SUBJECT CODE: AEE 107					
SUBJECT: FINANCIAL MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and theories of Financial Management in the Hospitality industry. This will also help the students in analyzing the financial statements and capital budgeting.

		Hours	Marks
Chapter 1	Financial Management	04	04
1.1	Definition, Scope and objectives-Branched of accounting		
1.2	Historical, cost, Financial control, Financial Management and Revenue.		
Chapter 2	Ratio Analysis	12	08
2.1	Meaning, Importance and limitations		
2.2	Practical problems on computation of Liquidity Ratios- Current and Quick Ratio. Activity /Turnover Ratios-Stock Turnover Ratio, Debtors Turnover Ratio, Creditors Turnover Ratio, Long-term Solvency Ratios-Proprietary Ratio, Debt Equity Ratio. Profitability Ratios-Gross Profit, Net Profit,		
2.3	Operating ratio, Return on Capital employed, Return on Proprietor's Fund Ratio. Practical problems on preparation of Balance sheet from given ratios.		
Chapter 3	Funds Flow and Cash Flow Statement	12	10
3.1	Nature, Importance and Uses		
3.2	Differences between Funds Flow and Cash Flow Statement		
3.3	Practical problems on preparation of Funds Flow considering following adjustment only: Depreciation on fixed assets, Dividend- Interim and Final and Taxation		

Chapter 4	Working Capital Management	08	06
4.1	Definition and Meaning		
4.2	Factors affecting working capital		
4.3	Working capital cycle		
4.4	Practical problems on determination of working capital		
Chapter 5	Capital Budgeting	10	06
5.1	Meaning and Importance		
5.2	Practical problems on capital budgeting : Payback period, Accounting Rate of return, Net Present Value		
Chapter 6	Budgets, Budgeting and Budgetary Control	08	08
6.1	Definition and Characteristics of Budgets		
6.2	Meaning and Advantages of Budgetary Controls		
6.3	Practical problems on Cash Budget, Flexible Budget		
Chapter 7	Introduction to Pricing and Value added Tax.	10	08
7.1	Importance of Pricing.		
7.2	Methods of Pricing- Cost plus, Rate of Return, Absorption Contribution and Backward.		
7.3	History, Meaning and Advantages of Value Added Tax in Hotel and Catering establishments		

The students may be assigned exercises related to Hotel Accounting to get hands on experience. They may be given assignments to collect various Formats used in the Hotel Industry and to present same in the class.

SUBJECT CODE:DSE 201A				
SUBJECT: REGIONAL CUISINES OF INDIA (PRACTICAL)				
Teaching Scheme/Week	Examination Scheme			
Practical Hours	IA Marks	EA Marks	Total Marks	Credits
08	40	60	100	04

Minimum 20 Practicals including, Indian regional menus to be conducted.

The practicals should comprise dishes from the following states / cuisine:

- | | |
|------------------------|---------------|
| 1) Goan | 8) Rajasthani |
| 2) Maharashtra | 9) Tamilnadu |
| 3) Gujarati / Parsi | 10) Kashmiri |
| 4) Karnataka | 11) Lucknowi |
| 5) Bengali | 12) Kerela |
| 6) Punjabi | 13) Sindh |
| 7) Andhra / Hyderabadi | |

Students are required to maintain a journal to record the various practicals attended and the teacher must record the performance evaluation of the same on a day to day basis.

SUBJECT CODE:DSE 102					
SUBJECT: ALCOHOLIC BEVERAGES II (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	--	100	04

Rationale

To impart comprehensive knowledge of various spirits, liqueurs and cocktails.

		Hours	Marks
Chapter 1	Spirits	08	06
1.1	Introduction to Spirits		
1.2	Fermentation and Distillation Process		
1.3	Pot Still and Patent still.		
1.4	Various methods of Measuring Alcoholic Strength		
Chapter 2	Whisky	10	08
2.1	Ingredients used in making of Whisky.		
2.2	Manufacturing process of Whisky.		
2.3	Types of Whisky-Scotch and Irish Whisky		
2.4	Americal and Canadian Whisky		
2.5	International and IMFL Brand		
Chapter 3	Brandy	08	08
3.1	Ingredients used in making of Brandy		
3.2	Manufacturing process of Brandy		
3.3	Types of Brandy - Cognac and Armagnac		
3.4	Labeling Terminology		
3.5	Fruit and other Brandies.		
3.6	International and IMFL Brands.		
Chapter 4	Rum	06	06
4.1	Ingredients used in making of Rum		
4.2	Manufacturing process of Rum		
4.3	Tyype of Rum-White, dark and golden		
4.4	International and IMFL Brands		
Chapter 5	Gin	06	06
5.1	Ingredients used in making of Gin.		
5.2	Manufacturing process of Gin		
5.3	Types of Gin.		
5.4	International and IMFL Brands		
Chapter 6	Vodka	04	04
6.1	Ingredients used in making of Vodka		

6.2	Manufacturing process of Vodka.		
6.3	Types of Vodka		
6.4	International and IMFL Brands.		
Chapter 7	Tequila	06	04
7.1	Ingredients used in making of Tequila.		
7.2	Manufacturing process of Tequila		
7.3	Types of tequila		
7.4	Brands of Tequila		
Chapter 8	Other Alcoholic Beverages	04	06
8.1	Aquavit		
8.2	Schnapps		
8.3	Pastis		
8.4	Feni		
8.5	Arrack		
Chapter 9	Liqueurs	06	06
9.1	Definition and types of liqueurs		
9.2	Production methods		
9.3	Service of Liqueurs		
Chapter 10	Cocktails	06	06
10.1	Introduction and history of cocktails		
10.2	Methods of making cocktails and rules for making cocktails		
10.3	Equipments glassware, and garnishes used in making of cocktails, Cocktail recipe		

Glossary of Terms

Hors d'age	Marc	Grappa
Pisco	Ouzo	Peats Reek

SUBJECT: ALCOHOLIC BEVERAGES II (PRACTICAL)					
Teaching Scheme/Week	Examination Scheme				
Practical Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
08	40	60	--	100	04

1. Preparing a Beverage list
2. Preparing an Beverage order ticket
3. Service of Whisky
4. Service of Brandy
5. Service of Rum
6. Service of Gin
7. Service of Vodka
8. Service of Tequila
9. Service of other alcoholic beverages
10. Service of Liqueurs
11. Types of Cocktails
12. Methods of making cocktails-Buildup, Stirred
13. Methods of making cocktails-Layered, Floating
14. Menu planning and Service of food and alcoholic beverages
15. Preparing of Beverage List for a Specialty bar
16. Maintenance of statutory books

Field Visit

Students should be taken for visit to Winery and report must be submitted individually.
 Work Shop -A cocktail and mocktail workshop to be conducted and the report must be submitted individually.

Minimum of 02 assignments to be submitted by students by the end of these mester based on following topics.

- 1 Types of mocktail with recipes, glassware, method and presentation
- 2 Collecting themed bar menu cards (Minimum 5)
- 3 Price list of Spirits from 5 outlets

SUBJECT CODE:DSE 203					
SUBJECT: TRENDS IN HOUSEKEEPING (THEORY)					
Teaching Scheme/Week	Examination Scheme				
TheoryHours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	--	100	04

Rationale: The subject intends to familiarize the students with the current trends in housekeeping

		Hours	Marks
Chapter 1	Chaning trends in Housekeeping	06	06
1.1	Introduction		
1.2	Latest trends in Housekeeping with respect to Erogonomics Green housekeeping-Ecotel Facility management Technology		
Chapter 2	Erogonomics	08	08
2.1	Importance of Erogonomics in housekeeping		
2.2	Time and motion study in housekeeping routine		
2.3	Erogonomics design of furniture and fixtures		
2.4	Erogonomics design of equipments		
2.5	Erogonomics in housekeeping process		
Chapter 3	Introduction to Green housekeeping	08	06
3.1	Introduction to green housekeeping		
3.2	Ecotels		
3.3	Ecotel certification – 5 globes		
3.4	Role of housekeeping in environmental control		
3.5	Case study		
Chapter 4	Energy Conservation	08	06
4.1	Importance of Energy Conservation		
4.2	Energy Monitoring and Performance		
4.3	Guidelines for energy conservation		
4.4	Use of energy conserving products Educating and Sensitizing housekeeping staff regarding Importance of energy conservation		
Chapter 5	Water Conservation	08	06
5.1	Importance of Water Conservation		
5.2	General guidelines for water conservation		
5.3	Rainwater Harvesting		
5.4	Educating and Sensitizing housekeeping staff and guest		

Chapter 6	Waster Management	06	06
6.1	Importance of Waste Management		
6.2	3-R principle: Reduce, Reuse, Recycle		
6.3	Types of waste in hotels		
6.4	Waste disposal and control		
6.5	Sewage treatment plant in hotels		
6.6	Vermicomposting		
Chapter 7	Recent trends in Material planning for House Keeping	08	08
7.1	Bedding – Mattress, bed sheets, pillow menus Bedspreads, comforted and dust ruffle		
7.2	Bath Linen		
7.3	Table linen		
7.4	Uniforms

SUBJECT CODE:DSE 203A**SUBJECT: TRENDS IN HOUSEKEEPING (PRACTICAL)**

Teaching Scheme/Week	Examination Scheme				
Practical Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
08	40	60	--	100	04

1. Preparation of Time and motion study and practice in Housekeeping routines.
2. Preparation of sample format of ergonomic risk factor analysis for housekeeping staff.
3. Preparation of guidelines for energy conservation in housekeeping department.
4. Preparation of lighting system design for guest rooms and public areas.
5. Preparation of safety and security systems for guest rooms and public areas.
6. Calculation of energy cost in public areas for energy management.
7. Calculation of energy cost in public areas for energy management.
8. Preparation of checklist for eco friendly housekeeping in hotels.
9. Practice with computer & PMS handling related to Housekeeping.
10. Preparation of Housekeeping staff requirement and staff scheduling using housekeeping software.
11. Preparation of daily housekeeping schedules using housekeeping software.
12. Preparation of housekeeping history and staff performance reports using housekeeping software.
13. Planning of a Facility management project for various sectors.
14. Preparation of a feasibility study for outsourcing housekeeping jobs.
15. Designing of hotel staff uniforms.
16. Various reports generated for MIS in housekeeping.

Assignments :

1. Methods of pest control and chemicals used in hotels.
2. Project report on biogas and sewage treatment plants for waste disposal.
3. Project report on Vermicomposting.
4. Project report on Rain water harvesting.
5. Project report on Ecotel.

Visits :

1. Visit to an Ecotel.
2. Visit to a biogas and sewage treatment plant.
3. Visit to a Vermicomposting plant.
4. Visit to a Rain water harvesting system.
5. Visit to a facility management agency.

SUBJECT CODE: SEC 103					
SUBJECT: TOURISM OPERATIONS (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	--	100	03

Rationale

To inculcate a sense of importance and establish a link between the tourism industry and the hotel industry and to highlight tourism industry as an alternative career path.

		Hours	Marks
Chapter 1	The Tourism Phenomenon	04	03
1.1	Definition - Tourism, Tour; Tourist; Visitor; Excursionist; Domestic; International; Inbound; Outbound; Destination.		
1.2	Growth of Tourism / Evolution / History of Tourism.		
1.3	Present status of tourism in India		
Chapter 2	Constituents of Tourism Industry	04	05
2.1	Primary Constituents		
2.2	Secondary Constituents		
2.3	The 5 A's of Tourism - Attractions, Accessibility, Accommodation, Amenities, Activities.		
2.4	Career Opportunities for tourism professionals.		
Chapter 3	Infrastructure of Tourism	04	06
3.1	Role of Transport in Tourism		
3.2	Modes of Transport: Road, Rail, Air, Sea.		
3.3	Types of Accommodation- Main Alternate & Supplementary accommodation		
Chapter 4	Types of Tourism	04	06
4.1	Types of Tourism- Holiday, Social, Cultural, MICE, Religious, VFR (Visiting Friends and Relatives) Sports, Political, Health, Senior Citizen, Sustainable Tourism		
4.2	Alternative Tourism : Eco Tourism, Agro Rural Tourism		
Chapter 5	The Impact of Tourism	04	06
5.1	Economic Impact - Employment generation, Foreign Exchange earnings		
5.2			

5.3	Multiplier Effect, Leakage, Infrastructure Development		
5.4	Social, Cultural and Political Impact – Standard of living, Passport to Peace, International Understanding, Social Integration, Regional growth, National Integration		
	Environmental Impact – Tourism Pollution and Control, Wildlife and Bird Sanctuaries and their protection for tourist industry		
Chapter 6	The Tourism Organisations – Objectives, Role and Functions	06	06
6.1	Government organizations: DOT, ITDC, MTDC, ASI, TFCI.		
6.2	Domestic organisations: TAAI, FHRAI, IATO

SUBJECT CODE: DSCP					
SUBJECT: PROJECT WORK					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
12	40	60	--	100	06

The students have to utilize the hours allotted for data collection, data analysis & preparing a detail project report at the end of the semester to record the process of the project and the findings thereon. The report should be in spiral bound format for the internal examination and hard bound with golden embossing for external examination.

The format of the project report is as detailed below

- Cover page
- Title Page
- Certificate
- Acknowledgements
- Index
- Introduction
- Aims & Objectives
- Theoretical framework of the topic (Background of the Topic, History, Contents from Secondary Data, Explanation of Terms)
- Research Methodology (Data collection method, Sampling method)
- Data Analysis & Data Interpretation (Graphical presentation of collected data)
- Suggestions / Recommendations
- Conclusions & Limitations
- Bibliography
- Appendix (Any relevant material to support the project)

Students have to present the process and findings of the project report to the panel examiners with the help of a Power Point presentation not exceeding 15 minutes. The examiners would evaluate the project based on the parameters of quality of the study, Project Report, presentation by the student & viva.

Note

The Project Report should be market research and field work oriented and preferably related to the Elective Course (Food Production / Food & Beverage Service / Accommodation Department).

SUBJECT CODE:AEC 103					
SUBJECT: HOSPITALITY MARKETING (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	--	100	03

Rationale

This subject intends to promote and understanding of core concepts of marketing, current marketing environment, challenges in marketing of services and the marketing strategies to be adopted.

		Hours	Marks
Chapter 1	Introduction to Marketting	04	04
1.1	Defining Marketing

LIST OF SKILL ENHANCING ELECTIVE COURSES

SEE	101	FIRST AID
SEE	102	HOTEL MAINTENANCE
SEE	103	RETAIL MANAGEMENT
SEE	104	EVENT MANAGEMENT
SEE	105	ENTREPRENEURSHIP DEVELOPMENT
SEE	106	FACILITY PLANNING
SEE	107	SKILL ENHANCEMENT FOR MEDIA AND JOURNALISM IN HOSPITALITY

SUBJECT CODE: SEE 101					
SUBJECT: FIRST AID					
Teaching Scheme/Week		Examination Scheme			
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

To introduce the students to first aid practices and managing emergency incidents until professional help is provided.

		Hours	Marks
Chapter 1	Introduction to First Aid	10	10
1.1	First Aid		
1.2	First aid priorities		
1.3	How to prepare yourself during an emergency		
1.4	Looking after yourself: Personal safety and protection from infections		
Chapter 2	Accidents and Injuries	12	10
2.1	Dealing with a casualty		
2.2	Requesting help		
2.3	Use of medication		
2.4	Assessing a casualty		
2.5	Method of assesment		
2.6	Head to toe examination		
2.7	Monitoring vital sign		

Chapter 3	Managing an incident	14	10
3.1	Removing clothing and headgear		
3.2	First aid materials: Dressing, Bandage, Slings.		
3.3	Action at an emergency		
3.4	Traffic incidents		
3.5	Fires		
3.6	Electrical incidents		
3.7	Water incidents		
Chapter 4	Emergency first aid for	14	10
4.1	Wounds and bleeding		
4.2	Shock		
4.3	Head injury		
4.4.	Spinal injury		
4.5	Broken bones		
4.6	Burns and scalds		
4.7	Poisoning		
4.8	Bites and Stings		
Chapter 5	Life saving procedures	14	10
5.1	Resuscitation		
5.2	Choking		
5.3	Hanging and Strangulation		
5.4	Drowning		
5.5	Inhalation of fumes		
5.6	Asthma		

REFERENCE BOOKS

Sr. No.	Name of the Book	Author	Publisher
1	First aid manual	Written and endorsed by St John Ambulance	St Andrew's First Aid and the British Red Cross, DK
2	First aid Manual	St. John Ambulance (Author)	Dorling Kindersley Publishers Ltd 7 th Revised edition edition (1 May 1997)

SUBJECT CODE:SEE 102					
SUBJECT: HOTEL MAINTENANCE					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

The subject will provide information regarding the basic services and different types of engineering and maintenance systems in hotel industry. This subject will help students to understand various aspects and importance of the Engineering department in a hotel. At the end of the course students will be thorough with various machines and their working, fuels, electricity, safety and security, water distribution systems and energy conservation in hotel.

		Hours	Marks
Chapter 1	Maintenance & Replacement Policy	07	05
1.1	Definition of Maintenance		
1.2	Importance of Maintenance department in the hotel industry		
1.3	Organization chart of Maintenance department in 3/4/5 star hotels		
1.4	Duties and responsibilities of Chief Engineer of a hotel		
1.5	Types on maintenance and their advantages and disadvantages: Breakdown/Corrective, Preventive Predictive.		
1.6	Contract Maintenance: Need of contract maintenance. Types: Lumpsum, Unit Rate, Cost plus, Upper limit contract.		
1.7	Maintenance chart for Swimming Pool: Daily basis and Quarterly basis Kitchen: Daily basis and Quarterly basis		
1.8	Replacement of equipments: Reasons for replacement, economic replacement of equipments.		
Chapter 2	Refrigeration	08	08
2.1	Definitions: Heat, Temperature, Sensible Heat, Latent Heat, Relative Humidity, Zero Law of Thermodynamics, First Law of Thermodynamics.		
2.2	Methods of Heat Transfers: Conduction, Convection and Radiation.		
2.3			

	Refrigeration: Principles of refrigeration, Unit of refrigeration Refrigerants: Properties and types Block diagram of working of Vapour Compression Refrigeration System Domestic Refrigerator: Block diagram and working, Maintenance, Defrosting: Need and Methods Walk in Freezer/ Cold Storage: Block Diagram and working		
Chapter 3	Air Conditioning	06	06
3.1	Types of AC: Unitary AC, Window AC, Split AC, Block Diagram and working		
3.2	Factors affecting load on AC		
3.3	Factors affecting AC Comfort		
Chapter 4	Fuels	04	04
4.1	Types of Fuels		
4.2	Comparison of various fuels: Solid, Liquid and Gaseous		
4.3	Fuels used in hotel industry		
Chapter 5	Electricity	07	06
5.1	Types of Electricity supply: Single and Three Phase		
5.2	Types of Fuse: Re-wireable, Cartridge, MCB		
5.3	Importance and methods of Earthing		
5.4	Calculation of Electricity Bill		
Chapter 6	Water systems	08	07
6.1	Sources of water		
6.2	Adverse effects of hard water		
6.3	Methods of purification and Softening: Ion exchange, Limesoda		
6.4	Water distribution system: Up Feed, Down Feed		
6.5	Traps: Water Closets and Flushing Systems, Types, Diagram and functions		
6.6	Various plumbing fixtures		
Chapter 7	Energy and its Conservation	06	04

7.1	Various energy sources: Conventional and Non Conventional(Examples, Advantages and disadvantages)		
7.2	Need for for energy conservation		
7.3	Simple methods of energyconservations in Kitchen and Guest rooms.		
7.4	Use of Solar energy in a hotel.		
Chapter 8	Fire and Its Prevention	06	04
8.1	Fire Traingle		
8.2	Types of Fires: A,B,C, D, E and F		
8.3	Theory of Extinguishment: Staravation, Cooling and Smothering		
8.4	Various types of fire extinguishers		
8.5	Smoke Detectors and Fire Alarm system		
Chapter 9	Safety and Security in Hotel	06	03
9.1	Causes of Accidents		
9.2	Prevention/Control of Accidents		
9.3	Safety Issues in Hotel:Guest key Control, kitchen Safety, Slip and falls		
Chapter 10	Pollution and Control	06	03
10.1	Air Pollution:Causes and Effects		
10.2	Water Pollution: Causes and Effects		
10.3	Noise pollution: Causes and Effects		
10.4	Waste Management		

Note- Field visit to be arranged for students to engineering department of a five star hotel.working of AC plants and other aspects and systems of maintenance department to be shown to students. A report of the same must be submitted by students individually.

Assignments

1. Eco-friendly Refrigerant.
2. Centralized Air Conditioning in detail with block diagram
3. Working of Air filter, Humidifier and De-humidifier in AC
4. Water purification methods
5. Various lighting systems used in a hotel
6. Procedure to be followed in case of Fire alarm in hotel
7. Make a chart for various fire extinguishers with colour code and the type of fire it extinguishes.
8. Waste Disposal Methods– Incineration and Land Fill

SUBJECT CODE: SEE 103					
SUBJECT: RETAIL MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and application of retail management techniques.

		Hours	Marks
Chapter 1	Retailing	04	04
1.1	Concept, importance, Functions		
1.2	Retailing as a career.		
Chapter 2	Retail formats	08	06
2.1	Store and non store		
2.2	Retailing		
2.3	Franchising		
2.4	Unconventional channels		
2.5	Retail expansion- need for foreign direct investment in Indian retail		
Chapter 3	Indian V/s Global Scenario in Retail	08	06
3.1	Evolution of retail in India		
3.2	Traditional business models in Indian retail		
3.3	Drivers of retail change in India		
3.4	Key sectors in Indian Retail		
3.5	International Retailing-factors contributing to its growth		
Chapter 4	The Retail Consumer	06	06
4.1	Need for understanding consumer buying behavior		
4.2	Customer decision making process		
4.3	Factors influencing the retail shopper		
Chapter 5	Retail Strategy	06	06
5.1	Importance of strategy from a retail perspective		
5.2	The strategic planning process		

Chapter 6	Retail location	06	06
6.1	Factors affecting location decision		
6.2	Site selection		
6.3	Store design		
Chapter 7	Basic of Retail Merchandising	08	06
7.1	Concept, Importance, Functions		
7.2	Functions and methods of buying for different types of organizations, introduction to Private label, Brands- concepts and needs		
Chapter 8	Retail Pricing	06	06
8.1	Factors affecting retail pricing decisions		
8.2	Pricing Strategies		
Chapter 9	Retail Store Operations	06	06
9.1	Concept		
9.2	Functional areas of retail operations		
9.3	Floor Space Management		
9.4	Managing store inventories and display		
Chapter 10	The Legal and Ethical aspects of retail business	06	04
10.1	Acts pertaining to the retail sector		
10.2	Taxation and its impact on retailing

SUBJECT CODE: SEE 104					
SUBJECT: EVENT MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and theories of application of management techniques inorganising of events.

		Hours	Marks
Chapter 1	Event Management	08	08
1.1	Introduction-Event Management		
1.2	Size of Event		
1.3	Types of Events-Cultural, Festivals, Religious, Business etc.		
1.4	Case study of some events		
Chapter 2	Planning an Event	08	08
2.1	Principles and steps in Planning		
2.2	Consultation with clients:Setting objectives, confirmation of date, list of guests, theme finalizations, event agenda		
Chapter 3	Concepts and Design	10	05
3.1	Developing the concept		
3.2	Analyzing the concept		
3.3	Designing the event		
3.4	Logistics of the concept		
3.5	Feasibility		
Chapter 4	Legal Compliance	06	05
4.1	Relevant legislations		
Chapter 5	Activities in Event Management	12	10
5.1	Pre event activities		
5.2	During event activities		
5.3	Post event activities		
5.4	Managing event-Planning, staging, organization		
5.5	Financial considerations		
5.6	Marketing and Promtion		

Chapter 6	Planning Venues	08	05
6.1	Finding venue, requirement of space		
6.2	Creating request for proposal		
6.3	Site inspection and confirmation		
6.4	Pre event meeting		
Chapter 7	Marketing of a Event	08	05
7.1	Tools used for marketing: Advertising, Publicity, Sponsor and media.		
Chapter 8	Dealing with the Vendors	04	04
8.1	Types of vendors, choosing vendors		
8.2	Vendor contracts		

REFERENCE BOOKS

SUBJECT CODE: SEE 105					
SUBJECT: ENTREPRENEURSHIP DEVELOPMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale:

The subject aims to provide information regarding the various aspects pertaining to becoming a successful entrepreneur in the Hotel & Catering Industry.

		Hours	Marks
Chapter 1	Introduction to Entrepreneurship	10	08
1.1	Who is entrepreneurship?		
1.2	Definition of an Entrepreneur, Entrepreneurship and Intrapreneur Concept, Classification, Characteristics and skills of an Entrepreneur		
1.3	Skills of an Entrepreneur		
1.4	Qualities of an Entrepreneur		
1.5	Women Entrepreneurship		
Chapter 2	Introduction to Entrepreneurship	10	08
2.1	Entrepreneurship as a Career		
2.2	Role of an Entrepreneur and Economic development		
2.3	Various Entrepreneurs in India and Abroad		
2.4	Identifying the Opportunity (SWOT Analysis)		
Chapter 3	Market Assessment	10	08
3.1	Sources of Funding for a Business: Internal and External Funds, Personal Funds, Family and friends, Commercial banks and Financial institutions		
3.2	Procedure to get loan from various banks for business		
Chapter 4	Tools and Techniques of Ideation	12	10
4.1	Business plan- steps involved from concept to commissioning		
4.2	Project Report: Meaning and importance, components of a project report		
4.3	Project Appraisal: Meaning and definition, Technical, Economic feasibility and Cost- Benefit analysis		
4.4	Risktaking		

Chapter 5	Modern Trends in Entrepreneurship	10	08
5.1	E- Commerce		
5.2	Concept and Process		
5.3	Global Entrepreneur		
Chapter 6	Legal Acts prevailing in India	12	08
6.1	Various Acts applicable to business enterprises		
6.2	GST- Introduction

SUBJECT:FACILITY PLANNING (THEORY)

Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

To introduce students to the fundamentals of planning and design related to hotel operation areas.

		Hours	Marks
Chapter 1	Introduction to Planning and Designing	08	10
1.1	Principles of planning and designing		
1.2	Trends in catering		
1.3	Time and motion study		
Chapter 2	Building and Exterior Facilities	08	10
2.1	Roof, exterior walls, windows and doors		
2.2	Structural frame & foundation		
2.3	Elevators.		
2.4	Storm water drainage systems, utilities.		
2.5	Landscaping and grounds		
Chapter 3	Parking Areas	08	10
3.1	Parking lots		
3.2	Structural features		
3.3	Lay out considerations		
3.4	Maintenance		
3.5	Parking garages		
3.6	Accessibility requirement for parking areas		
3.7	Valet parking		
Chapter 4	Lodging Planning and design	16	10
4.1	Development Process		
4.2	Feasibility studies		
4.3	Space allocation programme		
4.4	Operational criteria		
4.5	Budget		
4.6	Preliminary schedule		
4.7	Site design		

4.8	Hotel design		
4.9	Guestrooms and suites		
4.10	Lobby		
4.11	Food and beverage outlets		
4.12	Function areas		
4.13	Recreational facilities		
4.14	Back of the house areas		
Chapter 5	Food Service Planning and Design	08	10
5.1	Concept development		
5.2	Feasibility		
5.3	Regulations		
5.4	Planning layout		
5.5	Receiving areas		
5.6	Storage areas		
5.7	Kitchen		
5.8	Office space		
5.9	Sample blue print

Assignments

Assignments based on all the above topics to be done.

SUBJECT CODE:SEE107					
SUBJECT:SKILL ENHANCEMENT FOR MEDIA & JOURNALISM IN HOSPITALITY					
Teaching Scheme/Week	Examination Scheme				
Practical Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
08	--	--	50	50	04

Rationale

The subject in to develop creative writing skills among hospitality students

The students are expected to utilize the allotted hours in the following activities:

- Book reading and discussion (Atleast 2)
- Exploring journals/Literature in the digital /electronic media (Atleast 4)
- Writing a travelogue (Atleast2)
- Writing a review of a book or a restaurant (Atleast 4)
- Creating promotional material such as posters, pamphlets etc.for the various curricular as well as extra curricular events of the institute. (Atleast4)

SEMESTER VII

SUBJECT CODE:DSE 201					
SUBJECT: ADVANCED FOOD PRODUCTION & KITCHEN MANAGEMENT (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	--	100	04

Rationale

The subject intends to provide indepth insight into international cuisine and develop an advanced understanding of technical as well as managerial skills for culinary professionals.

		Hours	Marks
Chapter 1	Production Management	02	04
1.1	Introduction to production management		
1.2	Kitchen organization		
1.3	Allocation of work, Job Description, Duty Roster		
1.4	Production Planning & Scheduling		
1.5	Production Quality & Quantity Control		
1.6	Forecasting and Budgeting		
Chapter 2	Nouvelle Cuisine	02	04
2.1	Evolution of Nouvelle cuisine		
2.2	Principles of Nouvelle cuisine		
Chapter 3	Food Presentations & Garnishes	02	04
3.1	Importance of food presentation		
3.2	Skills and techniques in food presentation		
3.3	Importance of garnishes		
3.4	Classical garnishes		
Chapter 4	International Cookery	20	20
4.1	Influence of historical background, geographical location on the staple food and cuisines of the following countries/ regions: France Japan Italy China Germany Tex Mex Spain Mediterranean Great Britan South East Asia		
Chapter 5	Meringues	02	02
5.1	Making of meringues		
5.2	Factors affecting stability of meringues Cooking of meringues Types and uses of meringue		

Chapter 6	Sugar	02	04
6.1	Tools required for sugar work		
6.2	Types of sugar as decorative work : Spun Sugar, Pulled Sugar, Poured sugar and Blown Sugar		
Chapter 7	Chocolate	02	04
7.1	Manufacture		
7.2	Couverture		
7.3	Tempering		
7.4	Molding		
7.5	Chocolate Decorations		
Chapter 8	Icings & Toppings	04	04
8.1	Types of icings – Flat, Butter cream, Royal, Marzipan, Nougatine, Pastillage, Ganache		
Chapter 9	Recipe Balancing	02	04
9.1	Importance		
9.2	Principles of recipe balancing in cake making and bakery		
Chapter 10	Pastries	05	06
10.1	Types: Short Crust, Flaky, Puff, Danish, Choux and Filo		
10.2	Faults and their causes		
Chapter 11	New Concepts in Culinary	05	04
11.1	Understanding basics of Molecular Gastronomy		
11.2	Organic foods		
11.3	Vegan cuisine

SUBJECT CODE:DSE 201 (A)				
SUBJECT: ADVANCED FOOD PRODUCTION & KITCHEN MANAGEMENT (PRACTICAL)				
Teaching Scheme/Week	Examination Scheme			
Practical Hours	IA Marks	EA Marks	Total Marks	Credits
08	40	60	100	04

Minimum 24 International menus to be conducted.

The menus should cover the following regions of the world :

1. Tex-Mex
2. France
3. Italy
4. China
5. Spain
6. Germany
7. Great Britain
8. Japan
9. Mediterranean region
10. South East Asia

Students are required to maintain a journal to record the various practicals attended and the teacher must record the performance evaluation of the same on a day to day basis.

SUBJECT CODE:DSE 202					
SUBJECT: FOOD & BEVERAGE OPERATIONS & MANAGEMENT (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	--	100	04

Rationale

To impart comprehensive knowledge about bar operation and management skills.

		Hours	Marks
Chapter 1	Introduction to Bar & Bar Beverages	12	12
1.1	Alcoholic Beverages		
1.2	Non Alcoholic Beverages		
1.3	Aerated Beverages, Bar Syrups, Squashes and Cordials		
1.4	Premixed Drinks Mineral, Spring water, Flavoured and Packaged waters.		
1.5	Aperitifs, Liqueurs and digestifs		
1.6	Types of Bars		
1.7	Role of Various bar personnel in the bar. Bar equipment's and their uses (Large and Small equipment's)		
Chapter 2	Planning of Bar	08	06
2.1	Layout of a bar		
2.2	Factors to be considered while planning a bar		
2.3	Safety and hygiene consideration		
2.4	Seating arrangements of various bars.		
Chapter 3	Bar Controls & Statutory Requirements	08	06
3.1	Purchasing, Receiving and storing of beverages		
3.2	Inventory/Stock Control methods.		
3.3	Calculation of Beverage cost Daily, Weekly Bar Reports.		
3.4	Sales Summary and Sales Analysis, Sales Mix.		
Chapter 4	Mixology	10	10
4.1	Introduction to the science of Mixology.		
4.2	Cocktail making		
4.3	Glassware and garnishes.		
4.4	Making of Traditional and Innovative cocktails.		
4.5	Flair bartending		
Chapter 5	Function and Event Catering	08	10

5.1	Definition of function catering and types of functions		
5.2	Organizational structure of Banquet department, duties and responsibilities of banquet		
5.3	Function catering administrative procedures		
5.4	Preparation of function prospectus.		
5.5	Menu planning for various types of functions		
5.6	Seating arrangement for various functions, Table plan and space considerations.		
5.7	Off premises / out-door catering		
Chapter 6	Gueridon Service	08	06
6.1	Origin and definition.		
6.2	Types of trolleys.		
6.3	Special equipments used in gueridon service care and maintenance.		
6.4	Service Procedure.		
6.5	Service of classical dishes		
Chapter 7	Buffets	04	04
7.1	Definition		
7.2	Types of Buffets		
7.3	Equipments and set up of buffets.		
Chapter 8	Menu Engineering	03	03
8.1	Concept and application.		
8.2	SWOT analysis of various food and beverage outlets.		
Chapter 9	Customer Relationship	03	03
9.1	Handling Customer Complaints.		
9.2	Customer Satisfaction		

Glossary of Terms

Semester VIII

SUBJECT CODE: DSC					
SUBJECT: INDUSTRIAL EXPOSURE & REPORT-II					
Teaching Scheme/Week	Examination Scheme				
Training Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
54	--	120	80	200	21

In the Eight semester the student shall undertake industrial training for a period of 11 weeks, reputed hotel, and restaurant or hospitality organization.

The institute shall assist in the placement of students for training in various hotels. The student can make self arrangement to train in any hotel of his choice. The student will have to bear the necessary expenses involved for the same.

At the end of the industrial training the student shall submit Training Report along with the logbook maintained on a daily basis during the period of training and the performance appraisal from each department.

The training report is to be prepared by the student in two copies and to be submitted to the Training & Placement Officer within the stipulated time for assessment.

The report will be assessed by the internal examiner and only on the basis of a certificate of the examiner concerned that the training has been satisfactorily completed would the student be allowed to appear for the external assessment conducted by a panel of examiners comprising of one external examiner (the external would include preferably one from the hotel industry of the level of Head of the Department and above) and one internal examiner. The Continuous Assessment marks will be awarded based on the performance appraisals filled by the hotel managers.

The student is required to practice the discipline & norms laid down by the institute and also follow the rules and regulations of the hotel in which he/she is undergoing training.

Any adverse remark from the hotel will call for stringent action.

Faculty of Management
Syllabus for Bachelor in Science (Hospitality & Hotel Administration)
B.Sc (H&HA)

Bharati Vidyapeeth, the parent body of Bharati Vidyapeeth University was established on 10th May 1964, by Dr. Patangrao Kadam with the objective of bringing about intellectual awakening and all side development of the people of our country through dynamic education.

Bharati Vidyapeeth is now a leading educational institution in the country, which has created a history by establishing, within a short span of 52 years or so, 180 educational institutions imparting education from the preprimary stage to post graduate stage. Our college and institutions of higher education impart education in different disciplines including Medicine, Dentistry, Ayurved, Homeopathy, Nursing, Arts, Science, Commerce, Engineering, Pharmacy, Management, Social Sciences, Law, Environmental Science, Hotel Management and Catering Technology, Architecture, Physical Education, Journalism, Photography, Computer Science and Information Technology, Biotechnology & Agriculture.

These educational institutions which have achieved acclaimed academic excellence also cater to the educational needs of thousands of students coming from various states and abroad. Our teaching faculty includes highly qualified, experienced, dedicated and student caring teachers. These educational institutions are located at various places viz. Pune, Navi Mumbai, Kolhapur, Solapur, Sangli, Karad, Panchgani, Jawahar and New Delhi. This spectacular success achieved by Bharati Vidyapeeth is mainly a creation of unusual foresight, exceptionally dynamic leadership and able guidance of the founder of the Vidyapeeth, Dr. Patangrao Kadam. It has been our constant endeavor to impart high quality education and training to our students and so, no wonder that our institutions have been nationally known for their academic excellence. In recognition of the academic merit achieved by these institutions and their potential for development which they have, the Department of Human Resource Development, Government of India and the University Grants Commission of India have accorded the status of a deemed to be university to Bharati Vidyapeeth with its twenty nine constituent units.

Besides these 180 educational institutions, Bharati Vidyapeeth has also been running a Co-operative Bank, Co-operative Consumer Stores, Co-operative Poultry, Co-operative Sugar Factory, Charitable Hospitals and Medical Research Centre and the like.

BHARATI VIDYAPEETH DEEMED UNIVERSITY, PUNE

Bharati Vidyapeeth, the parent organization of this University is one of the largest educational organizations in the country. It has 171 educational units under its umbrella including 67 Colleges and institutes of conventional and professional disciplines.

The Department of Human Resource Development, Government of India on the recommendations of the University Grants Commission accorded the status of "Deemed to be University" initially to a cluster of 12 units of Bharati Vidyapeeth.

Subsequently, 17 additional colleges/institutes were brought within the ambit of Bharati Vidyapeeth Deemed University vide various notifications of the Government of India.

Bharati Vidyapeeth Deemed University commenced its functioning on 26th April, 1996.

BHARATI VIDYAPEETH (DEEMED TO BE UNIVERSITY)
INSTITUTE OF HOTEL MANAGEMENT AND CATERING TECHNOLOGY
Pune

A Great Choice:

BVDUIHMCT is an institute dedicated to providing quality professional hospitality education. We teach our students the knowledge & specific skills necessary to live successful and to grow into positions of influence & leadership in their chosen profession.

BVIHMCT has been engaged in preparing students to make successful careers for the last 27 years, along the way, we have developed our own way of doing things. Things that our students like, and things that the employer's like & appreciate too.

Our Vision: Our vision is "To make education affordable and accessible to masses".

Our Mission: As a part of Bharati Vidyapeeth, we contribute in our own way to the vision of our founder, Dr. Patangrao Kadam—"Social transformation through dynamic education", by nurturing the spirit of professional education as a source and a system to enhance equality of life in society.

Our Goal: To ensure professional approach to teaching within an excellent environment for students to gain an international awareness of the industry through effective communication techniques.

Our Objectives:

- To offer students the opportunity to develop their practical, management, and communication abilities.
- To provide each individual student with the training know how for a successful career in the highly competitive industry.
- To develop the personality of a student as required by the hospitality industry.
- To make students worthy citizens of the nation.

Increasingly selective hotels target BVDUIHMCT students not only for their achievements but also for their attitude which is vital in today's competitive world.

Realising the increasing importance of Hotel Management and Tourism as a profession and industry and also the need to make arrangements for Hotel Management and Tourism

Education Dr.Patangrao Kadam, the founder of Bharati Vidyapeeth with his unusual futuristic vision established the Institute of Hotel Management & Catering Technology in the year 1992.

Over the years, the institution has established itself as an ideal centre of Hotel Management education.

- a) **Name of the Programme:** Bachelor in Science (Hospitality & Hotel Administration)
- b) **Nature and Duration of Programme:** Full Time under Graduate Programme of 03 Years
(Approved by UGC)

II. Introduction:

Bachelor in Science (Hospitality & Hotel Administration) is a Full Time Three year programme offered by Bharati Vidyapeeth Deemed University and conducted at Bharati Vidyapeeth Deemed University-Institute of Hotel Management & Catering Technology, Pune.

The institute has experienced faculty members, excellent infrastructure, well stocked library and Computer Lab with LAN/Internet facility and other facilities to provide a conducive environment for learning and development.

III. Rationale for Syllabus Revision

The curriculum of the Three Years Bachelor in Science (Hospitality & Hotel Administration) is devised to incorporate changes in the hospitality and tourism industry and to keep abreast with the current trends in the hospitality industry.

In view of the dynamic nature of the hospitality industry and the evolving expectations of the stakeholders such as the students, parents and the society, need was felt for the revision of the syllabus and to introduce a Choice Based Credit system.

Over the period of two years the faculty members of the institute, adjunct faculty members and industry experts have been involved in the framing of the structure and course content.

The revised syllabus is designed to equip the students with the essential knowledge, skills and attitudinal orientation vital for successful careers in the hospitality industry.

Attempt has been made to incorporate the current trends such as Environmental studies, Safety and security, Application of Computers in Hotels, Skill

enhancement for Media and Journalism in Hospitality. Other relevant courses such as Retail Management, Event Management, Entrepreneurship Development, Hotel Economics, First aid have also been incorporated. The Curriculum provides students with an opportunity to select an area of specialization among the Discipline Specific electives.

IV. Objectives and Frame work of the curriculum of B.Sc (H&HA) programme

1. The basic objectives of the B.Sc(H&HA) programme is to provide to the hospitality industry a steady stream of competent young men and women with the necessary knowledge, skills, values and attitudes to occupy key operational positions.
2. The course structure of the B.Sc (H&HA) programme is designed keeping in view with the objectives stated above. Consequently certain essential features of such model programmes structure would be:
 - a) To impart to the student latest and relevant theoretical and practical knowledge for deloping their competencies to work in the field of hospitality services.
 - b) To provide opportunities to the students within and outside the institute for for developing necessary operational skills necessary for the hospitality industry.
 - c) To develop the right kind of values and attitudes to function effectively in the hospitality industry.
3. The following considerations have been taken into account:
 - a) The knowledge inputs and oppourtunities for skill development have been offered in an evenly distributed and logically sequenced manner.
 - b) The design is simple and logical.
4. The relative importance of skill development and attitudional oreination in management education suggest that the instituons offering B.Sc (H&HA) programmes should have some freedom on course development in choosong methods of instuuctions and internal assesment ina broad frame worl of ojectives and cirriculum structure.
5. A weight age of 40 precent is given to Internal Assessment, consisting of tasks like classroom exercises, tests, seminars, presentations.quizzes, group tasks, self study assignments, class room discusiion etc.
6. The External Assessment (University Examination) has a weightage of 60 percent.

This full time Three Year programme in B.Sc (H&HA) has 6 semesters. Each semester has a total of 20 academic weeks of which 16 weeks's comprise instructional weeks.

V. Eligibility for Admission

Admission to the B.Sc (H&HA)programme is open to any candidate having passed the H.S.C.(Class XII) examination or its equivalent in academic streams of Science, Arts, Commerce or vocation from any recognized board.

Candidates who have taken admission to Four Years BHMCT and would like to change over to B.Sc(H&HA) after first year of BHMCT can do so subject to availability of seats and provided the candidate has passed all the subjects in First Year of BHMCT.

Candidates who have appeared for class XII Re-examination may also apply for admission. Admission of such candidates will remain provisional until submission of the H.S.C (Class XII) Mark list and passing Certificate in original.

Subject to the above conditions, the final admission is based solely on:

- i) Merit in the Entrance Examination conducted by Bharat iVidyapeeth Deemed University
- ii) Submission of College Leaving/Transfer/ Migration Certificate and Anti Ragging Affidavit.

VI. Structure of the Programme

1. B.Sc (H & HA) is a three years programme divided into six semesters.
2. A student of B.Sc (H & HA) programme must take 150 credits to full fill the total number of credits required for the completion of the academic programme
3. The curriculum requires the students to spend at least 32 hours per semester for non credit course options such as Community Service, Sports Activities, Cultural Activities, General Interest Activities (during Semester I and Semester III B.Sc(H&HA) in order to encourage participation in extra curricular activities which is aimed at developing an all rounded personality of the students.

-
-
4. After imparting general understanding of the hotel operations during the first three semesters, the students are provided with an opportunity to select areas of specialization in the fourth semester from amongst the Discipline Specific Elective courses in the fourth semester and in detail in the subsequent semesters.
 5. Students have to choose and study at least any two courses from among the list of Ability Enhancing Elective Courses and at least any two courses from among the list of Skill Enhancing Elective Courses of their choice during the second and third year of their choice during the Second & Third Year of B.Sc (H&HA). Ability Enhancing Elective course and Skill Enhancing Elective course carries 04 credits each.
 6. The programme includes on the job learning in the form of Industrial Exposure for a period of 18 weeks in a classified hotel of 3 star category and above during the fourth semester with 31 credits.
 7. The medium of instruction and examination will be English.
 8. A student would be required to complete the course within 08 academic years from the date of admission.
 9. Outline of the Structure of B.Sc (H&HA) programme is given in Appendix I and Detailed Syllabus is given in Annexure II.

VII. Attendance

The students are required to have at least 75% attendance in each course. The students who fail to comply with the above requirement shall not be allowed to appear for the University examinations. Such students shall have to seek readmission in the same class of the succeeding year.

VIII. Choice Based Credit System

In the credit system. Each In the Credit system, each course is defined in terms of expected learning outcomes. The study load (The average number of clock hours spend per student is needed to achieve the Expected learning outcomes) determines the assigned credit value for each course. The total assigned credits of all courses are the assigned credit for the programme and this total constitutes the minimum credits required to be earned to complete the programme and obtain the degree from the university.

The minimum credits to complete Three Years B.Sc (H&HA) programme shall be 150 credits.

The courses in B.Sc (H&HA) programmes are of various kinds and include:

DSC Discipline Specific Compulsory Course

DSE Discipline Specific Elective Course

AEC Ability Enhancing Compulsory Course AEE Ability Enhancing Elective Course

SEC Skill Enhancing Compulsory Course

SEE Skill Enhancing Elective Course

LEC Language Enhancing Compulsory Course

LEE Language Enhancing Elective Course

NC Non Credit Course

In terms of a semester of 15/16 weeks, Every One hour session per week of theory / lecture = One Credit per semester. Every Two hours Session per week of practice = One Credit per semester.

Discipline Specific courses are about 70% of the minimum credits that constitute the programme.

Assessment

1. The final total assessment of the candidates shall be made in terms of an Internal Assessment (IA) and External Assessment (EA) with the exception of Ability Enhancing Elective courses and Skill Enhancing Elective Courses which will be made in terms of continuous Assessment only. The internal assessment will be conducted by the institute and external assessment will be conducted by the university. The external assessment will be based on the entire Syllabus. Internal Assessment (IA), Continuous Assessment (CA) and External Assessment (EA) will constitute as separate heads of passing and they will be shown separately in the transcripts.
2. For each course, the ratio of internal assessment in relation to the external assessment shall be 40:60.

-
-
3. Internal assessment (IA) will be calculated as follows: 50% based on Attendance, class participation, performance, journal work, classroom exercises, presentations, quizzes, group tasks, self-study assignments, classroom discussion etc, and 50% based on the performance in minimum two class tests during these mester.
 4. External Assessment (EA) will be based on the examinations conducted by the University at the end of each semester.
 5. Ability Enhancing Elective courses and Skill Enhancing Elective Courses will have only Continuous Assessment (CA) based on the performance in minimum two class tests and submission of minimum 04 assignments during the semester.
 6. Industrial Exposure will have Continuous Assessment and External Assessment.

Continuous Assessment will be based on the Performance Appraisal filled by the departmental heads of the various Operational Departments of the Hotel in which the student undergoes Industrial Exposure. The Training Report has to be prepared and submitted to the Principal within the stipulated time for assessment. The training report will be assessed by a panel of examiners appointed by the University, comprising of one internal examiner and one external examiner (preferably HOD of a classified hotel of 3 Star category and above or a Senior faculty from any recognized Institute of Hotel Management).

7. Non Credit courses will be assessed as 'Satisfactory' or 'Unsatisfactory' Performance based on completion of assigned activities/tasks and submission of the report thereof.
8. Students have to complete the Compulsory Core Module in Environmental Studies and will be assessed as 'Pass or 'Fail' based on their performance in the examination conducted by the University.
9. Re-assessment of Internal Marks: In case of those students who have secured less than 5 grade points in internal assessment the institute shall administer additional internal assessment test, the result of which shall be conveyed to the University as revised internal marks. In case the result of the internal test as above results in lower marks than the original figure of

marks shall prevail, in short the rule is that the higher of the two figures of the marks, shall be taken into consideration.

10. The Grades obtained in Internal Assessment/Continuous Assessment will be communicated to the University at the end of each semester. These marks will be considered for the declaration of the results.

Standard of passing

For all courses, both internal assessment and External assessment constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the students must obtain a minimum grade point of 5(40%marks) at External Assessment and also a minimum of grade point of 5(40%marks) for Internal Assessment.

In order to pass in courses which are assessed on the basis of continuous assessment the student must secure at least Pass Grade equivalent to 5 grade points.

A student who fails at External Assessment (EA) of a course has to reappear only for External assessment and clear the head of passing, Similarly a student who fails in internal Assessment/Continuous Assessment of a course has to appear only for Internal Assessment /Continuous Assessment as a backlog student and clear the head of passing to secure the Grade Point Average (GPA) required for passing. The performance of Internal assessment and continuous assessment will be combined to obtain Grade Point Average for the course the weights for performance at External Assessment and Internal Assessment shall be 60 % and 40 % respectively. Students can avail the verification/revaluation facility as per the prevailing policy, guidelines and norms of the University.

Grading System

10 point Grading System for grading in each head of passing shall be adopted as suggested By the Bharati Vidyapeeth University.

The grading system shall be as shown in the Table 1 below

Range of Marks (out of 100)	Grade Point	Grade
$80 \leq \text{Marks} \leq 100$	10	O
$70 \leq \text{Marks} < 80$	9	A+
$60 \leq \text{Marks} < 70$	8	A
$55 \leq \text{Marks} < 60$	7	B+

$50 \leq \text{Marks} < 55$	6	B
$40 \leq \text{Marks} < 50$	5	C
Marks < 40	0	D

The performance at Internal Assessment /Continuous Assessment will be combined to abating the Grade Point Average (GPA) and EA will be combined to obtain the Grade Point Average (GPA) for the course. The Weights for performance at External Assessment and Continuous Assessment shall be 60 % and 40% respectively.

The GP for a course shall be calculated by first finding the totalmarks for the course. The corresponding GP Average as per the table below shall be the GPA for the course.

The Formula to calculate the GradePoint (GP) -

Suppose that 'Max' is the maximum marks assigned for an examination or evaluation based on which Grade point will be computed. In order to determine the GP, set $x = \text{Max}/10$ (since we have adopted 10 Points system) The GP is calculated by the formul as shown in the Table2. After computing the grade point, the grade can be found from Table1.

Table2: Formula to calculate Grade Point in individual evaluations.

Range of Marks atthee valuation	Formula for the Grade Point
$8x \leq M \leq 10x$	10
$5.5x \leq M < 8x$	Truncate (M/x) +2
$4x \leq M < 5.5x$	Truncate (M/x) +1

Two kinds of performance indicators namely Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of the learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of a learner when he or she completes the programme is the final result of the learner.

The SGPA is calculated by the formula

$$\text{SGPA} = \frac{\sum C_k \times \text{GP}_k}{\sum C_k}$$

Where C_k is the credit value assigned to a course and GP_k is the GPA obtained by the learner in the course. In the above, the sum is taken over all courses that the learner has

undertaken for the study during the semester, including those in which he/she might have failed or those for which he/she remained absent.

Formula to compute equivalent percentage marks for specified CGPA.

$$\begin{aligned} & 10 \times \text{CGPA} - 10, \text{ if } 5.00 \leq \text{CGPA} \leq 6.00 \\ & 05 \times \text{CGPA} + 10, \text{ if } 6.00 \leq \text{CGPA} \leq 8.00 \\ \% \text{Marks}(\text{CGPA}) = & 10 \times \text{CGPA} - 20, \text{ if } 8.00 \leq \text{CGPA} \leq 9.00 \\ & 20 \times \text{CGPA} - 110, \text{ if } 9.00 \leq \text{CGPA} \leq 9.50 \\ & 40 \times \text{CGPA} - 300, \text{ if } 9.50 \leq \text{CGPA} \leq 10.00 \end{aligned}$$

ATKT Rules:

A student is allowed to keep term for semester III if he/she has a backlog of not more than eight courses (Theory as well as Practical) in Semester I and Semester II together

A student shall be allowed to keep term for semester V, if he/she has a backlog of not more (Theory as well as Practical) in Semester III and IV together and should pass all the subjects of Semester I and Semester II.

Award of Honours

A student who has completed the minimum credit specified for the programmes shall be declared to have passed in the programme.

The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed.

The criteria for the award of honours are given in the table below.

Question Paper Pattern for External Assessment conducted by the University

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$

CGPA below ≤ 5.00	F	Fail	Marks below 40
------------------------	---	------	----------------

The pattern of Question Paper for External Assessment (60Marks) of Theory subjects conducted by the University will be as follows:

1. The Question Paper will be divided into 02 Sections, Section I and Section II.
2. Each Section will consist of 03 Questions and all questions will be compulsory.
3. Question 1 of each Section shall be Objective in nature (Multiple Choice Question, Fill in the Blanks, Match the Pairs, True or False etc.) and carry a total of 06 marks only.
4. Question 2 and Question 3 will be of 12 marks each with internal choice. A question may be subdivided into sub-question a, b, c ... and the allocation of marks will depend on the weight age given to the topic.
5. Questions shall be set to assess the basic knowledge acquired, comprehension and application of knowledge in a given situation.
6. The Chairman of Board of Paper Setters for each course shall ensure that the questions cover the entire syllabus as per the weight age of marks indicated in the syllabus.
7. The duration of written examination shall be 2 ½ hours.

SEMESTER- I

SUBJECT CODE: DSC 101					
SUBJECT : BASIC INDIAN FOOD PRODUCTION (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	-	100	03

Rationale :

This subject intends to develop knowledge and basic culinary skills, which will help students to develop a comprehensive insight into culinary history, ingredients and their uses, methods of cooking, basic cooking equipment and tools.

		Hours	Marks
Chapter 1	Introduction to art of cookery	06	08
1.1	Culinary History		
1.2	Origins of classical and modern cuisine		
1.3	Classical kitchen brigade for a five star hotel		
1.4	Duties and responsibilities of Executive Chef and various chefs		
1.5	Organization of modern kitchen		
1.6	Standards of professionalism		
1.7	Kitchen Uniforms		
1.8	Inter departmental co-ordination		
Chapter 2	Mise-en-place	04	08
2.1	Importance		
2.2	Weighing and measuring ingredients-weight and volume consideration		
2.3	Preparation of ingredients		
2.4	Methods of mixing food		
Chapter 3	Equivalents of ingredients	04	04
3.1	Equivalents of various ingredients used in the kitchen-cereals, pulses, vegetables, fruits, nuts, fish, meat.		
Chapter 4	Methods of Cooking	14	16
4.1	Aims and Objectives of cooking food		
4.2	Effects of heat on food- proteins, carbohydrates, vitamins, fats, minerals, fruit and vegetable fiber, flavor components		
4.3	Types of pigments in vegetables, fruits and animal products		

4.4	Effects of heat, acid, alkali, oxidation and metal on pigments		
4.5	Precautions for enhancing and retention of colour.		
4.6	Methods of heat transfer- conduction, convection, radiation.		
4.7	Cooking methods- Moist & Dry (Salient features of various cooking methods, temperature precaution) Steaming, braising, stewing, poaching, boiling, baking, roasting, grilling, frying, broiling, microwave and solar.		
Chapter 5	Tools & Equipments	04	06
5.1	Introduction to various types of Knives, Hand tools and Small equipments, Measuring devices, Pots, Pans and Containers		
5.2	Use and maintenance of Equipment- Cooking range, Mixer, OTG, Refrigerator.		
5.3	Properties, Advantages and Disadvantage of various materials used in tools and equipment		
Chapter 6	Sanitation and Safety	08	08
6.1	Personnel Hygiene		
6.2	Food Storage		
6.3	Hygiene & safe practices in food handling and preparation		
6.4	Cleaning and Sanitizing Equipments		
6.5	Rodent and insect control		
6.6	Safety practices at work place, preventing cuts & burns, falls & injuries		
6.7	Fire prevention.		
6.8	HACCP system.		
Chapter 7	Standard Recipe	04	06
7.1	Definition		
7.2	Uses & Limitations		
7.3	Structure		
Chapter 8	Culinary Terms	04	04

Raita	Payassam	Do pyaza
Murabba	Korma	Bharwaan
Phirnee	Kofta	Bhurta
Chenna	Khoya	Pakora
Rabarhi	Kachumber	Kadhi
Khichri	Kachori	Baghar

SUBJECT: BASIC INDIAN FOOD PRODUCTION (PRACTICAL)					
Teaching Scheme/Week	Examination Scheme				
Practical Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	-----	100	02

Minimum 12 practicals of Indian menus to be conducted and should include basic rice/ Indian bread meat, vegetable and sweet dishes.

It is recommended that demonstrations be conducted in the initial stages to familiarise the students with the following:

1. Introduction of various tools and their usage.
 2. Familiarization and identification of commonly used ingredients—weights and volume conversion, yield testing.
 3. Basic hygiene practices to be observed in the kitchen.
 4. Safety practices in the kitchen.
 5. Food storage.
 6. Use of knife and cutting techniques, cuts of vegetables.
 7. Pre-preparations, mixing methods.
 8. Basic Cooking methods.
- Students are required to maintain a journal to record the various practicals attended and the teacher must record the performance evaluation of the same on a day to day basis.

SUBJECT CODE:DSC102					
SUBJECT: BASIC FOOD & BEVERAGE SERVICE-I (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	-----	100	03

Rationale:

To impart comprehensive knowledge and develop technical skills in basic aspects of Food & Beverage operations in the hotel industry.

		Hours	Marks
Chapter 1	The Food & Beverage Industry	06	08
1.1	Introduction to Food & Beverage Industry		
1.2	Classification of Catering Establishments		
1.3	Introduction to Food & Beverage Operations		
Chapter 2	Food & Beverage Service Areas in the Hotel	08	10
2.1	Restaurant , Coffee Shop, Room Service, Bars, Banquets, Snack Bars, Executives lounges,		
2.2	Business Centre & Night Clubs Auxiliary Areas		
Chapter 3	Food & Beverage Service Equipments	06	10
3.1	Types & Usage of Equipments , Furniture, Chinaware, Silverware, Glassware, Linen and Disposables		
3.2	Special Equipments,Care and maintenance of Equipments		
Chapter 4	Food & Beverage Service Personnel	08	12
4.1	Food & Beverage Service Organizations		
4.2	Job Description & Job Specification of Food & Beverage Staff		
4.3	Attitudes & attributes of Food & Beverage service personnel, competencies		
4.4	Basic etiquettes for service staff, Interdepartmental relationship		
Chapter 5	Food & Beverage Service Methods	12	12
5.1	Table Service- Silver / English, Butler / French,		

	Russian, American		
5.2	Self Service , Buffet & Cafeteria		
5.3	Specialized Service- Gueridon , Tray, Trolley, Lounge, Room		
5.4	Single Point Service – Take away, Vending Machine,		
5.5	Food Courts, Bars& Automats		
5.6	Mise-en-place & Mise-en-scene		
Chapter 6	In Room Dining-IRD	08	08
6.1	Introduction		
6.2	Equipments Required for IRD–Trays& Trolleys		
6.3	In Room Dining Procedures-Misen place activities		
6.4	Order Taking for IRD and Execution of IRD order		
6.5	Collecting the order and Carryingit to the Room		
6.6	Other Services

SEMESTER- II

SUBJECT CODE: DSC 201					
SUBJECT : BASIC CONTINENTAL FOOD PRODUCTION (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	-	100	03

Rationale:

This subject intends to develop knowledge of stocks, soups, sauces, egg and fish cookery, salads and potato preparations and its application in continental cooking.

		Hours	Marks
Chapter 1	Stocks , Essences and Glazes	06	06
1.1	Definition of stock		
1.2	Ingredients used in stock making		
1.3	Care and rules of stock making		
1.4	Recipes of one litre of various stocks. (White stock, Brown stock, Fish stock and Vegetable stock)		
1.5	Storage of Stocks.		
1.6	Essences, Glazes & Convenience bases.		
Chapter 2	Soups	06	08
2.1	Classification of Soup with 5 examples each (Consommé, Cream, Puree, Broths, Chowder, Veloute, Bisque, National Soup)		
2.2	Consommé- Definition, Ingredients, Clarification, Recipe for one litre and five variations.		
2.3	Garnishes and Accompaniments for Soups & Consommés.		
Chapter 3	Sauces	08	10
3.1	Definition of Sauces. Structure & Functions of Sauces.		
3.2	Thickening agents – Roux: preparation and types, Beurre Manie, White Wash, Cornstarch, Arrowroot,		

3.3	Waxymaize, Instant Starches, Liaison.		
3.4	Classification of sauces.		
3.5	Recipes of Mother sauces – 1 litre&five derivatives of each sauce.		
3.6	Butter sauces – types Dessert sauces – types. Miscellaneous sauces.		
Chapter 4	Textures	03	04
4.1	Definition and Characteristics		
4.2	Types – Desirable and Undesirable		
Chapter 5	Eggs	06	08
5.1	Composition, Structure & Selection		
5.2	Uses in cookery		
5.3	General cooking principles - Effect of heat, acid, salt & sugar		
5.4	Cooking eggs – boiling, poaching, frying , shirred eggs, scrambled eggs, omelets, soufflés		
5.5	Types and Storage		
Chapter 6	Fish	06	08
6.1	Classification of fish with examples & characteristics.		
6.2	Selection of fish & shellfish		
6.3	Cuts of fish.		
6.4	Cooking of fish.		
6.5	Handling & Storage of fish		
6.6	Local equivalentents of fish varieties.		
Chapter 7	Salads	04	06
7.1	Definition of salad, Classification and structure of salad		
7.2	Rules for salad making		
7.3	Salad dressings – Definition, Ingredients used for salad dressing, Types of salad dressings		
7.4	Different types of Salad – Caesar Waldorf Nicoise Russian Cole slaw Tossed Florida German Japonaise Mimosa Raphael Andalouse Eve		
Chapter 8	Potatoes and other starches	03	06
8.1	Various styles of potato preparations: Parsley Potato, Potato Lyonnaise, Potato Marquise, Potato Duchesse, French Fries, Fried Potato, Dauphinois Potato, Potato Croquettes, Potato Lorette, Anna Potato, Macairepotato, Potato Brioche, Chester		

8.2	Potato, Hashed Brown, Jacket Baked		
8.3	Cooking Rice. - Boiling & steaming, Reheating. Pasta – Varieties and Cooking of Pasta.		
Chapter 9	Culinary Terms	06	04
9.1	Bain Marie Appetizer Baste Blend Blanched Bouquet garni Caramel Bouillon Garniture Consommé Dough Estouffade Court Bouillon Cutlet Garnish Beurre Manie Fumet Glaze Concasse Liason Mire Poix Hors d'œuvre Julienne Knead Mis – en- Place Marinade Matignon Paysanne Paner Parboil Poach Puree Sabayon Ragout Potage Roux Simmer Royale Stew Infusion Au gratin Sear Bisque Macedione Zest Fricasse Pare Souffle Barbeque Croutons Printaniere Beurre Noir Espagnole Brunoise Maitre – d- hotel butter

SUBJECT : BASIC CONTINENTAL FOOD PRODUCTION (PRACTICAL)

Teaching Scheme/Week	Examination Scheme				
Practical hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	--	100	02

Minimum 12 practicals of Continental menus to be conducted and should include the following : basic soups, sauces, egg preparations, fish preparations, stews, vegetables, potatoes, salads, basic custard, puddings and mousses.

- Students are required to maintain a journal to record the various practicals attended and the teacher must record the performance evaluation of the same on a day to day basis.

SUBJECT CODE:DSC 202					
SUBJECT: BASIC FOOD & BEVERAGE SERVICE II (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	---	100	03

Rationale:

This subject aims to provide fundamental knowledge of Food & Beverage Menus with purpose to apply knowledge & skills required to provide immense services to the guest.

		Hours	Marks
Chapter 1	The Service Sequence	10	12
1.1	Taking Bookings		
1.2	Preparation for service		
1.3	Methods of Order Taking		
1.4	Types of KOT, BOT		
1.5	Service of Food & Beverage		
1.6	Clearing Following Services		
1.7	Billing Methods, dealing with discrepancies		
1.8	Feedback system		
Chapter 2	Types of Meals	10	14
2.1	Breakfast- Types & Service methods		
2.2	Brunch		
2.3	Lunch		
2.4	Afternoon Teas, High Tea		
2.5	Dinner		
2.6	Supper		
Chapter 3	Menu Knowledge	12	14
3.1	Introduction		
3.2	Menu Types – Table d’ hote& A ’la carte ´ menu		
3.3	Menu Planning, Considerations & Constraints		
3.4	Menu Terms		
3.5	French Classical Menu		
3.6	Classical Foods, Accompaniments , cover & service		

Chapter 4	Control Methods	06	08
4.1	Necessity & Functions of Control System		
4.2	Objectives of Control System		
4.3	Flow chart of F & B system		
4.4	Purpose of Revenue control system		
Chapter 5	Non Alcoholic Beverages	10	12
5.1	Classification		
5.2	Hot Beverages-Types, Production, Service		
5.3	Cold Beverages-Types, Production, Service		

Glossary of Terms

Gueridon Service	Single Point Service	Debarrasseur
Trancheur	Chef d'etage	Chef de sale
Sommelier	Mixologist	Barista
Bus Boy	Hot Plate	Still Room
Aboyeur	Off-board	EPOS
Deferred Wash	Tray Jack	Plat du jour
Mise-en-place	Mise-en-scene	Carte du jour
Crumb down	Dumb Waiter	Tisane
Waiters Friend	EPNS	Cover
BOT	KOT	Accompaniment

Assignments:

Minimum of **2 assignments** based on the following topics to be given to individual student and the marks to be considered in internal marks.

1. Collect Menus of Fine Dining Restaurants, QSR, 5 Star Hotel, Coffee Shop
2. Prepare a chart of food and accompaniments for French and Indian menu.
3. Prepare one menu each of Fixed, Cyclic for Cafeteria.

02	40	60	-----	100	01

1. Using a Room and public area inspection checklist

- Cleaning of a Guest room and public area.
- Checking of the Guest room and public area using a check list.

2. Various forms, formats maintained at control desk

3. Linen room inventory

- Physical inventory of linen

4. Monogramming

- Monogramming of linen and uniforms using chain stitch and satin stitch
- Setting up and cleaning of linen and uniform room
- Setting up and cleaning of floor pantry

5. Mending

- Mending of torn linen and repair of uniforms- Button and hook stitching.

6. Identification and construction of weaves

- Plain weave
- Basket weave
- Figured weave
- Pile weave

7. Identification and construction of weaves

- Satin weave
- Twill weave
- Sateen weave

8. Stain Removal

- Identification, classification and stain removal procedures for- Animal, vegetable, mineral, metalloid.

9. Stain Removal

- Identification, classification and stain removal procedures for acidic, alkaline, pigments and miscellaneous stains.

10. Laundering Procedure

- Prewashing, washing, rinsing
- Starching
- Blueing

11. Laundering Procedure

- Washing, Ironing of cotton, silk and synthetic fabrics.
- Cleaning of laundry and laundry equipments.

ASSIGNMENTS

1. Fabrics used in Hotel Industry (Samples to be collected)

Presentation on assignments with the use of audio visual aids.

04*	20	30	-----	50	02

1. Development of proficiency in English

- Practice on spoken communication skills and testing voice and accent, voice clarity, voice modulation and intonation.

2. Personal Introduction

- Developing an Understanding of Social Etiquettes.

3. Business manners and etiquettes

- To understand presenting oneself with finesse.

4. Debate

- To understand subject knowledge, oral and leadership skills.

5. Group Discussion

- To understand subject knowledge, oral and leadership skills.

6. Extempore

- To understand subject knowledge, oral and leadership skills.

7. Body Language

- Study of different pictorial expression of nonverbal communications and its analysis.

8. SWOT Analysis

- Self evaluation.
- Self discipline
- Recognition of one's own limits and deficiencies.
- Self Awareness.

9. Presentation skills

- To understand Preparing and delivery of presentation.

10. Time Management techniques

- To understand Time Quadrant model and its use.

11. Stress management techniques

- To identify factors that cause stress through questionnaire/games.

12. Listening skills

- To improve note making and listening skills.

13. Organizing a seminar

14. Guest lectures of hospitality professionals.

15. Field visits

- Field visits to various sectors of the hospitality industry as a learning experience for students.

16. Report writing on guest lectures and field visits

Assignment

1. Make a SWOT Analysis to identify your strength, weaknesses, opportunity and threats
2. Identify your areas of self development and plan a strategy to improve.
3. Identify qualities, traits of a eminent admired personality
4. Prepare a tree of life to understand personality determinants
5. Identify your values and prepare a code of ethics for yourself
6. Presentation on your role model in hospitality industr

SEMESTER– III

Industrial Training

SUBJECT CODE:DSC 301-(I)					
SUBJECT:INDUSTRIAL EXPOSURE & REPORT					
Teaching Scheme/Week	Examination Scheme				
Training Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
54	--	120	80	200	37

In the fifth semester the student shall undertake industrial training for a period of 22 weeks, reputed hotel, and restaurant or hospitality organization.

The institute shall assist in the placement of students for training in various hotels. The student can make self arrangement to train in any hotel of his choice. The student will have to bear the necessary expenses involved for the same.

At the end of the industrial training the student shall submit a training Report along with the logbook maintained on a daily basis during the period of training and the performance appraisal from each department.

The training report is to be prepared by the student in two copies and to be submitted to the Training & Placement Officer within the stipulated time for assessment.

The report will be assessed by the internal examiner and only on the basis of a certificate of the examiner concerned that the training has been satisfactorily completed would the student be allowed to appear for the external assessment conducted by a panel of examiners comprising of one external examiner (the external would include preferably one from the hotel industry of the level of Head of the Department and above) and one internal examiner. The Continuous Assessment marks will be awarded based on the performance appraisals filled by the hotel managers.

The student is required to practice the disciplines & norms laid down by the institute and also follow the rules and regulations of the hotel in which he/she is undergoing training.

Any adverse remark from the hotel will call for stringent action.

SUBJECT CODE: AEE 101					
SUBJECT: CATERING SCIENCE					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

To develop awareness of the importance of hygiene, sanitation and food safety in hotel industry.

		Hours	Marks
Chapter1	Importance of Hygiene in the Catering Industry.	04	02
1.1	Introduction, Definitions: Hygiene & Sanitation		
1.2	Significance of hygiene & Sanitation in the food industry		
Chapter2	Food Microbiology.	08	06
2.1	Classification & Morphology of Microorganisms- Bacteria, Virus,		
2.2	Fungi, Algae, protozoa.		
2.3	Growth of Bacteria and its relevance to the food industry. Factors affecting microbial Growth. Moisture, Ph, Temperature, Oxygen, Time, Osmotic Pressure		
2.4	How food act as substrate for micro organisms.		
2.5	Concept of food contamination, Sterility, Cross Contamination, Contamination from plants & fruits, animals, sewage, soil, water, air.		
2.6	Food spoilage, causes, chemical changes caused by microorganisms		
Chapter3	Food borne illnesses	08	04
3.1	Microbial action-Food Poisoning (Microorganisms involved, mode of transmission, control of food Borne illness) Food infection (Bacterial, Viral, Protozoal) (Micro organisms involved, mode of transmission,		

	control of food born eillness)		
3.2	Toxicmetals and chemicals		
3.3	Naturally occurring toxicants in food.		
3.4	Investigation of food– borne disease outbreak		
Chapter4	Beneficial effects of micro organisms	06	04
4.1	Role of micro organisms in the manufacture of fermented foods, Dairyproducts, Vegetable preparations, Bakery products & Alcoholic beverages.		
Chapter5	Hygienic food Handling	06	06
5.1	Importance of following sanitary procedures.		
5.2	Concept of danger zone		
5.3	Sanitaryprocedures whilePreparation,Cooking, Mixing rawand cooked preparation, Holding: Hotholding, cooling, leftover		
5.4	Common Faults in food preparation		
Chapter6	Environmental Sanitation. Hygiene in food production and service areas.	08	04
6.1	Types of wastes in catering establishments the irdisposal methods. Food Contamination and spoilage due to kitchen pests and Pest control.		
Chapter 7	Hazard Analysis and critical control points, Importance, definition & usage of HACCP.	06	06
Chapter 8	Sanitation Regulation & standards	06	06
8.1	Food adulteration. Simple tests to detect food adult erantsin milk, sugar, turmeric, chilli powder, tea, coffee semolina, Ghee, butter margarine,oil		
8.2	Control of food quality– IndianStan.		
Chapter 9	Food Preservation.	06	06
9.1	Food Preservation by canning, drying, fermentation, Pickl ingandcuring, chemical preservatives & by irradiation.		
Chapter 10	Food Science	06	06

-
-
- 10.1 pH-Definition and its relevance in industry.
 - 10.2 Browning reactions (desirable & undesirable, enzymatic and non enzymatic reactions of food)
 - 10.3 Concept of gelatinization, inversion and crystallization in starch.
 - 10.4 Definitions and relevance of Boiling point, Boiling under pressure, Melting Point, Smoking point, Flash Point, Surface Tension.

SUBJECT CODE:AEE 102					
SUBJECT: DIETITICS & NUTRITION					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
08	–	–	50	50	04

Rationale

To develop basic awareness of important nutrients and knowledge of nutritional requirements for human beings & plan a balanced diet & understand the changes that occurs in the chemical components of food during preparation.

		Hours	Marks
Chapter1	Introduction to nutrition	06	04
1.1	Definitions: Food, Diet, nutrients, nutrition, Malnutrition, over and under nutrition/Energy, energy requirements.		
1.2	Basal metabolic rate, Factors affecting basal metabolic rate.		
1.3	Concept of digestion, absorption, metabolism.		
1.4	Objectives of cooking.		
Chapter 2	Carbohydrates	04	04
2.1	Definition, Composition, Classification		
2.2	Foodsources, Functions		
2.3	RDA (Adolescents and Adults)		
2.4	Importance of fiber in the Diet		
2.5	Symptoms of Deficiency and Excess of Carbohydrates In diet		
2.6	Effect of heat on Carbohydrates		
Chapter 3	Proteins	06	04
3.1	Definition, Composition, Classification		
3.2	Food sources		

3.3	Essential and Non-essential Aminoacids		
3.4	RDA (Children and Adults)		
3.5	Effect of heat on Proteins		
Chapter4	Lipids	06	04
4.1	Definition, Composition, Classification		
4.2	Food Sources		
4.3	RDA (Adolescents and Adults)		
4.4	Symptoms of deficiency and excess of fats		
4.5	Effect of heat on fats		
Chapter 5	Vitamins	06	06
5.1	Definition, Classification of Vitamins in to Fat Soluble And Water Soluble		
5.2	Functions, Sources, RDA, Symptoms of Deficiency and excess		
Chapter6	Mineral	06	04
6.1	Classification, General Functions of Minerals- Calcium, Iron, Iodine, Sodium and Chlorine		
6.2	FoodSources,Symptoms of DeficiencyandExcess		
6.3	RD Ain Adole scents and Adults		
Chapter7	Water	04	04
7.1	Sources, Functions of Water in human body, Sources Of Water		
7.2	Deficiency and Excess		
Chapter8	Classification of Raw Materials into food groups	08	04
8.1	The irnutritive values-cereals, pulses, nuts& Oil seeds milk & milk Products, eggs,flesh foods, Vegetables & fruits, fats & oils.		

Chapter 9	Formulation of balanced & Therapeutic Diet	10	06
9.1	Five food groups system diet therapeutic diet		
9.2	Exchange list system		
9.3	Planning of a diet for normal adults (male & female)		
9.4	Concepts of Therapeutic diets, Foods to be avoided and recommended in Diabetes Mellitus, Cardiovascular disorders,		
9.5	Gastro intestinal disorders, Kidney disorders and Liver disorders, Fevers and Infections		
9.6	New trend sin Nutrition (importance of avoiding junk food, gluten free diet, transfatty acids, convenience food)		
Chapter 10	Food Additives	04	04
11.1	Definition, types and functions andvarious uses in food industry

SUBJECTCODE:AEE103					
SUBJECT:FOOD & BEVERAGE CONTROLS					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	–	–	50	50	04

Rationale

To impart to students various cost, control and inventory concepts in a food and beverage operation.

		Hours	Marks
Chapter1	Introduction to Food & Beverage management	8	6
1.1	Sectors of Food & Beverage Industry		
1.2	Cost and market orientation		
1.3	Food & Beverage Management functions		
1.4	Responsibilities of food and beverage management		
1.5	Constraintst of o odand beverage management		
Chapter2	An overview of Food and Beverage control	6	04
2.1	Food and beverage control defined		
2.2	Objectives of food and beverage control		
2.3	Problems of food and beverage control		
2.4	The fundamentals of control		
Chapter3	Cost, Profit and Sales concepts	10	6
3.1	The elements of cost		
3.2	Basic cos tconcepts - Fixed and variable costs, Direct And indirect costs,Control lable and uncontrollable costs, Estimated, budgeted and Standard costs Outlay And opportunity costs		
3.3	Kinds of profit		
3.4	Break evenan alysis		
Chapter4	Budgeting for Food and Beverage Operations	10	6
4.1	Budgets defined		
4.2	Objectives of budgetary control		
4.3	Types of budgets		

4.4	Basic stages in the preparation of budgets		
4.5	Obstacles to control		
Chapter 5	Purchasing	6	6
5.1	The main duties of the purchasing manager		
5.2	The purchasing procedure for food and beverage		
5.3	The selection of a supplier		
5.4	Methods of purchasing food and beverage		
5.5	Purchase specifications for food and beverage		
Chapter 6	Receiving, Storing and Issuing	8	8
6.1	Objectives of receiving food		
6.2	Themeattag		
6.3	Stock taking of food		
6.4	Receiving of beverages		
6.5	Storing and issuing of beverages		
6.6	Cellar records		
6.7	Issuing beverages		
6.8	Stock taking of beverages		
Chapter 7	Control checklist	6	6
7.1	Food control checklist		
7.2	Beverage control checklist, bar procedures, beverage control procedures		
7.3	Prevention of fraud in the bar		
Chapter 8	Management information System	10	8
8.1	Various Reports		
8.2	Calculation of Actual Cost		
8.3	Daily Food Cost		
8.4	Monthly Food Cost		
8.5	Statistical Revenue Reports		
8.6	Cumulative and Non-Cumulative

SUBJECT CODE: AEE104					
SUBJECT: PRINCIPLES OF MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	–	–	50	50	04

Rationale

To make the student understand the concepts of management and the irpractical application in the hospitality industry.

		Hours	Marks
Chapter1	Introduction to management	06	04
1.1	Management and Organization defined		
1.2	Elements of an organisation		
1.3	Levels of management		
1.4	External and internal factors that affect management		
Chapter2	The Evolution of Managementtheory	08	08
2.1	Brief history of management thought		
2.2	Taylor’s Scientific Management Theory		
2.3	Fayol’s Classical Organization Theory		
Chapter3	Planningand DecisionMaking	08	08
3.1	Planning defined		
3.2	Importance of plans and goals		
3.3	Hierarchy of plans/Types of plans (Objectives, Strategies, Policies, Procedures, Methods, Rules, Programmes, Budgets		
3.4	Steps in planning		
3.5	The rational model of decision making		
Chapter4	Organising& Staffing	12	08
4.1	Organising defined and importance		
4.2	Formal and informal organization		
4.3	Span of management		
4.4	Departmentation		
4.5	Centralisation & Decentralisation		
4.6	Delegation of Authority		

Chapter5	Leadership	10	06
5.1	Leadership styles- Autocratic, Democratic, Laissez faire		
5.2	Blake & Mouton's Managerial Contingency Theory) Characteristics of a good leader		
5.3			
Chapter6	Motivation	08	08
6.1	Motivation defined		
6.2	Nature and importance		
6.3	Theories of motivation		
	i) Maslow's Hierarchy of Needs		
	ii) McGregor's Theory X &Theory Y		
6.4	Morale		
6.5	Benefits of high morale/motivation		
Chapter7	Co ordination	06	04
7.1	Co-ordination defined		
7.2	Need for Coordination		
7.3	Problems in achieving effective coordination		
7.4	Approaches to achieving effective coordination		
Chapter8	Controlling	06	04
8.1	Control defined		
8.2	Need for control		
8.3	Steps in the control process

SUBJECT CODE:AEE105					
SUBJECT:ORGANIZATIONAL BEHAVIOUR					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	–	–	50	50	04

Rationale

The subject aims to introduce students to the various elements and dynamics of organizational behavior.

Chapter	Topic	Hours	Marks
Chapter1	Introduction to organizational behavior	05	04
1.1	Organizational behaviour defined.		
1.2	Relevance and scope.		
Chapter2	Foundation of individual behaviour	08	06
2.1	Environmental factors		
2.2	Personal factors		
2.3	Organizational factors		
2.4	Psychological factors		
2.5	Personality, perception, attitudes and learning		
Chapter3	Motivation	06	06
3.1	Nature of Motivation		
3.2	Theories of motivation-Maslow, Herzberg, Equity And Expectancy		
Chapter4	Foundation of Group Behaviour	06	06
4.1	Group Dynamics		
4.2	Group Formation		
4.3	Group Task		
4.4	Group Decision making		

Chapter 5	Leadership	05	04
5.1	Nature of leadership		
5.2	Theories of leadership-Traittheory, Behavioural and Fielder’s contingency theory		
Chapter 6	Communication	05	04
6.1	Inter personal communication		
6.2	Barriers and ways of overcoming barriers		
6.3	Organizational communication		
6.4	Informal communication		
Chapter 7	Conflicts	03	04
7.1	Causes of conflicts		
7.2	Ways of overcoming conflicts		
Chapter 8	Organization	05	04
8.1	Organizational structures		
8.2	Behavioural implications of different structures		
Chapter 9		08	06
9.1	Organizational Change		
9.2	Factors responsible for change		
9.3	Resistance to change		
9.4	Implementation of the change process		
	Ways of overcoming theresistance		
Chapter10	Organizational Culture	05	06
10.1	Definition and importance of organizational culture		
10.2	Creation and sustenance of organizational culture

SUBJECT CODE: AEE106					
SUBJECT: HOTEL ECONOMICS					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	-	-	50	50	04

Rationale

This subject helps the students to develop an understanding of the concept and theories of application of management techniques in the field of economics. More over they should be able to understand the Manager's role in the decision making process from economic view point.

		Hours	Marks
Chapter1	Nature & Significance of Managerial Economics	04	08
1.1	Meaning, Features & Significance		
1.2	Functions of Managerial Economist		
Chapter2	Basic Terms used in Economics	08	08
2.1	Micro & Macro Economics		
2.2	Problem of Scarcity – Lionel Robbins Definition of Economics		
2.3	Economic Tasks– Production & Distribution		
2.4	Economic Entities– Household & Firm		
2.5	Distinction between Plant, Firm & Industry		
Chapter3	Demand Analysis	12	08
3.1	Meaning, Types & Determinants of Demand		
3.2	Meaning & Determinants of Individual & Market Demand		
3.3	Demand Function & Demand Schedule		
3.4	The Law of Demand		
Chapter4	Theory of Consumer Demand	10	06
4.1	Utility- Meaning & Types		
4.2	The Law of Diminishing Marginal Utility		
4.3	The Law of Equi-Marginal Utility		

Chapter5	Elasticity of Demand	10	06
5.1	Concepts, Kinds & Types		
5.2	Measurement of Price Elasticity Demand		
Chapter6	Production Analysis	08	06
6.1	Concepts & Attributes		
6.2	The Law of Variable Proportions		
6.3	The Law of Returns to Scale		
Chapter7	Supply Analysis	06	04
7.1	Meaning & Determinants of Supply		
7.2	The Law of Supply		
7.3	Elasticity of Supply-meaning, measurement & factors Affecting elasticity of Supply		
Chapter8	Types of Market	06	04
8.1	Meaning & Classification of Market Structure		
8.2	Types of Market Structures Formed by the Nature of Competition		

REFERENCE BOOKS

SUBJECT CODE:AEE107					
SUBJECT:FINANCIAL MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	–	–	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and theories of Financial Management in the Hospitality industry. This will also help the student in analyzing the financial statements and capital budgeting.

		Hours	Marks
Chapter 1	Financial Management	04	04
1.1	Definition, Scope and objectives-Branches of accounting-		
1.2	Historical, cost, Financial control, Financial Management and Revenue.		
Chapter 2	Ratio Analysis	12	08
2.1	Meaning, Importance and limitations		
2.2	Practical problems on computation of Liquidity Ratios- Current and Quick Ratio. Activity /Turnover Ratios-Stock Turnover Ratio, Debtors Turnover Ratio, Creditors Turnover Ratio, Long-term Solvency Ratios-Proprietary Ratio, Debt Equity Ratio.		
2.3	Profitability Ratios-Gross Profit, Net Profit, Operating ratio, Return on Capital employed, Return on Proprietor's Fund Ratio. Practical problems on preparation of Balance sheet from given Ratios.		
Chapter 3	Funds Flow and Cash Flow Statement	12	10
3.1	Nature, Importance and Uses		
3.2	Differences between Funds Flow and Cash Flow Statement		
3.3	Practical problems on preparation of Funds Flow considering following adjustment only: Depreciation On fixed Assets, Dividend- Interim and Final and Taxation		

Chapter 4	Working Capital Management	08	06
4.1	Definition and Meaning		
4.2	Factors affecting working capital		
4.3	Working capital cycle		
4.4	Practical problems on determination of working capital		
Chapter 5	Capital Budgeting	10	06
5.1	Meaning and Importance		
5.2	Practical problems on capital budgeting : payback period, Accounting Rate of return, Netpresent Value		
Chapter6	Budgets,Budgeting and Budgetary Control	08	08
6.1	Definition and Characteristics of Budgets		
6.2	Meaning and Advantages of Budgetary control		
6.3	Practical problems on Cash Budget, Flexible Budget		
Chapter7	Introduction to Pricing and Value added Tax.	10	08
7.1	Importance of Pricing.		
7.2	Methods of Pricing- Costplus, Rate of Return, Absorption Contribution and Backward.		
7.3	History, Meaning and Advantages of Value added tax In Hotel and Catering establishment		

The students may be assigned exercises related to Hotel Accounting to get hands on experience.They may beg ivenassignments to collect various Formats use din the Hotel Industry and to present samein the class.

SEMESTER– IV

SUBJECT CODE:DSC401					
SUBJECT:LARDER AND BASIC BAKING (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	---	100	04

Rationale

This subject in tends to develop knowledge and skills required for Garde Manger work and preparation off rozen desserts. It will also enhance understanding of the basic principles of baking, ingredients used in bakery and their role. It attempts to develop an understanding of meat cookery.

		Hours	Marks
Chapter 1	Le GardeManger	04	06
1.1	Definition		
1.2	Functions of larder department		
1.3	Break down of larder department		
1.4	Responsibilities of Chef Garde Manger		
1.5	Larder control		
1.6	Liasion with kitchen & pastry department		
1.7	Layout of larder in a hotel		
1.8	Equipments & tools use dinlarder		
Chapter 2	Horsd'oeuvres	03	04
2.1	Types of horsd'oeuvres: Hotand Cold- Canapés, Cocktails, Relishes.		
2.2	Miscellaneoushorsd'oeuvres- Antipasto, Bruschetta, Tapas, Amusebouche		
Chapter 3	Meat Cookery and Poultry	10	10
3.1	Composition & structure		
3.2	Quality of Meat		
3.3	Factors affecting flavour & tenderness		
3.4	Cooking of meats		
3.5	Selection, Cuts, approximate weights & method of cooking of the following– Lamb, Pork, Beef, Veal.		
3.6	Poultry- Selection, Cuts, Uses.		

Chapter 4	Curing And Smoking	02	02
4.1	Ingredients used for curing foods		
4.2	Curing methods		
4.3	Smoking		
Chapter 5	Charcuterie	05	06
5.1	Bacon– cuts & uses		
5.2	Ham– types & uses		
5.3	Differentiation – Ham, Bacon & Gammon		
5.4	Forcemeats – Types		
5.5	Sausages– Composition, Classification & Types		
Chapter 6	Pate,Terrines and other cold foods	05	06
6.1	Duties and responsibilities of Chef-de - froid		
6.2	Aspic– Definition, Function & Types		
6.3	Chaufroid – definition, types		
6.4	Using aspic & chaud froid sauce		
6.5	Pates & Terrines– Definition, Preparation, Difference		
6.6	Galantine & Ballotine- Definition, Preparation, Difference		
6.7	Mousse & Mouselline- Definition, Preparation, Difference		
6.8	Assembly of cold buffet		
6.9	Smorgasbord		
Chapter 7	Creams,Custards,Puddingsand FrozenDesserts	04	06
7.1	Basic custard		
7.2	Pastrycream – Definition, Preparation & Variations		
7.3	Pudding– Types		
7.4	Bavarians, Chiffons, Mousses & Souffles		
7.5	Frozen dessert – Classification, Popular ice - cream desserts		
7.6	Dessert sauces		
Chapter 8	Culinary Terms	04	06
Anglaise	Assaisonner	Ateraux	Aspic
Abattis	Ballotine	Barder	Bavarois
Beignet	Bouchee	Blondir	Chantilly
Charlotte	Chiffonade	Coulis	Crecy
Dariole	Duxelle	Panada	Farcir
FoieGras	Jardiniere	Jambonnette	Juslie
Meringue	Navarin	Papillote	Parfait
Praline	Provencale	Quenelle	Quiche
Ratatouille	Timbale	Dartois	Crudite
Forcemeat	Rollmops	Frizzling	Baba

Kedegree	Raspings	Nori	Fleuron
Crepinettes	Tournedos	Zakuski	Matellote
Civet	Duglere	Rissotto	Hummus
Macerate	Taboullleh	Gnocchi	Sippets
Tripe	Muesli	Neige	Pastillage
Dashi	Bombe	Compote	Tapenade
Lardons	Panache	Piquante	Baron
Sauerkraut	Salsa	Daube	Shaslik
Blanquette	Sundae	Crepes	Zabaglion
Qubus	Moussaka	Paella	Falafel
Baveuse	Waffles	Blackpudding	Truffles

Chapter 9 Ingredients Used in Bakery **05 04**

- 9.1 Flour– Functions.
- 9.2 Sugars – Functions
- 9.3 Fats - Types, Functions
- 9.4 Milk & milk products - Functions, guidelines for usage
- 9.5 Eggs - Functions, guidelines for usage
- 9.6 Leavening agents - Functions, guidelines for usage
- 9.7 Fruits and nuts - Types, Functions.
- 9.8 Salt- Functions, guidelines for usage
- 9.9 Spices & Flavouring - Types, Functions
- 9.10 Chocolate & Cocoa- Types, Functions, guidelines for usage

Chapter 10 Basic Baking **06 10**

- 10.1 Steps in Bread making
- 10.2 Methods of making cookies – Rolled, Dropped, Molded, Bagged, Ice Box, Stencil, Sheet, Bar
- 10.3 Cake Mixing Methods – Sugar Batter, Flour Batter, Boiling, Sugar Water, All in One
- 10.4 Faults in Bread, Cakes, Cookies.

SUBJECT:LARDER AND BASICBAKING(PRACTICAL)					
TeachingScheme/Week	ExaminationScheme				
Practical Hours	IAMarks	EAMarks	CAMarks	Total Marks	Credits
08	40	60	-----	100	04

- Minimum 08 practicals of Advanced Continental menus to be conducted. Menus may be designed so as to cover classical appetizers, soups, main course, accompaniments, salads and desserts.
- Minimum 04 Bakery practicals to be conducted to include varieties of bread, cookies and also introduce them to basic cake making.
- Students are required to maintain a journal to record the various practicals attended and the teacher must record the performance evaluation of the same on a day today basis.

SUBJECTCODE:DSC 402				
SUBJECT:ALCOHOLICBEVERAGES – I(THEORY)				
TeachingScheme/Week	Examination Scheme			
Theory Hours	IAMarks	EAMarks	TotalMarks	Credits
03	40	60	100	03

Rationale:

To impart comprehensive knowledge about various fermented & distilled alcoholic beverages such as wines, aperitifs, spirits, liqueurs & bitters.

		Hours	Marks
Chapter 1	Aperitifs	02	04
1.1	Definition		
1.2	Types- Wine Based, Spirit Based		
Chapter 2	Introduction to Fermented Alcoholic Beverages	10	12
2.1	Wine- Classification , Brands		
2.2	Beer – Classification, Brands		
2.3	Sake – Classification , Brand		
Chapter 3	Introduction to Distilled Alcoholic Beverages	14	16
3.1	Brandy – Classification, Brands		
3.2	Rum – Classification, Brands		
3.3	Vodka – Classification, Brands		
3.4	Gin – Classification, Brands		
3.5	Whisky – Classification, Brands		
3.6	Tequila – Classification, Brands		
Chapter 4	Introduction to Cocktails	08	10
4.1	Methods of Making Cocktails		
4.2	Golden Rules		
4.3	Classification of Cocktails		
4.4	Examples of Cocktails		
Chapter 5	Other Alcoholic Beverage	03	04
5.1	Arrack, Aquavit, Schnapps, Fruit Brandies, Pastis,		
5.2	Kirsch, Feni, Calvados, Korn, Doppelkorn, Cordials		
Chapter 6	Introduction to Liqueur	06	08
6.1	Introduction, Manufacturing		
6.2	Types		
6.3	Brands		

Chapter 7	Introduction to Bitter	03	04
7.1	Introduction, Manufacturing		
7.2	Types		
7.3	Brands		
Chapter 8	Introduction to Tobacco	02	02
8.1	Introduction		
8.2	Types, Brands of Cigar, Cigarettes.		

Glossary of Terms

Distillation	Aqua-vitae	Eau-de-vie
Congeners	Pot still	Fore-shots
Blending	Coffey still	Maturing
Cognac	Armagnac	Bonne chauffe
Ageing	Angels share	Brouillis
Grande Fine Champagne	Fine Champagne	Fine Maison
VSOP	Napoleon Brandy	Old liqueur cognac
Hors d'age	Marc	Grappa
Grain Whiskey	Ouzo	Peats reek
Single malt	Blended whisky	Malt whisky
Dunder	Vatted malt	Rye whisky
Schnapps	White rum	Bagasse
Wine	Aromatized wine	Dark rum
Blue wine	Blush wine	Agave
Champagne	Sparkling wine	Vinc
Asti spumante	Vins mousseux	Fortified wine
Vinho coto		

Assignment: Minimum of two assignments to be submitted by students by the end of these semester.

1. Wines from New world countries (USA, Australia, Africa and New Zealand)
2. Price list of wines from two outlets.
3. Indian wines brand names and prices
4. Price list of Beer from two outlets
5. Prepare a wine & other alcoholic beverages list.
6. List & give recipe of 10 cocktails of different base : Vodka, Rum, Tequila, Brandy, Whisky

SUBJECT : FRONT OFFICE ACCOUNTING (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory hours	IA	EA	CA	Total	Credits
	Marks	Marks	Marks	Marks	
02	40	60	-----	100	02

Rationale:

The subject aims to establish the importance of Front office Operations & its role in the Hospitality Industry. It also prepares the student to acquire knowledge of the operational aspects in front office. It also prepares the student to acquire basic skills and knowledge necessary to calculate occupancy statistics in the front office department.

		Hours	Marks
Chapter 1	Front Office Accounting	06	10
1.1	Importance of the front office accounting system		
1.2	Types of accounts		
1.3	Vouchers		
1.4	Folios		
1.5	Ledger		
1.6	The front office accounting cycle		
1.7	Use of computers in front office accounting		
Chapter 2	Credit Control practices at front desk	06	10
2.1	Objectives of credit control		
2.2	Hotel credit control policy		
2.3	Credit control measures at check-in		
2.4	Credit control measures during occupancy		
2.5	Credit control measures at check out and after guest departure		
Chapter 3	Calculation of various Statistical data using formula	06	10
3.1	ARR, Room Occupancy %, Double Occupancy %, Bed Occupancy %, Foreign occupancy %, Local Occupancy % House Count, House Position, etc.		
3.2	Reports - DRR, Revenue Report, Daily Occupancy Report.		

Chapter4	Night Auditor	04	10
4.1	Concept of Night Audit & Role of Night Auditor		
4.2	Night Auditor's Report		
Chapter 5	Establishing Room Rates	06	10
5.1	Rule of Thumb		
5.2	Hubbart's formula		
5.3	Market Condition Approach		
Chapter 6	Forecasting Room Availability	04	10
6.1	Benefits of forecasting		
6.2	Data Required for forecasting		
6.3	Records Required for forecasting		
6.4	Room Availability forecast.		
6.5	Types of forecast & their sample format		

Glossary of Term

ARR	Rev Par	Yield
ARG	DRR	Re -capitulation sheet
Transcript	High Balance	High Debt
House count	City Ledger	House limit
Management Account	Overstay	Noshow
Stayover	Understay	Cash Paid out
Forecasting	Hubbart's Formula	Rule of Thumb
Market Condition approach

04	20	30	-	50	02

Rationale

To enable students to acquire correct pronunciation of French hotel terminology, to use standard phrase in French related to hotel operations and also practice spoken French skills.

S.No. Topic

- 1 Alphabets
- 2 Basic greetings, Days of the week, Date, Months– Question and Answers
- 3 Time– Clock, Questions and Answers related to time
- 4 Kitchen Equivalentents
- 5 Kitchen Equivalentents
- 6 Kitchen Equivalentents
- 7 To plan and read a menu in French and briefly describe the dishesin English
- 8 To read, translate and say the recipe for basic dishes covered in theory class
- 9 To read, translate and say the recipe for basic dishes covered in theory class-Practice
- 10 Question and Answers related to Kitchen
- 11 Reading of a wine label
- 12 Dialogues related to F & B Service
- 13 Question and Answers related to F & B Service
- 14 Standard phrases use din House keeping and Front Office
- 15 Questions & Answers, Dialogues related to House keeping
- 16 Question &Answers, Dialogues related to Front Office

SEMESTER - V

SUBJECT CODE:DSE 101					
SUBJECT:QUANTITY & INDIAN REGIONAL FOOD PRODUCTION (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	-----	100	04

Rationale

This subject intends to develop knowledge & skills required for catering with emphasis on operational techniques practiced in quantity food production which will help students to produce quality products in a large quantity. It also provides a detailed understanding of meat cookery.

		Hours	Marks
Chapter 1	Quantity Food Equipments	03	06
1.1	Selection criteria		
1.2	Classification, Use, Care & Maintenance of following equipments. Cooking Equipments - range, oven, salamander, grill, griddle, rotisserie, deep fryer, tilting pan, steam jacket kettle, tandoor, steam cooker. Processing equipments - Mixer, food cutter, slicer, food processor, food grinder, potato peeler. Holding & storage equipments - Steam table, bain marie, overhead infrared lamp, refrigerator, walk in cooler, deep freezer		
Chapter 2	Introduction to Catering Industry	06	06
2.1	Institutional catering - Hospital, School, College		
2.2	Industrial catering		
2.3	Transport catering - Air, Sea, Railway Outdoor catering		
2.4	Outdoor catering		
Chapter 3	Kitchen Layout	03	06
3.1	Factors to be considered when planning a kitchen		
3.2	General layout of quantity kitchen of Institutional, Industrial, Flight catering, Five star deluxe hotels.		
Chapter 4	Menu Planning	04	06
4.1	Types of menu		
4.2	Principles of menu planning		

4.3	Planning of menus for various catering establishments.		
Chapter 5	Food and Nutrition	02	04
5.1	Importance of Balance diet Preparing		
5.2	Points to be considered while healthful meals.		
Chapter 6	Indian Spices and Masalas		04 06
6.1	Role of Indian spices and ingredients in Indian Cooking.		
6.2	Role of masalas in Indian cuisine.		
6.3	Different masalas used in Indian cooking - Wet and Dry.		
6.4	Composition of different masalas - garam masala, sambar masala , rasam powder, chat Goda masala		
6.5	Proprietary masala blends		
6.6	Basic Indian Gravies - Makhani, Kadhai Brown, White, Green		
Chapter 7	Regional Cooking Style	22	20
7.1	Cooking from different states with reference to - - Geographical location - Historical background - Seasonal availability of raw material - Special equipments and fuels. Staple diet & popular food preparations. For the following cuisines / states.		
	1. Maharashtrian	7. Tamilnadu	
	2. Gujarati	8. Kashmiri	
	3. Karnataka	9. Lucknowi	
	4. Bengali	10. Kerala	
	5. Punjab	11. Hyderabadi	
	6. Bengali	12. Goan

SUBJECT: Quantity & Indian Regional FOOD Production (PRACTICAL)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
08	40	60	-----	100	04

Minimum 20 menus to be conducted.

Menus should comprise of 06 Indian menus for Industrial and Institutional purpose and 02 snack menus in quantity kitchen and 12 Indian Regional menus.

Students are required to maintain a journal to record the various practicals attended and the teacher first record the performance evaluation of the same on a day to day basis.

SUBJECT CODE:DSE 102					
SUBJECT: ALCOHOLIC BEVERAGES II (THEORY)					
Teaching Scheme/Week		Examination Scheme			
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	-----	100	0

Rationale

To impart comprehensive knowledge of various spirits, liqueurs and cocktails.

