

BHARATI VIDYAPEETH UNIVERSITY, PUNE
BACHELOR OF HOMOEOPATHIC MEDICINE AND SURGERY
B.H.M.S.

DEGREE COURSE CURRICULUM AND SYLLABUS

A) NOTIFICATION:

The rules and regulations adopted by Bharati Vidyapeeth University are in complete conformity to/ with homoeopathy (Degree course) regulations. In exercise of the powers conferred by clauses (i), 9j) and (k) of section 33 and sub-section (1) of section 20 of the Homoeopathy Central Council Act, 1973 (59 of 1973), the central Council of Homoeopathy, with the previous sanction of the Central Government, hereby makes the following regulations, namely.

Preliminary

Commencement (1) This Regulation may be called (Degree Course) Reg. 1983

(2) Come into force on the date of their publication (14th July 2015)

N.B.- shall apply to students admitted to I yr. BHMS (Degree Course) from Ac.

Session (2015-16)

B) PART-I

1. **AIMS & OBJECTIVES:** The main objectives of B.H.M.S. degree course as per Central Council of Homoeopathy are, "To standardize education of homoeopathic medicine and to turn out able and efficient practitioners, Teachers and Research workers in the field, " and endeavor has therefore been made in curriculum to ensure imparting of requisite training to students under going this course so as to fulfill the above objective.
2. **ELIGIBILITY FOR ADMISSION / QUALIFICATION & AGE:**
 - a) 10+2 Equivalent after period of 12yr. study and last 2 years with Physics, Chemistry, Biology with mathematics any other with English
 - b) 10+2 (PCB including practical test) English
 - c) Pre-Profession premedical with PCB after passing pre university or Equivalent with PCB & English
 - d) First year of the three years degree course 10+2 (PCB including practical test English)
 - e) Any other Examination which in scope & Standard of found to be equivalent to the intermediate science exam

Minimum Age for Admission:

17 years as on 31st December in the year of admission for the B.H.M.S. Course.

3. DURATION OF THE COURSE:

5 1/2 years including compulsory internship of one year as under :

- | | | | |
|----|---------------------|---|----------|
| a) | First B.H.M.S. | - | 1 year. |
| b) | Second B.H.M.S. | - | 1 year. |
| c) | Third B.H.M.S. | - | 1 year |
| d) | Final B.H.M.S. | - | 1&½ year |
| e) | Internship B.H.M.S. | - | 1 year |

4. **DEGREE TO BE AWARDED AFTER SUCCESSFUL COMPLETION OF COURSE:**
"Bachelor of Homoeopathic Medicine and Surgery (B.H.M.S.)"
5. **MEDIUM OF INSTRUCTION:**
English
6. **COURSE OF STUDY**
 - i) The degree courses of B.H.M.S. (Degree) shall comprise a course of study consisting of curriculum and syllabus. Provided in these regulations, spread over a period of 5 1/2 years including compulsory internship of 1 year duration after passing the final degree examination.
 - ii) The internship should be undertaken at the hospital attached to the college and in cases where such hospital cannot accommodate all of its students for internship such students may undertake their internship in a hospital a dispensary run by the Central Govt. and State Govt. or Local bodies.
 - iii) At the completions of internship of the specified period and on the recommendation of the head of the institution where internship was undertaken the Bharati Vidyapeeth University shall issue the degree to the successful candidates.

Criteria for selection of student

The Selection of students to the college shall be based solely on merit of candidate in the competitive examination conducted by University (Board any agency notified by state/Central Government)

- (a) State having one college one university conducting competitive examination
- (b) State having more than one university an more than in college competitive examination
- (c) There are more than one college in a state and only one university/board then joint selection board of principals of the colleges, constituted by the state Govt. and representative of faculty
- (d) Central Govt. notified competitive Exam.
Competitive examination conducted by university/Board or state/central Govt.

The Curriculum.

Subjects of Study and examination for v c B.H.M.S. (Degree) Course shall be as under namely:-

Sr. No.	Course	Subject of Teaching	Subject of Examination
1	I Year	1)Anatomy, 2)Physiology, 3)Homeopathic Pharmacy, 4)Homeopathic Materia Medica 5)Organon of Medicine	1)Anatomy, 2)Physiology, 3) Homeopathic Pharmacy
2	II Year	1)Pathology, 2) Forensic Medicine, 3) Homeopathic Materia Medica, 4)Organon of Medicine, 5)Surgery, 6) Obstetrics & Gynecology	1)Pathology, 2) Forensic Medicine, 3) Homeopathic Materia Medica, 4)Organon of Medicine,
3	III Year	1)Surgery, 2) Obstetrics & Gynecology 3)Homoeopathic. Materia Medica, 4)Practice of Medicine, 5)Organon of Medicine, 6)Community Medicine, 7)Repertory	1)Surgery, 2) Obstetrics & Gynecology 3)Homoeopathic Materia Medica 4)Organon of Medicine, ,
4	IV Year	1)Practice of Medicine, 2) Homoeopathic Materia Medica, 3)Organon of Medicine, 4)Community Medicine, 5)Repertory	1)Practice of Medicine, 2) Homoeopathic Materia Medica, 3)Organon of Medicine, 4)Community Medicine, 5)Repertory

1. SCHEME OF EXAMINATION :

- (i) There shall be a regular examination and a supplementary examination in a year and the supplementary examination shall be conducted within two months of declaration of results (including issue of mark sheets)
- (ii) The student shall be admitted to the First, Second, Third & Fourth B.H.M.S' examination provided he has required 75% attendance at the minimum in each of the subjects (in theory and practical including clinical) for appearing in the University examinations shall be compulsory. “The candidate shall pass First B.H.M.S, examination in all the subjects at least one term (six months) before he is allowed to appear in the Second B.H.M.S examination provided that he has passed in the subjects of anatomy and physiology (including Biochemistry) examinations two terms (twelve months) before he is allowed to appear in the Second B.H.M.S examination.” No candidate shall be admitted to the Second BHMS Examination unless he has passed the First BHMS examination.
The candidate must pass the Second BHMS examination at least one term (6 months) before he is allowed to appear in the Third BHMS examination. No candidate shall be admitted to the Third BHMS examination unless he has passed the Second BHMS examination.
The candidate must pass the Third BHMS examination at least one term (6 months) before he is allowed to appear in the Fourth BHMS examination.No candidate shall be admitted to the Fourth BHMS examination unless he has passed the third BHMS examination.
- (iii) The First BHMS examination shall be held in the 12th month of admission.
The Second BHMS examination shall be held in the 24th month of admission to First BHMS.
The Third BHMS examination shall be held in the 36thmonth of admission to First BHMS.The
Fourth BHMS examination shall be held in the 54th month of admission of First BHMS.
- iv) No candidate shall be admitted to third and fourth examination unless he has passed second and third BHMS examination respectively at least 1 term/6months before.

NUMBER OF PAPERS AND MARKS FOR EACH SUBJECT

(iv) Full marks for each subject and minimum marks required for pass are as follows, namely:-

FIRST BHMS EXAMINATIONS

Subject	Written		Practical(including oral)		Total	
	Full marks	Pass marks	Full marks	Pass marks	Full marks	Pass marks
Homoeopathic Pharmacy	100	50	100	50	200	100
Anatomy	200	100	200	100	400	200
Physiology	200	100	200	100	400	200

SECOND BHMS EXAMINATION

Subject	Written		Practical or Clinical including oral		Total	
	Full marks	Pass marks	Full marks	Pass marks	Full marks	Pass marks
Pathology	200	100	100	50	300	150
Forensic Medicine & toxicology	100	50	100	50	200	100
Homoeopathic Materia Medica	100	50	100	50	200	100
Organon of Medicine	100	50	100	50	200	100

THIRD BHMS EXAMINATION

Subject	Written		Practical or clinical including oral		Total	
	Full marks	pass marks	Full marks	Pass marks	Full marks	Pass marks
Surgery	200	100	200	100	400	200
Gynaecology and Obstetrics	200	100	200	100	400	200
Homoeopathic Materia Medica	100	50	100	50	200	100
Organon of Medicine	100	50	100	50	200	100

FOURTH BHMS EXAMINATION

Subject	Written		Practical or clinical including oral		Total	
	Full marks	Pass marks	Full marks	Pass marks	Full marks	Pass marks
Practice of medicine	200	100	200	100	400	200
Homoeopathic Materia Medica	200	100	200	100	400	200
Organon of medicine with homoeopathic philosophy	200	100	100	50	300	150
Repertory	100	50	100	50	200	100
Community medicine	100	50	100	50	200	100

Total:- 1000 + 900 + 1200 + 1500 = 4600 Marks

2. **PASS MARKS:**
Pass marks in all subjects both homoeopathic and allied Medical subjects shall be 50% in each part (written, oral and practical).
3. **RULES OF EXAMINATION:**
The examination will be conducted as per prescribed norms and regulations of Central Council of Homoeopathy, New Delhi and Bharati Vidyapeeth University.

Three hrs. shall allowed for each theoretical paper in each subject.

A candidate who appears at First BHMS examination, Second BHMS examination, Third BHMS examination or Fourth BHMS examination but fails to pass in the subject or subjects shall be re-admitted to the next examination in the subject or subjects (theory and practical including oral where in he has filed).

If a candidate fails to pass in all the subjects with in four chances in examination, he shall be required to prosecute a further course of studying all the subjects and in all parts for one year to the satisfaction of the head of the college and appearing for examination in all th4 subjects.

Provided that if a student appearing for the Fourth BHMS examination has only one subject to pas at the end of prescribed chances, he shall be allowed to appear at the next examination in that particular subject and shall complete the examination with this special chance.

Candidates who have passed in one or more subjects need not appear in the subject or those subjects again in the subsequent examinations if the candidate passes the whole examination with in four chances including the original examination.

There shall be regular examination and a supplementary examination for First BHMS (only for Pharmacy subject) in a year and the supplementary examination shall be conducted within two months after declaration of results (including issue of mark sheets)

For non-appearance in an examination for any reason, a candidate shall not have any liberty for availing additional chance to appear in that examination.

Grace Marks:

Grace marks at the maximum up to ten marks in total shall be awarded if a student fails in one or more subjects (including any head of passing) and if a student is passing examination as a whole by award of grace marks.

Rules of ATKT:

If a candidate appearing at First BHMS will be issued marksheet with the result Pass, fail or Fail ATKT as the case may be

- 1) If a candidate fails in the subject 'Pharmacy' only, then the result will be given as Fail ATKT and he will be allowed to appear in supplementary examination, which will be held within two months after declaration of result.
- 2) If a candidate fails in subject 'Pharmacy' along with 'Anatomy' or 'Physiology' or both the subjects the result will be given as fail. In this case he will not be allowed to appear at the supplementary examination in the subject 'Pharmacy'
- 3) If a candidate passes in 'Pharmacy' subject and fails in "Anatomy" / 'Physiology' or both the subjects the result will be given as Fail.
- 4) Result for Second & Third BHMS examinations will be given either in Fail ATKT or Pass.

The candidate must pass the First BHMS examination in all the subjects at least one term (6 months) before he is allowed to appear in the Second BHMS examination provided that he has passed in the subjects of Anatomy and Physiology (including Biochemistry) examination two terms (12 month) before he is allowed to appear in the Second BHMS examination.

- a) No candidate shall be admitted to the Second-BHMS examination unless he has passed the First BHMS examination.
- b) No candidate shall be admitted to the Third-BHMS examination unless he has passed the Second BHMS examination.

c) No candidate shall be admitted the Fourth-BHMS examination unless he has passed the Third BHMS examination.

The candidate must pass the Second BHMS examination at least one term (6 months) before he is allowed to appear in the Third BHMS examination.

Supplementary examination will be conducted after two months of declaration of results only in the subject of Pharmacy at First BHMS. If a student fails in the subjects Anatomy or Physiology or both, he is not allowed to appear in supplementary examination in any of the subject. He can appear in next university subsequent examination only.

Duration of Course : 4 & ½ Year (Total Marks: 4600)

(First-12 months, Second -12months, Third-12months, Fourth-18months)

Every candidate shall compete the course including the passing of examination in all subjects and compete the compulsory internship training within a period of eleven years from the date of admission in first BHMS degree course.

The minimum of hours for lecture, Demonstration Practical and seminar classes in the subject shall be as under

FIRST BHMS

Sr. No.	Subject	Theoretical lecture (in hours)	Practical or clinical or tutorial or seminars (in hours).
1	Pharmacy	100	75
2	Anatomy	200 (including 10 hours each for histology and embryology).	275 (including 30 on histology and embryology).
3	Physiology	200 (including 50 hours for bio-chemistry)	275 hours (including 50 hours for Biochemistry).
4	Homoeopathic Materia Medica	35	--
5	Organon of Medicine with Homoeopathic Philosophy	35 (including 10 for logic)	

SECOND BHMS

Sr. No.	Subject	Theoretical lecture (in hours)	Practical or clinical or tutorial or seminar (in hours)
1.	Pathology	200	80
2.	Forensic Medicine and Toxicology	80	40
3.	Organon of Medicine with Homoeopathic Philosophy	160	60
4.	Homoeopathic Materia Medica	160	60
5.	Surgery	80	60 (One term of three months in surgical ward and outpatient department)
6.	Gynaecology and Obstetrics	40 and 40=80	60 (One term of three months in gynecology and obstetrics ward and outpatient department).

THIRD BHMS

S. N.	Subject	Theoretical lecture (in hours)	Practical or clinical or tutorial or seminars (in hours)
1.	Practice of medicine	50}75 25}	75 One term of three months each in outpatient department and inpatient department in different wards or department.
2.	Surgery	100}150 50}.	75 One term of three months each in surgical ward and outpatient department.
3.	Gynaecology and Obstetrics	100}150 50}	75 One term of three months gynaecology and obstetrics ward and outpatient department.
4.	Homoeopathic Materia Medica	100	75
5.	Organon of Medicine	100	75
6.	Repertory	50	25
7.	Community Medicine	35	15

FOURTH BHMS

Subject	Theoretical lecture (in hours)	Practical or clinical or tutorial classes (in hours)
Practice of Medicine	120}180 60}	One term of three months each in outpatient department and inpatient department respectively for case taking, analysis, evaluation and provisional prescription just for case presentation on ten cases per month.
Homoeopathic Materia Medica	180	
Organon of Medicine with Homoeopathic Philosophy	180	
Repertory	100	
Community Medicine	100	100

4. **RESULTS AND RE-ADMISSION TO EXAMINATION:**

- i) Results of the examination are published at the **maximum within one month** of the last date examination.
- ii) Candidate who have passed in one or more subjects need not appear in that subject or those subjects again in the subsequent examinations if the candidate passes the whole examination within 4 chances including the original examination.
- iii) “The candidate shall pass First B.H.M.S, examination in all the subjects at least one term (six months) before he is allowed to appear in the Second B.H.M.S examination provided that he has passed in the subjects of anatomy and physiology (including Biochemistry) examinations two terms (twelve months) before he is allowed to appear in the Second B.H.M.S examination.

- iv) “a candidate who appears at First B.H.M.S examination, Second B.H.M.S examination, Third B.H;M.S examination or Fourth B.H.M.S examination but fails to pass in the subject or subjects shall be re-admitted to the next examination in the subject or subjects (theory and practical or clinical including oral or practical or clinical wherein he has failed);”;
- v) Special classes, seminars, demonstrations, practical, tutorials, etc. shall be arranged for the repeaters in the subject in which they have failed before they are allowed to appear at the next examination, in which attendance shall be compulsory.
- vi) If a candidate fails to pass in all the subjects within the prescribed chances he shall be required to prosecute a further course of study in all the subject and in all parts for 1 year to the satisfaction of the head of college and appearing for examinations in all the subjects.
- vii) Grace Mark University/examining authority shall have the discretion to **award maximum 10 marks** in total if a student fails in one/more subjects.

11. EXAMINERS:

- i) No person other than the holder of the qualification prescribed for the teaching staff in Homoeopathy (minimum standards of education) regulations amended from time to time shall be appointed an internal or external examination or paper setter for the B.H.M.S. Degree course.

Provided that :

- a) No such person shall be appointed as an examiner unless he has at least three years continuous regular teaching experience in the subject concerned, gained in a Degree level Homoeopathic Medical College.
- b) Internal examiners shall be appointed from amongst the teaching staff of Homoeopathic Medical College.
- c) No person shall be appointed as an external examiner in any allied medical subject unless he possesses recognized Medical qualification as required for appointment to teaching post in accordance with annexure of the Homoeopathy (Minimum standards education) regulations, 1983.
- d) A paper setter may be appointed as an internal or external examiner.

The criteria for appointing the Chairman or paper-setter or moderator shall be as follows, namely:-

- (1) Chairman: Senior most person from amongst the examiners or paper-setters appointed for theory and oral or practical or clinical examinations shall be appointed as Chairman and the eligibility qualification for the Chairman shall be the same as for appointment of a Professor.
- (2) Moderator: A Professor or Associate Professor or Reader shall be eligible to be appointed as moderator:
- (3) Paper setter A Professor or Associate Professor or Reader shall be appointed as a paper setter.

Provided that an Assistant Professor or Lecturer with three years experience as an examiner shall be eligible to be appointed as paper setter

For non appearance in an examination for any reason, a candidate shall not have any liberty for availing additional chance to appear in that examination.

12. INTERNSHIP TRAINING:

- 1) II) Each candidate shall be required to undergo compulsory rotating Internship of one year, after passing the Final B.H.M.S. examinations, to the satisfaction of the Principal of the Homoeopathic College. Thereafter only, the candidate shall be eligible for the award of Degree of bachelor of Homoeopathic Medicine and Surgery (B.H.M.S.) by the University
 - i) (a) All parts of the internship training shall be undertake at the hospital attached to the College, and in cases where such hospital cannot accommodate all of its students for internship then such candidates/ students shall be informed in writing by the college and it shall be the responsibility of the College to ensure that each of such students is put on internship training in a Homoeopathic Hospital or dispensary run by Government or local bodies.
 - ii) To enable the State Board/ Council of Homoeopathy to grant provisional registration of minimum of one year to each candidate to undertake the internship, the University concerned shall issue a provisional passed certificate on passing the Final B.H.M.S. examination to each successful candidate.
Provide that in the event of shortage or unsatisfactory work, the period of compulsory internship and the provisional registration shall be accordingly extended by the State Board/ Council.
 - iii) Full registration shall only be given by the State Board if the B.H.M.S. degree awarded by the University concerned is a recognized medical qualification as per Section 13(1) of the Act, and Board shall award registration to such candidates who produce certificate to completion or compulsory rotating internship of not less than one year duration from the Principal of College where one has been a bonafide student which shall also declare that the candidate is eligible for it.
 - iv) The internee students shall not prescribe the treatment including medicines and each of them shall work under the direct supervision of Head of Department concerned and/ or a Resident Medical Officer. No intern student shall issue any medico legal document under his/ her signatures.
2. The internship training shall be regulated by the Principal in consultation with concerned Heads of Departments and R.M.O. as under :
 - i) Each internee student shall be asked to maintain a record of work, which is to be constantly monitored by the Head of concerned Department and / or Resident Medical Officer under whom the internee is posted. The scrutiny of record shall be done in an objective way to update the knowledge, skill and aptitude of internee.
 - ii) The stress during the internship training shall be on case taking, evaluation of symptoms, nosological and miasmatic diagnostic analysis, repertorization and management of sick people based on principles of Homoeopathy. The Principal or Head of the College in consultation with heads of concerned clinical departments (including Organon of Medicine, Materia Medica and Repertory) shall make medical units having integration of teaching faculty of concerned departments to regulate internship training to be given to each student. Weekly seminars shall be conducted wherein interns in rotation be given a chance to present their cases for discussion, and, concerned teachers/ R.M.O. shall assess performance of each of interns. Resident Medical Officer shall co-ordinate with teachers concerned in conduct of weekly seminars

- iii) Rotation of intern students shall be as under :
 - a) Practice of Medicine - 8 Months wherein internee will be rotated in each Psychology, Respiratory, Gastro intestinal Endocrinology. Skin and V.D., Locomotor Cardiology, Paediatrics sections.
 - b) Surgery - 1 Month.
 - c) Obstetrics and Gynaecology - 2 months [1 month each (including Reproductive and child health care)].
 - d) Community medicine (including PHC/ CHC) - 1 month.
- iv) Each internee shall be exposed to clinicopathology work to acquire skill in taking samples and doing routine blood - examination, blood smear for parasites, sputum examination, urine and stool examination. Student shall be trained to correlate laboratory findings with diagnosis and management of sick people.
- v) Each internee shall be given opportunities to learn the diagnostic techniques like x-rays, Ultrasonography, E.C.G., Spirometer and other forthcoming techniques and correlate their findings with diagnosis and management of cases.
- vi) Each internee student shall be given adequate knowledge about issuing of medico-legal certificates including medical and fitness certificates, death certificates, birth certificates, court producers and all of such legislation's be discussed which were taught in curriculum of Forensic Medicine.
- vii) Each internee shall maintain records of 40 acute and 25 chronic cases complete in all manner including follow up in Practice of Medicine, record of 5 antenatal checkup and 3 delivery cases attended by him/ her in Department of Obstetrics and 3 cases of Gynaecology; records of 5 surgical cases assisted by him (and demonstrational knowledge of dressings) in Surgery department, and records of knowledge gained in Primary Health Centers, Community health Centers, various health programmes.
- viii) Each internee shall be given a liberty to choose an elective assignment on any subject, and complete output shall be furnished in writing by the internee in respect of elective assignment to the Principal of the College within internship duration.
- ix) Each intern shall be posted on duty in such a manner that each of them attend at least 15 days in O.P.D. and 15 days I.P.D. at least in each month (except for duty in Community Medicine) and attend the other parts of duty including self preparation in Library.
- x) Each intern-student shall be made to learn importance of maintaining statistics and records; intern-student shall also be familiarized with research methodology.
- 3. i) Each internee shall have not less than 80% of attendance during the internship training.
- ii) Each internee shall be on duty of at least 6 hrs. per day during the compulsory internship training.

C) **PART-II :**

a) **INTRODUCTION :**

Basic objectives of education and training in a Homoeopathic institution is to prepare a competent Homoeopathic Physician who is capable of functioning independently and effectively under Rural and Urban set ups.

A. **Sound Foundation :**

To function effectively as a Homoeopathic Physician a thorough grasp over the medical concepts is imperative. For this, the educational process shall be perceived as an integrated evolving process and not merely as an acquisition of a large number of disjointed facts.

A student shall have to pass through a Training procedure which encompasses the above well, right from I-B.H.M.S. to IV-B.H.M.S. and also during the internship period.

He shall undergo an education process wherein learning of Facts and concepts right from 1st Year are in a continuity, in an evolutionary and progressive pattern. In I-B.H.M.S., student shall study the fundamental principles of Homoeopathy and will also learn more of applied anatomy than a multitude of minor anatomical details.

In II-B.H.M.S., a student shall be exposed to very vital concept of susceptibility and symptomatology with Analysis-Evaluation and details of the Homoeopathic concepts, old logic of Homoeopathy. these will attain much deeper significance (if care is taken by teachers of pathology and Organon-Philosophy) when the current knowledge of INFLAMMATION, IMMUNITY, is correlated well with concepts of susceptibility.

In III-B.H.M.S., there is opportunity to fortify the foundation at the best by correlating between Theory of Chronic diseases and the Patho-Physiological facts on the Gynecology, Surgery and Medicine. A student shall have to be taught the spectrums of various diseases in correlation with the spectrum of miasmatic manifestations. He will then be able to use a well concluded EVALUATION ORDER OF Characteristics to derive an Operationally valid repertorial Totality.

The knowledge gathered in this pattern will keep him constantly aware of his objectives and his role as a Homoeopathic Physician. The Integration will eliminate the state of confusion. The Therapeutics action then will be right and Complete, utilizing the full repertories of the Medicinal and Non-medicinal measures, keeping him up-to-date about the fresh scientific developments and inculcating values of Continuous Medical Education.

B. **Execution :**

Maximum emphasis shall be placed on the applied aspects of all the subjects. Thus teachings of Anatomy, Physiology and Biochemistry will demand greater emphasis on applied aspects of these sciences. Teaching of Pathology will demand sharp focus on general Pathology, while Regional Pathology will come up as an application. it shall require correlation with Medicine, Surgery and Gynecology. All these need to be studied from Homoeopathic perspectives, hence emphasis on applied aspect of Organon Philosophy and Homoeopathic Therapeutics representing application to all other subjects.

C. Inter-Department co-ordination :

Essentially, the entire approach becomes an integrated approach. All departments shall develop a cohesive well-defined programme which demand marked inter-departmental co-ordination.

It is therefore desirable to have teaching programmes wherein, by rotation each department participates in the teaching co-ordinating well with the other faculties with constant updating and evaluation. The co-ordination has to be in the way as given in the text under each subject inside these Regulations. This will ensure fundamental and exceptional clarity.

D. Deductive – Inductive Teachings :

While teaching, there shall be balance in designing deductive and inductive process in mind. There shall be less emphasis on didactic lectures. Major portion of the time of the students shall be devoted to demonstrations, group discussions, seminars and clinics. Every attempt shall be made to encourage students to participate in all these to develop his personality, character, expressions and to ensure the grasp over concepts rapidly.

E. Patient Oriented Teaching :

In order to impart the integrated medical education PATIENT has to be in the Centre right from day one of the II-B.H.M.S.

Importance of social factors in relation to the problem of health and disease shall receive proper emphasis throughout the course and to achieve this objective, the educational process shall be community as well as hospital based.

GENERAL GUIDELINES THERAPEUTICS

Homoeopathy has a distinct approach to disease. Concept of individualization and concept chronic miasm makes it distinct.

It recognizes an ailing individual by studying him as a whole rather than in terms of sick parts. It emphasizes that study of man from the state of Health i.e. DISPOSITION DIATHESIS DISEASE, taking into account all predisposing and precipitating factors i.e. FUNDAMENTAL CAUSE, MAINTAINING CAUSE AND EXCITING CAUSE.

Hahnemann's theory of chronic miasm provides us an evolutionary understanding of the chronic disease PSORA - SYNCOSIS-SYPHILIS and acute manifestations of chronic diseases, evolution of the natural disease shall be comprehended in the light of theory or chronic miasm. However, current knowledge of Pathology and clinical medicine assist in defining this must demonstrated.

Study of therapeutics does not mean simply list of specifics. For the clinical condition, but teaching of applied Materia Medica. Here we demonstrate how various drugs would come up in psoric, sycotic, tubercular or syphilitic state of the clinical conditions. Thus emphasize would be in correlating pace of evolution of disease, peculiar, respectively and of characteristics.

Thus, teaching of THERAPEUTICS would essentially demand an effective correlation of

- i) Knowledge of clinical/ Medicine/ Surgery.
- ii) Appreciation of Natural disease its evolution in the light of Theory of chronic miasm. Thus correlation with Organon Philosophy.
- iii) Applied Materia Medica and Repertory.

NOTE :

The modifications in this syllabus will be published as and when published by Central Government.

- 3) Following shall be subjectwise Syllabus for the Bachelor of Homoeopathic Medicine and Surgery (B.H.M.S.) course.

SYLLABUS

. **Syllabus for Degree Course:** Following shall be the syllabus for B.H.M.S. (Degree) Course:-

HOMOEOPATHIC PHARMACY

Instructions:

Instruction in Homoeopathic Pharmacy shall be so planned as to present

- (1) Importance of homoeopathic pharmacy in relation to study of Homoeopathic Materia Medica, Organon of medicine and national economy as well as growth of homoeopathic pharmacy and research;
- (2) Originality and speciality of homoeopathic pharmacy and its relation, to pharmacy of other recognised systems of medicine.
- (3) The areas of teaching shall encompass the entire subject but stress shall be laid on the fundamental topics that form the basis of homoeopathy

A. Theory;

I. General concepts and orientation:

1. History of pharmacy with emphasis on emergence of Homoeopathic Pharmacy.
2. Official Homoeopathic Pharmacopoeia (Germany, Britain, U.S.A., India).
3. Important terminologies like scientific names, common names, synonyms.
4. Definitions in homoeopathic pharmacy.
5. Components of Pharmacy.
6. Weights and measurements.
7. Nomenclature of homoeopathic drugs with their anomalies.

II. Raw Material: drugs and vehicles

1. Sources of drugs (taxonomic classification, with reference to utility).
2. Collection of drug substances.
3. Vehicles.
4. Homoeopathic Pharmaceutical Instruments and appliances.

III. Homoeopathic Pharmaceutics:

1. Mother tincture and its preparation - old and new methods
2. Various scales used in homoeopathic pharmacy.
3. Drug dynamisation or potentisation.
4. External applications (focus on scope of Homoeopathic lotion, glycerol, liniment and ointment).
5. Doctrine of signature.
6. Posology (focus on basic principles; related aphorisms of organon of medicine).
7. Prescription (including abbreviations)
8. Concept of placebo.
9. Pharmaconomy - routes of homoeopathic drug administration.

10. Dispensing of medicines.

11. Basics of adverse drug reactions and pharmaco-vigilance

IV. Pharmacodynamics

1. Homoeopathic Pharmacodynamics

2. Drug Proving (related aphorisms 105 - 145 of organon of medicine) and merits and demerits of Drug Proving on Humans and Animals.

3. Pharmacological study of drugs listed in Appendix -A

V. Quality Control:

1. Standardisation of homoeopathic medicines, raw materials and finished products.

2. Good manufacturing practices; industrial pharmacy.

3. Homoeopathic pharmacopoeia laboratory - functions and activities, relating to quality control of drugs.

VI. Legislations pertaining to pharmacy:

1. The Drugs and Cosmetics Act, 1940 (23 of 1940) {in relation to Homoeopathy}

2. Drugs and Cosmetics Rules, 1945 {in relation to Homoeopathy}

3. Poisons Act, 1919 (12 of 1919)

4. The Narcotic Drugs and Psychotropic Substances Act, 1985 (61 of 1985)

5. Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954 (21 of 1954)

6. Medicinal and Toilet Preparations (Excise Duties) Act, 1955 (16 of 1955).

B. Practical:

Experiments

1. Estimation of size of globules.

2. Medication of globules and preparation, of doses with sugar of milk and distilled water.

3. Purity test of sugar of milk, distilled water and ethyl alcohol.

4. Determination of specific gravity of distilled water and ethyl alcohol.

5. Preparation of dispensing alcohol and dilute alcohol from strong alcohol.

6. Trituration of one drug each in decimal and centesimal scale.

7. Succussion in decimal scale from Mother Tincture to 6X potency.

8. Succussion in centesimal scale from Mother Tincture to 3C potency.

9. Conversion of Trituration to liquid potency: Decimal scale 6X to 8X potency.

10. Conversion of Trituration to liquid potency: Centesimal, scale 3C to 4C potency.

11. Preparation of 0/1 potency (LM scale) of 1 Drug.
12. Preparation of external applications - lotion, glycerol, liniment, ointment.
13. Laboratory methods - sublimation, distillation, decantation, filtration, crystallisation.
14. Writing of prescription.
15. Dispensing of medicines.
16. Process of taking minims.
17. Identification of drugs (listed in Appendix B)-
 - (i) Macroscopic and Microscopic characteristic of drug substances- minimum 05 drugs;
 - (ii) Microscopic study of Trituration of two drugs (up to 3X potency)
18. Estimation of moisture content using, water bath.
19. Preparation of mother tincture-maceration and percolation-
20. Collection of 30 drugs for herbarium.
21. Visit to homoeopathic pharmacopoeia laboratory and visit to a large scale manufacturing unit of homoeopathic medicines (GMP compliant). (Students shall keep detailed visit reports as per proforma at Annexure. 'B')

C. Demonstration

1. General instructions for practical or clinical in pharmacy.
2. Identification and use of homoeopathic pharmaceutical instruments and appliance and their cleaning.
3. Estimation of moisture content using water bath.
4. Preparation of mother tincture - maceration and percolation,

APPENDIX-A

List of drugs included in the syllabus of pharmacy for study of pharmacological action:-

1.	Aconitum napellus	2.	Adonis vernalis
3.	Allium-cepa	4.	Argentum nitricum
5.	Arsenicum album	6.	Atropa Belladonna
7.	Cactus grandiflorus	8.	Cantharis vesicatoria
9.	Cannabis indica	10.	Cannabis sativa
11.	Cinchona officinalis	12.	Coffea cruda
13.	Crataegus oxyacantha	14.	Crotalus horridus
15.	Gelsemium sempervirens	16.	Glonoinum
17.	Hydrastis canadensis	18.	Hyoscyamus niger
19.	Kali bichromicum	20.	Lachesis
21.	Lithium carbonicum	22.	Mercurius corrosivus
23.	Naja tripudians	24.	Nitricum acidum

25	Nux vomica	26	Pssifiora incarnata
27	Stannum metallicum	28	Stramonium
29	Symphytum officinale	30	Tabacum

APPENDIX - B

List of drugs for identification

I. Vegetable Kinngdom.

1	Aegle folia	2.	Anacardium orientale
3.	Andrographis paniculata	4.	Calendula officinalis
5.	Cassia sophera	6.	Cinchona officinalis
7.	Cocculus indicus	8.	Coffea cruda
9.	Colocythis	10.	Crocus sativa
11.	Croton tiglium	12.	Cynodon dactylon
13.	Ficus religiosa	14.	Holarrhena antidysenterica
15.	Hydrocotyle asiatica	16.	Justicia adhatoda
17.	Lobelia inflata	18.	Nux vomica
19	Ocimum sanctum	20.	Opium
21.	Rauwolfia serpentina	22.	Rheum
23	Saraca indica	24	Senna
25	Stramonium	26	Vinca minor

II. Chemicals or Minerals

1	Aceticum acidum	2.	Alumina
3.	Argentum metallicum	4.	Argentum nitricum
5.	Arsenicum album	6.	Calcarea carbonica
7.	Carbo vegetabilis	8.	Graphites
9.	Magnesium phosphorica	10.	Natrum muriaticum
11.	Sulphur		

III. Animal kingdom

1	Apis mellifica	2.	Blatta orientalis
3.	Formica rufa	4.	Sepia
5.	Tarentula cubensis		

Note:

1. Each student shall maintain practical or clinical record or journal and herbarium file separately.
2. College authority shall facilitate the students in maintaining record as per Appendix-C.

D. Examination:

1. Theory

1.1.	Number of papers - 01
1.2.	Marks: 100

3. Practical including viva voce or oral

2.1.		Marks100
2.2	Distribution of marks	
2.2.1	Experiments	15
2.2.2	Spotting	20
2.2.3	Maintenance of practical records or journal	10
2.2.4	Maintenance of herbarium record	05
2.2.5.	Viva Voce (oral)	50
	Total	100

ANATOMY

Instructions:

- I(a)** Instructions in anatomy should be so planned as to present a general working knowledge of the structure of the human body.
- (b)** The amount of detail which a student is required to memorize should be reduced to the minimum.
- (c)** Major emphasis should be laid on functional anatomy of the living subject rather than on the static structures of the cadaver, and on general anatomical positions and broad relations of the viscera, muscles, blood-vessels, nerves and lymphatic and Study of the cadaver is the only a mean to achieve this.
- (d)** Students should not be burdened with minute anatomical details which have no clinical significance.

II Though dissection of the entire body is essential for the preparation of the student of his clinical studies, the burden of dissection can be reduced and much saving of time can be effected, it considerable reduction of the amount of topographical details is made and the following points are kept in view:-

- (1) Only such details as have professional or general educational value for the medical student.
- (2) The purpose of dissection is to give the student an understanding of the body in relation to its function, and the dissection should be designed to achieve this goal.
- (3) Normal radiological anatomy may also form part of practical or clinical training and the structure of the body should be presented linking functional aspect.
- (4) Dissection should be preceded by a course of lectures on the general structure of the organ or the system under discussion and then its function. In this way anatomical and physiological knowledge can be presented to students in an integrated form and the instruction of the whole course of anatomy and physiology and more interesting, lively and practical or clinical.
- (5) A good part of the theoretical lectures on anatomy can be transferred to tutorial classes with the demonstrations.
- (6) Students should be able to identify anatomical specimens and structures displayed in the dissections.
- (7) Lectures or demonstrations on the clinical and applied anatomy should be arranged in the later part of the course and it should aim at demonstrating the anatomical basis of physical signs and the value of anatomical knowledge to the students.

- (8) Seminars and group discussions to be arranged periodically with a view of presenting these subjects in an integrated manner.
- (9) More stress on demonstrations and tutorials should be given. Emphasis should be laid down on the general anatomical positions and broad relations of the viscera, muscles, blood vessels, nerves and lymphatics.
- (10) There should be joint seminars with the departments of Physiology and Bio-chemistry which should be organised once a month.
- (11) There should be a close correlation in the teaching of gross Anatomy, Histology, Embryology and Genetics and the teaching of Anatomy, Physiology including Bio-Chemistry shall be integrated.

A. Theory

- a) A complete course of human anatomy with general working knowledge of different anatomical parts of the body.

The Curriculum includes the following namely:-

1. General Anatomy-

1.1	Modern concepts of cell and its components; cell division, types with their significance.
1.2	Tissues.
1.3	Genetics.

2. Development anatomy (Embryology):

2.1	Spermatogenesis	2.2	Oogenesis
2.3	Formation of germ layer	2.4	Development of embryonic disc
2.5	Placenta	2.6	Development of abdominal organs
2.7	Development of cardio vascular	2.8	Development of nervous system
2.9	Development of respiratory system	2.10	Development of body cavities
2.11	Development of uro-genital system		

3. Regional anatomy:

This will be taught under the following regions:-

3.1	Head, Neck and Face, Brain	3.2	Thorax
3.3	Abdomen	3.4	Upper and Lower Extremities
3.5	Special Senses		

Each of the above areas will cover:-

a)	Osteology	b)	Syndesmology (joints)
c)	Myology	d)	Angiology
e)	Neurology	f)	Splanchnology (viscera and organs)
g)	Surface anatomy	h)	Applied anatomy
i)	Radiographic anatomy		

4 Histology (Microanatomy):

B PRACTICAL

1. Dissection of the whole human body, Demonstration of dissected parts
2. Identification of histological slides related to tissues and organs.
3. Students shall maintain practical or clinical journals and dissection cards.

C Examination:

1. Theory:

The written papers in anatomy shall be in two papers, namely-

1.1 - Paper – I

a)	General Anatomy	b)	Head, Face
c)	Neck	d)	Central nervous system
e)	Upper Extremities	f)	General Embryology

1.2 - Paper – II

a)	Thorax	b)	abdomen
c)	Pelvis	d)	Lower Extremities
e)	Histology (micro-anatomy)	f)	Special Embryology.

2. The Practical including viva voce or oral examination includes the following:-

2.1.		Marks200
2.2	Distribution of marks	
2.2.1	Knowledge of dissected parts	20
2.2.2	Viscera	20
2.2.3	Bones	20
2.2.4	Surface Anatomy	10
2.2.5	Spotting (including Radiology and Histology)	20
2.2.6	Maintenance of Practical record or journal and dissection card	10
2.2.7	Viva Voce (Oral)	100
	Total	200

PHYSIOLOGY

Instructions:

- I (a) The purpose of a course in physiology is to teach the functions, processes and inter-relationship of the different organs and systems of the normal disturbance in disease and to equip the student with normal standards of reference for use while diagnosing and treating deviations from the normal.
- (b) To a Homoeopath the human organism is an integrated whole of body life and mind and though life includes all the chemico-physical processes it transcends them.
- (c) There can be no symptoms of disease without vital force animating the human organism and it is primarily the vital force which is deranged in disease.
- (d) Physiology shall be taught from the stand point of description physical processes underlying them in health.
- (e) Applied aspect of every system including the organs is to be stressed upon while teaching the subject.
- II (a) there should be close co-operation between the various departments while teaching the different systems.
- (b) There should be joint courses between the two departments of anatomy and physiology so that there is maximum co-ordination in the teaching of these subjects.
- (c) Seminars should be arranged periodically and lecturers of anatomy, physiology and bio-chemistry should bring home the point to the students that the integrated approach is more meaningful.

A. Theory:

The curriculum includes the following, namely:-

I. General physiology:

1. Introduction to cellular physiology
2. Cell Junctions
3. Transport through cell membrane and resting membrane potential
4. Body fluids compartments
5. Homeostasis

II. Body fluids:

1.	Blood	2.	Plasma Proteins
3.	Red Blood Cells	4.	Erythropoiesis
5.	Hemoglobin and Iron Metabolism	6.	Erythrocyte Sedimentation Rate
7.	Packed Cell Volume and Blood Indices	8.	Anemia
9.	Haemolysis and Fragility of Red Blood cell	10.	White Blood Cell'
11.	Immunity	12.	Platelets
13.	Haemostasis	14.	Coagulation of Blood
15.	Blood groups	16.	Blood Transfusion
17.	Blood volume	18.	Reticulo-endothelial System and Tissue Macrophage
19	Lymphatic System and Lymph	20	Tissue Fluid and Oedema

III. Cardio-vascular system:

1	Introduction to cardiovascular system	2	Properties of cardiac muscle
3	Cardiac cycle	4	General principles of circulation
5	Heart sounds	6	Regulation of cardiovascular system
7	Normal and abnormal Electrocardiogram (ECG)	8	Cardiac output
9	Heart rate	10	Arterial blood pressure
11	Radial Pulse	12	Cardiovascular adjustments during exercise
13	Regional circulation- Cerebral, Splanchnic, Capillary, Cutaneous & skeletal muscle circulation		

IV. Respiratory system and environmental physiology:

1	Physiological anatomy of respiratory tract	2	Mechanism of respiration; Ventilation, diffusion of gases
3	Transport of respiratory gases	4	Regulation of respiration
5	Pulmonary function tests	6	High altitude and space physiology
7	Deep sea physiology	8	Artificial respiration
9	Effects of exercise on respiration		

V. Digestive system.

1	Introduction to digestive system Physiological anatomy of Stomach,	2	Composition and functions of digestive juices
3	Pancreas, Liver and Gall bladder, Small intestine, Large intestine	4	Movements of gastrointestinal tract Digestion and absorption of
5	Gastrointestinal hormones	6	carbohydrates, proteins and lipids

VI. Renal physiology and skin:

1	Physiological anatomy of kidneys and urinary tract	2	Renal circulation
3	Urine formation: Renal clearance, glomerular filtration, tubular reabsorption, selective secretion, concentration of urine, acidification of urine	4	Renal function tests
5	Micturition	6	Skin
7	Sweat	8	Body temperature and its regulation

VII. Endocrinology

1	Introduction to endocrinology	2	Hormones and hypothalamo-hypophyseal axis
3	Pituitary gland	4	Thyroid gland
5	Parathyroid	6	Endocrine functions of pancreas
7	Adrenal cortex	8	Adrenal medulla
	Endocrine functions of other organs		

VIII. Reproductive system:

1	Male reproductive system- testis and its hormones; seminal vesicles, prostate gland, semen.	2	Introduction to female reproductive system
3	Menstrual cycle	4	Ovulation
5	Menopause	6	Infertility
7	Pregnancy and parturition	8	Placenta.
9	Pregnancy tests	10	Mammary glands and lactation
11	Fertility	12	Foetal circulation

IX Central nervous system:

1	Introduction to nervous system	2	Neuron
3	Neuroglia	4	Receptors
5	Synapse	6	Neurotransmitters
7	Reflex	8	Spinal cord
9	Somato-sensory system and somato-motor-system	10	Physiology of pain
11	Brainstem, Vestibular apparatus	12	Cerebral cortex
13	Thalamus	14	Hypothalamus
15	Internal Capsule	16	Basal ganglia
17	Limbic System	18	Cerebellum — Posture and equilibrium
19	Reticular information	20	Proprioceptors
21	Higher intellectual function	22	Electroencephalogram (EEG)
23	Physiology of sleep	24	Cerebro-spinal fluid (CSF)
25	Autonomic Nervous System (ANS)		

X. Special senses:

Eye: Photochemistry of vision, Visual pathway Pupillary reflexes, Colour vision, Errors of refraction

1	Ear: Auditory pathway, Mechanism of hearing, Auditory defects	2	Sensation of smell: Olfactory receptors, olfactory pathways
3	Sensation of taste : Taste receptors, Taste pathways	4	Sensation of touch

XI. Nerve muscle physiology:

1	Physiological properties of nerve fibres	2	Nerve fibre- types, classification, function, Degeneration and regeneration of peripheral nerves
3	Neuro-Muscular junction	4	Physiology of Skeletal muscle
5	Physiology of Cardiac muscle	6	Physiology of Smooth muscle
7	EMG and disorders of skeletal muscles	8	

Bio-physical sciences

1	Filtration	2	Ultra filtration
3	Osmosis	4	Diffusion
5	Adsorption	6	Hydrotropy
7	Colloid	8	Donnan Equilibrium
9	Tracer elements	10	Dialysis
11	Absorption	12	Assimilation
13	Surface tension		

B. Practical:

I. Haematology:

1	Study of the Compound Microscope	2	Introduction to Haematology
3	Collection of Blood samples	4	Estimation of Haemoglobin Concentration
5	Determination of Haematocrit	6	Haemocytometry
7	Total RBC count	8	Determination of RBC indices
9	Total Leucocytes Count (TLC)	10	Preparation and examination of Blood Smear
11	Differential Leucocyte Count (DLC)	12	Absolute Eosinophil Count
13	Determination of Erythrocyte Sedimentation Rate	14	Determination of Blood Groups
15	Osmotic fragility of Red cells	16	Determination of Bleeding Time and Coagulation Time
17	Platelet Count	18	Reticulocyte Count

1. Human experiments:

1	General Examination	2.	Respiratory System- Clinical examination, Spirometry, Stethography
2	Gastrointestinal System-Clinical examination	4	Cardiovascular System- Blood pressure recording, Radial pulse, ECG, Clinical examination
5	Nerve and Muscle Physiology-Mosso's Ergography, Handgrip Dynamometer	6	Nervous System- Clinical examination
7	Special Senses- Clinical examination	8	Reproductive System-Diagnosis of pregnancy

BIO-CHEMISTRY

A. Theory:

Carbohydrates:	Chemistry, Metabolism, Glycolysis, TCA, HMP, Glycogen synthesis and degradation, Blood glucose regulation.
Lipids:	Chemistry, Metabolism, Intestinal uptake, Fat transport, Utilisation of stored fat, Activation of fatty acids, Beta oxidation and synthesis of fatty acids
Proteins:	Chemistry, Metabolism, Digestion of protein, Transamination, Deamination, Fate of Ammonia, Urea cycle, End products of each ammo acid and their entry into TCA cycle
Enzymes:	Definition, Classification, Biological Importance, Diagnostic use, Inhibition
Vitamins:	Daily requirements, Dietary source, Disorders and physiological role
Minerals	Daily requirement, Dietary Sources, Disorders and physiological role
Organ function tests	Tests and interpretation

B. Practical:

1	Demonstration of uses of instruments or equipment
2	Qualitative analysis of carbohydrates, proteins and lipids
3	Normal, characteristics of urine
4	Abnormal constituents of urine
5	Quantitative estimation of glucose, total proteins, uric acid in blood
6	Liver function tests
7	Kidney function tests
8	Lipid profile
9	Interpretation and discussion of results of biochemical tests.

C. Examination:

1. Theory:

(1) No. of Papers-02

(2) Marks: Total marks: 200; Paper I- 100
Paper II- 100

1.1. Contents:

1.1.1. Paper-I:

a)	General Physiology	b)	Biophysics
c)	Body fluids	d)	Cardiovascular system
e)	Reticuloendothelial system	f)	Respiratory system
g)	Excretory system	h)	Regulation of body temperature
i)	Skin	j)	Nerve Muscle physiology

1.1.2. Paper-II:

a)	Endocrine system	b)	Central Nervous System
c)	Digestive system and metabolism	d)	Reproductive system
e)	Sense organs	f)	Biochemistry
g)	Nutrition		

2. Practical Including viva voce or oral:

2.1.	Practical and viva voce	Marks 200
2.2	Distribution of marks	
2.2.1	Experiments	50
2.2.2	Spotting	30
2.2.3	Maintenance of Practical record/Journal	20
2.2.4	Viva Voce (Oral)	100
	Total	200

HOMOEOPATHIC MATERIA MEDICA

Instructions:

- I (a) Homoeopathic Materia Medica is differently constructed as compared to other Materia Medicas;
- (b) Homoeopathy considers that study of the action of drugs on individual parts or systems of the body or on animal or their isolated organs is only a partial study of life processes under such action and that it does not lead us to a full appreciation of the action of the medicinal substance, the drug substance as a whole is lost sight of.
- II Essential and complete knowledge of the drug action as a whole can be ascertained only by qualitative drug proving on healthy persons and this alone can make it possible to elicit all the symptoms of a drug with reference to the psychosomatic whole of a person and it is just such a person as a whole to whom the knowledge of drug action is to be applied.
- III (a) The Homoeopathic Materia Medica consists of a schematic arrangement of symptoms produced by each drug. Incorporating no theories for explanations about their interpretation or inter-relationship;
- (b) Each drug should be studied synthetically, analytically and comparatively, and this alone would enable a Homoeopathic student to study each drug individually and as a whole and help him to be a good prescriber.
- IV (a) The most commonly indicated drugs for day to day ailments should be taken up first so that in the clinical classes or outdoor duties the students become familiar with their applications and they should be thoroughly dealt with explaining all comparisons and relationship;
- (b) Students should be conversant with their sphere of action and family relationships and the rarely used drugs should be taught in outline, emphasizing only their most salient features and symptoms.
- V Tutorials must be introduced so that students in small numbers can be in close touch with teachers and can be helped to study and understand Materia Medica in relation to its application in the treatment of the sick.
- VI (a) While teaching therapeutics an attempt should be made to recall the Materia Medica so that indications for drugs in a clinical condition can directly flow out from the proving of the drugs concerned.
- (b) The student should be encouraged to apply the resources of the vast Materia Medica in any sickness and not limit himself to memorize few drugs for a particular disease and this Hahnemannian approach will not only help, him in understanding the proper perspective of symptoms as applied and their curative value in sickness but will even lighten his burden as far as formal examinations are concerned.
- (c) Application of Materia Medica should be demonstrated from case-records in the outdoor; and the indoor.
- (d) Lectures on comparative Materia Medica and therapeutics as well as tutorials should be integrated with lectures on clinical medicine.
- VII For the teaching of drugs, the department should keep herbarium sheets and other specimens for demonstrations to the students and audio-visual material shall be used for teaching and training purposes.

- VIII (a) There is a large number of Homoeopathic medicines used today and much more medicines are being experimented and proved at present and more will be added in future and some very commonly used Homoeopathic medicines are included in this curriculum for detailed study.
- (b) It is essential that at the end of this course each student should gain basic and sufficient knowledge of "How to study Homoeopathic Materia Medica" and to achieve this objective basic and general topic of Materia Medica should be taught in detail during this curriculum, general topics should be taught in all the classes.
- (c) The medicines are to be taught under the following headings, namely:-
- (1) Common name, family, habitat, parts used, preparation, constituents (of source material)
 - (2) Proving data
 - (3) Sphere of action.
 - (4) Symptomatology of the medicine emphasizing the characteristic symptoms (mental, physical generals and particulars including sensations, modalities and concomitants) and constitution.
 - (5) Comparative study of medicines.
 - (6) Therapeutic applications (applied Materia Medica).

FIRST B.H.M.S.

A. Theory:

General topics of Materia Medica (including introductory lectures) :-

(a) Basic Materia Medica -

1. Basic concept of Materia Medica
2. Basic construction of various Materia Medicas
3. Definition of Materia Medica

(b) Homoeopathic Materia Medica

1. Definition of Homoeopathic Materia Medica
2. Basic concept and construction of Homoeopathic Materia Medica.
3. Classification of Homoeopathic Materia Medica.
4. Sources of Homoeopathic Materia Medica.
5. Scope and Limitations of Homoeopathic Materia Medica.

Note: There shall be no examination in First B.H.M.S.

SECOND B.H.M.S.

A. Theory:

(a) In addition to syllabus of First B.H.M.S. Course, following shall be taught, namely: -

- (i) Science and philosophy of Homoeopathic Materia Medica.
- (ii) Different ways of studying Homoeopathic materia medica (e.g. psycho-clinical, pathological, physiological, synthetic, comparative, analytical, remedy relationships, group study, portrait study etc.)
- (iii) Scope and limitations of Homoeopathic materia medica.
- (iv) Concordance or remedy relationships.
- (v) Comparative Homoeopathic materia medica, namely:-
Comparative study of symptoms, drug pictures, drug relationships,
- (vi) Theory of Biochemic system of medicine, its history, concepts and principles; according to Dr. Wilhelm Heinrich Schuessler. Study of 12 Biochemic medicines, (tissue remedies).

(b) Homoeopathic Medicines to be taught in Second B.H.M.S as per Appendix -I.

APPENDIX-I

1.	Aconitum napellus	26.	Dulcamara
2.	Aethusa cynapium	27.	Euphrasia
3.	Allium cepa	28.	Ferrum Phosphoricum
4.	Aloe socotrina	29.	Gelsemium
5.	Antimonium crudum	30.	Hepar sulph
6.	Antimonium tartaricum	31.	Hypericum perforatum
7.	Apis mellifica	32.	Ipecacuanha
8.	Argentum nitricum	33.	Kali muriaticum
9.	Arnica montana	34.	Kali phosphoricum
10.	Arsenicum album	35.	Kali sulphuricum
11.	Arum triphyllum	36.	Ledum palustre
12.	Baptisia tinctoria	37.	Lycopodium clavatum
13.	Bellis perennis	38.	Magnesium phosphoricum
14.	Bryonia alba	39.	Natrum muriaticum
15.	Calcarea carbonica	40.	Natrum phosphoricum
16.	Calcarea fluorica	41.	Natrum sulphuricum
17.	Calcarea phosphoric	42.	Nux vomica
18.	Calcarea sulphurica	43.	Pulsatilla
19.	Calendula officinalis	44.	Rhus toxicodendron
20.	Chamomilla	45.	Ruta graveolens
21.	Cina	46.	Silicea
22.	Cinchona officinalis.	47.	Spongia tosta
23.	Colchicum autumnale	48.	Sulphur
24.	Colocyntis	49.	Symphytum officinale
25.	Drosera	50.	Thuja occidentalis

B: Practical or clinical:

This will cover,-

- (i) Case taking of acute and chronic patients.
- (ii) Case processing including totality of symptoms, selection of medicine, potency and repetition schedule

Each student shall maintain practical record or journal with record of five cases.

C. Examination:

The syllabus covered in First BHMS and Second BHMS course are the following, namely:-

1. Theory:

1.1.	Number of papers- 01	
1.2.	Marks: 100	
1.3.	Distribution of marks	
1.3.1.	Topics of I B.H.M.S.	50 Marks
1.3.2.	Topics of II B.H.M.S.	50 Marks

2. Practical including viva voce or oral

2.1.		Marks100
2.2	Distribution of marks	
2.2.1	Case taking and Case processing of one long case	30
2.2.2	Case taking of one short Case	10
2.2.3	Maintenance of Practical record or journal	10
2.2.4	Viva Voce (oral)	50
	Total	100

THIRD B.H.M.S

In addition to the syllabus of First and Second B.H.M.S. including the use of medicines for Second BHMS (Appendix-I), the following additional topics and medicines, are included in the syllabus of Homoeopathic materia medica for the Third B.H.M.S examination.

A. General Topics of Homoeopathic Materia Medica-

In addition to the syllabus of First and Second B.H.M.S. including the use of medicines, for Second BHMS (Appendix-I), the following additional topics and medicines are included in the syllabus of Homoeopathic Materia Medica for the Third B.H.M.S. Examination.

(a) Concept of Nosodes - definition of nosodes, types of nosodes, general indications of Nosodes.

(b) Concepts of constitution, temperaments, diathesis-

Definitions, various concepts of constitution with their peculiar characteristics, importance of constitution, temperaments and diathesis and their utility in treatment of patients.

B. Concept of mother tincture.

C. Homoeopathic medicines to be taught in Third B.H.M.S. as in Appendix-II

APPENDIX-II

1.	Acetic acid	40.	Graphites
2.	Actea spicata	41.	Helleborus niger
3.	Agaricus muscarius	42.	Hyoscyamus niger
4.	Agnus castus	43.	Ignatia amara
5.	Alumina	44.	Kali bichromicum
6.	Ambra grisea	45.	Kali bromatum
7.	Ammonium carbonicum	46.	Kali carbonicum
8.	Ammonium muriaticum	47.	Kreosotum
9.	Anacardium orientale	48.	Lachesis muta
10.	Apocynum cannabinum	49.	Moschus
11.	Arsenicum Iodatum	50.	Murex purpurea
12.	Asafoetida	51.	Muriatic acid
13.	Aurum metallicum	52.	Naja tripudians
14.	Baryta carbonica	53.	Natrum carbonicum
15.	Belladonna.	54.	Nitric acid
16.	Benzoic acid	55.	Nux moschata
17.	Berberis vulgaris	56.	Opium
18.	Bismuth	57.	Oxalic acid
19.	Borax	58.	Petroleum
20.	Bovista Iycoperdon	59.	Phosphoric acid
21.	Bromium	60.	Phosphorus
22.	Bufo rana	61.	Phytolacca decandra
23.	Cactus grandiflorus	62.	Picric acid
24.	Caladium seguinum	63.	Platinum metallicum

25.	Calcarea arsenicosa	64.	Podophyllum
26.	Camphora	65.	Secale cornutum
27.	Cannabis indica	66.	Selenium
28.	Cannabis sativa	67.	Sepia
29.	Cantharis vesicatoria	68.	Staphysagria
30.	Carbo vegetabilis	69.	Stramonium
31.	Chelidonium majus	70.	Sulphuric acid
32.	Conium maculatum	71.	Syphilinum
33.	Crotalus horridus	72.	Tabacum
34.	Croton tiglium	73.	Taraxacum officinale
35.	Cyclamen europaeum	74.	Tarentula cubensis
36.	Digitalis purpurea	75.	Terebinthina
37.	Dioscorea villosa	76.	Theridion
38.	Equisetum hyemale	77.	Thlaspi bursa pastoris
39.	Ferrum metallicum	78.	Veratrum album

Sr.No	Group studies
1	Acid group
2	Carbon group
3	Kali group
4	Ophidia group
5	Mercurius group
6	Spider group

D. Practical or clinical:

(1) This will cover,-

(a) Case taking of acute and chronic patients.

(b) Case processing including selection of medicine, potency and repetition schedule

(2) Each student shall maintain a journal having record, of ten (10) case takings.

E. Examination

1. Theory:

1.1.	Number of papers- 01
1.2.	Marks: 100
1.3.	Distribution of marks:
1.3.1.	Topics of Second B.H.M.S. - 50Marks
1.3.2.	Topics of Third B.H.M.S. - 50 Marks

2. Practical including viva voce or oral:

2.1.		Marks100
2.2	Distribution of marks	
2.2.1	Case taking and Case processing of one long case	30
2.2.2	Case taking of one short Case	10
2.2.3	Maintenance of Practical record or journal	10
2.2.4	Viva Voce (oral)	50
	Total	100

FOURTH B.H.M.S.

In addition to the syllabus of First, Second and. Third BHMS including the medicines taught as per the Appendices I and II, the following additional topics and medicines are included in the syllabus for the Fourth BHMS examination.

A. General topics of Homoeopathic materia medica - Sarcodes - definition and general indications.

B. Medicines indicated in Appendix-III shall be taught in relation to the medicines of -Appendices-I and II for comparison wherever required.

APPENDIX-III.

1.	Abies canadensis	62.	Capsicum
2.	Abies nigra	63.	Cedron
3.	Carbo animalis	64.	Eupatorium perfoliatum
4.	Carbolic acid	65.	Abroma augusta
5.	Condurango	66.	Calotropis gigantea
6.	Fluoricum acidum	67.	Carica papaya
7.	Hydrastis canadensis	68.	Cassia sophera
8.	Raphanus sativus.	69.	Ficus religiosa
9.	Magnesia carbonica	70.	Jonosia asoca
10.	Magnesia muriatica	71.	Justicia adhatoda
11.	Anthracinum	72.	Ocimum sanctum
12.	Bacillinum:	73.	Syzigium jambolanum
13.	Lac caninum	74.	Ratanhia peruviana
14.	Lac defloratum	75.	Collinsonia canadensis
15.	Lyssin	76.	Antimonium arsenicosum
16.	Medorrhinum	77.	Sticta pulmonaria
17.	Psorinum	78.	Asterias rubens
18.	Pyrogenium	79.	Iodium
19.	Vaccinium	80.	Thyroidinum
20.	Variolinum	81.	Argentum metallicum
21.	Hydrocotyle asiatica	82.	Cuprum metallicum
22.	Mezereum	83.	Plumbum metallicum
23.	Radium bromatum	84.	Zincum metallicum
24.	Urtica urens	85.	Adonis vernalis
25.	Vinca minor	86.	Kalmia latifolia
26.	Abrotanum	87.	Physostigma venenosum
27.	Rheum palmatum	88.	Mercurius corrosivus
28.	Sanicula aqua	89.	Mercurius cyanatus
29.	Acalypha indica	90.	Mercurius dulcis
30.	Corallium rubrum	91.	Mercurius solubilis
31.	Lobelia inflata	92.	Mercurius sulphuricus
32.	Mephitis putorius	93.	Causticum
33.	Rumex crispus	94.	Bacillus No, 7
34.	Sabadilla officinalis	95.	Dysentery co
35.	Sambucus nigra	96.	Gaertner
36.	Squilla maritima	97.	Morgan pure
37.	Baryta muriatica	98.	Morgan gaertner
38.	Crataegus oxyacantha	99.	Proteus bacillus

39.	Lithium carbonicum	100.	Sycotic bacillus
40.	Rauwolfia serpentina	Additional medicines	
41.	Caulophyllum	101.	Aesculus hippocastanum
42.	Cocculus indicus	102.	Adrenalinum
43.	Crocus sativus	103.	Artemesia vulgaris
44.	Helonias dioica	104.	Avena sativa
45.	Lilium tigrinum	105.	Blatta orientalis
46.	Sabina	106.	Carcinosin
47.	Trillium pendulum	107.	Carduus marianus
48.	Viburnum opulus	108.	Ceanothus
49.	Cicuta virosa	109.	Chininum arsenicosum
50.	Ranunculus bulbosus	110.	Cholesterinum
51.	Rhododendron chrysanthum	111.	Coca erythroxyton
52.	Clematis erecta	112.	Diphtherinum
53.	Sabal serrulata	113.	Erigeron canadensis
54.	Sarsaparilla officinalis	114.	Malandrinum
55.	Coffea cruda	115.	Menyanthes
56.	Glonoine	116.	Onosmodium
57.	Melilotus	117.	Passiflora incarnata
58.	Millefolium	118.	Ustilago maydis
59.	Sanguinaria canadensis	119.	Stannum metallicum
60.	Spigelia	120.	Valeriana officinalis
61.	Veratrum viride	121.	X-ray

Sr. No.	Group studies
1.	Baryta group
2.	Calcarea group
3.	Magnesia group
4.	Natrum group
5.	Compositae family
6.	Ranunculaceae family
7.	Solonaceae family

C. Practical or clinical:

Each student shall maintain a journal having record of ten (10) acute and ten(10) chronic case takings,

D. Examination:

1. Theory:

1.1.	Number of papers-02
2.1	Marks: 200
2.1.1	Distribution of marks:
2.1.2	Paper-I: Topics of First, Second and Third B.H.M.S. - 100 Marks
2.1.3	Paper-II Topics of IV B.H.M.S. - 100 Marks

2. Practical including viva voce or oral:

2.1.		Marks 200
2.2	Distribution of marks	
2.2.1	Case taking and Case processing of one long case	60
2.2.2	Case taking of one short Case	20
2.2.3	Maintenance of Practical record or journal	20
2.2.4	Viva Voce (oral)	100
	Total	200

ORGANON OF MEDICINE WITH HOMOEOPATHIC PHILOSOPHY

Instructions for all classes from Ist BHMS to IVth BHMS.

- I(a) Organon of Medicine with Homoeopathic Philosophy is a vital subject which builds up the conceptual base of the physician.
- (b) It illustrates those principles which when applied in practice enable the physician to achieve results, which he can gain logically and rationally in medical practice with greater competence.
- (c) Focus of the education and training should be to build up the conceptual base of Homoeopathic Philosophy for use in medical practice.
- II Homoeopathy should be taught as a complete system of medicine with logical rationality of its holistic, individualistic and dynamistic approach to life, health, disease, remedy and cure and in order to achieve this, integration in the study of logic, psychology and the fundamentals of Homoeopathy becomes necessary.
- III (a) It is imperative to have clear grasp of inductive and deductive' logic, and its application and understanding of the fundamentals of Homoeopathy
- (b) Homoeopathic approach in therapeutics is a holistic approach and it demands a comprehension of patient as a person, disposition, state of his mind and body, along with the study of the disease process and its causes.
- (c) Since Homoeopathy lays great emphasis on knowing the mind, preliminary and basic knowledge of the psychology becomes imperative for a homoeopathic physician and introduction to psychology will assist the student in building up his conceptual base in this direction.
- IV The department of Organon of medicine shall co-ordinate with other departments where students are sent for the pre-clinical and clinical training and this will not only facilitate integration with other related departments, but also enhance the confidence of / the students when they will be attending specialty clinics.

ORGANON OF MEDICINE WITH HOMOEOPATHIC PHILOSOPHY

FIRST B.H.M.S.

Instructions I to IV to be followed

A. Theory:

1. Introductory lectures

- 1.1. Evolution of medical practice of the ancients (Prehistoric Medicine, Greek Medicine, Chinese medicine, Hindu medicine and Renaissance) and tracing the empirical, rationalistic and vitalistic thoughts.
- 1.2. Short history of Hahnemann's life, his contributions, and discovery of Homoeopathy, situation leading to discovery of Homoeopathy
- 1.3. Brief life history and contributions of early pioneers of homoeopathy like C.V. Boenninghausen, J.T. Kent, C. Hering, Rajendra Lai Dutta, M.L. Sircar
- 1.4. History and Development of Homoeopathy in India, U.S.A. and European countries
- 1.5. Fundamental Principles of Homoeopathy.
- 1.6. Basic concept of:
 - 1.6.1. Health: Hahnemann's concept and modern concept.
 - 1.6.2. Disease: Hahnemann's concept and modern concept.
 - 1.6.3. Cure.
- 1.7. Different editions and constructions of Hahnemann's Organon of Medicine.

2. Logic

To understand Organon of medicine and homoeopathic philosophy, it is essential to be acquainted with the basics of LOGIC to grasp inductive and deductive reasonings.

Preliminary lectures on inductive and deductive logic (with reference to philosophy book of Stuart Close Chapter 3 and 16).

3. Psychology

3.1.	Basics of Psychology
3.2.	Study of behavior and intelligence.
3.3.	Basic concepts of Sensations
3.4.	Emotion, Motivation, Personality, Anxiety, Conflict, Frustration, Depression, Fear, Psychosomatic Manifestations
3.5.	Dreams.

4. Aphorisms 1 to 28 of Organon of medicine

5. Homoeopathic 'Prophylaxis

B. Examination: There shall be no examination in the subject in First B.H.M.S.

ORGANON OF MEDICINE WITH HOMOEOPATHIC PHYSIOPHY

SECOND B.H.M.S.

Instructions I to IV to be followed

A.Theory

1. Aphorisms 29-104 including foot notes of Organon Medicine(5 & 6thEditions translated by R.E. Dudgeon and W. Boericke)
2. Homoeopathic philosophy
 - 2.1. Chapters of Philosophy books of J.T. Kent (Chapters 1 to 17, 23 to 27, 31 to 33), Stuart Close (Chapters- 8, 9, 11, 12) and H.A. Roberts (Chapters 3, 4, 5, 6, 8, 9, 11, 17, 18, 19, 20) related to Aphorisms 29-104 of Organon of Medicine
 - 2.2. Symptomatology:
Details regarding Symptomatology are to be comprehended by referring to the relevant aphorisms of organon of medicine and chapters of the books on homoeopathic philosophy
 - 2.3. Causations:
Thorough comprehension of the evolution of disease, taking into account pre-disposing, exciting and maintaining causes.
 - 2.4. Case taking
The purpose of homoeopathic case taking is not merely collection of the disease symptoms from the patient, but comprehending the patient as a whole with the correct appreciation of the factors responsible for the genesis and maintenance of illness. Hahnemann's concept and method of case taking, as stated in his Organon of Medicine is to be stressed upon
 - 2.5. Case processing: This includes,
 - (i) Analysis of Symptoms,
 - (ii) Evaluation of Symptoms,
 - (iii) Miasmatic diagnosis,
 - (iv) Totality of symptoms

B. Practical or clinical:

1. Clinical posting of students shall be started from Second B.H.M.S onwards.
2. Each student shall maintain case records of at least ten acute cases

C. Examination:

1. Theory

1.1.	No. of papers -01
1.2.	Marks; 100
1.3.	Distribution of marks:
1.3.1.	Logic-15 marks
1.3.2.	Psychology-15 marks
1.3.3.	Fundamentals of homoeopathy and aphorisms 1 to 104 - 50 marks
1.3.4.	Homoeopathic philosophy- 20 marks

2. Practical including viva voce or oral:

2.1.		Marks100
2.2	Distribution of marks	
2.2.1	Case taking and Case processing	40
2.2.2	Maintenance of practical record or journal	10
2.2.4	Viva voce (oral)	50
2.2.4	Total	100

ORGANON OF MEDICINE WITH HOMOEOPATHIC PHILOSOPHY

THIRD B.H.M.S.

Instructions I to IV to be followed

A. Theory:

In addition to revision of Aphorisms studied in First B.H.M.S and Second B.H.M.S, the following shall be covered, namely:-

1. Hahnemann's Prefaces and Introduction to Organon of Medicine.
2. Aphorisms 105 to 294 of Hahnemann's Organon of Medicine, including foot notes (5th and 6th Editions translated by R.E. Dudgeon and W. Boericke)
3. Chapters of Philosophy books of J.T. Kent (Chapters- 28,29; 30, 34to37), Stuart Close (Chapters- 7,10,13,14,15) & H.A. Roberts (Chapters- 7,10,12 to 19,21, 34) related to 105-294 Aphorisms of Organon of Medicine.

B. Practical or clinical:

Each student appearing for Third B H.MS examination shall maintain records of 20 cases (10 acute and 10 chronic cases).

C. Examination:

1. Theory:

1.1.	Number of papers - 01
1.2.	Marks: 100
1.3.	Distribution of Marks:
1.3.1.	Aphorisms 1 to 294 60 marks
1.3.2.	Homoeopathic philosophy: 40 marks

3. Practical including viva voce or oral:

2.1.		Marks100
2.2	Distribution of marks	
2.2.1	Case taking and Case processing	40
2.2.2	Maintenance of practical record or journal	10
2.2.4	Viva voce (oral)	50
2.2.4	Total	100

ORGANON OF MEDICINE WITH HOMOEOPATHIC PHILOSOPHY

FOURTH B.H.M.S.

Instructions I to IV to be followed

A. Theory:

In addition to the syllabus of First B.H.M.S, Second B.H.M.S and Third B.H.M.S, the following shall be covered, namely:-

1. Evolution of medical practice of the ancients (Prehistoric Medicine, Greek Medicine, Chinese medicine, Hindu medicine and Renaissance) and tracing the empirical, rationalistic and vitalistic thoughts
2. Revision of Hahnemann's Organon of Medicine (Aphorisms 1-294) including footnotes (5th & 6th Editions translated by R.E. Dudgeon and W. Boericke).
3. Homoeopathic Philosophy
Philosophy books of Stuart Close (Chapters- 1, 2, 4, 5, 6, 8, 17), J.T. Kent (Chapters - 18 to 22) and H.A. Roberts (Chapters- 1 to 5, 20, 22 to 33, 35), Richard Hughes (Chapters-1 to 10) and C. Dunham (Chapters- 1 to 7).
4. Chronic Diseases:
 - 4.1. Hahnemann's Theory of Chronic Diseases.
 - 4.2. J.H. Allen's The Chronic Miasms - Psora and Pseudo-psora, Sycosis
 - (a) Emphasis should be given on the way in which each miasmatic state evolves and the characteristic expressions are manifested at various levels and attempt should be made to impart a clear understanding of Hahnemann's theory of chronic miasms.
 - (b) The characteristics of the miasms need to be explained in the light of knowledge acquired from different branches of medicine
 - (c) Teacher should explain clearly therapeutic implications of theory of chronic miasms in practice and this will entail a comprehension of evolution of natural disease from miasmatic angle, and it shall be-correlated with applied Materia Medica

B. Practical or clinical

- (a) The students shall maintain practical records of patients treated in the Out Patient Department and In Patient Department of the attached hospital.
- (b) The following shall be stressed upon in the case records, namely:
 - (1) receiving the case properly (case taking) without distortion of the of patient's expressions.
 - (2) nosological diagnosis.

- (3) analysis and evaluation of the symptoms, miasmatic diagnosis and portraying the totality of symptoms.
- (4) Individualisation of the case for determination of the similimum, prognosis, general management including diet and necessary restrictions on mode of life of the individual patients.
- (5) State of susceptibility to formulate comprehensive plan of treatment.
- (6) Order of evaluation of the characteristic features of the case would become stepping stone for the repertorial totality.
- (7) remedy selection and Posology.
- (8) Second prescription.

Note; (1) Each student has to maintain records of twenty thoroughly worked out cases (ten chronic and ten acute cases).

(2) Each student shall present at least one case in the departmental symposium or seminar.

C. Examination:

1. Theory

1.1.	Number of papers - 02
1.2.	Marks: Paper I: 100, Paper II: 100
1.3.	Distribution of marks:
	Paper I: Aphorisms 1-145:- 30 marks
	Aphorisms 146-294:- 70 marks
	Paper II; Chronic diseases - 50 marks
	Homoeopathic philosophy - 50 marks

2. Practical including viva voce or oral:

2.1.		Marks100
2.2	Distribution of marks	
2.2.1	Case taking and case processing of a long case	30
2.2.2	Case taking and case processing of a short case	10
2.2.3	Maintenance, of practical record, or journal	10
2.2.4	Viva Voce (oral)	50
	Total	100

PATHOLOGY

Instructions:

- I (a) Pathology and microbiology shall be taught in relation to the concept of miasms as evolved by Samuel Hahnemann and further developed by JT Kent, H.A. Robert, J.H. Allen and other stalwarts, with due reference to Koch's postulate, correlation with immunity, susceptibility and thereby emphasizing homoeopathic concept of evolution of disease and cure
- (b) Focus will be given on the, following points, namely: -
- (1) Pathology in relation with Homoeopathic Materia Medica.
 - (2) Correlation of miasms and pathology.
 - (3) Characteristic expressions of each miasm.
 - (4) Classification of symptoms and diseases according to pathology.
 - (5) Pathological findings of diseases, their interpretation, correlation and usage in the management of patients under homoeopathic treatment.
- (c) To summarise, all the topics in the general and systemic pathology and microbiology should be correlated each juncture, with homoeopathic principles so that the importance, of pathology in Homoeopathic system could be understood by the students.

A. Theory:

(a) General Pathology

1.	Cell Injury and cellular adaptation	15.	Regeneration
2.	Inflammation and repair (Healing).	16.	Hyperemia
3.	Immunity	17.	Infection
4.	Degeneration	18.	Pyrexia
5.	Thrombosis and embolism	19.	Necrosis
6.	Oedema	20.	Gangrene
7.	Disorders of metabolism	21.	Infarction
8.	Hyperplasia and hypertrophy	22.	Amyloidosis
9.	Anaplasia	23.	Hyperlipidaemia and lipidosis
10.	Metaplasia	24.	Disorders of pigmentation
11.	Ischaemia	25.	Neoplasia (Definition, variation in cell growth, nomenclature and taxonomy, characteristics of neoplastic cells, aetiology and pathogenesis, grading and staging, diagnostic approaches, interrelationship of tumor and host, course and management).
12.	Hemorrhage	26.	Calcification
13.	Shock	27.	Effects of radiation
14.	Atrophy	28.	Hospital infection

(b) Systemic pathology

In each system, the important and common diseases should be taught, keeping in view their evolution, aetio-pathogenesis, mode of presentation, progress and prognosis, namely:-

1. Mal-nutrition and deficiency diseases.
2. Diseases of Cardiovascular system
3. Diseases of blood vessels and lymphatics.
4. Diseases of kidney and lower urinary tract
5. Diseases of male reproductive system and prostate.
6. Diseases of the female genitalia and breast.
7. Diseases of eye, ENT and neck
8. Diseases of the respiratory system.
9. Diseases of the oral cavity and salivary glands.
10. Diseases of the G.I. system
11. Diseases of liver, gall bladder, and biliary ducts
12. Diseases of the pancreas (including diabetes mellitus)
13. Diseases of the haemopoetic system, bone marrow and blood
14. Diseases of glands-thymus, pituitary, thyroid, and parathyroid, adrenals, parotid.
15. Diseases of the skin and soft tissue.
16. Diseases of the musculo-skeletal system.
17. Diseases of the nervous system.
18. Leprosy

(c) Microbiology

(I) General Topics:

1. Introduction.
2. History and scope of medical microbiology.
3. Normal bacterial flora
4. Pathogenicity of micro-organisms
5. Diagnostic microbiology

(II) Immunology:

1. Development of immune system
2. The innate immune system
3. Non-specific defense of the host
4. Acquired immunity
5. Cells of immune system, T cells and cell mediated immunity; B cells and Humoral immunity.
6. The complement system.
7. Antigen, Antibody, Antigen - Antibody reactions (Anaphylactic and Atopic), Drug Allergies

8. Hypersensitivity
9. Immuno-deficiency.
10. Auto-immunity
11. Transplantation
12. Blood group antigens
13. Clinical aspect of immune-pathology.

(III) Bacteriology:

1. Bacterial structure, growth and metabolism.
2. Bacterial genetics and bacteriophage
3. Identification and cultivation of bacteria
4. Gram positive aerobic and facultative anaerobic cocci, e.g. Streptococci, Pneumococci.
5. Gram positive anaerobic cocci, e.g. peptostreptococci.
6. Gram negative aerobic cocci, e.g. neisseria, moraxella, kingella.
7. Gram positive aerobic bacilli, e.g. corynebacterium, bacillus anthrax, cereus subtitis, mycobacterium tuberculosis, M. leprae, actinomycetes; nocardia, organism of enterobacteriac group.
8. Gram positive anaerobic bacilli, e.g. genus clostridium, lactobacillus.
9. Gram negative anaerobic bacilli, e.g. bacteroides, fragilus, fusobacterium.
10. Others like- cholerae vibrio, spirochaetes, leptospirae, mycoplasma, chlamydiae, rickettsiae, yersinia and pasturella.

(IV) Fungi and Parasites:

1. Fungi -(1) True pathogens (cutaneous, sub-cutaneous and systemic infective agents), (2) Opportunistic pathogens.
2. Protozoa - (1) Intestinal (Entamoebahistoltylica, Giardia lamblia, Cryptosporidiumparvum), (2) Urogenital (Trichomonasvaginaiis) 3) Blood and Tissues (Plasmodium -species, Toxoplasma gondii, Trypanosoma species, Ieishmania species).
3. Helminths - (1) Cestodes (tapeworms)- Echinococcus granulosus, Taenia solium, Taenia saginata (2) Trematodes (Flukes): Paragonimuswestermani, Schistosomamansoni, Schistosomahaematobium (3) Nematodes- Ancylostoma duodenale, Ascaris lumbricoides, Enterobius, vermicularis, Strongyloides, Stercoralis, Trichuristrichiura, Brugiamalayi, Dracunculus medinensis, Loa loa, Onchocerca volvulus, Wuchereria bancroftii).

(V) Virology:

1. Introduction
2. Nature and classification of viruses.
3. Morphology and replication of viruses.
4. DMA viruses:
 - (i) parvo virus
 - (ii) herpes virus, varicella virus, CMV, EBV.
 - (iii) hepadna virus (hepatitis virus)
 - (iv) pox virus- variola virus, vaccinia virus, molluscumcontagiosum etc.
5. RNA viruses:
 - (a) orthomyxo virus:
 - (i) entero virus
 - (ii) rhino virus
 - (iii) hepato virus

(b) paramyxovirus- rubeola virus, mumps virus, Influenza virus etc.

(c) phabdo virus

(d) rubella virus (gentian measles)

(e) corona virus

(f) retro virus

(g) yellow fever virus

(h) dengue, Vhikungunya virus.

(i) Miscellaneous virus:

(i) arena virus

(ii) corona virus

(iii) rota virus

(iv) bacteriophages

(VI) Clinical microbiology: (1) Clinically important micro organisms (2) Immunoprophylaxis, (3) Antibiotic Sensitivity Test (ABST).

(VII) Diagnostic procedures in microbiology: (1) Examination of blood and stool (2) Immunological examinations (3) Culture methods (4) Animal inoculation.

(VIII) Infection and Disease: (I) Pathogenicity, mechanism and control (2) Disinfection and sterilization (3) Antimicrobial chemotherapy (4) Microbial Pathogenicity.

(d) Histopathology:

1. Teaching of histopathological features with the help of slides of common pathological conditions from each system.

1. Teaching of gross pathological specimens for each system.

2. Histopathological techniques, e.g. fixation, embedding, sectioning and staining by common dyes and stains.

3. Frozen sections and its importance.

4. Electron microscopy; phase contrast microscopy.

B. Practical or clinical;

(1) Clinical and Chemical Pathology: estimation of haemoglobin (by acidometer) count of Red Blood Cells and White Blood Cells, bleeding time, clotting time, blood grouping, staining of thin and thick films, differential counts, blood examination for parasites, erythrocyte sedimentation rate.

(2) Urine examination, physical, chemical microscopical, quantity of albumin and sugar.

(3) Examination of Faeces: physical, chemical (occult blood) and microscopical for ova and protozoa.

(4) Methods of sterilization, preparation of a media, use of microscope, gram and acid fast stains, motility preparation, gram positive and negative coed and bacilli, special stains for coryne bacterium gram and acid fast stains of pus and sputum.

(5) Preparation of common culture medias, e.g. nutrient agar, blood agar, Robertson's Cooked Meal media (RCM) and Mac conkey's media.

(6) Widal test demonstration.

(7) Exposure to latest equipment viz. auto-analyzer, cell counter, glucometer.

(8) Histopathology

(a) Demonstration of common slides from each system.

(b) Demonstration of gross pathological specimens.

(c) Practical or clinical demonstration of histopathological techniques, i.e. fixation, embedding.

(d) Sectioning, staining by common dyes and stain, frozen section and its importance

(e) Electron microscopy; phase contrast microscopy.

C. Examination:

1. Theory:

1.1	Number of papers – 02	
1.2	Marks: Paper I-100, Paper II-100	
1.3	Contents	
1.3.1	Paper-I: Section A- General Pathology	50 marks
	Section B- Systemic Pathology	50 marks

1.3.1. Paper-II: Section A-

Bacteriology	25 marks
Fungi and Parasites	25 marks

Section B-

Virology	20 Marks
Clinical Microbiology and Diagnostic procedure	10 Marks
Microbiological control and mechanism of Pathogenicity	10 Marks
General Topics Immuno-pathology	10 Marks

2. Practical including viva voce or oral:

2.1.		Marks 100
2.2	Distribution of marks	
2.2.1	Practical	15
2.2.2	Spotting	20 (4 spotting)
2.2.3	Histopathological slides	10 (2 slides)
2.2.4	Journal or practical record	05
2.2.5.	Viva voce (oral)	50
	Total	100

(Including 5 marks for interpretation of routine pathological reports)

FORENSIC MEDICINE AND TOXICOLOGY

Instructions:

(a) Medico-legal examination is the statutory duty of every registered medical practitioner, whether he is in private practice or engaged in Government sector and in the present scenario of growing consumerism in medical practice, the teaching of Forensic Medicine and Toxicology to the students is highly essential.

(b) This learning shall enable the students to be well-informed about medico-legal responsibility in medical practice and he shall also be able to make observation and infer conclusion by logical deduction to set enquire on the right track in criminal matters and connected medico-legal problems.

(c) The students shall also acquire knowledge of laws in relation to medical practice medical negligence and code of medical ethics and they shall also be capable of identification, diagnosis and treatment of the common poisonings in their acute and chronic state and also dealing with their medico-legal aspects.

(d) For such purposes, students shall be taken to visit district court and hospitals to observe court proceedings and post-mortem as per Annexure 'B'.

I. Forensic Medicine

A. Theory:

1. Introduction

- (a) Definition of forensic medicine
- (b) History of forensic medicine in India. -
- (c) Medical ethics and etiquette.
- (d) Duties of registered medical practitioner in medico-legal cases.

2. Legal procedure

- (a) Inquests, courts in India, legal procedure.
- (b) Medical evidences in courts, dying declaration, dying deposition, including medical certificates, and medico-legal reports.

3. Personal identification

- (a) Determination of age and sex in living and dead; race, religion.
- (b) Dactylography, DNA finger printing, foot print.
- (c) Medico-legal importance of bones, scars and teeth, tattoo marks, handwriting, anthropometry.
- (d) Examination of biological stains and hair.

4. Death and its medico-legal importance

- (a) Death and its types, their medico-legal importance
- (b) Signs of death (1) immediate, (2) early, (3) late and their medico-legal importance
- (c) Asphyxial death (mechanical asphyxia and drowning).
- (d) Deaths from starvation, cold and heat etc.

5. Injury and its medico-legal importance

Mechanical, thermal, firearm, regional, transportation and traffic injuries; injuries from radiation, electrocution and lightning.

6. Forensic psychiatry

- (a) Definition, delusion, delirium, illusion, hallucinations; impulse and mania, classification of Insanity.
- (b) Development of insanity, diagnosis, admission to mental asylum.

7. Post-mortem examination (autopsy)

- (a) Purpose, procedure, legal bindings; difference between pathological and medico-legal autopsies.
- (b) External examination, internal examination of adult, foetus and skeletal remains.

8. Impotence and sterility

Impotence, Sterility, Sterilization, Artificial Insemination, Test Tube Baby, Surrogate mother.

9. Virginity, defloration; pregnancy and delivery.

10. Abortion and infanticide;

- (a) Abortion: different methods, complication, accidents following criminal abortion, MTP.
- (b) Infant death, legal definition, battered baby syndrome, cot death, legitimacy.

11. Sexual Offences

Rape, incest, sodomy, sadism, masochism, tribadism, bestiality, buccal coitus and other sexual perversions.

II. Toxicology

1. General Toxicology

- (a) Forensic Toxicology and Poisons
- (b) Diagnosis of poisoning in living and dead,
- (c) General principles of management of poisoning,
- (d) Medico-legal aspects of poisons,
- (e) Antidotes and types.

2. Clinical toxicology

- (a) Types of Poisons:
 - (i) Corrosive poisons (Mineral acids, Caustic alkalis, Organic acids, Vegetable acids).
 - (ii) Irritant poisons (Organic poisons - Vegetable, and animal; Inorganic poisons - metallic and non-metallic, Mechanical poisons)
 - (iii) Asphyxiant poisons (Carbon monoxide, Carbon dioxide, Hydrogen sulphide and some war gases).
 - (iv) Neurotic poisons (Opium, Nux vomica, Alcohol, Fuels like kerosene and petroleum products, Cannabis indica, Dhatura, Anaesthetics, Sedatives and Hypnotics, Agrochemical compounds, Belladonna, Hyoscyamus, Curare, Conium)
 - (v) Cardiac poisons (Digitalis purpurea, Oleander, Aconite, Nicotine)
 - (vi) Miscellaneous poisons (Analgesics and Antipyretics, Antihistamines, Tranquillizers, antidepressants, Stimulants, Hallucinogens, Street drugs etc.)