		Hours	Marks
Chapter 1	Spirits	08	06
1.1	Introduction to Spirits		
1.2	Fermentation and Distillation Process		
1.3	Pot Still and Patent still.		
1.4	Various methods of Measuring Alcoholic Strength		
Chapter 2	Whisky	10	08
2.1	Ingredients used in making of Whisky.		
2.2	Manufacturing process of Whisky.		
2.3	Types of Whisky-Scotch and Irish Whisky		
2.4	Americal and Canadian Whisky		
2.5	International and IMFL Brand		
Chapter 3	Brandy	08	08
3.1	Ingredients used in making of Brandy		
3.2	Manufacturing process of Brandy		
3.3	Types of Brandy - Cognac and Armagnac		
3.4	Labeling Terminology		
3.5	Fruit and other Brandies.		
3.6	International and IMFL Brands.		

Chapter 4	Rum	06	06
4.1	Ingredients used in making of Rum		
4.2	Manufacturing process of Rum		
4.3	Tyype of Rum-White, dark and golden		
4.4	International and IMFL Brands		
Chapter 5	Gin	06	06
5.1	Ingredients used in making of Gin.		
5.2	Manufacturing process of Gin		
5.3	Types of Gin.		
5.4	International and IMFL Brands		
Chapter 6	Vodka	04	04
6.1	Ingredients used in making of Vodka		
6.2	Manufacturing process of Vodka.		
6.3	Types of Vodka		
6.4	International and IMFL Brands.		
Chapter 7	Tequila	06	04
7.1	Ingredients used in making of Tequila.		
7.2	Manufacturing process of Tequila		
7.3	Types of tequila		
7.4	Brands of Tequila		
Chapter 8	Other Alcoholic Beverages	04	06
8.1	Aquavit		
8.2	Schnapps		
8.3	Pastis		
8.4	Feni		
8.5	Arrack		
Chapter 9	Liqueurs.	06	06

9.1	Definition and types of liqueurs		
9.2	Production methods		
9.3	Service of Liqueurs.		
Chapter 10	Cocktails	06	06
10.1	Introduction and history of cocktails		
10.2	Methods of making cocktails and rules for making cocktails		
10.3	Equipments glassware, and garnishes used in making of cocktails, Cocktail recipe		

Glossary of Terms

-
5. Assignment on different types of windows and window treatments.
 6. Assignment on lighting systems in guest rooms and public areas.
 7. Collection of brochures and tariff cards of different types of hotels.
 8. Designing a brochure for - A Business hotel, Heritage hotel, Resort.

Presentation on above topics with use of audio visual aids.

SUBJECT CODE:SEC 102					
SUBJECT: ACCOUNTING SKILLS FOR HOTELS (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	--	100	03

Rationale

The course aims to help students to acquire the basic knowledge of Accounting as practiced in Hotels for the day-to-day operations of the organization. It would also prepare them to comprehend and utilize this knowledge in day-to-day operations undertaken in the various department in hotels.

Chapter 1	Introduction to Accounting	Hours	Marks
1.1	Terms and terminologies used in Accounting	04	04
1.2	Definition, Objectives and Importance of Accounting and Hotel Accounting		
Chapter 2	Double Entry System of Book - Keeping	04	04
2.1	Nature, Advantages and Principles		
2.2	Classification of Accounts		
2.3	Golden rules of Debit and Credit		
2.4	Accounting Concepts and Convention		
Chapter 3	Journal and special function books	04	06
3.1	Practical problems on Journalizing-simple entries		
	Practical problems on special function books		
Chapter 4	Trial Balance	04	06
4.1	Definition, need and types of Trial Balance		
4.2	Practical problems on preparation of Trial balance		
Chapter 5	Final accounts of Small Hotels and Restaurants	10	10

5.1	Need for preparation of Trading account, Profit and Loss account and Balance Sheet		
5.2	Practical problems on Trading account, Profit and Loss account and Balance Sheet with following adjustments only : Closing stock, Depreciation of fixed assets and Staff meals		
Chapter 6	Allowances, Discount and Visitors Paid Out	04	06
6.1	Meaning and Types		
6.2	Formats of Allowance and VPO Vouchers		
6.3	Difference between Allowance & Discount		
6.4	Difference between Discount & VPO		
Chapter 7	Visitors Tabular Ledger	04	06
7.1	Format and Use of Visitors Tabular Ledger		
7.2	Practical Problems on Visitors Tabular Ledger		
Chapter 8	Guest Weekly Bill	06	08
8.1	Format and Use of Guest Weekly Bill		
8.2	Practical Problems on Guest Weekly Bill		
8.3	Difference between VTL and GWB		
Chapter 9	Uniform System of Accounting	08	10
9.1	Introduction to Uniform System of Accounting (Practical problems on Cost of Food and Beverage sales)		
9.2	Practical problems on preparation of Income Statement as per Uniform System of Account.

SUBJECT CODE: SEC 103					
SUBJECT: TOURISM OPERATIONS (THEORY)					
Teaching Scheme/Week		Examination Scheme			
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	-	100	03

Rationale

To inculcate a sense of importance and establish a link between the tourism industry and the hotel industry and to highlight tourism industry as an alternative career path.

		Hours	Marks
Chapter 1	The Tourism Phenomenon	04	03
1.1	Definition - Tourism, Tour; Tourist; Visitor; Excursionist; Domestic; International; Inbound; Outbound; Destination.		
1.2	Growth of Tourism / Evolution / History of Tourism.		
1.3	Present status of tourism in India.		
Chapter 2	Constituents of Tourism Industry	04	05
2.1	Primary Constituents		
2.2	Secondary Constituents		
2.3	The 5 A's of Tourism - Attractions, Accessibility, Accommodation, Amenities, Activities.		
2.4	Career Opportunities for tourism professionals.		
Chapter 3	Infrastructure of Tourism	04	06
3.1	Role of Transport in Tourism		
3.2	Modes of Transport: Road, Rail, Air, Sea.		
3.3	Types of Accommodation- Main Alternate & Supplementary accommodation.		

Chapter 4	Types of Tourism	04	06
4.1	Types of Tourism -		
4.2	Various motivators, Holiday, Social, Cultural, MICE, Religious, VFR (Visiting Friends and Relatives), Sports, Political, Health, Senior Citizen, Sustainable Tourism		
4.3	Alternative Tourism : Eco Tourism, Agro Rural Tourism		
Chapter 5	The Impact of Tourism	04	06
5.1	Economic Impact - Employment generation, Foreign Exchange earnings.		
Chapter 10	Itinerary Planning	04	06
10.1	Definition		
10.2	Steps to plan a Tour		
10.3	Route map		
10.4	Transport booking - reservation		
10.5	Accommodation - reservation		
10.6	Food facilities		
10.7	Local guide / escort		
10.8	Climate / seasonality		
10.9	Shopping & cultural show		
10.10	Costing		
Chapter 11	Technology in the Travel Industry	02	04
11.1	Relationship between Information Technology and Tourism Industry. Current Technology used.		
11.2	G.D.S (Global distribution system)		
11.3	Use of Internet in tourism.		

REFERENCE BOOKS

- 1 Introduction to Travel & Tourism, Michael M. Cottman, Van Nostrand Reinhold
- 2 Travel Agency & Tour Operation, Jagmohan Negi, Kanishka Publishers & Distributors

Assignments

1. Preparation of Itinerary - 2 days, 15 days, 21 days etc. for well-known tourist destinations in India and abroad.
2. Preparation of passport and visa-Documents and procedural requirements
3. Field visit to a Travel Agency, Airport etc.

SUBJECT CODE:AEC 102				
SUBJECT: HOSPITALITY LAW (THEORY)				
Teaching Scheme/Week	Examination Scheme			
Theory Hours	IA Marks	EA Marks	Total Marks	Credits
03	40	60	100	03

Rationale

The subject aims to provide information regarding the various laws pertaining to the hotel and catering industry.

		Hours	Marks
Chapter 1	The Indian Contract Act 1872	06	06
1.1	Definition and essentials of a contract.		
1.2	Valid, void and voidable contracts		
1.3	Free consent and consideration		
1.4	Performance and discharge of contracts		
1.5	Breach of contract and remedies for breach of contract.		
Chapter 2	The Sales of Goods Act 1932	04	04
2.1	Meaning of contract of sale.		
2.2	Difference between sale and agreement to sale.		
2.3	Rights and duties of seller and buyer.		
2.4	Unpaid seller.		
Chapter 3	The Partnership Act 1932	04	04
3.1	Nature of partners.		
3.2	Rights and duties of partners.		
Chapter 4	The Companies Act 1956	04	06
4.1	Essential features of company.		
4.2	Legal aspects of corporate social responsibility.		

Chapter 5	The Bombay Shop and Establishment Act	04	06
5.1	General Provisions applicable to the Hotel industry		
5.2	Daily and weekly working hours, over time, Annual leave with wages,		
Chapter 6	The Industrial Dispute Act 1948	04	06
6.1	Definition of Industry.		
6.2	Industrial disputes		
6.3	Settlement of industrial disputes		
6.4	Strike, lay-off, lock out, retrenchment and closure.		
Chapter 7	The Payment of Wages Act 1936.	04	06
7.1	Responsibility of payment of wages.		
7.2	Rules for payment of wages.		
7.3	Permissible deductions.		
Chapter 8	Food Legislation.	06	06
8.1	The prevention of food Adulteration Act 1954		
8.2	Role of Food inspector and public analyst.		
8.3	Colouring, packing and labeling,		
8.4	Prohibition and regulation of sales		
8.5	Preservatives.		
8.6	Anti-oxidants, emulsifying, stabilizing and anti-caking agents.		
Chapter 9	The Food Safety and Standards Act 2006	04	06
9.1	Food Safety and Standards Authority of India		
9.2	General Principles of Food Safety		
9.3	General Provisions as to Articles of Food		
9.4	Provisions Relating to Import		
9.5	Special responsibilities related to food safety		

9.6	Offences and penalties		
Chapter 10	The Consumer Protection Act.	04	04
10.1	Rights of a consumer		
10.2	Redressal of consumer disputes		
Chapter 11	Licenses and Permits	04	06
11.1	Licenses and permits required for hotel and catering establishments		
11.2	Procedure for applying and renewal of licenses and Permits.		
11.3	Provisions for suspension and cancellation of licenses		
11.4	By laws for operating Permit Rooms and Bar

SUBJECT: CATERING SCIENCE (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	---	---	50	50	04

Rationale

To develop awareness of the importance of hygiene, sanitation and food safety in hotel industry.

		Hours	Marks
Chapter 1	Importance of Hygiene in the Catering Industry.	02	02
1.1	Introduction, Definitions : Hygiene & Sanitation		
1.2	Significance of hygiene & Sanitation in the food industry		
Chapter 2	Food Microbiology	10	06
2.1	Classification & Morphology of Microorganisms Bacteria, Virus,		
2.2	Fungi, Algae, protozoa.		
2.3	Growth of Bacteria and its relevance to the food industry. Factors affecting microbial Growth, Moisture, Ph, Temperature, Oxygen, Time, Osmotic Pressure		
2.4	How food act as a substrate for microorganisms.		
2.5	Concept of food contamination, Sterility, Cross Contamination, Contamination from plants & fruits, animals, sewage, soil, water, air.		
2.6	Food spoilage, causes, chemical changes caused by microorganisms		
Chapter 3	Food borne illnesses	10	04
3.1	Microbialaction-Food Poisoning (Microorganisms involved, mode of transmission, control of food Borneillness) Food infection (Bacterial, Viral Protozoal) (Microorganisms involved, mode of transmission,		

	control of food borne illness)		
3.2	Toxic metals and chemicals		
3.3	Naturally occurring toxicants in food.		
3.4	Investigation of food - borne disease outbreak		
Chapter 4	Beneficial effects of microorganisms	08	06
4.1	Role of microorganisms in the manufacture of fermented foods, Dairy products, Vegetable preparations, Bakery Products & Alcoholic beverages.		
Chapter 5	Hygienic food Handling	08	06
5.1	Importance of following sanitary procedures.		
5.2	Concept of danger zone		
5.3	Sanitary procedures while Preparation, Cooking, Mixing raw and cooked preparation, Holding: Hot holding, cooling, leftover		
5.4	Common Faults in food preparation		
Chapter 6	Environmental Sanitation. Hygiene in food production and service areas.	08	08
6.1	Types of wastes in catering establishments their disposal methods. Food Contamination and spoilage due to kitchen pests and Pest control.		
Chapter 7	Hazard Analysis and critical control points, Importance, definition & usage of HACCP.	06	06
Chapter 8	Sanitation Regulation & standards	06	06
8.1	Food adulteration. Simple tests to detect food adulterants in milk, sugar, turmeric, chilli powder, tea, coffee, semolina, Ghee, butter margarine, oil		
8.2	Control of food quality - Indian Stan.		
Chapter 9	Food Preservation.	06	08
9.1	Food Preservation by canning, drying, fermentation, Pickling and curing, chemical preservatives & by irradiation.

SUBJECT CODE: AEE 102					
SUBJECT: DIETITICS & NUTRITION (THEORY)					
Teaching Scheme/Week		Examination Scheme			
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	---	--	50	50	04

Rationale

To develop basic awareness of important nutrients and knowledge of nutritional requirements for human beings & plan a balanced diet & understand the changes that occurs in the chemical components of food during preparation.

		Hours	Marks
Chapter 1	Introduction to nutrition	04	04
1.1	Definitions : Food, Diet, nutrients, nutrition, Malnutrition over and under nutrition/Energy energy requirements.		
1.2	Basal metabolic rate, Factors affecting basa Imetabolic rate.		
1.3	Concept of digestion, absorption, metabolism.		
1.4	Objectives of cooking.		
Chapter 2	Carbohydrates	04	04
2.1	Definition, Composition, Classification		
2.2	Food sources, Functions		
2.3	RDA (Adolescents and Adults)		
2.4	Importance of fiber in the Diet		
2.5	Symptoms of Deficiency and Excess of Carbohydrates in diet		
2.6	Effect of heat on Carbohydrates		
Chapter 3	Proteins		
3.1	Definition, Composition, Classification		
3.2	Food sources		

3.3	Essential and Non-essential Amino acids		
3.4	RDA (Children and Adults)		
3.5	Effect of heat on Proteins		
Chapter 4	Lipids	06	04
4.1	Definition, Composition, Classification		
4.2	Food Sources		
4.3	RDA (Adolescents and Adults)		
4.4	Symptoms of deficiency and excess of fats		
4.5	Effect of heat on fats		
Chapter 5	Vitamins	06	06
5.1	Definition, Classification of Vitamins into Fat Soluble And Water Soluble		
5.2	Functions, Sources, RDA, Symptoms of Deficiency and excess		
Chapter 6	Mineral	06	04
6.1	Classification, General Functions of Minerals, Calcium, Iron Iodine, Sodium and Chlorine		
6.2	Food Sources, Symptoms of Deficiency and Excess		
6.3	RDA in Adolescents and Adults		
Chapter 7	Water	02	04
7.1	Sources, Functions of Water in human body, Sources of Water		
7.2	Deficiency and Excess		
Chapter 8	Classification of Raw Materials into food groups	06	04
8.1	Their nutritive values-cereals, pulses, nuts & Oil seeds milk & Products, eggs, flesh foods, Vegetables & fruits, fats & oils.		
Chapter 9	Formulation of balanced & Therapeutic Diet	10	06
9.1	Five food groups system diet therapeutic diet Exchange list system		
9.2	Exchange list system		
9.3	Planning of a diet for normal adults (male & female)		

9.4	Concepts of Therapeutic diets, Foods to be avoided and recommended in Diabetes Mellitus, Cardiovascular disorders,		
9.5	Gastro intestinal disorders, Kidney disorders and Liver disorders, Fevers and Infections		
9.6	New trends in Nutrition (importance of avoiding junk food, gluten free diet, trans fatty acids, convenience food)		
Chapter 10	Food Science	10	06
10.1	pH-Definition and its relevance in industry		
10.2	Browning reactions (desirable & undesirable, enzymatic And non enzymic reactions in food)		
10.3	Concept of gelatinization, inversion and cystallization in starch.		
10.4	Definitions and relevance of Boiling point, Boiling under pressure, Melting Point Smoling point, Flash Point, Surface Tension		
Chapter 11	Food Additives	04	04
11.1	Definition, types and functions and various uses in food industry		

REFERENCE BOOKS

SUBJECT CODE: AEE 103					
SUBJECT: FOOD & BEVERAGE CONTROLS					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	-	--	50	50	04

Rationale : To impart to students various cost, control and inventory concepts in a food and beverage operation.

		Hours	Marks
Chapter 1	Introduction to Food & Beverage management	8	6
1.1	Sectors of Food & Beverage Industry		
1.2	Cost and market orientation		
1.3	Food & Beverage Management functions		
1.4	Responsibilities of food and beverage management		
1.5	Constraintst of o odand beverage management		
Chapter 2	An overview of Food and Beverage control	6	04
2.1	Food and beverage control defined		
2.2	Objectives of food and beverage control		
2.3	Problems of food and beverage control		
2.4	The fundamentals of control		
Chapter 3	Cost, Profit and Sales concepts	10	06
3.1	The elements of cost		
3.2	Basic cost concepts - Fixed and variable costs, Direct costs, Estimated, budgetd and Standard costs Outlay		
3.3	Kinds of profit		
3.4	Break evenan alysis		

Chapter 4	Budgeting for Food and Beverage Operations	10	6
4.1	Budgets defined		
4.2	Objectives of budgetary control		
4.3	Types of budgets		
4.4	Basic stages in the preparation of budgets		
4.5	Obstacles to control		
Chapter 5	Purchasing	6	6
5.1	The main duties of the purchasing manager		
5.2	The purchasing procedure for food and beverage		
5.3	The selection of a supplier		
5.4	Methods of purchasing food and beverage		
5.5	Purchase specifications for food and beverage		
Chapter 6	Receiving, Storing and Issuing	8	8
6.1	Objectives of receiving food		
6.2	Themeattag		
6.3	Stock taking of food		
6.4	Receiving of beverages		
6.5	Storing and issuing of beverages		
6.6	Cellar records		
6.7	Issuing beverages		
6.8	Stock taking of beverages		
Chapter 7	Control checklist	6	6
7.1	Food control checklist		
7.2	Beverage control checklist, bar procedures, beverage control procedures		
7.3	Prevention of fraud in the bar		

Chapter 8	Management information System	10	8
8.1	Various Reports		
8.2	Calculation of Actual Cost		
8.3	Daily Food Cost		
8.4	Monthly Food Cost		
8.5	Statistical Revenue Reports		
8.6	Cumulative and Non-Cumulative

SUBJECT CODE:AEE 104					
SUBJECT: PRINCIPLES OF MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	-	--	50	50	04

Rationale

To make the student understand the concepts of management and their practical application in the hospitality industry.

		Hours	Marks
Chapter 1	Introduction to Management	06	04
1.1	Management and Organization defined		
1.2	Why organizations and managers are needed		
1.3	Types of managers		
1.4	External and internal factors that affect management.		
Chapter 2	The Evolution of Management theory	08	08
2.1	Brief history of management thought		
2.2	Taylor's Scientifica Management Thory		
2.3	Fayol's Classical Organization Theory		
Chapter 3	Planning and Decision Making	08	08
3.1	Planning defined		
3.2	Importance of plans and goals		
3.3	Hierarchy of plans/Types of plans (Objectives, Strategies, Policies, Procedures, Methods, Rules,		
3.4	Steps in planning		
3.5	The rational mode of decision making		

Chapter 4	Organising & Staffing	12	08
4.1	Organising define and importance		
4.2	Formal and informal organization		
4.3	Span of management		
4.4	Departmentation		
4.5	Centralisation & Decentralisation		
4.6	Delegation of Authority		
Chapter 5	Leadership	10	06
5.1	Leadership styles		
5.2	Leadership theory (Blake & Mouton's Managerial Grid, Trait Theory, Contingency Theory) Characteristics		
5.3	of a good leader		
Chapter 6	Motivation	08	08
6.1	Motivation define		
6.2	Nature and importance		
6.3	Theories of motivation		
	i) Maslow's Hierarchy of Needs		
	ii) Mc Gregor's Theory X & Theory		
6.4	Y Morale		
6.5	Benefits of high morale/motivation		
Chapter 7	Co- ordination	06	04
7.1	Co-ordination defined		
7.2	Need for Co ordination		
7.3	Problems in achieving effective coordination		
7.4	Approaches to achieving effective coordination		

Chapter 8 Controlling

06 04

- 8.1 Control defined
- 8.2 Need for control
- 8.3 Steps in the control process

SUBJECT CODE:AEE 105					
SUBJECT: ORGANIZATIONAL BEHAVIOUR					
Teaching Scheme/Week		Examination Scheme			
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	---	--	50	50	04

Rationale

The Subject aims to introduce students to the various elements and dynamics of organizational behavior.

		Hours	Marks
Chapter 1	Introduction to organizational behavior	04	04
1.1	Organizational behaviour defined		
1.2	Relevance and Scope.		
Chapter 2	Foundation of individual behaviour	06	06
2.1	Environmental factors		
2.2	Personal factors		
2.3	Organizational factors		
2.4	Psychological factors		
2.5	Personality, perception, attitudes and learning		
Chapter 3	Motivation	06	06
3.1	Nature of Motivation		
3.2	Theories of motivation-Maslow, Herzberg, Equity And Expectancy		
Chapter 4	Foundation of Group Behaviour	06	06
4.1	Group Dynamics		
4.2	Group Formation		
4.3	Group Task		
4.4	Group Decision making		

Chapter 5	Leadership	04	04
5.1	Nature of leadership		
5.2	Theories of leadership - Traittheory, Behavioural and Fielder's contingency theory		
Chapter 6	Communication	04	04
6.1	Inter personal communication		
6.2	Barriers and ways of ovrcoming barrirs		
6.3	Organizational communication		
6.4	Informal communication		
Chapter 7	Conflicts	03	04
7.1	Causes of conflicts		
7.2	Ways of overcoming conflicts		
Chapter 8	Organization	05	04
8.1	Organizational structures		
8.2	Behavioural implications of diffrent structures		
Chaper 9		05	06
9.1	Organizational Change		
9.2	Factors responsible for change		
9.3	Resistance to change		
9.4	Implementation of the change process		
	Ways of overcoming the resistance		
Chapter 10	Organizational Culture	05	06
10.1	Definition and importance of organizational culture		
10.2	Creation and sustenance of organizational culture

SUBJECT CODE: AEE 106					
SUBJECT: HOTEL ECONOMICS					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	-	-	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and theories of application of management techniques in the field of economics. Moreover they should be able to understand the Manager's role in the decision making process from economic view point.

		Hours	Marks
Chapter 1	Nature & Significance of Managerial Economics	04	08
1.1	Meaning, Features & Significance		
1.2	Functions of Managerial Economist		
Chapter 2	Basic Terms used in Economics	08	08
2.1	Micro & Macro Economics		
2.2	Problem of Scarcity - Lionel Robbins Definition of Economics		
2.3	Economic Tasks-Production & Distribution		
2.4	Economic Entities - Household & Firm		
2.5	Distinction between Plant, Firm & Industry		
Chapter 3	Demand Analysis	12	08
3.1	Meaning Types & Determinants of Demand		
3.2	Meaning & Determinants of Individual & Market Demand		
3.3	Demand Function & Demand Schedule		
3.4	The Law of Demand		
Chapter 4	Theory of Consumer Demand	10	06
4.1	Utility - Meaning & Types		
4.2	The Law of Diminishing Marginal Utility		
4.3	The Law of Equi-Marginal Utility		

Chapter 5	Elasticity of Demand	10	06
5.1	Concepts, Kinds & Types		
5.2	Measurement of Price Elasticity Demand		
Chapter 6	Production Analysis	08	06
6.1	Concepts & Attributes		
6.2	The Law of Variable Proportions		
6.3	The Law of Returns to Scale		
Chapter 7	Supply Analysis	06	04
7.1	Meaning & Determinants of Supply		
7.2	The Law of Supply		
7.3	Elasticity of Supply meaning, measurement & factors Affecting elasticity of Supply		
Chapter 8	Types of Market	06	04
8.1	Meaning & Classification of Market Structure		
8.2	Types of Market Structures Formed by the Nature of Competition		

REFERENCE BOOKS

- 2 Modern Micro Economics, Ahuja H.L.S. Chand Publishing
- 3 Business Economics (Micro), Dr. (Ms). Girija Shamkar, Nirali Prakashan

SUBJECT CODE: AEE 107					
SUBJECT: FINANCIAL MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and theories of Financial Management in the Hospitality industry. This will also help the student in analyzing the financial statements and capital budgeting.

		Hours	Marks
Chapter 1	Financial Management	04	04
1.1	Definition, Scope and objectives Branches of accounting.		
1.2	Historical, Cost, Financial control , Financial Management and Revenue.		
Chapter 2	Ratio Analysis	12	08
2.1	Meaning, Importance and limitations		
2.2	Practical problems on computation of Liquidity Ratios. Turnover Ratio, Debtors Turnover Ratio, Creditors Turnover Ratio, Long-term Solvency Ratios-Proprietary Ratio, Debt Equity Ratio.		
2.3	Profitability Ratios - Gross Profit, Net Profit, Operating ratio, Practical problems on preparation of Balance sheet from given Ratios.		
Chapter 3	Funds Flow and Cash Flow Statement	12	10
3.1	Nature, Importance and Uses		
3.2	Differences between Funds Flow and Cash Flow Statement Practical problems on preparation of Funds Flow considering following adjustment only : Depreciation		

	Onfixed Assets, Dividend- Interim and Finaland Taxation		
Chapter 4	Working Capital Management	08	06
4.1	Definition and Meaning		
4.2	Factors affecting working capital		
4.3	Working capital cycle		
4.4	Practical problems on determination of working capital		
Chapter 5	Capital Budgeting	10	06
5.1	Meaning and Importance		
5.2	Practical problems on capital budgeting : payback period, Accounting Rate of return, Netpresent Value		
Chapter 6	Budgets, Budgeting and Budgetary Control	08	08
6.1	Definition and Characteristics of Budgets		
6.2	Meaning and Advantages of Budgetary control		
6.3	Practical problems on Cash Budget, Flexible Budget		
Chapter 7	Introduction to Pricing and Value added Tax.	10	08
7.1	Importance of Pricing.		
7.2	Methods of Pricing - Costplus, Rate of Return, History, Meaning and Advantages of Value added tax		
7.3	History, Meaning and Advantages of Value added tax In Hotel and Catering establishment		

The students may be assigned exercises related to Hotel Accounting to get hands on experience. They may be given assignments to collect various Formats use in the Hotel Industry and to present same in the class.

SUBJECT CODE:DSE 201					
SUBJECT: ADVANCED FOOD PRODUCTION & KITCHEN MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
0	40	60	-	100	04

Rationale

The subject intends to provide indepth insight into international cuisine and develop advanced understanding of technical as well as managerial skills for culinary professional.

		Hours	Marks
Chapte 1	Production Management	02	04
1.1	Introduction to production management		
1.2	Kitchen organization		
1.3	Allocation of work, Job Description, Duty Roaster		
1.4	Production planning & scheduling		
1.5	Production Quality & Quantity Control		
1.6	Forecasting and Budgeting		
Chapter 2	Nouvelle cuisine	02	04
2.1	Evolution of Nouvelle cuisine		
2.2	Principles of Nouvelle cuisine		
Chapter 3	Food presentation & Garnishes	02	04
3.1	Importance of food presentation		
3.2	Skills and techniques in food presentation		
3.3	Importance of garnishes		
3.4	Ten classical garnishes		
Chapter 4	International Cuisine	20	20
4.1	Influence of Geographical location, Historical background on		

staple food and cuisines of following countries.

1. Tex-Mex 2. France 3. Italy 4 China

5. Spain 6. Germany 7. Great Britain 8. Japan

9. Mediterranean region 10. South East Asia

Chapter 5	Meringues	02	02
5.1	Making of meringues		
5.2	Factors affecting stability		
5.3	Cooking of meringues		
5.4	Types & uses of meringues,		
Chapter 6	Sugar	02	04
6.1	Tools required for sugar work		
6.2	Types of Sugar as decorative work-spun sugar, pulled sugar, poured sugar, blown sugar		
Chapter 7	Chocolate	02	04
7.1	Manufacture		
7.2	Couverture		
7.3	Tempering		
7.4	Moulding		
7.5	Chocolate decorations		
Chapter 8	Icing & Topping	04	04
8.1	Icing : Types- Flat, Royal, Butter Cream		
8.2	Marzipan, Nougatine, pastillage, Ganache		
8.3	Cooking of meringues		
8.4	Types & uses of meringues.		
Chapter 9	Recipe Balancing	02	04
9.1	Importance of recipe balancing		
9.2	Principles of recipe balancing in cake making & bakery		

Chapter 10	Pastries	05	06
10.1	Types-Shortcrust, Flakey, Puff, Danish, Choux, Filo		
10.2	Faults & their causes.		
Chapter 11	New Concepts in Culinary	05	04
11.1	Molecular Gastronomy : Concept.		
11.2	Organic foods		
11.3	Vegan cuisine

SUBJECT CODE:DSE 201 (A)				
SUBJECT: ADVANCED FOOD PRODUCTION & KITCHEN MANAGEMENT (PRACTICAL)				
Teaching Scheme/Week	Examination Scheme			
Practical Hours	IA Marks	EA Marks	Total Marks	Credits
08	40	60	100	04

Minimum 24 International menus to be conducted.

The menus should cover the following regions of the world :

1. Tex-Mex
2. France
3. Italy
4. China
5. Spain
6. Germany
7. Great Britain
8. Japan
9. Mediterraneanregion
10. South East Asia

Students are required to maintain a journal to record the various practicals attended and the teacher must record the performance evaluation of the same on a day to day basis.

SUBJECT CODE:DSE 202					
SUBJECT: FOOD & BEVERAGE OPERATIONS & MANAGEMENT (THEORY)					
Teaching Scheme/Week		Examination Scheme			
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	4	60	-	100	04

Rationale

To impart comprehensive knowledge about bar operation and management skills.

		Hours	Marks
Chapter 1	Introduction to Bar & Bar Beverages	12	12
1.1	Alcoholic Beverages		
1.2	Non Alcoholic Beverages,		
1.3	Aerated Beverages, Bar Syrups, Squashes and Cordials		
	Premixed Drinks Mineral, Spring water, flavoured and packaged waters.		
1.4	Aperitifs, Liqueurs and digestifs		
1.5	Types of Bars		
1.6	Role of Various personnel's in the bar.		
1.7	Bar Equipment's and their uses (Large and Small equipment's)		
Chapter 2	Planning of Bar	08	06
2.1	Layout of a bar		
2.2	Factors to be considered while planning a bar		
2.3	Safety and hygiene consideration		
2.4	Seating Arrangements of various bars.		
Chapter 3	Bar Controls & Statutory Requirements	08	06
3.1	Purchasing, Receiving and storing of Beverages		

3.2	Inventory/Stock Control methods.		
3.3	Calculation of Beverage cost., Daily, Weekly Bar Reports.		
3.4	Sales Summary and Sales Analysis, Sales Mix.		
Chapter 4	Mixology	10	10
4.1	Introduction to the science of Mixology.		
4.2	Cocktail making		
4.3	Glassware and garnishes.		
4.4	Making of Traditional and Innovative cocktails.		
4.5	Flair bartending		
Chapter 5	Function and Event Catering	08	10
5.1	Definition of function catering and types of functions		
5.2	Organizational structure of Banquet department, duties and		
5.3	Responsibilities of various personnel's		
5.4	Function catering administrative procedures		
5.5	Preparation of function prospectus.		
5.6	Menu planning for various types of functions		
5.7	Seating arrangement for various functions, Table plan and		
5.8	space considerations. Off premises / out-door catering.		
Chapter 6	Gueridon Service	08	06
6.1	Origin and Definition.		
6.2	Types of trolleys.		
6.3	Special equipments used in Gueridon service care and		
6.4	Maintenance.		
6.5	Service Procedure.		
6.6	Service of classical dishes.		
Chapter 7	Buffets	04	04
7.1	Definition		

7.2	Types of Buffets		
7.3	Equipments and set up of buffets.		
Chapter 8	Menu Engineering	03	03
8.1	Concept and application.		
8.2	SWOT analysis of various food and beverage outlets.		
Chapter 9	Customer Relationship	03	03
9.1	Handling Customer Complaints.		
9.2	Customer SAtisfaction

SUBJECT: ACCOMMODATION MANAGEMENT (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
0	40	60	-	100	04

Rationale :

The subject aims to establish the importance of management in Accommodation Operations.

This course aims to establish the importance of Front Office within the hospitality industry. It also prepares the student to acquire management skills and knowledge in the Department.

	Topic	Hours	Marks
Chapter 1	Pioneers of the hotel industry	04	02
1.1	Founders of the Hotel Industry		
1.2	Developments in hotel industry		
1.3	Indian chain hotels-History & growth		
Chapter 2	Social skills required for Rooms Division staff	06	06
2.1	Introduction and Importance of social skills		
2.2	Behaviorial skills-self presentation, body language Cross culture-Styles of welcoming, need for foreign language, global language		
Chapter 3	Budgeting in Rooms Division	06	08
3.1	Definition, concept & importance		
3.2	Type of budgets - capital & operating		
3.3	Budgeting for front office operations- Forecasting Revenue, Estimating Expenses, Refining Budget Plans		
Chapter 4	Revenue Management	06	06
4.1	Concept		

4.2	Measuring & maximizing Yield		
4.3	Elements of Revenue Management		
4.4	Using Revenue Management- concept of ARR and REV PAR		
4.5	Calculation of Yield statistics and yield management		
Chapter 5	Evaluating Front Office Operations	06	06
5.1	Daily Operations Report		
5.2	Occupancy Ratios		
5.3	Rooms Revenue Analysis		
5.4	Hotel Income Statement		
5.5	Rooms Division Income Statement		
5.6	Rooms Division Budget Reports		
5.7	Operating Ratios		
5.8	Ratio Standards		
Chapter 6	Introduction to Management Information System	06	06
6.1	MIS-Introduction, Definition, Concept Understanding information system, MIS for key decisions		
6.2	Property management system - Various modules related to Reservations, Registration, Cashiering, Telephones, Guest history		
Chapter 7	Managing Human Resource in Rooms Division Department	06	06
7.1	Determining manpower requirements.		
7.2	Recruitment		
7.3	Training		
7.4	Staff Scheduling		
7.5	Staff Motivation		
7.6	Performance Appraisal		

7.7	Effective use of SOP's in front office departments.		
Chapter 8	New property operations	06	06
8.1	Starting up Rooms Division Operations		
8.2	Systems and procedures		
8.3	Staffing consideration		
8.4	Count down		
Chapter 9	Housekeeping in Allied sectors	08	08
9.1	Need & Importance		
9.2	Institutional Housekeeping-Hostels, guest houses & residential		
9.3	Homes		
9.4	Housekeeping in Hospitals		
9.5	Housekeeping in Retail sectors		
	Housekeeping in Art Gallery, Museum		
	Housekeeping in Aircrafts, Airports		
	Corporate Housekeeping.		
Chapter 10	Customer Relationship Management in Rooms Division	06	06
10.1	Definition & concept		
10.2	Importance of loyalty programme		
10.3	Benefits of loyalty Programme		
10.4	Types of loyalty programme		

Glossary of Terms

Capital budget	Operating budget	Pre opening budget
Flexible bedget	Fixed budget	Master budget

14. Preparation of a checklist for Rooms Division tasks in the countdown of a new property launch.
15. Planning Start up systems and procedures in the Rooms Division department of a new start up property.
16. Planning for a housekeeping operation in Retail and Corporate sectors, Hostels, Guest houses and Hospitals.

Assignment

1. Preparation of job descriptions for housekeeping personnel
2. Preparation of orientation and induction training programme for housekeeping staff
3. Preparation of performance appraisal report
4. Preparation of SWOT analysis for Rooms Division Department
5. Preparation of SOP's for front office department. Preparation of SOP's for Protocols of VVIP, VIP's and CIP's & traditional welcome amenities (Ministers, Dignitaries, Govt. Officials, Foreign delegates and others)
6. Preparation of SOP's for different tasks in Housekeeping department.

SUBJECT CODE:SEC 104**SUBJECT: APPLICATION OF COMPUTERS IN HOTELS (THEORY)**

Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
02	20	30	---	50	02

Rationale

The subject aims to give a basic knowledge of computers and its operations and enables the student to operate the computer with enough practice to get confidence.

		Hours	Marks
Chapter 1	Computer Fundamentals	03	03
1.1	Features of Computer System		
1.2	Block Diagram		
1.3	Hardware Input & Output Devices, CPU, RAM, ROM		
1.4	Software - System, Applications/W		
1.5	Networks - LAN, MAN, WAN, Topologies		
1.6	Viruses- Types, Precautions		
1.7	Types of Software- System & Application software's		
Chapter 2	Windows	03	03
2.1	Features		
2.2	Terminologies - Desktop, Windows, Wallpaper, Icons, File, Folder, etc. Windows Explorer - (Assignment with files, folders)		
2.3	Accessories - Paint, Notepad, Calculator,		
Chapter 3	MS Word	03	02
3.1	File Commands, Print, Page Setup		
3.2	Editing - Cut, Copy, Paste, Find, Replace, etc.		

3.3	Formatting Commands - Fonts, Bullets, Borders, Columns, Tabs, Indents.		
3.4	Tables, Auto Text, Auto Correct		
3.5	Mail Merge, Hyperlinks		
Chapter 4	MS Excel	03	03
4.1	Features, Auto Fill, Custom Listsetc		
4.2	Cell Reference - Relative & Absolute (s)		
4.3	Formulae, Functions (Math/Stats, Text, Date, IF)		
4.4	Charts-Types, Parts of the Chart		
4.5	Databases (Create, Sort, Auto Filter, Sub Total)		
Chapter 5	MS Powerpoint	04	03
5.1	Slide Layout, Slidetransition		
5.2	Clip Art, Organizational Chart, Graphs, Tables.		
5.3	Custom Animations, Slide Timings.		
Chapter 6	Internet / Email	04	04
6.1	History, Pre-requisites for Internet, Role of Modem		
6.2	Services - Emailing, Chatting, Surfing, Blog		
6.3	Search Engines, Browsers, Dial Up, Domains		
6.4	Broadband, Concepts of Webupload, download		
6.5	Threats - Spyware, Adware, SPAM		
Chapter 7	E-Commerce And ERP Concepts	03	03
7.1	Concepts of B-to-B, B-to-C		
7.2	ERP Concept		
7.3	SAP Concepts		
Chapter 8	Hospitality Software	03	03
8.1	Shawman Hospitality Software- Point of Sale (VPOS - 9)		

8.2	Introduction		
8.3	Restaurant order taking		
8.4	Add on command prompt		
8.5	Cheque making -single, split etc.		
8.6	Bill settlement		
8.7	Availing Discounts		
Chapter 9	Hospitality software	03	03
9.1	Shawman Hospitality Software-Property Management System		
9.2	Introduction		
9.3	Room Reservations		
9.4	Group Booking		
9.5	Payment Settlement		
9.6	Adding Discounts		
9.7	Payroll Management System		
Chapter 10	Hospitality Software	03	03
10.1	Shawman Hospitality Software- Human Resource Management System		
10.2	Sales & Catering Management System		
10.3	Wire data System		
10.4	Customer feedback system		
10.5	Introduction		
10.6	Payroll		
10.7	Customer Feedback		
10.8	Communication within the property & Outside the property		
10.9	Other Hospitality Software's Fidelio, Opera, Oracle, Micros

04	40	60	---	100	02

Practical 1 COMPUTER FUNDAMENTALS

Input Devices, Output devices,
LAN, WAN, MAN

Practical 2 WINDOWS

Change wallpaper, set screen saver, Create folders and files using Notepad.
Cut, copy and paste files to floppy/ pen drives.
Create images using Paint
Check free disk space and speed of processor.
Change date and time.

Practical 3, 4, 5, 6 WORD

Type recipe of any dish, with its image, with ingredients inatable.
Create KOT, Student's Resumes with students photograph. (WORD)
Letter Writing
KOT Making
Company Letter head making
File, Edit, View, Insert, Format, Tools, Table Commands Page Setup, Print File, Edit, View, Insert, Format, Tools, Table Commands Page Setup, Print Options, Setting Page Margins Clip Arts, Inserting Pictures/Charts/Files Correcting Text, Cut, Paste, Undo, Redo, Deleting Blank lines, Inserting A Page, Typing Over Text, Replacing Text, Moving And Copying Text. menu Method, Key Board Method, Tool Bar Method, Drag & Drop Method, Checking Text, The Spell Checker, Auto Correct Check Up, The Grammar Checker, Formatting A Text, Changing Type Style, Character Highlighting, Alignment of Text, Left, Right

Center, Justifying Text-Types & Tab Setting, Setting Tab Using Ruler, Indenting Paragraphs, Increasing And Decreasing Indents, Using Ruler To set Indents, Spacing Paragraph Line Spacing, Spacing Between Paragraphs. Page Views, Normal Views, Page Layout View, Outline View, Print Preview, "Full Screen View, Master Document View, Magnification, Page Formatting, Setting Margins, Paper Size, Printing in Landscape Or Portrait Orientation, Page Numbering, Adjoining Page Numbering, Deleting Page Numbering, Header & Footer, Creating And Editing Inserting And Deleting Pages in A Document, Saving The Text, Saving The File To Disk, Closing A file, Opening A Non-Work document Printing Text.

Practical 7, 8, 9

EXCEL

List of employees, with salary,

KOT,

Report Card with Pass/Fail Result, Bills with details of Hotel Rooms, Charts, Data base of Employees with filters

Processing With MS Excel, Starting Excel, Starting New Work Book, Entering And Editing Data, Formatting Work Sheet, Sorting The DATA, The Worksheet Selecting Cells And Ranges, Selecting With Mouse, Data Entry, Entering Numbers, Text, DATE & Time Entries, Entering Series, Filing A Text Series With Auto Fill, Filing A Number Series, Editing DATA, Clearance And Replacing Contents of A Cell, Deleting The Contents of A Range of Cell, Re-arranging Work sheet data, Copying Auto Correct, Spell Checking, File dose, Formatting Data, Font Selection, Aligning DATA, Format Style, Formatting Work Book, Arranging, Hiding, Unhiding, Inserting Columns And Rows, Adjusting Width, Copying And Moving, Inserting And Deleting Sheets From Work Book, Mathematical Operator, Exponentiation And Percentage Operators, Logical Or Comparison Operator, Exponentiation And Percentage Operators, Logical Or Comparison Operators, Using Mouse To Create A Formula. Inserting A Chart, Chart Types, Modifying Chart Adding Drawing To the Chart, Printing In Excel, Print Parameters, Default And Changing Default Settings, Sorting, Printing Etc.

Practical 10, 11

POWER POINT

To Present the above information as a presentation as an assignment.

Use different layout, organization chart, design templates, in the presentation.

Opening And Saving Presentations The Easy Way -Using Auto Content Wizard-Working With Blank Presentation -Using The Templates -Using

The Slide Master Working with Color Schemes- Working with slides, Making A New Slide Move, Copy or Duplicate Slides Delete A Slide Copy A Slide From One Presentation To Another Go To Specific Slide-Change The Lay Out of A Slide Zoom In or Out of Slide Working With Text In Power Point Cutting, Copying and Pasting-Formatting Text, Change Font & Size, Shadowing, Embossing-Alignment The Text-Left, Center, Right And Justify-Power Of Graphics In Power Point Working With Clipart Picture- Using Microsoft Excel-Chart-Using Organization Charts-Power Point Drawings Ways To Draw- Adding Lines Connecting Lines Borders And Adding Curves - Creating Word Tables Making Great Looking Presentations (Putting On A Show)- Arranging, Creating Animated Slides - Manually Advancing Slides-Adding And Removing Transitions - Running A Presentation Continuously Printing The Presentation Elements.

Practical 12

INTERNET

To search and downloading formation from the internet as a topica and submit (Hard/Softcopy)

Create email id, send mail to faculty as an assignment.

Practical 13, 14

Shawman - Point of Sale

Shawman Hospitality Software - Point of Sale (VPOS9)

Introduction

Restaurant ordertaking

Add on command prompt

Cheque making - single, split etc.

Availing Discounts

Bill Printing, Re-printing, Bill settlement

Practical 15

Property Management System

Taking Rooms Booking

Adding Discounts

Billing

Practical 16

Payroll System

Calculating Paryroll

Appraisal System

SUBJECT CODE:AEC 103					
SUBJECT: HOSPITALITY MARKETING (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	--	100	03

Rationale

This subject intends to promote and understanding of core concepts of marketting, current marketing environment, challenges in marketing of services and the marketing strategies to be adopted.

		Hours	Marks
		04	04
Chapter 1	Introduction to Marketting		
1.1	Defining Marketing

SUBJECT: HUMAN RESOURCE MANAGEMENT (THEORY)					
Teaching Scheme/Week		Examination Scheme			
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
03	40	60	-	100	03

Rationale :

The student will be able to understand the role and importance of Human Resource Management in the modern hospitality environment.

		Hours	Marks
Chapter 1	Introduction to Human Resource Management.	04	06
1.1	Human Resource Management defined.		
1.2	Human Resource Management and Personnel Management.		
1.3	Role, Nature and Characteristics of Human Resource Management		
1.4	Functions of Human Resource Management		
1.5	Challenges for Human Resource Management		
Chapter 2	Human Resource Planning	10	10
2.1	Man power planning-concept need and technique.		
2.2	Process of manpower planning.		
2.3	Job analysis, job description, job specification.		
2.4	Recruitment/Sources of recruitment.		
2.5	Selection, orientation and induction process		
Chapter 3	Human Resource Development	06	06
3.1	Definition and elements of Human Resource Development.		
3.2	Training - need and importance.		
3.3	Assessment of training needs.		
3.4	Difference between training and development		

Chapter 4	Performance Management and Appraisal	08	08
4.1	Performance Management - Need and importance.		
4.2	Performance Appraisal - Purpose method sanderrours.		
4.3	Career Management promotion and transfers.		
4.4	Career development and its benefits.		
4.5	Need for career counseling		
Chapter 5	Performance and Job Evaluation	08	04
5.1	Performance evaluation and its objectives		
5.2	Job Evaluation-concept and objectives, methods of job evaluation		
5.3	Limitations of Job Evaluation.		
5.4	Competency matrix-concept, benefits and implementation In the hospitality industry.		
Chapter 6	Compensation Administration	10	08
6.1	Objectives of compensation administration.		
6.2	Types of compensation-direct and indirect.		
6.3	Factors influencing compensation administration- External and internal factors, concept of Cost to Company (CTC)		
6.4	Steps in formulation of compensation packages.		
6.5	Current trend in compensation - competency and Skill based pay, Broad banding.		
Chapter 7	Incentives and Benefits	08	06
7.1	Objectives of wage incentives.		
7.2	Wage incentives planning process.		
7.3	Types of incentive schemes in brief-straight piece rate, differential piecerate, task and time bonus, meritrating.		
7.4	Organisation wide incentive plans-profit sharing, Employee stock options (ESOP)		
7.5	Fringe benefits -objectives and forms		
Chapter 8	Grievances and Discipline	03	06
8.1	Grievance Handling -causes of grievances.		

-
-
- 8.2 Grievance handling system.
 - 8.3 Discipline aims and objectives.
 - 8.4 Causes of indiscipline.
 - 8.5 Women Grievance committee-importance, Role and functions.

Chapter 9 Industrial Relations - Labour and Management Relations 03 06

- 9.1 Trade union-concept, objectives and functions.
- 9.2 Collective Bargaining.
- 9.3 Workers participation in management in hospitality industry.
- 9.4 Labour turn over-causes and measures for reducing labour turnover, retention
- 9.5 Strategies implemented by the hospitality industry.

REFERENCE BOOKS.

SUBJECT CODE:SEE101					
SUBJECT: FIRST AID					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

To develop awareness of the importance of hygiene, sanitation and food safety in hotel industry.

		Hours	Marks
Chapter 1	Introduction to First Aid	10	10
1.1	First Aid		
1.2	First aid priorities		
1.3	How to prepare yourself during an emergency		
1.4	Looking after yourself: Personal safety and protection from infections		
Chapter 2	Accidents and Injuries	12	10
2.1	Dealing with a casualty		
2.2	Requesting help		
2.3	Use of medication		
2.4	Assessing a casualty: Methods of assessment Head to toe examination Monitoring vital sign		
Chapter 3	Managing an incident	14	10
3.1	Removing clothing and headgear		
3.2	First aid material: Dressings, Bandages, slings.		
3.3	Action at an emergency		
3.4	Traffic incidents		

3.5	Fires		
3.6	Electrical incidents		
3.7	Water incidents		
Chapter 4	Emergency first aid for	14	10
4.1	Wounds and bleeding		
4.2	Shock		
4.3	Head injury		
4.4	Spinal injury		
4.5	Broken bones		
4.6	Burns and Scalds		
4.7	Poisoning		
4.8	Bites and Stings		
Chapter 5	Life saving procedures	14	10
5.1	Resuscitation		
5.2	Choking		
5.3	Hanging and Strangulation		
5.4	Drowning		
5.5	Inhalation of fumes		
5.6	Asthma

SUBJECT CODE:SEE 102					
SUBJECT: HOTEL MAINTENANCE					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

The subject will provide information regarding the basic services and different types of engineering and maintenance systems in hotel industry. This subject will help students understand various aspects and importance of the Engineering department in a hotel. At the end of the course students will be thorough with various machines and their working, fuels, electricity, safety and security, water distribution systems and energy conservation in hotel.

		Hours	Marks
Chapter 1	Maintenance & Replacement Policy	07	05
1.1	Definition of Maintenance		
1.2	Importance of Maintenance department in the hotel Industry		
1.3	Organization chart of Maintenance department in 3/4/5 star hotels		
1.4	Duties & responsibilities of Chief Engineer of a hotel		
1.5	Types on maintenance and their advantages and disadvantages <ul style="list-style-type: none"> • Breakdown/Corrective • Preventive • Predictive. 		
1.6	Contract Maintenance <ul style="list-style-type: none"> • Need of contract maintenance • Types: Lumpsum, Unit price/Unit Rate, cost plus upper limit Contract 		
1.7	Maintenance chart for <ul style="list-style-type: none"> • Swimming Pool: Daily basis and Quarterly basis • Kitchen: Daily basis and Quarterly basis 		
1.8	Replacement of Equipments: <ul style="list-style-type: none"> • Reasons for replacement • Economic placement of equipments 		
Chapter 2	Refrigeration	08	08
2.1	Definitions: Heat, Temperature, Sensible heat, Latent Heat, Relative Humidity, Zero Law of Thermodynamics, First Law of Thermodynamics,		

2.2	Methods of Heat Transfer:		
	• Conduction		
	• Convection		
	• Radiation		
2.3	Refrigeration		
	• Principle of refrigeration		
	• Unit of Refrigeration		
	• Refrigerants: Properties and Types		
	• Block diagram and working of Vapour Compression Refrigeration System		
	• Block diagram and working of Vapour Absorption Refrigeration System		
2.4	Domestic Refrigerator:		
	• Block Diagram and working		
	• Maintenance		
	• Defrosting: Need, Methods		
2.5	Walk in Freezer/Cold Storage		
	• Block diagram		
	• Working		
Chapter 3	Air Conditioning	06	06
3.1	Types of AC		
	• Unitary AC: Window A C and S plit AC		
	• Block Diagram and Working		
3.2	Factors affecting Load on AC		
3.3	Factors affecting AC Comfort		
Chapter4	Fuels	04	04
4.1	Types of Fuels		
4.2	Comparison of various Fuels: Solid, Liquid And Gaseous		
4.3	Fuels used in the hotel industry		
Chapter5	Electricity	07	06
5.1	Types of Electricity supply: Single and Three Phase		
5.2	Types of Fuse: Re-wireable, Cartridge, MCB.		
5.3	Importance and method of Earthing		
5.4	Calculation of Electricity Bill		

Chapter 6	Water Systems	08	07
6.1	Sources of water.		
6.2	Adverse effects of hard water		
6.3	Methods of purification & water softening: Ion Exchange, limesoda.		
6.4	Water Distribution System: Up Feed and Down Feed		
6.5	Traps, Water Closets and Flushing Systems: Types, diagrams, functions.		
6.6	Various plumbing fixtures		
Chapter 7	Energy & Its Conservation	06	04
7.1	Various energy sources: Conventional & Non Conventional (Examples, Advantages and Disadvantages)		
7.2	Need for energy conservation		
7.3	Simple Methods of energy conservation in Kitchen & Guest room.		
7.4	Use of Solar Energy in a hotel		
Chapter 8	Fire & Its Prevention	06	04
8.1	Fire Triangle		
8.2	Fire types: A, B,C,D, E,F		
8.3	Theory of Extinguishment: Starvation, Cooling, Smothering		
8.4	Various types of fire extinguishers		
8.5	Smoke Detectors and Fire Alarm system		
Chapter 9	Safety and Security in Hotel	06	03
9.1	Causes of Accidents		
9.2	Prevention /Control of Accidents		
9.3	Safety Issues in Hotel: <ul style="list-style-type: none"> • Guest Key Control • Kitchen Safety • Slip & fall 		
Chapter 10	Pollution & Control	06	03
10.1	Air Pollution: Causes and Effects		
10.2	Water Pollution: Causes and Effects		
10.3	Noise Pollution: Causes and Effects		
10.4	Waste Management		

Note

Field Visits–Field visit to be arranged for students to engineering department of a five star hotel. Working of AC Plants and other aspects and systems of maintenance department to be shown to students. Are part of the same must be submitted by students individually.

Assignments

1. Write Short Note one co-friendly Refrigerant.
2. Explain Centralized Air Conditioning in Detail with block diagram
3. Explain the working of Air filter, Humidifier and Dehumidifier in AC
4. Enlist and Explain water purification methods
5. Explain various Lighting systems used in Hotel
6. Write procedure to be followed in case of Fire Alarm in Hotel
7. Make a chart for various fire extinguishers with colour code and the type of fire it extinguishes.
8. Write notes on: Waste Disposal Methods– Incineration and Land Fill

SUBJECT CODE:SEE103					
SUBJECT: RETAIL MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and application of retail management techniques.

		Hours	Marks
Chapter 1	Retailing	04	04
1.1	Concept, Importance, Functions		
1.2	Retail as a career.		
Chapter 2	Retailformats	08	06
2.1	Store & NonStore		
2.2	Retailing		
2.3	Franchising		
2.4	Unconventional channels		
2.5	Retail expansion-need for foreign direct investment in Indian retail.		
Chapter3	Indian Vs. Global Scenario in Retail	08	06
3.1	Evolution of retail in India		
3.2	Traditional business models in Indian retail		
3.3	Drivers of retail change in India		
3.4	Key sectors in Indian Retail		
3.5	International retailing- factors contributing to it's growth		
Chapter 4	The Retail Consumer	06	06
4.1	Need for understanding consumer buying behavior		
4.2	Customer decision making process		
4.3	Factors influencing the retail shopper		
Chapter 5	Retail Strategy	06	06
5.1	Importance of strategy from a retail perspective.		
5.2	The strategic planning process		

Chapter 6	Retail Location	06	06
6.1	Factors affecting location decision		
6.2	Site Selection		
6.3	Store Design		
Chapter 7	Basics of Retail Merchandising	08	06
7.1	Concept, Importance, Functions		
7.2	Function and methods of buying for different types of organizations Introduction to Private label Brands-concept and need.		
Chapter 8	Retail Pricing	06	06
8.1	Factors affecting retail pricing decisions		
8.2	Pricing Strategies		
Chapter 9	Retail Store Operations	08	06
9.1	Concept		
9.2	Functional are as of retail operations		
9.3	Floor space management		
9.4	Managing store inventories and display		
Chapter 10	The legal and Ethical aspects of the retail business	06	04
10.1	Acts pertaining to the retail sector		
10.2	Taxation and its impact on retailing

SUBJECT CODE:SEE104					
SUBJECT: EVENT MANAGEMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale

This subject helps the students to develop an understanding of the concepts and theories of application of management techniques inorganising of events.

		Hours	Marks
Chapter 1	Event Management	08	08
1.1	Introduction - Event Management		
1.2	Size of Event		
1.3	Types of Events - Cultural, festivals, religious, business etc.		
1.4	Case study of some events		
Chapter 2	Planning an Event	08	08
2.1	Principles and steps in Planning		
2.2	Consultation with client: Setting objectives, confirmation of date, list of guests, theme finalization, Event agenda		
Chapter 3	Conceptand Design	10	5
3.1	Developing the concept		
3.2	Analyzing the concept		
3.3	Designing the event		
3.4	Logistics of the concept		
3.5	Feasibility		
Chapter 4	Legal Compliance	06	05
4.1	Relevant legislations		
Chapter 5	Activities in Event Management	12	10
5.1	Pre event activities		
5.2	During event activities		

5.3	Post event activities		
5.4	Managing an event– Planning, Staging, Staging, Organizing, Leadership and Co-ordination, Controlling, Evaluation, Protocol		
5.5	Financial Considerations		
5.6	Marketing and Promotion		
Chapter 6	Planning Venues	08	05
6.1	Finding a venue, requirement of space		
6.2	Creating request for proposal		
6.3	Site inspection and confirmation		
6.4	Pre event meeting		
Chapter 7	Marketing of the Event	08	05
7.1	Tools used for marketing: advertising, publicity, Sponsorship and media.		
Chapter 8	Dealing with the Vendors	04	04
8.1	Types of vendors, choosing vendors		
8.2	Vendor contracts

SUBJECT: ENTREPRENEURSHIP DEVELOPMENT					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	--	--	50	50	04

Rationale:

The subject aims to provide information regarding the various aspects pertaining to becoming a successful entrepreneur in the Hotel & Catering Industry.

	Hours	Marks
Chapter 1 Introduction of Entrepreneurship	10	08
1.1 Who is an entrepreneur?		
1.2 Definition of an Entrepreneur, Entrepreneurship and Intrapreneur Concept, Classification, Characteristics and skills of an Entrepreneur		
1.3 Qualities of an Entrepreneur		
1.4 “ Women Entrepreneurship “		
Chapter 2 Introduction to Entrepreneurship	10	08
2.1 Entrepreneurship as a Career		
2.2 Role of an Entrepreneur and Economic development		
2.3 Various Entrepreneurs in India and abroad		
2.4 Identifying the Opportunity (SWOT Analysis)		
Chapter 3 Market Assessment	10	08
3.1 Source of Funding to Business		
Sources of Finance-		
<ul style="list-style-type: none"> • Internal & External Funds • Personal Funds 		

	<ul style="list-style-type: none"> • Family and friends • Commercial Banks • Procedure to get loan from Various banks for Business 		
Chapter 4	Tools and Techniques of Ideation	12	10
4.1	Business plan – Steps involved from concept to commissioning		
4.2	Project report – 1. Meaning and importance		
	2. Components of project report.		
4.3	Project Appraisal -1. Meaning and definition		
	2. Technical, Economic feasibility		
	3. Cost- benefit analysis		
4.4	Risktaking		
Chapter 5	Modern Trends in Entrepreneurship	10	08
5.1	E-Commerce		
5.2	Concept and process		
5.3	Global Entrepreneur		
Chapter 6	Legal acts prevailing in India	12	08
6.1	Various acts applicable in business		
6.2	GST – Introduction

- Using a Room and public area inspection checklist
 - Cleaning of a Guestroom and public area.
 - Checking of the Guestroom and public area using a checklist.
- Flower Arrangements
 - Demonstration of various styles and shapes of flower arrangements.
- Flower Arrangements
 - Preparation of various styles and shapes of flower arrangements.
- Introduction to Horticultural aspects.
 - Visit to greenhouse for identification of indoor plants used in hot

els.

- Identification of outdoor plants used in hotels.
 - Identification and use of foliage in flower arrangements.
5. Special decorations for functions in hotel
- Preparations for events organized in hotels—floral rangolis, garlands, tinsel and miscellaneous decorations.
6. Inventory and stock taking of room and cleaning supplies
- Requisition procedure
 - Calculating par stock
 - Stock taking or physical inventory of room and cleaning supplies.
 - Documentation of supplies inventory.
 - Cleaning of housekeeping stores.
7. Using housekeeping software for material management
8. Various methods of pricing contract
9. Pest control demonstration.
10. Standard operating Procedure at housekeeping
- Handing of keys
 - Safety of Guests & Guests Property

-
- Safety of Hotel Property & employees
- 11. Standard operating Procedure at housekeeping**
- To eliminate workplace hazards

ASSIGNMENTS

1. Indoor and outdoor plants used in hotels.
2. Presentation on assignments with the use of Audio Visual aids

DSC 304 / 304 A

CO1 - Learn Importance of the front office accounting system, Types of accounts, Vouchers, Folios & Ledger.

CO2 - Enhance the knowledge of cash and credit handling through front office cashiering.

CO3 - Understand the process of a Night Audit.

CO4 - Learn various types of room rates and methods used to establish room rate.

CO5 - Understand the importance of forecasting and various types of forecasting used in front office department.

CO6 - Understand the Calculations of various statistical data using Formulae in front office.

CO7 - Know how to use software for accounting and preparing MIS at front desk.

CO8 - Understand the importance and use of various vouchers at front desk.

CO9 - Learn various techniques used for credit control at various stages of guest stay.

CO10 - Gain knowledge about calculation of statistics of hotel performance and understand the procedure of Night Auditing.

CO11 - Learn to prepare forecast of occupancy.

CO12 - Know how to calculate room rate with the help of Hubbart's formula.

1. Use of computers in front office accounting
Practice on use of front office software for accounting at front desk.
2. Using and making various vouchers used at front desk
Role play of situations pertaining to using and making vouchers like Allowance voucher, VPO, Cash voucher and miscellaneous vouchers.
3. Credit control practices at front desk
Role play of situations pertaining to credit control practices during reservations.
Role play of situations pertaining to credit control practices during arrival.
4. Credit control practices at front desk
Role play of situations pertaining to credit control practices during occupancy. Role play of situations pertaining to credit control practices during checkout.
5. Preparing a Night Auditors Report.
6. Calculations of various statistical data using Formulae ARR, RevPar, Room Occupancy%, Double Occupancy%, Bed Occupancy%, foreign occupancy%, Local Occupancy%
7. Calculations of various statistical data using Formulae Bed Occupancy%, Foreign occupancy%, Local Occupancy%, Graphical presentation.
8. Preparing Weekly & Monthly forecasts.
9. Using Hubbart's formula for calculating room rate
10. Using front office software for MIS reports
Budgetary reports, Occupancy reports, Income and expenditure reports, forecasting reports etc.

11. Situations dealing with guest problems

Roleplay of situations pertaining to guest problems and emergency situations like bomb, terrorist attack, fire, death and natural disasters.

ASSIGNMENTS

1. Calculation of various statistical data using formula and graphical representation.

Hubbart's Formula for calculating Room rate.

SUBJECT: INDUSTRIAL EXPOSURE & REPORT-II					
Teaching Scheme/Week	Examination Scheme				
Training Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
54	--	120	80	200	21

In the Eight semester the students shall undertake industrial training for a period of 11 weeks, reputed hotel, and restaurant or hospitality organization.

The institute shall assist in the placement of students for training in various hotels. The student can make self arrangement to train in any hotel of his choice. The student will have to bear the necessary expenses involved for the same.

At the end of the industrial training the student shall submit Training Report along with the logbook maintained on a daily basis during the period of training and the performance appraisal from each department.

The training report is to be prepared by the student in two copies and to be submitted to the Training & Placement Officer within the stipulated time for assessment.

The report will be assessed by the internal examiner and only on the basis of a certificate of the examiner concerned that the training has been satisfactorily completed would the student be allowed to appear for the external assessment.

conducted by a panel of examiners comprising of one external examiner (the external would include preferably one from the hotel industry of the level of Head of the Department and above) and one internal examiner. The Continuous Assessment marks will be awarded based on the performance appraisals filled by the hotel managers.

The student is required to practice the discipline & norms laid down by the institute and also follow the rules and regulations of the hotel in which he/she is undergoing training. Any adverse remark from the hotel will call for stringent action.

SUBJECT: REGIONAL CUISINES OF INDIA (PRACTICAL)				
Teaching Scheme/Week	Examination Scheme			
Practical Hours	IA Marks	EA Marks	Total Marks	Credits
08	40	60	100	04

Minimum 20 Practicals including, Indian regional menus to be conducted. The practicals should comprise dishes from the following states / cuisine:

- | | |
|---------------------|---------------|
| 1) Goan | 8) Rajasthani |
| 2) Maharashtrian | 9) Tamilnadu |
| 3) Gujarati/ Parsi | 10) Kashmiri |
| 4) Karnataka | 11) Lucknowi |
| 5) Bengali | 12) Kerala |
| 6) Punjabi | 13) Sindhi |
| 7) Andhra/Hyderabad | |

Students are required to maintain a journal to record the various practicals attended and the teacher must record the performance evaluation of the same on a day to day basis.

DSE 202 / 202 A

CO1 - Classify types and brands of spirits

CO2 - Learn production methods of liqueurs and bitters

CO3 - Understand methods of making cocktails

CO4 - Identify types of glassware used in a bar

CO5 - Acquire the skills for service of spirits and cocktails

CO6 - Develop the ability to compile a beverage list

Mapping of Course Outcome	
CO1	Skill Development

SUBJECT CODE: DSE202					
SUBJECT: ALCOHOLIC BEVERAGES II (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	--	100	04

Rationale

To impart comprehensive knowledge of various spirits, liqueurs and cocktails.

		Hours	Marks
Chapter 1	Spirits	08	06
1.1	Introduction to Spirits		
1.2	Fermentation and Distillation Process		
1.3	Pot Still and Patent still.		
1.4	Various methods of Measuring Alcoholic Strength		
Chapter 2	Whisky	10	08
2.1	Ingredients used in making of Whisky.		
2.2	Manufacturing process of Whisky.		
2.3	Types of Whisky - Scotch and Irish Whisky		
2.4	American and Canadian Whisky		
2.5	International and MFL Brand		
Chapter 3	Brandy	08	08
3.1	Ingredients used in making of Brandy		
3.2	Manufacturing process of Brandy		
3.3	Types of Brandy - Cognac and Armagnac		

3.4	Labeling Terminology		
3.5	Fruit and other Brandies.		
3.6	International and IMFL Brands.		
Chapter 4	Rum	06	06
4.1	Ingredients used in making of Rum		
4.2	Manufacturing process of Rum		
4.3	Type of Rum-White, dark and golden		
4.4	International and IMFL Brands		
Chapter 5	Gin	06	06
5.1	Ingredients used in making of Gin.		
5.2	Manufacturing process of Gin		
5.3	Types of Gin.		
5.4	International and IMFL Brands		
Chapter 6	Vodka	04	04
6.1	Ingredients used in making of Vodka		
6.2	Manufacturing process of Vodka.		
6.3	Types of Vodka		
6.4	International and IMFL Brands.		
Chapter 7	Tequila	06	04
7.1	Ingredients used in making of Tequila.		
7.2	Manufacturing process of Tequila		
7.3	Types of tequila		
7.4	Brands of Tequila		
Chapter 8	Other Alcoholic Beverages	04	06
8.1	Aquavit		
8.2	Schnapps		
8.3	Pastis		
8.4	Feni		
8.5	Arrack		
Chapter 9	Liqueurs	06	06
9.1	Definition and types of liqueurs		
9.2	Production methods		
9.3	Service of Liqueurs		
Chapter 10	Cocktails	06	06
10.1	Introduction and history of cocktails		
10.2	Methods of making cocktails and rules for making cocktails		
10.3	Equipments glassware, and garnishes used in making of cocktails, Cocktail recipe

1. PreparationofTime andmotionstudy andpracticeinHousekeepingroutines.

-
2. Preparation of sample format of ergonomic risk factor analysis for housekeeping staff.
 3. Preparation of guidelines for energy conservation in housekeeping department.
 4. Preparation of lighting system design for guest rooms and public areas.
 5. Preparation of safety and security systems for guest rooms and public areas.
 6. Calculation of energy cost in public areas for energy management.
 7. Calculation of energy cost in public areas for energy management.
 8. Preparation of checklist for eco-friendly housekeeping in hotels.
 9. Practice with computer & PMS handling related to Housekeeping.
 10. Preparation of Housekeeping staff requirement and staff scheduling using housekeeping software.
 11. Preparation of daily housekeeping schedules using housekeeping software.
 12. Preparation of housekeeping history and staff performance reports using housekeeping software.
 13. Planning of a Facility management project for various sectors.
 14. Preparation of a feasibility study for outsourcing housekeeping jobs.
 15. Designing of hotel staff uniforms.
 16. Various reports generated for MIS in housekeeping.

Assignments :

1. Methods of pest control and chemicals used in hotels.
2. Project report on biogas and sewage treatment plants for waste disposal.
3. Project report on Vermicomposting.
4. Project report on Rainwater harvesting.
5. Project report on Ecotel.

Visits:

1. Visit to an Ecotel.
2. Visit to a biogas and sewage treatment plant.
3. Visit to a Vermicomposting plant.
4. Visit to a Rainwater harvesting system.

Visit to a facility management agency.

DSE 301 / 301 A

CO1 - Learn various International Cuisine-

CO2 - Geographical location, Historical background and influence on food, staple diet and ingredients.

CO3 - Learn Advanced bakery skills- Meringues, Chocolate decorations, Sugar work, Icings and toppings, Pastries & Recipe balancing.

CO4 - Learn New concepts in culinary- Vegan, Molecular Gastronomy & Organic foods.

CO5 - Acquire professional skills and techniques required for various International cuisines.

CO6 - Detect and correct various faults in bakery and confectionery products.

SUBJECT CODE: DSE301					
SUBJECT: ADVANCED FOOD PRODUCTION & KITCHEN MANAGEMENT (THEORY)					
Teaching Scheme/Week	Examination Scheme				
Theory Hours	IA Marks	EA Marks	CA Marks	Total Marks	Credits
04	40	60	--	100	04

Rationale

The subject intends to provide in-depth insight into international cuisine and develop an advanced understanding of technical as well as managerial skills for culinary professionals.

		Hours	Marks
Chapter 1	Production Management	02	04
1.1	Introduction to production management		
1.2	Kitchen organization		
1.3	Allocation of work, Job Description, Duty Roster		
1.4	Production Planning & Scheduling		
1.5	Production Quality & Quantity Control		
1.6	Forecasting and Budgeting		
Chapter 2	Nouvelle Cuisine	02	04
2.1	Evolution of Nouvelle cuisine		
2.2	Principles of Nouvelle cuisine		
Chapter 3	Food Presentations & Garnishes	02	04

3.1	Importance of food presentation		
3.2	Skills and techniques in food presentation		
3.3	Importance of garnishes		
3.4	Classical garnishes		
Chapter 4	International Cookery	20	20
4.1	Influence of historical background, geographical location on the staple food and cuisines of the following countries/ regions: France Japan Italy China Germany TexMex Spain Mediterranean Great Britain South East Asia		
Chapter 5	Meringues	02	02
5.1	Making of meringues		
5.2	Factors affecting stability of meringues Cooking of meringues Types and uses of meringue		
Chapter 6	Sugar	02	04
6.1	Tools required for sugar work		
6.2	Types of sugar as decorative work: Spun Sugar, Pulled Sugar, Poured sugar and Blown Sugar		
Chapter 7	Chocolate	02	04
7.1	Manufacture		
7.2	Couverture T		
7.3	Tempering M		
7.4	Molding		
7.5	Chocolate Decorations		
Chapter 8	Icings & Toppings	04	04
8.1	Types of icings – Flat, Buttercream, Royal, Marzipan, Nougatine, Pastillage, Ganache		
Chapter 9	Recipe Balancing	02	04
9.1	Importance		
9.2	Principles of recipe balancing in cake making and bakery		
Chapter 10	Pastries	05	06
10.1	Types: Short Crust, Flaky, Puff, Danish, Choux and Filo		
10.2	Faults and their causes		
Chapter 11	New Concepts in Culinary	05	04
11.1	Understanding basics of Molecular Gastronomy		
11.2	Organic foods		

11.3 Vegancuisine

**GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM
(Rules & Regulations)**

1	Class/ Home Assignments & Research Paper	- 10 Marks
2	Unit Tests / Moot Courts/ Legal Aid	- 20 Marks
3	Tutorials Based On Case Studies & Legislative Analysis	- 05 Marks
4	Attendance	- 05 Marks

Total = 40 Marks

**GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM
(Rules & Regulations)**

1. CLASS/ HOME ASSIGNMENTS & RESEARCH PAPER :-

Long Term Paper	- 05 Marks
2 research papers	- 05 Marks (2.5 Marks Each)

Total = 10 Marks

EXPLANATION:-

In the Class/Home Assignments, the students are required to prepare a compulsory **Long Term Paper**. Besides this, the students shall also submit a minimum of **two compulsory Research papers** on any of the themes relating to the subject. The Submissions must be **free from plagiarism** and must meet international standards of modes of citation (except at places where only Indian Citation applies).

2. UNIT TESTS:-

Unit test I	- 10 Marks
Unit test II	- 10 Marks

Total = 20 Marks

EXPLANATION:-

There shall be a minimum of two compulsory Unit written tests to be appeared by the students which shall consist of 10 Marks for each paper. The Topics for each paper shall be notified by the concerned subject teacher well in advance. Similarly, a student can participate in the moot court/ legal aid and related activities.

3. TUTORIALS BASED ON CASE STUDIES & LEGISLATIVE ANALYSIS:-

Tutorial 1 (Case Study-I)	- 02 Marks
Tutorial 2 (Case Study-II)	- 02 Marks
Tutorial 3 (Legislative Analysis)	- 01 Marks

Total = 05 Marks

EXPLANATION:-

There shall be a minimum number of 3 Tutorials out of which 2 tutorials shall be based on the recent case studies while 1 tutorial shall be based on analysis of recent or landmark legislation relating to the subject to be appeared by the students in the Class.

4. ATTENDANCE:-

Attendance = 05 Marks

EXPLANATION:-

As per the norms of Bar Council of India, it shall be compulsory for all students to have a minimum of 75% of attendance per semester.

SPECIAL CLAUSE:-

The students who participate at the following activities with the prior permission of the Principal may be exempted from the above rules as a Special case:

- a) *A Student Who participated at Various national and International Moot Court Competitions in India or abroad; or*
- b) *A Student Who participated in Mock Trials, Debate, Essay or any other kind of competitions*
- c) *A Student who participated in any Model United Nations, Model Parliamentary Debate Competitions in India or abroad; or*
- d) *A Student Who actively volunteered in the College organized or any national NSS activity or any other extra-curricular activities; or*
- e) *A Student Who participated in assisting NLC's Free Legal Aid Clinic or other legal aid services, Legal Awareness camps etc. ; or*
- f) *A Student who participated in any cultural or sports activities held at national or international level; or*
- g) *A Student who is suffering from prolonged illness duly certified by the Registered medical practitioner*

Provided, the students who participated in the abovementioned activities, have sought prior permission, in writing, of the Principal, Law College to represent the institute at national and international level. The exemption granted under this rule shall solely be subject to the discretion of the Principal, Law College and no Student can claim the exemption as a matter of his/her right.

SYSTEM OF EXAMINATION:

Each paper shall be of out of which 40 Marks shall be for Internal Assessment (IA) and 60 Marks shall be for University Examination (UE). Internal Assessment (IA) and University Examination (UE) shall be conducted by the University for each Paper.

THE CREDIT SYSTEM:

The credits specified for LL.B. 3 year programme describe the weightages of various courses of the programme. The number of credits along with grade points that the student has satisfactorily completed measures the performance of the student. Satisfactory progress of a student is subject to his/ her maintaining a minimum Cumulative Grade Point Average (CGPA), as well as minimum grades in different courses of the programme. A certain number of credits must be earned by the student to qualify for the degree. Description of credit distribution for core Courses, elective Courses, and language course has already been shown. There shall be a 10-Point Absolute Grading System for grading in each head of passing. The system shall have seven, the highest being 10. The performance indicators **O, A+, A, B+, B, and F** shall respectively mean:

O	Outstanding
A+	Excellent
A	Very Good
B+	Good
B	Satisfactory
F	Fail

THE GRADING SYSTEM UNDER CBCS

Point Scale for Grading

Marks Range of marks (Out of 100)	Grade Point	Grade
80 ≤ Marks ≤ 100	10	O
70 ≤ Marks ≤ 80	9	A+
60 ≤ Marks ≤ 70	8	A
55 ≤ Marks ≤ 60	7	B+
50 ≤ Marks ≤ 55	6	B
Marks below < 50	0	F

EVALUATION AND COMPUTATION OF THE GRADE POINT AVERAGES:

Cumulative performance indicators such as GPA, SGPA or CGPA shall be calculated as described and illustrated below.

- A) The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the Course/ Paper.
- B) The Weights for performance at UE and IA shall respectively be **60% and 40%**.
- C) The Grade Point Average (GPA) for a Course/ Paper shall be calculated by first finding the total marks out of 100 for the Course/ Paper.
- D) Two kinds of performance indicators, namely, the Semester Grade point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the Courses/ Paper in a particular Semester, while CGPA measures the cumulative performance in all courses/ papers since his/her enrollment. The CGPA of a learner when he/she completes the programme is the Final Result of the learner.

STANDARDS OF PASSING:

- A) In order to pass in a Semester, a Student must obtain a minimum grade point of 6.00 (50%) both at the UE and IA.
- B) A Student who passes in a Course/ Paper is said to have completed the Credits assigned to the Course/ Paper.
- C) A Student who completed the minimum Credits required for a programme will be declared to have completed the programme.
- D) **Minimum passing grade** shall be Grade 'B' for each course/ Paper.

RULES OF PROMOTION FOR LL.B 3 YEARS PROGRAMME:

The candidate, who has taken admission in LL.B 3 years Course, subject to the clearance of eligibility and after securing required credits as prescribed by the university, shall be automatically promoted to next year. However, a Student who has not put up sufficient credits shall not be promoted to next year. In order to take admission in the final year, the Candidate has to pass in all the papers of 1st year with minimum 6.00 Grade points at both University Examination and Internal Examination.

AWARD OF HONOURS:

A Student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The Final result will be in terms of letter grade only and is based on the CGPA of all Courses studied and passed. The Criteria for the award of honours is given below.

The Criteria for the award of Degree are given as follows:

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
9.50 < CGPA < 10.00	O	Outstanding	80 <Marks <100
9.00 < CGPA < 9.49	A+	Excellent	70 <Marks <80
8.00 < CGPA < 8.99	A	Very Good	60 <Marks <70
7.00 < CGPA < 7.99	B+	Good	55 <Marks <60
6.00 < CGPA < 6.99	B	Satisfactory	50 <Marks <55

GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM

(Rules & Regulations)

- **Class/ Home Assignments & Research Paper** - 10 Marks
- **Unit Tests / Moot Courts/ Legal Aid** - 20 Marks
- **Tutorials Based On Case Studies & Legislative Analysis** - 05 Marks
- **Attendance** - 05 Marks

Total = 40 Marks

GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM

(Rules & Regulations)

1. CLASS/ HOME ASSIGNMENTS & RESEARCH PAPER :-

- Long Term Paper - 05 Marks
- 2 research papers - 05 Marks (2.5 Marks Each)

Total = 10 Marks

EXPLANATION:-

In the Class/Home Assignments, the students are required to prepare a compulsory **Long Term Paper**. Besides this, the students shall also submit a minimum of **two compulsory Research papers** on any of the themes relating to the subject. The Submissions must be **free from plagiarism** and must meet international standards of modes of citation (except at places where only Indian Citation applies).

2. UNIT TESTS:-

- Unit test I - 10 Marks
- Unit test II - 10 Marks

Total = 20 Marks

EXPLANATION:-

There shall be a minimum of two compulsory Unit written tests to be appeared by the students which shall consist of 10 Marks for each paper. The Topics for each paper shall be notified by the concerned subject teacher well in advance. Similarly, a student can participate in the moot court/ legal aid and related activities.

3. TUTORIALS BASED ON CASE STUDIES & LEGISLATIVE ANALYSIS:-

Tutorial 1 (Case Study-I)	- 02 Marks
Tutorial 2 (Case Study-II)	- 02 Marks
Tutorial 3 (Legislative Analysis)	- 01 Marks

Total = 05 Marks

EXPLANATION:-

There shall be a minimum number of 3 Tutorials out of which 2 tutorials shall be based on the recent case studies while 1 tutorial shall be based on analysis of recent or landmark legislation relating to the subject to be appeared by the students in the Class.

4. ATTENDANCE:-

Attendance = 05 Marks

EXPLANATION:-

As per the norms of Bar Council of India, it shall be compulsory for all students to have a minimum of 75% of attendance per semester.

SPECIAL CLAUSE

The students who participate at the following activities with the prior permission of the Principal may be exempted from the above rules as a Special case:

- a) *A Student Who participated at Various national and International Moot Court Competitions in India or abroad; or*
- b) *A Student Who participated in Mock Trials, Debate, Essay or any other kind of competitions*
- c) *A Student who participated in any Model United Nations, Model Parliamentary Debate Competitions in India or abroad; or*
- d) *A Student Who actively volunteered in the College organized or any national NSS activity or any other extra-curricular activities; or*
- e) *A Student Who participated in assisting NLC's Free Legal Aid Clinic or other legal aid services, Legal Awareness camps etc. ; or*
- f) *A Student who participated in any cultural or sports activities held at national or international level; or*
- g) *A Student who is suffering from prolonged illness duly certified by the Registered medical practitioner*

Provided, the students who participated in the abovementioned activities, have sought prior permission, in writing, of the Principal, Law College to represent the institute at national and international level. The exemption granted under this rule shall solely be subject to the discretion of the Principal, Law College and no Student can claim the exemption as a matter of his/her right.

SYSTEM OF EXAMINATION

Each paper shall be of 100 Marks out of which 40 Marks shall be for Internal Assessment (IA) and 60 Marks shall be for University Examination (UE). Internal Assessment (IA) and University Examination (UE) shall be conducted by the University for each paper.

THE CREDIT SYSTEM:

The credits specified for B.A. LL.B. 5 years programme describe the weight ages of various courses of the programme. The number of credits along with grade points that the student has satisfactorily completed measures the performance of the student. Satisfactory progress of a student is subject to his/ her maintaining a minimum Cumulative Grade Point Average (CGPA), as well as minimum grades in different courses of the programme. A certain number of credits must be earned by the student to qualify for the degree. Description of credit distribution for core Courses, elective Courses, and language course has already been shown.

There shall be a 10-Point Absolute Grading System for grading in each head of passing. The system shall have seven, the highest being 10.

The performance indicators **O, A+, A, B+, B, and F** shall respectively mean:

O	Outstanding
A+	Excellent
A	Very Good
B+	Good
B	Satisfactory
F	Fail

THE GRADING SYSTEM UNDER CBCS

Point Scale for Grading

Marks Range of marks (Out of 100)	Grade Point	Grade
80 ≤ Marks ≤ 100	10	O
70 ≤ Marks ≤ 80	9	A+
60 ≤ Marks ≤ 70	8	A
55 ≤ Marks ≤ 60	7	B+
50 ≤ Marks ≤ 55	6	B
Marks below < 50	0	F

EVALUATION AND COMPUTATION OF THE GRADE POINT AVERAGES:

Cumulative performance indicators such as GPA, SGPA or CGPA shall be calculated as described and illustrated below.

- A) The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the Course/ Paper.
- B) The Weights for performance at UE and IA shall respectively be **60% and 40%**.
- C) The Grade Point Average (GPA) for a Course/ Paper shall be calculated by first finding the total marks out of 100 for the Course/ Paper.
- D) Two kinds of performance indicators, namely, the Semester Grade point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the Courses/ Paper in a particular Semester, while CGPA measures the cumulative performance in all courses/ papers since his/her enrollment. The CGPA of a learner when he/she completes the programme is the Final Result of the learner.

STANDARDS OF PASSING

- A) In order to pass in a Semester, a Student must obtain a minimum grade point of 6.00 (50%) both at the UE and IA.
- B) A Student who passes in a Course/ Paper is said to have completed the Credits assigned to the Course/ Paper.
- C) A Student who completed the minimum Credits required for a programme will be declared to have completed the programme.
- D) **Minimum passing grade** shall be Grade 'B' for each course/ Paper.

RULES OF PROMOTION FOR B.A LL.B 5 YEARS PROGRAMME

In a 5 year LL.B programme, a Student who is admitted in 1st year, subject to the clearance of eligibility and after securing required credits for that year, shall automatically be promoted to next year. However, a Candidate who has not put minimum credits shall not be promoted to next year of the programme. In order to get promotion in 3rd year, the Candidate has to pass in all the papers of 1st year with minimum 6.00 grade points in each paper at both University Examination and Internal Examination. Similarly, in order to get promotion to 4th Year, a Candidate has to pass in all the papers of 1st year and 2nd year. In order to get promotion in last year, a Candidate has to pass in all the papers of 1st year, 2nd year and 3rd year of the programme.

SINGLE DEGREE:

As per the UGC rules, a Candidate admitted in **B.A. LL.B 5 Years Programme** is entitled for Single Degree only (**B.A. LL.B**) that too after the successful completion of 5 years programme. They shall not be entitled for Dual Degree as the duration of the Programme is only five years.

AWARD OF HONOURS:

A Student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The Final result will be in terms of letter grade only and is based on the CGPA of all Courses studied and passed. The Criteria for the award of honours is given below.

The Criteria for the award of Degree are given as follows:

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
9.50 < CGPA < 10.00	O	Outstanding	80 <Marks <100
9.00 < CGPA < 9.49	A+	Excellent	70 <Marks <80
8.00 < CGPA < 8.99	A	Very Good	60 <Marks <70
7.00 < CGPA < 7.99	B+	Good	55 <Marks <60
6.00 < CGPA < 6.99	B	Satisfactory	50 <Marks <55
CGPA Below 6.00	F	Fail	Marks below 50

Dr. Ujwala Bendale
Dean, Principal I/C
New Law College

**COURSE DESIGN OF LL.M (TWO YEAR PROGRAM)
(SEMESTER PATTERN)**

Semester	Core Course	Elective Course	Practical Paper	Open Course	General Course	Total No. of Papers	Total Marks	Total Credits
First Semester	02	02	01	NIL	NIL	05	500	30
Second Semester	02	02	01	NIL	NIL	05	500	30
Third Semester	NIL	02	01	02	01	06	600	30
Fourth Semester	Dissertation	NIL	NIL	NIL	NIL	01	200	30
Total						17	1800	120

1. Scheme of Examination: The examinations for two year LL.M. Program will be held in each Semester. The medium of instruction and the examination shall be in English. Every paper shall carry 100 marks out of which 60 marks are for written examination i.e. University Examination (UE) & 40 marks for Internal Assessment (IA). There shall be no written examination (i.e UE) for Practical Paper and Dissertation.

▪ **Internal Assessment (IA) will be as follows:**

- Unit Tests - 15 marks
- Home assignment - 10 marks
- Tutorial/Class Presentation - 10 marks
- Attendance - 5 marks

▪ **Practical Paper**

- The student has to appear for a Practical Paper in First, Second and Third Semester each respectively.
- The practical paper shall carry 100 marks each which shall be evaluated on the basis of the performance of the students under following headings:
 - Research Project (Doctrinal/Non-doctrinal)
 - Research publication
 - Clinical work
 - Law teaching

▪ **Dissertation**

- Dissertation shall carry 200 marks which shall be evaluated as follows:
 - Written work submission – 100 Marks
 - Research Publication – 50 Marks
(in Peer reviewed journal having ISSN No.)
 - Presentation and Viva voce – 50 marks

The student shall also have to submit two progress reports signed by their research guide highlighting the work carried out by the student during his research.

2. **Credit System:** Choice based credit system designed as per the University rules has been implemented for this program. The two year LL.M. program will have **120 credits**. Each credit is of 15 hours.
3. **Grading System:** The University has adopted a **10-point absolute grading system** for grading in each head of passing. The grading system shall be as shown in Table-1 below.

The Grading System under CBCS

Range of Marks (out of 100)	Grade Point	Grade
$80 \leq \text{Marks} \leq 100$	10	O
$70 \leq \text{Marks} < 80$	9	A+
$60 \leq \text{Marks} < 70$	8	A
$55 \leq \text{Marks} < 60$	7	B+
$50 \leq \text{Marks} < 55$	6	B
Marks < 50	0	D

The performance indicators O, A+, A, B+, B, and D shall respectively mean Outstanding, Excellent, Very Good, Good, Average, and Poor. It may be noted that entries in Table are meant for converting marks in individual courses to grade points. The respective grade points can also be computed from the following formulas given in Table-2.

The Formula to calculate the Grade Points (GP):

Suppose that '**Max**' is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP, set $x = \text{Max}/10$ (since we have adapted 10-point system). Then GP is calculated by the formulas shown in Table-2. After computing the grade point the grade can be found from Table-1.

Table-2: Formula to Calculate Grade Point in Individual Evaluations

Range of Marks at the evaluation	Formula for the Grade Point
$8x < M < 10x$	10
$5.5x < M < 8x$	$\text{Truncate}(M / x) + 2$
$4x < M < 5.5x$	$\text{Truncate}(M/x) + 1$

4. Computation of Grade Point Averages: Cumulative performance indicators such as GPA, SGPA, or CGPA shall be calculated as described and illustrated below.

- I. The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. **The weights for performance at UE and IA shall respectively be 60% and 40%.**
- II. The grade point average (GPA) for a course shall be calculated by first finding the total marks **out of 100 for the course. The corresponding GP (as per the table in (2) above) shall be the GPA for the course.**
- III. Two kinds of performance indicators, namely, the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of a learner when he/she completes the programme is the final result of the learner.

- IV. The SGPA is calculated by the formula
$$SGPA = \frac{\sum C_k \times GP_k}{\sum C_k}$$
, where C_k is the credit-value assigned to a course and GP_k is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

- V. The CGPA is calculated by the formula
$$CGPA = \frac{\sum C_k \times GP_k}{\sum C_k}$$
, where C_k is the credit-value assigned to a course and GP_k is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrolment and also the during the semester for which CGPA is calculated, including those in which he/she might have failed or those for which he/she remained absent. **The CGPA shall be calculated up to two decimal place accuracy.**

- VI. The CGPA, calculated after the minimum credits specified for the programme are 'earned', will be the final result.

5. Standards of Passing

- For all courses, both UE and IE constitute separate heads-of-passing (HoP).
- In order to pass in such courses and to 'earn' the assigned credits the learner must obtain a minimum grade point of **6.0 (50% marks) at UE** and also a minimum grade point of **6.0 (50% marks) at IA**;
- The GPA for a course will be calculated only if the learner passes at the UE.
- A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the HoP.

- Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the HoP.

6. Rules of Promotion: - The admission of students to the Two Year LL.M Program shall be on the yearly basis. A student admitted to the First Year of the course who complies with norms of the credit system and internal assessment with minimum 75% of attendance in the first year shall be automatically promoted to the Second year.

7. Award of Honours:

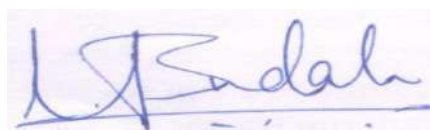

1. A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given in Table 4.

Table 4: Criteria for the Award of Honours at the End of the Programme

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 < CGPA < 10.00$	O	Outstanding	$80 < Marks \leq 100$
$9.00 < CGPA < 9.49$	A+	Excellent	$70 < Marks < 80$
$8.00 \leq CGPA \leq 8.99$	A	Very Good	$60 \leq Marks < 70$
$7.00 < CGPA < 7.99$	B+	Good	$55 < Marks < 60$
$6.00 < CGPA < 6.99$	B	Satisfactory	$50 < Marks < 55$
CGPA below 6.00	F	Fail	<i>Marks Below 50</i>

2. Formula to compute equivalent percentage marks for specified CGPA:

$$\%Marks(CGPA) = \begin{cases} 10 \times CGPA - 10, & \text{if } 5.00 \leq CGPA \leq 6.00 \\ 5 \times CGPA + 20, & \text{if } 6.00 \leq CGPA \leq 8.00 \\ 10 \times CGPA - 20, & \text{if } 8.00 \leq CGPA \leq 9.00 \\ 20 \times CGPA - 110, & \text{if } 9.00 \leq CGPA \leq 9.50 \\ 40 \times CGPA - 300, & \text{if } 9.50 \leq CGPA \leq 10.00 \end{cases}$$

New Law College

COURSE STRUCTURE FOR LL.M (TWO YEAR PROGRAM) (SEMESTER PATTERN)

➤ Core courses

- Law and social transformation in India (5 credits)
- Indian constitutional law: The new challenges (5 credits)
- Judicial process (5 credits)
- Legal education and research methodology (5 credits)

➤ Elective Courses

▪ Business law

- Law of industrial and Intellectual property (5 credits)
- Legal regulation of economic enterprises (5 credits)
- Law of export import regulation (5 credits)
- Banking laws (5 credits)
- Insurance laws (5 credits)
- Corporate finance (5 credits)

▪ Human rights law

- Concept and development of human rights (5 credits)
- Human rights and international order (5 credits)
- Protection and enforcement of human rights in India (5 credits)
- Human rights of disadvantaged groups (5 credits)
- International humanitarian law and refugee law (5 credits)
- Science technology and human rights (5 credits)
- Dissertation (30 credits)

▪ Intellectual Property Law

- General Regime of Intellectual Property Rights (5 credits)
- Law Relating to Patents (5 credits)
- Law Relating to Trademarks (5 credits)
- Law Relating to Copyright (5 credits)
- Biotechnology and IPR (5 credits)
- Law of geographical indication and traditional knowledge (5 credits)

▪ Environment Law

- Environment and Development: Law and Policy (5 credits)
- Environment and international legal order (5 credits)
- Environment protection in India (5 credits)
- Environment protection and disaster management (5 credits)
- Climate change and legal order (5 credits)
- Biological diversity and legal order (5 credits)

➤ **Practical Paper**

- Practical Paper I (10 Credits)
- Practical Paper II (10 Credits)
- Practical Paper III (10 Credits)

➤ **Interdisciplinary Courses**

- Educational Technology and E-learning (3 credits)
- Computer Application and Legal research (3 credits)

➤ **Value Added Course**

- Soft skills and Personality Development (4 credits)

COLLEGE OF PHYSICAL EDUCATION

Dhankawadi, Pune-411 043 (Maharashtra), INDIA

DIPLOMA IN YOGA EDUCATION

(PG D.Y.Ed. - 1 Year)

GENERAL OBJECTIVES

- 1) To train the candidates in the esoteric aspects of Yoga that deals with the problems of integration of personality.
- 2) To prepare the students to undertake teaching work in yoga.
- 3) To inculcate rational thinking and scientific temper among the students of yoga.
- 4) To use managerial and organizational skills for becoming a yoga teacher.
- 5) To help them understand varied responsibilities of a yoga teacher.
- 6) To acquaint the student with school/ college Health Programme.
- 7) To acquaint the students with the basic concept of management of yoga education in the school.
- 8) To understand the evaluation procedure in Physical Education.
- 9) To develop competencies and skills in yoga needed for becoming a healthy individual.
- 10) To enrich proper knowledge of yoga among the students to resolve emerging issues such as health & fitness, wellness etc.
- 11) To develop a special aptitude towards spiritual phenomenon through yoga.

Programme outcome

1. At the end of the course the students will be able to understand traditional Indian Yoga systems; the philosophy of the Yoga systems and the new thought in Yoga movement in the country.
2. The students will be able to understand the principles of Hatha Yoga and the texts in this field.
3. The programme will develop basic understanding of the human anatomy, the human physiology and a deeper understanding of the human systems
4. The students will be introduced to the essential elements of a yogic life style, the concept of health and disease and their remedies through yoga practice. They will also learn the overview of the five sheath human existence.
5. The students will be introduced to regular and rigorous practice (sadhana) of yoga practices that would make them disciplined and knowledgeable Yoga teachers

REGULATIONS

1. **Duration of the Course:**

This is a co-education course. The duration of the course of study is for 1 year. The total Teaching days shall not be less than 200 days excluding examination.

2. **Eligibility for Admission:**

Candidate must be a graduate from any discipline.

3. **Selection Procedure for Admission:**

Admission to the eligible candidates will be given as per the selection procedure laid down by the College from time to time.

4. **Rules of examination**

- He/ she have completed all the practical and other work according to the syllabus up to the satisfaction of the principal. He/ she should have obtained such a certificate from the principal of the college. Unless and until the student obtains such a certificate, he will not be allowed to appear for university examination.
- Student who fails in any one or more internal practical works in the term end examination will be permitted to complete in the subsequent year of examination
- Student who fails in any one or more papers in the final examination will be permitted to rewrite the remained paper or papers in the subsequent year of examination
- **Medium of Instruction:** Medium of Instruction will be Marathi or Hindi or English or in combination. The candidate appearing for examination will have the option of answering all the examination subjects either in Marathi or in Hindi or in English.
- The college will complete the internal assessment of the heads mentioned in the syllabus. The internal assessment will be in the form of marks.
- For the rationalization of internal marks, the **College shall appoint moderation committee** (keeping the Principal of the college or his nominee as Chairman). The Committee will take the review of the internal marks given by the college faculties and advice the college if necessary. The college should take the appropriate action as per the advice of the committee.

Norms for passing PG D.Y.Ed. Examination :

To pass the examination the candidate must obtain at least 35% marks in each theory and 40% in practical separately and the aggregate must be 45%.

- i) Pass Class: 45% & above and below 50%

- ii) II Class: 50% & above and below 60%.
 iii) I Class: 60% & above and below 70%.
 iv) I Class with distinction: 70% & above

Note:

- 1) The candidate who has obtained minimum 35% or more marks in any head of passing but failed in the examination shall be eligible to claim exemption in such head/heads. Candidates claiming exemption will not be eligible for first class with Distinction, first class, and second class and merit list.
- 2) The candidate has completed their terms but has not completed internal work are eligible do so in next one academic year only.

SCHEME OF EXAMINATION

PART-A (THEORY)

Subject Code	Theory Subjects	Final Paper (Marks)	Sessional (Marks)	Total (Marks)	Minimum Aggregate Passing Marks	Credits
DYEd/Th-1	Foundation of Patanjala Yoga Sutra (3 periods per week)	75	25	100	35	6
DYEd/Th-2	Foundation of Hath yoga (3 periods per week)	75	25	100	35	6
DYEd/Th-3	Yoga, Cultural Synthesis & Value Education (3 periods per week)	75	25	100	35	6
DYEd/Th-4	Anatomic-physiological aspects in Yoga Education (3 periods per week)	75	25	100	35	6
DYEd/Th-5	Psychology of Yoga Education (3 periods per week)	75	25	100	35	6
DYEd/Th-6	Teaching Methods in Yoga Education (3 periods per week)	75	25	100	35	6
	TOTAL	450	150	600	-	36

PART-B (PRACTICAL SKILL)

Activity Code	Activities	Max. Marks	Min. Pass Marks	Credits
DYEd/Pr-1	Asanas (3 periods per week)	100	40	6
DYEd/Pr-2	Pranayamas (2 periods per week)	100	40	4
DYEd/Pr-3	Kriyas (2 periods per week)	100	40	4
DYEd/Pr-4	Bandhas & Mudras (2 periods per week)	100	40	4
DYEd/Pr-5	Antaranga Yoga (2 periods per week)	100	20	4
DYEd/Pr-6	Practice teaching (1 period per week) 1) peer group lesson-ten 2) external lesson- two	100	20	2
	TOTAL	600	-	24

Total Credit (A+B) = 60

GENERAL OBJECTIVES

- 1) To train the candidates in the esoteric aspects of Yoga that deals with the problems of integration of personality.
- 2) To prepare the students to undertake teaching work in yoga.
- 3) To inculcate rational thinking and scientific temper among the students of yoga.
- 4) To use managerial and organizational skills for becoming a yoga teacher.
- 5) To help them understand varied responsibilities of a yoga teacher.
- 6) To acquaint the student with school/ college Health Programme.
- 7) To acquaint the students with the basic concept of management of yoga education in the school.
- 8) To understand the evaluation procedure in Physical Education.
- 9) To develop competencies and skills in yoga needed for becoming a healthy individual.
- 10) To enrich proper knowledge of yoga among the students to resolve emerging issues such as health & fitness, wellness etc.
- 11) To develop a special aptitude towards spiritual phenomenon through yoga.

REGULATIONS

1. Duration of the Course:

This is a co-education course. The duration of the course of study is for 1 year. The total Teaching days shall not be less than 200 days excluding examination.

2. Eligibility for Admission:

Candidate must be a graduate from any discipline.

3. Selection Procedure for Admission:

Admission to the eligible candidates will be given as per the selection procedure laid down by the College from time to time

4. Medium of instruction :- Medium of instruction will be **Marathi** or **Hindi** or **English** in combination. The candidate appearing for examination will have the option of answering all the examination subjects either in Marathi or in Hindi or in English

5. Rules of examination

- A candidate (He/She) must have completed all the practical and other work according to the syllabus up to the satisfaction of the principal. He/she should have obtained such a certificate from the principal of the college. Unless and until the student obtains such a certificate, he will not be allowed to appear for university examination.
- The College will complete the internal assessment of the heads mentioned in the syllabus internal assessment will be in the form of marks.
- For the rationalization of internal marks, the college shall appoint moderation committee (keeping the principal of the college or his nominee as chairman). The Committee will take the review of the internal marks given by the college and advise the college if necessary. The college should take the appropriate action as per the advice of the committee.
- 80% of marks will be assessed through external evaluation and 20% shall be by the internal evaluation.
- A candidate must record attendance at the periods in college for the whole year as prescribed in the university norms (min.80%) to be able to appear for university examination.
- Candidate should complete all the practical and internal assessment work up to the satisfaction of the principal / Head of the unit.
- To pass the examination the candidate should score minimum 40% marks separately in internal as well as external examination for each theory and practical paper

SYLLABUS FOR P.G. DIPLOMA IN YOGA EDUCATION (P.G.D.Y.Ed.)