III. Legislations relating to medical profession

- (a) the Homoeopathy Central Council Act, 1973 (59 of 1973);
- (b) the Consumer Protection Act, 1986 (68 of 1986);
- (c) the Workmen's compensation Act, 1923 (8 of 1923);
- (d) the Employees State Insurance Act, 1948 (34 of 1948);
- (e) the Medical Termination of Pregnancy Act, 1971 (34 of 1971);
- (f) the Mental Health Act, 1987 (14 of 1987)
- (g) the Indian Evidence Act, 1872 (1 of 1872);
- (h) the Prohibition of Child Marriage Act, 2006 (6 of 2007);
- (i) the Personal Injuries Act, 1963 (37 of 1963)
- (j) the Drugs and Cosmetics Act, 1940 (23 of 1940) and the rules made therein;
- (k) the Drugs and Magic Remedies (Objectionable Advertisements) Act, 1954 (21 of 1954);
- (l) the Transplantation of Human Organs Act, 1994 (42 of 1994);
- (m) the Pre-natal Diagnostic Techniques (Regulation and Prevention of Misuse) Act, 1994 (57 of 1994);
- (n) the Homoeopathic Practitioners (Professional Conduct, Etiquette and Code of Ethics) Regulations, 1982;
- (o) the Drugs Control Act, 1950 (26 of 1950);
- (p) the Medicine and Toiletry Preparations (Excise Duties) Act, 1955 (16 of 1955);
- (q) the Indian Penal Code (45 of 1860) and the Criminal Procedure Code (2 of 1974) {relevant provisions}
- (r) the Persons with Disabilities (Equal Opportunities, Protection of Rights and Full Participation) Act, 1995 (1 of 1996);
- (s) The Clinical Establishment (Registration and Regulation) Act, 2010 (23 of 2010).

B. Practical:

1. Demonstration:

- (a) Weapons
- (b) Organic and inorganic poisons
- (c) poisonous plants
- (d) Charts, diagrams, photographs, models, x-ray films of medico-legal importance
- (e) Record of incidences reported in newspapers or magazines and their explanation of medico-legal importance.
- (f) Attending demonstration of ten medico-legal autopsies.

2. Certificate Writing

Various certificates like sickness certificate, physical fitness certificate, birth certificate, death certificate, injury certificate, rape certificate, chemical analyzer (Regional Forensic Laboratory), certificate for alcohol consumption, writing post-mortem examination report.

C. Examination:

1. Theory:

1.1.	Number of papers	01
1.2.	Marks	100

2. Practical including viva voce or oral:

2.1.	Practical including viva or oral	Marks 100
2.2	Distribution of marks	
2.2.1	Medico-legal aspect of 4 specimens	40
2.2.2	Journal or practical records	10
2.2.3	Viva voce/(oral)	50
	Total	100

SURGERY

Instructions:

- I. (a) Homoeopathy as a science needs clear application on part of the physician to decide about the best course of action(s) required to restore the sick, to health.
- (b) Knowledge about surgical disorders is required to be grasped so that the Homoeopathic Physician is able to:-
 - (1) Diagnose common surgical conditions.
 - (2) Institute homoeopathic medical treatment wherever possible.
 - (3) Organise Pre and Post-operative Homoeopathic medicinal care besides surgical intervention with the consent of the surgeon.
- II. For the above conceptual clarity and to achieve the aforesaid objectives, an effective co-ordination between the treating surgeons and homoeopathic physicians is required keeping in view the holistic care of the patients and it will also facilitate the physician in individualizing the patient, necessary for homoeopathic treatment and management.
- III. The study shall start in Second B.H.M.S. and complete Third B.H.M.S. and examination shall be conducted in Third B.H.M.S.
- IV. (a) Following is a plan to achieve the above and it takes into account about the Second and Third year B.H.M.S. syllabus and respective stage of development.
- (b) Throughout the whole period of study, the attention of the students should be directed by the teachers of this subject to the importance of its preventive aspects.
- V. There shall be periodical inter-departmental seminars, to improve the academic knowledge, skill and efficiency of the students and the study shall include training on,-
 - (a) Principles of surgery,
 - (b) Fundamentals of examination of a patient with surgical problems
 - (c) Use of common instruments for examination of a patient.
 - (d) Physiotherapy measures.
 - (e) Applied study of radio-diagnostics.
 - (f) Knowledge of causation, manifestations, management and prognosis of surgical disorders.
 - (g) Miasmatic background of surgical disorders, wherever applicable.
 - (h) Bedside clinical procedures.
 - (i) Correlation of applied aspects, with factors which can modify the course of illness, including application of medicinal and non-medicinal measures.
 - (j) Role of homoeopathic treatment in pseudo-surgical and true surgical diseases.

SECOND B.H.M.S.

A. Theory:

(a) General Surgery

1. Introduction to surgery and basic surgical principles.
2. Fluid, electrolytes and acid-base balance.
3. Haemorrhage, haemostasis and blood transfusion.
4. Boil, abscess, carbuncle, cellulitis and erysipelas.
5. Acute and chronic infections, tumors, cysts, ulcers, sinus and fistula.
6. Injuries of various types; preliminary management of head injury
7. Wounds, tissue repair, scars and wound infections.
8. Special infections (Tuberculosis, Syphilis, Acquired Immuno Deficiency Syndrome, Actinomycosis, Leprosy).
9. Burn
10. Shock
11. Nutrition
12. Pre-operative and post-operative care.
13. General management, surgical management and homoeopathic therapeutics of the above topics will be covered.

Examination: There will be no examination in the subject in Second B.H.M.S.

THIRD B.H.M.S.

A. Theory:

(b) Systemic Surgery:-

1. Diseases of blood vessels, lymphatics and peripheral nerves
2. Diseases of glands
3. Diseases of extremities
4. Diseases of thorax and abdomen
5. Diseases of alimentary tract
6. Diseases of liver, spleen, gall bladder and bile duct.
7. Diseases of abdominal wall, umbilicus, hernias.
8. Diseases of heart and pericardium.
9. Diseases of urogenital system.
10. Diseases of the bones, cranium, vertebral column, fractures and dislocations.
11. Diseases of the joints.
12. Diseases of the muscles, tendons and fascia.

B. Ear -

1. Applied anatomy and applied physiology of ear
2. Examination of ear
3. Diseases of external, middle and inner ear

C. Nose

1. Applied anatomy and physiology of nose and paranasal sinuses.
2. Examination of nose and paranasal sinuses
3. Diseases of. nose and paranasal sinuses

D. Throat

1. Applied Anatomy and applied Physiology of pharynx, larynx, tracheobronchial tree, oesophagus
2. Examination of pharynx, larynx, tracheobronchial tree, oesophagus
3. Diseases of Throat (external and internal)
4. Diseases of oesophagus.

E. Ophthalmology

1. Applied Anatomy, Physiology of eye
2. Examination of eye.
3. Diseases of eyelids, eyelashes and lacrimal drainage system.
4. Diseases of Eyes including injury related problems.

F. Dentistry

1. Applied anatomy, physiology of teeth and gums;
2. Milestones related to teething.
3. Examination of Oral cavity.
4. Diseases of gums
5. Diseases of teeth
6. Problems of dentition

General management, surgical management and homoeopathic therapeutics of the above topics will be covered. Practical or clinical: (To be taught in Second and Third B.H.M.S.)

1. Every student shall prepare and submit twenty complete histories of surgical cases, ten each in the Second and Third B.H.M.S. classes respectively.
2. Demonstration of surgical Instruments, X-rays, specimens etc.
3. Clinical examinations in Surgery.

4. Management of common surgical procedures and emergency procedures as stated below:

- (a) Wounds
- (b) Abscesses: incision and drainage.
- (c) Dressings and plasters.
- (d) Suturing of various types.
- (e) Pre-operative and post-operative care.
- (f) Management of shock.
- (g) Management of acute haemorrhage.
- (h) Management of acute injury cases.
- (i) Preliminary management of a head Injury case.

Examination:

It will be conducted in Third B.H.M.S (not in Second B.H.M.S.).

1. Theory:

1.1.	Number of papers-02
1.2.	Marks: Paper I-100, Paper II-100

1.3. Contents:

1.3.1. Paper-I:

Section -1- General Surgery	50 marks
Section -2 - Homoeopathic Therapeutics related to General Surgery	50 marks

1.3.2. Paper-II

Section-1-Systemic Surgery	25 marks
(i) ENT	10 marks
(ii) Ophthalmology	10 marks
(iii) Dentistry	05 marks
Section-2: - Homoeopathic Therapeutics related to Systemic Surgery	25 marks
(i) ENT Homoeopathic Therapeutics	10 marks
(ii) Ophthalmology Homoeopathic Therapeutics	10 marks
(iii) Dentistry Homoeopathic Therapeutics	05 marks

2. Practical including viva voce or oral:

2.1.		Marks 200
2.2	Distribution of marks	
2.2.1	One long case	40
2.2.2	Identification of instruments, X-rays	30
2.2.3	Practical records, case records or journal	30
2.2.4.	Viva voce (oral)	100
	Total	200

GYNAECOLOGY AND OBSTETRICS

Instructions:

- I. (a) Homoeopathy adopts the same attitude towards this subject as it does towards Medicine and Surgery, but while dealing with Gynaecology and Obstetrical cases, a Homoeopathic physician must be trained in special clinical methods of investigation for diagnosing local conditions and individualizing cases, the surgical intervention either as a life saving measure or for removing mechanical obstacles, if necessary, as well as their management by using homoeopathic medicines and other auxiliary methods of treatment.
- (b) Pregnancy is the best time to eradicate genetic dyscrasias in women and this should be specially stressed and students shall also be instructed in the care of new born.
- (c) The fact that the mother and child form a single biological unit and that this peculiar close physiological relationship persists for at least the first two years of the child's life should be particularly emphasized.
- II. A course of instructions in the principles and practice of gynaecology and obstetrics and infant hygiene and care including the applied anatomy and physiology of pregnancy and labour, will be given.
- III. Examinations and investigations in gynecological and obstetrical cases shall be stressed and scope of homoeopathy in this subject shall be taught in details.
- IV. The study shall start in Second B.H.M.S and shall be completed in Third B.H.M.S. and examinations will be held in Third B.H.M.S and following topics shall be taught, namely:-

SECOND B.H.M.S.

A. Theory:

1. Gynaecology

- (a) A review of the applied anatomy of female reproductive systems-development and malformations.
- (b) A review of the applied physiology of female reproductive systems-puberty, menstruation and menopause.
- (c) Gynecological examination and diagnosis.
- (d) Developmental anomalies.
- (e) Uterine displacements.
- (f) Sex and intersexuality.
- (g) General Management and therapeutics of the above listed topics in Gynaecology.

2. Obstetrics

- (a) Fundamentals of reproduction
- (b) Development of the intrauterine pregnancy-placenta and foetus.
- (c) Diagnosis of pregnancy-investigations and examination.
- (d) Antenatal care.
- (e) Vomiting in pregnancy.
- (f) Preterm labour and post maturity.
- (g) Normal labour and Puerperium.
- (h) Induction of labour.
- (i) Postnatal and puerperal care.
- (j) Care of the new born.
- (k) Management and therapeutics of the above listed topics in obstetrics.

THIRD B.H.M.S

1. Gynaecology

- (a) Infections and ulcerations of the female genital organs.
- (b) Injuries of the genital tract.
- (c) Disorders of menstruation.
- (d) Menorrhagia and dysfunctional uterine bleeding.
- (e) Disorders of female genital tract.
- (f) Diseases of breasts.
- (g) Sexually transmitted diseases.
- (h) Endometriosis and adenomyosis.
- (i) Infertility and sterility.
- (j) Non-malignant growths.
- (k) Malignancy.
- (l) Chemotherapy caused complications.
- (m) Management and therapeutics of the above listed topics in gynecology.

2. Obstetrics

- (a) High risk labour, mal-positions and mal-presentations, twins, prolapse of cord and limbs, abnormalities in the action of the uterus, abnormal conditions of soft part contracted pelvis, obstructed labour, complications of 3rd stage of labour, injuries of birth canal, fetal anomalies.
- (b) Abnormal pregnancies-abortion, molar pregnancy, diseases of placenta and membranes, toxemia of pregnancy, ante partum hemorrhages, multiple pregnancy, protracted gestation, ectopic pregnancy, intrauterine growth retardation, pregnancy in Rh negative woman, intrauterine fetal death, still birth;
- (c) Common disorders and systemic diseases associated with pregnancy.
- (d) Pre-natal Diagnostic Techniques (Regulation and Prevention of Misuse) Act, 1994.
- (e) Common obstetrical operations-medical termination of pregnancy, criminal abortion, caesarean section, episiotomy.
- (f) Emergency obstetric care.
- (g) Population dynamics and control of conception;
- (h) Infant care - Neonatal hygiene, Breast feeding, Artificial feeding, Management of premature child, Asphyxia, Birth injuries, Common disorders of newborn.
- (i) Reproductive and child health care (a) safe motherhood and child survival (b) Risk approach - MCH care (c) Maternal mortality-and morbidity:'. (d) Perinatal mortality and morbidity (e) Diseases of foetus and newborn.
- (j) Medico-legal aspects in obstetrics.
- (k) Homoeopathic Management and Therapeutics of the above listed clinical Conditions in Obstetrics.

B. Practical or clinical:

Practical or clinical classes shall be taken on the following topics both In Second and Third B.H.M.S.

- (a) Gynaecological case taking
- (b) Obstetrical case taking
- (c) Gynaecological examination of the patient
- (d) Obstetrical examination of the patient including antenatal, intranatal and post- natal care
- (e) Bed side-training
- (f) Adequate grasp over Homoeopathic principles and management
- (g) Identification of Instruments arid models.

Record of ten cases each in gynaecology and obstetrics.

C.Examination:

1. Theory:.

1.1.	Number of papers - 02
1.2.	Marks: Paper 1-100, Paper 11-100
1.3.	Contents:
1.3.1.	Paper –I: Gynaecology and homoeopathic therapeutics
1.3.2.	Paper-II: Obstetrics, infant care and homoeopathic therapeutics

2. Practical including viva voce or oral:

2.1.		Marks 200
2.2	Distribution of marks	
2.2.1	One long case	30
2.2.2	Practical records, case records, journal	30
2.2.3	Identification of instruments, models and specimens	40
2.2.4.	Viva voce (oral)	100
	Total	200

PRACTICE OF MEDICINE

Instructions:

- I. (a) Homoeopathy has a distinct approach to the concept of disease.
- (b) It recognizes an ailing individual by studying him as a whole rather than in terms of sick parts and emphasizes the study of the man, his state of health, state of illness.
- II. The study of the above concept of individualization is essential with the a following background so that the striking features which are characteristic to the individual become clear, in contrast to the common picture of the respective disease conditions, namely:-
- (1) Correlation of the disease conditions with basics of anatomy, physiology and, biochemistry and pathology.
 - (2) Knowledge of causation, manifestations, diagnosis (including differential, diagnosis), prognosis and management of diseases,
 - (3) Application of knowledge of organon of medicine and homoeopathic philosophy in dealing with the disease conditions.
 - (4) Comprehension of applied part.
 - (5) Sound clinical training at bedside to be able to apply the knowledge and clinical skill accurately.
 - (6) Adequate knowledge to ensure that rational investigations are utilised.
- III. (a) The emphasis shall be on study of man in respect of health, disposition, diathesis, disease, taking all predisposing and precipitating factors, i.e. fundamental cause, maintaining cause and exciting cause;
- (b) Hahnemann's theory of chronic miasms provides us an evolutionary understanding of the chronic diseases: psora, sycosis, syphilis and acute manifestations of chronic diseases and evolution of the natural disease shall be comprehended in the light of theory of chronic miasms.
- IV. (a) The teaching shall include homoeopathic therapeutics or management in respect of all topics and clinical methods of examination of patient as a whole will be given due-stress during the training.
- (b) A thorough study of the above areas will enable a homoeopathic physician to comprehend the practical aspects of medicine.
- (c) He shall be trained as a sound clinician with adequate ability of differentiation, sharp observation and conceptual clarity about diseases by taking help of all latest diagnostic techniques, viz. X-ray, ultrasound, electrocardiogram, and commonly performed laboratory investigations.
- (d) Rational assessment of prognosis and general management of different disease conditions are also to be focused.
- V. Study of subject. - The study of the subject will be done in two years in Third B.H.M.S and Fourth B.H.M.S, but examination shall be conducted at the end of Fourth B.H.M.S.

Syllabus & Marks Distribution IIIrd BHMS

Theory:

1. Applied anatomy and applied physiology of the respective system as stated below.
2. Respiratory diseases.
3. Diseases of digestive system and peritoneum.
4. Diseases concerning liver, gall-bladder and pancreas.
5. Genetic Factors (co-relating diseases with the concept of chronic miasms).
6. Immunological factors in diseases with concept of susceptibility (including HIV, Hepatitis-B)
7. Disorders due to chemical and physical agents and to climatic and environmental factors.
8. Knowledge of clinical examination of respective systems.
9. Water and electrolyte balance - disorders of.

Sr. No	Topics	Must Know	Desirable to Know	Nice to Know
I	Respiratory Diseases			
1	Upper respiratory tract infections	Definition, Etiopathogenesis, C/F, Investigations, D/D & Hom therapeutics		Rhinoscopy
2	Bronchial Asthma	Definition, Etiopathogenesis, Pathology, C/F, Investigations, D/D & Hom therapeutics	Pulmonary Function test	
3	Chronic Obstructive Lung Disease	Definition, Etiopathogenesis, Pathology, C/F, Investigations, D/D, Complications & Hom therapeutics		
4	Pneumonia	Definition, Etiopathogenesis, Pathology, Types, C/F, Investigations, D/D, Complications & Hom therapeutics		
5	Bronchiectasis	Definition, Etiology, Pathology, C/F, Investigations & Hom therapeutics	D/D	
6	Lung abscess	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom therapeutics	D/D	
7	Pulmonary Tuberculosis	Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom therapeutics		Epidemiology
8	Tropical pulmonary eosinophilia	Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom		Epidemiology

		therapeutics		
9	Occupational Lung Disorders	Definition, Etiopathogenesis, C/F, Diagnosis & Hom therapeutics	D/D & Complications	
10	Sarcoidosis		Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom therapeutics	
11	Pulmonary Thromboembolism	Definition, Etiopathogenesis, C/F, Diagnosis, Complications & Hom therapeutics	D/D & General manamangement	
12	Pleurisy & Pleural Effusion	Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom therapeutics		Pleural Tapping
13	Pneumothorax	Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom therapeutics	General management	Surgical management
14	Bronchial carcinomas	Definition, Etiology, Pathology, C/F, D/D, Diagnosis, Complications & Hom therapeutics		
15	Interstitial lung diseases		Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom therapeutics	
16	Cystic fibrosis of lung			Basics/Associated syndromes.
II	Diseases of Digestive System & Peritoneum			
1	Disorders of Mouth & Salivary glands	Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom therapeutics		Imaging studies
2	Esophageal disorders(GERD, ACHLASIA)		Definition, Etiopathogenesis, C/F, D/D, Diagnosis, Complications & Hom therapeutics	Dietary management
3	Peptic Ulcers	Definition, Etiopathogenesis, Pathology, Types, C/F, Investigations, Complications, D/D, General management & Hom therapeutics	Dietary management	Endoscopic changes, & Surgical management
4	Gastritis	Definition, Etiopathogenesis, Pathology, Types, C/F, Investigations, Complication, D/D, General management & Hom therapeutics	Dietary management	Endoscopic changes

5	GI Bleeding		Causes, Manifestations, D/D, Complications & Hom therapeutics	
6	Diarrhoea	Definition, Etiopathogenesis, C/F, Investigations, Complications, General management & Hom therapeutics	Dietary management	Endoscopic changes & Sigmoidoscopy
7	Constipation	Definition, Etiopathogenesis, C/F, Investigations, Complications, General management & Hom therapeutics	Dietary management	Endoscopic changes & Sigmoidoscopy
8	Malabsorption Syndrome		Definition, Etiopathogenesis, Pathology, Types, C/F, Investigations, Complication, D/D, General management & Hom therapeutics	Intestinal Biopsy & Dietary management
9	Irritable Bowel Syndrome	Definition, Etiopathogenesis, C/F, Investigations, Complication, D/D, General management & Hom therapeutics	Dietary management	
10	Inflammatory Bowel Diseases	Definition, Etiopathogenesis, Pathology, Types, C/F, Investigations, Complications, D/D & Hom therapeutics	Dietary management	Sigmoidoscopy
11	Abdominal Tuberculosis		Definition, Etiopathogenesis, Pathology, C/F, Investigations, Complications, D/D & Hom therapeutics	
12	Peritonitis	Definition, Etiopathogenesis, C/F, Investigations, Complications, D/D & Hom therapeutics		Enzyme study
13	Neoplasia of the bowel	Definition, Etiology, Pathology, Types, C/F, Investigations, Complications, D/D & Hom therapeutics		Imaging studies
14	Anorectal disorders		Definition, Etiology, Pathology, C/F, Investigations, Complications, D/D & Hom therapeutics	
15	Diverticulitis		Definition, Etiopathogenesis, C/F, Investigations,	

			Complications, D/D & Hom therapeutics	
III	Diseases concerning Liver, Gall-bladder & Pancreas			
1	Viral Hepatitis	Definition, Etiopathogenesis, C/F, Investigations, Complications, D/D & Hom therapeutics		Serological studies
2	Alcoholic Liver Diseases	Definition, Causes, Types, Pathology, C/F, Investigations, Complications, D/D & Hom therapeutics		Liver transplantation
3	Cirrhosis of Liver	Definition, Causes, Types, Pathology, C/F, Investigations, Complications D/D & Hom therapeutics		Histological changes
4	Portal Hypertension	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom therapeutics		
5	Liver Failure		Definition, Etiopathogenesis, C/F, Invest, Complications & Hom Therapeutics	Liver transplantation
6	Liver abscess		Definition, Causes, Pathology, C/F, Investigations, Complications & Hom therapeutics	
7	Gallstones	Definition, Etiopathogenesis, C/F, D/D, Investigations, Complications & Hom therapeutics		
8	Cholecystitis		Definition, Etiopathogenesis, C/F, D/D, Investigations, Complications & Hom therapeutics	
9	Pancreatitis		Definition, Etiopathogenesis, Types, C/F, Investigations, Complications, D/D & Hom therapeutics	
10	LFT	Reference ranges and interpretations.		
11	Ascites	Definition, Etiopathogenesis, C/F, D/D, Investigations, Complications & Hom therapeutics		
12	Pregnancy and Liver			Consequences

	Diseases			
13	Parasitic Diseases of the Liver		Types, Etiopathogenesis, Pathology, C/F, Diagnosis, prognosis, Hom therapeutics	Diagnostics and treatment
14	Inherited Metabolic Disorder of the Liver		Types, Causes, Pathology, C/F, Diagnosis, Prognosis & Hom therapeutics	
15	Hepatocellular carcinoma	Types, Etiology, Pathology, C/F, Diagnosis, Prognosis & Hom therapeutics		
IV	Genetic factors(co-relating diseases with concept of chronic miasms)			
1	Down's Syndrome	Definition, Causes, C/F & Diagnosis	Concept of Miasm & Hom Therapeutics.	Scope & limitations of Hom & Genetic Testing/ counselling
2	Turner's & Klinfilter's Syndrome	Definition, Causes C/F & Diagnosis	Concept of Miasm & Hom Therapeutics.	Scope & limitations of Hom & Genetic Testing/ counselling
3	Cystic fibrosis Huntington's disease & Marfan's syndrome		Etiopathogenesis, C/F, Diagnosis, Concept of Miasm & Hom therapeutics.	Scope & limitations of Hom & Genetic Testing/ counselling
4	Poly cystic kidney disease		Etiopathogenesis, C/F & Diagnosis, Concept of Miasm & Hom therapeutics.	Scope & limitations of Hom & Genetic Testing/ counselling
V	Immunological factors in disease with concept of susceptibility (Including HIV, Hepatitis-B)			
1	Homoeopathic relation of immunity & Susceptibility	Homoeopathic relation of immunity & Susceptibility		
2	Hypersensitivity reactions	Types & manifestations of Hypersensitivity reactions		
3	Autoimmune diseases		Types & manifestations of Autoimmune diseases	Autoantibody studies
4	HIV	Etiopathogenesis, C/F, Complications & Diagnosis with miasmatic & Homoeopathic management		
5	Hepatitis-B	Etiopathogenesis, C/F, Complications & Diagnosis with miasmatic & Homoeopathic management		
6	Transplantations			Basic

				considerations and host tissue defences.
VI	Disorders due to Chemical & Physical agents & to Climatic & environmental factors			
1	Diseases due to Chemical & Physical agents		Etiopathogenesis & Manifestations of diseases due to Chemical & Physical agents	
2	Disease due to Climatic & Environmental factors		Etiopathogenesis & Manifestations of disease due to Climatic & Environmental factors	
VII	Water & Electrolyte balance – disorders of			
1	Hypo & Hypernatraemia	Causes, Manifestations, Diagnosis General management & Hom Therapeutics		Scope & Limitations of Homoeopathy
2	Hypo & Hyperkalaemia	Causes, Manifestations, Diagnosis General management & Hom Therapeutics		Scope & Limitations of Homoeopathy
3	Hypo & Hyperphosphataemia		Causes, Manifestations, Diagnosis, General management & Hom Therapeutics	Scope & Limitations of Homoeopathy
4	Metabolic Acidosis & Alkalosis	Causes, Manifestations, Diagnosis, General management & Hom Therapeutics		
5	Respiratory Acidosis & Alkalosis	Causes, Manifestations, Diagnosis, General management & Hom Therapeutics		

SYLLABUS & MARKS DISTRIBUTION IVTH BHMS

A Theory:

1. Nutritional and metabolic diseases
2. Diseases of haemopoietic system.
3. Endocrinal diseases.
4. Infectious diseases.
5. Diseases of cardiovascular system.
6. Diseases of urogenital Tract.
7. Disease of CNS and peripheral nervous system.
8. Psychiatric disorders.
9. Diseases of locomotor system (connective tissue, bones and joints disorders)
10. Diseases of skin and sexually transmitted diseases.
11. Tropical diseases.
12. Paediatric disorders.
13. Geriatric disorders.
14. Applied anatomy and applied physiology of different organ and systems relating to specific diseases.
15. Knowledge of clinical examination of respective systems.
 - (a) General management and homoeopathic therapeutics for all the topics to be covered in Third B.H.M.S and Fourth B.H.M.S shall be taught simultaneously and the emphasis shall be on study of man in respect of health, disposition, diathesis, disease, taking all predisposing and precipitating factors, i.e. fundamental cause, maintaining cause and exciting cause.
 - (b) Study of therapeutics does not mean simply list of specifics for the clinical conditions but teaching of applied materia medica which shall be stressed upon.

Sr No	Topics	Must Know	Desirable to Know	Nice to Know
I	Nutritional & Metabolic Diseases			
1	Protein Energy Malnutrition	Definition, Etiopathogenesis, Types, C/F, Investigations & Hom Therapeutics.	Complications	Dietary management
2	Fat soluble vitamins	C/F of Deficiency and Hypervitaminosis & Diagnosis.	Daily requirement & Role of Hom in deficiency disorders	
3	Water Soluble vitamins	C/F of Deficiency and Hypervitaminosis & Diagnosis.	Daily requirement & Role of Hom in deficiency disorders	
4	Obesity	Types, Complications & Hom management	Nutritional Assessment	
5	Wilson's disease/Haemochrom		Definition, Etiopathogenesis, C/F,	Copper metabolism&

	atosis/ porphyrias.		Investigations & Complications	Iron metabolism
6	Amyloidosis		Definition, Etiopathogenesis, Types, C/F & Investigations.	complications
II	Diseases of Hematopoietic system			
1	Anemia	Definition, Causes, Classification, C/F, Investigations, Complications, General management & Hom Therapeutics		Parenteral therapy
2	Iron deficiency anemia	Definition, Etiopathogenesis, C/F, Investigations, Complications, General management & Hom Therapeutics		Iron metabolism
3	Megaloblastic anemia	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics		Metabolism of Vit B12 & Folate
4	Aplastic anemia	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics		Scope & limitations of
5	Hemolytic anemia/thalassemia	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics		Blood transfusion, Scope & limitations of Homoeopathy
6	Leukemia	Definition, Etiopathogenesis, Types, C/F, Investigations, Complications, D/D, & Hom Therapeutics		Bone marrow Transplantation
7	Lymphomas / Burkitt's lymphoma	Definition, Etiopathogenesis, Types C/F, Investigations, Complications & Hom Therapeutics	Staging (TNM)	Scope & limitations of Homoeopathy
8	Disorders due to deficiency of Clotting factors	Definition, Etiopathogenesis, C/F, & Investigations of Hemophilia-A, Hemophilia-B & Von- wilbrand disease & Hom Therapeutics		Scope & limitations of Homoeopathy
9	Platelet Disorders	Definition, Types, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics.		
10	Multiple myelomas.	Definition, Types, Etiopathogenesis, C/F, Investigations & Complications & Hom Therapeutics.	Staging (TNM)	

11	Hypersplenism		Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics.	
12	Polycythemia vera		Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics.	
III	Endocrinal Diseases			
1	Disorders of Growth hormone	Etiopathogenesis, S/S & Investigations of GH Deficiency & Excess	Homoeopathic Therapeutics	
2	Diabetes insipidus	Etiopathogenesis, S/S, Investigations & Hom Therapeutics.		
3	Goitre	Definition, Types, Etiopathogenesis, C/F, Investigations, D/D & Hom Therapeutics		
4	Hypothyroidism	Definition, Etiopathogenesis, C/F, Investigations, D/D, Complications & Hom Therapeutics	Congenital hypothyroidism	Hormonal assay
5	Hyperthyroidism	Definition, Etiopathogenesis, C/F, Investigations, D/D, Complications & Hom Therapeutics		Radioactive iodine ablation/ Basics of CA Thyroid.
6	Hypo & Hyper Parathyroidism	Definition, Etiopathogenesis, C/F, Investigations & Hom Therapeutics		Calcium metabolism
7	Disorders of Adrenal Gland	Definition, types, Etiopathogenesis, C/F, Investigations & Hom Therapeutics		Functions of Glucocorticoids
8	Diabetes Mellitus	Definition, Causes, Classification, Pathogenesis, C/F, Investigations, Complications, General management & Hom Therapeutics	GTT & Hb1ac	
IV	Infectious Diseases			
1	Bacterial infections- Typhoid Fever, Bacillary Dysentery, Cholera, Diphtheria, Brucellosis, Tuberculosis, Pertusis, Tetanus, Septicemia,	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics	Vaccination.	Culture study of bacteria

2	Viral infections - Herpes infections, Swine flu, Japanese Encephalitis, Rabies, Mumps, Measles, Rubella, Poliomyelitis.	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics	Vaccination.	Serological studies
3	Parasitic infestations: Amoebiasis, giardiasis,	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics		
4	Fungal infections – Madura foot, cryptococcosis		Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics	
5	Spirochetes – syphilis, leptospirosis.	Definition, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics		
V	Diseases of Cardiovascular System			
1	Acute circulatory failure (shock)	Definition, Etiopathogenesis, Types, C/F, Investigations, D/D, General management & Hom Therapeutics	Complications	
2	Heart failure	Definition, Etiopathogenesis, Types, C/F, Investigations, D/D, Complications General management & Hom Therapeutics		
3	Ischemic heart disease	Definition, Etiopathogenesis, Types, C/F, Investigations, D/D, Complications, General management & Hom Therapeutics		Complications, CABG, PTCA, Stent & Stress tests.
4	Acute Rheumatic fever	Definition, Etiopathogenesis, Pathology, C/F, D/D, Investigations, Complications, General management & Hom Therapeutics		
5	Valvular heart diseases	Definition, Etiopathogenesis, Types, Hemodynamics, C/F, Investigations, D/D, General management & Hom Therapeutics	Complications	Surgical management
6	Infective Endocarditis	Definition, Etiopathogenesis, Types, C/F, Investigations, D/D, General management & Hom Therapeutics	Complications	
7	Hypertension	Definition, Etiopathogenesis, Types, C/F, Investigations, General management & Hom		

		Therapeutics		
8	Cardiomyopathies		Definition, Etiopathogenesis, Types, C/F, Investigations & Hom Therapeutics	
9	Arrhythmias	Definition, Etiopathogenesis, Types, C/F, General management & Hom Therapeutics	ECG Changes	
10	Cor-pulmonale and pulmonary hypertension.	Definition, Etiopathogenesis, C/F, Investigations, Complications, General management & Hom Therapeutics	Scope & limitation of Homoeopathy	
11	Congenital heart diseases- ASD, VSD, COA, PDA, TOF	Definition, Etiopathogenesis, Haemodynamics, C/F, Investigations, Complications, General management & Hom Therapeutics	Scope & limitation of Homoeopathy & Surgical management	
12	Diseases of Pericardium	Definition, Etiopathogenesis, Types, C/F, Investigations, General management & Hom Therapeutics	D/D	Pericardiocentesis
VI	Diseases of Urogenital tract			
1	Urinary Tract Infections	Definition, Types, Etiopathogenesis, C/F, Investigations, Complications, General management & Hom Therapeutics		Culture & sensitivity.
2	Nephrotic Syndrome	Definition, Etiopathogenesis, C/F, Investigations, General management & Hom Therapeutics		
3	Glomerulopathies	Definition, Etiopathogenesis, Pathology, Types, C/F, Investigations, General management & Hom Therapeutics		
4.	Renal failure	Definition, Types, Etiopathogenesis, C/F, Investigations, Complications & Hom Therapeutics	Dialysis – types & indications.	Renal Transplantation
5	Nephrolithiasis/obstructive uropathy.	Definition, Etiopathogenesis, Types, C/F, Investigations, General management & Hom Therapeutics		Surgical intervention
6	Tumors of Genito urinary tract		Types, Causes, Pathology, C/F, Investigations, Complications & Hom Therapeutics.	

VII Diseases of Central Nervous System & Peripheral Nervous System				
1	Headache	Definition, Etiopathogenesis, Types, C/F, D/D, General management & Hom Therapeutics	Investigations & Complications of secondary headache	
2	Epilepsy	Definition, Etiopathogenesis, Classification, C/F, Investigations, D/D, Complications, General management & Hom Therapeutics		EEG
3	Cranial nerves disorders	Causes, C/F, Investigations, D/D, General management & Hom Therapeutics of Trigeminal neuralgia, Facial nerve palsy, Bulbar / Pseudo bulbar palsy	Causes, C/F, General management & Hom Therapeutics of other cranial nerve lesions.	
4	Meningitis- bacterial, viral	Definition, Etiopathogenesis, C/F, Investigations D/D, general management & Hom Therapeutics		
5	Viral infections of CNS		Definition, Etiopathogenesis, C/F, Investigations, D/D, Complications & Hom Therapeutics	
6	Neurosyphilis	Definition, Etiopathogenesis, C/F, Investigations, Complications, General management & Hom Therapeutics		
7	Movement disorders		Causes & Manifestations of different types of movement disorders	
8	Parkinsonism	Definition, Etiopathogenesis, C/F, Investigations, General management & Hom Therapeutics		Degenerative pathology of Basal ganglia
9	Myasthenia gravis	Definition, Etiopathogenesis, C/F, Investigations, General management & Hom Therapeutics		
10	Peripheral Neuropathies	Definition, Etiopathogenesis, Classification, C/F, General management & Hom Therapeutics		Nerve conduction studies
11	Cerebellar disorders	Definition, Etiopathogenesis, Classification, C/F, Investigations, D/D, General management & Hom Therapeutics		Scope & limitation of Homoeopathy

12	Motor Neuron diseases	Definition, Etiopathogenesis, Types, C/F, Investigations, General management & Hom Therapeutics		Scope & limitation of Homoeopathy
13	Disorders of muscles (muscular dystrophies)	Definition, Etiopathogenesis, Types, C/F, Investigations, General management & Hom Therapeutics		Scope & limitation of Homoeopathy
14	Cerebrovascular diseases	Definition, Etiopathogenesis, Types, C/F, Investigations, D/D, Complications, General management & Hom Therapeutics		MRI study
15	Alzheimer's diseases	Definition, Etiopathogenesis, C/F, D/D, Investigations & Hom Therapeutics		
16	Coma	Definition, Causes, levels of consciousness, Complications, Clinical approach, General management & Hom Therapeutics		Scope & limitation of Homoeopathy
17	Multiple sclerosis		Definition, Etiopathogenesis, C/F, Investigations, D/D, Complications, General management & Hom Therapeutics	Scope & limitation of Homoeopathy
18	Spinal cord diseases (syringomyelia, brown sequard syndrome, cauda equina syndrome)		Definition, Etiopathogenesis, C/F, Investigations, D/D, Complications, General management & Hom Therapeutics	Scope & limitation of Homoeopathy
19	Tumors of CNS		Definition, Causes, Pathology, C/F, Investigations, D/D, Complications, General management & Hom Therapeutics	
VIII	Psychiatric Disorders			
1	Basic considerations of Psychiatry	Clinical approach, Classification, Psycho therapy and Hahnemannian classification		
2	Organic Brain syndromes Delirium and dementia	Etiopathogenesis, C/F, General management, & Hom Therapeutics		
3	Mood disorders	Etiology, Types, C/F, Diagnosis, General management & Hom Therapeutics		

4	Schizophrenia	Definition, Causes, Types, C/F, General management & Hom Therapeutics		
5	Anxiety disorders	Definition, Causes, Classification, C/F, General management & Hom Therapeutics		
6	Somatoform disorders	Definition, Causes, Types, C/F, General management & Hom Therapeutics		
7	Personality disorders	Definition, Causes, Types, C/F, General management & Hom Therapeutics		
8	Substance Abuse	Effects of alcohol, dependence and withdrawal, General management & Hom Therapeutics	Manifestations and Homoeopathic Therapeutics of Cannabis, opioids & nicotine abuse	
IX	Diseases of Locomotor System(connective tissue, Bones& joint disorders)			
1	Osteoarthritis	Definition, Etiopathogenesis, C/F, Investigations, General management, & Hom Therapeutics	Complications	Joint exercise & Arthroscopy
2	Rheumatoid arthritis	Definition, Etiology, Pathology, Immunopathogenesis, C/F, Investigations, General management, & Hom Therapeutics	Complications	
3	Gout	Definition, Etiopathogenesis, C/F, Investigations, General management, & Hom Therapeutics		Metabolism of Purine
4	Ankylosing Spondylitis	Definition, Etiopathology, C/F, Investigations, General management, & Hom Therapeutics	Complications	
5	Reiter's Syndrome		Definition, Etiopathogenesis, C/F, Investigations & Hom management	
6	Systemic Lupus Erythematosus	Definition, Etiopathogenesis, C/F, Investigations, Complications, General management & Hom Therapeutics		ANA profile
7	Systemic Vasculitis		Definition, Etiopathogenesis, C/F, Investigations, General management & Hom Therapeutics	
8	Sjogren's Syndrome		Definition,	

	& Behcet's disease		Etiopathogenesis, S/S, Investigations & Hom Therapeutics	
9	Rickets & Osteomalacia	Definition, Etiopathogenesis, C/F, Investigations, General management & Hom Therapeutics	Vit D Dosage and Complications	
10	Osteoporosis	Definition, Etiopathogenesis, C/F, Investigations, General management & Hom Therapeutics		Bone density study
11	Paget's disease		Definition, Etiopathogenesis, C/F, Complications & Investigations & Hom Therapeutics	Scope & limitations of Homoeopathy
12	Cervical And lumbar Spondylosis	Definition, Etiopathology, C/F, Investigations, Complications, General management, & Hom Therapeutics		MRI study
13.	Osteomyelitis	Definition, Etiopathology, Types, C/F, Investigations, General management & Hom Therapeutics		
X	Diseases of Skin & Sexually Transmitted Diseases			
1	Bacterial infections	Etiopathogenesis, S/S, Investigations, General management & Hom Therapeutics		
2	Fungal infections	Etiopathogenesis, S/S, Investigations, General management & Hom Therapeutics		
3	Viral infection	Etiopathogenesis, S/S, Investigations, General management & Hom Therapeutics		
4	Scabies	Etiopathogenesis, S/S, Investigations, General management & Hom Therapeutics		
5	Eczema	Definition, Etiopathogenesis, Types, S/S, Investigations, General management & Hom Therapeutics		
6	Acne	Definition, Etiopathogenesis, Types, S/S, Investigations, General management & Hom Therapeutics		
7	Urticaria and	Definition, Etiopathogenesis,		

	Angioedema	S/S, Investigations, General management & Hom Therapeutics		
8	Psoriasis	Definition, Etiopathogenesis, Types, S/S, Complications, Investigations, General management & Hom Therapeutics		
9	Lichen Planus		Definition, Etiopathogenesis, S/S, Investigations, Complications & Hom Therapeutics	
10	Pigment disorders	Definition, Etiopathogenesis, Types, S/S, Investigations & Hom Therapeutics of Hypopigmentation disorders	Etiopathogenesis, Various Types, S/S, Invest & Hom Therapeutics of Hypopigmentation disorders	
11	Hair & Nail disorders	Etiopathogenesis, S/S & Investigations of Hair & Nail disorders		
12	Syphilis/ HIV/Gonorrhoea	Definition, Types, Etiopathogenesis, S/S, Investigations, Complication & Hom Therapeutics		
13	Vesiculo bullous disorders	Definition, Etiopathogenesis, S/S, Investigations, Complications, General management & Hom Therapeutics		
XI	Tropical diseases			
1	Malaria	Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics		Epidemiology
2	Chikungunya	Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics		Epidemiology
3	Dengue	Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics		Epidemiology
4	Leprosy	Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics		Epidemiology

5	Ankylostomiasis		Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics	Epidemiology
6	Elephantiasis	Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics		Epidemiology
7	Schistosomiasis		Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics	
8	Leishmaniasis		Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics	
9	Trachoma		Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics	
10	Chagas Disease		Definition, Etiopathogenesis, S/S, Investigations, Complications, D/D, General management & Hom Therapeutics	
XII	Paediatric disorders			
1	Disorders of Growth & Development (Failure to thrive, Enuresis, Autistic, MR and delayed milestones)	Causes, C/F, General management & Hom Therapeutics		
2	Behavioral disorders(ADHD)	Causes, C/F, General management & Hom Therapeutics		
3	Diseases of New born infants(Neonatal jaundice & Neonatal seizures)	Etiopathogenesis, Manifestations, Diagnosis & Homoeopathic therapeutics		
4	Hydrocephalus	Etiopathogenesis, Types C/F, General management & Hom Therapeutics		

5	Immunity & Immunization	General & Homoeopathic concept of Immunity, Immunization Schedule & Homoeopathic Prophylaxis	Vaccine types	
6	Diarrhoeal Disorders in Children	Etiopathogenesis, Manifestation, Diagnosis, D/D General management & Homoeopathic Therapeutics		
7	Indian childhood Cirrhosis		Etiopathogenesis, Manifestation, Diagnosis, Complications & Homoeopathic Therapeutics	
8	Cerebral Palsy	Etiopathogenesis, Manifestation, Diagnosis & Homoeopathic Therapeutics		
9	Convulsive disorders in Children	Etiopathogenesis, Manifestation, Diagnosis & Homoeopathic Therapeutics		
10	Common Helminthic infection(Ascaris Lumbricoides, Enterobius vermicularis & Echinococcosis)	Etiopathogenesis, Manifestation, Diagnosis & Homoeopathic Therapeutics		
11	Inborn errors of metabolism (Aminoaciduria, Lysosomal storage disorders)		Etiopathogenesis, Manifestation, Diagnosis & Homoeopathic Therapeutics	
XIII	Geriatric Disorders			
1	Geriatric care	General approach, Geriatric counseling, Reassurance		
2	Common Geriatric problems (Depression, Dementia & Insomnia)	Causes, S/S, General management & Hom Therapeutics		
3	Gait disorders	Causes, S/S, General management & Hom Therapeutics		
4	Elder abuse	Causes, S/S, General management & Hom Therapeutics		

Practical or clinical:

- (a) Each candidate shall submit of twenty complete case records (ten in Third B.H.M.S and ten in Fourth B.H.M.S).
- (b) The examination procedure will include one long case and one short case to be prepared. During clinical training, each student has to be given adequate exposure to,-
1. Comprehensive case taking following Hahnemann's instructions;
 2. physical examinations (general, systemic and regional);
 3. laboratory investigations required for diagnosis of disease conditions.
 4. differential diagnosis and provisional diagnosis and interpretation of Investigation reports.
 5. Selection of similimum and general management.

Examination:**1. Theory:**

1.1	Number of papers - 02
1.2.	Marks.: Paper I- 100, Paper II-100
1.3.	Contents:
1.3.1	Paper-1: Topics of Third B.H.M.S with Homoeopathic Therapeutics
1,3,2.	Paper-II: Topics of Fourth B.H.M.S with Homoeopathic Therapeutics

2. Practical including viva voce or oral:

2.1.		Marks 200
2.2	Distribution of marks	
2.2.1	One long case	20
2.2.2	One short case	20
2.2.3	Practical records, case records, journal	30
2.2.4.	Identification of specimens (X-ray, E.C.G., etc.)	30
2.2.5	Viva voce (oral)	100
	Total	200

Note: The case reports of the students carried out during the course shall also be considered for the oral examination,

REPERTORY

Instructions:

I. (a) Repertorisation is not the end but the means to arrive at the similimum with, the help of Materia Medica, based on sound knowledge of Homoeopathic Philosophy.

(b) Homoeopathic materia medica is an encyclopedia of symptoms. No mind can memorize all the symptoms or all the drugs with their gradations.

(c) The repertory is an index and catalogue of the symptoms of the materia medica, neatly arranged in a practical or clinical form, with the relative gradation of drugs, which facilitates quick selection of indicated remedy and it may be difficult to practice Homoeopathy without the aid of repertories.

II. (a) Each repertory has been compiled on distinct philosophical base, which determines its structure.

(b) In order to explore and derive full advantage of each repertory, it is important to grasp thoroughly its conceptual base and construction and this will help student to learn scope, limitations and adaptability of each repertory.

THIRD B.H.M.S.

A. Theory:

1. Repertory: Definition, Need, Scope and Limitations.
2. Classification of Repertories
3. Study of different Repertories (Kent, Boenninghausen, Boger-Boenninghausen):
 - (a) History
 - (b) Philosophical background
 - (c) Structure
 - (d) Concept of repertorisation.
 - (e) Adaptability
 - (f) Scope
 - (g) Limitation(s)
4. Gradation of Remedies by different authors.
5. Methods and techniques of repertorisation. Steps of repertorisation.
6. Terms and language of repertories (Rubrics) cross references in other repertories and materia medica.
7. Conversion of symptoms into rubrics and repertorisation using different repertories.
8. Repertory - its relation with organon of medicine and materia medica.
9. Case taking and related topics:
 - (a) Case taking.
 - (b) Difficulties of case taking, particularly in a chronic case.
 - (c) Types of symptoms, their understanding and importance.
 - (d) Importance of pathology in disease diagnosis and individualization in relation to study of repertory.
10. Case processing
 - (a) analysis and evaluation of symptoms
 - (b) miasmatic assessment
 - (c) totality of symptoms or conceptual image of the patient
 - (d) repertorial totality
 - (e) selection of rubrics
 - (f) repertorial technique and results
 - (g) repertorial analysis

B. Practical or clinical:

1. Record of five cases each of surgery, Gynaecology and obstetrics worked out by using Kent's repertory.
2. Rubrics hunting from Kent's & Boenninghausen's repertories.

Note: There will be no Examination in the subject in Third B.H.M.S.

FOURTH B.H.M.S

A. Theory:

1. Comparative study of different repertories (like Kent's Repertory, Boenninghausen's Therapeutic Pocket Book and Boger- Boenninghausen's Characteristic Repertories, A Synoptic Key to Materia Medica).
2. Card repertories and other mechanical aided repertories- History, Types and Use.
3. Concordance repertories (Gentry and Knerr)
4. Clinical Repertories (William Boericke etc.)
5. An introduction to modern thematic repertories- (Synthetic, Synthesis and Complete Repertory and Murphy's Repertory)
6. Regional repertories
7. Role of computers in repertorisation and different softwares.

B. Practical or clinical:

Students shall maintain the following records, namely:-

1. Five acute and five chronic cases (each of medicine, surgery and obstetrics and gynaecology) using Kent's Repertory.
2. Five cases (pertaining to medicine) using Boenninghausen's therapeutics pocket book.
3. Five cases (pertaining to medicine) using Boger-Boenninghausen's characteristics repertory.
4. Five cases to be cross checked on repertories using homoeopathic softwares.

C. Examination:

There will be examination of repertory only in Fourth B.H.M.S (not in III BHMS).

1. Theory:

1.1.	Number of papers	01
1.2.	Marks	100

2. Practical including viva voce or oral:

2.1.	Marks	Marks 100
2.2	Distribution of marks	
2.2.1	One long case	30
2.2.2	One short case	10
2.2.3	Practical record or journal	10
2.2.4.	Viva voce (oral)	50
	Total	100

COMMUNITY MEDICINE

Instructions:

- I. (a) Physician's function is not limited merely prescribing homoeopathic medicines for curative purpose, but he has wider role to play in the community.
- (b) He has to be well conversant with the national health problems of rural as well as urban areas, so that he can be assigned responsibilities to play an effective role not only in the field of curative but also preventive and social medicine including family planning.
- II. This subject is of utmost importance and throughout the period of study attention of the student should be directed towards the importance of preventive medicine and the measures for the promotion of positive health.
- III. (a) During teaching, focus should be laid on community medicine concept, man and society, aim and scope of preventive and social medicine, social causes of disease and social problems of the sick, relation of economic factors and environment in health and disease.
- (b) Instructions in this course shall be given by lectures, practicals, seminars, group discussions, demonstration and field studies.

THIRD B.H.M.S.

A. Theory:

1. Man and Medicine
2. Concept of health and disease in conventional medicine and homoeopathy.
3. Nutrition and health
 - (a) Food and nutrition
 - (b) Food in relation to health and disease
 - (c) Balanced diet.
 - (d) Nutritional deficiencies, and Nutritional survey
 - (e) Food Processing
 - (f) Pasteurization of milk
 - (g) Adulteration of food.
 - (h) Food Poisoning
4. Environment and health
 - (a) Air, light and sunshine, radiation.
 - (b) effect of climate
 - (c) comfort zone
 - (d) personal hygiene
 - (e) physical exercise
 - (f) sanitation of fair and festivals
 - (g) disinfection and sterilization
 - (h) atmospheric pollution and purification of air
 - (i) air borne diseases
5. Water
 - (a) distribution of water, uses, impurities and purification
 - (b) standards of drinking water
 - (c) water borne diseases
 - (d) excreta disposal
 - (e) Disposal of deceased.
 - (f) Disposal of refuse.
 - (g) medical entomology- insecticides, disinfection, Insects in relation to disease, Insect control,
6. Occupational health
7. Preventive medicine in pediatrics and geriatrics

FOURTH B.H.M.S .

A. Theory:

1. Epidemiology

- (a) Principles and methods of epidemiology
- (b) Epidemiology of communicable diseases:
 - General principles of prevention and control of communicable diseases.
- (c) Communicable diseases: their description, mode of spread and method of prevention.
- (d) Protozoan and helminthic infections - life cycle of protozoa and helminthes, their prevention.
- (e) Epidemiology of non-communicable diseases: general principles of prevention and control of non-communicable diseases
- (f) Screening of diseases.

2. Bio-statistics

- (a) Need of biostatistics in medicine
- (b) Elementary statistical methods.
- (c) Sample size calculation
- (d) Sampling methods
- (e) Test of significance
- (f) Presentation of data
- (g) Vital statistics

3. Demography and Family Planning, Population control; contraceptive practices, National Family Planning Programme.

4. Health education and health communication

5. Health care of community.

6. International Health

7. Mental Health.

8. Maternal and Child Health

9. School Health Services

10. National Health Programs of India including Rashtriya Bal Chikitsa Karyakram.

11. Hospital waste management

12. Disaster management

13. Study of aphorisms of organon of medicine and other homoeopathic literatures, relevant to above topics including prophylaxis.

B. Practicals:

1. Milk dairy
2. Primary Health Centre
3. Infectious Diseases Hospital
4. Industrial unit
5. Sewage treatment plant
6. Water purification plant

Note:

1. For field visits, Annexure 'B' has to be kept in view.
2. Students are to maintain practical records or journals in support of above practical or field visits.
3. Reports of the above field visits are to be submitted by the students.
4. Each student has to maintain records of at least ten¹ infectious diseases.

C. Examination:

There will be examination of the subject only in Fourth B.H.M.S (and not in III BHMS). Besides theory examination there shall be a practical-or clinical examination including viva-voce as per following distribution of marks-

1. Theory -

1.1.	Number of papers - 01.
1.2.	Marks: 100

2. Practical including viva-voce oral.

2.1.		Marks 100
2.2	Distribution of marks	
2.2.1	Spotting	30
2.2.3	Journal or practical records (including field visit records)	20
2.2.3	Viva voce (oral)	50
	Total	100

BHARATI VIDYAPEETH DEEMED UNIVERSITY
HOMOEOPATHIC MEDICAL COLLEGE
Katraj-Dhankawadi, Pune – 43.

SUBJECT – HOMOEOPATHIC PHARMACY

I- BHMS

3 hours

Marks : 100

Section-I and Section – II, Q.1 and Q.5 are Compulsory.

They are for 20 marks. Then from remaining 3 questions from each section 15 marks each. 6 Students have to write any 2,

Q.No.	Section – I	Marks
1.	Short notes [any 4 out of -5 marks each]	20
2.	a] and b]	7,8
3.	a] and b]	7,8
4.	a] and b]	7,8
Section – II		
5.	Short notes [any 4 out of -5 marks each]	20
6.	a] and b]	7,8
7.	a] and b]	7,8
8.	a] and b]	7,8

PRACTICAL/ORALS

Table No.	Contents	Marks
E1	Table Viva	50
E2	Spotting	20
E2	Journal	10
E2	Herberium	05
E2	Practical with Viva	15
	Total	100

Total 100 marks exam. Divided in above headings

E1 --- Examiner – 1,

E2 --- Examiner - 2

Ist B.H.M.S. Anatomy

THEORY.

Number of Papers	02
Paper – I	100 marks
Paper – II	100 marks
Total	200 marks

Distribution of portion for Theory

Paper-I	Paper-II
1. Upper Limb	1. Lower Limb
2. Head, Neck, Face	2. Thorax
3. Brain	3. Abdomen
4. General Embryology	4. Special Embryology
	5. Histology

Day –

Marks – 100

Instructions –

1. All questions are **Compulsory**.
2. Figures to the right indicate **Full Marks**.
3. Each section to be written in the **SEPARATE Answer Book**
4. Draw neat labeled diagrams wherever necessary.

SECTION - I

Q. 1		Write short notes on Any Four of the following	[20]
	a	Head/Face	
	b	Neck	
	c	Brain	
	d	General Anatomy	
	e	General Anatomy	
Q.2		Write answer in one or two sentences	[10]
	a	Head/Face	
	b	Neck	
	c	Brain	
	d	General Anatomy	
	e	General Anatomy	
Q.3		Head, Face OR Neck	[10]
Q.4		Brain	[10]
		SECTION - II	
Q. 5		Write short notes on Any Four of the following	[20]
	a	Upper Limb	
	b	Upper Limb	
	c	General Embryology	
	d	General Embryology	
	e	General Embryology	
Q.6		Write answer in one or two sentences	[10]
	a	Upper Limb	
	b	Upper Limb	
	c	General Embryology	
	d	General Embryology	
	e	General Embryology	
Q.7		Long Question on Upper Limb OR Upper Limb	[10]
Q.8		Long Question on Upper limb OR Embryology	[10]

SECTION - I

Q. 1		Write short notes on Any Four of the following	[20]
	A	Thorax	
	B	Thorax	
	C	Thorax	
	D	Lower Limb	
	E	Lower Limb	
Q.2		Write answer in one or two sentences	[10]
	A	Thorax	
	B	Thorax	
	C	Thorax	
	D	Lower Limb	
	E	Lower Limb	
Q.3		Long Question on Lower Limb OR Lower Limb	[10]
Q.4		Long Question on Thorax	[10]
		SECTION - II	
Q. 5		Write short notes on Any Four of the following	[20]
	A	Abdomen	
	B	Abdomen/Pelvis	
	C	Histology	
	D	Histology	
	E	Special Embryology	
Q.6		Write answer in one or two sentences	[10]
	A	Abdomen	
	B	Abdomen/Pelvis	
	C	Special Embryology	
	D	Special Embryology	
	E	Special Embryology	
Q.7		Long Question on Abdomen OR Pelvis	[10]
Q.8		Long Question on Abdomen /Pelvis	[10]

IInd BHMS

Day –
Date -

Total Marks -100 marks
Time – 3 hours.

Two sections of 50 marks each

Section – I, to be based on Ist BHMS syllabus

Section – II, to be based on IInd BHMS syllabus

- Instructions :**
1. All questions are compulsory.
 2. Figures to the right indicate full marks
 3. Each section to be answered in separate answer books
 4. Answers written in inappropriate section will not be assessed

Section-1

Question No.	Questions	Marks
1	Long question	10
2	Short notes(4 out of 5)	20
3A	Long question	10
B	Long question	10

Section-II

Question No.	Question	Marks
4A	Long question based on 6 topics in theory (give choice)	9
B	Long question- drug picture (give choice)	9
5	Short notes on drug indications (4 out of 5)	16
6	Comparisons (4 out of 5)	16

Practical and oral examination, marks : 100

Examiners : 02

1. Each examiner shall conduct the examination of not more than 50 marks.
2. One examiner shall be internal and other external.

Practical mark division.

Syllabus	Marks
Case taking and case processing of one long case i.e. analysis, evaluation and formation of totality with selection of medicine, potency and repetition schedule.	30
Case taking of one short case.	10
Journal.	10
Total	50

Viva voce(oral) : 50 marks. – On syllabus of Ist & IInd BHMS.

PRACTICE OF MEDICINE & HOMOEOPATHIC THERAPEUTICS

Exam pattern

Theory: -

Number of papers -02

Marks: - paper I-100, Paper II-100

Contents:-

Paper I: - Topics of third B.H.M.S. with Homeopathic therapeutics

Paper II: - Topics of fourth B.H.M.S. with Homeopathic therapeutics

Note :- it is expected from students that the management aspects of all the clinical conditions is homeopathic while studying and writing in the paper.

Subject	Theory		Practical and oral				Grand total	
	Max marks	Pass marks	Max practical marks	Max oral marks	Total	Pass marks	Max marks	Pass marks
Practice of medicine	200	100	100	100	200	100	400	200

A. Theory: 200 Marks

There shall be two papers, each carrying 100 marks and each paper of three hours duration. Both the papers are inclusive of therapeutics. The distribution of chapter wise marks in written paper may be as follows:

Paper I

Sr.No.	Name of the System	Weightage
1	Respiratory diseases	25 marks
2	Diseases of digestive system & peritoneum	25 marks
3	Diseases concerning liver, gall –bladder and pancreas	20 marks
4	Genetic factors(co-relating diseases with the concept of chronic miasms)	05 marks
5	Immunological factors in disease with concept of susceptibility(including HIV, Hepatitis B)	10 marks
6	Disorders due to chemical and physical agents and to climatic and environmental Factors	10 marks
7	Disorders of Water and electrolyte balance	05marks

Paper II

Sr.No.	Name of the System	Weightage
1	Nutritional and Metabolic diseases	05 marks
2	Diseases of haemopietic system	10 marks
3	Endocrinal diseases	10 marks
4	Infectious diseases	05 marks
5	Diseases of Cardiovascular system	10marks
6	Diseases of urogenital tract	10 marks
7	Diseases of the Central Nervous system and peripheral nervous system	10 marks
8	Psychiatric disorders:	05 marks
9	Diseases of the locomotor system (connective tissue, bones & joints disorders)	10marks
10	Diseases of Skin & sexually transmitted diseases:	10 marks
11	Tropical diseases	05 marks

12	Paediatric disorders	05 marks
13	Geriatric disorders	05 marks

Practical including viva voce or oral:

Total Marks: 200

Distribution of marks

Table 1:-50 marks

One long case – (20 marks)	
(Complete case writing- Bed side examination	10 marks
Clinical diagnosis and remedy selection -	10marks
Practical records, case records, journal -	
	30 marks

Table 2:- 50 marks

One short case - (20 marks)	
(Complete case writing- Bed side examination	10 marks
Clinical diagnosis and remedy selection -	10marks
Identification of specimens (X-Ray, E.C.G.)-	
	30 marks

Table 3:- 50 marks

Topics of third B.H.M.S. with Homeopathic therapeutics

Table 4:- 50 marks

Topics of fourth B.H.M.S. with Homeopathic therapeutics

INSTRUCTIONS FOR PAPER SETTING

- 1) Please give weightage to each system as prescribed while setting the question papers.
- 2) There is no separate section for therapeutics.
- 3) It is expected that therapeutics should be incorporated in the question itself wherever necessary.
- 4) As far as possible do not omit any system while setting the paper.

DEPT OF COMMUNITY MEDICINE Proposed Examination pattern 2015 course

There will be examination of the subject only in Fourth B.H.M.S (and not in III BHMS). Besides theory examination there shall be a practical-or clinical examination including viva-voce as per following distribution of marks-

1. Examination of this subject to be conducted in IV-B.H.M.S. at the end of course of study in Theory and Practical Training of Community.
2. Theory paper shall be comprised of two sections of 50 marks each and optional questions shall be available in each the section.
3. Some questions with Homoeopathic concept of prophylaxis, vaccination, immunology and personal hygiene may be asked in any of the sections.
4. Practical/ oral examination shall be on spotting and identification of the specimens and matters related to community medicine.

5. Marks :

Written		Practical		Total	
Full	Pass	Full	Pass	Full	Pass
100	50	100	50	100	50

THEORY PATTERN :**SECTION-I**

Question	Pattern	Marks	Remarks
1.	A) Short question	10/9 marks	Compulsory
	B) Short question	8/9 marks	Compulsory
2.	Short notes of 4 marks	16 marks	Internal option may be given
3.	Short notes of 4 marks	16 marks	Internal option may be given
4.	Short notes of 4 or 8 marks	16 marks	Internal option may be given

SECTION-II

Question	Pattern	Marks	Remarks
1.	A) Short question	10/9 marks	Compulsory
	B) Short question	8/9 marks	Compulsory
2.	Short notes of 4 marks	16 marks	Internal option may be given
3.	Short notes of 4 marks	16 marks	Internal option may be given
4.	Short notes of 4 or 8 marks	16 marks	Internal option may be given

Out of question 2, 3 and 4 student will be given option of writing any 02 questions. Question No.5 will be compulsory as described above. Out of remaining questions namely Q. 6, 7 and 8 students will be given option of writing any 02 questions.

PRACTICAL PATTERN :

02 Examiners

01 Internal – 25 marks

01 External- 25marks

2.Practical including viva-voce/oral;	
2.1. Marks: 100	
2.2. Distribution of marks	Marks
2.2.1 Spotting	30
2.2.2 Journal or Practical record (including field visit records)	20
2.2.3 Viva voce(oral)	50
Total	100

Note: Pass marks for theory and practical will be 50 each respectively.

DURATION

Course Duration	4 years
Weeks available per year	52 weeks
Vacation	8 weeks
Gazetted holidays	3 weeks
Examination (including preparatory)	4 weeks
Available weeks	37 weeks
Hours per week	40 hours
Practical	30 hours per week
Theory	10 hours per week
Internship practical	48 hours per week
Hours available per academic year	1480 (37 week x 40 hours)

7. Microbiology	60		
8. Library work/self study			50
9. Co-curricular activities			35
Total Hours	510	855	85
Total hours = 1450			

THIRD YEAR

Subject	Theory (in hrs) (Class & lab)	Practical (in hrs) (clinical)	(In hrs)
1. Medical surgical nursing (Adult including geriatric)-II	120	270	
2. Child Health Nursing	90	270	
3. Mental Health Nursing	90	270	
4. Communication & Educational Technology	60+30		
5. Library work & Self study			50
6. Co-curricular activities			50
Total Hours	390	810	100
Total hours = 1300 hrs			

FOURTH YEAR

Subject	Theory(in hrs) (class & lab)	Practical (in hrs) (clinical)	(In hrs)
1. Midwifery & Obstetrical Nursing	90	360	
2. Community health nursing II	90	135	
3. Nursing Research	45	*	
4. Management of Nursing Service & Education	60+30		
Total Hours	315	495	
Total hours = 810 hrs			

*** Project work to be carried out during internship**

INTERN-SHIP (Integrated practice)

48 hours per week

Subject	Theory(in hrs) (class & lab)	Practical (in hrs) (clinical)	(In weeks)
1. Midwifery & Obstetrical Nursing		240	5
2. Community health Nursing II		195	4
3. Medical surgical Nursing (adult including geriatrics)		430	9
4. Child Health Nursing		145	3
5. Mental Health Nursing		95	2
6. Research project		45	1
Total Hours		1150	24
Total hours = 1150hrs			

NOTE: -

1. Internship means 8 hours of integrated clinical duties in which two weeks of evening and night shift duties are included.
2. Internship should be carried out as 8 hours per day at 48 hours per week.
3. Student during internship will be supervised by nursing teachers.
4. Fourth final examination to be held only after completion of internship.

SCHEME OF EXAMINATION

FIRST YEAR

Subject	ASSESSMENT			
	Hours	Internal	External	Total

FOURTH YEAR

SUBJECT	ASSESSMENT			
	Hours	Internal	External	Total
Theory				
1. Midwifery & Obstetrical Nursing	3	25	75	100
2. Community health nursing II	3	25	75	100
3. Nursing Research & Statistics	3	25	75	100
4. Management of Nursing Service & Education	3	25	75	100
Practical & Viva				
1. Midwifery & Obstetrical Nursing -II	3	50	50	100
2. Community Health Nursing -II	3	50	50	100

NOTE:-

1. Anatomy and physiology-Question paper will consist of section A Anatomy of 37 marks & section B Physiology should be of 38 marks.
2. Nutrition & Biochemistry- Question Paper will consist of section A Nutrition of 45 marks & section B Biochemistry of 30 marks.
3. Pharmacology, Pathology & Genetics-section A Pharmacology with 38.Marks, section B Pathology of 25 marks & genetics with 12 marks.
4. Nursing research & statistics – Nursing research should be of 50 marks & statistics of 25 marks
5. Minimum pass marks shall be 40% for English only.
6. Theory and practical exam for introductions to computers to be conducted as college exams and marks to be sent to the university for inclusion in the mark sheet
7. Minimum pass marks shall be 50% in each of theory & practical paper separately.
8. The candidate must have minimum of 80% attendance (irrespective of the kind of absence.) In theory & practical in each subject for appearing of examination.
9. A candidate must have 100% attendance in each of the practical areas before award of the degree.
10. A candidate has to pass in theory & practical exam separately in each of the paper.
11. If the candidate fails in either theory or practical exam he/she has to reappear for both the papers (Theory & practical).
12. Maximum number of attempts permitted for each paper is 3 including first attempt.
13. Candidate shall not be permitted to the subsequent higher examination unless the candidate has passed the previous examination.
14. The maximum period to complete the course successfully should not exceed 8 years.
15. Maximum number of candidates for practical examination should not exceed 20 per day.
16. All practical examinations must be held in the respective clinical areas.
17. One internal & one external examiner should jointly conduct the practical exam for each student.
18. An examiner should be a lecturer or above in a college of nursing with M.Sc.(N) in concerned subject & minimum of 3 years of teaching experience. To be an examiner for nursing foundation course faculty having M.Sc.(N) with any shall be considered.
19. Student has to pass in internal assessment and university Exam separately with 50% marks each.

**B.Sc.
NURSING
FIRST YEAR**

ENGLISH

Placement- First Year

Time:-Theory-60 hours

Course Description: The course is designed to enable students to enhance ability to comprehend spoken and written English (and use English) required for effective communication in their professional work. Student will practice their skills in verbal and written English during clinical and classroom experiences.

UNIT	CONTENT	HOURS
UNIT-1	<ul style="list-style-type: none">• Review of Grammar• Remedial study of Grammar• Building Vocabulary• Phonetics• Public Speaking	10 hrs.
UNIT-2	* Read and comprehend prescribed course books	30 hrs.
UNIT-3	* Various forms of composition <ul style="list-style-type: none">- Letter writing- Note taking- Precise writing- Nurse notes- Anecdotal records- Diary writing- Reports on health problems etc.- Resume/CV	10 hrs.
UNIT-4	* Spoken English <ul style="list-style-type: none">- Oral report- Discussion- Debate- Telephonic conversation	6 hrs.
UNIT-5	* Listening comprehension <ul style="list-style-type: none">- Media, audio, video, speeches etc.	4 hrs.

ANATOMY

Placement- First Year

Time:- Theory-60 hours

Course Description: The course is designed to enable students to acquire Knowledge of normal structure of various human body system and understand the alteration in anatomical structures in disease in disease and practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	Introduction to Anatomical terms organization of the human body - Human cell structure - Tissues – definition, types, characteristics, classification, location, function and formation - Membranes and glands – classification and structure. - Alteration in disease Application and implementation in nursing	5 hrs.
UNIT-2	The Skeletal System - Bones- types, structure, axial & appendicular skeleton - Bone formation and growth - Description of bones - Joint – classification and structure Alteration in disease Application and implication in nursing	6 hrs.
UNIT-3	The Muscular System - Types and structure of muscles - Muscle group	7 hrs.

	Alteration in disease Application and implication in nursing	
--	---	--

UNIT-4	<p>The Nervous System</p> <ul style="list-style-type: none"> - Structure of neurologia & neurons - Somatic nervous system Structure of brain, spinal chord, cranial nerves, peripheral nerves - Autonomic nervous system- (Sympathetic, parasympathetic) Structure & location <p>Alteration in disease Application and implication in nursing</p>	6 hrs.
UNIT-5	<p>The Sensory Organs</p> <ul style="list-style-type: none"> - Structure of skin, eye, ear, nose, tongue (Auditory and olfactory apparatus) <p>Alteration in disease Application and implication in nursing</p>	6 hrs.
UNIT-6	<p>Circulatory and Lymphatic system</p> <ul style="list-style-type: none"> - The circulatory system <ul style="list-style-type: none"> * Blood - Microscopic structure * Structure of heart * Structure of blood vessels- Arterial and venous system *Circulation: systemic, pulmonary, coronary. - Lymphatic system <ul style="list-style-type: none"> * Lymphatic vessels and lymph 	7 hrs.

	<ul style="list-style-type: none"> * Lymphatic tissues <ul style="list-style-type: none"> - Thymus gland - Lymph nodes - Lymphatic Nodules <p>Alteration in disease Application and implication in nursing</p>	
--	---	--

UNIT-7	<p>The Respiratory System</p> <ul style="list-style-type: none"> - Structure of the organs of respiration - Muscles of respiration Intercostals and diaphragm <p>Alteration in disease Application and implication in nursing</p>	5 hrs.
UNIT-8	<p>The Digestive System</p> <ul style="list-style-type: none"> - Structure of alimentary tract and accessory organs of digestion <p>Alteration in disease Application and implication in nursing</p>	6 hrs.
UNIT-9	<p>The Excretory System (Urinary)</p> <ul style="list-style-type: none"> - Structure of organs of urinary - System: kidney, ureters, urinary bladder, urethra, structure of skin. <p>Alteration in disease Application and implication in nursing</p>	4 hrs.
UNIT-10	<p>The Endocrine System</p> <ul style="list-style-type: none"> - Structure of pituitary, pancreas, thyroid, parathyroid, thymus and adrenal glands <p>Alteration in disease</p>	4 hrs.

	Application and implication in nursing	
UNIT-11	The Reproductive System including Breast - Structure of female reproductive organs - Structure of male reproductive organs - Structure of breast	4 hrs.

PHYSIOLOGY

Placement- First Year

Time: Theory 60 hrs.

Course Description: The course is designed to assist the students to acquire Knowledge of the normal physiology of various human body systems and under stand the alteration in physiology disease and practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	Cell physiology * Tissue – formation, repair * Membranes & gland – functions Alteration in disease Application and implication in nursing	4 hrs.
UNIT-2	Skeleton System * Bone formation and growth * Bones – functions and movements of bones of axial & appendicular skeleton, bone healing * Joints and joint movements Alteration in disease Application and implication in nursing	4 hrs.
UNIT-3	Muscular System * Muscle movements, muscle tone, physiology of muscle contraction, levels and maintenance of posture Alteration in disease Application and implication in nursing	4 hrs.
UNIT-4	Nervous System * Function of neuralgia & neurons * Stimulus & nerve-impulse- definition and mechanism * Function of brain spinal cord. Cranial & spinal nerves * Cerebrospinal fluid-composition. Circulation and function * Reflex arc, reflex action and reflexes *Autonomic function - Pain: somatic, viscera land referred. - Autonomic learning and biofeedback Alteration in disease Application and implication in nursing	7 hrs.
UNIT-5	Circulatory System * Blood formation, composition, blood group, blood coagulation * Hemoglobin : structure, synthesis and breakdown, variation of molecules, estimation * Function of heart, conduction, cardiac cycle, circulation- principles control, factors influencing BP &	8 hrs.

	<p>Pulse</p> <p>Alteration in disease</p> <p>Application and implication in nursing</p>	
UNIT-6	<p>The Respiratory System</p> <ul style="list-style-type: none"> * Functions of respiratory system * Physiology of respiration * Pulmonary ventilation, volume * Mechanics of respiration * Gaseous exchange in lungs * Carriage of oxygen & carbon dioxide * Exchange of gases in tissues * Regulation of respiration <p>Alteration in disease</p> <p>Application and implication in nursing</p>	6 hrs.
UNIT-7	<p>The Digestive System</p> <ul style="list-style-type: none"> * Functions of organ of digestive tract. Movements of alimentary tract. Digestion in mouth stomach small intestine, large intestine, absorption of food, function of liver, gall bladder and pancreas. * Metabolism of carbohydrates, protein and fat. <p>Alteration in disease</p> <p>Application and implication in nursing</p>	6 hrs.
UNIT-8	<p>The Excretory System</p> <ul style="list-style-type: none"> * Function of Kidneys, ureters, urinary bladder & urethra. * Composition of urine * Mechanism of urine formation * Function of skin * Regulation of body temperature * fluid and electrolyte balance <p>Alteration in disease</p> <p>Application and implication in nursing</p>	5 hrs.
UNIT-9	<p>The Sensory organs</p> <ul style="list-style-type: none"> * Functions of skin, eye, ear, nose, tongue. <p>Alteration in disease</p> <p>Application and implication in nursing</p>	4 hrs.
UNIT-10	<p>The Endocrine System</p> <ul style="list-style-type: none"> * Function of Pituitary, pineal body, thymus, thyroid, parathyroid, pancreas, suprarenal, placenta & ovaries & testes. <p>Alteration in disease</p> <p>Application and implication in nursing</p>	5 hrs.
UNIT-11	<p>The Reproductive system</p> <ul style="list-style-type: none"> * Reproduction of cells-DNA. Mitosis, spermatogenesis, 	5 hrs

	<p>oogenesis</p> <ul style="list-style-type: none"> * Function of female reproductive organs: function of breast, female sexual cycle * Introduction of embryology * Function of male reproductive organs, male function in reproduction male fertility system. <p>Alteration in disease Application and implication in nursing</p>	
UNIT-12	<p>Lymphatic and Immunological system</p> <ul style="list-style-type: none"> • Circulation of lymph • Immunity - Formation of T-cells & B-cells - Types of immune response - Antigen - Cytokines - Antibodies 	

NUTRITION

Placement- First Year

Time: Theory 60 hrs

Course Description: The course is designed to assist the students to acquire knowledge of Nutrition for maintenance of optimal health at different stages of life and its application for practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	<p>Introduction</p> <ul style="list-style-type: none">• Nutrition<ul style="list-style-type: none">- History- Concepts <p>* Role of nutrition in maintaining health</p> <p>* Nutritional problem in India</p> <p>* Factors affecting food and nutrition: socio-economic, cultural, tradition, production, system of distribution, life style and food habits etc.</p> <p>* Role of food and its medicinal value</p> <p>* Classification of food</p> <p>* Food standards</p> <p>* Element of Nutrition : macro and micro</p> <p>* Calorie BMR</p>	4hrs
UNIT-2	<p>Carbohydrates</p> <ul style="list-style-type: none">• Classification• Caloric value• Recommended daily allowances• Dietary Sources• Functions• Digestion, absorption and storage, metabolism of carbohydrates• Malnutrition: Deficiencies and over consumption	2 hrs.
UNIT-3	<p>Fats</p> <ul style="list-style-type: none">* Classification* Caloric Value* Recommended daily allowances* Dietary sources* Functions* Digestion, absorption and storage, metabolism of fats* Malnutrition: Deficiencies and over consumption	2 hrs.
UNIT-4	<p>Proteins</p> <ul style="list-style-type: none">• Classification• Caloric value	2 hrs.

	<ul style="list-style-type: none"> • Recommended daily allowances • Dietary sources • Functions • Digestion, absorption and storage, metabolism of carbohydrates. • Malnutrition: Deficiencies and over consumption 	
UNIT-5	<p>Energy</p> <ul style="list-style-type: none"> * Unit of energy- Kcal * Energy requirements of different categories of people * Measurement of energy * Body mass index (BMI) & basic metabolism * Basal metabolic rate (BMR) – determine the factors affecting. 	3 hrs.
UNIT-6	<p>Vitamins</p> <ul style="list-style-type: none"> • Classification • Recommended daily allowance • Dietary sources • Functions • Absorption, synthesis, metabolism, storage and excretion • Deficiencies • Hypervitaminosis 	4 hrs.
UNIT-7	<p>Minerals</p> <ul style="list-style-type: none"> * Classification * Recommended daily allowance * Dietary sources * Functions * Absorption, synthesis, metabolism, storage and exertion * Deficiencies * Over composition and toxicity 	4 hrs.
UNIT-8	<p>Water and Electrolyte Balance</p> <ul style="list-style-type: none"> * Water :- Daily requirements, regulation of water, metabolism, distribution of body water * Electrolytes: Types, sources, composition of body fluids * Maintenance of Fluid & electrolyte balance * Over Hydration dehydration and water intoxication * Electrolyte Imbalance 	3 hrs.
UNIT-9	<p>Cookery rules and preservation of Nutrients</p> <ul style="list-style-type: none"> * Principles, methods of cooking and serving <p>Preservation of nutrients</p> <ul style="list-style-type: none"> * Safe food handling – toxicity * Storage of Food * Food Preservation, food additives and its principles * Preservation of food adulteration Act(PFA) 	5 hrs.

	<ul style="list-style-type: none"> * Food standards * Preparation of simple beverages of different types of 	
UNIT-10	<p>Balanced diet</p> <ul style="list-style-type: none"> * Elements * Food groups * Recommended daily allowance * Nutritive value of food * Calculation of balanced diet for different categories of people * Planning menu * Budgeting of food * Introduction to therapeutic diet: Naturopathy=Diet 	5 hrs.
UNIT-11	<p>Role of nurse nutritional programme</p> <ul style="list-style-type: none"> • National programme related to nutrition <ul style="list-style-type: none"> - Vitamin A deficiency programme - National iodine deficiency disorders (IDD) programme - Mid-day meal programme - Integrated child development scheme • National & International agencies working towards food/nutrition <ul style="list-style-type: none"> - NIPCCD, CARE, FAQ, NIN, CFTRI (Central food technology and research institute) etc. • Assessment of nutritional status • Nutrition education and role of nurse. 	

BIOCHEMISTRY

Placement-First Year

Time: Theory 30 hrs.

Course Description: The course is designed to assist the students to acquire knowledge of the normal biochemical composition and functioning of human body and understand the alteration in biochemistry in disease for practice for practice of nursing

UNIT	CONTENT	HOURS
UNIT-1	Introduction <ul style="list-style-type: none">• Definition and significance in nursing• Review of structure, composition and function of cell• Prokaryote and Eukaryote cell organization• Microscopy	3hrs.
UNIT-2	Structure and Function of Cell membrane <ul style="list-style-type: none">• Fluid mosaic model tight junction, cytoskeleton• Transport mechanism: diffusion, osmosis, filtration, active channel, sodium pump• Acid base balance- maintenance and diagnostic tests - PH buffers	6hrs
Unit -3	Composition and Metabolism of Carbohydrates <ul style="list-style-type: none">• Types structure, composition and uses• Monosaccharide, Disaccharides, Polysaccharides oligosaccharides• Metabolism - Pathways of Glucose <ul style="list-style-type: none">- Glycolysis- Gluconeogenesis Cori's cycle Tricarboxylic acid(TCA) cycle- Glycogenolysis- Pentose phosphate- Pathways (Hexose mono phosphate)- Regulation of blood glucose level Investigation & their interpretation	6hrs

Unit -4	<p>Composition and metabolism of lipids</p> <ul style="list-style-type: none"> • Types, structure, composition and uses of fatty acids Nomenclature Roles and prostaglandin's • Metabolism of Fatty acids <ul style="list-style-type: none"> -Breakdown -Synthesis • Metabolism of Triglycerols • Cholesterol metabolism <ul style="list-style-type: none"> * Biosynthesis and its regulation <ul style="list-style-type: none"> - Bile salts and bilirubin - Vitamin D -Steroid hormones • Lipoproteins and their functions <ul style="list-style-type: none"> - VLDLs- IDLs and HDLs - Transport of lipids - Arteriosclerosis <p>Investigation and their interpretation</p>	4hrs
Unit -5	<p>Composition and metabolism of Amino acids and proteins</p> <ul style="list-style-type: none"> * Types, structure, composition and uses acids and proteins * Metabolism of amino acids and proteins <ul style="list-style-type: none"> • Protein synthesis Targeting & glycosylation • Chemotherapy • Electrophoresis • Sequencing * Metabolism of Nitrogen <ul style="list-style-type: none"> • Fixation & assimilation • Urea cycle • Heme and chlorophylls * Enzymes and co-enzymes <ul style="list-style-type: none"> • Classification • Properties • Kinetics & inhibition • Control <p>Investigation and their interpretation</p>	6hrs
Unit -6	<p>Composition and Vitamins and minerals</p> <ul style="list-style-type: none"> * Vitamins & Minerals <ul style="list-style-type: none"> - Structure - Classification - Properties - Absorptions - Storage & transportations - Normal concentration investigation and their 	2hrs

	interpretation	
Unit -7	<p>Immunochemistry</p> <ul style="list-style-type: none"> - Immune response - Structure & Classification of immune response - Mechanism of antibody production - Antigen: HLA typing - Free radical & antioxidants - Specialized proteins: Collagen Elastin Keratin Myosin, Lens Protein - Electrophoretic and quantitative determinations of immunoglobins- ELISA etc <p>Investigation and their interpretation</p>	3hrs

NURSING FOUNDATION

Placement: First Year

**Theory-265hrs
Practical- 650hrs
(200lab and 450 clinical)**

Course Description: This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical setting. It is aimed at helping the students to acquire knowledge understanding and skill in techniques of nursing and practice them in supervised clinical setting

UNIT	CONTENT	HOURS
UNIT-1	<p>Introduction</p> <ul style="list-style-type: none">* Concept of health: Health – Illness continuum* Factors influencing health* Causes and risk factors for developing illness* Body defenses : Immunity and immunization* Illness & illness behavior* Impact of illness on patient and family* Health care services: health promotion and prevention primary care, diagnosis, treatment, rehabilitation and continuing care.* Health care team* Types of health care agencies* Hospitals; Types, organization and functions* Health promotion and level of disease prevention* Primary health care and its delivery: Role of nurse.	10 hrs.
UNIT-2	<p>Nursing as a profession</p> <ul style="list-style-type: none">* Definition and characteristics of a profession* Nursing<ul style="list-style-type: none">- Definition, concepts, philosophy, objectives.- Characteristics, nature and scope of nursing practice- Function of nurse- Qualities of nurse- Categories of nursing personnel- Nursing as a profession- History of nursing in India* Values : Definition, types, values clarification and values professional nursing: caring and advocacy* Ethics :<ul style="list-style-type: none">- Definition and ethical principles- Code of ethics and professional conduct for nurse.	16 hrs.
Unit -3	<p>Hospital admission and discharge</p> <ul style="list-style-type: none">* Admission to the hospital<ul style="list-style-type: none">- Unit and its preparation admission bed	4 hrs.

	<ul style="list-style-type: none"> - Admission procedure - Special considerations - Medico-legal issues - Roles and responsibilities of the nurse * Discharge from the hospital <ul style="list-style-type: none"> - Types: Planned discharge, LAMMA and abscond, referral And transfers - Discharge planning - Discharge procedure - Special consideration - Medico- legal issues - Roles and responsibilities of the nurse - Care of the unit after discharge 	
Unit -4	<p>Communication and the nurse patient relationship</p> <ul style="list-style-type: none"> * Communication: Levels, elements, types, modes, process, factors influencing communication. <ul style="list-style-type: none"> - Methods of effective communication <ul style="list-style-type: none"> # Attending skills # Rapport building skills # Empathy skill - Barriers to effective communication * Helping relationship (NPR): dimensions of helping relationships, phases of a helping relationship * Communicating effectively with patient, families and team members and maintain effective human relation with special reference to communicating with vulnerable group (children, woman, physically and mentally challenged and elderly) * Patient teaching: Importance purpose, process, role of nurse and integrating teaching in nursing process. 	10 hrs
Unit -5	<p>The Nursing process</p> <ul style="list-style-type: none"> * Critical thinking and nursing judgment <ul style="list-style-type: none"> - Critical thinking: Thinking and learning - Competencies, attitude for critical thinking, levels critical thinking in nursing * Nursing process overview: <ul style="list-style-type: none"> Application in practice <ul style="list-style-type: none"> - Nursing process format: INC, current format - Assessment <ul style="list-style-type: none"> # Collection of data: types, sources, methods - Nursing Diagnosis <ul style="list-style-type: none"> # Identification of client problems # Nursing diagnosis statement # Difference between medical and nursing diagnosis - Planning <ul style="list-style-type: none"> - Establishing goals and expected outcomes - Selection of intervention: Protocols and standing 	15 hrs

	<p>orders</p> <ul style="list-style-type: none"> - Writing the nursing care plan <p>* Implementation</p> <ul style="list-style-type: none"> - Implementing the plan of care <p>* Evaluation</p> <ul style="list-style-type: none"> - Outcome of care - Review and modify <p>* Documentation and reporting</p>	
Unit -6	<p>Documentation and reporting</p> <ul style="list-style-type: none"> * Documentation: purpose of recording and reporting * Communication within the health care team * Types of record: ward records, medical/nursing records * Common record-keeping forms, computerized documentation * Guidelines for reporting :Factual basis, accuracy , completeness, current ness, organization, confidentiality * Methods of recording. * Reporting change –of shift reports: transfer reports, incident reports * Minimizing legal liability through effective record keeping 	4hrs
Unit -7	<p>Vital sign</p> <ul style="list-style-type: none"> * Guidelines for taking signs: * Body temperature <ul style="list-style-type: none"> - Physiology, regulation .Factor affecting body Temperature. - Assessment of body temperature: sites, equipments and technique special considerations - Temperature alterations: Hyperthermia, heat stroke, hypothermia - Hot and cold applications * Pulse <ul style="list-style-type: none"> - Physiology and regulation, characteristics of the pulse, factors affecting pulse - Assessment of pulse: sites, location, equipment and technique, Special consideration - Alteration in pulse * Respiration <ul style="list-style-type: none"> - Physiology and regulation, mechanics of breathing <p>Characteristics of the respiration, factors affecting respiration</p> <ul style="list-style-type: none"> - Assessment of pulse: site, location, equipments and technique, special consideration - Alteration in pulse. * Respiration: <ul style="list-style-type: none"> - Physiology and regulation, mechanics of breathing, characteristics, Factors affecting respiration 	15hrs

	<ul style="list-style-type: none"> - Assessment of respiration: technique, special consideration - Alteration in respiration * Blood pressure <ul style="list-style-type: none"> - Physiology and regulation, characteristics of blood pressure, Factors affecting blood pressure. - Assessment of blood pressure: equipments, technique, special consideration. - Alteration in blood pressure * Reading of vital signs 	
UNIT 8	<p>Health assessment</p> <ul style="list-style-type: none"> # Purpose # Process of health assessment <ul style="list-style-type: none"> - Health history - Physical examination # Methods- inspection., palpation, percussion, auscultation olfaction # Preparation of examination; patient and unit # General assessment # Assessment of each body system # Recording of health assessment 	30 hrs
UNIT 9	<p>Machinery equipment and Linen</p> <ul style="list-style-type: none"> - Type Disposable and reusable – linen, rubber gods, glass ware, mental, plastics, furniture machinery <p>Introduction</p> <ul style="list-style-type: none"> - Indent - Maintenance - Inventory 	5hrs

UNIT 10	<p>Meeting needs of patient</p> <p>* Basic needs (Activity of daily living)</p> <ul style="list-style-type: none"> - Providing safe and clean environment - Physical- environment, temperature humidity, noise, ventilation, light, odors, pests control, reduction of physical hazards: Fire accidents - Safety devices restraints, side rails, airways, trapeze etc. - Role of nurse in providing safe and clean environment <p>* Hygiene - Factors influencing hygiene practices</p> <ul style="list-style-type: none"> - Hygienic care: care of the skin – bath and pressure points, feet and nail, oral cavity, hair care, eyes, ear and nose - Assessment, principles, types, equipments procedure, special considerations - Patient environment : Room equipment and linen, making patient beds - Types of beds and bed making - Comport:- - Factors influencing comport - Comport devices <p>* Physiological needs;</p> <p># Sleep & rest</p> <ul style="list-style-type: none"> - Physiology of sleep - Factors affecting Sleep - Promoting rest & sleep - Sleep disorders <p># Nutrition</p> <ul style="list-style-type: none"> - Importance - Factors affecting nutritional needs - Assessments of nutritional needs variables - meeting nutritional needs principles, equipments, procedure and special considerations <ul style="list-style-type: none"> * Oral * Central : Naso/ orgastric, gastrostomy * Parental <p>* Urinary elimination</p> <ul style="list-style-type: none"> - Review of physiology of urine elimination, composition and characteristics of urine - Factor influencing urination - Alteration in urinary elimination - Types & collection of urine specimen: observation, urine testing - Facilitating urine elimination : assessment, types, 	60hrs
---------	--	-------

equipments, procedure and special considerations

- # Providing urinal & bed pan
- # Condom drainage
- # Perineal care
- # Catheterization
- # Care of urinary drainage
- # Care of urinary diversion
- # Bladder irrigation

*** Bowel elimination**

- Review of physiology of bowel elimination.

Composition and characteristics of feces.

- Factor influencing bowel elimination Alteration in bowel elimination

- Types & collection of feces specimen: observation
- Facilitating bowel elimination: assessment,

equipment, procedures and special considerations

- # Passing of flatus tube
- # Enemas
- # Suppositories
- # Sitz bath
- # Bowel wash
- # Care of ostomies

*** Mobility and immobility**

- Principles of body mechanics
- Maintenance of normal body alignment and

mobility

- Factors affecting body alignment and mobility
- Hazards associated with immobility
- Alteration in body alignment and mobility
- Nursing intervention for impaired body alignment

and mobility: assessment, types, devices used, method and special consideration, rehabilitation aspects

- # Range of motion exercises
- # Maintaining body alignment: positions
- # Moving
- # Lifting
- # Transferring
- # Walking
- # Restraints

*** Oxygenation**

- Review of cardiovascular and respiratory physiology
- Factors affecting oxygenation
- Alteration in oxygenation
- Nursing intervention in oxygenation: assessment,

types, equipments used, procedure and special consideration

- # Maintenance of patient airway
- # Oxygen administration
- # Suction
- # Inhalation: dry & moist
- # Chest physiotherapy and postural drainage
- # Pulse oxymetry
- # CPR- Basic life support

*** Fluid, electrolyte and acid-base balance**

- Review of physiological regulation of fluid

UNIT-11	<p>Infection control and clinical settings</p> <ul style="list-style-type: none"> * Infection control <ul style="list-style-type: none"> - Nature of infection - Chain of infection transmission - Defenses against infection: natural and acquired - Hospital acquired infection - Concept of asepsis: medical asepsis and surgical asepsis - Isolation precaution (barrier nursing) <ul style="list-style-type: none"> # Hand washing: simple, hand atisepsis and surgical antiseptis (scrub) # Isolation: source and protective # Personal protective equipments: types, uses and technique of wearing and removing # Decontamination of equipments and unit # Transportation of infected patients # Transmission based precautions * Biomedical waste management <ul style="list-style-type: none"> - Importance - Types of hospital waste - Hazards associated with hospital waste - Decontamination of hospital waste - Segregation and transportation and disposal 	20 hrs
UNIT-12	<p>Administration of Medication</p> <ul style="list-style-type: none"> * General principles/ considerations <ul style="list-style-type: none"> - Purpose of medications - Principles : 5 rights, special considerations, prescriptions, safety in administering medication and medication errors - Drug forms - Route of administration - Storage & maintenance of drug and nurses responsibility - Broad classification of drugs - Therapeutic effect, side effects, toxic effects, idiosyncratic reaction, allergic reaction, drug tolerance, drug interaction - Factors influencing drug action - Systems of drug measurements: metric system, apothecary system, households measurement, solution <ul style="list-style-type: none"> - Converting measurements units: Conversion within one system, conversion between system, dosage calculation - Terminologies and abbreviation used in prescription and medications. * Parenteral <ul style="list-style-type: none"> - General principles: decontamination of disposable syringes and needles 	40 hrs.

	<ul style="list-style-type: none"> - Types of parenteral therapies - Types of syringes, needles, canula and infusion sets - Protection from needles stick injuries: giving medication with the safety syringes - Routes of parenteral therapies <ul style="list-style-type: none"> # Intradermal: purpose, site, equipments, procedures, special consideration # Subcutaneous: purpose, site, equipments, procedure, special consideration # Intramuscular: purpose, site, equipments, procedure, special consideration # Intravenous: purpose, site, equipments, procedure, special consideration # Advanced techniques: epidural, intrathecal, intraosseous, intraperitoneal, intrapleural, intra arterial- role of nurse * Topical administration: purpose, site, equipments, procedure, special consideration <ul style="list-style-type: none"> - Application to skin - Application to mucus membrane # Direct application of liquids-Gargle and swabbing the throat <ul style="list-style-type: none"> # Insertion of drug into body cavity: Suppository/ medicated packing in rectum/ vagina # Instillation: Ear, eye, nasal, bladder and rectal # Irrigation : Ear, eye, bladder, vaginal and rectal # Spraying: Nose and throat * Inhalation: Nasal, oral, end tracheal / tracheal (steam, oxygen and medication) Purposes, types, equipments, procedure, special considerations <ul style="list-style-type: none"> - Recording and reporting of medication administered. 	
UNIT-13	<p>Meeting needs of pre-operative patients</p> <ul style="list-style-type: none"> * Definition and concept of pre operative nursing * Pre-operative phase <ul style="list-style-type: none"> - Preparation of patient for surgery * Intra operative <ul style="list-style-type: none"> - Operative theatre set up and environment - Role of nurse * Post operative phase <ul style="list-style-type: none"> - Recovery unit - Post operative room - Post operative care * Wounds: types, classification, wound healing process, factors affecting wound, complication of wound healing * Surgical asepsis * Care of wound ; types, equipments, procedure and special considerations 	10 hrs.

	<ul style="list-style-type: none"> - Dressing, suture care - Care of drainage - Application of bandages, binders, splints and slings - Heat and cold therapy 	
UNIT-14	<p>Meeting special needs of the patient</p> <ul style="list-style-type: none"> * Care of patient having alteration in <ul style="list-style-type: none"> - Temperature (hyper & hypothermia): Types, assessment, management - Sensorium (Unconsciousness); Assessment and management - Urinary elimination (retention & incontinence); Assessment and management - Functioning of sensory organs(visual & hearing impairment); Assessment and management - Communication method and special considerations - Mobility (physically challenged, cast); Assessment and management - Mental state (mentally challenged); Assessment and management - Communication methods and special considerations - Respiration (distress); Types, assessment, management - Comfort-(pain) nature, types, Factors influencing pain, coping , assessment& management * Treatment related to gastrointestinal system; naso-gastric suction, gastric irrigation, gastric analysis. 	15 hrs.
UNIT- 15	<p>Care of terminally ill patient</p> <ul style="list-style-type: none"> • Concepts of loss, grief, grieving process • Signs of clinical death • Care of dying patient, special considerations Advanced directives; euthanasia, will, dying declaration, organ donation etc. • Medic-legal issue • care of dead body • Equipment., procedure and care of unit • Autopsy • Embalming 	5hrs
UNIT- 16	<p>Professional nursing concepts and practices</p> <ul style="list-style-type: none"> • Conceptual and theoretical models of nursing practice introduction to models – holistic model, health belief Model, health promotion model etc. • Introduction to theories in nursing: peplum’s Henderson’s Orem. S Newman’s Roger’s and Roy’s • Linking theories with nursing process 	6hrs

Nursing Foundation practical

Placement: - First Year

Practical- 650hrs

(200 and 450 Clinical):

Course Description: This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical setting. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in supervised clinical settings

UNIT	CONTENT	HOURS
UNIT -1	<p>Hospital admission and discharge (III)</p> <ul style="list-style-type: none"> • Admission • Prepare unit for new patient • Prepare admission procedure <ul style="list-style-type: none"> New patient Transfer in • Prepare patient record <p>Discharge/Transfer out</p> <ul style="list-style-type: none"> • Gives discharge counseling • Perform discharge procedure (planned discharge, LAMMA and abscond, referrals and transfers) • Prepare records of discharge/transfer • Dismantle, and disinfect unit and equipment after discharge/transfer <p>Perform assessment</p> <ul style="list-style-type: none"> • History taking, nursing diagnosis, problem list, Prioritization goals & outcomes, selection of interventions • Write nursing care plan • Gives care as per the plan <p>Communication</p> <ul style="list-style-type: none"> • Use verbal and nonverbal communication techniques Prepare a plan for patient teaching session 	<p>200 450 Minimum practice time clinical area</p>

	<p>Write patient report</p> <ul style="list-style-type: none"> • change of shift reports, transfer reports , incident report etc • Presents patient report <p>Vital sign</p> <ul style="list-style-type: none"> • Measure, record and interpret alteration in body temperature pulse respiration and blood pressure Health assessment • Health history taking 	
--	---	--

	<ul style="list-style-type: none"> • Perform assessment <ul style="list-style-type: none"> -General - Body systems • Use various methods of physical examination • Inspection palpation, Percussion Auscultation, Olfaction • Identification of system wise deviations <p>Prepare patient's Unit</p> <ul style="list-style-type: none"> • Prepare beds <ul style="list-style-type: none"> - Open closed, occupied operation amputation - Cardiac, Fracture, burn and Fowler's bed - Pain assessment and provision for comfort <p>Use comfort devices</p> <p>Hygienic care</p> <ul style="list-style-type: none"> • Oral hygiene • Bath and care of pressure points • Hair wash pediculosis Treatment <p>Feeding</p> <ul style="list-style-type: none"> • Oral, Eternal, Naso/orogastric gastrostomy and parenteral feeding • Naso- gastric insertion suction and irrigation <p>Assisting patient in urinary elimination</p> <ul style="list-style-type: none"> • Provides urinal/bed pan • Condom drainage • Catheterization • Care of urinary drainage <p>Bladder irrigation</p> <p>Assisting bowel elimination</p> <ul style="list-style-type: none"> • Insertion of Flatus tube • Enemas • Insertion of suppository <p>Bowel wash</p> <p>Body alignment and mobility:-</p> <ul style="list-style-type: none"> - Range of motion exercises

PSYCHOLOGY

Placement: First Year

Theory-60 hrs

Course Description: This course is designed to assist the students to acquire knowledge of fundamentals of psychology and develop an insight into behavior of self, and others Further it is aimed at helping them to practice the principles and mental hygiene for promoting mental health in nursing practice

UNIT	CONTENT	HOURS
UNIT -1	Introduction <ul style="list-style-type: none">• History and origin of science of psychology• Definition & scope of psychology• Relevance to nursing• Methods of psychology	2 hrs
UNIT -2	Biology of behavior <ul style="list-style-type: none">• Body of relationship- modulation process in health and illness• Genetics and behavior-Heredity and environment• Brain and behavior- Nervous system, neurons and synapse• Association cortex, Rt and Lt hemisphere• Psychology of sensation• Muscular and glandular controls of behavior• Nature of behavior of an organism/ integrated responses	4 hrs
UNIT -3	Cognitive process <ul style="list-style-type: none">• Attention: types, determinants, duration and degree, alteration• Perception: types, determinants, duration and degree, alteration• Learning: Nature, types, learner and learning, factors influencing, laws and theories, process, transfer, study habits• Memory: Meaning, types nature, factors influencing, development theories and methods of memorizing and forgetting• Thinking: types and levels, stages of development, relationship with language and communication• Intelligence: Meaning , classification, uses, theories• Attitude Concept, types, individual difference	20 hrs.

	<p>and variability</p> <ul style="list-style-type: none"> • Psychometric assessment of cognitive processes • Alteration in cognitive processes • Application 	
UNIT -4	<p>Motivation and Emotional process</p> <ul style="list-style-type: none"> • Motivation: Meaning, concept, types, theories, motives and behavior, conflicts and frustration conflict and resolution • Emotion and stress <ul style="list-style-type: none"> - Emotion: Definition , components, change in emotions, <p>Theories, emotions in health and illness</p> <ul style="list-style-type: none"> • Stress stressors cycle. Affect adaptation and coping • Attitude meaning nature. Development factors affecting <p>- Behavior and attitudes</p> <p>- Attitudinal Change</p> <ul style="list-style-type: none"> • Psychometric assessment of emotions and attitudes • Alteration in emotions • Application 	
UNIT – 5	<p>Personality</p> <ul style="list-style-type: none"> • Definition topography, types, theories • Psychometric assessment of personality • Alteration in personality • Application 	7hrs
UNIT – 6	<p>Developmental psychology</p> <ul style="list-style-type: none"> • Psychology of people at different stages from infancy to old age • Psychology of Vulnerable individual challenged, Women, sick • Psychology of groups 	7 hrs
UNIT – 7	<p>Mental Hygiene and Mental Health</p> <ul style="list-style-type: none"> • concept of Mental Hygiene and mental health • Characteristics of mentally healthy person • Warning signs of poor mental health • Promotive and preventive mental health – Strategies and Services • Ego defense mechanism and implication • Personal and social adjustment • Guidance and counseling • Role of nurse 	8 hrs
UNIT- 8	Psychological assessment and tests	4 hrs

	* Types, development, characteristics, principles, uses, interpretation and role of nurse in psychology assessment	
--	--	--

INTRODUCTION TO COMPUTERS

Placement: First Year

Theory-45 hrs.

Course Description: This course is designed for students to develop basic understanding of uses of computers and its application in nursing.

UNIT	CONTENT	HOURS	
		Theory	Prac.
UNIT - 1	Introduction <ul style="list-style-type: none">• Concepts of computers• Hardware and software : trends and technology• Application of computers in nursing	3 hrs	----
UNIT - 2	<ul style="list-style-type: none">• Introduction to disk operating system<ul style="list-style-type: none">- DOS- Window (all version)• Introduction<ul style="list-style-type: none">- MS – word- MS – Excel with pictorial presentation- MS – Access- MS – Power point	6 hrs	20 hrs
UNIT - 3	<ul style="list-style-type: none">• Multimedia : types and uses• Computer aided teaching and testing	2 hrs	3 hrs
UNIT - 4	<ul style="list-style-type: none">• Use of internet :e-mail	1hrs	3 hrs
UNIT - 5	<ul style="list-style-type: none">• Statistical Package : types and their feature	2 hrs	2 hrs
UNIT - 6	<ul style="list-style-type: none">• Hospital management system : types and uses	1 hrs	2 hrs

B.Sc. Nursing

Second Year

SOCIOLOGY

Placement: Second Year

Theory-60 hrs.

Course Description: This course is designed to introduce the concept of sociology related to community and social institutions in India and its relationship with health. Illness and nursing

UNIT	CONTENT	HOURS
UNIT -1	Introduction <ul style="list-style-type: none">• Definition of sociology• Nature and scope of discipline• Importance and application of sociology in nursing	1hrs
UNIT -2	Individual and Society <ul style="list-style-type: none">• Society and community• Nature of Society• Difference between society and Community• Process of socialization and individualization• Personal disorganization	3hrs
UNIT -3	Culture <ul style="list-style-type: none">• Nature of Culture• Evolution of Culture• Diversity and uniformity of Culture• Culture and Civilization• Tran cultural Society• Influence on health and disease	3 hrs
UNIT – 4	Social groups and Process <ul style="list-style-type: none">• The meaning and Classification of groups• Primary and Secondary group• In –group V/s Out put, class Tribe, caste• Economic, Political, religious groups, mob, crowd, public and audience interaction and social process• Co-operation, competition, conflict• Accommodation assimilation and isolation	4hrs
UNIT – 5	Population <ul style="list-style-type: none">• Society and population	6 hrs.

	<ul style="list-style-type: none"> • Malthusian theory of population • Population explosion in India and its impact on health status • Family welfare programme 	
UNIT – 6	<p>Family and marriage</p> <ul style="list-style-type: none"> • Family Functions • Types- joint nuclear, blended and extended Family: characteristics • The modern family- changes, problems-dowry etc. Welfare services • Changes and legislation on family and marriage in India-Marriage acts. • Marriage: forms and function of marriage • Marriage and family problem in India. • Family, marriage and their influence on health and health practice 	5 hrs
UNIT-7	<p>Social Stratification</p> <ul style="list-style-type: none"> • Meaning and types of social stratification • The Indian caste system-origin and feature • Features of caste in India today • Social class system and status • Social mobility- Meaning and types • Race as a biological concept, criteria of racial classification • Salient feature of primary races- racism • Influence of class, caste and race on health and health practices 	7hrs
UNIT-8	<p>Types of communication in India (Rural, urban regional)</p> <ul style="list-style-type: none"> • Features of village community and characteristics of Indian villages – panchayat system , social dynamics • Community development project and planning • Changes in Indian rural life • Availability of health facilities in rural and its impact on health and health practice • Urban – community – features • The growth of cities ; urbanization and its impact on health and health practices • Major urban problems – urban slums • Region : problems and impact on health 	6 hrs
UNIT - 9	<p>Social change</p> <ul style="list-style-type: none"> • Nature and process of social change • Factors influencing social change: cultural 	4hrs

	<p>change, cultural lag.</p> <ul style="list-style-type: none"> • Introduction to theories of social change: linear, cyclical Marxi functional <p>Role of Nurse - change agents</p>	
UNIT – 10	<p>Social organization and social change</p> <ul style="list-style-type: none"> • Social organization : elements, types • Democratic and authoritian modes of participation Voluntary associations • Social system : definition and types of social system • Inter – relationship of institutions 	4 hrs
UNIT-11	<p>Social control</p> <ul style="list-style-type: none"> • Nature and process of social control • Political, legal, religion, educational economic , industrial and Technological system norms and values – Folkways & mores customs laws and fashion <p>Role of nurse</p>	2hrs
UNIT- 12	<p>Social Problems</p> <ul style="list-style-type: none"> • Social disorganization • Control and planning poverty housing illiteracy, food supplies prostitution rights of women and children ,venerable groups Elderly, handicapped, minority group , child labor, substance abuse, HIV/AIDS • Social welfare programme in India <p>Role of Nurse</p>	15hrs

Pharmacology

Placement: Second Year

Theory – 45Hrs.

Course Description: This course is designed to enable students to acquire understanding of pharmaco-dynamics, pharmacokinetic, principles and therapeutic and nursing implication

UNIT	CONTENT	HOURS
UNIT 1	<p>Introduction to pharmacology</p> <ul style="list-style-type: none">• Definition• Sources• Terminology used• Types, classification• Pharamacodynamics Action, therapeutic• Adverse toxic• Pharmacokinetics ablsorapti8on, interaction excretion• Review routes and principles of administration of drugs• Indian pharmacopoeia Legal issue• Rational use of drugs• Principles of therapeutics	3 Hrs
UNIT-2	<p>Chemotherapy</p> <ul style="list-style-type: none">• Pharmacology of commonly used<ul style="list-style-type: none">- Penicillin- Sources- Cephalosporins- Aminnoglycosides	6 Hrs

	<ul style="list-style-type: none"> - Macrolide and Broad spectrum antibiotics - Sulfonamides - Quinolones - Antamoebic - Antimalaria - Anthelmintics - Antiscabies agents - Antiviral and antifungal agents - Antitubercular drugs - Anti-leprosy - Anticancer drugs - Immunosuppressant <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	
UNIT- 3	<p>Pharmacology of commonly used antiseptics, disinfectants and insecticides</p> <p>Antiseptics: Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p> <ul style="list-style-type: none"> • Disinfectants • Insecticides 	2 hrs.
UNIT- 4	<p>Drug action on GI system</p> <ul style="list-style-type: none"> • pharmacology of commonly used - Antiemetics - Emetics - Purgatives - Antacids - Cholinergic - Fluid and electrolyte therapy - Anti-diarrhoeals - Histamines <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	2 hrs.
UNIT-5	<p>Drugs used on respiratory system</p> <p>* Pharmacology of commonly used</p> <ul style="list-style-type: none"> - Antiasthmatics - Mucolytics - Decongestants - Expectorants - antitussives - Bronchodilators - Antihistamines 	2 hrs.

	Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse	
UNIT- 6	<p>Drugs used in Urinary system</p> <ul style="list-style-type: none"> • Pharmacology of commonly used <ul style="list-style-type: none"> - Diuretics and ant diuretics - Urinary antiseptics - Cholinergic and anticholinergic - Acidifiers and alkalanizers <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	2 hrs.
UNIT-7	<p>Miscellaneous</p> <ul style="list-style-type: none"> • Drugs used in deaddiction • Drug used in CPR and emergency • Vitamins and minerals • Immunosuppressant • Antidotes • Antivenom • Vaccines and sera 	4 hrs.
UNIT- 8	<p>Drugs used on skin and mucus membranes</p> <ul style="list-style-type: none"> • Topical application for skin, eye, ear, nose, and buccal cavity Antipruritics <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effect, toxicity and role of nurse</p>	1 hrs.
UNIT- 9	<p>Drugs acting on nervous system</p> <ul style="list-style-type: none"> • Basic and applied pharmacology of commonly used • Analgesics <ul style="list-style-type: none"> # Non steroidal anti inflammatory drug (NSAID) • Antipyretics • Hypnotics and sedatives <ul style="list-style-type: none"> # Opiods # Non opiods # Tranquilizers # General and local anesthetics 	8 hrs.

	<p># Gases: oxygen, nitrous oxide, carbon dioxide</p> <ul style="list-style-type: none"> ● Cholinergic and anticholinergic <ul style="list-style-type: none"> - Muscle relaxants - Major Tranquilizers - Anti psychotics - Anticonvulsants - Adrenergics - Nonadnergics - Mood stablizers Acetylcholine - Stimulants <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effect, adverse effect, toxicity and role of nurse</p>	
UNIT- 10	<p>Cardiovascular drugs</p> <ul style="list-style-type: none"> ● Haematinics ● Cardio tonics ● Anti anginals ● Anti hypertensive and vasodilators ● Anti-arrhythmic ● Plasma exponders ● Coagulants and anticoagulants ● Antiplatelets and thrombolytics ● Hyplipidemics <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	5 hrs.
UNIT-11	<p>Drug use for hormonal disorders and supplementation, contraception and medical termination of pregnancy</p> <ul style="list-style-type: none"> ● Insulin and oral hypoglycemic ● Thyroid supplement and suppressants ● Steroids, antibolics ● Uterine stimulants and relaxants ● Oral contraceptives ● Other estrogen- progesterone preparation ● Corticotrophine & gonadotropines ● Adrenaline ● Prostaglandins ● Calcitonins ● Calcium salts ● Calcium regulators 	4 hrs.

	Composition, action, dosage, route, indications, contraindication, drug Interaction, side effects, adverse effects, toxicity and role of nurse	
UNIT- 12	Introduction to drug used in alternative systems of medicine * Ayurveda, Homeopathy, Unani & Sidha etc.	6hrs.

PATHOLOGY AND GENETICS

SECTION A – PATHOLOGY

**Placement; Second year
hours**

Time Theory – 30

Course Description; this course is designed to enable students to acquire knowledge of pathology of various disease conditions and apply this knowledge in practice of nursing

UNIT	CONTENT	TIME (HRS)	
UNIT - 1	INTRODUCTION <ul style="list-style-type: none"> • Importance of study of pathology • Definition of terms • Methods of technique • Cellular and tissue changes • Infiltration and regeneration • Inflammation and infection • Wound healing • Vascular changes 	Thr. 3	Pr

	<p>Cellular growth , Neoplasms</p> <ul style="list-style-type: none"> • Normal and cancer cell • Benign and Malignant growth • In situ carcinoma <p>Disturbances in fluid and electrolyte imbalance</p>		
UNIT -2	<p>Special pathology</p> <ul style="list-style-type: none"> • Pathological changes in disease conditions of various systems : • Respiratory tract Tuberculosis , Bronchitis, pleural effusion and pneumonia , Lung abscess Emphysema, Bronchiectasis. Bronchial asthma , Chronic Chronic obstructive pulmonary disease & tumors <p>Cardio – vascular System</p> <ul style="list-style-type: none"> • Pericardial effusion • Rheumatic heart disease • Infective endocarditic, atherosclerosis • Ischemia, infarction & aneurysm <p>Gastro Intestinal Tract</p> <ul style="list-style-type: none"> • Petic ulcer, typhoid • Carcinoma of GI tract-buccal, esophageal • Gastric and intestinal 	10	5

	<p>Liver Gall bladder & pancreas</p> <ul style="list-style-type: none"> • Hepatitis, Chronic, liver abscess, cirrhosis • Tumors of liver gall bladder and pancreas • Cholecystitis <p>Kidneys and Urinary Tract:</p> <ul style="list-style-type: none"> • Glumerulonephritis, Pyelonephritis • Calculi, renal failure, renal carcinoma & cystitis <p>Male genital systems</p> <ul style="list-style-type: none"> • Cryptorchidism, testicular atrophy • Prostatic hyperplasia carcinoma penis,& prostrate <p>Female genital system</p> <ul style="list-style-type: none"> • Fibroids • Carcinoma cervix and endometrium • Vesicular mole, Choriocarcinoma • Ectopic gestation 		
--	--	--	--

	<ul style="list-style-type: none"> • Ovarian cyst & tumors <p>Cancer Breast</p> <p>Central Nervous System</p> <ul style="list-style-type: none"> • Hydrocephalus, Meningitis, Encephalitis • Vascular disorders- thrombosis, embolism • Stroke, paraplegia, Quadraplegia • Tumors, meningiomas- gliomas <p>Metastatic tumors</p> <p>Skeletal system</p> <ul style="list-style-type: none"> • Bone healing, osteoporosis, osteomyelitis <p>Arthritis & tumors</p>		
UNIT-3	<p>Clinical pathology</p> <ul style="list-style-type: none"> • Various blood and bone marrow test in assessment and monitoring of disease conditions • Hemoglobin • RBC, White cell & platelet counts • Bleeding time, clotting time and prothrombin time • Blood grouping and cross matching • Blood Chemistry • Blood culture • Serological and immunological test • Other blood test • Examination of bone marrow • Methods of collection of blood specimen for various clinical pathology, biochemistry, microbiology tests, <p>Inference and normal values</p>	4	3
UNIT 4	<p>Examination of body cavity fluids, transudates and exudates</p> <ul style="list-style-type: none"> • The laboratory tests used in CSF analysis • Examination of other body cavity fluids transudates and exudates sputum, wound discharge etc • Analysis of gastric and duodenal contents • Analysis of semen sperm count, motility and morphology and their importance in infertility 	2	1
UNIT- 5	<p>Urine and Faeces</p> <p># Urine</p> <ul style="list-style-type: none"> • Physical characteristics • Analysis • Culture and sensitivity 	1	1

	# Faeces <ul style="list-style-type: none"> • characteristics • Stool examination: occult blood, Ova, parasite and cyst, reducing substances etc. Methods of collection for various tests, inference and normal values		
--	--	--	--

SECTION –B GENETICS

Placement: Second Year

Theory-15 hours

Course: Description: This course is designed to enable students to acquire understanding of Genetics, its role in causation and management of defects and diseases

UNIT	CONTENT	TIME (HRS)
UNIT -I	Introduction <ul style="list-style-type: none"> • Practical application of genetics in Nursing 	3

	<ul style="list-style-type: none"> • Impact of genetic condition on Families • Review of cellular division mitosis and meiosis • Characteristics and structure of genes • Chromosomes and sex determination • Chromosomal aberration patterns of inheritance <ul style="list-style-type: none"> # Medallion theory of inheritance # multiple allots and blood groups # Sex linked inheritance # Errors in transmission (Mutation) 	
UNIT- II	<p>Maternal, prenatal and genetic influence on development of defects and disease</p> <ul style="list-style-type: none"> • Condition affecting the mother genetic and infections • Consanguinity atopy • Prenatal nutrition and food allergies • Maternal age • Maternal drugs therapy • Prenatal testing and diagnoses • Effect of radiation, drugs and chemicals • Infertility • Spontaneous abortion • Neural tube defects and the role of folic acid in lowering the risk • Downs syndrome(Trisomy 21) 	3
UNIT- III	<p>Genetic testing in neonates and children</p> <ul style="list-style-type: none"> • Screening for <ul style="list-style-type: none"> # Congenital abnormalities # Development delay # Dysmorphism 	2
UNIT- IV	<p>Genetic conditions of adolescents and adults</p> <ul style="list-style-type: none"> • Cancer genetics Familial Cancer • Inborn errors of metabolism • Blood group alleles and hematological disorder • Genetic haemochromatosis • Huntington's disease • Mental illness 	2
UNIT V	<p>Services related to Genetics</p> <ul style="list-style-type: none"> • Genetic testing • Human genome project • Gene therapy • The Eugenics movement • Genetic Counseling • Legal and Ethical issues • Role of nurse 	5

**Medical and Surgical
(Adult including Geriatrics)**

Placement: Second Year

**Time: theory – 210 hours
Practical -720hours**

Course Description: - The purpose of this course is to acquire knowledge and develop proficiency in caring for patients with medical and surgical disorders in verities of health care settings and at home

UNIT	CONTENT	TIME(HRS)
UNIT – 1	<p>INTRODUCTION</p> <ul style="list-style-type: none"> • Introduction to medical surgical nursing – evolution and trends of medical and surgical nursing • Review of concepts of health and illness Disease – concepts. Diseases (ICD -10 or later version) Acute illness Chronic illness. Stages of illness. • Review of Concepts of comprehensive nursing care in medical surgical conditions based on nursing process. • Role of nurse patient and family in care of adult patient • Role and responsibilities of a nurse in of medical and surgical settings. Settings • Outpatient department • In - patient unit • Intensive care unit • Home and Community • Introduction to of Medical and surgical asepsis <ul style="list-style-type: none"> ▪ Inflammation and infection ▪ Wound healing ▪ Care of Surgical patient ▪ Pre-operative ▪ Intra-operative ▪ Post-operative 	15
UNIT- II	<p>Common signs and symptoms and management</p> <ul style="list-style-type: none"> • Fluid and electrolyte imbalance • Vomiting • Dyspnea and cough, respiratory obstruction • Fever • Shock • Unconsciousness, Syncope • Pain • Incontinence • Edema • Age related problem- Geriatric 	15
UNIT- III	<p>Nursing management of Patients (adults including elderly) with respiratory problems</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of respiratory 	20

	<p>systems</p> <ul style="list-style-type: none"> • Nursing Assessment – History and physical assessment • Etiology, Pathophysiology, Clinical manifestations diagnosis, treatment modalities and medical - surgical, dietetics & nursing management of adults including elderly with. • Upper Respiratory tract infections • Bronchitis • Asthma • Emphysema • Empyema • Atelectasis • Chronic Obstructive Pulmonary Diseases(COPD) • Broncheectasis • Pneumonia • Pulmonary tuberculosis • Lung abscess • Pleural effusion • Cysts and tumors • Chest injuries • Respiratory arrest and insufficiency • Pulmonary embolism <p>Special therapies, alternative therapies Nursing procedures Drugs used in treatment of respiratory disorders</p>	
Unit- IV	<p>Nursing management of Patients (adults including elderly) with disorders of digestive systems</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of digestive systems • Nursing Assessment – History and physical assessment • Etiology, Pathophysiology clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management ❑ Disorders of- oral cavity- lips, gums, tongue, salivary glands and teeth ❑ Oesophagus - inflammation, structure obstruction, bleeding and tumors. ❑ Stomach and Duodenum- hiatus hernia, gastritis, peptic ulcer, duodenum ulcer, bleeding, tumours, pyloric stenosis ❑ Small intestinal disorders-Colitis inflammation and infection, enteritis, obstruction, bleeding and tumour and perforation ❑ Large intestinal disorders- Colitis inflammation and infection, enteritis, obstruction, tumour and lump 	

	<ul style="list-style-type: none"> <input type="checkbox"/> Hernias <input type="checkbox"/> Appendix- inflammation, mass, abscess, rupture <input type="checkbox"/> Anal & Rectum, hemorrhoids, fissures and fistulas <input type="checkbox"/> Peritonitis/acute abdomen <input type="checkbox"/> Pancreas: inflammation, cyst, abscess and tumour. <input type="checkbox"/> Liver: inflammation, cyst, abscess, cirrhosis, portal hypertension, hepatic failure and tumour <input type="checkbox"/> Gall Bladder: inflammation, obstruction, stones and tumour. <p>Special therapies, alternative therapies Nursing procedures Drug used in treatment of disorders of digestive systems.</p>	
Unit V	<p>Nursing management of patients (adults including elderly) with blood and cardio vascular problems.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of blood and cardio vascular system. • Nursing Assessment- History and physical assessment • Etiology pathphysiology Clinical manifestations diagnosis treatment modalities and medical surgical dietetics & nursing management of , • Vascular system • Hypertension hypotension • Artherosclerosis • Raynaud's disease • Aneurysm and peripheral vascular disorder <p>Heart</p> <ul style="list-style-type: none"> • Coronary artery disease • Ischemic Heart Disease • Coronary arteriosclerosis • Angina pectoris • Myocardial infraction • Muscular disorders of the heart • Congenital and acquired • Rheumatic Heart diseases <p>Endocarditis, pericarditis/myocarditis</p> <ul style="list-style-type: none"> • Cardio Myopathies • Cardiac dysrhythmias, Heart Block • Congestive cardiac failure <ul style="list-style-type: none"> <input type="checkbox"/> Cor-pulmonale, pulmonary edema, cardiogenic shock cardiac tamponade • Cardiac emergencies and arrest • Cardio pulmonary Resuscitation (CPR) • Blood 	30

	<ul style="list-style-type: none"> <input type="checkbox"/> Anemia's <input type="checkbox"/> Polycythemia <input type="checkbox"/> Bleeding disorders, clotting factors defects and platelets defects <input type="checkbox"/> Thalassemia <input type="checkbox"/> Leukaemias <input type="checkbox"/> Leukopenias and agranulocytosis <input type="checkbox"/> Lymphomas <input type="checkbox"/> Myelomas • Special therapies <ul style="list-style-type: none"> <input type="checkbox"/> Blood transfusion, safety checks, procedure and requirements, management of adverse transfusion, reaction, records for blood transfusion <input type="checkbox"/> Management and counseling of blood donors phlebotomy procedure, and post donation management Blood bank functioning and hospital transfusion committee Bio safety and waste management in relation to Blood transfusion <input type="checkbox"/> Role of a nurse in organ donation, retrieval and banking Alternative therapies Nursing procedures Drug used in treatment of blood and cardio vascular disorders. 	
Unit-VI	<p>Nursing management of patients (adults including elderly) with Gento-Urinary problems.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of Gento-Urinary systems. • Nursing assessment-History and physical assessment • Etiology, pathophysiology clinical manifestations diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of- • Nephritis • Nephrotic syndrome • Nephrosis • Renal calculus • Tumours • Acute renal failure • Chronic renal failure • End stage renal disease • Dialysis, renal transplant • Congenital disorders, urinary infections • Benign prostatic hypertrophy • Disorders of ureter, urinary bladder and urethra-inflammation, infection, structure, obstruction, tumour, prostrate <p>Special therapies, alternative therapies</p>	10

	<p>Nursing procedures</p> <p>Drug used in treatment of disorders of Gentic-Urinary systems</p>	
UNIT-VII	<p>Nursing management of disorders of male (adults including elderly) Reproductive system</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of male reproductive system • Nursing Assessment – History and physical assessment • Etiology, pathophysiology clinical manifestations diagnosis treatment modalities and medical, surgical dietetics & nursing management of male reproductive system • Congenital malformations , cryptorchidism • Hypospadiasis Epispadiasis • Infection • Testis and adjacent structures • Penis • Prostate inflammation, infection hypertrophy tumour • Sexual dysfunction • Infertility • Contraception • Breast gynaecomastia tumour • Climacteric Changes. Special theories alternative therapies • Nursing procedures • Drugs used in treatment of disorders of male reproductive system 	5
UNIT-VIII	<p>Nursing management of patients (adults including elderly) with disorders of endocrine systems</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of endocrine system • Nursing Assessment -History and physical assessment Etiology, pathophysiology clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of- <ul style="list-style-type: none"> <input type="checkbox"/> Disorders of Thyroid and parathyroid <input type="checkbox"/> Diabetes mellitus <input type="checkbox"/> Adrenal tumour <input type="checkbox"/> Pituitary disorders <p>Special therapies, alternative therapies</p> <p>Nursing procedures.</p> <p>Drugs used in treatment of disorders of endocrine systems</p>	15
UNIT-IX	<p>Nursing management of patients (adults including elderly)</p>	10

	<p>with disorders of integumentary system</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of integumentary system • Nursing Assessment History and physical assessment • Etiology, pathophysiology clinical manifestations, diagnosis treatment modalities and medical, surgical, dietetics & nursing management of skin and its appendages <ul style="list-style-type: none"> <input type="checkbox"/> Lesions and abrasions <input type="checkbox"/> Infection and infestations, Dermatitis <input type="checkbox"/> Dermatoses: Infectious and infectious “ Inflammatory Dermatoses” <input type="checkbox"/> Acne Vulgaris <input type="checkbox"/> Allergies and Eczema <input type="checkbox"/> Psoriasis <input type="checkbox"/> Malignant melanoma <input type="checkbox"/> Alopecia <p>Special therapies, alternative therapies Nursing procedures Drug used in treatment of disorders of integumentary system.</p>

MEDICAL SURGICAL NURSING

(Adult including geriatrics)- I

Practical

Placement: Second Year

times: 720 hours

AREA	SKILLS	DURATON (in Weeks)
General Medical Ward (Respiratory, Endocrine, Renal, Hematology)	<ul style="list-style-type: none"> • Assessment of the patient <ul style="list-style-type: none"> - Taking history - Perform general and specific Examination - Identify alteration and deviations • Practice Medical Surgical asepsis Standard safety Measures • Administer medications <ul style="list-style-type: none"> - Oral, IV M Subcutaneous • IV Therapy <ul style="list-style-type: none"> - IV Canulation - Maintenance and Monitoring • Oxygen therapy by different Methods • Mobilization • Chest Physiotherapy • Naso gastric Feeding • Assist in common diagnostic • Perform/Assist in therapeutic procedures • Blood and c component therapy • Throat suctioning • Collect specimen for common investigations • Maintain elimination <ul style="list-style-type: none"> - Catheterization - Bowel wash - Enema - Urinary drainage • Maintain intake output and documentation • Counsel land teach related to specific disease conditions 	6

General Surgical Ward (Gl Urinary,	<ul style="list-style-type: none"> • practice medical surgical asepsis • Standard safety Measures 	6
------------------------------------	---	---

CTVS)	<ul style="list-style-type: none"> • Pre- operative preparation of the patients • Post operative care <ul style="list-style-type: none"> - Receiving patient , assessment - Monitoring care • Care of wounds and drainage • Sutures removal • Ambulating and exerciser • Naso gastric aspiration • Care of chest drainage • Ostomy care <ul style="list-style-type: none"> - Gastrostomy - Colostomy - Entrostomy • Blood component and therapy • Practice Universal precaution 	
Cardiology Ward	<ul style="list-style-type: none"> • Physical examination of the cardio vascular system recoding and interpreting ECG • Monitoring of patient • Preparation and assisting in non- invasive and invasive diagnostic procedures • Administer cardiac drugs • Cardio pulmonary resuscitation • Teach patient and families • Practice medical and surgical asepsis standard safety measures 	2
Skin and Communicable disease ward	<ul style="list-style-type: none"> • Assessment of patient with skin disorders • Assist in diagnostic and therapeutic procedures • Administer topical medication • Practice medical and surgical asepsis standard safety measures • Use of personal protective equipment (PPE) • Give medicated baths • Counseling HIV positive patient • Teach prevention of infection disease 	1
Orthopedic Ward	<ul style="list-style-type: none"> • Assessment of orthopedic patient • Assist in application of plaster cast and removal of cast • Apply skin traction, buck's traction • Assist in application and removal of prosthesis • Physiotherapy and range of motion exercises (ROM) muscle strengthening exercises • Crutch maneuvering technique • Activities of daily living 	2

Operation theatre

- Ambulance
- Teach and counsel patients and families
- Scrubbing, gowing, gloving
- Identify instruments
- Suturing
- Material for common operations
- Disinfection, carbolization, Fumigation
- Preparation of instrument sets for common operations
- Sterilization of sharp and other instruments
- Prepare OT table depending upon the operation
- Positioning and monitoring of the patient
- Endotracheal intubation
- Assisting in minor and major operations
- Handling specimens
- Disposal of waste as per guidelines.

6

INTRENSHIP

TIME: 260 hrs. (9WEEKS)

ICU, CCU, CARDIAC. O T	<ul style="list-style-type: none"> • Assist in arterial Puncture for blood gas analysis • Perform ECG and interpret accordingly • Conduct and analysis Pulse toiletry • care with artificial airway • Assist in en tracheal incubation • Setting up ventilators • Drugs Sheet • Observation of special procedure in OT 	2
Neuro, ICU,ITU,OT	<ul style="list-style-type: none"> • Assess neurological status • Implement care to head injury spinal injury • Drug sheet • Pre and post operative care with neureo surgery patients 	2
Burns and plastic reconstructive surgery	<ul style="list-style-type: none"> • Nursing care 	2
OT, Laparoscopic Orthopedic, Eye, ENT		3

COMMUNITY HEALTH NUSING –I

Placement: Second Year

Theory- 90hrs

Practical – 135 hours

Course: description: This course is designed for students to appreciate principles of promotion and maintenance of health

UNIT	CONTENT	HOURS
UNIT- 1	Introduction <ul style="list-style-type: none"> • Community health nursing • Definition, concept and dimensions of health • Promotion of health • Maintenance of health 	2hrs
UNIT -2	Determinations of health <ul style="list-style-type: none"> • Eugenic • Environment <ul style="list-style-type: none"> - physical air, light ventilation, water, housing sanitation, disposal of waste, disposal of dead bodies forestation noise climate , communication infrastructure facilities and linkage - Acts regulating the environment: National pollution control board - Bacterial and viral agents, host carriers and immunity arthropods and rodents • food hygiene : Production, preservation, purchase, preparation, consumption • act Regulation food hygiene- prevention and food adulteration act, drug and cosmetic act • Socio-cultural <ul style="list-style-type: none"> - customs - Marriage system - Family structure - Status of special group females,. children elderly, challenged groups and sick persons • Life style • Hygiene • Physical activity <ul style="list-style-type: none"> - Recreation and sleep - Sexual life - Spiritual life philosophy 	20hrs

	<ul style="list-style-type: none"> - Self reliance - Dietary pattern - Education - Occupation • Financial management <ul style="list-style-type: none"> - Income - Budget - Purchasing power - Security 	
UNIT-3	<p>Epidemiology</p> <ul style="list-style-type: none"> • Definition: concept, aims, scope, uses and terminology used in epidemiology • Dynamics of disease transmission: epidemiological triad • Morbidity and mortality: measurements • Level of prevention • Methods of epidemiology <ul style="list-style-type: none"> - Descriptive - Analytical: Epidemic investigation - Experimental 	10 hrs.
UNIT-4	<p>Epidemiology and nursing management of common communicable disease</p> <ul style="list-style-type: none"> • Respiratory infection <ul style="list-style-type: none"> - Small pox - Chicken pox - Measles - Influenza - Rubella - ARI's and pneumonia - Mumps - Diphtheria - Mumps - Diphtheria - Whooping cough - Meningococcal meningitis - Tuberculosis - SARS • Intestinal infection <ul style="list-style-type: none"> - Poliomyelitis - Viral Hepatitis - Cholera - Diarrhoeal disease - Typhoid fever - Food poisoning - Amoebiasis 	25 hrs.

	<ul style="list-style-type: none"> - Hook worm infection - Ascariasis - Dracunculiasis • Arthropods infection <ul style="list-style-type: none"> - Dengue - Malaria - Filariasis • Zoonoses <p>Viral</p> <ul style="list-style-type: none"> - Rabies - Yellow fever - Japanese encephalitis - Kyasnur forest disease <ul style="list-style-type: none"> • Bacterial <ul style="list-style-type: none"> - Brucellosis - Plague - Human relationship - Anthrax - Leptospirosis • Rickettsial disease <ul style="list-style-type: none"> - Rickettsial zoo noses - Scrub typhus - Tick typhus - Q fever • Parastic Zoonoses <ul style="list-style-type: none"> - Taeniasis - Hydatid disease - Lsieshmaniasis • Surface infection <ul style="list-style-type: none"> - Trachoma - Tetanus - Leprosy - STD & RTI - Yaws - HIV/AIDS <p>Any other</p>	
UNIT-5	<p>Epidemiology and nursing management of non communicable disease</p> <ul style="list-style-type: none"> • Malnutrition: under nutrition, over nutrition, nutritional deficiencies • Anemia • Hypertension • Stroke • Rheumatic: heart disease • Coronary heart disease 	10 hrs.

	<ul style="list-style-type: none"> • Cancer • Diabetes mellitus • Blindness • Accidents • Mental illness • Obesity • Iodine deficiency • Fluorosis • Epilepsy 	
UNIT-6	<p>Demography</p> <ul style="list-style-type: none"> • Definition concept and scope • Method of collection analysis and interpretation of demographic data • Demographic rates and ratio 	6hrs
Unit -7	<p>Population and its control</p> <ul style="list-style-type: none"> • Population explosion and its impact on social, economic development of individual society and country • Population control: <ul style="list-style-type: none"> - Overall development : Women empowerment, social economic and educational devolvemnt - Limiting family size - Promotion of small family norm - Methods spacing (natural, biological chemical mechanical methods etc) - Terminal surgical methods - Emergency contraception 	17hrs

COMMUNITY HEALTH NURSING –I PRACTICAL

Placement: second Year

Practical 135 hours

AREAS	SKILLS	DURATION (in weeks)
Community Health nursing	<ul style="list-style-type: none">• Use techniques of interpersonal relation• Identification of health determinants of community• History taking• Physical examination• Collect specimens- sputum, malaria smear• Perform simple lab test at center blood for hemoglobin and sugar Urine for albumin and sugar• Administer vaccines and medications to adults• Counsel and teach individual family land community<ul style="list-style-type: none">- Nutrition- Hygiene- Self- health monitoring- Seeking health services- Healthy life style- Family welfare methods- Health promotion	2 weeks urban and 2 weeks rural

MICROBIOLOGY

Placement:

theory: 60 hrs (Theory 45+15 lab)

Course:- Description: This course is designed to enable students to acquire understanding of fundamentals for microbiology and identification of various microorganism . It also provides opportunities for practicing infection Control measures in Hospital and Community settings

UNIT	CONTENT	HOURS	
		Th.	Pr.
UNIT-1	Introduction <ul style="list-style-type: none">• Importance and relevance to nursing• Historical prospective• Concepts and terminology• Principles of microbiology	5hrs	----
UNIT 2	General Characteristics of microbes <ul style="list-style-type: none">• Structure and classification of microbes• Morphological types• Size and form of bacteria• Motility• Colonization• Growth and nutrition of Microbes<ul style="list-style-type: none">- Temperature Moisture	10hrs	5 hrs

	<ul style="list-style-type: none"> - Blood and body fluids • Laboratory methods for identification fo micro organisms • Staining techniques, gram staining acid fast staining hanging drop0 preparation • Culture various medias - 		
UNIT -3	<p>Infection control</p> <ul style="list-style-type: none"> • Infection Sources portals of entry and exist, transmission • Asepsis • Disinfection: Types and methods • Sterilization : Types and methods • Chemotherapy and antibiotics • Standard safety measures • Biomedical waste management • Role of nurse • Hospital acquired infection • Hospital infection control programme <ul style="list-style-type: none"> - Protocols collection of samples preparation of report and status for rate of infection in the unit / hospital nurse accountability continuing education etc. 	10 hrs	2hrs
UNIT -4	<p>Pathogenic organisms</p> <ul style="list-style-type: none"> • Micro organisms <ul style="list-style-type: none"> - Cocci - Gram positive and gram negative - Bacilli- Gram positive and gram negative - Spirochete - Mycoplasma - Rickettsiae - Chlamyaide • viruses • Fungi- Superficial and deep mycosi8s • Parasites • Rodents and victors <ul style="list-style-type: none"> Characteristics sources portal of entry, transmission of Infection identification of disease production organisms Collection handling and transportation of various specimens 	12hrs	4 hrs
		8 hrs	4 hrs
Unit -5	<p>Immunity</p> <ul style="list-style-type: none"> • Immunity- types, classification • Antigen and antibody reaction • Hypersensitivity- skin test • Serological test • Immunoprophylaxis 	8 hrs.	4 hrs.

- vaccines & sera- types and classification, storage and handling, cold chain
- Immunization for various disease
- Immunization schedule

B.SC.

NURSIG

THIRD YEAR

MEDICAL SURGICAL NURSING
(ADULT INCLUDING GERIATICS)- II

Placement: third Year

Theory – 12 hrs
Practical – 270 hours

Course description: the purpose of this course is to acquire knowledge and develop proficiency in caring for patient with medical surgical disorders in various health care settings and at home

UNIT	CONTENT	HOURS
UNIT-1	<p>Nursing management of patient with disorders of Ear, Nose and throat</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of the ear, nose and throat • Nursing assessment History and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of ear, nose and throat disorders <p style="padding-left: 40px;"># External ear deformities otalgia, foreign bodies and tumors</p> <p style="padding-left: 40px;"># Middle ear impacted wax, tympanic membrane perforation, otitis media, tumors</p> <p style="padding-left: 40px;"># Inner ear Meniere's disease, labyrinthitis, ototoxicity, tumors</p> <p style="padding-left: 40px;"># Upper airway infections: Common cold sinusitis, rhinitis, and adenoiditis, peritonsillar abscess, laryngitis</p> <ul style="list-style-type: none"> • Upper respiratory airway • Nasal obstruction, laryngeal obstruction, cancer of the larynx • Cancer of the oral cavity • Speech defects and speech therapy • Deafness • Prevention, control and rehabilitation • Hearing aids, implanted hearing devices <p>Special therapies Nursing procedures Drug used in treatment of disorders of ear, nose and throat. Role of nurse communication with hearing impaired and muteness</p>	15 hrs.
UNIT- 2	<p>Nursing management of patient with disorders of Eye</p> <ul style="list-style-type: none"> • Review of anatomy, physiology of the eye • Nursing management-history and physical assessment • Etiology, pathophysiology, clinical, diagnosis, treatment modalities and medical and surgical nursing management of the eye disorders <p style="padding-left: 40px;"># Refractive errors</p> <p style="padding-left: 40px;"># Eyelids- infection, tumors and deformities</p> <p style="padding-left: 40px;"># Conjunctiva- inflammation and infection, bleeding</p>	15 hrs.

	<ul style="list-style-type: none"> # Cornea- inflammation and infection # Lens- cataract # Glaucoma # Disorders of posterior chamber and retina: retinal and vitreous problems # Retinal detachment # Ocular emergency and their prevention • Blindness • National blindness control program <ul style="list-style-type: none"> # Eye banking # Eye prostheses and rehabilitation <p>Role of a nurse- Communication with visually impaired patient, eye camps</p> <p>Special therapies</p> <p>Nursing procedures</p> <p>Drugs used in treatment of disorder of eye</p>	
UNIT-3	<p>Nursing management of patient with neurological disorders</p> <ul style="list-style-type: none"> # Review of anatomy and physiology of the neurological system • Nursing assessment- history and physical and neurological assessment and Glasgow coma scale • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of neurological disorders • Congenital malformation • Headache • Head injuries • Spinal injuries <ul style="list-style-type: none"> # Paraplegia # Hemiplegia # Quadraplegia • Spinal cord compression- herniation of in vertebral disc • Tumors of the brain and spinal cord • Intra cranial and cerebral aneurysms • Infection: <ul style="list-style-type: none"> # Meningitis, encephalitis, brain, abscess, neurocysticerosis • Movement disorders <ul style="list-style-type: none"> # Chorea # Seizures # Epilepsies • Cerebro vascular accidents (CVA) • Cranial, spinal neuropathies- Bells palsy trigeminal neuralgia • Peripheral Neuropathies Guillainbarr'e syndrome • Myasthenia gravis • Multiple sclerosis 	16 hrs.

	<ul style="list-style-type: none"> • Degenerative diseases <ul style="list-style-type: none"> #Delirium # Dementia # Alzheimer’s disease # Parkinson’s disease • Management of unconscious patient and a patient with stroke • Role of nurse in communicating with patient having neurological deficit • Rehabilitation of patient with neurological deficit • Role of nurse in long stay facility (institution) and at home special therapies • Nursing procedures • Drug used in treatment of neurological disorders. 	
UNIT-4	<p>Nursing management of patients with disorder of female reproductive system.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of female reproductive system. • Nursing assessment- History and physical assessment • Breast self examination • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of disorder of female reproductive system • Sexuality and reproductive health • Menstrual disorders: Dysmenorrhea, amenorrhea, premenstrual syndrome • Abnormal uterine bleeding: menorrhagia, metrorrhagia • Pelvic Inflammatory disease • Ovarian and fallopian tube disorders: infection, cysts, tumors • Uterine and cervical and disorders: endometriosis, polyps, fibroids, cervical and uterine tumors uterine displacement, cystocele/ urethrocele/ rectocele • Vaginal disorders: infection and discharges fistulas • Vulvular disorders: infection, cysts and tumors • Diseases of breasts: deformities, infection cysts and tumors • Menopause and hormonal replacement therapy • Infertility • Contraception: types, methods, risk and effectiveness <ul style="list-style-type: none"> # Barrier methods, intra uterine device, hormonal, post conceptional methods etc. # Terminal methods • Sterilization • Emergency contraception methods • Abortion- natural, medical and surgical abortion-MTP Act • Toxic shock syndrome • Injuries and trauma: Sexual Violence 	16 hrs.

	<p>Special therapies Nursing procedures Drug used in treatment of gynecological disorders National family welfare programme</p>	
UNIT-5	<p>Nursing management of patient with burns, reconstructive and cosmetic surgery</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of the skin and connective tissues and various deformities • Nursing assessment- History and physical assessment and assessment of burns and fluid and electrolyte loss • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of burns and reconstructive and cosmetic surgery • Types of re-constructive and cosmetic surgery: for burns, congenital deformities, injuries and cosmetic purposes • Role of nurse • Legal aspects • Rehabilitation • Special therapies <ul style="list-style-type: none"> <input type="checkbox"/> Psychosocial aspects <p>Nursing procedures Drug used in treatment of burns, constructive and cosmetic surgery</p>	10 hrs.
UNIT-6	<p>Nursing management of patient with Oncological conditions</p> <ul style="list-style-type: none"> • Structure and characteristics of normal and cancer cells • Nursing assessment – history and physically assessment • Prevention, screening, early detections, warning sign of cancer • Epidemiology, etiology, classification, pathophysiology, staging, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of oncological condition • Common malignancies of various body system: oral, larynx, lung stomach, and colon, liver, leukemias, and lymphomas, breast, cervix, ovary, uterus, sarcoma, brain, renal, bladder, prostate etc. • Oncological emergencies • Modalities of treatment <ul style="list-style-type: none"> <input type="checkbox"/> Immunotherapy <input type="checkbox"/> Chemotherapy <input type="checkbox"/> Radiotherapy <input type="checkbox"/> Surgical intervention <input type="checkbox"/> Stem cell and bone marrow transplants <input type="checkbox"/> Gene therapy <input type="checkbox"/> Other forms of treatment • Psychological aspects of cancer 	10 hrs.

	<ul style="list-style-type: none"> • Rehabilitation • Palliative care: Symptoms and pain management, nutritional support • Home care • Hospice care • Stomal therapy • Special therapies <ul style="list-style-type: none"> <input type="checkbox"/> Psychosocial therapies * Nursing procedures 	
UNIT-7	<p>Nursing management of patient in EMERGENCY AND DISASTER</p> <p>Situations</p> <p>Disaster Nursing:</p> <ul style="list-style-type: none"> • Concepts and principals of disaster nursing • Causes and types of disaster: Natural and manmade <ul style="list-style-type: none"> <input type="checkbox"/> Earthquakes, floods, epidemics, cyclones <input type="checkbox"/> Fire, explosion, accidents <input type="checkbox"/> Violence, terrorism: biochemical, war • Policies related to emergency/ disaster management: Institutional, national state, institutional • Disaster preparedness: • Team, guidelines, protocols, equipments, resources • Co-ordination and involvement of : community, various Govt departments, non govt. organizations and international agencies • Role of nurse; working • Legal aspects of disaster nursing • Impact on health after effects: Post traumatic stress disorders • Rehabilitation: physical, psychosocial, financial relocation, Emergency nursing • Concept, priorities, principles and scope and scope and emergency nursing • Organization of emergency services: physical set-up, staffing, equipment and supplies, protocols, concepts of triage and role of triage nurse • Co-ordination and involvement of different departments and facilities • Nursing assessment-history and physical assessment • Etiology, classification, pathophysiology, staging, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of patient with medical and surgical emergency • Principles of emergency management • Common emergencies • Respiratory emergencies 	10 hrs.

	<ul style="list-style-type: none"> • Cardiac emergencies • Shock and hemorrhage • Pain • Poly-trauma, road accidents, crouch, injuries, wound • Bites • Poisoning; food, gas drug and chemical poisoning • Seizures • Thermal emergencies; heat stroke, and cold injuries • Pediatric emergencies • Obstetrical emergencies • Violence, abuse, sexual assault • Cardio pulmonary resuscitation • Crisis intervention • Role of nurse: communication and interpersonal relations • Medico legal aspects 	
UNIT-8	<p>Nursing care of the elderly</p> <ul style="list-style-type: none"> • Nursing assessment- history and physical assessment • Ageing • Demography: Myths and realities • Concepts and theories of ageing • Normal biological ageing • Age related body related changes • Psychosocial aspects of ageing • Medication and elderly • Stress and coping in elder patient • Common health problems and nursing management • Cardiovascular, respiratory, musculoskeletal • Endocrine, genitor-urinary, gastrointestinal • Neurological, skin and sensory organs <ul style="list-style-type: none"> <input type="checkbox"/> Psychosocial and sexual <input type="checkbox"/> Abuse of elderly • Role of nurse for care of elderly: ambulation, nutritional, communicational, psychosocial and spiritual • Role of family and formal and non formal caregivers • Use of aids and prosthesis (hearing aids, dentures) • Legal and ethical issues • Provision and programme for elderly, privileges, community Programs and health services * Home and institutional care 	10 hrs.
UNIT-9	<p>Nursing management of patients in critical care units</p> <ul style="list-style-type: none"> • Nursing assessment-history and physical assessment • Classification • Principles of critical care nursing • Organization: physical set-up, policies, staffing norms 	10 hrs.

- Protocols, equipment, ventilators, cardiac monitors, defibrillators
- Resuscitation equipments
- Infection control and protocols

**MEDICAL SURGICAL NURSING
(Adult and geriatrics)-II Practical**

Placement: Third year

**Time: Theory-120 hrs
Practical – 270 hrs.
Internship - 430 hrs.**

Areas	Skills to be developed	Duration (In weeks)
ENT	<ul style="list-style-type: none"> • Perform examination of ear, nose and throat • Assist with diagnostic procedures • Assist with therapeutic procedures • Instillation of drops • Perform/assist with irrigations • Apply ear bandage • Performs tracheotomy care • Teach patient and families 	1
Ophthalmology	<ul style="list-style-type: none"> • Perform examination of eye • Assist with diagnostic procedures • Assist with therapeutic procedures • Performs /assist with irrigations • Apply eye bandage • Apply eye drops/ointment • Assist with foreign body removal • Teach patient and families 	1
Neurology	<ul style="list-style-type: none"> • Perform neurological examination • Use Glasgow coma scale • Assist with diagnostic procedure • Assist with therapeutic procedures • Teach patient and families • Participate in rehabilitation program 	2
Gynecology ward	<ul style="list-style-type: none"> • Assist with gynecological examination • Assist with diagnostic procedure • Assist with therapeutic procedures 	1

	<ul style="list-style-type: none"> • Teach patient and families • Teach self Breast examination • Assist with PAP smear collection 	
Burns Unit	<ul style="list-style-type: none"> • Assessment of burns patient <ul style="list-style-type: none"> - Percentage of burns - Degree of burns • Fluid and electrolyte replacement therapy <ul style="list-style-type: none"> - Assess - Calculate - Replace - Record intake/output • Care of Burns wound <ul style="list-style-type: none"> - Bathing - Dressing • Perform active and passive exercises • Practice medical and surgical asepsis • Counsel and teach patient and families • Participate rehabilitation program 	1
Oncology	<ul style="list-style-type: none"> • Screen for common cancer-TNM classification • Assist with diagnostic procedures <ul style="list-style-type: none"> - Biopsies - Pap Smear - Bone- Marrow aspiration • Breast examination • Assist with therapeutic Procedures • Participates in various modalities of treatment <ul style="list-style-type: none"> - chemotherapy - radiotherapy - Pain management - Stomal therapy - Immuno therapy - Gene therapy - Alternative therapy • Participate in palliative care • Counsel and teach patient families • Self Breast examination • Warning signs • Participate in rehabilitation program 	2
Critical care unit	<ul style="list-style-type: none"> • monitoring of patients in ICU • Maintain flow sheets • Care of patient on ventilators • Perform end tracheal suction 	

	<ul style="list-style-type: none"> • Demonstration use of ventilators, Carries monitors etc. • Collect specimen and interprets ABG analysis • Assist in arterial puncture • Maintain CVP line • Pulse oximetry • CRP – ALS 	
	<ul style="list-style-type: none"> • Defibrillators • Pace makers • Bag-mask ventilation • Emergency tray trolley- Crash Cart • Administration of drugs <ul style="list-style-type: none"> - Infusion pump - Epidural - Intrathecal Intracardiac • Total parenteral therapy • Chest physiotherapy • Perform active and passive exercises • Counsel the patient and family in dealing with grieving and bereavement 	1
Casualty Emergency	<ul style="list-style-type: none"> • Practice triage • Assist with assessment examination investigations and their interpretation in emergency and disaster situations • Assist in legal procedures • In emergency unit • Participate in managing crowd • Counsel the patient and family in dealing with grieving and bereavement 	1

B.Sc. Nursing

Fourth Year

MIDWIFERY AND OBSTETRICAL NURSING

Placement: Fourth Year

Theory- 90 hrs.
Practical- 180 hrs.

Course Description: This course is designed for students to the concepts and principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skills in rendering nursing care to normal and high risk pregnant woman during antenatal, natal and postnatal periods in hospital and community setting it also helps to develop skills in managing normal and high risk neonates and participate in family welfare programme

UNIT	CONTENT	HOURS
UNIT-1	Introduction to midwifery and obstetrical nursing <ul style="list-style-type: none">• Introduction to concept of midwifery and obstetrical nursing• Trends in midwifery and obstetrical nursing<ul style="list-style-type: none"><input type="checkbox"/> Historical perspective and current trends<input type="checkbox"/> Legal and ethical aspects<input type="checkbox"/> Pre-conception care and preparing for parenthood<input type="checkbox"/> Role of nurse in midwifery and obstetrical care<input type="checkbox"/> National policy and legislation in relation to material health and welfare<ul style="list-style-type: none"><input type="checkbox"/> Maternal morbidity, mortality and fertility rates<input type="checkbox"/> Prenatal morbidity, mortality rates	3 hrs.
UNIT-2	Review of anatomy and physiology of female reproductive system and fetal development <ul style="list-style-type: none">• Female pelvis- general description of the bones joints, ligaments, planes of the pelvis diameters of the true pelvis	8 hrs.

	<p>important landmarks, variations in pelvic shapes</p> <ul style="list-style-type: none"> • Female organs of reproduction – external genitalia, internal genital organs and their anatomical relation, musculature blood supply, nerves, lymphatic, pelvic cellular tissue, pelvic peritoneum • Physiology of menstrual cycle • Human sexuality • Fetal development <ul style="list-style-type: none"> <input type="checkbox"/> Conception <input type="checkbox"/> Review of fertilization, implantation, development of the embryo and placement at term- functions, abnormalities, the fetal sac, amniotic fluid the umbilical chord <input type="checkbox"/> Fetal circulation, fetal skull, bones, sutures and measurements <p>* Review of genetics</p>	
<p>UNIT-3</p>	<p>Assessment and management of pregnancy (ante-natal)</p> <ul style="list-style-type: none"> • Normal pregnancy • Physiological changes during pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Reproductive system <input type="checkbox"/> Cardiovascular system <input type="checkbox"/> Respiratory system <input type="checkbox"/> Urinary system <input type="checkbox"/> Gastro intestinal system <input type="checkbox"/> Metabolic change <input type="checkbox"/> Skeletal change <input type="checkbox"/> Skin changes <input type="checkbox"/> Endocrine system <input type="checkbox"/> Psychological changes <input type="checkbox"/> Discomfort of pregnancy • Diagnosis of pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Signs <input type="checkbox"/> Differential diagnosis <input type="checkbox"/> Confirmatory tests • Ante natal care <ul style="list-style-type: none"> <input type="checkbox"/> Objectives <input type="checkbox"/> Assessment <ul style="list-style-type: none"> - History and physical examination - Antenatal examination - Signs of previous child birth 	<p>8 hrs.</p>

	<ul style="list-style-type: none"> <input type="checkbox"/> Relationship of fetus to uterus and pelvis lie attitude presentation. Position <input type="checkbox"/> per vaginal examination • Screening and assessment for high risk • Risk approach • History and physical examination • Modalities of diagnosis Invasive and non invasive ultrasonic cardio tomography, NST, CST • Antenatal preparation <ul style="list-style-type: none"> <input type="checkbox"/> Antenatal counseling <input type="checkbox"/> Antenatal exercises <input type="checkbox"/> Diet <input type="checkbox"/> Substance use <input type="checkbox"/> Education for childbirth <input type="checkbox"/> Husband and Families <input type="checkbox"/> Preparation for self confinement <input type="checkbox"/> Prevention from radiation • Psycho-social and cultural aspects <ul style="list-style-type: none"> <input type="checkbox"/> Adjustment to pregnancy <input type="checkbox"/> Unwed mother <input type="checkbox"/> Single parent <input type="checkbox"/> Teenage pregnancy <input type="checkbox"/> Sexual violence • Adoption 	
UNIT-4	<p>Assessment and management of intranatal period</p> <ul style="list-style-type: none"> • Physiology of labour • Management of labour • First stage <ul style="list-style-type: none"> <input type="checkbox"/> Signs and symptoms of onset of labour normal and abnormal <input type="checkbox"/> Duration <input type="checkbox"/> Preparation of <ul style="list-style-type: none"> # Labour room # Woman <input type="checkbox"/> Assessment and observation of woman in labour: Partogram- maternal and fetal monitoring <ul style="list-style-type: none"> <input type="checkbox"/> Active management of labour, induction of labour <input type="checkbox"/> Pain relief and comfort in labours • Second stage <ul style="list-style-type: none"> <input type="checkbox"/> Sign and symptoms: normal and abnormal <input type="checkbox"/> Duration <input type="checkbox"/> Conduct of delivery: principles and technique <input type="checkbox"/> Episiotomies (Only if required) <input type="checkbox"/> Receiving the new born - Neonatal resuscitation; initial steps and subsequent 	12 hrs

- resuscitation
 - Care of umbilical cord
 - Immediate assessment including screening for congenital anomalies
- Identification
- Bonding
- Initiate feeding
- Screening and transportation of the neonate
- * Third stage
 - Sign and symptoms: normal and abnormal
 - Duration
 - Method of placenta expulsion
 - Management : principles and technique
 - Examination of the placenta
 - Examination of perineum
- Maintaining records and reports
- Fourth stage

UNIT-5

Assessment and management of women during post natal period

- Normal puerperium: physiology duration
- Postnatal assessment and management
 - Promoting physical and emotional well being
 - Lactation management
 - Immunization
- Family dynamics after child
- Family welfare services, methods, counseling
- Follow-up
- Records and reports

UNIT-6

Assessment and management of normal neonates

- **Normal neonate:**
 - Physiological adaptation
 - Initial and daily assessment
 - Essential newborn care, thermal control
 - Breast feeding prevention of infections
- Immunization
- Minor disorders of newborn and its management
- Levels of neonatal care (level II, &III)
- At primary, secondary and tertiary levels
- Maintenance of reports and records

6 hrs.

<p>UNIT-7</p>	<p>High risk pregnancy – assessment and management</p> <ul style="list-style-type: none"> • Screening and assessment <ul style="list-style-type: none"> <input type="checkbox"/> Ultrasonic cardio tomography , NST CST, non invasive and invasive <input type="checkbox"/> Newer modalities of diagnosis • High risk approach • Levels of care primary secondary and tertiary levels • Disorders of pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Hyper-emesis, gravidarum bleeding in early pregnancy, abortion , ectopic <input type="checkbox"/> Pregnancy vesicular mole <input type="checkbox"/> Ante-partum hemorrhage • Uterine abnormality and displacement • Disease complicating pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Medical and surgical conditions <input type="checkbox"/> Infection, RTI(STD) UTI, HIV, TORCH <input type="checkbox"/> Gynecological diseases complicating pregnancy <input type="checkbox"/> Pregnancy induced hypertension and diabetes , toxemia of pregnancy hydramnios <input type="checkbox"/> Rh incompatibility <input type="checkbox"/> Mental pregnancy <input type="checkbox"/> Abnormalities of placenta and cord <input type="checkbox"/> Intra-uterine growth – retardation <input type="checkbox"/> Nursing management of mothers with high risk pregnancy <input type="checkbox"/> Maintenance of records and reports 	<p>10hrs</p>
<p>UNIT-8</p>	<p>Abnormal labour- assessment and management</p> <ul style="list-style-type: none"> • Disorders in labour <ul style="list-style-type: none"> <input type="checkbox"/> CPD and contracted pelvis <input type="checkbox"/> Malposition and Malpresentations <input type="checkbox"/> Premature labour, disorders of uterine action, precipitate labour, prolonged labor <input type="checkbox"/> complication of third stage Injuries to birth canal • Obstetrical emergencies and their management <ul style="list-style-type: none"> <input type="checkbox"/> Presentation and prolapse of cord, vasa praveia amniotic fluid emblems rupture of uterus shoulder dystocia obstetrical shock • Obstetrical procedures and operation <ul style="list-style-type: none"> <input type="checkbox"/> Introduction of labour, forceps vacuum version manual removal of placenta. Caesar ear. Section. destructive operation <p>* Nursing management of women undergoing obstetrical operation and procedures</p>	
<p>UNIT- 9</p>	<p>Abnormalities during postnatal period</p> <ul style="list-style-type: none"> • Assessment and management of woman with postnatal complications <ul style="list-style-type: none"> <input type="checkbox"/> Puerperal infection breast engorgement and infections and infection, UTI, thromboembolic disorders, post partum 	<p>4hrs</p>

	<p>hamburger, eclampsia and subinvolution</p> <ul style="list-style-type: none"> <input type="checkbox"/> Psychological complications : <ul style="list-style-type: none"> - Post partum blues - Post partum depression - Post partum psychosis 	
UNIT- 10	<p>Abnormalities during postnatal period</p> <ul style="list-style-type: none"> • Admission of neonates in the neonatal intensive care units protocols • Nursing management of : <ul style="list-style-type: none"> <input type="checkbox"/> Low birth weight babies <input type="checkbox"/> Infection <input type="checkbox"/> Respiratory problems <input type="checkbox"/> Hemolytic disorders <input type="checkbox"/> Birth injuries <input type="checkbox"/> Malformation • Monitoring of high risk neonates • Feeding of high risk neonates • Organization and management of neonatal intensive care units • Infection control in neonatal intensive care units • Maintenance of reports and records 	10hrs
UNIT – 11	<p>Pharamaco- therapeutics in obstetrics</p> <ul style="list-style-type: none"> • Indication, dosage, action contraindication and side effects of drugs • effect of drugs on pregnancy labour and puerperium • Nursing responsibilities in the admission of drugs in obstetric- oxytocin, anti-hypertensives, diuretics, laccolic agents, anticonvulsants: • Analgesics and anesthesia in obstetrics • Effect of maternal medication on fetus on fetus and neonate 	4 hrs

Unit - 5	<p>Assisting individuals and group to promote and maintain their health</p> <ul style="list-style-type: none"> • Empowerment for self care of individual families and group in 	15 hrs.

A Assessment of self and family

- Monitoring growth and development
 - Mile stones
 - Weight measurement
 - Social development
- Temperature and blood pressure monitoring
- Menstrual cycle
- Breast self examination and testicles
- Warning signs of various diseases
- Teats: Urine sugar and albumin, blood sugar

B Seek health service for

- Routine check – up
- Immunization
- Counseling
- Diagnosis
- Treatment
- Follow – up

C Maintenance of health records for self and family

D Continue medical care and follow – up in community for various disease and disabilities

E Carryout therapeutic procedures as prescribed / required for self and the family

F Waste management

G Sensitize and handle social issues affecting health and development for self and family

- Women empowerment
- Women and child abuse
- Abuse of elders
- Female foeticide
- Commercial sex worker
- Food adulteration
- Substance abuse

H Utilize community resources for self and family

- Trauma services
- Old age homes
- Orphanage
- Home of physically and mentally challenged individuals
- Homes for destitute

Unit - 6

National health and family welfare programmers and the role of a nurse

20 hrs.

- National ARI programmer
- Revised national tuberculosis programmer (RNTCP)
- National anti-malaria programme
- National filarial control programme
- National guinea worm eradication programme
- National leprosy eradication programme
- National AIDS control programme
- National STD control programme
- Iodine deficiency disorder programme
- Expanded programme of immunization
- National family welfare programme
- National water supply and sanitation programme
- Minimum need programme
- National diabetes control programme
- Polio eradication programme
- National cancer control programme
- Yaws eradication programme
- 20 pints programme
- ICDS programme
- Mid day meal applied nutritional programme
- Health schemes
 - ESI
 - CGHS
 - Health insurance

Unit - 7

- Health agencies
 - International – WHO, UNFPA, UNDP, World bank, FAO, UNICEF, DANDIA, European commission (EC) Red cross, USAID, UNESCO, Colombo plan, ILO, CARE etc.
 - National – Indian red cross society, Indian council for child welfare, Family planning association of India (FPAI), Tuberculosis association of India, Hindu kushwant singh, Central social welfare board, All India women’s conference, Blind association of India etc.

5 hrs.

**Community Health
Nursing – II – Practical**

Placement : Fourth Year

**Time : Practical – 135 hrs
Internship – 195 hrs**

Areas	Skills	Duration (In weeks)
Community Health Nursing	<ul style="list-style-type: none"> • Community health survey • Community diagnosis • Family care Home adaptation of common procedures • Home visit Bag technique • Organize and conduct clinics – antenatal Postnatal well baby clinic camps etc • Screen manage and referrals for <ul style="list-style-type: none"> <input type="checkbox"/> High risk mothers and neonates <input type="checkbox"/> Accidents and emergencies <input type="checkbox"/> Illness Physical and mental <input type="checkbox"/> Disabilities • Conduct delivery at home / center: episiotomy and suturing • Resuscitate newborn • School health programme <ul style="list-style-type: none"> <input type="checkbox"/> Screen manage, refer children • Collaborate with health and allied agencies • Train and supervise health workers • Provide family welfare services: insertion of IUD • Counsel and teach individual, family and community about: HIV, TB, Diabetes, Hypertension, Mantel health, adolescents, elderly health physically and mentally challenged individuals. • Collect and calculate Vital health statistics • Document and maintain <ul style="list-style-type: none"> <input type="checkbox"/> Individual family and administrative records <input type="checkbox"/> Write reports – center, disease, and national health programme/projects 	1 week for urban & 4 weeks for rural
Placement : Internship		Time :4 weeks
Areas	Skills	Duration
Urban	Provide comprehensive care to individual family and community	4 weeks

NOTE: During the rural posting they should stay in health centers under the supervision of teachers

Nursing Research and Statistics

**Placement: Fourth Year
Internship**

**Time: Theory- 45 hrs
Practical -45 hrs**

Course description: The course is designed to enable students to develop an understanding of basic concept of research process and statistics. It is further structured to conduct participate in needs based research studies in various setting and utilize the research findings to provide quality nursing care The burs foe practical will be utilized for conducting individual/ group research project

Unit	Content	Time (hrs)
I	Research and research Process Research and research Process <ul style="list-style-type: none">• Introduction and need for nursing research• Definition of Research and nursing research• Steps of scientific method• Characteristics of good research• Steps of Research process- overview	4

SYLLABUS AND REGULATIONS

M.Sc. (NURSING)

Published by

INDIAN NURSING COUNCIL

**8th floor, NBCC Center, Plot no. 2, Community
Center Okhla Phase-I, New Delhi – 110020**

Philosophy

National Health Policy(NHP) 2002 emphasizes the need to prepare nurses to function in super-speciality areas who are required in tertiary care institutions, entrusting some limited public health functions to nurses after providing adequate training, and increase the ratio of degree holding vis a vis diploma holding nurses.

It is observed that there is an acute shortage of nursing faculty in under graduate and post graduate nursing programme in India

Indian Nursing Council believes that:

Post Graduate programme is essential to prepare nurses to improve the quality of nursing education and practice in India. .

Post graduate programme in nursing builds upon and extends competence acquired at the graduate levels, emphasizes application of relevant theories into nursing practice, education, administration and development of research skills.

The programme prepares nurses for leadership position in nursing and health fields who can function as nurse specialists, consultants, educators, administrators and researchers in a wide variety of professional settings in meeting the National priorities and the changing needs of the society.

This programme provides the basis for the post masteral programme in nursing. Further the programme encourages accountability and commitment to life long learning which fosters improvement of quality care.

Aim

The aim of the postgraduate program in nursing is to prepare graduates to assume responsibilities as nurse specialists, consultants, educators, administrators in a wide variety of professional settings

Objectives

On Completion of the two year M.Sc Nursing programme, the graduate will be able to:-

1. Utilize /apply the concepts, theories and principles of nursing science
2. Demonstrate advance competence in practice of nursing
3. Practice as a nurse specialist.
4. Demonstrate leadership qualities and function effectively as nurse educator and manager.
5. Demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.

6. Demonstrate the ability to plan and effect change in nursing practice and in the health care delivery system.
7. Establish collaborative relationship with members of other disciplines
8. Demonstrate interest in continued learning for personal and professional advancement.

Other Staff (Minimum requirements)

(To be reviewed and revised and rationalized keeping in mind the mechanization and contract service)

- Ministerial
 - a) Administrative Officer 1
 - c) Office Superintendent 1
 - d) PA to Principal 1
 - e) Accountant/Cashier 1

- Upper Division Clerk 2

- Lower Division Clerk 2

- Store Keeper 1
 - a) Maintenance of stores 1
 - b) Classroom attendants 2
 - c) Sanitary staff As per the physical space
 - d) Security Staff As per the requirement

- Peons/Office attendants 4

- Library
 - a) Librarian 2
 - b) Library Attendants As per the requirement

- Hostel
 - a) Wardens 2
 - b) Cooks, Bearers, Sanitary Staff As per the requirement
 - c) Ayas /Peons As per the requirement
 - d) Security Staff As per the requirement
 - e) Gardeners & Dhobi (desirable) Depends on structural facilities

Eligibility Criteria/Admission Requirements:

1. The candidate should be a Registered Nurse and Registered midwife or equivalent with any State Nursing Registration Council.
2. The minimum education requirements shall be the passing of :
B.Sc. Nursing / B.Sc. Hons. Nursing / Post Basic B.Sc. Nursing with minimum of 55% aggregate marks.
3. The candidate should have undergone in B.Sc. Nursing / B.Sc. Hons. Nursing / Post Basic B.Sc. Nursing in an institution which is recognized by Indian Nursing Council.
4. Minimum one year of work experience after Basic B.Sc. Nursing.
5. Minimum one year of work experience prior or after Post Basic B.Sc. Nursing.
6. Candidate shall be medically fit.
7. 5% relaxation of marks for SC/ST candidates may be given.

Entrance/Selection test

Selection of the candidates should be based on the merit of the entrance examination held by University or competent authority.

Regulations for examination:

Eligibility for appearing for the examination:

75% of the attendance for theory and practicals. However 100% of attendance for practical before the award of degree

Classification of results:

- 50% pass in each of the theory and practical separately.
- 50-59% Second division
- 60-74% first division
- 75% and above is distinction
- For declaring the rank aggregate of 2 years marks to be considered

If the candidate fails in either practicals or theory paper he/she has to re-appear for both the papers (theory and practical)

Maximum no. of attempts per subject is three (3) inclusive of first attempt. The maximum period to complete the course successfully should not exceed 4 years

Candidate who fails in any subject, shall be permitted to continue the studies into the second year. However the candidate shall not be allowed to appear for the Second year examination till such time that he/she passes all subjects of the first year M.Sc nursing examination

Practicals

- 4 hours of practical examination per student.
- Maximum number of 10 students per day per speciality.
- The examination should be held in clinical area only for clinical specialities
- One internal and external should jointly conduct practical examination
- Examiner – Nursing faculty teaching respective speciality area in M.Sc nursing programme with minimum 3 years experience after M.Sc nursing.

Dissertation

Evaluation of the dissertation should be done by the examiner prior to viva
Duration: Viva-voce -minimum 30 minutes per student

Guidelines for Dissertation

Tentative Schedule for dissertation

S. No.	Activities	Scheduled Time
1.	Submission of the research proposal	End of 9 th month of 1 st year
2.	Submission of dissertation – Final	End of 9 th month of II nd Year

Note: - Administrative approval and ethical clearance should be obtained

A. Research Guides

a) *Qualification of Guide*

Main guide : Nursing faculty / nursing expert in the same clinical speciality holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in teaching in the Post Graduate Programme in Nursing.

Co-Guide : A Co-Guide is a nursing faculty/expert in the field of study (may be from outside the college but should be within the city.)

b) *Guide – Students Ratio*

Maximum of 1:4 (including as co-guide)

c) *Research Committee*

There should be a research committee in each college comprising of minimum 5 members chaired by the Principal, College of Nursing.

Duration

Duration of the course is 2 years for M.Sc. (N)

Available	52 weeks
Vacation	4 weeks
Examination	2 weeks
Gazetted holidays	3 weeks
Total weeks available	43 weeks
40 hours per week	1720 hours
Total hours for 2 years	3440 hours

Course of Instruction

	Theory (hrs)	Practical (hrs)
1st year		
Nursing education	150	150
Advance nursing practice	150	200
Nursing Research and statistics	150	100
*Clinical speciality –I	150	650

--------------	------------	-------------

II nd Year

Nursing Management	150	150
Nursing Research(Dissertation)		300
*Clinical Speciality-II	150	950
Total	300	1400

Educational visit 2 weeks

***Clinical Speciality** – Medical Surgical Nursing (Cardio Vascular & Thoracic Nursing, Critical care Nursing, Oncology Nursing, Neurosciences Nursing, Nephro-Urology Nursing, Orthopedic Nurisng, Gastro Enterology Nursing,)Obstetric & Gynaecological Nursing, Child Health (Paediatric) Nursing, Mental Health(Psychiatric) Nursing, Community Health Nursing, Psychiatric (Mental Health) Nursing etc.

Note: Students have to maintain log book for each activity during the course of study

Scheme of Examination

	Theory			Practical		
	Hours	Internal	External	Hours	Internal	External
1st year						
Nursing education	3	25	75		50	50
Advance nursing practice	3	25	75			
Nursing Research and statistics	3	25**	75*			
Clinical speciality -I	3	25	75		100	100
Total		100	300		150	150
II nd Year						
Nursing Management	3	25	75			
Dissertation & Viva					100	100
Clinical Speciality-II	3	25	75		100	100
Total		50	150		200	200

* Nursing research=50 and statistics=25

**Nursing research=15 and statistics=10

1. Minimum pass marks shall be 50 % in each of the Theory and practical papers separately.
2. A candidate must have minimum of 80% attendance (irrespective of the kind of absence) in theory and practical in each subject for appearing for examination.
3. A candidate must have 100% attendance in each of the practical areas before award of degree
4. A candidate has to pass in theory and practical exam separately in each of the paper.
5. If a candidate fails in either theory or practical paper he/she has to re-appear for both the papers (Theory and practical).
6. Maximum no. of attempts permitted for each paper is 3 including first attempt.

7. The maximum period to complete the course successfully should not exceed 4 (four) years
8. A candidate failing in more than two subjects will not be promoted to the IInd year.
9. No candidate shall be admitted to the subsequent IInd year examination unless the candidate has passed the Ist year examination.
10. Maximum number of candidates for all practical examination should not exceed 10 per day.
11. Provision of Supplementary examination should be made.
12. All practical examinations must be held in the respective clinical areas.
13. One internal and One external examiners(outside the University) should jointly conduct practical examination for each student
14. An examiner should be M.Sc (N) in concerned subject and have minimum of 3 (three) years post graduate teaching experience.
15. One internal and One external examiners(outside the University) should evaluate dissertation and jointly conduct viva-voce for each student
16. For Dissertation Internal examiner should be the guide and external examiner should be Nursing faculty / nursing expert in the same clinical speciality holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of Nursing.