PAPER I- Foundation of Patanjala Yoga Sutra (P.Y.S.)

Marks 100

Unit-I.

1. P.Y.S.: Introduction to P.Y.S., its author and its concept about Yoga and chapters.
2. P.Y.S.: According to *Samkhya* Philosophy,
3. Yoga traditions: P.Y.S. and other Traditions (*Gita, Hatha, Mantra, Laya*)
4. Brief survey of P.Y.S. and its Traditional and Modern commentaries and other related works on P.Y.S.
5. Concept of Citta, its structure & functions and need to channelize it

Unit-II.

1. *Abhyasa & Vairagya.*
2. Factors that accelerate *Patanjala Yoga Sadhana, Bhavapratyaya Yogis & Upayapratyaya Yogis,*
3. Concept of *Isvara* and *Isvarapranidhana/ Pranava Japa*
4. Concept of *Cittaviksepa/ antaraya, Eka tattva – Abhyasa .*
5. Concept and methods to achieve *Cittaprasadana,*

Unit-III.

1. *Kriyayoga:* Meaning, concept , importance and Its educational value.

2. *Klesas*: Concept & their remedy.
3. Concept of *Caturvyuha*: *heya*, *heyahetu*, *hana* and *hanopaya*.
4. *Rtambhara prajna*,
5. Concept of Saptabhumi Prajna

Unit-IV.

1. *Yamas* and *Niyamas*: Concept and practice.
2. Concept and practice of *Asanas*, *Pranayama*, *Pratyahara* according to Patanjali and their practice in the light of other scripture.
3. Concept of *Dharana*, *Dhyana* and *Samadhi*, their differences and salient features
4. *Samprajnata* and *Anya*, *Samapattis*, *Sabija Samadhi* and *Nirbija Samadhi* and difference between Samapatti and Samadhi
5. Concept of *Samyama* in PYS.

PAPER II. Foundations of Hatha Yoga

Marks 100

Unit – I

- 1) Concept of Yoga in the light of its definitions, Schools of Yoga- *Bhavana* Yoga-*Jnana*, *Karma* and *Bhakti*; *Prana Samyama* Yoga- *Mantra*, *Hatha* , *Laya* and *Raja*;
- 2) Introduction to important *Hathayogic* Texts with special reference to *Hathapradipika* (HP) and *Gheranda Samhita* (Gh S), Special features of these two texts,
- 3) Ideal place and ideal hut according to *HP* and *Gh S*.
- 4) *Sadhaka* and *Badhaka* Factors according to *HP*,
- 5) Concept of *Mitahara* in *HP* and *Gh S*.

Unit – II

- 1) Antiquity and definitions of *Asana*,
- 2) All 15 *asanas* from *HP* and 32 *Asanas* from *Gh S*.
- 3) Evolution of *Pranayama*, Components of *Pranayama*, *Yukta* and *Ayukta* *Pranayama*,
- 4) Concept of *Kanda* and *Nadi* in *Hathayoga*, *Nadishodhana* *Pranayama* in *HP* and *Gh S*.
- 5) *Yoga Therapy* in 5th Chapter of *HP* of *Kaivalyadhama*.

Unit – III

- 1) Importance of *Cleansing* processes in *Yogic* curriculum, comparison between *Pancha karma* and *Shat karma*,
- 2) *Cleansing* processes in *HP* and *Gh S*.
- 3) Eight *kumbhakas* in *HP* and *Gh S*, Special study of *Suryabhedana*, *Ujjayi*, *Bhramari*, *Bhastrika* and *Kevala/ Kevali* in *HP* and *Gh S*
- 4) *Sahita kumbhaka* in *Gh S*,

5) *Sitkari and Plavini Kumbhaka* in *HP*

Unit -IV

1. Importance and purpose of *Mudras* in *Hathayoga*, Concept of *Kundalini* and its arousal,
2. *Mudras* in *HP* and *Gh S*, Special study of *Khecari* and *Shaktichalana*,
3. Five *Dharanas*, in *Hatha yoga*
4. Concept of *Pratyahara* and *Dhyana* in *Hathayoga* with special reference to *Gh S*, Concept and technique of *Samadhi* in *Gh S*,
5. Concept of *Laya* and *nada*, Technique and stages of *Nadanusandhana*.

REFERENCE BOOKS

1. *Goraksha Shatakam* of *Gorakshanath* (Pub by kaivalyadhama, Lonavla)
2. *Shiv samhita* (Pub. By Kaivalyadhama ,Lonavla)
3. *Vasishtha samhita* (Pub. By Kaivalyadhama ,Lonavla)
4. *Yoga Yajnavalkya yajnavalkya smriti*
5. *Asana* by Swami Kuvalayananda (Pub by kaivalyadhama, Lonavla)
6. *Pranayama* by Swami Kuvalayananda (Pub by kaivalyadhama, Lonavla)

PAPER III. Yoga, Cultural Synthesis & Value Education: Marks 100

UNIT – I

Yoga and Culture

1. Concept and meaning of *Yoga* and its forms.
2. Definition of Culture and Civilization,
3. Salient Characteristics of Indian and Western Culture.
4. *Yoga* as basis of Culture and Humanitarianism

UNIT – II

Yoga and Philosophy (Darshana)& Philosophy of Yoga in Darshana,

1. Brief Introduction to *Yoga* in *Veda* and *Upanishads*, *Shrimad Bhagawad Gita* with special reference to – *Jnana Yoga*, *Karma Yoga* and *Bhakti Yoga* – their inter- relationship and synthesis.
2. Salient features of Indian Philosophy and Western Philosophy
3. Six systems of Indian Philosophy with special reference to concepts of Soul, Bondage and Liberation. Relation of *Yoga* to these systems.
4. Brief Introduction to the contribution of Modern Indian personalities like Swami Vivekananda, Gandhiji, Shri Aurobindo, Swami Shivanandaji and Swami Kuvalayanandaji towards World Peace and Harmony with special reference to *Yoga*.

UNIT III

Yoga, Religion and Mysticism

1. Meaning and significance of Religion; Yoga and Religion; Yoga and Jainism
2. Yoga and Buddhism
3. Yoga and Islam,
4. Yoga and Christianity
5. Yoga and Mysticism, Yoga and Suficism.

UNIT IV

Yoga and Value Education

Values – meaning, significance, classification; Indian Understanding of Values.

1. Basis of Value Development –
 - a) Socio-cultural,
 - b) Psychological.
2. Concept of Value Education – Meaning, aims and objectives, Rationale of Value Education, Contents of Value Education and Role of Teachers.

Methods of Value Education:- a) Yoga as a method of Value Education.
b) Implication & application of Value Education in one's own life style.
Short –term project to prepare & follow & submit to in- charge for evaluation . (Committed Project)

Reference Books –

- 1) Mysticism and Philosophy – Stace, W.T. Mac Milan and Co., London, 1961.
- 2) Mysticism in World's Religions – Geoffrey Parinder, Oxford University Press, New York, Shendon Press, 1976.
- 3) Education in value a Source book Pub: national council of education research and training Nov 1992, Secretary, NCERT ,Sri Aurobindo Marg New Delhi 10016 Price Rs.54
- 4) Hindu Cultural An Introduction, Pub – Central Chinmaya Mission trust, Mumbai

- 5) Indian Philosophy Datta & Chatterjee Hindi and English, Pub.:University of Calcutta, Calcutta Year 1984, 8th Reprint

- 7) Bharatiya Darshana: parasnath Dwivedi- Hindi Pub.: Shriram Mehra & com., Agra 3 Year 1980
- 8) *Bharatiya Sanskriti*, - Dr. Rajkishor Singh Hindi, Pub.: Vinod Pustak Mandir, Agra, Year 1995-96
- 9) *Dharma Avem Sanskriti* V.K.Bhatiya, -Hindi, Pub.: Sahitya Bhavan, Agra, Year 1978

PAPER IV. Anatomico-Physiological aspects in Yoga Education (Marks100)

UNIT I –

1) Knowledge about the Living Body :

1. Concept of Living body and stages of life – modern view.
2. Concept of Anatomy & Physiology and its importance in Yogic field.
3. Modern History of Scientific concept about yogic practices.
4. Structural organization of body.
5. Basic physiological concepts.
6. Concept of harmony in related with health (all systems , organs cells)

2) Nervous System :

1. Anatomy of Brain , spinal cord , nerves.
2. Voluntary & Autonomus work of nervous system.
3. Concept of the development of brain and nerve cell.
4. Role of neurotransmitters.

3) Digestive system –

- 1) Structure and functions of all part of alimentary track and glands
- 2) Process of digestion; factors influencing the digestion.
- 3) Concept of diet through modern, Ayurvedic and yogic views.
- 4) Indigestion and its complications; How does yoga help to reverse the complication due to indigestion.

UNIT II –

1) Respiratory system

- Structure and functions of all parts of respiratory track.
- Mechanism of ventilation, diffusion and cellular respiration, breath regulation.
- Lung capacity and factors influencing it.
- Yogic practices for healthy respiratory system

2) Circulatory system –

- Structure and functions of the heart , blood vessels & blood cells.
- Concept of blood pressure and effect of yoga practices on it.

3) Endocrine system –

- Structure and functions of all endocrine glands.
- Neuro endocrine balance and yoga
- Yogic practices, how they influences work of glands.

4) Reproductive and Excretory System:

- Structure and Functions & effect of Yoga practices on it.

UNIT III –

1) Musculoskeletal System

Muscles –properties, function, types of muscles

Types of contraction & stretching

Bones – function and types of bones

Yoga and health of muscles and bones in different stage of life.

2) Asana

Definition

View of traditional text, scientific view,

Types.

Anatomy, physiology, therapeutic importance & limitation of various asanas described in traditional texts.

Asana- How to use as a therapy.

3) Pranayama

Definition, psycho-physiological effect.

Various types according to traditional texts and their importance.

Therapeutic importance and research about Pranayama.

UNIT- IV

1) Kriya

Cleansing concept in *Hatha & Patanjali*

Neti – Effect, importance and limitation

Vastra and *Nauli* - Effect, importance and limitation

Kapalabhati - Effect, importance and limitation

Trataka - Effect, importance and limitation.

Shankha Prakshalana & other processes.

2) **Meditation**

Scientific view

Types and variation. As a means & Goal/End.

Types and variations

3) **Yoga Therapy**

Concept of Yoga Therapy 1- Life style modification.2- practice.

Klesha and *antarayas* & how to overcome it. *Chittaprasadhana*.

Yogic management of 1- psychosomatic disorders.

2. Metabolic disorders

3. Immunity related diseases.

UNIT V –

1. Concept of Body, Mind and beyond mind.
2. Conceptual understanding of body mind & beyond with reference to human body function.
3. Body as a micro & macrocosm with interrelation.
4. *Nadi chakra*, *Kosha* , Subtle body etc.

UNIT VI –

1. Structural & functional comparison of modern / ancient yoga , ayurveda, Homeopathy.
2. Experience based knowledge & information about human body- According to yogic text & with their technical terms without equation & comparison according to *Hatha Pradipika* & *PYS*.

Reference books

---	---

Calculation of Credit:

For theory	For practical
1 day = 2 hrs. For 200 days, total (200x2) = 400 hrs. 36 credits = 400 hrs. 1 credit = 11 hrs.	1 day = 1 hrs (1 hr in morning + 1 hr in evening) For 200 days, total (200x2) = 400 hrs. 24 credits = 400 hrs. 1 credit = 16 hrs.
Minimum eligibility for exam: Minimum 4 Credits in each paper = 11 hrs x 4=44 hrs. Thus, 44 hrs. to be spent for each paper	Minimum eligibility for exam: Minimum 2 Credits in each event = 16 hrs. x 2= 32 hrs. Thus, 32 hrs. to be spent for each event

A student must acquire 4 credits in each theory paper and 2 credits in practical event. Thus, the year-wise credit to be acquired is as follows:

Year	Minimum CREDIT		Minimum TOTAL Credit needed
	Theory paper	Practical	
1 st year	Minimum 4 credits x 6 papers =24 credits	Minimum 2 credits x 6 events =12 credits	36 Credits (Out of 60)

Theory Lectures : 600 Credits : 24

Practical : 600 Credits : 12

BHARATI VIDYAPEETH DEEMED UNIVERSITY

**(Established u/s 3 of UGC Act 1956, vide notification no. F9. 15.U.3 of
Govt. of India)**

COLLEGE OF PHYSICAL EDUCATION

Dhankawadi, Pune-411 043 (Maharashtra), Tel.020-24373741

REACCREDITED 'A' GRADE BY NAAC

**Bachelor of Physical Education & Sports
(B.P.E.S)-3Years**

(6 Semester Programme)

**CURRICULUM FRAMEWORK
2015-2018**

**GUIDELINES OF REGULATIONS AND SYLLABUS STRUCTURE FOR
[B.P.E.S -3 years] (Six SEMESTERS)
CHOICE BASED CREDIT SYSTEM (CBCS)**

Preamble: Bachelor of Physical Education and Sports i.e. B.P.E.S (Six Semesters Choice Based Credit System) for 3 year duration This is a professional programme meant for preparing basics to become teachers of physical education.

B.P.E.S programme shall be designed to integrate the study of physical activity in childhood, social context of Physical Education, historical development, subject knowledge of psychology, pedagogy, aim of Physical Education, communication language & skills etc. The B.P.E.S programme comprises of compulsory and optional theory papers as well as physical activity (practical courses).

Programme Outcome

1. Students will know and apply discipline specific scientific and theoretical concepts critical to development of physically educated person.
2. Students will plan, design and implement learning experiences that facilitate and enhance the growth of learners of diverse needs from varying backgrounds.
3. Students will use effective communication and pedagogical skills and strategies to enhance student engagement & learning.
4. Students will utilize assessments and reflection to foster student learning and to inform instructional decisions.
5. Students will inherit qualities essential to become effective professionals.
6. Students will understand the disciplinary content knowledge, application of content knowledge to teaching physical education.
7. Students will evaluate self and seek opportunities to grow professionally and humanistically.
8. Students will use appropriate technology to enhance teaching and learning and enhance personal and professional productivity.
9. Students will foster relationship with colleagues, parents, community and associated agencies to support student's growth & wellbeing.

Duration, Intake, Eligibility and Admission Procedure:

The Duration, Intake, Eligibility and Admission Procedure are as per the University norms and standards.

Duration: B.P.E.S programme shall be of duration of three academic years,

that is, Six semesters. However, the students shall be permitted to complete the B.P.E.S programme requirements within a maximum of Five years from the date of admission to the programme. However, if a student fails to complete the degree in 5 years he should take fresh admission.

Intake:-

50 seats are approved by University for B.P.E.S course.

*No differently-abled candidate is eligible for the admission in B.P.E.S Course.

Eligibility

Candidate should have passed the higher secondary (10+2 standard) or equivalent examination with 40% marks. Relaxation of 5% marks will be given to the candidates belonging to S.C. & S.T. and other notified categories as per Government Rules or for extraordinary sportsman.

Age:-

For General category candidates, the upper age limit is 25 years as on 1st July of the academic year. Age relaxation for SC, ST and OBC candidate will be given according to the rules and regulation of Bharati Vidyapeeth University and GOI

Admission procedure:-

Admission shall be made on merit on the basis of marks obtained in the entrance examination consisting of 100 marks based on the following.

a- Physical fitness test	50 marks
b- Written test	30 marks
c- Interview	10 marks
d- Sports achievement	10 marks

The total entrance test will be conducted in two days and could be extended, if needed and it will be conducted at Bharati Vidyapeeth Deemed University College of Physical Education

There shall be Physical Fitness Test (modified AAHPER/CNADIAN/OR ANYOTHER fitness test) of 50 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education

- (A)** Theory Paper comprising of 30 multiple-choice questions of 30 minutes duration carrying 30 marks. Questions shall be based on Aptitude Test, Current Affairs and General Knowledge about sports.

(B) Interview comprising of 10 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education

(C) Sports Participation **Weightage** :- Candidate shall be given maximum 10 marks *weight age* on the basis of their sports participation in any one of the following level:

Participation	Marks
<input type="checkbox"/> International:	10
<input type="checkbox"/> Senior National championship/ National Games:	
1st Place :	10
2nd Place :	08
3rd Place :	07
Participation:	05
<input type="checkbox"/> All India Inter-Zonal Inter University Competitions:	
1st Place :	08
2nd Place :	07
3rd Place :	06
Participation:	05
<input type="checkbox"/> Zonal Inter University Competitions/ Junior National Competitions:	
1st Place :	07
2nd Place :	06
3rd Place :	05
Participation:	04
<input type="checkbox"/> Senior State Championship/Rural national games/Woman Festival:	
1st Place :	05
2nd Place :	04

3rd Place :	03
Participation:	02

Note:-

*The marks will be given in only those games/sports, which are in the competition list of Association of Indian Universities (**AIU**) and/or School Games Federation of India (**SGFI**).

*The obtained position must be during last five academic sessions.

*The school state championship and inter collegiate championship participation shall be considered for eligibility criteria only; the candidate shall not get any marks for sports **weightage**.

Medical examination:-

Qualified candidates will have to submit medical certificate by CMO and blood group certificate to the concern office.

1. Rules of examination**(i) Eligibility for appearing at B. A. (Physical Education) examination:**

Students should have kept at least 80% attendance in each year for theory and practical.

He/ she must complete all the practical and other work according to the syllabus up to the satisfaction of the Principal. He/ she must obtain such a certificate from the Principal of the college. Unless and until the student obtains such a certificate, he will not be allowed to appear for university examination.

(ii) Annual Examination:**Theory**

An annual examination will be held at the end of each year which shall be called "Annual Examination". This is a 6 semester course in semester-wise distribution of theory marks for each annual examination will be as follows:

1 st Semester:	400
2 nd Semester:	400
3 rd Semester:	400
4 th Semester:	400
5 th Semester:	400
6 st Semester:	400

Practical:

There shall be practical examination to be conducted at the end of the completion of teaching every year. Year-wise distribution of practical marks for each annual examination will be as follows:

1 st Semester:	500
2 nd Semester:	500
3 rd Semester:	500
4 th Semester:	500
5 th Semester:	500
6 st Semester:	500

- N.B.-** (i) University Exam, internal assessment and practical will be done by a Panel of two examiners (One Internal And One External)appointed by University
- (ii) For the rationalization of internal marks, the **College shall appoint moderation committee** (keeping the Principal of the college or his nominee as Chairman). The Committee will take the review of the internal marks given by the college faculties and advice the college, if necessary. The college should take the appropriate action as per the advice of the committee and submit the internal marks to the University.

3. Standard of Passing

A candidate should obtain minimum 40% of marks in each theory paper and also he/she should get 40% marks to pass the subject including theory and **sessional**. Similarly, to pass the examination, the candidate should also obtain minimum 40% marks in practical examination.

4. A.T.K.T.

A candidate may be allowed to take admission in succeeding year of the course irrespective of number of papers/ practical events in which he/she fails. It is mandatory that the whole course shall be completed within a period of 5 years from the date of admission.

SCHEME OF EXAMINATION FOR B.P.E.S

(6SEMESTERS)

(2015-2018)

Semester wise Distribution of Marks & Credits

		Sem-I	Sem-II	Sem-III	Sem-IV	Sem-V	Sem-VI	Total
Part-A: Theory Courses	Marks	400	400	400	400	400	400	2400
	Credits	16	16	16	16	16	16	96
Part-B: Activity Courses (Games/Sports)	Marks	400	400	300	300	400	400	2200
	Credits	8	8	6	6	8	8	44
Part- C: Game/ Sport Specialization	Marks	100	100	100	100	100	100	600
	Credits	2	2	2	2	2	2	12
Part D -: Teaching Ability and Internship	Marks	--	--	100	100	--	--	200
	Credits	--	--	2	2	--	--	4
Grand Total	Marks	900	900	900	900	900	900	5400
	Credits	26	26	26	26	26	26	156

NOTES:

- Each Theory Course shall have 4 Units and 3 hrs. Duration final examination except Sports Specialization which will have 3 units in each semester and 2-hour duration semester-end examination.
- The pattern of Semester-end question papers shall be:

2.1. For papers having Max. Marks- 60: [12+12+12+12+(4x3)=60 marks]

1. For University examination each question paper shall consist of 9 questions (4 long answer questions from each unit and 1 combined question of 4 short notes from all 4 units).
2. The candidate will attempt any one question from each unit. The 5th question will be compulsory consisting 4 short notes of 3 marks each.
3. For Internal Assessment of Theory Courses one Mid Semester Test of 30 marks for each course will be conducted by the college. For the mid semester test each question paper (of 30 marks) shall consist of 5 questions (4 long answer questions from first two unit and 1 combined question of 2 short notes from both units). The candidate will attempt any one question from each unit (2 questions of 12 marks each from first 4 questions). The 5th question will be compulsory consisting 2 short notes of 3 marks each. In addition, the teacher concerned shall conduct one open book examination consisting of 10 marks and submit the marks to the college exam department.
4. For Semester-end Examination in Activity Courses, the breaks-up of 100 Marks shall be as follows:

- Skill proficiency/playing ability	:	80
- Diary / Record book	:	20
5. For Specialization Sports Practice and Sports Training, the break-up of 100 Marks shall be as follows:

- Skill proficiency/playing ability	:	50
- Written Test	:	50
6. For Lesson Plan, student needs to complete perform 10 ground lesson in 3rd and 4th Semester at college itself.

- Lesson Plan	:	100 marks

PART-A: THEORY COURSES:**PART-B: PRACTICUM / ACTIVITY COURSES (GAMES & SPORTS):**

Activity Code	Name of Activity	University Exam	Class	Credits
B.P.E.S /VI/B/HC/01	Softball	100	48	2
B.P.E.S /VI/B/HC/02	Hockey	100	48	2
B.P.E.S /VI/B/HC/03	Football	100	48	2
B.P.E.S /VI/B/HC/03	Swimming	100	48	2
	Total	400	192	8

PART-C: SPECIALIZATION :(continue from Semester –IV& V)

Activity Code	Name of Area	University Exam	Class	Credits
B.P.E.S /VI/D/SCC/01	<u>SPECIALIZATION</u>	100	48	2

A student shall select/opt for any one Game/Sport from amongst: Basketball, Cricket, Football, Handball, Table Tennis, Tennis, Track & Field, Volleyball, Weight Lifting, Kho-Kho, Kabaddi and Yoga.

(Choice Based Credit System)**Standard of Passing:**

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0(40% of marks) at UE and also a minimum grade point of 5.0(40% marks) at IA.

If a student fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50 % in aggregate). The GPA for a course will be calculated only if the learner passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table:

Range of Marks (Out of 100)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} \leq 80$	A+	9
$60 \leq \text{Marks} \leq 70$	A	8
$55 \leq \text{Marks} \leq 60$	B+	7
$50 \leq \text{Marks} \leq 55$	B	6
$40 \leq \text{Marks} \leq 50$	C	5
$\text{Marks} \leq 40$	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weights for performance at UE and IA shall respectively be 60% and 40%.

GPA is calculated by adding the UE marks of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

Formula to calculate Grade Points (GP)

Suppose that Max is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP. Sex x -Max/10 (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

Range of marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (Marks/x)+2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (Marks/x)+1

Two kinds of performance indicators, namely, the semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester. While the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of learner when he/she completes the B.P.E.S programme is the final result of the learner.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA)	10x CGPA -10	If $5.00 \leq \text{CGPA} \leq 6.00$
	5x CGPA +20	If $6.00 \leq \text{CGPA} \leq 8.00$
	10x CGPA -20	If $8.00 \leq \text{CGPA} \leq 9.00$
	20x CGPA -110	If $9.00 \leq \text{CGPA} \leq 9.50$
	40x CGPA -300	If $9.50 \leq \text{CGPA} \leq 10.00$

Award of Honours:

A student who has completed the minimum credits specified for the B.P.E.S programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honors are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA Below 5.00	F	Fail	Marks Below 40

Educational Tour/Camp: In addition to the above rules the student must fulfill the following requirements to acquire the degree which is mandatory. Educational Tour or Leadership Camp organized by the College of Physical Education of at least 07 days. The students shall contribute separately for these activities.

B.P.E.S

(Physical Education and Sports)

6 semester Credit system

Syllabus

Semester I

B.P.E.S /I/A/HC/01: **Fundamental of Physical Education**

Unit I: Introduction

- a. Meaning, Definition, Scope and Functions of Physical Education
- b. Different Interpretations of Physical Education
- c. Concept of Movement Education
- d. Physical Education an Integral Part of Education
- e. Life time Physical Education for Fitness

Unit II: Philosophical Foundations

- a. Meaning of Philosophy, Philosophical basis of Physical Education, Different Schools of Philosophy
- b. History of Physical Education
- c. Objectives of Preprimary, Primary and Secondary School Physical Education Programmes
- d. Concept of Physical Fitness
- e. Cultural aspect of sports and worthy use of Leisure time through Physical Education activities
- f. F) National and International understanding through Sports

Unit III: Contribution of Thinkers & Competitions.

- | | |
|-----------------------|---------------------|
| a. Swami Kuvalayanand | b. Baren'Dcaubertin |
| c. Shri. Aurobindo | d. Olympic Games |
| e. Asian Games | |

Unit IV: Recreations.

- a. Meaning, Definition, Scope & Functions of Recreations
- b. Recreation in Rural, Urban & Industrial Area
- c. Age-Wise Planning & leadership in recreation

Book Recommended

- i Principles of Education – R. M. Marathe, MoghePrakashan, Kolhapur
- ii Teacher and Education in Emerging Indian Society – NCERT, New Delhi.
- iii Human Values Education – S. P Rahela
- iv Foundation of Physical Education – Bucher Charles, WCB/McGraw Hill, 1999
- v The Principles of Physical Education – Willam J. E. W. B. Sounders Com. Philadelphia, 1964.

B.P.E.S /I/A/HC/02: Anatomy**UNIT-I Introduction**

- a. Introduction of Basic concepts of Anatomy
- b. Structure and functions of cell.
- c Tissues and their classification.
- d Basic introduction of body systems.

UNIT-II Skeleto Muscular Systems

- a. Classification of Skeletal system.
- b. Types and structure of bones.
- c. Different types of joints.
- d. Classification of Muscle
- e. . Types of Muscles

Unit III Respiratory and Digestive System

- a) Meaning and types of Respiration, Organs of Respiratory System.
- b) Functions of Respiratory System, Vital capacity and its measurement. Mechanism of Respiration.
- c) Meaning, importance and organs of Digestive System.
- d) Functions, processes, mechanism of Digestive System.

UNIT-IV

- a. Circulatory System and Nervous System
- b. Meaning of the Circulatory System.
- c. Heart, its structure, functions.
- d. Cardiac Cycle. Meaning, functions compositions of Blood,
- e. Maintenance of Blood supply

Books Recommended

2. Sedey Rod R.- Anatomy and Physiology
3. Stephens & Tate P. St. lous, Mosby, 1992
4. Tortora G. J. : Introduction to Human Body, Ed. 4th California, Addison, Wesley, 1996

B.P.E.S /I/A/HC/03: ENGLISH**UNIT-I : Vocabulary**

- 1.1 Synonyms
- 1.2 Antonyms
- 1.3 Common abbreviations in use
- 1.4 One word substitution
- 1.5 Words Commonly Misspel
- 1.6 Idiomatic Comparisons or Similes
- 1.7 Word Formation by Prefix and Suffix

UNIT-II : Common Errors & Transformations

- 2.1 Common errors in sentences especially regarding number, gender, Pronouns, prepositions, articles, degrees etc.
- 2.2 Punctuation
- 2.3 Kinds of sentences - Assertive, Interrogative, Exclamatory, Imperative, Optative
- 2.4 Transformation of sentences
- 2.5 Tenses

UNIT-III : Correspondence

- 3.1 Personal Letters
- 3.2 Applications for leave, scholarship etc.
- 3.3 Invitations- Formal and Informal with reply
- 3.4 Notice Writing

UNIT-IV :- Descriptive Writing

- 4.1 Paragraph writing (50 words)
- 4.2 Essay writing (250 words)
- 4.3 Comprehension of unseen passage
- 4.4 Summary Writing

B.P.E.S/I/A/SC/01: Historical Development of Sports Movements (Elective Subject)

UNIT -Introduction

- A. Physical Education in Ancient Civilization with reference to
i) India ii) Greece iii) Rome iv) Egypt.
- B. Development of Physical Education & sports during 20th Century with special reference to i) U.S.A. ii) Sweden iii) Germany iv) Olympics v) Asian Games.

UNIT - II Sports Bodies of India

- Physical Training for teacher working in school & college
- Movement of Akhadash & Vyayam Shalas.
- Central Advisory Board of Physical Education
- Sports authority of India (Sai)
- Awards National & state level.
- All India council of sports
- SNIPES, NSNIS, LNIPE.
- Nehru Yuwak Kendra

UNIT - III A Study of the development of Physical Education sports & Games in Maharashtra with reference to

- a) Pune International marathon
b) The present Organization set up in state.
c) Important schemes and activities including indigenous activities.
d) Role of Voluntary Physical Education & sports Bodies in state...

UNIT - IV Youth welfare & Youth Services:-

- a) Concept of youth welfare & Youth work.
b) Youth organization in India
c) Programmers under youth development
d) Youth services such as secreting & guiding N.C.C. N.S.S., Civil defense & scout & Guide movement.

Reference

5. Physical Education in ancient India - Dr. S.H. Deshpande.

B.P.E.S /I/A/SC/01: First Aid**UNIT -I**

- a) Meaning and definition of first aids and its importance in sports
- b) Types of first aids and its objectives
- c) First aids box and its management
- d) Role and qualification of first aider

Unit-II

- a) Common sports injuries in different parts of body
- b) First aids for sports injuries
- c) Common causes of sports injuries and its prevention
- d) RICE & Bandage

UNIT - III

- a) Definition of safety education and its significant
- b) Aims and objectives of safety education
- c) Identify causes of accidents & List types and sources of accidents
- d) Safety measures at
 - Home
 - Road
 - School
 - Community

UNIT – IV

- a) Describe and demonstrate the management of the following:-
 - Stings and Snake bites
 - Fracture
 - Nose bleeding
 - Electric shocks and other shocks
- b) Fevers:-
 - Definition of fever
 - signs of fever
 - first Aid for fever
 - Management of fever.
- c) Fainting- Definition and causes of fainting, first aid for fainting
- d) Drowning/Near-drowning:- Definition of drowning, definition of near-drowning
- e) first aid for drowning/near drowning.

Semester II

B.P.E.S /II/A/HC/01: **Physiology of Exercise**

UNIT-I Introduction

- a. Definition and importance of physiology and Exercise physiology
- b. Essential properties of living being.
- c. Effect of exercise on various system of the body.
 - a) Circulatory system
 - b) Respiratory system
 - c) Muscular system

UNIT-II

1. Cardiac functions and Blood

- a. Cardiac cycle and its function in human body.
- b. Control of cardiac function.
- c. Blood pressure and it's regulation in human body.

2. Kidney

- a) Role of kidney in human body
- b) Function of kidney

3. Physiology terminology

a) Second wing	b) Second wing
c) Second wing	d) oxygen debt
e) VO_2 max	f) Vital capacity
g) Athletic heart	

Unit III

1. Nervous system

- a) Definition of Nervous system, role of nerve fibers
- b) Parts of Brain & spinal cord its functions,
- c) Central nervous system and peripheral nervous system**

2. Endocrine system

a) Pituitary gland	b) Thyroid
c) Parathyroid	d) Adrenal
e) Sex organ	

3. Environment effect on the body

- a) High altitude
- b) Hot condition
- c) Cold condition

UNIT-IV

- a) Physical fitness and its components.
- b) Training, conditioning, and warm-up.
- c) Types of muscle contraction.
- d) Lactic acid and its influence on sports performance.
- e) First aids and sports injuries

Books Recommended

B.P.E.S /II/A/HC/02: **Information Technology**

Unit I: Introduction of Computer

1. History, application, characteristics, types of computer (Analog, Digital, Hybrid) and generations of Computer.
2. Physical structure of computer.
3. Role of computer in various fields
4. Need of computer in Physical Education.

Unit-II Component of Computer System: An Introduction of Hardware and Soft ware

1. Components of computer system
2. CPU (CU, ALU and Main memory)
3. Input devices (Keyboard, Mouse and Track Ball, Touchpad, Joysticks, Touch Sensitive Screens, Data Scanning Device, Bar Code Readers, Optical Mark Reader (OMR) and Magnetic Ink Character Reader (MICR)
4. Output Devices (Monitor, Printer, LCD)
5. Hardcopy Devices (Printers and Plotter)
6. UPS and types of UPS
7. Operating System Programme Languages translator.
8. Application program/package

UNIT-III: USE OF COMPUTERS IN SCHOOLS

1. Functional knowledge of operating computers–on/off, word processing, use of power point, excel
2. Computer as a learning tool
3. Effective browsing of the internet for discerning and selecting relevant information
4. Survey of educational sites based in India
5. Downloading relevant material
6. Cross collating knowledge from varied sources
7. Competencies in developing original software

UNIT IV: VISUALISING TECHNOLOGY-SUPPORTED LEARNING SITUATIONS

1. Preparation of learning schemes
2. Interactive use of audio-visual programme
3. Developing PPT slide show for classroom use
4. Use of available software or CDs with LCD projection for subject learning interactions
5. Generating subject-related demonstrations using computer software

B.P.E.S /II/A/HC/03: **Psychology of Sports**

UNIT- I Introduction to Sport Psychology

1. Meaning and scope, Importance, relationship with other sport sciences,
2. Development of sport psychology in India.
3. Scope of Sports Psychology

UNIT-II Concept and meaning of motor learning

1. Stages of learning transfer of training, assessment of learning and factors affecting of motor learning.
2. Growth & Development: Concept of growth & development,
3. Play and its Theories.

UNIT III Personality in Sport:

1. Concept and definition of Personality
2. Modern perspective, (trait, humanistic, social cognitive and biological),
3. Dynamics of personality in sport Anxiety in Sports

UNIT-IV Psychological Preparation and Competition:

1. Motivation and Techniques of Motivation
2. Phenomenon of competitive
3. Psychological preparation for competition (arousal regulation, imagery, self-confidence, goal setting, concentration.)
4. Short term psychological preparation (upcoming competition) Mind to muscle and muscle to mind relaxation techniques.

B.P.E.S /II/A/SC/01: **Fitness and Wellness (Elective Subject)**

FITNESS & WELLNESS

Unit-I

- Definition of fitness & wellness, Components of fitness & wellness,
- Benefits of exercise & health, Fitness & wellness strategy,
- Fitness potential for popular sports, Fitness & wellness activities,
- Role of parents & community for the maintenance of fitness & wellness

Unit-II –

- Selection of machines for various parameters of health & wellness,
- Fitness center, Safety in gymnasium & sports field,
- Clothing & accessories, Carriers in fitness & wellness

Unit-III –

- Test, measurements & evaluation of fitness components, Cardiovascular endurance, Muscular strength, Muscular endurance, flexibility, body composition, agility, balance, co-ordination, speed, power, reaction time

Unit-IV –

- Assessment prior to fitness & wellness prescription,
- Principles of training, Training methods
- Diet prescription, Exercise prescription, Prescription for life style changes, Weight management
- Prevention of diseases through fitness & wellness, Diabetes & exercise, Cardiovascular diseases and exercise, Ageing and exercise, Addiction management- sustains abuse controls
- Stress management, Spiritual management

B.P.E.S /II/A/SC/02: **Adapted Physical Education (Elective Subject)**

Unit 1: An Introduction to Adapted Physical Education

- a) Meaning, Need and Importance of Adapted Physical Education and Sports
- b) Purpose, Aims and Objectives of Adapted Physical Education and Sports
- c) Program organization of Adapted Physical Education and Sports
- d) Adapted Sports- Para Olympics

Unit 2: Development of Individual Education Program (IEP)

- a) The student with a disability
- b) Components and Development of IEP.
- c) Principles of Adapted Physical Education and Sports
- d) Role of Physical Education teacher
- e) Teaching style, method & approach in teaching Adapted Physical Education

Unit 3: Developmental Considerations of an Individual

- 3.1 Motor development
- 3.2 Perceptual Motor development
- 3.3 Early childhood and Adapted Physical Education

Unit 4: Individual with unique need and activities

- 4.1 Behavioral and Special learning disability
- 4.2 Visual Impaired and Deafness
- 4.3 Health Impaired students and Physical Education
- 4.4 HRPF and its development for Individual with unique need
- 4.5 Role of games and sports in Adapted Physical Education

Semester III

B.P.E.S /III/A/HC/01 :Kinesiology

Unit-I : Introduction To Kinesiology

1. Meaning, aim & objectives, importance of kinesiology for physical education and sports
2. Fundamental concepts: Centre of gravity, line of gravity, axis and planes of motion, fundamental starting positions,
3. terminology of fundamental movements, and classification of muscles

UNIT-II :Location& Action

1. Types of Joints
2. Location & Action of Muscles at Various Joints:- a) Upper extremity – shoulder girdle, shoulder joints, elbow joint b) Neck, trunk (Lumbothoracic region)
3. Lower extremity – Hip joint, knee joint, ankle joint
4. Muscular analysis of fundamental movements:- Walking, running, jumping, throwing, catching, pulling, pushing, striking, hanging

UNIT-III Laws of Motion

1. Define mass, weight, force, pressure work, power energy, impulse, moments, impact, friction,
2. Newton's laws of motion
3. Angular kinetics: moment of inertias, conservation of moments, transfer of moments, levers, equilibrium

UNIT-IV Motion

1. Meaning, aims, objectives and importance, types of motion, linear motion & angular motion
2. Linear kinematics: Speed, velocity acceleration uniform accelerated motion and projectile motion
3. Angular kinematics: Angular speed, angular velocity, angular acceleration and relationship between linear and angular motion

B.P.E.S/III/A/HC/02: **METHODS OF TEACHING IN PHYSICAL EDUCATION**

UNIT I : Introduction of Teaching

1. Meaning of teaching, coaching, officiating and as a career in Physical Education & Sports
2. Meaning and need for methods,
3. Factors effecting teaching method.

UNIT II Teaching methods

1. Teaching methods and its Types- command, demonstration, imitation, discussion, part- whole, whole- part-whole, explanation and recitation
2. Techniques of presentation: personal and technical preparation.

UNIT III Class management

1. Class management: techniques, formations, command (types and techniques)
2. factors effecting class management
3. Lesson Plan: Need, construction, Introduction development, skill/recreation

UNIT IV

1. Qualification and qualities of a coach,
2. Personnel in physical education/sports.
3. Teaching Aids: Need and Importance, Types of teaching aids.
4. Fundamental skills of athletics, aquatics, badminton, basketball, cricket, football, hockey, handball, kabaddi, KhoKho, volleyball and Judo, Yoga Assanas,

B.P.E.S /III/A/HC/03: **Health Education**

Unit-I Health

1. Health-meaning, dimensions of health and their interrelationships,
2. Importance of health for individual, family, community and nation;
3. Factors influencing health,
4. Spectrum of health

Unit II Health Education

1. Health Education- meaning, scope
2. Aims and objectives of Health Education
3. Principles, methods and media used in health education
4. Hygiene- personal hygiene, food hygiene, environmental hygiene-meaning, need and importance; associated practices related to maintenance and promotion of health

Unit-II Foods and Nutrition-

1. Misconceptions about food, essential body nutrients- functions, food sources, balanced diet, diet prescription
2. Communicable and Non-communicable diseases- meaning, distinction between communicable and non-communicable diseases.
3. Communicable diseases- their mode of spread and prevention of diarrhea diseases, typhoid, malaria, STD Respiratory disease ; non-communicable diseases- causes and prevention of diabetes, CVD, cancers, renal diseases and respiratory diseases.

Unit-III Contemporary health problems of college youth-

1. Alcohol, drugs, use of tobacco (chewing, sniffing, smoking)- their harmful effects substance abuse management
2. National health programmes- components of existing national health programmes

Unit IV Health Agencies:

- 1 Introduction to Organizational and Administrative set-up of Health System in India
 - National level
 - State Level
 - District Leve
2. Steps of Planning of Health Education Programme
3. Internationals health agencies- WHO, UNICEF, Red Cross- their constitution and role in promoting health

B.P.E.S /III/A/SC/01: **Sports Entrepreneur (Elective)**

Unit I: Introduction to Sports Entrepreneurship

1. Concept of entrepreneurship, innovation & knowledge management in sport
2. Business Planning Process - The business plan as an entrepreneurial tool
3. Elements of Business Plan, Objectives, Market Analysis, Development of product / idea, Marketing, Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition, Business Model Canvas and Drafting Business Proposal for Funding Agency.

Unit II : Introduction to Finance in Sports

1. The Four Domains of Sports Marketing, Marketing Through Sports
2. Finance, Organization & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition,
3. Business Model Canvas and Drafting Business Proposal for Funding Agency.

Unit II. Management of Physical Education and sports

1. Meaning, Need and scope of management of Physical Education
2. Principles of Sports Management
3. Construction, marking and maintenance of play grounds, track & field, gymnasium, swimming pool and athletic track

Unit IV: Organization of co-curricular activities and Physical Education programmes.

1. Physical Education Budget : Need, Importance, procedure and principles of budget making,
2. Physical Education and sports programmes for - Primary, secondary and higher secondary School for sports awareness – demonstration, play days, sports rallies, sports exhibitions
3. Organization of National days (15th August & 26th January)., Organization of mass competition, sports day, hiking, trekking, Scout and Guide Camp and picnics
4. Ceremonies of competition – Opening, closing and victory

B.P.E.S/III/A/SC/02: Professional Preparation in Physical Education (Elective)

Unit I- Foundation OF Professional Preparation

- 1 Meaning of Professional
- 2 Components of Professional Preparation.
- 3 Contribution of physical education in attaining ideals of Indian democracy.
- 4 Forces and factors affecting educational policies and Programme.

UNIT-II Historical Perspective

1. Historical review of Professional Preparation in India.
2. Professional courses being offered in professional preparation colleges in India.
3. Professional Preparation in Physical Education in USA, USSR and UK.
4. Beginning of Professional Preparation in the world.

UNIT-III Under-Graduate preparation of professional personnel.

- 1 Purposes, Admission Requirements of Undergraduate preparation.
- 2 Theory, Teaching practice and practical.
- 3 Professional competencies to be developed.
- 4 Post-Graduate Preparation.
- 5 Methods of instruction.
- 6 Professional relations.

UNIT-IV Teacher and Teaching

- 1 Teaching as a career.
- 2 Basic Qualities of a successful teacher.
- 3 Preparation of the specialized physical education teacher.
- 4 Types of teaching jobs.
- 5 Types of non-teaching jobs.

Reference

Semester IV

B.P.E.S /IV/A/HC/01: **EVENT MANAGEMENT**

Unit-1

Meaning of Events, classification of events, Event Management, Designing an Event- 5C"s (Conceptualization, Costing, Canvassing, Customization, Carrying out).

Key Elements of Events- (Event Infrastructure, Organizers, Clients, Target Audience, Media, and Venue).

Unit-II

Managing Sports Events- Planning, Organizing, Coordinating and Controlling Pre events,

During the Events & Post Events issues. Sponsors, Sports Management Companies, Spectators, Sports personalities, Media etc. Sports Management Companies- Introduction, Role, Scope of Work, Service rendered to the clients, Ways of Functioning- Team work, Departments etc.

Unit-III

Sources of funds available for sports: Broadcasting:- What is broadcasting, The basics of sports broadcasting rights, Media providers:-Who are the media providers, How do they fund sports

Sponsorship:-Meaning of sponsorship, Sports and sponsorship, Major sponsors in sports

Team sponsors and individual sponsors, Endorsement, Sports and celebrity endorsement

Unit-IV

Sports and advertisements Advertisement Suggested Readings

Advertisement and brand choice Aiming the right target, Top sports ad companies

Firms and their advertisement choices, Effects of advertisement, gate money

Budgetary Control in sports

Role of Mass Media in Event Promotion.- Introduction to different Sports Media (Television channels, Sports Magazines etc.) Popular Sports Channels Operating in India- ESPN STAR SPORTS, ZEE SPORTS, TEN SPORTS, DD SPORTS, and NEO SPORTS etc. Spectators control, Importance of Spectators for Sports & Games. Human resource management.

B.P.E.S /IV/A/HC/02 : **Sports Sociology**

1. Introduction to Social Science

- 1.1 Introduction & Meaning of Social Sciences.
- 1.2 Scope of Sociology and its relation with other subjects of Social Sciences.
- 1.3 Defining Society, Community, Association, Institutions, Customs;
- 1.4 Man as a Social animal;
- 1.4 Effect of various social forces on personality development;
- 1.5 Origin and growth of society & Culture.

2. Social Structure, Organization and Institutions :

- 2.1 Socialization, social codes and social control, groups (primary and secondary, crowds and public, family, kinship and marriage;
- 2.2 Social stratification, social class and caste, social mobility;
- 2.3 Economical and political institutes for society;
- 2.4 Cultural and religious institutions;
- 2.5 Concept, factors and process of socio-cultural changes.

3. Main Features of Indian Society and Rural Scene:

- 3.1 Demographic profile, social elements;
- 3.2 Religions pluralism – Hindu, Muslim, Christian and Tribal;
- 3.3 Linguistic Pluralism;
- 3.4 Indian policy – secularism, democracy, social justice;
- 3.5 Indian Rural Scene:
 - 3.5.1 Indian village, rural family, rural education;
 - 3.5.2 Indian village community, rural stratification;
 - 3.5.3 Community development projects and Panchayati-Raj;
 - 3.5.4 Trends in Rural change.

4. Sport and Society:

- 4.1 Meaning and definition of sport sociology;
- 4.2 Sport as a social occurrence;
- 4.3 Socialization through games and sports;
- 4.4 Relationship between family and sport participation;
- 4.5 Relationship between politics and sports;
- 4.6 Social Stratification and sports;
- 4.7 Sports as a social phenomenon.

B.P.E.S / IV / A/ HC/03: Environment Science

1. **Introduction:**
 - 1.1 Multi – Disciplinary nature of environmental studies.
 - 1.2 Definition, Scope and Importance of environmental studies.
 - 1.3 Concept of environmental education.
 - 1.4 Historical Background of environmental education.
2. **Natural Resources and related environmental issues:**
 - 2.1 Forest Resources:
 - 2.1.1 Use and over exploitation, deforestation
 - 2.1.2 Timber extraction, mining, dams and their effects on forests and tribal people.
 - 2.2 Water Resources
 - 2.3 Flood Resources:
 - 2.3.1 World food problems
 - 2.3.2 Changes caused by agriculture and overgrazing
 - 2.3.3 Effects of modern agriculture
 - 2.3.4 Fertilizer-pesticide problems.
 - 2.4 Energy Resources:
 - 2.4.1 Growing energy needs
 - 2.4.2 Renewable and non-renewable energy sources
 - 2.4.3 Use of alternate energy sources.
 - 2.5 Land Resources:
 - 2.5.1 Land as a resource
 - 2.5.2 Land degradation
 - 2.5.3 Man induced Land Slides
 - 2.5.4 Soil erosion and desertification
 - 2.6 Role of an individual in conservation of Natural Resources.
- 3.1 **Ecosystem:**
 - 3.1.1 Concept, structure and function of an Ecosystem
 - 3.1.2 Producers, consumers and decomposers.
 - 3.1.3 Energy flow in the ecosystem
 - 3.1.4 Food chains, food Webs and ecological pyramids.

4.1 Environmental Pollution:

4.1.1 Definition, effects and control measure of:

- 4.1.1.1 Air Pollution
- 4.1.1.2 Water Pollution
- 4.1.1.3 Soil Pollution
- 4.1.1.4 Marine Pollution
- 4.1.1.5 Noise Pollution
- 4.1.1.6 Thermal Pollution
- 4.1.1.7 Nuclear Hazards

4.1.2 Solid Waste Management: causes, effects and control measures of urban and industrial wastes.

4.1.3 Role Disaster Management: Floods, earthquake, cyclone and Land slides.

B.P.E.S /IV/A/SC/01: **FITNESS INSTRUCTOR**

Unit-I Introduction to health and fitness

Health goals, fitness goals, performance goals, components of physical fitness and performance, behaviours that support fitness and performance, taking control of personal health and fitness, factors to consider prior to physical activity, exercise requirement for prevention of premature health problems, how to promote physical activity promotion of physical activity adherence

Unit-II Foundation to health fitness instructions:

Energy cost of physical activity, measurement of energy expenditure, significance of cardiovascular fitness, risks of testing cardio respiratory fitness, components of health related and fitness related fitness

Unit-III Healthy body composition

Measurement of body fat calculating target body weight, LBM and Body fat,

Muscular strength and endurance:- health fitness requirements, assessment of strength and muscular endurance

Flexibility: Importance of flexibility in health and fitness, factors affecting range of movement (ROM) spine and hip joint, flexibility and low back function

Unit-IV Exercise prescription: foundation of prescribing exercise, general guidelines for cardio-respiratory fitness programmes, determining intensity, general exercise testing, exercise programme selection, exercise prescription for body weight management

Muscular strength and endurance training: fundamental principles, types of strength training, muscular training modes, intensity and frequency. Overreaching and overtraining

Flexibility training: exercise considerations for improving flexibility, prophylactic exercise for improving low back function

B.P.E.S /IV/A/SC/02: Sports Industry**SPORTS INDUSTRY****Unit-I**

Introduction, history in relation to „sports goods industry“ in India, Industrial relations in India, Peculiar characteristic, i.e. Hand Made Goods, Involving skilled workers-piece rated wages, Policy- five year plans for production, export strategy and potential

Unit-II

Sports Industry in Europe-USA, Canada and ASIA & other parts of the world, Major sports-World wide-Europe, ASIA & India including some local games, development of sports

Unit-III

Future need for mechanization to improve quality, Evaluation of management thought, planning-nature, objective, promises, strategies & tactical plan

Unit-IV

Organizations-Principles, structure, management, levels, quality control, Personnel management- recruitment selection, training, performance

Unit-V

Direction/controlling- production control, material control, quality control, sales distribution-government departments, whole sellers & retailers

Semester V

B.P.E.S /V/A/HC/01: **Correctives in Physical Education**

Unit-I

1. Definition of Remedial, physiotherapy and corrective exercises.
2. Concept of posture, its meaning and characteristics of correct and incorrect posture.
3. Causes of incorrect posture
4. Necessity and importance of correct posture.
5. Principles of correct posture.
6. Tests for correct posture.

Unit-II

1. Classification of posture : a. Good Type b. Bantom Type c. Fatigue Type
2. Postural deformities and their causes : a. Kyphosis b. Lordosis c. Scoliosis d. Bow legs e. Knock knee f. Flat foot
3. Preventive and remedial measures for postural defects :
 - a. Psychological and habitual consideration in preventing and correcting postural defects.
 - b. Corrective exercises for various postural defects.
 - c. Physiotherapist treatment in correcting postural defects.

Unit-III

1. Massage: **a.** Meaning, definition and a brief history of massage.
b. Massage as means of relaxation and points to be considered while giving massage. **c.** General effects of massage.
2. Classification of the manipulation and movements in the massage :
3. Effleurage and stroking i. Petrissage ii. Percussion / Tapotement
iii. Vibration and shaking.
4. Effects of manipulation and movements on the different systems of human body.

Unit-IV

- Classification of positions : a. Fundamental positions b. Derived positions c. Modified positions
- Classification of exercises along with their practical instructions : a. Free mobility exercises b. Assisted exercise c. Resisted exercises

Reference Books:

B.P.E.S /V/A/HC/02 : **Test measurement and Evaluation**

UNIT-I

- Introduction to test, measurement and evaluation and their importance in the field of physical education
- Test constructions:- a) general consideration b) physical fitness/ efficiency test

UNIT – II

- Meaning and importance of statistics in the field of physical education, “population” and “sample” “random sampling”
- Meaning of data, kinds of data- continuous and discrete Frequency distribution, construction of frequency tables, mean, median and mode.

UNIT –III

- Measures of variability range, quartile, deviation, standard Deviation, co-efficient of variation
- Normal probability curve and meaning, uses its principles, Diagrammatic represent action

UNIT-IV

- Physical fitness testing: components of physical fitness
- Strength test: - Kraus Weber strength test, Muscular Endurance test: Cardiopulmonary test:
- Endurance Test, Harvard step test.
- Anthropometric Measurements:- Weight, height, sitting height, chest circumference, thigh circumference, calf circumference, skin fold biceps, triceps, sub scapular and supra iliac.
- Measurement of skills, games and sports-Johnson badminton test, Brady volleyball test, McDonald soccer test, Cornish Handball test, Hockey skill test- SAI hockey Test

B.P.E.S /V/A/HC/03: **Yoga Education**

UNIT- I

Origin of yoga, definition and scope of yoga, limitations and misconceptions, importance of yoga in physical education and other fields

UNIT- II

Historical development of yoga in India.

Types of Yoga:- Hatha yoga, laya yoga, mantra yoga, bhakti yoga, karma yoga, jnana yoga, raj yoga

UNIT- III

Patanjali yoga sutras- yama, niyama, asana, pranayama

Pratyahar- Benefits & utilities of these. Astanga yoga- Definition, objectives, dharna, dhyana, Samadhi & their psychological impact.

Shatkarm/cleansing process/ yogic methods and personal hygiene.

UNIT- IV

Asanas: Types, importance of asanas in special reference to Physical Education & Sports.

Differentiate between asanas and exercise.

Pranayama and importance of pranayama in special reference to Physiological effects

Bandhas, mudras and their physiological effects.

UNIT- V

Disease wise treatment through yoga therapy- Asthma, high & low B.P, diabetes, obesity, heart disease, insomania, arthritis, backache, female disease and importance of vegetarianism in yogic diet

B.P.E.S /V/A/SC/01: **GYM MANAGEMENT**

UNIT-I

Concept of nutrition and health, balanced diet, dietary aids and gimmicks, Energy and activity, calculating calorie intake and expenditure

Obesity, anorexia and related health problems – measurements and management, Weight management programmes

UNIT-II

Understanding of various forms of aerobics- floor aerobics, step – aerobics, weight, Aerobics and aqua aerobics, Training effects of aerobic fitness on various physiological systems namely skeletal Muscular, circulatory and respiratory

Improvement of aerobic fitness, Aerobic fitness programme

UNIT-III

Location and Establishment of gym (Publicity, policy, reception, information, Registration, offer of programmes), Procurement, placement & maintenance of gym, Equipments , Marketing, clientage, Enrolments, record keeping, social activities, Public Relations, Individualized/group grooming programme, basic concepts of financial management

Gym-instructor – qualification, qualities, pay-roll, Performance – evaluation, grooming and presentation, Introduction to different exercise equipment, Gym management – Costing, Balance sheet, Promotional plans

UNIT-IV

Measurement of Weight and Height, Calculating BMI (Body Mass Index), Measurement of Fitness Components Flexibility (Sit and Reach Test, Hip Bend and Toe Touch), Strength (Sit-Ups, Leg-Raise for Minimal Strength), Cardiovascular Endurance (One-mile run, Physical Efficiency test, Harvard step test),

Self- evaluation –Personal Health and Well-being

UNIT-V

Exercise schedules – Aerobics, Fitness and Weight Management

B.P.E.S V/A/SC/02 :SPORTS JOURNALISM

UNIT-I

Meaning, scope and changing trends of journalism in sports

Historical development & role of print and electronic media in sports promotion

UNIT-II

Language – vocabulary, spellings, figure of speech , dialect, grammar, punctuation

Fundamentals of a sports story/ news

UNIT-III

Organizational set-up of a news paper- printing, process sequences of operations in the printing of a news paper/journals.

Introduction of various sports organization and agencies- Olympic Games, Asian games, commonwealth games, awards and trophies.

UNIT-IV

Theory and principles of advertising in sports

Public relations in sports, press release, conferences

Research tools for developing a sports story

Process of news paper publishing and management

Semester VI

B.P.E.S /VI/A/HC/01: **Basic of Sports Training**

UNIT I: Introduction

- Meaning and Definitions of Sports Training.
- Meaning of terms: Coaching, Teaching, Conditioning and Training.
- Aim and Tasks of Sports Training.
- Characteristics of Sports Training.
- Principles of Sports Training.
- Systematization of Sports Training.
 - Beginner
 - Intermediate.
 - High Performance.

UNIT-II: Training Load

- Definition and Types of Training Load.
- Features/Factors of Training Load
- Principles of Intensity and Volume of Stimulus.
- Over Load.
- Meaning and types of over load.
- Causes of over load.
- Symptoms of over load.
- Tackling of over load.
- Judgment of Training Load.

UNIT-III :- Strength

- Concept and types of Strength.
- Factors determining Strength.
- Methods of strength training.
- Management of strength training programme.

Endurance

- Concept and types of endurance.
- Factors determining endurance.
- Methods of endurance training.

Speed

- Concept and Classification of Speed.
- Factors determining speed.
- Methods of developing speed abilities.
- Reaction speed
- Speed of movement.
- Acceleration speed
- Sprinting speed.

- Speed endurance.

UNIT-IV : Technical Training

- Definition of Technique and Skill.
- Importance of Technique.
- Process of Skill Learning.
- Methods of Technique Training.

Tactical Training

- Concept of Tactics and Strategy.
- Methods of Tactical Training.

Planning

- Concept of Training Plan.
- Principles of Planning.
- Types of Training Plan.

Periodization

- Meaning and Importance of Periodization.
- Periods of Training Year.
- Aim and Contents of Periods.
- Types of Periodization.

B.P.E.S /VI/A/HC/01: **STRESS MANAGEMENT**

Unit-I

Definition of stress and anger, Causes of stress and anger, two main emotions of stress-fear and anger, Daily life stressors, Process of stress and anger- Psycho Physiology of stress

Unit-II

Adaptation to stress-Reframing of habitual stress resistance, Occupational stress, Peer stress (Students stress), Family stress, Stress & elderly

Unit-III

Stress & drug abuse

Stress related diseases- i) Sleep disorder, ii) Eating disorder, iii) Sexual and emotional disorder, iv) Other stress related diseases, v) Stress & Spirituality

Unit-IV

Self awareness and stress management, Muscular tension reduction, Emotional tension reduction, Stress free living, Stress free examination, Stress management through physical activity, Stress management through recreation

Unit-V

Anger management- Redford William's 12 steps of anger management

Stress management- behavior modification, time management, coping strategy

Relaxation technique- i) Diaphragmatic breathing, ii) Meditation, iii) Progressive muscle relaxation, iv) Yoga, v) Mental imagery, vi) Music therapy, vii) Massage therapy

B.P.E.S /VI/A/HC/01: EDUCATIONAL TECHNOLOGY**UNIT-I : Introduction to Educational Technology**

- 1.1 Definition
- 1.2 Educative Process
- 1.3 The Teacher of Yesterday & Today
- 1.4 An outline of Teaching method used then and now
- 1.5 Use of sensory organ in the process of learning and remembering
- 1.6 Communication:
 - 1.6.1 Types of Communication
 - 1.6.2 Communication Cycle
 - 1.6.3 Communication in the Class room

UNIT-II Teaching Aids:

- 2.1 Importance of Teaching Aids
- 2.2 Criteria for selecting Teaching Aids
- 2.3 Difference between Teaching Method and Teaching Aid
- 2.4 Broad classification of Teaching Aids
 - 2.4.1 Audio Aids
 - 2.4.2 Visual Aids
 - 2.4.3 Audio-Visual Aids
 - 2.4.4 Effectiveness of Edger Dale's cone classification
- 2.5 Advantage and suggestions for effective use of selected teaching Aids.
 - 2.5.1 Verbal
 - 2.5.2 Chock Board
 - 2.5.3 Charts
 - 2.5.4 Models
 - 2.5.5 Slide Projector
 - 2.5.6 Over Head Projector
 - 2.5.7 Motion Picture
 - 2.5.8 Self Experiment and Projects.

UNIT-III New Teaching Techniques and Innovations – I:

- 3.1 Art of questioning and answering
 - 3.1.1 Purpose of Questioning
 - 3.1.2 Classification of Questioning
 - 3.1.3 Techniques of asking questions
- 3.2 Programmed Learning
 - 3.2.1 Concept of Programmed learning
 - 3.2.2 Fundamental Principles of Programmed learning

3.2.3 Steps involved in preparation of Programme

3.3 Team Teaching

3.3.1 Meaning

3.3.2 Guiding principles of Team Teaching

3.3.3 Advantage of Team Teaching.

UNIT-IV **New Teaching Techniques and INNOVATIONS – II :**

4.1 Micro Teaching

4.1.1 Concept and Features of Micro Teaching

4.1.2 Micro Teaching Verses Traditional Teaching

4.1.3 Steps in Micro Teaching

4.1.4 Principles of Micro Teaching

4.1.5 Micro Teaching Skills

4.1.6 Limitation of Micro Teaching

4.2 Simulation Teaching

4.2.1 Meaning of Simulation

4.2.2 Types of activities in simulation

4.2.3 Steps in Simulation

4.2.4 Advantages of Simulation

4.2.5 Limitations of Simulation

B.P.E.S /VI/A/SC/02: **ART OF DAILY SCHEDULING**

Unit-I

Introduction:- Meaning and definition of Daily Schedule, art, science, management of time, shortage of time for daily activities

Types of daily activities: requirement of daily activities for various domains of personality, essential categories of daily activities, correct decision making to include all types of daily activities with in fixed 24 hours

Unit-II

Art of living, art of scheduling, art and science of principles of time management, acronym and daily prayers, methods of recalling and rechecking daily activities

Attitudes and art of daily schedules: right knowledge of daily activities, developing correct attitude by learning the art of behaviour change, transdental theory of behaviour changes, relation between attitude and behaviour change

Unit-III

Understanding the concept of perfection of nature, relation between nature known as superpower or god in religious terms, predisposing, enabling and reinforcing factors for strengthening the art of daily schedules

Cognition and daily schedules: necessity of right attitude and right information of essential components of daily schedules. Enlisting activities needed daily, relation between qualitative and quantitative balances

Unit-IV

Alternative daily schedule patterns: effect of culture, race, gender and age on daily schedules, fundamentals of art of daily schedules, listing alternative daily schedules for different categories of human being based on culture, race. Gender, age, and geographical locations

Factors helping adherence to daily schedule: self responsibility, knowledge to body requirements, important body systems requiring daily attention

Analysis of lifestyles: role of active lifestyle and wellness activities, factors helping to promote daily schedules

Barriers to daily schedules – peer pressures, careless environment of , firm no to harmful barriers like smoking, drugs, alcohol and irresponsible sex urge

Wellness and daily schedules: art of inclusion of all wellness parameters to daily schedules, namely meditation, foods, right physical activities, right hygienic habits, right environmental care, right injury preventing behaviours, right decision towards sex, entertainment recreation, rest, sleep

COLLEGE OF PHYSICAL EDUCATION

Dhankawadi, Pune-411 043 (Maharashtra), Tel.020-24373741

REACCREDITED 'A' GRADE BY NAAC

Bachelor of Physical Education

(B.P.Ed.)

(4 Semester Programme)

CURRICULUM FRAMEWORK

**GUIDELINES OF REGULATIONS AND SYLLABUS STRUCTURE FOR
B. P. ED. (FOUR SEMESTERS)
CHOICE BASED CREDIT SYSTEM (CBCS)**

Preamble: Bachelor of Physical Education (B. P. Ed.) two years (Four Semesters Choice Based Credit System) B.P.Ed programme is a professional B.P.Ed programme meant for preparing teachers of physical education in classes VI to X and for conducting physical education and sports activities in classes XI and XII.

B. P. Ed. B.P.Ed programme shall be designed to integrate the study of childhood, social context of Physical Education, subject knowledge, pedagogical knowledge, aim of Physical Education and communication skills. The B.P.Ed programme comprises of compulsory and optional theory as well as practical courses and compulsory school internship.

Course Outcome

1. Bachelor of Physical Education (B. P. Ed.) two years (Four Semesters Choice Based Credit System) programme is a professional programme meant for preparing teachers of Physical Education in classes VI to X and for conducting Physical Education and sports activities in classes XI and XII.
2. The course prepares the leaders in Physical Education who act as Mentors and Motivators for School children in inculcating healthy and hygienic habits.
3. To prepare the leaders who can work in Health and Fitness Industry as Fitness and Wellness experts.
4. To prepare Sports Experts in various capacities like Trainers, Physiotherapists, Rehabilitation Experts, Sports Counsellors, Game Officials, Scorers, Referees etc.
5. To prepares Experts who can work with various Sports Federations/Organisations/Leagues/Media Houses.

Intake, Eligibility and Admission Procedure:

The Intake, Eligibility and Admission Procedure are as per the NCTE norms and standards.

Eligibility

(a) Bachelor's degree in any discipline with 50% marks and having at least participation in the Inter-College/Inter-Zonal/District/School competition in sports and games as recognized by the AIU/IOA/SGFI/Govt. of India. (Sports participation in last 05 years.)

Or

(b) Bachelor's degree in physical education with 45%marks.

Or

(c) Bachelor's degree in any discipline with 45%marks and studied physical education as compulsory/elective subject.

Or

(d) Bachelor's degree with 45%marks and having participated in national/Inter University/State competitions or secured 1st, 2nd or 3rd position in Inter College/Inter-Zonal/District/School competition in sports and games as recognized by the AIU/IOA/SGFI/Govt. of India. (Sports participation in last 05 years.)

Or

(e) Bachelor's degree with participation in International competition or secured 1st, 2nd or 3rd position in National/Inter-University competition in sports and games as recognized by the AIU/IOA/SGFI/Govt. of India. (Sports participation in last 05 years.)

Or

(f) Graduation with 45%marks and at least three years of teaching experience (for deputed in-service candidates i.e. trained physical education teachers/coaches).

The relaxation in the percentage of marks in the qualifying examination and in the reservation of seats for SC/ST/OBC and other categories shall be as per the rules of the Central Government/State Government, whichever is applicable.

Age:-

For General category candidates the upper age limit is 32 years as on 1st July of the academic year. Age relaxation for SC, ST and OBC candidate will be given according to the rules and regulation of Bharati Vidyapeeth University and GOI

Number of seats:-

50 (Fifty) seats are approved by NCTE Bhopal for B.P.Ed. course.

Note:-

*Married girl is eligible for admission to B.P.Ed. programme. But, it is also compulsory for her to sign an undertaking that she will discontinue the B.P.Ed programme at once for at least one academic year, if she gets pregnant during the course of study. She can join back afresh from the beginning of the semester keeping the guidelines pertaining to the maximum duration of the course in mind.

*No differently-abled candidate is eligible for the admission in B.P.Ed. Course.

Admission procedure:-

Admission shall be made on merit on the basis of marks obtained in the entrance examination consisting of 100 marks based on the following.

a- Physical fitness test	50 marks
b- Written test	30 marks
c- Interview	10 marks
d- Sports achievement	10 marks

The total entrance test will be conducted in two days and could be extended, if needed and it will be conducted at Bharati Vidyapeeth Deemed University College of Physical Education

There shall be Physical Fitness Test (modified AAHPER/CNADIAN/OR ANYOTHER fitness test) of 50 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education

- (A) Theory Paper comprising of 30 multiple-choice questions of 30 minutes duration carrying 30 marks. Questions shall be based on Aptitude Test, Current Affairs and General Knowledge about sports.
- (B) Interview comprising of 10 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education
- (C) Sports Participation Weightage :- Candidate shall be given maximum 10 marks weightage on the basis of their sports participation in any one of the following level:

Participation	Marks
➤ International:	10
➤ Senior National championship/ National Games:	
1st Place :	10
2nd Place :	08
3rd Place :	07
Participation:	05
➤ All India Inter-Zonal Inter University Competitions:	
1st Place :	08
2nd Place :	07
3rd Place :	06
Participation:	05
➤ Zonal Inter University Competitions/Junior National Competitions:	
1st Place :	07
2nd Place :	06
3rd Place :	05
Participation:	04
➤ Senior State Championship/Rural national games/Woman Festival:	
1st Place :	05
2nd Place :	04
3rd Place :	03
Participation:	02

Note:-

*The marks will be given in only those games/sports, which are in the competition list of Association of Indian Universities (**AIU**) and/or School Games Federation of India (**SGFI**).

*The obtained position must be during last five academic sessions.

*The school state championship and inter collegiate championship participation shall be considered for eligibility criteria only; the candidate shall not get any marks for sports weightage.

Medical examination:-

Qualified candidates will have to submit medical certificate by CMO and blood group certificate to the concern office.

Course fee

The course fee Rs 80,000/- shall be deposited in Four installments ie.

Semester	Installment	Month	Amount
1 st	1 st	July- At the time of admission	Rs.20,000
2 nd	2 nd	December	Rs 20,000
3 rd	3 rd	June	Rs.20,000
4 th	4 th	December	Rs.20,000

The mode of **DD/Banker's cheque** in favor of the **The Pricipal ,Bharati Vidyapeeth (Deemed to be) University, College of Physical Education, or candidate can deposit cash in Bharati Bank in prescribed bank account of the college through Challan obtaining from College office .**

Duration: The B.P.Ed programme shall be of duration of two academic years, that is, four semesters. However, the students shall be permitted to complete the B.P.Ed programme requirements within a maximum of three years from the date of admission to the programme.

The student, who discontinue the B.P.Ed programme after one year or more semesters due to extraordinary circumstances, are allowed to continue and complete the B.P.Ed programme with due approval from the principal .

SCHEME OF EXAMINATION FOR B.P.ED. (4 SEMESTERS)
(2015-2017)

Semester wise Distribution of Marks & Credits

		Sem-I	Sem-II	Sem-III	Sem-IV	Total
Part-A: Theory Courses	Marks	400	400	400	200	1500
	Credits	16	16	16	8	60
Part-B: Activity Courses (Games/Sports)	Marks	400	300	300	400	1300
	Credits	8	6	6	8	26
Part- C: Game/ Sport Specialization	Marks	100	100	100	100	400
	Credits	2	2	2	2	8
Part D -: Teaching Ability and Internship	Marks	--	100	100	300	400
	Credits	--	2	2	6	8
Grand Total	Marks	900	900	900	900	3600
	Credits	26	26	26	24	102

NOTES:

- Each Theory Course shall have 4 Units and 3 hrs. duration final examination except Sports Specialization which will have 3 units in each semester and 2-hour duration semester-end examination.
- The pattern of Semester-end question papers shall be:
 - 2.1. For papers having Max. Marks- 60 : [12+12+12+12+(4x3)=60 marks]**
For University examination each question paper shall consist of 9 questions (8 long answer questions from each unit and 1 combined question of 4 short notes from all 4 units). The candidate will attempt any one question from each unit (4 questions of 12 marks each from first 8 questions). The 9th question will be compulsory consisting 4 short notes of 3 marks each.
- For Internal Assessment of Theory Courses one Mid Semester Test of 30 marks for each course will be conducted by the college. For the mid semester test each question paper (of 30 marks) shall consist of 5 questions (4 long answer questions from first two unit and 1 combined question of 2 short notes from both units). The candidate will attempt any one question from each unit (2 questions of 12 marks each from first 4 questions). The 5th question will be compulsory consisting 2 short notes of 3 marks each. In addition, the teacher concerned shall conduct one open book examination consisting of 10 marks and submit the marks to the college exam department.

4. For Semester-end Examination in Activity Courses, the breaks-up of 100 Marks shall be as follows:

-	Skill proficiency/playing ability	:	80
-	Diary / Record book	:	20

5. For Specialization Sports Practice and Sports Training, the break-up of 100 Marks shall be as follows:

-	Skill proficiency/playing ability	:	60
-	Written Test	:	40

6. For internship, student needs to complete 150 hrs. as a physical education teacher in schools and also needs to prepare day to day lesson plan. Every day lesson plan will be evaluated and signed by School Administrator/Principal. Student needs to submit a report on his or her internship with the lesson plan duly signed by School Administrator/Principal. School Administrator/Principal will also be asked to give marks to the student according to his performance after the internship gets over. The break-up of 300 Marks shall be as follows

-	School Administrator Report	:	100 marks
-	Lesson Plan	:	100 marks
-	Viva-Voce	:	100 marks

CURRICULUM FRAMEWORK FOR B.P.ED.

(4 SEMESTERS 2015-2017)

B.P.Ed. I-Semester (July 2015 to November 2016)

PART-A: THEORY COURSES:

Subject Code	Courses	University Exam	Internal Assessment	Total	Lecture	Credits
BPEd/I/A/HC/01	Introduction & History of Physical Education	60	40	100	64	4

Activity Code	Name of Area	University Exam	Class	Credits
BPEd/III/C/HC/01	Internship	300	150	6

(Choice Based Credit System)

Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0(40% of marks) at UE and also a minimum grade point of 5.0(40% marks) at IA.

If a student fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50 % in aggregate). The GPA for a course will be calculated only if the learner passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table:

Range of Marks (Out of 100)	Grade	Grade Point
80 ≤ Marks ≤ 100	O	10
70 ≤ Marks ≤ 80	A+	9
60 ≤ Marks ≤ 70	A	8
55 ≤ Marks ≤ 60	B+	7
50 ≤ Marks ≤ 55	B	6
40 ≤ Marks ≤ 50	C	5
Marks ≤ 40	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weights for performance at UE and IA shall respectively be 60% and 40%.

GPA is calculated by adding the UE marks of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

Formula to calculate Grade Points (GP)

Suppose that Max is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP. Sex x -Max/10 (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

Range of marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (Marks/x)+2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (Marks/x)+1

particular semester. While the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of learner when he/she completes the B.P.Ed programme is the final result of the learner.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA)	10x CGPA - 10	If $5.00 \leq \text{CGPA} \leq 6.00$
	5x CGPA + 20	If $6.00 \leq \text{CGPA} \leq 8.00$
	10x CGPA - 20	If $8.00 \leq \text{CGPA} \leq 9.00$
	20x CGPA - 110	If $9.00 \leq \text{CGPA} \leq 9.50$
	40x CGPA - 300	If $9.50 \leq \text{CGPA} \leq 10.00$

Award of Honours:

A student who has completed the minimum credits specified for the B.P.Ed programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA Below 5.00	F	Fail	Marks Below 40

Educational Tour/Camp: In addition to the above rules the student must fulfill the following requirements to acquire the degree which is mandatory. Educational Tour or Leadership Camp organized by the College of Physical Education of at least 07 days. The students shall contribute separately for these activities.

B.P.Ed

Semester I

BPEd/I/A/HC/01: Introduction & History of Physical Education

Subject Outcome:-

1. Students will understand the concept of Philosophy and philosophy of physical education to acquaint student with the different Philosophies along with their implications in Physical education.
2. Students will understand the concept of Sociology and to acquaint student the implications of Physical education and sports in society.
3. Students will understand the concept of Education and Physical Education
4. Students will get acquainted with historical perspective as influence on physical education, Abroad and in India.
5. Students will get acquainted with different Issues, challenges and opportunities in Physical education & sports

Unit – 1: Introduction

Meaning, Definition and Scope of Physical Education
 Aims and Objective of Physical Education
 Importance of Physical Education in present era.
 Misconceptions about Physical Education.
 Relationship of Physical Education with General Education.
 Physical Education as an Art and Science.

Unit- II – Historical Development of Physical Education in India

Indus Valley Civilization Period. (3250 BC – 2500 BC)
 Vedic Period (2500 BC – 600 BC)
 Early Hindu Period (600 BC–320 AD) & Later Hindu Period (320AD-1000AD)
 Medieval Period (1000 AD – 1757 AD) British Period (Before 1947)
 Physical Education in India (After 1947)
 Contribution of Akhadas and Vyayamshalas
 Y.M.C.A. and its contributions.

Unit- III- Foundation of Physical Education

Philosophical foundation:
 Idealism, Pragmatism, Naturalism, Realism, Humanism,
 Existentialism and Indian Philosophy and Culture.
 Fitness and wellness movement in the contemporary perspectives
 Sports for all and its role in the maintenance and promotion of fitness.

Unit-IV- Principles of Physical Education

Biological, Growth and development, Age and gender characteristics, Body Types
 Anthropometric differences , Psychological, Learning types, learning curve Laws and principles of learning, Attitude, interest, cognition, emotions and sentiments. Sociological, Society and culture, Social acceptance and recognition, Leadership
 Social integration and cohesiveness

BPEd/I/A/HC/02: Anatomy, Physiology and Exercise Physiology

Subject Outcome:-

1. Students will understand the basic structure and function of the human body
2. Students will understand the effect of exercise on the different systems
3. Students will understand the normal movements of the body
4. Students will understand how body gets fuel for its working.

Unit – 1 Introduction

Brief introduction of Anatomy and Physiology
 Need and importance of anatomy and physiology
 Organization of Living organism
 Essential Properties of living cell

Unit – II Skeletal System, Digestive System and Respiratory system

Skeletal System

General structure of the bone, various kinds of bones, functions of the bones.
 Joints, their structure, and their movements

Digestive System

Organs and its function in digestive system
 Process of digestion in human body

Respiratory system

Organs and its function in respiratory system
 Types of respiration

Unit – III Cardiovascular System and Nervous system

Cardiovascular System

Heart, its location, structure and function.
 Mechanism of blood circulation.
 Blood pressure, cardiac output, cardiac cycle, heart rate, pulse rate and athletes heart.

Nervous system

Organs of nervous system
 Function of brain
 Function of spinal cords
 Types of nervous system

Unit – IV- Effect of Exercise on Various Systems

Cardio – respiratory system
 Skeletal system
 Muscular System
 Digestive and Excretory system
 Nervous system

BPEd/I/A/HC/03: Computer Application & Communicative Skills in Physical Education

Learning Outcome

1. Understand concept of information and communication technology in physical education field
2. Analyse sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Offer Hands on Knowledge in information and communication Technology .

Unit I: Introduction of Computer

1. History, application, characteristics, types of computer (Analog, Digital, Hybrid) and generations of Computer.
2. Physical structure of computer.
3. Role of computer in various fields
4. Need of computer in Physical Education.

Unit-II Component of Computer System: An Introduction of Hardware and Software

1. Components of computer system
2. CPU (CU, ALU and Main memory)
3. Input devices (Keyboard, Mouse and Track Ball, Touchpad, Joysticks, Touch Sensitive Screens, Data Scanning Device, Bar Code Readers, Optical Mark Reader (OMR) and Magnetic Ink Character Reader (MICR)
4. Output Devices (Monitor, Printer, LCD)
5. Hardcopy Devices (Printers and Plotter)
6. UPS and types of UPS
7. Operating System Programme Languages translator.
8. Application program/package

UNIT III Effective Communication

A) The Seven C's of the Effective Communication

B) Communication: Its interpretation

- i)** Basics **ii).** Nonverbal Communication **iii).** Barriers to Communication

UNIT IV Business Communication and Writing

A) Business Communication at Work Place

- i)** Letter Components and Layouts **ii).** Planning a letter **iii).** Process of Letter writing **iv).** Email Communication **v).** Memo and Memo Reports **vi).** Employment Communication **vii).** Notice Agenda and Minutes of Meeting **vii).** Brochures

B) Report Writing

i). Effective Writing ii). Types of Business Reports iii). Structure of Reports iv). Gathering Information v). Organization of the Material vi). Writing Abstracts and Summaries vii) Writing Definitions viii). Visual Aids ix). User Instruction Manual

BPEd/I/A/SC/01: Development of Sports Movements (Elective)**Subject Outcome:-**

1. Students will understand the concept of Philosophy and philosophy of physical education to acquaint student with the different Philosophies along with their implications in Physical education.
2. Students will understand the concept of Sociology and to acquaint student the implications of Physical education and sports in society.
3. Students will understand the concept of Education and Physical Education
4. Students will get acquainted with historical perspective as influence on physical education, Abroad and in India.
5. Students will get acquainted with different Issues, challenges and opportunities in Physical education & sports

UNIT - I A) Physical Education in Ancient Civilization with reference to

- I) India ii) Greece iii) Rome IV) Egypt.
- B) Development of Physical Education & sports during 20 Th Century with special reference to 1) U.S.A. ii) Sweden iii) Germany iv) Olympics v) Asian Games.

UNIT - II Physical Education in India during 20th century

- a) Physical Training for teacher working in school & college.
- b) Movement of Akhadas & Vyayam Shalas.
- c) Central Advisory Board of Physical Education.
- d) All India council of sports.
- e) SNIPES, NSNIS, LNIPE.
- f) Sports authority of India (sai)
- g) Nehru yuwak Kendra.
- h) Awards National & state level.

UNIT - III A Study of the development of Physical Education sports & Games in Maharashtra with reference to

- a) The present Organization set up in state.
- b) Important schemes and activities including indigenous activities.
- c) Role of Voluntary Physical Education & sports Bodies in state...

UNIT - IV Youth welfare & Youth Services:-

- a) Concept of youth welfare & Youth work.
- b) Youth organization in India
- c) Programmers under youth development
- d) Youth services such as secreting & guiding N.C.C. N.S.S., Civil defense & scout & Guide movement.

Reference

- 1) Manual of Physical Education of India - D.G. Wakharkar
- 2) A World History of Physical Education - Van Ten Micher
- 3) History of Physical Education C.W. Hyensmith
- 4) A Brief History of Physical Education - Emmel A Rice & John L Hutchinson
- 5) Physical Education in ancient India - Dr. S.H. Deshpande.

BPEd/I/A/SC/02: First Aid & Safety Education (Elective)**Subject Outcome:-**

1. Students will understand classification of sports injuries and its first aid and immediate management.
2. Students will know the basics of therapeutic modalities and its physiological effects.
3. Students will know the process of rehabilitation
4. Students will understand good and bad posture, postural deformities, its causes and management.
5. Students will understand nutrition and diet plan pre, during and post competition.
6. Students will know the general first aid.

UNIT - I

- a) Meaning and definition of first aids and its importance in sports
- b) Types of first aids and its objectives
- c) First aids box and its management
- d) Role and qualification of first aider

Unit-II

- a) Common sports injuries in different parts of body
- b) First aids for sports injuries
- c) Common causes of sports injuries and its prevention
- d) RICE & Bandage

UNIT - III

- a) Definition of safety education and its significant
- b) Aims and objectives of safety education
- c) Identify causes of accidents & List types and sources of accidents
- d) Safety measures at
 - Home
 - Road
 - School
 - Community

UNIT - IV

- a) Describe and demonstrate the management of the following:-
 - Stings and Snake bites
 - Fracture
 - Nose bleeding
 - Electric shocks and other shocks
- b) Fevers:-
 - Definition of fever
 - signs of fever
 - first Aid for fever
 - Management of fever.
- c) Fainting- Definition and causes of fainting, first aid for fainting
- d) Drowning/Near-drowning:- Definition of drowning, definition of near-drowning
- e) first aid for drowning/near drowning.

B.P.Ed

Semester II

BPEd/II/A/HC/01: Educational & Sports Psychology**Subject Outcome:-**

1. Students will know about psychology and sports Psychology.
2. Students will understand Human behavior and learning patterns of individuals.
3. Students will know learning process and different theories based on learning
4. Students will acquire theoretical perspectives and develop understanding of stages of human development with special reference to Motor Development for Skill Learning in Sport and PE.
5. Students will be aware about different attributes affecting learning and development process.
6. Students will understand range of cognitive capacities in learners.
7. Students will understand the Cognitive and higher mental processes involved in learning in sports and Physical Education.
8. Students will understand the differences of personality among various types of sports and its importance for character building.

UNIT-I : Introduction of Sports Psychology

- 1.1 Meaning, Scope of Sports Psychology
- 1.2 Importance of Sports Psychology for Physical Education teacher and Coach
- 1.3 Human behavior, Urge and instincts.

UNIT-II: Cognitions Process and higher mental Processes in Physical Activities

- 2.1 Learning: Definitions, Meaning and Types (Primary, Associate & Concomitant)
- 2.2 Laws of Learning and Transfer of Training
- 2.3 Meaning of Sensation & Perception, Thinking and Attention. 2.4 Fatigue.

UNIT-III : Growth and Development and Personality

- 3.1 Meaning and Concept of Motor Development
- 3.2 Motor Development during Childhood, Adolescence
- 3.3 Concept of personality and Personality traits of sportsmen.
- 3.4 Adjustment and maladjustment and causes of maladjustment.

UNIT-IV : Individual Differences

- 4.1 Meaning of Individual differences.
- 4.2 Heredity and Personality and their role in individual differences.
- 4.3 Interaction of Heredity and Environment.
- 4.4 Various Status of an Individual
- 4.5 Other Causes of individual differences.

BPEd/II/A/HC/02: Methodology of Teaching in Education & Physical Education

Subject Outcome:-

1. To understand the place of Physical Education in school curriculum.
2. To acquaint the learner with different methods of teaching physical activities.
3. To acquaint the students with planning, objectives of different types of lessons.
4. To acquaint the learner with organizing and conducting various types of tournaments and athletic meet.
5. To acquaint the learner with the constructions and marking of track and field events

Unit -I Introduction

- I) Aims and Objectives of Physical Education.
- ii) Place of Physical Education in Curriculum.
- iii) Principles of Learning Process.
- iv) Principles of Teaching Process.

Unit -II Methods and importance of Teaching

Orientation, Demonstration, Imitation, Command, Exploration, Set Drill, Progressive Part, Observation, Verbal Explanation, Whole- Part- Whole, Formal informal.

Unit III Procedure of Teaching Presentation Technique -

- I) Personal Preparation
- ii) Technical Preparation.
- iii) Steps and characteristics of Presentation.
- iv) Principle of classes Management.
- v) Factors affecting class management.

Unit IV - Lesson Planning -

- i) Micro Teaching - importance and skills.
- ii) Types of lesson - General & Specific
- iii) Planning and importance of lesson.
- iv) Teaching Aids- Importance Types and uses.

BPEd/II/ A/HC/03: Sports Training**Subject Outcome:-**

1. To understand the basic concept and principles of officiating and coaching of different games and sports.
2. To enable the students to understand the rules, regulations and officiating of different games and sports.
3. To acquaint the students with the duties and responsibilities of an officials and coaches.
4. To acquaint the students with dimensions and actual markings of different play fields, courts and arenas.
5. To understand the concept, principles and forms of sports training

UNIT – I Sports Training & Training Load

- 1.1 Sports Training, Definition, Meaning, Aim & Tasks.
- 1.2 Coaching, Meaning, Aim and Objectives.
- 1.3 Principles of Sports Training.
- 1.4 Load, Intensity, Density, Duration and Frequency.
- 1.5 Over Load, Fatigue causes, symptoms and remedial measures.

UNIT – II Development of Motor Components:

- 2.1 Strength: Definition, Importance & Classification, Methods of Development.
- 2.2 Endurance: Definition, Importance & Classification, Methods of Development.
- 2.3 Speed: Definition, Importance & Classification, and Methods of Development.
- 2.4 Flexibility: Definition, Importance & Classification, Methods of Development.
- 2.5 Coordinative Abilities: Definition, Importance & Classification, Methods of Development.

UNIT – III Technical & Tactical Preparation:

- 3.1 Technique: Meaning & Definition and Importance, Stage of technical Development, correction of faults.
- 3.2 Methods of Technique Training.
- 3.3 Strategy & Tactics: Meaning, Importance.
- 3.4 Methods of Tactical Training.
- 3.5 Principles of Attack & Defence.

UNIT – IV Planning and Periodisation:

- 4.1 Meaning and Importance.

4.2 Types of Plan: Short term, Medium term and long-term training Programme.

4.3 Periodisation: Meaning & Importance.

4.4 Types of Periodisation.

BPEd/II/A/SC/01 : Fitness, Wellness and Sports Nutrition (Elective Subject)

Subject Outcome:-

1. Students will understand the concept of physical activity, exercise, fitness, and wellness and will be able to recognize the long term benefits of maintaining a high level of wellness for living in today's world.
2. Students will know the dimensions of wellness and strategies to improve them
3. Students will know the physiological benefits of exercise, physical activity, physical fitness and wellness
4. Students will understand the concept of overweight, obesity & their management.

Unit I Physical Fitness

- a. Definition, meaning and concept of Physical fitness, Physical Activity and Exercise
- a. Components of HRPF, SRPF and Physical fitness
- b. Definition and concept of wellness and holistic health
- c. Factors affecting Physical Fitness and wellness

Unit II Doping and Nutrition

- a. Prevention and first-aid for common sports injuries
- b. Nutrition-components, balance diet and diet for athlete
- c. Meaning and definition of doping, ergogenic aids

Unit III Development of Fitness

- a. Benefits of physical fitness and exercise and principles of physical fitness
- b. Calculation of fitness index level 1-4
- c. Waist-hip ratio larger heart rate, BMI and types and principles of exercise (FITT)
- d. Methods of training – Continues, Interval, Circuit, Fartlek and Plyometric

Unit IV Wellness and Weight Management

- a. Concept, meaning and Components of wellness
- b. Manipulation of energy balance to Induce weight loss and weight gain
- c. Methods of Weight Management
- d. Concept, types and causes of obesity and its management

BPed/II/A/SC/02 : Adapted Physical Education

Subject Outcome:-

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

Unit 1: Introduction to Adapted Physical Education

- 1.1 Meaning, Need and Importance of Adapted Physical Education and Sports
- 1.2 Purpose, Aims and Objectives of Adapted Physical Education and Sports
- 1.3 Program organization of Adapted Physical Education and Sports
- 1.4 Adapted Sports- Para Olympics

Unit 2: Development of Individual Education Program (IEP)

- 2.1 The student with a disability
- 2.2 Components and Development of IEP.
- 2.3 Principles of Adapted Physical Education and Sports
- 2.4 Role of Physical Education teacher
- 2.5 Teaching style, method and approach in teaching Adapted Physical Education

Unit 3: Developmental Considerations of an Individual

- 3.1 Motor development
- 3.2 Perceptual Motor development
- 3.3 Early childhood and Adapted Physical Education

Unit 4: Individual with unique need and activities

- 4.1 Behavioral and Special learning disability
- 4.2 Visual Impaired and Deafness
- 4.3 Health Impaired students and Physical Education
- 4.4 HRPF and its development for Individual with unique need
- 4.5 Role of games and sports in Adapted Physical Education

B.P.Ed

Semester III

BPEd/III/A/HC/01: Measurement & Evaluation in Physical Education

Subject Outcome:-

1. Students will understand the concept of Test, Measurement, Evaluation and Assessment Procedure in Physical Education and give examples of each
2. Students will differentiate formative and summative evaluation, Process and Product evaluation
3. Students will identify the purposes of measurement and Evaluation
4. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
5. Students will locate and select physical fitness and sports skill tests
6. Students will properly administer psychomotor tests.

Unit- I Introduction to Test & Measurement & Evaluation

Meaning of Test & Measurement & Evaluation in Physical Education

Need & Importance of Test & Measurement & Evaluation in Physical Education

Principles of Evaluation

Unit- II Criteria; Classification and Administration of test

Criteria of tests, scientific authenticity (reliability, objectivity, validity)

Type and classification of Test, Administration of test

Unit- III Physical Fitness Tests

AAHPER youth fitness test

National physical Fitness Test

Indiana Motor Fitness Test

JCR test

U.S Army Physical Fitness Test

Unit- IV Sports Skill Tests

Badminton Skill test

Basketball Skill test

Soccer Skill test

Volleyball Skill test

Hockey Skill test

BPEd/III/A/HC/02 : Kinesiology & Biomechanics

Subject Outcome:-

1. To understand the nature and scope of Biomechanics in Physical Education & Sports.
2. To understand the importance of movement analysis, kinesiological analysis and biomechanical Analysis.
3. To understand the knowledge regarding antagonistic and agonistic muscles in the movements.
4. To gain knowledge of the application of mechanical principles to fundamental skills and sports techniques.
5. To understand basic mathematical problems related to motion, force and levers.

Unit – I Introduction to Kinesiology and Sports Biomechanics

Meaning and Definition of Kinesiology and Sports Biomechanics
 Importance of Kinesiology and Sports Biomechanics to Physical Education Teacher, Athletes and Sports Coaches.
 Terminology of Fundamental Movements
 Fundamental concepts of following terms – Axes and Planes, Centre of Gravity, Equilibrium, Line of Gravity

Unit – II Fundamental Concept of Anatomy and Physiology

Classification of Joints and Muscles
 Types of Muscle Contractions
 Posture – Meaning, Types and Importance of good posture.
 Fundamental concepts of following terms- Angle of Pull, All or None Law, Reciprocal

Unit – III Mechanical Concepts

Force - Meaning, definition, types and its application to sports activities
 Lever - Meaning, definition, types and its application to human body.
 Newton's Laws of Motion – Meaning, definition & its application to sports activities.
 Projectile – Factors influencing projectile trajectory.

Unit – IV Kinematics and Kinetics of Human Movement

Linear Kinematics – Distance and Displacement, speed and velocity, Acceleration
 Angular kinematics – Angular Distance and Displacement, Angular Speed and velocity, Angular Acceleration.
 Linear Kinetics – Inertia, Mass, Momentum, Friction.
 Angular Kinetics – Moment of inertia, Couple, Stability.

BPEd/III/A/HC/03 : Yoga and Health Education

Subject Outcome:-

1. To understand the concept and nature of yoga along with its historical background.
2. To gain knowledge regarding the application of yoga to Physical Education and Sports.
3. To understand the anatomy and Physiology of Asanas and Pranayamas.
4. To acquire the skills needed to understand and to overcome environmental problems.
5. To gain knowledge regarding the effect of yogic practices on health aspects.

Unit – I Introduction of Yoga

Meaning and Definition of Yoga

Aims and Objectives of Yoga

Yoga in Early Upanisads

The Yoga Sutra: General Consideration

Need and Importance of Yoga in Physical Education and Sports

Unit - II: Foundation of Yoga

Yoga in the Bhagavadgita - Karma Yoga, Raj Yoga, Jnana Yoga and Bhakti Yoga

The Astanga Yoga: Yama, Niyama, Asana, Pranayama, Pratyahara, Dharana, Dhyana and Samadhi

Effect of Asanas and Pranayama on various systems of the body

Unit – III Health Education

Concept, Dimensions, Spectrum and Determinants of Health

Definition of Health, Health Education, Health Instruction, Health Supervision

Aim, objective and Principles of Health Education

Health Service and guidance instruction in personal hygiene

Unit – IV Health Problems in India

Communicable and Non Communicable Diseases

Obesity, Malnutrition, Adulteration in food, Environmental sanitation,

Explosive Population,

Personal and Environmental Hygiene for schools

Objective of school health service, Role of health education in schools

Health Services – Care of skin, Nails, Eye health service, Nutritional service, Health appraisal, Health record, Healthful school environment, first- aid and emergency care etc.

**BPEd/III/A/SC/01: Sports Entrepreneur, Marketing & Sports Management
(Elective)**

Subject Outcome:-

1. Identify the skills and knowledge base needed to foster entrepreneurial activity for individuals based on the experiences of successful sports entrepreneurs as well as assess and discuss the challenges they have faced.
2. Critically discuss ways in which entrepreneurial-minded individuals can thrive in large sports organizations despite the tendency of such organizations to resist innovation and to favor the status quo or only seek marginal gains.
3. Demonstrate an understanding of, and identify, new opportunities and translate them into viable business solutions or opportunities

Unit I: Introduction to Sports Entrepreneurship

Concept of entrepreneurship, innovation and knowledge management in sports.
Business Planning Process - The business plan as an entrepreneurial tool
Elements of Business Plan, Objectives, Market Analysis, Development of product / idea, Marketing, Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition, Business Model Canvas and Drafting Business Proposal for Funding Agency.

Unit II : Introduction to Sports Marketing

The Four Domains of Sports Marketing, Marketing Through Sports ,
Marketing concepts – traditional and modern; Selling vs. marketing; Marketing mix; Marketing environment.

Sponsorship: Introduction , Sponsorship: Developing and Selling the Proposal

Unit II. Management of Physical Education and sports

Meaning, Need and scope of management of Physical Education

Principles of Sports Management

Construction, marking and maintenance of play grounds, track & field, gymnasium, swimming pool and athletic track

Unit IV: Organization of co-curricular activities and Physical Education programmes.

Physical Education Budget : Need, Importance, procedure and principles of budget making,

Physical Education and sports programmes for - Primary, secondary and higher secondary School for sports awareness – demonstration, play days, sports rallies, sports exhibitions

Organization of National days (15th August & 26th January)., Organization of mass competition, sports day, hiking, trekking, Scout and Guide Camp and picnics

Ceremonies of competition – Opening, closing and victory

BPEd/III/A/SC/02: Professional Preparation in Physical Education (Elective)

Subject Outcome:-

1. Students will develop understanding of the profession of Physical Education.
2. Students will be able to deal with issues experienced by Physical Education teachers.
3. Students will recognize that learning to teach is a lifelong process.
4. Students will develop a comprehensive view of Physical Education from a global perspective.
5. Students will understand the domains & hidden dimensions of Physical Education.
6. Students will Demonstrate basic knowledge & awareness about inclusion, differently-abled students & describe steps to inclusion.

UNIT I: Foundation of Professional Preparation

- 1.1 Meaning of Professional
- 1.2 Components of Professional Preparation.
- 1.3 Contribution of physical education in attaining ideals of Indian democracy.
- 1.4 Forces and factors affecting educational policies and Programme.

UNIT-II Historical Perspective

- 2.1 Historical review of Professional Preparation in India.
- 2.2 Professional courses being offered in professional preparation colleges in India.
- 2.3 Professional Preparation in Physical Education in USA, USSR and UK.
- 2.4 Beginning of Professional Preparation in the world.

UNIT-III Under-Graduate preparation of professional personnel.

- 3.1 Purposes, Admission Requirements of Undergraduate preparation.
- 3.2 Theory, Teaching practice and practical.
- 3.3 Professional competencies to be developed.
- 3.4. Post-Graduate Preparation.
- 3.5 Purposes & Admission requirements.
- 3.6 Methods of instruction.
- 3.7 Professional relations.

UNIT-IV Teacher and Teaching

- 4.1 Teaching as a career.
- 4.2 Basic Qualities of a successful teacher.
- 4.3 Preparation of the specialized physical education teacher.
- 4.4 Types of teaching jobs.
- 4.5 Types of non-teaching jobs.

Reference

- 1) A Professional Career in Physical Education. (Englewood Cliffs, N.J. Prentice Hall, Inc. 1963.)

- 6) Borozne Joseph & Pechar Stanley: Administration & Supervision for Safety in sports, Washington,Aaphper pub. 1977.
- 7) Aahper pub: Profession preparation in Safety Education and School health Education, Washington Aahper Pub.1974.

B.P.Ed

Semester IV

BPEd/IV/ A/HCS/01: Sports Medicine, Physiotherapy and Rehabilitation

Subject Outcome:-

1. Students will understand classification of sports injuries and its first aid and immediate management.
2. Students will know the basics of therapeutic modalities and its physiological effects.
3. Students will know the process of rehabilitation
4. Students will understand good and bad posture, postural deformities, its causes and management.
5. Students will understand nutrition and diet plan pre, during and post competition.

Unit – I Sports Medicine

- Meaning and concept of sports medicine
- Aim and objective of sports medicine
- Role of Sports trainers and physician in team

Unit-II Common Sports injuries

- Types of sports injuries and their causes
- Common regional injuries and their management – shoulder, elbow, wrist, knee and ankle
- Low back problem cause, symptom and its management in sports
- First aid – meaning and its concepts
- Athletic bandage and massage – Its classification, indications & contra-indications, general principles of massage

Unit – III Athletic Care and Rehabilitation

- Meaning of Physiotherapy and Rehabilitation
- Diagnosis of injuries – signs and symptoms of injuries
- Different forms of Hydrotherapy and Thermotherapy – hot and cold packs, whirlpool, contrast bath, infrared, short wave diathermy and ultrasound

Unit – IV Drugs and Doping

- Meaning of drugs and doping
- Wada and Nada
- Types of doping and its advantage and disadvantage
- Types of dope test

BPEd/IV/A/HC/02: Research and Statistics in Physical Education

Learning outcomes

1. Identify the research problem in the field of physical Education and sports
2. Know to Summarize the various research literature
3. Understand and apply the basics of statistics in research
4. Organize the samples and sampling techniques which is relevant to the study.

Unit-I Introduction to Research

Definition of Research

Need and importance of Research in Physical Education and Sports.

Scope of Research in Physical Education & Sports.

Classification of Research

Research Problem, Meaning of the term, Location and criteria of Selection of Problem, Formulation of a Research Problem, Limitations and Delimitations.

Unit-II Survey of Related Literature

Need for surveying related literature.

Literature Sources, Library Reading

Research Proposal, Meaning and Significance of Research Proposal.

Preparation of Research proposal / project.

Research Report: A group project is to be undertaken by a small batch of students under the supervision of a teacher, wherein it is expected to survey school facilities of physical education, health assessment, programme evaluation, fitness status of the students, staff and other stakeholders etc. and submit the report to the institution.