Admission Strength

Annual admission strength for M.Sc (N) Programme should have prior sanction/permission from the Indian Nursing Council on the basis of clinical, physical facilities and teaching faculty.

Health Services

There should be provisions for the following health services for the students.

- (a) An annual medical examination.
- (b) Vaccination against Tetanus, hepatitis B or any other communicable disease as considered necessary.
- (c) Free medical care during illness and / provision of health insurance should be made.
- (d) A complete health record should be kept in respect of each individual students. The question of continuing the training of a student, with long term chronic illness, will be decided by the individual college.

CURRICULUM

NURSING EDUCATION

Placement : 1st Year

Hours of Instruction

Theory 150 Hours

Practical 150 Hours

Total : 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of Fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to :

1. Explain the aims of education, philosophies, trends in education and health: its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing.
9. Demonstrate skill in guidance and counseling.
10. Describe the problems and issues related to administration of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education programs.
12. Identify research priorities in nursing education.
13. Discuss various models of collaboration in nursing education and services.

14. Explain the concept, principles, steps, tools and techniques of evaluation
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

IX	12	25	Continuing Education in Nursing <ul style="list-style-type: none"> □ Concepts – Definition, importance, need scope, principles of adult learning, assessments of learning needs, priorities, resources. □ Program planning, implementation and evaluation of continuing education programs. □ Research in continuing education. □ Distance education in nursing.
X	10	10	Curriculum Development <ul style="list-style-type: none"> □ Definition, curriculum determinants, process and steps of curriculum development, Curriculum models, Types and framework. □ Formulation of philosophy, objectives, selection and organization of learning experiences; master plan, course plan, unit plan. □ Evaluation strategies, process of curriculum change, role of students, faculty, administrators, statutory bodies and other stakeholders. □ Equivalency of courses: Transcripts, credit system.
XI	8	4	Teacher preparation <ul style="list-style-type: none"> □ Teacher – roles & responsibilities, functions, characteristics, competencies, qualities, □ Preparation of professional teacher □ Organizing professional aspects of teacher preparation programs □ Evaluation: self and peer □ Critical analysis of various programs of teacher education in India.

Units	Hours		Course Content
	Theory	Practical	
XII	10	5	Guidance and counseling <ul style="list-style-type: none"> □ Concept, principles, need, difference between guidance and counseling , trends and issues. □ Guidance and counseling services : diagnostic and remedial. □ Coordination and organization of services. □ Techniques of counseling : Interview, case work, characteristics of counselor, problems in counseling. □ Professional preparation and training for counseling.
XIII	15	10	Administration of Nursing Curriculum <ul style="list-style-type: none"> □ Role of curriculum coordinator – planning, implementation and evaluation. □ Evaluation of educational programs in nursing-course and program. □ Factors influencing faculty staff relationship and techniques of working together. □ Concept of faculty supervisor (dual) position. □ Curriculum research in nursing. □ Different models of collaboration between education and service
XIV	10		Management of nursing educational institutions <ul style="list-style-type: none"> □ Planning, organizing, staffing, budgeting, recruitment, discipline, public relation, performance appraisal, welfare services, library services, hostel,
XV	5	5	<ul style="list-style-type: none"> □ Development and maintenance of standards and accreditation in nursing education programs. □ Role of Indian Nursing Council, State Registration Nursing Councils, Boards and University. □ Role of Professional associations and unions.

Activities :

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10 (like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
- Preparation and utilization of instructional Aids using different media.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.

- Educational visits.
- Field visits (INC/SNRC) to get familiar with recognition/registration process.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
- Observe and practice application of various non-standardized tests (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

Methods of evaluation

- Tests
- Presentation
- Project work
- Written assignments

ADVANCE NURSING PRACTICE

Placement: 1ST Year

Hours of Instruction
Theory 150 Hours
Practical 200 Hours
Total : 350 Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Appreciate and analyze the development of nursing as a profession.
2. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Describe scope of nursing practice.
6. Provide holistic and competent nursing care following nursing process approach.
7. Identify latest trends in nursing and the basis of advance nursing practice.
8. Perform extended and expanded role of nurse.
9. Describe alternative modalities of nursing care.
10. Describe the concept of quality control in nursing.
11. Identify the scope of nursing research.
12. Use computer in patient care delivery system and nursing practice.
13. Appreciate importance of self development and professional advancement.

Course Content

Unit	Hours	Content
I	10	Nursing as a Profession <ul style="list-style-type: none"> □ History of development of nursing profession, characteristics, criteria of the profession, perspective of nursing profession-national, global □ Code of ethics(INC), code of professional conduct(INC), autonomy and accountability, assertiveness, visibility of nurses, legal considerations, □ Role of regulatory bodies □ Professional organizations and unions-self defense, individual and collective bargaining □ Educational preparations, continuing education, career opportunities, professional advancement & role and scope of nursing education. □ Role of research, leadership and management. □ Quality assurance in nursing (INC). □ Futuristic nursing.
II	5	Health care delivery <ul style="list-style-type: none"> □ Health care environment, economics, constraints, planning process, policies, political process vis a vis nursing profession. □ Health care delivery system- national, state, district and local level. □ Major stakeholders in the health care system-Government, non-govt, Industry and other professionals. □ Patterns of nursing care delivery in India. □ Health care delivery concerns, national health and family welfare programs, inter-sectoral coordination, role of non-governmental agencies. □ Information, education and communication (IEC). □ Tele-medicine.
III	10	Genetics <ul style="list-style-type: none"> □ Review of cellular division, mutation and law of inheritance, human genome project ,The Genomic era. □ Basic concepts of Genes, Chromosomes & DNA. □ Approaches to common genetic disorders. □ Genetic testing – basis of genetic diagnosis, Pre symptomatic and predisposition testing, Prenatal diagnosis & screening, Ethical, legal & psychosocial issues in genetic testing. □ Genetic counseling. □ Practical application of genetics in nursing.
IV	10	Epidemiology <ul style="list-style-type: none"> □ Scope, epidemiological approach and methods, □ Morbidity, mortality, □ Concepts of causation of diseases and their screening, □ Application of epidemiology in health care delivery, Health surveillance and health informatics □ Role of nurse

Unit	Hours	Content
V	20	<p>Bio-Psycho social pathology</p> <ul style="list-style-type: none"> □ Pathophysiology and Psychodynamics of disease causation □ Life processes, homeostatic mechanism, biological and psycho-social dynamics in causation of disease, life style □ Common problems: Oxygen insufficiency, fluid and electrolyte imbalance, nutritional problems, hemorrhage and shock, altered body temperature, unconsciousness, sleep pattern and its disturbances, pain, sensory deprivation. □ Treatment aspects: pharmacological and pre- post operative care aspects, □ Cardio pulmonary resuscitation. □ End of life Care □ Infection prevention (including HIV) and standard safety measures, bio-medical waste management. □ Role of nurse- Evidence based nursing practice; Best practices □ Innovations in nursing
VI	20	<p>Philosophy and Theories of Nursing</p> <ul style="list-style-type: none"> □ Values, Conceptual models, approaches. □ Nursing theories: Nightingale's, Henderson's, Roger's, Peplau's, Abdella's, Lewine's, Orem's, Johnson's, King's, Neuman's, Roy's, Watson's, etc and their applications, □ Health belief models, communication and management, etc □ Concept of Self health. □ Evidence based practice model.
VIII	10	<p>Nursing process approach</p> <ul style="list-style-type: none"> □ Health Assessment- illness status of patients/clients (Individuals, family, community), Identification of health-illness problems, health behaviors, signs and symptoms of clients. □ Methods of collection, analysis and utilization of data relevant to nursing process. □ Formulation of nursing care plans, health goals, implementation, modification and evaluation of care.
IX	30	<p>Psychological aspects and Human relations</p> <ul style="list-style-type: none"> □ Human behavior, Life processes & growth and development, personality development, defense mechanisms, □ Communication, interpersonal relationships, individual and group, group dynamics, and organizational behavior, □ Basic human needs, Growth and development, (Conception through preschool, School age through adolescence, Young & middle adult, and Older adult) □ Sexuality and sexual health. □ Stress and adaptation, crisis and its intervention, □ Coping with loss, death and grieving, □ Principles and techniques of Counseling.

Unit	Hours	Content
X	10	<p>Nursing practice</p> <ul style="list-style-type: none"> □ Framework, scope and trends. □ Alternative modalities of care, alternative systems of health and complimentary therapies. □ Extended and expanded role of the nurse, in promotive, preventive, curative and restorative health care delivery system in community and institutions. □ Health promotion and primary health care. □ Independent practice issues,- Independent nurse-midwifery practitioner. □ Collaboration issues and models-within and outside nursing. □ Models of Prevention, □ Family nursing, Home nursing, □ Gender sensitive issues and women empowerment. □ Disaster nursing. □ Geriatric considerations in nursing. □ Evidence based nursing practice- Best practices □ Trans-cultural nursing.
XI	25	<p>Computer applications for patient care delivery system and nursing practice</p> <ul style="list-style-type: none"> □ Use of computers in teaching, learning, research and nursing practice. □ Windows, MS office: Word, Excel, Power Point, □ Internet, literature search, □ Statistical packages, □ Hospital management information system: softwares.

Practical

Clinical posting in the following areas:

- Specialty area- in-patient unit - 2 weeks
- Community health center/PHC - 2 weeks
- Emergency/ICU - 2 weeks

Activities

- Prepare Case studies with nursing process approach and theoretical basis
- Presentation of comparative picture of theories
- Family case- work using model of prevention
- Annotated bibliography
- Report of field visits (5)

Methods of Teaching

- Lecture cum discussion
- Seminar
- Panel discussion
- Debate
- Case Presentations
- Exposure to scientific conferences
- Field visits

Methods of evaluation :

- Tests
- Presentation
- Seminar
- Written assignments

Advance nursing Procedures

Definition, Indication and nursing implications;

- CPR, TPN, Hemodynamic monitoring, Endotracheal intubation, Tracheostoma, mechanical ventilation, Pacemaker, Hemodialysis, Peritoneal dialysis, LP, BT Pleural and abdominal paracentesis OT techniques, Health assessment, Triage, Pulse oxymetry

Internal Assessment

CLINICAL SPECIALITY – I

MEDICAL SURGICAL NURSING

Placement: 1st Year

Hours of instruction
Theory: 150 Hours
Practical: 650 Hours
Total : 800 Hours

Course Description

This course is common for the students undergoing clinical speciality-II in neuro science nursing/cardiovascular & thoracic nursing/critical care nursing/oncology nursing/orthopaedic and rehabilitation nursing/nephro & urology nursing, gastroenterology nursing/ geriatric nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends & issues in the field of Medical – Surgical Nursing as a speciality.
2. Apply concepts & theories related to health promotion.
3. Appreciate the client as a holistic individual.
4. Perform physical, psychosocial assessment of Medical – Surgical patients.
5. Apply Nursing process in providing care to patients.
6. Integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness.
7. Recognize and manage emergencies with Medical- Surgical patients.
8. Describe various recent technologies & treatment modalities in the management of critically ill patients.
9. Appreciate the legal & ethical issues relevant to Medical – Surgical Nursing.
10. Prepare a design for layout and management of Medical – Surgical Units.

11. Appreciate the role of alternative systems of Medicine in care of patients.
12. Incorporate evidence based Nursing practice and identify the areas of research in the field of Medical – Surgical Nursing.
13. Recognize the role of Nurse practitioner as a member of the Medical – Surgical health team.
14. Teach Medical – Surgical Nursing to undergraduate nursing students & in-service nurses.

COURSE CONTENT:

Unit	Hours	Content
I	5	<p>Introduction:</p> <ul style="list-style-type: none"> □ Historical development of Medical- Surgical Nursing in India. □ Current status of health and disease burden in India. □ Current concept of health. □ Trends & issues in Medical – Surgical Nursing. □ Ethical & cultural issues in Medical – Surgical Nursing. □ Rights of patients. □ National health policy, special laws & ordinances relating to older people. □ National goals. □ Five year plans. □ National health programs related to adult health.
II	20	<p>Health Assessment of patients</p> <ul style="list-style-type: none"> □ History taking. □ Physical examination of various systems. □ Nutritional assessment. □ Related investigations and diagnostic assessment.

CLINICAL SPECIALITY-I

OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement : 1st year

Hours of Instruction
Theory : 150 Hours.
Practical : 650 Hours.
Total : 800 Hours.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynaecological nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends in the field of midwifery, obstetrics and gynaecology as a speciality.
2. Describe the population dynamics and indicators of maternal and child health
3. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
4. Provide comprehensive nursing care to women during reproductive period and newborns.
5. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing.
6. Identify and analyze the deviations from normal birth process and refer appropriately.
7. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
8. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation
9. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing.
10. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.
11. Describe the recent advancement in contraceptive technology and birth control measures
12. Appreciate the legal and ethical issues pertaining to obstetric and gynaecological nursing

Course Content

Units	Hours	Content
I	10	<p>Introduction</p> <ul style="list-style-type: none"> □ Historical and contemporary perspectives □ Epidemiological aspects of maternal and child health □ Magnitude of maternal and child health problems □ Issues of maternal and child health : Age, Gender, Sexuality, psycho Socio cultural factors □ Preventive obstetrics □ National health and family welfare programmes related to maternal and child health: health care delivery system- National Rural health mission, Role of NGO's □ Theories, models and approaches applied to midwifery practice □ Role and scope of midwifery practice: Independent Nurse midwifery practitioner □ Legal and Ethical issues: Code of ethics and standards of midwifery practice, standing orders □ Evidence based midwifery practice □ Research priorities in obstetric and gynaecological nursing.
II	15	<p>Human reproduction</p> <ul style="list-style-type: none"> □ Review of anatomy and physiology of human reproductive system: male and female □ Hormonal cycles □ Embryology □ Genetics, teratology and counseling □ Clinical implications
III	25	<p>Pregnancy</p> <ul style="list-style-type: none"> □ Maternal adaptation : Physiological, psychosocial <ul style="list-style-type: none"> • Assessment – Maternal and foetal measures Maternal measures:History taking , examination-General,physical and obstetrical measure, identification of high risk, • Foetal measure- clinical parameters, biochemical- human estriol, Maternal Serum Alfa Feto Protein, Acetyl Choline esterase (AchE), Triple Test Aminocentesis, Cordocentesis, chorionic villus sampling (CVS)), • Biophysical- (US IMAGING, Foetal movement count, Ultra Sonography, Cardiotocography, cardiotomography, Non Stress Test(NST), Contraction stress test(CST), amnioscopy, foetoscopy, • Radiological examination, □ Interpretation of diagnostic tests and nursing implications □ Nursing management of the pregnant women, minor disorders of pregnancy and management, preparation for child birth and parenthood, importance of institutional delivery , choice of birth setting, importance and mobilizing of transportation, prenatal counseling, role of nurse and crisis intervention, identification of high risk pregnancy and refer □ Alternative/complementary therapies

Units	Hours	Content
IV	25	<p>Normal Labour and nursing management:</p> <ul style="list-style-type: none"> □ Essential factors of labour □ Stages and onset <p>First stage: Physiology of normal labour</p> <ul style="list-style-type: none"> • Use of partograph: Principles, use and critical analysis, evidence based studies • Analgesia and anaesthesia in labour • Nursing management <p>Second stage</p> <ul style="list-style-type: none"> • Physiology , intrapartum monitoring • Nursing management. • Resuscitation , immediate newborn care and initiate breast feeding (Guidelines of National neonatology forum of India) <p>Third stage</p> <ul style="list-style-type: none"> • Physiology and nursing management <p>Fourth stage – Observation, critical analysis and Nursing management.</p> <ul style="list-style-type: none"> • Various child birth practice: water birth, position change etc • Evidence based practice in relation to labour intervention <p>Role of nurse midwifery practitioner</p> <ul style="list-style-type: none"> • Alternative /complementary therapies
V	20	<p>Normal puerperium and nursing management</p> <ul style="list-style-type: none"> □ Physiology of puerperium □ Physiology of lactation, lactation management, exclusive breast feeding ,Baby friendly hospital initiative(BFHI) □ Assessment of postnatal women . □ Minor discomforts and complications of puerperium □ Management of mothers during puerperium: Postnatal exercises Rooming in, bonding, warm chain □ Evidence based studies <p>Role of nurse midwifery practitioner</p> <ul style="list-style-type: none"> • Alternative /complementary therapies
VI	20	<p>Normal Newborn</p> <ul style="list-style-type: none"> □ Physiology and characteristics of normal newborn □ Physical and Behavioural assessment of newborn □ Needs of newborn □ Essential newborn care: Exclusive breast feeding, Immunization, Hygiene measures, Newborn nutrition □ Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU □ Observation and care of newborn □ Parenting process

Units	Hours	Content
VII	10	<p>Pharmacodynamics in obstetrics</p> <ul style="list-style-type: none"> □ Drugs used in pregnancy, labour, post partum and newborn □ Calculation of drug dose and administration □ Effects of drugs used □ Anaesthesia and analgesia in obstetrics □ Roles and responsibilities of midwifery nurse practitioner □ Standing orders and protocols and use of selected life saving drugs and interventions of obstetric emergencies approved by the MOHFW
VIII	10	<p>Family welfare services</p> <ul style="list-style-type: none"> □ Population dynamics □ Demography trends: vital statistics, calculation of indicators especially maternal and neonatal mortality rates and problems and other health problems □ Recent advancement in contraceptive technology □ Role of nurses in family welfare programmes in all settings □ Role of independent nurse midwifery practitioner □ Family life education □ Evidence based studies □ Information, Education and Communication(IEC) □ Management information and evaluation system(MIES) □ Teaching and supervision of health team members
IX	5	<p>Infertility</p> <ul style="list-style-type: none"> □ Primary and secondary causes □ Diagnostic procedures □ Counseling: ethical and legal aspects of assisted reproductive technology(ART) □ Recent advancement in infertility management. □ Adoption procedures <p>Role of nurses in infertility management.</p>
X	5	<p>Menopause</p> <ul style="list-style-type: none"> □ Physiological, psychological and social aspects □ Hormone Replacement Therapy □ Surgical menopause □ Counseling and guidance <p>Role of midwifery nurse practitioner</p>
XI	5	<p>Abortion</p> <ul style="list-style-type: none"> □ Types, causes □ Legislations, Clinical rights and professional responsibility □ Abortion procedures □ Complications □ Nursing management <p>Role of midwifery nurse practitioner</p>

Practical

Total = 660 Hours
1 week = 30 Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
1	Anetenatal Wards & OPDs	4	120
2	Labour Room	5	150
3	Postnatal Ward	2	60
4	Family Planning Clinics	2	60
5	PHC/Rural maternity settings	4	120
6	Gynae	2	60
7	Maternity OT	2	60
8	NICU	1	30
	Total	22 Weeks	660Hours

Procedures observed

- Diagnostic investigations : amniocentesis, chorionic villi sampling
- Infertility management: artificial reproduction : artificial insemination, invitro fertilization, and related procedures

Procedures assisted

- Medical termination of pregnancy,

Procedures performed

- Antenatal assessment-20
- Postnatal assessment-20
- Assessment during labour : use of partograph - 20
- Per vaginal examination-20
- Conduct of normal delivery-20
- Episiotomy and suturing-10
- Setting up of delivery areas
- Insertion of intra uterine devices(copper T)

Others

- Identification of high risk women and referral
- Health education: to women and their families
- Motivation of couples for planned parenthood

CLINICAL SPECIALTY –I

CHILD HEALTH (PAEDIATRIC) NURSING

Placement : 1st Year

Hours of Instruction
Theory 150 Hours
Practical 650 Hours
Total : 800 Hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and pediatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
3. Appreciate the child as a holistic individual
4. Perform physical, developmental, and nutritional assessment of pediatric clients
5. Apply nursing process in providing nursing care to neonates & children
6. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
7. Recognize and manage emergencies in neonates
8. Describe various recent technologies and treatment modalities in the management of high risk neonates
9. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
10. Prepare a design for layout and management of neonatal units
11. Incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatal nursing
12. Recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal health team
13. Teach pediatric nursing to undergraduate students & in-service nurses

Course Content

Unit	Hours	Content
I	10	Introduction <ul style="list-style-type: none"> □ Historical development of Pediatrics and Pediatric Nursing in India; □ Current status of child health in India; □ Trends in Pediatrics and Pediatric Nursing, □ Ethical and cultural issues in pediatric care □ Rights of children □ National health policy for children, special laws and ordinances relating to children. □ National goals, □ Five year plans, □ National health programs related to child health.
II	10 Hrs	Assessment of pediatric clients <ul style="list-style-type: none"> □ History taking □ Developmental assessment □ Physical assessment □ Nutritional assessment □ Family assessment
III	10	Hospitalized child <ul style="list-style-type: none"> □ Meaning of hospitalization of the child, preparation for hospitalization, effects of hospitalization on the child and family □ Stressors and reactions related to developmental stages, play activities for ill hospitalized child. □ Nursing care of hospitalized child and family -principles and practices
IV	15	Pre-natal Pediatrics <ul style="list-style-type: none"> □ Embryological and fetal development, Prenatal factors influencing growth and development of fetus, □ Genetic patterns of common pediatric disorders, chromosomal aberrations, genetic assessment and counseling legal and ethical aspects of genetic, screening and counseling role of nurse in genetic counseling, □ Importance of prenatal care and role of pediatric nurse.
V	15	Growth and Development of children <ul style="list-style-type: none"> □ Principles of growth and development, □ Concepts and theories of growth and development, □ Developmental tasks and special needs from infancy to adolescence, developmental milestones, □ Assessment of growth and development of pediatric clients, □ Factors affecting growth and development.
VI	15	Behavioral Pediatrics and Pediatric Nursing <ul style="list-style-type: none"> □ Parent child relationship, □ Basic behavioral pediatric principles and specific behavioral pediatric concepts/disorders- maternal deprivation, failure

Unit	Hours	Content
		<p>to thrive, child abuse, the battered child,</p> <ul style="list-style-type: none"> □ Common behavioral problems and their management, □ Child guidance clinic.
VII	15	<p>Preventive Pediatrics and Pediatric Nursing</p> <ul style="list-style-type: none"> □ Concept, aims and scope of preventive pediatrics, □ Maternal health and its influence on child health antenatal aspects of preventive pediatrics, □ Immunization, expanded program on immunization/ universal immunization program and cold chain, □ Nutrition and nutritional requirements of children, changing patterns of feeding, baby- friendly hospital initiative and exclusive breast feeding, □ Health education, nutritional education for children □ Nutritional programs □ National and international organizations related to child health, <p>Role of pediatric nurse in the hospital and community.</p>
VIII	30	<p>Neonatal Nursing</p> <ul style="list-style-type: none"> □ New born baby- profile and characteristics of the new born, □ Assessment of the new born, □ Nursing care of the new born at birth, care of the new born and family, □ High risk newborn- pre term and term neonate and growth retarded babies, □ Identification and classification of neonates with infections, HIV & AIDS, Ophthalmia neonatorum, congenital syphilis. □ High risk new born- Identification, classification and nursing management □ Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU.
IX	30	<p>IMNCI (Integrated management of neonatal and childhood illnesses)</p>

Practical

Total = 660Hours
1 Week = 30Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
1	Pediatric Medicine Ward	4	120 Hours
2	Pediatric Surgery Ward	4	120 Hours
3	Labor Room/Maternity Ward	2	60 Hours
4	Pediatric OPD	2	60 Hours
5	NICU	4	120 Hours
6	Creche	1	30 Hours
7	Child Guidance Clinic	1	30 Hours
8	Community	4	120 Hours
	Total	22 Weeks	660 Hours

Student Activities

- Clinical presentations
- Growth & developmental assessment
- Assessment & prescription of nursing interventions for sick children
- Health education related to disease conditions
- Nutritional assessment
- Project work
- Field visits

CLINICAL SPECIALITY – I

MENTAL HEALTH (PSYCHIATRIC) NURSING

Placement : 1st Year

Hours of Instruction
Theory 150 hours
Practical 650 hours
Total : 800 hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Psychiatric Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function psychiatric nurse specialist . It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends and issues in the field of psychiatry and psychiatric nursing.
2. Explain the dynamics of personality development and human behaviour.
3. Describe the concepts of psychobiology in mental disorders and its implications for psychiatric nursing
4. Demonstrate therapeutic communications skills in all interactions
5. Demonstrate the role of psychiatric nurse practitioner in various therapeutic modalities
6. Establish and maintain therapeutic relationship with individual and groups
7. Uses assertive techniques in personal and professional actions
8. Promotes self-esteem of clients, others and self
9. Apply the nursing process approach in caring for patients with mental disorders
10. Describe the psychopharmacological agents, their effects and nurses role
11. Recognize the role of psychiatric nurse practitioner and as a member of the psychiatric and mental health team
12. Describe various types of alternative system of medicines used in psychiatric settings
13. Incorporate evidence based nursing practice and identify the areas of research in the field of psychiatric nursing

Course Content

Units	Hours	Content
I	15	<p>Introduction</p> <ul style="list-style-type: none"> □ Mental Health and Mental Illness □ Historical perspectives □ Trends, issues and magnitude □ Contemporary practices □ Mental health laws/Acts □ National mental health program -National mental health authority, state mental health authority □ Human rights of mentally ill □ Mental Health/ Mental Illness Continuum □ Classification of mental illnesses-ICD, DSM □ Standards of Psychiatric nursing □ Challenges and Scope of psychiatric nursing □ Multi-disciplinary team and role of nurse <p>Role of psychiatric nurse- extended and expanded</p>
II	10	<p>Concepts of Psychobiology</p> <ul style="list-style-type: none"> □ The Nervous System: <ul style="list-style-type: none"> • An Anatomical Review • The Brain and limbic system • Nerve Tissue • Autonomic Nervous system • Neurotransmitters □ Neuroendocrinology <ul style="list-style-type: none"> • Pituitary, Thyroid Gland • Circadian Rhythms □ Genetics □ Neuro psychiatric disorders □ Psychoimmunology <ul style="list-style-type: none"> • Normal Immune response • Implications for psychiatric Illness □ Implications for Nursing
III	10	<p>Theories of Personality Development and relevance to nursing practice</p> <ul style="list-style-type: none"> □ Psychoanalytic Theory- Freud's □ Interpersonal Theory-Sullivan's □ Theory of Psychosocial Development-Erikson's □ Theory of object relations □ Cognitive Development Theory □ Theory of Moral Development □ A Nursing Model-Hildegard E.Peplau
IV	5	<p>Stress and its management</p> <ul style="list-style-type: none"> □ An introduction to the concepts of stress □ Psychological Adaptation to stress □ Stress as a Biological Response. □ Stress as an Environmental Event.

Units	Hours	Content
		<ul style="list-style-type: none"> □ Stress as Transaction between the Individual and the Environment. □ Stress management.
V	10	<p>Therapeutic communication and interpersonal relationship</p> <ul style="list-style-type: none"> □ Review communication process, factors affecting communication □ Communication with individuals and in groups □ Techniques of therapeutic communication-touch therapy □ Barrier of communication with specific reference to psychopathology □ Therapeutic attitudes □ Dynamics of a therapeutic Nurse-client relationship; Therapeutic use of self Gaining self-awareness □ Therapeutic nurse-patient relationship its phases ; Conditions essential to development of a therapeutic relationship □ Therapeutic impasse and its management
VI	10	<p>Assertive Training</p> <ul style="list-style-type: none"> □ Assertive Communication □ Basic Human Rights □ Response Patterns <ul style="list-style-type: none"> • (Nonassertive Behavior • Assertive Behavior • Aggressive Behavior • Passive-Aggressive Behavior) □ Behavioral Components of Assertive Behavior □ Techniques that Promote Assertive Behavior □ Thought-Stopping Techniques Method <p>Role of The Nurse</p>
VII	10	<p>Promoting Self-Esteem</p> <ul style="list-style-type: none"> □ Components of Self-Concept □ The Development of Self-Esteem □ The Manifestations of Low-Self-Esteem □ Boundaries <p>Role of The Nurse</p>
	5	<p>Women and Mental Health</p> <ul style="list-style-type: none"> ∥ Normal reaction to conception, pregnancy and puerperium ∥ Problems related to conception, pregnancy and puerperium and its management. • Counselling – Premarital, marital and genetic

Units	Hours	Content
VIII	10	<p>The nursing process in psychiatric/mental health nursing</p> <ul style="list-style-type: none"> □ Mental health assessment- History taking, mental status examination □ Physical and neurological examination □ Psychometric assessment □ Investigations, Diagnosis and Differential diagnosis □ Interpretation of investigations □ Nurse's role □ Nursing case management <ul style="list-style-type: none"> □ Critical pathways of care □ Documentation <ul style="list-style-type: none"> □ Problem-oriented recording □ Focus charting □ The PIE method
IX	35	<p>Psycho social and physical therapies</p> <ul style="list-style-type: none"> □ Individual therapy □ Behavioural Therapy- Relaxation therapy, cognitive therapy, positive- negative reinforcement, bio-feedback, guided imagery, ab-reactive therapy □ Group Therapy □ Family Therapy □ Milieu Therapy □ The Therapeutic Community □ Occupational therapy □ Recreational therapy □ Play therapy □ Music therapy □ Light therapy □ Color therapy □ Aroma therapy
XI	5	<p>Electroconvulsive Therapy</p> <ul style="list-style-type: none"> □ Historical Perspectives □ Indications □ Contraindications □ Mechanisms of Action □ Side Effects □ Risks Associated with Electroconvulsive Therapy □ The Role of The Nurse in Electroconvulsive Therapy
X	10	<p>Psychopharmacology</p> <ul style="list-style-type: none"> □ Historical Perspectives □ Role of a Nurse in Psychopharmacological Therapy <ul style="list-style-type: none"> • Antianxiety Agents • Antidepressants Agents • Mood stabilizers • Antipsychotics • Sedative-Hypnotics • Central Nervous System Stimulants □ Future developments

Units	Hours	Content
XII	15	<p>Alternative systems of medicine in mental health</p> <ul style="list-style-type: none"> □ Types of Therapies <ul style="list-style-type: none"> • Herbal Medicine • Unani • Siddha • Homeopathic • Acupressure and Acupuncture • Diet and Nutrition • Chiropractic Medicine • Therapeutic Touch and Massage • Yoga • Pet Therapy

Practical

Total = 660 Hours
1 Week = 30 Hours

S.No.	Area of Posting	No. of Week	Total Hours
1	Acute Psychiatric Ward	4	120 Hours
2	Chronic Psychiatric ward	4	120 Hours
3	Psychiatric Emergency Unit	2	60 Hours
4	O.P.D	2	60 Hours
5	Family Psychiatric Unit	2	60 Hours
6	Community Mental Health Unit	4	120 Hours
7	Rehabilitation / Occupational Therapy Unit/Half way home / Day care centre	4	120 Hours
	Total	22 Weeks	660 Hours

Student Activities

- History taking
- Mental health assessment
- Psychometric assessment
- Personality assessment
- Process recording
- Therapies- Group Therapy
- Family Therapy
- Psychotherapy
- Milieu Therapy
- The Therapeutic Community
- Occupational therapy
- Recreational therapy
- Play therapy
- music therapy
- Pet therapy
- Counselling
- Assisted ECT
- Assisted EEG
- Case studies
- Case presentation
- Project work
- Socio and psycho drama
- Field visits

CLINICAL SPECIALITY- I

COMMUNITY HEALTH NURSING

Placement : 1st Year

Hours of Instructions
Theory 150 hours
Practical 650 hours
Total 800 hours

Course Description

The course is designed to assist students in developing expertise and in-depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

Objectives

At the end of the course, the student will be able to:

1. Appreciate the history and development in the field of Community Health and Community Health Nursing.
2. Appreciate role of individuals and families in promoting health of the Community.
3. Perform physical, developmental and nutritional assessment of individuals, families and groups.
4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the people.
5. Apply nursing process approach while providing care to individuals, families, groups and community.
6. Integrate the concepts of family centered nursing approach while providing care to the community.
7. Recognize and participate in the management of emergencies, epidemics and disasters.
8. Apply recent technologies and care modalities while delivering community health nursing care.
9. Appreciate legal and ethical issues pertaining to community health nursing care.
10. Conduct community health nursing care projects.
11. Participate in planning, implementation and evaluation of various national health and family welfare programmes at local, state and the national level.
12. Incorporate evidence based nursing practice and identify the areas of research in the community settings.

13. Participate effectively as a member of Community Health team.
14. Coordinate and collaborate with various agencies operating in the community by using inter-sectoral approach.
15. Teach community health nursing to undergraduates, in-service nurses and the community health workers.
16. Demonstrate leadership and managerial abilities in community health nursing practice

Course Content

Unit	Hours	Content
I	10	Introduction <ul style="list-style-type: none"> □ Historical development of Community Health and Community health Nursing- World and India, various health and family welfare committees □ Current status, trends and challenges of Community Health Nursing □ Health status of the Community-community diagnosis □ Scope of Community health Nursing practice □ Ethical and legal issues □ Socio-cultural issues in Community health Nursing □ National Policies, plans and programmes <ul style="list-style-type: none"> • National health policy • National Population policy • National Health and welfare Programmes • National Health goals/ indicators/ Millennium developmental goals(MDG)/ Strategies • Planning process: Five year plans • National Rural Health Mission • Panchayat raj institutions
II	10	Health <ul style="list-style-type: none"> □ Concepts, issues □ Determinants □ Measurements □ Alternate systems for health promotion and management of health problems □ Health economics □ Health technology □ Genetics and health □ Waste disposal □ Eco system
III	15	Population dynamics and control <ul style="list-style-type: none"> □ Demography □ Transition and theories of population □ National population policy □ National population programmes □ Population control and related programmes □ Methods of family limiting and spacing □ Research, Census, National Family Health Survey

Unit	Hours	Content
IV	30	<p>Community health Nursing</p> <ul style="list-style-type: none"> □ Philosophy, Aims, Objectives, Concepts, Scope, Principles, Functions □ Community health Nursing theories and models □ Quality assurance: Community health Nursing standards, competencies, Monitoring community health nursing, nursing audits □ Family nursing and Family centered nursing approach □ Family health nursing process <ul style="list-style-type: none"> ○ Family health assessment ○ Diagnosis ○ Planning ○ Intervention ○ Evaluation □ Nursing care for special groups: children, adolescents, adults, women, elderly, physically and mentally challenged- Urban and rural population at large □ Community nutrition □ Concept, role and responsibilities of community health Nurse practitioners/nurse midwifery practitioners-decision making skills, professionalism, legal issues
V	45	<p>Maternal and neonatal care</p> <ul style="list-style-type: none"> □ IMNCI(Integrated Management of Neonatal And Childhood Illnesses) module □ Skilled Birth Attendant (SBA) module
VI	15	<ul style="list-style-type: none"> □ Disaster nursing (INC module on Reaching out: Nursing Care in emergencies)
VII	10	<p>Information, education and communication</p> <ul style="list-style-type: none"> □ IEC/BCC: Principles and strategies □ Communication Skills □ Management information and evaluation system: Records and reports □ Information technology □ Tele-medicine and tele-nursing □ Journalism □ Mass media □ Folk media
VIII	15	<p>Health care delivery system: Urban, rural, tribal and difficult areas</p> <ul style="list-style-type: none"> □ Health organization: National, State, District, CHC, PHC, Sub Centre, Village - Functions, Staffing, pattern of assistance, layout, drugs, equipments and supplies,Roles and Responsibilities of DPHNO □ Critical review of functioning of various levels, evaluation studies, recommendations and nursing perspectives □ Alternative systems of medicine □ Training and supervision of health workers

Unit	Hours	Content
		<ul style="list-style-type: none">□ Health agencies: NGO's, Roles and functions□ Inter-sectoral coordination□ Public private partnership□ Challenges of health care delivery system

Practical

Total = 660 Hours
1 Week = 30 Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
1	Sub-centre, PHC, CHC	12	360 Hours
2	District family welfare bureau	1	30 Hours
3	Urban centers	6	180 Hours
4	Field visits	3	90 Hours
	Total	22 Weeks	660 Hours

Student Activities

- Identification of community leaders and resource persons (community mapping)
- Community health survey
- Community health nursing process- individual, family and special groups and community
- Counseling
- Health education – campaign, exhibition, folk media, preparation of IEC materials
- Organising and participating in special clinics/camps and national health and welfare programmes-Organise atleast one health and family welfare mela/fair (all stalls of national health and family welfare activities should be included)
- Estimation of Vital health statistics -Exercise
- Drill for disaster preparedness
- Organise atleast one in-service education to ANM's/LHV/PHN/HW
- Nutrition – Exercise on nutritional assessment on dietary planning, demonstration and education for various age groups
- Filling up of Records, reports and registers maintained at SC/PHC/CHC
- Assist women in self breast examination
- Conduct antenatal examination
- Conduct vaginal examination
- Conduct deliveries
- Post natal visits
- Perform Episiotomy and suturing
- Prepare Pap smear
- Conduct Insertion/Removal of IUD
- Blood Slide preparation
- Field visits
- Maintenance of log book for various activities

NURSING RESEARCH AND STATISTICS

Placement: 1st Year

Hours of Instruction
Theory 150 Hours
Practical 100 Hours
Total : 250 Hours

Part-A : Nursing Research

Theory 100 Hours
Practical 50 Hours
Total : 150 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Define basic research terms and concepts.
2. Review literature utilizing various sources
3. Describe research methodology
4. Develop a research proposal.
5. Conduct a research study.
6. Communicate research findings
7. Utilize research findings
8. Critically evaluate nursing research studies.
9. Write scientific paper for publication.

Content Outline

Unit	Hours		Course Content
	Theory	Practical	
I	10		Introduction: <ul style="list-style-type: none"> □ Methods of acquiring knowledge – problem solving and scientific method. □ Research – Definition, characteristics, purposes, kinds of research □ Historical Evolution of research in nursing □ Basic research terms □ Scope of nursing research: areas, problems in nursing, health and social research □ Concept of evidence based practice □ Ethics in research □ Overview of Research process
II	5	5	Review of Literature <ul style="list-style-type: none"> □ Importance, purposes, sources, criteria for selection of resources and steps in reviewing literature.
III	12		Research Approaches and designs <ul style="list-style-type: none"> □ Type: Quantitative and Qualitative □ Historical, survey and experimental –Characteristics, types advantages and disadvantages □ Qualitative: Phenomenology, grounded theory, ethnography
IV	10	5	Research problem: <ul style="list-style-type: none"> □ Identification of research problem □ Formulation of problem statement and research objectives □ Definition of terms □ Assumptions and delimitations □ Identification of variables □ Hypothesis – definition, formulation and types.
V	5	5	Developing theoretical/conceptual framework. <ul style="list-style-type: none"> □ Theories: Nature, characteristics, Purpose and uses □ Using, testing and developing conceptual framework, models and theories.
VI	6		Sampling <ul style="list-style-type: none"> □ Population and sample □ Factors influencing sampling □ Sampling techniques □ Sample size □ Probability and sampling error □ Problems of sampling

Unit	Hours		Course Content
	Theory	Practical	
VII	20	10	Tools and methods of Data collection: <ul style="list-style-type: none"> □ Concepts of data collection □ Data sources, methods/techniques quantitative and qualitative. □ Tools for data collection – types, characteristics and their development □ Validity and reliability of tools □ Procedure for data collection
VIII	5		Implementing research plan <ul style="list-style-type: none"> □ Pilot Study, review research plan (design)., planning for data collection, administration of tool/interventions, collection of data
IX	10	10	Analysis and interpretation of data <ul style="list-style-type: none"> □ Plan for data analysis: quantitative and qualitative □ Preparing data for computer analysis and presentation. □ Statistical analysis □ Interpretation of data □ Conclusion and generalizations □ Summary and discussion
X	10		Reporting and utilizing research findings: <ul style="list-style-type: none"> □ Communication of research results; oral and written □ Writing research report purposes, methods and style- vancouver, American Psychological Association(APA), Campbell etc □ Writing scientific articles for publication: purposes & style
XI	3	8	Critical analysis of research reports and articles
XII	4	7	Developing and presenting a research proposal

Activities:

- Annotated Bibliography of research reports and articles.
- Review of literature of selected topic and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical/ conceptual framework.
- Preparation of a sample research tool
- Analysis and interpretation of given data
- Developing and presenting research proposal
- Journal club presentation
- Critical evaluation of selected research studies
- Writing a scientific paper.

Method of Teaching

- Lecture-cum-discussion
- Seminar/Presentations
- Project
- Class room exercises
- Journal club

Methods of Evaluation

- Quiz, Tests (Term)
- Assignments/Term paper
- Presentations
- Project work

Internal Assessment

Techniques	Weightage (15marks)
Term Test(2 tests)	40%
Assignment	20%
Presentation	20%
Project work	20%
Total	100%

Part –B : Statistics

Hours of Instruction
Theory 50 Hours
Practical 50 Hours
Total : 100 Hours

Course Description

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing.

General Objectives

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully.
4. Use descriptive and inferential statistics to predict results.
5. Draw conclusions of the study and predict statistical significance of the results.
6. Describe vital health statistics and their use in health related research.
7. Use statistical packages for data analysis

Unit	Hours		Course Content
	Theory	Practical	
I	7	4	Introduction: <ul style="list-style-type: none">□ Concepts, types, significance and scope of statistics, meaning of data,□ sample, parameter□ type and levels of data and their measurement□ Organization and presentation of data – Tabulation of data;□ Frequency distribution□ Graphical and tabular presentations.
II	4	4	Measures of central tendency: <ul style="list-style-type: none">□ Mean, Median, Mode
III	4	5	Measures of variability; <ul style="list-style-type: none">□ Range, Percentiles, average deviation, quartile deviation, standard deviation
IV	3	2	Normal Distribution: <ul style="list-style-type: none">□ Probability, characteristics and application of normal probability curve; sampling error.

Unit	Hours		Course Content
	Theory	Practical	
V	6	8	Measures of relationship: <ul style="list-style-type: none"> □ Correlation – need and meaning □ Rank order correlation; □ Scatter diagram method □ Product moment correlation □ Simple linear regression analysis and prediction.
VI	5	2	Designs and meaning: <ul style="list-style-type: none"> □ Experimental designs □ Comparison in pairs, randomized block design, Latin squares.
VII	8	10	Significance of Statistic and Significance of difference between two Statistics (Testing hypothesis) <ul style="list-style-type: none"> □ Non parametric test – Chi-square test, Sign, median test, Mann Whitney test. □ Parametric test – ‘t’ test, ANOVA, MANOVA,ANCOVA
VIII	5	5	Use of statistical methods in psychology and education: <ul style="list-style-type: none"> □ Scaling – Z Score, Z Scaling □ Standard Score and T Score □ Reliability of test Scores: test-retest method, parallel forms, split half method.
IX	4	2	Application of statistics in health: <ul style="list-style-type: none"> □ Ratios, Rates, Trends □ Vital health statistics – Birth and death rates. □ Measures related to fertility, morbidity and mortality
X	4	8	Use of Computers for data analysis <ul style="list-style-type: none"> □ Use of statistical package.

Activities

- Exercises on organization and tabulation of data,
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics(chi square, t-test, correlation)
- Practice in using statistical package
- Computing vital health statistics

Methods of Teaching:

- Lecture-cum-discussion
- Demonstration – on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data,

- Computing Descriptive and inferential statistics; vital and health statistics and use of computer for data entry and analysis using statistical package.

Methods of Evaluation

- Test, Classroom statistical exercises.

Internal Assessment

Techniques

Weightage 10 marks

Test – (2 tests)

100%

NURSING MANAGEMENT

Placement : II Year

Hours of Instruction
Theory 150 Hours
Practical 150 Hours
Total : 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of Principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Describe the philosophy and objectives of the health care institutions at various levels.
2. Identify trends and issues in nursing
3. Discuss the public administration, health care administration vis a vis nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Collaborate and co-ordinate with various agencies by using multi-sectoral approach
7. Discuss the planning, supervision and management of nursing workforce for various health care settings.
8. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
9. Identify and analyse legal and ethical issues in nursing administration
10. Describe the process of quality assurance in nursing services.
11. Demonstrate leadership in nursing at various levels

Course Content

Unit	Hours	Content
I	10	<p>Introduction</p> <ul style="list-style-type: none"> □ Philosophy, purpose, elements, principles and scope of administration □ Indian Constitution, Indian Administrative system vis a vis health care delivery system: National, State and Local □ Organisation and functions of nursing services and education at National, State , District and institutions: Hospital and Community □ Planning process: Five year plans, Various Committee Reports on health, State and National Health policies, national population policy, national policy on AYUSH and plans,
II	10	<p>Management</p> <ul style="list-style-type: none"> □ Functions of administration □ Planning and control □ Co-ordination and delegation □ Decision making – decentralization basic goals of decentralization. □ Concept of management <p>Nursing management</p> <ul style="list-style-type: none"> □ Concept, types, principles and techniques □ Vision and Mission Statements □ Philosophy, aims and objective □ Current trends and issues in Nursing Administration □ Theories and models <p>Application to nursing service and education</p>
III	15	<p>Planning</p> <ul style="list-style-type: none"> □ Planning process: Concept, Principles, Institutional policies □ Mission, philosophy, objectives, □ Strategic planning □ Operational plans □ Management plans □ Programme evaluation and review technique(PERT), Gantt chart, Management by objectives(MBO) □ Planning new venture □ Planning for change □ Innovations in nursing <p>Application to nursing service and education</p>
IV	15	<p>Organisation</p> <ul style="list-style-type: none"> □ Concept , principles, objectives, Types and theories, Minimum requirements for organisation, Developing an organizational Structure, levels, organizational Effectiveness and organizational Climate, □ Organising nursing services and patient care: Methods of patient assignment- Advantages and disadvantages, primary nursing care, □ Planning and Organising: hospital, unit and ancillary services(specifically central sterile supply department, laundry, kitchen, laboratory services, emergency etc)

Unit	Hours	Content
		<ul style="list-style-type: none"> □ Disaster management: plan, resources, drill, etc <p>Application to nursing service and education</p>
V	15	<p>Human Resource for health</p> <ul style="list-style-type: none"> □ Staffing <ul style="list-style-type: none"> • Philosophy • Norms: Staff inspection unit(SIU), Bajaj Committee, High power committee, Indian nursing council (INC) • Estimation of nursing staff requirement- activity analysis • Various research studies □ Recruitment: credentialing, selection, placement, promotion □ Retention □ Personnel policies □ Termination □ Staff development programme □ Duties and responsibilities of various category of nursing personnel <p>Applications to nursing service and education</p>
VI	15	<p>Directing</p> <ul style="list-style-type: none"> □ Roles and functions □ Motivation: Intrinsic, extrinsic, Creating motivating climate, Motivational theories □ Communication : process, types, strategies, Interpersonal communication, channels, barriers, problems, Confidentiality, Public relations □ Delegation; common delegation errors □ Managing conflict: process, management, negotiation, consensus □ Collective bargaining: health care labour laws, unions, professional associations, role of nurse manager □ Occupational health and safety <p>Application to nursing service and education</p>
VII	10	<p>Material management</p> <ul style="list-style-type: none"> □ Concepts, principles and procedures □ Planning and procurement procedures : Specifications □ ABC analysis, □ VED (very important and essential daily use) analysis □ Planning equipments and supplies for nursing care: unit and hospital □ Inventory control □ Condemnation <p>Application to nursing service and education</p>
VIII	15	<p>Controlling</p> <ul style="list-style-type: none"> □ Quality assurance – Continuous Quality Improvement <ul style="list-style-type: none"> • Standards • Models • Nursing audit

Unit	Hours	Content
		<ul style="list-style-type: none"> □ Performance appraisal: Tools, confidential reports, formats, Management, interviews □ Supervision and management: concepts and principles □ Discipline: service rules, self discipline, constructive versus destructive discipline, problem employees, disciplinary proceedings-enquiry etc □ Self evaluation or peer evaluation, patient satisfaction, utilization review <p>Application to nursing service and education</p>
IX	15	<p>Fiscal planning</p> <ul style="list-style-type: none"> □ Steps □ Plan and non-plan, zero budgeting, mid-term appraisal, capital and revenue □ Budget estimate, revised estimate, performance budget □ Audit □ Cost effectiveness □ Cost accounting □ Critical pathways □ Health care reforms □ Health economics □ Health insurance □ Budgeting for various units and levels <p>Application to nursing service and education</p>
X	10	<p>Nursing informatics</p> <ul style="list-style-type: none"> □ Trends □ General purpose □ Use of computers in hospital and community □ Patient record system □ Nursing records and reports □ Management information and evaluation system (MIES) □ E- nursing, Telemedicine, telenursing □ Electronic medical records
XI	10	<p>Leadership</p> <ul style="list-style-type: none"> □ Concepts, Types, Theories □ Styles □ Manager behaviour □ Leader behaviour □ Effective leader: Characteristics, skills □ Group dynamics □ Power and politics □ lobbying □ Critical thinking and decision making □ Stress management <p>Applications to nursing service and education</p>

Unit	Hours	Content
XII	10	<p>Legal and ethical issues</p> <p>Laws and ethics</p> <ul style="list-style-type: none"> □ Ethical committee □ Code of ethics and professional conduct □ Legal system: Types of law, tort law, and liabilities □ Legal issues in nursing: negligence, malpractice, invasion of privacy, defamation of character □ Patient care issues, management issues, employment issues □ Medico legal issues □ Nursing regulatory mechanisms: licensure, renewal, accreditation □ Patients rights, Consumer protection act(CPA) □ Rights of special groups: children, women, HIV, handicap, ageing □ Professional responsibility and accountability □ Infection control □ Standard safety measures

PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, Revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organisation Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for speciality units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel
8. Prepare a list of equipments and supplies for speciality units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions
12. Prepare a plan of action for performance appraisal
13. Identify the problems of the speciality units and develop plan of action by using problem solving approach
14. Plan a duty roster for speciality units/hospital, community and educational institutions
15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurses notes, Official letters, curriculum vitae, presentations etc

16. Prepare a plan for disaster management
17. Group work
18. Field appraisal report

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING

SUB SPECIALITY – CARDIO VASCULAR AND THORACIC NURSING

Placement : II year

Hours of Instruction
Theory : 150 hours.
Practical : 950 hours.
Total : 1100 hours.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as Cardio vascular and Thoracic Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to cardio vascular and thoracic Nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of cardio vascular and thoracic conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions
7. Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.
8. Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
9. Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
10. Appreciate team work & coordinate activities related to patient care.
11. Practice infection control measures.
12. Identify emergencies and complications & take appropriate measures

13. Discuss the legal and ethical issues in cardio vascular and thoracic nursing
14. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
15. Appreciate the role of alternative system of medicine in care of patient
16. Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
17. Identify the sources of stress and manage burnout syndrome among health care providers.
18. Teach and supervise nurses and allied health workers.
19. Design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursing practice.

Content Outline

Unit	Hours	Content
I	5	Introduction <ul style="list-style-type: none"> □ Historical development, trends and issues in the field of cardiology. □ Cardio vascular and thoracic conditions – major health problem. □ Concepts, principles and nursing perspectives □ Ethical and legal issues □ Evidence based nursing and its application in cardio vascular and thoracic nursing(to be incorporated in all the units)
II	5	Epidemiology <ul style="list-style-type: none"> □ Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitus etc □ Health promotion, disease prevention, Life style modification □ National health programs related to cardio vascular and thoracic conditions □ Alternate system of medicine □ Complementary therapies
III	5	Review of anatomy and physiology of cardio vascular and respiratory system <ul style="list-style-type: none"> □ Review of anatomy and physiology of heart, lung, thoracic cavity and blood vessels. Embryology of heart and lung. □ Coronary circulation □ Hemodynamics and electro physiology of heart. □ Bio-chemistry of blood in relation to cardio pulmonary function.
IV	20	Assessment and Diagnostic Measures: <ul style="list-style-type: none"> □ History taking □ Physical assessment <ul style="list-style-type: none"> • Heart rate variability: Mechanisms , measurements, pattern, factors, impact of interventions on HRV □ Diagnostic tests <ul style="list-style-type: none"> • Hemodynamic monitoring: Technical aspects, monitoring, functional hemodynamic indices, ventricular function indices,

Unit	Hours	Content
		<p>output measurements (Arterial and swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand</p> <ul style="list-style-type: none"> • Radiologic examination of the chest: interpretation, chest film findings • Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination <ul style="list-style-type: none"> - ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance, • Echocardiography: technical aspects, special techniques, echocardiography of cardiac structures in health and disease, newer techniques • Nuclear and other imaging studies of the heart: Magnetic Resonance Imaging. • Cardio electrophysiology procedures: diagnostic studies, interventional and catheter ablation, nursing care • Exercise testing: indications and objectives, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period • Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data • Pulmonary function test: Bronchoscopy and graphies • Interpretation of diagnostic measures • Nurse’s role in diagnostic tests <p>□ Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, cardiac enzyme studies, Serum Concentration of Selected drugs.</p> <p>□ Interpretation and role of nurse</p>
V	25	<p>Cardiac disorders and nursing management:</p> <p>□ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Hypertension • Coronary Artery Disease. • Angina of various types. • Cardiomegaly • Myocardial Infarction, Congestive cardiac failure • Heart Failure, Pulmonary Edema, Shock. • Rheumatic heart disease and other Valvular Diseases • Inflammatory Heart Diseases, Infective Endocarditis, Myocarditis, Pericarditis. • Cardiomyopathy, dilated, restrictive, hypertrophic. • Arrhythmias, heart block <p>Associated illnesses</p>

Unit	Hours	Content
VI	10	<p>Altered pulmonary conditions</p> <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of: <ul style="list-style-type: none"> • Bronchitis • Bronchial asthma • Bronchiectasis • Pneumonias • Lung abscess, lung tumour • Pulmonary tuberculosis, fibrosis, pneumoconiosis etc • Pleuritis, effusion • Pneumo, haemo and pyothorax • Interstitial Lung Disease • Cystic fibrosis • Acute and Chronic obstructive pulmonary disease (conditions leading to) • Cor pulmonale • Acute respiratory failure • Adult respiratory distress syndrome • Pulmonary embolism • Pulmonary Hypertension
VII	10	<p>Vascular disorders and nursing management</p> <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of: <ul style="list-style-type: none"> • Disorders of arteries • Disorders of the aorta • Aortic Aneurysms, • Aortic dissection • Raynaud's phenomenon • Peripheral arterial disease of the lower extremities • Venous thrombosis • Varicose veins • Chronic venous insufficiency and venous leg ulcers • Pulmonary embolism
VIII	10	<p>Cardio thoracic emergency interventions</p> <ul style="list-style-type: none"> □ CPR- BLS and ALS □ Use of ventilator, defibrillator , pacemaker □ Post resuscitation care. □ Care of the critically ill patients □ Psychosocial and spiritual aspects of care □ Stress management; ICU psychosis □ Role of nurse
IX	10	<p>Nursing care of a patient with obstructive airway</p> <ul style="list-style-type: none"> □ Assessment □ Use of artificial airway □ Endotracheal intubation, tracheostomy and its care □ Complication, minimum cuff leak, securing tubes <p>Oxygen delivery systems.</p> <ul style="list-style-type: none"> □ Nasal Cannula

Unit	Hours	Content
		<ul style="list-style-type: none"> □ Oxygen mask, Venturi mask □ Partial rebreathing bag □ Bi-PAP and C-PAP masks □ Uses, advantages, disadvantages, nursing implications of each. <p>Mechanical Ventilation</p> <ul style="list-style-type: none"> □ Principles of mechanical ventilation □ Types of mechanical ventilation and ventilators. □ Modes of ventilation, advantage, disadvantage, complications. □ PEEP therapy, indications, physiology, and complications. Weaning off the ventilator. □ Nursing assessment and interventions of ventilated patient.
X	10	<p>Congenital Heart Diseases,</p> <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of: <ul style="list-style-type: none"> • Embryological development of heart. • Classification – cyanotic and acyanotic heart disease. • Tetralogy of Fallots. • Atrial Septal Defect, Ventricular Septal Defect., Eisenmenger’s complex. • Patent ductus arteriosus, AP window • Truncus Arteriosus. • Transposition of great arteries. • Total Anomaly of Pulmonary Venous Connection. • Pulmonary stenosis, atresia. • Coarctation of aorta. • Ebstein’s anomaly • Double outlet right ventricle, Single ventricle, Hypoplastic left heart syndrome.
XI	10	<p>Pharmacology</p> <ul style="list-style-type: none"> □ Review □ Pharmacokinetics □ Analgesics/Anti inflammatory agents □ Antibiotics, antiseptics □ Drug reaction & toxicity □ Drugs used in cardiac emergencies □ Blood and blood components <ul style="list-style-type: none"> • Antithrombolytic agents • Inotropic agents • Beta-blocking agents • Calcium channel blockers. • Vaso constrictors • Vaso dilators • ACE inhibitors. • Anticoagulents • Antiarrhythmic drugs. • Anti hypertensives • Diuretics • Sedatives and tranquilizers. • Digitalis.

Unit	Hours	Content
		<ul style="list-style-type: none"> • Antilipemics □ Principles of drug administration, role and responsibilities of nurses and care of drugs
XII	20	<p>Nursing Care of patient undergoing cardio thoracic surgery</p> <ul style="list-style-type: none"> □ Indications, selection of patient □ Preoperative assessment and preparation; counselling. □ Intraoperative care: Principles of open heart surgery, equipment, anaesthesia, cardiopulmonary by pass. □ Surgical procedures for Coronary Artery Bypass Grafting, recent advances and types of grafts, Valve replacement or reconstruction, cardiac transplant, Palliative surgery and different Stents, vascular surgery, other recent advances. □ Thoracic surgery: lobectomy, pneumonectomy, tumour excision etc □ Immediate postoperative care : assessment, post operative problems and interventions : Bleeding, Cardiac tamponade, Low cardiac output, Infarction, Pericardial effusion, Pleural effusion, Pneumothorax, Haemothorax, Coagulopathy, Thermal imbalance, Inadequate., ventilation/perfusion, Neurological problems, renal problems, Psychological problems. □ Chest physiotherapy □ Nursing interventions- life style modification, complementary therapy/alternative systems of medicine. □ Intermediate and late post operative care after CABG, valve surgery, others. <p>Follow up care</p>
XIII	5	<p>Cardiac rehabilitation</p> <ul style="list-style-type: none"> □ Process □ Physical evaluation □ Life style modification □ Physical conditioning for cardiovascular efficiency through exercise □ Counseling □ Follow up care
XIV	5	<p>Intensive Coronary Care Unit/intensive cardio thoracic unit:</p> <ul style="list-style-type: none"> □ Quality assurance <ul style="list-style-type: none"> • Standards, Protocols, Policies, Procedures • Infection control; Standard safety measures • Nursing audit • Design of ICCU/ICTU • Staffing; cardiac team • Burn out syndrome □ Nurse's role in the management of I.C.C.U and ICTU. □ Mobile coronary care unit. □ Planning inservice educational programme and teaching

Practicals

Total – 960 Hours
1 Weeks = 30 Hours

S.No.	Deptt/ Unit	No. of Week	Total Hours
1	Cardio thoracic -Medical	4	120 Hours
	-Surgical	4	120 Hours
2.	OTs (Cardiac and thoracic)	4	120 Hours
3.	Casualty	2	60 Hours
4.	Diagnostic labs including cath lab	2	60 Hours
5.	ICCU	4	120 Hours
6.	ICU	4	120 Hours
7.	CCU	4	120 Hours
8.	Paediatric Intensive	2	60 Hours
9.	OPD	2	60 Hours
	Total	32 Weeks	960 Hours

Essential Nursing Skills

Procedures Observed

1. Echo cardiogram
2. Ultrasound
3. Monitoring JVP , CVP
4. CT SCAN
5. MRI
6. Pet SCAN
7. Angiography
8. Cardiac cathetrisation
9. Angioplasty
10. Various Surgeries
11. Any other

I. Procedures Assisted

1. Arterial blood gas analysis
2. Thoracentesis
3. Lung biopsy
4. Computer assisted tomography (CAT Scan)
5. M.R.I.
6. Pulmonary angiography
7. Bronchoscopy
8. Pulmonary function test
9. ET tube insertion
10. Tracheostomy tube insertion
11. Cardiac catheterisation
12. Angiogram
13. Defibrillation
14. Treadmill test

15. Echo cardiography
16. Doppler ultrasound
17. Cardiac surgery
18. Insertion of chest tube
19. CVP Monitoring
20. Measuring pulmonary artery pressure by Swan-Ganz Catheter
21. Cardiac Pacing

II. Procedures Performed

1. Preparation of assessment tool for CT client (Cardiac, thoracic and vascular).
2. ECG – Recording, Reading, Identification of abnormalities
3. Oxygen therapy – Cylinder, central supply,
Catheter, nasal canula, mask, tent
Through ET and Tracheostomy tube
Manual resuscitation bag
4. Mechanical ventilation
5. Spirometer
6. Tuberculen skin test
7. Aerosal therapy
8. Nebulizer therapy
9. Water seal drainage
10. Chest physiotherapy including – Breathing Exercises
Coughing Exercises
Percussion & Vibration
11. Suctioning – Oropharyngeal, nasotracheal, Endotracheal
Through tracheostomy tube
12. Artificial airway cuff maintenance
13. CPR
14. Care of client on ventilator
15. Identification of different – Arrhythmias
Abnormal pulses, respirations
B.P. Variation
Heart sounds
Breath sounds
16. Pulse oxymetry
17. Introduction of intracath
18. Bolus I.V. Injection
19. Life line
20. Maintenance of “Heplock”
21. Subcutaneous of Heparin
22. Obtaining leg measurements to detect early swelling in thrombophlebetes
23. Identification of Homans signs
24. Buerger – Allen exercises

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING - CRITICAL CARE NURSING

Placement: II Year

Hours of instruction

Theory: 150 hours

Practical: 950 hours

Total : 1100 hours

Course Description

This course is designed to assist students in developing expertise and in-depth knowledge in the field of Critical care Nursing. It will help students to develop advanced skills for nursing intervention in caring for critically ill patients. It will enable the student to function as critical care nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of Critical Care Nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to Critical Care Nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients
3. Describe the various drugs used in critical care and nurses responsibility
4. Perform physical, psychosocial & spiritual assessment
5. Demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support.
6. Demonstrate skill in handling various equipments/gadgets used for critical care
7. Provide comprehensive care to critically ill patients.
8. Appreciate team work & coordinate activities related to patient care.
9. Practice infection control measures.
10. Assess and manage pain .
11. Identify complications & take appropriate measures.
12. Discuss the legal and ethical issues in critical care nursing
13. Assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
14. Assist in various diagnostic, therapeutic and surgical procedures
15. Incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing

16. Identify the sources of stress and manage burnout syndrome among health care providers.
17. Teach and supervise nurses and allied health workers.
18. Design a layout of ICU and develop standards for critical care nursing practice.

Course Content

Unit	Hours	Content
I	5	Introduction to Critical Care Nursing <ul style="list-style-type: none"> □ Historical review- Progressive patient care(PPC) □ Review of anatomy and physiology of vital organs, fluid and electrolyte balance □ Concepts of critical care nursing □ Principles of critical care nursing □ Scope of critical care nursing □ Critical care unit set up including equipments supplies, use and care of various type of monitors & ventilators □ Flow sheets
II	10	Concept of Holistic care applied to critical care nursing practice <ul style="list-style-type: none"> □ Impact of critical care environment on patients:- <ul style="list-style-type: none"> • Risk factors, Assessment of patients, Critical care psychosis, prevention & nursing care for patients affected with psychophysiological & psychosocial problems of critical care unit, Caring for the patient's family, family teaching □ The dynamics of healing in critical care unit:-therapeutic touch, Relaxation, Music therapy, Guided Imagery, acupressure □ Stress and burnout syndrome among health team members
III	14	Review <ul style="list-style-type: none"> □ Pharmacokinetics □ Analgesics/Anti inflammatory agents □ Antibiotics, antiseptics □ Drug reaction & toxicity □ Drugs used in critical care unit (inclusive of ionotropic, life saving drugs) □ Drugs used in various body systems □ IV fluids and electrolytes □ Blood and blood components □ Principles of drug administration, role of nurses and care of drugs
IV	5	Pain Management <ul style="list-style-type: none"> □ Pain & Sedation in Critically ill patients □ Theories of pain, Types of pain, Pain assessment, Systemic responses to pain □ pain management-pharmacological and non-pharmacological measures □ Placebo effect

Unit	Hours	Content
V	5	<p>Infection control in intensive care unit</p> <ul style="list-style-type: none"> □ Nosocomial infection in intensive care unit; methyl resistant staphylococcus aureus (MRSA), Disinfection, Sterilization, Standard safety measures, Prophylaxis for staff
VI	10	<p>Gastrointestinal System</p> <ul style="list-style-type: none"> □ Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Gastrointestinal Bleeding, Abdominal injury, Hepatic Disorders:-Fulminant hepatic failure, Hepatic encephalopathy, Acute Pancreatitis, Acute intestinal obstruction, perforative peritonitis
VII	10	<p>Renal System</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Renal Failure, Chronic Renal Failure, Acute tubular necrosis, Bladder trauma □ Management Modalities: Hemodialysis, Peritoneal Dialysis, Continuous Ambulatory Peritoneal Dialysis, Continuous arterio venous hemodialysis, Renal Transplant,
VIII	10	<p>Nervous System</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Common Neurological Disorders:-Cerebrovascular disease, Cerebrovascular accident, Seizure disorders, GuilleinBarre-Syndrome, Myasthenia Gravis, Coma, Persistent vegetative state, Encephalopathy, Head injury, Spinal Cord injury □ Management Modalities: Assessment of Intracranial pressure, Management of intracranial hypertension, Craniotomy □ Problems associated with neurological disorders: Thermo regulation, Unconsciousness, Herniation syndrome
IX	5	<p>Endocrine System</p> <ul style="list-style-type: none"> □ Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing Management of :-Hypoglycemia, Diabetic Ketoacidosis, Thyroid crisis, Myxoedema, Adrenal crisis, Syndrome of Inappropriate/ hypersecretion of Antidiuretic Hormone (SIADH)
X	15	<p>Management of other Emergency Conditions</p> <ul style="list-style-type: none"> □ Mechanism of injury, Thoracic injuries, Abdominal injuries, pelvic fractures, complications of trauma, Head injuries □ Shock: Shock syndrome, Hypovolemic, Cardiogenic, Anaphylactic, Neurogenic and Septic shock □ Systemic inflammatory Response: The inflammatory response, Multiple organ dysfunction syndrome □ Disseminated Intravascular Coagulation □ Drug Overdose and Poisoning, □ Acquired Immunodeficiency Syndrome (AIDS)

Unit	Hours	Content
		<ul style="list-style-type: none"> □ Ophthalmic: Eye injuries, Glaucoma, retinal detachment □ Ear Nose Throat: Foreign bodies, stridor, bleeding, quincy, acute allergic conditions □ Psychiatric emergencies;, suicide, □ crisis intervention
XI	20	<p>Cardiovascular emergencies</p> <ul style="list-style-type: none"> □ Principles of Nursing in caring for patient's with Cardiovascular disorders □ Assessment: Cardiovascular system: Heart sounds, Diagnostic studies:- Cardiac enzymes studies, Electrocardiographic monitoring, Holter monitoring, Stress test. Echo cardiography, Coronary angiography, Nuclear medicine studies □ Causes, Pathophysiology, Clinical types, Clinical features, Diagnostic Prognosis, Management : Medical, Surgical & Nursing management of:-Hypertensive crisis, Coronary artery disease, Acute Myocardial infarction, Cardiomyopathy, Deep vein thrombosis, Valvular diseases, Heart block, Cardiac arrhythmias & conduction disturbances, Aneurysms, Endocarditis, Heart failure Cardio pulmonary resuscitation BCLS/ ACLS □ Management Modalities: Thrombolytic therapy, Pacemaker – temporary & permanent, Percutaneous transluminal coronary angioplasty, Cardioversion, Intra Aortic Balloon pump monitoring, Defibrillations, Cardiac surgeries, Coronary Artery Bypass Grafts (CABG/MICAS), Valvular surgeries, Heart Transplantation, Autologous blood transfusion, Radiofrequency Catheter Ablation
XII	15	<p>Respiratory System</p> <ul style="list-style-type: none"> □ Acid-base balance & imbalance □ Assesment : History & Physical Examination □ Diagnostic Tests:Pulse Oximetry, End –Tidal Carbon Dioxide Monitoring, Arterial blood gas studies, chest radiography, pulmonary Angiography, Bronchoscopy, Pulmonary function Test, Ventilation perfusion scan, Lung ventilation scan □ Causes Pathophysiology, Clinical types, Clinical features, Prognosis, Management: Medical, Surgical and Nursing management of Common pulmonary disorders:-Pneumonia, Status asthmaticus, interstitial drug disease, Pleural effusion, Chronic obstructive pulmonary disease, Pulmonary tuberculosis, Pulmonary edema, Atelectasis, Pulmonary embolism, Acute respiratory failure, Acute respiratory distress syndrome (ARDS), Chest Trauma Haemothorax, Pneumothorax □ Management Modalities:-Airway Management □ Ventilatory Management:-Invasive, non- invasive, long term mechanical ventilations □ Bronchial Hygiene:-Nebulization, deep breathing exercise, chest physiotherapy, postural drainage, Inter Costal Drainage, Thoracic surgeries

Unit	Hours	Content
XIII	7	<p>Burns</p> <ul style="list-style-type: none"> □ Clinical types, classification, pathophysiology, clinical features, assessment, diagnosis, prognosis, Management: Medical, Surgical & Nursing management of burns □ Fluid and electrolyte therapy – calculation of fluids and its administration □ Pain management □ Wound care □ Infection control □ Prevention and management of burn complications □ Grafts and flaps □ Reconstructive surgery □ Rehabilitation
XIV	5	<p>Obstetrical Emergencies</p> <ul style="list-style-type: none"> □ Causes, Pathophysiology, Clinical types, clinical features, diagnostic Prognosis, Management: Medical, Surgical and Nursing management of :Antepartum haemorrhage, Preeclampsia, eclampsia, Obstructed labour and ruptured uterus, Post partum haemorrhage, Peurperal sepsis, Obstetrical shock
XV	10	<p>Neonatal Paediatric emergencies</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Neonatal emergencies □ Asphyxia Neonatarum, Pathological Jaundice in Neonates, Neonatal seizures, Metabolic disorders, Intra cranial Hemorrhage, Neonatal Sepsis, RDS/HMD (Respiratory Distress Syndrome/Hyaline Membrane Disease), Congenital disorders:- <ul style="list-style-type: none"> • Cyanotic heart disease, tracheo oesophageal fistula, congenital hypertropic pyloric stenosis, imperforate anus • Pediatric emergencies □ Dehydration, Acute broncho pneumonia, Acute respiratory distress syndrome, Poisoning, Foreign bodies, seizures, traumas, Status asthmaticus
XVI	2	<p>Legal and ethical issues in critical care-Nurse's role</p> <ul style="list-style-type: none"> □ Brain death □ Organ donation & Counselling □ Do Not Resuscitate(DNR) □ Euthanasia □ Living will
XVII	2	<p>Quality assurance</p> <ul style="list-style-type: none"> □ Standards, Protocols, Policies, Procedures □ Infection control; Standard safety measures □ Nursing audit □ Staffing □ Design of ICU/CCU

Practical

Total = 960 Hours
1 Week = 30 Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
3	Burns ICU	2	60 Hours
5	Medical ICU	8	240 Hours
6	Surgical ICU	12	360 Hours
9	CCU	2	60 Hours
10	Emergency Department	3	90 Hours
12	Dialysis Unit	1	30 Hours
13	Transplant Room	2	60 Hours
14	Paediatric/ NICU	2	60 Hours
	Total	32 Weeks	960 Hours

ESSENTIAL CRITICAL CARE NURSING SKILLS

I. Procedures Observed

1. CT Scan
2. MRI
3. EEG
4. Hemodialysis
5. Endoscopic Retrograde cholangio Pancreaticogram(ERCP)
6. Heart/ Neuro/GI./ Renal Surgeries

II. Procedures Assisted

1. Advanced life support system
2. Basic cardiac life support
3. Arterial line/arterial pressure monitoring/blood taking
4. Arterial blood gas
5. ECG recording
6. Blood transfusion
7. IV cannulation therapy
8. Arterial Catheterization
9. Chest tube insertion
10. Endotracheal intubations
11. Ventilation

12. Insertion of central line/cvp line
13. Connecting lines for dialysis

III. Procedure Performed

1. Airway management
 - a. Application of oropharyngeal airway
 - b. Oxygen therapy
 - c. CPAP (Continuous Positive Airway pressure)
 - d. Care of tracheostomy
 - e. Endotracheal extubation
2. Cardiopulmonary resuscitation, Basic cardiac life support, ECG
3. Monitoring of critically ill patients – clinically with monitors, capillary refill time (CRT) assessment of jaundice, ECG.
4. Gastric lavage
5. Assessment of critically ill patients
 - Identification & assessment of risk factors, Glasgow coma scale, and dolls eye movement, arterial pressure monitoring, cardiac output/pulmonary artery pressure monitoring, and detection of life threatening abnormalities
6. Admission & discharge of critically ill patients
7. Nutritional needs – gastrostomy feeds, pharyngeal feeds, jejunostomy feeds, TPN, formula preparation & patient education.
8. Assessment of patient for alteration in blood sugar levels monitoring blood sugar levels periodically & administering insulin periodically.
9. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, use of insulin syringes/tuberculin, monitoring fluid therapy, blood administration.
10. Setting up dialysis machine and starting, monitoring and closing dialysis
11. Procedures for prevention of infections:
 - Hand washing, disinfection & sterilization surveillance, and fumigation universal precautions.
12. Collection of specimen.
13. Setting, use & maintenance of basic equipment, ventilator, O2 analyzer, monitoring equipment, transducers, defibrillator, infusion & syringe pumps, centrifuge machine.

IV Other Procedures:

CLINICAL SPECIALITY-II

MEDICAL SURGICAL NURSING- ONCOLOGY NURSING

Placement : II Year

Hours of Instruction
Theory : 150 hours
Practicals : 950 hours
Total : 1100 hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of oncology Nursing. It will help students to develop advanced skills for nursing intervention in various oncological conditions. It will enable the student to function as oncology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of oncology nursing

Objectives

1. Explain the prevention, screening and early detection of cancer
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of oncological disorders of various body systems
3. Describe the psychosocial effects of cancer on patients and families.
4. Demonstrate skill in administering/ assisting in various treatment modalities used for patients with cancer
5. Apply nursing process in providing holistic care to patients with cancer.
6. Apply specific concepts of pain management
7. Appreciate the care of death and dying patients and value of bereavement support.
8. Describe the philosophy, concept and various dimensions of palliative care
9. Appreciate the role of alternative systems of medicine in care of cancer patients
10. Appreciate the legal & ethical issues relevant to oncology nursing
11. Recognize and manage Oncological emergencies
12. Counsel the patients with cancer and their families
13. Incorporate evidence based nursing practice and identify the areas of research in the field of oncology nursing
14. Recognize the role of oncology nurse practitioner as a member of oncology team
15. Collaborate with other agencies and utilize resources in caring for cancer patients.

16. Teach and supervise nurses and allied health workers.
17. Design a layout and develop standards for management of oncology units/hospitals and nursing care.

Content outline

Unit	Hours.	Content
I	4	<p>Introduction</p> <ul style="list-style-type: none"> □ Epidemiology-Incidence, Prevalence – Global, National, State and Local □ Disease burden, concept of cancer, risk factors □ Historical perspectives □ Trends and issues □ Principles of cancer management □ Roles and responsibilities of oncology nurse
II	5	<p>The Nature of Cancer</p> <ul style="list-style-type: none"> □ Normal cell biology □ The Immune system □ Pathological and pathophysiological changes in tissues <ul style="list-style-type: none"> • Biology of the cancer cell • Clone formation Transformation • Tumor stem lines • Structure of a solid tumor • Products produced by the tumor • Systemic effects of tumor growth
III	4	<p>Etiology of Cancer</p> <ul style="list-style-type: none"> □ Carcinogenesis, □ Theories of cancer causation □ Risk factors □ Carcinogens – genetic factors, chemical carcinogens, radiation, viruses, Immune system failure, rapid tissue proliferation □ Hormone changes, diet, emotional factors.
IV	10	<p>Diagnostic Evaluation</p> <ul style="list-style-type: none"> □ Health assessment: History taking, physical examination, □ Staging and grading of tumors, □ TNM Classification □ Common diagnostic tests <ul style="list-style-type: none"> • Blood investigation: Haemetological, Bio-chemical, Tumor markers, Hormonal assay • Cytology:Fine needle aspiration cytology(FNAC) • Histopathology: Biopsy • Radiological assessment: MRI, Ultrasound, Computed tomography, Mammography, Positron emission tomography(PET), Radio nuclide imaging, Functional metabolism imaging • Endoscopies <p>Nurses responsibilities in diagnostic measures</p>

Unit	Hours.	Content
V	10	<p>Levels of prevention and care</p> <ul style="list-style-type: none"> □ Primary prevention – Guidelines for cancer detection, general measures, Warning signs of cancer, □ Self examination-Oral, Breast, Testicular □ Secondary prevention – early diagnosis. □ Screening □ Tertiary prevention – disability limitation, □ Rehabilitation :Mobility , Speech, Bowel and bladder, Ostomies etc □ Patient and family education, □ Discharge instruction, follow-up care and use of community resources.
VI	25	<p>Cancer Treatment Modalities and Nurse’s Role</p> <ul style="list-style-type: none"> □ Surgery <ul style="list-style-type: none"> • Principles of surgical oncology • Current surgical strategy, • Determining surgical risk • Special surgical techniques • Pre-intra-postoperative nursing care • Acute and chronic surgical complications • Future directions and advances □ Chemotherapy <ul style="list-style-type: none"> • Principles and classification of chemotherapeutics • Pharmacology of antineoplastic drugs- Mechanism of action, Absorption, protein binding, Bio-transformation, excretion, common side effects, drug toxicity • Calculating drug doses, • Therapeutic response to chemotherapy-Tumor variables, drug resistance, • Safety precautions □ Radiation Therapy <ul style="list-style-type: none"> • Physics of radiotherapy • Types of ionizing rays • Radiation equipments:Linear accelerator, cobalt, Implants,Isotopes, • Types of therapies: Oral, Brachy therapy, tele therapy, selectron therapy • Effects of radiation on the body tissue, • Radiation biology – cell damage hypoxic cells, alteration of tumor kinetics. • Approaches to radiation therapy – • External radiotherapy • Internal radiotherapy – unsealed, • Sealed sources. • Effectiveness of radiotherapy-Radiosensitivity, treatment effects • Complications of radiotherapy • Radiation safety: Standards of Bhaba Atomic Research Centre(BARC)

Unit	Hours.	Content
		<ul style="list-style-type: none"> □ Bone Marrow Transplantation/Stem Cell Transplantation <ul style="list-style-type: none"> • Types, indications, transplantation procedure, complications and nursing management • Types and donor sources • Preparation and care of donor and recipient • Bone marrow bank • Legal and ethical issues □ Immunotherapy (Biotherapy) <ul style="list-style-type: none"> • Concepts and principles • Classification of agents • Treatment and applications □ Gene Therapy <ul style="list-style-type: none"> • Current Concepts and practices □ Alternative and Complementary Therapies <ul style="list-style-type: none"> • Current practices
VII	10	<ul style="list-style-type: none"> □ Pain management:- Theories, types and <ul style="list-style-type: none"> • Nature of cancer pain • Pathophysiology of pain • Pain threshold □ Assessment of pain <ul style="list-style-type: none"> • Principles of cancer pain control • Pharmacological: Opioid and non-opioid analgesic therapy • Patient controlled analgesia(PCA) • Other invasive techniques of pain control • Recent developments in Cancer pain □ Non- Pharmacological pain relief technique- <ul style="list-style-type: none"> • Complementary therapies(Music, massage, meditation, relaxation techniques, biofeed back etc) • Psychological intervention in pain control • Alternative system of medicines <p>Role of nurse</p>

Clinical Experience

S. No.	Deptt./ Unit	No. of Week	Total Hours
1	Medical Oncology ward	6	180 Hours
2	Surgical Oncology ward	6	180 Hours
3	Bone marrow transplantation Unit	2	60 Hours
4	Operation Theatre	2	60 Hours
5	Radiotherapy Unit	2	60 Hours
6	Chemotherapy Unit	4	120 Hours
7	Out patient department and pain clinic	2	60 Hours
8	Pediatric Oncology ward	2	60 Hours
9	Palliative Care ward	2	60 Hours
10	Community oncology	2	60 Hours
11	Hospice	1	30 Hours
12	Other field visits	1	30 Hours
	Total	32 Weeks	960 Hours

Procedures Observed

1. CT Scan
2. MRI
3. PET Scan(Positron Emission Tomography)
4. Ultra sound
5. Mammography
6. Radio Nuclide Imaging
7. Bone Scan
8. Thyroid Function Test
9. Functional and Metabolic Imaging
10. Transportation of radioactive materials
11. Others

Procedures Assisted

1. IV cannulation – Open method
2. Chemotherapy
3. Radiotherapy – Brachytherapy – Low Density Radiation, High Density Radiation.
4. Interstitial implantation
5. Bio-therapy and Gene therapy
6. Teletherapy – Treatment planning
7. Bone marrow aspiration and biopsy
8. Biopsy – tissue
9. FNAC – Fine Needle Aspiration Cytology and biopsy

10. Advance Cardiac life support
11. Endotracheal intubation
12. Defibrillation Ventilation
13. Tracheostomy
14. Thoracentesis
15. Paracentesis
16. Lumbar Puncture
17. Arterial Blood Gas
18. Nerve Block
19. Chest tube insertion
20. Intercostal drainage
21. CVP monitoring

Procedure Performed

1. Screening for cancer
2. Assessment of pain
3. Assessment of Nutritional status
4. Care of Tracheostomy
5. Endotracheal intubation
6. Gastric gavage
7. Pap smear
8. IV cannulation
9. Care of surgical flaps
10. Care of ostomies
11. Blood transfusion and component therapy
12. Counseling
13. Practice standard safety measures
14. Care of dead body and mortuary formalities

Other procedures

(As per the institutional protocol):

1. Alternative therapies

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING- NEUROSCIENCES NURSING

Placement : II Years

Hours of Instruction
Theory – 150 Hours
Practical- 950 Hours
Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in-depth knowledge in the field of neurology and neurosurgical Nursing. It will help students to develop advanced skills for nursing intervention in caring for patients with neurological and neurosurgical disorders. It will enable the student to function as neuroscience nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of neurology and neurosurgical Nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to neurology and neurosurgical Nursing.
2. Review the anatomy and physiology of nervous system
3. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of patients with neurological and neurosurgical disorders
4. Perform neurological assessment and assist in diagnostic procedures
5. Describe the concepts and principles of neuroscience nursing
6. Describe the various drugs used in neurosciences and nurses responsibility
7. Assist in various therapeutic and surgical procedures in neuroscience nursing
8. Demonstrate advance skills/competence in managing patients with neurological and neurosurgical disorder following nursing process approach
9. Identify psychosocial problems of patients with disabilities and assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
10. Participate in preventive, promotive and rehabilitative services for neurological and neurosurgical patients.
11. Explain the legal and ethical issues related to brain death, organ transplantation and practice of neuroscience nursing
12. Incorporate evidence based nursing practice and identify the areas of research in the field of neuroscience nursing

13. Organise and conduct inservice education program for nursing personnel.
14. Develop standards of care for quality assurance in neuroscience nursing practice
15. Identify the sources of stress and manage burnout syndrome among health care providers.
16. Teach and supervise nurses and allied health workers.
17. Plan and develop physical layout of neuro intensive care unit

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> □ Introduction to neuroscience(neurological and neurosurgical) nursing <ul style="list-style-type: none"> • History-Development in neurological and neurosurgical nursing, Service & education • Emerging trends and issues in neurology and neuro surgery and its implication to nursing. • neurological and neurosurgical problems – • Concepts, principles and nursing perspectives • Ethical and legal issues • Evidence based nursing and its application in neurological and neurosurgical nursing
II	5	<p>Epidemiology</p> <ul style="list-style-type: none"> □ Major health problems- □ Risk factors associated with neurological conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations, occupational and infections. □ Health promotion, disease prevention, life style modification and its implications to nursing <p>Alternate system of medicine / complementary therapies</p>
III	10	<p>Review of Anatomy and physiology</p> <ul style="list-style-type: none"> □ Embryology □ Structure and functions of Nervous system- CNS, ANS, cerebral circulation , cranial and spinal nerves and reflexes, motor and sensory functions □ Sensory organs

Unit	Hours	Content
IV	15	<p>Assessment and diagnostic measures</p> <ul style="list-style-type: none"> □ Assessment <ul style="list-style-type: none"> • History taking • Physical assessment, psychosocial assessment • Neurological assessments, Glasgow coma scale interpretation & its relevance to nursing. • Common assessment abnormalities □ Diagnostic measures <ul style="list-style-type: none"> • Cerebro spinal fluid analysis • Radiological studies-Skull and spine X-ray Cerebral Angiography, CT Scan, Single Photon Emission Computer Tomography(SPECT), MRI (Magnetic Resonance Imaging), MRA, MRS, Functional MRI, Myelography, PET (Positron Emission Test), Interventional radiology. • Electorgraphic studies- Electro encephalo graphy, MEG, EMG, video EEG, • Nerve conduction studies-Evoked potentials, visual evoked potentials, brain stem auditory evoked potentials, somatosensory evoked potentials • Ultrasound studies-Carotid duplex, transcranial Doppler sonography, • Immunological studies • Biopsies – muscle, nerve and Brain. <p>Interpretation of diagnostic measures</p> <p>Nurse’s role in diagnostic tests</p>
V	5	<p>Meeting Nutritional needs of neurological patients</p> <ul style="list-style-type: none"> □ Basic nutritional requirements □ Metabolic changes following injury and starvation □ Nutritional assessment □ Common neurological problems that interfere with nutrition and strategies for meeting their nutritional needs □ Special metabolic and electrolyte imbalances □ Chronic fatigue syndrome
VI	5	<p>Drugs used in neurological and neurosurgical disorders</p> <ul style="list-style-type: none"> □ Classification □ Indications, contraindications, actions and effects, toxic effects <p>Role of nurse</p>

Unit	Hours	Content
VII	10	<p>Traumatic conditions.</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Cranio cerebral injuries. • Spinal & Spinal cord injuries. • Peripheral nerve injuries. • Unconsciousness
VIII	10	<p>Cerebro vascular disorders.</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Stroke & arterio venous thrombosis. • Haemorrhagic embolus. • Cerebro vascular accidents. • Intracranial aneurysm. • Subarchnoid Haemorrhage. • Arterio venous fistula. • Brain tumours □ Diseases of cranial nerves;Trigiminal neuralgia, Facial palsy, Bulbar palsy.
IX	10	<p>Degenerating and demyelinating disorders</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Motor neuron diseases. • Movement disorders- Tics, dystonia, chorea, wilson’s disease, essential tremors • Dementia. • Parkinson’s disease. • Multiple sclerosis. • Alzemier’s
X	10	<p>Neuro infections</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of Neuro infections <ul style="list-style-type: none"> • Meningitis-types • Encephalitis. • Poliomyelitis. • Parasitic infections. • Bacterial infections • Neurosyphilis. • HIV & AIDS. • Brain abscess.