Unit-III Basics of Statistical Analysis

Statistics: Meaning, Definition, Nature and Importance

Class Intervals: Raw Score, Continuous and Discrete Series, Class Distribution, Construction of Tables, Graphical Presentation of Class Distribution: Histogram, Frequency Polygon, Frequency Curve. Cumulative Frequency Polygon, Ogive, Pie Diagram

Unit- IV Statistical Models in Physical Education and Sports

Measures of Central Tendency: Mean, Median and Mode-Meaning, Definition, Importance, Advantages, Disadvantages and Calculation from Group and Ungrouped data

Measures of Variability: Meaning, importance, computing from group and ungroup data

Percentiles and Quartiles: Meaning, importance, computing from group and ungroup data

BHARATI VIDYAPEETH DEEMED UNIVERSITY

(Established u/s 3 of UGC Act 1956, vide notification no. F9. 15.U.3 of Govt. of India)

COLLEGE OF PHYSICAL EDUCATION

Dhankawadi, Pune-411 043 (Maharashtra), Tel.020-24373741

REACCREDITED 'A' GRADE BY NAAC

Master of Philosophy (M. Phil.) In Physical Education

**CURRICULUM FRAMEWORK
(2009-2010)**

BHARATI VIDYAPEETH UNIVERSITY

Relevant Rules for Degree of Master of Philosophy (M. Phil.) In Physical Education

1. Status :

The M. Phil. Degree shall have the status of an intermediate Degree between the first Post-Graduate degree and Doctorate Degree. It will have both research and course components and will give the student adequate background for advanced research.

2. Learning Outcome

- i.** The course would equip students of Gujarat with necessary qualification for lecturer in a college/ secondary teacher or principal / higher secondary teacher or principal.
- ii.** Use online resources, libraries, databases etc.
- iii.** Create/prepare research papers for Sports and Physical Education
- iv.** Present and publish research papers in field of Sports and Physical Education.
- v.** Research scholar comes out with his/her original research or translation under the guidance of respected faculties in the second term. 9 Documentation skills.
- vi.** Knowledge of Sports Medicine, Sports Psychology, Sports Sociology and Sports Management.
- vii.** Organize and participate in seminar, workshop, symposia, conference etc.
- viii.** Participate in group discussions.

3. Eligibility and Admission :

An applicant seeking admission to the M. Phil. Course must have obtained a Master's Degree in Physical Education from this or any other recognized University.

Admission to the M.Phil. course shall be made on the basis of :

- 1) Satisfactory performance at the Masters Degree examination in Physical Education; and
- 2) The performance at a test conducted by the College / University concerned.

4. Duration of the M.Phil. course :

The M.Phil. Course can be done either on a full-time or on Vacational basis depending upon the availability of the programme in the College.

(a) Full-time course:

- 1.** The duration of the full-time M.Phil. course shall be 12 months.
- 2.** A full-time M.Phil. Student shall attend lectures, tutorials, practicals and seminars and must complete to the satisfaction of the institute.
- 3.** Although the duration of a full-time M.Phil. Course shall be for 1 yr., which can be maximally extended up to 2½ yrs from the date of admission to complete dissertation and after which the admission shall stand cancelled. In such a case, the student has to take fresh admission.

(b) Vacational course :

- i.** The vacational M.Phil. course shall extend over a period of 24 months (2 years). Such a Vacational M.Phil. student shall have to attend a minimum period of 4 months for his studies at the College / M.Phil. Centre. Like a regular student, a vacational student also may be permitted to complete his dissertation within the period of 2½ years from the date of admission. The facility of vacational M.Phil. course shall be restricted to teachers of any institutions.
- ii.** A student of vacational M.Phil. Course must attend lectures, tutorials, practicals and seminars for at least two months in a year to the satisfaction of the institution.
- iii.** The criteria for granting admission to the Vacational M.Phil. programme will be as follows :
 - a.** First preference will be given to the lecturers who are working in Universities and Colleges as per the merit of previous examination.
 - b.** Second preference will be lecturers of Junior College or School teachers.
- iv.** The duration of a vacational M.Phil. Course shall be for 2 yrs., However it can be extended up to 2½ yrs with the prior permission of the University authorities.

4. Content: - This course shall be divided into two parts-

Part A - Theory Paper (3 papers i.e., 2 compulsory & 1 optional).

Part B - Research Project (Dissertation, Seminar & Viva-Voce).

5. Evaluation :

- i. The evaluation of the performance of the student will be a continuous process and performance will be evaluated by the concern guide.
- ii. The dissertation will be evaluated by the guide of the candidate and an external referee appointed by the University authorities on recommendation of the principal.
- iii. Seminar and Viva-voce will be based on the dissertation. The evaluation of the final seminar and the viva-voce test will be done by a **committee** consisting of the following :
 - a. One expert (who is a senior research guide for Ph.D. of this or any other university) to be nominated by the Head/Professor-in-charge of the Institute;
 - b. The dissertation supervisor;
 - c. The Head of the Institute, who will act as Chairman of this Committee.
- iv. The following grade will be awarded to a student on the basis of marks obtain by him in the final exam as follows:

Percentage of Total Marks	Grade
50% & above but less than 55 %	“C” Grade
55% & above but less than 60 %	“B” Grade
60% & above but less than 65 %	“B”+ Grade
65% & above but less than 70 %	“A” Grade
Above 70%	“O” Grade / Outstanding

- v. In case a student fails in dissertation by not getting required marks for passing. The same dissertation may be sent to second examiner for evaluation. Even after second time evaluation, if the student fail he/she may be asked to resubmit the dissertation

with the suggestions and modification given by the examiners. He can resubmit and appear for final examination.

- vi.** All interested persons can attend the seminar and the viva-voce examination which will constitute the defense of the dissertation and they shall have the right to ask questions and participate in discussion on the dissertation. The chairman of M.Phil. Evaluation committee shall exercise his/ her discretion to allow or not to allow a question. However, the members of the audience at the defense shall have no right to express their opinion on the suitability or otherwise of the dissertation for the award of the M. Phil. Degree.

M. Phil. Structure

(Regular Course:- 1 yr. / Vacational Course:- 2 yrs.)

Intake: - 30 Students for each course

Structure of M. Phil.:- This course shall be divided into two parts

Part A - Theory Paper

Part B - Research Project

Examination:

Part A: Structure of Theory Paper

Sr. No.	Paper Name	Optional / Compulsory	Theory / Practical	Marks	Min. Marks	Min.% of Passing
01	Research Processes in Physical Education	Compulsory	Theory	100 Marks	40 Marks	50%
02	Advanced Statistics & Computer Application to Physical Education	Compulsory	Theory	100 Marks	40 Marks	
03	Yoga and Sports Achievement	Optional	Theory	100 Marks	40 Marks	
	Training method and applied Mechanics	Optional	Theory	100 Marks	40 Marks	
	Measurement & Evaluation in Physical Education	Optional	Theory	100 Marks	40 Marks	
	Sports Medicine	Optional	Theory	100 Marks	40 Marks	
	Exercise Physiology	Optional	Theory	100 Marks	40 Marks	
	Sports Psychology	Optional	Theory	100 Marks	40 Marks	
				300 Marks	120 Marks	

Part B: Structure of Research Project

1. Dissertation / Thesis:-

Dissertation / Thesis shall be evaluated by both internal and external examiners for 100 Marks (i.e., Internal 50 Marks and External 50 Marks).

2. Seminar Presentation:-

Seminar Presentation shall be an open defense system, and will be evaluated by a three-member Committee which will consist of the Head of the Institute as Chairman of the committee, internal examiner and any one subject expert (Preferably a Ph.D. guide)

3. Viva Voce:-

Viva-voce shall be evaluated by a three-member Committee which will consist the Head of the Institute as Chairman of the committee, internal examiner and any one subject expert (Preferably a Ph.D. guide).

Structure of Research Project:-

Sr. No	Research Project	Internal	External	Full Marks	Min. Marks of Passing	Minimum % of Passing
01	Dissertation/Thesis	50 Marks	50 Marks	100 Marks	40 Marks	50%
02	Seminar Presentation	50 Marks	50 Marks	100 Marks	40 Marks	
03	Viva - Voce	50 Marks	50 Marks	100 Marks	40 Marks	
		150 Marks	150 Marks			
	Total			300 Marks	120 Marks	150 marks

STRUCTURE OF OVERALL MINIMUM PASSING MARKS:

Sr. No.	Name of Part	Total Marks	Minimum Passing Marks
01	Part "A"	300	150
02	Part "B"	300	150
Total		600	300

STANDARD OF PASSING:

- A student has to obtain minimum 40% Marks in each THEORY PAPER of Part-A and 50% marks in aggregate in Part-A total, also students has to obtain 40% marks in each a) Dissertation b) seminar & c) Viva-voce and 50% marks in aggregate in Part B
- If a student fails to get less than 50% marks in overall aggregate in theory, he / she may apply again in *one or more theory subject* to obtain 50% marks in Part-A.
- If any student fails to get 50% marks in Part-B (Dissertation / Seminar Presentation / Viva Voce), he / she has to reappear either in Seminar or Viva Voce or both to get 50% marks for passing in part-B.

AWARDS OF GRADE:

The following grade will be awarded to a student on the basis of marks obtain by him in the final exam as follows:

Percentage of Total Marks	Grade
50% & above but less than 55 %	“C” Grade
55% & above but less than 60 %	“B” Grade
60% & above but less than 65 %	“B”+ Grade
65% & above but less than 70 %	“A” Grade
Above 70%	“O” Grade / Outstanding

System of Dissertation / Thesis Submission:

The M. Phil. Course must be completed within 2½ years from the time of admission; otherwise the admission is treated as cancelled. In such a case, the student has to take fresh admission.

Students can submit their dissertation any time during the session. The dissertation will be sent to an expert for evaluation and Viva-voce will be conducted accordingly. After receiving the marks, the university will declare the final result.

**PATTERN OF QUESTION PAPER:
M. Phil. Question Paper Structure**

Subject: -

Day: -

Time:-

Date: -

Marks:- 100

N. B. 1. Attempt any 04 questions from Q. No. 01 to 06

2. Q. No. 07 is **COMPULSARY**

Time Table of M. Phil. Examination

Paper No.	Subject	Full Marks	Day & Date	
			Regular Course	Vacational Course
Paper I (Compulsory)	Research Process in Physical Education	100	Monday 21 st June 2010	Monday 18 th June 2012
Paper II (Compulsory)	Advanced Statistics and Computer Application to Physical Education	100	Tuesday 22 nd June 2010	Tuesday 19 th June 2012
Paper III (Optional)	Yoga & Sports Achievement	100	Wednesday 23 rd June 2010	Wednesday 20 ^h June 2012
	Thesis/Dissertation (Submission)	100	Monday 03 rd May 2010	Monday 03 rd May 2012
	Final Seminar (Research Thesis)	100	7 th June 2010 To	4 th June 2012 To
	Viva-Voce (Research Thesis)	100	10 th June 2010	9 th June 2012
		600 Marks		

Syllabus For Master Of Philosophy (M. Phil.)

Compulsory paper – I: - Research Processes in physical education

Learning outcomes

1. Identify the research problem in the field of physical Education and sports
2. Know to Summarize the various research literature
3. Understand and apply the basics of statistics in research
4. Organize the samples and sampling techniques which is relevant to the study.
5. Apply the systematic methods in writing research thesis

Unit I: - Introduction

Meaning nature and scope of research importance of research in general and With special reference to physical education and sports Characteristics of research and research worker.

Unit II:-

Basic, Applied and action research-their relationship and difference.

Importance and methodology of research.

Unit III:-

Place of research in university, Historical perspective, relation to graduate study,

Organization & financing of research, problem of university sponsored research.

Unit IV:- The Problem

Located the problem – selection of problem

Developing problem statement

Meaning and significance of Hypothesis

Type of hypothesis

Unit V:- Non-Laboratory Research Techniques

Historical Research

Meaning and significance of Hypothesis

Examining validate of historical data

Principal of historical criticism

Pitfalls in historical Research

Unit VI:- Philosophical studies.

Meaning and significance.

Methodology of philosophical research.

Critical thinking continuum.

Unit VII : - Descriptive studies – Board survey

Questionnaire, Opinion ire and interview techniques.

Case studies and profiles.

Unit VIII:- Laboratory Research

Experimental designs.

Unit XI:- Experimental Methods

Control of Experiment Factors.

Principals of Experimental Enquiry (Mill's Canons)

Establishing a research Laboratory

Unit X:- Research Report

Deference between abstract, Research proposal & research reports.

Format of research reports

Table and Figures.

Footnote and Bibliography

Reference Books:

1. John w. Best Research Education (Fourth Ed.) New Delhi, prentice Hall of India.
2. M.L. Kamallesh- Methodology of research in physical education. New Delhi, 1994
3. R.H. Whitney, Techniques of research.
4. Good, Bar, Gatesw, Research in education.

5. Clark, David H. Clar. Harison H.: Research process in physical education.
6. Veit, Richard, Research – The students Guide. New York Macmillan publishing company, 1980.
7. Sadhu A.N., Sing Amarjit; Research Methodology In Social Sciences (Fourth Edition) Bombay Himalaya Publishing House-1998

Compulsory paper– II:- Advanced Statistics And Computer Application to physical Education

Learning Outcome

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

Unit I :- Introduction to statistics

Meaning – importance and need of statistics parametric and non parametric statistic.

Unit II:- Measure of central tendency – specific characteristics and use of central tendency

Unit III: Percentiles and quartiles –

Meaning and importance – computation of percentiles and deciles.

Unit IV:- Measure of variability-

Quartile deviation, mean deviation and standard deviation – Specific Characteristic and uses.

Unit V: Normal probability curve – principles and properties of normal curve

Unit VI: Analysis of variance :

Need for analysis of variance – standard deviations of combined

Samples – one way analysis of variance – two way analysis of Variance post Hoc Tests of significance

Unit VII: Analysis of co-variance:-

Need for co-variance. Application of analysis of co-variance, control of covariates.

Unit VIII : Partial and multiple correlations :

Meaning of partial correlation, First order part correlation – computation of partial standard deviation.

Meaning of multiple correlation computation of multiple correlation – Difference between multiple correlation.

Unit IX : Prediction and Wherry – Doolittle method:

Meaning of predication – Two Variables regression equations – Multiple regression equations.

Unit X:- Wherry Doolittle method of multiple correlation.

Unit XI Special Co relational and parametric methods:

Chi-Square

Rank – Difference method of correlation. Biserial Correlation

Phi-Coefficient, Contingency coefficient, Curvilinear, relationship

Unit XII : Computer programmers with basic knowledge.**Reference Books:**

1. Ferguson, George A. Statistical Analysis in psychology and education (Fifth edi.) Singapore, Mc Graw-hill international Book Co.,1985.
2. Walpole Ronald E. Introduction to statistics (Third Edi) Macmillan publish co. Inc, New York 1982
3. Mendenhal, off Understanding statistics (Second Edi) Belmont california, Wadsworth publishing company Inc., 1976
4. Garrett, Henry E. Wood Worth R.S.; Statistic in psychology and education, Bombay, Vakil & sons Ltd. INDIA, 1981
5. Advance statistic by Clark & Clarke.
6. Steele Robert, and Torrid James A. Principles and procedure of statistics, New York, Mc Graw-hill Book CoM.,1960.
7. Garret, Harry E. and Wood worth R.S. statistic in psychology and education, Bombay, Allied Pacific Private Ltd. 1981

Optional Paper – Training Method and Applied Mechanics

Part – ‘A’ Training Methods

Learning outcome

1. Understand training as performance based science
2. Explain different means and methods of various training
3. Prepare training schedule for various sports and games
4. Appraise types of periodization for performance development
5. Create various training facilities and plans for novice to advance performers
6. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
7. Students will locate and select physical fitness and sports skill tests
8. Students will properly administer psychomotor tests

Unit I :- Principals of training and Conditioning

Type of training weight training, circuit training, interval, times

Running wind sprint, jogging miles, fartlek training.

Other factors: diet, sleep-rest musical ione and readiness

Unit II :- Fitness

Basic of physical fitness, basic physical characteristic fitness & training,

Emotional fitness and psychological training.

Unit II :- Strength Development:

Maximum strength, elastic strength, strength endurance, absolute and relative strength, external resistance and the athletes ability to express force, static muscular activity, dynamic muscular activity, strength development training

Unit IV: Speed Development :

Speed in Sports, Speed Development Training For Speed Development the Speed Barrier Endurance and Speed Training.

Unit V : Endurance Development

Training Method- Duratin-Repetirion Competition and Testing Endurance Sports.

Unit VI: Mobility Development

Mobility Classification Factors influencing Mobility Role of Mobility,
Mobility Training: Mobility Unit Construction- Mobility Derivation.

Unit VII: Physiological Effort of Training:

Unit VIII: Training Schedules – Seasons and Levels-Concept of Trainer System
Role of Trainer in Programmed Implementation.

Unit XI: Testing Processes & Tools Strength Speed- Endurance Vital Capacity
Blood Pressure- Pulse rate. Apparatus Spirometer Spigometer
Meter-Lig Dynamo Meter-Intruder Pulse Apparatus.

Unit X: The Effect of Drugs, Alcohol and Smoking on Performance.

Unit XI: Effect of climatic changes and High Altitude on Human Performance.

Part-B Applied Mechanics

Unit I: Nature and Scope of Applied Mechanics in Physical Education
Movement Mechanics in the Body

Unit II: a) Concepts of Application of Mechanics in Sports Static and Dynamic
Balance (Equilibrium).

Force-Movement of Force Centripetal and Centrifugal.

Force of Gravity, Spin and Friction, Impact -Levers, Newton's

Laws of Motion Velocity and Action-Reaction types of Motion -Rotary
and Linear Motion-Angular Kinetics, Linear Kinetics, Kinematics
Linear, Kinematics Center of Gravity Falling Bodies. Path of
Projection-Work Power and Energy.

B) Guiding Principles Derived From the Application of Above
Mechanical Concepts.

Unit III : Hydrodynamics constructions:

Concepts & Application of Mechanics in Sports in the Aquatic Media
Flotation. Buoyant Force-Specific Gravity Center of Buoyancy-Rotative
Motion Fluid Resistance-Gyro Scoping Action-Guiding Principles

Derived From the Application of the Above Mechanical Concepts in the Aqua Media.

Unit IV: Aero Dynamic Constructs :

Principal of Cinematographic Analysis-Application of Cinematographic & Video Analysis Motor Ideograms Avoidance of Errors of Measurements.

Unit IV: Analysis dynamic constructions:

Principal of cinematographic analysis – application of cinematographic & video analysis motor ideograms avoidance of errors of measurement

8. Bunn, John W. Scientific Principal of Coaching Eagle wood Cliffs N.J. Prentice Hall.
9. Harre, Dierich Principles of Sports Training Berlin Sportverlag.

Optional Paper – Measurement And Evaluation In Physical Education

Learning outcome

1. Students will understand the concept of Test, Measurement, Evaluation and Assessment Procedure in Physical Education and give examples of each
2. Students will differentiate formative and summative evaluation, Process and Product evaluation
3. Students will identify the purposes of measurement and Evaluation
4. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
5. Students will locate and select physical fitness and sports skill tests
6. Students will properly administer psychomotor tests

Unit I: Meaning of the term Measurement and evaluation. Basic Principles & functions of measurements and evaluation – Brief history of Measurement in Physical Education –Place of measurement and evaluation in Phy.Edu.

Unit II: Critical of test selection – Scientific Authenticity, Reliability, Validity, Objectivity, Norms– Administrative feasibility & educational application

Unit III: Tests Classification – Standard test – Objective and Subjective tests. Construction of Tests: Knowledge tests (Written Tests) & Skill tests (Evaluation of knowledge test steps in constructions of knowledge & skill tests.)

Unit IV: Maturity, Nutrition Body Size and form _ Nutrition – Evaluating Nutrition, Nutritional test evaluation body Dimensions – Somato types – Posture, Values Test of Antero Posterior Posture, Lateral Deviation and Spine foot measurement.

Unit V: Determination of Center of Gravity of the human body – Graphic method, and Analytical rate, Respiratory Volume, Tidal Volume – Vital Capacity Audition & visual Reaction time, body fat, Grip Strength. Leg Strength & Flexibility.

Unit VI: Strength test – Kraus Weber Muscular Tests – Rogers Physical Fitness, Index Suggested Changes in the PFI test. Physiological fitness – Mc curdy Larson test of Organic efficiency cremation blood – piosis tests, Harvard step test, Kuper's 12 minutes continuous Run / Walk test.

Unit VII: Testing instrument– Expire Graph, Peak Flow meter chromatograph, Duckle method and Analytical method.

Unit VIII: Motor fitness – Oregon motor fitness test, California physical performance tests, revised AAHPER Youth fitness tests, Motor fitness tests of the armed forces. The JCR test, New York State Physical Fitness test, Purdue University Motor fitness test, Shafer Girl’s motor fitness test, Evaluation of motor Fitness test, sit-ups and chins. Inter relationship and self-scoring.

Unit IX: General motor Abilities – the concept of general motor Ability equating by specific activities, equating by general abilities, strength index – strength abilities of girls. MC Cloy’s General motor ability & Capacity test, Motor educability – LOWA Brace test. Explosive muscular vertical jump & standing broad jump.

Unit X: Measurement of social efficiency – MC Dolly’s behavior rating scale, Blascrchand’s scale, Cowell Social behavior trend index, social Acceptance Evaluation Socio metric Questionnaire. Measurement of general social Efficiency – Bell Adjustment Inventory, the Bereuter Personality Inventory. Cattails Sixteen personality Factor questionnaire & California psychological Inventory.

Unit XI: Measurement Programmes – Suggestions for administering tests. Test Personnel, time for testing – Economy of tables, Graphics exhibits Preparation of reports – Co-Operative measurement projects central New York State Projects, Oregon Pilot Physical fitness project.

Unit XII: Use of test in meeting the individual needs:

- a) Presentation, interpretation and use of test results.
- b) The teacher
- c) The student
- d) The parent
- e) The Administrator

Reference Book:

2. Mathews, Donald K. Measurement in physical Education Philadelphia, London W.B. Saunders co.'58.
3. Margaret H. Safrit, Evaluation in physical education Englewood cliffs, New Jersey: prentice Hall Inc. '81.
4. Barry L. Jonson and jack N. Nelson practical measurements for evaluation in physical education. Delhi: Surjeet Publication.

Optional Paper:- Sports Medicine

Learning Outcome

1. Perform and report on the exploratory analysis of data collected using sports technology
2. Analyze sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Support a conclusion based upon quantitative prediction, performance and analysis of a sporting team, code, or gaming environment

Unit I: - History of sports medicine – its definition aims and objective, nature and functional utility- preventive, curative and rehabilitative aspects.

Unit II:- Concept of physical fitness – specific fitness- definition and components of physical fitness.

Unit III:- Physiological, pathological and psychological problems of sportsmen before, during and after competition.

Unit IV:- Thermo-regulation and sports: Fluid balance, Climatic ant tomes and their possible effects on the physiological function – Heat Exhaustion, Heat camp, Heat stroke, Exposure, Mountain Sickness-High altitude & its effects on performance,

Unit V:- Nutrition and Hygiene : Athletic nutrition and malnutrition high calorie diets, Role of vitamins, Minerals, Salts Carballydrate protein, fat loading before tournament, Hygiene of sportsmen Athletes foot, ringworm etc. Importance and need of immunization

Unit VI:- Roll of Skills rule and regulation in the prevention of sports injuries and early rehabilitation.

Unit VII:- Regional and specific injuries in track and filels and ither major games and their management

Unit VIII:- Common injuries and their management

Unit IX:- Somato types, physique and performance.

Unit X:- Women in sorts: Special problem of female athlete.

Unit XI:- Aging and Sports

Unit XII :- Sports physiotherapy: History of massage, definition, Muscle relaxations an aid to massage factors to be considered in including relaxation – points to be considered in giving massage - classification, contra indication – effects & uses Hydrotherapy, sauna bath , Electrotherapy & exercise therapy – Sports therapy- Sports therapy.

Unit XIII: At tapping and supports – safety gadgets in sports and games.

Unit XIV: Drugs and doping: Ergogenic – Artificial aids, Anabolic substances its use and amuses in sports, its effects and dangers.

Unit XV: Evaluation in sports medicine – Biometrics – measurement analysis interpretation for evaluation & performance – selection – prediction.

OPTIONAL PAPER – EXERCISE PHYSIOLOGY

Learning outcomes

1. Understand the basic principles of physiology and Exercise Physiology
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation.
4. Remember and recall the definition of physiology and co-relate the principles of physiology.
5. Appraise the effects during the training and practical sessions

Unit I: Introduction and function of muscles:

Classification of muscles, structure of muscles tissues, various theories of Muscular contraction, Hypertrophy of muscles in relation to physical activity.

Unit II: Neuromuscular Physiology:

Neuron, motor units neuron muscular junction, Bio-electric Potential, Kinesthesia tone moisture and equilibrium.

Unit III: Bio-Energies:

Fule for muscular work, energy for muscular contraction, Aerobic & Anaerobic systems. Inter relationship of aerobic and Anaerobic system with special reference to different activities Anaerobic – Threshold training.

Unit IV: Operational Dynamic:

Physiological changes due to Exercise and training: Effect of exercise on various systems, - oxygen debt, second wind, micro circulation. Effect of Exercise and training on carbohydrates, Fat and protein metabolism- control of variables in training.

Unit V: Sports Ergonomics:

Works capacity under different environmental conditions such as hot, humid, cold and high altitude.

Unit VI: Sports Nutrition:

Physiological consideration of diet in relation components, quantities and significance, sports and diet, diet before during and after competition Glycogen boosting – calorie calculator. Determination of energy cost of various sports activities.

Unit VII: Sex differences and sports.

Unit VIII: Effect of smoking, drinking, drugs and athletic performance, Dope Testing.

Unit IX: Aging and Exercise, Basic principles and guidelines for construction of cardio respiratory endurance exercise for the aged.

Unit X: Physical conditioning:

General principles of physical training, development of muscular strength and local endurance, development of Aerobic & Anaerobic endurance.

Unit XI: Functional tests E.M.G. Instrumentation.

Unit XII: Physiology for the physically handicapped

- a) Neuro Muscular condition
- b) Skelete – Muscular condition.
- c) Cardio – Muscular condition

Optional Paper :- SPORTS PSYCHOLOGY

Learning outcomes

1. Understand the basic principles of physiology and Exercise Physiology
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation.
4. Remember and recall the definition of physiology and co-relate the principles of physiology.
5. Appraise the effects during the training and practical sessions

Unit I: The History and Development of Sports Psychology.

Unit II: Psychology and play
Traditional theories of play
Twentieth Century theories of Play

Unit III: Psychology of motor learning.

Measuring of the term, perceptual motor learning the retention of motor skills transfer of skill, measurement of learning, and learning curve, Attention and its role in learning motor skills.

Unit IV: Children in Sports:

Early Psychological experience, motivation of children in sport emotions of Children in sport, child and coach, children and competitive sports.

Unit V: Women in sport – issues and controversies.

Unit VI: Physical activity and the psychological development of the handicapped.

Unit VII: Personality of sportsmen and coach:

Nature of personality, the issue of heredity in personality, personality traits of sportsmen, assessment of personality traits of the coach and his personality.

Unit VIII: Motivation in Sport:

Theories in/ or/ motivation, achievement motivation, level of aspiration and achievement, methods and assessing aspiration level, motivation and participation in physical activity dropouts in sports.

Unit IX: Socio psychological dimension of sport:

Sport performance in groups, team cohesion, socio metry in sport, leadership sport, sport audience and their effect on performance.

Unit X: Psychology of competition:

Psychological characteristics of pre-during and post competition (Anxiety, fear, frustration) Mental training, Psychological preparation for competition – Autogenic training.

Unit XI: Psycho Dynamics in sports:**Unit XII:**The Evaluation of the superior Athlete:

- a) Typology of Athletics activities based upon their Psychological demands.
- b) Personality assessment.
- c) Assessing the Athlete through field tests.
- d) Motivate of superior athletes.
- e) Psychological preparation of the superior athlete.

Unit XIII: Aggression and performance:

- a) Theories of aggression
- b) Aggression in Athletic competition
- c) Sex difference in Aggression
- d) Instruction in Aggression

Unit XIV: Activation:

- a) Basic research findings
- b) Activation in sports, research findings
- c) Method of adjusting activation levels of Athletes.

Optional Paper: Yoga and Sports Achievement:

Subject Outcome:-

1. To understand the concept and nature of yoga along with its historical background.
2. To gain knowledge regarding the application of yoga to Physical Education and Sports.
3. To understand the anatomy and Physiology of Asanas and Pranayamas.
4. To acquire the skills needed to understand and to overcome environmental problems.
5. To gain knowledge regarding the effect of yogic practices on health aspects.

Unit I: Understanding of Yoga:

- Yoga – Definition of Yoga – steps, Asana: Definition of objectives, aims.
- Pranayama – Definition, Aims & Objectives, Mechanism of Pranayama.
- Kriyas, Bandhas, Mudras.
- Ardinal Principles of Yoga practives.

Unit II: Philosophical Foundation of Yoga

- Yogic Texts & Yoga Philosophy
- Patanjali Yoga.
- Yoga, Mysticism & Cultural Synthesis.

Unit III: Scientific Foundation of Yoga

- Various physiological systems in the body.
- Deep Breathing, Normal breathing – pranayama breathing
- Scientific explanation of Asana & Exercises.
- Physiological implications of different yogic practices.

Unit IV: Yoga Psychology & Mental Health

- Meaning & nature
- Characteristics of mental health in western Psychology and Yoga.
- Interpretation of Psychological disturbance in terms of Yoga.
- Mechanism of Patanjala Yoga in controlling psychosomatic disorders.

Unit V: Yoga, Health & Fitness

- Health related fitness
- Role of yoga in health & fitness
- Non-slip dominance in relation to health, fitness and performance
- Injuries in yoga & remedies

Unit VI: Yoga Diet

- Philosophy of Yoga diet.
- Process of Eating
- Balance diet & concept of Ahara (Svattik, Rajasik, Tamasik)
- Diet & Behavior

Unit VII: Yoga Practical's (as suggested by Swami Kuvalayanada)

- Short course of Yoga
- Easy course of Yoga
- Full course of yoga

Unit VIII: Yoga Practicals

- Methods of Teaching & Learning
- Yoga Lesson Planning
- Practice Teaching (One Lesson)

REACCREDITED 'A' GRADE BY NAAC

Master of Physical Education
(M.P.Ed)-2Years

(4 Semester Programme)

Curriculum Framework & Syllabus

CURRICULUM FRAMEWORK

**GUIDELINES OF REGULATIONS AND SYLLABUS STRUCTURE FOR M.P.
ED. TWO YEARS PROGRAMME (FOUR SEMESTERS)
CHOICE BASED CREDIT SYSTEM (CBCS)**

Preamble: The Master of Physical Education (M.P.Ed.) two years (Four Semesters, Choice Based Credit System) programme is a professional programme meant for preparing Physical Education Teachers for senior secondary (Class XI and XII) level as well as Assistant Professor/Directors/Sports Officers in Colleges/Universities and teacher educators in College of Physical Education.

The M.P.Ed. programme is designed to integrate the study of childhood, social context of Physical Education, subject knowledge, pedagogical knowledge, aim of Physical Education and communication skills. The programme comprise of compulsory and optional theory, Specialization and Teaching Practice

Programme Outcome

1. The Master of Physical Education (M.P. Ed.) two years (Four Semesters, Choice Based Credit System) programme is a professional programme meant for preparing Physical Education Teachers for senior secondary (Class XI and XII) level as well as Assistant Professor/Directors/Sports Officers in Colleges/Universities and teacher educators in College of Physical Education.
2. To prepare the leaders who can work in Health and Fitness Industry as Fitness and Wellness experts.
3. To prepare Sports Experts in various capacities like Trainers, Physiotherapists, Rehabilitation Experts, Sports Counsellors, Game Officials, Scorers, Referees etc.
4. To prepares Experts who can work with various Sports Federations/Organisations/Leagues/Media Houses.

Intake, Eligibility and Admission Procedure: The Intake, Eligibility and Admission Procedure are as per the NCTE norms and standards.

Eligibility

(a) Bachelor of physical education (B.P.Ed.) or equivalent with at least **50% marks.**

Or

(b) A candidate, who has passed any one of B.Ed (Phy.Edu), B.P.E. (4 yrs) or any other equivalent degree.

Number of seats: As approved by NCTE for M.P.Ed. Course.

Note:-

*Married girl is eligible for admission to M.P.Ed. programme. But, it is also compulsory for her to sign an undertaking that she will discontinue the programme at once for at least one academic year, if she gets pregnant during the course of study. She can join back afresh from the beginning of the semester keeping the guidelines pertaining to the maximum duration of the course in mind.

*No differently-abled candidate is eligible for the admission in M.P.Ed. programme.

Admission procedure: Admission shall be made on merit on the basis of marks obtained in the entrance examination consisting of 100 marks based on the following.

a- Written test	50 marks
b- Sports proficiency test	30 marks
c- Interview	10 marks
d- Sports achievement	10 marks

The total entrance test will be conducted in two days and could be extended, if needed and it will be conducted at College of Physical Education, Bharati Vidyapeeth University.

- (A) **Theory Paper** comprising of 50 multiple-choice questions of one and half hours duration carrying 50 marks. Questions shall be based on B.P.Ed. course.
- (B) There shall be **Physical Fitness** of 30 marks will be conducted by Internal Examiners of College of physical education.
- (C) **Interview** comprising of 10 marks will be conducted by Internal Examiners of College of Physical Education

(D) Weightage :- Candidate shall be given maximum 10 marks weightage on the basis of their sports participation in any one of the following level:

Participation	Marks
➤ International:	10
➤ Senior National championship/ National Games:	
1st Place :	10
2nd Place :	08
3rd Place :	07
Participation:	05
➤ All India Inter-Zonal Inter University Competitions:	
1st Place :	08
2nd Place :	07
3rd Place :	06
Participation:	05
➤ Zonal Inter University Competitions/Junior National Competitions:	
1st Place :	07
2nd Place :	06
3rd Place :	05
Participation:	04
➤ Senior State Championship/Rural national games/Women festival:	
1st Place :	05
2nd Place :	04
3rd Place :	03
Participation:	02

Note:-

*The marks will be given in only those games/sports, which are in the competition list of Association of Indian Universities (AIU) and/or School Games Federation of India (SGFI).

*The obtained position must be during last five academic sessions.

*The school state championship and inter collegiate championship participation shall be considered for eligibility criteria only; candidate shall not get any marks for sports weightage.

Medical examination: Qualified candidates will have to submit medical certificate by CMO and blood group certificate to the concern College

Course fee: It has been decided by the B.O.S. that the convener of the B.O.S. is authorized to submit the proposal of the M.P.Ed Fees Structure to the University Authorities with consultation with the Internal members of B.O.S.

Duration: The M.P.Ed programme shall be of duration of two academic years, that is, four semesters. However, the students shall be permitted to complete the programme requirements within a maximum of 4 years from the date of admission to the programme.

The student, who discontinue the programme after one year or more semesters due to extraordinary circumstances, are allowed to continue and complete the programme with due approval from the Principal.

The CBCS System: M.P.Ed Programmes shall run on Choice Based Credit System (CBCS). It is an instructional package developed to suit the needs of students, to keep pace with the developments in higher education and the quality assurance expected of it in the light of liberalization and globalization in higher education.

Course: The term course usually referred to, as 'papers' is a component of a M.P.Ed programme. All courses need not carry the same weight. The courses should define learning objectives and learning outcomes. A course may be designed to comprise Lectures/ tutorials/laboratory work/ field work/ outreach activities/ project work/ vocational training/viva/ seminars/ term papers/assignments/ presentations/ self-study etc. or a combination of some of the

Courses of Programme: The M.P.Ed. Programme consists of a number of courses, the term 'Course' applied to indicate a logical part of subject matter of the programme and is invariably equivalent to the subject matter of a "paper" in the conventional sense. The following are the various categories of courses suggested for the M.P.Ed. Programme.

a) Theory:

Core Course

Elective Course

b) Practicum:

c) Specialization

d) Teaching Practices:

Programme Outcome

1. The Master of Physical Education (M.P. Ed.) two years (Four Semesters, Choice Based Credit System) programme is a professional programme meant for preparing Physical Education Teachers for senior secondary (Class XI and XII) level as well as Assistant

Professor/Directors/Sports Officers in Colleges/Universities and teacher educators in College of Physical Education.

2. To prepare the leaders who can work in Health and Fitness Industry as Fitness and Wellness experts.
3. To prepare Sports Experts in various capacities like Trainers, Physiotherapists, Rehabilitation Experts, Sports Counsellors, Game Officials, Scorers, Referees etc.
4. To prepares Experts who can work with various Sports Federations/Organizations/Leagues/Media Houses

Semesters: An academic year is divided into two semesters. Each semester will consist of 17-20 weeks of academic work equivalent to 100 actual teaching days. The odd semester may be scheduled from July to November/December and even semester from November / December to April/May.

Credits: The term 'Credit' refers to a unit by which the programme is measured. It determines the number of hours of instructions required per week. One credit is equivalent to one hour of teaching (lecture or tutorial) or one and half hours of practical work/field work per week. The term 'Credit' refers to the weight given to a course, usually in relation to the instructional hours assigned to it. The total minimum credits, required for completing a M.P.Ed. Programme is 90 credits and for each semester 20 credits. Total Number of hours required to earn 1 credit is 20-25 hrs in theory and 30 hrs in Practical.

Condonation: Student must have 75% of attendance in each course for appearing the examination. Students who have 74% to 65% of attendance shall apply for condonation in the prescribed form along with the Medical Certificate or proof of participation in intercollege or inter university competitions. Students who have 64% to 50% of attendance shall apply for condonation in prescribed form along with the Medical Certificate. Students who have below 50% of attendance are not eligible to appear for the examination.

Provision of Bonus Credits Maximum 06 Credits in each Semester

S. No.	Special Credits for Extra Co-curricular Activities	Credit
1.	Sports Achievement at State level Competition (Medal Winner)	1
	Sports Achievement National level Competition (Medal Winner)	2
	Sports participation International level Competition	4
2.	Inter Uni. Participation (Any one game)	2
3.	Inter College Participation (min. two game)	1
4.	National Cadet Corps / National Service Scheme	2
5.	Blood donation / Cleanliness drive / Community services	2
6.	Mountaineering - Basic Camp, Advance Camp / Adventure Activities	2
7.	Organization / Officiating - State / National level in any two game	2
8.	News Reposting / Article Writing / book writing / progress report writing	1
9.	Research Project by any funding agencies	4

Students can earn maximum **06 Bonus credits** in each semester by his/her participation in the above mentioned activities duly certified by the Head of the institution / Department. **This Bonus credit will be used only to compensate loss of credits in academic activities.**

Examinations:

- i. There shall be examinations at the end of each semester, for first semester in the month of November /December: for second semester in the month of April/May. A candidate who does not pass the examination in any course(s) shall be permitted to appear in such failed course(s) in the subsequent examinations to be held in November/December or April/May.
- ii. A candidate should get enrolled /registered for the first semester examination. If enrollment/registration is not possible owing to shortage of attendance beyond condonation limit / rules prescribed OR belated joining OR on medical grounds, such candidates are not permitted to proceed to the next semester. Such candidates shall redo the semester in the subsequent term of that semester as a regular student; however, a student of first semester shall be admitted in the second semester, if he/she has successfully kept the term in first semester.

Pattern of Question Papers:

A) For papers having Max. Marks- 60: [12+12+12+12+(4x3)=60 marks]

For University examination each question paper shall consist of 9 questions (2 long answer questions from each unit and 1 combined question of 4 short notes from all 4 units). The candidate will attempt any one question from each unit. The 5th question will be compulsory consisting 4 short notes of 3 marks each.

B) For Semester-end Examination in Activity Courses, the breaks-up of 100

Marks shall be as follows:

- Skill proficiency/playing ability : 60
- Diary / Record book : 40

C) For Specialization Sports Practice and Sports Training, the break-up of 100 Marks shall be as follows:

- P=(Practical) Skill proficiency : 60
- IA=(Internal Assessment)Written Test : 40

D) For Lesson Plan, student needs to complete perform lesson at college itself.-

Lesson Plan : 100 marks

- P=(Practical) Skill proficiency : 60
- IA=(Internal Assessment)Written Test : 40

Examiners: There will be one internal and one external examiner based on the Game specialization that is from **Athletics, badminton, basketball, cricket, football, handball, kabaddi, kho-kho, table-tennis, volleyball and yoga.**

Evaluation: The performance of a student in each course is evaluated through continuous internal assessment (CIA), one test of 20 marks and of one to two hours duration is to be conducted around 10-14 weeks of academic work from the start of each semester; evaluation is to be done in terms of percentage of marks with a provision for conversion to grade point. If, any student is not able to give the internal test due to Medical reason or participation in inter college or inter university competitions, the concerned course teacher must conduct the student examination within a month time (there is no provision for seeking improvement of internal assessment). The marks obtain in CIA is added with end semester examination and will be consolidated at the end of course. The components for continuous internal assessment are;

Internal Test	20 Marks
Seminar / Lab Practical / presentations	5 Marks
Open Book Test	5 Marks
Attendance	10 Marks
Total	40 Marks

Attendance shall be taken as a component of continuous assessment, although the students should have minimum 75% attendance in each course. In addition to continuous evaluation component, the end semester examination, which will be written type examination of at least 3 hours duration, would also form an integral component of the evaluation. The ratio of marks to be allotted to continuous internal assessment and to end semester examination is 30:70. The evaluation of practical work, wherever applicable, will also be based on continuous internal assessment and on an end-semester practical examination.

Attendance in Percentage	Marks
Above 95	10
95-90	8
89-85	6
84-80	4
79-75	2
Below 75	0

Minimum Passing Standard: The minimum passing standard for CIA (Continuous Internal Assessment) and External Examinations shall be 40%, i.e. 16 marks out of 40 marks and 24 marks out of 60 marks respectively for theory courses. The minimum passing for both CIA & external examination shall be 50%, i.e. 20 marks out of 40 and 30 marks out of 60 marks for the practical courses.

Grading: Once the marks of the CIA (Continues Internal Assessment) and SEA (Semester End Assessment) for each of the courses are available, both (CIA and SEA)

will be added. The marks thus obtained for each of the courses will then be graded as per details provided in **Letter Grades and Grade Points table** from the first semester onwards the average performance within any semester from the first semester is indicated by Semester Grade Point Average (**SGPA**). while continuous performance (including the performance of the previous semesters also) starting from the first semester is indicated by Cumulative Grade Point Average (**CGPA**). These two are calculated by the following formula:

(i) **SGPA(Si)** $S_i = \frac{\sum(C_i \times G_i)}{\sum C_i}$

where C_i is the number of credits of the i th course and G_i is the grade point scored by the student in the i th course.

(ii) The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e. $CGPA = \frac{\sum(C_i \times S_i)}{\sum C_i}$

Where S_i is the SGPA of the i th semester and C_i is the total number of credits in that semester.

(iii) The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcript or certificate or marksheet.

Classification of Final Results: For the purpose of declaring a candidate to have qualified for the Degree of Master of Physical Education in the First class / Second class / Pass class or First class with Distinction, the marks and the corresponding CGPA earned by the candidate in Core Courses will be the criterion. It is further provided that the candidate should have scored the First / Second Class separately in both the grand total and end Semester (External) examinations.

Award of the M.P.Ed. Degree: A candidate shall be eligible for the award of the degree of the M.P.Ed. Only if he/she has earned the minimum required credit including Bonus Credits of the programme prescribed above.

A.T.K.T.: A candidate may be allowed to take admission in succeeding year of the course irrespective of number of papers/ practical events in which he/she fails. It is mandatory that the whole course shall be completed within a period of 4 years from the date of admission. Failing which candidate name will be removed from college.

(Choice Based Credit System)

Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0(40% of marks) at UE and also a minimum grade point of 5.0(40% marks) at IA.

If a student fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50 % in aggregate). The GPA for a course will be calculated only if the learner passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table:

Range of Marks (Out of 100)	Grade	Grade Point
80 ≤ Marks ≤ 100	O	10
70 ≤ Marks ≤ 80	A+	9
60 ≤ Marks ≤ 70	A	8
55 ≤ Marks ≤ 60	B+	7
50 ≤ Marks ≤ 55	B	6
40 ≤ Marks ≤ 50	C	5
Marks ≤ 40	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weights for performance at UE and IA shall respectively be 60% and 40%.

GPA is calculated by adding the UE marks of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

Formula to calculate Grade Points (GP)

Suppose that Max is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP. Sex x -Max/10 (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

Range of marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (Marks/ x)+2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (Marks/ x)+1

Two kinds of performance indicators, namely, the semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester. While the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of learner when he/she completes the B.P.E.S programme is the final result of the learner.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA)	10x CGPA -10	If $5.00 \leq \text{CGPA} \leq 6.00$
	5x CGPA +20	If $6.00 \leq \text{CGPA} \leq 8.00$
	10x CGPA -20	If $8.00 \leq \text{CGPA} \leq 9.00$
	20x CGPA -110	If $9.00 \leq \text{CGPA} \leq 9.50$
	40x CGPA -300	If $9.50 \leq \text{CGPA} \leq 10.00$

Award of Honors:

A student who has completed the minimum credits specified for the M.P.Ed programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honors are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA Below 5.00	F	Fail	Marks Below 40

Note:

1. SGPA is calculated only if the candidate passes in all the courses i.e. get minimum C grade in all the courses.
2. CGPA is calculated only when the candidate passes in all the courses of all the previous and current semesters.
3. The cumulative grade point average will be calculated as the average of the SGPA of all the semesters continuously, as shown above.
4. For the award of the class, CGPA shall be calculated on the basis of:
 - Marks of each Semester End Assessment and
 - Marks of each Semester Continuous Internal Assessment for each course.
5. The final Class for M.P.Ed. Degree shall be awarded on the basis of last CGPA (grade) from all the one to four semester examinations.

Grievance Redressal Committee: The college/department shall form a Grievance Redressal Committee for each course in each college/department with the course teacher / Principal / Director and the HOD of the faculty as the members. This Committee shall solve all grievances of the students.

Revision of Syllabi: Syllabi of every course should be revised according to the NCTE.

- Revised Syllabi of each semester should be implemented in a sequential way.
- In courses, where units / topics related to governmental provisions, regulations or laws, that change to accommodate the latest developments, changes or corrections are to be made consequentially as recommended by the Academic Council.
- All formalities for revisions in the syllabi should be completed before the end of the semester for implementation of the revised syllabi in the next academic year.
- During every revision, up to twenty percent of the syllabi of each course should be changed so as to ensure the appearance of the students who have studied the old (unrevised) syllabi without any difficulties in the examinations of revised syllabi.
- In case, the syllabus of any course is carried forward without any revision, it shall also be counted as revised in the revised syllabi.

Miscellaneous:

1. The procedural details may be given by the university from time to time.
2. Any unforeseen problems/difficulties may be resolved by Vice Chancellor, whose decision in the matter shall be final.
3. The provision of any order, rules or regulation in force shall be inapplicable to

the extent of its inconsistency with these regulations.

Semester-I

Part- A Theoretical Course						
Course Code	Title of the papers	Total No of Class	Credits	Internal Assessment	University Exam	Total
Core Course						
SOE/PE/C-501	Research Method in Physical Education	64	4	40	60	100
SOE/PE/C-502	Physiology of Exercise & Sports	64	4	40	60	100
SOE/PE/C-503	Psychology of Sports	64	4	40	60	100
Elective course(Anyone)						
SOE/PE/E-501	Sports technology/	64	4	40	60	100
SOE/PE/E-502	Adapted Physical Education					
Part - B Practical Course						
SOE/PE/P -501	Conditioning	96	4	40	60	100
SOE/PE/P -502	Lab Practical (Sports Psychology, Biomechanics & Kinesiology, Test & Measurement)	96	4	40	60	100
Part - C Specialization						
SOE/PE/S -501	Games Specialization	96	4	40	60	100
Part - D Teaching Practices						
SOE/PE/T -501	Game Specialization Teaching Lesson theory Sports	96	4	40	60	100
	Total	40	32	320	480	800

Semester-II

Part- A Theoretical Course						
Course Code	Title of the papers	Total no of Class	Credits	Internal Assessment	University Exam	Total
Core Course						
SOE/PE/C -601	Statistics for Research in Physical Education	64	4	40	60	100
SOE/PE/C -602	Kinesiology & Biomechanics	64	4	40	60	100
SOE/PE/C-603	Science of Sports Training & Advanced Coaching	64	4	40	60	100
Elective course (Anyone)						
SOE/PE/E-601	Athletic care and Rehabilitation	64	4	40	60	100
SOE/PE/E -602	Sports Journalism & Mass Media					
Part - B Practical Course						
SOE/PE/P-601	Pilot Study	96	4	40	60	100
SOE/PE/P -602	Measurement & Evaluation	96	4	40	60	100
Part - C Specialization						
SOE/PE/S-601	Games Specialization	96	4	40	60	100
Part - D Teaching Practices						
SOE/PE/T -601	Game Specialization Practical Lesson Plan (5 Lesson)	96	4	40	60	100
	Total		32	320	480	800

Semester-III

Part- A Theoretical Course						
Course Code	Title of the papers	Total no of Class	Credits	Internal Assessment	University Exam	Total
Core Course						
SOE/PE/C-701	Professional preparation	64	4	40	60	100
SOE/PE/C -702	Management in PE & Sports	64	4	40	60	100
SOE/PE/C -703	Measurements and Evaluation in Physical Education	64	4	40	60	100
Elective Course (Anyone)						
SOE/PE/E-701	Information and communication technology in physical education	64	4	40	60	100
SOE/PE/E-702	Health Education and Sports Nutrition					
Part - B Practical Course						
SOE/PE/P -701	Conditioning	96	4	40	60	100
SOE/PE/P -703	Lab Practical (Sports Psychology, Biomechanics & Kinesiology, Test and Measurement)	96	4	40	60	100
Part - C Teaching Practices						
SOE/PE/T -701	Teaching Lesson theory	96	4	40	60	100

Semester-IV

Part- A Theoretical Course						
Course Code	Title of the papers	Total no of Class	Credits	Internal Assessment	University Exam	Total
Core Course						
SOE/PE/C-801	Sports Medicine	64	4	40	60	100
SOE/PE/C-802	Pedagogy of Physical Education	64	4	40	60	100
SOE/PE/C-803	Sports Entrepreneur	64	4	40	60	100
Elective Course (Anyone)						
SOE/PE/E-801	Dissertation	64	4	40	60	100
SOE/PE/E-802	Exercise Prescription & Fitness Management					

Note:-

- 1. Games specialization will be given in following Games and sports: Athletics, basketball, cricket, football, handball, hockey, kabaddi, kho-kho, table-tennis, volleyball and yoga. Student will select One Game specialization for I and II semester**
2. Teaching theory lesson plan will consist of 5 lessons from theory subject of Master degree which will be taken on college students itself.

SCHEME OF EXAMINATION FOR M.P.ED
(4 SEMESTERS)

Semester wise Distribution of Marks & Credits

		Sem-I	Sem-II	Sem-III	Sem-IV	Total
Part-A: Theory Courses	Marks	400	400	400	400	1600
	Credits	16	16	16	16	64
Part-B: Practical (Games/Sports)	Marks	200	200	200		600
	Credits	8	8	8		24
Part-C: Game/Sport Specialization	Marks	100	100			200
	Credits	4	4			8
Part D :- Teaching Ability	Marks	100	100	100		300
	Credits	4	4	4		12
Grand Total	Marks	800	800	700	400	2700
	Credits	32	32	28	16	108

Semester I

SOE/PE/C-501: Research Process In Physical Education

Learning outcomes

1. Identify the research problem in the field of physical Education and sports
2. Know to Summarize the various research literature
3. Understand and apply the basics of statistics in research
4. Organize the samples and sampling techniques which is relevant to the study.
5. Apply the systematic methods in writing research thesis

UNIT I - Introduction

Meaning and Definition of Research - Need, Nature and Scope of research in Physical Education. Classification of Research, Location of Research Problem, Criteria for selection of a problem, Qualities of a good researcher.

UNIT II - Methods of Research

Descriptive Methods of Research; Survey Study, Case study, Introduction of Historical Research, Steps in Historical Research, Sources of Historical Research: Primary Data and Secondary Data, Historical Criticism: Internal Criticism and External Criticism.

UNIT III - Experimental Research

Experimental Research - Meaning, Nature and Importance, Meaning of Variable, Types of Variables. Experimental Design - Single Group Design, Reverse Group Design, Repeated Measure Design, Static Group Comparison Design, Equated Group Design, Factorial Design.

UNIT IV - Sampling

Meaning and Definition of Sample and Population. Types of Sampling; Probability Methods; Systematic Sampling, Cluster sampling, Stratified Sampling. Area Sampling - Multistage Sampling. Non- Probability Methods; Convenience Sample, Judgement Sampling, Quota Sampling.

Research Proposal and Report

Cauterization of Thesis / Dissertation, Front Materials, Body of Thesis - Back materials. Method of Writing Research proposal, Thesis / Dissertation; Method of writing abstract and full paper for presenting in a conference and to publish in journals ,Mechanics of writing Research Report, Footnote and Bibliography writing.

SOE/PE/C-502: PHYSIOLOGY OF EXERCISE AND SPORTS

Learning outcomes

1. Understand the basic principles of physiology and Exercise Physiology
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation.
4. Remember and recall the definition of physiology and co-relate the principles of physiology.
5. Appraise the effects during the training and practical sessions

UNIT I – Skeletal Muscles and Exercise

Macro & Micro Structure of the Skeletal Muscle, Chemical Composition, Sliding Filament theory of Muscular Contraction. Types of Muscle fiber Muscle Tone, Chemistry of Muscular Contraction – Heat Production in the Muscle, Effect of exercises and training on the muscular system.

UNIT II – Cardiovascular System and Exercise

Heart Valves and Direction of the Blood Flow – Conduction System of the Heart – Blood Supply to the Heart – Cardiac Cycle – Stroke Volume – Cardiac Output – Heart Rate – Factors Affecting Heart Rate – Cardiac Hypertrophy – Effect of exercises and training on the Cardio vascular system.

UNIT III – Respiratory System and Exercise

Mechanics of Breathing – Respiratory Muscles, Minute Ventilation – Ventilation at Rest and During Exercise. Diffusion of Gases – Exchange of Gases in the Lungs –Exchange of Gases in the Tissues – Control of Ventilation – Ventilation and the Anaerobic Threshold. Oxygen Debt – Lung Volumes and Capacities – Effect of exercises and training on the respiratory system.

UNIT IV – Metabolism and Energy Transfer

Metabolism – ATP – PC- Anaerobic Metabolism – Aerobic Metabolism – Aerobic and Anaerobic Systems during Rest and Exercise. Short Duration High Intensity Exercises – High Intensity Exercise Lasting Several Minutes – Long Duration Exercises.

Climatic conditions and sports performance and ergogenic aids

Variation in Temperature and Humidity – Thermoregulation – Sports performance in hot climate, Cool Climate, high altitude. Influence of: Amphetamine, Anabolic steroids, Androstenedione, Beta Blocker, Choline, Creatine, Human growth hormone on sports performance. Narcotic, Stimulants: Amphetamines, Caffeine, Ephedrine, Sympathomimetic amines. Stimulants and sports performance.

Richard, W. Bowers. (1989). Sports Physiology. WMC: Brown Publishers.

SOE/PE/C-503: SPORTS PSYCHOLOGY

Learning outcomes

1. Explain group mechanisms and group psychology in a sports context
2. Reflect upon motivational psychology as applied to sports activities
3. Formulate relevant constructs of exercise psychology
4. Demonstrate the ability to discuss sociological theories, concepts, and ideas in large and small groups and to express empirically as well as theoretically-based opinions.
5. To apply core sociological theories to specific social problems in order to analyse social problems

UNIT I - Introduction

Meaning, Definition, History, Need and Importance of Sports Psychology. Present Status of Sports Psychology in India. Motor Learning: Basic Considerations in Motor Learning- Motor Perception - Factors Affecting Perception - Perceptual Mechanism. Personality: Meaning, Definition, Structure - Measuring Personality Traits. Effects of Personality on Sports Performance.

UNIT II - Motivation

Meaning & Definition, Types of Motivation: Intrinsic, Extrinsic. Achievement Motivation: Meaning, Measuring of Achievement Motivation. Anxiety: Meaning and Definition, Nature, Causes, Method of Measuring Anxiety. Competitive Anxiety and Sports Performance. Stress: Meaning and Definition, Causes. Stress and Sports Performance. Aggression: Meaning and Definition, Method of Measurement. Aggression and Sports Performance. Self-Concept: Meaning and Definition, Method of Measurement.

UNIT III - Goal Setting

Meaning and Definition, Process of Goal Setting in Physical Education and Sports. Relaxation: Meaning and Definition, types and methods of psychological relaxation. Psychological Tests: Types of Psychological Test: Instrument based tests: Pass-along test - Tachistoscope - Reaction timer - Finger dexterity board - Depth perception box - Kinesthesiometer board. Questionnaire: Sports Achievement Motivation, Sports Competition Anxiety.

UNIT IV - Sports Sociology

Meaning and Definition - Sports and Socialization of Individual Sports as Social Institution. National Integration through Sports. Fans and Spectators: Meaning and definition, Advantages and disadvantages on Sports Performance. Leadership: Meaning, Definition, types. Leadership and Sports Performance.

Group Cohesion

Group: Definition and Meaning, Group Size, Groups on Composition, Group Cohesion,

Group Interaction, Group Dynamics. Current Problems in Sports and Future Directions - Sports Social Crisis Management - Women in Sports: Sports Women in our Society, Participation pattern among Women, Gender inequalities in Sports.

SOE/PE/E-501: SPORTS TECHNOLOGY

Learning Objectives:

1. To enable students to learn the fundamental of sports technology.
2. To equip the students to learn the technology used in sports.
3. To understand the different types of playfield surfaces, sports equipment's and its advantages.
4. To familiarize the students with the latest technology involved in sports and games.

Unit I - Sports Technology

Meaning, definition, purpose, advantages and applications, General Principles and purpose of instrumentation in sports, Workflow of instrumentation and business aspects, Technological impacts on sports.

Unit II - Science of Sports Materials

Adhesives- Nano glue, nanomoulding technology, Nano turf. Foot wear production, Factors and application in sports, constraints. Foams- Polyurethane, Polystyrene, Styrofoam, closed-cell and open-cell foams, Neoprene, Foam. Smart Materials - Shape Memory Alloy (SMA), Thermo chromic film, High-density modeling foam.

Unit III - Surfaces of Playfields

Modern surfaces for playfields, construction and installation of sports surfaces. Types of materials - synthetic, wood, polyurethane Artificial turf. Modern technology in the construction of indoor and outdoor facilities. Technology in manufacture of modern play equipments. Use of computer and software in Match Analysis and Coaching.

Unit IV - Modern equipment

Playing Equipments: Balls: Types, Materials and Advantages, Bat/Stick/ Racquets: Types, Materials and Advantages. Clothing and shoes: Types, Materials and Advantages. Measuring equipments: Throwing and Jumping Events. Protective equipments: Types, Materials and Advantages. Sports equipment with nano technology, Advantages.

Training Gadgets

Basketball: Ball Feeder, Mechanism and Advantages. Cricket: Bowling Machine, Mechanism and Advantages, Tennis: Serving Machine, Mechanism and Advantages, Volleyball: Serving Machine Mechanism and Advantages. Lighting Facilities: Method of erecting Flood Light and measuring luminous. Video Coverage: Types, Size, Capacity, Place and Position of Camera in Live coverage of sporting events.

SOE/PE/E-502: ADAPTED PHYSICAL EDUCATION

Learning outcome

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

Unit 1: An Introduction to Adapted Physical Education

- 1.1 Meaning, Need & Importance of Adapted Physical Education and Sports
- 1.2 Purpose, Aims and Objectives of Adapted Physical Education and Sports
- 1.3 Program organization of Adapted Physical Education and Sports
- 1.4 Adapted Sports- Para Olympics

Unit 2: Development of Individual Education Program (IEP)

- 2.1 The student with a disability
- 2.2 Components and Development of IEP.
- 2.3 Principles of Adapted Physical Education and Sports
- 2.4 Role of Physical Education teacher
- 2.5 Teaching style, method & approach in teaching Adapted Physical Education

Unit 3: Developmental Considerations of an Individual

- 3.1 Motor development
- 3.2 Perceptual Motor development
- 3.3 Early childhood and Adapted Physical Education

Unit 4: Individual with unique need and activities

- 4.1 Behavioral and Special learning disability
- 4.2 Visual Impaired and Deafness
- 4.3 Health Impaired students and Physical Education
- 4.4 HRPF and its development for Individual with unique need

4.5 Role of games and sports in Adapted Physical Education

Semester II

SOE/PE/C-601: STATISTICS FOR RESEARCH IN PHYSICAL EDUCATION

Learning Outcome

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

UNIT I - Introduction

Meaning and Definition of Statistics. Function, need and importance of Statistics. Types of Statistics. Meaning of the terms, Population, Sample, Data, types of data. Variables; Discrete, Continuous. Parametric and non-parametric statistics.

UNIT II - Data Classification, Tabulation and Measures of Central Tendency

Meaning, uses and construction of frequency table. Meaning, Purpose, Calculation and advantages of Measures of central tendency - Mean, median and mode.

UNIT III - Measures of Dispersions and Scales

Meaning, Purpose, Calculation and advances of Range, Quartile, Deviation, Mean Deviation, Standard Deviation, Probable Error. Meaning, Purpose, Calculation and advantages of scoring scales; Sigma scale, Z Scale, Hull scale

UNIT IV - Probability Distributions and Graphs

Normal Curve, Meaning of probability- Principles of normal curve - Properties of normal curve. Divergence from normality - Skewness and Kurtosis. Graphical Representation in Statistics; Line diagram, Bar diagram, Histogram, Frequency Polygon, O give Curve.

Inferential and Comparative Statistics

Tests of significance; Independent "t" test, Dependent "t" test - chi - square test, level of confidence and interpretation of data. Meaning of correlation - co-efficient of correlation - calculation of co- efficient of correlation by the product moment method and rank difference method. Concept of ANOVA and ANCOVA.

SOE/PE/C-602: KINSESIOLGY AND BIOMECHANICS

Learning Outcomes

1. Analyze and explain the mechanisms underlying biomechanical, physiological, and psychological changes that occur during after acute and chronic exercise.
2. Understand mechanical principles can be applied to the analysis of human movement to assess and improve performance and reduce risk of injury.
3. Know effectiveness of human movement using mechanical principles.

UNIT I - Introduction

Meaning, nature, role and scope of applied kinesiology and Sports Biomechanics. Meaning of Axis and Planes, Dynamics, Kinematics, Kinetics, Statics Centre of gravity -Line of gravity plane of the body and axis of motion, Vectors and Scalars.

UNIT II - Muscle Action

Origin, Insertion and action of muscles: Pectoralis major and minor, Deltoid, Biceps, Triceps (Anterior and Posterior), Trapezius, serratus, Sartorius, Rectus femoris, Abdominis, Quadriceps, Hamstring, Gastrocnemius.

UNIT III - Motion and Force

Meaning and definition of Motion. Types of Motion: Linear motion, angular motion, circular motion, uniform motion. Principles related to the law of Inertia, Law of acceleration, and law of counter force. Meaning and definition of force- Sources of force - Force components .Force applied at an angle - pressure -friction -Buoyancy, Spin - Centripetal force - Centrifugal force.

UNIT IV - Projectile and Lever

Freely falling bodies - Projectiles -Equation of projectiles stability Factors influencing equilibrium - Guiding principles for stability -static and dynamic stability. Meaning of work, power, energy, kinetic energy and potential energy. Leverage -classes of lever - practical application. Water resistance - Air resistance -Aerodynamics.

Movement Analysis: Analysis of Movement, Equipment's used for Analysis, Methods of analysis - Qualitative, Quantitative, Predictive,

SOE/PE/C-603: SCIENCE OF SPORTS TRAINING AND ADVANCED COACHING

Learning Outcomes

1. Understand training as performance based science
2. Explain different means and methods of various training
3. Prepare training schedule for various sports and games
4. Appraise types of periodization for performance development
5. Create various training facilities and plans for novice to advance performers

UNIT I

Introduction Sports training: Definition – Aim, Characteristics, Principles of Sports Training, Meaning of Coaching, Definition, Aim Characteristics, Principles of coaching, Over Load: Definition, Causes of Over Load, Symptoms of Overload, How to tackle over load, Judgement of Training load

UNIT II

Sports Training, various Sports Training Methods: Continuous Training Method, Interval Training Method, Repetition Method, Circuit Training Method, Fartlek Training Method, Weight Training Method, and Plyometric Training Method. Components of Physical Fitness, Development of Physical fitness. Endurance, Strength, speed, flexibility, Co-ordinative Abilities

UNIT III

Preparing for Competitions-Build-up competitions, Main Competition, Competition Frequency & Psychological Preparation, Training Plan: Macro Cycle, Meso-Cycle. Short Term Plan and Long Term Plans - Periodisation: Meaning, Single, Double and Multiple Periodisation, Preparatory Period, Competition Period and Transition Period.

UNIT IV

Preparing lesson Plan, significance of lesson plan, Types of lesson plan, principles of lesson plan, contents in lesson plan, time allotment

Definition of Doping – Side effects of drugs – Dietary supplements – IOC list of doping classes and methods. Blood Doping – The use of erythropoietin in blood boosting – Blood doping control – The testing programmes – Problems in drug detection – Blood testing in doping control – Problems with the supply of medicines Subject to IOC regulations : over-

the- counter drugs (OTC) – prescription only medicines (POMs) – Controlled drugs (CDs).
Reporting test results – Education

SOE/PE/E-601: ATHLETIC CARE AND REHABILITATION

Learning outcomes

1. Understand the primary responsibilities the sports trainer has in preventing sports injuries and providing initial care for injured athletes.
2. Demonstrate the basics of sport first aid during and after game situation.
3. Recognize and appropriately treat common sports injuries and conditions from onset through rehabilitation.
4. Identify and apply knowledge of anatomy to the design and execution of research studies.

Unit I – Corrective Physical Education

Definition and objectives of corrective physical Education. Posture and body mechanics, Standards of Standing Posture. Value of good posture, Drawbacks and causes of bad posture. Posture test – Examination of the spine.

Unit II – Posture

Normal curve of the spine and its utility, Deviations in posture: Kyphosis, lordosis, flat back, Scoliosis, round shoulders, Knock Knee, Bow leg, Flat foot. Causes for deviations and treatment including exercises.

Unit III – Rehabilitation Exercises

Passive, Active, Assisted

Resisted exercise for Rehabilitation

Stretching, PNF techniques and principles.

Unit IV – Massage

Brief history of massage – Massage as an aid for relaxation – Points to be considered in giving massage – Physiological, Chemical, Psychological effects of massage – Indication / Contra indication of Massage – Classification of the manipulation used massage and their specific uses in the human body – Stroking manipulation: Effleurage – Pressure manipulation: Petrissage Kneading (Finger, Kneading, Circular) ironing Skin Rolling – Percussion manipulation: Tapotement, Hacking, Clapping, Beating, Pounding, Slapping, Cupping, Poking, Shaking Manipulation, Deep massage.

Sports Injuries Care, Treatment and Support

Principles pertaining to the prevention of Sports injuries – care and treatment of exposed and unexposed injuries in sports – Principles of apply cold and heat, infrared rays – Ultrasonic, Therapy – Short wave diathermy therapy. Principles and techniques of Strapping and

Bandages.

SOE/PE/E-602: SPORTS JOURNALISM AND MASS MEDIA

Learning Outcome

1. Know how to seek accreditation to sporting events and to report on such events.
2. Demonstrate analytic skills in relation to reporting sporting events
3. Produce a number of assignments that demonstrate their own style and perception of events

UNIT I - Introduction

Meaning and Definition of Journalism, Ethics of Journalism – Canons of journalism- Sports Ethics and Sportsmanship – Reporting Sports Events. National and International Sports News Agencies.

UNIT II - Sports Bulletin

Concept of Sports Bulletin: Journalism and sports education – Structure of sports bulletin – Compiling a bulletin – Types of bulletin – Role of Journalism in the Field of Physical Education: Sports as an integral part of Physical Education – Sports organization and sports journalism – General news reporting and sports reporting.

UNIT III - Mass Media

Mass Media in Journalism: Radio and T.V. Commentary – Running commentary on the radio – Sports expert's comments. Role of Advertisement in Journalism. Sports Photography: Equipment- Editing – Publishing.

UNIT IV - Report Writing on Sports

Brief review of Olympic Games, Asian Games, Common Wealth Games World Cup, National Games and Indian Traditional Games. Preparing report of an Annual Sports Meet for Publication in Newspaper. Organization of Press Meet.

Sports organization and Sports Journalism – General news reporting and sports reporting. Methods of editing a Sports report. Evaluation of Reported News. Interview with and elite Player and Coach.

Publication.

Semester III

SOE/PE/C-701: PROFESSIONAL PREPARATION

Learning outcome

- 1 Students will develop understanding of the profession of Physical Education.
2. Students will be able to deal with issues experienced by Physical Education teachers.
3. Students will recognize that learning to teach is a lifelong process.
4. Students will develop a comprehensive view of Physical Education from a global perspective.
5. Students will understand the domains & hidden dimensions of Physical Education.
6. Students will Demonstrate basic knowledge & awareness about inclusion, differently-abled students & describe steps to inclusion

Unit 1: The profession

- 1.1 Meaning, criteria & evaluation of profession
- 1.2 A professional & professionalism in Physical Education & sports
- 1.3 Physical Education as a profession
- 1.4 Legal regulation of profession

Unit 2: Professional Preparation

- 2.1 Historical perspectives
- 2.2 Policy perspectives
- 2.3 Theoretical perspectives
- 2.4 Nature & content of professional preparation programs

Unit 3: Professional Development

- 3.1 Meaning & process
- 3.2 Growth on the job- in service concept
- 3.3 Self appraisal & parameter influencing self appraisal
- 3.4 Guiding principles & professional relations
- 3.5 Qualifications & duties, responsibilities & job profiles of school Phy. Edu. teachers, directors of Physical Education in colleges & university

Unit 4: Curriculum

- 4.1 Meaning, importance & fundamental principles of curriculum planning
- 4.2 Writing the curriculum guide
- 4.3 Physical Education curriculum models
- 4.4 Implementing the Physical Education curriculum

Suggested Reading:

5. Kelly, L. E. & Melograno, V. J. (2004). *Developing the Physical Education curriculum*. Champaign: Human Kinetics.
6. Pangrazi, R.P. & Dauer, V. P. (1995). *Dynamic Physical Education for elementary school children* (11th Ed.). Boston: Allyn and Bacon.
7. Pangrazi, R.P. & Dauer, V.P. (1985). *Dynamic Physical Education curriculum & instruction for secondary school student*. Minnesota: Burgess publishing company.
8. Lombardo, B. & Wuest, D. (1994). *Curriculum & instruction the secondary school Physical Education experience*. St. Louis: Mosby
9. Kasat, G. & Karmarkar, A. K. (1996). *Professional preparation in Physical Education and sports*. Amravati: Kasat

SOE/PE/C-702: MANAGEMENT IN PHYSICAL EDUCATION AND SPORTS

1. Students will know the basic concept of management of Physical Education and Sports in the school.
2. Students will know the basic methods and technique and its principles to manage the programme of competitions, intramurals the basic level of competitions.
3. Students will know the duties and responsibilities of manager
4. Students will know the budget management, school programme of Phy. Edu. and sports.

UNIT I

Introduction, Definition of Sports Management, Need & Importance. Basic Principles and Procedures of Sports Management. Functions of Sports Management, Scope of Sports Management

UNIT II

Introduction, Organisation at school level, Organisation at University level, Organisation at National level, basic guiding Principles for organizing physical education and sports Programmes in the Institutions, Intramurals need and importance, Organisation and Administration of Intramural Activities, Extra murals- General Objectives, Policies for Organisation and management of Extra mural Programmes, Management of Personnel.

UNIT III

Introduction , Importance, types and need of Sports Equipments, Procurement of Equipment, Principles of Purchase Procedure, Quotations and tenders, Principles of Equipment Purchase, Important considerations in Selecting sports Equipment, Receiving, Stock Taking and Storing Equipment, Disposal of Equipment.

UNIT IV

Introduction, Planning the Facilities, administrative Principles for Planning a Facility, General Principles for Planning the Facilities, Types of Facilities, Principles for planning the Indoor facility, Outdoor facilities, facility requirements, Planning, Construction and Management of sports infrastructure, guidelines for layout of sports infrastructure, Surface, Fencing, Drainage, lighting, Beautification, Management, Gymnasium,

Swimming Pool, Management of Indoor facilities, Management in Care and Maintenance of the facility.

McKernan, James (2007) Curriculum and Imagination: Process, Theory, Pedagogy and Action Research,. U.K. Routledge

SOE/PE/C-703: MEASUREMENT AND EVALUATION IN PHYSICAL EDUCATION

Learning outcome

1. Students will understand the concept of Test, Measurement, Evaluation and Assessment Procedure in Physical Education and give examples of each
2. Students will differentiate formative and summative evaluation, Process and Product evaluation
3. Students will identify the purposes of measurement and Evaluation
4. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
5. Students will locate and select physical fitness and sports skill tests
6. Students will properly administer psychomotor tests

Unit1: Basics of Measurement & Evaluation

- 1.1 Concept Test, measurement, evaluation & assessment & its importance
- 1.2 Classification of test in Physical Education
- 1.3 Different tools of evaluation in Physical Education
- 1.4 Trends in evaluation in Physical Education
- 1.5 Criteria of test selection

Unit2: Construction & Standardization of tools

- 2.1 Methods for testing Validity, Reliability & Objectivity
- 2.2 Construction of psychomotor test
- 2.3 Construction of Questionnaire and Opinionnaire
- 2.4 Administration of psychomotor test.
- 2.5 Concept, importance, construction & administrative concern of Rating scales

Unit3: Measuring fitness & sports skills

- 3.1 Measurement of HRPF, SRPF, GMA & Motor educability.
- 3.2 Measurement of skills of various sports & games: Soccer, Handball, Tennis, Basketball, volleyball.
- 3.3 Testing of psychological variable.
- 3.4 Fitness assessment Tests for SCoursecial Population & older adults

Unit4: Test batteries & norms for evaluation

- 4.1 Meaning & characteristics of Test batteries: AAHCOURSERD youth Fitness test, JCR, FITNESS GRAM & ACSM Fitness test
- 4.2 Factors affecting measurement in Physical Education.
- 4.3 Anthropometric measurement & somatoty Course.
- 4.4 Norm referenced tests & criterion referenced tests

SOE/PE/E-701: INFORMATION AND COMMUNICATION TECHNOLOGY IN PHYSICAL EDUCATION

Learning outcome

1. Understand concept of information and communication technology in physical education field
2. Analyse sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Offer Hands on Knowledge in information and communication Technology

Unit I – Communication & Classroom Interaction

Concept, Elements, Process & Types of Communication, Communication Barriers & Facilitators of communication
Importance of ICT Need of ICT in Education
Scope of ICT: Teaching Learning Process, Publication Evaluation, Research and Administration, Challenges in Integrating ICT in Physical Education

Unit II – Fundamentals of Computers

Characteristics, Types & Applications of Computers Hardware of Computer: Input, Output & Storage Devices Software of Computer: Concept & Types
Computer Memory: Concept & Types Viruses & its Management
Concept, Types & Functions of Computer Networks Internet and its Applications Web Browsers & Search Engines Legal & Ethical Issues

Unit III – MS Office Applications

MS Word: Main Features & its Uses in Physical Education
MS Excel: Main Features & its Applications in Physical Education MS Access: Creating a Database, Creating a Table, Queries, Forms & Reports on Tables and its Uses in Physical Education
MS Power Point: Preparation of Slides with Multimedia Effects MS Publisher: Newsletter & Brochure

Unit IV – ICT Integration in Teaching Learning Process

Approaches to Integrating ICT in Teaching Learning Process
Project Based Learning (PBL)
Co-Operative Learning
Collaborative Learning
ICT and Constructivism: A Pedagogical Dimension
E-Learning & Web Based Learning
E-Learning

Web Based Learning
Visual Classroom

SOE/PE/E-702: HEALTH EDUCATION AND SPORTS NURTITION

Learning Outcomes

1. Understand the basic principles of Anatomy, Physiology and Health Education
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation. .
4. Remember and recall the definition of anatomy and physiology and co-relate the principles of physiology.
5. Appraise the effects of health condition during the training and practical sessions

Unit - I Health Education

Concept, Dimensions, Spectrum and Determinants of Health

Definition of Health, Health Education, Health Instruction, Health Supervision, Aim, objective and Principles of Health Education

Health Service and guidance instruction in personal hygiene

Unit - II Health Problems in India

Communicable and Non Communicable Diseases

Obesity, Malnutrition, Adulteration in food, Environmental sanitation, Explosive, Population,

Personal and Environmental Hygiene for schools

Objective of school health service, Role of health education in schools

Health Services - Care of skin, Nails, Eye health service, Nutritional service, Health appraisal, Health record, Healthful school environment, first- aid and emergency care etc.

Unit- III - Hygiene and Health

Meaning of Hygiene, Type of Hygiene, dental Hygiene, Effect of Alcohol on Health, Effect of Tobacco on Health, Life Style Management, Management of Hypertension, Management of Obesity, Management of Stress

Unit - IV- Introduction to Sports Nutrition

Meaning and Definition of Sports Nutrition, Role of nutrition in sports, Basic Nutrition guidelines, Nutrients: Ingestion to energy metabolism (Carbohydrate, Protein and Fat), Role of carbohydrates, Fat and protein during exercise.

Nutrition and Weight Management

Concept of BMI (Body mass index), Obesity and its hazard, Dieting versus exercise for weight control Maintaining a Healthy Lifestyle, Weight management program for sporty child, Role of diet and exercise in weight management, Design diet plan and exercise schedule for weight gain and loss.

Semester IV

SOE/PE/C-801: SPORTS MEDICINE

Learning Outcome

1. Perform and report on the exploratory analysis of data collected using sports technology
2. Analyze sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Support a conclusion based upon quantitative prediction, performance and analysis of a sporting team, code, or gaming environment

UNIT I - Introduction

Meaning, definition and importance of Sports Medicine, Definition and Principles of therapeutic exercises. Coordination exercise, Balance training exercise, Strengthening exercise, Mobilization exercise, Gait training, Gym ball exercise Injuries: acute, sub-acute, chronic. Advantages and Disadvantages of PRICE, PRINCE therapy, Aquatic therapy.

UNIT II - Basic Rehabilitation

Basic Rehabilitation: Strapping/Tapping: Definition, Principles Precautions Contraindications. Proprioceptive neuromuscular facilitation: Definition hold, relax, repeated contractions. Show reversal technique exercises. Isotonic, Isokinetic, isometric stretching. Definition. Types of stretching, Advantages, dangers of stretching, Manual muscle grading.

UNIT III - Spine Injuries and Exercise

Head, Neck and Spine injuries: Causes, Presentational of Spinal anomalies, Flexion, Compression, Hyperextension, Rotation injuries. Spinal range of motion. Free hand exercises, stretching and strengthening exercise for head neck, spine. Supporting and aiding techniques and equipment for Head, Neck and Spine injuries.

UNIT IV - Upper Extremity Injuries and Exercise

Upper Limb and Thorax Injuries: Shoulder: Sprain, Strain, Dislocation, and Strapping. Elbow: Sprain, Strain, Strapping. Wrist and Fingers: Sprain Strain, Strapping. Thorax, Rib fracture. Breathing exercises, Relaxation techniques, Free hand exercise, Stretching and strengthening exercise for shoulder, Elbow, Wrist and Hand. Supporting and aiding techniques and equipment for Upper Limb and Thorax Injuries.

Lower Extremity Injuries and Exercise

Lower Limb and Abdomen Injuries: Hip: Adductor strain, Dislocation, Strapping. Knee: Sprain, Strain, Strain, Strapping. Ankle: Sprain, Strain, Strapping. Abdomen: Abdominal wall, Contusion, Abdominal muscle strain. Free exercises - Stretching and strengthening exercise for Hip, knee, ankle and Foot. Supporting and aiding techniques and equipment for

Lower limb and Abdomen injures.

SOE/PE/C-802: PEDAGOGY OF PHYSICAL EDUCATION

Learning outcome

1. Students will use effective communication and pedagogical skills and strategies to enhance student engagement & learning.
2. Students will utilize assessments and reflection to foster student learning and to inform instructional decisions.
3. Students will inherit qualities essential to become effective professionals.
4. Students will understand the discipline

Unit 1: Systematic improvement in teaching skills

- 1.1 Science & Art of teaching – Teaching, Learning, & Pedagogy, appropriate practices-goals & feedback
- 1.2 Stages of skill development in teaching, sources of help, expert PE teacher
- 1.3 Effective teacher- how are they identified? Active teachers, contextual variations of active teaching
- 1.4 What teachers do in PE? What students do in PE? Effective PE teaching

Unit 2: Assessing and improving teaching

- 2.1 Assessment model, on-site assessment of teaching, steps in assessment process
- 2.2 Task system- ecology of PE, important concepts in ecological framework
- 2.3 Interpersonal skills in PE teaching – teacher-student interaction skills, effective communication skills
- 2.4 Legal, ethical & moral issues in teaching, promoting self growth in PE
- 2.5 Strategies for content development- factors affecting program level planning, differing visions of good in PE

Unit 3: Developing effective units of instructions

- 3.1 Determining entry & exit levels, end of unit objectives, practical factors related to unit planning, constructing unit plan, writing instructional objectives
- 3.2 Generic instructional strategies- guided practice, independent practice, monitoring student performance
- 3.3 Instructional format- active teaching, task teaching, teaching through questioning, peer teaching, cooperative learning
- 3.4 Self-instructional formats- contracts, PSI, providing effective instruction for mainstream students

Unit 4: Measuring teaching & its outcomes

- 4.1 Traditional methods for assessing teaching- intuitive judgment, eyeballing, anecdotal records, checklists, rating scale

4.2 Systematic observation records- event recording, duration recording, interval recording, group time sampling, self recording

4.3 Combining observation techniques, important decisions in developing observation strategies, building observation system

4.4 What to observe, training observers, calculating reliability of observation data, examples of observation system

Suggested Readings:

1. Siedentop, D. (1991). Developing teaching skills in Physical Education. Ca: Mayfield Publishing company

2. Mosston, M., Ashworth, S. (1994). Teaching Physical Education (4th Ed). NY: Macmillan College Publishing Company

3. Kelly, L.E., Nelograno, V.J. (2004). Developing the Physical Education curriculum. Champaign, IL: Human Kinetics

4. Hopple, C.J. (2005). Elementary Physical Education teaching & assessment- A practical guide. Champaign IL: Human Kinetic

SOE/PE/C-803: SPORTS ENTREPRENEUR

Learning outcomes

- Identify the skills and knowledge base needed to foster entrepreneurial activity for individuals based on the experiences of successful sports entrepreneurs as well as assess and discuss the challenges they have faced.
- Critically discuss ways in which entrepreneurial-minded individuals can thrive in large sports organizations despite the tendency of such organizations to resist innovation and to favor the status quo or only seek marginal gains.
- demonstrate an understanding of, and identify, new opportunities and translate them into viable business solutions or opportunities

Unit I: Introduction to Sports Entrepreneurship

1. Concept of entrepreneurship, innovation & knowledge management in sports
2. Business Planning Process - The business plan as an entrepreneurial tool
3. Elements of Business Plan, Objectives, Market Analysis, Development of product / idea, Marketing, Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition, Business Model Canvas and Drafting Business Proposal for Funding Agency.

Unit II : Introduction to Finance in Sports

1. The Four Domains of Sports Marketing, Marketing Through Sports
2. Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling & milestones, Value proposition,
3. Business Model Canvas & Drafting Business Proposal for Funding Agency.

Unit II. Management of Physical Education and sports

1. Meaning, Need and scope of management of Physical Education
2. Principles of Sports Management
3. Construction, marking and maintenance of play grounds, track & field, gymnasium, swimming pool and athletic track

Unit IV: Organization of co-curricular activities & Physical Education programmes

1. Physical Education Budget : Need, Importance, procedure and principles of budget making,

2. Physical Education and sports programmes for - Primary, secondary and higher secondary School for sports awareness - demonstration, play days, sports rallies, sports exhibitions
3. Organization of National days (15th August & 26th January)., Organization of mass competition, sports day, hiking, trekking, Scout and Guide Camp and picnics
4. Ceremonies of competition - Opening, closing and victory

References:

- Sports Marketing By Melissa Jane Johnson Morgan Jane
- Small Business, Entrepreneurship and Enterprise Development. Harlow: Pearson Education.

SOE/PE/E-801: DISSERTATION

Learning Outcome

1. Students will have basic knowledge of Research in Physical Education, Fitness & Sports to Student
2. Students will know the fundamentals of research
3. Students will be able to select research problem & know the steps of developing it
4. Students will understand methodology & research procedure
5. Students will know different sampling techniques & data collection tools
6. Students will know basic statistics & statistical techniques
7. Students will apply & interpret descriptive statistics
8. Students will recognize appropriate inferential statistical tool as per research method
9. Students will understand data processing

SOE/PE/E-802: EXERCISE PRESCRIPTION & FITNESS MANAGEMENT

Learning objectives:

- 1. To make the students understand the concepts of fitness**
 - 2. To equip the students to learn the tests to measure each component of fitness**
 - 3. To acquire the skills of pre exercise screening**
 - 4. To learn the principles of training**
 - 5. To equip the students to prescribe the exercise to the clients**
 - 6. To understand the fitness norms and prepare fitness report of the clients**
- Learning objectives:**

Unit 1: Basic Principles of Physical Fitness

- 1.1. How much physical activity is enough? Benefits of physical activity
- 1.2. Health related components of physical fitness, skill related components of fitness
- 1.3. Principles of physical training: Specificity, progressive overload (FITT), Reversibility, individual difference
- 1.4. Designing your exercise program- guidelines for training, choosing activities for a balanced program

Unit 2: Developing fitness, improving quality of life

- 2.2. Benefits of aerobic exercises, monitoring heart rate
- 2.3. Developing aerobic exercise program- setting goals, applying FITT, building & maintaining aerobic fitness
- 2.4. Benefits of muscular strength & endurance, assessing muscular strength & endurance, creating a successful strength training program
- 2.5. Applying FITT principle, weight machines versus free weights, weight training safety
- 2.6. Determinants of flexibility, benefits & additional potential benefits of flexibility & stretching exercises, Flexibility improvement- FITT principle

Unit 3: Developing a personal fitness plan

- 3.1. Guidelines for personal fitness plan- set goals, select activity, set target, system of mini goals & rewards, lifestyle activity, monitoring, commitment
- 3.2. Putting plan into action, maintaining fitness program for life
- 3.3. Exercise guidelines for people with special concerns- arthritis, asthma, diabetes, heart disease, hypertension, obesity, and osteoporosis
- 3.4. Exercise guidelines for life stages- children & adolescents, pregnant women, older adults

Unit 4: Behavior change & fitness management

- 4.1. Psychosocial factors to consider, Behavioral change theories & exercise
- 4.2. Strategies to achieve fitness goals & maintaining fitness programs
- 4.3. Trends in weight loss, weight gain
- 4.4. Causes of obesity, implications of overweight & obesity
- 4.5. Underweight conditions & eating disorders

Suggested Readings:

1. Fahey, Insel, Roth (2004) Fit & well (6thEd.) Boston: McGraw Hill co. Greenberg
2. Dintiman, Oakes. (2004). Physical fitness & wellness (3rd Ed.). IL: Human Kinetics
3. Howley& Franks (1997). Health fitness instructor's Handbook (3rd Ed.)IL: Human kinetics
4. ACSM (1998) ACSM's resource manual for guidelines for exercise testing & Prescription (3rd Ed.) Lippincott, Williams & Wilkins
5. Destine& Moore (2003) ACSM's exercise management for person's with chronic diseases & disabilities (2nd Ed.) IL: Human Kinetics

Courses in Bioinformatics to enhance Entrepreneurship/ communication skill development

MBI 105: C Programming and Data Structure (C)	Total
Basic Course – Theory; 3 Credits	45L

UNIT I

1. Introduction and First Program	3
➤ Why Programming	
➤ Types of Programming	
➤ Introduction to C	
➤ C programming features	
➤ Benefits of C	
➤ Some Facts about C	
➤ Understanding First C Program	
2. Variables and Data Types	3
➤ Identifiers	
➤ Keywords	
➤ Data Types	
➤ Variables	
➤ Constants	
3. Console IO Operations	2
➤ printf function	
➤ scanf function	
➤ Unformatted Functions	
4. Operators and Expressions	2
➤ Expressions	
➤ Types of Operators	
➤ Type Casting	
5. Control Flow Statements	2
➤ Decision Making in C	
➤ If Statement	
➤ Switch Statement	
➤ Unconditional Branching	
➤ While Loop	
➤ Do...While Loop	
➤ For Loop	
➤ Break and continue statements	

UNIT II

6. Working with Functions	5
➤ What is a Function	
➤ Benefits of a Function	
➤ Function Terminology	
➤ Array of Structures	
➤ How does Function Works	
➤ Scope and Lifetime of Variables in function	

- Storage Classes of Variables
 - Call by value and call by reference
 - Recursion
7. Working with Arrays and Strings 5
- Understanding Arrays
 - Arrays Declaration and Initialization
 - Sample Programs
 - Multidimensional Arrays.
 - Arrays and Functions
 - String operation

UNIT III

8. Pointers 4
- Understanding Pointers
 - Declaring and Initializing Pointers
 - Function and Pointer Parameters
 - Pointer Arithmetic
 - Pointer and Arrays
 - Two Dimensional Arrays and Pointers
 - void Pointer
 - Dynamic allocation of memory
 - Difference between malloc and calloc
9. Structure and Unions 4
- Overview of Structures
 - Defining and Using a Structure
 - Structures within a Structure
 - typedef keyword
 - Passing Structures to Functions
 - Structure and Pointers
 - Unions
10. File Handling 4
- What is a Stream
 - Opening and Closing of Files
 - Writing and Reading in Text Format
 - Writing and Reading in Binary Format

UNIT IV

11. Introduction to Data Structures 2
- Data Structures- Data structure, Abstract Data Types (ADT), Concept of linear and Non-linear, static and dynamic data structures, and relationship among data, data structure
10. Linked Lists 3
- Concept, Comparison of sequential and linked organizations, Primitive operations, Realization of Linked Lists, Linked list operations, Head

pointer and header node, Types of linked list- Linear and circular linked lists, Doubly Linked List and operations, Circular Linked List, Singly circular linked list, Doubly circular linked list.

- 11. Stacks** **2**
Stacks- concept, Primitive operations, stack operations, Applications of Stack- Expression, Evaluation and Conversion, Need for prefix and postfix expressions, Postfix expression evaluation, Recursion- concept, Backtracking algorithmic strategy, use of stack in backtracking.
- 12. Queues** **2**
Concept, Realization of Queues Using Arrays , Circular Queue, Advantages of using circular queues, operations on queue
- 13. Sorting and Searching** **2**
Searching- Search Techniques, Sequential search, Binary search.
Sorting methods- Bubble sort, Insertion sort, Selection sort, Quick sort, Heap sort, Shell sort, Comparison of All Sorting Methods.

References:

1. C& Data structures - P. Padmanabham, B.S. Publications.
2. The C Programming Language, B.W. Kernighan, Dennis M.Ritchie, PHI/Pearson Education.

4. Programming in C - Stephen G. Kochan, III Edition, Pearson Eductaion.
5. Data Structures and Program Design in C, R.Kruse, C.L. Tondo, BP Leung, Shashi M, Second Edition, Pearson Education.
6. Computer science, A structured programming approach using C, B.A. Forouzan and R.F. Gilberg, Third edition, Thomson.
7. DataStructures Using C - A.S.Tanenbaum, Y. Langsam, and M.J. Augenstein, PHI/Pearson education.
8. Let us C – Yashwant Kanetkar

MBI 107: DBMS & MongoDB (C)	Total
Basic Course – Theory; 3 Credits	45L

UNIT I

1. DBMS	10
<ul style="list-style-type: none"> ➤ Database designing, data capturing ➤ Data Abstraction ➤ Data Models ➤ Instances & Schemes ➤ E-R Model - Entity and entity sets ➤ Relations and relationship sets ➤ E-R diagrams <p>Reducing E-R Diagrams to tables</p>	

UNIT II

2. Basic concepts in Indexing and hashing	15
<ul style="list-style-type: none"> ➤ Types of Indexing ➤ Data warehousing ➤ Data mining ➤ Oracle Architecture ➤ Basic concepts in Oracle: <ul style="list-style-type: none"> ○ Table space ○ Data files ○ Blocks ○ Extents ○ Segments ○ Oracle Background Processes ○ Control files ○ Oracle Memory Management ○ Rollback ○ Redo logs etc. ➤ Oracle Report generation, Grants, Roles, Privileges ➤ Introduction to SQL 	

UNIT III

3. MongoDB	10
<ul style="list-style-type: none"> ➤ Introduction of mongoDB ➤ Uses and Advantages ➤ RDBMS/SQL vs. MongoDB ➤ Structure of MongoDB ➤ Database, Collection – operation ➤ Data type 	

UNIT IV

4. ➤ CRVD commands 10
 ➤ Limit Records, Sorting Record
 ➤ Indexing, Aggregation
 ➤ Covered queries
 ➤ ObjectID
 ➤ Regular Expression

11. Linux : The Complete Reference 6th Edition by Richard Petersen, Tata McGraw-Hill Education (2007)

MBI 108: PERL Programming	Total
Elective Course – Theory; 2 Credits	30L

UNIT I

1. Introduction to Perl	3
Perl Data types, Operators, Input/Output in Perl	
2. String Functions, Array Functions, Hash Functions	3
3. Control Statements and loops	4

UNIT II

4. Subroutine	3
Defining subroutine, Calling subroutine, Passing Arguments to a Subroutine	
Returning Value from a Subroutine	
5. Regular Expression, Pattern Matching, Referencing and Dereferencing	3
6. File handling	4
File I/O, Opening and Closing Files, Reading and Writing Files	

UNIT III

7. Object Oriented Programming in Perl	3
Objects, Methods, and Classes in Perl	
8. Packages in Perl	3
9. Perl and Web	4
CGI programming, Web browsing

7. Beginning Web Development with Perl by Steve Suehring, Apress publication.

MBI 201: Statistical Analysis System (SAS) (C)	Total
Core Course – Theory; 2 Credits	30L

UNIT I

1. Introduction to SAS	1
➤ An overview of SAS foundation	
➤ Introduction to SAS programs submitting a SAS program	
➤ Working with SAS program syntax	
2. Accessing Data	1
➤ Examining SAS data sets	
➤ Accessing SAS libraries- Proc contents	
3. Reading and Creating SAS Data sets	2
➤ Introduction to SAS Data sets	
➤ Reading from existing SAS Data Sets	
➤ Reading Spreadsheet and Database Data	
➤ Reading Raw Data Files	
○ Reading standard delimited data	
○ Reading nonstandard delimited data	
○ Handling missing data	
○ Reading raw data files with formatted input	
○ Controlling when a record loads	
4. Formatting Data Values	1
➤ Using SAS formats	
➤ Creating user-defined formats	
5. Manipulating Data	2
➤ using SAS functions	
➤ conditional processing	
6. Combining SAS Data Sets	2
➤ Concatening	
➤ Merging - one-one, one-many, merging with non-matches	
7. Processing Data in groups	1

8. Processing Data Iteratively	2
➤ DO loop processing	
➤ conditional DO loop processing	
➤ SAS array processing	
➤ using SAS arrays	
9. Restruction / Rotating SAS Data Set	1
10. Creating Summary Reports	2
➤ Proc Print	
➤ Proc Freq	
➤ Proc Report	
➤ Proc Tabulate	
➤ Report Enhancement	

UNIT II

11. SAS Macros Language	1
➤ Purpose of Macro Facility	
➤ Program Flow	
12. Macro Variables introduction to macro variables	2
➤ Automatic macro variables	
➤ Macro variable references	
➤ User-defined macro variables	
➤ Delimiting macro variable references	
13. Macro Definitions defining and calling a macro	2
➤ Macro parameters	
➤ DATA Step and SQL Interfaces creating macro variables in the DATA step	
14. DATA Step and SQL Interfaces creating macro variables in the	2

	DATA step	
	➤ Indirect references to macro variables	
	➤ Creating macro variables in SQL	
15.	Macro Programs conditional processing	2
	➤ Parameter validation	
	➤ Iterative processing	
	➤ Global and local symbol tables	
16.	SAS SQL – Language	1
	➤ Introduction to SAS- SQL	
	➤ Basic Queries	
	➤ Overview of the SQL procedure	
	➤ Specifying columns	
	➤ Specifying rows	
17.	Types of Joins	1
18.	Introduction to Subqueries	2
19.	Set Operators	2

MBI 202: R and Data Analytics (C)	Total
Core Course – Theory; 3 Credits	45 L

UNIT I

1. An Introduction to R and Basic Programming	5
➤ Overview	
➤ Environment set up (Note: Only for Lab Demonstration)	
➤ Data Types	
➤ Variables	
➤ Operator	
➤ Decision making	
2. R Core Programming	5
➤ Loops	
➤ Functions	
➤ Strings	
➤ Vector	
➤ List	
➤ Matrix	

UNIT II

3. R Core Programming	5
➤ Arrays	
➤ Factors	
➤ Data Frames	
➤ Packages	
➤ Data Shaping	
➤ Library	
4. R Charts and Graphs	5
➤ R-Pie Chart	

- R – Bar Chart
- R- Box Plots
- R - Histogram
- R- Line Graph
- R- Scatter Plots

UNIT III

- | | | |
|----|--|---|
| 5. | R Data Interfaces 1 | 5 |
| | <ul style="list-style-type: none"> ➤ R-CSV ➤ R-Excel ➤ R-Binary files ➤ R-XML files | |
| 6. | R Data Interfaces 1 | 5 |
| | <ul style="list-style-type: none"> ➤ R-JSON files ➤ R-Web Data ➤ R-Database ➤ R- NoSQL | |

UNIT IV

- | | | |
|----|--|---|
| 7. | Analytics with R Statistics | 6 |
| | <ul style="list-style-type: none"> ➤ Mean, Median, Mode ➤ Normal Distribution ➤ Multiple regression ➤ Supervised Model ➤ Unsupervised Model | |
| 8. | Algorithm | 9 |
| | <ul style="list-style-type: none"> ➤ Logistic regression ➤ Linear Regression ➤ Decision tree ➤ Random Forest | |

- SVM model

MBI 203: JAVA and BioJAVA Programming (C)	Total
Core Course – Theory; 3 Credits	45L

UNIT I

1. An Introduction to Java	2
A Short History of Java	
➤ Features or buzzwords of Java	
➤ Comparison of Java and C++	
➤ Java Environment	
➤ Simple java program	
➤ Java Tools – jdb, javap, javadoc	
➤ Java IDE – Eclipse/NetBeans (Note: Only for Lab Demonstration)	
2. An Overview of Java	4
➤ Types of Comments	
➤ Data Types	
➤ Final Variable	
➤ Declaring 1D, 2D array	
➤ Accepting input using Command line argument	
➤ Accepting input from console (Using Buffered Reader class)	
3. Objects and Classes	6
➤ Defining Your Own Classes	
➤ Access Specifiers (public, protected, private, default)	
➤ Array of Objects	
➤ Constructor, Overloading Constructors and use of 'this' Keyword	
➤ Static block, static Fields and methods	
➤ Predefined class – Object class methods (equals(), toString(), hashCode(), getClass())	
➤ Creating, Accessing and using Packages	
➤ Creating jar file and manifest file	

- Wrapper Classes
- Garbage Collection (finalize() Method)

UNIT II

- 4. Inheritance and Interface** **7**
- Inheritance Basics (extends Keyword) and Types of Inheritance
 - Superclass, Subclass and use of Super Keyword
 - Method Overriding and runtime polymorphism
 - Use of final keyword related to method and class
 - Use of abstract class and abstract methods
 - Defining and Implementing Interfaces
 - Runtime polymorphism using interface
 - Object Cloning
- 5. Exception Handling** **4**
- Dealing Errors
- Exception class, Checked and Unchecked exception
 - Catching exception and exception handling
 - Creating user defined exception
 - Assertions

UNIT III

- 6. Strings, Streams and Files** **5**
- String class and StringBuffer Class
 - Formatting string data using format() method
 - Using the File class
 - Stream classes
 - Byte Stream classes
 - Character Stream Classes
 - Creation of files

- Reading/Writing characters and bytes
- Handling primitive data types
- Random Access files

7. Collection 6

Introduction to the Collection framework

- List – ArrayList, LinkedList and Vector, Stack, Queue
- Set - HashSet, TreeSet, and LinkedHashSet
- Map – HashMap, LinkedHashMap, Hashtable and TreeMap
- Interfaces such as Comparator, Iterator, ListIterator, Enumeration

UNIT IV

8. Database Programming 6

- The design of jdbc, jdbc configuration
- Types of drivers
- Create and Execute sql statements, query execution
- The Result Set Object

9. Multithreading 3

- What are threads?
- Life cycle of thread
- Running and starting thread using Thread class
- Thread priorities
- Running multiple threads
- The Runnable interface
- Synchronization and interthread communication

10. Networking 2

Networking basics – Protocol, Addressing, DNS, URL, Socket, Port

- The java.net package – InetAddress, URL, URLConnection class
- SocketServer and Socket class
- Creating a Socket to a remote host on a port (creating TCP

client and server)

- Simple Socket Program Example

MBI 208: Structural Biology & Molecular Modeling	Total
Core Course –Theory; 3 Credits	45L

UNIT I

- | | |
|--|---|
| 1. Secondary and tertiary structures of macromolecules: protein, DNA and RNA | 3 |
| 2. Secondary structure prediction using Chou Fasman, GOR methods; analysis of results and measuring the accuracy of predictions using Q3, Segment overlap, Mathew's correlation coefficient. | 2 |
| 3. Fundamentals of the methods for 3D structure prediction (sequence similarity/identity of target proteins of known structure, fundamental principles of protein folding etc.) | 5 |

UNIT II

- | | |
|--|---|
| 4. Homology Modeling, fold recognition, and ab-initio structure prediction methods - protocols/algorithms. | 5 |
| 5. 3-D structure comparison and concepts: FSSP, CE, VAST and DALI, Fold Classes. | 6 |
| 6. Databases of structure-based classification: CATH and SCOP. | 2 |

UNIT III

- | | |
|---|---|
| 7. General features- bond stretching, angle bending, improper torsions, cross terms, non-bonded interactions, point charges, calculation of atomic charges, polarization, Van Der Waals interactions, hydrogen bond interactions, Water models. | 3 |
| 8. Types of force field - all atoms force field, united atom force field, etc. | 4 |
| 9. Molecular Energy minimization methods: steepest descent, conjugate gradient– derivatives, First order steepest decent and conjugate gradients. | 3 |
| 10. Second order derivatives Newton-Raphson, Minima, maxima saddle points and convergence criteria.-non derivatives minimization methods, the simplex. | 3 |

UNIT IV

11. Molecular Dynamics Simulation: Newtonian dynamics, Periodic boundary conditions and minimum image convention, Potential truncation and shifted-force potentials, Neighbor list, Force calculations. 3
12. Classical Monte Carlo: Random numbers, Evaluating integrals using random numbers, Importance sampling, Metropolis algorithm. 3
13. Analysis of simulated trajectories: Radial distribution functions, Self diffusion coefficient, Time correlation functions. 3

MBI 302: Chemoinformatics and Drug Designing	Total
Advance Course – Theory; 3 Credits	45L

UNIT I

1. Introduction to Cheminformatics	12
<ul style="list-style-type: none"> ➤ Introduction to cheminformatics: aims, scope, role of cheminformatics in pharmaceutical/chemical research. ➤ Chemical Structure representation file format: 1D, 2D and 3D structures, molecular file formats (SMILES, PDB, SDF, MOL). ➤ Molecular Descriptors: 1D, 2D, 3D, topological (Molecular connectivity, electrotopological and refractotopological) and shape indices descriptors. ➤ Introduction to graph theory, vertex partitioning algorithms, Molecular Similarity and Molecular Diversity Analysis. 	

UNIT II

2. Introduction to Molecular Properties	11
<ul style="list-style-type: none"> ➤ Similarity metrics: Tanimoto Coefficient, Euclidean distance and Tversky Index. ➤ Chemical Databases: Design, storage and retrieval methods, molecular database screening, Lipinski rule, Drug/Lead like molecules, chemical structure based search techniques ➤ Introduction to molecular properties: Hydrophobicity, molecular refractivity, electronic charges (Huckel charge, Wang-ford charge), principal moment of inertia. ➤ Pharmacokinetics study: <i>In-silico</i> ADMET Studies 	

UNIT III

3. Drug discovery and QSAR	11
<ul style="list-style-type: none"> ➤ Drug discovery process, role of Bioinformatics in drug design. ➤ Target identification and validation, lead optimization and validation. ➤ Structure-based drug design and ligand based drug design. 	

- Concept of *de novo* design for lead identification.
- Structure Activity Relationship: QSARs and QSPRs, QSAR Methodology, Training data, test data and external validation data, applicability domain in QSAR
- 3D QSAR techniques: CoMFA and CoMSIA.

UNIT IV

4. Pharmacophore Modeling 11

- Pharmacophore features, Pharmacophore model, Receptor-based and ligand-based pharmacophore modeling.
- Virtual screening based on pharmacophore model.
- Receptor site, molecular docking study, flexible docking, rigid docking, molecular interactions.
- Scoring functions, correlation between ligand-based and receptor-based studies.

MBI 303: Machine Learning Techniques	Total
Advance Course – Theory; 3 Credits	45L

UNIT I

1. Introduction to Machine Learning (ML)	2
<ul style="list-style-type: none"> ➤ .Introduction to Artificial Intelligence & Machine Learning. ➤ Elements of ML. ➤ Life Cycle of ML. ➤ Applications of Machine Learning. 	
2. Introduction to Data Mining	3
<ul style="list-style-type: none"> ➤ Data Science and Visualization ➤ Important Python Libraries ➤ pandas ➤ numpy ➤ scikit-learn ➤ matplotlib ➤ seaborn. 	
3. Biological Data and its Application in Machine Learning	1
4. Genetic Algorithm	1
<ul style="list-style-type: none"> ➤ What is genetic algorithm? ➤ Types of genetic algorithm ➤ Introduction to feature selection 	
5. Introduction to Linear Regression	3
<ul style="list-style-type: none"> ➤ loss functions ➤ over fitting ➤ gradient descent 	

UNIT II

6.	Classification Algorithm	6
	➤ Logistic Regression,	
	➤ Support Vector Machine	
	➤ Naïve Bayes Classifier.	
7.	Non Parametric Learning:	4
	➤ K- Nearest Neighbors	
	➤ Decision Trees	
	➤ Random Forest Classifier	
8.	Introduction to Cross-Validation, Hyper parameter tuning and ensemble Models	2

UNIT III

7.	Introduction & Types of Unsupervised Learning	1
8.	Association Rule Mining : (Market Basket Analysis)	2
9.	Clustering :	3
	➤ K-means Clustering	
	➤ Hierarchical Clustering	
10.	➤ Principal Component Analysis (PCA)	3
	➤ Singular Value Decomposition (SVD)	
	➤ SOM(self-organizing maps)	

UNIT IV

8.	Neural Computation	2
	➤ Introduction to Neural computation	
	➤ Neural network model	
9.	Evolutionary computation	4
	➤ Introduction to evolutionary Processes	

- Genetic Operators
 - Evolutionary Optimization Algorithms
- 10. Fuzzy Computation 3**
- Introduction
 - Fuzzy sets & systems
 - Ant colony Optimization (ACO)
- 11. Introduction to Human Language Technology & Machine Learning 3**
- Stochastic Grammar & linguistics, Language models
 - Statistical language Model,
 - Markov model
 - Hidden Markov Model
- 12. Optimization Techniques 2**
- Conjugate Gradient,
 - Newton Raphson,
 - Steepest descent,
 - Simulated annealing

MBI 305: Python Programming	Total
Advance Course – Theory; 2 Credits	30L

UNIT I

1. Introduction and Overview of Python 4

- Installation and understanding Python Environment
- Introduction to Python variables
- basic Operators, keywords, python blocks

2. Data types and Program Flow Structures 6

- Numeric data types: int, float, complex, string data type and string operations,
- Control Structure: if, else and elif , nested control structures
- Python Loop : for loops in python using ranges, string, list and dictionaries, while loops in python, Controlling loop using pass, continue, break and else

3. String , Lists, Tuples & Dictionaries 5

- String: String operators, String manipulation using in built methods
- Lists: list operations, slicing, list methods, - list comprehension.
- Tuples: definition, assignment, tuple operations.
- Dictionaries: definition, operations and methods

UNIT II

4. Functions , Modules & Packages 4

- Function: Definition, Function calling, lambda function
- Modules: Introduction to inbuilt Modules, User defined Modules

- Package: Understanding in built package, building own package, importing package

5. File Handling & Exceptional Handling 6

- File Handling: Opening a file, Read and Write operations, File and Directory related methods
- Exceptional Handling: try-except-else, Assert, try-finally, Raise, Exception Names & descriptions, User defined exceptions.

6. Python Database Interaction 5

- Python Database interaction, Insertion and retrieval information in database.
- Reading and storing information on database.

MBI 308: Artificial Intelligence	Total
Elective Course – Theory; 2 Credits	30L

UNIT I

1. Intelligent Agents:	4
➤ PEAS Representation for an Agent,	
➤ Agent Environments, Concept of Rational Agent, Structure of Intelligent agents, Types of Agents	
2. Problem Solving:	4
➤ Solving problems by searching, - DFS, BFS, A* searches, Performance Evaluation.	
➤ Use of graphs in bioinformatics	
3. Knowledge and Reasoning:	4
➤ A knowledge Based Agent,	
➤ Introduction To Logic,	
➤ First Order Logic: Syntax and Semantics,	
➤ Inference in First Order Logic, Unification, Forward and backward chaining, Resolution	
4. Planning:	3
➤ Planning problem,	
➤ Planning with State Space Search	
➤ Partial Order Planning	
➤ Hierarchical Planning	
➤ Conditional Planning	

UNIT II

5. Genetic Algorithms:	2
➤ Single-objective genetic algorithms,	
➤ Multi-objective genetic algorithms,	

- GA – bioinformatics applications genetic programming
- 6. Learning: 3**
- Introduction to neural networks
 - Perceptrons
 - Multilayer feed forward network
 - Application of ANN
 - Reinforcement learning: Passive & Active Reinforcement learning
- 7. Introduction to Robotics: 2**
- Robot Classification, Robot Specification.
- 8. Direct and Inverse Kinematics: 4**
- Coordinate Frames, Rotations, Homogeneous Coordinates,
 - Arm Equation of four axis SCARA Robot,
 - TCV
 - Direct Kinematics of Four Axis SCARA Robot
 - Inverse Kinematics of Four Axis SCARA Robot
- 9. Application: 4**
- DNA sequencing, hybridization
 - RNA folding prediction using GA
 - Genomics and proteomics
 - MAGE (MicroArray *and* Gene Expression)
 - Advances in tele surgery and surgical robotics
 -

MBI 306: Introduction to Clinical Trials and Pharmacovigilance	Total
Elective Course – Theory; 2 Credits	30L

UNIT I

1. Clinical Research:	3
Introduction to clinical Pharmacology, basic components and scope. The concept of safety: measuring risk, safety in practice, risk–benefit balance, lack of benefit causation: causality assessment in individual cases, assessing causality from clinical trial data, using the Bradford hill criteria to assess causality.	
2. Introduction to basic terms: tolerance, addiction, idiosyncrasy, allergy, hypersensitivity, antagonism, synergism, potentiation, tachyphylaxis, adverse drug reactions and its monitoring.	2
3. Clinical evaluation of new drugs, organizations, types of clinical research	2
4. Phases of clinical research: pre-clinical studies, human volunteer studies (Phase I), clinical trials (Phase II and III studies), post-marketing surveillance (Phase IV studies), prescription-event monitoring and registries.	2
5. Introduction to clinical trials:	2
History, terminologies, type of clinical trials, role of clinical trials in new drug developments.	
6. Regulatory affairs in clinical trials: IND, NDA, ANDA-parts and contents, safety monitoring boards, FDA in various countries including India.	2
7. Clinical trial designs: Designs used in clinical trials, inclusion and exclusion criteria, randomization blinding and controls.	2

UNIT II

- | | | |
|------------|--|----------|
| 8. | Concept of Pharmacovigilance
Standard terms and terminologies in Pharmacovigilance. | 2 |
| 9. | Adverse Drug Reactions: nature and mechanisms of ADRs, predisposing factors for ADRs. | 2 |
| 10. | The process of Pharmacovigilance: signal detection, evaluation and investigation and communication. | 2 |
| 11. | Regulatory aspects of Pharmacovigilance: legislation and guidelines, key elements of European legislation, regulatory Pharmacovigilance systems, obligations of pharmaceutical companies. | 2 |
| 12. | International collaboration: international regulatory collaboration, World Health Organization, Council for International Organizations of Medical Sciences. | 2 |
| 13. | Clinical aspects of adverse drug reactions: clinical burden of ADRs, important ADRs and minimizing risk, improving patient safety in clinical practice. | 2 |
| 14. | Ethical and societal considerations: ethical principles, informed consent, privacy and confidentiality, ethical issues for the pharmaceutical industry, conflicts of interest. | 2 |
| 15. | Reporting Database, managements and Risk assessment: PSUR (periodic safety update reports), risk assessments and managements, Regulatory guidelines and laws n PV. | 1 |

Courses in B.Sc. Biotechnology to enhance Entrepreneurship/ communication skill development

BBT 309: General Course III, Elective; Option I - <u>Communication Skills and Personality Development</u>		Total
General Course III; 2 Credits		30 L
1	Preparation of presentation –principles and presentation technique (what, how, for whom etc).	3 L
2	Nonverbal communication during presentation – how to manage stress, what to do with hands, legs ..., activating the audience with nonverbal communication	3 L
3	Verbal communication –argumentation, usable and unsuitable phrases	2 L
4	Communication skills – listening, empathic reaction, how to question, stealing the show, opening door question	3 L
5	Conflict situation solving, attack from the audience – communication skills as a work experience, vicious circle of attack and defence	2 L
6	Work with audience – ice-breaking, get them in the mood, work with emotions, visualization tools, nonstandard situations	3 L
7	Improvisation and unprepared presentations	2 L
8	Paradigm of human cooperation – why there could be problems to start the communication and what to do with it	3 L
9	Defense against manipulation, how to say NO, stress management	3 L
10	Image and etiquette	2 L
11	Basics of Personality (Definationetc), Theories of Personality Development	3 L
12	Analysing Strengths & weaknesses, Body Language & Preparation of Self Introduction	3 L

BBT 608: Open Course VI, Elective; Option II - Business management in Biotechnology **Total**
Open Course VI; 2 Credits **30L**

UNIT I

1	Nature and characteristics of Management, Scope and Functional areas of management.	1 L
2	Roles of Management, Levels of Management in Biotechnology	1 L
3	Evolution of management thought: early, contemporary and modern	1 L
4	Nature, purpose and importance of planning process	2 L
5	Types of plans and Decision making.	2 L
6	Importance of planning – steps in planning & planning premises.	2 L
7	Hierarchy of plans. Components of planning	2 L
8	Principles of organization, Types of organization. Departmentation Committees.	1 L
9	Nature and importance of staffing–Process of Recruitment and Selection.	3 L

UNIT II

10	Performance appraisals	2 L
11	Motivation and leadership	1 L
12	Business Communication – Meaning and importance	1 L
13	Sales Management Nature of product and market strategy	1 L
14	Packaging and advertising	2 L
15	After Sales Service	1 L
16	Pricing techniques	2 L
17	Financial functions and cost analysis in project planning and control	2 L
18	Structure of a Biotechnology Company	2 L
19	Start-up of Biotechnology Company	1 L

BBT 504: Food Biotechnology
Core Course; 3 Credits

Total
45L

UNIT I

- | | |
|---|------|
| 1 Introduction | 5 L |
| Importance of food and dairy Micro biology – Types of microorganisms in food – Source of contamination (primary sources) – Factors influencing microbial growth in foods (extrinsic and intrinsic) | |
| 2 Food fermentations: Cheese, bread, wine, fermented vegetables – methods and organisms used. Significance of fermented foods, Starter cultures for curd preparation and fermentation of idli batter, production of mushroom, single cell protein, assessment of microbiological quality of various foods. | 10 L |

Unit II

- | | |
|--|------|
| 3 Food spoilage and General principles of food preservation | 15 L |
| Preservation by Heat -Blanching, Pasteurization, Sterilization, Boiling and Canning. Refrigeration & Freezing of foods– Differences between -refrigeration and freezing, Preservation by Drying: Air convection dryers, Fluidized bed drier, roller drier, vacuum drier, spray drier, Freeze – Drying.Preservation by Concentration- Methods of concentration, Types of Evaporators. Preservation by Radiations - Types of Radiations, Effects of Radiations, Dose – Determining Factors, Status of Irradiated foods in India, Microwave, Ohmic heating. Preservation by Chemicals -GRAS, Food preservation by preservatives, Food Additives | |

Unit III

- | | |
|--|-----|
| 4 Introduction to Tetrapack technology | 1 L |
| 5 Genetically modified foods –
Organic foods, Types of organic foods, identifying organic foods, organic food & preservatives.
Genetic modification in Food industry – Background, history, controversies over risks, application, future applications. | 7 L |
| 6 Industrial awareness: Quality control and quality assurance in food industry, concept of current good manufacturing practices (Hazard Analysis and Critical Control Points) | 7 L |

References

BBT 602: Bioprocess Technology and Quality Control **Total**
Core Course - Theory; 3 Credits **45L**

UNIT I

- | | | |
|---|---|-----|
| 1 | Isolation & preservation of industrially important micro-organisms | 5 L |
| 2 | Selection of the desired characteristics, Screening methods, different methods of culture preservation, improvement of industrial micro-organisms | 5 L |
| 3 | Media formulation: media ingredients, objectives and cost effectiveness | 5 L |

UNIT II

- | | | |
|---|--|-----|
| 4 | Types of fermentation, design of typical bioreactor and its various parts | 5 L |
| 5 | Types of bioreactors: continuous stirred tank reactors (CSTR), packed bed reactors, fluidized bed reactors, air lift fermenter | 5 L |
| 6 | Online monitoring and computer control of fermentation process | 3 L |

UNIT III

- | | | |
|---|---|-----|
| 7 | Downstream processing: General steps, recovery of products, extraction and purification | 08L |
| 8 | Quality control in pharmaceutical industry: Evolution of quality concepts: Quality, Quality control, Quality Assurance, GMP
Quality Assurance concepts & tools: Process approach, System approach, Statistical Quality control , Documentation
Input control: Contamination, Cross contamination, Raw Material/ Packaging material, Building, premises and Location, Utilities, Human resource,
Process control: Validation- Equipment/Instruments, process, Operators, Utilities, Materials,
IPQC and Final quality testing and release of product
Good Documentation Practices | 09L |

BBT 508: Open Course V, Elective, Option I - Biotechnology for forensics **Total**
Open Course V; 2 Credits **30 L**

Unit I

1	Collection and storage of biological evidence	2L
2	Chemical and microscopic analysis of biological stains	3 L
3	Screening evidence for biological stains in forensic casework	3L
4	Species of origin and serology separation techniques	5L
5	ABO Grouping and secretor status	2 L

Unit II

6	Biological markers of forensic significance	3L
7	Introduction to blood spatter	3 L
8	Introduction to DNA analysis	6 L
9	Court room testimony	3 L

Courses in M.Sc. Biotechnology/ Medical Biotechnology to enhance Entrepreneurship/ communication skill development

MBT&Med BT 210: Option I (210.1) Bio-entrepreneurship Elective Course I – Theory; 2 Credits	Total 30L
UNIT I	
1 Sectors: Pharma, Biotech, Food, Agri-biotech, Research, Diagnostics, Analytic Labs	3
2 Developing flair for business in students	1
3 Short-term opportunities available for business	2
4 Import substitute product list	2
5 Regulatory Affairs: SSI, MSME, FICCI, MCC, IEC	3
6 Firm registration, GST registration, SME Loan, ISO 22000/14000 etc.,	3
7 Export counsel	1
UNIT II	
8 Finance: Banking, MoFPI, SIDBI, Foreign collaboration, Investors	3
9 Subsidies: BIRAC, SSI, MSME, MoFPI	2
10 Marketing: Promotion, Distribution, Rolling Cycle	2
11 Business Concept and Competitors' knowledge	1
12 Export benefits, procedures	2
13 Make In India	1
14 Knowledge about taxation, GST, custom duty, excise	3
15 Packaging suitability knowledge	1

MBT&MedBT 210: Option II (210.2) – Intellectual property rights I (IPR-I) Total
Elective Course I – Theory; 2 Credits 30L

UNIT I

1 Introduction to Intellectual Property 15
General Introduction to IP & IPR; Introduction, History & role of International Conventions & Treaties- GATT, WTO, WIPO, TRIPS, Budapest Treaty, CBD, Nagoya Protocol; International framework for the protection of IP; IP as a factor in R&D; IPs of relevance to Biotechnology, Agriculture, Bioinformatics and Pharma sector

UNIT II

2 Types of IP Industries: Patents, Trademarks, Copyright & Related Rights, Industrial Design, Traditional Knowledge, Geographical Indications, Plant variety and Protection of New GMOs 8

3 Concept of 'prior art' 7
Need of Prior Art for IP types, Classification search and its implications; Invention in context of "prior art"; Patent databases; Searching International Databases; Country-wise patent searches (USPTO, EPO, India etc.); Analysis and Report formation

MBT&Med BT 310: Option I (310.1) – Biomedical Waste Management	Total
Elective Course II – Theory; 2 Credits	30 L

UNIT I

1	Introduction, definition, classification/ categories, composition and sources. Radioactive waste Health Impacts, direct and Indirect hazards Modern technology for handling biomedical waste Basic steps in waste management, segregation, collection and handling of waste On site pre-treatment of waste Mechanical treatment and chemical disinfections store and off-site transportation Common treatment facilities in-site and off-site Liquid waste treatment and different technologies, cost aspect	15
---	---	----

UNIT II

2	Technologies available for treatment of biomedical waste Conventional treatment technologies a) Wet thermal technology b) Incineration - different models Treatment of general/non-infectious waste a) Composting, rotating jumbling system French composting b) Vermi-composting Disposal Technologies a) Sharp disposal pit b) Deep- burial pit c) Secured land Controls applied to waste management, Environmental safety, risks & public issues, Instrumentation and monitoring, Crematories, Risk management in hospitals -Environment issues in hospitals -Risk analysis Legislation and policies on health care waste management.	15

MBT& Med BT 310: Option III (310.3) – Intellectual property rights II (IPR II) Elective Total
 Course II - Theory; 2 Credits 30 L

UNIT I

1 Basics of Patents 5

Indian Patent Act 1970; Patent Rules, 2003; Recent Amendments; Definitions, non-patentable subject matter, patentability criteria, anticipation, infringement, opposition, biopiracy; Precautions before patenting-disclosure/non-disclosure.

2 Types of patents 5

Provisional and Complete specification; Contents of specification

3 Introduction to Patent drafting 5

National, PCT and Convention patent applications; PCT and Implications; Role of a Country Patent Office; Procedure for filing requirements National and international Patent application, Forms, fees and timelines
 Cost and financial assistance for patenting, introduction to existing schemes

UNIT II

4 Relevant case studies (3-4 cases) related to patentability criteria, anticipation, infringement, opposition, bio-piracy 12

5 Career opportunities in the field of IPR. 3

Med BT 302: Plant Biotechnology Total
 Core Course – Theory; 3 Credits 45L

UNIT I

- | | | |
|---|---|---|
| 1 | Biodiversity hotspots in India: Characterization of biodiversity through different biochemical and molecular methods (chemical printing of biodiversity), | 3 |
| 2 | Conservation strategies of biodiversity, threatened and extinct species | 2 |
| 3 | Bio-prospecting of biodiversity for product development | 2 |

UNIT II

- | | | |
|---|---|---|
| 4 | Plant tissue culture and micropropagation
Introduction, Different systems and stages in axillary shoot proliferation, organogenesis, somatic embryogenesis with examples.. | 4 |
| 5 | Cell culture technology and its application for the production of artificial seeds and secondary metabolites.. | 4 |
| 6 | Homozygous plant production through anther and pollen culture, Embryo rescue and embryo culture in rearing viable hybrid plants, Endosperm culture and production of triploids, Somaclonal and gametoclonal variations and their applications | 4 |
| 7 | Protoplast technology for the production of somatic hybrids and cybrids. Applications in crop improvement. | 3 |

UNIT III

- | | | |
|----|--|---|
| 8 | Transgenic Plants
Introduction, vertical versus horizontal gene transfer, vectors, reporter genes | 3 |
| 9 | Direct and indirect methods for gene transformation, plant cell and chloroplast transformation, | 3 |
| 10 | Introduction to markers, Marker – Assisted Crop Improvement, Genetic Markers and Linkage Maps | 3 |

Unit IV

- | | | |
|----|--|---|
| 10 | Applications of transgenic plants
Development of transgenes for the production of biofuels, single cell proteins, pigments, nutraceuticals, pharmaceuticals, biopesticides, pharmaceuticals, vaccines, plantibodies, value addition, bio-fortification. | 3 |
| 11 | Selection and characterization of transformants for biotic and abiotic stress tolerance, for increase in crop and timber productivity | 3 |
| 12 | Marker Technology in Crop Improvement | 3 |

66

MSW Regular (CBCS 2019-20 pattern)
AE-1: CORPORATE SOCIAL RESPONSIBILITY

Section – I

Unit – I: Introduction

- Concept, meaning and definitions of CSR
- Objectives and Scope of CSR
- Development of CSR
- Functions of CSR
- Scope for Social Work in CSR Activities

Unit – II: Fields of Corporate Social Responsibility

- Education
- Health and Sanitation
- Gender Empowerment
- Infrastructure development
- Rural Development
- Environment

Unit – III: Essentials of Corporate Social Responsibility

- Identifying Priorities of the Community
- Community Investment and Employee Volunteering
- Partnership and Stakeholder Dialogue
- Managing CSR Along with Supply Chains

Section – II

Unit – IV: Aspects of Corporate Social Responsibility

- Social Aspects
- Economical Aspects
- Environment Aspects
- Role of Social Worker in CSR activities

Unit – V: Corporate Social Responsibility Policy and Programmes

- Policies and Programmes of CSR
- CSR programmes for employees
- Networking with Stakeholders

Unit – VI: Corporate Social Responsibility Strategic Planning and Management

- Non-financial Risk Assessment and Management
- Aligning CSR Strategies with Financial Performance
- CSR Investment for Poverty Alleviation
- Long Term Development and Commitment

AE-2: ENVIRONMENTAL ISSUES AND DISASTER MANAGEMENT

Section – I

Unit – I: Introduction

- Concept and Definitions of Environment
- Physical, Social and Communal Environment
- Environment Education; need and objectives
- Global Environmental Issues

Unit – II: Approaches and Models of Environment Education

- Service approach and Action approach
- Sustainable development approach
- Interdisciplinary model and Multi – disciplinary model
- Social Deveopment model and Economic development model

Unit – III: Concepts in Disaster Management

- Disasters, Risks, Hazards, Vulnerability, Disaster Cycle
- Relief and Rehabilitation in Disaster, Logistic Management
- Disaster preparedness and disaster mitigation
- Initiatives in disaster management

Section – II

Unit – IV: Classification of Disasters

- Meaning of Natural and Human made disasters.
- Types of disasters: Famine and drought, Floods, Cyclone, Storms, Tsunami, Earthquakes, Riots, Industrial Accidents, Road-Air-Rail Accidents, Bomb-blast and explosions, War, Avalanches and landslides.

Unit – V: Disaster Responses and Mitigation:

- Prevention and preparedness – Disaster response at various stages of disasters: evacuation and rescue; emergency supplies; early warning systems and vulnerability reduction; disaster financing: provisions and procedures.
- Aid administration and management
- Technological options for disaster response and preparedness

Unit – VI: Relief and Rehabilitation

- Relief – Damage and needs assessment.
- Rehabilitation and Recovery - Planning for rehabilitation and recovery, displacement and resettlement.
- Community Participation and capacity building for facing disasters
- Disaster Management Act, 2005.

68

SE-1-: SOCIAL WORK AND SKILL DEVELOPMENT

Section – I

Unit – I: Self Awareness and Development

- Self-concept and Factors affecting Self-concept
- Concept and meaning of Self-Development
- Significance of Self Development for Social Workers

Unit – II: Sensitivity

- Meaning of Sensitivity
- Gender Sensitivity
- Sensitivity regarding Special- Needs

Unit – III: Perception

- Understanding Perception
- Distortions in Perception
- Understanding Stereotypes

Section – II

Unit – IV: Communication

- Concept of Communication
- Communication Process
- Barriers in Communication
- Use of Audio-Visual Media

Unit – V: Skills for Social Work Methods

- Skills for working with Individuals
- Skills for working with Groups
- Simulation Games
- Role Play and Street Plays

Unit – VI: Career and Work

- Models of career choice and development: Holland and Super
- Work life balance: Work holism, family roles, recreation

69

SE-2 : MEDIA AND DEVELOPMENT

Section – I

Unit – I: Understanding Media

- Concept and meaning of Media
- Scope of media in development
- Role of Media in a Democracy
-

Unit – II: Types of Media:

- Print Media
- Electronic media
- Folk and cultural media
- Challenges for media

Unit – III: Media and Development – I

- Role of Press in Social & Political Movements
- Freedom of Press
- Role of Press Council of India

Section – II

Unit – IV: Media and Development – II

- Representation of Different Groups- Stereotyping and Labelling in Media
- Content of Newspaper: News Stories, Features, Articles, Editorial, Advertorial, Advertisements & Public Relations

Unit –V: Media and Society

- Understanding the Role of Media in Development
- Writing on Development Issues
- Media as Public Service
- Media and Civil Society

Unit – VI: Advertising

- Role of Advertising in Marketing
- Types of Advertisements
- Ethics in Advertising

70

HRM&LW – 6: BUSINESS COMMUNICATION AND PRESENTATION SKILLS

Section – I

Unit – I: Concept and Nature of Communication

- Process and Objectives of Communication.
- Barriers to Communication.
- Seven Cs of effective communication

Unit – II: Verbal and Non-Verbal Communication

- Meaning of Verbal and Non-Verbal Communication
- Essentials of effective communication,
- Professional dressing and body language.

Unit – III: Types of Speeches

- Managerial speeches
- Presentations and Extempore speech
- Speech of thanks,
- Theme speech.

Section – II

Unit – IV: Effective Presentations:

- Organising Presentation
- Principles of Effective Presentations,
- Qualities of skillful Presenter

Unit – V: Interview Skills:

- Mastering the art of giving interviews in:
 - Selection or placement interviews,
 - Appraisal interviews,
 - Exit interviews,
 - Web /video conferencing,
 - Skype Interview
 - Tele-meeting

Unit – VI: Report Writing:

- Report Planning and outline,
- Types of reports
- Logical Sequencing, Graphs and Charts,
- Executive Summary

71

CC-12: COMMUNITY HEALTH AND HEALTH CARE SYSTEM

Section – I

Unit – I: Community Health

- Concept and definitions of Health, Standards of Health ,
- Individual and community health
- Factors Affecting Health
- Concept of Diseases, Classification of diseases ,Mode of Transmission of Diseases

Unit – II: Public Health and Health Care Services

- History of Public Health in India
- Public Health Programmes in India- Village , Block, District Levels
- Health Policy and Administration

Unit – III: Government Initiatives in Public Health

- National Urban Health Mission-Objectives, Structure, Services
- National Rural Health Mission- Objectives, Structure, Services
- Issues in Public Health services

Section – II

Unit – IV: Prevention and Control of Diseases

- Concept of Control and Prevention of diseases
- Prevention and Control of : Communicable Diseases, -
- Measles ii) Mumps iii) Polio iv) Chicken Pox v) Rubella vi) Tetanus vii) Whooping cough viii) Diphtheria
- Levels of Prevention : Primary level, Secondary level & Tertiary level

Unit – V: Malnutrition

- Concept and Definition of Malnutrition
- Social aspects of Nutrition
- Diseases and Conditions related to Malnutrition
- Vitamin deficiency, Anemia, Iodine deficiency

Unit –VI: Community Health Care and Social Work

- Health Education and Counseling
- Application of Social Work Methods in Health Care
- Role of Social Worker in Community Health Care Programme

72

URCD 10 SUSTAINABLE DEVELOPMENT

Unit 1: Sustainable and Inclusive Development – Genesis and Definition

- Definition and concept of Human Development, Sustainable and Inclusive Development
- Approaches of Sustainable Development
- Genesis of Sustainable and Inclusive Development

Unit 2: Mechanisms for Sustainable and Inclusive Development

- Mechanisms in Indian context (government, non-government, CSR, International Development Agencies)
- Planning Process of SD : five year plan to NITI Aayog
- Current schemes and Programmes of S & I D
- Impact of Schemes and Programmes

Unit 3: Social Implications of Inclusive Development

- Inclusive Development and social Integration
- Inclusive Development and upliftment of weaker sections
- Inclusive Development and Women Empowerment

Section II

Unit 4: Sustainable development Goals and Indicators (I)

GOAL 1: No Poverty

GOAL 2: Zero Hunger

GOAL 3: Good Health and Well-being

GOAL 4: Quality Education

GOAL 5: Gender Equality

GOAL 6: Clean Water and Sanitation

Unit 5: Sustainable development Goals and Indicators (II)

GOAL 7: Affordable and Clean Energy

GOAL 8: Decent Work and Economic Growth

GOAL 9: Industry, Innovation and Infrastructure

GOAL 10: Reduced Inequality

GOAL 11: Sustainable Cities and Communities

GOAL 12: Responsible Consumption and Production

Unit 5: Sustainable development Goals and Indicators (III)

GOAL 13: Climate Action

GOAL 14: Life Below Water

GOAL 15: Life on Land

GOAL 16: Peace and Justice Strong Institutions

GOAL 17: Partnerships to achieve the Goal

BHARATI VIDYAPEETH

[DEEMED TO BE UNIVERSITY]

‘A’ Grade University Status by Ministry of HRD, Govt. of India

Re-Accredited by NAAC with ‘A’ Grade

FACULTY OF MANAGEMENT STUDIES

BACHELOR OF BUSINESS ADMINISTRATION

Choice Based Credit System

(BBA - 2018) (CBCS)

SYLLABUS

Course Structure

Applicable with effect from 2018-19

Bharati Vidyapeeth
[Deemed to be University],
Pune
Faculty of Management Studies
Bachelor of Business Administration Programme (BBA)
Revised Course Structure
(To be effective from 2018-2019)

The BBA Programme.....

The Bachelor of Business Administration Programme (BBA) is a full time three year programme offered by Bharati Vidyapeeth Deemed University (BVDU), Pune and conducted at its management institutes in New Delhi, Pune, Navi Mumbai, Kolhapur, Sangli, Karad and Solapur. All the seven institutes have excellent faculty, Laboratories, Library, and other facilities to provide proper learning environment. The University is accredited by NAAC with an 'A' grade. The Bachelor of Business Administration (BBA) is designed to provide a strong practical understanding of the principles, theories, and tools necessary to succeed in businesses. The BBA programme focuses on imparting to students the ability to demonstrate leadership, understand human relationships, and problem-solving abilities essential for success in any business endeavour. While designing the BBA course, the above facts are considered and the requirements for higher studies and immediate employment are visualized. This effort is reflected in the Vision and Mission statements of the BBA programme. Of course, the statements also embody the spirit of the vision of Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth Deemed University which is to usher in “Social Transformation Through Dynamic Education.”

Vision

To prepare the students to cope with the rigor of Post Graduate Programmes in India and Abroad as well as to prepare them for managing Businesses globally and as Entrepreneurs who will also be sensitive to societal concerns.

Mission

To impart sound conceptual knowledge and skills in the field of Business Management studies that can be leveraged for enhancing career prospects and higher education in the said discipline.

Objectives

The Bachelor of Business Administration (BBA) degree programme has the following objectives...

- To provide students with an in-depth knowledge of Management and Business concepts
- To provide students with a firm foundation in both theoretical and practical concepts and applications to meet the various needs of business organisations at a global level
- To prepare students for the responsibilities and career opportunities with corporations and as entrepreneurs.

Duration :

The duration of the BBA degree programme shall be of three years divided into six Semesters. i.e. BBA Part – I (Sem-I & II), BBA Part – II (Sem-III & IV) and BBA Part – III (Sem V & VI). The medium of instruction and examination will be only English.

Eligibility Requirements

A candidate applying for BBA programme should have passed higher secondary or equivalent examination (10 + 2) of any recognized Board satisfying the following conditions:

1. Subject to the above conditions, every eligible candidate has to pass a common All India Entrance test (B-UMAT) conducted by Bharati Vidyapeeth Deemed University, Pune. The final admission is based solely on the merit at the B-UMAT test

Note : Elective will be offered only if a minimum of ten (10) students opt for the same in semester V.

Grading System for Programmes under Faculty of Management Studies:

1. **Grade Points:** The Faculty of Management Studies, Bharati Vidyapeeth University has suggested the use of a 10-point grading system for all programmes designed by its various Board of Studies. A grading system is a 10-point system if the maximum grade point is 10. The system is given in Table I below.

Table I: The 10-point Grading System Adapted for Programmes under FMS

Range of Percent Marks	[80, 100]	[70, 79]	[60, 69]	[55, 59]	[50, 54]	[40, 49]	[00, 39]
Grade Point	10.0	9.0	8.0	7.0	6.0	5.0	0.0
Grade	O	A+	A	B+	B	C	D

Formula to calculate GP is as under:

Set $x = \text{Max}/10$ where Max is the maximum marks assigned for the examination (i.e. 100)

Formula to calculate the individual evaluation

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

2.Scheme of Examination: Courses having Internal Assessment (IA) and University Examinations (UE) shall be evaluated by the respective institutes and the University at the term end for **40(forty)** and **60(Sixty)** Marks respectively. The total marks of IA and UE shall be 100 Marks and it will be converted to grade points and grades.

CCA – Comprehensive Continuous Assessment - Courses having *only Comprehensive Continuous Assessment (CCA)* the respective institutes will evaluate the students in various ways such as *Class Test, Presentations, Field Assignments and MiniProjects* for a total of 100 marks during the term. Then the marks will be converted to grade points and grades.

Open Courses shall be evaluated for 50 marks only (fifty marks only).

3. Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

If learner fails in IA, the learner passes in the course provided, he/she obtains a minimum 25% marks in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the learner passes at UE.

A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA he has to reappear only at IA as backlog candidate and clear the Head of Passing. to secure the GPA required for passing.

The 10 point Grades and Grade Points according to the following table

Range of Marks (%)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} \leq 80$	A+	9
$60 \leq \text{Marks} \leq 70$	A	8
$55 \leq \text{Marks} \leq 60$	B+	7
$50 \leq \text{Marks} \leq 55$	B	6
$40 \leq \text{Marks} \leq 50$	C	5
Marks < 40	D	0

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

Formula to calculate Grade Points (GP)

Suppose that „Max“ is the maximum marks assigned for an examination or evaluation, based on which GP will be computed. In order to determine the GP, Set $x = \text{Max}/10$ (since we have adopted 10 point system). Then GP is calculated by the following formulas

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

Two kinds of performance indicators, namely the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all the courses since his/her enrollment. The CGPA of learner when he /she completes the programme is the final result of the learner.

The SGPA is calculated by the formula

$$SGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where, C_k is the Credit value assigned to a course and GP_k is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the Semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

The CGPA is calculated by the following formula

$$CGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where, C_k is the Credit value assigned to a course and GP_k is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrollment and also during the semester for which CGPA is calculated.

The CGPA shall be calculated up to two decimal place accuracy.

The formula to compute equivalent percentage marks for specified CGPA:

% marks (CGPA)	$10 * \text{CGPA} - 10$	If $5.00 \leq \text{CGPA} \leq 6.00$
	$5 * \text{CGPA} + 20$	If $6.00 \leq \text{CGPA} \leq 8.00$
	$10 * \text{CGPA} - 20$	If $8.00 \leq \text{CGPA} \leq 9.00$
	$20 * \text{CGPA} - 110$	If $9.00 \leq \text{CGPA} \leq 9.50$
	$40 * \text{CGPA} - 300$	If $9.50 \leq \text{CGPA} \leq 10.00$

Award of Honours:

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA below 5.0	F	Fail	Marks below 40

c) ATKT Rules:

1. A student is allowed to carry backlog of any number of subjects for Semester IV.
2. A student must pass Semester I and Semester II to appear for Semester V.

Marketing Management	Human Resource Management
Financial Management	International Business Management
Entrepreneurship Development	Financial Markets

Note : ADD ON Courses :

Courses such as mentioned below may be introduced as ADD-ON courses separately. The Add on Courses are not compulsory for the students and may be introduced on demand on Payment basis, with prior approval of concerned authorities)

- a) Foreign Language
- b) Office Automation Tools
- c) Supply Chain Management
- d) Event Management

Course Code 101

BBA- Sem - I (CBCS 2018)

Business English - Communication

Credits : 4

UE + IA: 60:40

Course Type : AECC

Course Objectives:

- To acquaint students in managerial communication from every perspective that is globally demanding.
- To acquaint students with the required skills for effective communication in business organizations
- To enable students to develop confidence and expertise in composing effective communication skills essential in Business Situations

Learning Outcomes:

After studying this subject, the student should be able to:

- Understand how to converse in business situations
- Write effective e-mails, Letters
- Write formal and informal Reports

Unit 1: Concept and Nature of Communication

(12 hours)

Meaning and Introduction, Importance and Nature of Communication. Process and Objectives of Communication. Channels of Communication, Barriers to Communication, Overcoming barriers, Seven C' s of effective communication

Unit 2: Verbal Communication

(12 hours)

Verbal Communication (oral) – Meaning, Advantages, Disadvantages, Essentials of effective oral communication, Types. Speaking Skills – Meaning and importance – Guidelines for preparing a Speech – Strategies for good conversation

Exercises on Verbal communication.

Unit 3: Non – Verbal Communication**(12 hours)**

Meaning , Importance, Uses of non verbal communication, Body Language, Gestures, Postures, Para Language, non verbal aspects of written communication.

Unit 4: Listening, Reading Skills, Presentation Skills**(12 hours)**

Listening Skills – Meaning and importance – Types – Listening Barriers – Overcoming barriers to improve Listening skills. Exercises on Listening Skills, Reading Skills – Meaning and importance – Steps for better reading. Exercises to improve Reading Skills ,

Introduction and importance, Planning the Presentation. Presentation Structure. Organizing the Presentation. Qualities of a skillful Presenter. Use of Visual aids in Presentation.

Unit 5: Written Communication**(12 hours)**

Writing Skills – Meaning and importance of written communication in business, Business Letters : Tactful use of language – Structure of a Business letter - Business letter formats – Types of letters: Letters of inquiry and Reply, Letters placing orders and reply, Letter of Complaint, Claims and Adjustments, Sales letters, Job application letters.

BBA- Sem - I (CBCS 2018)

Business Organization & Systems

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

- To acquaint students with fundamentals of business organization and management systems as a body of knowledge.
- To impart to the students an understanding of business concepts with a view to prepare them to face challenge of managing business in the new era.

Learning Outcomes:

On successful completion of this syllabi the students will

- Understand the basic concepts in commerce, trade and industry. He will be exposed to modern business world.
- Understand modern business practices, forms, procedures and functioning of various business organizations.

Unit 1: Introduction to Business

14 hrs.

Concept of business – meaning, definition, nature and scope, characteristics of business. Business as an economic activity. Objectives of business. Structure of business. Requisites for success in modern business. Meaning, scope and evolution of commerce & industry, Industrial Revolution, beginning and growth of Indian business, industrialisation in India. Globalization & challenges for Indian Business in the modern era.

Unit 2: Forms of Business Ownership

8 hrs

Introduction to various forms – factors affecting choices of an ideal form of ownership, features merits and demerits of sole proprietorship – joint Hindu family business – partnership – joint stock company – co-operative organisation, public enterprises.

Unit 3: Formation of a Company

10 hrs

Stages in formation and incorporation of a company (i.e. promotion – incorporation and registration – capital subscription – commencement of business. - documents of a company i.e. Memorandum of association – articles of association – prospectus.

Unit 4: Establishment of Business Enterprise**12 hrs**

Various factors to be considered while starting a new business enterprise i.e. Identification of business opportunity – market assessment – suppliers – technology – location – human resource – finance etc. Small and medium enterprises – meaning characteristics and objectives. Role of support organisation such as trade associations and chambers of commerce.

Unit 5: Organization of Trade**12 hrs**

Channels of distribution – meaning, functions and types. Internal trade – wholesale and retail

External trade – import and export. Role and importance of support services to business such as transport insurance etc. Business combinations – mergers and acquisitions. Franchising. Business process outsourcing. Multinationals – concept and role of MNCs. Stock Exchange and Produce Exchange: Definition and Meaning, Importance, Functions, Listing, Dealers.

Course Code 103

BBA- Sem - I (CBCS 2018)

Micro Economics

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

- To expose students to basic micro economic concepts.
- To apply economic analysis in the formulation of business policies.

Learning Outcomes:

Students will be able to use economic reasoning to problems of business.

Unit 1: Introduction to Micro Economics 12 hrs.

Business economics –meaning nature and scope; Micro and macro; Basic economic problems; Market forces in solving problems; Circular flow of income and expenditure; Tools for analysis (Functional relationships, Schedules, Graphs, Equations)

Unit 2: Demand Analysis and Utility Concept

12hrs.

Concept of demand; Law of demand ; Factors affecting demand ;Exceptions to law of demand; Market demand ;Changes in demand ;Elasticity of demand (Price ,Income ,Cross)
Concept of Utility, Cardinal & Ordinal Utility, Law Of Diminishing Marginal Utility

Unit 3: Supply and Cost & Revenue concepts 12 hrs.

Concept of supply, Factors affecting supply, Law of supply, Exceptions of law of supply
Types of cost, Fixed and variable, Accounting and economic, Total cost, marginal cost, average cost, implicit & explicit cost, real and money cost, Short run and long run, Average revenue, total and marginal revenue. Opportunity cost, Money cost, , Law of returns to scale, Economies and diseconomies of scale, Law of Variable proportions

Unit 4: Market Analysis 12 hrs.

Features of markets, Pure, Perfect, Monopoly, Duopoly, Oligopoly, Monopolistic competition
Equilibrium of firm and industry under perfect competition, Price determination under monopoly, Price and output determination under monopolistic competition

Unit 5: Theories of Distribution 8 hrs.

Marginal productivity theory of distribution, Rent –modern theory of rent, Role of trade union and collective bargaining in wage determination, Interest –liquidity theory of interest
Profits- Dynamic, Innovation, Risk and uncertainty bearing theories of profits

Reference Books :

1. Microeconomics theory and Application-D N DWIVEDI-Vikas.
2. Seth –micro economics
3. Mithani –managerial economics
4. M .jhingan
5. Ahuja.microeconomic analysis

<https://alison.com/>: Fundamentals of Financial Accounting

Course Code 104

BBA- Sem - I (CBCS 2018)

Business Accounting

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

- To impart to the learners the basic accounting knowledge
- To train in the accounting process from entering business transactions to Journal to preparation of Final Accounts.

Learning Outcomes:

After the completion of the course, the students will understand:

- Importance and utility of Financial Accounting
- Accounting process from entering the business transactions to journal to preparation of Final Accounts of a sole proprietor.

Unit 1: Introduction to Financial Accounting: **6 hrs.**

Definition and Scope of Financial Accounting, Objectives of Financial Accounting, Book Keeping v/s. Accounting, Basic Terms used in Accounting, Users of Financial Statements, Limitations of Financial Accounting

Unit 2: Accounting Principles and Accounting Standards: **6 hrs.**

Accounting Concepts, Accounting Conventions, Meaning of Accounting Standards, Significance of Accounting Standards.

Unit 3: Journal & Subsidiary Books: **14 hrs.**

Accounting Process, Types of Accounts, Rules of Accounts, Preparation of Journal, Simple and Combined Journals entries.

Subsidiary Books: Purchase Book, Sales Book, Purchase Return Book, Sales Return Book, Cash Book

Unit 4: Ledger Posting and Trial Balance: **12 hrs.**

Meaning and Utility of Ledger, Format of Ledger Account, Procedure of posting Journal entries to Ledger Accounts, Balancing of Ledger Account, Preparation of Trial Balance

Unit 5: Depreciation: **8 hrs.**

Meaning of Depreciation, Causes of Depreciation, Methods of charging depreciation: Written Down Value & Straight Line Method, Accounting treatment of Depreciation

Unit 6: Meaning and Preparation of Final Accounts: **14 hrs.**

Preparation of Trading and Profit & Loss Account and Balance Sheet of sole proprietary

business.

BBA- Sem - I (CBCS 2018)

Foundation of Mathematics & Statistics

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

- i) To develop knowledge of key theories, concepts in Mathematics.
- ii) To enhance ability to problem solving
- iii) To build ability to apply mathematical and statistical concept for business applications

Learning Outcomes:

- i) Students will be able to solve problems in Mathematics using appropriate concepts
- ii) Students will be able to effectively apply the statistical tools for business applications

Unit 1:

12hrs.

Profit and Loss, Discount, Commission, Brokerage, Rates and Taxes, Insurance, Partnership, Bill of Exchange, Stock and Shares, Payroll

Unit 2:

12 hrs.

Simple interest and Compound interest and Annuity:

Simple interest, Compound Interest,, Interest Compounded Continuously, Compound Amount at changing rate, Introduction of Annuity, Amount and Present Value of Immediate or Ordinary Annuity, Annuity Due,

Unit 3:

12hrs.

Matrices and Determinants & Simultaneous Linear equations:

Definition of a Matrix, Matrix operations, Determinants, Properties of determinants. Applications in Business Problem, Solution of Simultaneous equations Linear Equation in two unknowns. Permutations and Combinations

Unit 4:

12 hrs.

Introduction to Business Statistics

Definition, descriptive and inferential statistics in business, scope of statistics, Population and sample, data, types of data, sources of data, methods of data collection.

Unit 5:

12 hrs.

Data presentations and graphical displays

Frequency, cumulative frequency distribution, Frequency distributions, importance of Diagrammatic and Graphic Representation of data, frequency polygons and frequency curves, histograms, Ogive Curves.

BACHELOR OF BUSINESS ADMINISTRATION

Generic Elective / Interdisciplinary

Course Code 106
BBA- Sem - I (CBCS 2018)

Community Work

Credits : 2

CCA : 50 marks

Course Type : Generic Elective / Interdisciplinary

Course Objectives:

This course aims to expose the students to social issues and help them Participate in community service through trips/events organized at institute, state level etc and also to Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc

- (I) To expose the students towards social reality and role of community development for social upliftment and well being
- (II) To involve students in community work through active involvement and participation

Learning Outcomes:

Students will be able to know the community needs and understand their role to contribute meaningfully towards community development

Unit 1:

5 hrs

History, meaning, Goals, values, functions, role and process of community work. Professional and voluntary community work. Attitudes, roles and skills of a community worker

Unit 2:

10 hrs

Social concerns in India: poverty, unemployment, population, problems faced by women – dowry, domestic violence, etc. Social problems - terrorism, corruption, caste conflict, drug abuse, AIDS, ETC.

UNIT 3:

15 hrs

Types of community work. Caring for needy, helping the poor, fundraising drives- organizing

COMMUNITY HOURS:

Participate in community service trips/events organized at institute, state level etc , Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc , Submit a report on a particular type of community involvement undertaken

Course Code 106

BBA- Sem - I (CBCS 2018)

Career & Life Skills

Credits : 2

CCA : 50 marks

Course Type : **Generic Elective / Interdisciplinary**

Course Objectives:

- To help students make well-informed, thoughtful decisions regarding your future as adults.
- To develop behaviours and attitudes that help students contribute to the community in a positive manner.
- Give you skills and knowledge to contribute to the well-being and respect of the self and others

Learning Outcomes:

Students will be able to understand self potential and ways to enhance capabilities.

Unit 1: Introduction to Life Management

Life management-definition, scope and application, concept of emotions, self belief, setting realistic goals, understanding system

Unit 2: Developing Emotional Potential and Physical Potential

12 hrs

Improving thinking skills, improving study skills, planning education
Eating habits, healthy foods, staying healthy, changing habits-the self change model

Developing Your Intellectual Potent

12 hrs

Effective communication, effective listening, effective speaking ,getting along with others, functioning in groups, how to delegate.

Definition-stress, handling change and stress, managing time, managing money, formulation of career plan, bring it all together

Unit 3: Career and Life Choices

Managing personal, lifelong career development.

Resource Choices... Making responsible decisions in the use of finances and other resources that reflect personal values and goals as well as a commitment to self and others.

Personal Choices... Understand the emotional/psychological, intellectual, social, spiritual, and physical dimensions of health and how these dimensions of health work together to contribute to personal well-being.

- Mindset: the new psychology of success -[carol s. Dweck](#)

Course Code 106
BBA- Sem - I (CBCS 2018)

Waste Management

Credits : 2

CCA : 50 marks

Course Type : **Generic Elective / Interdisciplinary**

Course Objectives:

- to expose students to the issue of waste and waste management tools and techniques applicable for waste disposal and management.

Learning Outcomes:

After completion of the course students

- will be able to understand solid waste sources, health and environmental issues related to solid waste management.
- will get knowledge about Sources, handling and control of Biomedical, Chemical, Nuclear and e-wastes.
- will be able to understand the issues regarding waste disposal and management and will become aware of Environment and health impacts due to solid waste mismanagement

Unit – I Solid Waste Management-

10 hrs

Introduction to waste Management

Introduction, Meaning, Solid waste including municipal, hospital and industrial solid waste; health and environmental issues related to solid waste management. Provisions in Indian Penal Code for Environmental protection.

Unit – II Biomedical, Chemical, Nuclear and e-wastes

10 hrs

Biomedical wastes – Types – Management and handling – control of biomedical wastes, Chemical wastes – Sources – Environmental effects – Need for control – Health and environmental effects. Nuclear waste – Management of nuclear wastes, e-waste- sources and management.

Unit – III

10 hrs

Waste reduction at source – Treatment and disposal techniques for solid wastes – composting, vermin-composting, autoclaving, microwaving, incineration, non- incineration, Thermal techniques, use of refuse derived fuels, land-filling. **Reduce Reuse and Recycling Techniques:** Need for the concept- Various Types - Handmade Paper production – Reuse of materials- Recycle of material

Books Recommended:

BACHELOR OF BUSINESS ADMINISTRATION

SEMESTER 2

Course Code 201

BBA- Sem - II (CBCS 2018)

Environment Studies

Credits : 2

CCA : 50 marks

Course Type : Generic / Open Elective

Course Objectives:

- To sensitize the students on the environmental issues
- To educate the students about the threats to the environment and natural resources

Learning Outcomes:

Learners will be able to understand the different aspects of environments, the threats posed by human activities and the solutions for the same.

Unit 1: Nature and Scope

(8 Hrs)

The Multidisciplinary Nature of Environmental Studies Definition, scope and importance Need for public awareness.

Natural Resources Renewable and Non-renewable Resources: (a) Forest resources: (b) Water resources: (c) Mineral resources: (d) Food resources: (e) Energy resources: (f) Land resources:

Unit 2: Ecosystems

(6 Hrs)

Concept, Structure and function of an ecosystem. Energy flow in the ecosystem.

Introduction, types, characteristic features, structure and function of the following ecosystem: (a) Forest ecosystem (b) Grassland ecosystem (c) Desert ecosystem (d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estauries)

Biodiversity and Its Conservation, Introduction, definition: genetic, species and ecosystem diversity. Threats to biodiversity: Endangered and endemic species of India. Conservation of biodiversity.

Unit 3 : Pollution

(6 Hrs)

Environmental Pollution (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards

Unit 4: Social Issues and the Environment

(4 Hrs)

Urban problems related to energy. Water conservation, rain water harvesting, watershed management. Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust.

Unit 5: Environment and human health**(6 Hrs)**

Population growth, Environment and human health. Value education. HIV/AIDS. Women and Child Welfare. Role of Information Technology in environment and human health. Case Studies. Field Work -

Visit to a local area to document environmental assets—river/forest/grassland/hill/mountain. Visit to a local polluted site—Urban/Rural/Industrial/Agricultural.

Course Code 202

BBA- Sem -II (CBCS 2018)

Principles of Management

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

Students will be given the opportunity to learn

- Basic concepts of management and to enable them to gain appreciation for emerging ideas, techniques, procedures and practices in the field of management.
- The role of leadership and management within an organization; appreciate different leadership styles and which one is suitable to a particular managerial context.

Learning Outcomes:

- Integrate management principles into management practices.
- Assess managerial practices and choices relative to ethical principles and standards.
- Specify how the managerial tasks of planning, organizing, and controlling can be executed in a variety of circumstances.
- Determine the most effective action to take in specific situations

Unit 1: Introduction of Management

12 hrs

Introduction to Management- Definitions & Characteristics of Management-Scope of Management--Functions of Management. Skills for a Manager. The Evolution of Management Thoughts- Scientific Management, General Principles of Management.

Unit 2: Planning

8 hrs

Overview of Planning: Introduction to Planning & it's Importance; Planning Process; Types of Planning, Decision making Process - Types and Techniques.

Unit 3: Organizing

10 hrs

Introduction & Definition- Concept of Organization-Principles of Organization-Creating an Organization Structure- Informal Organization- Departmentalization, line and staff relationship.

Unit 4: Leading

10 hrs

Defining leadership, ingredients of leadership, Trait approach to leadership, Behavioral approach to leadership, and different styles of leadership.

Unit 5: Controlling

10 hrs

Controlling- Basic Concept, Relationship between Planning & Controlling. The Basic Control Process, Requirement for Effective Control, Control Techniques, Use of IT for Controlling.

3. Critical Perspectives on Management (Coursera)

Course Code 203

BBA- Sem -II (CBCS 2018)

Macro Economics

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

- To study the behavior and working of the economy as a whole.
- To study relationships among aggregates.
- To apply economic reasoning to problems of business and public policy.
- To enhance knowledge regarding current affairs of the economy as a whole.
- The course is designed to study the impact of monetary and fiscal policy on the aggregate behavior of individuals.

Learning Outcomes:

The learner will get acquainted with the principles of Macroeconomics, determination of and linkages between major economic variables ; level of output and prices, inflation, interest rates and exchange rates.

Unit 1: Basic Issues and features of Indian Economy

12 hrs

Macroeconomics- definition & nature, Scope , Importance, Limitations, Paradoxes, Macro economic variables. Concept and Measures of Development and Underdevelopment; Human Development; Composition of national income and occupational structure, Measurement of macroeconomic variables: National income accounting, Circular flow of income (four sector model), Methods to calculate national income, Stock and flow concept, Gross domestic product(GDP), Gross national product(GNP), Net domestic product(NDP), Net national product(NNP), Personal and Personal disposable income; Classical theory of income and employment:

Unit 2: Policy Regimes

12 hrs

- a) The evolution of planning and import substituting industrialization.
- b) Economic Reforms since 1991.
- c) Monetary and Fiscal policies with their implications on economy

Unit 3:

12 hrs

Theory of Income & Employment, Says law of market, Keynes theory of Income & Employment: simple Keynesian model, components of aggregate demand, equilibrium income, changes in equilibrium, multiplier(investment, Government expenditure, lump sum tax, foreign trade), effect of fiscal and monetary policy, Classical aggregate demand curve, Classical theory

of interest rate, effect of fiscal and monetary policy.

Unit 4: Money :

12 hrs

Functions of money, quantity theory of money, determination of money supply and demand, Quantity Theory of Money

Business cycle & Inflation & Deflation:

Business cycle-nature, Features/Characteristics- Prosperity/Boom – Recession, Depression, Revival/Recovery

Inflation: Meaning , demand and supply side factors, causes & control,

Deflation: Meaning , causes & control, Phillips curve, Stagflation, Inflationary gap

Unit 5: :

12 hrs.

Macro economic policy: Monetary policy, Fiscal policy

Economic scenario analysis, Out of inflation & deflation , which is worst and why?

- What is the current CRR & SLR ratio? Are this ratios appropriate for current condition of the country
- Which trade cycle is prevailing in India at present

Which monetary & fiscal policy do you suggest for current condition of India?

Course Code 204

BBA- Sem - II (CBCS 2018)

Management Accounting

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

- To Impart the Knowledge of Basic cost concepts, element of cost & Preparation of Cost Sheet.
- To provide basic knowledge of important Methods & Techniques of costing.
- To have basic knowledge about concept of management and cost audit

Learning Outcomes:

At the end of the course students should be able to

1. Understand basic cost concepts, element of cost & Preparation of Cost Sheet.
2. Have practical applications of important Methods & Techniques of costing.
3. Understand the application of concept of management and cost audit.

Unit 1: Introduction

(8 Hours)

Definition, Nature and scope of Management Accounting, Limitations of Financial Accounting, Advantages and Limitations of Management Accounting, Difference between Financial and Management Accounting.

Unit 2: Introduction of Cost Accounting

(12 Hours)

Concept and need of Cost Accounting, Material, Labour and other Expenses, Classification of cost & Types of Costs, Preparation of Cost Sheet, Methods and techniques of Costing,

Unit 3: Budget and Budgetary Control

(12 Hours)

Meaning and objectives of Budget, Definition, Meaning and objectives of Budgetary control, Advantages and disadvantages of Budgetary Control, Types of Budget, Preparation of flexible budget and cash budget.

Unit 4: Marginal Costing & Standard Costing

(20 Hours)

Definition and Meaning of Marginal Cost and Marginal Costing, importance and Limitations of Marginal Costing, Contribution, P/V Ratio, Break Event Point, Margin of Safety, Definition and Meaning of Standard Costing, Advantages and Limitations of Standard Costing ,Variance Analysis – Material and labour Variances only

Unit 5: Management Audit

(8 Hours)

Concept and Process of Audit, Essentials of Audit, Cost Audit its Objectives and Advantages, Management Audit its Objective and Advantages, Contents of Management Audit Reports.

Course Code 205
BBA- Sem - II (CBCS 2018)
Business Statistics

Credits : 4

UE + IA: 60:40

Course Type : Core

Course Objectives:

- i) To familiarize the students with the basic statistical tools and their application in business decision-making.
- ii) To develop the quantitative skills of the students so as to make them skilled at understanding data, comparing two or more data sets and predicting business data etc.
- iii) To make the learner familiar with the processes needed to develop, report, and analyze business data.

Learning Outcomes:

- i) Students will be able to solve problems in Statistics using appropriate concepts
- ii) Students will be able to effectively apply the statistical tools for business applications

Unit 1: Descriptive statistics – Measures of Central Tendency and Dispersion **12 Hrs**

Arithmetic mean, median, Mode, G.M. Quartiles deciles, percentiles
Absolute and relative measures of dispersion, Range, quartile deviation, mean deviation, standard deviation, variance.

Unit 2: Correlation Analysis **12Hrs**

Meaning of correlation, types of correlation, Methods of studying correlation, scatter diagram, Karl Pearson's coefficient, Rank Correlation

Unit 3: Regression Analysis **12Hrs**

Meaning and applications, Lines of regression, regression coefficients, Business applications
Distinction between Correlation and regression

Unit 4: Probability **12Hrs**

Basic Concepts in probability, definition of probability, random experiment, sample space, independent events, mutually exclusive events, conditional probability, Expected Value and Variance – $E(X)$ and $V(X)$, Bayes' Theorem

Unit 5: Association of Attributes **12Hrs**

Introduction, Meaning and importance, Yule's Coefficient of association and interpretation

Teaching Methodology

- Lectures, tutorial and Field Work.
- Field work on collection of data through surveys and presentation of data using EXCEL to be carried out by students under the guidance of faculty.

OPEN COURSES SEMESTER II**

Course Code 206

BBA- Sem - II (CBCS 2018)

Community Work – Swachh Bharat Abhiyan

Credits : 2

CCA : 50 marks

Course Type : Generic / Open Elective

Course Objectives:

- i) This course aims to expose the students to Swachh Bharat Abhiyan initiative of the government.

Learning Outcomes:

Students will be able to understand the details about the Swachh Bharat Abhiyan and its impact on society.

Unit 1:

5 hrs

History, meaning, Goals of Cleanliness initiatives

Unit 2:

10 hrs

Initiators of cleanliness drive in India. Sant Ghadage Baba, Mahatam Gandhi, Efforts taken towards the Swachh Bharat Abhiyan, Swachh Bharat Mission.

UNIT 3:

15 hrs

Impact of Cleanliness initiatives. Social Awareness, Case Studies

COMMUNITY HOURS:

Internship of 15 days (100 hours) to be undertaken

Submit a report on a particular type of community involvement undertaken

Smart Cities

Credits : 2

CCA : 50 marks

Course Type : Generic / Open Elective

Course Objectives:

to give exposure to tools and techniques applicable for planning, controlling & monitoring of Smart Infrastructure and Cities. This subject would also enable to develop insight for managing project risks, uncertainties and complexities of smart cities project.

Learning Outcomes:

Students will get an understanding of road map for Planning Smart Cities and benchmarking their performance for Indian context

Unit 1:

6 hrs

Introduction to Smart Cities, •Introduction to "City Planning", Understanding Smart Cities

Unit 2 :

12 hrs

Dimensions of Smart Cities, Global Experience of Smart Cities, Smart Cities –Global Standards and Performance, Benchmarks, Practice Codes, India "100 Smart Cities" Policy and Mission

Unit 3 :

12 hrs

- Smart City Planning and Development
- Financing Smart Cities Development
- Governance of Smart Cities, Case Studies on Smart Cities

Reference :

Sectoral Analysis

Credits : 2

CCA : 50 marks

Course Type : Generic / Open Elective

Course Objectives:

- To expose the students to the different sectors of the economy
- To enable the students to understand the importance and contribution of the sectors to business, economy and global environment
- To expose the students towards rural problems To awaken sense of responsibility amongst students towards senior citizens

Learning Outcomes:

Students will get exposure to the different sectors of the economy and their contribution to the national development.

Unit 1 :

Introduction to the sectors of the economy

8 hours

Units 2:

Detailed view of the IT, Manufacturing, Agriculture, Banking Insurance, Service Sector, Retail etc

12 hours

Unit 3:

Project work on detailed analysis of any one sector – national and global scenario

10 hours

Reference Books :

BBA Programme Objectives:

1. To provide students with an in-depth knowledge of Management and Business concepts
2. To provide students with a firm foundation in both theoretical and practical concepts and applications to meet the various needs of business organizations at a global level
3. To prepare students for the responsibilities and career opportunities with corporations and as entrepreneurs.

BBA CBCS 2018 SEM III

301 : Computer Applications For Business

Course Code	301	Course Type	SEC
Credits	Four.	Examination Pattern	CCA

Course Objectives:	
to introduce IT in a simple language to all undergraduate students, regardless of their specialization. to introduce the students to the world of computers and software applications.	
Learning Outcomes:	
This course will provide learners with a solid foundation on which to build a strong knowledge of computer applications for business. students will learn how to use Microsoft Office applications and explore and examine the fundamentals of computer hardware and software.	
Unit I: Introduction to Computer Fundamentals	(6 hours)
Introduction to Computer, Computer System Hardware, Computer Memory, Input and Output Devices, Interaction between User and Computer, Introduction to Free and Open Source Software, Definition of Computer Virus, Types of Viruses, Use of Antivirus software	
Unit II Basics of Operating System	(10 hours)
Definition of Operating System, Objectives, types and functions of Operating Systems, Working with Windows Operating System: Introduction to The Desktop, Structure of Windows, Windows Explorer, File and Folder Operations, The Search, The Recycle Bin, Configuring the Screen, Adding or Removing New Programs using Control Panel, Applications in windows (Paint, Notepad, WordPad, Calculator)	
Unit III: Use of Computer in Business	(12 hours)
Data Processing, Files and Records, File Organization (Sequential,	

Direct/Random, Index) Computer Applications in Business – Need and Scope
 Computer Applications in various fields of Commerce: Personnel Administration, Accounting, Cost and Budgetary Management, Purchasing, Banking, Insurance and Stock-broking, e-governance Introduction to E-Commerce, Evolution of E-Commerce, Role of e-Commerce, e-Commerce Framework, e-Commerce Categories

Unit IV: Introduction to Business Communication Tools (20 hours)

MS-Word: Introduction, Starting MS-Word, MS-Word Screen and its Components, Elementary Working with MS-Word

MS-Powerpoint: Introduction, Starting MS-PowerPoint, Basics of PowerPoint, MS-PowerPoint Screen and Its Components, Elementary Working with MSPowerPoint

Unit V: Spreadsheet tool (12 hours)

MS-Excel: Introduction, Starting MS-Excel, Basics of Spreadsheet, MS-Excel Screen and Its Components, Elementary Working with MS-Excel.

BBA- Sem -III (CBCS 2018)
302: Organizational Behavior

Course Code	302	Course Type	Core Course
Credits	Four.	Examination Pattern	UE + IA: 60:40

Course Objectives:

- To expose the students to the fundamentals of Organizational Behaviour (OB) - such as working with people, nature of organizations, communication, leadership and motivation of people.
- To help students develop a conceptual understanding of OB theories
- to enable the students to put the ideas and skills of OB into practice

Learning Outcomes:

On completion of this course, students will be able

- to understand the dynamics of individual and organizational behavior and relationships.
- To understand the importance of organizational behavior in managerial functions.

Unit 1: (12 hours)
 Introduction to Organizational Behavior : Definition, Evolution of the Concept of OB, Contributions to OB by major behavioral science disciplines, Challenge and Opportunities for OB managers, Models of OB study

Unit 2: (12 hours)
 Foundations of Individual Behavior Attitudes and Job Satisfaction, Components of Attitude, Major Job Attitude, Job Satisfaction, Personality and Values, Personality Determinants, MBTI, Big – Five Model, Values, Formation, Types of Values, Perception, Factors influencing perception.

Unit 3: Motivation and Leadership (14 hours)
 Motivation and Leadership Concept of motivation, Definition, Theories of Motivation, Maslow’s need Theory, ERG Theory, Theory X and Theory Y, Two Factor Theory, McClelland’s Theory, Equity Theory, Vroom’s Expectancy Theory. Concept of Leadership, Theories of leadership, Traits of good Leader, Difference between Leader and Manager

Unit 4: Groups and Teams (10 hours)

Foundations of Group Behaviour, Formation of Group, Group - Classification, Properties, Roles, norms, status, size and cohesiveness, Group decision making, Understanding teams, creating effective teams, Conflict Process, Conflict management communication.

Unit 5 : (10 hours)
Culture, Definition, Culture's function, need and importance of Cross Cultural management, Stress and its Management.

BBA CBCS 2018 SEM III

303 : Principles of Marketing

Course Code	303	Course Type	Core Course
Credits	Four.	Examination Pattern	UE + IA: 60:40

Learning Objectives:	
1.	To enhance students' knowledge as regards to basics of marketing.
2.	To develop practical insights into application of marketing concepts.

Learning Outcomes: After studying this course students will be able to -	
1.	Understand the need and importance of marketing in the current business scenario.
2.	Analyze the need and importance of market segmentation, targeting and positioning.
3.	Understand the steps involved in developing a marketing plan.
4.	Know the recent trends in marketing.

Unit 1 :Introduction to Marketing (12 Hours)

Marketing - Definition, Evolution, core concepts, Marketing v/s Selling, Role of a Marketing Manager in the current scenario, Marketing Environment – Internal and External Environment.

Unit 2 : Market segmentation, Targeting & Positioning (STP) (12 Hours)

Market Segmentation, meaning, its benefits, Bases for segmenting Consumer market and Industrial market, Market Targeting, Product positioning concept.

Unit 3 : Marketing Research (12 Hours)

Nature & Scope, Marketing Research Process, Questionnaire designing & methods of data collection.

Unit 4 : Marketing Mix (7 P's of Marketing) (12 Hours)

Product :Concept, Levels of Products – core benefit, basic product, expected product, augmented product and potential product, Product Life Cycle - concept, stages and its influence on marketing mix decisions.

Price :Meaning, Pricing objectives, Pricing Strategies - Skimming pricing, Penetration pricing and psychological pricing.

Place : Need and importance of distribution, Factors influencing selection of distribution channel, Channels of Distribution – Manufacturer, wholesaler, retailer, carrying and forwarding agents, e-tailer, Channel Conflict – Concept, types of channel conflict.

Promotion : Promotion Mix – Elements : Advertising, Sales Promotion, Personal Selling, Publicity, Public Relations, Direct Marketing etc.
Brief overview of people, process and physical evidence.

Unit 5 :Recent Trends in Marketing

(12 Hours)

Digital Marketing – Meaning, Importance, Green Marketing - Meaning, Importance, Use of Information Technology in marketing practices – Virtual marketing, E-buying behavior etc

Program Objectives :

The Bachelor of Business Administration (BBA) degree program has the following objective:

- To provide students with an in-depth knowledge of Management and Business concepts
- To provide students with a firm foundation in both theoretical and practical concepts and applications to meet the various needs of business organizations at a global level
- To prepare students for the responsibilities and career opportunities with corporations and as entrepreneurs.

BBA- Sem -V (CBCS 2018)
501: Summer Internship – Report & Viva

Course Code	501	Course Type	SEC
Credits	Six	Examination Pattern	UE + IA: 60:40

Course Objectives:

1. Assist the student's development of employer-valued skills such as teamwork, communications and attention to detail.
2. Expose the student to the environment and expectations of performance in private/public companies or government entities.
3. Enhance and/or expand the student's knowledge of a particular area(s).
4. Expose the student to professional role models or mentors who will provide the student with support in the early stages of the internship and provide an example of the behaviors expected in the intern's workplace.

Learning Outcomes:

The internship helps in connecting organizations with student. This access results in opportunities to consult with real-world companies on real-world challenges, building relationships that can result in lasting connections with successful organizations that students continue to benefit from after graduation.

Details:

At the end of Semester IV a student shall be required to prepare a project in any one of the functional areas of business i.e.

- Marketing Management
- Human Resource Management
- Financial Management.
- International Business Management
- Banking and Insurance Management
- Hospitality Management
- Financial Market

The Summer Training should be conducted in an organization under the guidance of a faculty member . The duration will be for 50 days. The report is to be prepared and submitted to the institute during the semester V.

Reference Books : Follow the Monograph and conduct in coordination with Corporate Resource Center of the Institute

BBA- Sem -V (CBCS 2018)**502: MANAGEMENT OF SERVICES**

Course Code	502	Course Type	Core Course
Credits	Four.	Examination Pattern	UE + IA: 60:40

Learning objectives:

- To provide in-depth insight in managing and delivering of quality services
- To create awareness about the services sector, the challenges and opportunities therein.
- To understand the need and importance of people , process and physical evidence in services marketing mix.

Learning outcomes

After studying this course students would be able to

- Understand the challenges and opportunities involved in services sector.
- Understand the aspects of developing new services, promoting the services and making it available in a convenient manner.

Unit 1: Introduction to Services and Service sector

Meaning of Services, Differences between goods and services, Characteristics of Services , Classification of Services, Growth of Service Sector in India, Factors responsible for growth of service sector in India.

Unit 2: Marketing of Services :

7Ps in Service Marketing –

Service Product – service life cycle,

Pricing the Service- factors involved in pricing the services,

Service Location (Place) and Channels of Services,

Promotion and Communication of Services – promotion mix,

People in Services – role of service employees, training of service employees,

Process in Services – service as a process,

Physical Evidence in Services.

Unit 3: Quality of Services:

Meaning of service quality, Importance of service quality, quality issues in services. Role of information technology in improving service quality.

Unit 4: Management Demand and Supply of Services

Patterns and determinants of demand, strategies for managing demand, service capacity management.

Unit 5: Introduction To Management Of Different Service Sectors

Banking Services: - Concept – Scope and Importance, Human Resource Management in banking services,

Hotel Services: - Concept, Scope and Importance, Profile of Services, H. R.M and Customer Care, Management of Hotel Services in India.

Management of Insurance Services : Concept, Scope and Importance

Management of Transport Services : Concept, Scope and Importance, – Passenger transport and Goods transport – Road, Rail and Water Transport. Challenges faced.

NPTEL

BBA- Sem -V (CBCS 2018)**505: INTRODUCTION TO OPERATIONS RESEARCH**

Course Code	505	Course Type	Core Course
Credits	Four.	Examination Pattern	UE + IA: 60:40

Course Objective

The objective of the course is to familiarize the students with the tools & techniques of Operation Research.

Learning Outcome

Students will be able to understand the practical importance and applications of various operations research techniques.

UNIT 1

Definition of Operations Research (OR), Origin and Development of OR, Scope of Operation Research, Advantages and Limitations of OR.

UNIT 2

Linear Programming Problem-LPP, Formulation of LP Problem, Graphical solution – Procedure of solving LPP by Graphical method. Applications and limitations of LPP

UNIT 3

Transportation Problem, meaning, definition and applications, Applications of Transportation Problem, Types of Transportation problems. Initial Basic Feasible Solution – North West Corner Rule, Least Cost or Matrix Minima Method, Vogel's Approximation method. Checking for optimality, Finding optimal solution by MODI method.

UNIT 4

Assignment Problem- meaning, definition and applications, Types – unbalanced and maximization, assignment problem. Hungarian method for solving assignment problem.

UNIT 5

Network Analysis - importance of network analysis, construction of networks. Critical Path Method (CPM) - calculation of earliest and latest times, types and computation of floats. Program Evaluation and Review Technique (PERT) - 3 time estimates, expected duration.

BBA- Sem -V (CBCS 2018)**FMK-504: ELECTIVE –II : FINANCIAL MARKETS****CAPITAL MARKET OPERATIONS**

Course Code	FMK-504	Course Type	Discipline Specific Elective (DSE II)
Credits	Four.	Examination Pattern	UE + IA: 60:40

- **Learning objectives:**
- To help the students in understanding the capital market trading, clearing, settlement
To introduce the eligibility criteria for membership of NSE, important regulatory aspects and valuation concepts

Learning outcomes : After studying this course student are able to

- Capital Market Trading, Clearing and Settlement
- regulatory aspects and valuation concepts.

Unit – I: Introduction.**(9 hours)****Unit I: Indian Securities Market – An Overview:****(12 Hrs.)**

- Introduction, Capital Market Intermediaries,
- Industrial Securities market- Government securities Market- Long Term Loan Market Primary market, Secondary market, products
- Participants of Derivatives market

Unit II: Trading Operations:**(12 Hrs.)**

- Introduction, NEAT system, Market types,
- Order Management, trade management, auction, Trade Mechanism
- Introduction to Debt Market, Wholesale Debt Market

Unit III: Clearing and Settlements:**(12 Hrs.)**

- Introduction, Transaction cycle, Settlement process, Settlement agencies, Risks in settlement, Securities settlement, Funds Settlement Shortages handling, Risk containment measures,
- International securities, Identification number, Demat and Electronic transfer of securities, In protection fund

Unit IV: Legal & Regulatory Framework:**(14 Hrs.)**

- Introduction to various Acts governing securities Market –Important provisions of SEBI (Stock Brokers & Sub – Brokers) Regulations, 1992, SEBI (Prohibition of Insider Trading) Regulations, 1992, SEBI (Prohibition of Fraudulent and Unfair Trade Practices Relating to Securities markets) Regulations, 2003.

- The Depositories Act, 1996, Money Laundering Act, 2002.

Unit V: Fundamental and Technical Analysis: (10 Hrs.)

- Fundamental and Technical Analysis, Types of Charts and Technical Indicators
Market Simulation Lab.Market simulation lab sessions on internet based software to develop Keyboarding skills for cash market.

Note : Students are expected to keep themselves updated with latest developments in the subject from financial dailies like The Economic Times, Financial Express etc., watch business channels e.g. CNBC, NDTV Profit, ET Now etc. and get updates from webs SEBI, NSE etc.

**BHARATI VIDYAPEETH
DEEMED TO BE UNIVERSITY**

PUNE, INDIA

FACULTY OF MANAGEMENT STUDIES

Board of Studies in Computer Applications

Bachelor of Computer Applications Programme

(Under Choice Based Credit System)

To be effective from 2018-19

BHARATI VIDYAPEETH (DEEMED TO BE UNIVERSITY), PUNE
FACULTY OF MANAGEMENT STUDIES
Board of Studies in Computer Applications and Systems Studies
Bachelor of Computer applications Programme
(Under Choice Based Credit System)
To be effective from 2018-19 at Part I

1. INTRODUCTION:

The BCA Programme is a full time 150 Credits program offered by Bharati Vidyapeeth (Deemed to be University), Pune and conducted at its management institutes in Delhi, Karad, Kolhapur, Pune, Sangli, and Solapur. All the six institutes have excellent faculty, Laboratories, Library, and other facilities to provide proper learning environment. The University is reaccredited by NAAC with an 'A+' grade. The expectations and requirements of the Software Industry, immediately and in the near future, are visualized while designing the BCA programme. This effort is reflected in the Vision and Mission statements of the BCA programme. Of course, the statements also embody the spirit of the vision of Late Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth University which is to usher in “Social Transformation through Dynamic Education.”

2. VISION STATEMENT OF BCA PROGRAMME:

To create high caliber solution architects and innovators for software development.

3. MISSION STATEMENT OF BCA PROGRAMME:

To teach 'things, not just words', 'how to think', and 'how to self-learn'.

4. OBJECTIVES OF BCA PROGRAMME:

The main objectives of BCA Programme are to prepare the youth to take up positions as system analysts, system engineers, software engineers and programmers. Accordingly the course curriculum aims at developing 'systems thinking' 'abstract thinking', 'skills to analyze and synthesize', and 'skills to apply knowledge', through 'extensive problem solving sessions', 'hands on practice under various hardware/software environments' and 'three projects'. In addition, 'social interaction skills', 'communication skills', 'life skills', 'entrepreneurial skills', and 'research skills' which are necessary for career growth and for leading quality life are also imparted.

5. LEARNING OUTCOMES FROM THE BCA PROGRAMME:

At the end of the course the student should be able to:

- (a) Analyze problems and design effective and efficient software solutions.
- (b) Develop software under latest Application Development Environments.

- (c) Learn new technologies with ease and be productive at all times.
- (d) Read, write, and contribute to technical literature.
- (e) Work in teams.
- (f) Be a good citizen in all respects.

6. ELIGIBILITY FOR ADMISSION TO THIS PROGRAMME:

Admission to the course is open to any candidate who has passed (10+2) or equivalent examination of any recognized board.

Subject to the above condition, the final admission is based solely on the merit at the All India entrance test (BU-MAT) conducted by Bharati Vidyapeeth (Deemed to be University, Pune).

7 DURATION OF THE PROGRAMME:

The duration of this course is three years divided in to six semesters or a minimum of 150 credits whichever is later. The medium of instruction and examination will be only English.

8 SCHEME OF EXAMINATION:

For some courses there is Internal Assessment (IA) conducted by the respective institutes as well as a University Examination (UE) at the End-of-the Term. UE will be conducted out of 60 marks and IA will be conducted for 40 marks then these are converted to grade points and grades as per the Table I. For courses having only Continuous Assessment (CA) the respective institutes will evaluate the students in varieties of ways, three or four times, during the term for a total of 100 marks. Then the marks will be converted to grade points and grades using the Table I.

9 STANDARD OF PASSING:

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA. A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the Head of Passing to secure the GPA required for passing.

The 10 point Grades and Grade Points according to the following table:

Range of Marks (%)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} < 80$	A+	9
$60 \leq \text{Marks} < 70$	A	8
$55 \leq \text{Marks} < 60$	B+	7
$50 \leq \text{Marks} < 55$	B	6
$40 \leq \text{Marks} < 50$	C	5
Marks < 40	D	0

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively. GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

10 Award of Honours:

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} < 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} < 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} < 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} < 55$

$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} < 50$
CGPA below 5.0	F	Fail	Marks below 40

RULES OF ATKT:

1. A student is allowed to carry backlog of any number of subjects upto Semester IV.
2. A student must pass Part I (Semester I and II) to appear for Semester V.

SEMESTER-WISE COURSE STRUCTURE FOR BCA

(To be effective from July 2018)

SEMESTER I

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
101	Fundamentals of Information Technology	4	3	1	-	40	60
102	Algorithm and program Design	4	3	1	-	40	60
103	C Programming – I	4	3	1	-	40	60
104	Business organization system	4	3	1	-	40	60
105	Business Mathematics	4	3	1	-	40	60
106	Lab on MS-Office Suite	2	-	-	4	40	60
107	Lab on C Programming – I	2	-	-	4	40	60
108	General course-I: Community Work I / Career & Life Skills / Waste Management	1	2	-	-	50	0
Total		25	17	5	8	330	420

SEMESTER II

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
201	Computer Organization and Architecture	4	3	1	-	40	60
202	DBMS I	4	3	1	-	40	60
203	C Programming - II	4	3	1	-	40	60
204	Financial Accounting	4	3	1	-	40	60
205	Principles of Management	4	3	1	-	40	60
206	Lab on C Programming - II	2	-	-	4	40	60
207	Environmental Studies	2	2	-	-	40	60
208	General Course II : Community Work II (Swacchh Bharat Abhiyan) / Sectoral Analysis / Smart Cities	1	2	-	-	50	0
Total		25	19	5	4	330	420

SEMESTER III

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
301	Operating Systems	4	3	1		40	60
302	Software Engineering	4	3	1		40	60
303	DBMS II	4	3	1		40	60
304	Statistics	4	3	1		40	60
305	Multimedia Technology	4	3	1		40	60
306	Lab on Oracle and Multimedia	2	-	-	4	40	60
307	Lab on Linux Operating System	2	-	-	4	40	60
308	General Course III : Community Work III / Start up management / Agro Tourism	1	2	-	-	50	0
Total		25	17	5	8	330	420

SEMESTER IV

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
401	Computer Networks	4	3	1	-	40	60
402	Software Testing	4	3	1	-	40	60
403	Java Programming	4	3	1	-	40	60
404	Operations Research	4	3	1	-	40	60
405	Entrepreneurship Development	4	3	1	-	40	60
406	Lab on Java	2	-	-	4	40	60
407	Minor Project - I	2	2	-	-	0	100
408	General Course IV: Community work IV / Basics of Taxation / Meditation & Yoga	1	2	-	-	50	0
Total		25	19	5	4	290	460

SEMESTER V

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
501	Introduction to the Internet Technologies	4	3	1	-	40	60
502	Object Oriented Analysis and Design	4	3	1	-	40	60
503	C# Programming	4	3	1	-	40	60
504	Graph Theory	4	3	1	-	40	60
505	Elective I	4	3	1	-	40	60
506	Lab on Internet Technology and C# Programming	2	-	-	4	40	60
507	Minor Project II	2	2	-	-	0	100
508	General Course V: Social Media Management / Road Safety and Management / Event Management	1	2	-	-	50	0
Total		25	19	5	4	290	460

SEMESTER VI

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
601	Data warehousing and Data Mining	4	3	1		40	60
602	Web Programming	4	3	1		40	60
603	Software project Management	4	3	1		40	60
604	Business Analytics	4	3	1		40	60
605	Elective II	4	3	1		40	60
606	Lab on Web programming	2	-	-	4	40	60
607	Major Project	2	2	-	-	0	100
608	General Course VI: Business Ethics / Basics of Hospitality Management / Aptitude	1	2	-	-	50	0
Total		25	19	5	4	290	460

Electives:

Elective No.	Elective Group	Course No	Course Name
01	Information Security	505-1-A	Information Security Concepts
		605-1-B	Information Security Administration
02	Big Data	505-2-A	Introduction to Big Data
		605-2-B	HADOOP
03	Information Systems	505-3-A	E-Commerce
		605-3-B	Knowledge Management

Practical Examinations:

For courses Nos. 106,107, 206, 306, 307,406, 506 and 606 there will be practical examination.