Unit	Hours	Content
XI	10	<p>Paroxysmal disorders.</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Epilepsy and seizures. • Status epilepticus. • Syncope. • Menier’s syndrome. • Cephalgia.
XII	10	<p>Developmental disorders.</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Hydrocephalus. • Craniosynostosis. • spina bifida- Meningocele, Meningomyelocele encephalocele • syringomyelia. • Cerebro vascular system anomalies. • Cerebral palsies. • Down’s syndrome

Practical

Total = 960 Hours

1 Week = 30 Hours

S.No.	AREA OF POSTING	No. of Week	Total Hours
1	O.P.D.	2	60
2	Casualty	2	60
3	Diagnostics	2	60
4	Neuro psychiatry	1	30
5	Neuro Medical wards	4	120
6	Paediatric Neuro ward	2	60
7	Neuro surgical wards	4	120
8	Head Injury ward	3	90
9	ICU- neuro medicine	4	120
10	I.C.U.- neuro surgical	4	120
11	Rehabilitation	2	60
12	Operation Theatre	2	60
	Total	32 Weeks	960 Hours

ESSENTIAL NEURO NURSING SKILLS

I. Procedures Observed

1. CT scan
2. MRI
3. PET
4. EEG
5. EMG
6. Sleep pattern studies/Therapy
7. Radiographical studies
8. Neuro surgeries
9. Nerve conduction studies
10. Ultrasound studies
11. Any other

II. Procedures Assisted

1. Advanced Cardiac life support
2. Lumbar Puncture
3. Biopsies – muscle, nerve and Brain
4. Arterial Blood Gas
5. ECG Recording
6. Blood transfusion
7. IV cannulation – open method

8. Endotracheal intubation
9. Ventilation
10. Tracheostomy
11. ICP monitoring
12. Gama Knife
13. Cereberal angiography
14. Myelography
15. Neuro surgeries

III. Procedures Performed:

1. Airway management
 - a. Application of Oro Pharyngeal Airway
 - b. Care of Tracheostomy
 - c. Conduct Endotracheal Intubation
 - d. use of AMBU bag, artificial respirators
 - e. Setting of Ventilators and Care of patients on ventilators
2. Cardio Pulmonary Resuscitation -Defibrillation
3. Neurological assessment -Glasgow coma scale
4. Gastric Lavage
5. IV Cannulation
6. Administration of emergency IV Drugs, fluid
7. Care of patients with incontinence, bladder training
Catheterization
8. Care of patients on traction related to the neurological conditions
9. Blood Administration.
10. Muscle strengthening exercises
11. Guidance and counseling
12. Monitoring – management and care of monitors.

IV. Other Procedures:

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING- NEPHRO-UROLOGY NURSING

Placement : II Year

Hour of Instruction
Theory : 150 Hours
Practical : 950 Hours
Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Nephro and urological Nursing. It will help students to develop advanced skills for nursing intervention in various nephro and urological conditions. It will enable the student to function as nephro and urology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of nephro and urology nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to **nephro and urological** nursing
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of **nephro and urological** conditions
3. Perform physical, psychosocial & spiritual assessment
4. Assist in various diagnostic, therapeutic and surgical interventions
5. Provide comprehensive nursing care to patients with **nephro and urological conditions**
6. Describe the various drugs used in **nephro and urological** conditions and nurses responsibility
7. Demonstrate skill in handling various equipments/gadgets used for patients with **nephro and urological** conditions
8. Appreciate team work & coordinate activities related to patient care.
9. Practice infection control measures.
10. Identify emergencies and complications & take appropriate measures
11. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
12. Discuss the legal and ethical issues in **nephro and urological** nursing
13. Identify the sources of stress and manage burnout syndrome among health care providers

14. Appreciate the role of alternative system of medicine in the care of patient
15. Incorporate evidence based nursing practice and identify the areas of research in the field of **nephro and urological** nursing
16. Teach and supervise nurses and allied health workers.
17. Design a layout of kidney transplant unit and dialysis unit
18. Develop standards of nephro urological nursing practice

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> □ Historical development: trends and issues in the field of nephro and urological nursing. □ nephro and urological problems □ Concepts, principles and nursing perspectives □ Ethical and legal issues □ Evidence based nursing and its application in nephro and urological nursing(to be incorporated in all the units)
II	5	<p>Epidemiology</p> <ul style="list-style-type: none"> □ Major health problems- urinary dysfunction, urinary tract infections, Glomerular disorders, obstructive disorders and other urinary disorders □ Risk factors associated with nephro and urological conditions conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations □ Health promotion, disease prevention, life style modification and its implications to nursing <p>Alternate system of medicine / complementary therapies</p>
III	5	<p>Review of anatomy and physiology of urinary system</p> <ul style="list-style-type: none"> □ Embryology □ Structure and functions □ Renal circulation □ Physiology of urine formation □ Fluid and electrolyte balance □ Acid base balance □ Immunology specific to kidney
IV	20	<p>Assessment and diagnostic measures</p> <ul style="list-style-type: none"> □ History taking □ Physical assessment, psychosocial assessment □ Common assessment abnormalities-dysurea, frequency, enuresis, urgency, hesitancy, hematuria, pain, retention, burning on urination, pneumaturia, incontinence, nocturia, polyurea, anuria, oliguria, □ Diagnostic tests-urine studies, blood chemistry, radiological procedures-KUB, IVP, nephrotomogram, retrograde pyelogram, renal arteriogram, renal ultrasound, CT scan, MRI, cystogram, renal

Unit	Hours	Content
		<p>scan, biopsy, endoscopy-cystoscopy, urodynamics studies-cystometrogram, urinary flow study, sphincter electromyography, voiding pressure flow study, videourodynamics, Whitaker study</p> <p>Interpretation of diagnostic measures</p> <p>Nurse's role in diagnostic tests</p>
V	5	<p>Renal immunopathy/Immunopathology</p> <ul style="list-style-type: none"> □ General Concept of immunopathology □ Immune mechanism of glomerular vascular disease □ Role of mediator systems in glomerular vascular disease
VI	15	<p>Urological Disorders and Nursing Management</p> <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical, surgical and nursing management of □ Urinary tract infections- pyelonephritis, lower urinary tract infections, □ Disorders for ureters, bladder and urethra □ Urinary tract infections- □ Urinary dysfunctions- urinary retention, urinary incontinence, urinary reflux, □ Bladder disorders- neoplasms, calculi, neurogenic bladder, trauma, congenital abnormalities □ Benign prostatic hypertrophy(BPH) □ Ureteral disorders: ureteritis, ureteral trauma, congenital anomalies of ureters □ Urethral disorders- tumours, trauma, congenital anomalies of ureters,

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING - ORTHOPEDIC NURSING

Placement : II Year

Hours of Instruction
Theory : 150 Hours
Practical : 950 Hours
Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of orthopedic nursing. It will help students to develop advanced skills for nursing intervention in various orthopedic conditions. It will enable the student to function as orthopedic nurse practitioner/specialist providing quality care. It will further enable the student to function as educator, manager, and researcher in the field of orthopedic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of orthopedic nursing
2. Identify the psycho-social needs of the patient while providing holistic care.
3. Perform physical and psychological assessment of patients with orthopedic conditions and disabilities.
4. Describe various disease conditions and their management
5. Discuss various diagnostic tests required in orthopedic conditions
6. Apply nursing process in providing care to patients with orthopedic conditions and those requiring rehabilitation.
7. Recognize and manage orthopedic emergencies.
8. Describe recent technologies and treatment modalities in the management of patients with orthopedic conditions and those requiring rehabilitation.
9. Integrate the concept of family centered, long term care and community based rehabilitation to patients with orthopedic conditions.
10. Counsel the patients and their families with orthopedic conditions
11. Describe various orthotic and prosthetic appliances
12. Appreciate the legal and ethical issues pertaining to patients with orthopedic conditions and those requiring rehabilitation.
13. Appreciate the role of alternative system of medicine in care of patients with orthopedic conditions

14. Incorporate evidence based nursing practice and identify the areas of research in the field of orthopedic nursing.
15. Recognize the role of orthopedic nurse practitioner and as a member of the orthopedic and rehabilitation team.
16. Teach orthopedic nursing to undergraduate students and in-service nurses.
17. Prepare a design and layout of orthopedic and rehabilitative units.

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> □ Historical perspectives – History and trends in orthopedic nursing □ Definition and scope of orthopedic nursing □ Anatomy and physiology of Musculo-skeletal system □ Posture, Body landmarks Skeletal system Muscular system. Nervous system - Main nerves □ Healing of - Injury, bone injury, □ Repair of ligaments □ Systemic response to injury □ Ergonomics, Body mechanics, biomechanical measures □ Orthopedic team
II	8	<p>Assessment of Orthopedic Patient</p> <ul style="list-style-type: none"> □ Health Assessment: History, physical examination- Inspection, palpation, movement, Measurement, muscle strength Testing. □ Diagnostic studies – Radiological studies, Muscle enzymes, serologic studies

XVIII	4	<p>Quality assurance</p> <ul style="list-style-type: none"> □ Standards, Protocols, Policies, Procedures □ Nursing audit □ Staffing □ Design of orthopedic, physiotherapy and rehabilitation unit

Practicals

1. Clinical practice in Orthopedic, physiotherapy and Rehabilitation Units.
2. Application of tractions and plaster casts and removal of tractions and plaster casts and other appliances.
3. Apply Theories and Nursing Process in the management of patients with orthopedic conditions.
4. Provide various types of physical and rehabilitative therapies
5. Provide health education on related disease conditions.
6. Unit management and plan - designing

Clinical Experience

Total = 960 Hours
1 Week = 30 Hours

S. No.	Deptt./Unit	No. of Week	Total Hours
1	Orthopedic Ward	8	240 Hours
2	Orthopedic Operation theatre	4	120 Hours
3	Neurosurgical Ward	2	60 Hours
4	Orthopedic O.P.D.	4	120 Hours
5	Casualty/Emergency and Trauma	4	120 Hours
6	Rehabilitation Units	2	60 Hours
7	Physiotherapy Unit	4	120 Hours
8	Paediatric /paediatric surgery unit	2	60 Hours
9	Field Visit	2	60 Hours
	Total	32 Weeks	960 Hours

Procedures Observed

1. X Ray
2. Ultrasound
3. MRI
4. C T Scan/bone scan
5. Arthroscopy
6. Electrothermally – assisted capsule shift or ETAC (Thermal capsulorrhaphy)
7. Fluoroscopy
8. Electromyography
9. Myelography
10. Discography
11. Others

Procedures Assisted

1. Blood Transfusion
2. IV cannulation and therapy
3. Ventilation
4. Various types of tractions
5. Orthopedic surgeries – Arthrocentesis, Arthroscopy, Bone lengthening, Arthrodesis, grafting, Fractures fixation, reconstructive, reimplantation, replantation, spinal decompression, transplantation of bone, muscle or articular cartilage, autografting, allografting.
6. Injection – Intra articular, intra osseous.
7. Advance Life Support

Peocedures Performed

1. Interpretation of X ray films.
2. Application and removal of splints, casts, and braces.
3. Care of tractions – skin and skeletal traction, pin site care.
4. Cold therapy.
5. Heat therapy
6. Hydrotherapy
7. Therapeutic exercises
8. Use of TENS (Transcutaneous electrical nerve stimulation)
9. Techniques of transportation
10. Crutch walking, walkers, wheel chair.
11. Use of devices for activities of daily living and prevention of deformities.
12. Administration of drugs: IV injection, IV cannulation, and Blood transfusion.
13. Procedures for prevention of infections: disinfection and sterilization, surveillence, fumigation.
14. Special skin/ part preparations for orthopedic surgeries.
15. Surgical dressings – Debridement.
16. Bladder and bowel training

Other Procedures

CLINICAL SPECIALITY - II

MEDICAL SURGICAL NURSING - GASTRO ENTEROLOGY NURSING

Placement : II Year

Hours of Instruction

Theory : 150 hrs.
Practical : 950 hrs.
Total : 1100 hrs.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of gastro enterology Nursing. It will help students to develop advanced skills for nursing intervention in various gastro enterology conditions. It will enable the student to function as gastro enterology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of gastro enterology nursing

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to gastro enterology nursing
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of gastrointestinal conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with gastrointestinal conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Provide comprehensive care to patients with gastrointestinal conditions
7. Describe the various drugs used in gastrointestinal conditions and nurses responsibility
8. Demonstrate skill in handling various equipments/gadgets used for patients with gastrointestinal conditions
9. Appreciate team work & coordinate activities related to patient care.
10. Practice infection control measures.
11. Identify emergencies and complications & take appropriate measures
12. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
13. Discuss the legal and ethical issues in GE nursing

14. Identify the sources of stress and manage burnout syndrome among health care providers
15. Appreciate the role of alternative system of medicine in care of patient
16. Incorporate evidence based nursing practice and identify the areas of research in the field of gastrointestinal nursing
17. Teach and supervise nurses and allied health workers.
18. Design a layout of Gastro enterology intensive care unit (GEICU) , liver care/transplant unit

Course Content

Unit	Hours	Content
I	5	Introduction <ul style="list-style-type: none"> □ Historical development: trends and issues in the field of gastro enterology. □ Gastro enterological problems □ Concepts, principles and nursing perspectives □ Ethical and legal issues □ Evidence based nursing and its application in gastrointestinal nursing(to be incorporated in all the units)
II	5	Epidemiology <ul style="list-style-type: none"> □ Risk factors associated with GE conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations □ Health promotion, disease prevention, life style modification and its implications to nursing □ National health programmes related to gastro enterology □ Alternate system of medicine / complementary therapies
III	5	Review of anatomy and physiology of gastrointestinal system <ul style="list-style-type: none"> □ Gastrointestinal system □ Liver, biliary and pancreas □ Gerontologic considerations □ Embryology of GI system □ Immunology specific to GI system
IV	15	Assessment and diagnostic measures <ul style="list-style-type: none"> □ History taking □ Physical assessment, psychosocial assessment □ Diagnostic tests <ul style="list-style-type: none"> • Radiological studies:Upper GIT- barium swallow, lower GIT- Barrium enema, • Ultra sound: • Computed tomography • MRI • Cholangiography: Percutaneous transheptic Cholangiogram(PTC) • Magnetic Resonance Cholangio pancreatography (MRCP) • Nuclear imaging scans(scintigraphy) • Endoscopy

Unit	Hours	Content
		<ul style="list-style-type: none"> • Colonoscopy • Proctosigmoidoscopy • Endoscopic Retrograde Cholangio pancreatography (ERCP) • Endoscopic ultrasound • Peritonoscopy(Laproscopy) • Gastric emptying studies • Blood chemistries: Serum amylase, serum lipase • Liver biopsy • Miscellaneous tests:Gastric analysis, fecal analysis • Liver function tests: Bile formation and excretion, dye excretion test, Protein metabolism, haemostatic functions- prothrombin vitamin K production, serum enzyme tests,Lipid metabolism- serum cholesterol <p>Interpretation of diagnostic measures</p> <p>Nurse's role in diagnostic tests</p>
V	25	<p>Gastro intestinal disorders and nursing management</p> <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical and nursing management of <ul style="list-style-type: none"> • Disorders of the mouth:Dental caries,Peridontal disease,Acute tooth infection, Stomatitis, Thrush (moniliasis),Gingivitis, Leukoplakia, Inflammation of the parotid gland, Obstruction to the flow of saliva,Fracture of the jaw • Disorders of the oesophagus: Reflux oesophagitis, Oesophageal achalasia, Oesoophageal varices, Hiatus hernia, Diverticulum • Disorders of the stomach and duodenum: Gastritis, Peptic ulcer, Dumping of the stomach, Food poisoning, idiopathic gastroparesis, Aerophagia and belching syndrome, Ideopathic cyclic nausea and vomiting, Rumination syndrome, Functional dyspepsia, Chronic Non specific (functional) abdominal pain • Disorders of the small intestine <ul style="list-style-type: none"> – Malabsorption syndrome – tropical sprue – Gluten – sensitive enteropathy (Coeliac disease) – Inflammatory diseases of intestines and abdomen,,: appendicitis, Peritonities, Intestinal obstruction, Abdominal TB, Gastrointestinal polyposis syndrome – Chronic inflammatory bowel disease, Ulcerative colites, crohn's disease – Infestations and infections – Worm infestations, Typhoid, Leptospirosis – Solitary rectal ulcer syndrome – Alteration in bowel elimination (diarrhoea, constipation, fecal impaction, fecal incontinence, Irritable bowel syndrome, Chronic idiopathic constipation, Functional diarrhoea <p>Anorectal Conditions: Hemorrhoids, Anal fissure, Anal fistula, Abscess, Strictures, Rectal prolapse, Pruritis ani, Perianal disease, Anal condylomas, Warts</p>

Unit	Hours	Content
VI	15	<p>Disorder of liver, pancreas gall bladder and nursing management</p> <ul style="list-style-type: none"> □ Disorders of liver biliary tract : □ Viral Hepatitis – A, B, C, D & E □ Toxic hepatitis <ul style="list-style-type: none"> • Cirrhosis of liver, liver failure, Liver transplantation • Non cirrhotic portal fibrosis • Liver abscess,; • Parasitic and other cysts of the liver • Disorders of the Gall Bladder and Bile Duct: □ Cholecystitis □ Cholelithiasis □ Choledocholithiasis □ Disorders of the pancreas: Pancreatitis, □ Benign tumors of islet cells □ Disorders of the Peritoneum <ul style="list-style-type: none"> • Infections of the peritoneum □ Surgical peritonitis □ Spontaneous bacterial peritonitis □ Tuberculosis peritonitis □ Disorders of the Diaphragm <ul style="list-style-type: none"> • Diaphragmatic hernia • Congenital hernias • Paralysis of diaphragm • Tumors of the diaphragm □ Hiccups
VII	15	<p>Gastro intestinal emergencies and nursing interventions</p> <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical and nursing management of: <ul style="list-style-type: none"> • Esophageal varices, • Ulcer perforation, • Acute cholecystitis • Diverticulitis • Fulminant hepatic failure • Biliary obstruction • Bowel obstruction • Gastroenteritis • Intussusception • Acute intestinal obstruction, perforation • Acute pancreatitis • Cirrhosis of liver complications • Liver , spleen, stomach pancreatic, mesenteric, bowel and greater vessel injuries • Acute appendicitis /peritonitis • Acute abdomen • Food poisoning
VIII	15	<ul style="list-style-type: none"> □ Congenital Anomalies of Esophagus <ul style="list-style-type: none"> • Esophageal atresia • Tracheo esophageal fistula

Unit	Hours	Content
		<ul style="list-style-type: none"> • Esophageal stenosis • Esophageal duplications • Dysphagia – Lusoria – aberrant right subclavian artery compressing esophagus • Esophageal rings – schalzkiring • Esophageal webs <p>□ Congenital Anomalies of Stomach</p> <ul style="list-style-type: none"> • Gastric atresia • Micro gastia • Gastric diverticulum • Gastric duplication • Gastric teratoma • Gastric volvulus • Infantile hypertrophic pyloric stenosis • Adult hypertrophic pyloric stenosis <p>□ Congenital Anomalies of Duodenal</p> <ul style="list-style-type: none"> • Duodenal Atresia or stenosis • Annular pancreas • Duodenal duplication cysts • Malrotation and mid gut volvulus <p>□ Developmental anomalies of the intestine:</p> <ul style="list-style-type: none"> • Abdominal wall defects (omphalocele and Gastroschisis) • Meckel’s diverticulum • Intestinal atresia <p>□ Hirschsprung’s disease</p>
IX	15	<p>Pharmo Kinetics</p> <ul style="list-style-type: none"> □ Drugs used in GIT □ Principles of administration □ Roles responsibilities of nurses □ Drugs in Peptic ulcer disease □ Proton Pump inhibitors □ H₂ Receptor Antagonists □ Cytoprotective Agents: □ Drugs used in Diarrhea □ Drugs used in constipation □ Drugs used in Inflammatory Bowel Disease □ Aminosalicylates □ Corticosteroids □ Immunomodulators □ chemotherapy □ Antibiotics □ Antiemetics: □ Anticholinergics □ Antihistaminics □ Antihelminthics □ Vitamin Supplements

Unit	Hours	Content
X	10	Nutrition and nutritional problems related to GI system <ul style="list-style-type: none"> □ Nutritional assessment and nursing interventions □ Therapeutic diets □ Adverse reactions between drugs and various foods □ Malnutrition- etiology , clinical manifestations and management □ Tube feeding, parenteral nutrition, total parenteral nutrition □ Obesity- etiology, clinical manifestations and management □ Eating disorders- anorexia nervosa, bulimia nervosa □ Recent advances in nutrition
XI	15	Malignant disorders of gastro intestinal system <ul style="list-style-type: none"> □ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical, other modalities and nursing management of: <ul style="list-style-type: none"> • Malignancy of oral cavity ,Lip,Tongue,buccal mucosa, oropharynx, Salivary gland • Esophageal , Gastric , Carcinoma of bowel - Small bowel, Colorectal and Anal carcinoma, • Liver, biliary tract and Pancreatic carcinoma
XII	5	Administration and management of GE unit <ul style="list-style-type: none"> □ Design & layout □ Staffing, □ Equipment, supplies, □ Infection control; Standard safety measures □ Quality Assurance:-Nursing audit –records /reports, Norms, policies and protocols □ Practice standards
XIII	5	Education and training in GE care <ul style="list-style-type: none"> □ Staff orientation, training and development, □ In-service education program, <ul style="list-style-type: none"> • Clinical teaching programs

Practicals

Total = 960 Hours
1 Week = 30 Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
1	Diagnostic labs	2	60 Hours
2	Emergency and casualty	3	90 Hours
3	Liver transplant unit	1	30 Hours
4	GE Medical Ward	6	180 Hours
5	GE Surgical Ward	8	240 Hours
6	OT	2	60 Hours
7	ICU	4	120 Hours
8	Pediatric gastroenterology	2	60 Hours
9	Oncology	2	60 Hours
10	GE OPD	2	60 Hours
	Total	32 Weeks	960 Hours

Procedures Assisted

1. Endoscopy room – Upper G.I. Endoscopy (Diagnostic and therapeutic).
2. Sigmoidoscopy
3. Colonoscopy
4. Polypectomy
5. Endoscopic retrograde cholangio pancreatography (ERCP)
6. Liver biopsy
7. Percutaneous catheter drainage (PCD) of Pseudocyst pancreas
8. Abdominal paracentesis
9. Percutaneous aspiration of liver abscess
10. GE Lab : PT, HbsAg, Markers – A, B, C virus, CBP, ESR, Stool Test

Procedures Performed

1. History and Physical assessment
2. RT intubation / extubation / aspiration/suction
3. Gastric lavage and gavage
4. Bowel wash
5. Therapeutic Diets
6. Ostomy feeding
7. Stoma care
8. Monitoring vital parameters
9. Plan of inservice education programme for nursing staff and Class-IV employees
10. Counseling

CLINICAL SPECIALITY – II

OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement - II Year

Hours of Instruction	
Theory:	150 hrs
Practical	950 hrs
Total	1100 hrs

Course Description

This course is designed to assist the student in developing expertise and in-depth understanding in the field of Obstetric and gynecological Nursing .It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological nursing.

Objectives

At the end of the course, the student will be able to:

1. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions
2. Perform physical, psychosocial, cultural & spiritual assessment
3. Demonstrate competence in caring for women with obstetrical and gynaecological conditions
4. Demonstrate competence in caring for high risk newborn.
5. Identify and Manage obstetrical and neonatal emergencies as per protocol.
6. Practice infection control measures
7. Utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical , gynecological and neonatal care.
8. Demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatal care
9. Teach and supervise nurses and allied health workers.
10. Design a layout of speciality units of obstetrics and gynecology
11. Develop standards for obstetrical and gynaecological nursing practice.
12. Counsel women and families
13. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecological nursing
14. Function as independent midwifery nurse practitioner

Contents Outline

Unit	Hours	Content
I	25	<p>Management of problems of women during pregnancy</p> <ul style="list-style-type: none"> □ Risk approach of obstetrical nursing care , concept & goals. □ Screening of high-risk pregnancy, newer modalities of diagnosis. □ Nursing Management of Pregnancies at risk-due to obstetrical complication <ul style="list-style-type: none"> • Pernicious Vomiting. • Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblastic diseases. • Hemorrhage during late pregnancy, ante partum hemorrhage, Placenta praevia, abruptio placenta. • Hypertensive disorders in pregnancy, pre-eclampsia, eclampsia, Hemolysis Elevated liver enzyme Low Platelet count (HELLP) • Iso-immune diseases. Rh and ABO incompatibility • Hematological problems in pregnancy. • Hydramnios-oligohydramnios • Prolonged pregnancy- post term, post maturity. • Multiple pregnancies. • Intra uterine infection & pain during pregnancy. • Intra Uterine Growth Retardation(IUGR), Premature Rupture of Membrane(PROM), intra uterine death
II	15	<p>Pregnancies at risk-due to pre-existing health problems</p> <ul style="list-style-type: none"> □ Metabolic conditions. □ Anemia and nutritional deficiencies □ Hepatitis □ Cardio-vascular disease. □ Thyroid diseases. □ Epilepsy. □ Essential hypertension □ Chronic renal failure. □ Tropical diseases. □ Psychiatric disorders □ Infections Toxoplasmosis Rubella Cytomegalo virus Herpes (TORCH); Reproductive Tract Infection(RTI);STD; HIV/AIDS, Vaginal infections; Leprosy, Tuberculosis □ Other risk factors: Age- Adolescents, elderly; unwed mothers, sexual abuse, substance use □ Pregnancies complicating with tumors, uterine anomalies, prolapse, ovarian cyst
III	15	<p>Abnormal labour, pre-term labour & obstetrical emergencies</p> <ul style="list-style-type: none"> □ Etiology, pathophysiology and nursing management of <ul style="list-style-type: none"> • Uncoordinated uterine actions, Atony of uterus, precipitate labour, prolonged labour. • Abnormal lie, presentation, position compound presentation.

		<ul style="list-style-type: none"> • Contracted pelvis-CPD; dystocia. • Obstetrical emergencies Obstetrical shock, vasa praevia, inversion of uterus, amniotic fluid embolism, rupture uterus, presentation and prolapse cord. • Augmentation of labour. Medical and surgical induction. • Version • Manual removal of placenta. • Obstetrical operation: Forceps delivery, Ventouse, Caesarian section, Destructive operations • Genital tract injuries-Third degree perineal tear, VVF, RVF <p>□ Complications of third stage of labour:</p> <ul style="list-style-type: none"> • Post partum Hemorrhage. • Retained placenta.
IV	10	<p>post partum complications</p> <p>□ Nursing management of</p> <ul style="list-style-type: none"> • Puerperal infections, puerperal sepsis, urinary complications, puerperal venous thrombosis and pulmonary embolism • Sub involution of uterus, Breast conditions, Thrombophlebitis • Psychological complications, post partum blues, depression, psychosis
V	25	<p>High Risk Newborn</p> <p>□ Concept, goals, assessment, principles.</p> <p>□ Nursing management of</p> <ul style="list-style-type: none"> • Pre-term, small for gestational age, post-mature infant, and baby of diabetic and substance use mothers. • Respiratory conditions, Asphyxia neonatorum, neonatal apnoea meconium aspiration syndrome, pneumo thorax, pneumo mediastinum • Icterus neonatorum. • Birth injuries. • Hypoxic ischaemic encephelopathy • Congenital anomalies. • Neonatal seizures. • Neonatal hypocalcaemia, hypoglycemia, hypomagnesaemia. • Neonatal heart diseases. • Neonatal hemolytic diseases • Neonatal infections, neonatal sepsis, ophthalmia neonatorum, congenital syphilis, HIV/AIDS • Advanced neonatal procedures. • Calculation of fluid requirements. • Hematological conditions – erythroblastosis fetalis, hemorrhagic disorder in the newborn • Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU

VI	15	<p>HIV/AIDS</p> <ul style="list-style-type: none"> □ HIV positive mother and her baby □ Epidemiology □ Screening □ Parent to child transmission(PTCT) □ Prophylaxis for mother and baby □ Standard safety measures □ Counseling □ Breast feeding issues □ National policies and guidelines □ Issues: Legal,ethical, Psychosocial and rehabilitation <p>Role of nurse</p>
VII	25	<p>Gynecological problems and nursing management</p> <ul style="list-style-type: none"> □ Gynecological assessment □ Gynecological procedures □ Etiology, pathophysiology, diagnosis and nursing management of <ul style="list-style-type: none"> • Menstrual irregularities • Diseases of genital tract • Genital tract infections • Uterine displacement • Genital prolapse • Genital injuries • Uterine malformation • Uterine fibroid, ovarian tumors, Breast carcinoma, Pelvic inflammatory diseases, reproductive tract malignancies, hysterectomy – vaginal and abdominal. • Sexual abuse, rape, trauma , assault
VIII	5	<p>Administration and management of obstetrical and gynaecological unit</p> <ul style="list-style-type: none"> □ Design & layout □ Staffing, □ Equipment, supplies, □ Infection control; Standard safety measures □ Quality Assurance:-Obstetric auditing –records /reports, Norms, policies and protocols □ Practice standards for obstetrical and gynaecological unit
IX	5	<p>Education and training in obstetrical and gynaecological care</p> <ul style="list-style-type: none"> □ Staff orientation, training and development, □ In-service education program, □ Clinical teaching programs.

Practicals

Total = 960 Hours
1 Week = 30 Hours

S.No.	Deptt./ Unit	No. of Week	Total Hours
1	Antenatal OPD including Infertility clinics/Reproductive medicine, Family welfare and post partum clinic / PTCT	6	180 Hours
2	Antenatal and Postnatal ward	6	180 Hours
3	Labour room	4	120 Hours
4	Neonatal Intensive Care Unit	3	90 Hours
5	Obstetric/Gynae Operation Theatre	3	90 Hours
6	Gynae Ward	4	120 Hours
7	CHC, PHC, SC	6	180 Hours
	Total	32 Weeks	960 Hours

Essential Obstetrical And Gynecological Skills

Procedure Observed

- Assisted Reproductive Technology procedures
- Ultra sonography
- Specific laboratory tests.
- Amniocentesis.
- Cervical & vaginal cytology.
- Fetoscopy.
- Hysteroscopy.
- MRI.
- Surgical diathermy.
- Cryosurgery.

Procedures Assisted

- Operative delivery
- Abnormal deliveries-Forceps application, Ventouse, Breech
- Exchange blood transfusion
- Culdoscopy.
- Cystoscopy
- Tuboscopy
- Laparoscopy.
- Endometrial Biopsy
- Tubal patent test
- Chemotherapy
- Radiation therapy
- Medical Termination of Pregnancy.
- Dilatation and Curettage

Procedures Performed

- History taking.
- Physical Examination-General
- Antenatal assessment. – 20
- Pelvic examination
- Assessment of risk status.
- Assessment of Intra uterine foetal well-being.kick chart and foetal movement chart, Doppler assessment, Non Stress Test, Contraction stress test(Oxytocin challenge test)
- Universal precautions- Disposal of biomedical waste.
- Per Vaginal examination and interpretation (early pregnancy, labour, post partum).
- Utilization of Partograph
- Medical & Surgical induction(Artificial rupture of membranes).
- Vacuum extraction
- Conduct of delivery.
- Prescription and administration of fluids and electrolytes through intravenous route.
- Application of outlet forceps, delivery of breach – Burns Marshall, Loveset manoeuvre
- Repair of tears and Episiotomy suturing.
- Vacuum extraction
- controlled cord traction, Manual removal of placenta, placental examination,
- Manual vacuum aspiration
- Postnatal assessment.- 20
- Management of breast engorgement
- Thrombophlebitis (white leg)
- Postnatal counseling.
- Reposition of inversion of uterus.
- Laboratory tests: Blood- Hb, Sugar, Urine-albumin,sugar
- Breast care, breast exam, and drainage breast abscess.
- Postnatal exercise.
- Assessment –New born assessment; physical and neurological, Apgar score, high-risk newborn, Monitoring neonates; Clinically and With monitors, Capillary refill time, Assessment of jaundice, danger signs
- Anthropometric measurement
- Neonatal resuscitation
- Gastric Lavage
- Care of newborn in multi channel monitor and ventilator.
- Care of newborn in radiant warmer and incubator.
- Kangaroo mother care.
- Assisting mother with exclusive Breast-feeding
- Feeding technique: Katori, spoon, naso/orogastric, Total Parenteral nutrition
- Assesment, calculation and administration of fluids and medications:
 - Oral
 - I.D.
 - I.M.
 - I.V.- Securing IV line, infusion pump

- Administration of drug per rectum
- Capillary blood sample collection.
- Oxygen therapy.
- Phototherapy.
- Chest physiotherapy.
- counseling – Parental, bereavment, family planning, infertility etc
- Setting of operation theatre.
- Trolley and table set up for Obstetrical & gynaecological operations.
- Pap smear.
- Vaginal smear.
- Insertion of pessaries,
- Insertion of IUD and removal.
- Teaching skills
- communication skills
- Prepare referral slips
- Pre transport stabilization
- Networking with other stake holders

CLINICAL SPECIALTY –II
PEDIATRIC (CHILD HEALTH) NURSING

Placement : II Year

Hours of Instruction
Theory 150 hours
Practical 950 hours
Total : 1100 hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
3. Recognize and manage emergencies in children
4. Provide nursing care to critically ill children
5. Utilize the recent technology and various treatment modalities in the management of high risk children
6. Prepare a design for layout and describe standards for management of pediatric units/hospitals
7. Identify areas of research in the field of pediatric nursing

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> □ Current principles, practices and trends in Pediatric Nursing □ Role of pediatric nurse in various settings -Expanded and extended
II	35	<ul style="list-style-type: none"> □ Pathophysiology, assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities and nursing intervention in selected pediatric medical disorders <ul style="list-style-type: none"> • Child with respiratory disorders: <ul style="list-style-type: none"> - Upper respiratory tract: choanal atresia, tonsillitis, epistaxis, aspiration. - Lower respiratory tract: Broncheolitis, Bronchopneumonia, Asthma, cystic fibrosis • Child with gastro-intestinal disorders: <ul style="list-style-type: none"> - Diarrheal diseases, gastro-esophageal reflux. - Hepatic disorders: Hepatitis, Indian childhood cirrhosis, liver transplantation. - Malabsorption syndrome, Malnutrition • Child with renal/ urinary tract disorders: Nephrotic syndrome, Nephritis, Hydronephrosis, hemolytic-uremic syndrome, kidney transplantation • Child with cardio-vascular disorders: <ul style="list-style-type: none"> - Acquired: Rheumatic fever, Rheumatic heart disease, - Congenital: Cynotic and acynotic • Child with endocrine/metabolic disorders: Diabetes insipidus, Diabetes Mellitus – IDDM, NIDDM, hyper and hypo thyroidism, phenylketonuria, galactosemia • Child with Neurological disorders: Convulsions, Meningitis, encephalitis, guillian- Barre syndrome • Child with oncological disorders: Leukemias, Lymphomas, Wilms’ tumor, nephroblastomas, neuroblastomas, Rhabdomyosarcoma, retinoblastoma, hepatoblastoma, bone tumors • Child with blood disorders: Anemias, thalassemias, hemophilia, polycythemia, thrombocytopenia, and disseminated intravascular coagulation • Child with skin disorders • Common Eye and ENT disorders • Common Communicable diseases
III	35	<ul style="list-style-type: none"> □ Assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities including cosmetic surgery and nursing interventions in selected pediatric surgical problems/ Disorders <ul style="list-style-type: none"> • Gastrointestinal system: Cleft lip, cleft palate and conditions requiring plastic surgery, Tracheo esophageal fistula/atresia, Hirschsprungs’ disease/megacolon, malrotation, intestinal obstruction, duodenal atresia,

		<p>gastrochisis, exomphalus, anorectal malformation, omphalocele, diaphragmatic hernia</p> <ul style="list-style-type: none"> • Anomalies of the nervous system: Spina bifida, Meningocele, Myelomeningocele, hydrocephalus • Anomalies of the genito-urinary system: Hypospadias, Epispadias, Undescended testes, Exstrophy bladder • Anomalies of the skeletal system • Eye and ENT disorders • Nursing management of the child with traumatic injuries: General principles of managing Pediatric trauma <ul style="list-style-type: none"> - Head injury, abdominal injury, poisoning, foreign body obstruction, burns - & Bites • Child with oncological disorders: Solid tumors of childhood, Nephroblastoma, Neuro blastoma, Hodgkin's/Non Hodgkin's Lymphoma, Hepatoblastoma, Rhabdomyosarcoma • Management of stomas, catheters and tubes • Management of wounds and drainages
IV	10	<p>Intensive care for pediatric clients</p> <ul style="list-style-type: none"> □ Resuscitation, stabilization & monitoring of pediatric patients □ Anatomical & physiological basis of critical illness in infancy and childhood □ Care of child requiring long-term ventilation □ Nutritional needs of critically ill child □ Legal and ethical issues in pediatric intensive care □ Intensive care procedures, equipment and techniques □ Documentation
V	20	<p>High Risk Newborn</p> <ul style="list-style-type: none"> □ Concept, goals, assessment, principles. □ Nursing management of <ul style="list-style-type: none"> • Post-mature infant, and baby of diabetic and substance use mothers. • Respiratory conditions, Asphyxia neonatorum, neonatal apnoea meconium aspiration syndrome, pneumo thorax, pneumo mediastinum • Icterus neonatorum. • Birth injuries. • Hypoxic ischaemic encephelopathy • Congenital anomalies. • Neonatal seizures. • Neonatal hypocalcaemia, hypoglycemia, hypomagnesaemia. • Neonatal heart diseases. • Neonatal hemolytic diseases • Neonatal infections, neonatal sepsis, ophthalmia neonatorum, congenital syphilis, HIV/AIDS • Advanced neonatal procedures. • Calculation of fluid requirements.

		<ul style="list-style-type: none"> • Hematological conditions – erythroblastosis fetalis, hemorrhagic disorder in the newborn • Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU
VI	10	Developmental disturbances and implications for nursing <ul style="list-style-type: none"> □ Adjustment reaction to school, □ Learning disabilities □ Habit disorders, speech disorders, □ Conduct disorders, □ Early infantile autism, Attention deficit hyperactive disorders (ADHD), depression and childhood schizophrenia.
VII	10	Challenged child and implications for nursing <ul style="list-style-type: none"> □ Physically challenged, causes, features, early detection & management □ Cerebral palsied child, □ Mentally challenged child. □ Training & rehabilitation of challenged children
VIII	5	Crisis and nursing intervention <ul style="list-style-type: none"> □ The hospitalized child, □ Terminal illness & death during childhood □ Nursing intervention-counseling
IX	5	Drugs used in Pediatrics <ul style="list-style-type: none"> □ Criteria for dose calculation □ Administration of drugs, oxygen and blood □ Drug interactions □ Adverse effects and their management
X	10	Administration and management of pediatric care unit <ul style="list-style-type: none"> □ Design & layout □ Staffing, □ Equipment, supplies, □ Norms, policies and protocols □ Practice standards for pediatric care unit □ Documentation
XI	5	Education and training in Pediatric care <ul style="list-style-type: none"> □ Staff orientation, training and development, □ In-service education program, □ Clinical teaching programs.

Practical

Total = 960 Hours
1 Week = 30 Hours

- Field visits:

S. No.	Deptt./ Unit	No. of Week	Total Hours
1	Pediatric medicine ICU	4	120 Hours
2	Pediatric surgical ICU	4	120 Hours
3	NICU	4	120 Hours
4	Pediatric OT	2	60 Hours
5	Pediatric medicine ward	6	180 Hours
6	Pediatric surgery ward	6	180 Hours
7	Emergency/Casualty	4	120 Hours
8	Field visits*	2	60 Hours
	Total	32	960 Hours

*Child care center, Anganwadi, play school, Special schools for challenged children, Juvenile court, UNICEF, Orphanage, Creche, SOS village

Essential

I. Procedures Observed:

- Echo cardiogram
- Ultrasound head
- ROP screening (Retinopathy of prematurity)
- Any other

II. Procedures Assisted

- Advanced neonatal life support
- Lumbar Puncture
- Arterial Blood Gas
- ECG Recording
- Umbilical catheterization – arterial and venous
- Arterial B P monitoring
- Blood transfusion- exchange transfusion full and partial
- IV cannulation & therapy
- Arterial catheterization
- Chest tube insertion
- Endotracheal intubation
- Ventilation
- Insertion of long line
- Assist in surgery

III. Procedures Performed:

- Airway Management
 - Application of Oro Pharyngeal Airway
 - Oxygen therapy
 - CPAP(Continuous Positive Airway Pressure)
 - Care of Tracheostomy
 - Endotracheal Intubation
- Neonatal Resuscitation
- Monitoring of Neonates – clinically & with monitors, CRT(Capillary Refill Time), assessment of jaundice, ECG
- Gastric Lavage
- Setting of Ventilators
- Phototherapy
- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,
- Admission & discharge of neonates
- Feeding - management of breast feeding, artificial feeding, expression of breast milk, OG(Orogastric) tube insertion, gavage feeding, TPN, Breast feeding counseling
- Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation & control
- Administration of Drugs: I/M, IV injection, IV Cannulation & fixation infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/ insulin syringes, Monitoring fluid therapy, Blood administration.
- Procedures for prevention of infections: Hand washing, disinfections & sterilization, surveillance, fumigation
- Collection of specimens
- Setting, Use & maintenance of basic equipment: Ventilator, O₂ analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow

IV. Other Procedures:

CLINICAL SPECIALITY - II

PSYCHIATRIC (MENTAL HEALTH) NURSING

Placement: II Year

Hours of Instruction
Theory 150 hrs
Practical 950 hrs
Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of patients with mental disorders in hospital and community
2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
4. Identify and manage psychiatric emergencies.
5. Provide nursing care to critically ill patients with mental disorders
6. Utilize the recent technology and various treatment modalities in the management of patients with mental disorders
7. Demonstrate skills in carrying out crisis intervention.
8. Appreciate the legal and ethical issues pertaining to psychiatric nursing.
9. Identify areas of research in the field of psychiatric nursing.
10. Prepare a design for layout and describe standards for management of Psychiatric units/emergency units/hospitals
11. Teach psychiatric nursing to undergraduate students & in-service nurses.

Course Content

Unit	Hours	Content
I	2	Principles and practice of Psychiatric nursing <ul style="list-style-type: none"> □ Review
II	10	Crisis Intervention <ul style="list-style-type: none"> □ Crisis, Definition □ Phases In The Development of A Crisis □ Types of Crisis; Dispositional , Anticipated Life Transitions Traumatic Stress, Maturation/ Development , Reflecting Psychopathology □ Psychiatric Emergencies and their management □ Grief and grief reaction □ Crisis Intervention; Phases □ Post traumatic stress disorder (PTSD) □ Role of the Nurse
III	4	Anger/ Aggression Management <ul style="list-style-type: none"> □ Anger and Aggression, Types, Predisposing Factors □ Management □ Role of The Nurse

	Total	32 Weeks	960 Hours

Essential Psychiatric nursing skills

Procedures Observed

1. Psychometric tests
2. Personality tests
3. Family therapy
4. Assisted
5. CT
6. MRI
7. Behavioral therapy.

Procedures Performed

1. Mental status examination
2. Participating in various therapies – Physical; ECT,
3. Administration of Oral, IM, IV psychotropic drugs
4. Interviewing skills
5. Counseling skills
6. Communication skills
7. Psychoeducation
8. Interpersonal relationship skills
9. Community Survey for identifying mental health problems
10. Rehabilitation therapy
11. Health education and life skills training.
12. Supportive psychotherapeutic skills
13. Group therapy
14. Milieu therapy
15. Social/Recreational therapy.
16. Occupational therapy.

CLINICAL SPECIALITY – II

COMMUNITY HEALTH NURSING

Placement : II Year

Hours of Instruction
Theory- 150 hours
Practicals- 950 hours
Total- 1100 hrs

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of community health nursing. It will help students to develop advanced skills for nursing intervention in various aspects of community health care settings. It will enable the student to function as community health Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of community health nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to community health Nursing- reproductive and child health, school health, Occupational health, international health, rehabilitation, geriatric and mental health.
2. Apply epidemiological concepts and principles in community health nursing practice
3. Perform community health assessment and plan health programmes
4. Describe the various components of Reproductive and child health programme.
5. Demonstrate leadership abilities in organizing community health nursing services by using inter-sectoral approach.
6. Describe the role and responsibilities of community health nurse in various national health and family welfare programmes
7. Participate in the implementation of various national health and family welfare programme
8. Demonstrate competencies in providing family centered nursing care independently
9. Participate/Conduct research for new insights and innovative solutions to health problems
10. Teach and supervise nurses and allied health workers.
11. Design a layout of sub center/Primary health center/Community health centre and develop standards for community health nursing practice.

Content Outlines

Unit	Hours	Content
I	20	<p>Epidemiology</p> <ul style="list-style-type: none"> □ Introduction <ul style="list-style-type: none"> • Concept, scope, definition, trends, History and development of modern Epidemiology • Contribution of epidemiology • Implications □ Epidemiological methods □ Measurement of health and disease: □ Health policies □ Epidemiological approaches <ul style="list-style-type: none"> • Study of disease causatives • Health promotion • Levels of prevention □ Epidemiology of <ul style="list-style-type: none"> • Communicable diseases • Non-communicable diseases □ Emerging and re-emerging diseases Epidemics □ National Integrated disease Surveillance Programme □ Health information system □ Epidemiology study and reports □ Role of Community health nurse

Practical

Total = 960 Hours
1 Week = 30 Hours

S.No.	Deptt./Unit	No. of Week	Total Hours
1	Urban and Rural community	17	510 Hours
2	School Health	3	90 Hours
3	International health	2	60 Hours
4	Administration(SC/PHC/CHC)	2	60 Hours
5	Occupational health	2	60 Hours
6	Community Mental Health	2	60 Hours
7	Home for aged and Hospice	2	60 Hours
8	Rehabilitation	2	60 Hours
	Total	32 Weeks	960 Hours

Categorisation of practical activities

Observed

- MCH office and DPHNO
- CHC/ First Referral Unit(FRU)
- Child guidance clinic
- Institute/Unit for mentally challenged
- District TB centre
- AIDS control society
- Filariasis clinic
- RCH clinic
- STD clinic
- Leprosy clinic
- Community based rehabilitation unit
- Cancer centers
- Palliative care
- Home of old age
- Mental health units
- De-addiction centres
- School health services
- Industry
- Selected industrial health centers
- ESI unit
- Municipality/ corporation office

Assisted

- Laparoscopic sterilization
- Vasectomy
- All clinics related to RCH
- Monitoring of national health and family welfare programmes

Performed

- Conduct various clinics
- School health assessment.
- Health survey.
- Health assessment
- Drug administration as per the protocols
- Treatment of minor ailments
- Investigating outbreak of epidemic.
- Screening for leprosy, TB and non-communicable disease
- Presumptive and radical treatment for Malaria.
- Counselling
- Report writing
- Referrals
- Writing a project proposal
- Material management- requisition for indent, condemnation, inventory maintenance,
- Training and Supervision of various categories of personnel
- Liaison with NGO's

STAFFING PATTERN RELAXED TILL 2012

Qualifications & Experience Of Teachers Of College Of Nursing

Sr. No.	Post, Qualification & Experience
1	Professor-cum-Principal - Masters Degree in Nursing - 10 years of experience and minimum of 5 years of teaching experience_ <i>Desirable : Independent published work of high standard / doctorate degree / M.Phil.</i>
2	Professor-cum-Vice Principal - Masters Degree in Nursing - 10 years of experience and minimum of 5 years of teaching experience_ <i>Desirable : Independent published work of high standard / doctorate degree / M.Phil.</i>
3	Reader / Associate Professor - Master Degree in Nursing. - 7 years of experience and minimum of 3 years teaching experience <i>Desirable : Independent published work of high standard / doctorate degree / M.Phil.</i>
4	Assistant Professor /Lecturer - Master Degree in Nursing. - 3 years experience

PHILOSOPHY

Indian Nursing Council believes that, **Health** is a state of well-being that enables a person to lead a psychologically, socially and economically productive life.

Nursing contributes to the health services in vital and significant way in the health care delivery system. It organizes national health goals and is committed to participate in the implementation of National Health policies and programmes. It aims at identifying health needs of the people , planning and providing quality care in collaboration with other health professionals and community groups.

Scope of nursing practice encompasses provision of promotive, preventive, curative and rehabilitative aspects of care to people across their life span in wide variety of health care settings. Practice of Nursing is based upon application of basic concepts and principles derived from the physical, biological, behavioral sciences.

Undergraduate nursing program at the post basic level is a broad based education within an academic framework, which builds upon the skills and competencies acquired at the diploma level. It is specifically directed to the upgrading of critical thinking skills, competencies & standards required for practice of professional nursing and midwifery as envisaged in National Health Policy 2002.

The teachers have the responsibility to be role models and create learning environment that enables students to acquire inquiry driven, self directed learning and foster attitude of life long learning.

Under graduate nursing education program at the post basic level prepares its graduates to become exemplary citizen by adhering to code of ethics and professional conduct at all times in fulfilling personal, social and professional obligations so as to respond to national aspirations.

AIMS :

The aim of the undergraduate nursing program at the post basic level is to upgrade the diploma (GNM) nurses to:

assume responsibilities as professional, competent nurses and midwives at basic level in providing promotive, preventive, curative and rehabilitative services.

make independent decisions in nursing situations, protect the rights of and facilitate individuals and groups in pursuit of health, function in the hospital, community nursing services, and conduct research studies in the areas of nursing practice. They are also expected to assume the role of teacher, supervisor, manager in a clinical/public health setting.

OBJECTIVES :

On completion of B.Sc. Nursing (Post-Basic) degree programme the graduates will be able to:

1. Assess health status, identify nursing needs, plan, implement and evaluate nursing care for patients / clients that contribute to health of individuals, families and communities.
2. Demonstrate competency in techniques of nursing based on concepts and principles from selected areas of nursing, physical, biological and behavioral sciences.
3. Participate as members of health team in the promotive, preventive, curative and restorative health care delivery system of the country.
4. Demonstrate skills in communication and interpersonal relationship.
5. Demonstrate leadership qualities and decision-making abilities in various situations.
6. Demonstrate skills in teaching to individuals and groups in community health settings.
7. Demonstrate managerial skills in community health settings.
8. Practice ethical values in their personal and professional life.
9. Participate in research activities and utilize research findings in improving nursing practice.
10. Recognize the need for continued learning for their personal and professional development.

COURSE OF STUDY :

Sr. No.	Subject	Theory Hours	Practical Hours	Total Hours
1st Year				
1.	Nursing Foundation	45	030	075
2.	Nutrition & Dietetics	30	015	045
3.	Biochemistry & Biophysics	60	-	060
4.	Psychology	60	015	075
5.	Maternal Nursing	60	240	300
6.	Child Health Nursing	60	240	300
7.	Microbiology	60	030	090
8.	Medical & Surgical Nursing	90	270	270
9.	English (Qualifying)	60	-	060
Total		525	840	1215

Note: Hindi/local language as per the need of the institution.

2nd Year

10.	Sociology	60	-	060
11.	Community Health Nursing	60	240	300
12.	Mental Health Nursing	60	240	300
1.	Introduction to Nursing Education	60	075	135
2.	Introduction to Nursing Administration	60	180	240
3.	Introduction to Nursing Research & Statistics	45	120	165
Total		345	855	1200

SCHEME OF EXAMINATION:

1st Year

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
Theory					
1.	Nursing Foundation	2	15	35	050
2.	Nutrition & Dietetics	2	15	35	050
3.	Biochemistry & Biophysics	3	25	75	100
4.	Psychology	3	25	75	100
5.	Microbiology	3	25	75	100
6.	Maternal Nursing	3	25	75	100
7.	Child Health Nursing	3	25	75	100
8.	Medical & Surgical Nursing	3	25	75	100
9.	* English (Qualifying)	--	100 College level qualifying exam, minimum passing Marks 33%.		100
Practicals					
1.	Medical & Surgical Nursing		50	50	100
2.	Child Health Nursing		50	50	100
3.	Maternal Nursing		50	50	100

Note: * College level qualifying exam to appear in University Examination, minimum passing Marks 33%

2nd Year

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
Theory					
10.	Sociology	3	25	75	100
11.	Community Health Nursing	3	25	75	100
12.	Mental Health Nursing	3	25	75	100
13.	Introduction to Nursing Education	3	25	75	100
14.	Introduction to Nursing Service Administration	3	25	75	100
15.	** Introduction to Nursing Research Statistics	2	50 College level qualifying exam, minimum passing Marks 50%		050
Practicals					
4.	Community Health Nursing		50	50	100
5.	Mental Health Nursing		50	50	100
6.	** Introduction to Nursing Research Statistics		50 (Research Project) College level qualifying exam, minimum passing Marks 50%		050

Note: **** College level qualifying exam to appear in University Examination, minimum passing Marks 50%. (Not University Examination)**

N.B.:

1. Teaching of Anatomy, Physiology, Pharmacology and Pathology will be integrated with clinical subjects.
2. A minimum of 80% attendance in theory and practical/clinicals in each clinical area is essential before award of degree.
3. 100 % attendance in practical / clinicals in each clinical area is essential before award of degree.
4. 50% of minimum marks in each theory and practical paper separately is required for passing.
5. Examination in the 'English' subject of 1st year P.B.B.Sc. Nursing course will be a college level Internal Assessment Qualifying Examination with minimum passing of 33% Marks. Student who fails or student who secures less than 33% Marks in the 'English' subject will not become eligible to appear in any subject of the University's final examination. Marks of 'English' subject are to be send to the University along with Internal Assessment Marks of other subjects for inclusion in the Mark Sheet.
6. Examination in the 'Introduction to Nursing Research and Statistics' subject of 2nd year P.B.B.Sc. Nursing course will be a college level Internal Assessment Qualifying Examination with minimum passing of 50% Marks. Student who fails or student who secure less than 50% Marks each i.e. independently in the Internal Assessment (Theory) Head and independently in the Internal Assessment (Practical) Head of the 'Introduction to Nursing Research and Statistics' subject will not become eligible to appear in any subject of the University's final examination. Marks of 'Introduction to Nursing Research and Statistics' subject are to be send to the University along with Internal Assessment Marks of other subjects for inclusion in the Mark Sheet.

IST YEAR
POST BASIC B.Sc NURSING
SYLLABUS

NURSING FOUNDATION

Placement: Ist Year

**Time Allotted: Theory : 45 Hrs
Practical : 30 Hrs**

COURSE DESCRIPTION :

This course will help students to develop an understanding of the philosophy, objectives and responsibilities of nursing as a profession. The purpose of the course is to orient to the current concepts involved in the practice of nursing and developments in the nursing profession.

OBJECTIVES : At the end of the course, the students will

1. Identify professional aspects of nursing
2. Explain theories of nursing
3. Identify ethical aspects of nursing profession
4. Utilise steps of nursing process
5. Identify the role of the nurse in various levels of health services
6. Appreciate the significance or quality assurance in nursing.
7. Explain current trends in health and nursing

COURSE CONTENTS :

UNIT I	DEVELOPMENT OF NURSING AS A PROFESSION	6 hrs
	<ul style="list-style-type: none">- Philosophy- Objectives and responsibilities of a graduate nurse- Trends influencing nursing practice- Expanded role of the nurse- Development of nursing education in India and trends in nursing education- Professional organizations, career planning- Code of ethics & professional conduct for nurses.	
UNIT II	CONCEPTS OF HEALTH & ILLNESS	12 hrs
	<ul style="list-style-type: none">- Concepts of health and illness, effects on the person- Stress and adaptation- Health care concepts and nursing care concept- Developmental concepts, needs, roles and problems of the developmental stages of individual – newborn, infant, toddler, pre-adolescent, adolescent, adulthood, middle-age, old age.	

UNIT III	THEORY OF NURSING PRACTICE	5 hrs
	<ul style="list-style-type: none"> - Meta paradigm of nursing – characterized by four central concepts i.e. Nurse, Person (client/patient). Health and Environment. Nursing Theory; <ul style="list-style-type: none"> - Florence Nightingale - Virginia Henderson - Betty Neumen - Dorothea Orem - Martha Rogers etc. 	
UNIT IV	NURSING PROCESS	10 hrs
	<ul style="list-style-type: none"> - Nursing Process - Nursing diagnosis – Definitions, concepts, statements, types, interpretation - Planning: techniques for planning care, types of care plans. - Implementation: different approaches to care, organisations and implementation of care, recording. - Evaluation: tools for evaluation, process of evaluation. 	
UNIT V	QUALITY ASSURANCE	6 hrs
	<ul style="list-style-type: none"> - Quality assurance: nursing standards, nursing audit, total quality management - Role of council and professional bodies in maintenance of standards. 	
UNIT VI	APPROACHES TO HEALTH CARE	6 hrs
	<ul style="list-style-type: none"> - Primary health care concepts: <ul style="list-style-type: none"> - community oriented nursing - holistic nursing - primary nursing - family oriented nursing concepts: <ul style="list-style-type: none"> - Problem oriented nursing - Progressive patient care - Team nursing 	
PRACTICUM : Teaching Learning Activities -		30 Hrs.
	Nursing process application.	
	<ul style="list-style-type: none"> - Select one patient and write nursing care plan. 	20 Hrs.
	<ul style="list-style-type: none"> - Select one client from OPD / Community / Peer Group and write nursing care plan. 	10 Hrs.

EVALUATION:

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
1.	Nursing Foundation Theory	2	15	35	050

Internal Assessment: 15 Marks

(Out of 15 Marks to be send to the University)

Mid-Term: 25 Marks

Prelim: 35 Marks

Total: 60 Marks

(60 Marks from mid-term & prelim (Theory) to be converted into 15 Marks)

External Assessment (Theory): 35 Marks

(University Examination)

NUTRITION & DIETETICS

Placement: Ist Year

Time Allotted Theory : 30 Hrs.

Practical : 15 Hrs.

COURSE DESCRIPTION :

This course is designed to provide the students with a wide knowledge of dietetics in Indian setting, that the practice of teaching optimum and realistic dietary planning can become an integral part of nursing practice.

OBJECTIVES : At the end of the course, the students will

1. Explain the principles and practices of nutrition and dietetics.
2. Plan therapeutic diets in different settings
3. Identify nutritional needs of different age groups and plan diet accordingly.
4. Prepare meals using different methods utilizing cookery rules.

COURSE CONTENTS :

UNIT I INTRODUCTION TO NUTRITION AND DIETETICS 8 Hrs

- Balanced diet, factors on which it depends.
- Factors to be considered in planning
- Guides available for planning
- Food Hygiene, preparation and preservation
- Review of nutrients – micro & macro

UNIT II INFANT AND CHILD NUTRITION 8 Hrs

- Feeding of normal infants: factors to be considered in planning, nutritional requirements
- Supplementary feeding of infants: Advantage and method of introduction.
- Weaning effects on mother and child.
- Psychology of infant and child feeding.
- Feeding the sick child. Diet in diseases of infancy and childhood.
- Deficiency – malnutrition, under nutrition, other nutrients deficiency.
- Feeding pre-school child: nutritional needs, factors to be considered in planning diets. Problems in feeding.

UNIT III INTRODUCTION TO DIET THERAPY 8 Hrs

- Introduction
- Routine hospital diets.
- Therapeutic diet under each unit i.e. Cardiovascular diseases, Gastrointestinal diseases, Renal disorders, Endocrine and metabolic disorders,
- Allergy, Infections and fevers,
- Pre and post operative stage,
- Deficiency diseases and malnutrition, overweight and underweight

UNIT IV COMMUNITY NUTRITION**6 Hrs**

- Need for community nutrition programme.
- Nutritional needs for special groups: infant, child, adolescent,
- Pregnant and lactating mother and old people.
- Substitutes for non-vegetarian foods.
- Selection of cheap and nutritious foods. Nutrition education needs and methods.
- Methods of assessing nutritional status of individual / group / community.
- Current nutritional problems and national programmes (mid day meal etc.)

PRACTICUM :

- I Methods of cooking and cookery rules.
1. Simple preparation of beverages, soups, cereals and pulses, eggs, vegetables, meat, multipurpose food snacks.
 2. Menu Plans.
- II Preparation of supplementary food for infants.
1. Food for toddlers.
 2. Low cost nutritious dishes for vulnerable groups.
 3. Dietary case study of patient on special diet and planning of low cost dietary instructions for home adaptations.
 4. Planning of therapeutic diets.

EVALUATION :

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
2.	Nutrition & Dietetics Theory	2	15	35	050

Internal Assessment: 15 Marks

(Out of 15 Marks to be send to the University.)

Mid-Term: 25 Marks

Prelim: 35 Marks

Total: 60 Marks

(60 Marks from mid-term & prelim (Theory) to be converted into 15 Marks)

External Assessment (Theory): 35 Marks**(University Examination)****REFERENCES:**

- 1) Clinical dietetics and Nutrition, Antia 4th ed.
- 2) Nutritive value of Indian foods, Gopalan, 1st ed.
- 3) Krause's Food, Nutrition & diet Therapy, Mahan, 11th ed.
- 4) Nutrition & diet therapy, Williams
- 5) Clinical Dietetics & Nutrition, Philip.

BIOCHEMISTRY & BIOPHYSICS

SECTION – A

BIOCHEMISTRY

Placement: Ist Year

Time Allotted Theory : 30 Hrs

Practical :

COURSE DESCRIPTION :

The broad goal of teaching Biochemistry to Nursing students is to enable them to understand, the chemical processes taking place in the human body in health and disease. This will help them to increase the quality of patient care.

OBJECTIVES : At the end of the course, the students will

1. Identify the basic principles of Biochemistry
2. Understand and grasp the basic outline of chemistry and properties of important biomolecules like glucose, urea, etc
3. Summarize the working of enzymes and their importance as diagnostic tools for the clinician.
4. Describe the mechanisms involved in maintenance of body fluids along with electrolytes.
5. Be able to understand the concepts of laboratory medicine, which involves learning about physiological levels of important biomolecules and the underlying cause of change in these levels in disease states.

COURSE CONTENTS

UNIT I	INTRODUCTION	2 hrs
-	Introduction: importance of Biochemistry in Nursing	
-	Study of cell and its various components	
UNIT II	WATER AND ELECTROLYTES	2 hrs
-	Distribution of water and its functions in human body (ECF & ICF)	
-	Water & Fluid balance	
-	Electrolyte Distribution and its functions in body	
-	Dehydration causes and consequences	
-	Electrolyte imbalance – causes, hypo and hypernatremia and kalemia	
UNIT III	ENZYMES	05 hrs
-	Definition and Mechanism of action	
-	Factors affecting enzyme activities	
-	Enzymes in clinical diagnosis and its applications	
-	Precautions for handling specimens for enzymes estimation	
-	Digestion and Absorption of carbohydrates, proteins and lipids.	
-	Factors influencing the digestion and absorption	
-	Mal absorption syndrome	

UNIT IV CARBOHYDRATES 05 hrs

- Elementary outline of Electron transport chain (ETC) and Biological Oxidation
- Elementary consideration of Mono, di and polysaccharides
- Fate of glucose in the body including-gluconeogenesis, glycogenesis, glycolysis, glycogenolysis. Storage of glucose.
- Outline and Importance of TCA Cycle (Kreb's cycle)
- Regulation of blood glucose levels. Glucose Tolerance test (GTT) Hyperglycemia, Hypoglycemia.

UNIT V PROTEINS – AMINO ACIDS & HARMONES 05 hrs

- Protein Chemistry
- Essential amino acids, properties and functions
- Important polypeptides
- Plasma Proteins and their functions
- Nucleic acids- DNA, RNA
- Biosynthesis of proteins in the cells and Role of nucleic acids in protein synthesis
- Nitrogenous constituents of Urine, blood their origin Urea cycle and Nitrogen balance. Uric Acid formation, gout.

UNIT VI LIPIDS 06 hrs

- Biological Importance of important lipids and their functions
- Cholesterol and Lipoproteins
- Sources occurrence and distribution
- Blood levels and Metabolism
- Biosynthesis of fats and storage of fats (B-oxidation)
- Role of liver in fat metabolism Fatty liver, its causes and prevention
- Goal of lipid metabolism in Atherosclerosis and Heart diseases
- Ketone body formation and its utilization.
- Causes and detection of ketosis

UNIT VII INTER-RELATIONSHIP IN METABOLISM 05 hrs

- Carbohydrates, Lipids, a Protein, minerals metabolism
- Nutrition calorie value of food, BMR, SDA, Balance Diet

SECTION – B

BIOPHYSICS

Placement: Ist Year

**Time Allotted Theory : 30 Hrs
Practical :**

COURSE DESCRIPTION :

The broad goal of teaching Biophysics to nursing students is to enable them to understand the application of physics principles while providing nursing care to the patients.

COURSE CONTENTS :

UNIT I	INTRODUCTION	2 hrs
-	Introduction: Concepts of unit and measurements Fundamental and derived units	
-	Unit length, weight, mass, time.	
UNIT II	MOTION	2 hrs
-	Vector and scalar motion, speed, velocity and acceleration	
-	Newton's law of motion	
UNIT III	GRAVITY	3 hrs
-	Gravity: Specific gravity , centre of gravity, principles of gravity.	
-	Effect of gravitational forces on human body.	
-	Application of principles of gravity in nursing	
UNIT IV	FORCE WORK & ENERGIES	3 hrs
-	Force, work, Energy: Their units of measurement.	
-	Type and transformation of energy, forces of the body, Static forces.	
-	Principles of machines, friction and body mechanics.	
-	Simple mechanics – lever and body mechanics, pulley and traction, incline plane, screw.	
-	Application of these principles in nursing.	
UNIT V	HEAT	3 hrs
-	Heat : Nature, measurement, transfer of heat	
-	Effects of heat on matter	
-	Relative humidity, specific heat	
-	Temperature scales	
-	Regulation of body temperature	
-	Use of heat for sterilization	
-	Application of these principles in nursing	

UNIT VI	LIGHT	3 hrs
	<ul style="list-style-type: none"> - Light: Laws of reflection - Focusing elements of the eye, defective vision and its correction, use of lenses - Relationship between energy, frequency and wavelength of light - Biological effects of light - Use of light in therapy - Application of these principles in nursing 	
UNIT VII	PRESSURES	3 hrs
	<ul style="list-style-type: none"> - Pressures: Atmospheric pressure, hydrostatic pressure, osmotic pressure - Measurements of pressures in the body <ul style="list-style-type: none"> - Arterial and venous blood pressures - Ocular pressure - Intracranial pressure - applications of these principles in nursing 	
UNIT VIII	SOUND	2 hrs
	<ul style="list-style-type: none"> - Sound: Frequency, Velocity and Intensity - Vocalisation and hearing - Use of ultrasound. Noise pollution and its prevention - Application of these principles in nursing 	
UNIT IX	ELECTRICITY	5 hrs
	<ul style="list-style-type: none"> - Electricity and Electromagnetism : Name of Electricity, Voltage, Current, Resistance and their Units. - Flow of electricity in solids, electrolytes , gases and vacuum. - Electricity and human body - ECG, EEG, EMG, ECT - Pace makers and defibrillation - Magnetism and electricity - M.R.I. Scanning, CAT Scan 	
UNIT X	NUCLEAR PHYSICS	2 hrs
	<ul style="list-style-type: none"> - Atomic Energy : Structure of Atom, Isotopes and Isobars. - Radioactivity : Use of radioactive isotopes - Radiation protection units and limits, instruments used for detection of ionising radiation. X-rays. 	
UNIT XI	ELECTRONICS	2 hrs
	<ul style="list-style-type: none"> - Principles of Electronics: Common electronic equipments used in patient care. 	

PRACTICUM :

- Experiments and Tests should be demonstrated wherever applicable.

EVALUATION:

Paper	Subject Biochemistry & Biophysics	Duration	Internal Assessment	External Assessment	Total Marks
3.	Theory	3	25	75	100

Internal Assessment: 25 Marks
(Out of 25 Marks to be send to the University)

	Section - A Biochemistry	Section – B Biophysics	Total Marks
Mid-Term	25	25	--
Prelim	37	38	--
Total	62	63	125
Average out of	13	12	25

(62 Marks from Biochemistry (mid-term & prelim) to be converted into 13 Marks and 63 Marks from Biophysics (mid-term & prelim) to be converted into 12 Marks)

External Assessment (Theory): 75 Marks
(University Examination)

Section A: Biochemistry: 37 Marks
Section B: Biophysics: 38 Marks
Total Marks: 75 Marks

PSYCHOLOGY

Placement: Ist Year

**Time Allotted Theory : 60 Hrs
Practical : 15 Hrs**

COURSE DESCRIPTION :

This course is designed to orient students with regards to psychological principles, and widen their knowledge of the fundamentals of psychology. The course offers students an opportunity to understand the psychodynamics of patient behavior and to apply theoretical concepts in practical settings.

OBJECTIVES : The course aims towards the developing students skills in –

- Understanding herself and others
- Analysing her own thought and behavior patterns
- Using psychological principles to improve her efficiency in nursing care
- Applying psychological principles while performing nursing duties
- Distinguishing psychological processes during health and sickness
- Planning nursing care with regards to psychological needs and concerns
- Participating in psychological assessment of patients

COURSE CONTENTS

UNIT I	INTRODUCTION TO PSYCHOLOGY	3 hrs
	<ul style="list-style-type: none">- Definition, history and scope- Branches and methods- Relationship with other subjects- Psychology and the student nurse- Habits and skills	
UNIT II	SENSATION, ATTENTION AND PERCEPTION	6 hrs
	<ul style="list-style-type: none">- Sensation – Definition and sensory processes- Problems in sensation- Attention – Definition, characteristics and types- Factors affecting attention- Distraction and sustaining attention- Perception – Definition and characteristics- Perception of form, depth and movement- Types and difficulties in perception- Problems and nursing care	
UNIT III	LEARNING	5 hrs
	<ul style="list-style-type: none">- Definition, nature and conditioning theories- Learning process, laws and types and factors- Learning during health and sickness	

UNIT IV	MEMORY AND FORGETTING	5 hrs
	<ul style="list-style-type: none"> - Memory – Definition and nature - Memory models and factors affecting memory - Methods to improve memory - Forgetting – Definition, explanation of forgetting - Memory during health and sickness - Forgetting during health and sickness 	
UNIT V	MOTIVATION	6 hrs
	<ul style="list-style-type: none"> - Definition, nature and theories - Needs and motives – Biological and social - Frustration and conflicts - Types of conflicts - Self actualization - Application in nursing care 	
UNIT VI	EMOTION	5 hrs
	<ul style="list-style-type: none"> - Definition and meaning, theories - Expressions and perceptions - Emotions in sickness, nursing care 	
UNIT VII	ATTITUDES	5 hrs
	<ul style="list-style-type: none"> - Definition and nature, theories - Factors influencing attitude formation - Role of attitudes in health and sickness 	
UNIT VIII	INTELLIGENCE AND ABILITIES	6 hrs
	<ul style="list-style-type: none"> - Definitions and nature, theories - Psychological testing and measurement - Mental retardation and IQ - Intelligence and abilities during sickness 	
UNIT IX	PERSONALITY	7 hrs
	<ul style="list-style-type: none"> - Definition, nature, factors influencing personality - Theories of personality development - Defence mechanism - Psychological problems - Personality disorders and nursing 	
UNIT X	INDIVIDUAL DIFFERENCE	4 hrs
	<ul style="list-style-type: none"> - Definition and significance - Heredity and environment - Role in health and sickness - Implications in nursing 	

UNIT XI PSYCHOLOGICAL ASPECTS OF NURSING 5 hrs

- Behaviour during sickness
- Understanding the client
- Psychological approach in nursing care
- Psychological needs of child, adolescent, adult, aged
Chronically ill and attendants

UNIT XII MENTAL HYGIENE 3 hrs

- Concepts and meaning of mental hygiene
- Characteristics of a mentally healthy person
- Factors influencing mental health

All theory topic lectures will be covered through interactive sessions with students.

PRACTICUM :

A 3 Experiments 9 hrs

- Attention
- Memory
- Learning

B 2 Psychological Tests (Rating Scales) 4 hrs

- Hardiness
- Positive Thinking

C Case Study 2 hrs

Discussion of a case with identification of expressed emotions, psychological needs, sources of conflict and attitudes expressed

Practicum will be recorded in a journal and will be scored as part of internal Assessment.

EVALUATION :

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
4.	Theory	3	25	75	100

Internal Assessment:

Theory: 15 Marks

Practicum Assignment: 10 Marks

Total: 25 Marks

(Out of 25 Marks to be send to the University)

Mid-Term: 50 Marks

Prelim: 75 Marks

Total: 125 Marks

(125 Marks from mid-term & prelim (Theory) to be converted into 15 Marks)

Practicum Assignments: 10 Marks

External Assessment: 75 Marks

(University Examination)

MICROBIOLOGY

Placement: Ist Year

**Time Allotted Theory : 60 Hrs
Practical : 30 Hrs**

COURSE DESCRIPTION :

This course reorients the students to the fundamentals of Microbiology and its various sub-divisions. It provides opportunities to gain skill in handling and use of microscope for identifying various micro-organisms. It also provides opportunities for safe handling of materials containing harmful bacteria and methods of destroying microorganisms.

OBJECTIVES : After the course the students will develop

1. Identify common disease causing organisms
2. Basic principles of Microbiology & its significance in health & disease
3. Handling of infective specimens
4. Various methods of sterilization & disinfection
5. Role of nurse in hospital infection control system.

COURSE CONTENTS :

UNIT I	INTRODUCTION	3 hrs
	<ul style="list-style-type: none">- General Microbiology : History, (Fracostoriues of Verona to the Latest Nobe Laureates short note on Pasteur and Koch) and Introduction (Why to study the subject?)- Microscope (Types – dissecting to Electron measuring scale upto nanometer)	
UNIT II	GENERAL MICROBIOLOGY	3 hrs
	<ul style="list-style-type: none">- Morphology and Physiology (Size, Shape, struct., spore, flagella, capsule)- Staining (demonstration) Gram's + Z N's + Motility	
UNIT III	BACTERIAL GROWTH REQUIREMENT	5 hrs
	<ul style="list-style-type: none">- Growth requirement of Bacteria + Bacteria growth curve- Cultural media different- Collection processing of sample and bacteria	
UNIT IV	STERILIZATION & DISINFECTION	5 hrs
	<ul style="list-style-type: none">- Sterilization + Disinfections- Sterilization demo of instruments, Different disinfectants dilute- Hospital infection control Biosafety + Fumigation and role of nurse- Bacterial genetics (emphasis to drug resistance) Host parasite relationship	

UNIT V	SYSTEMIC BACTERIOLOGY	10 hrs
	(Morpho, growth requirements, diseases caused vaccine epideo)	
-	Pyogenic cocci causing diseases Staphylococci	
-	Streptococci and Pneumococci and Neisseria	
-	Salmonella + Shigella	
-	E coli diarrhea + Cholera + Pseudomonas	
-	C. diphtheria + Chlamydia	
-	Anaerobes intro. + C. welchii	
-	C. tetani + nonsporing anaerobes mention diseases	
-	Tuberculosis	
-	Leprosy + Aty	
-	Spirocheate + Leptospira	
-	Chlamydia	
-	Demo different morphology of bacteria G + C, G + B, GNC, GNB	
-	Demo of organism Spore, Capsule, fungi, AFB	
UNIT VI	SYSTEMIC MYCOLOGY	5 hrs
-	Fungi intro., Dermatophytes	
-	Mycetophytes	
-	Mycetoma, Rhino, Crypto	
-	Candida and Lab. Diagnosis of fungal infections	
UNIT VII	IMMUNOLOGY	5 hrs
-	Immunity	
-	Antigen	
-	Antibody	
-	Ag X Ab reaction sererogical	
-	Immune Response	
-	Hypersensitivity	
UNIT VIII	SYSTEMATIC PARASITOLOGY	10 hrs
-	Intro classification and some terms	
-	Amoeba + Giardia	
-	Trichomonas + Leishmania	
-	Malaria + Toxoplasma	
-	Cestodes (Taenia sodium and saginata E. granuloses)	
-	Intestinal Nematodes	
-	Tissue Nematodes	
-	Vectors	
-	Diff. Parasites and vectors stool preparation demo	
UNIT IX	SYSTEMATIC VIROLOGY	8 hrs
-	Gen. Prop. Cultivation classification	
-	Herpes virus	
-	Picorna virus	

- Measles, Mumps, Chicken pox
- Ortho and Arbo (Dengue)
- Rhabdo virus
- Hepatitis virus
- HIV and AIDS

UNIT X CLINICAL MICROBIOLOGY

6 hrs

- PUO, UTI, STD, Wound infection
- Micro – organism transmitted through food
- Food poisoning, food born infection

PRACTICUM :

- Each student will practice in laboratory as indicated in each unit of the courses outline. While giving nursing care in the wards they will practice collection and processing of specimens, prevention and control of hospital infections. Sterilization, immunisation, chemotherapy and maintenance of personal and environmental hygiene. Observation visit to incinerator, posting in CSSD and infection control department.

EVALUATION :

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
5.	Microbiology Theory	3	25	75	100

Internal Assessment:

Theory: 15 Marks

Journal Assignment: 10 Marks

Total: 25 Marks

(Out of 25 Marks to be send to the University)

Mid-Term: 50 Marks

Prelim: 75 Marks

Total: 125 Marks

(125 Marks from mid-term & prelim (Theory) to be converted into 15 Marks)

Journal Assignments: 10 Marks

External Assessment (Theory): 75 Marks

(University Examination

MATERNAL NURSING

Placement: Ist Year

**Time Allotted Theory : 60 Hrs
Practical : 240**

COURSE DESCRIPTION :

The course is designed to widen the student's knowledge of obstetrics during pregnancy, labour and puerperium. It also helps to acquire knowledge and to develop skill in rendering optimum nursing care to a child bearing mother in a hospital or in community and help in the management of common gynaecological problems.

OBJECTIVES : At the end of the course, the student will be able to :

1. Describe the physiology of pregnancy, labour, and puerperium.
2. Manage normal pregnancy, labour and puerperium.
3. Explain the physiology of lactation, and advice on management of breast feeding.
4. Provide pre- and post operative nursing care in obstetric conditions.
5. Identify and manage high risk pregnancy including appropriate referrals.
6. Propagate the concept and motivate acceptance of family planning methods.
7. Teach , guide and supervise auxiliary midwifery personnel.

COURSE CONTENT

UNIT I	INTRODUCTION AND HISTORICAL REVIEW	5 hrs.
-	(a) Early history of midwifery and evolution of obstetrics Maternity care and practices in various culture across the world. Expanded role of the nurse in maternity and gynaecology.	
-	(b) Safe motherhood initiative Maternal mortality, morbidity and perinatal mortality. Legislation related to maternal benefits, MTP acts, incentives and Family planning. Family welfare programme.	
 UNIT II	 ANATOMY AND PHYSIOLOGY OF FEMALE REPRODUCTIVE SYSTEM	 6 hrs.
-	Review of anatomy and physiology of female reproductive system.	
-	Female pelvis and foetal skull.	
-	Menstrual cycle	
-	Human reproduction, gametogenesis, fertilization, embryo.	
-	Placenta, foetal membrane, liquor amnii, umbilical	
-	The foetus, foetal growth, foetal physiology, foetal circulation.	

UNIT III	NORMAL PREGNANCY	8 hrs.
	<ul style="list-style-type: none"> - Physiological changes during pregnancy - Diagnosis of pregnancy and antenatal care - Antenatal assessment of foetal well being. - Physiology of normal labour - Mechanism of normal labour. - Management of I, II, and III stages of labour. - Physiology of puerperium. - Physiology of lactation and breast feeding - Management of normal puerperium 	
UNIT IV	NEW BORN BABY	6 hrs.
	<ul style="list-style-type: none"> - Resuscitation and immediate care of newborn.including SGA & LGA - Normal characteristics and essential care of newborn. - Asphyxia Neonatarum, respiratory distress - Jaundice in newborn - Birth injuries, congenital anomalies, infection in newborn, and vomiting in newborn. - Still birth – incidence, causes and prevention. - Care of low birth weight babies in labour room and nursery / NICU. 	
UNIT V	MEDICAL DISORDERS IN PREGNANCY	5 hrs.
	<ul style="list-style-type: none"> - Hypertensive disorders – Pregnancy induced hypertension, Eclampsia. - Anaemia in pregnancy - Diabetes mellitus in pregnancy - Heart diseases - Renal disorders in pregnancy - Jaundice in pregnancy - Pulmonary TB - Pregnancy with STD, HIV / AIDS. 	
UNIT VI	HIGH RISK PREGNANCY	10 hrs.
	<ul style="list-style-type: none"> - Abortion - Hydatiform mole - Ectopic pregnancy - Medical termination of pregnancy - Antepartum haemorrhage – Placenta previa, Abruption placenta - Vomiting in pregnancy - Pregnancy in Rh negative women - Multiple pregnancy, hydramnios - Preterm labour - Premature rupture of membrane 	

	<ul style="list-style-type: none"> - IUGR, postdatism - Pregnancy with previous caesarean section - Fibroid with pregnancy - Ovarian tumour with pregnancy 	
UNIT VII	HIGH RISK LABOUR	3 hrs.
	<ul style="list-style-type: none"> - Abnormal presentation – Unstable lie, Occipitoposterior, face and brow presentation - Breech presentation, compound presentation - Abnormal uterine action in labour and active management of labour - Contracted pelvis and CPD - Obstructed labour, rupture of uterus, injuries of maternal birth canal, cord prolapse. 	
UNIT VIII	ABNORMALITIES OF PUERPERIUM	4 hrs.
	<ul style="list-style-type: none"> - Puerperial pyrexia and sepsis - Post partum haemorrhage - Breast complications – Breast engorgement, breast abscess, acute mastitis - Psychiatric disorders in puerperium 	
UNIT IX	OBSTETRICAL EMERGENCIES & OPERATIVE OBSTETRICS	3 hrs.
	<ul style="list-style-type: none"> - Uterine rupture, cervical tear - D & E , S & E - Use of instruments – Ephysiotomy Forcep, Vacuum - Caesarean section 	
UNIT X	PHARMACOTHERAPEUTICS	2 hrs.
	<ul style="list-style-type: none"> - Oxytocics, Prostaglandins – use in obstetrics - Anaesthesia and analgesics used in obstetrics 	
UNIT XI	SPECIAL INVESTIGATIONS IN OBSTETRICS	2 hrs.
	<ul style="list-style-type: none"> - USG, NST, CTG - Radiography 	
UNIT XII	CURRENT TRENDS IN REPRODUCTIVE HEALTH(RCH)	4 hrs.
	<ul style="list-style-type: none"> - Infertility, genetic counseling - Unwanted pregnancy - Unwed mother - Advances in obstetrics and maternity care. 	
UNIT XIII	GYNAECOLOGICAL NURSING	4 hrs.
	<ul style="list-style-type: none"> - Common Gynaecological Problems 	

- Cervical erosions, Carcinoma
- Fibroids, Uterine and Cervical Prolaps
- Uterine Inversion etc

PRACTICUM : Practice following Procedures

- Antenatal, Postnatal & per vaginal exam.
- Conduct normal delivery (For male candidates minimum conduct of 5 deliveries)
- Motivation of Planned Parenthood, advice on family planning methods.
- Assist in various diagnostic & therapeutic procedure including IUD insertion & removal.
- Follow Nursing process in providing care to 3-6 patients.

PRACTICUM / CLINICAL EXPERIENCE : **TOTAL HOURS : 240**

- Antenatal OPD or ANC Ward : **hours : 50**
- Labour Room : **hours : 60**
- Post natal ward/ OPD : **hours : 50**
- Gynaecology ward : **hours : 30**
- OPD, Family Planning clinics & visits : **hours : 30**
- Operation Theatre : **hours : 20**

EVALUATION:

CHILD HEALTH NURSING

Placement: Ist Year

Time Allotted Theory : 60hrs

Practical : 240hrs

COURSE DESCRIPTION :

This course is aimed at developing an understanding of the modern approach to child care, the principles of child health nursing and the common problems of neonates and children in health and sickness.

OBJECTIVES : At the end of the course, the students will be able to:-

1. Explain the modern concept of child care and the principles of child health nursing.
2. Describe the normal growth and development of children in various age groups.
3. Explain the physiological response of body to disease conditions in children.
4. Identify the health needs and problems of neonates and children, plan and implement appropriate nursing interventions.
5. Identify the various preventive, promotive and rehabilitative aspects of child care and apply them in providing nursing care to children in the hospital and in the community.

COURSE CONTENT

UNIT I	INTRODUCTION TO CHILD HEALTH NURSING	8 hrs.
	<ul style="list-style-type: none">- Modern concept of child care- Internationally accepted rights of the child.- Changing trends in hospital care, preventive, promotive and curative aspects of child health Child morbidity and mortality rates- National policy and legislation's in relation to child health and welfare.- National programmes related to child health and welfare.- Differences between adult and child- Hospital environment for a sick child and role of a paediatric nurse in caring for the hospitalized child- Principles of pre and post operative care of infants and children- Paediatric nursing procedures Prepn of child for diagnostic tests, collection of specimens, calculation and administration of oral and parenteral medication, feeding, adm of oxygen, nebulisation ,collection of specimens ,exchange transfusion, restraints	
UNIT II	THE HEALTHY CHILD	12 hrs.
	<ul style="list-style-type: none">- Growth & development ---. Principles & factors affecting growth & development.- Assessment of growth and development	

- Growth & development from birth to adolescence, needs of normal children through stages of development and parental guidance.
- Nutritional needs of infants and children principles of paediatric nutrition
 - Breast feeding
 - Artificial feeding & Weaning
- Infancy ,toddler, pre schooler, school age child and adolescents.
- Role of play in children - Need, importance and value of play, selection of play material and nurse's role.
- Preventive immunization

UNIT III CARE OF THE NEWBORN. 4 hrs.

- Characteristics and care of a newborn.
- Asphyxia neonatorum & neonatal resuscitation.
- Low birth weight infants
- Nursing management of common neonatal disorders.
 - Neonatal jaundice & photo therapy
 - Neonatal sepsis & hypoglycemia
 - Organization of Neonatal units, Prevention & Control of infection
 - Critical care concept in child health

UNIT IV NURSING MANAGEMENT OF COMMON CHILDHOOD ILLNESS. 32 hrs.

- (a) **Nutritional deficiency disorders.**
 - Protein energy malnutrition
 - Vitamin deficiency disorders (Rickets, scurvy, Vit A deficiency disorders)
- (b) **Respiratory diseases & disorders .**
 - Acute bronchitis & Bronchiolitis
 - Pneumonia
 - Branchial Asthama
- (c) **Disorders of the gastro-intestinal system.**
 - Acute gastroenteritis
 - Tracheo esophageal fistula
 - Cleft lip and palate
 - Hypertrophic Pyloric Stenosis
 - Hirschsprung's disease & Intestinal Obstruction
 - Anorectal anomalies
- (d) **Cardiovascular system**
 - Rheumatic fever
 - Congenital heart diseases
 - Congestive cardiac failure
- (e) **Disorders of Genito urinary System**
 - Acute glomerulo nephritis
 - Nephrotic Syndrome
 - Wilm's tumour & Congenital disorders
- (f) **Neurological disorders**
 - Convulsions in children & Epilepsy

- Meningitis & Encephalitis
- Hydrocephalus, Meningocele and meningocele
- (g) **Haematological disorders**
 - Anaemia & Thalassemia
 - Idiopathic thrombocytic Purpura & Hemophilia
 - Leukaemia
- (h) **Endocrine Disorders**
 - Juvenile Diabetes Mellitus
- (i) **Orthopaedic Disorders**
 - CTEV (Club foot) , Congenital hip dislocation
 - Fractures
- (j) **Disorders of Skin, Eye & ENT**
 - Skin** : Eczema, urticaria, scabies, pediculosis, worm infestations
 - Eye & ENT** : Tonsillitis, Deafness, Otorrhoea, Otitis Media, Cong Cataract, hypertelorism
- (k) **Communicable Diseases in Children**
 - Measles/rubella, Chicken pox
 - Diphtheria, whooping cough
 - Tetanus, Poliomyelitis
 - AIDS
 - Tuberculosis
- (m) **Paediatric Emergencies**
 - Accidents, Poisoning ,Stings & Bites
 - Foreign bodies, Haemorrhage & Drowning Burns

**UNIT V MANAGEMENT OF BEHAVIOURAL PROBLEMS
IN CHILDREN CHILDHOOD ILLNESS.**

04 hrs.