SEMESTER I

Course Number	Course Name	L-T-P- Credits	Year of Introduction
101	Fundamentals of Information Technology	3+1+0 = 4C	2018-19
<p>Course Objective: The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization. It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry. The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive medias, Internet basics</p>			
<p>Expected Outcome : At the end of this course, student should be able to (a) Understand basic concepts and terminology of information technology. (b) Have a basic understanding of personal computers and their operations. (c) Be able to identify issues related to information security.</p>			
<p>References (Books, Websites etc) : How to solve computer – Dromey Computer Fundamentals by P. K. Sinha,</p>			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
Course Plan			
Unit	Contents		
1	<p>Introduction to Computers: Definition, .Basics of Computer, Characteristics of computers, Evolution of Computer, Block Diagram Of a computer, Generations of Computer, Classification Of Computers, Applications of Computer, Capabilities and limitations of computer.</p>		
2	<p>Computer Arithmetic: Binary, Binary Arithmetic, Number System: Positional & Non Positional, Binary, Octal, Decimal, Hexadecimal, Converting from one number system to another , 1's Complements, 2's Complements, Computer Codes, Rules and laws of Boolean algebra, Basic Gates (NOT, AND & OR)</p>		
3	<p>Input Output Devices: Role of I/O devices in a computer system. Input Units: Keyboard, Terminals and its types. Pointing Devices, Scanners and its types, Voice Recognition Systems, Vision Input System, Touch Screen, Output Units: Monitors and its types. Printers: Impact Printers and its types. Non Impact Printers and its types, Plotters, types of plotters, Sound cards, Speakers.</p>		

4	<p>Storage Fundamentals: Primary Vs Secondary Storage, Data storage & retrieval methods. Primary Storage: RAM ROM, PROM, EPROM, EEPROM. Secondary Storage: Magnetic Disks. Flash Drives, DVD, Blue-Ray disc.</p>
5	<p>Software: Software and its needs, Types of S/W. System Software: Operating System, Utility Programs Programming Language: Machine Language, Assembly Language, High Level Language their advantages & disadvantages. Application S/W and its types: Word Processing, Spread Sheets Presentation, Graphics, DBMS s/w, Algorithms and Flow Charts.</p>
6	<p>Data Communication: Communication Process, Data Transmission speed, Communication Types (modes), Data Transmission Medias, Modem and its working, characteristics, Types of Networks, LAN Topologies, Computer Protocols, Concepts relating to networking. Internet – Web Browsers, Web servers, Internet Protocol, Hyper text Transfer Protocol, Business Data Processing: Introduction, data storage hierarchy, Method of organizing data, File Types, File Organization, File Utilities.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
102	Algorithm and Program Design	3+1+0 = 4C	2018-19
<p>Course Objective: To understand good principles of algorithm design, elementary analysis of algorithms, and fundamental data structures. The emphasis is on choosing appropriate data structures and designing correct and efficient algorithms to operate on these data structures.</p>			
<p>Expected Outcome:</p> <p>This is a first course in data structures and algorithm design. Students will:</p> <ul style="list-style-type: none"> • learn good principles of algorithm design; • learn how to analyze algorithms and estimate their worst-case and average-case behaviour (in easy cases); • become familiar with fundamental data structures and with the manner in which these data structures can best be implemented; become accustomed to the description of algorithms in both functional and procedural styles; 			
<p>References (Books, Websites etc) :</p> <ol style="list-style-type: none"> 1. Dromey R. G. : How to Solve it by a Computer. 2. Sartaj Sahni: Data Structure, Algorithms and Applications in C++ (Ch II). 			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
Course Plan			
Unit	Contents		
1	<p>Introduction: Concept, of Problem, Procedure and Algorithm, Algorithm Representation through Pseudo - Code and Flow - Charts, Tracing of Algorithms Such as Swapping, Counting, Finding the Sum, Product, maximum, minimum, of a list of numbers.</p>		
2	<p>Concept of Structured Programming and Procedure Oriented Programming: Introduction, Concept, Basic Control Structure, Benefits of Structured Programming and Procedure Oriented Programming</p>		
3	<p>Design of Algorithm: Design of algorithm for problem such as Evaluation of polynomial, Sum of first n factorials, Finding nth term of Fibonacci sequence, Finding largest and second largest of list, Determining nth root of a number, compute, GCD and Base Conversion</p>		
4	<p>Problem Analysis and Design 1: Problem Analysis and Design of Algorithms for problems such as (1) Swapping (2) Counting (3) Finding the Sum, Product, maximum, minimum of a finite list of numbers, and (4) Simple variations of the above problem realization that, there may be alternative algorithm and that one algorithm may be better (in some sense) than the other.</p>		

5	Problem Analysis and Design2: Problem Analysis Design of Algorithms for problems such as (1) Evaluation of a polynomial (2) Sum of first n factorials (3) Finding the nth term of a Fibonacci sequence, (4) Finding the largest and second largest of a finite list, (5) Evaluating in finite series and variations of these problems, (6) Determining nth root of a number.
6	Concept of Array, Sort and Search Technique: Introduction of Array, Array manipulation such as removing the duplicates, Partitioning of an array, listing of prime numbers, finding prime factor of a number, The problem of search and Merge, Linear, Binary search algorithms, The Problem of Sorting, Selection, Insertion and Bubble

Course Number	Course Name	L-T-P- Credits	Year of Introduction
103	C Programming - I	3+1+0 = 4C	2018-19
Course Objective:			
This is a first course in programming. The objective of this paper is to teach the Programming Language C. However, the process of learning a computer language will also be emphasized. Emphasis is also on semantics and problem solving.			
Expected Outcome:			
At the end of the course a student should be able:			
<ul style="list-style-type: none"> • To solve a given problem using programming/algorithm • Understand and use C libraries, • Trace the given C program manually • Effectively use of Arrays and functions • Write C program for simple applications of real life using structures and Unions. 			
References (Books, Websites etc) :

Computer fundamentals and programming in C – Pradip Dey & Manas Ghosh, OXFORD 			
Suggested MOOC :			
Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction to C language Origins of C, Character Set of C, C Tokens, Keywords and Identifiers, Constants, Variables, Data types, Declaration of variables, Declaration of variables as constant, Operators, Types of operators, Precedence and associativity, Expression, Type conversions in expressions, Input and Output functions - printf(), scanf(), getchar(), putchar(), Formatted input and formatted output.		
2	Decision Control and looping Introduction, Control Statements- Sequential, Selection, Iteration Statements, Branching structure- if statement, if-else statement, Nested if-else statement, else if Ladder, Conditional operator, switch statement, Loop control structures- while loop, do-while loop, for loop, Nested for loop, Jump statements-break, continue, goto		
3	Functions Introduction, Purpose of function, Function declaration/ Function prototype, Function definition, Function call, return statement, Function parameters, Types of functions, Call		

	by value , Storage classes, Recursion, Examples on recursive function
4	<p>Arrays and Strings</p> <p>Introduction to one-dimensional Array, Definition, Declaration, Initialization, Accessing and displaying array elements, Arrays and functions, Introduction to two-dimensional Array, Definition, Declaration, Initialization, Accessing and displaying array elements, Introductions to Strings, Definition, Declaration, Initialization, Input, output statements for strings, Standard library functions, Implementations with standard library functions</p>
5	<p>Structures and union</p> <p>Introduction to structure, Defining a structure, Declaring structure variables, Accessing structure members, nested structure, Array of structure, Array within structure, Introduction to union, Definition, Declaration, Differentiate between structure and union</p>
6	<p>Pointers</p> <p>Introduction to pointer, Definition, Declaring and Initializing pointer variable, Indirection operator and address of operator, Accessing variable through its pointer, Pointer arithmetic, Dynamic memory allocation, Pointers & Functions, Pointers & Array, Pointers & Structures</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
104	Business Organization System	3-1-0 = 4C	2018-19
<p>Course Objective: To acquaint students with fundamentals of Business Organization and management systems as a body of knowledge.</p>			
<p>Expected Outcome : 1. Students shall know about business and structure 2. Students shall know about various forms of business 3. Students will have sound knowledge about overall business environment.</p>			
<p>References (Books, Websites etc) :</p> <p>Reference Books: S.A. Sherlekar ,Modern Business Organization and Management – (Himalaya Publishing House) Y.K. Bhushan ,Fundamental of Business Organization & Management – (S Chand Publishers) Basu, C. R.; <i>Business Organization and Management</i>, Tata McGraw Hill, Publishing House, New Delhi, 1998 B S Moshal, J P Mahajan, J S Gujral, Business Organization and Management –. Galgotia Publishing Co, New Delhi Redmond James, Robert Trager , Media Organization and Management –, Biztantra, New Delhi</p>			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
<p>Laboratory Experiments:</p>			
1	<p>Nature of Business Concept of Business – Meaning, Definition, Nature and Scope, Characteristics of Business. Business as an Economic Activity. Objectives of Business. Structure of Business (Classification of Business Activities. Requisites for Success in Modern Business.</p>		
2	<p>Evolution of Business Beginning and development of Commerce, Evolution of Industry, Industrial Revolution, Beginning and growth of Indian Business, Industrialization in India.</p>		
3	<p>Forms of Business Ownership Introduction to various forms – Factors affecting choices of an deal form of ownership, features Merits and Demerits of Sole Proprietorship – Joint Hindu Family Business – Partnership – Joint Stock Company – Co-operative Organisation, Public Enterprises.</p>		
4	<p>Formation of a Company Stages in formation and incorporation of a company (e Promotion – incorporation and registration – Capital Subscription – Commencement of Business. - Documents of a Company i.e. Memorandum of Association – Articles of Association – Prospectus.</p>		

5	<p>Establishment of Business Enterprise Various factors to be considered while starting a new Business enterprise i.e. identification of Business Opportunity – Market Assessment – Suppliers – Technology – Location – Human Resource – Finance etc. Small and Medium Enterprises – Meaning Characteristics and objectives. Role of Support Organisation such as Trade Associations and Chambers of Commerce.</p>
6	<p>Organization of Trade Channels of Distribution – Meaning, Functions and types. Internal Trade – Wholesale and Retail External Trade – Import and Export. Role and importance of support services to Business such as Transport Insurance etc. Business Combinations – Mergers and Acquisitions. Franchising. Business Process Outsourcing. Multinationals – Concept and role of MNCs</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
105	Business Mathematics	3+1+0 =4C	2018-19
Course Objective:			
To give general idea about mathematics and its application in Business			
Expected Outcome:			
The students will be able to solve small business problems by using the concepts of Business Mathematics			
References (Books, Websites etc) :			
Discrete Mathematics & its Applications by Kenneth Rosen			
Suggested MOOC :			
Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Set Theory : Definition of a set, Representation of elements of sets, Methods of representing sets , types of sets, operations on sets , cardinality of a set, Principle of Inclusion and Exclusion , Venn Diagram , Proof by using Venn diagram		
2	Functions and Relations : Definition of Function, Types of Functions ,Composite Function, Relation definition, representation of relations		
3	Logic: Propositions, Logic Operations-Negation, Disjunction, Conjunction, Conditional and Biconditional, Truth Tables of compound propositions, Translating English sentences in to logical statements and vice versa, Logic gates and circuits		
4	Matrices: Matrix Definition, General Form, Representation of matrix in computers, Types of matrices, Operations on matrices: Addition, Subtraction and Multiplication, transpose , row / column transformations , Inverse of the matrix by Co-factor and Adjoint method, solutions to three variable problems by using matrices, application problems of matrices		
5	Permutations and Combinations: Concept- Permutation, Combination, Sum and Product rules, problems on Permutation and combination (with wording atleast, atmost, neither nor, any one etc.)		
6	Probability: Concept and problem solving, general probability, conditional probability, partitions, Bayes Theorm		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
106	Lab on MS-Office Suite	2-0-4 = 4C	2018-19
<p>Course Objective: The objective of this course is to help the student gain proficiency in text editing and formatting, spreadsheet and database management, and presentation preparation. An additional objective of the course is for the student to gain basic knowledge of modern-day computing technology.</p>			
<p>Expected Outcome : Upon completion of this course students will be able to:</p> <ul style="list-style-type: none"> • Demonstrate an advanced knowledge of the Word Processing package, MS Office and a knowledge of how to design & create effective and structured documents like technical reports, letters, brochures, etc., • Demonstrate the skills in the appropriate use of various features of the spread sheet package MS Excel and also to create useful spreadsheet applications like tabulated statements, balance sheets, statistical charts, business statements, etc. • Demonstrate the skills in making an effective presentation with audio and video effects using the MS Excel package • Draw graphical pictures, flow charts, block diagrams etc., using the drawing tools available in MS Word or MS Power Point and incorporate them into documents and presentations. 			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
Course Plan			
Unit	Information Technology Essentials, Windows and Internet Explorer:		
1	Verify the components of a typical computer system, Explore, maintain files, and customize the Windows operating system, Review using the Internet Explorer.		
2	<p>MS Word: Introduction: Introduction to MS Word, Menus, Shortcuts, Document types Working with Documents:</p> <ol style="list-style-type: none"> a) Opening Files – New & Existing, Saving Files b) Formatting page and Setting Margins c) Converting files to different formats : Importing, Exporting , Sending files to others d) Editing text documents : Inserting , Deleting ,Cut, Copy, paste , Undo, Redo , Find, Search, Replace e) Using Toolbars, Ruler, Icons and help <p>Formatting Documents:</p> <ol style="list-style-type: none"> a) Setting Font Styles: Font selection – style, size, color etc., Type face – Bold Italic, underline, Case settings, Highlighting, Special symbols b) Setting Paragraph style: Alignments, Indents, Line space, Margins and Bullets 		

	<p>and Numbering</p> <p>c) Setting Page Style: Formatting, Border & Shading, Columns, Header & footer, Setting Footnotes, Inserting manual Page break, Column break and line break, Creating sections and frames, Inserting Clip arts, inserting pictures and other files, Anchoring & Wrapping</p> <p>d) Setting Document Styles: Table of Contents, Index, Page Numbering, data & Time, Author etc., Creating Master Documents</p> <p>Creating Tables: Table settings, Borders, Alignments, Insertion, deletion, Merging, Splitting, Sorting, Formula</p> <p>Drawing: Inserting Pictures/Files etc., Drawing Pictures, Formatting & Editing pictures, Grouping and ordering, Rotating</p> <p>Tools: Word Completion, Spell Checks, Macros, Mail merge, Templates, Using Wizards, Tracking, Changes, Security</p>
3	<p>MS Power Point:</p> <p>Introduction: Opening new Presentation, Different presentation templates, Setting backgrounds, Selecting presentation layouts</p> <p>Creating a presentation: Setting presentation style, Adding Text to the presentation</p> <p>Formatting a presentation: Adding style, Color, gradient fills, Arranging objects, Adding Header & Footer, Slide background, Slide layout</p> <p>Adding Graphics to the presentation: Inserting pictures, movies, tables, etc into the presentation, Drawing Pictures using Draw</p> <p>Adding effects to the presentation: Setting Animation & transition effect, Adding audio and video</p> <p>Printing Handouts and Generating standalone presentation viewer</p>
4	<p>MS Excel:</p> <p>Introduction: Spreadsheet & its Applications, Opening spreadsheet, Menus & Toolbars & icons, Shortcuts, Using help</p> <p>Working with Spreadsheets: Opening a File, Saving Files, Setting Margins, Converting files to different formats: Importing, Exporting and Sending files to others</p> <p>Spreadsheet addressing: Rows, Columns & Cells, Referring cells and Selecting cells</p> <p>Entering and Editing Data:</p>

	<p>Entering Data, Cut, Copy, paste, Undo, Redo, Find, Search & Replace, Filling continuous rows, columns, Inserting -Data, cells, column, rows & sheets, Manual breaks</p> <p>Computing data : Setting Formula, Finding total in a column or row, Mathematical Operations(Addition, Subtraction, Multiplication, Division, Exponentiation), Using other Formula</p> <p>Formatting Spreadsheets: Formatting – Cell, row, column & Sheet: Alignment, Font, Border & shading, highlighting values Hiding/Locking Cells</p> <p>Worksheet : Sheet Name , Row & Column Headers, Row Height, Column Width, Visibility – Row, Column, Sheet , worksheet Security</p> <p>Formatting – worksheet: Sheet Formatting & style - background, color, Borders & shading, Anchoring objects, Formatting layout for Graphics, Clipart etc.,</p> <p>Working with sheets : Sorting, Filtering, Validation, Consolidation, Subtotal , Creating Charts, Selecting charts, Formatting charts, label, scaling etc.,</p> <p>Using Tools: Error Checking, Spell Checks, Macros, Formula Auditing, Creating & using Templates, Tracking changes, customization, printing worksheet</p>
5	<p>Working with Excel Functions: Concept of Functions, Commonly used functions: Sum, Max,Min, Average, Count, Today, Now, Datedif, Countif, CountA, CountBlank, Round, RoundUp, RoundDown, ABS, Sign, Ceiling, Floor, Trim, Value, Clean, sqrt, if, sumif</p>
6	<p>MS Access: What is an Access Database, Opening a Database File, Create Table, Create and modify fields of tables, Construct simple queries, Saving and Running Queries</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
107	Lab on C Programming I	0-0-4- = 2 C	2018
Course Objective :			
This is companion course of C Programming I			
Syllabus Broad Units:			
This Companion course of C programming; Practical aspects of C programming towards problem solving is covered.			
Expected Outcome :			
The students will develop adequate programming skills with respect to following			
<ol style="list-style-type: none"> 1. Implement a real world problem using basic constructs of C language. 2. Develop an application using Decision making and looping 3. Make use of proper operators to solve problem. 4. Make use of Arrays and pointers efficiently and handling strings. 5. Comprehend the dynamic memory allocation and pointers in C. 6. Able to define new data types using enum, structures and typedef. 			
References (Books, Websites etc) :			
<ol style="list-style-type: none"> 1. Let us C - Y.Kanetkar, BPB Publications 2. Programming in C - Gottfried B.S., TMH 3. The 'C' programming language - B.W.Kernighan, D.M.Ritchie, PHI 4. Programming in ANSI C - Balaguruswami, TMH 5. C- The Complete Reference - H.Sohildt, TMH 6. A Structured Programming Approach using C – B.A. Forouzan & R.F. Gillberg, THOMSON Indian Edition 7. Computer fundamentals and programming in C – Pradip Dey & Manas Ghosh, OXFORD 			

Outline of Lab on C programming – I

Sr. No	Programming Exercises
1	Compilation and Executing programs Arithmetic operations Use of Symbolic constants Demonstrating the following gcc options -o, -c, -D, -l, -I, -g, -E Programs to demonstrate use of operators and Input/ output <i>gcc or an equivalent compiler is assumed.</i>
2	Program to demonstrate the following – Branching

	<ul style="list-style-type: none"> - Nested Branching - Looping - Selection
3	<p>Working with functions</p> <ul style="list-style-type: none"> - Writing function prototype and definition - Using functions to solve problems (Calling a function) - Using recursion - Storage classes - Using register, extern and static
4	<p>Arrays and Strings</p> <p>1D - Linear Search, Sort</p> <p>2D - Matrix operations</p> <p>Strings: program to do operations on string using library and user defined functions</p> <p>Finding length of string, String concatenation, removing extra spaces, get substring, check whether second string is part of another, converting string to lowercase, uppercase etc.</p>
5	<p>Structures</p> <p>Making use of structures to define new types(user defined types)</p> <p>Arrays of structure, display all elements of array and sorting of them.</p>
6	<p>Pointers,</p> <p>Programs to demonstrate working of pointer; need of pointer</p> <p>Pointer as parameter to function</p> <p>Comparison of pointer with arrays and using pointer to refer an array</p> <p>Creating pointer dynamically by using dynamic memory allocation</p> <p>Array of Pointers, Ragged Arrays, Function pointer</p>

Course Number	Course Name	L-T-P-Credits	Year of Introduction
108	Community Work	2-0-0 =1 C	2018-19
Course Objective:			
This course aims to expose the students to social issues and help them Participate in community service through trips/events organized at institute, state level etc and also to Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc			
(I) To expose the students towards social reality and role of community development for social upliftment and well being			
(II) To involve students in community work through active involvement and participation			
Expected Outcome:			
Students will be able to know the community needs and understand their role ito contribute meaningfully towards community development			
Course Plan			
Unit	Contents		
1	History, meaning, Goals, values, functions, role and process of community work. Professional and voluntary community work. Attitudes, roles and skills of a community worker .		
2	Social concerns in India: poverty, unemployment, population, problems faced by women – dowry, domestic violence, etc. Social problems - terrorism, corruption, caste conflict, drug abuse, AIDS, ETC.		
3	Types of community work. Caring for needy, helping the poor, fundraising drives-organizing.		
	COMMUNITY HOURS:		
	Participate in community service trips/events organized at institute, state level etc , Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc , Submit a report on a particular type of community involvement undertaken.		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
108	Career & Life Skills	2-0-0 =1 C	2018-19
<p>Course Objective:</p> <ol style="list-style-type: none"> To help students make well-informed, thoughtful decisions regarding your future as adults. To develop behaviours and attitudes that help students contribute to the community in a positive manner. Give you skills and knowledge to contribute to the well-being and respect of the self and others 			
<p>Expected Outcome: Students will be able to understand self potential and ways to enhance capabilities.</p>			
<p>References (Books, Websites etc) : <i>LifeChoices Series: - LifeChoices: Careers, Healthy & Well, Relationships, Venturing Out</i></p>			
<p>Online Resources:</p> <ol style="list-style-type: none"> the life-changing magic of tidying up: the japanese art of decluttering and organizing - marie kondo how to organize (just about) everything: more than 500 step-by-step instructions for everything from organizing your closets to planning a wedding to creating a flawless filing system – peter walsh <p>Mindset: the new psychology of success -carol s. Dweck</p>			
Course Plan			
Unit	Contents		
1	<p>Unit 1: Introduction to Life Management Life management-definition, scope and application, concept of emotions, self belief, setting realistic goals, understanding system</p>		
2	<p>Unit 2: Developing Emotional Potential and Physical Potential Improving thinking skills, improving study skills, planning education Eating habits, healthy foods, staying healthy, changing habits-the self change model</p>		
3	<p>Developing Your Intellectual Potent Effective communication, effective listening, effective speaking ,getting along with others, functioning in groups, how to delegate. Definition-stress, handling change and stress, managing time, managing money, formulation of career plan, bring it all together</p>		
4	<p>Career and Life Choices Managing personal, lifelong career development. Resource Choices... Making responsible decisions in the use of finances and other resources that reflect personal values and goals as well as a commitment to self and others. Personal Choices... Understand the emotional/psychological, intellectual, social, spiritual, and physical dimensions of health and how these dimensions of health work together to contribute to personal well-being.</p>		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
108	Waste Management	2-0-0 =1 C	2018-19
<p>Course Objective: To expose students to the issue of waste and waste management tools and techniques applicable for waste disposal and management.</p>			
<p>Expected Outcome: After completion of the course students</p> <ul style="list-style-type: none"> • will be able to understand solid waste sources, health and environmental issues related to solid waste management. • will get knowledge about Sources, handling and control of Biomedical, Chemical, Nuclear and e-wastes. <p>will be able to understand the issues regarding waste disposal and management and will become aware of Environment and health impacts due to solid waste mismanagement</p>			
<p>References (Books, Websites etc) :</p> <ol style="list-style-type: none"> 1. D. Bhide and B.B. Sundaresan, “Solid Waste Management – Collection, Processing and disposal” Mudrashilpa Offset Printers, Nagpur, 2001. 2. Biomedical waste (Management and Handling) Rules, 1998. 3. Course Plan			
Unit	Contents		

1	<p>Solid Waste Management- Introduction to waste Management Introduction, Meaning, Solid waste including municipal, hospital and industrial solid waste; health and environmental issues related to solid waste management. Provisions in Indian Penal Code for Environmental protection.</p>
2	<p>Biomedical, Chemical, Nuclear and e-wastes Biomedical wastes – Types – Management and handling – control of biomedical wastes, Chemical wastes – Sources –Environmental effects – Need for control – Health and environmental effects. Nuclear waste – Management of nuclear wastes, e-waste- sources and management.</p>
3	<p>Waste reduction at source Treatment and disposal techniques for solid wastes–composting, vermin-composting, autoclaving, microwaving, incineration, non- incineration, Thermal techniques, use of refuse derived fuels, land-filling. Reduce Reuse and Recycling Techniques: Need for the concept-Variou Types - Handmade Paper production –Reuse of materials-Recycle of material</p>

SEMESTER II

Semester II

Course Number	Course Name	L-T-P- Credits	Year of Introduction
201	Computer Organization and Architecture	3-1-0 = 4C	2018-19
<p>Course Objective: Main objective of this paper is to learn structure and functioning of various hardware components of digital computer. Also study the interactions and communication among these hardware components.</p>			
<p>Expected Outcome : At the end of this course, student should be able to understand</p> <ul style="list-style-type: none"> • Simple machine architecture and the reduced instruction set computers. • Memory control, direct memory access, interrupts, and memory organization • Basic data flow through the CPU (interfacing, bus control logic, and internal communications). • Number systems, instruction sets, addressing modes, and data/instruction formats. 			
<p>References (Books, Websites etc) : M Morris Mano Computer systems Architecture third edition Prentice Hall of India Publication</p>			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
Course Plan			
Unit	Contents		
1	<p>Introduction To Digital Computer: Data Representation – Data Types – Complements – Arithmetic Operations – Representations – Fixed –Point, Floating – Point , Decimal Fixed – Point – Binary Codes- Logic Gates, Boolean Algebra, Map Simplification – Combinational Circuits: Half-Adder, Full Adder- Flip Flops - Sequential Circuits</p>		
2	<p>Introduction To Digital Components And Micro Operations: ICs – Decoders – Multiplexers – Registers – Shift Registers – Binary Counters – Memory Unit – Register Transfer Language – Register Transfer – Bus And Memory Transfers – Arithmetic, Logic And Shift Micro Operations , Arithmetic Logic Shift Unit.</p>		
3	<p>Computer organization: Instruction Codes – Computer Registers – Computer Instructions – Timing And Control – Instruction Cycle – Memory Reference Instructions – I/O And Interrupt – Machine Language – Assembly Language – Assembler.</p>		
4	<p>Memory Organization: Memory Hierarchy – Main Memory – Auxiliary Memory – Associative Memory – Cache Memory – Virtual Memory – Memory Management.</p>		
5	<p>Central Processing Unit: General Register Organization – Control Word – Stack Organization – Instruction Format – Addressing Modes – Data Transfer And Manipulation – Program Control, RISC</p>		

6

Input – Output Organization:

Peripheral Devices – Input-Output Interface – Asynchronous Data Transfer – Modes Of Transfer – Priority Interrupt – DMA – IOP – Serial Communication.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
202	Database Management System	3-1-0 = 4C	2018-19
<p>Course Objective: This is a foundational course on Data Modeling. The course aims to impart knowledge of the concepts related to database and operations on databases. It also gives the idea how database is managed in various environments with emphasis on security measures as implemented in database management systems.</p>			
<p>Expected Outcome : At the end of the course, student should be able to A) Understand the concepts of database and techniques for its management. B) Different Data Models at Conceptual and Logical level. C) Differentiate between the role of DBA and Data Architect D) Understanding Data Security standards and Methods</p>			
<p>References (Books, Websites etc) : 1) Database System Concepts By Henry korth and A. Silberschatz 2) Database Systems Concepts, Designs and Application by Shio Kumar Singh, Pearson 3) Database Management Systems by Debabrata Sahoo ,Tata Macgraw Hill</p>			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com www.coursera.com</p>			
Course Plan			
Unit	Contents		
1	<p>Introduction of Database Management System: Difference between Data, Information, Data Processing & Data Management. File Oriented Approach, Database oriented approach to Data Management, Need for DBMS, Characteristic of Database, Database Architecture: Levels of Abstraction, Database schema and instances, 3 tier architecture of DBMS, Data Independence. Database users, Types of Database System. Database Languages, DBMS interfaces.</p>		
2	<p>Data Modeling: Data Models, Logical Data Modeling: Hierarchical Data Model, Network Data Model, Relational Data Model, Advantages and Disadvantages of Logical Data Modeling. Conceptual Data Modeling: Entity Relationship Model, Entities, Attributes, Types of Attributes, Relationships, Degree of relationship Set, Mapping Cardinalities, Keys, ER Diagram Notations, Roles Participation: Total and Partial, Strong and Weak Entity Set. Case studies on ERD.</p>		
3	<p>Normalization: Keys: Composite, Candidate, Primary, Secondary, Foreign, Super key, CODD's Rules, Mapping conceptual model into Relational Model. Functional Dependencies, Decomposition, Lossy and Lossless Decomposition, Dependency Preserving Decomposition Advantages and Disadvantages of Normalization, Normal Forms (1NF, 2NF, 3NF,) Case Studies on Normalization.</p>		

4	<p>File Structures and Data Administration: File Organization, Overview of Physical Storage Media, Magnetic Disk, RAID, Tertiary Storage, Storage Access, Data Dictionary Storage, Organization of File (Sequential, Clustering), Indexing and Hashing, Basic Concepts, indices, B+ Tree index file, B- tree index file, Static hashing, Dynamic Hashing, Data administration, Role and Responsibility of DBA</p>
5	<p>Transaction and Concurrency Control Multiprogramming and Multiprocessing, Basic Database access operations, Concept of transaction, transaction state, ACID properties, Schedules, Serializability of schedules., Concurrency Control, lock based protocols, timestamp based protocols, Multiple granularity, Multiple Version Techniques, Deadlock and its handling, Wait-Die and Wound-Wait, Deadlock prevention without using timestamps, Deadlock detection and time outs</p>
6	<p>Database Recovery and security Management: Database Recovery, Types of Failures, and Data access. Recovery and atomicity, Recovery Techniques Algorithms: Log Based Recovery, Check points, Shadow Paging, Recovery with concurrent transactions</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
203	C Programming - II	3-1-0 = 4C	2018-19
Course Objective: <ul style="list-style-type: none"> To understand file handling in C. To develop skills to analyze the problem given and to design & develop an efficient solution to given problem To develop capability to choose appropriate data structures for given problems To imbibe programming skills & thereby making industry ready 			
Expected Outcome: After undergoing this course, student will <ol style="list-style-type: none"> Have thorough knowledge about data structures Ability to design& develop program using linear data structures& non linear data structures for solving problems Ability to choose appropriate data structures for problem solving Ability to use combination of these data structures for problem solving. 			
References (Books, Websites etc) : <ol style="list-style-type: none"> Behrouz A. Forouzan and Richard F. Gilberg , 2nd Edition, Thomson, 2003, Computer Science A Structured Programming Approach Using C Basavraj S Anami, Shanmukhappa Angadi, Sunil Kumar S Manvi, PHI Publications, 2010. A Holistic approach to learning C. Andrew Tenanbaum, Thomson, 2005, Data Structures with C.Robert Kruse & Bruce Leung, Data Structures & Program Design in C, Pearson Education, 			
Suggested MOOC : Data structures and Algorithms, Prof. Sudarshan Iyengar, IITRopar, 8 weeks, Rerun Feb 05, 2018 https://onlinecourses.nptel.ac.in/noc16_cs06 at NEPTEL			
Course Plan			
Unit	Contents		
1	Elementary Data Structures: Basic concepts such as data object, array, and record; Operations and relations on data objects; definition of data structure; Built-in data types as examples of data structures; concept of abstract data type; notation to specify an abstract data type; concepts of pre-conditions and post-conditions; Implementation of an ADT in a language; Specification and implementation of simple data structures such as Integer, Rational, Currency, Date, Temperature, distance, Pay, Marks, Grade_card etc.		
2	Linear Data Structures: (Representation in Memory and operations like insertion, deletion and traversal) – one and multidimensional array, Pointer arrays, single link list, circular link list, double link list		
3	Particular Linear Data Structures: Representation in Memory and operations like insertion, deletion and traversal) - Stacks: Applications: implementation of recursion, factorial calculation, queues, circular queue, deque;		

4	File Handling: Creation, reading writing in a file. Pattern Matching and Extraction of data from a file. Reading and writing from files.
5	Hierarchical data structures : General trees and related concepts; depth first and breadth first traversal of trees; n-ary trees and important properties of n-ary trees; binary trees and their properties; binary tree traversal algorithms.
6	The problem of search and Sorting : Linear and binary search and their efficiency; Hash tables, The standard sort algorithms (Bubble/insertion/selection) and their efficiencies; Merge sort and quick sort algorithms and their efficiencies.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
204	Financial Accounting	3-1-0 = 4C	2018-19
Course Objective: <ol style="list-style-type: none"> To impart basic accounting knowledge To lay a foundation for further study of accounting at higher level To enable the students to understand basic accounting principles, practice and its applications in modern business activities. 			
Expected Outcome : <ul style="list-style-type: none"> The knowledge of accounting and its principles at basic level. Practical's in Tally and Excel for Financial Accounting assignments 			
References (Books, Websites etc) : <ol style="list-style-type: none"> Dr. S. N. Maheshwari , Financial Accounting For Management: (Vikas Publishing House) Robert Anthony, David Hawkins, Business Accounting. (Tata McGraw –Hill) M.G.Patkar, Book-Keeping & Accountancy. Std XI(FYJC) Commerce Anil Chowdhry , Fundamentals of Accounting & Financial Analysis (PearsonEducation) M.E.Thukaram Rao, Accounting for Managers.(New Age International Publishers) 			
Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction: Need for Accounting, Meaning and definition of book keeping, System of Book keeping. Financial Accounting-definition, Scope and objectives. Accounting v/s Book Keeping. Limitations of Financial Accounting, End users of financial statement.		
2	Accounting Principles, Concepts and Conventions: Accounting Principles-definition and importance, Accounting Concepts and Conventions, Branches of accounting.		
3	Journal and ledger: Journal-importance and utility, classification of accounts, journalizing of transactions. Ledger- meaning and utility, posting and balancing of account		
4	Subsidiary Books And Trial Balance: Cash book, purchase book, sales book. Trial Balance- meaning and purpose, preparation of a trial balance.		
5	Preparation of final accounts: Preparation of Trading and Profit & Loss Account and Balance Sheet of sole proprietary business.		
6	Computerized Accounting: Computers and Financial application, Accounting Software packages. (Orientation level)		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
205	Principles of Management	3+1+0 = 4C	2018-19
Course Objective: To understand the concepts in Management and to develop the skills related to practice of management.			
Expected Outcome: To understand the functions and processes of business management.			
References (Books, Websites etc) : <ol style="list-style-type: none"> 1. Heinz Wehrich & Harold Koontz , Principles and Practice of Management 2. Tripathi & Reddy , Principles of Management 3. Dr. L.M.Prasad, Principles of Management 4. Richard Daft., Management. Thomson South Western Publishers, Australia 			
Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction to Management: Definitions and Meaning of Management, Characteristics of Management, Management Vs. Administration, Levels of Management, Functions of management, Scope and Importance of Management, Henry Fayol' s contribution to Management, Fredrick Taylor's contribution to Scientific Management, Social Responsibility of Management.		
2	Planning: Meaning, Steps in planning process, Nature of planning , Types of plans, Mission and Objectives, Process of setting Objectives, Management by Objectives, Decision making - process.		
3	Organizing: Meaning, Process of Organizing, Organization Structure, Forms of Organization		
4	Staffing: Recruitment and its Sources, Selection process, Payment of Wages and Salaries, Incentives - Types, Motivation - Positive and Negative motivation.		
5	Directing: Defining Leadership, Types of leadership. Authority & Responsibility, Delegation of Authority, Decentralization - Determinants of decentralization, Distinction between Delegation and Decentralization.		
6	Controlling: Meaning, Characteristics of Control, Process of Controlling, Modern methods of controlling, Requirements for Effective Control, Relationship between Planning & Controlling. Use of IT in Controlling. Zero Based Budgeting and Management audit.		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
206	Lab on C Programming -II	0-0-4 = 2C	2018-19
Course Objective :			
This is companion course of C Programming II			
Syllabus Broad Units:			
This Companion course of C programming II; Practical aspects of C programming towards problem solving is covered.			
Expected Outcome :			
The students will develop adequate programming skills with respect to following			
<ol style="list-style-type: none"> 1. Define basic data structures such as Date, Currency and Rational; and using it. 2. Defining and using and updating Linear data structures : arrays and Linked List 3. Should define data types such as stack, queue and List 4. Able to read and write data into files. 5. Able to define hierarchical data types; manipulate and use it. 6. Able to understand searching and sorting mechanism and use various algorithms on it. 			
References (Books, Websites etc) :

Robert Kruse & Bruce Leung, Data Structures & Program Design in C, Pearson Education, 			

Lab on C programming -II

Sr. No	Programming Exercises
1	Elementary Data Structures <ul style="list-style-type: none"> - Write a program having functionality of one dimension and two dimension arrays with use of simple data types such as Integer, Float, Date etc. - Write a program wherein mathematical calculations involves such as average, percentage calculation, Factorial calculation and Matrix multiplication - Write program for structure implementation for array and pointers. - Create a object of the class to achieve various functionalities of accounting such as Net Pay calculation, Tax deduction, Gross pay etc.
2	Linear Data Structures <ul style="list-style-type: none"> - Demonstrate various functionalities for Link list, Circular link list and double link list with the reference of array and pointer.

	<ul style="list-style-type: none"> - Write a C program to insert and delete string / integer data from specific place of linked list. - Search a specific string/ integer in a given data set also find how many time it occurs or repeats in a set given
3	<p>Particular Linear Data Structures</p> <ul style="list-style-type: none"> - Write program for implementation of recursion - Demonstrate Insertion, Deletion and Searching functionalities with their nomenclatural for – <ul style="list-style-type: none"> o Stack o Queues o Circular Queues - Do necessary assumption for implementation of it
4	<p>File Handling</p> <ul style="list-style-type: none"> - Program to create and write data into files - Program to read data from files. - Programs on pattern matching on data of files and using this pattern matching at the time of reading and writing data into file
5	<p>Hierarchical data structures</p> <ul style="list-style-type: none"> - Programs for defining data structure to represent a tree. Creating tree and adding data/nodes into it. - Programs to traverse trees: DFS, BFS and other - Deleting and nodes in tree
6	<p>The problem of search and Sorting</p> <ul style="list-style-type: none"> - Programs to use linear/sequential searching and binary searching - Programs to implement standard sorting algorithms with efficiency measurement - Reading data form and using it with various sorting algorithms

Course Number	Course Name	L-T-P- Credits	Year of Introduction
207	Environment Studies	2-0-0 = 2C	2018-19
Course Objective: To Understand and the nature and function of the natural environment affecting society.			
Expected Outcome : Understand the importance of Environment in the life of living things.			
References (Books, Websites etc) : <ul style="list-style-type: none"> • Agrawal K.C.:Environmental Biology:Nidhi Publishers Ltd(2001) • Bharucha Erach: The Biodiversity of India: Mapin Publishing Pvt. Ltd. • Jadhav H and Bhosale V.M.: Environmental Protection and Laws: Himalaya Publishing House. • Miller T.G. Jr.: Environmental Science: Wadsworth Publishing Co. 			
Suggested MOOC :			
Course Plan			
Unit	Contents		
1	<p>The multidisciplinary nature of environment studies: Definition, scope and importance-need of public awareness.</p> <p>Natural Resources: Renewable and non-renewable resources: Forest resources: Use and over- exploitation, deforestation. Case studies. Timber extraction, mining, dams and their effects on forest and tribal people.</p> <p>Water resources: Use and over-utilization of surface and groundwater, floods, droughts, conflicts over water, dams- benefit and Problems.</p> <p>Mineral Resources: Use and exploitation ‘environmental effects of extracting and using mineral resources, case studies.</p> <p>Food resources: World food problems, changes caused by agriculture. Fertilizer-pesticide problems, water logging, salinity, case studies.</p> <p>Energy resources: Growing energy needs, renewable and non-renewable energy resources, use of alternative energy sources.</p> <p>Land resources: Land as resources, land degradation, man induced landslides, desertification. Role of individual in conservation of natural resources. Equitable use of resources for sustainable lifestyles</p>		
2	<p>Ecosystem: Concept of ecosystem, structure and function of an ecosystem, producers, consumers and decomposers .Energy flow in the ecosystem, Ecological succession, food chains, food webs and ecological pyramids, introduction, types, characteristics features structure and function of the following ecosystem, forest ecosystem ,grassland ecosystem, Desert ecosystem, Aquatic ecosystems, ponds, stream, lakes, rivers, estuaries.</p>		
3	<p>Biodiversity and its conservations: Introduction, Definition: genetic, species and ecosystem diversity, Biogeographically classification of India, value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option vales, India as a mega diversity nation, Hot-Spots of biodiversity, Threats to biodiversity: habitat loss, poaching of wildlife, Man wildlife</p>		

	conflicts, Endangered and endemic species of India, Conservation of biodiversity: In situ and Ex-situ conservation of biodiversity.
4	<p>Environmental Pollution: Definition- Causes, effects and control measures of:-Air pollution, water pollution, soil pollution, marine pollution, noise pollution, thermal pollution, and nuclear hazards .Soil waste management: cause, effects and control measures of urban and industrial waste. Role of an individual in prevention of pollution. Pollution case studies. Disaster management: floods, earthquakes, cyclone and landslide.</p>
5	<p>Social issues and Environment: From unsustainable to sustainable development, urban/problems related to energy, water conservation, rain water harvesting, watershed management, Resettlement and rehabilitation of people; its problems and concerns Case Studies, Environment ethics: Issues and possible solutions ,wasteland reclamation, Consumerism and waste products, Environment protection Act, Air(presentation and Control of Pollution)Act. Water (Prevention and Control of Pollution) Act. Wildlife Protection Act. Forest Conservation Act. Issues involved in enforcement of environmental legislation. Public awareness.</p>
6	<p>Human Population and the Environment: Population growth, variation among nations, population explosion-Family Welfare Programme. Environment and Human health. Human Rights Value Education. HIV/AIDS Women and Child Welfare. Role of Information Technology in Environment and human health.</p>

Course Number	Course Name	L-T-P-Credits	Year of Introduction
208	Community Work – Swachh Bharat Abhiyan	2-0-0 =1 C	2018-19
Course Objective: This course aims to expose the students to Swachh Bharat Abhiyan initiative of the government.			
Expected Outcome : Students will be able to understand the details about the Swachh Bharat Abhiyan and its impact on society.			
References (Books, Websites etc) : www.swachhbharaturban.in/ swachhbharatmission.gov.in			
Course Plan			
Unit	Contents		
1	History, meaning, Goals of Cleanliness initiatives		
2	Initiators of cleanliness drive in India. Sant Ghadage Baba, Mahatam Gandhi, Efforts taken towards the Swachh Bharat Abhiyan, Swachh Bharat Mission		
3	Impact of Cleanliness initiatives. Social Awareness, Case Studies.		
	COMMUNITY HOURS: Internship of 15 days (100 hours) to be undertaken Submit a report on a particular type of community involvement undertaken		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
208	Sectoral Analysis	2-0-0 =1 C	2018-19
Course Objective: <ul style="list-style-type: none"> • To expose the students to the different sectors of the economy • To enable the students to understand the importance and contribution of the sectors to business, economy and global environment • To expose the students towards rural problems To awaken sense of responsibility amongst students towards senior citizens 			
Expected Outcome : Students will get exposure to the different sectors of the economy and their contribution to the national development.			
References (Books, Websites etc) : <ol style="list-style-type: none"> 1. S.A. Sherlekar ,Modern Business Organization And Management – (Himalaya Publishing House) 2. Y.K. Bhushan ,Fundamental Of Business Organization & Management – (S Chand Publishers) 3. Basu, C. R.; <i>Business Organization And Management</i>, Tata Mcgraw Hill, Publishing House, New Delhi, 1998 4. Business World 			
Course Plan			
Unit	Contents		
1	Introduction to the sectors of the economy		
2	Detailed view of the IT, Manufacturing, Agriculture, Banking Insurance, Service Sector, Retail		
3	Project work on detailed analysis of any one sector – national and global scenario		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
208	Smart Cities	2-0-0 =1 C	2018-19
Course Objective: To give exposure to tools and techniques applicable for planning, controlling & monitoring of Smart Infrastructure and Cities. This subject would also enable to develop insight for managing project risks, uncertainties and complexities of smart cities project.			
Expected Outcome : Students will get an understanding of road map for Planning Smart Cities and benchmarking their performance for Indian context.			
References (Books, Websites etc) :			
Suggested MOOC :			
Course Plan			
Unit	Contents		
1	Introduction to Smart Cities, •Introduction to "City Planning", Understanding Smart Cities		
2	Dimensions of Smart Cities, Global Experience of Smart Cities, Smart Cities –Global Standards and Performance, Benchmarks, Practice Codes, India "100 Smart Cities" Policy and Mission		
3	<ul style="list-style-type: none"> •Smart City Planning and Development •Financing Smart Cities Development •Governance of Smart Cities, Case Studies on Smart Cities 		

SEMESTER III

Course Number	Course Name	L-T-P- Credits	Year of Introduction
----------------------	--------------------	-----------------------	-----------------------------

301	Operating Systems	3L-1T-0P=4C	2018
Course Objective: <ul style="list-style-type: none"> To provide an understanding of the major operating system components To provide coverage of basic computer system organization The overall aim of this course is to provide a general understanding of how a computer works. This includes aspects of the underlying hardware as well as structure and key functions of the operating system. 			
Expected Outcome : At the end of this course, student should be able to <ul style="list-style-type: none"> Explain the concepts of process, address space and file Compare and contrast various CPU scheduling algorithms Understand functioning and working of Windows as well as Unix Operating System 			
Prerequisite: Students should have basic knowledge of working on an operating system			
References (Books, Websites etc) : <ul style="list-style-type: none"> Operating systems design and implementation by Andrew Tanenbaum and Albert Woodhull Operating systems concept and design by Milan Milenkovic Operating system Concepts by Silberschulz, Abraham and Galvin, peter raer 			
Suggested MOOC: Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction to Operating System: Definition and concept of OS, History of OS, Importance and function of Operating system. Types of OS-Batch System, timesharing, Multitasking, multiprogramming, multiprocessing, online operating system, real time, distributed operating system. Views-command language users view, system call users view, structure of OS- simple, monolithic system and layered system, client server model. User operating-system interface: command line interface, GUI, system calls. Case Study: Unix History, General Structure of Unix, The shell of Unix operating system, The shell of Unix operating system		
2	Process Management: Process concept, Process Control Block, process states and its transitions, context switch, OS services for Process management, scheduling and types of schedulers, scheduling algorithm-First come first served, shortest job first, shortest remaining time next, time slice scheduling, priority based scheduling, multilevel queue, multilevel queue with feedback Case Study: Process management in Unix		
3	Storage Management: Basic concept of storage management, logical and physical address space, swapping, contiguous allocation, non-contiguous allocation, fragmentation, segmentation, paging, demand paging, virtual memory, page replacement algorithms- FIFO, Optimal page		

	replacement algorithm, least recently page replacement algorithm, clock page replacement algorithm, design issue of paging, thrashing,
4	<p>Inter-process communication and synchronization: Need, Mutual Exclusion, Semaphore, Busy-wait Implementation, characteristics of semaphore, queuing implementation of semaphore, producer consumer problem, critical region and conditional critical area. What is deadlock? Conditions to occur the deadlock, deadlock prevention, deadlock avoidance- banker's algorithm. resource request, resource release.</p>
5	<p>File Systems: Files-basic concept, file attributes, operations, file types, file structure, access methods, Directory- structure-single level directory system, two level directory system, hierarchical directory system, directory operations, protection, security, allocation method.</p> <p>Case Study: Unix File Management and Security</p>
6	<p>Input/output System: Principles of I/O hardware, I/O devices, device controller, DMA, Principles of I/O software-goals, interrupt handler, device driver. Mass storage structure-disk structure, disk scheduling (FCFS, SSTF, SCAN, LOOK, C-SCAN, C-LOOK)</p> <p>Case Study: Input output management in Unix</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
302	Software Engineering	3L-1T-0P = 4C	2018
Course Objective: To introduce the current methodologies involved in the development and maintenance of Software over its entire life cycle.			
Learning Outcome : At the end of this course, student should be able to <ul style="list-style-type: none"> Understand life cycle models, Requirement elicitation techniques, understand the concept of Analysis and Design of software. Develop SRS as per any of the existing standards. Implement software engineering concepts in software development to develop quality software. 			
Pre-requisites: Preliminary knowledge of computer, their operations and applications.			
References (Books, Websites etc): <ul style="list-style-type: none"> SOFTWARE ENGINEERING A PRACTITIONERS APPROACH seventh edition BY Roger S. Pressman McGraw Hill International Edition. Software Engineering by Sommerville, Pearson Education, 7th edition Software Engineering by K.K. Aggarwal & Yogesh Singh, New Age International Publishers. 			
Suggested MOOC: Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction to Software Engineering: Software, Program vs Software, software characteristics, Definition of Software Engineering, importance, principles of software engineering, Difference between software engineering and software programming, Members involved in software development.		
2	Software process and Feasibility study: Need of Feasibility study, types of Feasibility study, Cost Benefit Analysis. General software development life cycle with all phases. Overview of software models (Waterfall, Prototyping, and Spiral and Rapid Application Development model).		
3	Requirement Engineering Concepts and Methods: What is Requirement Engineering, Types of requirements, Requirement elicitation techniques- Traditional methods and Modern methods, Verification and validation process. Principles of Requirement Specification, Software Requirement Specification document Outline Characteristics of good SRS: - correct, complete, unambiguous, consistent, modifiable, traceable, Understandable		
4	Analysis and Structured System Design tools: Analysis and Design Tools : Entity-Relationship Diagrams, Decision Tree and Decision Table , Data Flow Diagrams (DFD) , Data Dictionary , Elements of DD		

	<p>Advantage of DD , Pseudo code , Input And Output Design</p> <p>Structured System Design: Modules Concepts and Types of Modules Structured Chart , Qualities of Good Design , Coupling, Types of Coupling , Cohesion, Types of Cohesion, CASE STUDIES (Based on Above Topic)</p>
5	<p>Software Testing and Software Quality Assurance</p> <p>Software Testing: Definition, Test characteristics, Types of testing: Black-Box Testing , White-Box Testing ,Unit testing , Integration testing, Validation, Verification.</p> <p>Quality concept: (Quality, quality control, quality assurance, cost of quality), SQA activities, SQA plan. Formal Technical review: Review meeting, review reporting and review guidelines Software Configuration Management: - What is configuration management, Baseline, Software Configuration items, SCM process- Identification of objects, Version control and Change control.</p>
6	<p>Software Maintenance: What is software maintenance? Problems during software maintenance.</p> <p>Categories of Software Maintenance: Corrective maintenance, Adaptive maintenance, Perfective maintenance, and preventive maintenance. Cost of Maintenance, Maintenance Activities.</p> <p>Maintenance Process and Models: Maintenance processes, Fix Model, Iterative Enhancement Model, Reuse Oriented Model, Boehm Model, and Taute’s Models.</p>

Course Number	Course Name	L – T – P Credits	Year of Introduction
303	DBMS – II	3L – 1T – 0P=4C	2018
<p>Course Objectives: The main objective is to teach the concepts related to database its techniques and operations. SQL (Structured Query Language) is introduced in this subject. This helps creates strong foundation for application of data design.</p>			
<p>Expected Outcome: At the end of this course, the student should be able to:</p> <ul style="list-style-type: none"> • Creating tables, and queries using SQL • Applying SQL Operators and SQL Functions in the created tables in SQL; • Writing and solving complex queries based on joins, sub queries • Writing PL/SQL blocks, objects 			
<p>Text Books: Ivan Bayross. SQL, PL/SQL The Programming Language of Oracle 3rd Revised Edition BPB Publications</p>			
<p>Suggested MOOC: Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com www.coursera.com</p>			
Syllabus			
1.	<p>Introduction to Oracle and SQL: Introduction to Oracle: History, Features, Versions of Oracle, Oracle File Management, Spool command SQL: Defining a database in SQL, Components of SQL: DDL, DML, DCL, DQL, SQL query Rules, Data types, Keywords, Delimiters, Literals. DDL Commands – Defining a database in SQL, Creating table, changing table definition, removing table. DML Commands- Inserting, updating, deleting data. DQL Commands: Select Statement with all options. Renaming table, Describe Command, Distinct Clause, Sorting Data in a Table. Data Constraints: Primary key, Foreign Key, NOT NULL, UNIQUE, CHECK constraint.</p>		
2.	<p>Operators: Arithmetic, Logical, Relational, Range Searching, Pattern Matching, IN & NOT IN Predicate, all, % any, exists, not exists clauses, Set Operations: Union, Union All, Minus, Intersect.</p>		
3.	<p>Joins and Oracle Functions: Join Concept. Simple join, equi join, non equi join, Self join, Outer join, Sub queries, Aggregate Functions, Numeric Functions, String Functions, Conversion</p>		

	functions, Date conversion functions, and Date functions.
4.	<p>Database Objects:</p> <p>Index: Creating index, simple index, composite index, unique index, dropping indexes, multiple indexes on table</p> <p>Sequence: Creating sequence, altering sequence, dropping sequence.</p> <p>Views: Concept, creation, usage</p> <p>Objects: declaring and initializing objects in SQL, Manipulating object in PL/SQL</p>
5.	<p>Introduction to PL/SQL programming:</p> <p>Introduction, Advantages, PL/SQL Block, PL/SQL Execution Environment, PL/SQL Character set, Literals, Data types, Variables, Constants, Displaying User Message on screen, Conditional Control in PL/SQL, Iterative Control Structure: While Loop, For Loop, Goto Statement</p>
6.	<p>Advanced Programming Techniques of PL/SQL:</p> <p>Cursors:</p> <p>Introduction, Types of Cursors: Implicit Cursor, Explicit Cursors, Parameterized cursors, Programs on cursors</p> <p>Triggers:</p> <p>Introduction, Use of triggers, Types of Triggers, Creating triggers, Examples on Triggers</p> <p>Stored Procedures / Functions:</p> <p>Introduction, How oracle executes procedures/ functions, Advantages, How to create Procedures & Functions, Examples</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
304	Statistics	3L-1T-0P=4C	2018
Course Objective:			
The main objective is to introduce basic concepts of statistics to the students and make them competent in collecting and analyzing the data by using statistical techniques			
Expected Outcome : At the end of this course, student is expected to			
<ul style="list-style-type: none"> • Tabulate the raw data by using frequency distribution and represent the data graphically. • Analyse the data by using measures of central tendency and dispersion • Estimate the value of dependent variable • Generate the relationship between two variables in the form of degree or equation 			
Prerequisite:			
Students should have basic knowledge of use of calculator and research attitude			
References:			
1) Fundamentals of Statistics , S.C. Gupta , Himalaya Publishing House (5th Edition)			
2) Business Statistics , S.P. Gupta, M.P. Gupta –Sultan Chand & Sons, New Delhi (16 th Edition)			
Suggested MOOC:			
Please refer these websites for MOOCS:			
NPTEL / Swayam			
www. edx.com			
www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction to Statistics: Definition of Statistics, Importance of Statistics, Scope of statistics : Economics, Computer Science, Business and Management, limitations of Statistics .		
2	Data Collection and representation: Primary and Secondary data, Sources of Data collection, Tabular Representation of data: Ungrouped and grouped frequency distribution, Graphical representation of data: Simple bar, subdivided bar, percentage bar diagram, pie diagram, histogram, frequency polygon, ogive curves.		
3	Measures of central tendency: a) Mean: Definition, problems on mean for listed data items, discrete distribution and continuous distribution, merits and demerits b) Median: Definition, problems on median for listed data items, discrete distribution and continuous distribution, merits and demerits c) Mode: Definition, problems on mode for listed data items, discrete distribution and continuous distribution, merits and demerits.		
4	Measures of Dispersion: a)Range: Definition, problems on range for listed data items, discrete distribution and continuous distribution, merits and demerits of range b)Mean Deviation: Definition, problems on mean deviation about mean for listed data items, discrete distribution and continuous distribution, merits and demerits		

	<p>c) Standard Deviation: Definition, problems on standard deviation for listed data items, discrete distribution and continuous distribution, merits and demerits.</p> <p>d) Deciles, percentiles, quartiles</p>
5	<p>Regression and Correlation:</p> <p>a) Regression: Definition, regression equations, regression coefficients, problems on finding regression equations and estimations</p> <p>b) Correlation: Definition, Karl Pearson's correlation coefficient, Spearman's Rank correlation with correction factor</p>
6	<p>Time series analysis:</p> <p>Components of Time series Analysis , Fitting a straight line $y=ax+b$, fitting a curve $y=ax^2+bx+c$, 3 yearly and 5 yearly moving averages</p>

Course Number	Course Name	L-T-P-Credits	Year of Introduction
305	Multimedia Technology	3L-1T-0P=4C	2018
Course Objective:			
The main objective of this course is to know the concept of multimedia by students. To know different software tools used in multimedia technology. To know multimedia computing.			
Expected Outcome: After learning this course, student will be able			
<ul style="list-style-type: none"> ▪ To understand about various interactive multimedia devices, the basic concept about images and image formats. ▪ To understand different software tools used in multimedia. 			
Reference Books:			
<ul style="list-style-type: none"> • Principles of Multimedia – Ranjan Parekh, Publisher: Tata McGraw Hills • Multimedia: Making It Work (8th Edition) – by Tay Vaughan, Publisher: Tata McGraw Hills. • Multimedia Communications: Applications, Networks, Protocols and Standards - Fred Halsall, Publisher: Pearson Education. 			
Suggested MOOC:			
<ol style="list-style-type: none"> 1) www.openlearning.com 2) www.mooc-list.com 3) www.coursera.org 			
Course Plan			
Unit	Contents		
1	What is multimedia? History of Multimedia, Steps for Creating multimedia presentation, Delivering multimedia, Where to Use multimedia? (Business, Schools, Home, and Public Places), Multimedia authoring tools, types of multimedia authoring tools, features of multimedia authoring tools.		
2	Storage technology, Magnetic media (Hard disk, RAID), Optical Media (CD Storage, CD standards), DVD (Size and capacity of DVD, DVD video, DVD audio).		
3	Using text in multimedia, text types, designing with text, Hypertext and Hypermedia, Characteristics of Hypertext and Hypermedia. Using image in multimedia, image color models, Dithering, Image file formats, Macintosh formats, Windows formats, Cross-platform formats.		
4	What is sound? Characteristics of Sound, Digital Audio, MIDI audio, MIDI Vs Digital audio, Audio file formats, Copyright issues. Principles of animation, Animation techniques, Animation file formats, Making animation (A Rolling Ball, A Bouncing Ball), Creating animated scene.		
5	Working of video, Video signal formats (Component Video, Composite Video and S-Video), Digital Video, Digital Video Standards (EDTV, CCIR Recommendations), HD Video and HDTV.		

6	Multimedia communications, Multimedia information representation, Multimedia networks, Multimedia applications, Media types, Communication modes, network types, Multipoint conferencing, Network QOS.
---	--

Course Number	Course Name	L – T – P Credits	Year of Introduction
306	Lab on Oracle and Multimedia	0L-0T-4P=2C	2018

Course Objectives:

The main objective is to teach the concepts related to SQL (Structured Query Language) and multimedia. The different SQL commands to be introduced. It helps to the students in writing SQL queries and its implementations. It basically helps to design and develop database structure. This is foundational course for building up database and processing through different queries.

Expected Outcome:

At the end of this course, the student should be able to:

- Creating tables, and queries using SQL
- Applying SQL Operators and SQL Functions in the created tables in SQL;
- Writing and solving complex queries based on joins, sub queries
- Writing PL/SQL blocks, objects
- Creating multimedia file
- Understanding the use of multimedia in web sites

16.	<p>Granting and Revoking Privileges to/from user</p> <ol style="list-style-type: none"> a) Grant all privileges on the table product_master to the user Pradeep. b) Grant SELECT and UPDATE privilege on table client_master to Neeta. c) Grant all privileges on the table client_master to the user Ivan with grant option. d) Select all records from product_master table belonging to Sunita. e) Revoke DELETE privilege on supplier_master from Florian. f) Revoke the remaining privileges on supplier_master that were granted to Florian. 						
17.	<p>Writing PL/SQL Block</p> <ol style="list-style-type: none"> a) Write a PL/SQL Block to generate any n odd and even numbers. b) List the contents of product_master. c) Write a PL/SQL Block that inverse the string or number. [if given number is 8973 then its inverse is 3798]. If the price of the product 'P00001' is < 4000 then change the price to 4000. The price change is recorded in the old_price table along with product_no and the date on which price was changed last. d) Write a PL/SQL block that processes an order for "540 HDD". [Check the availability of the product, if yes update its value.] 						
18.	<p>Writing CURSORS</p> <ol style="list-style-type: none"> 1. Write a PL/SQL block that updates the acctmast table and sets the balance depending upon the account is debited or credited. The updation should be done only for those values that are not processed i.e. the processed flag is 'N' in the accttrans table. acctmast (acctno*, name, balance) accttrans (acctno, trndate, debt_crdt, amount, processed) 2. The HRD manager has decided to raise the salary of employees by 0.15. Write a PL/SQL block to accept the employee number and update the salary of that employee. Display appropriate message based on the existence of the record in the employee table. 3. The HRD manager has decided to raise the salary of employees working as "Programmers" by 0.25. Write a PL/SQL block to accept the employee number and update the salary of that employee. Display appropriate message based on the existence of the record in the employee table. 4. Create following 2 tables item-mast (item-id*, description, bal-stock) item-trans (item-id, description, operation, qty, status) -> the operations are for UPDATE – U, for INSERT –I, for DELETE –D Based on the value in the operation column of table item-trans the records for table item-mast is inserted, updated or deleted. On the basis of success/failure of insert, update and delete operation the status column in the table item-trans is updated with appropriate text indicating success or reason for failure. 						

	<p>Following are the 3-cases which are to be taken care of:</p> <ul style="list-style-type: none"> • if operation = 'I' then the item-id against along with description and qty is inserted into the required columns of the table item-mast. If the insert is successful then the status field of item-trans table is updated to 'SUCCESSFUL' else 'ITEM ALREADY EXIST'. • if operation = 'D' then row from item-mast is deleted whose item-id is equal to the item-id in the table item-trans with the operation column having the value 'D'. If delete is successful then the status column of item-trans table is updated to 'SUCCESSFUL' else 'ITEM DOES NOT EXIST'. • if operation = 'U' then the qty against this operation column is added to bal-stock column of the table item-mast where item-id of table item-mast is same as that of item-trans. if update is successful then the status of item-trans table is updated to 'SUCCESSFUL' else 'ITEM DOES NOT EXIST'. <p>Write a parameterized CURSOR that defines all the above cases.</p>
19.	<p>Writing TRIGGERS</p> <ol style="list-style-type: none"> 1. Create a transparent audit system for a table client-master. The system must keep track of the records that are being deleted or modified and when they have been deleted or modified. client-master (client-no, name, city, state, pin, bal-due) audit-client (client-no, name, bal, operation, o-date) <ul style="list-style-type: none"> • operation: the operation performed on the client-master table • o-date: the date when the operation was performed. 2. Write a database triggers that checks that the qty-on-hand does not become negative.
20	<p>Writing PROCEDURES</p> <p>Create following 2 tables item-mast (item-id*, description, bal-stock) item-trans (item-id, description, operation, qty, status) -> the operations are for UPDATE – U, for INSERT –I, for DELETE –D</p> <p>Base on the value in the operation column of table item-trans the records for table item-mast is inserted, updated or deleted. On the basis of success/failure of insert, update and delete operation the status column in the table item-trans is updated with appropriate text indicating success or reason for failure.</p> <p>Following are the 3-cases which are to be taken care of:</p> <ol style="list-style-type: none"> i. if operation = 'I' then the item-id against along with description and qty is inserted into the required columns of the table item-mast. If the insert is successful then the status field of item-trans table is updated to 'SUCCESSFUL' else 'ITEM ALREADY EXIST'. ii. if operation = 'D' then row from item-mast is deleted whose item-id is equal to the item-id in the table item-trans with the operation column having the value 'D'. If delete is successful then the status column of item-trans table is updated to 'SUCCESSFUL' else 'ITEM DOES NOT EXIST'. iii. if operation = 'U' then the qty against this operation column is added to bal-stock column of the table item-mast where item-id of table item-mast is same as that of item-trans. if update is successful then the status of item-

	<p>trans table is updated to ‘SUCCESSFUL’ else ‘ITEM DOES NOT EXIST’.</p> <p>Write a database procedure which will check for the existence of item-id in the table item-mast. The procedure must have one argument which receives a value for which a matching pattern for item-id in the table item-mast and another which will return value indicating whether a match has been found or not. The value returned by the procedure can be used to make a decision to perform further processing or not.</p>

Part B: Lab on Multimedia

Q.No.	Question
1	<p>Create a new document in a word processing application. Next, type in a line of text and copy the line five times. Now change each line into a different font. Recopy the entire set of lines three times. Finally, change the size of the first set to 10-point text, the second set to 18-point text, and the third set to 36-point text.</p> <p>a) Which of the smallest lines of text is most readable? b) Which line of text stands out the most?</p>
2	<p>Download three different images from a web site. One should be photographic, one should be a graphic (solid colors or gradients), and one should be a mix. Convert the images to 256 colors. Use the tools available to use different dithering patterns and palettes. Print out the files before and after reducing to 256 colors. Write the file sizes on each one.</p>
3	<p>Visit different web sites. Describe the use of colors for each in subjective terms. Is each site vibrant? childish? muted? subtle? Why? What cultural or other factors determined the color selection? Print out a page from each site, and write a paragraph describing the colors and images used in each one.</p>
4	<p>Open an image in an image-editing program capable of identifying colors. Select three different pixels in the image. Sample the color and write down its value in RGB, HSB, CMYK, and web (hexadecimal) color.</p>
5	<p>Visit three web sites that use sound (you may need to find Flash-based web sites). Where, when, and how is sound used? Does the sound fit the mood of the site? Is there background sound? Can the sounds be turned on and off? Document your findings.</p>
6	<p>Locate three web sites that offer “royalty-free” or “buyout” music. Such sites almost always allow visitors to listen to low-quality samples. What formats are the samples provided in? Listen to some of the samples. Try to identify which are synthesized and which are actual instruments playing the music. What are the license arrangements for using the music? Document your findings, noting the various lengths and formats the music is provided in.</p>
7	<p>Use a search engine to search on the words “animation” and “definition.” Create a document that provides many different definitions of the term animation. Describe the differences among definitions. Which elements make the most difference among them—type of motion, process used for creation, method of playback, or something else? What do all (or, at least, most) of the definitions have in common?</p>
8	<p>Conceptualize a brief animated sequence. Include a number of moving elements that move into and out of the frame. Consider where the key frames should be. How do the elements move? Do they get bigger or smaller? Do they rotate? Do they “deform” (change shape)?</p>

	Create a storyboard with sketches showing at least ten of the key frames.
9	Locate three web sites that include video clips. What format are they served in? Examine the HTML source code to discover what method of video delivery is used. Make a note of your findings.
10	Prepare five graphic images using paint or drawing program. Be sure to include a variety of colors and contrasts. Add text to the images. Use small text, large text, text with serifs, bold text, and text in contrasting and similar colors. Add drop shadows. Add boxes and other shapes to the images, in various weights.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
307	Lab on Linux Operating System	0L-0T-4P=2C	2018
Course Objective: The student would be able <ul style="list-style-type: none"> • To obtain knowledge of how to manage files in Linux system. • To understand Linux commands and write shell programming. • To grasp the concepts of User Management in Linux. • To control the system running Ubuntu operating system. 			
Expected Outcome : The course is to provide the knowledge of the Linux Operating System. This course intends to teach various features that will help the students to use and learn the working of Ubuntu /Red Hat operating system			
Prerequisite: Students should have basic knowledge of working on an operating system. <ul style="list-style-type: none"> • Linux for beginners : An introduction to the linux operating system and command line • Linux: the complete reference, sixth edition paperback by Richard Petersen, McGraw Hill education • Unix shell Programming: by yashwant Kanitkar • UNIX Concepts and Applications - by Sumitabha Das 			
Course Plan			
Unit	Contents		
1	Introduction to Linux Operating system, various flavors of Linux O.S., Learning to use and Install Linux, Booting Any one flavor of Linux like ubuntu, red hat etc, Starting up ,Logging in, Exploring the desktop ,Working with virtual desktops, Getting Everything up and running ,Viewing your hardware , Getting online Using an Ethernet Card ,Joining wireless network ,Configuring Email and instant messaging, Adding a Printer , Configuring a local printer, Configuring a network printer, Setting up digital imaging devices, Transferring photos from digital camera, Configuring scanner, Configuring Bluetooth.		
2	General Purpose Utilities: banner (display a blown-up message), cal (The calendar), date-display the system date, who-Login detail tty-knowing your terminal uname-know your machine name passwd-change your password lock-lock your terminal echo-display message bc-the calculator. who am i,- display login name		
3	Navigating the file system:- pwd-checking your current directory, cd-changing directories, mkdir-Making directories		

	<p>rmdir-moving directories ls-listing files Handling Ordinary files: cat-displaying and creating files, touch-creating empty file cp-copying a file rm-deleting files mv-renaming files more-paging output lp-printing a fiile file-know the file type wc-line, word and character counting split-splitting file in to multiple files cmp-comparing two files comm.-finding common chmod-changing file permission files searches using find command, locate command, mount and unmount command. Understanding vi modes, Using vi to edit the file, Creating a new text file using vi, Searching through files.</p>
4	<p>Filters: pr- paginating files head-displaying the beginning of a file, tail- displaying the end of file cut- slitting a file vertically paste- pasting file sort- ordering file uniq- locating repeated line nl- line numbering tr-translating characters. regular expressions and grep to find text ps-process status kill-terminate process Other process related commands</p>
5	<p>sh command, pattern matching- the wild cards, escaping-the backslash(), quoting, redirection, pipes, tees</p>
6	<p>What is Shell, Different types of shells, Shell as command processor, shell variables, creating command substitution, various shell scripts using functions, conditionals, loops, customizing environment</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
308	Community Work III	2L-0T-0P=2C	2018
<p>Course Objective: This course aims to expose the students to the societal issues and help them participate in the community service through trips/events organized at institute, state level etc and also to Volunteer at events like fundraising activities, fairs, festivals, slums, nonprofit organization etc.</p> <ul style="list-style-type: none"> To expose the students towards social reality and role of community development for social upliftment and well being To involve students in community work through active involvement and participation 			
<p>Expected Outcome : Students will be able to know the community needs and understand their role towards community development.</p>			
<p>Reference Books :</p> <ul style="list-style-type: none"> An Introduction to Community Development, Rhonda Phillips, Robert Pittman – 2014 Community Development in Asia and The Pacific, Manohar S. Pawar, 2009 			
<p>Online Resources: https://community-wealth.org/sites/clone.community-wealth.org/files/downloads/tool-enterprise-directory.pdf https://www.ahaprocess.com/solutions/community/events-resources/free-resources/</p>			
<p>Community Hours: Participate in community service trips/events organized at institute, state level etc , Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc , Submit a report on a particular type of community involvement undertaken.</p>			
<p>MOOCs: https://alison.com/course/diploma-in-community-development</p>			
Course Plan			
Unit	Contents		
1	<p>Community work through Education: Teaching at Schools, Teaching at Orphanages, Teaching to poor children ,study the role of government in the education sector ,study the NGOs particularly working in education sector.</p>		
2	<p>Community Work for Slums: Learn the government facilities, NGOs which are working for the slums and try to connect any NGO.</p>		
3	<p>Community Work for Environment: Role of Govt. and NGOs which are working to save the environment, Initiatives like Clean your city drive, Cycle day, Awareness of Dry and wet waste classification, Tree Plantation Drive, Environment awareness activities etc.</p>		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
308	Start-Up Management	2L-0T-0P=2C	2018
Course Objective: The objectives of the course is <ul style="list-style-type: none"> To Introduce to the students the idea of start ups and their role in the society and nation To impart knowledge about the organization and management of start ups 			
Expected Outcome : Students will be able to understand the role of start ups and case studies of well known start ups in India.			
Reference Books : <ul style="list-style-type: none"> Khanka S. S. – Entrepreneurship Development, S. Chand. Burns, P. (2001). Entrepreneurship and small business. New Jersey:Palgrave. Mullins, J. (2004). New business road test. New Delhi: Prentice Hall. 			
Online Resources: https://www.entrepreneur.com/ https://www.shopkeep.com/blog/the-7-best-free-resources-for-planning-your-new-business			
MOOCs: https://startupindia.upgrad.com/ - Startup India Learning Programme Swayam			
Course Plan			
Unit	Contents		
1	Meaning of Start ups, Formation of a start up, idea generation for start ups, scaling up process.		
2	Managing a startup, Customer Development, Market Sizing, Lean Startups, Support by government for startups,		
3	Case Studies on well known startups.		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
308	Agro Tourism	2L-0T-0P=2C	2018
Course Objective: The objectives of the course are to familiarize students with principles and relationship between tourism and agricultural activities.			
Expected Outcome : Students will be able to obtain and diversify knowledge from tourism, rural tourism and their specific form agri-tourism.			
Reference Books : <ul style="list-style-type: none"> • Talwar, Prakash. Travel and Tourism Management. Gyan Books Pvt., Ltd., Main Ansari Road, Darya Ganj, New Delhi- 110 002. • Bagri, S. C. Trends in Tourism Promotion 2003. International Books Distributors, 9/3, Rajpur Road, Dehradun-248 001 Uttarakhand (India). 			
Online Resources: http://www.agritourism.in http://www.ecoindia.com			
MOOCs: https://www.mooc-list.com/tags/tourism https://www.coursera.org/ https://swayam.gov.in/ https://alison.com/courses?query=agriculture+tourism			
Course Plan			
Unit	Contents		
1	Introduction, importance, scope, forms of agro-tourism, advantages and implementations, sustainability component, difficulties involved.		
2	Govt. policies and legislations in respect of tourism and agro-tourism and environment protection laws. Requirements for Agro-tourism Farm, forest, garden, fish tank/ponds, residential huts, etc. Introduction to Indian culture through agro tourism.		
3	Profiling the tourist for: age, sex, life cycle, education, employment, income, satisfaction and expectations, values, purpose of visit, accommodation, duration of stay, preferences and perceptions regarding area management, environmental concerns, involvement and responsibility, motivations, etc.		

SEMESTER IV

Course Number	Course Name	L-T-P- Credits	Year of Introduction
401	Computer Networks	3L-1T- 0P = 4C	2018
<p>Course Objectives: The key objective is to acquire a foundational understanding of computer network and communication technologies. Networking concepts will be illustrated using TCP/IP networks. To enable the learner with Network Technologies and applications of Network.</p>			
<p>Learning Outcomes: At the end of this course, student should be able to</p> <ul style="list-style-type: none"> • Students will acquire a good knowledge of the computer network, its architecture and operation. • Student will be able to pursue his study in advanced networking courses (This knowledge will help them to create base for the Network Electives to be studied in the next semesters). • Students will be able to follow trends of computer networks. So, students will get exposed to advanced network technologies like MANET, WSN, and 4G. 			
<p>References (Books, Websites etc) :</p> <ul style="list-style-type: none"> • 1.A.S. Tanenbaum, Computer Networks (4th ed.), Prentice-Hall of India, Latest Edition • 2.W.Behrouz Forouzan and S.C. Fegan, Data Communication and Networking, McGraw Hill, Latest Edition 			
<p>Other Books:</p> <ul style="list-style-type: none"> • Network Essential Notes GSW MCSE Study Notes • Internetworking Technology Handbook CISCO System • Introduction to Networking and Data Communications Eugene Blanchard • Computer Networks and Internets with Internet Applications Douglas E. Comer 			
<p>Suggested MOOC :</p>			
Course Plan			
Unit	Contents		
1	<p>Introduction to Computer Networks: What is Computer Network? Network Goals and Motivations, Application of Networks, Network Topologies, Classification of Networks, Network software: Network Protocols, Protocol Hierarchies, Design issues for the Layers, Connection Oriented and Connectionless Services, Service Primitives, Relation of services to Protocols, Network Models: The OSI Reference Model, The TCP/IP Reference Model, Comparison of OSI and TCP/IP Reference Model, A critique of OSI Model, A critique of TCP/IP Model, Examples of some networks: Internet, X.25, ISDN, Frame relay, ATM, Ethernet, Wireless Lans- (wi-fi)</p>		
2	<p>Data Transmission and Physical Layer: Signals: Analog and Digital Signals, Data Rate, Transmission Impairment, Signal Measurement: Throughput, Propagation Speed and Time, Wavelength, Frequency, Bandwidth, Spectrum Transmission Media& its Characteristics: Guided and Unguided Media, Synchronous and Asynchronous Transmission, Multiplexing: FDM, WDM, TDM, Switching: Circuit, Message and Packet Switching, Mobile Telephone Systems: 1G, 2G, And 3G</p>		

3	<p>Network Layer: Network Layer Design Issues; Routing Algorithms: Static/ Dynamic , Direct/ Indirect, Shortest Path Routing, Flooding, Distance Vector Routing , Link State Routing, Hierarchical Routing, Broadcast Routing, Multicast Routing, Congestion Control Algorithms: General Principal of Congestion Control, congestion prevention polices, Load shedding, Jitter Control, IP Addressing: IP- Protocol, IP-Address Classes (A, B, C, D, E), Broadcast address, Multicast address, Network Mask, Subnetting, Internet control Protocol-ICMP, IGMP, Mobile-IP, IPv6</p>
4	<p>Transport and Application Support Protocols,: Transport service, Service Primitives, Internet, and Transport Protocols: TCP/UDP, Remote Procedure Calls, RTP, Session Layer: Token Concept Presentation Layer: Data Encryption and Data Security, Message Authentication, Application Layer: Domain Name Service, Telnet, FTP, SMTP, SNMP, MIME, POP, IMAP, WWW,HTTP</p>
5	<p>Advance Networks: Concept of 4G Networks, Introduction of 802.16, 802.20, Bluetooth, Infrared, MANET, Sensor Networks. Technical Issues of Advanced Networks, Mobile Ad-hoc Networks: Introductory concepts, Destination-Sequenced Distance Vector protocol, Ad Hoc On-Demand Distance Vector protocol, Wireless Sensor Networks: Sensor networks overview: Introduction, applications, design issues, requirements.</p>
6	<p>Internet Basics: Concept and Characteristics of Internet , Intranet, Extranet . Structure of Internet through Client Sever . Domain name , Website Development formats for Business Applications.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
402	Software Testing	3L-1T-0P=4C	2018
<p>Course Objective : The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization. It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry. The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive medias, Internet basics.</p>			
<p>Expected Outcome : At the end of this course, student should be able to:</p> <ul style="list-style-type: none"> • Understand basic concepts and terminology of information technology. • Have a basic understanding of personal computers and their operations. • Be able to identify issues related to information security. 			
<p>References (Books, Websites etc) :</p> <ul style="list-style-type: none"> • Software Testing by Renu Rajani and Pradeep Oak • Software Engineering by Roger S. Pressman • Software Testing Principles And Practices by Srinivasan Desikan and Gopaldaswamy • Ramesh 			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
Course Plan			
Unit	Contents		
1	<p>Introduction to Software Concepts: Introduction, Definition and Characteristics of oftware, Importance of Software, Software types, Software components, Members involved in software development, Overview of SDLC.</p>		
2	<p>Introduction to Testing: What is testing, Why, When and How Testing, Importance of Testing. Testing goals and characteristics, Testing during planning stage, Testing during design stage, Testing during coding stage.</p>		

3	<p>Software Testing Lifecycle & Software Testing Process: Overview of STLC, Principles of Verification and Validation, Techniques of verification (review, inspections, walkthroughs), V testing model Software development V & V Software acquisition V & V Software supply V & V Software Testing Process: Testing process: a) Plan b) Develop c) Execute d) Manage Conventional Software Architectures.</p>
4	<p>Software Testing Strategies: Test strategies for conventional software</p> <ul style="list-style-type: none"> a) Unit Testing b) Integration Testing <ul style="list-style-type: none"> i) Top-Down Integration ii) Bottom-Up Integration iii) Regression Testing iv) Smoke Testing v) Integration test documents c) Validation Testing <ul style="list-style-type: none"> a. Test Criteria b. Configuration Review c. Alpha and Beta Testing a) System Testing <ul style="list-style-type: none"> i) Recovery Testing ii) Security Testing iii) Stress Testing iv) Performance Testing <p>Difference between Testing and Debugging, The Art of Debugging</p> <ul style="list-style-type: none"> a) Debugging Process b) Debugging strategies c) Correcting the Error.

5	<p>Software Testing Techniques:</p> <p>Overview of Black-Box and White-Box Testing, Methods of White-box Testing:</p> <ol style="list-style-type: none"> a) Basis Path Testing <ol style="list-style-type: none"> i) Flow Graph Notation ii) Independent Program Paths iii) Deriving Test Cases iv) Graph Matrices b) Control Structure Testing <ol style="list-style-type: none"> i) Conditional Testing ii) Data Flow Testing iii) Loop Testing <ul style="list-style-type: none"> • Simple Loops • Nested Loops • Concatenated Loop <p>Methods of Black-Box Testing:</p> <ol style="list-style-type: none"> a) Graph Based Testing b) Equivalence Partitioning c) Boundary Value Analysis d) Orthogonal Array Testing <p>Testing of client/server Architectures, Testing Documentation and Help Facilities, Testing for Real-Time Systems:</p> <ol style="list-style-type: none"> a) Task Testing b) Behavioral Testing c) Intertask Testing d) System Testing <p>Testing Patterns:</p> <ol style="list-style-type: none"> a) Pair Testing b) Separate Test Interface c) Scenario Testing
6	<p>Risk Management:</p> <p>Introduction and Characteristics of Risks, Role of Testing in Risk Management, Types of Risks:</p> <ol style="list-style-type: none"> a) Project Risks b) Technical Risks c) Business Risks d) Predictable Risks e) Unpredictable Risks

Course Number	Course Name	L-T-P- Credits	Year of Introduction
403	Java Programming	3L-1T-0P=4C	2018
Course Objective : The Objectives of the course is to introduce Object Oriented Programming using Java, Make student to use Java for implementing OO Concepts and also make them familiarize to use JDK and Java API for concurrent programming, input/output, Java data structures and GUI (AWT) programming using java.			
Expected Outcome : At the end of this course, student should be able to understand <ul style="list-style-type: none"> • Design interfaces, abstract and concrete classes • Use concurrent programming, java Collections and utility classes • Able to achieve object persistence using object serialization. • Design applications using event driven programming. • Get the main features of Java Programming for Business Applications 			
References (Books, Websites etc) : <ul style="list-style-type: none"> • Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007 • Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008 • Bruce Eckel , Thinking In Java – Printice Hall, Fourth Edition 			
Suggested MOOC: Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction to Java: Features of Java, Java compiler, JVM, Garbage collection, Data types, concept of class and object, java naming conventions wrapper classes, control structures in java, arrays in java, array of objects.		
2	Class and Object Concepts: Concepts of OOP, Defining a class, creating objects from class, adding attributes and methods to the class, using constructors, Passing values to the functions – pass by value, pass by reference, Function overloading. Modifiers – public, private, protected, default, static, final, Concept of package, Introduction to Exception Handling.		
3	Inheritance and Polymorphism: Concept and importance of inheritance, is-a relationship, types of inheritance, Polymorphism – function overriding, dynamic method dispatch. Using abstract and final keywords with class declaration, Concept of interface and class.		

4	<p>Concurrent Programming : Concept of threads, lifecycle of threads, creating threads, Thread class, Runnable interface, Introduction to Tread Synchronization .</p>
5	<p>Java Input/Output: Concept of streams, types of streams – byte streams, character streams. The Console: System.out, System.in, and System.err, InputStream class, OutputStream class, File class, FileInputStreams, File OutputStream, Reader class, Writer class, FileReader, FileWriter. Buffered streams – BufferedInputStream, BufferedOutputStream, BufferedReader, BufferedWriter. Object Streams</p>
6	<p>Java Applets and GUI: Applet concept, creating basic applet, applet lifecycle, controlling applet content, introduction to AWT controls – Button, Lable, TextField, TextArea, List, Checkbox and RadioButtons, Scrollbar, Menu etc. (Only AWT Component)</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404	Operations Research	3L-1T-0P=4C	2018
<p>Course Objective : Main objective of this paper is to learn historical development of O.R., need and characteristics of OR in business and management. Formulate a real-world problem as a mathematical programming model. To aware the students about the basic terms in operations research. Students will be able to formulate and solve optimization problems related to job/ work assignments.</p>			
<p>Expected Outcome : At the end of this course, student should be able to understand:</p> <ul style="list-style-type: none"> • Students will be able to describe characteristics and scope of OR. • Students will be able to define and formulate mathematical problems. • Students will be able to select optimal problems solving techniques for a given problem using LP. • Students will be able to formulate and solve transportation, travelling sales problems. • Students will be able to demonstrate and solve simple models of Game theory. • Students will be able to solve different problems related to Network. 			
<p>References (Books, Websites etc) :</p> <ul style="list-style-type: none"> ○ Operations Research: An Introduction by Hamdy Taha, Pearson ○ Operations Research by A M Natarajan, P Balasubramani, A Tamilarasi, Pearson Education Inc ○ Operations Research by P Mariappan, Pearson ○ Operations Research by H N wagner, Prentice hall. ○ Optimization in Operations Research by Ronald Rardin, Pearson Education Inc. ○ Operations Research by R. Paneerselvam, Prentice Hall of India Pvt. Ltd. ○ Quantitative Techniques in Management by N D Vohra, Tata McGraw-Hill 			
Suggested MOOC : List of Open Source Software/learning website: www.nptel.ac.in/			
Course Plan			
Unit	Contents		
1	<p>Basics of Operation Research : Origin of Operation Research, Historical Standpoint, Methodology, Different Phases, Characteristics, Scope and Application of Operations Research, limitations of OR.</p>		
2	<p>Linear Programming : Introduction, Requirement of LP, Basic Assumptions, Formulation of LP, General Statement of LP, Solution techniques of LP: Graphical Methods, Analytical Methods: Simplex Method , Concept of slack, surplus & artificial variables. Manual solutions of L.P.P. upto 3 iterations. Minimization & Maximization Problems.</p> <p>Special Cases – i)Alternative solution (ii) Unbounded solutions (iii) Infeasible solutions to be shown graphically & also by simplex method.</p>		

3	<p>Transportation Model : North-West Corner rule, Least-cost method, Vogel’s approximation method, Final Transportation cost using MODI method, Special cases : i)Degeneracy in transportation problem, ii)unbalanced supply and demand, iii)profit maximization problem iv) prohibited transportation routes</p>
4	<p>Assignment Model: Hungarian method for solution, non square matrix, Special Cases :i) unbalanced problem ii)restriction on assignments iii)Maximization problem iv)alternate solution</p>
5	<p>Network Analysis : Terms used in network analysis, Network or arrow diagram, Fulkerson’s rule, Programme Evaluation and Review Technique (PERT), Critical path method (CPM), Time estimates for activities. Probability of completion of project. Determination of floats (total, free, independent & interfering) , Crashing of Simple Networks.</p>
6	<p>Decision Theory And Decision Tree: Introduction, Decision under certainty, Decision under risk, Payoff table, Regret table, Decision making under uncertainty, Maximin & Maximax criteria,Minimax Regret criterion, Laplace criterion, Hurwicz criterion, Expected Monetary Value criterion, Expected Value of Perfect Information (E.V.P. I), Expected Opportunity Loss (E.O.L.), Decision Tree, Simple examples</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405	Entrepreneurship Development	3L-1T-0P=4C	2018
Course Objectives : To develop an understanding of entrepreneurship concepts To provide sufficient knowledge to students aspiring to be entrepreneurs To provide ways and means to start an enterprise			
Expected Outcome : At the end of this course, student should be able to understand <ul style="list-style-type: none"> • Evolution, definition, characteristics, function and types of entrepreneurs. • Role of Entrepreneurship in Economic Development. • Business Opportunity Identification • Importance of Business plan • Support Agencies • Concept of Intellectual property rights 			
Reference Books : <ul style="list-style-type: none"> • Dr. Dilip Sarwate, Entrepreneurship Development and Project Management, Everest Publishing house • Vasant Desai, Dynamics of Entrepreneurship development and Management, Himalaya Publishing House • David H Holt, Entrepreneurship and New Venture Creation, Prentice Hall • Paul Ajit Kumar, Paul, Entrepreneurship Development, Himalaya Publishing House Mumbai • Raj Shankar – “Entrepreneurship: Theory and Practice” – Vijay Nicole Imprints Pvt. Ltd. • S.S. Khanka – Entrepreneurial Development – S. Chand And Company Ltd., New Delhi – 1999 Websites <ul style="list-style-type: none"> • www.startupindia.gov.in • www.india.gov.in • http://www.makeinindia.com/home 			
Suggested MOOC : Note: <ol style="list-style-type: none"> 1. Case studies to be discussed on various aspects mentioned in the syllabus. 2. Visiting/Interaction with successful local entrepreneurs should be done. 			
Course Plan			
Unit	Contents		
1	Introduction to Entrepreneurship : Evolution, Concept and definition of an entrepreneur, Characteristics, function and types of entrepreneurs, Qualities of an Entrepreneur, Growth of Entrepreneurship in India, role of Entrepreneurship in Economic Development, Women Entrepreneurship in India		
2	Business Opportunity Identification : Search for Business Ideas, Market Assessment, Sources of Information, Environmental Analysis, Entrepreneurial opportunities in India, Business Opportunity identification and selection		

3	<p>Business Plan Preparation : Meaning of Business plan, Significance and Contents of a Business Plan, developing Business Plan, Presenting Business Plan, Elevator Pitch</p>
4	<p>Project Finance : Types of Finance, Sources of Finance, Venture Capital, Start-up and Make-in-India program, MUDRA</p>
5	<p>Support Agencies : Support to Entrepreneurs by DIC, SIDBI, SIDCO, SSIB, NSIC, SISI, Other Institutions etc. Entrepreneurship promotion by Government through various schemes.</p>
6	<p>Entrepreneurial Motivation and Development : Factors motivating entrepreneurs, Basic course contents of EDP's Evaluation of EDP's, Organizations involved in EDP's. Basics of Intellectual property rights</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
406	BCA-II-SEM-IV	2	2018
Course Objective :			
To develop logical abilities of students using Java Programming language			
Expected Outcome: Provide foundation for programming and Enable the students to analyze and efficiently solve the problems using Java Programming.			
References (Books, Websites etc) :

Course Plan			
Unit	Contents		
1	Introduction : Basic concepts: Income, agricultural income, person, assessee, assessment year, previous year, gross total income, total income, maximum marginal rate of tax; Permanent Account Number (PAN) Residential status; Scope of total income on the basis of residential status Exempted income under section 10		
2	Direct and Indirect Tax: Income from Salaries; Income from house property, Profits and gains of business or profession; Capital gains; Income from other sources, Deductions from gross total income; Rebates and reliefs Computation of total income of individuals and firms; Tax liability of an individual Indirect taxes.		
3	Overview of GST: Overview Of GST: Introduction to GST-Key Concepts – Taxes under GST – Central GST – State GST – Union Territory GST – Integrated GST - Cess		
Course Number	Course Name	L-T-P- Credits	Year of Introduction

408	YOGA - I	2L-0T-0P=2C	2018
Course Objective: <ul style="list-style-type: none"> To introduce the practice of yoga and its benefits to students To impart practices of basic yogic kriyas 			
Expected Outcome : Students will be able to understand the advantages of Yoga and practice basic yog kriyas			
Reference Books : <ul style="list-style-type: none"> Yoga – Asanas, Pranayam, Mudras, Kriya, Vivekananda Ashram Yoga – Sivanand Yog Vedanta Center 			
Online Resources: https://www.yogatoday.com/ https://www.youtube.com/user/yogatoday https://m.youtube.com/user/yogawithadriene/playlists			
MOOCs: Swayam			
Course Plan			
Unit	Contents		
1	i) Origin of Yoga & its brief development. ii) Meaning of Yoga & its importance iii) Yoga as a Science of Art (Yoga Philosophy). iv) Meaning of meditation and its types and principles.		
2	i) Classification of Yoga/Types of Yoga ii) Hatha Yoga , Raja Yoga, Laya Yoga, Bhakti Yoga, Gyan Yoga, Karma Yoga. iii) Asthang Yoga.		
3	i) Principles of Yogic Practices. ii) Meaning of Asana, its types and principles. iii) Meaning of Pranayama, its types and principles. iv) Meaning of Kriya its types and principles. v) Yogic therapies and modern concept of Yoga vi) Naturopathy, Hydrotherapy, Electrotherapy, Messothrapy, Acupressure, acupuncture.		

SEMESTER V

Course Number	Course Name	L-T-P- Credits	Year of Introduction
501	Introduction to the Internet Technologies	3L-1T-0P = 4C	2018
<p>Course Objective :</p> <ul style="list-style-type: none"> To teach the basic internet concepts and train them to develop internet applications. An overview of the HTML5 specification Practical knowledge to implement new HTML5 elements and attributes. Overview of Javascript 			
<p>Pre-requisites: Preliminary knowledge of computer, their operations and applications.</p>			
<p>Expected Outcome :</p> <ul style="list-style-type: none"> Describe and use client-side technologies of the World Wide Web: HTML5, CSS3, Javascript. To implement different constructs and programming techniques provided by Java Script. 			
<p>References (Books, Websites etc) :</p> <p>Text Books:</p> <ol style="list-style-type: none"> The Complete Reference HTML -Thomas A.Powell The ABC's of JavaScript –Lee Purcell & May Jane Mara Internet Technology at work - Hofstetterfred Beginning HTML5 & CSS3 - Christopher Murphy, Richard Clark &oliStudholme <p>Reference Books :</p> <ol style="list-style-type: none"> Web Enabled Commercial Application Development using HTML, DHTML, JavaScript, Perl CGL –Bayross Ivan Internet Technology at work Hofstetterfred Web Design Technology-D.P. Nagpal- S. Chand Technical JavaScript Bible <p>Reference Sites:</p> <ol style="list-style-type: none"> www.w3schools.com www.devguru.com 			
<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com www.coursera.com</p>			
Course Plan			
Unit	Contents		
1	<p>Overview Of Internet And Intranet: Understanding internet and its need, concept of intranet, difference between internet and intranet, a brief history, internet applications, Internet Service Providers (ISP) concept of client and server, concept of a web browser and web server, communicating on the internet, concept of domain- Physical domain, virtual domain,</p>		

	registering a domain, need of IP addressing, process to assign IP addresses, World Wide Web
2	<p>Introduction To HTML: Introduction: Overview of HTML, need of HTML, Use of HTML HTML Tags: concept of Tag, types of HTML tags, structure of HTML program Text formatting through HTML: Paragraph breaks, horizontal rules, heading style, line breaks, background and BGcolor attributes Emphasizing material in a web page: Heading styles, drawing lines, text styles. Text styles and other text effects-centering, spacing, controlling font size & color Lists: Using unordered, ordered, definition lists Adding Graphics To HTML Documents: Using Image tag, attributes of Image tag, changing width & height of image</p>
3	<p>Tables, Frames And Linking Documents: Handling Tables: To define header rows & data rows, use of caption tag, changing height & width of table, cellpadding, cellspacing, bgcolor, colspan, rowspan Linking Documents: Concept of hyperlink, types of hyperlinks, linking to the beginning of document, linking to a particular location in a document, Images as hyperlinks Frames: Introduction To frames, using frames & frameset tags, named frames. Forms : INPUT tag, TYPE Attribute : text, password, button, checkbox, radio button, image</p>
4	<p>Introduction to CSS: Introducing CSS, Types of style sheets: inline, embedded and external Style. Working with CSS properties: text properties, color and background properties, border and shading, box and block properties, positioning with CSS, Various types of CSS selectors: universal, class, ID, child, descendent, adjacent sibling, attribute and query.</p>
5	<p>Introduction To HTML5 and CSS3: Features of HTML5 and CSS3 with few elements.</p>
6	<p>Introduction To JavaScript: Introduction to scripting: overview of Java Script, Advantages, Features of JavaScript, Client side java Script, writing JavaScript into HTML, First Hello World Program Basic JavaScript Techniques: Data types, literals, variables and operators, Java Script arrays, dense array, operators, expressions Java Script Programming Construct: Assignment, data declaration, if, switch, while, for, do while, label, break, Continue Functions and Objects-Built-In Function and User defined function. User defined functions, function declaration, passing parameters, variable scope, return values, recursive functions, String, Date, Math Objects Dialog boxes -Alert dialog box, prompt dialog box, confirm dialog box, Working with form- Forms and Form elements and the associated events. Form validation.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
502	Object Oriented Analysis and Design	3L-1T-0P – 4C	2018
Course Objective :			
<ul style="list-style-type: none"> To Understand concept of system design using UML. 2. To understand system development through object oriented techniques. 			
Expected Outcome :			
At the end of course students will know –			
<ul style="list-style-type: none"> Advantages of using OOP platforms for development. Process carried out while designing Object Oriented Systems. 			
References (Books, Websites etc) :			
<ul style="list-style-type: none"> The Unified Modeling Language User Guide by Grady Booch, James Raumbaugh, Ivar Jacobson. Object Oriented Software Engineering by Ivar Jacobson 3. Software Engineering by Pressman 			
Suggested MOOC : Refer NPTEL			
Course Plan			
Unit	Contents		
1	Object Oriented Concepts, Modeling and UML: What is Object Orientation : (Introduction to class, object, inheritance, polymorphism), Model : Introduction of Modeling, Object Oriented Modeling , Object oriented system development: Function/data methods, Object oriented analysis, Object oriented construction, Object oriented testing		
2	Iterative Development and UML: Understanding requirements, Rational Unified process & RUP Phases – Inception, Elaboration, Construction, Transition UML : Designing Tool for OOAD : Introduction to UML, Overview of UML, Conceptual Model of UML, Diagrams in UML, Advantages of UML Behavioral Modeling Use Case Diagram : Realization of Use Cases, Finding Actors, Defining Relations among Use case, Writing Use Cases, Activity Diagram		
3	Basic and Advanced Structural Modeling Class Diagram : Identifying the elements of an object model, Identifying classes and objects, Specifying the attributes, Defining operations, Finalizing the object definition, Advanced class Modelling, Interface, Types and Roles Diagrams Based on Classes : State Chart Diagram, Package Diagram, Object Diagram		

4	<p>Interaction Modelling :</p> <p>Introduction to Interaction Diagrams, Need of Interaction Diagrams, Interaction Diagrams, Collaboration Diagram, Sequence Diagram</p>
5	<p>Architectural Modeling</p> <p>Component Diagram: Need of Component Diagram, Realization of Components, Relating Components.</p> <p>Deployment Diagram : Purpose of deployment diagram, Architecture of System, Different Architectures used for System, Representing Architecture using Deployment Diagram</p>
6	<p>Object Oriented Programming Styles</p> <p>Object Oriented Style with reference to Reusability and Extensibility, Robustness, 3 Programming in the Large, Discussion on case Studies e.g. Library Management System, Hospital Management System, . Online Shopping, Nukari.com website, Matrimonial website</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
503	C# Programming	3L-1T-0P-=4C	2018
Course Objectives <ul style="list-style-type: none"> • Learn the fundamentals of C# programming in Visual Studio. • To Use .Net Framework • To Handle Exceptions in C# • To implement Object oriented technology in C# • To operate with Arrays • To use Class Designer and Object Test Bench tools. 			
Expected Outcome : This COURSE focuses on building applications with a graphical user interface (GUI) for the Microsoft Windows operating system although GUI interfaces on other operating systems, and on the Web Topics include: event-driven programming, Win32 API, dialog boxes and standard GUI controls, dynamic link libraries, .NET Framework. The C# programming languages will be used to build applications.			
Reference Books: <ul style="list-style-type: none"> • The Complete Visual C# Programmer's Guide • A Programmer's Introduction to C# 2.0, Third Edition • 3. C# and the .NET Platform, Second Edition 			
Course Plan			
UNIT	Contents		
1	The .net Framework: Introduction, common language runtime, common type system, common language specification, the base class library, the .net class library, Intermediate language, Just in time compilation, garbage collection, assemblies, web services, COM, localization		
2	Introduction to C # : Evaluation of C#, characteristics of C#, application of C#,difference between C++ and C#, difference between Java and C#.Introduction to C# environment : The .NET strategy, the origins of the .NET technology, the .NET framework, the common language runtime, framework base classes, user and programs interface, visual studio .NET, .NET languages, benefits of the .NET approach, C# and .NET. Data types, identifiers, variables, constants, C# statements, OOPs concept,array and strings, operators, control statements, type conversions, Mathematical functions.		
3	Classes and Objects : Basic principles of OOP's, class, objects, constructors, static members, static constructors, private constructors, copy constructors, destructors, member initialization, the this reference, nesting of classes, constant members, read only members, properties, indexers.Inheritance and polymorphism : overloading, inheritance, overriding, interfaces		
4	Visual studio IDE features, introduction to Window forms, components, control: textbox, label, linklabel, status bar, checkedlistbox, combobox, listbox, listview, radiobutton, button, panel, groupbox, dialog box, menu control, properties, methods, events of controls.		
5	ADO.net: the component model, creating database connection, database command, data repeater, connecting to data sources, choosing a .net data provider, manage a connection, building		

	command objects, executing commands, building datasets and datatables, data adapter
6	Managing Console I/O operations : Console class, console input, console output, formatted output, numeric formatting, standard numeric format, custom numeric format. Managing Errors and Exceptions : Types of errors, exceptions, syntax of exception handling code, multiple catch statement, the exception hierarchy, general catch handler, using final statement, nested try blocks, throwing our own exceptions, checked and unchecked operators, using exceptions for debugging.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504	Graph Theory	3L-1T-0P =4C	2018-19
Course Objective :			
The aims of this Graph theory is a delightful playground for the exploration of proof techniques in discrete mathematics and its results have applications in many areas of the computing ,social and natural science			
Expected Outcome :			
At the end of the course student should be able to:			
<ul style="list-style-type: none"> • Use graphs as models in a variety of areas. • Formulate several real world problems in mathematical terms 			
References (Books, Websites etc) :			
Introduction to Graph theory - PHI by Douglas B.West			
Discrete Mathematics and its Applications Edition 6 th - Tata McGraw Hill by Kenneth H. Rosen			
Suggested MOOC :			
NPTEL			
Course Plan			
Unit	Contents		
1	Fundamental Concepts : Definition, Graph Models, Sub Graph, Decomposition and special Graphs, Connection in Graphs, Bipartite Graph, Degree, Directed Graph, Undirected Graph, weighted graph, Regular Graph, dual graph, Representing Graph in computer memory, Examples		
2	Connectivity: Walk, paths, trail, circuits, Connected Graph, Bridge, Isomorphism, Eulerian Circuits, Euler's path, Euler graph, Hamiltonian Graph and Graph Algorithm, Konigsberge Bridge problem, shortest path problems, city route,puzzle problem, Seating arrangement problem, Travelling salesman problem, Examples		
3	Algorithms : Fleury's algorithm, Warshall's algorithm, Floyde's algorithm, Dijkstra's algorithm, Depth-First Search/ Breadth First search in Directed Graph, Examples		
4	Coloring of Graphs and planarity: Vertex Coloring and upper bonds, Graph with Large Chromatic Number, 4 color theorem,Applications of graph coloring, Planar Graph, Euler's Formula, Homomorphism, Theorems, Examples		
5	Trees and Distance: Concept of Trees, Definition and properties of Trees, Application of Trees, Trees as Models, Game Trees, Tree Traversal, Infix and Postfix notation of arithmetic expression, Binary Trees and its Properties, Binary Search Trees, Spanning Tree, Minimum spanning Tree, Depth First search, Breadth –First search, Back tracking applications, Kruskal algorithm, Prims algorithm, Huffman's algorithm Excercises		
6	Matchings : Matching, Hall's Condition, MinMax Theorem, covers, Maximum Bipartite Matching, Weighted Bipartite Matching, Maximum Networks Flow, Examples		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
506	Lab on Internet Technology and C# Programming	3L-1T-0P=4C	2018-19
Course Objective : <ul style="list-style-type: none"> To teach the basic internet concepts and train them to develop internet applications. An overview of the HTML5 specification Practical knowledge to implement new HTML5 elements and attributes. Overview of Javascript Learn the fundamentals of C# programming in Visual Studio. Suggested MOOC : Swayam			
Course Plan			
Unit	Contents		
Internet Technology:			
Design A webpage which have student's biodata with proper formatting and having student name as title.			
Design a form using HTML that accepts information about your qualification, extra curricular activities, achievements, skill sets, hobbies, and expectation for a particular job.			
Design a website for a class which shows student's list linked with their biodata pages			

Design a website for PNG jewelers, having images of different types of jewelries which are linked with the pages giving details about the items.

Design a Style sheet to give following effects
The first letter of the paragraph should have 150% font size
The first line of the paragraph should have purple as background color and white as the fore color.

Design a website for the college which lists all the faculties(ordered lists), courses (definition lists) every course explains details (fees, duration, intake capacity) as unordered list.

Design a website for Samsung products using frames having design as-

<logo>	<title>		
<Links to various products>	<images products>	of	<form to purchase the product>

Design a website for a college showing features of the university, college and list of different courses running in the institute. Course names have links with the pages having details of the courses having similar design using stylesheets.

Design a CSS(inline) that displays the regular text at the center with green as background color and white as fore color and should be bold, using class

Design a web page to display the following output

- List of subjects
 - Semester III
 - C++
 - Dot.Net
 - Semester IV
 - Java
 - Industrial Projects
- Internet Programming
- a. HTML
 - b. VBScript
 - c. Java Script
 - d. DHTML

Design a webpage which accepts users information with validations(name, std code(should not exceed 4 digits),landline number(no. of digits should be between 5 to 7), mobile number(exactly 10 digits),email(should have @ and .))

Write a HTML code to display timetable of your class.

Write a HTML code to display the mark sheet of entered seat number

Write an HTML code to accept the students's

Design a website which accepts a number from user and performs the selected operation(even/odd, prime/not prime, positive/negative)
Design a webpage which provides calculator facilities.
Design webpage which accepts no of lines and prints it in the form of triangular shaped pyramid.
Write JavaScript to display table of numbers 2-10 (use form and form elements)
Write a JavaScript code which contains “show” button. When user clicks on show button, first 10 terms of Fibonacci series will be displayed in text box on another HTML page. This page contains button “back”. With this button user can come back to original page.
Create a form having textboxes, radio button and check boxes and reset button. On clicking the reset button the entire form should be reset.
Design a webpage for a restaurant which accepts online order from user and shows the calculated total amount.
Accept login name and password from user and display biodata of the corresponding user.
Design a page for a user to create his login by accepting desired login name, password and confirm the password.
Accept data of a student wants to appear for entrance(name, marks at matriculation, higher secondary and graduation). Ask student to select the course he want to take admission. If the student scores above 55 at matriculation, above 60 at higher secondary and graduation then he is eligible for any course. If he has science degree or maths at 11th and 12th then only he is eligible for MCA.Design the form accordingly. Give the according message.
Design a webpage to conduct aptitude for maths. The test is objective, each question having 4 options. Let the students select the option. For every correct option he scores 2 marks and for every wrong answer he loose 1 mark. Calculate & show score of a student.
Design the registration form for a Web site and when the user clicks on Submit button the login form should be appeared on screen.
Create a purchase order form using Javascript.
Create a Java script code with show button. User click on show button, all string functions should be implemented.
Write JAVA script that finds occurrence of letter “m” in the string entered by user in textbox and replace it with “a” and write string to page.
Develop HTML form to accept mathematical expression in one textbox and display its result in another textbox after clicking on button showing mathematical operations.

C#	
SET-I	Basic Console Applications

	<ul style="list-style-type: none"> • Write a C# Program to design simple calculator • Write a C# Program to Check whether the Entered Number is Even or Odd. • Write a C# Program to Swap 2 Numbers • Write a C# Program to Get a Number and Display the Sum of the Digits • Write a C# Program to Get a Number and Display the Number with its Reverse • Write a Program in C# to demonstrate Command line arguments processing • Write a Program in C# to demonstrate boxing and Unboxing.
SET-II	Date and Time
	<ul style="list-style-type: none"> • Write a C# Program to Display the Date in Various Formats • Write a C# Program to Check Whether the Entered Year is a Leap Year or Not • Write a C# Program to find difference between Two Dates
SET-III	Classes
	<ul style="list-style-type: none"> • Write a program to demonstrate abstract class and abstract methods in C#. • Find the sum of all the elements present in a jagged array of 3 inner arrays. • Write a program to demonstrate Operator overloading. • Demonstrate arrays of interface types (for runtime polymorphism) with a C# program.
SET-IV	<ul style="list-style-type: none"> • Consider the Database STUDENT consisting of following tables: Course (C_ID: int, C_Name: string) • Student (RollNo:int, S_Name: string, Address: string, C_ID: int, Admissiyear: int) Develop suitable windows application using C#.NET having following options: <ol style="list-style-type: none"> 1. Entering new course details. 2. Entering new student details. 3. Display the details of students (in a Grid) who belong to a particular course. 4. Display the details of the students who have taken admission in a particular year • write a program in C# to demonstrate error handling.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
507	Minor Project II	2 Credits	2018-19

Course Objective :

Student has to complete a Minor project work under the guidance of the faculty member in the institute. Students has to develop any software using Java in a group of 2 to 3. Each team has to give 4 minimum PPT presentation to the Project Guide during the semester. Final project viva will be conducted as per University Time Table.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
508	Social Media Management	2L-0T-0P=2C	2018
Course Objective: This Course Teaches student to use social media strategically to create value for a client or organization.			
Expected Outcome : <ul style="list-style-type: none"> Students will learn by doing assignments focusing on social media, post writing and publishing, management and measurement tools, a social media audit, editorial calendar and crises management. Students will master the skills necessary to become successful social media managers. 			
Reference Books : <ul style="list-style-type: none"> Guy Kawasaki & Peg Fitzpatrick, “The art of social media: power tips for power users Social media marketing all in one for dummies, Jan Zimmerman & Deborah N Social media explained by Mark W. Schaefer 			
Online resources http://www.gov.pe.ca/photos/original/IPEI_ebiz_smmkt.pdf https://www.coursehero.com/file/10513028/Media-Management-Notes/			
MOOCs: Swayam			
Course Plan			
Unit	Contents		
1	Introduction To Social Media: Introduction to Social Media, importance of social Media, History and evolution of Social Media, Managing Information, Aggregators. Facebook, Twitter, Instagram, LinkedIn, Youtube, Blogs.		
2	Using Social Media: Strategy Plan for Social Media Management, Touchpoint, Analysis Scheduling, Creating Content, Managing Content programmes, Planning Worksheet, Social media campaign.		
3	Evaluating Social Media: <ul style="list-style-type: none"> Evaluation of Social Media Platforms Tools to manage and measure performance of social media content and campaigns Handling critical issues in social media management and legal aspects of social media.		

4	Setting-up own professional site Content management, design, connectivity with social media
	Assignments: <ol style="list-style-type: none">1.Explain atleast one social media management tool in detail.2.Describe social media analytics tool in bried with example.3.Detailed social media campmaign: The campaign can be any example presented in social media for Lead Generation. Describe the objectives for campaign, outline the tools, preapare budget for campaign.4.Budget for social media plan: Based on the understanding of your client, prepare a budget for social media management. Include the individual cost of your tactis, your proposed social media campaign and social media tools. Include the total cost as a bottom line of your budget. Include the ROI of your plan and why that budget should be allocated to social media. <p>List different types of content to be used in creating brand by using social media campaigns. Describe merits and demerits of each type of content used in social media.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
508	Road Safety Management	2L-0T-0P=2C	2018
<p>Course Objective: The vehicle population in India is growing at an exponential rate. This phenomenon is bringing in its wake a host of health related, environmental, safety and behavioral problems in the society. The problem is compounded due to absence of effective means of mass transportation system in most big cities in India.</p>			
<p>Reference Books :</p> <ul style="list-style-type: none"> • Pratibha Shastri Ranade , Road Safety Management, ICFAI University • Vijay Vinayak Revankar, Road Safety – Vimleshwar Automobile Industry and Road Safety Community Forum 			
<p>MOOCs: Alison</p>			
Course Plan			
Unit	Contents		
1	<p>Introduction to Road Safety Management: Importance and need of road safety management.</p>		
2	<p>Management of Traffic and Traffic Rules: Use of traffic signals, signs by hand, knowledge/applications of automatic signals, parking rules, driving around, Traffic islands ,traffic joints, subways and flyovers. Signs of roads: meaning of yellow, green and red lights, zebra crossings, bus stops, use of road by physically disadvantaged persons, elderly persons, women and children, special right of way for ambulance, firefighting vehicles, school bus and V.I.P vehicles.</p>		
3	<p>Management of Road Mishaps and Accidents: First aid to accident victims- First aid techniques, co-ordination with hospitals and other health centres for emergency treatment of accident victims, role of Insurance companies in providing relief to accidents victims, Management of Ambulance Services, Importance of voluntary blood donation in saving accident victims,Rehabilitation of persons affected by accidents. Qualities of a good Driver: Good health, tolerance, responsibility, knowledge of rules and laws, self confidence, politeness, familiarity with the vehicle and its maintenance requirements, self discipline.</p>		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
508	Event Management	2L-0T-0P=2C	2018
Course Objective: The basic purpose and spirit of this course is to expose the students to hands- on experience of event management.			
Expected Outcome : The students are oriented to event management in order to strengthen their skills of planning, organizing and other such management functional skills.			
Reference Books : <ul style="list-style-type: none"> • S. R. Singh, Event Management, HPH. • Alex Genadelik, Event Planning: Management & Marketing For Successful Events: Become an event planning pro & create a successful event series 			
Online Resources: https://blog.komodoplatform.com/notes-on-social-media-and-community-management-for-blockchain-cryptocurrency-and-ico-projects-4d0f328bdfb3			
MOOCs: Alison			
Course Plan			
Unit	Contents		
1	Introduction to Event Management: The concept of event. need and importance of events.		
2	Types of Events : Different types of event in Corporates, Social Programmes and Private Programmes. Following units are entirely based on practice part of the event management		
3	Assessment of Events : Post event assessment of any 05 programmes A student or a group of 03 students shall be assigned the event which has taken place in near past at any place and they shall make an inquiry into its success and effectiveness by rating them on the basis of appropriate parameters and shall submit the assignment to the respective teacher . Preparation of Learning Value report : A student shall prepare a report on what he learnt from the events and submit it to the concerned teacher. The report shall include mainly the description of occasion, the person involved and what guiding principles they have received from them.		

SEMESTER VI

Course Number	Course Name	L-T-P- Credits	Year of Introduction
601	Data Warehousing And Data Mining	3L-1T-0P= 4C	2018
Course Objective : <ul style="list-style-type: none"> To introduce the basic concepts of Data Warehouse and Data Mining techniques. Examine the types of the data to be mined and apply preprocessing methods on raw data. Discover interesting patterns, analyse and estimate the accuracy of the algorithms. 			
Expected Outcome : At the end of this course, student should be able to understand <ul style="list-style-type: none"> Process raw data to make it suitable for various data mining algorithms. Discover and measure interesting patterns from different kinds of databases. Apply the techniques of clustering, classification, association finding, feature selection and visualization to real world data. 			
References (Books, Websites etc) : <ul style="list-style-type: none"> Jiawei Han and Micheline Kamber , “Data Mining Concepts and Techniques” ELSEVIER M.Humphires, M.Hawkins, M.Dy,“Data Warehousing: Architecture and Implementation”, Pearson Education Kargupta, Joshi., “Data Mining: Next Generation Challenges and Future Directions”, Prentice Hall of India 			
Suggested MOOC: Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction to Data warehousing: Data Warehousing, Difference between operational database system and data warehouse, Data Warehouse Users, Benefits of Data Warehousing, Metadata, Classification of Metadata, and Importance of Metadata. Data Marts, Reasons for creating Data Marts, Building Data Marts: Top down Approach & Bottom up Approach, Data Warehouse Architecture, Two Tier Architecture, Three Tier Architecture. Data Warehouse Schema, Star, Snow Flake & Fact Constellation Schema. OLAP, Need for OLAP, OLAP Operations, OLAP Models.		
2	Data Preprocessing: Need, Objectives and Techniques, Descriptive data summarization, Data Cleaning, Data Integration, Data Transformation, Data Reduction.		
3	Introduction to Data Mining: Introduction, Need for Data Mining, KDD Process, Data Mining Architecture, Data		

	Mining Functionalities, Data Mining Task Primitives, Integration of a Data Mining System with a Database or Data Warehouse System
4	Mining Frequent Items and Associations: Frequent Item Set, Closed Item Set, Association Rule Mining, Market Basket Analysis, Classification of Association Rules, Apriori Algorithm
5	Classification and Prediction: Classification & Prediction, Issues regarding classification & Prediction, Comparing Classification Methods, Classification by Decision Tree Induction
6	Clustering: Introduction, Cluster Analysis, Need, Categorization of Major clustering methods. Types of Data in Cluster Analysis, Partitioning Methods: K-Means Method, K-Medoids Method, Applications of data mining in various sectors

Course Number	Course Name	L-T-P- Credits	Year of Introduction
602	Web Programming	3L-1T- 0P= 4C	2018-19
Course Objective :			
To make students able to design, develop the various types of web based applications.			
Expected Outcome :			
By using JavaScript, PHP and My SQL, at the end of the course student should be able to :			
<ul style="list-style-type: none"> • Design web pages • Knowledge about different types of web sites • Navigation amongst web pages • Knowledge about presenting information on web interfaces 			
References (Books, Websites etc) :			
<ul style="list-style-type: none"> • PHP and MySQL Web Development by Welling Thomson Fourth Edition, Pearson publication • Teach Yourself PHP, MySQL and Apache by Julie C. Meloni Pearson publication 			
Suggested MOOC :			
Please refer these websites for MOOCS:			
NPTEL / Swayam			
www.edx.com			
www.coursera.com			
Course Plan			
Unit	Contents		
1	Introduction To PHP: Installing and configuring PHP, Building blocks of PHP:PHP tags, variables, data types, operators, expressions, constants, Control Structures: conditional statements, loops, switch statement		
2	Working With Functions And Arrays: Working with functions: What is a function? Function declaration and definition, Calling function, user defined functions, variable scope, working with arrays: Creating, sorting and reordering arrays, PHP classes.		
3	String Manipulation: Working with strings, dates and time: Formatting, investigating and manipulating strings with PHP, using date and time functions in PHP, working with forms: Creating a simple input form. File Handling: Saving data, storing and retrieving Bob's order, processing files, opening file, writing to a file, closing a file, reading from a file, uses other useful file functions.		
4	Working With Cookies And Sessions : Working with cookies: Introducing cookies, setting and deleting cookies with PHP Working with session: starting a session, working with session variables, passing session IDs in the query string, destroying sessions and unsetting variables, using sessions		

5	<p>MYSQL :</p> <p>Creating web database: Using MySQL monitor, logging into MySQL, creating databases and users, setting users and privileges, column data types</p> <p>Working with MySQL database: Inserting data into database, retrieving data from the database, retrieving data with specific criteria, retrieving data from multiple tables, retrieving data in particular order, grouping and aggregate data, using sub queries, updating records, deleting records from databases, dropping table and database.</p>
6	<p>Accessing MYSQL Database From Web With PHP :</p> <p>Web database architecture, Querying database from the web: checking and filtering input data, setting up connection, Choosing database to use, querying database, retrieving the query result, disconnecting from the database.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
603	Software Project Management	3L-1T-0P= 4C	2018-19

Course Objective :

To provide basic project management skills with a strong emphasis on issues and problems associated with delivering successful IT projects. The course is designed to provide an understanding of the particular issues encountered in handling IT projects and to offer students methods, techniques and 'hands-on' experience in dealing with them.

Expected Outcome :

At the end of this course, student should be able to understand

- Understand and practice the process of project management and its application in delivering successful IT projects;
- Evaluate a project to develop the scope of work, provide accurate cost estimates and to plan the various activities;
- Identify the resources required for a project and to produce a work plan and resource schedule.

NPTEL / Swayam

www.edx.com

www.coursera.com

Course Plan

Unit	Contents
1	Introduction to project management: Project, project management, Importance, characteristics of project how software projects are diff. than other projects, Problems with software projects, Phases: Initiation phase, planning phase, execution phase, monitoring and controlling phase, and closing phase. All parties involved in project, Role of Project Manager, Project management framework, Software tool for project management
2	Project planning: Integration management: What is integration management, plan development and execution, What is scope management, methods for selecting project, scope statement, Work Breakdown Structure, main steps in Project planning: identify project scope and

	objective, identify project infrastructure, analyze project characteristics, identify project products and activities, estimate effort for each activity, identify risk activity, allocate resources, review plan, execute plan. Use of software (Microsoft Project) to assist in project planning activities.
3	Project scheduling: Time management: importance of Project schedules, schedules and activities, sequencing and scheduling activities, Network Planning models, duration estimation and schedule development, Critical path analysis, PERT, Use of software(Microsoft project) to assist in project scheduling.
4	Project cost management: Importance and principles of project cost management, Resource planning, Attributes to be considered in cost estimation, factors affecting the cost, various costs involved in it. Traditional method: Estimation by analogy, Expert judgment, Parkinson, price to win, top down, bottom up. COCOMO Model, Function point analysis, Function point analysis, Cost control, Use of software(Microsoft project) to assist in cost management.
5	Project quality management: Quality of information technology project, Stages of software quality management, PMBOK, Quality standards, Tools and techniques for quality control.
6	Project risk management: The importance, Top risk in projects, Common sources of risk in IT projects, elements in risk mgt., Risk identification, Risk quantification, Risk response development and control, using software to assist in project risk management.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
604	Business Analytics	3L-1T-0P=4C	2018-19
Course Objective : <ul style="list-style-type: none"> To gain an understanding of how decision makers use business analytics to formulate and solve business problems and to support Information System based decision making. To become familiar with the processes needed to develop, report, and analyze business data 			
Expected Outcome : At the end of this course, student should be able to understand <ul style="list-style-type: none"> Identify and prioritize information & data modelling. Identify and prioritize threats to information assets. Define an Geographical information system. Understand various types of Analytics and its significance. Understand text & web mining Applications of business analytics 			
References (Books, Websites etc) : <ol style="list-style-type: none"> Efraim Turban, Ramesh Sharda : Decision Support and Business Intelligence systems : PHI 8th Edition 			
Suggested MOOC : NPTEL, SWYAM			
Course Plan			
Unit	Contents		
1	Business Analytics & Data Visualization: Business Analytics (BA), Overview of Areas where Business Analytics is applied, OLAP, Reports & Queries, Multidimensionality, Advanced Business Analytics, Data Visualization, Geographical Information system, Real time Business Intelligence Automated Decision support, and Competitive Intelligence, BA & Web, Usage benefits & success		
2	Visualization and Data Issues: Organization of Source of Data, Importance of Data Quality, Dealing with Missing or incomplete data, data classification, Introduction to Data Mining, Data mining process, data mining tools XL MINER.		
3	Data, Text & Web Mining : Data Mining concepts & applications, Data Mining Techniques & Tools, Data Mining Project Processes, Text Mining, Web Mining		
4	Applications of Business Analytics : Risk - Fraud Detection and Prediction, Recovery Management, Loss Risk Forecasting, Risk Profiling, Portfolio Stress Testing, Market share estimation and Sensitivity Analysis		
5	Loyalty Analytics, Customer Life Time Value, Propensity Analytics, Churn Analytics, Customer Analytics Customer Segmentation, Cross- Sell or Up sell Models		

6	Recruitment Analytics, Compensation Analytics, Talent Analytics, Training Analytics, Human Resource Retention Analytics, Workforce Analytics Project Work
---	---

Course Number	Course Name	L-T-P- Credits	Year of Introduction
606	Lab on Web Programming	0L-0T-4P=2C	2018-19

1. Write a Program for finding the biggest number in an array without using any array functions.
2. Write a program to square of a number.
3. Write a program to print Factorial of any number.
4. Write a program in PHP to print Fibonacci series.
5. Write a program to find whether a number is Armstrong or not.
6. Write a program to find HCF of two numbers
7. Write a program to demonstrate four built in functions.
8. Program to print the below format

```

*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****

```

9. Write a program to make a chess:

10. Create the following form and based on the user selection print a message in the format given below:

Please select your favourite car

Nissan

Toyota

Mitsubishi

Your favourite car is: Nissan

11. Write a PHP script to accept personal details of student (rno, name, class) on first page. On second page accept marks of six subjects (out of 100). On third page print marklist (rno, name, class, marks, total, percentage)
12. Write a PHP file that will output a form containing 2 fields: username and password. Upon submission of the form, the code should check against the database to see whether the username-password pair was correct. If so, display a welcome message. If not,

display the message “Invalid username or password” followed by the same login form.

13. Write a PHP file that can be added to other PHP files using the include or require functions. This file should:

- a. Make a connection to a MySQL database, and log in with valid credentials. The connection resource should be stored in a variable with an appropriate name.
- b. Create a database TEST if it does not exist.
- c. Select the TEST database.
- d. Create a table USER exerciseusers if it does not exist with the following fields:
 - i. USERNAME VARCHAR(100) , PASSWORD_HASH CHAR(40),
PHONE VARCHAR(10)
- e. The USERNAME field should be designated as UNIQUE.
- f. If any of these operations cause an error, stop execution and print the error message

14. Design a web page that accepts inputs(username and password) and authenticate the username and password from a given database using PHP.

Note : Similar experiments can be designed.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
607	Major Project	2 Credits	2018-19

Course Objective :

Student has to complete a Major project work under the guidance of the faculty member in the institute. Students has to develop any software using Web Development / Dot Net Framework in a group of 2 to 3. Each team has to give 4 minimum PPT presentation to the Project Guide during the semester. Final project viva will be conducted as per University Time Table.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
608	Business Ethics	2L-0T-0P=2C	2018
<p>Course Objective: The objective of this paper is to make the students more clear about the importance of ethics in business and practices of good corporate governance. It also talks about the corporate social responsibility</p>			
<p>Expected Outcome : This course exposes the student to the issues of values and ethics in management so that decision making and decision execution are undertaken in a human manner, as this will add to the flexibility and dynamism of the corporate culture. The course will take the student from managerial ethics to organizational ethics and business sustainability.</p>

<p>The objective of this paper is to increase the capabilities of the student required by the industry. As per the need of the industry, the students will be trained in the latest Mathematical, Statistical, Logical, Verbal Ability, Current Trends in IT etc by the industry experts.</p>			

ELECTIVES:**Elective Group: (I) Information Security**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-1-A	Information Security Concepts	3L+1T+0P=4C	2018
Course Objective: Introduce the learner to concepts involved in Information Security domain			
Expected Outcome : Theoretical understanding of Information Security Concepts			
References (Books, Websites etc) : CEH Study Guide - Sybex			
Suggested MOOC : SWAYAM			
Syllabus			
Unit	Contents		
1	Information Security Concepts: Confidentiality, Integrity and Availability of Information, Identification, Authentication and Authorization, Security Principles and Models		
2	Physical Security: Facility Requirement, Perimeter Security, Fire Protection, Fire Suppression, Power Protection, General Environmental Protection, Equipment Failure Protection		
3	Network Security: Secure Network design, Firewalls, WLAN Security, VPNs, Types and Sources of Network Threats		
4	Operating System Security: Windows, Linux/UNIX		
5	Database Security: MS SQL		
6	Web Application Security: Web Application Vulnerabilities, Secure Coding Techniques, Continuous Security Testing and Assessments		
7	Compliance Standards : IT Act, ISO 27001, ITIL Framework		

Elective Group (I) Information Security

Course Number	Course Name	L-T-P- Credits	Year of Introduction
605-1-B	Information Security Administration	3L+1T+0P=4C	2018
Course Objective: Introduce the learner to concepts involving security administration			
Expected Outcome : Practical understanding of setting, managing and securing Information Systems			
References (Books, Websites etc) : Red Hat Linux Bible: Fedora and Enterprise Edition - by Christopher Negus			
Suggested MOOC : SWAYAM			
Syllabus			
Unit	Contents		
1	Setup a Client: Introduction to client-side devices, Setup, Manage and Secure a Desktop PC Setup, Manage and Secure a Mobile Device		
2	Setup a LAN: Introduction to LAN devices, Simulate a LAN, Setup, Manage and Secure a Local Area Network		
3	Connect a LAN to the Internet: Introduction to WAN devices, Setup, Manage and Secure a Connection to the Internet		
4	Share an Internet Connection across a LAN: Introduction to Internet Connection sharing, Introduction to NAT and PAT Setup, Manage and Secure a Proxy Server		
5	Share resources over a LAN: Setup, Manage and Secure a Print Server, Setup, Manage and Secure a File server		
6	Host a Website: Introduction to website hosting, Setup, Manage and Secure a Web Server		
7	Setup support servers: Setup, Manage and Secure a Mail Server, Setup, Manage and Secure a FTP Server, Setup, Manage and Secure a Boot Server, Setup, Manage and Secure a DNS Server		

Elective Group II- Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-2-A	Introduction to Big Data	3L-1T-0P= 4C	2018
<p>Course Objective : To introduce learner with Big Data Concept, decision making by doing analysis on the data and managing the data using Big Data Tools like Apache Hadoop, Pig and Hive. What are the problems of Big Data and how it can be solved by different tools.</p>			
<p>Pre-requisites: Preliminary knowledge of computer, Data Mining, Data Warehousing Concepts.</p>			
<p>Expected Outcome :</p> <ul style="list-style-type: none"> • Good knowledge of Big Data Concepts • Knowledge of Decision making using analysis on the Big Data • Introduction to Big data Tools like Hadoop and Weka. 			
<p>Reference Books :</p> <ol style="list-style-type: none"> 1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo 2. Edureka lectures Link:- https://www.youtube.com/watch?v=A02SRdyoshM 			
Course Plan			
Unit	Contents		
1	<p>Introduction: Big Data History, The Big Data Business Opportunity- Business Transformation Imperative, Big Data Business Model, Business Impact of Big Data</p>		
2	<p>Big Data In Organization: Data Analytics Lifecycle, Data Scientist Roles and Responsibilities – Discovery, Data Preparation, Model Planning, Model Building, Communicate Results, Operationalize, New Organizational Roles, Liberating Organizational Creativity.</p>		
3	<p>Decision Theory And Strategy: Business Intelligence Challenge, Big Data User Interface Ramifications, Human Challenge of Decision Making, Strategy for Decision Making- Big Data Strategy Document, Case Study.</p>		
4	<p>Value Creation Process: Understanding Big Data Value Creation, Value Creation Drivers, Michael Porter’s Value Creation Models- Michael Porter’s Five Forces Analysis, Michael Porter’s Value Chain Analysis, Case Study.</p>		
5	<p>Big Data User Experience: The Unintelligent User Experience, Understanding the Key Decisions to Build a Relevant User Experience, Using Big Data Analytics to Improve Customer Engagement, Uncovering and Leveraging Customer Insights, Big Data can Power a New Customer Experience.</p>		
6	<p>Big Data Use Cases: The Big Data Envisioning Process –1. Research Business Initiatives, 2. Acquire and Analyze your Data, 3. Brainstorm New Ideas , 4. Prioritize Big Data Use Cases, 5. Document Next Steps, The Prioritization Process.</p>		

7

Big Data Architecture:

New Big Data Architecture, **Introducing Big Data Technologies** – Apache Hadoop, MapReduce, R, WEKA etc.

Elective Group II Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
605-2-B	HADOOP	3L-1T-0P= 4C	2018
Course Objective : To introduce learner with HADOOP Tool for Business Intelligence, decision making by doing analysis on the data using HADOOP Tool and also managing the Big Data using HADOOP.			
Pre-requisites: Preliminary knowledge of computer, Big Data Analysis and Business Intelligence. Also students must know Core Java, C Programming and Data Structure Languages.			
Expected Outcome : <ul style="list-style-type: none"> • Good knowledge of HADOOP Tool. • Knowledge of Decision making using HADOOP analysis on the Big Data • Hands-on Big Data tools- Hadoop, Pig, Hive, HBase 			
Reference Books : <ol style="list-style-type: none"> 1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo 2. www.tutorialspoint.com 			
Course Plan			
Unit	Contents		
1	BIG DATA Overview : What is Big Data?, What Comes Under Big Data?, Benefits of Big Data, Big Data Technologies Operational vs. Analytical Systems, Big Data Challenges.		
2	Introduction To HADOOP: Hadoop Architecture, MapReduce, Hadoop Distributed File System, How Does Hadoop Work?, Advantages of Hadoop.		
3	HDFS Overview: Features of HDFS, HDFS Architecture, Starting HDFS, Listing Files in HDFS, Inserting Data into HDFS, Retrieving Data from HDFS, Shutting Down the HDFS.		
4	MAPREDUCE: What is MapReduce?, The Algorithm for MapReduce, Inputs and Outputs (Java Perspective), Analyze different use-cases where MapReduce is used, Differentiate between traditional way and MapReduce way.		
5	Introduction To Hadoop Features: New Big Data Architecture, Introducing HADOOP Features – Apache Hive, Apache HBase, Pig.		
6	Multi Node Cluster: Multi Node Cluster, Install Java, Creating User Account, Mapping the Nodes, Installing Hadoop, Configuring Hadoop, Start Hadoop Services, Adding New Data Node in the Hadoop Cluster, Removing New Data Node from the Hadoop Cluster.		
7	Environment Setup: Pre-installation Setup, Installing Java Downloading Hadoop Hadoop Operation Modes Installing Hadoop in Standalone Mode Installing Hadoop in Pseudo Distributed Mode Verifying Hadoop Installation, Implement basic Hadoop commands on terminal.		

Elective Group: (III) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-3-1	E-Commerce	3L-1T-0P-4C	2018-19
Course Objective : <ul style="list-style-type: none"> • To thoroughly understand the information technology for supporting E-commerce; • To understand the necessary infrastructure and functional components to develop Ecommerce systems; • To understand the design and application of E-commerce systems. 			
Expected Outcome : Upon successful completion of the course students will be able to: <ul style="list-style-type: none"> • Recognize the impact of Information and Communication technologies, especially of the Internet in business operations • Recognize the fundamental principles of e-Business and e-Commerce • Use tools and services of the internet in the development of a virtual e-commerce site 			
References : <ul style="list-style-type: none"> • E-commerce - C.S.V. Murthy, Himalaya Publishing House • E-commerce A Managerial Perspective - P.T. Joseph, Prentice Hall Of India • Frontiers of Electronics Commerce - Kalakota and Whinston, Pearson Education 			
Suggested MOOC : Swayam			
Course Plan			
Unit	Contents		
1	Introduction to E-Commerce: Definition, E-commerce fundamentals, different types of E-commerce E-Commerce Infrastructure - The Internet and World Wide Web, Web system, Internet basics, Characteristics of Internet, Components of Internet – Uniform Resource Locators, Internet Protocol, Hypertext Transfer Protocol (HTTP), Internet Service Provider (ISP), Types of ISP, domain name, domain name types E-commerce vs Traditional Commerce, Networking Categories, Mobile Commerce		
2	Business Models for e-commerce: Business-to-Consumer (B2C), Consumer-to-Consumer (C2C), Business-to-Business(B2B) Electronic Data Interchange Requirement of EDI, types of EDI, Advantages and Disadvantages of EDI		
3	E-commerce Payment System: Limitations of traditional payment system, requirement of e-payment system, Internet payment systems - Credit card payment (e.g., SET protocol), E-cash, E-check, smart card, Electronic Funds Transfer, Digital Token Based E-Payment Systems, Modern Payment Systems, Steps for Electronic Payment, Payment Security, Net Banking		

4	<p>Applications of E-Commerce: E-commerce in banking, retailing, online publishing, online marketing, e-advertising, e-branding.</p>
5	<p>E-commerce Security: Security issues, Privacy issues, Computer Security, security threats, security tools, Denial-of-Service attacks, Viruses, Unauthorized access to a computer network, Vulnerability of Internet Sites requirements, malicious code, intruders, attacking methods, Cryptography- encryption and decryption, public key encryption, private key cryptography, message digest, digital signature, digital certificate, firewalls, SSL. Firewall – Packet filtering, Application gateways.</p>
6	<p>Implementation of E-Commerce: WWW.EBAY.COM - B2C Website – Registration, Growth of eBay, PayPal – New Trend in Making Payments Online, National Electronic Funds Transfer.</p>

Elective Group: (III) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
605-3-B	Knowledge Management	3L+1T+0P=4C	2018
<p>Course Objective: The objective of the course is to provide the basic skills of managing knowledge in organizations. Knowledge is an asset for retaining the competitive advantage of the organization. This course develops the capabilities of towards managing students to manage knowledge in organizations.</p>			
<p>Pre-requisites: Knowledge about Information System and MIS with Implementation of MIS</p>			
<p>Expected Outcome : After going through this course a student should be able to understand :</p> <ul style="list-style-type: none"> • Will be able to understand the concepts of Knowledge and knowledge management . • Can be able to design and develop Knowledge management systems for Business applications . • Implementation of KM to various areas of Interest in Business Organizations . 			
<p>References (Books, Websites etc.):</p> <ol style="list-style-type: none"> 1. Madhukar Shukla:Competing Through Knowledge-Building a learning Organisation(Response Books, New Delhi. 2. Syllabus			
Unit	Contents		
1	<p>Introduction: Definition, Scope and Significance of Knowledge Management , Difficulties of Knowledge Management, Techniques of KM – Implementation of KM, Organizational knowledge, Characteristics and Components of Organizational Knowledge</p>		
2	<p>Drivers of knowledge Management: Pillars of knowledge Management, KM framework , Supply Chain of KM , Formulation of KM strategy.</p>		
3	<p>Technology and KM: Technology components of KM – IT & KM , Ecommerce and KM</p>		

4	<p>Total Quality Management and KM: TQM and KM , Bench marking and KM.</p>
5	<p>Implementation of KM: Discussion on Roadblocks to success, Implementing a KM programme , Critical Success Factors in KM , Implementation of KM</p>
6	<p>KM and Organizational Restructuring: The Mystique of Learning, Organization:- Outcomes of learning, Learning and Change – Innovation, continuous Improvements, Corporate Transformation.</p>
7	<p>Case studies in Knowledge Management Knowledge management in Health Care, Knowledge Management in Human Resource Management</p>

**Bharati Vidyapeeth Deemed To Be University,
Pune**

Faculty of Management Studies

Board of Studies in Computer Applications

Master of Computer Applications Programme

(2020 Course)

(Under Choice Based Credit System)

To be implemented from

2020-21

Master of Computer Applications Programme (2020 Course)
(Under Choice Based Credit System)
To be effective from 2020-21 at Part I

1. INTRODUCTION:

The MCA Program is a full time 102 credits programme offered by Bharati Vidyapeeth (Deemed to be University), Pune and is conducted at its Management Institutes in Pune, Karad, Kolhapur, Sangli, and Solapur. All the five institutes have excellent teaching staff, laboratories, library, and other facilities to provide proper learning environment. The University is reaccredited by NAAC with an 'A+' grade (3rd cycle). The expectations and requirements of the software industry, immediately and in the near future, are visualized while designing the MCA programme. This effort is reflected in the Vision and Mission statements of the MCA programme. Of course, the statements also embody the spirit of the vision of Late Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth Deemed to be University which is to usher in “Social Transformation through Dynamic Education.”

2. VISION STATEMENT OF MCA PROGRAMME:

Achieve excellence in Computer Applications with respect to teaching, learning and researching to meet the growing needs of the industry and society.

3. MISSION STATEMENT OF MCA PROGRAMME

- Promote outcome-based learning strategies in-order to meet global industry standards.
- Encourage innovations and problem-solving capabilities in students and the faculty.
- Cultivate collaborative research in both students and faculty members through industry interactions and collaborations.
- Enhance entrepreneurship skills among students.

4. PROGRAMME EDUCATION OBJECTIVES (PEO)

PEO1: To build a strong foundation for students to become proficient in all academic concepts and technical skills necessary to become an IT Professional.

PEO2: To provide a conducive environment for designing, implementing and testing various software applications through Software Development Cell.

PEO3: To keep the students and faculty abreast with the emerging technologies in the field of computer applications.

PEO4: To bring professionalism amongst the students and promote holistic development.

PEO5: To involve students in sustainable IT practices and community services.

5. PROGRAMME OUTCOMES (PO)

PO1: Computational Knowledge: Apply knowledge of computing fundamentals, mathematics and given domain to design appropriate models for a given problem and/or requirements.

PO2: Problem Analysis: Apply fundamental knowledge of software engineering and various systems domain in order to analyze, identify, formulate and provide the solution to given problem.

PO3: Design/Development of Solutions: Design and evaluate solutions, systems, modules and processes for specified set of needs with appropriate consideration of societal values and industry expectations.

PO4: Conduct researching in Information Systems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern Tool Usage: Use of modern tools for delivering milestones like problem analysis, design, development, testing and deployment.

PO6: Professional Ethics: Learn and inculcate professional ethics, cyber regulations, professional responsibilities and norms of professional computing world.

PO7: Lifelong Learning: Acknowledge the need for continuous professional development and practice it through self-motivated, independent learning.

PO8: Management Domain: Involving in projects development as individual or group to solve problems in various domains and environments using computational and management skills.

PO9: Communication Efficacy: Demonstrate efficacy in verbal and non-verbal means of communication like reports, design documentation and presentations to elaborate about complex computing.

PO10: Innovation and Entrepreneurship: Provide conducive environment for innovation and entrepreneurship leading to solutions for betterment of society.

6. ELIGIBILITY FOR ADMISSION TO THIS PROGRAMME:

Admission to the programme is open to any candidate (Graduate) of any recognized University satisfying the following conditions.

1. Passed BCA/ Bachelor Degree in Computer Science or Engineering or equivalent Degree.
OR Passed B.Sc. / B.Com. / B.A. with Mathematics at 10+2 Level or at Graduation Level (with additional bridge Courses as per the norms of the concerned University).
2. Obtained at least 50% marks (45% marks in case of candidates belonging to SC/ST category) in the qualifying Examination.

7. DURATION OF THE PROGRAMME

The duration of this programme is two years divided in to four semesters. The medium of instruction and examination will be only in English.

8. SCHEME OF EXAMINATION:

For some courses, there is Internal Assessment (IA) conducted by the respective institutes as well as a University Examination (UE) at the End-of-the Term. UE will be conducted out of 60 marks and IA will be conducted for 40 marks. Then these are converted to grade points and grades as per the Table I. For courses having only Continuous Assessment (CA), the respective institutes will evaluate the students in varieties of ways during the term for a total of 100 marks. Then the marks will be converted to grade points and grades using the Table I.

9. STANDARD OF PASSING:

For all courses, both UE and IA constitute separate Heads of Passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the Heads of Passing to secure the GPA required for passing.

The 10 point Grades and Grade Points are according to the following table:

Range of Marks (%)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} < 80$	A+	9
$60 \leq \text{Marks} < 70$	A	8
$55 \leq \text{Marks} < 60$	B+	7
$50 \leq \text{Marks} < 55$	B	6
$40 \leq \text{Marks} < 50$	C	5
Marks < 40	D	0

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

10. AWARD OF HONOURS:

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
9.5 ≤ CGPA ≤ 10	O	Outstanding	80 ≤ Marks ≤ 100
9.0 ≤ CGPA ≤ 9.49	A+	Excellent	70 ≤ Marks < 80
8.0 ≤ CGPA ≤ 8.99	A	Very Good	60 ≤ Marks < 70
7.0 ≤ CGPA ≤ 7.99	B+	Good	55 ≤ Marks < 60
6.0 ≤ CGPA ≤ 6.99	B	Average	50 ≤ Marks < 55
5.0 ≤ CGPA ≤ 5.99	C	Satisfactory	40 ≤ Marks < 50
CGPA below 5.0	F	Fail	Marks below 40

SEMESTER WISE COURSE STRUCTURE

	Semester I	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
101	Applied Database Management Systems	4	3	1	-	40	60
102	Computer Networks	4	3	1	-	40	60
103	Java Programming	4	3	1	-	40	60
104	Computational Statistics	4	3	1	-	40	60
105	Management Concepts and Applications	4	3	1	-	40	60
106	Lab on Applied Database Management Systems	3	1	0	4	40	60
107	Lab on Java Programming	3	0	0	6	40	60
108	MOOCS Based General Course 1 (Soft Sills) (GE-1)	2	0	-	-	50	00
		28	16	05	10	330	420

	Semester II	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
201	Object Oriented Software Engineering	4	3	1	-	40	60
202	Cloud Computing Concepts	4	3	1	-	40	60
203	Data structures using Python	4	3	1	-	40	60
204	Data Warehousing and Data Mining	4	3	1	-	40	60
205	Web Supporting Technologies	4	2	1	4	40	60
206	Lab on Data Structures using Python	3	0	0	6	40	60
207	Minor Project – 1	3	3	-	-	00	100
208	MOOCS Based General Course 2 (GE-2)	2	0	-	-	50	00
		28	17	05	10	290	460

	Semester III	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
301	Software Design Patterns	4	3	1	-	40	60
302	Artificial Intelligence	4	3	1	-	40	60
303	Information Security	4	3	1	-	40	60
304	EL-GRP-1 (A)	3	2	1	-	100	-
305	EL-GRP-2 (A)	3	2	1	-	100	-
306	Lab on Software Testing	3	1	0	4	40	60
307	Minor Project – 2	3	3	-	-	00	100
308	MOOCS Based General Course 3 (GE-3)	2	0	-	-	50	00
		26	17	05	04	410	340

	Semester IV	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
401	Seminar on Recent Trends in IT [#]	4	-	-	-		100
402	EI-GRP - 1 (B)	3	2	1	-	100	-
403	EI-GRP –2 (B)	3	2	1	-	100	-
404	Major Internship Project	10	-	-	-	-	100
		20	04	02	-	200	200

List of Elective Groups:

Elective Code	Elective Group	Subject Code	Subjects
01	Cloud Computing	A	Virtualization
		B	AWS
02	Data Science	A	Statistical Programming in R
		B	Introduction to Data Science
03	Linux	A	Linux Desktop Environment, Shell Programming and System Administration
		B	Linux Internals and Network Administration
04	Open Source Technologies	A	Perl Scripting
		B	Ruby
05	Mobile Computing	A	Java Script
		B	Android
06	Dot Net Technologies	A	C# Programming and Applications
		B	ASP Dot Net with MVC
07	Net Centric Technologies	A	HTML 5
		B	AJAX Programming
08	Information Systems	A	Recommender System
		B	Knowledge Management
09	IOT	A	IoT Architecture Sensors and Fundamentals with Hands-on lab
		B	Internet Of Things: Sensing And Actuator Devices and Smart city use case
10	Big Data	A	Introduction to Big Data
		B	Business Intelligence Tools With Hadoop
11	Cyber Security	A	Introduction to Information Security
		B	Information Security Threats and Mitigation Strategies

Practical Examinations:

For courses 106, 107, 205, 206 and 306, University Practical Examination will be held and marks will be reported to the University.

MOOC'S based General Course (108, 208, 308):

Students will complete MOOCS course prescribed by institute from NPTEL / Swayam in respective semesters and will be evaluated at institute level based on the assignments submitted by the students and the institute level exam on that subjects. The respective institute will report the marks obtained by students in these courses at the end of the semester.

Project Guidelines:**Minor Project I (207) and Minor Project II (307)**

Students are expected to choose a problem which will provide software solutions. The project should be based on the courses learnt by the student in previous semester. The projects can be completed as individual project or if the scope of the project is comprehensive then project can be divided into modules by the project guide and a group of student can work on it. The number of students in the group can be decided by project guide and it should not be less than 2 and more than 4. Every student or group must have meeting about progress of project with their project guide regularly as specified in time table or if required at a communicated by guide.

The project dissertation/document is expected to be created and it should have the following contents.

- a. SRS – Problem Statement, BRD- Business Requirement Document
- b. General Requirement
- c. Requirement as per user Role
- d. System design (RED/Class Diagrams, DFD/Activity diagrams)
- e. User screen design and client side validation
- f. Database Design
- g. User interface design /user manual
- h. Test cases
- i. Scope and limitation
- j. Conclusion
- k. Bibliography

Major Internship Project (404)

The student is expected to get exposure of industry through 'Major Internship Project'. Guidelines about project are as bellow.

1. Every project will be evaluated by University appointed panel of examiners at the end of the semester.
2. Student must report about the progress of project to the internal project guide regularly as specified in time table or if required at a time given by guide.

Seminar on Recent Trends in IT: (401)

Student will select any topic of interest and study it thoroughly throughout the semester. At the end of the semester, student will give a presentation on the topic before the panel appointed by the University and submit the seminar report.

Bridge Course:

This course of 30 hours duration is designed and compulsory for the students from Non-IT background. The course can be conducted concurrently with semester I courses . The evaluation of this course will be at institute level for 100 marks. The student must score minimum 40 marks to pass in this course. There will be no credits assigned to this Bridge Course. A separate course work completion certificate will be issued to students.

Subject Name	Course Work
No. of Credits	00
Pre Requisite	Basic Mathematics and MSCIT course
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Basic formula for finding areas, volumes, graphical representation of data is to be remembered.
Understanding	The calculations by using formulas, algorithm ,C program structure are to be understood
Applying	Application of basic knowledge of mathematics and computers is to be applied for calculations and for writing programming codes.
Analyzing	Programs which are to be written are analysed and put in a particular format such as graphs, trees for effective working
Evaluating	New programs or problems are to be evaluated through algorithms,logic
Creating	Creating proper program logic so as to reduce lines of codes is expected .
Syllabus	
	Unit 1: (4 Hours) Algorithm ,flow charts, integers, division, relations, relations and their types, representation of relation in computer memory, number conversion systems.

	<p>Unit 2: (4 Hours) Set theory, predicate logic, Graph terminologies, types of graphs , representation of graph in computers, Paths, Euler and Hamilton graphs, graph colorings.</p>
	<p>Unit 3 : (3 Hours) Trees ,applications of trees, tree traversal algorithms, minimum spanning trees</p>
	<p>Unit 4 : (5 Hours) Fundamentals of C programming, Keywords and Identifiers, Constants, Variables, Data types, Declaration of variables, Declaration of variables as constant, Operators, Types of operators, Input and Output functions - printf(), scanf(), getchar(), putchar(), Formatted input and formatted output.</p>
	<p>Unit 5: (7 Hours) Control Statements- Sequential, Selection, Iteration Statements, Branching structure- if statement, if-else statement, Nested if-else statement, else if Ladder, Conditional operator, switch statement, Loop control structures- while loop, do-while loop, for loop, Nested for loop, Jump statements-break, continue, goto statements.</p>
	<p>Unit 6: (5 Hours) Function call, return statement, Function parameters, Types of functions, Arrays and functions</p>
	<p>Unit 7: (2 Hours) Introduction to OOP concepts.</p>
Text Books	<p>1.Discrete Structures by Kenneth Rosen 2.C programming by Yashwant Kanetkar 3.Object Oriented Programming by Balguruswamy</p>
Reference Books	<p>C Programming language by Brain W. Kernighan</p>

SEMESTER I

Subject Name	101 Applied Database Management Systems
No. of Credits	4 Credits
Pre Requisite	Basics of Computing and Data Storage
Course Objectives	<ul style="list-style-type: none"> • To teach the fundamentals of the database systems at a master level. A variety of topics will be covered that are important for modern databases in order to prepare the students for real life applications of databases. • To impart knowledge of the concepts related to database and operations on databases. It also gives the idea how database is managed in various environments with emphasis on security measures as implemented in database management systems.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	<ul style="list-style-type: none"> • Remember the definitions of concepts
Understanding	<ul style="list-style-type: none"> • Understand the concept of database and techniques for its management • Understand data security standards and methods. • Understand the fundamentals of Distributed Database Systems
Applying	<ul style="list-style-type: none"> • Design different data models at conceptual and logical level and translate ER Diagrams to Relational Data Model. • Normalize the database.
Analyzing	<ul style="list-style-type: none"> • Identify and study the file organization schemes for DBMS. • State and Describe features for Concurrency and Recovery.
Evaluating	<ul style="list-style-type: none"> • Convert the relational algebra statements to the SQL statements.
Creating	<ul style="list-style-type: none"> • Write queries using Relational Algebra
Syllabus	<p>Unit 1. Introduction to DBMS (5 Hours) Difference between Data, Information, Data Processing & Data Management. File Oriented Approach, Database oriented approach to Data Management, Need for DBMS, Characteristic of Database, Database Architecture: Levels of Abstraction, Database schema and instances, 3 tier architecture of DBMS, Data Independence. Database users, Types of Database System. Database Languages, DBMS interfaces.</p>
	<p>Unit 2. Data Modeling in Database (7 Hours) Data Models, Logical Data Modeling : Hierarchical Data Model, Network Data Model, Relational Data Model. Conceptual Data Modeling: Entity Relationship Model, Entities, Attributes, Types of Attributes, Relationships, Relationship set, Degree of relationship Set, Mapping Cardinalities, Keys, ER Diagram Notations, Roles Participation: Total and Partial, Strong and Weak Entity Set.The extended entity relationship (EER) model, Subclass, Superclass, generalization, specialization, Attribute Inheritance. Relational Data Model : Codd's Rules for RDBMS, Translating ER Diagram to Relational Database.</p>
	<p>Unit 3.Normalization and Relational Algebra: (7 Hours)</p>

	<p>Normalization: Normalization Vs De-Normalization, Decomposition, Lossy and Lossless Decomposition, Functional Dependencies, Normal forms 1NF, 2NF, 3NF, BCNF, Case Studies on Normalization.</p> <p>Relational Algebra: Keys: Composite, Candidate, Primary, Secondary, Foreign, Relational Algebra Operators: Select, Project, Divide, Rename. Set Operations: Union, Intersect, Difference, And Product, Joins: Outer Joins, Inner Joins with example.</p>
	<p>Unit 4. File Structures and Data Administration: (6 Hours) File Organization, Overview of Physical Storage Media, Magnetic Disk, RAID, Tertiary Storage, Storage Access, Data Dictionary Storage, Organization of File (Sequential, Clustering), Indexing and Hashing, Basic Concepts, indices, B+ Tree index file, B- tree index file, Static hashing, Dynamic Hashing.</p>
	<p>Unit 5. Concurrency Control And Recovery Techniques: (7 Hours) Concurrency Control: Single User and Multiuser systems, Multiprogramming and Multiprocessing, Basic Database access operations, Concept of transaction, transaction state, ACID properties, Schedules, Serializability of schedules., Concurrency Control, Need for Concurrency control, lock based protocols, timestamp based protocols, Multiple granularity, Multiple Version Techniques, Deadlock and its handling, Wait-Die and Wound-Wait, Deadlock prevention without using timestamps, Deadlock detection and time outs, Starvation</p> <p>Recovery Techniques: Database Recovery, Types of Failures, Storage Structure: Volatile, Non Volatile and stable storage, Data access. Recovery and atomicity, Recovery Techniques / Algorithms: Log Based Recovery, Check points, Shadow Paging.</p>
	<p>Unit 6. Data Administration And Security: (7 Hours) Data administration, Role and Responsibility of DBA, Creating/Deleting/Updating table space, Database Monitoring, User Management. Basic data security principles – user privileges, data masking, encryption and decryption. Data Security Implementation, revalidation of user, role, privileges. Data Quality Management, Basic quality principles, data quality audit, data quality improvement</p>
	<p>Unit 7. Introduction to Distributed Database, NOSQL and MongoDB (6 Hours) Heterogeneous and Homogeneous Databases, Distributed database features and needs, Advantages and Disadvantages, Distributed Database Architecture. Levels of distribution, transparency, replication. Fragmentation.</p> <ul style="list-style-type: none"> • Introduction to NoSQL – Architecture, Sharding , Replica sets • NoSQL Assumptions and the CAP Theorem

	<ul style="list-style-type: none"> • Strengths and weaknesses of NoSQL • MongoDB Functionality Examples
Text Books	1. "Database System and Concepts" A Silberschatz, H Korth, S Sudarshan, published by McGraw-Hill.
Reference Books	<ol style="list-style-type: none"> 2. "Fundamentals of Database Systems" Global Edition By Ramez Elmasri, Shamkant B. Navathe 3. "Practical MongoDB" by Shakuntala Gupta Edward, Navin Sabharwal published by APress.
Suggested MOOC	Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com , www.coursera.com

Subject Name	102. Computer Networks
No. of Credits	4 Credits
Pre Requisite	Knowledge about hardware , network devices and data communication concepts
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of Computer Hardware and Network terminology for development of basic networks in the organization.
Understanding	By remembering students the basic concepts students will understand the concepts of Network topology, network operating systems and how the networks are developed ad per the need of the organization
Applying	Students will Have thorough knowledge about Computer Network and its use for the Information Sharing, device sharing and use of various new network technologies.
Analyzing	Students will acquire a good knowledge of the computer network, its architecture and operation. Student will be able to pursue his study in advanced networking courses (This knowledge will help them to create base for the Network Electives to be studied in the next semesters). Students will be able to follow trends of computer networks. So, students will get exposure to advanced network technologies like MANET, WSN, and 4G.
Evaluating	Ability to select proper method to design the network systems, selecting the proper tool to design the network protects the network from misuse.
Creating	Design and create their own procedure to protect the computer network and use the sharing proper resources.
Syllabus	Unit 1: Introduction to Computer Networks (6 Hours) Basic concepts of computer hardware and network terminology, What is Computer Network? Network Goals and Motivations, Application of Networks, Network Topologies, Classification of Networks, Network software in brief: Network Protocols, Protocol Hierarchies, Design issues for the Layers, Connection Oriented and Connectionless Services, Service Primitives, Relation of services to Protocols, Network Models: The OSI Reference Model, The TCP/IP Reference Model, Comparison of OSI and TCP/IP Reference Model, A critique of OSI Model, A critique of TCP/IP Model, Examples of some networks: Internet, X.25, ISDN, Frame relay, ATM, Ethernet, Wireless LANs- (wi-fi)
	Unit 2: Data Transmission and Physical Layer: (7 Hours) Signals: Analog and Digital Signals, Data Rate, Transmission Impairment, Signal Measurement: Throughput, Propagation Speed and Time, Wavelength, Frequency, Bandwidth, Spectrum Transmission Media& its Characteristics: Guided and Unguided Media, Synchronous and Asynchronous Transmission, Multiplexing: FDM, WDM, TDM, Switching: Circuit, Message and Packet Switching.

	<p>Unit 3: Network Layer: (7 Hours) Network Layer Design Issues; Routing Algorithms: Static/ Dynamic , Direct/ Indirect, Shortest Path Routing, Flooding, Distance Vector Routing , Link State Routing, Hierarchical Routing, Broadcast Routing, Multicast Routing, Congestion Control Algorithms: General Principal of Congestion Control, congestion prevention polices, Load shedding, Jitter Control, IP Addressing: IP-Protocol, IP-Address Classes (A, B, C, D, E), Broadcast address, Multicast address, Network Mask.</p>
	<p>Unit 4: Transport and Application Support Protocols (7 Hours) Transport service, Service Primitives, Internet, and Transport Protocols: TCP/UDP, Remote Procedure Calls, RTP, Session Layer: Token Concept Presentation Layer: Data Encryption and Data Security, Message Authentication,</p>
	<p>Unit 5 : Advance Networks: (7 Hours) Concept of 4G Networks, Introduction of 802.16, 802.20, Bluetooth, Infrared, MANET, Sensor Networks. Technical Issues of Advanced Networks, Mobile Ad-hoc Networks: Introductory concepts, Destination-Sequenced Distance Vector protocol, Ad Hoc On-Demand Distance Vector protocol, Wireless Sensor Networks: Sensor networks overview: Introduction, applications, design issues, requirements.</p>
	<p>Unit 6: Internet Basics (7 Hours) Concept and Characteristics of Internet , Intranet, Extranet . Structure of Internet through Client Sever . Domain name , Website Development formats for Business Applications. Practical Application on: Domain Name Service, Telnet, FTP, SMTP, SNMP, MIME, POP, IMAP, WWW,HTTP, TCP/IP, LAN, WAN Some basic Operations and commands.</p>
	<p>Unit 7 : Mobile Network - (7 Hours) Mobile Telephone Systems: various generations mobile technology , Smart Mobile facilities and Apps on Mobile . Sub netting, Internet control Protocol-ICMP, IGMP, Mobile-IP, IPv6</p>
Text Books	<p>1.A.S. Tanenbaum, Computer Networks (4th ed.), Prentice-Hall of India, Latest Edition 2.W.Behrouz Forouzan and S.C. Fegan, Data Communication and Networking, McGraw Hill, Latest Edition 3. William Stalling “Data and Computer Communication”</p>

	Dec.2019 .
MOOC on NPTEL	https://nptel.ac.in/courses , http://www.freetechbooks.com/computer network , In house on www.bharativedyapeeth.edu , Computer Network in Brief : - http://www.nripesheschool.com/

Subject Name	103. Java Programming
No. of Credits	4 Credits
Pre Requisite	Any programming Language and Concepts of OOP
Cognitive Abilities	At the end of this course, student should be able to <ul style="list-style-type: none"> • Design interfaces, abstract and concrete classes needed, given a problem specification • Implement classes designed using object oriented programming language • Make them comfort to muse Java API for Input/output and Java Collections and utility classes • Able to achieve object persistence using object serialization and write modules to take advantages of concurrent programming
Remembering	<ul style="list-style-type: none"> ▪ Java language Data Types, control structures, OOP concepts, ▪ Java API to handle numbers, strings ▪ Get knowledge about core Java API (Wrapper classes; String classes, Math class) ▪ Java API hierarchy for Input/output, collections and concurrent programming
Understanding	<ul style="list-style-type: none"> ▪ Understanding how to write, compile and run a Java program. ▪ Structure of class and using Inheritance among them. ▪ How to create Arrays. ▪ Come to know need of inheritance, abstract class and interface and how to use them ▪ Get knowledge about core Java API, API hierarchy for Input/output, collections and concurrent programming
Applying	<ul style="list-style-type: none"> ▪ Design classes and interfaces for given problem statement by making use of OOP concepts. ▪ Using proper I/O classes and Collections classes for given problem statement.
Analyzing	<ul style="list-style-type: none"> ▪ Analyze a given problem statement to identify classes and relationships among them and making use of Java API efficiently.
Evaluating	<ul style="list-style-type: none"> ▪ Given a problem statement; students should able to decide/ best mechanism of class design using is_a or has_a relationships. ▪ Read/listen a problem statement and able to decide which I/O classes to be used. ▪ Able to debate about when make to use of threads and which collection implementation should be used.
Creating	Writing Java Applications with use of classes, interfaces and taking advantages of polymorphism.
Syllabus	

	<p>Unit 1:Introduction to Java (9 Hours) Java Basics: Features of Java, History of Java, Installations of JDK and eclipse as IDE Writing and executing first Java program. Understanding role Java compiler, JVM, Understanding how Java is platform independent and secure. Java data types, variables, operators, expressions, type conversion and casting in Java. Control structures in java: if, if-else and switch statements, using iterative/looping statements in Java: while, do-while and for. Writing functions: Need of functions/methods, Writing and using static method; concepts of passing values and returning</p>
	<p>Unit 2: Class and Object Concepts: (7 Hours) Introduction to Object Oriented concepts, Defining a class, creating objects from class, adding attributes and methods to the class, using constructors, Java naming conventions for class, properties and methods/functions. Passing values to the functions – pass by value, pass by reference, Function overloading. Modifiers – public, private, protected, default, static, final Understanding use of Wrapper classes and Garbage collection in Java</p>
	<p>Unit 3: Arrays and Strings (6 Hours) One dimensional arrays, Multidimensional arrays, exploring String class and methods, String Buffer class. Packages - creating and accessing a package, importing, packages, creating user defined packages, Concept of package. Introduction to Exception Handling and user defined exceptions.</p>
	<p>Unit 4: Inheritance and Polymorphism(6 Hours) Concept and importance of inheritance, is-a relationship, types of inheritance, Polymorphism – function overriding, dynamic method dispatch. Overriding methods with throws clause. Using abstract and final keywords with class declaration, Concept of interface, Comparison of Interface and class. Access modifiers and data accessibility in derived classes, method access modifier and method overriding.</p>
	<p>Unit 5 :Concurrent Programming (7 Hours) Concept of threads, lifecycle of threads, creating threads, Thread class, Runnable interface, Thread synchronization, inter thread communication – wait(), notify(), notifyAll() methods .</p>
	<p>Unit 6: Java Input/Output (7 Hours) Concept of streams, types of streams – byte streams, character streams, The Console: System.out, System.in, and System.err Understanding File class, InputStream class, OutputStream class, FileInputStreams, FileOutputStream, Using character oriented Reader and Writer class, FileReader, FileWriter.</p>

	<p>Introduction to Buffered streams – DataInput and DataOutput Streams using BufferedReader, BufferedWriter.</p> <p>Making use of Object Streams for Serialization and deserialization</p>
	<p>Unit 7:Java Collections and Utility Classes (8 Hours)</p> <p>Introductions to generics: generic types and methods</p> <p>Collection Basics- A Collection Hierarchy, Using ArrayList and Vector, LinkedList, making use of Iterator to access collection elements.</p> <p>Set: HashSet, LinkedHashSet, TreeSet , Role of Comparable and Comparator interfaces,</p> <p>Introduction Map: Hashmap, HashTable, TreeMap, LinkedHashMap</p> <p>Understanding bounded types, erasures.</p>
Text Books	Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media;
Reference Books	<ol style="list-style-type: none"> 1. Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007 2. Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008 3. Bruce Eckel , Thinking In Java – Printice Hall, Fourth Edition

Subject Name	104 Computational Statistics
No. of Credits	4 Credits
Pre Requisite	
Course Objectives	<ul style="list-style-type: none"> • To build a strong foundation for students to become a proficient in all Statistics concepts and their Application. It is necessary to become a Data science Professional. • To provide a conducive environment for understanding, implementing and Prediction on various Historical data. • To keep the students and faculty abreast with the emerging technologies in the field of computer applications. • To bring professionalism amongst the students and promote holistic development.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	<ul style="list-style-type: none"> • Remember the definitions of concepts
Understanding	<ul style="list-style-type: none"> • Understand the concept of Statistics and their methods for its Data Analytics • Understand data engineering and standards and methods. • Understand the fundamentals of statistics and their Application
Applying	<ul style="list-style-type: none"> • Data engineering and their concept
Analyzing	<ul style="list-style-type: none"> • Identify and study the data for analytics purpose. • State and Describe features for Analytics
Evaluating	<ul style="list-style-type: none"> • Future Prediction for historical data
Creating	<ul style="list-style-type: none"> • Write programming of R for Data Analysis
Syllabus	
	<p>Unit 1. Introduction to Statistics (4 Hours): Meaning of Statistics as a Science, Importance of Statistics Scope of Statistics, Types of data: Primary data, Secondary data, Cross-sectional data, time series data, directional data, classification data and its classification, ungrouped frequency distribution,, grouped frequency distribution, cumulative frequency distribution, and relative frequency distribution.</p>
	<p>Unit 2. Measures of Central Tendency (15 Hours): Concept of central tendency of statistical data, Statistical averages, characteristics of a good statistical average. Arithmetic Mean (A.M.): Definition, effect of change of origin and scale, combined mean of a number of groups, merits and demerits, trimmed arithmetic mean. Mode and Median: Definition, formulae (for ungrouped and grouped data), merits and demerits, Quartiles, Deciles and Percentiles (for ungrouped and grouped data), Geometric Mean (G.M.): Definition, formula, merits and demerits. Harmonic Mean (H.M.): Definition. Formula, merits and demerits. mean Weighted Mean: weighted A.M., G.M. and H.M. Measures of Dispersion :Concept of dispersion, characteristics of good measure of dispersion.</p>

	<p>Range, Quartile deviation Mean deviation: Definition, merits and demerits, Variance and standard deviation</p>
	<p>Unit 3. Moments, Skewness and Kurtosis (6 Hours) : Concept of Raw and central moments, Formulae for ungrouped and grouped data (only first four moments), relation between central and raw moments upto fourth order. (without proof) , Measures of Skewness, Types of skewness, Pearson's and Bowley's coefficient of skewness, Measure of skewness based on moments, Measure of Kurtosis: Types of kurtosis, Measure of kurtosis based on moments</p>
	<p>Unit 4. Correlation (5 Hours): Bivariate data, Scatter diagram and interpretation, Concept of correlation between two variables, positive correlation, negative correlation, no correlation. variance between two variables , Karl Pearson's coefficient of correlation (r) , Spearman's rank correlation coefficient, compute Karl Pearson's correlation coefficient between ranks</p>
	<p>Unit 5. Regression (5 Hours) Meaning of regression, difference between correlation and regression, Concept of error in regression, error modeled as a continuous random variable. Simple linear regression model Estimation of a, b by the method of least squares. Interpretation of parameters.</p>
	<p>Unit 6. Time Series(5 Hours) Meaning and utility , Components of time series , Additive and multiplicative models , Methods of estimating trend : moving average method, least squares method and exponential smoothing method(with graph and interpretation)</p>
	<p>Unit 7. Introduction to R Programming(15 Hours) Concept of R, Installation of R, Data Types , Vector, List, Frame, Array, Matrix, Statistics Commands, Base graphics, Data manipulation with data table ,concept of cluster, Concept of Prediction Model ,Analysis of Real world Problem</p>

Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com, www.coursera.com</p>

Subject Name	105. Management Concepts and Applications
No. of Credits	4 Credits
Pre Requisite	General awareness about the organization and atomization used
Remembering	Students are expected to recalling day to day management concepts that are unknowingly applied in real life situations
Understanding	Gathering information about management, its origin and the contributions of some of the management gurus is achieved.
Applying	Students will learn implementation of management functions in real life cases so as to justify decision being taken and through ERPs availability
Analyzing	Students will learn fact finding in a situation using the objectives of each functions' achievement and its effective utilization in e commerce environment
Evaluating	Generating or creating the ability amongst the students in fact finding techniques and evaluating the actual performance with the planned.
Creating	Students are expected to capture the new cases in real life situation and create a solution in the form of model so as to resolve the problem such as ERPs
Syllabus	<p>Unit 1: Management: (9 Hours) Definition and Meaning ,Nature and purpose ,Evolution of Management thoughts, Contributions of F.W Taylor ,Contributions of Henry Fayol, Human relations approach, System approach to management, Skills and Functions of a manager</p> <p>Unit 2: Planning (9 Hours) Definition and Importance ,Types of Plans, Types of Planning , Steps in Planning ,Limitations of Planning ,Planning Premises, Management by Objectives (MBO):Concept, Objective setting Process, Benefits and Weaknesses, concept of software project planning</p> <p>Unit 3 : Organization (9 Hours) Definition ,nature of organizing, importance , process of organizing ,organization chart ,structure of IT organization , New Organisational Designs – Project, Matrix, Organic Structure & Mechanistic Structure Challenge of Modern Organisation, Virtual Organisation,Case study</p> <p>Unit 4 : Staffing (8 Hours) Nature & Significance, A brief knowledge of Recruitment, Selection, Training & Development, Performance Appraisal in IT organisation. Case study (8)</p> <p>Unit 5: Directing and Controlling: (15 Hours) Nature, Concept of Leadership, Leadership Styles, Theories of Leadership, Charismatic Leadership Theory, Role of Software Team Leader, case study , Concept and Importance of Control, Control Process, Types of Control Mechanism, Responsibility and authority , Management by Exceptions, case study.</p> <p>Unit 6:Decision making (6 Hours) Decision making and its process, Decision making conditions , need of computer based decision making , decision support system, expert</p>

	system.
	<p>Unit 7 :Introduction to E-commerce (6 Hours) E commerce types,E commerce spread in recent years ,E commerce importance ,Security measures under E commerce, introduction to Enterprise Resource Planning (ERP) ,ERP advantages, Introduction to SAP</p>
Text Books	<p>1.Principles of Management by L M Prasad, Sultan Chand Publications 2.E – Commerce: Strategy, Technologies and Applications” by David Whiteley</p>
Reference Books	<p>1. Principles of management by T Ramaswamy , Himalaya Publications 2. Principals of Management by Tripathi and Ready, 3. New Era of Management by Richard Daft ,South Western Sangage Learning 4.Management Principles and Practices by Lallan Prasad and SS Gulshan. Publications :Excel Books India. 5.Decision Support System , Janaki Raman ,PHI publications</p>

Subject Name	106 Lab on Applied Database Management Systems
No. of Credits	3 Credits
Pre Requisite	Concept of Database Management Systems, Familiarity with data processing concepts and applications.
Course Objective	<ul style="list-style-type: none"> •To practice the application of the concepts related to database its techniques and Operations. •SQL (Structured Query Language) is introduced in this subject.This helps to create strong foundation for application of database design.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	<ul style="list-style-type: none"> • Make use of different operators as per the questions
Understanding	<ul style="list-style-type: none"> • Understand the theoretical and physical aspect of a relational database.
Applying	<ul style="list-style-type: none"> • Implementation of RDBMS concepts through Oracle.
Analyzing	<ul style="list-style-type: none"> • Observe the performance of the query with different data sets.
Evaluating	<ul style="list-style-type: none"> • Test the results obtained from the different queries, PL/SQL blocks, functions
Creating	<ul style="list-style-type: none"> • Construct Simple and complex queries on sample datasets • Writing PL/SQL blocks
Syllabus	<p>Unit 1 Introduction to Oracle and SQL: (8 Hours) History, Features, Versions of Oracle, Database Structure: Logical Structure and Physical Structure, Oracle Architecture: System Global Area Processes: Server Processes, Background Processes, Tools of Oracle: SQL * Plus, PL/SQL, Forms, Reports, Pre Compilers:SQL Loader, Import, Export.</p> <p>Introduction to SQL : Keywords, Delimiters, Literals, Data Types, Components of SQL: DDL Commands– Defining a database in SQL, Creating table, changing table definition, removing table, Creating Tables with constraints on row level and column level, primary key, foreign key, check. Altering Constraints. DML Commands- Inserting, updating, deleting data, DQL Commands: Select Statement with all options. Renaming table, Describe Command, Distinct Clause, Sorting Data in a Table, Creating table from a table, Inserting data from other table, Table alias, and Column alias. DCL commands- Granting and Revoking Permissions</p>
	<p>Unit 2 Operators and Functions: (5 Hours) Operators:Arithmetic, Logical, Relational, Range Searching, Pattern Matching, IN & NOT IN Predicate, all, % any, exists, not exists clauses, Set Operations: Union, Union All, Minus, Intersect, Grouping data. Functions : Aggregate Functions, Numeric Functions, String Functions, Date Functions, Conversion Functions, Miscellaneous Sub queries Joins:Relating data through join concept. Simple join, equi join, non equi join, Self join, Outer join</p>

	<p>Unit 3 Database Objects: (5 Hours) Views:Introduction, Creating a View, Selecting data from a view, Updateable views, Views on multiple tables, Destroying a View. Sequences:Introduction, Creating a Sequence, Altering a Sequence, Referencing a Sequence, Dropping a Sequence. Index:Introduction, Creating Index, Simple Index, Unique Index, Reverse Key Index, Dropping Index.</p>
	<p>Unit 4 Introduction To PL/SQL: (5 Hours) Introduction, Advantages, PL/SQL Block, PL/SQL Execution Environment, PL/SQL Character set, Literals, Data types, PL/SQL Block: Attributes %type, %rowtype, Variables, Constants, Displaying User Message on screen, Conditional Control in PL/SQL, Iterative Control Structure: While Loop, For Loop, Goto Statement, Commit, Rollback, Savepoint</p>
	<p>Unit 5 : Cursor Management and Triggers: (5 Hours) Cursor:Explicit & Implicit Cursor, Declaring Cursor Variables, Constrained & Unconstrained Cursor Variables, Opening Cursor, Fetching Cursor into Variables, Closing Cursor, Cursor For Loops, Parametric Cursors. Triggers:Definition, Syntax, Parts of triggers: statement, body, restricted, Types of triggers: Enabling & disabling triggers.</p>
	<p>Unit 6 : Stored Procedures / Functions and Exception Handling: (5 Hours) Introduction, How oracle executes procedures/ functions, Advantages, How to create Procedures & Functions, Examples. Error Handling in PL/SQL: Exception Handling & Oracle Engine, Oracles Named Exception Handlers, User Named Exception Handlers.</p>
	<p>Unit 7 : MongoDB (7 Hours) Installation of MongoDB, Checking Shell, Creating Users and Enabling Authorization, Basic Querying Using Shell, sorting, indexing – single indexing and compound indexing, Using Conditional Operators in queries</p>
Text Books	<p>References (Books, Websites etc.): 1. Ivan Bayross SQL, PL/SQL The Programming Language of Oracle 3rd Revised Edition BPB Publications 2. “Practical MongoDB” by Shakuntala Gupta Edward, Navin Sabharwal by A Press.</p>
Reference Books	<p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayamwww. edx.com ; www.coursera.com</p>

Subject Name	107. Java Programming
No. of Credits	3 Credits
Pre Requisite	Any programming Language and Concepts of OOP
Cognitive Abilities	At the end of this course, student should be able to <ul style="list-style-type: none"> • Design interfaces, abstract and concrete classes needed, given a problem specification • Implement classes designed using object oriented programming language • Make them comfort to muse Java API for Input/output and Java Collections and utility classes • Able to achieve object persistence using object serialization and write modules to take advantages of concurrent programming
Remembering	<ul style="list-style-type: none"> ▪ Java language Data Types, control structures, OOP concepts, ▪ Java API to handle numbers, strings ▪ Get knowledge about core Java API (Wrapper classes; String classes, Math class) ▪ Java API hierarchy for Input/output, collections and concurrent programming
Understanding	<ul style="list-style-type: none"> ▪ Understanding how to write, compile and run a Java program. ▪ Structure of class and using Inheritance among them. ▪ How to create Arrays. ▪ Come to know need of inheritance, abstract class and interface and how to use them ▪ Get knowledge about core Java API, API hierarchy for Input/output, collections and concurrent programming
Applying	<ul style="list-style-type: none"> ▪ Design classes and interfaces for given problem statement by making use of OOP concepts. ▪ Using proper I/O classes and Collections classes for given problem statement.
Analyzing	<ul style="list-style-type: none"> ▪ Analyze a given problem statement to identify classes and relationships among them and making use of Java API efficiently.
Evaluating	<ul style="list-style-type: none"> ▪ Given a problem statement; students should able to decide/ best mechanism of class design using is_a or has_a relationships. ▪ Read/listen a problem statement and able to decide which I/O classes to be used. ▪ Able to debate about when make to use of threads and which collection implementation should be used.
Creating	Writing Java Applications with use of classes, interfaces and taking advantages of polymorphism.
Syllabus	
	Programming Exercises

1	<p>Introduction to Java</p> <p>Writing, compiling and Executing Java programs using basic language constructs as bellow</p> <ul style="list-style-type: none"> - Using Operators : arithmetic, relational, logical and bitwise - Control structures (if, if-else, switch) - Iterative statements (while, do-while, for)
2	<p>Class and Object Concepts</p> <ul style="list-style-type: none"> - Wring a class, creating objects and using it - Using constructors to initialize object - Programs to demonstrate parameter passing - Making use of access modifiers
3	<p>Arrays and Strings</p> <ul style="list-style-type: none"> - Programs to work with single dimensional and multidimensional arrays - Searching and sorting - Programming with string and operations on it - Programs to understand and study string literal pool
4	<p>Inheritance and Polymorphism</p> <ul style="list-style-type: none"> - Defining classes as generic types ; using it to write new class/classes - Need and example of method overriding - Writing abstract class and interface - Using abstract classes to write concrete classes - Using interface as base type to write new interface and implementing it to write new concrete class/classes - Anonymous and inner classes
5	<p>Concurrent Programming</p> <ul style="list-style-type: none"> - Designing and using Thread class and Runnable interface - Thread synchronization - Program to demonstrate Thread priorities, thread join and making use of yield - Programs with classes making use of thread and inter communication between them.
6	<p>Java Input/Output</p> <ul style="list-style-type: none"> - Programs to make using InputStream and OutputStream classes. - Reading and Writing data into files - Making use to console to read data. - Using readers and writers to write data into Files - Making use of Buffered Streams and reader and writer - Programs to take advantages of serialization
7	<p>Java Collections and Utility Classes</p> <ul style="list-style-type: none"> - Programs to make use collections (ArrayList, Vector, Set and Maps) - Writing user defined generic data types types - Programs to illustrate bounded types and erasures

SEMESTER II

Subject Name	201. Object Oriented Software Engineering
No. of Credits	4 Credits
Pre Requisite	Programming skills, Database Concepts.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Should be able to remember various steps carried out in development of software.
Understanding	Should be able to understand requirements of the user.
Applying	Should be able to apply object oriented concepts and UML diagrams to the defined problem.
Analyzing	Should be able to analyze requirements of the user and convert to functionalities of the software.
Evaluating	Should be able to Evaluate design of the existing software.
Creating	Should be able to de Design their own software.
Syllabus	<p>Unit 1 .Software and Software Engineering (5 Hours) The nature of software, Software Engineering Concept, SDLC, Process Models: Waterfall Model, V Model, Prototyping Model, Spiral Model, RAD (Rapid Action Development) Model</p>
	<p>Unit 2 .Object Oriented Concepts, Modeling and UML(5 Hours) 2.1 What is Object Orientation? (Introduction to class, object, inheritance, polymorphism) 2.2 Modeling 2.2.1 Introduction of Modeling 2.2.2 Object Oriented Modeling 2.3 UML (Unified Modelling Language) 2.3.1 History of UML 2.3.2 UML Diagrams 2.4 Iterative Development with RUP and Phases of RUP</p>
	<p>Unit 3 : Requirement Understanding and Requirement Modelling with Use Case Diagram (5 Hours) 3.1 Requirement Engineering 3.2 Requirement Elicitation 3.3 Developing Use Cases 3.4 Use Case Diagram 3.4.1 Realization of Use Cases 3.4.2 Finding Actors 3.4.3 Defining Relations among Use case 3.4.4 Writing Use Cases 3.5 Activity Diagram</p>
	<p>Unit 4 : Basic and Advanced Structural Modeling (10 Hours) 4.1 Class Diagram 4.1.1 Identifying the elements of an object model</p>

	<ul style="list-style-type: none"> 4.1.1 Identifying classes and objects 4.1.2 Specifying the attributes 4.1.3 Defining operations 4.1.4 Finalizing the object definition 4.1.5 Advanced class Modelling 4.1.6 Interface, Types and Roles <p>4.2 State Chart Diagram</p> <p>4.3 Package Diagram</p> <p>4.4 Object Diagram</p>
	<p>Unit 5 : Interaction Modelling (5 Hours)</p> <ul style="list-style-type: none"> 5.1 Introduction to Interaction Diagrams 5.2 Need of Interaction Diagrams 5.3 Interaction Diagrams <ul style="list-style-type: none"> 5.3.1 Collaboration Diagram 5.3.2 Sequence Diagram
	<p>Unit 6 : Architectural Modeling (5 Hours)</p> <ul style="list-style-type: none"> 6.1 Component Diagram <ul style="list-style-type: none"> 6.1.1 Need of Component Diagram 6.1.2 Realization of Components 6.1.3 Relating Components 6.2 Deployment Diagram <ul style="list-style-type: none"> 6.2.1 Software Architecture 6.2.2 Architectural Styles 6.2.3 Representing Architecture using Deployment Diagram
	<p>Unit 7 : Case Studies (10 Hours)</p> <p>7.4 Discussion on following case Studies-</p> <ul style="list-style-type: none"> a. Library Management System b. Hospital Management System c. Online Shopping d. Nukari.com website e. Matrimonial website
Text Books	1. Software Engineering by Pressman Publisher BPB
Reference Books	<ul style="list-style-type: none"> 1. The Unified Modeling Language User Guide by Grady Booch, James Raumbaugh, Ivar Jacobson. Publisher Addison-Wesley Professional 2. Object Oriented Software Engineering Use case driven approach by Ivar Jacobson Publisher Pearson 3. UML Distilled by Martin Fowler Publisher Addison-Wesley Professional 4. UML Toolkit 2 by Hans-Erik Eriksson Publisher Wiley.

Subject Name	202. Cloud Computing Concepts
No. of Credits	4 Credits
Pre Requisite	1. Knowledge of Web technologies 2. Knowledge of Web services and multimedia 3. Knowledge of DBMS
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	How to provide Flexible and scalable infrastructures
Understanding	Increased availability of high-performance applications to small/ medium-sized businesses
Applying	Reduces implementation and maintenance costs
Analyzing	The case studies will help us to understand more of practice of cloud computing in the market.
Evaluating	Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization
Creating	Creating flexible and scalable infrastructure suitable to the organizational need
Syllabus	Unit 1: Cloud Computing Fundamentals: (10 Hours) Definition of Cloud Computing, private, public and hybrid cloud. Cloud types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, public Vs private clouds
	Unit 2: Virtualization And Cloud Computing: (7 Hours) Role of virtualization in enabling the cloud; Business Agility: Benefits and challenges to Cloud architecture. Application availability, performance, security and disaster recovery; next generation Cloud Applications, Visualizing Virtualization, Managing Virtualization, Taking Virtualization into the Cloud
	Unit 3: Service Oriented Architecture And The Cloud : (7 Hours) Defining Service Oriented Architecture, Understanding the Coupling, Implementation of Service Oriented Architecture (SOA), Understanding Services in the Cloud, Serving the Business with SOA and Cloud Computing.
	Unit 4: Cloud Applications : (7 Hours) Technologies and the processes required when deploying web services; Deploying a web service from inside and outside a cloud architecture, advantages and disadvantages.
	Unit 5: Management Of Cloud Services: (7 Hours) Reliability, availability and security of services deployed from the cloud. Performance and scalability of services, tools and technologies used to manage cloud services deployment; Cloud Economics: Cloud Computing infrastructures available for implementing cloud based services. Economics of choosing a Cloud platform for an organization, based on application requirements, economic constraints and business needs (e.g Amazon, Microsoft and Google, Salesforce.com, Ubuntu and Redhat)
	Unit 6: Application Development: (7 Hours)

	Service creation environments to develop cloud based applications. Development environments for service development; Amazon, Azure, Google App.
	Unit 7: Cloud It Model: (7 Hours) Analysis of Case Studies when deciding to adopt cloud computing architecture. How to decide if the cloud is right for your requirements. Cloud based service, applications and development platform deployment so as to improve the total cost of ownership (TCO)
Text Books	<ol style="list-style-type: none"> 1. Cloud Computing: Principles and Pardigms by Rajkumar Buyya, james Broberg and Andrzej M.Gos cinski, Wiley, 2011. 2. Distributed & Cloud computing, Kai Hwang, Geoffery C.Fox,jack Elsevierm,2012 3. Cloud Computing implementation,management and security by John W.Rittinghouse,James E Ransome,CRC Press,Taylor & Francis group,2010 4. Cloud Computing a practical approach by Anthony T.Velte,Toby J.Velte Robert Elsenpeter,Tata Mc Graaw Hill edition,2010
Reference Books	<ol style="list-style-type: none"> 1. Cloud Application Architecture by George Reese,Oreilly publishers 2. Cloud computing and SOA convergence in your enterprise,by David S.Linthicum,Addison- Wesley

Subject Name	203. Data Structures and Algorithms using Python
No. of Credits	4 Credits
Pre Requisite	School Level Mathematics. It does not assume any prior knowledge of programming.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some motivating examples to remember and quickly builds up basic concepts such as conditionals, loops, functions, lists, strings and tuples.
Understanding	Students will get acquainted built in data structures in python, understand features and programming constructs of python language. During this course, they will understand main control structures of procedural programming languages. understand the complexity of various algorithms
Applying	They will make of function to reduce problem into small modules, To familiarize with exceptions and mechanism to handle it , make use of python to read and write data into files, implement ADT for various user defined data structures, implement data structures like: Stack, Queue, Link List, Tree.
Analyzing	Compare efficiency of various data structures for solving a particular problem. Analyzing performance of a algorithm.
Evaluating	Ability to choose appropriate data structures for problem solving Ability to use combination of these data structures for problem solving. Evaluating the performance of various Algorithms and Data Structures.
Creating	Design and create their own data structure for solving a real life problem
Syllabus	<p>Unit 1: (6 Hours) Basics of Python: Python Installation, writing and executing first python script, using python editors to write and execute python scripts Identifiers and Operators: Writing get familiar with python variables and data types, variables and assignments, Operator understanding and its usage, Python Control structures in Python: Conditionals and Loops: if statement, else Statement, el-if Statement, while Statement, for Statement, break Statement, continue Statement, pass Statement, Working strings in python: String type, strings concatenations and comparing strings, using string functions</p>
	<p>Unit 2: (6 Hours) Working with functions and Built in data structures Functions: Writing a simple function and using it, functions and parameters, functions retuning values, functions and variable scope, Variable number of arguments, passing objects and collections in function, understanding recursive functions, writing and using recursive functions.</p>

	<p>Variable number of arguments to functions</p> <p>Python data Structures: List: Crating and using list and tuples. Operations on list and tuples, Special Features of Lists and tuples, introduction to List comprehensions Dictionaries: Introduction to Dictionaries, Operators, Built-in Functions, Built-in Methods, Dictionary Keys, Using Set data structure, Arrays</p>
	<p>Unit 3: (8 Hours) Handling Exceptions and File Input/Output : Need of exception Handling, Simple mechanism to handle exception, Using if exceptions to handle the code cracks, Using else clause while handling exceptions, Handling generic and specific exceptions, handling multiple exceptions, Raising exception, File Objects, creating a file object, reading File contents, Writing data into file, reading and writing CSV files, using with clause, Using Exception handling with file operations,</p>
	<p>Unit 4: (9 Hours) Introduction ADT : Writing a simple Class in Python, creating object of class, Instance Methods, Class Variables and special methods. Understanding ADT, Defining ADT using pseudo-code, Defining ADT for Date, Stack and Queue, Implementation of Date, Stack and Queue ADT. Concepts of circular and double ended queue. Applications of Stack and Queue.</p>
	<p>Unit 5: (8 Hours) Linked Lists: Defining List as ADT, Implementation of Singly Linked Lists, Circularly Linked Lists, Doubly Linked Lists, The Positional List ADT, Sorting a Positional List, Link-Based vs Array-Based Sequences. Implementation of Stack and Queue using Link List. Applications of Linked List (polynomial Equations)</p>
	<p>Unit 6: (9 Hours) Trees: Concepts of tress and Binary Trees, Defining binary tree as ADT, Implementing Binary Trees, Tree Traversal Algorithms Search Trees: Binary Search Trees ,Balanced Search Trees ,Python Framework for Balancing Search Trees ,AVL Trees ,Splay Trees, Red-Black Trees Heaps, Maps, Hash Tables, and Skip Lists</p>
	<p>Unit 7: (9 Hours) Searching , Sorting and Analysis of Algorithms Need of searching, linear search, using binary search for efficient search. Need of sorting and various sorting algorithms: insertion sort, bubble</p>

	<p>sort, selection sort; Merge sort and quick sort algorithms. Python's Built-In Sorting Functions, Selection Algorithms.</p> <p>Analysis of Algorithms: Measuring Algorithm Efficiency, Asymptotic Analysis, The Big-O Notation, Find the complexity of Algorithms: Linear Search, Binary Search, Sorting Algorithms. Compare complexity of various searching and sorting Algorithms.</p>
Text Books	<p>Data Structures and Algorithms in Python Paperback – 2016 by Michael T. Goodrich (Author), Roberto Tamassia (Author), Michael H. Goldwasser (Author) WILEY PUBLICATION</p> <p>Data Structure and Algorithmic Thinking with Python Paperback – 2015 by NarasimhaKarumanchi (Author)</p>
Reference Books	<p>Problem Solving in Data Structures & Algorithms Using Python: Programming Interview Guide by Hemant Jain</p>
MOOC on NPTEL	<p>https://nptel.ac.in/courses/106/106/106106145/#</p>

Subject Name	204. Data Warehousing and Data Mining
No. of Credits	4 Credits
Pre Requisite	Thorough understanding of Relational database normalization techniques , Physical design of a database, Concepts of algorithm design and analysis, Basic understanding of: Software engineering principles and techniques, Probability and statistics
Course Objectives	This course will enable to expose the students to Study various design and implementation issues and techniques in data warehousing and data mining.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Remembering the fundamentals of Database technology and its application in data warehousing and data mining.
Creating	Creating multi dimensional data models using star, snowflake and fact constellation schemas.
Understanding	Understand the components, architecture and other important tools of data warehousing and data mining.
Applying	Apply the techniques of clustering, classification, association and other data mining algorithms to real world data.
Analyzing	Gather and analyze large sets of data to gain useful information using data mining techniques.
Evaluating	Producing and interpreting quantitative analysis using various data mining algorithms.
Syllabus	<p>Unit 1. Business Intelligence: (5 Hours) Business Environment and Computerized Decision Support, Managerial Decision Making, Computerized support for Decision Making, Decision Support System, Early Framework for Computerized Decision Support, Business Intelligence, Importance of BI, BI for Decision makers, The BI process, A framework for Business Intelligence.</p>
	<p>Unit 2: Data warehousing: (10 Hours) OLTP and OLAP Systems, Introduction to Data Warehouse, Differences between OLTP Systems and Data Warehouse, Characteristics of Data Warehouse; Advantages of Data Warehouse; Data Warehouse Users, Metadata, Classification of Metadata, and Importance of Metadata. Data Marts, Reasons for creating Data Marts, Building Data Marts: Top down Approach & Bottom up Approach, Data Warehouse Architecture, Two tier Architecture, Three Tier Architecture. Data Warehouse Schema, Star, Snow Flake & Fact Constellation Schema. OLAP Operations, OLAP Models.</p>
	<p>Unit 3. Data Preprocessing: (5 Hours) Need, Objectives and Techniques of data preprocessing. Descriptive Data Summarization: Measuring the Central Tendency, Measuring the Dispersion of Data, Graphic Displays of Basic Descriptive Data Summaries</p>

	<p>Data Cleaning: Handling of Missing values and Noisy Data, Data cleaning as a process</p> <p>Data Integration and Transformation: Data Integration: Schema integration, Controlling redundancies using correlation. Data Transformation: Smoothing, Aggregation, Generalization, Attribute construction, Normalization</p> <p>Data Reduction: Data Cube Aggregation; Attribute Subset Selection, Dimensionality Reduction, Numerosity Reduction, Discretization & Concept Hierarchy Generation for Numerical Data and for Categorical Data.</p>
	<p>Unit 4. Introduction Data Mining : (5 Hours) Evolution of database system technology, introduction to data mining, architecture of a typical data mining system, Types of data that can be mined, Data Mining Functionalities, Classification of Data Mining systems, Data Mining Task Primitives, Integration of a Data Mining System with a Database or a Data Warehouse System, Major issues in Data Mining.</p>
	<p>Unit 5: Mining Association Rules : (5 Hours) Introduction, Market Basket Analysis, Multi-Level and single level Mining, Mining Association Rules on Transactional database, Multi-Dimensional Association Rules From Relational Databases & Data Warehouses, From Association Mining To Correlation Analysis, Constraint Based Association Mining, Association Rule mining using Apriori Algorithm, and FP Growth algorithm. Generalized association rule.</p>
	<p>Unit 6: Classification & Prediction: (5 Hours) Introduction to Classification and Prediction; Basics of Supervised & Unsupervised Learning; Preparing the Data for Classification and Prediction; Comparing Classification and Prediction Methods, Classification by Decision Tree Induction, Tree Pruning, Rule-based Classification Using IF-THEN Rules for Classification; Rule Extraction from a Decision Trees; Bayesian Classification: Bayes' Theorem, Naïve Bayesian Classification. Prediction using Regression analysis.</p>
	<p>Unit 7. Cluster Analysis: (5 Hours) Introduction to Cluster Analysis; Types of Data in Cluster Analysis; Classification of clustering methods-Partitioning Method, Hierarchical Method, Density-based Method, Grid-Based Method, Model-Based Method, Constraint-based Method Partitioning Methods: K-Means and K-Medoids</p>
Text Books	<p>References (Books, Websites etc.):</p> <ul style="list-style-type: none"> • Jiawei Han, Micheline Kamber, Data Mining: Concepts and Techniques, Harcourt India Pvt., 2011.

Reference Books

- D. Hand, H. Mannila, and P. Smyth, Principles of Data Mining, MIT Press, 2011

Subject Name	205. Web Supporting Technologies
No. of Credits	4 Credits
Pre Requisite	Any pre-requisite knowledge is not required.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	The students will get information of the basics of internet with the help of examples. It will help them to identify and remember Web supporting concepts.
Understanding	Remembering the definitions will help the students to understand basic concepts of HAML, JavaScript, CSS and PHP etc. In this subject, students will understand various tags, programming constructs of JavaScript, technical issues, cascading Style Sheets, forms and PHP concepts.
Applying	Students will Have thorough knowledge of HTML and JavaScript. They will be able to design various forms as per requirements. They will be able to apply CSS concepts in scripting. The students will also apply their creativity to display the output.
Analyzing	The students will relate real life problem with the JavaScript solution. They will analyze the problem and solve it.
Evaluating	Ability to use JavaScript construct for problem solving, handling technical issues etc.
Creating	Design and create their own forms for solving a real-life requirement.
Syllabus	<p>Unit 1: Basics of Internet: (4 Hours) Understanding internet and intranet, difference between internet and intranet, Introduction to WWW, Concept of client and server, Introduction to web server and web browser, using Apache as web server, Internet Service Providers (ISP)</p> <p>Unit 2: Introduction to HTML: (14 Hours) Overview of HTML, concept of Tag, types of HTML tags, structure of HTML program, Text Formatting Through HTML: Emphasizing Material in a Web Page, Using Image tag, attributes of Image tag, Lists: Using unordered, ordered, definition lists, Handling Tables: To define header rows & data rows, use of caption tag, changing height & width of table, BGcolor, Handling Tables: cell padding, cell spacing, colspan, row span, handling table data, images in table, Frames: Introduction To frames, using frames & framesets, named frames, Concept of hyperlink, types of hyperlinks, linking to the beginning of document, linking to a particular location in a document, image as hyperlinks</p> <p>Unit 3: Cascading Style Sheets: (4 Hours) Introducing CSS, Types of style sheets: inline, embedded and external style sheets, working with CSS properties: text properties, color and background properties, border and shading, box and block properties, positioning with CSS, various types of CSS selectors, Using class and span tag, External style sheets,</p>

	<p>Unit 4: Introduction to JavaScript (Client-Side Scripting): 16 Hours) Introduction to scripting, overview of Java Script, advantages, client-side java Script, capturing user input, writing JavaScript into HTML, Advantages and limitations of JavaScript, JavaScript Basics: Data types, literals, variables and operators, Java Script arrays, dense array, operators, expressions, JavaScript Programming Constructs: Assignment, data declaration, if, switch, while, for, do while, label, break, continue, function call, return, with, delete, method of invocation Dialog boxes -Alert dialog box, prompt dialog box, confirm dialog box, window objects JavaScript Functions- Types of functions in Java Script- Built in functions, User defined functions, function declaration, passing parameters, variable scope, return values, recursive functions Arrays- Introduction to arrays, arrays with methods</p>
	<p>Unit 5: Forms: (14 Hours) Interactive web pages concepts, difference between static & dynamic web pages, Concept of form, how form works, Different elements - text, password, button, submit, reset, checkbox, Radio, Text Area, select & option, properties of form elements, form object's Method, Other built-in Object: String object, math object, date object, Regular Expressions, Form validation</p>
	<p>Unit 6: JavaScript Events: (4 Hours) What is an Event? Onclick Event Type, onsubmit Event Type, onmouseover and onmouseout, onchange, onload, onkeydown, working with DOM, Concept of Cookies and sessions, when and how to use cookies and sessions,</p>
	<p>Unit 7: Introduction to PHP: (8 Hours) Server-side web scripting, Adding PHP to HTML, Syntax and Variables, PHP control structures, Establishing connectivity with MySQL database</p>
Text Books	<ol style="list-style-type: none"> 1. Ivan Bayross (2006) Web Enabled Commercial Application Development Using HTML, DHTML, JavaScript, Perl CGI, BPB Publications
Reference Books	<ol style="list-style-type: none"> 1. Thomas Powell, Web Design The complete Reference, Tata McGrawHill 2. Thomas Powell and Fritz Schneider JavaScript 2.0 : The Complete Reference, Second Edition 3. PHP: The Complete Reference By Steven Holzner, Tata McGrawHil 4. MOOC on NPTEL	NPTEL / Swayam www.edx.com www.coursera.com www.w3schools.com
----------------------	--

Subject Name	206. Lab on Data Structures using Python
No. of Credits	4 Credits
Pre Requisite	School Level Mathematics. It does not assume any prior knowledge of programming.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some motivating examples to remember and quickly builds up basic concepts such as conditionals, loops, functions, lists, strings and tuples.
Understanding	By remembering students the basing concepts students will understand the concepts of searching and sorting algorithms, dynamic programming and backtracking, as well as topics such as exception handling and using files. As far as data structures are concerned, the course covers Python dictionaries as well as classes and objects for defining user defined data types such as linked lists and binary search trees.
Applying	Students will Have thorough knowledge about data structures and will be able to design & develop program using linear data structures& non linear data structures for solving problems
Analyzing	Compare efficiency of various data structures for solving a particular problem.
Evaluating	Ability to choose appropriate data structures for problem solving Ability to use combination of these data structures for problem solving.
Creating	Design and create their own data structure for solving a real life problem
Syllabus	Unit 1 (4 Hours) Informal introduction to programming, algorithms and data structures via gcd, Downloading and installing Python,gcd in Python: variables, operations, control_flow - assignments, conditionals, loops, functions.
Suggested Programs	Installation of Python IDE, understand various platforms for Python (google collaborator, Jupitar notebook) <ul style="list-style-type: none"> • Basic program to understand Data Types • creating variables, accepting input variable from user and printing their datatype • Mathematical functions (apply various operations on data +, -, /, *) • Conditional Statements (if, else, , • Create functions to <ul style="list-style-type: none"> ○ Find average of marks of five subjects

	<ul style="list-style-type: none"> ○ Find sum of first n prime numbers
	<p>Unit 2 (8 Hours) Python: types, expressions, strings, lists, tuples, arrays Python memory model: names, mutable and immutable values List operations: slices etc - Binary search Inductive function denitions: numerical and structural induction Elementary inductive sorting: selection and insertion sort In-place sorting.</p>
Suggested Programs	<ul style="list-style-type: none"> • Operations on Strings, Lists , tuples and arrays <ul style="list-style-type: none"> ○ Creating lists/tuple/array and accessing list elements using index ○ Access the list/tuple element using –ve index ○ Extract specific element from list/tuple/array ○ Use len(), del(), remove() and range functions on list/tuple • Applying different searching and sorting algorithm on data (list)
	<p>Unit 3 (7 Hours) Basic algorithmic analysis:input size,asymptotic,omplexity,O() notation Arrays vs lists Merge sort Quicksort Stable sorting. Dictionaries More on Python functions: optional arguments, default values Passing functions as arguments Higher order functions on lists: map, lter, list comprehension.</p>
Suggested Programs	<ul style="list-style-type: none"> • Write a program for sorting given list using Quick Sort • Fuction calling (passing the variables) <ul style="list-style-type: none"> ○ Find factorial of a number ○ Find fibbonacci series for a given number • Create Dictionaries with key,value pair, and access various elements of Dictioneries, Various operation using Dictionaries. • Usage of map, lter functions on list
	<p>Unit 4 (7 Hours) Exception handling Basic input/output Handling files String processing.</p>
Suggested Programs	<ul style="list-style-type: none"> • Read, write, search operations on File data structure • Write Programs based on exception handling • Write program for various operations on string variables
	<p>Unit 5 (7 Hours) Backtracking: N Queens, recording all solutions Scope in Python: local, global, nonlocal names Nested functions Data structures: stack, queue Heaps.</p>
Suggested Programs	<ul style="list-style-type: none"> • Creation and various operations on Stack • Creation and various operations on queue

	<ul style="list-style-type: none"> • Creation and various operations on heap • Defining scope variables in Python
	Unit 6 (9 Hours) Abstract datatypes Classes and objects in Python "Linked" lists: find, insert, delete Binary search trees: find, insert, delete Height-balanced binary search trees.
Suggested Programs	<ul style="list-style-type: none"> • Creation of class data structure ,Abstract classes • Creation of Link List and various operations on Link List • Implementation of tree data structure using class concept
	Unit 7 (9 Hours) Efficient evaluation of recursive denitions: memoization Dynamic programming: examples Other programming languages: C and manual memory management Other programming paradigms: functional programming.
Suggested Programs	Comparison of all discussed algorithm with their implementation in C and compare memory usage.
Text Books	Data Structures and Algorithms in Python Paperback – 2016 by Michael T. Goodrich (Author), Roberto Tamassia (Author), Michael H. Goldwasser (Author) WILEY PUBLICATION Data Structure and Algorithmic Thinking with Python Paperback – 2015 by Narasimha Karumanchi (Author)

MOOC on NPTEL	https://nptel.ac.in/courses/106/106/106106145/#

SEMESTER III

Subject Name	301. Software Design Patterns
No. of Credits	4 Credits
Pre-Requisite	This course assumes students should have following knowledge: <ul style="list-style-type: none"> • OOAD and UML. • Software Engineering • Java Programming
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Ability to identify the structure, framework of Design Patterns for a given problem
Understanding	Ability to understand the meanings, concepts and types of Design Patterns
Applying	Ability to decide and suggest a design pattern for the given problem
Analyzing	Exploit the possibilities and limitations of basic design patterns for a given problem and ability to analyze a software development problem
Evaluating	Ability to evaluate, assess the design pattern that are appropriate for a given problem
Creating	Create software design that are scalable, robust and easily maintainable and consisting multiple modules
Syllabus	
	Unit 1: Introduction to Design Patterns (4 Hours) Reusable design Patterns: Meaning & Use of Design Patterns, Organizing the Patterns, describing pattern, how to use the patterns while solving the problem, Applications of different design patterns in various cases. Selection of a Design Pattern
	Unit 2: Creational Patterns (8 Hours) Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences and Implementation of following Creational Patterns: - Factory Method, Abstract Factory, Builder, Prototype, Singleton. Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Creational design pattern.
	Unit – 3: Structural Patterns (8 Hours) Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of Following Structural Patterns Adapter (class), Adapter (object), Bridge, Composite, Decorator. Façade, Flyweight, Proxy. Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Structural design patterns.
	Unit 4: Behavioral Patterns – I (8 Hours) Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of following Behavioral Pattern Interpreter, Template Method, Chain of Responsibility, Command, Iterator

	Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Behavioral Design Patterns – I
	<p>Unit 5: Behavioral Patterns – II (8 Hours)</p> <p>Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of following Behavioral Pattern Mediator, Memento, Observer, State, Strategy, Visitor</p> <p>Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Behavioral Design Patterns – II</p>
	<p>Unit 6: JEE Patterns (6 Hours)</p> <p>Presentation Layer Design Pattern, Business Layer Design Pattern, Integration Layer Design Pattern</p> <p>Tutorial: Tutorials should be conducted in LAB using JAVA for implementing above Patterns</p>
	<p>Unit 7: Case Study (4 Hours)</p> <ul style="list-style-type: none"> • Designing a parking lot • Designing Movie Ticket Booking System • Design Logistic System • Online Hotel Booking System OYO
Text Books	Head First Design Patterns, Eric Freeman, Elisabeth Freeman, Kathy Sierra, Bert Bates,
Reference Books	<ul style="list-style-type: none"> • Design Patterns Elements of Reusable Object-oriented Software- Erich Gama, Richard Helm, Ralph Jonson • Ben Schneiderman, Designing the User Interface, Pearson Education, 1998
MOOCs on NPTEL	https://nptel.ac.in/courses/106/105/106105224/
Web Resources	https://www.tutorialspoint.com/design_pattern/index.htm https://www.javatpoint.com/design-patterns-in-java

Subject Name	302. Artificial Intelligence
No. of Credits	4 Credits
Pre Requisite	The Student should be well aware with: Strong hold on Mathematics, Strong experience of programming languages, Writing algorithm for finding patterns and learning, Strong data analytics skills, Good knowledge of Discrete mathematics, Strong will to learn machine learning languages.
Expected Outcome	At the end of the course a student should be able: <ul style="list-style-type: none"> • Understand various search methods. • Use various knowledge representation methods. • Understand various Natural Language Processing techniques. • Use Python Programming language using Numpy and Pandas.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some motivating examples to remember and quickly builds up basic concepts such as visual perception, speech recognition, decision-making, and translation between languages
Understanding	By remembering the basic concepts students will understand the concepts of Natural-language understanding (NLU) or natural-language interpretation (NLI), as well as topics such as simulation process of human intelligence by machines and special computer systems. As far as artificial intelligence is concerned the course covers natural language processing, Knowledge Representation Issues, Symbolic Reasoning under Uncertainty as well as Machine Learning (ML) using Python.
Applying	Students will have thorough knowledge about various level of mathematics, including probability, statistics, algebra, calculus, logic and algorithms. Bayesian networking or graphical modeling, including neural nets. Physics, engineering and robotics, Computer science, programming languages and coding. Knowledge of Python is essential.
Analyzing	Compare efficiency of various Theories of Intelligence and learning from experience for solving a particular problem.
Evaluating	Ability to choose appropriate Knowledge based approach for problem solving. Ability to use combination of these artificial intelligence theories for problem solving.
Creating	Design and create their own artificial intelligence applications for solving a real life problem
Syllabus	
	Unit1:Introduction: (4 Hours) What is AI? ,The AI Problems, Background/history, What Is An AI Techniques, The Level Of The Model, Criteria For Success, Some General References, High-level overview of field, State of the art.
	Unit 2 : Introduction and historical perspective, Hard and Soft AI

	<p>(7 Hours)</p> <p>Disciplines and applications, Theories of Intelligence, Detecting and Measuring Intelligence, Knowledge based approach, Problems, State Space Search & Heuristic Search Techniques: Defining The Problems as A State Space Search, Production Systems, Production Characteristics, Production System Characteristics, And Issues In The Design Of Search Programs, Additional Problems. Generate – And-Test, Hill Climbing, Best-First Search, Problem Reduction, Constraint Satisfaction, Means-Ends Analysis.</p>
	<p>Unit 3: Knowledge Representation Issues(6 Hours)</p> <p>Representations And Mappings, Approaches To Knowledge Representation. Using Predicate Logic: Representation Simple Facts In Logic, Representing Instance And Isa Relationships, Computable Functions And Predicates, Resolution. Representing knowledge Using Rules: Procedural Versus Declarative Knowledge, Logic Programming, Forward Versus Backward Reasoning</p>
	<p>Unit 4 : Symbolic Reasoning under Uncertainty(5 Hours)</p> <p>Introduction To Non-monotonic Reasoning, Logics For Non monotonic Reasoning. Statistical Reasoning: Probability And Bays’ Theorem, Certainty Factors And Rule-Base Systems, Bayesian Networks, Dumpster-Shafer Theory, Fuzzy Logic.</p>
	<p>Unit 5:Natural Language Processing(5 Hours)</p> <p>Introduction, Syntactic Processing, Semantic Analysis, Semantic Analysis, Discourse And Pragmatic Processing, Spell Checking.</p> <p>Connectionist Models: Introduction: Hopfield Network, Learning In Neural Network, Application Of Neural Networks, Recurrent Networks, Distributed Representations, Connectionist AI And Symbolic AI.</p>
	<p>Unit 6: Introduction to machine learning (7 Hours)</p> <p>Introduction Machine Learning Concepts, methods and models, Supervised Learning, unsupervised and semi-supervised, Learning Decision Trees, Evaluating and Choosing the Best Hypothesis, ,</p> <p>Introduction to Numpybasics, creating numpy arrays ,structure and content of arrays, subset, slice, index and iterate through arrays, multidimensional arrays, python lists vs numpy arrays, introduction to numpy operations on numpy arrays , operations on arrays basic linear algebra operations.</p>
	<p>Unit 7 : Introduction to pandas (8 Hours)</p> <p>Introduction, pandas basics, indexing and selecting data, merge and append, grouping and summarizing data frames, lambda function & pivot tables, reading delimited and relational databases, reading data from websites, getting data from apis, reading data from pdf files, cleaning datasets.</p>

	<p>Case study: For example, to explore a dataset stored in a CSV on your computer. Pandas will extract the data from that CSV into a Data Frame — a table, basically — then let you do things like:</p> <p>Calculate statistics and answer questions about the data, like</p> <ol style="list-style-type: none"> 1) What’s the average, median, max, or min of each column? 2) Does column A correlate with column B? 3) What does the distribution of data in column C look like? 4) Clean the data by doing things like removing missing values and filtering rows or columns by some criteria 5) Visualize the data with help from Matplotlib. Plot bars, lines, histograms, bubbles, and more. 6) Store the cleaned, transformed data back into a CSV, other file or database
Text Books	<ol style="list-style-type: none"> 1) Artificial Intelligence : A Modern Approach, Stuart Russel, Peter Norvig 2) Artificial Intelligence and Machine Learning by Chandra S.S.V, PHI
Reference Books	<ul style="list-style-type: none"> • “Artificial Intelligence” -By Elaine Rich And Kevin Knight (2nd Edition) Tata McGraw-Hill • Artificial Intelligence A New Synthesis :Nilson, Elsevir • Introduction to Artificial Intelligence and Expert System- Patterson, Prentice Hall India. • Shai shalev-shwartz, Shai Ben-David: Understanding Machine Learning from Theory to algorithms, Cambridge University press.