- Enuresis, Encoprecis, temper tantrums somnambulism, juvenile delinquency, speech defects, tics, pica, antisocial behaviour
- **Management of challenged children**
Need for early diagnosis ,treatment and rehabilitation of Mentally challenged – Mental retardation
- Physically challenged – Cerebral palsy
Socially challenged – Child abuse & child labour

PRACTICUM

The students will :-

1. Be posted in paediatric medical and surgical ward, OPD in hospital, health centre and neonatal unit..
2. Visit a centre for handicapped children and child welfare centre and write observation report.
3. Write an observation study of normal children of various age groups in home/nursery school/creche.
4. Follow nursing process in providing care to 3-6 children.
5. Write at least two nursing care studies and do a presentation.
6. Give two planned health teachings, one in hospital and one in OPD/health centre.
7. Practice the following nursing procedures :
Taking pediatric history

Physical assessment of children
 Baby bath
 Feeding – spoon & vati, nezogastric feeding.
 Restraining
 Calculation of dosage of drugs and administration of medications and injections & Intra Venous Infusion.
 Collection of specimens
 Enema. bowel wash. colostomy irrigation
 Steam and Oxygen inhalation
 Preparation to assist with diagnostic tests and operations
 Examination/Assessment of a newborn
 Neonatal resuscitation
 Care of a baby in incubator and on ventilator
 Photo therapy
 Assist in exchange transfusion and other therapeutic procedures

CLINICAL EXPERIENCE :

Total Hours : 240

- Pediatric Medical **hours : 60**
- Pediatric Surgical **hours : 60**
- Intensive Pediatric Critical Unit **hours : 30**
- NICU **hours : 30**
- OPDs including (CWC, CGC) **hours : 30**
- Visits – (various agencies: i.e., crèches, schools, nursery, Special schools & handicapped, etc.) **hours : 30**

EVALUATION :

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
7.	Theory	3	25	75	100
2.	Practical		50	50	100

Internal Assessment:

Theory: 25 Marks
Practical: 50 Marks
Total: 75 Marks

Details as follows:

Internal Assessment (Theory): 25 Marks

(Out of 25 Marks to be send to the University)

Mid-Term: 50 Marks

Prelim: 75 Marks

Total: 125 Marks

(125 Marks from mid-term & prelim (Theory) to be converted into 25 Marks)

Internal assessment (Practicum): 50 Marks

(Out of 50 Marks to be send to the University)

Practical Exam

1) Mid-Term exam

050 Marks

2) Prelim	050 Marks
3) Clinical Evaluation & Clinical Assignment:	500 Marks
i) Case study (two): (One Paediatric Medical & One paediatric surgical-50 marks each)	100 Marks
ii) Case presentation (one)	050 Marks
iii) Clinical evaluation of compressive nursing care- (One paediatric medical, One paediatric surgical & One NICU-100 Marks each)	300 Marks
iv) Health teaching	025 Marks
v) Assessment of growth and development (Preterm baby, Infant, Toddler, Preschooler, and schooler (Marks 20 each).	100 Marks
Total:	675 Marks
(675 Marks from Practicum to be converted into 50 Marks)	

External Assessment: 125 Marks
(University Exam)

Theory:	75 Marks
Practical:	50 Marks
Total:	125 Marks

MEDICAL –SURGICAL NURSING

Placement : Ist Year.

Allotted Theory: 90hrs.

Practical: 270hrs.

COURSE DESCRIPTION :

The purpose of this course is to widen the students' knowledge and develop proficiency in caring for patients with Medical Surgical problems. This course includes review of relevant anatomy & physiology, pathophysiology in Medical Surgical disorders & the nursing management of these conditions.

OBJECTIVES : At the end of the course, the F.Y.B.Sc. Nursing students will-

1. explain relevant Anatomy & Physiology of various systems of the body.
2. explain etiology, pathophysiology & manifestations of various disorders.
3. explain the actions, side-effects & nursing implications in administering drugs for various disorders.
4. discuss the recent advancement in the investigations, treatment & care of patients with Medical Surgical conditions.
5. develop skill in giving comprehensive nursing care to patients following the steps of nursing process.
6. assist the patients & their families in identifying & meeting their own health needs.
7. provide planned & incidental health education on various aspects related to disorder & relevant care.
8. appreciate the role of the nurse in the Medical Surgical health team.

COURSE CONTENTS :

UNIT I INTRODUCTION TO MEDICAL SURGICAL NURSING 4 hrs

- Introduction to medical surgical nursing.
- Review of concepts of comprehensive nursing care in medical surgical conditions.
- Nurse, patient & his/her family
- Functions of nurse in the outpatient department.
- Intensive care units. * Staff requirement. Client's needs & nsg. care.

UNIT II NURSING MANAGEMENT OF PATIENTS WITH SPECIFIC PROBLEMS 10 hrs

- Fluid & electrolyte imbalance.
- Dyspnoea, cough & respiratory obstruction.
- Fever & nursing care.
- Shock & nursing care.
- Unconsciousness & nursing care.
- Pain perception & nursing care.

- Chest injuries, resp. arrest & insufficiency
- Special respiratory therapies & drugs used in the management.

UNIT VI NURSING MANAGEMENT OF CLIENTS WITH GENITO-URINARY PROBLEMS. 05 hrs.

- Review of anatomy & physiology of the genito-urinary system & assessment of clients with genito-urinary problems.
- Pathophysiology & management of-
 - congenital disorders, urinary infections.
 - nephritis, renal calculi.
 - acute renal failure, chronic renal failure, end stage renal disease.
 - special procedures : dialysis, renal transplant.
 - benign prostatic hypertrophy.
 - drugs used in the management of these patients.

UNIT VII NURSING MANAGEMENT OF CLIENTS WITH PROBLEMS OF THE DIGESTIVE SYSTEMS 10 hrs.

- Review of anatomy & physiology of gastro-intestinal system & accessory organs& assessment of clients with gastro-intestinal tract disorders.
- Pathophysiology, diagnostic procedures & management of -
 - gastro-intestinal bleeding.
 - peptic ulcer.
 - acute abdomen.
 - infections, colitis, diarrhoea, dysentery & mal-absorption syndrome.
 - cholecystitis.
 - hepatitis, hepatic coma & cirrhosis of liver, portal hypertension.
 - pancreatitis.
 - tumours, hernias, fistulas, fissures, haemorrhoids.
 - drugs used in the management of these patients.

UNIT VIII NURSING MANAGEMENT OF PATIENTS WITH ENDOCRINE PROBLEMS. 5 hrs

- Review of anatomy & physiology & assessment of clients with endocrine disorders.
- Pathophysiology, diagnostic procedures & management of -
 - thyroid disorders.
 - diabetes mellitus, diabetes insipidus.
 - adrenal tumours, pituitary disorders.
 - drugs used, diagnostic procedures & nursing management of patient with above problems.

UNIT IX NURSING MANAGEMENT OF PATIENTS WITH MUSCULO-

SKELETAL PROBLEMS.**5 hrs.**

- Review of anatomy, physiology & assessment of patients with musculo-skeletal disorders.
- Osteomalacia, osteoporosis, osteomyelitis, bursitis.
- Fractures, dislocation & trauma.
- Prolapsed disc.
- Prosthesis & rehabilitation.
- Transplant & replacement surgeries.

UNIT X NURSING MANAGEMENT OF PATIENTS WITH DISORDERS OF FEMALE REPRODUCTIVE TRACT. 3 hrs.

- Disorders of menstruation & inf. of genital tract. *Benign & malignant tumours of genital tract & RVF & VVF. * Climacteric changes & associated problems.

UNIT XI NURSING MANAGEMENT OF PATIENTS WITH ONCOLOGICAL DISORDERS. 5 hrs.

- Types of neoplasms & related pathophysiology, diagnostic procedures, modalities of treatment & nurses' role.
- Special therapies : chemotherapy & radiotherapy & nsg. care.
- Preventive measures, other therapies.

UNIT XII NURSING MANAGEMENT OF PATIENTS WITH BURNS & RECONSTRUCTIVE SURGERIES. 3 hrs.

- Pathophysiology, assessment & nursing management of patients with burns.
- Nursing management of patients with reconstructive surgeries.

UNIT XIII NURSING MANAGEMENT OF PATIENTS WITH COMMUNICABLE DISEASES, STDS & HIV/AIDS. 5 hrs.

- Nursing management of patients with common communicable diseases & STDs.
- Nursing management of patients with immunological disorders including HIV/AIDS.

UNIT XIV NURSING MANAGEMENT OF PATIENTS WITH DISEASES OF EYE,EAR,NOSE,THROAT & SKIN. 5 hrs.

- Assessment & nursing management of patients with eye disorders.
(eye injuries, cataract, inf., blindness)
- Assessment & nursing management of patients with ear disorders (deafness).
- Assessment & nursing management of patients with nose & throat disorders. (DNS, tonsillitis).

- Assessment & nursing management of patients with skin disorders.
(fungal inf., herpes, psoriasis etc)

UNIT XV NURSING MANAGEMENT OF PATIENTS WITH BLOOD DISORDERS. 5 hrs.

- Review of anatomy & physiology of blood & blood products.
- Pathophysiology, diagnostic procedures & management of blood disorders.
 - anaemia, leukaemia.
 - bleeding disorders, haemophilia, purpura etc.
 - blood transfusion, safety checks, procedure & requirements, management of adverse transfusion reaction, records for blood transfusion.
 - management & counseling of blood donors, phlebotomy procedure, & post-donation management.
 - blood bank functioning & hospital transfusion committee. Biosafety & waste management in relation to blood transfusion.

UNIT XVI NURSING IN EMERGENCIES. 3 hrs.

- Cardiac emergencies. (included in unit iv)
- Trauma.
- poisoning.
- crisis mgt :thyroid, hypertensive, & adrenal crisis included in unit viii & iv.

PRACTILUM/CLINICAL EXPERIENC S :

Total hrs. 270.

1. Medical unit	hrs.25.
2. Surgical Uni	hrs.25.
3. Cardiology Unit	hrs.30.
4. Neurology Unit	hrs.30.
5. Intensive care Unit	hrs.35.
6. Critical care Unit	hrs.35.
7. Burns Unit	hrs.15.
8. Orthopaedic Unit	hrs.15.
9. Ophthalmic Unit	hrs.10.
10. Ear, Nose Throat Unit	hrs.10.
11. Artificial Kidney Dylasis	hrs.15.
12. Onchology Unit	hrs.10.
13. Skin ward	hrs.10
14. General OPD	hrs.05.

EVALUATION :

Paper	Subject Medical & Surgical Nursing	Duration	Internal Assessment	External Assessment	Total Marks
8.	Theory	3	25	75	100
3.	Practicals		50	50	100

Internal Assessment:

Theory:	25 Marks
Practical:	50 Marks
Total:	75 Marks

Details as follows:

Internal Assessment (Theory): 25 Marks

(Out of 25 Marks to be send to the University)

Mid-Term: 50 Marks

Prelim: 75 Marks

Total: 125 Mark

(125 Marks from mid-term & prelim (Theory) to be converted into 25 Marks)

Internal Assessment (Practical): 50 Marks

(Out of 50 Marks to be send to the University)

Practical Exam

Mid-Term Exam 050 Marks

Prelim 050 Marks

3) Clinical Evaluation & Clinical Assignment: 600 Marks

1. Case Study (Two) (50 Marks Each) 100 Marks

(One Medical & One Surgical Nursing)

2. Case Presentation (Two) (50 Marks Each) 100 Marks

(any specialty i.e., ENT/Ophthalmology/Skin/Burns.)

3. Nursing care plans (25 marks each) 100 Marks

i.e., Neurology/Orthopedic/Cardiology/Onchology.

4. Clinical Evaluation Comprehensive Nursing Care-300 Marks

(100 marks each) i.e., medical Nursing, Surgical Nursing,

Critical Care Units

Total: 700 Marks

(700 Marks from practical to be converted into 50 Marks)

External Assessment: 125 Marks (University Examination)

Theory : 75 Marks

Practical: 50 Marks

ENGLISH

Placement: Ist Year

Time Allotted: Theory – 60 Hrs

COURSE DESCRIPTION :

This course is designed to help the student understand and usage of English language required for their professional work.

OBJECTIVES : After the course the students will develop

1. Ability to speak and write grammatically correct English
2. Effective skill in reading and understanding the English language
3. Skill in reporting

COURSE CONTENTS :

UNIT I

15 hrs.

- Remedial study of Grammer
- Review of grammer, vocabulary and effective use of dictionary
- Prepare task oriented seminars
- Symposia and panel discussion

UNIT II

10 hrs.

- The ability to understand selected passage and express meaning in one's own words.
- Reading and comprehension of the prescribed books

UNIT III

20 hrs.

- The study of various forms of composition
- Note taking
- Diary
- Nurses notes, anecdotal records
- Writing of summary
- Nurses reports on health problems

The students will submit one sample of each item from her own practical experience.

UNIT IV

15 hrs.

- Verbal communication
- Oral reports
- Summarization of discussion
- Debate
- Listening comprehension – Film, Cassette and Radio

PRACTICUM :

- The clinical experience in the wards and bed side nursing will provide opportunity for students to fulfill the objectives of learning language.
- Assignment on writing and conversation through participation in discussion, debates, seminars and symposia. The students will gain further skills in task oriented communication.

EVALUATION :

Paper	Subject * English (Qualifying)	Duration	Internal Assessment	External Assessment	Total Marks
9.	Theory	--	100 College level qualifying exam, minimum passing Marks 33%.		100

*** College level qualifying exam to appear in University Examination, minimum passing Marks 33%.**

Internal Assessment: 100 Marks

(Out of 100 Marks to be send to the University along with Internal Assessment Marks of other subjects for inclusion in the Mark Sheet.)

Mid-Term:	50 Marks
Prelim:	50 Marks
Total:	100 Mark

IInd YEAR

POST BASIC B.Sc NURSING

SYLLABUS

SOCIOLOGY

Placement: IInd Year

Time Allotted: Theory : 60 Hrs

COURSE DESCRIPTION :

This course is to reorient students to sociology related to community of social institutions in India and its relationship with health, illness and nursing.

OBJECTIVES : At the end of the course, the student will

- describe sociological concepts applicable to nursing
- determine role of sociology in nursing as related to social institutes in India.
- Develop positive attitudes towards individual family and community.

COURSE CONTENTS :

UNIT I	INTRODUCTION OF SOCIOLOGY TO NURSING	5 hrs
	<ul style="list-style-type: none">- Behavioural sciences, social sciences, arts and sciences-meaning , fields and scope, their relationship with nursing- Concepts of social development and indicators of health, role of nurse as a social scientist and change agent in health for all.- Development of medical sociology – meaning, fields, scope, sociology and nursing methodology of sociology, sociology as science.- Meaning, definition, scope and significance of sociology, contribution of August Comte, Durkheim, Max Weber, Maciver to the development of sociology. COMMUNITY HEALTH NURSING

Placement : IInd year

Time Allotted Theory : 60 Hrs.

Practical : 240 Hrs.

COURSE DESCRIPTION:

The course enables the students to acquire knowledge and understanding of the changing concepts of comprehensive community health nursing practice, the national health care delivery system and to participate in the delivery of community health nursing practice.

This course also broadens the understanding in public health nursing administration, responsibility of nurse for early case finding, health assessment and health education based on principles of primary health care, Nursing process approach and comprehensive nursing care to the individual, family and community.

OBJECTIVES : At the end of the course the student will

- 1) Explain the concept of various factors contributing the health of individual family and community.
- 2) Explain and analyze health need of individual family and community based on factors contributing to health and illness
- 3) Describe national health care delivery system.
- 4) Describes epidemiological methods and principles of prevention and control of illness in the community.
- 5) Study implementation of national programmes and role of CHN in prevention and control of diseases.
- 6) Identify the role of personnel working in the community health setup and appreciate the integrated approach to community health.
- 7) Plan the work of community health nurse and supervise the health workers.
- 8) Study concept of public health administration and role of nurse as manager and supervisor.

COURSE CONTENT :

UNIT I	COMMUNITY HEALTH AND COMMUNITY HEALTH NURSING	8 hrs.
-	Changing concepts of health	
-	Determinants of health	
-	Introduction to community health & CH Nursing	
-	Principles of working in a community.	
-	Primary health care - concepts and principles.	
-	Role of nurse in promoting primary health care.	
-	Health for all - concepts strategy for HFA.	
-	Community health assessment and diagnosis.	
UNIT II	FAMILY HEALTH CARE & SERVICES	10 hrs.
-	Concepts, Objectives scope & Principles of family health services.	
-	Family as a unit of community health service.	
-	Factors influencing family health and high-risk families.	
-	Family Health assessment, Health risk families.	

- Principles and technique of home visits.
- Nursing process in family & community health care. Establishing working relationship with the family.
- Working with families in relation to prevention of disease and promotion of health.
- Care of Sick, & care of physically handicapped and mentally retarded at home
- Family health records.

UNIT III HEALTH ADMINISTRATION IN INDIA. 10 hrs.

- Health care delivery system in India.
- Health planning, National health policy and Five Years plan
- Organization and administration of health services at central, state, district level and Rural Health Services (Panchayati Raj).
- Monitoring and evaluation and health services
- System of medicines.
- Centrally sponsored health schemes.
- Role of voluntary health organization & International Health agencies.
- Health team concept, Public health legislation.
- Community Health Nursing Administration.
- Role of health personnel in community health Practice.
- Training Programmes for various health workers.
- Management and supervision in community health nursing practice.

UNIT IV HEALTH EDUCATION (IEC Information, Education, Communication) 5 hrs.

- Aims, concepts and scope of health education.
- Communication and health education.
- Methods and media for health education in community.
- Planning for health education and role of nurse in I.E.C.
- Central Health Education Bureau.

UNIT V ROLE OF NURSE IN NATIONAL HEALTH PROGRAMMES. 15 hrs.

- Development of community health services in India.
- Major health problem in India.
- National health programme for communicable and Non-communicable disease.
- Maternal and child health programme.
- Nutritional programme.
- Family welfare
- School health Programme.
- Occupational Health Programme.
- Disaster Management.
- As a health team members.
- Records and reports in Community health.

UNIT VI EPIDEMIOLOGY. 7 hrs.

- Epidemiology - Definition, Concepts, aims, objectives and methods and Principles.
- Epidemiology - Theories and Models.
- Application of Epidemiological Principles in community health.
- Monitoring and surveillance.
- Levels of prevention of disease

UNIT VII BIO STATISTICS AND VITAL STATISTICS.**5 hrs.**

- Introduction, definition and scope, legislation.
- Report, recording and compiling of vital statistics at the local State, National and International level.
- Definitions and methods of computing vital statistics.
- Methods of presenting data.
- Management Information System.

PRACTICUM

- Each students will prepare to community profile
- The students will be allotted families to give comprehensive nursing care through nursing process approach in Urban / Rural area.
- The students will participate in activities of Primary Health Center, Sub Centre, Community Health Centres, MCH Centre etc.
- Visit to the selected Health and Welfare agencies.
- To plan and conduct Health Education Programmes – individual/ groups/ community/Mass Health Education and Health Exhibition, to prepare simple A.V. AIDS.
- To supervise students and other health workers in the community settings.
- Students will be posted atleast 2 weeks for rural community health experience.
- To conduct simple family health survey analyze the data collected (Community dignosis)
- To write two family health care studies in urban and rural area. (One in each)

CLINICAL EXPERIENCE :**TOTAL HOURS : 240**

I)	<u>Urban Public Health Experience</u>	hours 160
	- Family oriented Health care	hours 40
	- Community Assessment / Community dignosis (Family Health Survey)	hours 30
	- School Health Programme	hours 20
	- Health Education	hours 20
	- Urban Public Health Centres (Various Clinics)	hours 30
	- Educational Visits	hours 30
II)	<u>Rural Public Health Experience</u>	hours 80 (2 weeks)
	1. Participation in Primary Health Care PHC, SC, R.H., etc.	hours 30
	2. Family oriented Health care	hours 10
	3. Public Health Administration	hours10
	4. Visits to various Health agencies (Zilha Parishad, D.T.C. District Training Centre, Community Health Centre)	hours 20
	5. Health Education Programme	hours 10

MENTAL HEALTH NURSING

Placement: IInd Year

Time Allotted Theory : 60 hrs.

Practical : 240 hrs.

COURSE DESCRIPTION

This course enables the students to recognize and appreciate the causes, symptoms and process of abnormal human behavior.

It also introduces the student to the present day treatment modalities in the light of psychological, social and cultural factors affecting human behavior.

This course helps the student to learn principles of mental health and psychiatric nursing and to develop skills in the management of the mentally ill in hospital and community.

OBJECTIVES : At the end of course, the student will

1. Identify and describe the philosophy and principles of mental health nursing.
2. Describe the historical development of mental health and psychiatric nursing.
3. Classify mental disorders.
4. Develop skills in history taking and performing mental status examination.
5. Describe etiological factors, psycho-pathology, clinical features, diagnostic criteria and treatment methods used for mental disorders.
6. Manage the patients with various mental disorders.
7. Communicate therapeutically with patients and their families.
8. Identify role of the nurse in preventive psychiatry.
9. Identify the legal aspects in practice of mental health and psychiatric nursing.

COURSE CONTENTS

UNIT-I	INTRODUCTION AND HISTORICAL DEVELOPMENT	5hrs.
-	Review of the concept of mental health and illness & mental mechanisms.	
-	History of psychiatry	
-	Historical development of mental health nursing.	
-	Philosophy, principles of mental health and psychiatric nursing.	
-	Theoretical approaches to Psychiatric Nursing.	
-	Concept of normal and abnormal behavior.	
-	Role and qualities of mental health and psychiatric nurse	
-	Mental health team and functions of team members.	
-	Legal aspects in psychiatry and mental health services.	
UNIT II	CLASSIFICATION AND ASSESSMENT OF MENTAL DISORDERS	5 hrs.
-	Terminologies used in Psychiatry	
-	Classification of mental disorders- ICD-10 classification	
-	Etiological factors and psychopathology of mental disorders	
-	History taking and mental status examination.	
UNIT III	THERAPEUTIC COMMUNICATION	4 hrs.
-	Communication process	
-	Interview skill	
-	Therapeutic communication techniques.	
-	Nurse patient Relationship.	
-	Therapeutic impasse and it's management	
-	process recording.	

UNIT IV	MANAGEMENT OF MENTAL DISORDERS	20 hrs.
-	Etiological factors, psychopathology, types, clinical features diagnostic criteria, treatment and nursing management of patient with following disorders.	
-	<u>Neurotic Disorders:</u>	
	- Anxiety disorders - General & Panic	
	- Depressive Neurosis	
	- Obsessive Compulsive Neurosis.	
	- Phobic Neurosis	
	- Hypochondriacal Neurosis.	
	- Stress related and Somatoform disorders	
	- Hysteric disorder.	
-	<u>Psychotic Disorders:</u>	
	- Schizophrenic disorders	
	- Affective disorders	
-	Organic Brain Syndromes – acute & chronic	
-	Epileptic disorders	
-	Sleep disorders	
-	Psychosomatic disorders	
-	Personality disorders	
-	Sexual Disorders	
-	Disorders of childhood:- Specific developmental disorders, Pervasive developmental disorders, Attention deficit disorders , Conduct disorders, Enuresis & Encopresis, Speech Disorders, Habit disorders, other disorders.	
-	Adolescent disorders –Attention deficit hyper activity disorder, conduct disorder, substance abuse, depression and suicide, eating disorders, running away.	
UNIT V	MANAGEMENT OF PATIENT WITH SUBSTANCE USE DISORDERS	3 hrs
-	Substance use and misuse	
-	Dependence, intoxication and withdrawal	
	- Classification of psychoactive substances	
	- Etiological & contributory factors	
	- Psychopathology	
	- Clinical features	
	- Diagnostic criteria	
-	Treatment and nursing management of patient with substance use disorders.	
-	Preventive and rehabilitative aspects in substance abuse.	
UNIT-VI	MANAGEMENT OF MENTAL SUB-NORMALITY / MENTALLY CHALLENGED-	2hrs
-	Classification of mental sub-normality	
-	Etiological factors	
-	Psychopathology	
-	Psychometric assessment	
-	Diagnostic criteria and management of sub-normality	
UNIT VII	PSYCHIATRIC EMERGENCIES	4 hrs.
-	Types of emergencies	
-	Psychopathology, Clinical feature, Assessment and diagnosis, Treatment and nursing management of patient with psychiatric emergencies such as-	
-	Suicide, Stupor & Catatonic syndrome, Aggression, other psychiatric emergencies	
-	Crisis Intervention therapy	
UNIT VIII	THERAPEUTIC MODALITIES-	12 hrs.
-	Principles, indication, contraindications and role of nurse in various treatment	

method:

- Pharmacotherapy
- Therapeutic community and Milieu therapy
- Psychotherapy- psychoanalysis, Behavior therapy, Cognitive Therapy, Supportive Therapy, Hypnosis, Abreaction, Relaxation Therapies, Biofeedback.
- Group therapy
- Family therapy
- Occupational Therapy
- Electro convulsive therapy
- Other miscellaneous therapies.

UNIT IX PREVENTIVE PSYCHIATRY- 5 hrs.

- Model of prevention
- Role of nurse in preventive psychiatry
- Psychiatric social worker
- Community mental health nursing
- Community mental health Services and agencies
- National mental health programme

PRACTICUM

The student will be provided opportunity to:

- Observe, record and report the behavior of their selected patients.
- Record the process of interaction.
- Assess the nursing needs of their selected patients. Plan and implement the nursing intervention.
- Counsel the attendant and family members of patient.
- Participate in the activities of psychiatric team
- Conduct an awareness programme on preventive Psychiatry
- Write observation reports after a field visit to the following places:
 - Child guidance clinic
 - School/special School (for mentally subnormal)
 - Mental Hospital
 - Community mental health center
 - De-addiction center.

CLINICAL EXPERIENCES Total Hours. : 240 hrs

- | | |
|---|------------------|
| 1. Psychiatric ward male & female | hours 120 |
| 2. Psychiatric OPD | hours 30 |
| 3. De-addiction center | hours 30 |
| 4. Various departments
(ECT, CGC, Occupational Therapy, Behavioral Therapy, Psychotherapy) | hours 25 |
| 5. Visit to Mental Hospital | hours 10 |
| 6. Community Mental Health (Visit to Rehabilitation centers) | hours 25 |

INTRODUCTION TO NURSING EDUCATION

Placement– IIInd Year

Time allotted Theory : 60 hrs

Practical : 75 hrs

COURSE DESCRIPTION :-

This course introduces the students to Principles and concepts of Education, curriculum development and methods and media of teaching. It also describes the step the steps in curriculum development and implementation of educational programme in Nursing.

OBEJCTIVES: At the end of the course, the students will

1. Describe the philosophy and principles of education
2. Describe the process of a nursing curriculum development
3. Explain the teaching learning process
4. Develop the ability to teach, using various methods and media
5. Describe the process of assessment
6. Describe the administrative aspects of school of nursing, College of Nursing
7. Develop basic skills in counseling and guidance
8. Participate in planning and organizing an in-service education programme

COURSE CONTENTS

UNIT I	INTRODUCTION TO EDUCATION	5 hrs.
	<ul style="list-style-type: none">- Meaning, aims, function and principles- Philosophy of education- Factors influencing development of philosophy of Nursing education- Nursing profession –Definition, concept, importance and characteristics of nursing profession- Development of nursing education in India before and after independence- Nursing education programmes in India – Basic, Post Certificate, Degree, post graduation and Ph. D.- High power committee recommendations for nursing education- Qualities, role and responsibilities of a nursing teacher	
UNIT II	NURSING CURRICULUM DEVELOPMENT	8 hrs.
	<ul style="list-style-type: none">- Organization of Nursing Curriculum- Development of Nursing Curriculum.- Curriculum types- Curriculum Committee- Curriculum planning- Formulating philosophy and objectives.- Selecting learning experiences and clinical components of nursing education.- Evaluation of curriculum.	
UNIT III	TEACHING LEARNING PROCESS	5 hrs.
	<ul style="list-style-type: none">- Meaning of education, aims, functions and- principles of teaching	

- Objective structured clinical examination.
- Assessment of attitudes
- Setting of question paper
- Scoring of Answer paper
- Reforms in nursing Educational system

UNIT VII MANAGEMENT OF SCHOOL OF NURSING 8 hrs

- Planning and organizing of school of Nursing
- Recruitment of teaching staff
- Budget facilities for the school
- Students selection and admission procedure
- Administrative planning for students
- Welfare service for students
- Maintainance of school Records
- Preparation of annual reports
- INC guidelines for school of nursing

UNIT VIII GUIDANCE AND COUNSELLING 5 hrs

- Definition and basic principles
- Organization of guidance & counseling
- Counseling process
- Managing disciplinary problems
- Management of crisis

UNIT IX IN SERVICE EDUCATION 5 hrs

- Introduction to nature and scope of in-service education programmes
- Principles of adult learning
- Planning for in-service programme
- Techniques and methods of staff education programme
- Evaluation of in-service programme

PRACTICUM

1. Practice Teaching : 5
 Theory Teaching : 3
 Clinical Teaching : 2
2. Visits to Nursing colleges and schools
3. To prepare different types of teaching Aids.
4. To prepare rotation plans
5. Study various Nursing Programme syllabus
6. To plan, organize and conduct 'one' service education programme

CLINICAL EXPERIENCES Total Hours. : 75 hrs

- | | |
|--|-----------------|
| - Practice Teaching (Theory + Practical) | hours 20 |
| - Prepare Teaching Aids | hours 10 |
| - Attending peer group Teaching | hours 05 |
| - Preparing rotation plan | hours 05 |
| - Study various Nursing Programme | hours 10 |
| - Plan inservice education Programme | hours 05 |
| - Visiting Nursing Schools and Colleges | hours 20 |

INTRODUCTION TO NURSING SERVICE ADMINISTRATION

Placement : IInd Year

Time Allotted : Theory : 60 hours

Practical : 180 hours

COURSE DESCRIPTION :

This course is designated to give an opportunity to the students to gain an understanding of the principles of administration and its application to nursing service. It is also intended to assist the students to develop an understanding of the need for professional leadership.

OBJECTIVES : At the end of the course , the student will enable the students to:-

- 1 Identify the Principles of administration.
- 2 Describe the Principles and techniques of supervision.
- 3 Explain the Principles and Methods of personnel management.
- 4 Explain the principles of Budgeting.
- 5 Organize and manage a Nursing Unit effectively.
- 6 Identify dynamics of Organizational behavior, styles and functions of effective leadership.

COURSE CONTENTS

UNIT I PRINCIPLE AND PRACTICE OF ADMINISTRATION 10 hrs.

- Significance, elements and Principles of Administration.
 - Planning
 - Organization
 - Staffing
 - Directing
 - Controlling
 - Coordinating
 - Reporting
 - Budgeting
- Administration and Organization of Hospital.
 - Definition, Aims, Functions & roles of the hospital
 - Classifications of Hospitals Health Team
 - Ethical and legal aspects of hospital administration
 - Policies of Hospital, different departments with special emphasis to the department of nursing office management
 - Nursing management
 - Responsibilities of nursing personnel , specially of ward sister,
 - Medico –legal aspects
 - Concept of cost effectiveness

UNIT II NURSING UNIT MANAGEMENT 10 hrs.

- Physical Lay out of a Nursing Unit
 - Necessary facilities
 - Factors affecting the quality of nursing care
 - Maintenance of a therapeutic environment
 - Administration of the nursing unit
 - Management of patient care
 - Maintenance of the Physical environment

- Delivery of patient care
- Assignment of duties and time plan
- Patient assignment
- Discharge Planning
- Safety measures, prevention of accidents and infections
- Maintenance of patients records and reports, legal responsibilities
- Maintenance of quality nursing care
- Nursing audit

UNIT III PERSONNEL MANAGEMENT 10 hrs.

- Significance of Personnel management Staff recruitment and selection process appointment, promotions, transfers, remunerations, retraining, terminating
 - personnel policies
 - Job specifications
 - Job description
 - Job Analysis
 - Staffing the unit
 - Staffing Philosophy
 - Staffing norms
 - Staffing Modules
 - Patient Classification System
 - Rotation plan
 - Leave planning
- Performance appraisal
 - Purposes of performance appraisal
 - Developing and using standards
 - Training
 - Feedback
- Career Counseling
- Staff welfare activities
- Management of Disciplinary problems
- Human resource development
- Health team approach
- Collective Bargaining, Conflicts and its solutions.

UNIT IV SUPERVISION 9 hrs.

- Definition, nature, need Philosophy and objectives of supervision
 - Principles of supervision
 - Tools and techniques of supervision
 - Staff Development
 - Orientation program
 - In service education
 - Continuing Education
 - Skill training
 - Assertiveness Training for assertiveness
 - Public speaking skills
 - Leadership development
 - Problem solving process
 - Evaluation
 - Nursing audit

UNIT V MATERIAL MANAGEMENT 9 hrs.

- Material management – concept, need
 - Principles of Material management
 - Quality control
 - Inventory
 - Care of equipments Stock keeping
 - Role of Nursing personnel in Material management

UNIT VI FINANCIAL MANAGEMENT 3 hrs.

- Budgeting - Nature and purposes of Budgeting
 - Types of Budget
 - Principles of Budgeting
 - Financial Audits

UNIT VII ORGANIZATIONAL BEHAVIOR 9 hrs.

- Organizational behavior
 - Group dynamics
 - Human relations
 - Morale Building
 - Organization Communication
 - Hospital Information system
 - Public relations in Hospitals
 - Leadership –Concepts, Manager behavior, Leader behavior Leadership – defined, Leadership Theories – Behavioral, Situational
 - Leadership styles and functions,
 - Transformational leadership
 - Qualities of a leader
 - Methods of reporting
 - Maintaining records and reports

PRACTICUM

- Observe the functioning of Nursing administration at various levels i.e., Institutions, departments and units.
- Each student will practice ward management under supervision
- Student will prepare rotation plan of the staff duties, write reports, give verbal reports of the ward and assist in the maintaining the inventory of the nursing unit
- Develop an Assessment tool for performance appraisal
- Visit Private and Government Hospital and write observation reports
- Student will present one seminar during administration experience.

Note : visits for Nursing administration and Nursing Education may be planned together.

CLINICAL EXPERIENCES Total Hours. : 180 hrs

- Ward Management **hours 90**
- ICU Management **hours 30**
- OPD / Departments **hours 30**
- Visits to hospitals and other agencies **hours 30**
(ie. Govt, Pvt or corporation and any other)

EVALUATION:

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
14.	Introduction to Nursing Service Administration Theory	3	25	75	100

Internal Assessment:

Theory:	15 Marks
Clinical Assignment:	10 Marks
Total:	25 Marks

Details as follows:

Internal Assessment (Theory): 15 Marks

(Out of 15 Marks to be send to the University)

Mid-Term:	50 Marks
Prelim:	75 Marks
Total:	125 Mark

(125 Marks from mid-term & prelim (Theory) to be converted into 15 Marks)

Clinical Assignment: 10 Marks

Practicum: Posting of ward management: 100 Marks

(100 Marks from Clinical Assignment to be converted into 10 Marks)

External Assessment (Theory): 75 Marks

(University Examination)

INTRODUCTION TO NURSING RESEARCH STATISTICS

Placement : II nd Year

Time Allotted Theory : 45 hrs.

Practical : 120 hrs.

COURSE DESCRIPTION

This course is designed to assist the student to develop an understanding of the basic concepts principles of research and scientific inquiry including the identification of problem and steps in research methodology. This course also introduces the basic concepts, and principles of Statistical methods, the use of computers in conducting research project in groups and use the finding in nursing practice.

OBJECTIVES : At the end of course student will

- 1) Define the terms and concepts of nursing research.
- 2) Identify needs and scope of nursing research.
- 3) Be able to define research problems.
- 4) Locate and list sources of literature review including operational definition and conceptual framework.
- 5) Describe different approaches and research designs in nursing research.
- 6) Describe sample and sampling technique with special reference to survey method.
- 7) Develop tool for data collection.
- 8) Able to conduct pilot study to confirm reliability and validity of tool before data collection.
- 9) To enumerate steps of data analysis and present data summary in tabular form.
- 10) Use descriptive and co-relational statistics in data analysis.
- 11) Conduct group project and write report.
- 12) Use computer for research project.

COURSE CONTENT

SECTION : A

INTRODUCTION TO RESEARCH METHODOLOGY

UNIT I	INTRODUCTION	2 hrs.
	<ul style="list-style-type: none">- Research definition- Method of acquiring knowledge- Problem solving and scientific method- Research characteristics, purpose, scope- Steps in Research methodology.	
UNIT II	RESEARCH AND NURSING	4 hrs.
	<ul style="list-style-type: none">- Development of research in nursing- Purpose, scope and need of nursing research- Areas of nursing research i.e. practice, service, administration and education, health and social research- Ethics in research	
UNIT III	RESEARCH DESIGN	3 hrs.
	<ul style="list-style-type: none">- Overview of research process- Statement of the problem and research objectives- Definitions of terms variables, assumptions, operational definition, limitation, delimitation, hypothesis-definitions, formulation and types	

UNIT IV	REVIEW OF LITERATURE	2 hrs.
	<ul style="list-style-type: none"> - Search for library resources - Criteria for selection of resources - Practical application of review of literature 	
UNIT V	RESEARCH APPROACHES (CLASSIFICATION & TYPES)	4 hrs.
	<ul style="list-style-type: none"> - Non experimental - Survey - characteristics, types, advantages and disadvantages - Historical - sources of data, characteristics, advantages and disadvantages - Experimental - characteristics, types, advantages and disadvantages 	
UNIT VI	SAMPLE & SAMPLING TECHNIQUE	2 hrs.
	<ul style="list-style-type: none"> - Definition of population and sample - Sampling and randomness; kinds and size of samples - Probability and non probability sample 	
UNIT VII	METHODS OF COLLETING DATA	7 hrs.
	<ul style="list-style-type: none"> - Preparation of tools - Types of instruments for data collection <ul style="list-style-type: none"> - a) Questionnaire : Opinionnaire, Interview schedule - b) Observation : records, observation checklist, rating scales. <ul style="list-style-type: none"> - Machineries, video tapes, films, closed circuit T.V. etc. - c) Measurements : Physiological measurement, Physical, Chemical, Microbiological etc., Psychological measurement Psychomotor skill test, personality test, Intelligence test, Sociological test, Socio economic standard scale, Sociometry, Health status measurement - Characteristics of good research tool - Testing reliability and validity of tool 	
UNIT VIII	IMPLEMENTING RESEARCH PLAN	2 hrs.
	<ul style="list-style-type: none"> - Data collection procedure and conditions for administration of tool 	
UNIT IX	DATA ANALYSIS AND INTERPRETING	2 hrs.
	<ul style="list-style-type: none"> - Types of data, data organization, tabulation, analysis and summarization - Structure of statistical methods : interpretation and presentation of data 	
UNIT X	COMMUNICATION OF RESEARCH FINDING	2 hrs.
	<ul style="list-style-type: none"> - Writing research report - composition, organization and format - Application of results; critical analysis of research report and public 	

SECTION : B INTRODUCTION TO STATISTIC**UNIT XI DESCRIPTIVE STATISTIC 8 hrs.**

- Frequency distribution - types of measure - frequencies, class, interval, graphic methods of describing frequency
- Measures of central tendency - Mode, Median and Mean
- Measures of variability : range, Standard deviation
- Introduction to normal probability
- Correlation
- Computation by rank difference methods
- Uses of correlation co-efficient

UNIT XII BIOSTATISTIC 2 hrs.

- Crude rates and standardized rates, ratio and estimation of the trends.

UNIT XIII INTRODUCTION TO COMUTERS IN NURSING 5 hrs.

- Basics of hardware and software
- Windows application Word, Excel and Power Point
- Introduction to Database

Five hours of computer training may be given to students to impart computer literacy and knowledge in basic computer operation.

PRACTICUM Total Hrs. 120

- Selecting and conducting small group research project (The number of students in a group can be decided depending on the availability of Nursing faculty and interest of the students)
- Group studies may include, studying existing health problem and practices, Nursing procedures, Health records, patients records and survey of Nursing literature.

EVALUATION:

Paper	Subject	Duration	Internal Assessment	External Assessment	Total Marks
	** Introduction to Nursing Research Statistics				
15.	**Theory	2	50	College level qualifying exam, minimum passing Marks 50%	050
6.	**Research Project		50	College level qualifying exam, minimum passing Marks 50%	050

Note: **** College level qualifying exam to appear in University Examination, minimum passing Marks 50%. (Not University Examination)**

Internal Assessment: 100 Marks

(Out of 100 Marks to be send to the University) Theory - Mid-Term: 25 Marks
Theory – Prelim: 25 Marks
Practical – Research Project: 50 Mark

Philosophy

National Health Policy(NHP) 2002 emphasizes the need to prepare nurses to function in super-speciality areas who are required in tertiary care institutions, entrusting some limited public health functions to nurses after providing adequate training, and increase the ratio of degree holding vis a vis diploma holding nurses.

It is observed that there is an acute shortage of nursing faculty in under graduate and post graduate nursing programme in India Indian Nursing Council believes that:

Post Graduate programme is essential to prepare nurses to improve the quality of nursing education and practice in India.

Post graduate programme in nursing builds upon and extends competence acquired at the graduate levels, emphasizes application of relevant theories in to nursing practice, education, administration and development of research skills.

The programme prepares nurses for leadership position in nursing and health fields who can function as nurse specialists, consultants, educators, administrators and researchers in a wide variety of professional settings in meeting the National priorities and the changing needs of the society.

This programme provides the basis for the post masteral programme in nursing. Further the programme encourages accountability and commitment to life long learning which fosters improvement of quality care.

Aim

The aim of the postgraduate program in nursing is to prepare graduates to assume responsibilities as nurse specialists, consultants, educators, administrators in a wide variety of professional settings

Objectives

On Completion of the two year M.Sc Nursing programme, the graduate will be able to:-

1. Utilize/apply the concepts, theories and principles of nursing science
2. Demonstrate advance competence in practice of nursing
3. Practice as a nurse specialist.
4. Demonstrate leadership qualities and function effectively as

- nurse educator and manager.
5. Demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.
 6. Demonstrate the ability to plan and effect change in nursing practice and in the health care delivery system.
 7. Establish collaborative relationship with members of other disciplines
 8. Demonstrate interest in continued learning for personal and professional advancement.

Guidelines and Minimum Requirements for setting up of a College of Nursing

1. Any organization under the Central Government, State Government, Local body or a Private or Public Trust, Mission, Voluntary registered under Society Registration Act or a Company registered under company's act wishes to open a M.Sc. Nursing programme, should obtain the No Objection/Essentiality certificate from the State Government.
2. The Indian Nursing council on receipt of the proposal from the Institution to start nursing program, will undertake the **first inspection** to assess suitability with regard to physical infrastructure, clinical facility and teaching faculty in order to give permission to start the programme.
3. After the receipt of the permission to start the nursing programme from Indian Nursing Council, the institution shall obtain the approval from the State Nursing Council and University
4. Institution will admit the students only after taking approval of State Nursing Council and University.
5. The Indian Nursing Council will conduct inspection every year till the first batch completes the programme. Permission will be given year by year till the first batch completes
6. If the institution is recognized for B.Sc. (N) programme and if one batch has passed out after found suitable by INC, then the institution will be exempted from NOC/Essentiality certificate for M.Sc.(N) programme from the State Government.
7. **Super Speciality Hospital*** can start M.Sc.(N) programme, however they have to get NOC/Essentiality certificate from

respective State Government to start the M.Sc. (N) programme.
*Super Speciality Hospital are eligible to start M.Sc.(N) provided they have respective speciality beds

Cardio thoracic beds

□ 50-100 bedded Cardiac Hospital, which has CCU, ICCU and ICU units with own thoracic unit or affiliated thoracic unit.

Critical Care beds

□ 250-500 bedded Hospital, which has a 8-10 beds critical care beds & ICUs

OBG speciality beds

50 bedded parent hospital having:

- i. Mother and neonatal units
- ii. Case load of minimum 500 deliveries per year
- iii. 8-10 level II neonatal beds.
- iv. Affiliation with level III neonatal beds

Neuro speciality beds

□ Minimum of 50 bedded Neuro care institution with advanced diagnostic, therapeutic and state of the art clinical facilities

Oncology speciality beds

□ Regional Cancer centers/Cancer Hospitals having minimum 100 beds,with medical and surgical oncology units with chemotherapy, radiotherapy, palliative care, other diagnostic and supportive facilities.

Orthopaedic Speciality beds

□ 250-500 bedded Hospital, which has a 50 orthopaedic beds & rehabilitation units.

Psychiatric beds

□ Minimum of 50 bedded institutes of psychiatry and mental health having all types of patients (acute, chronic, adult psychiatric beds, child psychiatric beds and de-addiction facilities) , with advanced diagnostic, therapeutic and state of the art clinical facilities.

Paediatrics beds

□ 50-100 bedded paediatric Hospital/ unit with paediatric surgery and level II or III neonatal units

Gastroentrolgy beds

□ 50-100 bedded gastroentrolgy beds

Nephro-Urology speciality beds

□ 50-100 bedded nephro urology hospital with dialysis and kidney transplants, urosurgery

STAFFING PATTERN:

M.Sc. (N)

If parent hospital is super-speciality hospital like cardio-thoracic hospital/cancer with annual intake 10 M.Sc(N) in cardio thoracic/cancer

Professor cum coordinator 1

Reader / Associate Professor 1

Lecturer 2

The above faculty shall perform dual role

B.Sc.(N) and M.Sc.(N)

Annual intake of 60 students in B.Sc.(N) and 25 students for M.Sc.(N)programme

Professor-cum-Principal 1

Professor-cum-Vice Principal 1

Reader / Associate Professor 5

Lecturer 8

Tutor / Clinical Instructor 19

Total

34

One in each specialty and all the M.Sc(N) qualified teaching faculty will participate in all collegiate programmes.

Teacher Student Ratio = 1 : 10 for M.Sc.(N) programme.

QUALIFICATIONS & EXPERIENCE OF TEACHERS OF COLLEGE OF NURSING

Sr. No.	Post	Qualification & Experience
1	Professor-cum-Principal	- Masters Degree in Nursing - 14 years experience after M.Sc.(N)in College ofNursing - 3 years experience in administration (Years of experience is relaxable if suitable candidate is not available) (If a candidate is not available, minimum 5 years of experience in college of nursing, with an aggregate

of 14 years teaching perience)

Desirable : Independent published work of high standard / doctorate degree / M.Phil.

2 Professor-cum-Vice Principal

- Masters Degree in Nursing
- 14 years experience after M.Sc. N. in College of Nursing
- 3 years experience in administration (Years of experience is relaxable if suitable candidate is notavailable) (If a candidate is not available, minimum 5 years of experience in college of nursing, with an aggregate of 14 years teaching experience)

Desirable : Independent published work of high standard / doctorate degree / M.Phil.

3 Reader / Associate Professor

- Master Degree in Nursing.
- 10 years experience after M.Sc.(N) in a College of Nursing. (If a candidate is not available, 5 years of experience in College of Nursing with an aggregatesof 10 years . teaching experience

Desirable : Independent published work of high standard /doctorate degree / M.Phil.

4 Lecturer

- Master Degree in Nursing.
- 3 years teaching experience after M.Sc. (N)

Note: *Qualifications & Experience of Nursing Teaching faculty relaxed till 2012 & placed under Annexure - I*

External /Guest faculty may be arranged for the selected units in different subjects as required

NOTE:

1. No part time nursing faculty will be counted for calculating total

no. of faculty required for a college.

2. Irrespective of number of admissions, all faculty positions (Professor to Lecturer) must be filled.

3. For M.Sc.(N) programme appropriate number of M.Sc. faculty in each speciality be appointed subject to the condition that total number of teaching faculty ceiling is maintained.

4. All nursing teachers must possess a basic university or equivalent qualification as laid down in the schedules of the Indian Nursing Council Act, 1947. They shall be registered under the State Nursing Registration Act.

5. Nursing faculty in nursing college except tutor/clinical instructors must possess the requisite recognized postgraduate qualification in nursing subjects.

6. Holders of equivalent postgraduate qualifications, which may be approved by the Indian Nursing Council from time to time, may be considered to have the requisite recognized postgraduate qualification in the subject concerned.

7. All teachers of nursing other than Principal and Vice-Principal should spend at least 4 hours in the clinical area for clinical teaching and/or supervision of care every day.

Other Staff (Minimum requirements)

(To be reviewed and revised and rationalized keeping in mind the mechanization and contract service)

• Ministerial	
a) Administrative Officer	1
c) Office Superintendent	1
d) PA to Principal	1
e) Accountant/Cashier	1
• Upper Division Clerk	2
• Lower Division Clerk	2
• Store Keeper	1
a) Maintenance of stores	1
b) Classroom attendants	2
c) Sanitary staff	As per the physical space
d) Security Staff	As per the requirement

• Peons/Office attendants	4
• Library	
a) Librarian	2
b) Library Attendants	As per the requirement
• Hostel	
a) Wardens	2
b) Cooks, Bearers, Sanitary Staff	As per the requirement
c) Ayas /Peons	As per the requirement
d) Security Staff	As per the requirement
e) Gardeners & Dhobi (desirable)	Depends on structural facilities

Eligibility Criteria/Admission Requirements:

1. The candidate should be a Registered Nurse and Registered midwife or equivalent with any State Nursing Registration Council.
2. The minimum education requirements shall be the passing of :
B.Sc. Nursing / B.Sc. Hons. Nursing / Post Basic B.Sc. Nursing with minimum of 55% aggregate marks.
3. The candidate should have undergone in B.Sc. Nursing / B.Sc. Hons. Nursing / Post Basic B.Sc. Nursing in an institution which is recognized by Indian Nursing Council.
4. Minimum one year of work experience after Basic B.Sc. Nursing.
5. Minimum one year of work experience prior or after Post Basic B.Sc.Nursing.
6. Candidate shall be medically fit.
7. 5% relaxation of marks for SC/ST candidates may be given.

Entrance/Selection test

Selection of the candidates should be based on the merit of the entrance examination held by University or competent authority.

Regulations for examination:

Eligibility for appearing for the examination:

75% of the attendance for theory and practicals. However 100% of attendance for practical before the award of degree

Classification of results:

- 50% pass in each of the theory and practical separately.
- 50-59% Second division
- 60-74% first division
- 75% and above is distinction
- For declaring the rank aggregate of 2 years marks to be considered

If the candidate fails in either practicals or theory paper he/she has to reappear for both the papers (theory and practical)

Maximum no. of attempts per subject is three (3) inclusive of first attempt. The maximum period to complete the course successfully should not exceed 4 years

Candidate who fails in any subject, shall be permitted to continue the studies into the second year. However the candidate shall not be allowed to appear for the Second year examination till such time that he/she passes all subjects of the first year M.Sc nursing examination

Practicals

- 4 hours of practical examination per student.
- Maximum number of 10 students per day per speciality.
- The examination should be held in clinical area only for clinical specialities
- One internal and external should jointly conduct practical examination
- Examiner – Nursing faculty teaching respective speciality area in M.Sc nursing programme with minimum 3 years experience after M.Sc nursing.

Dissertation

Evaluation of the dissertation should be done by the examiner prior to viva

Duration: Viva-voce -minimum 30 minutes per student

Guidelines for Dissertation

Tentative Schedule for dissertation

S. No.	Activities	Scheduled Time
1.	Submission of the research proposal	End of 9 th month of 1 st year
2.	Submission of dissertation - final	End of 9 th month of 2 nd year

Note: - Administrative approval and ethical clearance should be obtained

A. Research Guides

a) *Qualification of Guide*

Main guide : Nursing faculty / nursing expert in the same clinical speciality holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in teaching in the Post Graduate Programme in Nursing.

Co-Guide : A Co-Guide is a nursing faculty/expert in the field of study (may be from outside the college but should be within the city.)

b) *Guide – Students Ratio*

Maximum of 1:4 (including as co-guide)

c) *Research Committee*

There should be a research committee in each college comprising of minimum 5 members chaired by the Principal, College of Nursing.

Duration

Duration of the course is 2 years for M.Sc. (N)

Available	52 weeks
Vacation	4 weeks
Examination	2 weeks
Gazetted holidays	3 weeks
Total weeks available	43 weeks
40 hours per week	1720 hours
Total hours for 2 years	3440 hours

Course of Instruction

	Theory (hrs)	Practical (hrs)
1st year		
Nursing education	150	150
Advance nursing practice	150	200
Nursing Research and statistics	150	100

*Clinical speciality	150	650
Total	600	1100
II nd Year		
Nursing Management	150	150
Nursing Research(Dissertation		300
*Clinical Speciality	150	950
Total	300	1400

Educational visit 2 weeks

***Clinical Speciality** – Medical Surgical Nursing (Cardio Vascular & Thoracic Nursing, Critical care Nursing, Oncology Nursing, Neurosciences Nursing, Nephro-Urology Nursing, Orthopedic Nursing, Gastro Enterology Nursing,)Obstetric & Gynaecological Nursing, Child Health (Paediatric) Nursing, Mental Health(Psychiatric) Nursing, Community Health Nursing, Psychiatric (Mental Health) Nursing etc.

Note: Students have to maintain log book for each activity during the course of study

Scheme of Examination

	Theory			Practical		
	Hours	Internal	External	Hours	Internal	External
1st year						
Nursing education	3	25	75		50	50
Advance nursing practice	3	25	75			
Nursing Research and statistics	3	25**	75*			
Clinical speciality	3	25	75		100	100
Total		100	300		150	150
II nd Year						
Nursing Management	3	25	75			
Dissertation & Viva					100	100
Clinical Speciality - II	3	25	75		100	100
Total		50	150		200	200

* Nursing research=50 and statistics=25

**Nursing research=15 and statistics=10

1. Minimum pass marks shall be 50 % in each of the Theory and practical papers separately.
2. A candidate must have minimum of 80% attendance (irrespective of the kind of absence) in theory and practical in each subject for appearing for examination.
3. A candidate must have 100% attendance in each of the practical areas before award of degree
4. A candidate has to pass in theory and practical exam separately in each of the paper.
5. If a candidate fails in either theory or practical paper he/she has to re-appear for both the papers (Theory and practical).
6. Maximum no. of attempts permitted for each paper is 3 including first attempt.
7. The maximum period to complete the course successfully should not exceed 4 (four) years
8. A candidate failing in more then two subjects will not be promoted to the IInd year.
9. No candidate shall be admitted to the subsequent IInd year examination unless the candidate has passed the Ist year examination.
10. Maximum number of candidates for all practical examination should not exceed 10 per day.
11. Provision of Supplementary examination should be made.
12. All practical examinations must be held in the respective clinical areas.
13. One internal and One external examiners(outside the University) should jointly conduct practical examination for each student
14. An examiner should be M.Sc (N) in concerned subject and have minimum of 3 (three) years post graduate teaching experience.
15. One internal and One external examiners(outside the University) should evaluate dissertation and jointly conduct viva-voce for each student
16. For Dissertation Internal examiner should be the guide and external examiner should be Nursing faculty / nursing expert in the same clinical speciality holding Ph.D./M.Phil/M.Sc. Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of Nursing.

Admission Strength

Annual admission strength for M.Sc (N) Programme should have prior sanction/permission from the Indian Nursing Council on the basis of clinical, physical facilities and teaching faculty.

Health Services

There should be provisions for the following health services for the students.

- (a) An annual medical examination.
- (b) Vaccination against Tetanus, hepatitis B or any other communicable disease as considered necessary.
- (c) Free medical care during illness and / provision of health insurance should be made.
- (d) A complete health record should be kept in respect of each individual students. The question of continuing the training of a student, with long term chronic illness, will be decided by the individual college.

CURRICULUM
NURSING EDUCATION

Placement : Ist Year

Hours of Instruction
Theory 150 Hours
Practical 150 Hours
Total : 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of Fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to :

1. Explain the aims of education, philosophies, trends in education and health: its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing.
9. Demonstrate skill in guidance and counseling.
10. Describe the problems and issues related to administration of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education programs.
12. Identify research priorities in nursing education.

13. Discuss various models of collaboration in nursing education and services.
14. Explain the concept, principles, steps, tools and techniques of evaluation
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

XIV	10		Management of nursing educational institutions <input type="checkbox"/> Planning, organizing, staffing, budgeting,

			recruitment, discipline, public relation, performance appraisal, welfare services, library services, hostel,
XV	5	5	<input type="checkbox"/> Development and maintenance of standards and accreditation in nursing education programs. <input type="checkbox"/> Role of Indian Nursing Council, State Registration Nursing Councils, Boards and University. <input type="checkbox"/> Role of Professional associations and unions.

Activities :

- Framing philosophy, aims and objectives.
- Lesson Planning.
- Micro teaching-2.
- Conduct practice teachings using different teaching strategies -10 (like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
- Preparation and utilization of instructional Aids using different media.
- Develop course plans, unit plans, rotation plans.
- Conduct a continuing education workshop.
- Annotated bibliography.
- Critical evaluation of any nursing education program offered by a selected institution.
- Planning and Organizing field visits.
- Educational visits.
- Field visits (INC/SNRC) to get familiar with recognition/registration process.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
- Observe and practice application of various non-standardized tests (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

Methods of evaluation

- Tests
- Presentation
- Project work
- Written assignments

Internal Assessment

Construction of tests/rotation plan.	25

ADVANCE NURSING PRACTICE

Placement: 1ST Year

Hours of Instruction
Theory 150 Hours
Practical 200 Hours
Total : 350 Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Appreciate and analyze the development of nursing as a profession.
2. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Describe scope of nursing practice.
6. Provide holistic and competent nursing care following nursing process approach.
7. Identify latest trends in nursing and the basis of advance nursing practice.
8. Perform extended and expanded role of nurse.
9. Describe alternative modalities of nursing care.
10. Describe the concept of quality control in nursing.
11. Identify the scope of nursing research.
12. Use computer in patient care delivery system and nursing practice.
13. Appreciate importance of self development and professional advancement.

Course Content

Unit	Hours	Content
I	10	<p>Nursing as a Profession</p> <ul style="list-style-type: none"> □ History of development of nursing profession, characteristics, criteria of the profession, perspective of nursing profession-national, global □ Code of ethics(INC), code of professional conduct (INC), autonomy and accountability, assertiveness, visibility of nurses, legal considerations, □ Role of regulatory bodies □ Professional organizations and unions-self defense, individual and collective bargaining □ Educational preparations, continuing education, career opportunities, professional advancement & role and scope of nursing education. □ Role of research, leadership and management. □ Quality assurance in nursing (INC). □ Futuristic nursing.
II	5	<p>Health care delivery</p> <ul style="list-style-type: none"> □ Health care environment, economics, constraints, planning process, policies, political process vis a vis nursing profession. □ Health care delivery system- national, state, district and local level. □ Major stakeholders in the health care system- Government, non-govt, Industry and other professionals. □ Patterns of nursing care delivery in India. □ Health care delivery concerns, national health and family welfare programs, inter-sectoral coordination, role of nongovernmental agencies. □ Information, education and communication (IEC). □ Tele-medicine.
III	10	Genetics

		<ul style="list-style-type: none"> <input type="checkbox"/> Review of cellular division, mutation and law of inheritance, human genome project ,The Genomic era. <input type="checkbox"/> Basic concepts of Genes, Chromosomes & DNA. <input type="checkbox"/> Approaches to common genetic disorders. <input type="checkbox"/> Genetic testing – basis of genetic diagnosis, Pre symptomatic and predisposition testing, Prenatal diagnosis & screening, Ethical, legal & psychosocial issues in genetic testing. <input type="checkbox"/> Genetic counseling. <input type="checkbox"/> Practical application of genetics in nursing.
IV	10	<p>Epidemiology</p> <ul style="list-style-type: none"> <input type="checkbox"/> Scope, epidemiological approach and methods, <input type="checkbox"/> Morbidity, mortality, <input type="checkbox"/> Concepts of causation of diseases and their screening, <input type="checkbox"/> Application of epidemiology in health care delivery, Health surveillance and health informatics <input type="checkbox"/> Role of nurse
V	20	<p>Bio-Psycho social pathology</p> <ul style="list-style-type: none"> <input type="checkbox"/> Pathophysiology and Psychodynamics of disease causation <input type="checkbox"/> Life processes, homeostatic mechanism, biological and psycho-social dynamics in causation of disease, life style <input type="checkbox"/> Common problems: Oxygen insufficiency, fluid and electrolyte imbalance, nutritional problems, hemorrhage]and shock, altered body temperature, unconsciousness, sleep pattern and its disturbances, pain, sensory deprivation. <input type="checkbox"/> Treatment aspects: pharmacological and pre-post operative care aspects, <input type="checkbox"/> Cardio pulmonary resuscitation. <input type="checkbox"/> End of life Care <input type="checkbox"/> Infection prevention (including HIV) and standard safety measures, bio-medical waste management. <input type="checkbox"/> Role of nurse- Evidence based nursing practice; Best practices <input type="checkbox"/> Innovations in nursing
VI	20	<p>Philosophy and Theories of Nursing</p> <ul style="list-style-type: none"> <input type="checkbox"/> Values, Conceptual models, approaches.

		<ul style="list-style-type: none"> <input type="checkbox"/> Nursing theories: Nightingale's, Henderson's, Roger's, Peplau's, Abdella's, Lewine's, Orem's, Johnson's, King's, Neuman's, Roy's, Watson parse, etc and their applications, <input type="checkbox"/> Health belief models, communication and management, etc <input type="checkbox"/> Concept of Self health. <input type="checkbox"/> Evidence based practice model.
VIII	10	<p>Nursing process approach</p> <ul style="list-style-type: none"> <input type="checkbox"/> Health Assessment- illness status of patients/clients(Individuals, family, community), Identification of healthillness problems, health behaviors, signs and symptoms of clients. <input type="checkbox"/> Methods of collection, analysis and utilization of data relevant to nursing process. <input type="checkbox"/> Formulation of nursing care plans, health goals, implementation, modification and evaluation of care.
IX	30	<p>Psychological aspects and Human relations</p> <ul style="list-style-type: none"> <input type="checkbox"/> Human behavior, Life processes & growth and development, personality development, defense mechanisms, <input type="checkbox"/> Communication, interpersonal relationships, individual and group, group dynamics, and organizational behavior, <input type="checkbox"/> Basic human needs, Growth and development, (Conception through preschool, School age through adolescence, Young & middle adult, and Older adult) <input type="checkbox"/> Sexuality and sexual health. <input type="checkbox"/> Stress and adaptation, crisis and its intervention, <input type="checkbox"/> Coping with loss, death and grieving, <input type="checkbox"/> Principles and techniques of Counseling
XI	25	<p>Computer applications for patient care delivery system and nursing practice</p> <ul style="list-style-type: none"> <input type="checkbox"/> Use of computers in teaching, learning, research and nursing practice. <input type="checkbox"/> Windows, MS office: Word, Excel, Power Point, <input type="checkbox"/> Internet, literature search, <input type="checkbox"/> Statistical packages, <input type="checkbox"/> Hospital management information system: softwares.

.Practical

Clinical posting in the following areas:

- Specialty area- in-patient unit - 2 weeks
- Community health center/PHC - 2 weeks
- Emergency/ICU - 2 weeks

Activities

- Prepare Case studies with nursing process approach and theoretical basis
- Presentation of comparative picture of theories
- Family case- work using model of prevention
- Annotated bibliography
- Report of field visits (5)

Methods of Teaching

- Lecture cum discussion
- Seminar
- Panel discussion
- Debate
- Case Presentations
- Exposure to scientific conferences
- Field visits

Methods of evaluation :

- Tests
- Presentation
- Seminar
- Written assignments

Advance nursing Procedures

Definition, Indication and nursing implications;

- CPR, TPN, Hemodynamic monitoring, Endotracheal intubation, Tracheostoma, mechanical ventilation, Pacemaker, Hemodialysis, Peritoneal dialysis, LP, BT Pleural and abdominal paracentesis OT techniques, Health assessment, Triage, Pulse oxymetry

Internal Assessment

Techniques	Weightage
Test- (2 tests)	50
Assignment	25

Seminar/presentation	25

CLINICAL SPECIALITY - I

MEDICAL SURGICAL NURSING

Placement: 1st Year

Hours of instruction

Theory: 150 Hours

Practical: 650 Hours

Total : 800 Hours

Course Description

This course is common for the students undergoing clinical speciality-II in neuro science nursing/cardiovascular & thoracic nursing/critical care nursing/oncology nursing/orthopaedic and rehabilitation nursing/nephro & urology nursing, gastroenterology nursing/ geriatric nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends & issues in the field of Medical – Surgical Nursing as a speciality.
2. Apply concepts & theories related to health promotion.
3. Appreciate the client as a holistic individual.
4. Perform physical, psychosocial assessment of Medical – Surgical patients.
5. Apply Nursing process in providing care to patients.
6. Integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness.
7. Recognize and manage emergencies with Medical- Surgical patients.
8. Describe various recent technologies & treatment modalities in the management of critically ill patients.

9. Appreciate the legal & ethical issues relevant to Medical – Surgical Nursing.
10. Prepare a design for layout and management of Medical – Surgical Units.
11. Appreciate the role of alternative systems of Medicine in care of patients.
12. Incorporate evidence based Nursing practice and identify the areas of research in the field of Medical – Surgical Nursing.
13. Recognize the role of Nurse practitioner as a member of the Medical – Surgical health team.
14. Teach Medical – Surgical Nursing to undergraduate nursing students & in-service nurses.

COURSE CONTENT:

CLINICAL SPECIALITY-I
OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement : 1st year

Hours of Instruction
Theory : 150 Hours.
Practical : 650 Hours.
Total : 800 Hours.

Course Description

This course is designed to assist students in developing expertise and in depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynecological nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends in the field of midwifery, obstetrics and gynaecology as a speciality.
2. Describe the population dynamics and indicators of maternal and child health
3. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
4. Provide comprehensive nursing care to women during reproductive period and newborns.
5. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing.
6. Identify and analyze the deviations from normal birth process and refer appropriately.
7. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
8. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation
9. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing.
10. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.

11. Describe the recent advancement in contraceptive technology and birth control measures
12. Appreciate the legal and ethical issues pertaining to obstetric and gynaecological nursing

Course Content

Unit	Hours	Content
I	10	<p>Introduction:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Historical and contemporary perspectives <input type="checkbox"/> Epidemiological aspects of maternal and child health <input type="checkbox"/> Magnitude of maternal and child health problems <input type="checkbox"/> Issues of maternal and child health : Age, Gender, Sexuality, psycho Socio cultural factors <input type="checkbox"/> Preventive obstetrics <input type="checkbox"/> National health and family welfare programmes related to maternal and child health: health care delivery system- National Rural health mission, Role of NGO's <input type="checkbox"/> Theories, models and approaches applied to midwifery practice <input type="checkbox"/> Role and scope of midwifery practice: Independent Nurse midwifery practitioner <input type="checkbox"/> Legal and Ethical issues: Code of ethics and standards of midwifery practice, standing orders <input type="checkbox"/> Evidence based midwifery practice <input type="checkbox"/> Research priorities in obstetric and gynaecological nursing.
II	15	<p>Human reproduction</p> <ul style="list-style-type: none"> <input type="checkbox"/> Review of anatomy and physiology of human reproductive system: male and female <input type="checkbox"/> Hormonal cycles <input type="checkbox"/> Embryology <input type="checkbox"/> Genetics, teratology and counseling <input type="checkbox"/> Clinical implications.

Practical

Total = 660 Hours
1 Week = 30 Hours

S.No.	Dept/Unit	No. of Week	Total Hours
1.	Anetenatal Wards & OPDs	4	120 Hours
2.	Labour Room	5	150 Hours
3.	Postnatal Ward	2	60 Hours
4	Family Planning Clinics	2	60 Hours
5.	PHC/Rural maternity settings	4	120 Hours
6.	Gynae	2	60 Hours
7.	Maternity OT	2	60 Hours
8.	NICU	1	30 Hours
	Total	22 Weeks	660 Hours

Procedures observed

- Diagnostic investigations : amniocentecis, chordocentecis, chorionic villi sampling
- Infertility management: artificial reproduction : artificial insemination, invitro fertilization, and related procedures

Procedures assisted

- Medical termination of pregnancy,

Procedures performed

- Antenatal assessment-20
- Postnatal assessment-20
- Assessment during labour : use of partograph - 20
- Per vaginal examination-20
- Conduct of normal delivery-20
- Episiotomy and suturing-10
- Setting up of delivery areas
- Insertion of intra uterine devices(copper T)

Others

- Identification of high risk women and referral

- Health education: to women and their families
- Motivation of couples for planned parenthood

CLINICAL SPECIALTY –I

CHILD HEALTH (PAEDIATRIC) NURSING

Placement : Ist Year

Hours of Instruction

Theory 150 Hours

Practical 650 Hours

Total : 800 Hours

Course Description

This course is designed to assist students in developing expertise and in depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and pediatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
3. Appreciate the child as a holistic individual
4. Perform physical, developmental, and nutritional assessment of pediatric clients
5. Apply nursing process in providing nursing care to neonates & children
6. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
7. Recognize and manage emergencies in neonates
8. Describe various recent technologies and treatment modalities in the management of high risk neonates
9. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
10. Prepare a design for layout and management of neonatal units
11. Incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatal nursing

12. Recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal health team
13. Teach pediatric nursing to undergraduate students & in-service nurses

Course Content

Unit	Hours	Content
I	10	<p>Introduction:</p> <p>Historical development of Pediatrics and Pediatric Nursing in India;</p> <ul style="list-style-type: none"> <input type="checkbox"/> Current status of child health in India; <input type="checkbox"/> Trends in Pediatrics and Pediatric Nursing, <input type="checkbox"/> Ethical and cultural issues in pediatric care <input type="checkbox"/> Rights of children <input type="checkbox"/> National health policy for children, special laws and ordinances relating to children. <input type="checkbox"/> National goals, <input type="checkbox"/> Five year plans, <input type="checkbox"/> National health programs related to child health.
II	10	<p>Assessment of pediatric clients</p> <ul style="list-style-type: none"> <input type="checkbox"/> History taking <input type="checkbox"/> Developmental assessment <input type="checkbox"/> Physical assessment <input type="checkbox"/> Nutritional assessment <input type="checkbox"/> Family assessment

CLINICAL SPECIALITY – I

MENTAL HEALTH (PSYCHIATRIC) NURSING

Placement : 1st Year

Hours of Instruction
 Theory 150 hours
 Practical 650 hours
 Total : 800 hours

Course Description

This course is designed to assist students in developing expertise and in depth understanding in the field of Psychiatric Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function psychiatric nurse specialist . It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends and issues in the field of psychiatry and psychiatric nursing.
2. Explain the dynamics of personality development and human behaviour.
3. Describe the concepts of psychobiology in mental disorders and its implications for psychiatric nursing
4. Demonstrate therapeutic communications skills in all interactions
5. Demonstrate the role of psychiatric nurse practitioner in various therapeutic modalities
6. Establish and maintain therapeutic relationship with individual and groups
7. Uses assertive techniques in personal and professional actions
8. Promotes self-esteem of clients, others and self
9. Apply the nursing process approach in caring for patients with mental disorders
10. Describe the psychopharmacological agents, their effects and nurses role
11. Recognize the role of psychiatric nurse practitioner and as a member of the psychiatric and mental health team
12. Describe various types of alternative system of medicines used in psychiatric settings

13. Incorporate evidence based nursing practice and identify the areas of research in the field of psychiatric nursing

- Socio and psycho drama
- Field visits

CLINICAL SPECIALITY- I

COMMUNITY HEALTH NURSING

Placement : 1st Year

Hours of Instructions
Theory 150 hours
Practical 650 hours
Total 800 hours

Course Description

The course is designed to assist students in developing expertise and indepth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

Objectives

At the end of the course, the student will be able to:

1. Appreciate the history and development in the field of Community Health and Community Health Nursing.
2. Appreciate role of individuals and families in promoting health of the Community.
3. Perform physical, developmental and nutritional assessment of individuals, families and groups.
4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the people.
5. Apply nursing process approach while providing care to individuals, families, groups and community.
6. Integrate the concepts of family centered nursing approach while providing care to the community.

7. Recognize and participate in the management of emergencies, epidemics and disasters.
8. Apply recent technologies and care modalities while delivering community health nursing care.
9. Appreciate legal and ethical issues pertaining to community health nursing care.
10. Conduct community health nursing care projects.
11. Participate in planning, implementation and evaluation of various national health and family welfare programmes at local, state and the national level.
12. Incorporate evidence based nursing practice and identify the areas of research in the community settings.
13. Participate effectively as a member of Community Health team.
14. Coordinate and collaborate with various agencies operating in the community by using inter-sectoral approach.
15. Teach community health nursing to undergraduates, in-service nurses and the community health workers.
16. Demonstrate leadership and managerial abilities in community health nursing practice

Practical

Total = 660 Hours
1 Week = 30 Hours

S.No.	Dept/Unit	No. of Week	Total Hours
1.	Sub-centre, PHC, CHC	12	360 Hours
2.	District family welfare bureau	1	30 Hours
3.	Urban centers	6	180 Hours
4	Field visits	3	90 Hours
	Total	22 Weeks	660 Hours

Student Activities

- Identification of community leaders and resource persons (community mapping)
- Community health survey
- Community health nursing process- individual, family and special groups and community
- Counseling
- Health education – campaign, exhibition, folk media, preparation of IEC materials
- Organising and participating in special clinics/camps and national health and welfare programmes-Organise atleast one health and family welfare mela/fair (all stalls of national health and family welfare activities should be included)
- Estimation of Vital health statistics -Exercise
- Drill for disaster preparedness
- Organise atleast one in-service education to ANM's/LHV/PHN/HW
- Nutrition – Exercise on nutritional assessment on dietary planning, demonstration and education for various age groups
- Filling up of Records, reports and registers maintained at SC/PHC/CHC
- Assist women in self breast examination

- Conduct antenatal examination
- Conduct vaginal examination
- Conduct deliveries
- Post natal visits
- Perform Episiotomy and suturing
- Prepare Pap smear
- Conduct Insertion/Removal of IUD
- Blood Slide preparation
- Field visits
- Maintenance of log book for various activities

NURSING RESEARCH AND STATISTICS

Placement: 1st Year

Hours of Instruction
Theory 150 Hours
Practical 100 Hours
Total : 250 Hours

Part-A : Nursing Research

Theory 100 Hours
Practical 50 Hours
Total : 150 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Define basic research terms and concepts.
2. Review literature utilizing various sources
3. Describe research methodology
4. Develop a research proposal.
5. Conduct a research study.
6. Communicate research findings
7. Utilize research findings

8. Critically evaluate nursing research studies.
9. Write scientific paper for publication.

Content Outline

Unit	Hours		Course Content
	Theory	Practical	
I	10		<p>Introduction</p> <ul style="list-style-type: none"> □ Methods of acquiring knowledge – problem solving and scientific method. □ Research – Definition, characteristics, purposes, kinds of research □ Historical Evolution of research in nursing □ Basic research terms □ Scope of nursing research: areas, problems in nursing, health and social research □ Concept of evidence based practice □ Ethics in research □ Overview of Research process
II	5	5	<p>Review of Literature</p> <ul style="list-style-type: none"> □ Importance, purposes, sources, criteria for selection of resources and steps in reviewing literature.
III	12		<p>Research Approaches and designs</p> <ul style="list-style-type: none"> □ Type: Quantitative and Qualitative □ Historical, survey and experimental – Characteristics, types advantages and disadvantages □ Qualitative: Phenomenology, grounded theory, ethnography
IV	10	5	<p>Research problem:</p> <ul style="list-style-type: none"> □ Identification of research problem □ Formulation of problem statement and research objectives

			<input type="checkbox"/> Definition of terms <input type="checkbox"/> Assumptions and delimitations <input type="checkbox"/> Identification of variables <input type="checkbox"/> Hypothesis – definition, formulation and types.
V	5	5	Developing theoretical/conceptual framework. <input type="checkbox"/> Theories: Nature, characteristics, Purpose and uses <input type="checkbox"/> Using, testing and developing conceptual framework, models and theories.
VI	6		Sampling <input type="checkbox"/> Population and sample <input type="checkbox"/> Factors influencing sampling <input type="checkbox"/> Sampling techniques <input type="checkbox"/> Sample size <input type="checkbox"/> Probability and sampling error <input type="checkbox"/> Problems of sampling
VII	20	10	Tools and methods of Data collection: <input type="checkbox"/> Concepts of data collection <input type="checkbox"/> Data sources, methods/techniques quantitative and qualitative. <input type="checkbox"/> Tools for data collection – types, characteristics and their development <input type="checkbox"/> Validity and reliability of tools <input type="checkbox"/> Procedure for data collection
VIII	5		Implementing research plan <input type="checkbox"/> Pilot Study, review research plan (design)., planning for data collection, administration of tool/interventions, collection of data
IX	10	10	Analysis and interpretation of data <input type="checkbox"/> Plan for data analysis: quantitative and qualitative <input type="checkbox"/> Preparing data for computer analysis and presentation. <input type="checkbox"/> Statistical analysis <input type="checkbox"/> Interpretation of data <input type="checkbox"/> Conclusion and generalizations <input type="checkbox"/> Summary and discussion
X	10		Reporting and utilizing research findings:

			<input type="checkbox"/> Communication of research results; oral and written <input type="checkbox"/> Writing research report purposes, methods and style Vancouver, American Psychological Association (APA), Campbell etc <input type="checkbox"/> Writing scientific articles for publication: purposes & style
XI	3	8	Critical analysis of research reports and articles
XII	4	7	Developing and presenting a research proposal

Activities:

- Annotated Bibliography of research reports and articles.
- Review of literature of selected topic and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical/conceptual framework.
- Preparation of a sample research tool
- Analysis and interpretation of given data
- Developing and presenting research proposal
- Journal club presentation
- Critical evaluation of selected research studies
- Writing a scientific paper.

Method of Teaching

- Lecture-cum-discussion
- Seminar/Presentations
- **Project**
- Class room exercises
- Journal club

Methods of Evaluation

- Quiz, Tests (Term)
- Assignments/Term paper
- Presentations
- Project work

Internal Assessment

Techniques	Weightage (15marks)
Term Test(2 tests)	40%
Assignment	20%

Presentation	20%
Project work	20%
Total	100%

Part –B : Statistics

Hours of Instruction
 Theory 50 Hours
 Practical 50 Hours
 Total : 100 Hours

Course Description

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing.

General Objectives

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully.
4. Use descriptive and inferential statistics to predict results.
5. Draw conclusions of the study and predict statistical significance of the results.
6. Describe vital health statistics and their use in health related research.
7. Use statistical packages for data analysis

Content Outline

	Theory	Practical	
I	7	4	Introduction <ul style="list-style-type: none"> <input type="checkbox"/> Concepts, types, significance and scope of statistics, meaning of data, <input type="checkbox"/> sample, parameter <input type="checkbox"/> type and levels of data and their measurement <input type="checkbox"/> Organization and presentation of data – Tabulation of data; <input type="checkbox"/> Frequency distribution <input type="checkbox"/> Graphical and tabular presentations.

II	4	4	. Measures of central tendency: <input type="checkbox"/> Mean, Median, Mode
III	4	5	Measures of variability; <input type="checkbox"/> Range, Percentiles, average deviation, quartile deviation, standard deviation
IV	3	2	Normal Distribution: <input type="checkbox"/> Probability, characteristics and application of normal probability curve; sampling error.
V	6	8	Measures of relationship: <input type="checkbox"/> Correlation – need and meaning <input type="checkbox"/> Rank order correlation; <input type="checkbox"/> Scatter diagram method <input type="checkbox"/> Product moment correlation <input type="checkbox"/> Simple linear regression analysis and prediction.
VI	5	2	Designs and meaning: <input type="checkbox"/> Experimental designs <input type="checkbox"/> Comparison in pairs, randomized block design, Latin squares.
VII	8	10	Significance of Statistic and Significance of difference between two Statistics (Testing hypothesis) <input type="checkbox"/> Non parametric test – Chi-square test, Sign, median test, Mann Whitney test. <input type="checkbox"/> Parametric test – ‘t’ test, ANOVA, MANOVA,ANCOVA
VIII	5	5	Use of statistical methods in psychology and education: <input type="checkbox"/> Scaling – Z Score, Z Scaling <input type="checkbox"/> Standard Score and T Score <input type="checkbox"/> Reliability of test Scores: test-retest method, parallel forms, split half method.
IX	4	2	Application of statistics in health: <input type="checkbox"/> Ratios, Rates, Trends <input type="checkbox"/> Vital health statistics – Birth and death rates. <input type="checkbox"/> Measures related to fertility, morbidity and mortality
X	4	8	Use of Computers for data analysis

			<input type="checkbox"/> Use of statistical package.
--	--	--	--

Activities

- Exercises on organization and tabulation of data,
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics(chi square, t-test, correlation)
- Practice in using statistical package
- Computing vital health statistics

Methods of Teaching:

- Lecture-cum-discussion
- Demonstration – on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data,
- Computing Descriptive and inferential statistics; vital and health statistics and use of computer for data entry and analysis using statistical package.

Methods of Evaluation

- Test, Classroom statistical exercises.

Internal Assessment

Techniques

Test – (2 tests)

Weightage 10 marks

100%

NURSING MANAGEMENT

Placement : II Year

Hours of Instruction
Theory 150 Hours
Practical 150 Hours
Total : 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of Principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Describe the philosophy and objectives of the health care institutions at various levels.
2. Identify trends and issues in nursing
3. Discuss the public administration, health care administration vis a vis nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Collaborate and co-ordinate with various agencies by using multisectoral approach
7. Discuss the planning, supervision and management of nursing workforce for various health care settings.
8. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
9. Identify and analyse legal and ethical issues in nursing administration
10. Describe the process of quality assurance in nursing services.
11. Demonstrate leadership in nursing at various levels

Course Content

Unit	Hours	Content
I	10	<p>Introduction</p> <ul style="list-style-type: none"> □ Philosophy, purpose, elements, principles and scope of administration □ Indian Constitution, Indian Administrative system vis a vis health care delivery system: National, State and Local □ Organisation and functions of nursing services and education at National, State , District and institutions: Hospital and Community □ Planning process: Five year plans, Various Committee Reports on health, State and National Health policies, national population policy, national policy on AYUSH and plans
II	10	<p>Management</p> <ul style="list-style-type: none"> □ Functions of administration □ Planning and control □ Co-ordination and delegation □ Decision making – decentralization basic goals of decentralization. □ Concept of management <p>Nursing management</p> <ul style="list-style-type: none"> □ Concept, types, principles and techniques □ Vision and Mission Statements □ Philosophy, aims and objective □ Current trends and issues in Nursing Administration □ Theories and models <p>Application to nursing service and education</p>
III	15	<p>Planning</p> <ul style="list-style-type: none"> □ Planning process: Concept, Principles, Institutional policies □ Mission, philosophy, objectives, □ Strategic planning

		<input type="checkbox"/> Operational plans <input type="checkbox"/> Management plans <input type="checkbox"/> Programme evaluation and review technique(PERT), Gantt chart, Management by objectives(MBO) <input type="checkbox"/> Planning new venture <input type="checkbox"/> Planning for change <input type="checkbox"/> Innovations in nursing Application to nursing service and education
IV	15	Organisation <input type="checkbox"/> Concept , principles, objectives, Types and theories, Minimum requirements for organisation, Developing an organizational Structure, levels, organizational Effectiveness and organizational Climate, <input type="checkbox"/> Organising nursing services and patient care: Methods of patient assignment- Advantages and disadvantages, primary nursing care, <input type="checkbox"/> Planning and Organising: hospital, unit and ancillary services(specifically central sterile supply department, laundry, kitchen, laboratory services, emergency etc) <input type="checkbox"/> Disaster management: plan, resources, drill, etc Application to nursing service and education
V	15	Human Resource for health <input type="checkbox"/> Staffing • Philosophy • Norms: Staff inspection unit(SIU), Bajaj Committee, High power committee, Indian nursing council (INC) • Estimation of nursing staff requirement- activity analysis • Various research studies <input type="checkbox"/> Recruitment: credentialing, selection, placement, promotion <input type="checkbox"/> Retention <input type="checkbox"/> Personnel policies <input type="checkbox"/> Termination <input type="checkbox"/> Staff development programme <input type="checkbox"/> Duties and responsibilities of various category of nursing personnel Applications to nursing service and education

VI	15	<p>Directing</p> <ul style="list-style-type: none"> <input type="checkbox"/> Roles and functions <input type="checkbox"/> Motivation: Intrinsic, extrinsic, Creating motivating climate, Motivational theories <input type="checkbox"/> Communication : process, types, strategies, Interpersonal communication, channels, barriers, problems, Confidentiality, Public relations <input type="checkbox"/> Delegation; common delegation errors <input type="checkbox"/> Managing conflict: process, management, negotiation, consensus <input type="checkbox"/> Collective bargaining: health care labour laws, unions, professional associations, role of nurse manager <input type="checkbox"/> Occupational health and safety <p>Application to nursing service and education</p>

--	--	---

,
PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, Revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organisation Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for speciality units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel
8. Prepare a list of equipments and supplies for speciality units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions
12. Prepare a plan of action for performance appraisal
13. Identify the problems of the speciality units and develop plan of action by using problem solving approach
14. Plan a duty roster for speciality units/hospital, community and educational institutions

15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurses notes, Official letters, curriculum vitae, presentations etc
16. Prepare a plan for disaster management
17. Group work
18. Field appraisal report

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING

SUB SPECIALITY – CARDIO VASCULAR AND THORACIC NURSING

Placement : II year

Hours of Instruction
 Theory : 150 hours.
 Practical : 950 hours.
 Total : 1100 hours.

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as Cardio vascular and Thoracic Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to cardio vascular and thoracic Nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of cardio vascular and thoracic conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions

7. Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.
8. Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
9. Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
10. Appreciate team work & coordinate activities related to patient care.
11. Practice infection control measures.
12. Identify emergencies and complications & take appropriate measures
13. Discuss the legal and ethical issues in cardio vascular and thoracic nursing
14. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
15. Appreciate the role of alternative system of medicine in care of patient
16. Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
17. Identify the sources of stress and manage burnout syndrome among health care providers.
18. Teach and supervise nurses and allied health workers.
19. Design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursing practice.

Course Content

Unit	Hours	Content
I	5	Introduction <ul style="list-style-type: none"> <input type="checkbox"/> Historical development, trends and issues in the field of cardiology. <input type="checkbox"/> Cardio vascular and thoracic conditions – major health problem. <input type="checkbox"/> Concepts, principles and nursing perspectives <input type="checkbox"/> Ethical and legal issues <input type="checkbox"/> Evidence based nursing and its application in cardio vascular and thoracic nursing(to be incorporated in all the units)
II	5	Epidemiology <ul style="list-style-type: none"> <input type="checkbox"/> Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitus

		<p>etc</p> <ul style="list-style-type: none"> <input type="checkbox"/> Health promotion, disease prevention, Life style modification <input type="checkbox"/> National health programs related to cardio vascular and thoracic conditions <input type="checkbox"/> Alternate system of medicine <input type="checkbox"/> Complementary therapies
III	5	<p>Review of anatomy and physiology of cardio vascular and respiratory system</p> <ul style="list-style-type: none"> <input type="checkbox"/> Review of anatomy and physiology of heart, lung, thoracic cavity and blood vessels. Embryology of heart and lung. <input type="checkbox"/> Coronary circulation <input type="checkbox"/> Hemodynamics and electro physiology of heart. <input type="checkbox"/> Bio-chemistry of blood in relation to cardio pulmonary function.
IV	20	<p>Assessment and Diagnostic Measures:</p> <ul style="list-style-type: none"> <input type="checkbox"/> History taking <input type="checkbox"/> Physical assessment <ul style="list-style-type: none"> • Heart rate variability: Mechanisms , measurements, pattern, factors, impact of interventions on HRV <input type="checkbox"/> Diagnostic tests <ul style="list-style-type: none"> • Hemodynamic monitoring: Technical aspects, monitoring, functional hemodynamic indices, ventricular function indices, output measurements (Arterial and swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand • Radiologic examination of the chest: interpretation, chest film findings • Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination <ul style="list-style-type: none"> - ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance, • Echocardiography: technical aspects, special techniques, echocardiography of cardiac structures in health and disease, newer techniques • Nuclear and other imaging studies of the heart:

		<p>Magnetic Resonance Imaging.</p> <ul style="list-style-type: none"> • Cardio electrophysiology procedures: diagnostic studies, interventional and catheter ablation, nursing care • Exercise testing: indications and objectives, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period • Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data • Pulmonary function test: Bronchoscopy and graphies • Interpretation of diagnostic measures • Nurse’s role in diagnostic tests <p>□ Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, SScardiac enzyme studies, Serum Concentration of Selected drugs.</p> <p>□ Interpretation and role of nurse</p>
V	25	<p>Cardiac disorders and nursing management:</p> <p>□ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Hypertension • Coronary Artery Disease. • Angina of various types. • Cardiomegaly • Myocardial Infarction, Congestive cardiac failure • Heart Failure, Pulmonary Edema, Shock. • Rheumatic heart disease and other Valvular Diseases • Inflammatory Heart Diseases, Infective Endocarditis, Myocarditis, Pericarditis. • Cardiomyopathy, dilated, restrictive, hypertrophic. • Arrhythmias, heart block <p>Associated illnesses</p>
VI	10	<p>Altered pulmonary conditions</p> <p>□ Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Bronchitis

		<ul style="list-style-type: none"> • Bronchial asthma • Bronchiectasis • Pneumonias • Lung abscess, lung tumour • Pulmonary tuberculosis, fibrosis, pneumoconiosis etc • Pleuritis, effusion • Pneumo, haemo and pyothorax • Interstitial Lung Disease • Cystic fibrosis • Acute and Chronic obstructive pulmonary disease (conditions leading to) <ul style="list-style-type: none"> • Cor pulmonale • Acute respiratory failure • Adult respiratory distress syndrome • Pulmonary embolism • Pulmonary Hypertension
VII	10	<p>Vascular disorders and nursing management</p> <p><input type="checkbox"/> Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Disorders of arteries • Disorders of the aorta • Aortic Aneurysms, • Aortic dissection • Raynaud’s phenomenon • Peripheral arterial disease of the lower extremities • Venous thrombosis • Varicose veins • Chronic venous insufficiency and venous leg ulcers • Pulmonary embolism
VIII	10	<p>Cardio thoracic emergency interventions</p> <p><input type="checkbox"/> CPR- BLS and ALS</p> <p><input type="checkbox"/> Use of ventilator, defibrillator , pacemaker</p> <p><input type="checkbox"/> Post resuscitation care.</p> <p><input type="checkbox"/> Care of the critically ill patients</p> <p><input type="checkbox"/> Psychosocial and spiritual aspects of care</p> <p><input type="checkbox"/> Stress management; ICU psychosis</p> <p><input type="checkbox"/> Role of nurse</p>
IX	10	<p>Nursing care of a patient with obstructive airway</p> <p><input type="checkbox"/> Assessment</p>

		<input type="checkbox"/> Use of artificial airway <input type="checkbox"/> Endotracheal intubation, tracheostomy and its care <input type="checkbox"/> Complication, minimum cuff leak, securing tubes Oxygen delivery systems. <input type="checkbox"/> Nasal Cannula <input type="checkbox"/> Oxygen mask, Venturi mask <input type="checkbox"/> Partial rebreathing bag <input type="checkbox"/> Bi-PAP and C-PAP masks <input type="checkbox"/> Uses, advantages, disadvantages, nursing implications of each. Mechanical Ventilation <input type="checkbox"/> Principles of mechanical ventilation <input type="checkbox"/> Types of mechanical ventilation and ventilators. <input type="checkbox"/> Modes of ventilation, advantage, disadvantage, complications. <input type="checkbox"/> PEEP therapy, indications, physiology, and complications. Weaning off the ventilator. <input type="checkbox"/> Nursing assessment and interventions of ventilated patient.
X	10	Congenital Heart Diseases, <input type="checkbox"/> Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of: <ul style="list-style-type: none"> • Embryological development of heart. • Classification – cyanotic and acyanotic heart disease. • Tetralogy of Fallots. • Atrial Septal Defect, Ventricular Septal Defect., Eisenmenger’s complex. • Patent ductus arteriosus, AP window • Truncus Arteriosus. • Transposition of great arteries. • Total Anomaly of Pulmonary Venous Connection. • Pulmonary stenosis, atresia. • Coarctation of aorta. • Ebstein’s anomaly • Double outlet right ventricle, Single ventricle, Hypoplastic left heart syndrome.
XI	10	Pharmacology <input type="checkbox"/> Review <input type="checkbox"/> Pharmacokinetics <input type="checkbox"/> Analgesics/Anti inflammatory agents

		<ul style="list-style-type: none"> <input type="checkbox"/> Antibiotics, antiseptics <input type="checkbox"/> Drug reaction & toxicity <input type="checkbox"/> Drugs used in cardiac emergencies <input type="checkbox"/> Blood and blood components • Antithrombolytic agents • Inotropic agents • Beta-blocking agents • Calcium channel blockers. • Vaso constrictors • Vaso dilators • ACE inhibitors. • Anticoagulents • Antiarrhythmic drugs. • Anti hypertensives • Diuretics • Sedatives and tranquilizers. • Digitalis. • Antilipemics <input type="checkbox"/> Principles of drug administration, role and responsibilities of nurses and care of drugs
XII	20	<p>Nursing Care of patient undergoing cardio thoracic surgery</p> <ul style="list-style-type: none"> <input type="checkbox"/> Indications, selection of patient <input type="checkbox"/> Preoperative assessment and preparation; counselling. <input type="checkbox"/> Intraoperative care: Principles of open heart surgery, equipment, anaesthesia, cardiopulmonary by pass. <input type="checkbox"/> Surgical procedures for Coronary Artery Bypass Grafting, recent advances and types of grafts, Valve replacement or reconstruction, cardiac transplant, Palliative surgery and different Stents, vascular surgery, other recent advances. <input type="checkbox"/> Thoracic surgery: lobectomy, pneumonectomy, tumour excision etc <input type="checkbox"/> Immediate postoperative care : assessment, post operative problems and interventions : Bleeding, Cardiac tamponade, Low cardiac output, Infarction, Pericardial effusion, Pleural effusion, Pneumothorax, Haemothorax, Coagulopathy, Thermal imbalance, Inadequate., ventilation/perfusion, Neurological problems, renal problems, Psychological problems. <input type="checkbox"/> Chest physiotherapy

		<input type="checkbox"/> Nursing interventions- life style modification, complementary therapy/alternative systems of medicine. <input type="checkbox"/> Intermediate and late post operative care after CABG, valve surgery, others. Follow up care
XIII	5	Cardiac rehabilitation <input type="checkbox"/> Process <input type="checkbox"/> Physical evaluation <input type="checkbox"/> Life style modification <input type="checkbox"/> Physical conditioning for cardiovascular efficiency through exercise <input type="checkbox"/> Counseling <input type="checkbox"/> Follow up care
XIV	5	Intensive Coronary Care Unit/intensive cardio thoracic unit: <input type="checkbox"/> Quality assurance <ul style="list-style-type: none"> • Standards, Protocols, Policies, Procedures • Infection control; Standard safety measures • Nursing audit • Design of ICCU/ICTU • Staffing; cardiac team • Burn out syndrome <input type="checkbox"/> Nurse's role in the management of I.C.C.U and ICTU. <input type="checkbox"/> Mobile coronary care unit. <input type="checkbox"/> Planning inservice educational programme and teaching

Practical

Total = 960 Hours
1 Week = 30 Hours

S.No.	Dept/Unit	No. of Week	Total Hours
1.	Cardio thoracic -Medical	4	120 Hours
	-Surgical	4	120 Hours
2.	OTs (Cardiac and thoracic)	4	120 Hours
3.	Casualty	2	60 Hours
4	Diagnostic labs including cath lab	2	60 Hours
	ICCU	4	120 Hours

	ICU	4	120 Hours
	CCU	4	120 Hours
	Paediatric Intensive	2	60 Hours
	OPD	2	60 Hours
	Total	32 Weeks	960 Hours

Essential Nursing Skills

Procedures Observed

1. Echo cardiogram
2. Ultrasound
3. Monitoring JVP , CVP
4. CT SCAN
5. MRI
6. Pet SCAN
7. Angiography
8. Cardiac cathetrisation
9. Angioplasty
10. Various Surgeries
11. Any other

I. Procedures Assisted

1. Arterial blood gas analysis
2. Thoracentesis
3. Lung biopsy
4. Computer assisted tomography (CAT Scan)
5. M.R.I.
6. Pulmonary angiography
7. Bronchoscopy
8. Pulmonary function test
9. ET tube insertion
10. Tracheostomy tube insertion
11. Cardiac catheterisation
12. Angiogram
13. Defibrillation
14. Treadmill test
15. Echo cardiography
16. Doppler ultrasound
17. Cardiac surgery
18. Insertion of chest tube
19. CVP Monitoring
20. Measuring pulmonary artery pressure by Swan-Ganz Catheter
21. Cardiac Pacing

II. Procedures Performed

1. Preparation of assessment tool for CT client (Cardiac, thoracic and vascular).
2. ECG – Recording, Reading, Identification of abnormalities
3. Oxygen therapy – Cylinder, central supply,
Catheter, nasal canula, mask, tent
Through ET and Tracheostomy tube
Manual resuscitation bag
4. Mechanical ventilation
5. Spirometer
6. Tuberculen skin test
7. Aerosal therapy
8. Nebulizer therapy
9. Water seal drainage
10. Chest physiotheray including – Breathing Exercises
Coughing Exercises
Percussion & Vibration
11. Suctioning – Oropharyngeal, nasotracheal, Endotracheal
Through tracheostomy tube
12. Artificial airway cuff maintenance
13. CPR
14. Care of client on ventilator
15. Identification of different – Arrhythmias
Abnormal pulses, respirations
B.P. Variation
Heart sounds
Breath sounds
16. Pulse oxymetry
17. Introduction of intracath
18. Bolus I.V. Injection
19. Life line
20. Maintenance of “Heplock”
21. Subcutaneous of Heparin
22. Obtaining leg measurements to detect early swelling in
thrombophlebetes
23. Identification of Homans signs
24. Buerger – Allen exercises

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING - CRITICAL CARE NURSING

Placement: II Year

Hours of instruction
Theory: 150 hours
Practical: 950 hours
Total : 1100 hours

Course Description

This course is designed to assist students in developing expertise and indepth knowledge in the field of Critical care Nursing. It will help students to develop advanced skills for nursing intervention in caring for critically ill patients. It will enable the student to function as critical care nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of Critical Care Nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to Critical Care Nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients
3. Describe the various drugs used in critical care and nurses responsibility
4. Perform physical, psychosocial & spiritual assessment
5. Demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support.
6. Demonstrate skill in handling various equipments/gadgets used for critical care
7. Provide comprehensive care to critically ill patients.
8. Appreciate team work & coordinate activities related to patient care.
9. Practice infection control measures.
10. Assess and manage pain .

11. Identify complications & take appropriate measures.
12. Discuss the legal and ethical issues in critical care nursing
13. Assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
14. Assist in various diagnostic, therapeutic and surgical procedures
15. Incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing
16. Identify the sources of stress and manage burnout syndrome among health care providers.
17. Teach and supervise nurses and allied health workers.
18. Design a layout of ICU and develop standards for critical care nursing practice.

Course Content

Unit	Hours	Content
I	5	<p>Introduction to Critical Care Nursing</p> <ul style="list-style-type: none"> <input type="checkbox"/> Historical review- Progressive patient care(PPC) <input type="checkbox"/> Review of anatomy and physiology of vital organs, fluid and electrolyte balance <input type="checkbox"/> Concepts of critical care nursing <input type="checkbox"/> Principles of critical care nursing <input type="checkbox"/> Scope of critical care nursing <input type="checkbox"/> Critical care unit set up including equipments supplies, use and care of various type of monitors & ventilators <input type="checkbox"/> Flow sheets
II	10	<p>Concept of Holistic care applied to critical care nursing practice</p> <ul style="list-style-type: none"> <input type="checkbox"/> Impact of critical care environment on patients:- <ul style="list-style-type: none"> • Risk factors, Assessment of patients, Critical care psychosis, prevention & nursing care for patients affected with psychophysiological & psychosocial problems of critical care unit, Caring for the patient's family, family teaching <input type="checkbox"/> The dynamics of healing in critical care unit:- therapeutic touch, Relaxation, Music therapy, Guided Imagery, acupressure <input type="checkbox"/> Stress and burnout syndrome among health team members
III	14	<p>Review</p> <ul style="list-style-type: none"> <input type="checkbox"/> Pharmacokinetics

		<input type="checkbox"/> Analgesics/Anti inflammatory agents <input type="checkbox"/> Antibiotics, antiseptics <input type="checkbox"/> Drug reaction & toxicity <input type="checkbox"/> Drugs used in critical care unit (inclusive of inotropic, life saving drugs) <input type="checkbox"/> Drugs used in various body systems <input type="checkbox"/> IV fluids and electrolytes <input type="checkbox"/> Blood and blood components <input type="checkbox"/> Principles of drug administration, role of nurses and care of drugs
IV	5	Pain Management <input type="checkbox"/> Pain & Sedation in Critically ill patients <input type="checkbox"/> Theories of pain, Types of pain, Pain assessment, Systemic responses to pain <input type="checkbox"/> pain management-pharmacological and non-pharmacological measures <input type="checkbox"/> Placebo effect
V	5	Infection control in intensive care unit <input type="checkbox"/> Nosocomial infection in intensive care unit; methyl resistant staphylococcus aureus (MRSA), Disinfection, Sterilization, Standard safety measures, Prophylaxis for staff
VI	10	Gastrointestinal System <input type="checkbox"/> Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Gastrointestinal Bleeding, Abdominal injury, Hepatic Disorders:-Fulminant hepatic failure, Hepatic encephalopathy, Acute Pancreatitis, Acute intestinal obstruction, perforative peritonitis
VII	10	Renal System <input type="checkbox"/> Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:- Acute Renal Failure, Chronic Renal Failure, Acute tubular necrosis, Bladder trauma <input type="checkbox"/> Management Modalities: Hemodialysis, Peritoneal Dialysis, Continuous Ambulatory Peritoneal Dialysis, Continuous arterio venous hemodialysis, Renal Transplant

VIII	10	<p>Nervous System</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:- Common Neurological Disorders:-Cerebrovascular disease, Cerebrovascular accident, Seizure disorders, GuilleinBarre-Syndrome, Myasthenia Gravis, Coma, Persistent vegetative state, Encephalopathy, Head injury, Spinal Cord injury □ Management Modalities: Assessment of Intracranial pressure, Management of intracranial hypertension, Craniotomy □ Problems associated with neurological disorders: Thermo regulation, Unconsciousness, Herniation syndrome
IX	5	<p>Endocrine System</p> <ul style="list-style-type: none"> □ Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing Management of :- Hypoglycemia, Diabetic Ketoacidosis, Thyroid crisis, Myxoedema, Adrenal crisis, Syndrome of Inappropriate/hypersecretion of Antidiuretic Hormone (SIADH)
X	15	<p>Management of other Emergency Conditions</p> <ul style="list-style-type: none"> □ Mechanism of injury, Thoracic injuries, Abdominal injuries, pelvic fractures, complications of trauma, Head injuries □ Shock: Shock syndrome, Hypovolemic, Cardiogenic, Anaphylactic, Neurogenic and Septic shock □ Systemic inflammatory Response: The inflammatory response, Multiple organ dysfunction syndrome □ Disseminated Intravascular Coagulation □ Drug Overdose and Poisoning, □ Acquired Immunodeficiency Syndrome (AIDS) □ Ophthalmic: Eye injuries, Glaucoma, retinal detachment □ Ear Nose Throat: Foreign bodies, stridor, bleeding, quincy, acute allergic conditions □ Psychiatric emergencies;, suicide, □ crisis intervention

XI	20	<p>Cardiovascular emergencies</p> <ul style="list-style-type: none"> □ Principles of Nursing in caring for patient's with Cardiovascular disorders □ Assessment: Cardiovascular system: Heart sounds, Diagnostic studies:- Cardiac enzymes studies, Electrocardiographic monitoring, Holter monitoring, Stress test. Echo cardiography, Coronary angiography, Nuclear medicine studies □ Causes, Pathophysiology, Clinical types, Clinical features, Diagnostic Prognosis, Management : Medical, Surgical & Nurisng management of:- Hypertensive crisis, Coronary artery disease, Acute Myocardial infarction, Cardiomyopathy, Deep vein thrombosis, Valvular diseases, Heart block, Cardiac arrhythmias & conduction disturbances, Aneurysms, Endocarditis, Heart failure Cardio pulmonary resuscitation BCLS/ ACLS □ Management Modalities: Thrombolytic therapy, Pacemaker – temporary & permanent, Percutaneous transluminal coronary angioplasty, Cardioversion, Intra Aortic Balloon pump monitoring, Defibrillations, Cardiac surgeries, Coronary Artery Bypass Grafts (CABG/MICAS), Valvular surgeries, Heart Transplantation, Autologous blood transfusion, Radiofrequency Catheter Ablation
XII	15	<p>Respiratory System</p> <ul style="list-style-type: none"> □ Acid-base balance & imbalance □ Assesment : History & Physical Examination □ Diagnostic Tests:Pulse Oximetry, End –Tidal Carbon Dioxide Monitoring, Arterial blood gas studies, chest radiography, pulmonary Angiography, Bronchoscopy, Pulmonary function Test, Ventilation perfusion scan, Lung ventilation scan □ Causes Pathophysiology, Clinical types, Clinical features, Prognosis, Management: Medical, Surgical and Nursing management of Common pulmonary disorders:-Pneumonia, Status asthmaticus, interstitial drug disease, Pleural effusion, Chronic obstructive pulmonary disease, Pulmonary tuberculosis, Pulmonary edema, Atelectasis, Pulmonary embolism, Acute respiratory failure, Acute respiratory distress syndrome (ARDS),

		<p>Chest Trauma Haemothorax, Pneumothorax</p> <ul style="list-style-type: none"> □ Management Modalities:-Airway Management □ Ventilatory Management:-Invasive, non- invasive, long term mechanical ventilations □ Bronchial Hygiene:-Nebulization, deep breathing exercise, chest physiotherapy, postural drainage, Inter Costal Drainage, Thoracic surgeries
XIII	7	<p>Burns</p> <ul style="list-style-type: none"> □ Clinical types, classification, pathophysiology, clinical features, assessment, diagnosis, prognosis, Management: Medical, Surgical & Nursing management of burns □ Fluid and electrolyte therapy – calculation of fluids and its administration □ Pain management □ Wound care □ Infection control □ Prevention and management of burn complications □ Grafts and flaps □ Reconstructive surgery □ Rehabilitation
XIV	5	<p>Obstetrical Emergencies</p> <ul style="list-style-type: none"> □ Causes, Pathophysiology, Clinical types, clinical features, diagnostic Prognosis, Management: Medical, Surgical and Nursing management of :Antepartum haemorrhage, Preeclampsia, eclampsia, Obstructed labour and ruptured uterus, Post partum haemorrhage, Puerperal sepsis, Obstetrical shock
XV	10	<p>Neonatal Paediatric emergencies</p> <ul style="list-style-type: none"> □ Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Neonatal emergencies □ Asphyxia Neonatarum, Pathological Jaundice in Neonates, Neonatal seizures, Metabolic disorders, Intra cranial Hemorrhage, Neonatal Sepsis, RDS/HMD (Respiratory Distress Syndrome/Hyaline Membrane Disease), Congenital disorders:-

		<ul style="list-style-type: none"> • Cyanotic heart disease, tracheo oesophageal fistula, congenital hypertropic pyloric stenosis, imperforate anus • Pediatric emergencies <ul style="list-style-type: none"> <input type="checkbox"/> Dehydration, Acute broncho pneumonia, Acute respiratory distress syndrome, Poisoning, Foreign bodies, seizures, traumas, Status asthmaticus
XVI	2	Legal and ethical issues in critical care-Nurse's role <ul style="list-style-type: none"> <input type="checkbox"/> Brain death <input type="checkbox"/> Organ donation & Counselling <input type="checkbox"/> Do Not Resuscitate(DNR) <input type="checkbox"/> Euthanasia <input type="checkbox"/> Living will

Practical

Total = 960 Hours
1 Week = 30 Hours

S.No.	Dept/Unit	No. of Week	Total Hours
1.	Burns ICU	2	60 Hours
2.	Medical ICU	8	240 Hours
3.	Surgical ICU	12	360 Hours
4.	CCU	2	60 Hours
5	Emergency Department	3	90 Hours
6.	Dialysis Unit	1	30 Hours
7.	Transplant Room	2	60 Hours
8.	Paediatric/ NICU	2	60 Hours
	Total	32 Weeks	960 Hours

ESSENTIAL CRITICAL CARE NURSING SKILLS

I. Procedures Observed

1. CT Scan
2. MRI
3. EEG
4. Hemodialysis
5. Endoscopic Retrograde cholangio Pancreaticogram(ERCP)
6. Heart/ Neuro/GI./ Renal Surgeries

II. Procedures Assisted

1. Advanced life support system
2. Basic cardiac life support
3. Arterial line/arterial pressure monitoring/blood taking
4. Arterial blood gas
5. ECG recording
6. Blood transfusion
7. IV cannulation therapy
8. Arterial Catheterization
9. Chest tube insertion
10. Endotracheal intubations
11. Ventilation
12. Insertion of central line/cvp line
13. Connecting lines for dialysis

III. Procedure Performed

1. Airway management
 - a. Application of oropharyngeal airway
 - b. Oxygen therapy
 - c. CPAP (Continuous Positive Airway pressure)
 - d. Care of tracheostomy
 - e. Endotracheal extubation
2. Cardiopulmonary resuscitation, Basic cardiac life support, ECG
3. Monitoring of critically ill patients – clinically with monitors, capillary refill time (CRT) assessment of jaundice, ECG.
4. Gastric lavage
5. Assessment of critically ill patients
Identification & assessment of risk factors, Glasgow coma scale,

and dolls eye movement, arterial pressure monitoring, cardiac output/pulmonary artery pressure monitoring, and detection of life threatening abnormalities

6. Admission & discharge of critically ill patients

7. Nutritional needs – gastrostomy feeds, pharyngeal feeds, jejunostomy feeds, TPN, formula preparation & patient education.

8. Assessment of patient for alteration in blood sugar levels monitoring blood sugar levels periodically & administering insulin periodically.

9. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, use of insulin syringes/ tuberculin, monitoring fluid therapy, blood administration.

10. Setting up dialysis machine and starting, monitoring and closing dialysis

11. Procedures for prevention of infections:

Hand washing, disinfection & sterilization surveillance, and fumigation universal precautions.

12. Collection of specimen.

13. Setting, use & maintenance of basic equipment, ventilator, O2 analyzer, monitoring equipment, transducers, defibrillator, infusion & syringe pumps, centrifuge machine.

IV Other Procedures:

CLINICAL SPECIALITY-II

MEDICAL SURGICAL NURSING- ONCOLOGY NURSING

Placement : II Year

Hours of Instruction

Theory : 150 hours

Practicals : 950 hours

Total : 1100 hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of oncology Nursing. It will help students to develop advanced skills for nursing intervention in various oncological conditions. It will enable the student to function as oncology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of oncology nursing

Objectives

1. Explain the prevention, screening and early detection of cancer
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of oncological disorders of various body systems
3. Describe the psychosocial effects of cancer on patients and families.
4. Demonstrate skill in administering/assisting in various treatment modalities used for patients with cancer
5. Apply nursing process in providing holistic care to patients with cancer.
6. Apply specific concepts of pain management
7. Appreciate the care of death and dying patients and value of bereavement support.
8. Describe the philosophy, concept and various dimensions of palliative care
9. Appreciate the role of alternative systems of medicine in care of cancer patients
10. Appreciate the legal & ethical issues relevant to oncology nursing

11. Recognize and manage Oncological emergencies
12. Counsel the patients with cancer and their families
13. Incorporate evidence based nursing practice and identify the areas of research in the field of oncology nursing
14. Recognize the role of oncology nurse practitioner as a member of oncology team
15. Collaborate with other agencies and utilize resources in caring for cancer patients.
16. Teach and supervise nurses and allied health workers.
17. Design a layout and develop standards for management of oncology units/hospitals and nursing care.

Course Content

Unit	Hours	Content
I	4	Introduction <ul style="list-style-type: none"> <input type="checkbox"/> Epidemiology-Incidence, Prevalence – Global, National, State and Local <input type="checkbox"/> Disease burden, concept of cancer, risk factors <input type="checkbox"/> Historical perspectives <input type="checkbox"/> Trends and issues <input type="checkbox"/> Principles of cancer management <input type="checkbox"/> Roles and responsibilities of oncology nurse
II	5	The Nature of Cancer <ul style="list-style-type: none"> <input type="checkbox"/> Normal cell biology <input type="checkbox"/> The Immune system <input type="checkbox"/> Pathological and pathophysiological changes in tissues • Biology of the cancer cell • Clone formation Transformation • Tumor stem lines • Structure of a solid tumor • Products produced by the tumor • Systemic effects of tumor growth
III	4	Etiology of Cancer <ul style="list-style-type: none"> <input type="checkbox"/> Carcinogenesis, <input type="checkbox"/> Theories of cancer causation <input type="checkbox"/> Risk factors <input type="checkbox"/> Carcinogens – genetic factors, chemical carcinogens, radiation, viruses, Immune system failure, rapid tissue proliferation <input type="checkbox"/> Hormone changes, diet, emotional factors.

<p>IV</p>	<p>10</p>	<p>Diagnostic Evaluation</p> <ul style="list-style-type: none"> <input type="checkbox"/> Health assessment: History taking, physical examination, <input type="checkbox"/> Staging and grading of tumors, <input type="checkbox"/> TNM Classification <input type="checkbox"/> Common diagnostic tests • Blood investigation: Haemetological, Bio-chemical, Tumor markers, Hormonal assay • Cytology:Fine needle aspiration cytology(FNAC) • Histopathology: Biopsy • Radiological assessment: MRI, Ultrasound, Computed tomography, Mammography, Positron emission tomography(PET), Radio nuclide imaging, Functional metabolism imaging • Endoscopies <p>Nurses responsibilities in diagnostic measures</p>
<p>V</p>	<p>10</p>	<p>Levels of prevention and care</p> <ul style="list-style-type: none"> <input type="checkbox"/> Primary prevention – Guidelines for cancer detection, general measures, Warning signs of cancer, <input type="checkbox"/> Self examination-Oral, Breast, Testicular <input type="checkbox"/> Secondary prevention – early diagnosis. <input type="checkbox"/> Screening <input type="checkbox"/> Tertiary prevention – disability limitation, <input type="checkbox"/> Rehabilitation :Mobility , Speech, Bowel and bladder, Ostomies etc <input type="checkbox"/> Patient and family education, <input type="checkbox"/> Discharge instruction, follow-up care and use of community resources.
<p>VI</p>	<p>25</p>	<p>Cancer Treatment Modalities and Nurse’s Role</p> <ul style="list-style-type: none"> <input type="checkbox"/> Surgery • Principles of surgical oncology • Current surgical strategy, • Determining surgical risk • Special surgical techniques • Pre-intra-postoperative nursing care • Acute and chronic surgical complications • Future directions and advances <input type="checkbox"/> Chemotherapy • Principles and classification of chemotherapeutics • Pharmacology of antineoplastic drugs- Mechanism of action, Absorption, protein binding, Bio-transformation, excretion, common side effects,

	<p>drug toxicity</p> <ul style="list-style-type: none"> • Calculating drug doses, • Therapeutic response to chemotherapy-Tumor variables, drug resistance, • Safety precautions <p>☐ Radiation Therapy</p> <ul style="list-style-type: none"> • Physics of radiotherapy • Types of ionizing rays • Radiation equipments:Linear accelerator, cobalt, Implants,Isotopes, • Types of therapies: Oral, Brachy therapy, tele therapy, selectron therapy • Effects of radiation on the body tissue, • Radiation biology – cell damage hypoxic cells, alteration of tumor kinetics. • Approaches to radiation therapy – • External radiotherapy • Internal radiotherapy – unsealed, • Sealed sources. • Effectiveness of radiotherapy-Radiosensitivity, treatment effects • Complications of radiotherapy • Radiation safety: Standards of Bhaba Atomic Research Centre(BARC) <p>☐ Bone Marrow Transplantation /Stem Cell Transplantation</p> <ul style="list-style-type: none"> • Types, indications, transplantation procedure, complications and nursing management • Types and donor sources • Preparation and care of donor and recipient • Bone marrow bank • Legal and ethical issues <p>☐ Immunotherapy (Biotherapy)</p> <ul style="list-style-type: none"> • Concepts and principles • Classification of agents • Treatment and applications <p>☐ Gene Therapy</p> <ul style="list-style-type: none"> • Current Concepts and practices <p>☐ Alternative and Complementary Therapies</p> <ul style="list-style-type: none"> • Current practices
--	---

VII	10	<input type="checkbox"/> Pain management:- Theories, types and <ul style="list-style-type: none"> • Nature of cancer pain • Pathophysiology of pain • Pain threshold <input type="checkbox"/> Assessment of pain <ul style="list-style-type: none"> • Principles of cancer pain control • Pharmacological: Opioid and non-opioid analgesic therapy • Patient controlled analgesia(PCA) • Other invasive techniques of pain control • Recent developments in Cancer pain <input type="checkbox"/> Non- Pharmacological pain relief technique- <ul style="list-style-type: none"> • Complementary therapies(Music, massage, meditation, relaxation techniques, biofeed back etc) • Psychological intervention in pain control • Alternative system of medicines <p>Role of nurse</p>
VIII	5	Palliative care <ul style="list-style-type: none"> <input type="checkbox"/> Definition and scope, philosophy <input type="checkbox"/> Concept and elements of palliative care <input type="checkbox"/> Global and Indian perspective of palliative care <input type="checkbox"/> Quality of life issues <input type="checkbox"/> Communication skill <input type="checkbox"/> Nursing perspective of palliative care and its elements <input type="checkbox"/> Home care <input type="checkbox"/> Hospice care <p>Role of nurse in palliative care</p>
IX	2	<input type="checkbox"/> Infection control: <ul style="list-style-type: none"> • Process of infection, risk of hospitalization, nosocomial infections- prevention and control of infection in acute, long term care facility and community based care • Standard safety measures
X	30	Nursing Care of Patients With Specific Malignant Disorders <ul style="list-style-type: none"> <input type="checkbox"/> Malignancies of G.I. system-oral, oesophagus, stomach, rectal, liver & pancreas, care of ostomies/stoma <input type="checkbox"/> Respiratory malignancies <input type="checkbox"/> Genito urinary system malignancies- prostate Bladder, renal testicular malignancies,

		<input type="checkbox"/> Gynecological malignancies-cervix, uterus, ovary <input type="checkbox"/> Hematological malignancies-Lymphomas, Leukemias. <input type="checkbox"/> Malignancies of musculoskeletal system <input type="checkbox"/> Endocrine malignancies <input type="checkbox"/> Skin <input type="checkbox"/> Head and Neck -brain tumors <input type="checkbox"/> Other malignancies – Breast cancer, AIDS related Malignancies (Kaposi's Sarcoma)
XI	10	Paediatric malignancies <input type="checkbox"/> Leukemia, Lymphoma, Neuro- blastoma <input type="checkbox"/> Wilm's tumor, Soft tissue sarcoma, Retinoblastoma <input type="checkbox"/> Nursing Management of children with Paediatric Malignancies
XII	15	Nursing Management of Physiological Conditions and Symptoms Of Cancer Patient <input type="checkbox"/> Nutrition: - effects of cancer on nutritional Status and its consequences:-Anemia, Cachexia, Xerostomia, mucositis, Dysphagia , nausea and vomiting, constipation, diarrhoea, electrolyte imbalances, taste alterations <input type="checkbox"/> Impaired mobility: Decubitus ulcer, pathologic fractures, thrombophlebitis, pulmonary embolism, contractures, footdrop Other symptoms <input type="checkbox"/> Dyspepsia & hiccup, dyspnoea <input type="checkbox"/> intestinal obstruction, <input type="checkbox"/> Fungating wounds <input type="checkbox"/> Anxiety & depression, insomnia <input type="checkbox"/> Lymph edema Impact of cancer on sexuality: <input type="checkbox"/> Effects of radiotherapy/ chemotherapy/surgery on sexuality of the cancer patient <input type="checkbox"/> Nursing management of cancer patients experiencing sexual dysfunction <input type="checkbox"/> Sexual counseling
XIII	10	Cancer Emergencies <input type="checkbox"/> Disseminated intravascular coagulation(DIC), <input type="checkbox"/> Malignant pleural effusion <input type="checkbox"/> Neoplastic cardiac tamponade and septic shock <input type="checkbox"/> spinal cord compression <input type="checkbox"/> Superior venacava syndrome

		<input type="checkbox"/> Metabolic emergency: hyper and hypo calcemia <input type="checkbox"/> Surgical emergency <input type="checkbox"/> Urological emergency <input type="checkbox"/> Hemorrhage <input type="checkbox"/> Organ obstruction <input type="checkbox"/> Brain metastasis <input type="checkbox"/> Nurses role in managing oncologic emergencies
XIV	8	Psycho-Social Aspects of Nursing Care <input type="checkbox"/> Psychological responses of patients with cancer <input type="checkbox"/> Psychosocial assessment – <input type="checkbox"/> Crisis intervention, coping mechanisms <input type="checkbox"/> Stress management, spiritual/cultural care and needs <input type="checkbox"/> Counseling: individual and family <input type="checkbox"/> Maximizing quality of life of patient and family Ethical, moral and legal issues- <input type="checkbox"/> End of life care <input type="checkbox"/> Grief and grieving process <input type="checkbox"/> Bereavement support <input type="checkbox"/> Care of Nurses who care for the dying.
XV	2	Layout and Design of an oncology institution/ ward, OPD, chemotherapy unit, Bone marrow transplantation unit, Pain clinic etc <input type="checkbox"/> Practice Standards of oncology nursing • Policies and Procedures <input type="checkbox"/> Establishing Standing orders and Protocols Quality Assurance Programme in oncology units <input type="checkbox"/> Nursing audit

Clinical Experience

S.No.	Dept/Unit	No. of Week	Total Hours
1.	Medical Oncology ward	6	180Hours
2.	Surgical Oncology ward	6	180 Hours
3.	Bone marrow transplantation Unit	2	60 Hours
4.	Operation Theatre	2	60 Hours
5	Radiotherapy Unit	2	60 Hours
6.	Chemotherapy Unit	4	120 Hours
7.	Out patient department and pain clinic	2	60 Hours
8.	Pediatric Oncology ward	2	60 Hours
	Palliative Care ward	2	60 Hours
	Community oncology	2	60 Hours
	Hospice	1	30 Hours
	Other field visits	1	30 Hours
	Total	32 Weeks	960 Hours

Procedures Observed

1. CT Scan
2. MRI
3. PET Scan(Positron Emission Tomography)
4. Ultra sound
5. Mammography
6. Radio Nuclide Imaging
7. Bone Scan
8. Thyroid Function Test
9. Functional and Metabolic Imaging
10. Transportation of radioactive materials
11. Others

Procedures Assisted

1. IV cannulation – Open method
2. Chemotherapy
3. Radiotherapy – Brachytherapy – Low Density Radiation, High Density Radiation.
4. Interstitial implantation
5. Bio-therapy and Gene therapy
6. Teletherapy – Treatment planning
7. Bone marrow aspiration and biopsy
8. Biopsy – tissue
9. FNAC – Fine Needle Aspiration Cytology and biopsy
10. Advance Cardiac life support
11. Endotracheal intubation
12. Defibrillation Ventilation
13. Tracheostomy
14. Thoracentesis
15. Paracentesis
16. Lumbar Puncture
17. Arterial Blood Gas
18. Nerve Block
19. Chest tube insertion
20. Intercostal drainage
21. CVP monitoring

Procedure Performed

1. Screening for cancer
2. Assessment of pain
3. Assessment of Nutritional status
4. Care of Tracheostomy
5. Endotracheal intubation
6. Gastric gavage
7. Pap smear
8. IV cannulation
9. Care of surgical flaps
10. Care of ostomies
11. Blood transfusion and component therapy
12. Counseling
13. Practice standard safety measures
14. Care of dead body and mortuary formalities

Other procedures**(As per the institutional protocol):**

1. Alternative therapies

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING- NEUROSCIENCES NURSING

Placement : II Years

Hours of Instruction
Theory – 150 Hours
Practical- 950 Hours
Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and indepth knowledge in the field of neurology and neurosurgical Nursing. It will help students to develop advanced skills for nursing intervention in caring for patients with neurological and neurosurgical disorders. It will enable the student to function as neuroscience nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of neurology and neurosurgical Nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to neurology and neurosurgical Nursing.
2. Review the anatomy and physiology of nervous system
3. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of patients with neurological and neurosurgical disorders
4. Perform neurological assessment and assist in diagnostic procedures
5. Describe the concepts and principles of neuroscience nursing
6. Describe the various drugs used in neurosciences and nurses responsibility
7. Assist in various therapeutic and surgical procedures in neuroscience nursing

8. Demonstrate advance skills/competence in managing patients with neurological and neurosurgical disorder following nursing process approach
9. Identify psychosocial problems of patients with disabilities and assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
10. Participate in preventive, promotive and rehabilitative services for neurological and neurosurgical patients.
11. Explain the legal and ethical issues related to brain death, organ transplantation and practice of neuroscience nursing
12. Incorporate evidence based nursing practice and identify the areas of research in the field of neuroscience nursing
13. Organise and conduct inservice education program for nursing personnel.
14. Develop standards of care for quality assurance in neuroscience nursing practice
15. Identify the sources of stress and manage burnout syndrome among health care providers.
16. Teach and supervise nurses and allied health workers.
17. Plan and develop physical layout of neuro intensive care unit

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> □ Introduction to neuroscience(neurological and neurosurgical) nursing • History-Development in neurological and neurosurgical nursing, Service & education • Emerging trends and issues in neurology and neuro surgery and its implication to nursing. • neurological and neurosurgical problems – • Concepts, principles and nursing perspectives • Ethical and legal issues • Evidence based nursing and its application in neurological and neurosurgical nursing
II	5	<p>Epidemiology</p> <ul style="list-style-type: none"> □ Major health problems- □ Risk factors associated with neurological conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations, occupational and infections. □ Health promotion, disease prevention, life style

		modification and its implications to nursing Alternate system of medicine/complementary therapies
III	10	Review of Anatomy and physiology <ul style="list-style-type: none"> <input type="checkbox"/> Embryology <input type="checkbox"/> Structure and functions of Nervous system- CNS, ANS, cerebral circulation , cranial and spinal nerves and reflexes, motor and sensory functions <input type="checkbox"/> Sensory organs
IV	15	Assessment and diagnostic measures <ul style="list-style-type: none"> <input type="checkbox"/> Assessment <ul style="list-style-type: none"> • History taking • Physical assessment, psychosocial assessment • Neurological assessments, Glasgow coma scale interpretation & its relevance to nursing. • Common assessment abnormalities <input type="checkbox"/> Diagnostic measures <ul style="list-style-type: none"> • Cerebro spinal fluid analysis • Radiological studies-Skull and spine X-ray Cerebral Angiography, CT Scan, Single Photon Emission Computer Tomography(SPECT), MRI (Magnetic Resonance Imaging), MRA, MRS, Functional MRI, Myelography, PET (Positron Emission Test), Interventional radiology. • Electorgraphic studies- Electro encephalo graphy, MEG, EMG, video EEG, • Nerve conduction studies-Evoked potentials, visual evoked potentials, brain stem auditory evoked potentials, somatosensory evoked potentials • Ultrasound studies-Carotid duplex, transcranial Doppler sonography, • Immunological studies • Biopsies – muscle, nerve and Brain. Interpretation of diagnostic measures <p>Nurse’s role in diagnostic tests</p>
V	5	Meeting Nutritional needs of neurological patients <ul style="list-style-type: none"> <input type="checkbox"/> Basic nutritional requirements <input type="checkbox"/> Metabolic changes following injury and starvation <input type="checkbox"/> Nutritional assessment <input type="checkbox"/> Common neurological problems that interfere with nutrition and strategies for meeting their nutritional needs

		<input type="checkbox"/> Special metabolic and electrolyte imbalances <input type="checkbox"/> Chronic fatigue syndrome
VI	5	Drugs used in neurological and neurosurgical disorders <input type="checkbox"/> Classification <input type="checkbox"/> Indications, contraindications, actions and effects, toxic effects Role of nurse
VII	10	Traumatic conditions. <input type="checkbox"/> Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Cranio cerebral injuries. • Spinal & Spinal cord injuries. • Peripheral nerve injuries. • Unconsciousness
VIII	10	Cerebro vascular disorders. <input type="checkbox"/> Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Stroke & arterio venous thrombosis. • Haemorrhagic embolus. • Cerebro vascular accidents. • Intracranial aneurysm. • Subarchnoid Haemorrhage. • Arterio venous fistula. • Brain tumours <input type="checkbox"/> Diseases of cranial nerves;Trigiminal neuralgia, Facial palsy, Bulbar palsy.
IX	10	Degenerating and demyelinating disorders <input type="checkbox"/> Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of <ul style="list-style-type: none"> • Motor neuron diseases. • Movement disorders- Tics, dystonia, chorea, wilson's disease, essential tremors • Dementia. • Parkinson's disease.

		<ul style="list-style-type: none"> • Multiple sclerosis. • Alzemer's
X	10	<p>Neuro infections</p> <p>□ Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of Neuro infections</p> <ul style="list-style-type: none"> • Meningitis-types • Encephalitis. • Poliomyelitis. • Parasitic infections. • Bacterial infections • Neurosyphilis. • HIV & AIDS. • Brain abscess.
XI	10	<p>Paroxysmal disorders.</p> <p>□ Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Epilepsy and seizures. • Status epilepticus. • Syncope. • Menier's syndrome. • Cephalgia.
XII	10	<p>Developmental disorders.</p> <p>□ Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Hydrocephalus. • Craniosynostosis. • spina bifida- Meningocele, Meningomyelocele encephalocele • syringomyelia. • Cerebro vascular system anomalies. • Cerebral palsies. • Down's syndrome
XIII	10	<p>Neuro muscular disorders.</p> <p>□ Causes, pathophysiology, Clinical types, Clinical</p>

		<p>features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Polyneuritis – G B Syndrome. • Muscular dystrophy. • Myasthenia gravis. • Trigeminal neuralgia. • Bell’s palsy. • Menier’s disease • Carpal tunnel syndrome • Peripheral neuropathies
XIV	5	<p>Neoplasms – surgical conditions.</p> <p><input type="checkbox"/> Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Space occupying lesions -types • Common tumors of CNS,
XV	5	<p>Other disorders</p> <p><input type="checkbox"/> Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> <input type="checkbox"/> Metabolic disorders- diabetes, insipidus, metabolic encephalopathy <input type="checkbox"/> Sleep disorders <input type="checkbox"/> Auto immune disorders- multiple sclerosis, inflammatory myopathies
XVI	10	<p>Neuro emergencies</p> <p><input type="checkbox"/> Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Increased intracranial pressure • Unconscious • Herniation syndrome • Seizures • Severe head injuries • Spinal injuries • Cerebro vascular accidents
XVII	5	<p>Rehabilitation.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Concept and Principles of Rehabilitation. <input type="checkbox"/> Factors affecting quality of life and coping <input type="checkbox"/> Rehabilitation in acute care setting, and following stroke, head

8.	Head Injury ward	3	90 Hours
9	ICU- neuro medicine	4	120 Hours
10	ICU- neuro surgical	4	120 Hours
11	Rehabilitation	2	60 Hours
12	Operation Theatre	2	60 Hours
	Total	32 Weeks	960 Hours

ESSENTIAL NEURO NURSING SKILLS

I. Procedures Observed

1. CT scan
2. MRI
3. PET
4. EEG
5. EMG
6. Sleep pattern studies/Therapy
7. Radiographical studies
8. Neuro surgeries
9. Nerve conduction studies
10. Ultrasound studies
11. Any other

II. Procedures Assisted

1. Advanced Cardiac life support
2. Lumbar Puncture
3. Biopsies – muscle, nerve and Brain
4. Arterial Blood Gas
5. ECG Recording
6. Blood transfusion
7. IV cannulation – open method
8. Endotracheal intubation
9. Ventilation
10. Tracheostomy
11. ICP monitoring
12. Gama Knife
13. Cereberal angiography
14. Myelography
15. Neuro surgeries

III. Procedures Performed:

1. Airway management
 - a. Application of Oro Pharyngeal Airway
 - b. Care of Tracheostomy
 - c. Conduct Endotracheal Intubation
 - d. use of AMBU bag, artificial respirators
 - e. Setting of Ventilators and Care of patients on ventilators
2. Cardio Pulmonary Resuscitation -Defibrillation
3. Neurological assessment -Glasgow coma scale
4. Gastric Lavage
5. IV Cannulation
6. Administration of emergency IV Drugs, fluid
7. Care of patients with incontinence, bladder training
Catheterization
8. Care of patients on traction related to the neurological conditions
9. Blood Administration.
10. Muscle strengthening exercises
11. Guidance and counseling
12. Monitoring – management and care of monitors.

IV. Other Procedures:

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING- NEPHRO-UROLOGY NURSING

Placement : II Year

Hour of Instruction

Theory : 150 Hours

Practical : 950 Hours

Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of Nephro and urological Nursing. It will help students to develop advanced skills for nursing intervention in various nephro and urological conditions. It will enable the student to function as nephro and urology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of nephro and urology nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to **nephro and urological** nursing
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of **nephro and urological** conditions
3. Perform physical, psychosocial & spiritual assessment
4. Assist in various diagnostic, therapeutic and surgical interventions
5. Provide comprehensive nursing care to patients with **nephro and urological conditions**
6. Describe the various drugs used in **nephro and urological** conditions and nurses responsibility

7. Demonstrate skill in handling various equipments/gadgets used for patients with **nephro and urological** conditions
8. Appreciate team work & coordinate activities related to patient care.
9. Practice infection control measures.
10. Identify emergencies and complications & take appropriate measures
11. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
12. Discuss the legal and ethical issues in **nephro and urological** nursing
13. Identify the sources of stress and manage burnout syndrome among health care providers
14. Appreciate the role of alternative system of medicine in the care of patient
15. Incorporate evidence based nursing practice and identify the areas of research in the field of **nephro and urological** nursing
16. Teach and supervise nurses and allied health workers.
17. Design a layout of kidney transplant unit and dialysis unit
18. Develop standards of nephro urological nursing practice

Course Content

Unit	Hours	Content
I	5	Introduction <ul style="list-style-type: none"> <input type="checkbox"/> Historical development: trends and issues in the field of nephro and urological nursing. <input type="checkbox"/> nephro and urological problems <input type="checkbox"/> Concepts, principles and nursing perspectives <input type="checkbox"/> Ethical and legal issues <input type="checkbox"/> Evidence based nursing and its application in nephro and urological nursing(to be incorporated in all the units)
II	5	Epidemiology <ul style="list-style-type: none"> <input type="checkbox"/> Major health problems- urinary dysfunction, urinary tract infections, Glomerular disorders, obstructive disorders and other urinary disorders <input type="checkbox"/> Risk factors associated with nephro and urological conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations <input type="checkbox"/> Health promotion, disease prevention, life style modification and its implications to nursing

		Alternate system of medicine/complementary therapies
III	5	Review of anatomy and physiology of urinary system <ul style="list-style-type: none"> <input type="checkbox"/> Embryology <input type="checkbox"/> Structure and functions <input type="checkbox"/> Renal circulation <input type="checkbox"/> Physiology of urine formation <input type="checkbox"/> Fluid and electrolyte balance <input type="checkbox"/> Acid base balance <input type="checkbox"/> Immunology specific to kidney
IV	20	Assessment and diagnostic measures <ul style="list-style-type: none"> <input type="checkbox"/> History taking <input type="checkbox"/> Physical assessment, psychosocial assessment <input type="checkbox"/> Common assessment abnormalities-dysurea, frequency, enuresis, urgency, hesitancy, hematuria, pain, retention, burning on urination, pneumaturia, incontinence, nocturia, polyurea, anuria, oliguria, <input type="checkbox"/> Diagnostic tests-urine studies, blood chemistry, radiological procedures-KUB, IVP,nephrotomogram, retrograde pyelogram, renal arteriogram, renalultrasound, CT scan, MRI, cystogram, renal scan, biopsy, endoscopy-cystoscopy, urodynamics studiescystometrogram, urinary flow study, sphincter electromyography, voiding pressure flow study, videourodynamics, Whitaker study Interpretation of diagnostic measures Nurse's role in diagnostic tests
V	5	Renal immunopathy/Immunopathology <ul style="list-style-type: none"> <input type="checkbox"/> General Concept of immunopathology <input type="checkbox"/> Immune mechanism of glomerular vascular disease <input type="checkbox"/> Role of mediator systems in glomerular vascular disease
VI	15	Urological Disorders and Nursing Management <ul style="list-style-type: none"> <input type="checkbox"/> Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical and nursing management of <input type="checkbox"/> Urinary tract infections- pyelonephritis, lower urinary tract infections,

		<ul style="list-style-type: none"> <input type="checkbox"/> Disorders for ureters, bladder and urethra <input type="checkbox"/> Urinary tract infections- <input type="checkbox"/> Urinary dysfunctions- urinary retention, urinary incontinence, urinary reflux, <input type="checkbox"/> Bladder disorders- neoplasms, calculi, neurogenic bladder, trauma, congenital abnormalities <input type="checkbox"/> Benign prostrate hypertrophy(BPH) <input type="checkbox"/> Ureteral disorders: ureteritis, ureteral trauma, congenital anomalies of ureters <input type="checkbox"/> Urethral disorders- tumours, trauma, congenital anomalies of ureters,
VII	25	<p>Glomerular disorders and nursing management</p> <ul style="list-style-type: none"> <input type="checkbox"/> Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical and nursing management of <input type="checkbox"/> Glomerular nephritis- chronic, acute , nephritic syndrome <input type="checkbox"/> Acute Renal failure and chronic renal failure. <input type="checkbox"/> Renal calculi <input type="checkbox"/> Renal tumours-benign and malignant <input type="checkbox"/> Renal trauma <input type="checkbox"/> Renal abscess <input type="checkbox"/> Diabetic nephropathy <input type="checkbox"/> Vascular disorders <input type="checkbox"/> Renal tuberculosis <input type="checkbox"/> Polycystic <input type="checkbox"/> Congenital disorders <input type="checkbox"/> Hereditary renal disorders
VIII	10	<ul style="list-style-type: none"> <input type="checkbox"/> Management of Renal emergencies <input type="checkbox"/> Anuria <input type="checkbox"/> Acute Renal failure <input type="checkbox"/> Poisoning <input type="checkbox"/> Trauma <input type="checkbox"/> Urine retention <input type="checkbox"/> Acute graft rejection <input type="checkbox"/> Hematuria <input type="checkbox"/> Nurse's role
IX	10	<p>Drugs used in urinary disorders</p> <ul style="list-style-type: none"> <input type="checkbox"/> Classification <input type="checkbox"/> Indications, contraindications, actions and effects, toxic effects

		<input type="checkbox"/> Role of nurse
X	10	Dialysis <ul style="list-style-type: none"> <input type="checkbox"/> Dialysis- Historical, types, Principles, goals • Hemodialysis- vascular access sites- temporary and permanent • Peritoneal dialysis <input type="checkbox"/> Dialysis Procedures- steps, equipments, maintenance, <input type="checkbox"/> Role of nurse- pre dialysis, intra and post dialysis <input type="checkbox"/> Complications- <input type="checkbox"/> Counseling <input type="checkbox"/> patient education <input type="checkbox"/> Records and reports
XI	10	<ul style="list-style-type: none"> <input type="checkbox"/> Kidney transplantation <input type="checkbox"/> Nursing management of a patient with Kidney transplantation <input type="checkbox"/> Kidney transplantations- a historical review <input type="checkbox"/> Immunology of graft rejections <input type="checkbox"/> The recipient of a renal transplant <input type="checkbox"/> Renal preservations <input type="checkbox"/> Human Leucocytic Antigen(HLA) typing matching and cross matching in renal transplantation <input type="checkbox"/> Surgical techniques of renal transplantations <input type="checkbox"/> Chronic renal transplant rejection <input type="checkbox"/> Complication after KTP: Vascular and lymphatic, Urological, cardiovascular, liver and neurological, infectious complication <input type="checkbox"/> KTP in children and management of pediatric patient with KTP <input type="checkbox"/> KTP in developing countries <input type="checkbox"/> Results of KTP <input type="checkbox"/> Work up of donor and recipient for renal transplant <input type="checkbox"/> Psychological aspect of KTP and organ donations <input type="checkbox"/> Ethics in transplants <input type="checkbox"/> Cadaveric transplantation
XII	5	<ul style="list-style-type: none"> <input type="checkbox"/> Rehabilitation of patient with nephrological problems <input type="checkbox"/> Risk factors and prevention <input type="checkbox"/> Rehabilitation of patients on dialysis and after

		kidney transplant <input type="checkbox"/> Rehabilitation of patients after urinary diversions <input type="checkbox"/> Family and patient teaching
XIII	10	Pediatric urinary disorders <input type="checkbox"/> Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical and nursing management of children with Renal Diseases -UTI, ureteral reflux, glomerulo nephritis, nephrotic syndrome infantile nephrosis, cystic kidneys, familial factors in renal diseases in childhood, Haemolytic uraemic syndrome. Benign recurrent haematuria, nephropathy, wilms' tumour
XIV	5	Critical care units- dialysis , KTP unit <input type="checkbox"/> Philosophy, aims and objectives <input type="checkbox"/> Policies, staffing pattern, design and physical plan of Dialysis and KTP units <input type="checkbox"/> Team approach, functions <input type="checkbox"/> Psychosocial aspects in relation to staff and clients of ICU, dialysis unit <input type="checkbox"/> In-service education <input type="checkbox"/> Ethical and legal issues
XV	5	<input type="checkbox"/> Quality assurance in nephrological nursing practice <input type="checkbox"/> Role of advance practioner in nephrological nursing <input type="checkbox"/> Professional practice standards <input type="checkbox"/> Quality control in nephrological nursing <input type="checkbox"/> Nursing audit

Practical

Total = 960 Hours
1 week = 30 Hours

S.No.	Deptt. /Unit	No. of Week	Total Hours
1.	Nephrology Ward	6	180Hours
2.	Pediatrics	2	60Hours
3.	Critical Care Unit	2	60 Hours
4.	Urology Ward	6	180 Hours
5	Dialysis Unit	4	120 Hours
6.	Kidney Transplantation Unit	2	60 Hours
7.	URO OT	2	60 Hours
8.	Emergency Wards	2	60 Hours
9	Uro Nephro OPDs	4	120 Hours
10	Diagnostic Labs	2	60 Hours
	Total	32 Weeks	960 Hours

I. Procedures Observed

1. CT Scan
2. MRI
3. Radiographic studies
4. Urodynamics
5. Hemodialysis
6. Renal Surgeries

II. Procedures Assisted

1. Blood transfusion
2. I V cannulation therapy
3. Arterial Catheterization

4. Insertion of central line/cvp line
5. Connecting lines for dialysis
6. Peritoneal dialysis
7. Renal biopsy
8. Endoscopies- Bladder, urethra

III. Procedure Performed

1. Health assessment
2. Insertion of urethral and suprapubic catheters
3. Urine analysis
4. Catheterisation
5. Peritoneal dialysis
6. Bladder irrigation
7. Care of ostomies
8. Care of urinary drainage
9. Bladder training
10. Care of vascular access
11. Setting up dialysis machine and starting, monitoring and closing dialysis
12. Procedures for prevention of infections:
13. Hand washing, disinfection & sterilization surveillance, and fumigation universal precautions.
14. Collection of specimen.
15. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, blood administration. monitoring -fluid therapy, electrolyte imbalance,
16. Nutritional needs , diet therapy & patient education.
17. Counselling

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING - ORTHOPEDIC NURSING

Placement : II Year

Hours of Instruction
Theory : 150 Hours
Practical : 950 Hours
Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of orthopedic nursing. It will help students to develop advanced skills for nursing intervention in various orthopedic conditions. It will enable the student to function as orthopedic nurse practitioner/specialist providing quality care. It will further enable the student to function as educator, manager, and researcher in the field of orthopedic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of orthopedic nursing
2. Identify the psycho-social needs of the patient while providing holistic care.
3. Perform physical and psychological assessment of patients with orthopedic conditions and disabilities.
4. Describe various disease conditions and their management
5. Discuss various diagnostic tests required in orthopedic conditions
6. Apply nursing process in providing care to patients with orthopedic conditions and those requiring rehabilitation.
7. Recognize and manage orthopedic emergencies.

8. Describe recent technologies and treatment modalities in the management of patients with orthopedic conditions and those requiring rehabilitation.
9. Integrate the concept of family centered, long term care and community based rehabilitation to patients with orthopedic conditions.
10. Counsel the patients and their families with orthopedic conditions
11. Describe various orthotic and prosthetic appliances
12. Appreciate the legal and ethical issues pertaining to patients with orthopedic conditions and those requiring rehabilitation.
13. Appreciate the role of alternative system of medicine in care of patients with orthopedic conditions
14. Incorporate evidence based nursing practice and identify the areas of research in the field of orthopedic nursing.
15. Recognize the role of orthopedic nurse practitioner and as a member of the orthopedic and rehabilitation team.
16. Teach orthopedic nursing to undergraduate students and in-service nurses.
17. Prepare a design and layout of orthopedic and rehabilitative units.

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> <input type="checkbox"/> Historical perspectives – History and trends in orthopedic nursing <input type="checkbox"/> Definition and scope of orthopedic nursing <input type="checkbox"/> Anatomy and physiology of Musculo-skeletal system <input type="checkbox"/> Posture, Body landmarks Skeletal system Muscular system. <p>Nervous system - Main nerves</p> <ul style="list-style-type: none"> <input type="checkbox"/> Healing of - Injury, bone injury, <input type="checkbox"/> Repair of ligaments <input type="checkbox"/> Systemic response to injury <input type="checkbox"/> Ergonomics, Body mechanics, biomechanical measures <input type="checkbox"/> Orthopedic team
II	8	<p>Assessment of Orthopedic Patient</p> <ul style="list-style-type: none"> <input type="checkbox"/> Health Assessment: History, physical examination- Inspection, palpation, movement, Measurement, muscle strength Testing.

		<input type="checkbox"/> Diagnostic studies – Radiological studies, Muscle enzymes, serologic studies
III	10	Care of patients with devices <ul style="list-style-type: none"> <input type="checkbox"/> Splints, braces, various types of plaster cast <input type="checkbox"/> Various types of tractions, <input type="checkbox"/> Various types of orthopedic beds and mattresses <input type="checkbox"/> Comfort devices <input type="checkbox"/> Implants in orthopedic <input type="checkbox"/> Prosthetics and Orthotics

XIII	5	<p>Geriatric Problems</p> <ul style="list-style-type: none"> <input type="checkbox"/> Geriatric population, types of disabilities, causes, treatment and Management – Hospitalization, rest, physiotherapy, involvement of family members, social opportunities. <input type="checkbox"/> Care at home – involvement of family and community, follow up care and rehabilitation
XIV	6	<p>Pharmacokinetics</p> <ul style="list-style-type: none"> <input type="checkbox"/> Principles of drug administration <input type="checkbox"/> Analgesics and anti inflammatory agents <input type="checkbox"/> Antibiotics, Antiseptics, <input type="checkbox"/> Drugs used in orthopedics and neuromuscular disorders

		<input type="checkbox"/> Blood and blood components <input type="checkbox"/> Care of drugs and nurses role
XV	30	<p>Nurses Role in Orthopedic Conditions</p> <input type="checkbox"/> Gait analysis <input type="checkbox"/> Urodynamic studies <input type="checkbox"/> Prevention of physical deformities <input type="checkbox"/> Alteration of body temperature regulatory system and immune systems <input type="checkbox"/> Immobilization – cast, splints, braces and tractions <input type="checkbox"/> Prevention and care of problems related to immobility <input type="checkbox"/> Altered sleep patterns <input type="checkbox"/> Impaired communication <input type="checkbox"/> Self care and activities of daily living <input type="checkbox"/> Bladder and bowel rehabilitation <input type="checkbox"/> Sensory function rehabilitation <input type="checkbox"/> Psychological reaction related to disabilities and disorders. <input type="checkbox"/> Coping of individual and family with disabilities and disorders <input type="checkbox"/> Maintaining sexuality <input type="checkbox"/> Spirituality – A rehabilitative prospective <p>Orthopedic Reconstructive Surgeries</p> <input type="checkbox"/> Replacement surgeries – Hip, Knee, Shoulder <input type="checkbox"/> Spine surgeries <input type="checkbox"/> Grafts and flaps surgery <input type="checkbox"/> Deformity correction. <p>Physiotherapy</p> <input type="checkbox"/> Concepts, Principles, purpose, <ul style="list-style-type: none"> • Mobilization – Exercises: types, re-education in walking: Crutch walking, wheel chair, Transfer techniques, • Types of gaits: Non-weight bearing, partial weight bearing, four point crutch, tripod, walking with sticks, calipers • Forms of therapies: Hydrotherapy, electrotherapy, wax bath, heat therapy, ice, helio therapy, radiant heat, • Chest physiotherapy
XVI	8	<p>Rehabilitation</p> <input type="checkbox"/> Principles of rehabilitation, definition, philosophy, process,

		<ul style="list-style-type: none"> <input type="checkbox"/> Various types of therapies <input type="checkbox"/> Special therapies and alternative therapies <input type="checkbox"/> Rehabilitation counseling <input type="checkbox"/> Preventive and restorative measures. <input type="checkbox"/> Community based rehabilitation (CBR) <input type="checkbox"/> Challenges in rehabilitation. <input type="checkbox"/> Role of the nurse in rehabilitation, <input type="checkbox"/> Legal and ethical issues in rehabilitation nursing <input type="checkbox"/> Occupational therapy
XVII	5	<p>National Policies and Programmes</p> <ul style="list-style-type: none"> <input type="checkbox"/> National programmes for rehabilitation of persons with disability National Institutes, artificial limbs manufacturing Corporation, District Rehabilitation Centers and their schemes <input type="checkbox"/> Regional rehabilitation centers etc. <input type="checkbox"/> Public policy in rehabilitation nursing <input type="checkbox"/> The persons with disabilities act 1995, <input type="checkbox"/> Mental rehabilitation and Multiple disabilities act 1992, <input type="checkbox"/> The National Trust Rules 1999 and 2000 <input type="checkbox"/> Rehabilitation Council of India <input type="checkbox"/> Legal and ethical aspects in orthopedic nursing <input type="checkbox"/> Rehabilitation health team and different categories of team members.
XVIII	4	<p>Quality assurance</p> <ul style="list-style-type: none"> <input type="checkbox"/> Standards, Protocols, Policies, Procedures <input type="checkbox"/> Nursing audit <input type="checkbox"/> Staffing <input type="checkbox"/> Design of orthopedic, physiotherapy and rehabilitation unit

Practicals

1. Clinical practice in Orthopedic, physiotherapy and Rehabilitation Units.
2. Application of tractions and plaster casts and removal of tractions and plaster casts and other appliances.
3. Apply Theories and Nursing Process in the management of patients with orthopedic conditions.
4. Provide various types of physical and rehabilitative therapies
5. Provide health education on related disease conditions.

6. Unit management and plan - designing

Clinical Experience

Total = 960 Hours
1 week = 30 Hours

S.No.	Deptt. /Unit	No. of Week	Total Hours
1.	Orthopedic Ward	8	240Hours
2.	Orthopedic Operation theatre	4	120Hours
3.	Neurosurgical Ward	2	60 Hours
4.	Orthopedic O.P.D.	4	120 Hours
5	Casualty/Emergency and Trauma	4	120 Hours
6.	Rehabilitation Units	2	60 Hours
7.	Physiotherapy Unit	4	120 Hours
8.	Paediatric /paediatric surgery unit	2	60 Hours
9	Field Visit	2	60 Hours
	Total	32 Weeks	960 Hours

Procedures Observed

1. X Ray
2. Ultrasound
3. MRI
4. C T Scan/bone scan
5. Arthroscopy
6. Electrothermally – assisted capsule shift or ETAC (Thermal capsulorrhaphy)

7. Fluoroscopy
8. Electromyography
9. Myelography
10. Discography
11. Others

Procedures Assisted

1. Blood Transfusion
2. IV cannulation and therapy
3. Ventilation
4. Various types of tractions
5. Orthopedic surgeries – Arthrocentesis, Arthroscopy, Bone lengthening, Arthrodesis, grafting, Fractures fixation, reconstructive, reimplantation, replantation, spinal decompression, transplantation of bone, muscle or articular cartilage, autografting, allografting.
6. Injection – Intra articular, intra osseous.
7. Advance Life Support

Procedures Performed

1. Interpretation of X ray films.
2. Application and removal of splints, casts, and braces.
3. Care of tractions – skin and skeletal traction, pin site care.
4. Cold therapy.
5. Heat therapy
6. Hydrotherapy
7. Therapeutic exercises
8. Use of TENS (Transcutaneous electrical nerve stimulation)
9. Techniques of transportation
10. Crutch walking, walkers, wheel chair.
11. Use of devices for activities of daily living and prevention of deformities.
12. Administration of drugs: IV injection, IV cannulation, and Blood transfusion.
13. Procedures for prevention of infections: disinfection and sterilization, surveillance, fumigation.
14. Special skin/ part preparations for orthopedic surgeries.
15. Surgical dressings – Debridement.
16. Bladder and bowel training

Other Procedures

CLINICAL SPECIALITY - II

MEDICAL SURGICAL NURSING - GASTRO ENTEROLOGY NURSING

Placement : II Year

Hours of Instruction

Theory : 150 hrs.

Practical : 950 hrs.

Total : 1100 hrs.

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of gastro enterology Nursing. It will help students to develop advanced skills for nursing intervention in various gastro enterology conditions. It will enable the student to function as gastro enterology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of gastro enterology nursing

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to gastro enterology nursing
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of gastrointestinal conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with gastrointestinal conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Provide comprehensive care to patients with gastrointestinal

conditions

7. Describe the various drugs used in gastrointestinal conditions and nurses responsibility
8. Demonstrate skill in handling various equipments/gadgets used for patients with gastrointestinal conditions
9. Appreciate team work & coordinate activities related to patient care.
10. Practice infection control measures.
11. Identify emergencies and complications & take appropriate measures
12. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
13. Discuss the legal and ethical issues in GE nursing
14. Identify the sources of stress and manage burnout syndrome among health care providers
15. Appreciate the role of alternative system of medicine in care of patient
16. Incorporate evidence based nursing practice and identify the areas of research in the field of gastrointestinal nursing
17. Teach and supervise nurses and allied health workers.
18. Design a layout of Gastro enterology intensive care unit (GEICU) , liver care/transplant unit

Course Content

Total = 960 Hours
1 week = 30 Hours

S.No.	Deptt. /Unit	No. of Week	Total Hours
1.	Diagnostic labs		240Hours
2.	Emergency and casualty		120Hours
3.	Liver transplant unit		60 Hours
4.	GE Medical Ward		120 Hours
5.	GE Surgical Ward		120 Hours
6.	OT		60 Hours
7.	ICU		120 Hours
8.	Pediatric gastroenterology		60 Hours
9.	Oncology		60 Hours
10.	GE OPD		
	Total	32 Weeks	960 Hours

Procedures Assisted

1. Endoscopy room – Upper G.I. Endoscopy (Diagnostic and therapeutic).
2. Sigmoidoscopy
3. Colonoscopy
4. Polypectomy
5. Endoscopic retrograde cholangio pancreatography (ERCP)

6. Liver biopsy
7. Percutaneous catheter drainage (PCD) of Pseudocyst pancreas
8. Abdominal paracentesis
9. Percutaneous aspiration of liver abscess
10. GE Lab : PT, HbsAg, Markers – A, B, C virus, CBP, ESR, Stool Test

Procedures Performed

1. History and Physical assessment
2. RT intubation / extubation / aspiration/suction
3. Gastric lavage and gavage
4. Bowel wash
5. Therapeutic Diets
6. Ostomy feeding
7. Stoma care
8. Monitoring vital parameters
9. Plan of inservice education programme for nursing staff and Class-IV employees
10. Counseling

CLINICAL SPECIALITY – II

OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement - II Year

Hours of Instruction
 Theory: 150 hrs
 Practical 950 hrs
 Total 1100 hrs

Course Description

This course is designed to assist the student in developing expertise and indepth understanding in the field of Obstetric and gynecological Nursing .It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological nursing.

Objectives

At the end of the course, the student will be able to:

1. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions
2. Perform physical, psychosocial, cultural & spiritual assessment

3. Demonstrate competence in caring for women with obstetrical and gynaecological conditions
4. Demonstrate competence in caring for high risk newborn.
5. Identify and Manage obstetrical and neonatal emergencies as per protocol.
6. Practice infection control measures
7. Utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical , gynecological and neonatal care.
8. Demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatal care
9. Teach and supervise nurses and allied health workers.
10. Design a layout of speciality units of obstetrics and gynecology
11. Develop standards for obstetrical and gynaecological nursing practice.
12. Counsel women and families
13. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecological nursing
14. Function as independent midwifery nurse practitioner

Course Content

Unit	Hours	Content
I	25	<p>Management of problems of women during pregnancy</p> <ul style="list-style-type: none"> □ Risk approach of obstetrical nursing care , concept & goals. □ Screening of high-risk pregnancy, newer modalities of diagnosis. □ Nursing Management of Pregnancies at risk-due to obstetrical complication <ul style="list-style-type: none"> • Pernicious Vomiting. • Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblastic diseases. • Hemorrhage during late pregnancy, ante partum hemorrhage, Placenta praevia, abruptio placenta. • Hypertensive disorders in pregnancy, pre-eclampsia, eclampsia, Hemolysis Elevated liver enzyme Low Platelet count (HELLP) • Iso-immune diseases. Rh and ABO incompatibility • Hematological problems in pregnancy. • Hydramnios-oligohydramnios • Prolonged pregnancy- post term, post maturity. • Multiple pregnancies. • Intra uterine infection & pain during pregnancy.

		<ul style="list-style-type: none"> • Intra Uterine Growth Retardation(IUGR), Premature Rupture of Membrane(PROM), intra uterine death

Clinical Experience

Total = 960 Hours
1 week = 30 Hours

S.No.	Deptt. /Unit	No. of Week	Total Hours
1.	Antenatal OPD including Infertility clinics/ Reproductive medicine, Family welfare and post partum clinic/ PTCT	6	180Hours
2.	Antenatal and Postnatal ward	6	180Hours
3.	Labour room	4	120 Hours
4.	Neonatal intensive Care Unit	3	90 Hours
5	Obstetric / Gynae Operation Theatre	3	90 Hours
6.	Gynae Ward	4	120 Hours
7.	CHC,PHC, Sc	6	180 Hours
	Total	32 Weeks	960 Hours

Procedures Assisted

- Operative delivery
- Abnormal deliveries-Forceps application, Ventouse, Breech
- Exchange blood transfusion
- Culdoscopy.
- Cystoscopy
- Tuboscopy
- Laparoscopy.
- Endometrial Biopsy
- Tubal patent test

- Chemotherapy
- Radiation therapy
- Medical Termination of Pregnancy.
- Dilatation and Curettage

Procedures Performed

- History taking.
- Physical Examination-General
- Antenatal assessment. – 20
- Pelvic examination
- Assessment of risk status.
- Assessment of Intra uterine foetal well-being.kick chart and foetal movement chart, Doppler assessment, Non Stress Test, Contraction stress test(Oxytocin challenge test)
- Universal precautions- Disposal of biomedical waste.
- Per Vaginal examination and interpretation (early pregnancy, labour, post partum).
- Utilization of Partograph
- Medical & Surgical induction(Artificial rupture of membranes).
- Vacuum extraction
- Conduct of delivery.
- Prescription and administration of fluids and electrolytes through intravenous route.
- Application of outlet forceps, delivery of breach – Burns Marshall, Loveset manoeuvre
- Repair of tears and Episiotomy suturing.
- Vacuum extraction
- controlled cord traction, Manual removal of placenta, placental examination,
- Manual vacuum aspiration
- Postnatal assessment.- 20
- Management of breast engorgement
- Thrombophlebitis (white leg)
- Postnatal counseling.
- Reposition of inversion of uterus.
- Laboratory tests: Blood- Hb, Sugar, Urine-albumin,sugar
- Breast care, breast exam, and drainage breast abscess.
- Postnatal exercise.
- Assessment –New born assessment; physical and neurological, Apgar score, high-risk newborn, Monitoring neonates; Clinically and With monitors, Capillary refill time, Assessment of jaundice, danger signs
- Anthropometric measurement
- Neonatal resuscitation
- Gastric Lavage
- Care of newborn in multi channel monitor and ventilator.

- Care of newborn in radiant warmer and incubator.
- Kangaroo mother care.
- Assisting mother with exclusive Breast-feeding
- Feeding technique: Katori, spoon, naso/orogastric, Total Parenteral nutrition
- Assesment, calculation and administration of fluids and medications:
 - Oral
 - I.D.
 - I.M.
 - I.V.- Securing IV line, infusion pump
- Administration of drug per rectum
- Capillary blood sample collection.
- Oxygen therapy.
- Phototherapy.
- Chest physiotherapy.
- counseling – Parental, bereavment, family planning, infertility etc
- Setting of operation theatre.
- Trolley and table set up for Obstetrical & gynaecological operations.
- Pap smear.
- Vaginal smear.
- Insertion of pessaries,
- Insertion of IUD and removal.
- Teaching skills
- communication skills
- Prepare referral slips
- Pre transport stabilization
- Networking with other stake holders

CLINICAL SPECIALTY -II

PEDIATRIC (CHILD HEALTH) NURSING

Placement : II Year

Hours of Instruction
Theory 150 hours
Practical 950 hours
Total : 1100 hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
3. Recognize and manage emergencies in children
4. Provide nursing care to critically ill children
5. Utilize the recent technology and various treatment modalities in the management of high risk children
6. Prepare a design for layout and describe standards for management of pediatric units/hospitals
7. Identify areas of research in the field of pediatric nursing

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <ul style="list-style-type: none"> □ Current principles, practices and trends in Pediatric Nursing □ Role of pediatric nurse in various settings - Expanded and extended
II	35	<ul style="list-style-type: none"> □ Pathophysiology, assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities and nursing intervention in selected pediatric medical disorders • Child with respiratory disorders: <ul style="list-style-type: none"> - Upper respiratory tract: choanal atresia, tonsillitis, epistaxis, aspiration. - Lower respiratory tract: Broncheolitis, Bronchopneumonia, Asthma, cystic fibrosis • Child with gastro-intestinal disorders: <ul style="list-style-type: none"> - Diarrheal diseases, gastro-esophageal reflux. - Hepatic disorders: Hepatitis, Indian childhood cirrhosis, liver transplantation. - Malabsorption syndrome, Malnutrition • Child with renal/ urinary tract disorders: Nephrotic syndrome, Nephritis, Hydronephrosis, hemolytic-uremic syndrome, kidney transplantation • Child with cardio-vascular disorders: <ul style="list-style-type: none"> - Acquired: Rheumatic fever, Rheumatic heart disease, - Congenital: Cyanotic and acyanotic

		<ul style="list-style-type: none"> • Child with endocrine/metabolic disorders: Diabetes insipidus, Diabetes Mellitus – IDDM, NIDDM, hyper and hypo thyroidism, phenylketonuria, galactosemia • Child with Neurological disorders: Convulsions, Meningitis, encephalitis, guillian- Barre syndrome • Child with oncological disorders: Leukemias, Lymphomas, Wilms’ tumor, nephroblastomas, neuroblastomas, Rhabdomyosarcoma, retinoblastoma, hepatoblastoma, bone tumors • Child with blood disorders: Anemias, thalasseмии, hemophilia, polycythemia, thrombocytopenia, and disseminated intravascular coagulation • Child with skin disorders • Common Eye and ENT disorders • Common Communicable diseases
III	35	<p>□ Assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities including cosmetic surgery and nursing interventions in selected pediatric surgical problems/ Disorders</p> <ul style="list-style-type: none"> • Gastrointestinal system: Cleft lip, cleft palate and conditions requiring plastic surgery, Tracheo esophageal fistula/atresia, Hirschsprungs’ disease/megacolon, malrotation, intestinal obstruction, duodenal atresia, gastrochisis, exomphalus, anorectal malformation, omphalocele, diaphragmatic hernia • Anomalies of the nervous system: Spina bifida, Meningocele, Myelomeningocele, hydrocephalus • Anomalies of the genito-urinary system: Hypospadias, Epispadias, Undescended testes, Exstrophy bladder • Anomalies of the skeletal system • Eye and ENT disorders • Nursing management of the child with traumatic injuries: General principles of managing Pediatric trauma - Head injury, abdominal injury, poisoning, foreign body obstruction, burns - & Bites • Child with oncological disorders: Solid tumors of childhood, Nephroblastoma, Neuro blastoma, Hodgkin's/Non Hodgkin's Lymphoma,

		<p>Hepatoblastoma, Rhabdomyosarcoma</p> <ul style="list-style-type: none"> • Management of stomas, catheters and tubes • Management of wounds and drainages

Practical

Total = 960 Hours
1 week = 30 Hours

Field visits:

S.No.	Deptt. /Unit	No. of Week	Total Hours
1.	Pediatric medicine ICU	4	120Hours
2.	Pediatric surgical ICU	4	120Hours
3.	NICU	4	120 Hours
4.	Pediatric OT	2	60 Hours
5	Pediatric medicine ward	6	180 Hours
6.	Pediatric surgery ward	6	180 Hours
7.	Emergency/Casualty	4	120 Hours
8.	Field visits*	2	60 Hours
	Total	32 Weeks	960 Hours

*Child care center, Anganwadi, play school, Special schools for challenged children, Juvenile court, UNICEF, Orphanage, Creche, SOS village

Essential

I. Procedures Observed:

- Echo cardiogram
- Ultrasound head
- ROP screening (Retinopathy of prematurity)

- Any other

II. Procedures Assisted

- Advanced neonatal life support
- Lumbar Puncture
- Arterial Blood Gas
- ECG Recording
- Umbilical catheterization – arterial and venous
- Arterial B P monitoring
- Blood transfusion- exchange transfusion full and partial
- IV cannulation & therapy
- Arterial catheterization
- Chest tube insertion
- Endotracheal intubation
- Ventilation
- Insertion of long line
- Assist in surgery

III. Procedures Performed:

- Airway Management
 - Application of Oro Pharyngeal Airway
 - Oxygen therapy
 - CPAP(Continuous Positive Airway Pressure)
 - Care of Tracheostomy
 - Endotracheal Intubation
- Neonatal Resuscitation
- Monitoring of Neonates – clinically & with monitors, CRT(Capillary Refill Time), assessment of jaundice, ECG
- Gastric Lavage
- Setting of Ventilators
- Phototherapy
- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,
- Admission & discharge of neonates
- Feeding - management of breast feeding, artificial feeding, expression of breast milk, OG(Orogastric) tube insertion, gavage feeding, TPN, Breast feeding counseling
- Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation & control
- Administration of Drugs: I/M, IV injection, IV Cannulation & fixation infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/ insulin syringes,

Monitoring fluid therapy, Blood administration.

- Procedures for prevention of infections: Hand washing, disinfections & sterilization, surveillance, fumigation
- Collection of specimens
- Setting, Use & maintenance of basic equipment: Ventilator, O₂ analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow

IV. Other Procedures:

CLINICAL SPECIALITY - II

PSYCHIATRIC (MENTAL HEALTH) NURSING

Placement: II Year

Hours of Instruction

Theory 150 hrs

Practical 950 hrs

Total : 1100 Hours

Course Description

This course is designed to assist students in developing expertise and indepth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of patients with mental disorders in hospital and community
2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
4. Identify and manage psychiatric emergencies.

2.	Nutrition & Dietetics	1.30 hrs	15	35	50
3.	Biochemistry & Biophysics	3	25	75	100
4.	Psychology	3	25	75	100
5.	Microbiology	3	25	75	100
6.	Maternal Nursing	3	25	75	100
7.	Child Health Nursing	3	25	75	100
8.	Med. & Surgical Nursing	3	25	75	100
9.	English	3	25	75	100
Practical					
1.	Medical & Surgical Nursing		50	50	100
2.	Maternal Nursing		50	50	100
3.	Child Health Nursing		50	50	100
Second Year					
1.	Sociology	3	25	75	100
2.	Community Health Nursing	3	25	75	100
3.	Mental Health Nursing	3	25	75	100
4.	Introduction to Nursing	3	25	75	100
Education					
5.	Introduction to Nursing	3	25	75	100
Administration					
6.	Introduction to Nursing	2	50	---	50

Research & Statistics

Practical

1. Community Health Nursing	50	50	100
2. Mental Health Nursing	50	50	100
3. Research Project (Qualifying)	50	50	

Note: Qualifying Examination

College Examination (Not University Examination)

N.B.

1. Teaching of Anatomy, Physiology, Pharmacology and Pathology will be integrated with clinical subjects.
2. A minimum of 85% attendance in theory and 95% practical/ clinical in each subject is essential for appearing in the examination.
3. 100% attendance in practical/ clinical in each clinical area is essential before award of degree.
4. 50% of minimum marks in each theory and practical paper separately are required for passing.
5. A candidate has to secure minimum of 33 % in qualifying subject for passing.
6. The candidate has to pass in theory and practical exam separately in each of the paper.
7. If the candidate fails in either theory or practical exam he / she have to reappear for both (Theory & practical).
8. Biochemistry and Biophysics- question paper will consist of Section-I (Biochemistry) MCQ of 8 marks and 30 marks of long and short answer questions and Section-II (Biophysics) MCQ of 7 marks and 30 marks of long and short answer questions.
9. The maximum period to complete the course successfully is 4 years.

Nursing Foundation

Placement: First Year

Time Allotted: Theory – 45 Hrs

COURSE DESCRIPTION

This course will help students develop an understanding of the philosophy, objectives and responsibilities of nursing as a profession. The purpose of the course is to orient to the current concepts involved in the practice of nursing and developments in the nursing profession.

OBJECTIVES

At the end of the course, the students will

1. Identify professional aspects of nursing.
2. Explain theories of nursing.
3. Identify ethical aspects of nursing profession.
4. Utilize steps of nursing process.
5. Identify the role of the nurse in various levels of health services.
6. Appreciate the significance of quality assurance in nursing.
7. Explain current trends in health and nursing.

COURSE CONTENTS

UNIT I

- Development of nursing as a profession
 - Its philosophy
 - Objectives and responsibilities of a graduate nurse.
- Trends influencing nursing practice
- Expanded role of the nurse.
- Development of nursing education in India and trends in nursing education.
- Professional organizations, career planning.
- Code of ethics & professional conduct for nurses.

UNIT II

- Ethical, legal and other issues in nursing.
- Concepts of health wellness and illness, effects on the person.
- Stress and adaptation.
- Health care concept and nursing care concept.
- Developmental concept, needs, roles and problems of the developmental stages of individual – newborn, infant, toddler, pre-adolescent, adolescent, adulthood, middle-age, old age.

UNIT III

- Theory of nursing practice
- Meta paradigm of nursing – characterized by four central concepts i.e. Nurse, person (client/ patient), health and environment.

UNIT IV

- Nursing process.
- Assessment: Tools for assessment, methods, recording.
- Planning: Techniques for planning care, types of care plans.
- Implementation: Different approaches to care , organizations and implementation of care, recording.
- Evaluation: Tools for evaluation, process of evaluation.

UNIT V

- Quality assurance: nursing standards, nursing audit, total quality management
- Role of council and professional bodies in maintenance of standards.

UNIT VI

- Primary health care concept :
 - Community oriented nursing
 - Holistic nursing
 - Primary nursing
- Family oriented nursing concept:
 - problem oriented nursing
 - progressive patient care
 - team nursing

Nutrition & Dietetics

Placement: First Year

Time Allotted: Theory: 30 hrs

Practical: 15

hrs

COURSE DESCRIPTION

This course is designed to provide the students with a wide knowledge of dietetics in Indian setting, that the practice of teaching optimum and realistic dietary planning can become an integral part of nursing practice.

OBJECTIVES

At the end of the course, the student will

1. Explain the principles and practices of nutrition and dietetics.
2. Identify nutritional needs of different age groups and plan diet accordingly.

Plan therapeutic diets in different settings.

3. Plan therapeutic diets in different settings.
4. Prepare meals using different methods utilizing cookery rules.

COURSE CONTENTS

UNIT I

- Introduction to nutrition and dietetics.
- Balanced diet. Factors on which it depends.
- Factors to be considered in planning.
- Guides available for planning.
- Food Hygiene, preparation and preservation.
- Review of nutrients- micro & macro.

UNIT II

- Introduction to diet therapy.
- Hospital diets.
- Therapeutic diet under each unit i.e. cardiovascular diseases.

Gastrointestinal diseases, Renal disorders, Endocrine and metabolic disorders, Allergy, Infections and fevers, Pre and post operative stage, Deficiency diseases and malnutrition overweight and underweight.

UNIT III

- Infant and child Nutrition.

- Feeding of normal infants: feeding problems factors to be considered in planning
- Nutritional requirements.
- Supplementary feeding of infants: Advantage and method of introduction
- Weaning, effects on mother and child.
- Psychology of infant and child feeding.
- Feeding the sick child. Diet in diseases of infancy and childhood.
- Deficiency states – malnutrition and under nutrition.
- Feeding pre – school child: nutritional needs, factors to be considered in Planning diets. Problems in feeding.
- School lunch programme, Mid-day meal programme: Advantages, Need in India.