Subject Name	303. Information Security
No. of Credits	4 Credits
Pre Requisite	Basic Knowledge about Software Development Life Cycle, System Analysis
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of software development and software engineering Information can be understood and remembered .
Understanding	By remembering students the basing concepts students will understand the concepts of Information , Characteristics , Levels of Information, Information Security Measures and various stages in Information testing Life Cycle .
Applying	Students will Have thorough knowledge about Measures of Information Security and Cyber security at higher level , network security measures and various scanner and cleaners
Analyzing	To Measure the risk of Information loss or theft and over come the Information Security by scientific and proper methods .
Evaluating	Ability to select proper method to protect the information from misuse and make the organization full proof from various Information threats.
Creating	Design and create their own procedure to protect the important data and information at all the levels.
Syllabus	<p>Unit 1: Introduction and Background (5 Hours) Basic concepts of Information, Information Characteristics, sources of Information, Types of Information, Generating Information in Organizations. Business Application of Information and Information System, What is Information security? Need for Information Security , Types of Organization , Functions of Business organization , Levels of Organization , How Organizations manage the information , flow of information.</p> <p>Unit 2: Basics of Networking for Security Purpose (8 Hours) Network Installations, Types of Networks and their security issues, Types of Network of OS. Functions of Information security officer. Different measures to safe guard the important information in the organization. Network policy for protecting important resources of the Network. Basic concept of MIS and Organization flow of Information.</p> <p>Unit 3: Importance of Information Security (7 Hours) Improvement in corporate reputation based on the height of the level of information security, threat to business continuity due to accidents related to information systems, cyber space, information assets, threats, and vulnerabilities. Information Security Measures. Threats :- Ty p e s of threats physical threats (accident, disaster, fault, destruction, theft, unauthorized intrusion, etc.), technical threats (unauthorized access, eave</p>

	<p>S dropping , spoofing, alteration, error, cracking, etc.), man-made threats (operational error, loss, damage, peep, unauthorized use, social engineering, etc.), cyber-attack, information leakage, intent, negligence, mistake, fraudulent behavior, sabotage, DoS attack, rumor, flaming, SPAM e-mail, file sharing software [Malware / malicious programs] computer virus, macro virus, worm, bot (botnet, remote operated virus), Trojan horse, spyware, ransom ware, key logger, root kit, backdoor, fake anti-virus software</p>
	<p>Unit 4: Information security technology (cryptography) (7 Hours) CRYPTREC ciphers list, cryptography (encryption key), decryption (decryption key), decoding, symmetric cryptography (common key), public key cryptography (public key, private key)), AES (Advanced Encryption Standard), S/MIME (Secure MIME), PGP (Pretty Good Privacy), hybrid encryption, hash function (SHA-256, etc.), key management, disk encryption, file encryption, compromise. digital signature (signature key, verification key), timestamp (time authentication), message authentication, MAC (Message Authentication Code), challenge-response authentication. Human assets (people, and their qualifications, skills, and experience), intangible assets, service, risk management (JIS Q 31000), monitoring, information security events, information security incidents.</p>
	<p>Unit 5: Information security Management (7 Hours) Management of information based on the information security policy, information, information assets, physical assets, software assets Risk analysis and evaluation (Information asset review / Classification) information assets review, classification and management by importance of information assets, information assets ledger Risk analysis and evaluation (Risk type)loss of property, loss of responsibility, loss of net earnings, human cost, operational risk, supply chain risk,</p>
	<p>Unit 6: Information security regulations (8 Hours) (Company regulations including information security policy) organizational operation according to the information security policy, information security policy, information security purpose, information security measures criteria, information management regulations, security control regulations, documentation control regulations, regulations on measures to be taken against computer virus infection, regulations on measures against accidents, information security education regulations, privacy policy (personal information protection policy), employment agreement, office regulations, penal provisions, outward explanation regulations, regulations for exceptions, regulations for updating rules, procedure for approving regulations</p>
	<p>Unit 7: Management of Information Asset. (8 Hours) Security Incidents management, reducing risk in Information loss and keeping the information safe from unauthorized users and threats .</p>

	<p>Information Technology Act, Cyber Crimes and Cyber Laws. -What are cyber-crimes? Types of cyber-crimes. Categories of Cyber Crime, Online business threats , Online business frauds Safety tips for online business. , IT Policy for Information protecting. risk involved in usage of external service, risk involved in distribution of information by SNS, moral hazard, estimated annual loss, scoring method, cost factor .</p>
Text Books	<ol style="list-style-type: none"> 1. Information Security Management Handbook, Sixth Edition, Volume 5-2012 Amazon Books Edited by - Micki Krause Nozaki, Harold F. Tipton. 2. Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives Nina Godbole and Sunit Belpure, Publication Wiley. 3. Information Security: Principles and Practice 1st , Kindle Edition -2005 Amazon Books Author - Mark Stamp 4. “Cryptography and information Security” V.K. Pachghare, PHI Learning Private Limited, Delhi India. 5. Analyzing Computer Security by Charles P. Pfleeger, Shari Lawrance Pfleeger, Pearson Education India 6. Anil Gaikwad , Jyoti Biradar (Patil) “Basic Concepts of System Analysis” Lambert Academic Publication Dec. 2019 .
Reference Books	<ol style="list-style-type: none"> 1. Practical Information Security Management: A Complete Guide to Planning and Implementation-Dec-2016 Amazon Books . Tony Campbell 2. Managing Risk and Information Security :- Protect to Enable 3. Anil Gaikwad , Jyoti Biradar (Patil) Software Project Management Made Easy Lambert Academic Publication Dec 2019.
MOOC on NPTEL	<p>https://nptel.ac.in/courses/, http://www.freetechbooks.com/managing-risk-and-information-security-protect-to-enable-t1150.html</p>

Subject Name	306. Lab on Software Testing
No. of Credits	3 Credits
Pre Requisite	<ul style="list-style-type: none"> • Fundamental knowledge of computer. • Fundamental knowledge of Software Engineering, System Analysis and Design.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	The purpose of this course is to build the skills necessary to perform software testing at the function, class and application level.
Understanding	Concepts of developing test plan, test cases, execution of test cases etc.
Applying	Work on automated software testing tools like bugzilla, winrunner, selenium, test link etc.
Analyzing	Analyse the requirements for the given problem statement Find defects which may get created by the programmer while developing the software.
Evaluating	Gain confidence to write and execute test cases. To get the knowledge about automated testing and automated testing tools.
Creating	Design and implement the solution for given problem in any programming language. Derive test cases and execute test cases for any given problem.
Syllabus	<p>Unit 1: Introduction Software Testing (6 Hours)</p> <p>Basic testing vocabulary, Quality assurance versus Quality control, Cost of quality, Software quality factors, How quality is defined? Why do we test software? What is a defect?, defect life cycle. The Multiple roles of the software tester, Scope of testing, When should testing occur?, Testing constraints, Life cycle testing, Independent testing, Levels of testing, The “V” Concept of testing</p> <p>Unit 2: Testing Techniques (7 Hours)</p> <p>Structural versus Functional Technique Categories, Verification versus Validation, static versus Dynamic Testing, Examples of Specific Testing Techniques like white box testing and black box testing, Test Planning, Customization of the Test Process, Budgeting, Scheduling, Different test phases, difference between retesting and regression testing.</p> <p>Unit 3: Test Plan and test management tool: Test Director (7 Hours)</p> <p>Prerequisites to test planning, Understand the Characteristics of the Software Being Developed, Build the Test Plan, Write the Test Plan. Necessity of test management tool, understand test life cycle, defect life cycle. Demonstrate different test & defect life cycles through testing tool , Overview of Test management and bug tracking tools</p> <p>Unit 4: Test cases (6 Hours)</p>

	<p>Test Cases, Test case Design, Building test cases, Test data mining, Test execution, Test Reporting, Defect Management, Test Coverage: Traceability matrix</p> <p>Test Metrics: Guidelines and usage, Test reporting: Guidelines for writing test report, Test Tools used to Build Test Reports</p> <p>Manual testing Case Study • Requirements / User Story Study Hands on • Test planning Hands on • Test design Hands on • Test execution Hands on</p>
	<p>Unit 5 : Performance Testing (4 Hours)</p> <p>What is performance testing , why do we do performance testing, Types of performance testing , common performance problems, performance test metrics, performance testing tools.</p>
	<p>Unit 6:Automation Testing (5 Hours)</p> <p>Basics of automation testing – why, when, how to perform automation testing, , Progression vs Regression test automation, Factors for choosing a particular tool, An overview for the major functional testing tools. Overview of Test management and bug tracking tools.</p>
	<p>Unit 7: Automation testing tools (10 Hours)</p> <p>Study of bug tracking tool: Bugzilla. Study of winrunner, study of web testing tool selenium.</p> <p>Study of open source testing tool: test link, Case study for automation testing</p>
Text Books	<p>Hetzel, The Complete Guide to Software Testing, John Wiley & Sons.</p> <p>Software Testing by Renu Rajani and Pradeep Oak</p>
Reference Books	<p>1. Testing in 30+ Open Source Tools, Rahul Shende, Shroff Publishers & Distributor Pvt. Ltd, ISBN 13: 9789350231005 (page numbers from 15 to 117)</p> <p>2. http://seleniumhq.org/</p> <p>3. http://sourceforge.net/projects/sahi/</p> <p>4. http://testng.org/doc/index.html</p>

ELECTIVES
ELECTIVE GROUP (01): CLOUD COMPUTING

Subject Name	01(A) Virtualization
No. of Credits	3 Credits
Pre Requisite	Knowledge of Cloud Computing Concepts Knowledge of Virtualization Knowledge of Cloud security Knowledge of Web technologies
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	How to provide Flexible and scalable infrastructures as per user requirement
Understanding	Understanding the components of Virtualization
Applying	Carrying out practical's through Virtualization
Analyzing	The case studies will help us to understand more of practice of cloud computing in the market.
Evaluating	Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization
Creating	Creating flexible and scalable infrastructure suitable to the organizational need
Syllabus	Unit 1: Overview Of Virtualization : (Lectures/practical's : 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions
	Unit 2: Understanding Virtualization: (Lectures/practical's :7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare : what is VmWare, Virtualization with Vmware, VmWare Products,Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment
	Unit 3: Hypervisor: (Lectures/practical's : 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization : Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,
	Unit 4: Types Of Virtualization: (Lectures/practical's : 7) Server Virtualization, Client & Desktop Virtualization Services and Applications Virtualization, Network Virtualization, Storage Virtualization
	Unit 5: Tools For Virtualization: (Lectures/practical's : 05) Virtualization with Xen, Virtualization with Bochs and QEMU,

	Virtualization with Lguest, Virtualization with KVM
	Unit 6: Virtualization For Businesses: (Lectures/practical's:05) Need for Virtualization in a Business, Implementation of Virtualization in a Business, Cost-Benefit Analysis of Virtualization
	Unit 7: Openstack And Its Role In Virtualization: (Lectures/practical's : 05) Understanding Openstack, nine Core key components of openstack. CASE STUDIES OF VIRTULIZATION : Xen Hypervisor, OpenVZ Hypervisor, MS Virtual Server 2005 R2, Oracle VM
Text Books	References: 1. "Virtualization" – A Manager's Guide, By Dan Kusnetzky, O'reilley Publications, 2. "Virtualization for Dummies", 1st Edition, Kindle Edition, by Bernard Golden.
Reference	Please refer these websites for MOOC's: NPTEL / Swayam www.edx.com www.coursera.com

ELECTIVE GROUP (01): CLOUD COMPUTING

Subject Name	(01)B Cloud Computing Services (Amazon Web Services)
No. of Credits	3 Credits
Pre Requisite	Knowledge of Cloud Computing Concepts Knowledge of Virtualization Knowledge of Cloud security Knowledge of Web technologies Knowledge of IaaS, PaaS, SaaS & DaaS
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	How to provide Flexible and scalable infrastructures as per user requirement
Understanding	Understanding the components of AWS
Applying	Carrying out practical's through AWS
Analyzing	The case studies will help us to understand more of practice of cloud computing in the market.
Evaluating	Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization
Creating	Creating flexible and scalable infrastructure suitable to the organizational need
Syllabus	Unit 1: Cloud Computing Fundamentals: (Lectures/practical's : 10) Definition of Cloud Computing , private, public and hybrid cloud. Cloud types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, public Vs private clouds
	Unit 2: Infrastructure & Networking (Lectures/practical's :10) Introduction to Amazon Web Services AWS Global Infrastructure Introduction to Network Switches & Virtual Private Cloud VPC & Subnets Internet Gateways, VPC Peering & NAT Gateways IP Addressing in AWS Understanding AWS Security Groups Launching our first EC2 instance EC2 instance types & Pricing Models
	Unit 3: Storage (Lectures/practical's : 10) Introduction to Block & Object storage mechanism Introduction to Elastic Block Store - EBS EBS Snapshots EBS Volume Types Instance Store Volumes Introduction to Simple Storage Service (S3) Features of S3
	Unit 4: Elastic Load Balancers –(Lectures/practical's : 10) Understanding High Availability Configuration ELB Configuration

	Elasticity Auto Scaling Identity & Access Management Understanding the IAM Policies IAM User, IAM Policy and IAM Role
	Unit 5: Relational Databases (Lectures/practical's : 05) Introduction to Relational Databases Creating our first database structure in MySQL Getting started with DynamoDB
	Unit 6: Domain Name System (Lectures/practical's : 05) Introduction to DNS Understanding DNS Records Introduction to Route53
	Unit 7: AWS Lambda and API (Lectures/practical's : 05) Getting started with AWS Lambda Introduction to API Understanding working of API Building our API with API Gateway
Text Books	<ol style="list-style-type: none"> 1. Cloud Computing: Principles and Pardigms by Rajkumar Buyya, james Broberg and Andrzej M.Gos cinski, Wiley, 2011. 2. Amazon Web Services for Dummies – Wiley Brand. 3. Learning AWS – Design, Build and Deploy responsive applications using AWS cloud components by Aurobindo Sarkar, Amit Shah
Reference Books	<ol style="list-style-type: none"> 1. Learn AWS – David Clinton 2. AWS Lab by Zoom Technologies

ELECTIVE GROUP (02): DATA SCIENCE

Subject Name	(02) A - Statistical Programming in R
No. of Credits	3 Credits
Pre Requisite	Statistical Knowledge required
Course Objectives	<ul style="list-style-type: none"> • To teach the Beginners of R Programming of the a master level. A variety of topics will be covered that are important for Data science in order to prepare the students for real life prediction of data engineering. • To impart knowledge of the concepts related to Probability and Application on data sets. It also gives the idea how data is managed in various environments with emphasis on Predictions measures as implemented in data sets.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	<ul style="list-style-type: none"> • Remember the definitions of concepts and their Implementation in R.
Understanding	<ul style="list-style-type: none"> • Understand the concept of data and techniques for its Implementation • Understand data data standards and methods. • Understand the fundamentals of Data science
Applying	<ul style="list-style-type: none"> • Design different data behaviors and their Predictions. • Predictions Model Develop.
Analyzing	<ul style="list-style-type: none"> • Analyzing Data set • Studying Historical Data.
Evaluating	<ul style="list-style-type: none"> • Convert the historical Data into Prediction Model.
Creating	<ul style="list-style-type: none"> • Write R coding for Prediction Model.
Syllabus	<p>Unit 1. Introduction of Probability (8 Hours) : Concept, Types of Probability, Permutation and Combination concept ,Addition and Multiplication Theorem, Condition Probability, Bayes's Theorem</p>
	<p>Unit 2. Random Variable (5 Hours) : Concept, Discrete and Continuous Random Variable, Probability density function, Mathematical Expectation and their Theorem</p>
	<p>Unit 3. Data Distribution (7 Hours) : Distribution, Types of Data distribution, Exponential distribution, Binomial distribution, Normal distribution, Poisson distribution, Random number generation, Monte Carlo Simulation.</p>
	<p>Unit 4. Testing of Hypothesis (5 Hours): Procedure of Testing Hypothesis, Standard Error and Sampling distribution, Estimation, Student's t-distribution, Chi-Square test and goodness of fit, F-test and analysis of variance. Factor analysis.</p>
	<p>Unit 5. Introduction to R programming language (5 Hours): Getting R, Managing R, Arithmetic and Matrix Operations, Introduction to Functions, Control Structures. Working with Objects and Data: Introduction to Objects, Manipulating Objects, Constructing Data Objects, types of Data items, Structure of Data items, Reading and Getting Data, Manipulating Data, Storing Data.</p>

	<p>Unit 6. Graphical Analysis using R (5 Hours): Basic Plotting, Manipulating the plotting window, BoxWhisker Plots, Scatter Plots, Pair Plots, Pie Charts, Bar Charts.</p>
	<p>Unit 7. Advanced R (10 Hours): Statistical models in R, Correlation and regression analysis, Analysis of Variance (ANOVA), creating data for complex analysis, Summarizing data, and case studies.</p>
Text Books	"Fundamentals of Statistics" Seven Edition By S.C.Gupta
Reference Books	<ol style="list-style-type: none"> 1. "Fundamentals of Statistics" Seven Edition By S.C.Gupta 2. "R Programming Fundamentals by Kaelen Medeiros 3. " Reinforcement Learning e-book. 4. Learning R Programming Guide on line <p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com, www.coursera.com</p>

ELECTIVE GROUP (02): DATA SCIENCE

Subject Name	(02) B - Introduction to Data Science
No. of Credits	3 Credits
Pre Requisite	Statistical and Programming Knowledge required
Course Objectives	<ul style="list-style-type: none"> • To teach the Beginners of Data analysis through R /Python Programming of the a master level. A variety of topics will be covered that are important for Data science in order to prepare the students for real live Project Analysis • To impart knowledge of the concepts related to Machine Learning and implement and variety Application on data sets. It also gives the idea how data is managed in various environments with emphasis on Analysis measures as implemented .
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	<ul style="list-style-type: none"> • Remember the definitions of concepts and their Programming skills.
Understanding	<ul style="list-style-type: none"> • Understand the concept of coding and techniques for its Implementation • Understand data different Methods . • Understand the fundamentals of Data science
Applying	<ul style="list-style-type: none"> • Design different Model and their validity check. • Concept applying in other domain area.
Analyzing	<ul style="list-style-type: none"> • Analyzing Data set. • Comparing different Model .
Evaluating	<ul style="list-style-type: none"> • Convert the analysis in Modern approaches.
Creating	<ul style="list-style-type: none"> • Write R/Python coding for Analysis
Syllabus	<p>Unit 1. Association Rule (5 Hours): Mining Frequent Patterns, Associations, and Correlations: Basic Concepts and a Road Map, Association Rules, the Apriori Algorithm Classification and Prediction</p>
	<p>Unit 2. Classification(5 Hours) : Classification, Issues Regarding Classification, Classification by Decision Tree Induction, Bayesian Classification, Rule-Based Classification, Metrics for Evaluating Classifier Performance, Holdout Method and Random Sub sampling</p>
	<p>Unit 3. Prediction (5 Hours) : Prediction, Issues Regarding Prediction, Accuracy and Error Measures, Evaluating the Accuracy of a Classifier or Predictor. Clustering : Cluster Analysis, Agglomerative versus Divisive Hierarchical Clustering, Distance Measures in Algorithmic, Evaluation of Clustering.</p>
	<p>Unit 4. Linear Regression (5 Hours): Prediction using Linear Regression, Gradient Descent, Linear Regression with one variable, Linear Regression with multiple variables, Polynomial Regression, Feature Scaling/Selection.</p>

	<p>Unit 5. Logistic Regression (5 Hours): Classification using Logistic Regression, Logistic Regression vs. Linear Regression, Logistic Regression with one variable and with multiple variables.</p>
	<p>Unit 6. Deep Learning (10 Hours): History, Scope and specification, why deep learning now, building block of neural network, neural networks, Deep learning hardware. Backward and forward neural networks, XOR model, cost function estimation (maximum likelihood), units, activation functions, layers, , normalization, hyper-parameter tuning, Convolution neural networks, architecture</p>
	<p>Unit 7. Case study (10 Hours) : Iris Data set ,Loan Data set, Titanic survival Data set ,Share Market Data set, Covide -19 Data set etc.</p>
Text Books	An Introduction to Machine Learning Springer by Gopinath Rebala
Reference Books	<p>1. "Fundamentals of Statistics" Seven Edition By S.C.Gupta 2.An Introduction to Machine Learning Springer byGopinath Rebala 3.Deep Learning MIT Press by John D.Kelleher. Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com, www.coursera.com</p>

ELECTIVE GROUP (03): LINUX

Subject Name	(03) A- Linux Desktop Environment, Shell Programming and System Administration
No. of Credits	3 Credits
Pre Requisite	Knowledge of any operating system
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Linux Architecture and Shell Commands
Understanding	Understanding of Linux operating system and environment
Applying	Use Linux operating system for configuring the environment.
Analyzing	
Evaluating	Writing shell scripts and evaluating them
Creating	Creating small applications for smart home/city using Arduino
Syllabus	<p>(UNIT 1- 8 Hour) Linux Installation Using Shell Interface:</p> <ul style="list-style-type: none"> ▪ Introduction to Linux ▪ Internal and external commands ▪ General purpose utilities ▪ Navigating the file system ▪ Handling ordinary files <p>Using GUI Environments:</p> <ul style="list-style-type: none"> ▪ GNOME desktop environment ▪ KDE desktop environment
	<p>(UNIT II- 8 Hour) Using open source office suite</p> <ul style="list-style-type: none"> ▪ Word processor application ▪ Spreadsheet application ▪ Presentation application ▪ Desktop database application <p>Using the Internet</p> <ul style="list-style-type: none"> ▪ World wide web ▪ FTP ▪ Telnet <p>Using Multimedia</p> <ul style="list-style-type: none"> ▪ Graphics ▪ Audio Video
	<p>(UNIT III- 8 Hour) Introduction to shell</p> <ul style="list-style-type: none"> ▪ Introduction to 'bash' shell ▪ Redirection ▪ Pipes ▪ Tees ▪ Command substitution ▪ Introduction to other shells: Korn shell, C Shell etc. <p>Shell environment</p> <ul style="list-style-type: none"> ▪ Shell variables

	<ul style="list-style-type: none"> ▪ Handling the command line arguments ▪ Login scripts ▪ Terminal characteristics ▪ Aliases <p>Text editors ‘vi’ editor , ‘emacs’ editor</p>
	<p>(UNIT IV- 5 Hour)</p> <p>Shell commands</p> <ul style="list-style-type: none"> ▪ General purpose utilities ▪ File management ▪ Process management ▪ Communication management <p>Regular expressions</p> <ul style="list-style-type: none"> ▪ Pattern matching ▪ Wild cards ▪ Regular expressions ▪ Utilities: grep, egrep, fgrep etc. <p>Filters</p> <ul style="list-style-type: none"> ▪ Introduction to filters <p>Utilities: pr, head, tail, cut, paste, sort, uniq, nl, tr etc.</p>
	<p>(UNIT V- 6 Hour)</p> <p>Shell scripting</p> <ul style="list-style-type: none"> ▪ Introduction to shell scripting ▪ Programming constructs ▪ Mathematical operators ▪ Logical operators ▪ String manipulation ▪ Interactive scripts <p>Handling command line arguments</p>
	<p>(UNIT VI- 6 Hour)</p> <p>Understanding system administration:</p> <ul style="list-style-type: none"> ▪ Introduction to the routine activities in system administration ▪ Shell commands for system administration ▪ Administrative tools <p>Managing file systems and disk space</p>
	<p>(UNIT VII- 8 Hour)</p> <p>Setting up and supporting users:</p> <ul style="list-style-type: none"> ▪ Managing user accounts ▪ Providing support to the users <p>Automating system tasks:</p> <ul style="list-style-type: none"> ▪ Aut System initialization ▪ System startup and shutdown ▪ Scheduling system tasks omating system tasks: <p>Backing up and restoring files:</p> <ul style="list-style-type: none"> ▪ Backup and restore strategy ▪ Backup and restore tools <p>Computer security issues:</p> <ul style="list-style-type: none"> ▪ Password protection <p>FirewallsImplement one small project</p>

Text Books	Textbook: <ul style="list-style-type: none">▪ Red Hat Linux Bible: Fedora and Enterprise Edition - by Christopher Negus
Reference Books	UNIX Concepts and Applications - by Sumitabha Das
MOOC on NPTEL	

ELECTIVE GROUP (03): LINUX

Subject Name	(03)B -Linux Linux Internals and Network Administration
No. of Credits	3 Credits
Pre Requisite	Basics of Operating System
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Remembering Linux Internal and Network Management commands
Understanding	Understanding of Linux operating system and Network administration.
Applying	Creating Proxy, server, File server, web server
Analyzing	Analyzing inter process communication
Evaluating	Performance of different servers
Creating	Use of Linux administration for creation of server and management
Syllabus	<p>UNIT 1: (8 Hour) Setup And Manage a Local Area Network: Basic Networking, Introduction to networking, OSI Model, IP addressing (IPV4, IPV6) & LAN establishment with Linux , Configuring internet in Linux through broadband, dial-up, data card & through mobile (gprs). Setup And Manage Proxy Server : Basics of proxy services, Configuring proxy services, Creating ACL's for controlling access to internet, SQUID: Proxy server setup, Blocking Websites, content filtering, Bandwidth Management</p>
	<p>UNIT 2 :(8 Hour) Setup And Manage FILE Server: NFS: network file sharing & resource sharing across Linux environment. YUM server: Setting up local YUM, FTP YUM, HTTP YUM, EPEL, REMI & RPMForge like YUM configuration, DHCP: Dynamic Host Configuration Protocol setting up, Allocating IP, Subnet mask, default gateway and hostname, communication with DNS and other protocols. Setup And Manage FTP Server</p>
	<p>UNIT 3: (8 Hour) Setup And Manage Web Server : Basics of Web Services, Introduction to Apache, Configuring Apache for main site, Configuring Apache for multiple sites using IP-based, port based and name-based, Web Server: Apache installation, configuring dedicated server, shared server, user based authentication, load balancing and apache tuning. NIS, LDAP: (user's liberty to sit into remote machine) MAIL Server: knowing MUA, MTA & MDA, setting up and configuring POSTFIX, POP3s v/s IMAPs, Squirrel mail, accessing via Outlook, Thunderbird and evolution. Multi/virtual domain management, email security. Postfix Administration.</p>
	<p>UNIT 4 (5 Hour) Setup And Manage boot Server : What is booting and boot process of Linux?, Init Process or Run levels Setup And Manage DNS Server : Basics of Internet, Basics of DNS and BIND 9, Configuring DNS</p>

	primary server, DNS:master DNS, slave DNS with forward & reverse zone, one DNS resolving multiple domain, dynamic DNS etc
	<p>(UNIT 5 (6 Hour) Architecture of Linux, User and Kernel Space, Introduction to System Calls, System Calls in Detail, trace – Tracing system calls.</p> <p>Process management Introduction to Process and process attributes, process vs. Program, Process States, Creating Process, Process termination, process commands Special case of processes.</p> <p>Inter Process Communication Introduction to IPC, Pipe, FIFO, Shared Memory, Advantages and Disadvantages of various IPC mechanisms, Application of IPC</p>
	<p>(UNIT 6 (6 Hour) Working with Signals and Threads Thread and Process Synchronization Threads and resources management, Race condition in multi-threaded applications, writing thread safe code, Mutex, POSIX Semaphores, Usage of Binary semaphores and Mutex Race condition in multi-process applications, Limitations of shared memory, Semaphore Implementation.</p>
	<p>UNIT 7 (8 Hour) Linux Networking OSI and TCP/IP models, Addressing in TCP/IP, IPv4 and IPv6 differences, TCP three-way handshake, Network packet analysis in Linux, Networking commands in Linux, Using socket API to implement client server communication, Working with TCP and UDP sockets, Synchronous I/O</p>
Text Books	<ol style="list-style-type: none"> 1. Linux Administration : A Beginner’s Guide, Shah, TMH 2. LINUX: The Complete Reference, Petersen, TMH 3. LINUX Network Administrator’s Guide, Kirch, SPD/O’REILLY
MOOC on NPTEL	https://nptel.ac.in/courses/106/105/106105166/

ELECTIVE GROUP (04): OPEN SOURCE TECHNOLOGIES

Subject Name	(04) A. Perl Scripting
No. of Credits	3 Credits
Pre Requisite	
Course Objectives	Course Objective : To introduce basic concepts of Perl Programming and write, modify, and run simple Perl scripts and study working with files and using perl as an object oriented language
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of Perl scripting terminology for development of applications for organization.
Understanding	By remembering students will understand concepts of perl language and how to develop and implement various types of programs as per need of organization
Applying	Students will Have thorough knowledge about programming of Perl.
Analyzing	Students will acquire a good knowledge of programming with perl. Student will be able to pursue his study in object oriented concepts also using perl.
Evaluating	Ability to select proper programming concept to design applications to solve real world problem.
Creating	Design and create ir own applications using procedures, functions, file handling & OOP objects.
Course Plan	
Unit	Contents
	Unit 1: Perl – Introduction : (5 Hours) What is Perl? Perl features , Perl – Syntax Overview, Perl – Data Types , Numeric Literals String Literals , Perl – Variables , Creating Variables, Perl– Scalars, Scalar Operations ,Perl – Arrays Perl – Hashes
	Unit 2: Control Flow and Looping Statement: (6 Hours) if statement , if else statement, if elsif else statement, unless statement, switch statement, ? : Operator Perl – Loops : while loop , until loop, for loop, For each loop do while loop nested loops, next statement, last statement, continue statement, redo statement, go to statement, Infinite Loop
	Unit 3: Perl – Operators : (6 Hours) What is an Operator? Perl Arithmetic Operators, Perl Equality Operators, Perl Assignment Operators, Perl Bitwise Operators, Perl Logical Operators, Quote-like Operators, Perl – Date and Time, GMT Time Format, Date & Time, Epoch time, POSIX Function strftime()
	Unit 4: Perl – Subroutines : (8 Hours) Define and Call a Subroutine, Passing Arguments to a Subroutine, Passing Lists to Subroutines, Passing Hashes to Subroutines, Returning Value from a Subroutine, Private Variables in a Subroutine, Temporary Values via local(), State Variables

	<p>via state() Subroutine, Call Context</p> <p>Perl – References : Create References Dereferencing Circular References, References to Functions</p> <p>Perl – Formats Define a Format Using Format, Define a Report Header Number of Lines on a Page, Define a Report Footer , String and Mathematical Functions</p>
	<p>Unit 5: Perl – File I/O : (7 Hours)</p> <p>Opening and Closing Files, Open Function, Sysopen Function, Close Function, Operator getc Function, read Function, print Function, Copying Files Renaming a file, Deleting an Existing File Positioning inside a File</p> <p>Perl – Directories :Display all Files, Create new Directory, Remove a directory, Change a Directory</p>
	<p>Unit 6: Perl – Regular Expressions : (6 Hours)</p> <p>Pattern Matching, Match Operator Match Operator Modifiers Matching Only Once Regular Expression Variables. Substitution Operator Substitution Operator Modifiers. Translation Operator Translation Operator Modifiers More Complex Regular Expressions Matching Boundaries Selecting Alternatives Grouping Matching. \G Assertion Regular-expression Examples</p>
	<p>Unit 7: Introduction to Object Oriented Programming in Perl : (5 Hours)</p> <p>Object Basics, Defining a Class Creating and Using Objects, Defining Methods, Inheritance Method Overriding , Default Auto loading, Destructors and Garbage Collection, Object Oriented Perl Example</p>
<p>References (Books, Websites etc) :</p> <ul style="list-style-type: none"> • Mastering Perl : Brian, O'Reilly • www.tutorialspoint.com/perl/index.htm 	
<p>Suggested MOOC : Swayam</p>	

ELECTIVE GROUP (04): OPEN SOURCE TECHNOLOGIES

Subject Name	(04)B- Ruby
No. of Credits	3 Credits
Pre Requisite	
Course Objectives	Course Objective : Main objective of this paper is to learn, object-oriented programming with Ruby, Rails fundamentals and how to create basic online applications. How to work with HTML controls, use models in Rails applications, and work with sessions. Details on working with databases and creating, editing and deleting database records, Methods for handling cookies and filters and for caching pages.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of Ruby scripting for development of applications for organization .
Understanding	By remembering students will understand concepts of ruby rails and how to develop and implement various types of programs as per need of organization
Applying	Students will Have thorough knowledge about object-oriented programming with Ruby.
Analyzing	Students will acquire a good knowledge of programming with HTML controls, use models in Rails applications, and work with sessions. Student will be able to pursue his study in object oriented concepts for online application development..
Evaluating	Ability to select proper programming concept to design applications to solve real world problem.
Creating	Design and create ir own applications using OOP objects & rails application development.
	Contents
	Unit 1:Introduction to Ruby : (5 Hours) Creating a first web application, getting started with Ruby, Checking ruby documentation, working with numbers in ruby, working with strings in ruby.
	Unit 2:Variables and Constants in Ruby : (7 Hours) Storing data in variables, creating constants, interpolating variables in Double-Quoted strings, reading text on command line, creating symbols in ruby, working with operators, Handling operator precedence, working with Arrays, using Two Array Indices, working with Hashes, working with ranges.
	Unit 3:Conditional Loops, Methods and Blocks: (5 Hours) If Statement, Using case statement, using loops, creating and calling a method, making use of Scope, working with Blocks
	Unit 4: Classes: (6 Hours) creating a class, creating an object Data Encapsulation, Data Abstraction, Polymorphism, Inheritance
	Unit 5: Objects: (6 Hours) Understanding Ruby's object Access, overriding method, creating class variables, creating class methods, creating Modules, creating Mixins

	<p>Unit 6: Rails: (6 Hours) Putting Ruby to Rails, introducing Model View Controller Architecture, giving view something to do, mixing ruby code and HTML inside view, passing data from an action to a view, escaping sensitive text, adding a second action.</p>
	<p>Unit 7: Building Simple Rails Applications : (5 Hours) Accessing data user provides, using rails shortcuts for HTML controls, working with models, tying controls to models, initializing data in controls, storing data in sessions</p>
<p>References (Books, Websites etc.):</p> <ul style="list-style-type: none"> • Programming Ruby: Pragmatic Programmers' Guide, Second Edition • Agile Web Development with Rails, Third Edition • www.webtechlearning.com 	
<p>Suggested MOOC : SWAYAM</p>	

ELECTIVE GROUP (05): MOBILE COMPUTING

Subject Name	(05) A- JavaScript Programming
No. of Credits	3 Credits
Pre Requisite	Basic Knowledge about website development.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of programming be understood and remembered .
Understanding	By remembering students the basing concepts students will understand the concepts of programming structure
Applying	Students will Have thorough knowledge about website working
Analyzing	To study the form elements and its working
Evaluating	Ability to select proper functionality of a page and form.
Creating	Design and create their own websites with proper validation
Syllabus	Unit 1 Introduction to Javascript: (5 Hours) JavaScript Overview , JavaScript Programming Basics, Variables and Operators : Variables and Data Types , Operators , Array
	Unit 2 Control Statements: (5 Hours) Controlling the Flow: JavaScript Control Statements, Functions : Parameters and working, The Window Object : The Window Object, Dialog Boxes ,Window function
	Unit 3: The Document Object: (4 Hours) The Document Object, Writing to Documents, Document related functions Forms and Forms-based Data : The Form Object , Working with Form Elements and Their Properties ,Event related with form
	Unit 4: Form Validation (4 Hours) A Process, Testing Data , Preparing Data for Validation and Reporting Results, Validating Non-text Form.
	Unit 5 : Frames: (6 Hours) HTML Frames Review, Scripting for Frames The String and RegExp Objects : The String Object, Properties and methods of String Object, Using String Object Methods to Correct Data Entry Errors, The RegExp Object Dates and Math: The Date Object, Properties and methods of Date Object, The Math Object , Properties and methods of Math Object
	Unit 6: AJAX (8 Hours) Animation: Frequently used Animation function, Manual and Automated animation. AJAX: Introduction to AJAX, Interacting with the Web Server using XMLHttpRequest Object, Need of Web server
	Unit 7: JS Frameworks & Libraries (8 Hours)

	Need of JSON , RESTful API with JSON, jQuery, Intro ,Effects and animations DOM/HTML Updates, jQuery and Ajax
Reference Books	1.JavaScript and JQuery: Interactive Front-End Web Development, by Jon Duckett 2.JavaScript: The Definitive Guide, by David Flanagan 3.Learn JavaScript VISUALLY, by Ivelin Demirov
MOOC on NPTEL	https://nptel.ac.in/courses/106/105/106105084/ https://youtu.be/uUhOEj4z8Fo

ELECTIVE GROUP (05): MOBILE COMPUTING

Subject Name	(05)B - Android
No. of Credits	3 Credits (2 Lectures + 1 Tutorial)
Pre Requisite	Basic Knowledge about Java language
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of programming with GUI .
Understanding	By remembering students the basing concepts students will understand the concepts of program structure with layout
Applying	Students will Have thorough knowledge how programming affects on layout, output design.
Analyzing	To see various parts of design and its elements
Evaluating	Ability to create effective layout.
Creating	Design and create their own screen with proper view.
Syllabus	<p>Unit 1 : Introduction to Android (5 Hours) Evolution of Android ,Advantages of Android, SDK Tools for Android Overview of Android Platform : Android Development IDE Understand the Working of Android, The Android Application Framework, Screen Layout Design, User Interface Design, Introduction to Graphics and Animation Design, Interactivity, Introduction to Content Providers, Intent and Intent Filters</p>
	<p>Unit 2: Android Development Environment (8 Hours) Setting up the Android Development Environment : Installing Android Development Environment, Updating the Android SDK Setting up AVDs and Smartphone Connections Introduction to the Android Software Development Platform : Understanding Java SE and Dalvik Machine, The Directory Structure of an Android Project, Android XML, Android Application Resources ,Launching an Android Application, Creating first Hello Application</p>
	<p>Unit 3: Overview of Android Framework: (7 Hours) Overview of Object Oriented Programming, Overview of XML The Anatomy of an Android Application, Components of an Android Application, Android Intent Objects, Android Manifest XML</p>
	<p>Unit 4: Screen Layout Design: (7 Hours) Android View Hierarchies, Activity Lifecycle, Defining Screen Layouts (Screen size, pixel density) User Interface Design: Using Common UI Elements, Using Menus in Android , Adding Dialogs(Date picker, Time picker, Custom Dialog, Alert Dialog</p>

	<p>Unit 5: Introduction to Graphics Resources: (7 Hours) Introduction to Drawables, Using Bitmap Images, Using Transitions, Creating 9-Patch Custom Scalable Images, Playing Video in Android Apps</p> <p>Handling User Interface Events: An Overview of UI Events, Handling onClick Events for all Views, Android Touch-screen Events: onTouch</p> <p>Touch-screen's Right-Click Equivalent: onLongClick, Keyboard Event Listeners: onKeyUp, onKeyDown, Context Menus: onCreateContextMenu, Controlling the Focus</p>
	<p>Unit 6: (8 Hours)</p> <p>Understanding Content Providers: An Overview of Android Content Providers, defining a Content Provider, Working with a Database</p> <p>Intents and Intent Filters : Understanding the Intents, Android Intent Messaging via Intent Objects, Intent Resolution, Using Intents with Activities, Android Services, Using Intents with Broadcast Receivers</p>
	<p>Unit 7 : Bars and Views : (8 Hours) Action Bar, Toolbar, Navigation Drawer, TextView, EditText, Button, WebView, ImageView ,ListView etc</p>
Reference Books	<p>1.Android Application Development All-in-One For Dummies- Barry A. Burd</p> <p>2.Android Programming: The Big Nerd Ranch Guide Programming Android:</p> <p>3.Java Programming for the New Generation of Mobile Devices- Authors: Zigurd R. Mednieks, Laird Dornin, G. Blake Meike, Masumi Nakamura</p>
MOOC on NPTEL	<p>https://nptel.ac.in/courses/106/106/106106147/ https://youtu.be/bBt5sTXaOJA</p>

ELECTIVE GROUP (06): DOT NET TECHNOLOGIES

Subject Name:	(06) A- C# Programming and Applications
No. of Credits:	3 Credits
Pre Requisite:	Basic Knowledge of Object-Oriented Programming, Event Driven Programming was and Database Applications.
Cognitive Abilities:	Course Outcome as per Blooms Taxonomy
Remembering:	Using basic concepts of object-oriented programming, event driven programming and database application programming in C# can be understood and remembered.
Understanding:	By remembering basic concepts students can understand how to work with programming in C#. Students need to understand programming structures of OOP in C#. Needs to understand methods and properties of various controls of windows forms application along with database objects and their methods.
Applying:	Students will have detailed knowledge of Abstraction, Inheritance, Polymorphism, Encapsulation, Exception Handling, Windows forms applications and database applications
Evaluating:	Students will have ability to use proper methods of C# to solve object oriented problems.
Creating:	Students can apply the concepts of C# programming to create console based and windows based applications.
Syllabus:	<p>Unit 1: Introduction to C#: (7 Hours)</p> <p>Programming Features of C#, Keywords in C#, Namespaces, Data Types, Variables, Operators, Type Conversions, The ‘?:’ Operator, Control Statements.</p> <p>Methods, Passing Method Parameters, Method Overloading, Array, ArrayList class, String Methods, foreach loop.</p>
	<p>Unit 2: Classes and Objects: (7 Hours)</p> <p>Basic Principles of OOP, Define a Class, Member Access Modifiers, Constructors, Types of Constructors (Default Constructor, Overloaded Constructor, Static Constructor, Private Constructor and Copy Constructor), Destructors, ‘this’ Reference, Constant Members, Properties, Auto Implemented Properties, Object Initializer, Collection Initializer, Anonymous Types, Extension Methods, Partial Class, Partial Methods, Indexers.</p>

	<p>Unit 3: Inheritance and Polymorphism: (8 Hours)</p> <p>Define Inheritance, Types of Inheritance, Method Overriding, Abstract Class, Abstract Methods, Sealed Class and Methods, Define Polymorphism, Static Polymorphism: Function Overloading Operator Overloading, Overloadable and Nonoverloadable Operators, Dynamic Polymorphism, Defining Interface, Extending interface, Interface and Inheritance, Explicit Interface.</p>
	<p>Unit 4: Errors and Exception Handling: (7 Hours)</p> <p>Types of Errors, Exceptions, Syntax for Exceptions Handling Code, Multiple catch Statements, finally Statement, Nested try Block, Throwing Our Own Exception.</p>
	<p>Unit 5: Working with Windows Form Controls: (7 Hours)</p> <p>Properties, Events and Examples of: Button, Label, LinkLabel, TextBox, RichTextBox, ListBox, ListView, ComboBox, RadioButton, CheckBox, CheckedListBox, DateTimePicker, PictureBox, Timer, ProgressBar, TrackBar, HScrollBar, VScrollBar.</p>
	<p>Unit 6: Menus, MDI and Containers: (7 Lectures)</p> <p>ContextMenuStrip, MenuStrip, StatusStrip, ToolStrip, SDI and MDI, Visual Inheritance, GroupBox, Panel, TreeView, SplitContainer, TabControl Example.</p>
	<p>Unit 7: Data Access and Data Bindings: (7 Hours)</p> <p>ADO.NET Overview, .NET Data Providers, ADO.Net Objects, Connections, Commands, Data Adapters, Data Readers , Data Sets , Data Tables , Data Views , Data Bindings, Reports.</p>
References (Books, Websites etc)	<ul style="list-style-type: none"> • C#: The Complete Reference, McGraw-Hill Osborne Media- Herbert Schildt. • C # Programming- Wrox publication. • Programming in C# -A Primer. E. Balaguru
Suggested MOOC:	<ol style="list-style-type: none"> 1) Coursera (www.coursera.org) 2) mymooc (www.my-mooc.com) 3) Class Central (www.class-central.com) 4) edX (www.edx.org) 5) Mooc List (www.mooc-list.com)

ELECTIVE GROUP (06): DOT NET TECHNOLOGIES

Subject Name:	(06)B- ASP.Net with MVC
No. of Credits:	3 Credits
Pre Requisite:	Basic Knowledge of Website Development, JavaScript, Validations, State Management etc..
Cognitive Abilities:	Course Outcome as per Blooms Taxonomy
Remembering:	Using basic concepts of website development, methods and properties ASP. Net in C# can be understood and remembered.
Understanding:	By remembering basic concepts students can understand how to work with web designing in C#. Students need to understand methods and properties of various client and server side controls. Working of state management is also needs to understand.
Applying:	Students will have detailed knowledge of Website design and development, validation, state management, use of web parts and Ajax controls.
Evaluating:	Students will have ability to use proper client side and server side controls of C# to design modern web design.
Creating:	Students can apply the concepts of C# programming for designing a programs for desktop or mobile, as well as web application.
Syllabus	<p>Unit 1: Introduction to ASP.Net: (7 Hours) Introduction to ASP.Net, ASP.Net Architecture, ASP.Net Page Life Cycle, Page Life Cycle Events, ASP.Net Directives., FileUpload Control, Calendar Control, AdRotator Control, MultiView Control, and Wizard Control Examples, Validation Controls, Menu, SiteMapPath, TreeView Control.</p>
	<p>Unit 2: Master Pages, CSS, and JavaScript: (8 Hours) Working With Master Pages, Nested Master Pages, CSS Overview, Adding Style Sheets into, Web Pages, Editing Styles, Applying Styles to Master Pages, Applying Styles to Web Page, JavaScript Overview, Adding JavaScript files into ASP.Net, Editing JavaScript Files, Applying JavaScripts to Master Pages, Applying JavaScripts to WebPage.</p>
	<p>Unit 3: State Management: (7 Hours) View State, Hidden Field, Session State, Application State, QueryString,</p>

	HttpContext, Cookies, Caching, Types of Caching.
	Unit 4: Data Access in ASP.Net: (7 Hours) Data Source Controls, DataList, DataPager, GridView, DetailsView, FormView, Object Data Sources, ListView, DataPager, Repeater.
	Unit 5: ASP. Net Web Parts: (7 Hours) Introduction, Advantages of Web Parts, WebPartsManager, CatalogPart, PageCatalogPart, EditorPart, WebPartZone,, EditorZone, CatalogZone Controls.
	Unit 6 : Ajax Controls: (7 Hours) AJAX control toolkit, Building a ASP.NET Page with Ajax ScriptManager Control, UpdatePanel Control, UpdateProgress Control, Timer Control
	Unit 7: Working with MVC: (7 Hours) Introduction to .Net MVC Framework, MVC Framework Features, MVC Architecture, MVC Components, MVC Application Folders, Configuration files- global.asax, packages.config, web.config, Working with Views, Woking with Controls.
Reference Books:	<ul style="list-style-type: none"> • ASP.Net: The Complete Reference, Matthew MacDonald • Professional ASP.Net (4/4.5) in C #- Wrox publication
Suggested MOOC:	<ol style="list-style-type: none"> 1) Coursera (www.coursera.org) 2) mymoo (www.my-mooc.com) 3) Class Central (www.class-central.com) 4) edX (www.edx.org) 5) Mooc List (www.mooc-list.com)

ELECTIVE GROUP (07): NET CENTRIC TECHNOLOGIES

Subject Name	(07)-A HTML 5.0
No. of Credits	3 Credits
Pre Requisite	Basic concepts of Languages and HTML tags with functions.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Understand the Concepts of HTML 5 & the Applications of HTML 5 to Website Development.
Understanding	By remembering students the basic concepts of HTML and the applications of advanced features of HTML 5. 0 for web development. .
Applying	Students will Have thorough knowledge about practical approach in designing website for various business applications..
Analyzing	To Measure the knowledge about website development and practical applications of advanced features to the web applications
Evaluating	Ability to select proper method to use better tools for website development using HTML 5.0 features and apply security measures to the websites also use useful functions of HTML 5.0
Creating	Design and Develop Websites for various Business Applications. Check information inputted into a Database and validate it.
Syllabus	Unit-1 Introduction to HTML: (7 Hours) MIME Types, Standards for the Internet, Evolution of HTML, Introduction to XHTML, Introduction to Working Group, W3C
	Unit-2 Features of HTML5: (6 Hours) Detection of HTML5 Support, Modernizr: An HTML5 Detection Library, Canvas, Canvas , Text, Video, Video Formats, Local Storage, Web Workers, Offline Web Applications, Geolocation, Input Types, Placeholder Text, Form Autofocus, Microdata
	Unit-3 Elements of HTML5: (7 Hours) The Doctype, The Root Element, The <head> Element, New Semantic Elements in HTML5, Handling of Unknown Elements by the Browsers, Headers, Articles, Dates and Times, Navigation, Footers
	Unit-4 :Drawing Surface: (7 Hours) Introduction to Canvas, Simple Shapes, Canvas Coordinates, Paths, Text, Gradients, Images
	Unit-5 :Video on the web (6 Hours) Video Containers, Video Codecs, Audio Codecs
	Unit-6 :Geolocation and Local Storage for Web Applications (7 Hours) Geolocation API, Handling Errors, geo.js Library, Evolution of Local Storage, Introduction to HTML5 Storage
	Unit-7 :Web Forms and Offline Web Application (6 Hours) Introduction to Web Forms, Placeholder Text, Autofocus Field, e-Mail, Addresses, Web Addresses, Numbers as Spinboxes, Numbers as Sliders, Date Pickers, Search Boxes, Color Pickers, Introduction to

	Offline Web application, The Cache Manifest
Text Books	<ol style="list-style-type: none"> 1. .Anil Gaikwad , Jyoti Biradar (Patil) Basic Concepts of System Analysis Lambert Academic Publication Dec. 2019 . 2. Brian Albers, Frank Salim, and Peter Lubbers “Pro HTML 5.0 Programming

ELECTIVE GROUP (07): NET CENTRIC TECHNOLOGIES

Subject Name	(07) B - AJAX PROGRAMMING
No. of Credits	3 Credits
Pre Requisite	Basic concepts of Languages and HTML tags with functions.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Understand the Concepts of Basic Programming skills and how to use AJAX Programming for software development .
Understanding	Understand the Concepts of AJAX Programming & the Applications of AJAX to Website Development. Design and Develop Websites for various Business Applications using AJAX Programming. Check information and handle database in websites..
Applying	Students will Have thorough knowledge about practical approach in AJAX programming language for Software development .
Analyzing	Computer programming detail knowledge , An intermediate knowledge on Programming Languages and its structure for developing professional web applications for business organizations.
Evaluating	Ability to select proper method to use better tools for website development using AJAX programming language . Use maximum features of AJAX language and know the details about security features of the language .
Creating	Design and Develop Web applications or web sites for various Business Applications.
Syllabus –	Unit-1 Introduction to AJAX (6 Hours) Introduction to Web Architecture, Traditional Web Communication Processes and Technologies , Introduction to AJAX
	Unit-2 Interacting with the Web Server using XMLHttpRequest Object: (7 Hours) Introduction to Interaction with Web Server, Create an XMLHttpRequest Object, Interact with the Web Server
	Unit-3 : Working with PHP and AJAX: (6 Hours) Introduction to PHP , Process Client Requests , Accessing Files Using PHP
	Unit-4 Manipulating XML Data: (7 Hours) Basics of XML , Create an XML Document Using DOM , Retrieve Data from XML
	Unit-5 : Working with XSLT and AJAX: (7 Hours) Basics of XSLT , Transform Responses Using XSLT
	Unit-6 : Working with JSON: (6 Hours) Introduction to JSON Format, Create Data in JSON Format , Implement JSON on the Server Side scripting.
	Unit-7: Using Frameworks in AJAX: (6 Hours) Understand AJAX Frameworks , Use Prototype and Script.aculo.us , Use jQuery

	<p>Applying Basic AJAX Techniques Download Images Using AJAX, Auto-Populate Select Boxes</p> <p>Implementing Security and Accessibility in AJAX Applications Create Secure AJAX Applications , Create Accessible Rich Internet Applications</p>
Text Books	<ol style="list-style-type: none"> 1. Anil Gaikwad , Jyoti Birada (Patil) Basic Concepts of System Analysis Lambert Academic Publication Dec. 2019 . 2. Brian Albers, Frank Salim, and Peter Lubbers “Pro HTML 5.0 Programming.
Reference Books	<ol style="list-style-type: none"> 1. Ajax: The Definitive Guide: Interactive Applications by Anthony T. Holdener -2014. 2. ELECTIVE GROUP (08): INFORMATION SYSTEMS

Subject Name	(08) A -Recommender System
No. of Credits	3 Credits
Pre Requisite	Basic Knowledge about Relational Database Management system and Software Development , Knowledge about Business Organizations and its functions , Theory of Recommender Systems and Decision Making process .
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of software databases ,development stages and software development also software engineering Information can be understood and remembered .
Understanding	By remembering students the basing concepts students will understand the concepts of Recommender system , Internet and database concepts .
Applying	Students will Have thorough knowledge about practical approach in database design and design the recommender systems for business applications
Analyzing	To Measure the Information systems applications with respect to business benefits . reduce the risk of decision making
Evaluating	Ability to select proper method to use proper recommender system for business applications and make it useful for business functions.
Creating	<p>Design and create own recommender system as per the requirements of the business and functions of the business After going through this course a student should be able to understand :</p> <ul style="list-style-type: none"> • Will be able to understand the concepts of Decision Making Process. • Can be able to design and develop Recommender for Business applications. <p>Implementation of Recommender System for various areas of Interest in Business Organizations.</p>
Syllabus –	<p>Unit-1 : Introduction to Basic Concepts: (7 Hours) Collaborative Recommendation: User Based Nearest Neighbor recommendation, Item Based Nearest Neighbor recommendation, model based and pre-processing based approaches. Recent practical approaches and systems. Content based Recommendation: content representation and content similarity, similarity based retrieval, other text classification methods, Knowledge Based Recommendation: Knowledge representation and reasoning, interacting with constraint based recommenders, interacting with case based recommenders,</p>
	<p>Unit-2 :Hybrid recommendation approaches: (6 Hours) Opportunities for hybridization, Monolithic hybridization design, parallelized hybridization design, pipelined hybridization design,</p>
	<p>Unit 3:Evaluating recommender systems : (6 Hours) General properties of Evaluation research, popular evaluation designs, evaluation on historical datasets, alternate evaluation design</p>
	<p>Unit 4: Recent developments: (7 Hours) Attacks on collaborative recommender systems, Online consumer decision making</p>
	<p>Unit 5: Recommender systems and the next-generation web (7 Hours) Recommendations in ubiquitous environments.</p>

	<p>Unit 6: Explanations in recommender systems (6 Hours)</p> <p>Explanations in constraint-based recommenders, explanation in case based recommenders, explanation in collaborative filtering recommenders.</p>
	<p>Unit-7 :Case studies on Recommender System for various Business applications (7 Hours)</p>
Text Books	<ol style="list-style-type: none"> 1. “Innovation Management A Business Development Approach - Anil Gaikwad , Rajesh Kanthe –Lambert Academic Publication Dec 2019. 2. “Recommender systems An Introduction” by Dietmar Jannach, Markus Zanker, Alexzander Felfering, Gerhard friedrich by Cambridge university press 2011 3. Recommender systems handbook [book] by francesco ricci, lior Rokach, Paul b. Kantor in books
Reference Books	<ol style="list-style-type: none"> 1. Amazon books Recommender System Practical Approach Dec-2019 Amazon Books . 2. Tony Campbell Managing Risk and Information Security :- Protect to Enable. A-Press Open Access Book (Free). 3. Anil Gaikwad , Jyoti Biradar (Patil) Software Project Management made Easy Lambert Academic Publication 2019
MOOC on NPTEL	<p>https://nptel.ac.in/courses/, NPTEL / Swayam www.edx.com www.coursera.com</p>

ELECTIVE GROUP (08): INFORMATION SYSTEMS

Subject Name	(08) B - Knowledge Management
No. of Credits	3 Credits
Pre Requisite	Knowledge about Information System and MIS with Implementation of MIS
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of software development , information system and applications of databases o business problems The objective of the course is to provide the basic skills of managing knowledge in organizations. Knowledge is an asset for retaining the competitive advantage of the organization. This course develops the capabilities of towards managing students to manage knowledge in organizations.
Understanding	By remembering students the basic concepts of Knowledge management students will understand the concepts of applications of knowledge management to the business problems .
Applying	Students will Have thorough knowledge about practical approach in designing knowledge management systems for business functions and apply the various advanced tools of software development .
Analyzing	To Measure the knowledge management applications with respect to business benefits . reduce the risk of decision making
Evaluating	Ability to select proper method to use proper knowledge management system for business applications and make it useful for business functions.
Creating	Design and create own knowledge management After going through this course a student should be able to understand : Will be able to understand the concepts of Knowledge and knowledge management . Can be able to design and develop Knowledge management systems for Business applications . Implementation of KM to various areas of Interest in Business Organizations .
Syllabus	Unit 1: Introduction: (6 Hours) Definition, Scope and Significance of Knowledge Management , Difficulties of Knowledge Management, Techniques of KM – Implementation of KM, Organizational knowledge, Characteristics and Components of Organizational Knowledge
	Unit 2: Drivers of knowledge Management: (7 Hours) Pillars of knowledge Management, KM framework , Supply Chain of KM , Formulation of KM strategy.
	Unit 3: Technology and KM: (6 Hours) Technology components of KM – IT & KM , Ecommerce and KM
	Unit 4: Total Quality Management and KM: (7 Hours) TQM and KM , Bench marking and KM.
	Unit 5: Implementation of KM: (7 Hours) Discussion on Roadblocks to success, Implementing a KM programme , Critical Success Factors in KM , Implementation of KM
	Unit 6: KM and Organizational Restructuring: (7 Hours) The Mystique of Learning, Organization:- Outcomes of learning, Learning and Change – Innovation, continuous Improvements,

	Corporate Transformation.
	Unit 7: Case studies in Knowledge Management (6 Hours) Knowledge management in Health Care, Knowledge Management in Human Resource Management and other areas of Business Applications.
Text Books	<ol style="list-style-type: none"> 1. “Innovation Management A Business Development Approach - Anil Gaikwad , Rajesh Kanthe –Lambert Academic Publication Dec 2019. 2. Honey Cutt : “Knowledge Management Strategies”, PHI, New Delhi.

ELECTIVE GROUP (09): IOT

Subject Name	(09) A - IoT Architecture Sensors and Fundamentals with Hands-on lab
No. of Credits	3
Pre Requisite	School Level Mathematics. Basics of Programming and Networking
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Learning the concepts of IOT, Networking for IOT, Type of Sensor Network, Arduino Programming
Understanding	IOT Standards, connecting Technologies, Machine to Machine Communication
Applying	Implementing IOT with Arduino
Analyzing	Find the usability of IOT in various applications
Evaluating	Evaluate the performance of IOT solution and upgradation
Creating	Creating small applications for smart home/city using Arduino
Syllabus	<p>UNIT 1 (8 Hour) IOT concepts:</p> <ul style="list-style-type: none"> • Technologies that led to evolution of IOT • IOT and SCADA • IOT and M2M • IOT and Big Data <p>Relevance of IOT for the future</p> <ul style="list-style-type: none"> • IOT in everyday life • Internet of Everything • IOT and Individual Privacy. <p>Sensing, Actuation, Basics of Networking: layered architecture, important protocols (MQTT, CoAP, REST, XMPP, AMQP)</p>
	<p>UNIT 2 (8 Hour) IOT Standards : Requirement of international standard (case study) IOT standards in practice. Operating platforms /systems connectivity Technologies: 802.15.4, Zigbee, 6LoWPANs, RFID, HART, Bluetooth, ZWAVE, ISA 100.11-A</p>
	<p>UNIT 3 (8 Hour) Sensor Networks: components of sensor networks, deriving data from sensor nodes, different types of sensor networks and behavior of node in a sensor network, target tracking, wireless multimedia sensor network, nano networks, relationship between coverage and connectivity, stationary wireless sensor networks, mobile wireless sensor networks, UAV Networks</p>
	<p>UNIT 4 (5 Hour) Machine-to-Machine Communications: exchanging data between machines without human intervention, Low-end sensor nodes, mid-end sensor nodes, M2M ecosystem</p>
	<p>UNIT 5 (6 Hour) Interoperability in IoT, syntactic and semantic interoperability Introduction to Arduino Programming:</p>

	<p>Features of Arduino Arduino IDE Sketch Structure Arduino Function Libraries: Example : blink LED Operators, control statements, arrays, string, random number, Interrupts</p>
	<p>UNIT 6 (6 Hour) Integration of Sensors and Actuators with Arduino: Sensor interface with Arduino, DTH Sensor Library, Type of Motor Actuators, integration of Actuator with Arduino</p>
	<p>UNIT 7 (8 Hour) IOT Applications: Lighting as a service (case study) Intelligent Traffic systems (case study) Smart Parking (case study) Smart water management (case study) Implement one small project</p>
Text Books	<ul style="list-style-type: none"> • Daniel Minoli, “Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications”, ISBN: 978-1-118-47347-4, Willy Publications • Vijay Madiseti and ArshdeepBahga, “Internet of Things (A Hands-onApproach)”, 1 st Edition, VPT, 2014.

MOOC on NPTEL	https://nptel.ac.in/courses/106/105/106105166/

ELECTIVE GROUP (09): IOT

Subject Name	(09) B - Internet Of Things: implementation with Python and Raspberry Pi
No. of Credits	3 Credits
Pre Requisite	School Level Mathematics. Basics of Programming and Networking
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Understand IoT sensors and technological challenges faced by IoT devices
Understanding	Understanding of IoT value chain structure (device, data cloud), application areas and technologies involved
Applying	Implementing IOT with Python and Raspberry Pi
Analyzing	Explore and learn about Internet of Things with the help of preparing projects designed for Raspberry Pi
Evaluating	Evaluate the performance of IOT solution and upgradation
Creating	Creating small applications for smart home/city using Python and Raspberry Pi
Syllabus	<p>UNIT 1 (8 Hour) Introduction to Python Programming: Pyton IDE (Spider, Anaconda), Data Types in Python, control statements, functions, file read/write operations, image read/write operations, Networking in Python,</p> <p>UNIT 2 (8 Hour) Introduction to Rasberry Pi: Basic architecture, installation, Rasberry Pi GPIO, OS setup, using GPIO pins, Taking Pictures using PiCam using Python on Rasberry Pi</p> <p>UNIT 3 (8 Hour) Implementation of IOT with Rasberry Pi, integration of sensors for data collection, dissemination of data for processing, visualization of data</p> <p>UNIT 4 (5 Hour) Software Defined Networking: Origin of SDN SDN Architecture Rule Placement OpenFlow Protocol APIs in SDN Controller Placement Integration of SDN with IoT</p> <p>UNIT 5 (6 Hour) Cloud Computing: Introduction, Service Model Service Management Sensor-cloud Fog Computing</p> <p>UNIT 6 (6 Hour) Smart Cites, Smart Homes, connected vehicles, Industrial IOT</p> <p>UNIT 7 (8 Hour) Data Handling and Analytics Implement one small project</p>
Text Books	<ul style="list-style-type: none"> • Daniel Minoli, “Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications”, ISBN: 978-1-118-47347-4, Willy Publications • Vijay Madiseti and ArshdeepBahga, “Internet of Things (A Hands-on

	Approach)”, 1 st Edition, VPT, 2014.

MOOC on NPTEL	https://nptel.ac.in/courses/106/105/106105166/

ELECTIVE GROUP (10): BIG DATA

Subject Name	(10) A - Introduction to Big Data
No. of Credits	3 Credits
Pre Requisite	Preliminary knowledge of computer, Data Mining, Data Warehousing Concepts.
Course Objectives	To introduce learner with Big Data Concept, decision making by doing analysis on the data and managing the data using Big Data Concept like Business Intelligence Concept, decision making by Business Intelligence Tools on Applications such as Finance, Marketing, Education etc.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	<ul style="list-style-type: none"> Remember the definitions of concepts of Big Data and Business Intelligence Tools.
Understanding	<ul style="list-style-type: none"> Understand the concept of Big Data and Business Intelligence Tools. Understand decision making Theory and Strategies for Big Data. Understand different Business Intelligence Applications. Understanding the use of Business Intelligence for AI and Security.
Applying	<ul style="list-style-type: none"> Knowledge of Decision making using analysis on the Big Data Applying on different Big Data Applications in Industries
Analyzing	<ul style="list-style-type: none"> Identify and study the Big Data Analysis by Decision Theory and Strategy. User experience on Big Data and Business Intelligence Tools.
Evaluating	<ul style="list-style-type: none"> Applying Decision Making Theory on Big Data.
Creating	<ul style="list-style-type: none"> Case Studies: Knowledge about different applications used in industries. Using Business Intelligence in AI. Using Business Intelligence for Security
Syllabus	<p>Unit 1. Introduction: (Hours -5) Big Data History, The Big Data Business Opportunity- Business Transformation Imperative, Big Data Business Model, Business Impact of Big Data, Big Data In Organization: Data Analytics Lifecycle, Data Scientist Roles and Responsibilities – Discovery, Data Preparation, Model Planning, Model Building, Communicate Results, Operationalize, New Organizational Roles, Liberating Organizational Creativity.</p>
	<p>Unit 2. Decision Theory And Strategy: (Hours -7) Business Intelligence Challenge, Big Data User Interface Ramifications, Human Challenge of Decision Making, Strategy for Decision Making- Big Data Strategy Document, Case Study. Value Creation Process: Understanding Big Data Value Creation, Michael Porter’s Value Creation Models: Michael Porter’s Value Chain Analysis, Case Study.</p>
	<p>Unit 3. Big Data User Experience: (Hours -6) The Unintelligent User Experience, Understanding the Key Decisions to Build a Relevant User Experience, Using Big Data Analytics to Improve Customer Engagement, Uncovering and Leveraging Customer Insights, Big Data can Power a New Customer Experience, Big Data Use Cases: 1. Research Business Initiatives, 2. Acquire and Analyze your Data, 3. Brainstorm New Ideas, 4. Prioritize Big Data Use Cases, 5. Document Next Steps, The Prioritization Process.</p>

	<p>Unit 4. Introduction To Business Intelligence Applications: (Hours -6) Introduction to Big Data, Business Intelligence Data Mining, and Data Warehousing, What are Business Intelligence Applications (BIA). Features of BIA. Sales, Finance And Marketing: Introduction to Sales, Finance and Marketing Concept, Education And Learning: Introduction to Education System, Learning Concept.</p>
	<p>Unit 5. Vertical AI Applications: (Hours -7) Overview of AI, What is Vertical AI, Features of Vertical AI, Use of Business Intelligence in Vertical AI, Case Study.</p>
	<p>Unit 6. Security: (Hours -7) Define Security, Security in Big Data, Problems with Security, Business Intelligence for Security, Case Study.</p>
	<p>Unit 7. Lifescience: (Hours -7) Introduction to Life Science, Life Science Intelligence, Features of Life Science Intelligence, Use of Life Science Intelligence in Decision Making, Case Study.</p>
Text Books	
Reference Books	<p>1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo 2. Edureka lectures Link:- https://www.youtube.com/watch?v=A02SRdyoshM 3. Business Intelligence Strategy -By John Boyer, Bill Frank, Brain Green, Tracy Harris</p> <p>Suggested MOOC : Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com, www.coursera.com</p>

ELECTIVE GROUP (10): BIG DATA

Subject Name	(10) B -Business Intelligence Tools with HADOOP
No. of Credits	3 Credits
Pre Requisite	Preliminary knowledge of computer, Big Data Analysis and Business Intelligence.
Course Objectives	To introduce learner with Big Data Concept and HADOOP tool for Business Intelligence. Using different Advance Excel Functions (like Optimization) and implementing it on Big Data for decision making. By solving Case Studies the students will get real example of using BI Tools in industry. It will also introduce learner with decision making by doing analysis on the data using HADOOP Tool and also managing the Big Data using HADOOP.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	<ul style="list-style-type: none"> Remember the concepts of Business Intelligence Tools and HADOOP.
Understanding	<ul style="list-style-type: none"> Understand the Excel Tools for Business Intelligence. Understand working with Macros. Understand HDSF, Mapping and Reducing in HADOOP Environment. Understanding the Clusters and Nodes in HADOOP Environment.
Applying	<ul style="list-style-type: none"> Knowledge of Decision making using analysis on the Big Data using Excel Tools. Knowledge of Decision making using HADOOP analysis on the Big Data
Analyzing	<ul style="list-style-type: none"> Applying the Excel Tools or Mapping and Reducing on Big Data. Implementing Environment Setup of HADOOP.
Evaluating	<ul style="list-style-type: none"> Applying HADOOP Environment for Analysis on Big Data.
Creating	<ul style="list-style-type: none"> Case Studies: for Big Data Analysis using Excel tools or HADOOP Using features of Macros.
Syllabus	<p>Unit 1. Introduction To Big Data and Business Intelligence (Hours -5) Overview of - Data Mining, Data Warehousing, Big Data, How Business Intelligence is useful for Big Data, Big Data Problems. Introduction to BI, Data Cleaning- Editing a Workbook, Data Cleaning Using Text Functions, Using Validation To Keep Data Clean, Working with Multidimensional Data- Pivot Tables, Pivot Charts.</p>
	<p>Unit 2. Applications Of Business Intelligence and Excel Tools (Hours - 6) CRM Domain, Banking Domain, Health Care Domain, Mobile Industry Domain, Creation of a New Product, Providing Personalized Services, Optimization Modeling With Solver: Introduction to MS-Excel and MS-Excel Formulas, Understanding Optimization Modeling, Setting Up a Solver Worksheet, Solving an Optimization Modeling Problem, Reviewing the Solver Reports, Working With Solver: Working With the Solver Options, Setting a Limit on Solver, Understanding the Solver Error Messages, Case Studies (Solver Problems).</p>
	<p>Unit 3. Advance Excel Tools: (Hours -7) Using Shared Work Books- Sharing a workbook, Opening and editing a</p>

	shared workbook, Tracking changes, Resolving conflict in a shared workbook, Multiple workbooks- Linking workbooks, Editing the Link, Consolidating the workbook.
	Unit 4. Working With Macros: (Hours -6) Introduction to Macros? Where are Macros, Features of Macros, Working with Macros- Display the developer Tab, Changing Macro security Settings, Recording and running a Macro.
	Unit 5. Introduction To HADOOP: (Hours -6) Hadoop Architecture, MapReduce, Hadoop Distributed File System, How Does Hadoop Work?, Advantages of Hadoop. HDFS Overview: Features of HDFS, HDFS Architecture, Starting HDFS, Listing Files in HDFS, Inserting Data into HDFS, Retrieving Data from HDFS, Shutting Down the HDFS.
	Unit 6. MAPREDUCE: (Hours -7) What is MapReduce?, The Algorithm for MapReduce, Inputs and Outputs (Java a Perspective), Analyze different use-cases where MapReduce is used, Differentiate between traditional way and MapReduce way. Introduction To Hadoop Features: New Big Data Architecture, Introducing HADOOP Features – Apache Hive, Apache HBase, Pig.
	Unit 7. Multi Node Cluster: (Hours -8) Multi Node Cluster, Install Java, Creating User Account, Mapping the Nodes, Installing Hadoop, Configuring Hadoop, Start Hadoop Services, Adding New Data Node in the Hadoop Cluster, Removing New Data Node from the Hadoop Cluster. Environment Setup: Pre-installation Setup, Installing Java Downloading Hadoop Hadoop Operation Modes Installing Hadoop in Standalone Mode Installing Hadoop in Pseudo Distributed Mode Verifying Hadoop Installation, Implement basic Hadoop commands on terminal.

ELECTIVE GROUP (11): CYBER SECURITY

Title of the Course	(11) A -Introduction to Information Security
Number of Credits	3 Credits
Pre-Requisites	Information about computer hardware, system and application software, and networking
Course Outcomes as per Bloom's Taxonomy	
Remember	Concepts involved in information systems
Understand	Security concerns involving information systems
Apply	Understanding of concerns to improve information security
Analyze	Real-life scenarios with respect to information systems
Evaluate	Scenarios involving information systems and security concerns
Create	Information security awareness to address real-world scenarios
Syllabus (45 Hours)	<p>Unit-1: Information Security Concepts (10 Hours)</p> <ul style="list-style-type: none"> ▪ Confidentiality, Integrity and Availability of Information ▪ Identification, Authentication and Authorization ▪ Security Principles and Models
	<p>Unit-2: Physical Security (5 Hours)</p> <ul style="list-style-type: none"> ▪ Facility Requirement ▪ Perimeter Security ▪ Fire Protection ▪ Fire Suppression ▪ Power Protection ▪ General Environmental Protection ▪ Equipment Failure Protection
	<p>Unit-3: Network Security (10 Hours)</p> <ul style="list-style-type: none"> ▪ Secure Network design ▪ Firewalls ▪ WLAN Security ▪ VPNs ▪ Types and Sources of Network Threats
	<p>Unit-4: Operating System Security (5 Hours)</p> <ul style="list-style-type: none"> ▪ Windows ▪ Linux/UNIX
	<p>Unit-5: Database Security (5 Hours)</p> <ul style="list-style-type: none"> ▪ MS SQL

	Unit-6: Web Application Security (5 Hours) <ul style="list-style-type: none"> ▪ Web Application Vulnerabilities ▪ Secure Coding Techniques ▪ Continuous Security Testing and Assessments
	Unit-7: Compliance Standards (5 Hours) <ul style="list-style-type: none"> ▪ IT Act ▪ ISO 27001 ▪ ITIL Framework

BHARATI VIDYAPEETH (DEEMED to be UNIVERSITY), PUNE
Faculty of Management Studies
Master of Business Administration– (MBA-General)
Revised Course Structure (To be effective from 2020-2021)

I. Title:

- a) **Name of the Programme: Master of Business Administration (General)**
- b) **Nature & duration of the Programme: FULL TIME Post-Graduate Degree Programme of TWO YEARS (approved by AICTE).**

II. Introduction :

The Master of Business Administration (General) is a full time two-year program offered by Bharati Vidyapeeth (Deemed to be University), Pune and conducted at its Management Institutes in Pune, New Delhi, Karad, Kolhapur, Sangli, and Solapur. All the institutes have experienced faculty members, excellent Laboratories, Library, and other modern facilities to provide proper learning environment to the students. This programme is very well received by the industry.

III. Rationale for Syllabus revision:

The Vision and Mission statements of the MBA (General) program embodies the spirit of the mission of the University and vision of Hon'ble Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth (Deemed to be University), Pune, which is to usher in "Social Transformation through Dynamic Education

In view of the dynamic nature of the market, economy and evolving expectations of the stakeholders such as students, faculty members and industry in particular, the syllabus is revised periodically. Last revision was in the year 2016-17.

Over the past four years, feedback was received from various stakeholders and considering the changes that in the macro environment, a need was felt to revise the syllabus so as to suffice the requirements of the industry and society. This revised draft is the result of inputs received from the industry, academia, alumni and all stakeholders. This revised draft is the result of inputs received time to time from the industry, academia, alumni and all stakeholders

IV. Vision Statement of MBA (General) Program :

To facilitate creation of Dynamic and Effective Business Professionals, Managers and Entrepreneurs who can transform the corporate sector, cater to the needs of the society and contribute towards Nation building.

V. Objectives of the MBA (General) Program :

At Bharati Vidyapeeth (Deemed to be University), Pune the objective of MBA (General) Program is to provide world class Business Education and develop dynamic managers, entrepreneurs and business leaders. The Program aims to enhance decision

making capabilities of upcoming managers by imparting critical thinking and analytical abilities.

VI. MBA Program: Program Outcomes

On the successful completion of this Program a student shall be able to:

1. Apply the knowledge of management theories and practices to solve business problems.
2. Foster analytical and critical thinking abilities for data-based decision making.
3. Learn new technologies with ease and be productive at all times
4. Ability to understand, analyze and communicate global, economic, legal and ethical aspects of business.
5. Read, write, and contribute to Business literature
6. Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.

VII. Eligibility for Admission:

Admission to the programme is open to any graduate (10+2+3) of any recognized university satisfying the following conditions:

1. The candidate should have secured at least 50% (45% for SC/ST) in aggregate at graduate level university examination.
2. The Candidate studying in final year of Bachelor's degree may also apply. Admission of such candidates will remain provisional until submission of final result certificates in original.
3. Subject to the above conditions, the final admission is based solely on
 - a) The merit at the All India entrance test (B-MAT) followed by Group Discussion & Personal Interview conducted by Bharati Vidyapeeth (Deemed to be University), Pune
 - b) Submission of Migration Certificate, Transference Certificate, anti-ragging affidavit etc.

VIII. Structure of the Program:

The MBA-General program is of **102** credits which need minimum two years divided into four semesters to complete. During third semester students have to opt for

specialization(s) and study the specialization courses in depth. The programme also includes Summer Internship / Summer Training of 50 days. The medium of instruction and examination will be only English.

A student would be required to complete the course within FOUR academic years from the date of admission.

IX. Credits – 102

The definition of credits is based on the following parameters;

- i) Learning hours put in by the learner
- ii) Learning outcomes
- iii) Contents of the syllabus prescribed for the course etc.

In this system each credit can be described as a combination of 03 (**THREE**) components such as Lectures (L) + Tutorials (T) + Practice (P).

These components are further elaborated for an effective teaching learning process;

- Lectures (L): Classroom lectures delivered by Faculty member in an interactive mode.
- Tutorials (T): Sessions that includes participatory discussions, presentations by the students, case study discussions etc.
- Practice (P): It includes LAB sessions for IT related courses & Business Communication and practice sessions for courses like Accounts, Mathematics, Statistics and field assignments etc.

- ONE Credit = 12 Hours ; In terms of a Semester of 15 (FIFTEEN) weeks,

- Every ONE hour session per week of Lecture (L) = 01 (one) credit per Semester

- TWO hour sessions per week of Tutorial (T) = 01(one) credit per Semester

- TWO hour sessions per week of Practice (P) = 01(one) credit per Semester

 - a) Every **ONE** hour session per week of Lecture (L) = 01 (one) credit per Semester

 - b) **TWO** hour sessions per week of Tutorial (T) = 01(one) credit per Semester

 - c) **TWO** hour sessions per week of Practice (P) = 01(one) credit per Semester

X: Examination :

1. A) Scheme of Examination:

Courses having Internal Assessment (IA) and University Examinations (UE) shall be evaluated by the respective institutes and the University at the term end for 50(fifty) and 50(fifty) Marks respectively. The total marks of IA and UE shall be 100 Marks and it will be converted to grade points and grades.

For courses having *only Internal Assessment (IA)* the respective institutes will evaluate the students in various ways through *Class Test, Presentations, Field Assignments and Mini Projects* for a total of 100 marks during the term. Then the marks will be converted to grade points and grades.

Open Courses shall be evaluated for 100 marks only (hundred marks only).

B) Components of continuous evaluation system (CES) :

Following are the suggested components of CES,

- a) Case Study/ Caselet/Situation Analysis- (Group Activity or Individual Activity)
- b) Class Test
- c) Field Assignment
- d) Role play
- e) Industry Analysis (Group Activity or Individual Activity)
- f) Business plan
- g) Quiz
- h) Workbook / scrapbook
- i) Presentations
- j) Mini Research Projects

Breakup of CES marks (50)

Class Participation / Attendance	10
Mid-term	15
End-term	15
Class Tests, Assignments, MOOCs, Presentation / Mini-Project, Case Study/Lab work etc.	10

2. Grading System for Programmes under Faculty of Management Studies:

The Faculty of Management Studies, Bharati Vidyapeeth (Deemed to be University), Pune has suggested the use of a 10-point grading system for all programmes designed by its different Board of Studies.

The 10 point Grades and Grade Points according to the following table

Range of Marks (%)	Grade	Grade Point
80≤Marks≤100	O	10
70≤Marks≤80	A+	9
60≤Marks≤70	A	8
55≤Marks≤60	B+	7
50≤Marks≤55	B	6
40≤Marks≤50	C	5
Marks < 40	D	0

Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

- If learner fails in IA, the learner passes in the course provided, he/she obtains a minimum 25% marks in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the learner passes at UE.
- A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA he/she has to reappear only at IA as backlog candidate and clear the Head of Passing to secure the GPA required for passing.
- The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 50% and 50% respectively.
- GPA is calculated by adding the UE marks out of 50 and IA marks out of 50. The total marks out of 100 are converted to grade point, which will be the GPA.

Formula to calculate Grade Points (GP)

Suppose that 'Max' is the maximum marks assigned for an examination or evaluation, based on which GP will be computed. In order to determine the GP, Set $x = \text{Max}/10$ (since we have adopted 10 point system). Then GP is calculated by the following formulas

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

Two kinds of performance indicators, namely the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all the courses since his/her enrollment. The CGPA of learner when he /she completes the program is the final result of the learner.

The SGPA is calculated by the formula

$$SGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where, C_k is the Credit value assigned to a course and GP_k is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the Semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

The CGPA is calculated by the following formula

$$CGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where, C_k is the Credit value assigned to a course and GP_k is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrollment and also during the semester for which CGPA is calculated. **The CGPA shall be calculated up to two decimal place accuracy.**

The formula to compute equivalent percentage marks for specified CGPA:

% marks (CGPA)	10 * CGPA-10	If 5.00 ≤ CGPA ≤ 6.00
	5 * CGPA+20	If 6.00 ≤ CGPA ≤ 8.00
	10 * CGPA-20	If 8.00 ≤ CGPA ≤ 9.00
	20 * CGPA-110	If 9.00 ≤ CGPA ≤ 9.50
	40 * CGPA-300	If 9.50 ≤ CGPA ≤ 10.00

Award of Honours:

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed.

The criteria for the award of honors are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA below 5.0	F	Fail	Marks below 40

3. ATKT Rules:

A student is allowed to carry any number of backlog papers of Semester I and Semester II while going into Semester III. However, a student must clear all papers of Semester I and Semester II so as to become eligible for appearing in Examinations at Semester IV.

XI: A. Dual Specialization:

M.B.A (General) Programme 2020-21 offers Dual Specialization to the students in second year of MBA Programme. Under dual specialization students are required to select any **Two Specialization Groups** from the list given below :

i) Prerequisite for offering a combination of Specialization Groups

The Institute will offer the Specializations proposed only if minimum **Ten** students opt for the same.

ii) Specialization Combinations:

Two Specializations may be chosen from the following choices :

Specialization Choices
Marketing Management
Financial Management
Human Resource Management
Information Technology Management
International Business Management
Production & Operations Management
Agribusiness Management
Retail Management

B. Summer Internship:

At the end of Semester II, each student shall undertake Summer Internship in an Industry for 50 (**Fifty Days**). It is mandatory for the students to seek written approval from the Faculty Guide about the Topic and the Organization before commencing the Summer Internship.

During Summer Internship students are expected to take necessary guidance from the faculty guide allotted by the Institute. To do it effectively they should be in touch with their guide through e-mail or phone.

Summer Internship Project should be a research project or it may be an operational assignment that involves working by the students in an organization.

In case of an operational assignment

- 1) Students are expected to do a project work in an organization wherein they are doing Summer Internship.
- 2) The students should identify specific problems faced by the organization in a functional area in which the assignment is given.
e.g.
 - a) Sales - sales targets are not achieved for a particular product or service in a given period of time.
 - b) Finance – mobilization & allocation of financial resources.
 - c) HR – Increase in employee turnover ratio.
- 3) In this study students should focus on
 - Identifying the reasons / factors responsible for the problems faced by the organization
 - Collection of data(Primary & Secondary) related to reasons /factors responsible for these problems
 - Data Analysis tools & interpretation
 - Findings & observations.
 - Suggestions (based on findings & observations) for improving the functioning of the organization.

The ***learning outcomes and the utility to the organization*** must be highlighted in Summer Internship Project Report.

- 4) General chapterization of the report shall be as under;
- 1) Introduction and Literature Review: - This chapter will give a reader the background of problem area, specific problem & how you come across it?
 - 2) Company profile: -
 - 3) Objectives of the study:-
 - 4) Data collection: -
 - 5) Data analysis & interpretation: -
 - 6) Findings & observations: -
 - 7) Suggestions:-

Annexure: -

- Questionnaire
- References.

5. Technical details:

1. The report shall be printed on A-4 size white bond paper.
2. 12 pt. Times New Roman font shall be used with 1.5 line spacing for typing the report.
3. 1” margin shall be left from all the sides.
4. Considering the environmental issues, students are encouraged to print on both sides of the paper.
5. The report shall be hard bound as per the standard format of the cover page given by the Institute and shall be golden embossed.
6. The report should include a Certificate (on company’s letter head) from the company duly signed by the competent authority with the stamp.
7. The report shall be signed by the respective guide(s) & the Director of the Institute 10 (Ten) days before the viva-voce examinations.
8. Student should prepare two hard bound copies of the Summer Internship Project Report and submit one copy in the institute. The other copy of the report is to be kept by the student for their record and future references.
9. In addition to this, students should prepare two soft copies of their SIP reports & submit one each in Training & Placement Department of the Institute & Library

The Summer Internship shall be assessed out 100 Marks. The break-up of these marks is as under;

Sr. No.	Assessment Criteria	Marks
1	Summer Internship Report	50 (Fifty only)
2	Viva- voce examination	50 (Fifty only)

TOTAL MARKS

100

The examiners' panel shall be approved as per the University Guidelines.

The viva –voce shall evaluate the project based on

- i. Actual work done by the student in the organization
- ii. Student's knowledge about the company & Business Environment
- iii. Learning outcomes for the student
- iv. Utility of the study to the organization

Question Paper Pattern for University Examinations

The pattern of question paper for the courses having University Examinations will be as follows:

Title of the Course

Day: **Total Marks: 50**

Date: **Time: 02 Hours**

Instructions:

- a. Attempt any **THREE** questions from Section I and any **TWO** questions from **SECTION II**.
- b. All questions carry **EQUAL** marks.
- c. Answers to both the Sections should be written in the **SAME** answer book.

	SECTION – I	30 Marks
<i>It should contain 05 questions covering the syllabus & should test the conceptual knowledge of the students.</i>		
Question		Marks
Q.1	(10 marks)
Q.2		(10 marks)
Q.3		(10 marks)
Q.4		(10 marks)
Q.5.	Write Short Notes on ANY TWO	(10 marks)
SECTION – II		
20 Marks		
<i>It should contain 03 questions covering the entire syllabus & should be based on application of the Concepts</i>		
Q.6.		(10 marks)
Q.7.		(10 marks)
Q.8		(10 marks)

XII. Structure of the Syllabus

The MBA Programme as per Semesters, Credits and Marks is as follows:

Semester	Credits	Marks Distribution
I	25	900
II	25	900
III	31	1000
IV	21	800
Total	102	3600

The detailed structure is as follows

MBA – (General)- Semester I

Course Code	Semester – I	Credits	IE	UE	Total Marks
101	Management Concepts & Applications	3	50	50	100
102	Managerial Economics	3	50	50	100
103	Financial & Management Accounting	3	50	50	100
104	Organizational Behaviour	3	50	50	100
105	Statistical Techniques	3	50	50	100
106	Legal Aspects of Business	3	50	50	100
107	Business Communication	3	50	50	100
108	Data Analysis Using Advance - Excel	2	100	-	100
See below	Open 1	2	100	-	100
Total No. of Credits		25	550	350	900

Open Courses: Students can opt any one course from the following

Course Code	Open Course
109	Computers Application for Business
110	Social Media Management
111	Current Affairs

**** In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

MBA - (General)- Semester II

Course Code	Semester II	Credits	IE	UE	Total Marks
201	Marketing Management	3	50	50	100
202	Financial Management	3	50	50	100
203	Human Resource Management	3	50	50	100
204	International Business	3	50	50	100
205	Production & Operations Management	3	50	50	100
206	Research Methodology	3	50	50	100
207	Business Environment	3	50	50	100
208	Business Ethics and Corporate Governance	2	100	-	100
See below	Open	2	100	-	100
Total No. Credits		25	550	350	900

Open Courses: Any one course from the following

Course Code	Open course
209	Introduction to Business Analytics
210	E-commerce Applications
211	Managerial Skills for Effectiveness

**** In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

MBA -(General)- Semester III

Course Code	Semester – III	Credits	IE	UE	Total Marks
301	Strategic Management	3	50	50	100
302	Operations Research for Managers	3	50	50	100
303	Entrepreneurship Development and Innovation Management	3	50	50	100
See groups	Specialization I - E-(i)	3	50	50	100
	Specialization I - E-(ii)	3	50	50	100
See groups	Specialization II - E-(i)	3	50	50	100
	Specialization II - E-(ii)	3	50	50	100
304	**Summer Internship	6	50	50	100
305	Change Management	2	100	-	100
See below	Open	2	100	-	100
	Total No. of Credits	31	600	400	1000

Open Courses: Students can opt any one course from the following

Course Code	Open Course
306	Digital Marketing
307	Corporate Taxation
308	Negotiation Management

**** In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

MBA - (General) -Semester IV

Course Code	Semester IV	Credits	IE	UE	Total Marks
401	Project Management	3	50	50	100
See groups	Specialization I - E-(iii)	3	50	50	100
	Specialization I - E-(iv)	3	50	50	100
See groups	Specialization II - E-(iii)	3	50	50	100
	Specialization II - E-(iv)	3	50	50	100
402	Environment & Disaster Management	2	100	-	100
403	E-Business Management	2	100	-	100
See below	Open	2	100	-	100
	Total No. Credits	21	550	250	800

Open Courses: Any one course from the following

Course Code	Open course
404	Cyber Security
405	Artificial Intelligence for Managers
406	Rural Entrepreneurship

**** In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

LIST OF SPECIALIZATION - ELECTIVES

Elective: Marketing Management :

Sem III	
Code.	Name of the Course
MK01	Consumer Behaviour
MK02	Services Marketing
Sem IV	
MK03	Sales & Distribution Management & B2B
MK04	Integrated Marketing Communication

Elective: Financial Management

Sem III	
Code.	Name of the Course
FM01	Investment Analysis & Portfolio Management
FM02	Management of Financial Services
Sem IV	
FM03	Corporate Finance
FM04	International Financial Management

Elective: Human Resource Management

Sem III	
Code.	Name of the Course
HR01	Human Resource Planning and Development
HR02	Labour Laws
Sem IV	
HR03	Compensation and Benefits Management
HR04	Competency Mapping and Performance Management

Elective: International Business Management

Sem III	
Code.	Name of the Course
IB01	Regulatory Aspects of International Business
IB02	Export Import Policies, Procedures and Documentation
Sem IV	
IB03	International Marketing
IB04	Global Business Strategies

Elective: Production & Operations Management

Sem III	
Code.	Name of the Course
PM01	Quality Management
PM02	Business Process reengineering
Sem IV	
PM03	Logistics & Supply Chain Management
PM04	World Class Manufacturing Practices

Elective: Information Technology Management

Sem III	
Code.	Name of the Course
IT01	System Analysis & Design
IT02	Information System Security & Audit
Sem IV	
IT03	RDBMS with Oracle
IT04	Enterprise Business Applications

Elective: Agribusiness Management

Sem III	
Code.	Name of the Course
AM01	Rural Marketing
AM02	Supply Chain Management in Agribusiness
Sem IV	
AM03	Use of Information Technology in Agribusiness Management
AM04	Cooperatives Management

Elective: Retail Management

Sem III	
Code.	Name of the Course
R01	Introduction to Retailing
R02	Retail Management & Franchising
Sem IV	
R03	Merchandising, Display & Advertising
R04	Supply Chain Management in Retailing

SYLLABUS
(w.e.f. 2020_21)

MBA - (GENERAL)

SEMESTER – I

Programme: MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	101	Management Concepts and Applications	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives :
<ol style="list-style-type: none"> 1) To understand the basic Management Concepts and Skills. 2) To study the Principles and Functions of Management. 3) To learn the Applications of Principles of Management. 4) To familiar with the Functional areas of management. 5) To study the Leadership styles in the organization. 6) To expose to the Recent trends in management.
Learning Outcomes:
<p>On completion of this course, the students will be able to</p> <ol style="list-style-type: none"> 1) Understand the Management Concepts and Managerial Skills. 2) Focus on the Principles and Functions of Management. 3) Learn to apply the Principles of Management in practice. 4) Familiarize with the Functional areas of management. 5) Use the effective Leadership styles in the organization. 6) Recognize the Recent trends in management.

Unit	Contents	Sessions
1	Introduction to Management: Definition and meaning of Management, Characteristics of Management, Scope of Management, Scientific Management Approach by F.W. Taylor, Principles of Management by Henry Fayol, Levels of management, Managerial Skills, Functions of Management - Planning, Organizing, Staffing, Directing and Controlling. concept of "POSDCORB".	06
2	Planning: Meaning of Planning, Nature and importance of Planning, Process of Planning, Principles of Planning, Types of Plans - Single Use Plans - Repeated Use Plans, Types of Objectives, Setting Objectives, Management by Objectives (MBO), Decision making- Process of Decision making, Decision making models: classical, Administrative, Political and Vroom-Jago Model.	06
3	Organizing: Meaning of Organizing, Process of Organizing and Creation of Organization structure, Types of organizational structures - Formal and Informal, Staffing: Meaning of Staffing, Human Resource Planning - Job Analysis, Recruitment - Sources of Recruitment, Selection - Process of Selection, Placement of employees, Departmentalization - Bases of Departmentalization, Line and Staff Relationship.	07
4	Directing: Meaning of Directing, Principles of Directing, Leadership Styles, Span of	08

	Management - Determinants of Span of Management, Centralization and Decentralization, Authority, Responsibility and Accountability, Delegation of Authority - Advantages of Effective Delegation. Barriers to effective delegation-Guidelines for effective delegation-Distinctions between Delegation & Decentralization.	
5	Controlling: Meaning of Controlling, Need for effective controlling, Process of Controlling, Techniques of Controlling, Relationship between Planning and Controlling, Use of IT for Controlling, Control techniques, Zero Base Budgeting and Management audit.	08
6	Functional Departments And Sections - HR, Marketing, Production & Operations, Finance, etc. Introduction To Business Sectors: Manufacturing (Automobile, Pharmaceutical, etc), Service (IT, Telecom, Banking, Insurance, etc), Management of SMEs.	10

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	102	Managerial Economics	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives :		
Subject / Course Objectives :		
<ul style="list-style-type: none"> i) To acquaint learners with basic concepts and techniques of economic analysis and their application to managerial decision making. ii) To prepare the students for the use of managerial economics tools and techniques in specific business settings. iii) Comprehend how changes in the environment in which firms operate influence their decision-making. iv) To develop managerial skills for developing business strategy at the firm level. v) To understand recent developments in strategic thinking and how it is applied to economic decision making. vi) Identify possible external and internal economic risks and vulnerabilities to economic growth and identify policies to address them. 		
Learning Outcomes:		
<ul style="list-style-type: none"> i) Understand the role of managers in firms. ii) Analyze the demand and supply conditions and assess the position of a company. iii) Estimation of production function and finding out optimal combination of input using Isoquant and Isocost. iv) Design competition strategies including costing, pricing and market environment according to the nature of the product and structure of market. v) Enable to know the importance of various sectors of the economy and their contribution towards national income. vi) Investigate potential output and compute output gaps and diagnose the outlook for the economy. 		
Unit No.	Contents	Hrs.
1	Introduction to Economics For Business -Nature and Scope of Managerial Economics, Firm and its Objectives, Theories of Firm, Role of Managerial Economics in Decision Making.	5
2	Demand Theory and supply- Demand and its Determination - Law of Demand, Types of Demand, Demand Function, Economic Concept of Elasticity (Price, Cross and Income Elasticity). Concept of Supply, Demand and Supply Equilibrium, Shift in Demand and Supply.	9
3	Theory of Production -Production function, Law of Diminishing Marginal Returns, Three stages of Production, The Long run Production function, Isoquant and Isocost curve, Importance of Production function in managerial decision making.	8
4	Theory of Cost - Classification of Costs - Short Run and Long Run Cost, Cost Function, Scale Economies, Scope Economies, Dual Relationship Between Cost and Production Function, Least cost combination of input (Producer Equilibrium).	7

5	Market Structure - Introduction to different types of Market- <i>Price Determination under Perfect Competition</i> - Introduction, Market and Market Structure, Perfect Competition, Price-Output Determination under Perfect Competition, Short-run Industry Equilibrium, Short-run Firm Equilibrium, Long-run Industry Equilibrium, Long-run Firm Equilibrium under Perfect Competition. <i>Pricing Under Imperfect Competition</i> - Introduction, Monopoly, Price Discrimination under Monopoly, Monopolistic Competition, Oligopoly (Kinked Curve), Game theory.	9
6	Macroeconomic markets and Integration -Product Market: Saving and Investment Function, consumption function. Aggregate demand and Aggregate supply. Fiscal Policy and Monetary Policy for uplifting the economy. Types of Business Cycle.	7
Activity	Students are required to prepare workbook (practical file) -Hands on practice towards diagrams of Demand, Supply, Markets and price determination. News from economic times –For Policy Making, Industry related and country specific. Applications of managerial economics in different firms. Comparing the GDP and other key indicators across the countries. Macroeconomic indicators and the role of fiscal policy in uplifting economy.

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	103	Financial and Management Accounting	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives :

- i) To acquaint the learners with the fundamentals of Financial Accounting.
- ii) To orient to the Accounting mechanics involved in preparation of Books of Accounts and Financial Statements of a sole proprietor
- iii) To make the students familiar with International Accounting Standards and International Financial Reporting Standards (IFRS)
- iv) To introduce the concepts of Cost and Management Accounting
- v) To orient the students about application of budgetary control as a technique of Management Accounting
- vi) To acquaint the students with application of Standard Costing and Marginal Costing as techniques of Management Accounting.

Learning Outcomes :

- I. Learners will able to know the fundamentals of Financial Accounting and Accounting Principles
- II. Learners will demonstrate the ability to prepare Financial Statements of a sole proprietor
- III. Learners will understand the utility and importance of International Accounting Standards and International Financial Reporting Standards (IFRS)
- IV. Learners will be familiar with concepts of Cost and management Accounting
- V. Learners will be able to apply the technique of Budgetary Control
- VI. Learners will be able to apply the technique of Standard Costing and Marginal Costing.

Name : -	Syllabus – Financial and Management Accounting	Hrs.
Unit No : 1	Introduction to Financial Accounting Financial Accounting: Definition, Objectives and Scope Accounting Concepts and Conventions, GAAP, Branches of Accounting Accounting Cycle, End Users of Financial Statements	7
Unit No : 2	Accounting Mechanics Principles of Double Entry Book-Keeping, Journal Ledger and Preparation of Trial Balance (Theory only) Preparation of Trading, Profit & Loss Account and Balance Sheet of a Sole Proprietor	11
Unit No : 3	Introduction to International Accounting Standards Development of international accounting Standards and financial reporting rules Need and Advantages of International Financial Reporting Standards (IFRS) IFRS for Small and Medium Enterprises(SMEs).	5
Unit No : 4	Introduction to Cost and Management Accounting Cost Accounting: Meaning and Importance Classification of Costs, Preparation of Cost Sheet (Theory only) Management Accounting: Definition, Nature and Scope Distinction between Financial Accounting and Management Accounting	6
Unit No : 5	Techniques of Management Accounting (Budgetary Control)	8

	Meaning, Objectives, Advantages and Limitations of Budgetary Control Types of Budgets Preparation of Flexible Budget and Cash Budget	
Unit No : 6	Techniques of Management Accounting (Standard Costing and Marginal Costing) Meaning of Standard Costing, Steps to implement Standard Costing Variance Analysis of Material and Labour Costs Marginal Costing – Meaning of Marginal Cost, Characteristics and Advantages of Marginal Costing, Cost-Volume-Profit Analysis – Profit/Volume ratio, Break-Even Analysis and Margin of Safety	11

Course : MBA CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	105	Statistical Techniques	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives:

- I. To introduce to the learner the importance of statistical techniques in business applications
- II. To familiarize with the basic concepts of statistical techniques.
- III. To expose to the Graphical representation of data.
- IV. To impart skills in computation and application of correlation and regression.
- V. To understand the basics of probability and testing of hypotheses

Learning Outcomes:

After learning the concepts of Statistical Techniques, students will be able to have a

- I) Develop numerical ability to solve examples on various topics and specifically formation and Testing of Hypothesis
- II) Have clear understanding of various statistical tools and their applications in Business.
- III) Analyze the importance of Statistical Techniques in different functional areas of Management.
- IV) Apply Correlation and Regression Techniques in Business applications.
- V) To apply the statistical techniques to small data sets for analysis and interpretation

Name : -	Contents	Hrs.
Unit No : 1	Introduction to Statistics: Introduction to Statistics, Importance of Statistics in modern business environment. Scope and Applications of Statistics. Advantages and limitations of Statistics. Sources of data – Primary and secondary, Universe or Population, Sample, Concept of Sampling, Advantages of Sampling, Types of Sampling. Classification, Tabulation and Presentation of Data, Requisites of a good classification, Types of classification, Methods of classification, Tabulation - Frequency and Frequency Distribution, Diagrammatic and graphic representation of Data – Bar diagrams, Pie chart, Histogram, Frequency polygon, Frequency curve, Ogive curves	08
Unit No :2	Measures of Central Tendency and Dispersion: Statistical Averages - Arithmetic mean, Median and Mode, Positional averages - Quartiles, deciles and percentiles. Dispersion – Range - Quartile deviations, Mean deviation, Standard Deviation - Properties of standard deviation, Variance, Coefficient of Variation. Applications in business and management.	10
Unit No :3	Correlation: Correlation, Types of Correlation, Scatter diagram, Karl Pearson's correlation coefficient, Properties of Karl Pearson's correlation	08

	coefficient, Spearman's Rank Correlation Coefficient. Association of attributes.	
Unit No : 4	Regression - Regression analysis, Regression lines, Regression coefficients. Business application.	06
Unit No : 5	Elementary probability concepts, Probability Distributions- Binomial, Poisson and Normal Distribution	06
Unit no 6	Introduction to Testing of Hypothesis: Null and alternate hypothesis, Significance Level, type I and Type II error, Chi – Square Test.	08

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	108	Data Analysis Using advance -Excel	
Type	Credits	Evaluation	Marks
Open	2	CES	IE = 100

Course Objectives:

- i) To train the student for using the spreadsheet package MS-Excel for business applications.
- To impart skills of analyzing data and presenting it using MS-Excel.

Learning Outcomes :

Understand the different functions of MS Excel
Use MS Excel for analysis of Data

Unit No.	Contents	Hrs.
1	Introduction to Excel MS excel screen elements – Tool bar, title bar, ribbon, formula bar, status bar. Moving around a Worksheet, entering and formatting (e.g. Number, Text, Date and Currency) data. Cell referencing (relative, absolute, mixed), using formulae, Use of Find, Replace, Goto.	5
2	Working with Excel Insert, delete - cells, rows, columns. Sorting (basic, custom), filtering, grouping, ungrouping data, dealing with subtotals and grand totals. Validating data, protecting cells. Create, manage, and format pivot tables and pivot charts.	5
3	Conditional Formatting Once defined, it will automatically change the formats as per conditions user inputs. Work with functions to manipulate strings of text and data	5
4	Commonly used functions Sum, Max, Min, Average, Count, Today, Now, Datedif, Countif, CountA, CountBlank, Round, Roundup, Round Down, ABS, Sign, Ceiling, Floor, Trim, Value, Clean, sqrt, if, sumif	5
5	Data Viewing and Reviewing Inserting comments, spell checks and changes to the worksheet data etc, Viewing data in different ways eg. Page break, normal etc	5
6	Creating and managing charts Create and modify graphs / charts like Column, Line, Pie, Bar, Area, Scatter, 3D etc. Working with multiple sheets, hyper linking Work with spark lines. Perform Look UP tables.	5

Semester	Course Code	Course Title	
II	206	Research Methodology	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives:

- i) To introduce the role of research in business and management
- ii) To introduce the concepts of scientific research and methods of conducting scientific enquiry
- iii) To identify various sources of information for literature review and data collection.
- iv) To familiarize the learners with the key concepts in sampling techniques and instruments for data collection
- v) To develop basic understanding of conducting surveys and reporting the research
- vi) To educate on the ethical issues in conducting applied research.

Learning Outcomes :

At the end of the course the learner will

- I) Develop understanding on different applications of research for managerial decision making
- II) Explain key research and summarize the research articles and research reports
- III) Have basic awareness of data analysis-and hypothesis testing procedures
- IV) Design questionnaires and administer simple survey based projects.
- V) Describe sampling methods, measurement scales and instruments, and appropriate uses of each
- VI) Explain the rationale for research ethics

Unit No.	Contents	Hrs.
1	Introduction to Research Methodology Meaning, definition and objectives of research, motivations for research, type of research, Importance of research in managerial decision making , research in Research in functional / business areas. Qualities of a good researcher.	06
2	Research process: Steps in research process, Defining the research problem, Problem formulation and statement, Framing of hypothesis Research design: Meaning, characteristics, advantages and importance of research design. Measurement – types and errors in measurement. Development and designing of tools of data collection – Attitude measurement scales, Levels of measurement and questions of validity and reliability Designing of research projects – research proposal, Pilot surveys	08

3	<p>Sampling and Data Collection: Census and sample survey. Need and importance of sampling, probability and non-probability sampling technique. Data collection – Primary and secondary sources of data, methods of collecting primary data - interview, observation, questionnaires, schedules through enumerators, surveys. Advantages and Limitations of different methods of data collection. Use of secondary data, precautions while using secondary data.</p>	08
4	<p>Processing and Analysis of Data Meaning, importance and steps involved in processing of data. Use of statistical tools and techniques for analysis of data. Testing of Hypotheses, Basic concepts, importance of hypothesis. Procedure of testing of hypothesis. Chi-square test – Problems on Basic application of chi square test. Analysis and Interpretation of data – Interpretations of results, Concept of Univariate, Bi-variate and multivariate analysis of data</p>	10
5	<p>Reporting of research : Importance of research reports, types of reports, Format of a research report, Precautions in writing a research report.. Plagiarism and its types. References and Bibliography. Dissemination of research results. Ethical issues in conducting research.</p>	08