UNIT IV

- Community Nutrition: Need for community nutrition programme.
- Nutritional needs for special groups : Infant, child, adolescent, pregnant Woman, lactating mother and old people.
- Substitutes for non- vegetarian foods.
- Selection of cheap and nutritious foods, Nutrition education needs and Methods.
- Methods of assessing nutritional status of individual/ group/ community.
- Current nutritional problems and national programmes.

PRACTICUM

- I. Culinary guide practices Methods of cooking and cookery rules.
 1. Simple preparation of beverages, soups, cereals and pulses, eggs, Vegetables, meat.
 2. Menu Plans,
- II. Preparation of supplementary food for infants.
 1. Food for infants.
 2. Low cost nutritious dishes for vulnerable groups.
 3. Dietary case study of patient on special diet and planning of low cost Dietary instructions for home adaptations.
 4. Planning of therapeutic diets.

Biochemistry & Biophysics

Placement: First Year

Time: Allotted

Section A (Biochemistry) – Theory 30 hrs.

Section B (Biophysics) - Theory 30 hrs.

COURSE DESCRIPTION

This course introduces the basic principles of Biochemistry and Biophysics related to nursing.

OBJECTIVES

At the end of the course, the student will

1. Identify the basic principles of Biochemistry and Biophysics.
2. Synthesize the knowledge of these principles in various nursing situations.

Section A: Biochemistry

Theory – 30

hrs.

COURSE CONTENTS

UNIT I

- Introduction: Importance of Biochemistry in nursing.
- Study of cell and its various components.

UNIT II

- Water and Electrolytes: Water – Sources, property & functions in human Body.
- Water and fluid balance.
- Electrolytes of human body, functions, sources.

UNIT III

- Enzymes
 - Mechanism of action
 - Factors affecting enzyme activity
 - Diagnostic applications.
 - Precautions for handling specimens for enzyme estimation
- Digestion and absorption of carbohydrates, proteins and fats.
- Various factors influencing the digestion and absorption, mal-absorption syndrome.

UNIT IV

- Carbohydrates: Catabolism of carbohydrates for energy purposes.
- Mitochondrial oxidation and oxidation phosphorylation.
- Fats of glucose in the body, Storage of glucose in the body, glycogenesis, glycogenolysis and neoglucogensts, blood glucose and its regulation.
- Glucose tolerance test, hyperglycemia, hypoglycemia, glycemia.

UNIT V

- Protein: Amino acids, hormones.
- Essential amino acids. Biosynthesis of protein in the cells.
- Role of nucleic acid in protein synthesis.
- Nitrogenous constituents of Urine, Blood, and their origin- urea cycle, uric acid formation, gout.
- Plasma proteins and their functions.

UNIT VI

- Fat: Biosynthesis of fats and storage of fats in the body.
- Role of liver in fat metabolism
- Biological important lipids and their functions.
- Cholesterol and lipoprotein
 - Sources occurrence and distribution.
 - Blood level and metabolism.
 - Ketone bodies and utilization.
- Inter relationships in metabolism and cellular control of metabolic processes.

Section B : Biophysics

Theory : 30 hours

COURSE CONTESTS

UNIT I

- Introduction: Concepts of unit and measurements.
- Fundamental and derived units.
- Units of length, weight, mass, time.

UNIT II

- Vector and scalar motion, speed, velocity and acceleration.

UNIT III

- Gravity: Specific gravity, center of gravity, principles of gravity.
- Effects of gravitational forces on human body.
- Application of principles of gravity in nursing.

UNIT IV

- Force, Work, Energy: Their units of measurement.
- Type and transformation of energy, forces of the body, static forces.
- Principles of machines, friction and body mechanics.

- Simple mechanics- lever and body mechanics, pulley and traction.
Incline plane, screw.
- Application of these principles in nursing.

UNIT V

- Heat : Nature, measurement, transfer of heat
- Effects of heat on matter
- Relative humidity, specific heat
- Temperature scales.
- Regulation of body temperature
- Use of heat for sterilization
- Application of these principles in nursing

UNIT VI

- Light laws of reflection
- Focusing elements of the eye, defective vision and its correction, use of Lenses.
- Relationship between energy, frequency and wavelength of light.
- Biological effects of light.
- Use of light in therapy.
- Application of these principles in nursing.

UNIT VII

- Pressures: Atmospheric pressure, hydrostatic pressure, osmotic pressure.
- Measurements of pressures in the body.
 - Arterial and venous blood pressures
 - Ocular pressure
 - Intracranial pressure
 - Applications of these principles in nursing.

UNIT VIII

- Sound : Frequency, Velocity and Intensity
- Vocalization and hearing
- Use of ultrasound. Noise pollution and its prevention.
- Application of these principles in nursing.

UNIT IX

- Electricity and Electromagnetism : Nature of Electricity, voltage, Current, Resistance and their Units.
- Flow of electricity in solids, electrolytes, gases and vacuum.
- Electricity and human body.
- ECG, EEG, EMG, ECT.
- Pace makers and defibrillation.
- Magnetism and electricity.
- M.R.I. Scanning, CAT scan.

UNIT X

- Atomic Energy: Structure of Atom, Isotopes and Isobars.
- Radioactivity: Use of radioactive isotopes.
- Radiation protection units and limits, Instruments used for detection of ionizing radiation. X – Rays.

UNIT XI

- Principles of Electronics : Common electronic equipments used in patient Care.

Practicum

- Experiments and Tests should be demonstrated wherever applicable.

Psychology

Placement: First year

Time allotted: Theory 60 hrs.

Practical : 15 hrs.

COURSE DESCRIPTION

This course is designed to reorient and widen the student's knowledge of fundamentals of psychology. The student is offered an opportunity to apply the theoretical concepts in the clinical setting and thereby understand the psychodynamics of patient behavior. This course would also help the student to develop an insight into her own behavior.

OBJECTIVES

At the end of the course, the students will

1. Apply psychological principles while performing nursing duties.
2. Distinguish the psychological processes during health and sickness.
3. Analyze own behavior patterns.
4. Tabulate the psychological needs of the patients for planning nursing care.
5. Participate in psychometric assessment of the client.

COURSE CONTENTS

UNIT I

- Introduction: Definition of psychology, scope and methods of psychology.
- Relationship with other subjects.

UNIT II

- Sensation, Attention and Perception : Definitions
- Sensory processes : Normal and abnormal
- Attention and distraction: contributory factors.
- Characteristics of perception: normal and abnormal.

UNIT III

- Motivation : Definition and nature of motivation
- Biological and social motives
- Frustration and conflicts
- Self- actualization

UNIT IV

- Emotions: Definition of emotions, Expression and perception.
- Emotions in sickness.

UNIT V

- Personality: Definition, Constituents of personality.
- Personality in sickness and nursing

UNIT VI

- Psychological aspects of nursing
- Behavior and sickness. Psychological needs of
 - Child and adolescents
 - Adult
 - Aged
 - Attendants
 - Chronically ill individual

UNIT VII

- Individual differences.
- Significance of individual differences.
- Heredity and environment.
- Role of individual differences both in health and sickness.
- Implications of individual differences in nursing.

UNIT VIII

- Intelligence and Abilities : Definition
- Intelligence and abilities during sickness.
- Measurement of Intelligence and abilities.

UNIT IX

- Learning : Definition , Conditions of learning
- Laws of learning
- Learning during health and sickness.

UNIT X

- Memory and forgetting : Definition and nature of memory
- Memory during health and sickness.
- Forgetting during health and sickness.

UNIT XI

- Attitudes: Definition, Development and modification
- Role of attitudes in health and sickness.

UNIT XII

- Concept of mental hygiene & mental health.
- Characteristics of a mentally healthy person.

- Defense mechanisms

PRACTICUM

1. Simple experiments on i) Perception ii) Measuring thresholds iii) Reaction time.
2. Administration of psychological tests
3. Observation and recording data : i) Field observation ii) Interview
iii) Interview case study IV) Self- rating

Microbiology

Placement: First year

Time allotted: Theory 60 hrs.

Practical: 30 hrs.

COURSE DESCRIPTION

This course reorients the students to the fundamentals of Microbiology & its various sub-divisions. It provides opportunities to gain skill in handling and use of microscope for identifying various micro- organisms. It also provides opportunities for safe handling of materials containing harmful bacteria and methods of destroying microorganisms.

OBJECTIVES

At the end of the course, the students will

1. Identify common disease producing micro- organisms.
2. Explain the basic principles of microbiology and their significance in health and disease.
3. Demonstrate skill in handling specimens.
4. Explain various methods of dis- infection and sterilization.
5. Identify the role of the nurse in hospital infection control system.

COURSE CONTENTS

UNIT I

- Structure and Classification of Microbes.
- Morphological types
- Size and form of bacteria.
- Motility
- Classification of Micro- organisms.

Practical

- Use and care of microscope.
- Common examination: Smear Blood, Modules, and Yeasts.

UNIT II

- Identification of Micro- organisms.

- Discussion of laboratory methods.
- Diagnosis of bacterial diseases.

Practical

- Staining techniques- gram staining, acid fast staining.
- Hanging drop preparation.

UNIT III

- Growth and Nutrition of Microbes
- Temperature
- Moisture
- Blood

Practical

- Preparation of Media and culture techniques.
- Collection, handling and transportation of various specimens.

UNIT IV

- Destruction of Micro- organisms.
- Sterilization and disinfection
- Chemotherapy and antibiotics.
- Effects of heat and cold
- Hospital Infection control procedure & role of nurses.

Practical

Sterilization methods- Physical, Chemical and Mechanical.

UNIT V

- Disease producing micro- organisms.
- Gram positive bacilli.
- Tuberculosis and Leprosy
- Anaerobes
- Cocci
- Spirochete
- Rickettsiae

Practical - Identification and study of the following bacteria; Strepto-cocci. Pneumococci and Staphylococci. Corynebacteria, Spirochetes and gonococci, enteric bacteria. Posting in infection control department.

UNIT VI

- Pathogenic Fungi
- Dermatophytes
- Systemic Mycotic infection
- Laboratory diagnosis of Mycotic infection.

UNIT VII

- Immunity
- Immunity and hypersensitivity – Skin test
- Antigen and antibody reaction
- Immunization in disease.

Practical: Demonstration of serological methods.

UNIT VIII

- Parasites and Vectors.
- Characteristics and classification of parasites
- Protozoal infection including amoebiasis
- Helminthes infection
- Diagnosis of parasitic infection
- Vectors and diseases transmitted by them.

Practical: Identification of Parasites and Vectors.

UNIT IX

- Viruses.
- Classification and general character of viruses.
- Diseases caused by viruses in man and animal and their control.

UNIT X

- Micro – organisms transmitted through food.
- Food poisoning. Food borne infections.

PRACTICUM

Each Student will practice in the laboratory as indicated in each unit of the courses outline. While giving nursing care in the wards they will practice collection and processing of specimens. Prevention and control of hospital infections. Sterilization, immunization, chemotherapy and maintenance of personal and environmental hygiene. Observation visit to incinerator, posting in CSSD and infection control department.

Maternal Nursing

Placement: First year

Time allotted: Theory 60 hrs.

Practical: 240 hrs.

COURSE DESCRIPTION

This course is designed to widen the student's knowledge of obstetrics during pregnancy, labor and puerperium. It also helps to acquire knowledge and develop skill in rendering optimum nursing care to a child bearing mother in a hospital or community and help in the management of common gynecological problems.

OBJECTIVES

At the end of the course, the students will

1. Describe the physiology of pregnancy, labors and puerperium.
2. Manage normal pregnancy, labor and puerperium.
3. Explain the physiology of lactation and advice on management of breast feeding.
4. Be skilled in providing pre and post operative nursing care in obstetric conditions.
5. Identify and manage high risk pregnancy including appropriate referrals.
6. Propagate the concept and motivate acceptance of family planning methods.
7. Teach, guide and supervise auxiliary midwifery personnel.

COURSE CONTENTS

UNIT I

- Introduction and historical review
- Planned parenthood
- Maternal morbidity and mortality rates
- Legislations related to maternity benefits, MTP acts, incentives for family Planning etc.

UNIT II

- Review of the anatomy and physiology of female reproductive system.
- Menstrual Cycle & Disorders.
- Female (pelvis normal and contracted)
- Review of fetal development.

UNIT III

- Physiology and management of pregnancy, labor and puerperium.
- Signs and symptoms and diagnosis of pregnancy
- Antenatal care
- Pregnant women with HIV/ AIDS
- Management of common gynecological problems.

UNIT IV

- The New born baby.
- Care of the baby at birth including resuscitation
- Essential Newborn Care.
 - Feeding
 - Jaundice and infection
 - Small & large for date babies.
 - Intensive care of the new born.
 - Trauma and hemorrhage.

UNIT V

- Management of abnormal pregnancy, labor and puerperium.
- Abortion, ectopic pregnancy and vesicular mole.
- Pregnancy included hypertension, gestational diabetes, anemia, heart disease.

- Urinary infections, Ante partum hemorrhage
- Abnormal labor (malposition & malpresentation)
- Uterine inertia
- Disorders of puerperium
- Management of engorged breast, cracked nipples, breast abscess and mastitis
- Puerperal sepsis
- Post partum hemorrhage
- Inversion and prolapsed of uterus, obstetrical emergencies.
- Obstetrical operations i.e. forceps, vacuum, episiotomy, caesarean section.

UNIT VI

- Drugs in obstetrics.
- Effects of drugs during pregnancy. labor and puerperium on mother & Baby.

UNIT VII

- National Welfare Programmes for women
- National Family Welfare Programme.
- National family
- Problems associated with unwanted pregnancy
- Unwed mother.

PRACTICUM

1. The students will
 - a. Be posted in antenatal Clinic, MCH clinic, antenatal ward, labor room, postnatal ward, maternity OT, MTP room.
 - b. Visit welfare agencies for women and write observation report.
 - c. Follow nursing process in providing care to 3-6 patients.
 - d. Write at least two nursing care studies and do a presentation.
 - e. Give at least one planned health teaching to a group of mothers.
2. Practice following nursing procedures.
 - a. Antenatal & post natal examination, per vaginal exam.
 - b. Conduct normal delivery, stitching of episiotomy, (For male candidates Minimum conduct of 5 deliveries)
 - c. Motivation of family for adopting family planning methods.
 - d. Motivate family for Planned Parenthood.

e. Assist in various diagnostic and therapeutic procedures including IUD insertion and removal.

CHILD HEALTH NURSING

Placement: First year

Time allotted: Theory 60 hrs.

Practical: 240 hrs.

COURSE DESCRIPTION

This course is aimed at developing an understanding of the modern approach to childcare, the common health problems of children and neonates in health and sickness.

OBJECTIVES

At the end of the course, the students will

1. Explain the modern concept of child care and the principles of child health nursing.
2. Describe the normal growth and development of children at different ages.
3. Manage sick as well as healthy neonates and children.
4. Identify various aspects of preventive pediatric nursing and apply them in providing nursing care to children in hospital and community.

COURSE CONTENTS

UNIT I

- Introduction.
- Modern concept of child care
- Internationally accepted rights of the child

- National policy and legislations in relation to child health and welfare.
- National programmes related to child health and welfare.
- Changing trends in hospital care, preventive, promotive and curative aspects of child health.
- Child morbidity and mortality rates.
- Differences between an adult and child.
- Hospital environment for a sick child.
- The role of a pediatric nurse in caring for a hospitalized child.
- Principles of pre & post operative care of infants and children
- Pediatric nursing procedures.

UNIT II

- The healthy child
- Growth and development from birth to adolescence.
- The needs of normal children through the stages of development and parental guidance.
- Nutritional needs of children & infants breast- feeding. Supplementary/ feeding and weaning.
- Accidents, causes and prevention.
- Value of play and selection of play material
- Preventive immunization.

UNIT III

- Nursing care of a neonate.
- Nursing care of a normal newborn.
- Neonatal resuscitation
- Nursing management of a low birth weight baby
- Nursing management of common neonatal disorders.
- Organization of neonatal unit. Prevention of infections in the nursery.

UNIT IV

- Nursing management in common childhood diseases.
- Nutritional deficiency disorders.
- Respiratory disorders and infections.
- Gastrointestinal infections, infestations and congenital disorders.
- Cardio vascular problem- congenital defects and rheumatic fever.

- Genito- urinary disorder – Nephrotic syndrome. Wilms’ tumor, infection and congenital disorders.
- Neurological infections and disorders- convulsions, epilepsy, meningitis, Hydrocephalus, spin bifida.
- Hematological disorders- Anemia, Thalassemia, ITP, Lukemia, Hemophialia,
- Endocrine Disorders- Juvenile Diabetes Mellitus.
- Orthopedic disorders- club feet. Hip dislocation and fracture.
- Disorders of skin eye and ears.
- Common communicable diseases in children, their identification, nursing management in hospital and home and prevention.
- Pediatric emergencies- poisoning, foreign bodies, hemorrhage, burns and drowning.

UNIT V

- Management of behavior disorders in children.
- Management of challenged children:
 - Mentally challenged
 - Physically challenged
 - Socially challenged

PRACTICUM

The students will:-

1. Be posted in pediatric medical and surgical ward, OPD in hospital, health centre and neonatal unit.
2. Visit a centre for handicapped children and child welfare centre and write observation report.
3. Write an observation study of normal children of various age groups in home / nursery school/ crèche.
4. Follow nursing process in providing care to 3-6 children.
5. Write at least two nursing care studies and do a presentation.
6. Give two planned health teachings, one in hospital and one in OPD/ health centre.
7. Practice the following nursing procedures:
8. Taking pediatric history.
9. Physical assessment of children

10. Baby bath
11. Feeding
12. Restraining
13. Calculation of dosage of drugs and administration of medications and injections
14. Collection of specimens.
15. Enema, bowel wash, colostomy irrigation
16. Steam and Oxygen inhalation.
17. Preparation to assist with diagnostic tests and operations.
18. Examination / Assessment of a newborn.
19. Neonatal resuscitation
20. Care of a baby in incubator and on ventilator
21. Photo therapy
22. Assist in exchange transfusion and other therapeutic procedures.

Medical Surgical Nursing

Placement: First year

Time allotted: Theory 90 hrs.

Practical: 270 hrs.

COURSE DESCRIPTION

The purpose of this course is to widen the student's knowledge and develop proficiency in caring for patients with medical surgical problems. This course includes review of relevant anatomy and physiology, path physiology in medical – surgical disorders and the nursing management of these conditions.

OBJECTIVES

At the end of the course, the students will

1. Explain relevant Anatomy and Physiology of various systems of the body.
2. Explain path physiology of various disorders.
3. Explain the actions, side effects and nursing implications in administering drugs for various disorders.
4. Discuss the recent advancement in the treatment and care of patients with medical surgical conditions.

5. Develop skill in giving comprehensive nursing care to patients following the steps of nursing process.
6. Assist the patients and their families in identifying and meeting their own health needs.
7. Appreciate the role of the nurse in the medical surgical health team.

COURSE CONTENTS

UNIT I

- Introduction to medical surgical nursing.
- Review of concepts of comprehensive nursing care in medical surgical Conditions.
- Nurse, patient and his/ her family.
- Functions of nurse in the outpatient department.
- Intensive care unit.

UNIT II

- Nursing management of patient with specific problems.
 - Fluid and electrolyte imbalance.
 - Dyspnea and cough, respiratory obstruction.
 - Fever
 - Shock
 - Unconsciousness
 - Pain
 - Acute illness
 - Chronic illness
 - Terminal illness
 - Age related illness
 - Patient under going surgery
 - Incontinence

UNIT III

- Nursing management of patient with neurological and neurosurgical Conditions.
- Review of anatomy and physiology of the nervous system.
- Path physiology, diagnostic procedures and management of :

- Cerebro- vascular accident.
- Cranial, spinal and peripheral neuropathies.
- Head- ache and intractable pain.
- Epilepsy.
- Infectious and inflammatory diseases and trauma of the Nervous System.
- Common disorders of the system.
- Recent advances in diagnostic and treatment modalities.
- Drugs used in these disorders.
- Tumors of brain & spinal cord, congenital malformations, degenerative diseases.

UNIT IV

- Nursing management of patient with cardiovascular problems.
- Review of relevant anatomy and physiology of cardio vascular system.
- Pathophysiology, diagnostic procedures and management of
 - Ischemic Heart diseases.
 - Cardiac arrhythmias.
 - Congestive heart failure.
 - Rheumatic and other valvular heart diseases
 - Endocarditis, cardiomyopathies, congenital heart diseases, hypertension, heart block.
 - Cardiac emergencies: cardiac arrest, acute pulmonary edema, cardiac tamponade. Cardiogenic shock, aneurysms and peripherovascular disorders, recent advancement in cardiology.

UNIT V

- Nursing management of patient with respiratory problems.
- Review of anatomy and physiology of respiratory system, Pathophysiology, diagnostic procedures and management of upper respiratory tract infections.
 - Bronchitis
 - Asthma
 - Emphysema, Empyema, Atelectasis, COPD
 - Bronchiectasis
 - Pneumonia
 - Pulmonary tuberculosis
 - Lung abscess
 - Pleural effusion

- Tumors and Cysts
- Chest injuries
- Respiratory arrest and insufficiency
- Pulmonary embolism
- Drugs used in the management of these patients
- Special respiratory therapies.

UNIT VI

- Nursing management of patient with Genito- urinary problems.
- Review of anatomy and physiology of the genitor- urinary system.
 - Nephritis
 - Renal calculus
 - Acute renal failure
 - Chronic renal failure
 - End stage renal disease
- Special procedures, dialysis, renal transplant
- Drugs used in management of these patients
- Congenital disorders, urinary infections
- Benign prostate hypertrophy.

UNIT VII

- Nursing management of patients with problems of the digestive Systems.
- Review of anatomy and physiology of gastrointestinal system and accessory organs.
 - Pathophysiology, diagnostic procedures and management of
 - G.I. Bleeding
 - Peptic ulcer
 - Infections
 - Acute abdomen
 - Colitis, diarrhea, dysentery & mal- absorption syndrome.
 - Cholecystitis
 - Hepatitis, hepatic coma and cirrhosis of liver
 - Portal hypertension
 - Pancreatitis
 - Tumors, hernias, fistulas, fissures, hemorrhoids.
 - Drugs used in the management of these patients.

UNIT VIII

- Nursing management of patients with endocrine problems
- Review of anatomy and physiology and patho- physiology of patients

With

- Thyroid disorders
- Diabetes mellitus
- Diabetes insipid us
- Adrenal tumor
- Pituitary disorders.
- Diagnostic procedures.

Nursing management of patients with above problems.

Drugs used in endocrine problems.

UNIT IX

- Nursing management of patients with musculoskeletal problems.
- Review of anatomy and physiology and Pathophysiology
- Arthritis, osteomyelities, bursitis.
- Fractures, dislocation and trauma
- Prolapsed disc.
- Osteomalacia and osteoporosis
- Tumor
- Amputation

Diagnostic procedures

Nursing management of patients with above problems.

- Prosthesis and rehabilitation.
- Transplant & replacement surgeries.

UNIT X

- Nursing management of patients with disorders of female reproductive tract.
- Disorder of menstruation
- Infections of the genital tract
- R.V.F., V.V.F.
- Climacteric changes and associated problems.

UNIT XI

- Nursing management of patients with Oncological disorders.
- Types of neoplasm's and related Pathophysiology.
- Diagnostic procedures.

- Modalities of treatment and nurse's role.
- Special therapies – chemotherapy and radiotherapy.
- Preventive measures, other therapies.

UNIT XII

- Nursing management of patient with burns.
- Nursing management of patient with reconstructive surgeries.

UNIT XIII

- Nursing management of patients with common communicable diseases & STD's
- Nursing management of patients with immunological disorders including HIV / AIDS

UNIT XIV

- Nursing management of patients with diseases of eye, ear, nose, throat & Skin.

UNIT XV

- Nursing management of patients with blood disorders.
- Review of Anatomy & Physiology of Blood and Blood products.
- Patho- physiology, diagnostic procedures and management of blood Disorders-
 - Anemia
 - Leukemia
 - Bleeding disorders
 - Hemophilia
 - Purpura etc.
- Blood transfusion, safety checks, procedure and requirements, management Of adverse transfusion reaction, records for blood transfusion.
- Management and counseling of blood donors, phlebotomy procedure, and post donation management.
- Blood bank functioning and hospital transfusion committee.
- Bio – safety and waste management in relation to blood transfusion.

UNIT XVI

- Nursing in emergencies.

- Cardiac emergencies
- Trauma
- Poisoning
- Crisis management: Thyroid crisis, Hypertensive crisis, adrenal crisis.

PRACTICUM

- Students should rotate in the selected medical & surgical areas, like Cardio Thoracic, Neurology, Urology, Orthopedics, Gynecology, Oncology, Burns, and Reconstructive surgical units.
- The students should be given patient assignment. They have to practice patient centered comprehensive nursing
- Each student is required to give planned health teachings, conduct clinical Teaching, case presentation and drug study.

English

Placement: First year

Time allotted: Theory 60 hrs.

COURSE DESCRIPTION

The course is designed to help the student understand and usage of English language required for their professional work.

OBJECTIVES

After the course the students will develop

1. Ability to speak and write grammatically correct English
2. Effective skill in reading and understanding the English language.
3. Skill in reporting

COURSE CONTENTS

UNIT I

- Remedial Study of Grammar.
- Review of grammar, vocabulary and effective use of dictionary.
- Prepare task oriented seminars.
- Symposia and panel discussion.

UNIT II

- The ability to understand selected passage and express meaning in one's own words.
- Reading and comprehension of the prescribed books.

UNIT III

- The study of various forms of composition
 - Note taking
 - Diary
 - Nurses notes, anecdotal records
 - Writing of Summary
 - Nurses reports on health problems.

The students will submit one sample of each item from her own practical experience.

UNIT IV

- Verbal communication
- Oral reports
- Summarization of discussion
- Debate
- Listening comprehension – Film, Cassette and Radio.

PRACTICUM

- The clinical experience in the wards and bed side nursing will provide opportunity for students to fulfill the objectives of learning language.
- Assignment on writing and conversation through participation in discussion, debates, seminars and symposia, the students will gain further skills in task oriented communication.

Sociology

Placement: Second year

Time allotted: Theory 60 hrs.

COURSE DESCRIPTION

The course is to re-orient students to sociology related to community and social institution in India and its relationship with health, illness, and nursing.

OBJECTIVES

At the end of the course, the student will

1. Describe sociological concepts that are applicable to nursing.

2. Determine role of sociology in nursing as related to social Institutions in India.
3. Develop positive attitudes towards individual, family and community.

COURSE CONTENTS

UNIT I

- Introduction
- Importance of study of sociology in nursing, relationship of anthropology, Sociology, etc.

UNIT II

- Individual and the Society.
- Socialization
- Interdependence of the individual and society
- Personal disorganization.

UNIT III

- Culture
- Nature of culture
- Evolution of culture
- Diversity and uniformity of culture.

UNIT IV

- Social organization
- Social groups, crowds and public groups, nations, race.
- Social institutions: The family, marriage, education, religion, Arts, economic Organization, political organization.
- The urban & rural community in India : Ecology, Characteristics of the Village, characteristics of the town and city.
- Social stratification: Class and caste.

UNIT V

- Social process
- Process of Social Interaction : competition, conflict-war, cooperation, accommodation and assimilation.

UNIT VI

- Social change
- Nature and process of social change : Factors influencing cultural change, Cultural lag.

UNIT VII

- Social Problems
- Social disorganization, control & planning : poverty, population, housing, Illiteracy, food supplies, growth of urbanization, prostitution, minority groups, rights of women & children, child labor, child abuse, delinquency and crime, substance abuse.

Community Health Nursing

Placement: Second year
hrs.

Time Allotted: Theory 60

Practical – 240 hrs.

COURSE DESCRIPTION

The course enables the students to understand the national health care delivery system and to participate in the delivery of Community Health Nursing.

OBJECTIVES

At the end of the course, the student will

1. Explain the concepts of various factors contributing to health of individual, family and community.
2. Identify the role of community health nurse.
3. Describe national health care delivery system.
4. Describe epidemiological methods and principles of prevention and control of illness in the community.
5. Identify the role of personnel working in the community health setup.
6. Plan the work of community health nurse and supervise and train health workers.

COURSE CONTENTS

UNIT I

- Introduction
- Introduction to Community health- Concepts, Principles and elements of Primary Health Care.
- Introduction to community health nursing.
- Concepts of community health nursing- Community nursing process.
- Objectives, scope and principles of community health nursing.

UNIT II

- Family Health Services
- Concept, objectives, scope and principles
- Individual, family and community as a unit of service.
- Principles and techniques of home visiting.

- Establishing working relationship with the family.
- Working with families in relation to prevention of disease.
- Promotion of health.
- Care of the sick in the home, physically handicapped and mentally challenged.
- Surveillance and monitoring.

UNIT III

- Organization and administration of health services in India.
- National health policy.
- Health Care Delivery system in India.
- Health team concept.
 - Centre, State, district, urban health services, rural health services
 - System of medicines
 - Centrally sponsored health schemes
 - Role of voluntary health organizations and international health agencies.
 - Role of voluntary health personnel in the community
 - Public health legislation.

UNIT IV

- Health Education
 - Aims, concepts and scope of health education.
 - National plan for health education.
 - Communication techniques.
 - Methods and media for health education programmes.
 - Planning for health education and role of nurse

UNIT V

- Role of the community health nurse.
- National health programmes.
 - Maternal and child health programmes.

- Family welfare and school health services.
- Occupational health services.
- As a member of the health team.
- Training and supervision of health care workers.

UNIT VI

- Epidemiology
- Definition- Concepts, aims, objectives, methods, principles.
- Epidemiology – Theories and Models.
- Application of Epidemiology, principles and concepts in community health.

UNIT VII

- Bio-Statistics and Vital Statistics
- Introduction, definition and scope, legislation
- Report, recording and compiling of vital statistics at the local, state, national and international level.
- Definitions and methods of computing vital statistics.
- Methods of presenting data
- Management Information System.

PRACTICUM

- Each student will prepare a community profile.
- The students will be allotted families for gaining experience in identifying Family health needs, health counseling and guidance and family budgeting for optimum health.
- The students will participate in the activities of primary health centre.
- Sub – centre, MCH centre.
- Visits will be made to selected health and welfare agencies, water Purification plant and sewage disposal plant, Infectious disease hospital.
- Conduct health educational programmes for individual / groups/ community.

Mental Health Nursing

Placement: Second year

Time Allotted: Theory 60 hrs.

Practical – 240 hrs.

COURSE DESCRIPTION

The course enables the students to recognize and appreciate the causes, symptoms and process of abnormal human behavior. It also introduces the student to the present day treatment modalities in the light of psychological, social and cultural factors affecting human behavior. This course helps the student to learn principles of mental health and psychiatric nursing and to develop beginning skills in the management of the mentally ill in hospital and community.

OBJECTIVES

At the end of the course, the student will

1. Identify and describe the philosophy and principles of mental health nursing.
2. Describe the historical development of mental health and psychiatric nursing.
3. Classify mental disorders.
4. Develop skill in history taking and performing mental status examination.
5. Describe etiological factors, psycho- pathology, clinical features, diagnostic criteria and treatment methods used for mental disorders.
6. Manage the patients with various mental disorders.
7. Communicate therapeutically with patients and their families.
8. Identify role of the nurse in preventive psychiatry.
9. Identify the legal aspects in practice of mental health and psychiatric nursing.

COURSE CONTENTS

UNIT I

- Introduction and Historical Development
- History of psychiatry
- Historical development of mental health nursing.

- Philosophy, principles of mental health and psychiatric nursing.
- Concept of normal and abnormal behavior.
- Role and qualities of mental health and psychiatric nurse.
- Mental health team and functions of team members.
- Legal aspects in psychiatry and mental health services.

UNIT II

- Classification and assessment of mental disorders.
- Terminologies used in Psychiatry.
- Classification of mental disorders.
- Etiological factors and psychopathology of mental disorders.
- History taking and assessment methods for mental disorders.

UNIT III

- Therapeutic Communication
- Communication process
- Interview skills, therapeutic communication techniques. Nurse Patient Relationship, Therapeutic impasse and its management Process recording.

UNIT IV

- Management of mental Disorders.

Diagnostic criteria, treatment and nursing management of patient with following disorders:

- Neurotic Disorders : Anxiety Neurosis, Depressive Neurosis, Obsessive Compulsive Neurosis, Phobic Neurosis and Hypochondriacal Neurosis, Stress related and Somatoform Disorders.
- Psychotic disorders : Schizophrenic form, affective and organic Psychosis.
- Organic Brain Syndromes
- Psychosomatic disorders
- Personality disorders
- Disorders of childhood and adolescence.
-

UNIT V

- Management of patients with Substance use disorders
- Substance use and misuse.
- Dependence, intoxication and withdrawal.
- Classification of psychoactive substances
- Etiological & contributory factors
- Psychopathology
- Clinical features
- Diagnostic criteria.
- Treatment and nursing management of patient with substance use disorders.
- Preventive and rehabilitative aspects in substance abuse.

UNIT VI

- Management of mental sub- normality.
- Classification of mental sub- normality.
- Etiological factors, psychopathology, psychometric assessment, diagnostic Criteria and management of sub- normality.

UNIT VII

- Psychiatric Emergencies.
- Types of emergencies, psychopathology, clinical features, assessment and Diagnosis, treatment and nursing management of patient with psychiatric Emergencies.
- Crisis Intervention therapy.

UNIT VIII

- Therapeutic Modalities
- Principles, indication, contraindications and role of nurse in various Treatment methods:
 - Therapeutic community and Milieu therapy
 - Occupational therapy
 - Psychotherapy
 - Behavior therapy
 - Group therapy

- Family therapy
- Pharmacotherapy
- Electro convulsive therapy
- Other miscellaneous therapies.

UNIT IX

- Preventive psychiatry
- Model of prevention
- Role of nurse in preventive psychiatry
- Psychiatric social work.
- Community mental health nursing.
- Community mental health agencies
- National mental Health Programmes.

PRACTICUM

The student will be provided opportunity to:

- Observe, record and report the behavior of their selected patients
- Record the process of interaction.
- Assess the nursing needs of their selected patients, plan and implement the Nursing intervention.
- Counsel the attendant and family members of patient.
- Participate in the activities of psychiatric team.
- Write observation report after a field visit to the following places:
 - Child guidance clinic.
 - School/ Special Schools (For mentally subnormal)
 - Mental Hospital.
 - Community mental health centers.
 - De – addiction centre.

Introduction to Nursing Education

Placement: Second year

Time Allotted: Theory 60 hrs.
Practical – 75 hrs.

COURSE DESCRIPTION

The course introduces the students to principles and concepts of education, curriculum development and methods and media of teaching. It also describes the steps in curriculum development and implementation of educational programmes in nursing.

OBJECTIVES

At the end of the course, the student will

1. Describe the philosophy and principles of education.
2. Explain the teaching – learning process
3. Develop the ability to teach, using various methods and media.
4. Describe the process of assessment.
5. Describe the administrative aspects of school of nursing
6. Participate in planning and organizing an in- service education programme.
7. Develop basic skill of counseling and guidance.

COURSE CONTENTS

UNIT I

- Introduction to education
- Meaning of education, aims, function and principles.
- Philosophy of education
- Factors influencing development of philosophy of nursing education.

UNIT II

- Teaching learning process
- Nature and characteristics of learning.
- Principles and maxims of teaching.
- Formulating objectives.
- Lesson planning.

UNIT III

- Methods of teaching
 - Teaching methods
 - Lecture
 - Discussion
 - Demonstration
 - Group discussion
 - Project
 - Role play
 - Project
 - Role play
 - Panel discussion
 - Symposium
 - Seminar
 - Field trip
 - Workshop
 - Exhibition
 - Programmed instruction
 - Computer Assisted Learning.

Clinical teaching methods:

- Case methods
- Case presentation
- Nursing rounds and reports
- Bedside clinic
- Conference (individual and group)
- Recording of interaction process.

UNIT IV

- Educational media
- The communication process: factors affecting communication.
- Purposes and types of audio- visual aids.
- Graphics aid: Chalk – board, charts, graphs, posters, flash cards, flannel Graph/ khadigraph, bulletin, cartoon.
- Three dimensional aids: objects, specimen, models, puppets.
- Printed aids: slides, films and television, VCR, VCP, overhead projector, Camera, microscope.
- Audio – aids : tape recorder, public address system, computer.

UNIT V

- Methods of assessment
- Purpose and scope of evaluation and assessment.
- Criteria for selection of assessment techniques and methods.
- Assessment of knowledge: essay type question, SAQ (Short Answer Questions).
- MCQ (multiple choice questions).
- Assessment of skills: Observation, Check list, Practical Examination, Viva, Objective structured clinical examination.
- Assessment of attitude: Attitude scale.

UNIT VI

- Management of school of Nursing.
- Planning of School of nursing, organization.
- Recruitment of teaching staff, budget, facilities for the school, students Selection and admission procedure, administrative planning for students, Welfare services for students, maintenance of school records, preparation of Annual reports, INC guidelines for school of nursing.
- Curriculum Development.
 - Concept, Definition and meaning
 - Types of curriculum

- Levels of curriculum/ Approaches to curriculum
- Process/ steps in development of curriculum

- Rotation plan
- Clinical rotation

UNIT VII

- Guidance and Counseling Definition
- Basic principles of guidance and counseling
- Organization of guidance and counseling services
- Counseling process
- Managing disciplinary problems
- Management of crisis

UNIT VIII

- In – service education
- Introduction to nature and scope of in – service education programme.
- Principles of adult learning
- Planning for in service programme.
- Techniques, and methods of staff education programme
- Evaluation of in- service programme.

PRACTICUM

Each student should:

- Conduct five planned teaching using different methods and media.
- Prepare different types of teaching aids
- Plan, organize and conduct in service education programme.
- Conduct at least one counseling session.
- Prepare rotation plans.

Introduction to Nursing Service Administration

Placement: Second year
hrs.

Time Allotted: Theory 60

Practical – 180 hrs.

COURSE DESCRIPTION

The course is designed to give an opportunity to the student to gain an understanding of the principles of administration and its application to nursing service; it is also intended to assist the students to develop an understanding of professional leadership need.

OBJECTIVES

At the end of the course, the student will

1. Identify the principles of administration.
2. Describe the principles and techniques of supervision.
3. Explain the principles and methods of personnel management.
4. Explain the principles of budgeting
5. Organize and manage a nursing unit effectively.
6. Identify dynamics of organizational behavior. Styles and functions of effective leadership.

COURSE CONTENTS

UNIT – I

- Principles and Practice of administration
- Significance elements and principles of administration.
- Organization of Hospital – Definition, Aims, functions and

Classifications, health team.

- Policies of hospital, different departments with special emphasis to Department of nursing & office management.
- Responsibilities of the nursing personnel specially of ward sister, Medico Legal aspects, concept of cost effectiveness

- Planning
 - Planning process: Concept, principles, institutional policies
 - Mission, Philosophy, Objectives
 - Strategic Planning
 - Application to nursing service and education

UNIT – II

- Nursing unit Management
- Physical layout of a nursing unit and necessary facilities
- Factors affecting the quality of nursing care
- Maintenance of a therapeutic environment
- Administration of the unit management of patient care
- Maintenance of physical environment
- Assignment of duties and time plan
- Patient assignment, safety measures, prevention of accidents and Infections
- Maintenance of patient's records and reports, legal responsibilities
- Maintenance of quality nursing care, nursing audit

UNIT – III

- Personnel management
- Staff recruitment and selection, appointment, promotions, personnel Policies and job descriptions
- Job analysis
- Staffing the unit, staffing norms, rotation plan, leave planning, Performance appraisal, staff welfare and management of disciplinary Problems

UNIT – IV

- Supervision
- Principles of supervision, nature and objectives
- Tools and techniques of supervision
- Evaluation
- Nursing audit

- Staff development orientation program
- Skill training
- Leadership development
- Problem solving process

UNIT V

- Material Management
- Principles of material management
- Quality control
- Inventory, care of equipment, safekeeping
- Role of nursing personnel in material management

UNIT VI

- Financial Management
- Budgeting – Principles of budgeting, audit

UNIT VII

- Organizational Behavior
- Group dynamic and human relation, organizational communication
(Hospital Information System)
- Public relations, leadership styles and functions
- Methods of reporting
- Maintaining records and reports

PRACTICUM

- Observe the functioning of nursing administration at various level i.e.

Institution, department, unit.

- Each student will practice ward management under supervision.
- Student will prepare rotation plan of the staff, write reports, give verbal Reports of the ward and assist in maintaining the inventory of the nursing unit.
- Visit to private and government hospital and write observation reports.

Introduction to Nursing Research and Statistics

Placement: Second year
hrs.

Time Allotted: Theory 45

Practical – 120 hrs.

COURSE DESCRIPTION

The course is designed to assist the students to develop an understanding of basic concepts of research and statistics, use the findings of nursing research in nursing practice, apply the knowledge in conducting projects and solve problems related to nursing using scientific method.

OBJECTIVES

At the end of the course, the student will:

1. Define the terms and concepts of nursing research
2. Identify needs and scope of nursing research
3. Identify and define a research problem
4. Locate and list sources of literature for a specific study
5. Describe different research approaches, methods of data collection and sampling techniques with a special reference to survey method.
6. Develop tool for data collection.
7. Enumerate steps of data analysis and present data summary in tabular form.
8. Use descriptive and co- relational statistics in data analysis.
9. Conduct a group research project.

COURSE CONTENTS

A. INTRODUCTION TO RESEARCH METHODOLOGY

UNIT – I

- Steps of scientific methods
- Definition of research
- Need for nursing research
- Characteristics of good research, Research Process

UNIT II

- Statement of research problem.
- Statement of purpose and objectives.
- Definition of research terms.
- Review of literature.

UNIT III

- Research approaches: - historical, survey and experimental.

UNIT IV

- Sampling Techniques and methods of data collection.
- Sampling
- Instruments- questionnaire and Interview
- Observation schedule, records, measurements
- Reliability and validity of instruments.

UNIT V

- Analysis of Data : Tabulation
- Classification and summarization
- Presentation
- Interpretation of data.

UNIT VI

- Communication of research findings.
- Writing Report :
 - Organizing materials for writing
 - Format of the report
 - Use of computers

B. INTRODUCTION TO STATISTICS

UNIT VII

- Descriptive Statistics.
- Frequency Distribution – Types of measure – frequencies, class interval, Graphic methods of describing frequency
- Measures of Central Tendency – Mean, Median and Mode.
- Measures of Variability : Range, Standard deviation
- Introduction to normal probability.

UNIT VIII

- Correlation
- Computation by rank difference methods
- Uses of correlation co- efficient

UNIT IX

- Biostatistics : Crude rates and standardized rates , ratio and estimation of The trends

UNIT X

- Introduction to computers in nursing.
- Introduction to computers and disk- operating system.
- Introduction to word processing

- Introduction to data base
- Windows applications, word, excel, power point, multimedia.
- Use of statistical packages.
- Introduction to Internet & use of electronic mail
- Computer aided teaching & testing.

PRACTICUM

Students will conduct research project in small groups in selected areas of nursing and submit a report (group studies may include studying of existing health practices, improved practices of nursing (procedures), health records, patient records and survey of nursing literature.

BHARATI VIDYAPEETH DEEMED UNIVERSITY

INTRODUCTION

Bharati Vidyapeeth which is the parent body of Bharati Vidyapeeth Deemed University was established on 10 may 1964, by Dr. Patangrao Kadam with a wider objective of contributing to intellectual awakening and social cultural transformation through dynamic education. Under the imaginative, dynamic and socially committed leadership of the founder Dr. Patangrao Kadam, Bharati Vidyapeeth Deemed University has made astonishing stride in the field of education. The Vidyapeeth has so far established 156 educational institution imparting education to the student's right from pre-primary stage to post graduate stage and Ph.D.

The ministry of human resources development (Department of Education, Government of INDIA) on the recommendation of University Grant Commission, New Delhi through their notification No.

F. - 9-15/95 U.3 dated 26 April 1996 has declared the following institution of Bharati Vidyapeeth at Pune as to be Deemed University.

- 1) Bharati Vidyapeeth Medical College, Pune
- 2) Bharati Vidyapeeth Dental and Hospital, Pune.
- 3) Bharati Vidyapeeth College of Ayurved ,Pune
- 4) Bharati Vidyapeeth Homeopathic Medical College, Pune
- 5) Bharati Vidyapeeth College of Nursing, Pune.
- 6) Bharati Vidyapeeth Institute Yashwantrao Mohite College of Arts , Science and Commerce, Pune.
- 7) Bharati Vidyapeeth Institute New Law College, Pune.
- 8) Bharati Vidyapeeth Institute Social Science Center (M.S.W.), Pune
- 9) Bharati Vidyapeeth Institute Poona College of Pharmacy, Pune.
- 10) Bharati Vidyapeeth College of Engineering, Pune
- 11) Bharati Vidyapeeth Institute of Management & Entrepreneurship Development, Pune.
- 12) Bharati Vidyapeeth Institute Yashwantrao Chavan Institute of social science centre, Pune
- 13) Bharati Vidyapeeth Institute Research and Development Centre in Applied Chemistry, Pune.
- 14) Bharati Vidyapeeth Institute College of Physical Education, Pune.

- 15) Bharati Vidyapeeth Institute of Environment Education and Research, Pune.
- 16) Bharati Vidyapeeth Rajiv Gandhi Institute of Information Technology, Pune.
- 17) Interactive Research School in Health Affairs (IRSHA).
- 18) Bharati Vidyapeeth Medical College & Hospital, Sangli
- 19) Bharati Vidyapeeth Medical College & Hospital, Mumbai.
- 20) Bharati Vidyapeeth Institute of Management & Research, New Delhi.
- 21) Bharati Vidyapeeth College of Architecture, Pune.
- 22) Bharati Vidyapeeth Institute of Hotel Management & Catering Technology, Pune.
- 23) Bharati Vidyapeeth Yashwantrao Mohite Institute of Management, Karad.
- 24) Bharati Vidyapeeth Institute of Management, Kolhapur
- 25) Bharati Vidyapeeth Institute of Management & Rural Development Administration, Sangli.
- 26) Bharati Vidyapeeth Abhijit Kadam Institute of Management & Social Sciences, Solapur.
- 27) Bharati Vidyapeeth College of Engineering , New Delhi.
- 28) Bharati Vidyapeeth Deemed University Institute of Computer Application & Management, New Delhi.
- 29) Bharati Vidyapeeth Dental College & Hospital, Sangli.
- 30) Bharati Vidyapeeth Deemed University College of Nursing, Sangli.
- 31) Bharati Vidyapeeth Deemed University College of Nursing, Navi Mumbai.

The association of Indian universities has also accepted this university as its member.

This is probably the first only university having under its umbrella diversified disciplines of professional and non- professional categories such as Medicine, Dentistry, Nursing, Ayurvedic, Homeopathic Medicine, Science, Commerce, Law and Humanities.

The degrees and diplomas awarded by this university have the same status and recognition as those awarded by any Indian University recognized by the University Grant Commission, New Delhi. The University operates its educational programme in accordance with the rules, regulations and guidelines of various statutory Central Government Bodies like Medical Council of India, Dental council of India, Bar Council of India, Indian nursing Council, Central Council of Indian Medicine etc.

COLLEGE OF NURSING, PUNE

Bharati Vidyapeeth's College of Nursing was established in the year 1992 with prior permission of University of Pune to which it was having affiliation. It is now a constituent unit of Bharati Vidyapeeth University. This is the first college of nursing in the Non- Government sector in Pune. Adequate facilities for clinical studies have been provided and the college is Dhankawadi, Pune.

The college has been approved by the Government of India, UGC and Maharashtra nursing council. The college has been approved by the Government of India, UGC and Maharashtra nursing council. The college has separate Hostel facilities for Boys and Girls. The Curriculum and Syllabus is made and updated as per the Maharashtra nursing council, Indian nursing council and the need of society.

COLLEGE OF NURSING, SANGLI.

Bharati Vidyapeeth Deemed University's College of Nursing, Sangli started in 2007 at Bharati Vidyapeeth Deemed University campus, Wanlesswadi, Sangli. The college is a constituent unit of Bharati Vidyapeeth Deemed University & started with permission from Government of Maharashtra, Maharashtra nursing council and Indian nursing Council. The college has excellent physical Infrastructure & a well-qualified teaching faculty. Imparts hands on clinical practice to the students in 750 bedded parent Bharati Hospital and in Specialty Hospitals of Sangli, Miraj. The students are also given Community field experience in urban as well as Rural Setting. Apart from curricular the students are encouraged for participation in extracurricular activities & Sports competitions at University, State, National & international level. Students are assisted for Loan facility, Fee concessions, Minority Scholarship. The college has active NSS Unit which regularly conducts activities such as tree plantation, road safety rallies, prevention of addiction, save girl campaign, Rallies for prevention & management of HIV cases & adult education. The college is well equipped with nursing labs & has a digital library with adequate number of books, national & international journals. 70% of the Alumni are working in State Government hospitals, renowned hospitals and Abroad. The college has 30 – intake capacity of P.B.B.Sc. nursing.

COLLEGE OF NURSING, NAVI MUMBAI.

Bharati Vidyapeeth Deemed University's College of Nursing, Navi-Mumbai is started in 2009 at Bharati Vidyapeeth Deemed University Campus, Belapur. Navi Mumbai. The college is constituent unit of Bharati Vidyapeeth Deemed University Pune. And having affiliation of the same. The College has been started with permission from Government of Maharashtra, Maharashtra nursing council and Indian nursing Council. The college has 30 intake capacity for PB B.Sc. nursing programme.

PHILOSOPY OF BHARATI VIDYAPEETH

3. Research Project (Qualifying)	50	50	

Note: Qualifying Examination

College Examination (Not University Examination)

N.B.

1. Teaching of Anatomy, Physiology, Pharmacology and Pathology will be integrated with clinical subjects.
2. A minimum of 85% attendance in theory and 95% practical/ clinical in each subject is essential for appearing in the examination.
3. 100% attendance in practical/ clinical in each clinical area is essential before award of degree.
4. 50% of minimum marks in each theory and practical paper separately are required for passing.
5. A candidate has to secure minimum of 33 % in qualifying subject for passing.
6. The candidate has to pass in theory and practical exam separately in each of the paper.
7. If the candidate fails in either theory or practical exam he / she have to reappear for both (Theory & practical).
8. Biochemistry and Biophysics- question paper will consist of Section-I (Biochemistry) MCQ of 8 marks and 30 marks of long and short answer questions and Section-II (Biophysics) MCQ of 7 marks and 30 marks of long and short answer questions.
9. The maximum period to complete the course successfully is 4 years.

Nursing Foundation

Placement: First Year

Time Allotted: Theory – 45 Hrs

COURSE DESCRIPTION

This course will help students develop an understanding of the philosophy, objectives and responsibilities of nursing as a profession. The purpose of the course is to orient to the current concepts involved in the practice of nursing and developments in the nursing profession.

OBJECTIVES

At the end of the course, the students will

1. Identify professional aspects of nursing.
2. Explain theories of nursing.
3. Identify ethical aspects of nursing profession.
4. Utilize steps of nursing process.
5. Identify the role of the nurse in various levels of health services.
6. Appreciate the significance of quality assurance in nursing.
7. Explain current trends in health and nursing.

COURSE CONTENTS

UNIT I

- Development of nursing as a profession
 - Its philosophy
 - Objectives and responsibilities of a graduate nurse.
- Trends influencing nursing practice
- Expanded role of the nurse.
- Development of nursing education in India and trends in nursing education.
- Professional organizations, career planning.
- Code of ethics & professional conduct for nurses.

UNIT II

- Ethical, legal and other issues in nursing.
- Concepts of health wellness and illness, effects on the person.
- Stress and adaptation.
- Health care concept and nursing care concept.
- Developmental concept, needs, roles and problems of the developmental stages of individual – newborn, infant, toddler, pre-adolescent, adolescent, adulthood, middle-age, old age.

UNIT III

- Theory of nursing practice
- Meta paradigm of nursing – characterized by four central concepts i.e. Nurse, person (client/ patient), health and environment.

UNIT IV

- Nursing process.
- Assessment: Tools for assessment, methods, recording.
- Planning: Techniques for planning care, types of care plans.
- Implementation: Different approaches to care , organizations and implementation of care, recording.
- Evaluation: Tools for evaluation, process of evaluation.

UNIT V

- Quality assurance: nursing standards, nursing audit, total quality management
- Role of council and professional bodies in maintenance of standards.

UNIT VI

- Primary health care concept :
 - Community oriented nursing
 - Holistic nursing
 - Primary nursing
- Family oriented nursing concept:
 - problem oriented nursing
 - progressive patient care
 - team nursing

Nutrition & Dietetics

Placement: First Year

Time Allotted: Theory: 30 hrs

Practical: 15

hrs

COURSE DESCRIPTION

This course is designed to provide the students with a wide knowledge of dietetics in Indian setting, that the practice of teaching optimum and realistic dietary planning can become an integral part of nursing practice.

OBJECTIVES

At the end of the course, the student will

1. Explain the principles and practices of nutrition and dietetics.
2. Identify nutritional needs of different age groups and plan diet accordingly.

Plan therapeutic diets in different settings.

3. Plan therapeutic diets in different settings.
4. Prepare meals using different methods utilizing cookery rules.

COURSE CONTENTS

UNIT I

- Introduction to nutrition and dietetics.
- Balanced diet. Factors on which it depends.
- Factors to be considered in planning.
- Guides available for planning.
- Food Hygiene, preparation and preservation.
- Review of nutrients- micro & macro.

UNIT II

- Introduction to diet therapy.
- Hospital diets.
- Therapeutic diet under each unit i.e. cardiovascular diseases.

Gastrointestinal diseases, Renal disorders, Endocrine and metabolic disorders, Allergy, Infections and fevers, Pre and post operative stage, Deficiency diseases and malnutrition overweight and underweight.

UNIT III

- Infant and child Nutrition.

- Feeding of normal infants: feeding problems factors to be considered in planning
- Nutritional requirements.
- Supplementary feeding of infants: Advantage and method of introduction
- Weaning, effects on mother and child.
- Psychology of infant and child feeding.
- Feeding the sick child. Diet in diseases of infancy and childhood.
- Deficiency states – malnutrition and under nutrition.
- Feeding pre – school child: nutritional needs, factors to be considered in Planning diets. Problems in feeding.
- School lunch programme, Mid-day meal programme: Advantages, Need in India.

UNIT IV

- Community Nutrition: Need for community nutrition programme.
- Nutritional needs for special groups : Infant, child, adolescent, pregnant Woman, lactating mother and old people.
- Substitutes for non- vegetarian foods.
- Selection of cheap and nutritious foods, Nutrition education needs and Methods.
- Methods of assessing nutritional status of individual/ group/ community.
- Current nutritional problems and national programmes.

PRACTICUM

- I. Culinary guide practices Methods of cooking and cookery rules.
 1. Simple preparation of beverages, soups, cereals and pulses, eggs, Vegetables, meat.
 2. Menu Plans,
- II. Preparation of supplementary food for infants.
 1. Food for infants.
 2. Low cost nutritious dishes for vulnerable groups.
 3. Dietary case study of patient on special diet and planning of low cost Dietary instructions for home adaptations.
 4. Planning of therapeutic diets.

Biochemistry & Biophysics

Placement: First Year

Time: Allotted

Section A (Biochemistry) – Theory 30 hrs.

Section B (Biophysics) - Theory 30 hrs.

COURSE DESCRIPTION

This course introduces the basic principles of Biochemistry and Biophysics related to nursing.

OBJECTIVES

At the end of the course, the student will

1. Identify the basic principles of Biochemistry and Biophysics.
2. Synthesize the knowledge of these principles in various nursing situations.

Section A: Biochemistry

Theory – 30

hrs.

COURSE CONTENTS

UNIT I

- Introduction: Importance of Biochemistry in nursing.
- Study of cell and its various components.

UNIT II

- Water and Electrolytes: Water – Sources, property & functions in human Body.
- Water and fluid balance.
- Electrolytes of human body, functions, sources.

UNIT III

- Enzymes
 - Mechanism of action
 - Factors affecting enzyme activity
 - Diagnostic applications.
 - Precautions for handling specimens for enzyme estimation
- Digestion and absorption of carbohydrates, proteins and fats.
- Various factors influencing the digestion and absorption, mal-absorption syndrome.

UNIT IV

- Carbohydrates: Catabolism of carbohydrates for energy purposes.
- Mitochondrial oxidation and oxidation phosphorylation.
- Fats of glucose in the body, Storage of glucose in the body, glycogenesis, glycogenolysis and neoglucogensts, blood glucose and its regulation.
- Glucose tolerance test, hyperglycemia, hypoglycemia, glycemia.

UNIT V

- Protein: Amino acids, hormones.
- Essential amino acids. Biosynthesis of protein in the cells.
- Role of nucleic acid in protein synthesis.
- Nitrogenous constituents of Urine, Blood, and their origin- urea cycle, uric acid formation, gout.
- Plasma proteins and their functions.

UNIT VI

- Fat: Biosynthesis of fats and storage of fats in the body.
- Role of liver in fat metabolism
- Biological important lipids and their functions.
- Cholesterol and lipoprotein
 - Sources occurrence and distribution.
 - Blood level and metabolism.
 - Ketone bodies and utilization.
- Inter relationships in metabolism and cellular control of metabolic processes.

Section B : Biophysics

Theory : 30 hours

COURSE CONTESTS

UNIT I

- Introduction: Concepts of unit and measurements.
- Fundamental and derived units.
- Units of length, weight, mass, time.

UNIT II

- Vector and scalar motion, speed, velocity and acceleration.

UNIT III

- Gravity: Specific gravity, center of gravity, principles of gravity.
- Effects of gravitational forces on human body.
- Application of principles of gravity in nursing.

UNIT IV

- Force, Work, Energy: Their units of measurement.
- Type and transformation of energy, forces of the body, static forces.
- Principles of machines, friction and body mechanics.

- Simple mechanics- lever and body mechanics, pulley and traction.
Incline plane, screw.
- Application of these principles in nursing.

UNIT V

- Heat : Nature, measurement, transfer of heat
- Effects of heat on matter
- Relative humidity, specific heat
- Temperature scales.
- Regulation of body temperature
- Use of heat for sterilization
- Application of these principles in nursing

UNIT VI

- Light laws of reflection
- Focusing elements of the eye, defective vision and its correction, use of Lenses.
- Relationship between energy, frequency and wavelength of light.
- Biological effects of light.
- Use of light in therapy.
- Application of these principles in nursing.

UNIT VII

- Pressures: Atmospheric pressure, hydrostatic pressure, osmotic pressure.
- Measurements of pressures in the body.
 - Arterial and venous blood pressures
 - Ocular pressure
 - Intracranial pressure
 - Applications of these principles in nursing.

UNIT VIII

- Sound : Frequency, Velocity and Intensity
- Vocalization and hearing
- Use of ultrasound. Noise pollution and its prevention.
- Application of these principles in nursing.

UNIT IX

- Electricity and Electromagnetism : Nature of Electricity, voltage, Current, Resistance and their Units.
- Flow of electricity in solids, electrolytes, gases and vacuum.
- Electricity and human body.
- ECG, EEG, EMG, ECT.
- Pace makers and defibrillation.
- Magnetism and electricity.
- M.R.I. Scanning, CAT scan.

UNIT X

- Atomic Energy: Structure of Atom, Isotopes and Isobars.
- Radioactivity: Use of radioactive isotopes.
- Radiation protection units and limits, Instruments used for detection of ionizing radiation. X – Rays.

UNIT XI

- Principles of Electronics : Common electronic equipments used in patient Care.

Practicum

- Experiments and Tests should be demonstrated wherever applicable.

Psychology

Placement: First year

Time allotted: Theory 60 hrs.

Practical : 15 hrs.

COURSE DESCRIPTION

This course is designed to reorient and widen the student's knowledge of fundamentals of psychology. The student is offered an opportunity to apply the theoretical concepts in the clinical setting and thereby understand the psychodynamics of patient behavior. This course would also help the student to develop an insight into her own behavior.

OBJECTIVES

At the end of the course, the students will

1. Apply psychological principles while performing nursing duties.
2. Distinguish the psychological processes during health and sickness.
3. Analyze own behavior patterns.
4. Tabulate the psychological needs of the patients for planning nursing care.
5. Participate in psychometric assessment of the client.

COURSE CONTENTS

UNIT I

- Introduction: Definition of psychology, scope and methods of psychology.
- Relationship with other subjects.

UNIT II

- Sensation, Attention and Perception : Definitions
- Sensory processes : Normal and abnormal
- Attention and distraction: contributory factors.
- Characteristics of perception: normal and abnormal.

UNIT III

- Motivation : Definition and nature of motivation
- Biological and social motives
- Frustration and conflicts
- Self- actualization

UNIT IV

- Emotions: Definition of emotions, Expression and perception.
- Emotions in sickness.

UNIT V

- Personality: Definition, Constituents of personality.
- Personality in sickness and nursing

UNIT VI

- Psychological aspects of nursing
- Behavior and sickness. Psychological needs of
 - Child and adolescents
 - Adult
 - Aged
 - Attendants
 - Chronically ill individual

UNIT VII

- Individual differences.
- Significance of individual differences.
- Heredity and environment.
- Role of individual differences both in health and sickness.
- Implications of individual differences in nursing.

UNIT VIII

- Intelligence and Abilities : Definition
- Intelligence and abilities during sickness.
- Measurement of Intelligence and abilities.

UNIT IX

- Learning : Definition , Conditions of learning
- Laws of learning
- Learning during health and sickness.

UNIT X

- Memory and forgetting : Definition and nature of memory
- Memory during health and sickness.
- Forgetting during health and sickness.

UNIT XI

- Attitudes: Definition, Development and modification
- Role of attitudes in health and sickness.

UNIT XII

- Concept of mental hygiene & mental health.
- Characteristics of a mentally healthy person.

- Defense mechanisms

PRACTICUM

1. Simple experiments on i) Perception ii) Measuring thresholds iii) Reaction time.
2. Administration of psychological tests
3. Observation and recording data : i) Field observation ii) Interview
iii) Interview case study IV) Self- rating

Microbiology

Placement: First year

Time allotted: Theory 60 hrs.

Practical: 30 hrs.

COURSE DESCRIPTION

This course reorients the students to the fundamentals of Microbiology & its various sub-divisions. It provides opportunities to gain skill in handling and use of microscope for identifying various micro- organisms. It also provides opportunities for safe handling of materials containing harmful bacteria and methods of destroying microorganisms.

OBJECTIVES

At the end of the course, the students will

1. Identify common disease producing micro- organisms.
2. Explain the basic principles of microbiology and their significance in health and disease.
3. Demonstrate skill in handling specimens.
4. Explain various methods of dis- infection and sterilization.
5. Identify the role of the nurse in hospital infection control system.

COURSE CONTENTS

UNIT I

- Structure and Classification of Microbes.
- Morphological types
- Size and form of bacteria.
- Motility
- Classification of Micro- organisms.

Practical

- Use and care of microscope.
- Common examination: Smear Blood, Modules, and Yeasts.

UNIT II

- Identification of Micro- organisms.

- Discussion of laboratory methods.
- Diagnosis of bacterial diseases.

Practical

- Staining techniques- gram staining, acid fast staining.
- Hanging drop preparation.

UNIT III

- Growth and Nutrition of Microbes
- Temperature
- Moisture
- Blood

Practical

- Preparation of Media and culture techniques.
- Collection, handling and transportation of various specimens.

UNIT IV

- Destruction of Micro- organisms.
- Sterilization and disinfection
- Chemotherapy and antibiotics.
- Effects of heat and cold
- Hospital Infection control procedure & role of nurses.

Practical

Sterilization methods- Physical, Chemical and Mechanical.

UNIT V

- Disease producing micro- organisms.
- Gram positive bacilli.
- Tuberculosis and Leprosy
- Anaerobes
- Cocci
- Spirochete
- Rickettsiae

Practical - Identification and study of the following bacteria; Strepto-cocci. Pneumococci and Staphylococci. Corynebacteria, Spirochetes and gonococci, enteric bacteria. Posting in infection control department.

UNIT VI

- Pathogenic Fungi
- Dermatophytes
- Systemic Mycotic infection
- Laboratory diagnosis of Mycotic infection.

UNIT VII

- Immunity
- Immunity and hypersensitivity – Skin test
- Antigen and antibody reaction
- Immunization in disease.

Practical: Demonstration of serological methods.

UNIT VIII

- Parasites and Vectors.
- Characteristics and classification of parasites
- Protozoal infection including amoebiasis
- Helminthes infection
- Diagnosis of parasitic infection
- Vectors and diseases transmitted by them.

Practical: Identification of Parasites and Vectors.

UNIT IX

- Viruses.
- Classification and general character of viruses.
- Diseases caused by viruses in man and animal and their control.

UNIT X

- Micro – organisms transmitted through food.
- Food poisoning. Food borne infections.

PRACTICUM

Each Student will practice in the laboratory as indicated in each unit of the courses outline. While giving nursing care in the wards they will practice collection and processing of specimens. Prevention and control of hospital infections. Sterilization, immunization, chemotherapy and maintenance of personal and environmental hygiene. Observation visit to incinerator, posting in CSSD and infection control department.

Maternal Nursing

Placement: First year

Time allotted: Theory 60 hrs.

Practical: 240 hrs.

COURSE DESCRIPTION

This course is designed to widen the student's knowledge of obstetrics during pregnancy, labor and puerperium. It also helps to acquire knowledge and develop skill in rendering optimum nursing care to a child bearing mother in a hospital or community and help in the management of common gynecological problems.

OBJECTIVES

At the end of the course, the students will

1. Describe the physiology of pregnancy, labors and puerperium.
2. Manage normal pregnancy, labor and puerperium.
3. Explain the physiology of lactation and advice on management of breast feeding.
4. Be skilled in providing pre and post operative nursing care in obstetric conditions.
5. Identify and manage high risk pregnancy including appropriate referrals.
6. Propagate the concept and motivate acceptance of family planning methods.
7. Teach, guide and supervise auxiliary midwifery personnel.

COURSE CONTENTS

UNIT I

- Introduction and historical review
- Planned parenthood
- Maternal morbidity and mortality rates
- Legislations related to maternity benefits, MTP acts, incentives for family Planning etc.

UNIT II

- Review of the anatomy and physiology of female reproductive system.
- Menstrual Cycle & Disorders.
- Female (pelvis normal and contracted)
- Review of fetal development.

UNIT III

- Physiology and management of pregnancy, labor and puerperium.
- Signs and symptoms and diagnosis of pregnancy
- Antenatal care
- Pregnant women with HIV/ AIDS
- Management of common gynecological problems.

UNIT IV

- The New born baby.
- Care of the baby at birth including resuscitation
- Essential Newborn Care.
- Feeding
- Jaundice and infection
- Small & large for date babies.
- Intensive care of the new born.
- Trauma and hemorrhage.

UNIT V

- Management of abnormal pregnancy, labor and puerperium.
- Abortion, ectopic pregnancy and vesicular mole.
- Pregnancy included hypertension, gestational diabetes, anemia, heart disease.

- Urinary infections, Ante partum hemorrhage
- Abnormal labor (malposition & malpresentation)
- Uterine inertia
- Disorders of puerperium
- Management of engorged breast, cracked nipples, breast abscess and mastitis
- Puerperal sepsis
- Post partum hemorrhage
- Inversion and prolapsed of uterus, obstetrical emergencies.
- Obstetrical operations i.e. forceps, vacuum, episiotomy, caesarean section.

UNIT VI

- Drugs in obstetrics.
- Effects of drugs during pregnancy. labor and puerperium on mother & Baby.

UNIT VII

- National Welfare Programmes for women
- National Family Welfare Programme.
- National family
- Problems associated with unwanted pregnancy
- Unwed mother.

PRACTICUM

1. The students will
 - a. Be posted in antenatal Clinic, MCH clinic, antenatal ward, labor room, postnatal ward, maternity OT, MTP room.
 - b. Visit welfare agencies for women and write observation report.
 - c. Follow nursing process in providing care to 3-6 patients.
 - d. Write at least two nursing care studies and do a presentation.
 - e. Give at least one planned health teaching to a group of mothers.
2. Practice following nursing procedures.
 - a. Antenatal & post natal examination, per vaginal exam.
 - b. Conduct normal delivery, stitching of episiotomy, (For male candidates Minimum conduct of 5 deliveries)
 - c. Motivation of family for adopting family planning methods.
 - d. Motivate family for Planned Parenthood.

e. Assist in various diagnostic and therapeutic procedures including IUD insertion and removal.

CHILD HEALTH NURSING

Placement: First year

Time allotted: Theory 60 hrs.

Practical: 240 hrs.

COURSE DESCRIPTION

This course is aimed at developing an understanding of the modern approach to childcare, the common health problems of children and neonates in health and sickness.

OBJECTIVES

At the end of the course, the students will

1. Explain the modern concept of child care and the principles of child health nursing.
2. Describe the normal growth and development of children at different ages.
3. Manage sick as well as healthy neonates and children.
4. Identify various aspects of preventive pediatric nursing and apply them in providing nursing care to children in hospital and community.

COURSE CONTENTS

UNIT I

- Introduction.
- Modern concept of child care
- Internationally accepted rights of the child

- National policy and legislations in relation to child health and welfare.
- National programmes related to child health and welfare.
- Changing trends in hospital care, preventive, promotive and curative aspects of child health.
- Child morbidity and mortality rates.
- Differences between an adult and child.
- Hospital environment for a sick child.
- The role of a pediatric nurse in caring for a hospitalized child.
- Principles of pre & post operative care of infants and children
- Pediatric nursing procedures.

UNIT II

- The healthy child
- Growth and development from birth to adolescence.
- The needs of normal children through the stages of development and parental guidance.
- Nutritional needs of children & infants breast- feeding. Supplementary/ feeding and weaning.
- Accidents, causes and prevention.
- Value of play and selection of play material
- Preventive immunization.

UNIT III

- Nursing care of a neonate.
- Nursing care of a normal newborn.
- Neonatal resuscitation
- Nursing management of a low birth weight baby
- Nursing management of common neonatal disorders.
- Organization of neonatal unit. Prevention of infections in the nursery.

UNIT IV

- Nursing management in common childhood diseases.
- Nutritional deficiency disorders.
- Respiratory disorders and infections.
- Gastrointestinal infections, infestations and congenital disorders.
- Cardio vascular problem- congenital defects and rheumatic fever.

- Genito- urinary disorder – Nephrotic syndrome. Wilms’ tumor, infection and congenital disorders.
- Neurological infections and disorders- convulsions, epilepsy, meningitis, Hydrocephalus, spin bifida.
- Hematological disorders- Anemia, Thalassemia, ITP, Lukemia, Hemophialia,
- Endocrine Disorders- Juvenile Diabetes Mellitus.
- Orthopedic disorders- club feet. Hip dislocation and fracture.
- Disorders of skin eye and ears.
- Common communicable diseases in children, their identification, nursing management in hospital and home and prevention.
- Pediatric emergencies- poisoning, foreign bodies, hemorrhage, burns and drowning.

UNIT V

- Management of behavior disorders in children.
- Management of challenged children:
 - Mentally challenged
 - Physically challenged
 - Socially challenged

PRACTICUM

The students will:-

1. Be posted in pediatric medical and surgical ward, OPD in hospital, health centre and neonatal unit.
2. Visit a centre for handicapped children and child welfare centre and write observation report.
3. Write an observation study of normal children of various age groups in home / nursery school/ crèche.
4. Follow nursing process in providing care to 3-6 children.
5. Write at least two nursing care studies and do a presentation.
6. Give two planned health teachings, one in hospital and one in OPD/ health centre.
7. Practice the following nursing procedures:
8. Taking pediatric history.
9. Physical assessment of children

10. Baby bath
11. Feeding
12. Restraining
13. Calculation of dosage of drugs and administration of medications and injections
14. Collection of specimens.
15. Enema, bowel wash, colostomy irrigation
16. Steam and Oxygen inhalation.
17. Preparation to assist with diagnostic tests and operations.
18. Examination / Assessment of a newborn.
19. Neonatal resuscitation
20. Care of a baby in incubator and on ventilator
21. Photo therapy
22. Assist in exchange transfusion and other therapeutic procedures.

Medical Surgical Nursing

Placement: First year

Time allotted: Theory 90 hrs.

Practical: 270 hrs.

COURSE DESCRIPTION

The purpose of this course is to widen the student's knowledge and develop proficiency in caring for patients with medical surgical problems. This course includes review of relevant anatomy and physiology, path physiology in medical – surgical disorders and the nursing management of these conditions.

OBJECTIVES

At the end of the course, the students will

1. Explain relevant Anatomy and Physiology of various systems of the body.
2. Explain path physiology of various disorders.
3. Explain the actions, side effects and nursing implications in administering drugs for various disorders.
4. Discuss the recent advancement in the treatment and care of patients with medical surgical conditions.

5. Develop skill in giving comprehensive nursing care to patients following the steps of nursing process.
6. Assist the patients and their families in identifying and meeting their own health needs.
7. Appreciate the role of the nurse in the medical surgical health team.

COURSE CONTENTS

UNIT I

- Introduction to medical surgical nursing.
- Review of concepts of comprehensive nursing care in medical surgical Conditions.
- Nurse, patient and his/ her family.
- Functions of nurse in the outpatient department.
- Intensive care unit.

UNIT II

- Nursing management of patient with specific problems.
 - Fluid and electrolyte imbalance.
 - Dyspnea and cough, respiratory obstruction.
 - Fever
 - Shock
 - Unconsciousness
 - Pain
 - Acute illness
 - Chronic illness
 - Terminal illness
 - Age related illness
 - Patient under going surgery
 - Incontinence

UNIT III

- Nursing management of patient with neurological and neurosurgical Conditions.
- Review of anatomy and physiology of the nervous system.
- Path physiology, diagnostic procedures and management of :

- Cerebro- vascular accident.
- Cranial, spinal and peripheral neuropathies.
- Head- ache and intractable pain.
- Epilepsy.
- Infectious and inflammatory diseases and trauma of the Nervous System.
- Common disorders of the system.
- Recent advances in diagnostic and treatment modalities.
- Drugs used in these disorders.
- Tumors of brain & spinal cord, congenital malformations, degenerative diseases.

UNIT IV

- Nursing management of patient with cardiovascular problems.
- Review of relevant anatomy and physiology of cardio vascular system.
- Pathophysiology, diagnostic procedures and management of
 - Ischemic Heart diseases.
 - Cardiac arrhythmias.
 - Congestive heart failure.
 - Rheumatic and other valvular heart diseases
 - Endocarditis, cardiomyopathies, congenital heart diseases, hypertension, heart block.
 - Cardiac emergencies: cardiac arrest, acute pulmonary edema, cardiac tamponade. Cardiogenic shock, aneurysms and peripherovascular disorders, recent advancement in cardiology.

UNIT V

- Nursing management of patient with respiratory problems.
- Review of anatomy and physiology of respiratory system, Pathophysiology, diagnostic procedures and management of upper respiratory tract infections.
 - Bronchitis
 - Asthma
 - Emphysema, Empyema, Atelectasis, COPD
 - Bronchiectasis
 - Pneumonia
 - Pulmonary tuberculosis
 - Lung abscess
 - Pleural effusion

- Tumors and Cysts
- Chest injuries
- Respiratory arrest and insufficiency
- Pulmonary embolism
- Drugs used in the management of these patients
- Special respiratory therapies.

UNIT VI

- Nursing management of patient with Genito- urinary problems.
- Review of anatomy and physiology of the genitor- urinary system.
 - Nephritis
 - Renal calculus
 - Acute renal failure
 - Chronic renal failure
 - End stage renal disease
- Special procedures, dialysis, renal transplant
- Drugs used in management of these patients
- Congenital disorders, urinary infections
- Benign prostate hypertrophy.

UNIT VII

- Nursing management of patients with problems of the digestive Systems.
- Review of anatomy and physiology of gastrointestinal system and accessory organs.
 - Pathophysiology, diagnostic procedures and management of
 - G.I. Bleeding
 - Peptic ulcer
 - Infections
 - Acute abdomen
 - Colitis, diarrhea, dysentery & mal- absorption syndrome.
 - Cholecystitis
 - Hepatitis, hepatic coma and cirrhosis of liver
 - Portal hypertension
 - Pancreatitis
 - Tumors, hernias, fistulas, fissures, hemorrhoids.
 - Drugs used in the management of these patients.

UNIT VIII

- Nursing management of patients with endocrine problems
- Review of anatomy and physiology and patho- physiology of patients

With

- Thyroid disorders
- Diabetes mellitus
- Diabetes insipid us
- Adrenal tumor
- Pituitary disorders.
- Diagnostic procedures.

Nursing management of patients with above problems.

Drugs used in endocrine problems.

UNIT IX

- Nursing management of patients with musculoskeletal problems.
- Review of anatomy and physiology and Pathophysiology
- Arthritis, osteomyelities, bursitis.
- Fractures, dislocation and trauma
- Prolapsed disc.
- Osteomalacia and osteoporosis
- Tumor
- Amputation

Diagnostic procedures

Nursing management of patients with above problems.

- Prosthesis and rehabilitation.
- Transplant & replacement surgeries.

UNIT X

- Nursing management of patients with disorders of female reproductive tract.
- Disorder of menstruation
- Infections of the genital tract
- R.V.F., V.V.F.
- Climacteric changes and associated problems.

UNIT XI

- Nursing management of patients with Oncological disorders.
- Types of neoplasm's and related Pathophysiology.
- Diagnostic procedures.

- Modalities of treatment and nurse's role.
- Special therapies – chemotherapy and radiotherapy.
- Preventive measures, other therapies.

UNIT XII

- Nursing management of patient with burns.
- Nursing management of patient with reconstructive surgeries.

UNIT XIII

- Nursing management of patients with common communicable diseases & STD's
- Nursing management of patients with immunological disorders including HIV / AIDS

UNIT XIV

- Nursing management of patients with diseases of eye, ear, nose, throat & Skin.

UNIT XV

- Nursing management of patients with blood disorders.
- Review of Anatomy & Physiology of Blood and Blood products.
- Patho- physiology, diagnostic procedures and management of blood Disorders-
 - Anemia
 - Leukemia
 - Bleeding disorders
 - Hemophilia
 - Purpura etc.
- Blood transfusion, safety checks, procedure and requirements, management Of adverse transfusion reaction, records for blood transfusion.
- Management and counseling of blood donors, phlebotomy procedure, and post donation management.
- Blood bank functioning and hospital transfusion committee.
- Bio – safety and waste management in relation to blood transfusion.

UNIT XVI

- Nursing in emergencies.

- Cardiac emergencies
- Trauma
- Poisoning
- Crisis management: Thyroid crisis, Hypertensive crisis, adrenal crisis.

PRACTICUM

- Students should rotate in the selected medical & surgical areas, like Cardio Thoracic. Neurology, Urology, Orthopedics, Gynecology, Oncology, Burns, and Reconstructive surgical units.
- The students should be given patient assignment. They have to practice patient centered comprehensive nursing
- Each student is required to give planned health teachings, conduct clinical Teaching, case presentation and drug study.

English

Placement: First year

Time allotted: Theory 60 hrs.

COURSE DESCRIPTION

The course is designed to help the student understand and usage of English language required for their professional work.

OBJECTIVES

After the course the students will develop

1. Ability to speak and write grammatically correct English
2. Effective skill in reading and understanding the English language.
3. Skill in reporting

COURSE CONTENTS

UNIT I

- Remedial Study of Grammar.
- Review of grammar, vocabulary and effective use of dictionary.
- Prepare task oriented seminars.
- Symposia and panel discussion.

UNIT II

- The ability to understand selected passage and express meaning in one's own words.
- Reading and comprehension of the prescribed books.

UNIT III

- The study of various forms of composition
 - Note taking
 - Diary
 - Nurses notes, anecdotal records
 - Writing of Summary
 - Nurses reports on health problems.

The students will submit one sample of each item from her own practical experience.

UNIT IV

- Verbal communication
- Oral reports
- Summarization of discussion
- Debate
- Listening comprehension – Film, Cassette and Radio.

PRACTICUM

- The clinical experience in the wards and bed side nursing will provide opportunity for students to fulfill the objectives of learning language.
- Assignment on writing and conversation through participation in discussion, debates, seminars and symposia, the students will gain further skills in task oriented communication.

Sociology

Placement: Second year

Time allotted: Theory 60 hrs.

COURSE DESCRIPTION

The course is to re-orient students to sociology related to community and social institution in India and its relationship with health, illness, and nursing.

OBJECTIVES

At the end of the course, the student will

1. Describe sociological concepts that are applicable to nursing.

2. Determine role of sociology in nursing as related to social Institutions in India.
3. Develop positive attitudes towards individual, family and community.

COURSE CONTENTS

UNIT I

- Introduction
- Importance of study of sociology in nursing, relationship of anthropology, Sociology, etc.

UNIT II

- Individual and the Society.
- Socialization
- Interdependence of the individual and society
- Personal disorganization.

UNIT III

- Culture
- Nature of culture
- Evolution of culture
- Diversity and uniformity of culture.

UNIT IV

- Social organization
- Social groups, crowds and public groups, nations, race.
- Social institutions: The family, marriage, education, religion, Arts, economic Organization, political organization.
- The urban & rural community in India : Ecology, Characteristics of the Village, characteristics of the town and city.
- Social stratification: Class and caste.

UNIT V

- Social process
- Process of Social Interaction : competition, conflict-war, cooperation, accommodation and assimilation.

UNIT VI

- Social change
- Nature and process of social change : Factors influencing cultural change, Cultural lag.

UNIT VII

- Social Problems
- Social disorganization, control & planning : poverty, population, housing, Illiteracy, food supplies, growth of urbanization, prostitution, minority groups, rights of women & children, child labor, child abuse, delinquency and crime, substance abuse.

Community Health Nursing

Placement: Second year
hrs.

Time Allotted: Theory 60

Practical – 240 hrs.

COURSE DESCRIPTION

The course enables the students to understand the national health care delivery system and to participate in the delivery of Community Health Nursing.

OBJECTIVES

At the end of the course, the student will

1. Explain the concepts of various factors contributing to health of individual, family and community.
2. Identify the role of community health nurse.
3. Describe national health care delivery system.
4. Describe epidemiological methods and principles of prevention and control of illness in the community.
5. Identify the role of personnel working in the community health setup.
6. Plan the work of community health nurse and supervise and train health workers.

COURSE CONTENTS

UNIT I

- Introduction
- Introduction to Community health- Concepts, Principles and elements of Primary Health Care.
- Introduction to community health nursing.
- Concepts of community health nursing- Community nursing process.
- Objectives, scope and principles of community health nursing.

UNIT II

- Family Health Services
- Concept, objectives, scope and principles
- Individual, family and community as a unit of service.
- Principles and techniques of home visiting.

- Establishing working relationship with the family.
- Working with families in relation to prevention of disease.
- Promotion of health.
- Care of the sick in the home, physically handicapped and mentally challenged.
- Surveillance and monitoring.

UNIT III

- Organization and administration of health services in India.
- National health policy.
- Health Care Delivery system in India.
- Health team concept.
 - Centre, State, district, urban health services, rural health services
 - System of medicines
 - Centrally sponsored health schemes
 - Role of voluntary health organizations and international health agencies.
 - Role of voluntary health personnel in the community
 - Public health legislation.

UNIT IV

- Health Education
 - Aims, concepts and scope of health education.
 - National plan for health education.
 - Communication techniques.
 - Methods and media for health education programmes.
 - Planning for health education and role of nurse

UNIT V

- Role of the community health nurse.
- National health programmes.
 - Maternal and child health programmes.

- Family welfare and school health services.
- Occupational health services.
- As a member of the health team.
- Training and supervision of health care workers.

UNIT VI

- Epidemiology
- Definition- Concepts, aims, objectives, methods, principles.
- Epidemiology – Theories and Models.
- Application of Epidemiology, principles and concepts in community health.

UNIT VII

- Bio-Statistics and Vital Statistics
- Introduction, definition and scope, legislation
- Report, recording and compiling of vital statistics at the local, state, national and international level.
- Definitions and methods of computing vital statistics.
- Methods of presenting data
- Management Information System.

PRACTICUM

- Each student will prepare a community profile.
- The students will be allotted families for gaining experience in identifying Family health needs, health counseling and guidance and family budgeting for optimum health.
- The students will participate in the activities of primary health centre.
- Sub – centre, MCH centre.
- Visits will be made to selected health and welfare agencies, water Purification plant and sewage disposal plant, Infectious disease hospital.
- Conduct health educational programmes for individual / groups/ community.

Mental Health Nursing

Placement: Second year

Time Allotted: Theory 60 hrs.

Practical – 240 hrs.

COURSE DESCRIPTION

The course enables the students to recognize and appreciate the causes, symptoms and process of abnormal human behavior. It also introduces the student to the present day treatment modalities in the light of psychological, social and cultural factors affecting human behavior. This course helps the student to learn principles of mental health and psychiatric nursing and to develop beginning skills in the management of the mentally ill in hospital and community.

OBJECTIVES

At the end of the course, the student will

1. Identify and describe the philosophy and principles of mental health nursing.
2. Describe the historical development of mental health and psychiatric nursing.
3. Classify mental disorders.
4. Develop skill in history taking and performing mental status examination.
5. Describe etiological factors, psycho- pathology, clinical features, diagnostic criteria and treatment methods used for mental disorders.
6. Manage the patients with various mental disorders.
7. Communicate therapeutically with patients and their families.
8. Identify role of the nurse in preventive psychiatry.
9. Identify the legal aspects in practice of mental health and psychiatric nursing.

COURSE CONTENTS

UNIT I

- Introduction and Historical Development
- History of psychiatry
- Historical development of mental health nursing.

- Philosophy, principles of mental health and psychiatric nursing.
- Concept of normal and abnormal behavior.
- Role and qualities of mental health and psychiatric nurse.
- Mental health team and functions of team members.
- Legal aspects in psychiatry and mental health services.

UNIT II

- Classification and assessment of mental disorders.
- Terminologies used in Psychiatry.
- Classification of mental disorders.
- Etiological factors and psychopathology of mental disorders.
- History taking and assessment methods for mental disorders.

UNIT III

- Therapeutic Communication
- Communication process
- Interview skills, therapeutic communication techniques. Nurse Patient Relationship, Therapeutic impasse and its management Process recording.

UNIT IV

- Management of mental Disorders.

Diagnostic criteria, treatment and nursing management of patient with following disorders:

- Neurotic Disorders : Anxiety Neurosis, Depressive Neurosis, Obsessive Compulsive Neurosis, Phobic Neurosis and Hypochondria cal Neurosis, Stress related and Somatoform Disorders.
- Psychotic disorders : Schizophrenic form, affective and organic Psychosis.
- Organic Brain Syndromes
- Psychosomatic disorders
- Personality disorders
- Disorders of childhood and adolescence.
-

UNIT V

- Management of patients with Substance use disorders
- Substance use and misuse.
- Dependence, intoxication and withdrawal.
- Classification of psychoactive substances
- Etiological & contributory factors
- Psychopathology
- Clinical features
- Diagnostic criteria.
- Treatment and nursing management of patient with substance use disorders.
- Preventive and rehabilitative aspects in substance abuse.

UNIT VI

- Management of mental sub- normality.
- Classification of mental sub- normality.
- Etiological factors, psychopathology, psychometric assessment, diagnostic Criteria and management of sub- normality.

UNIT VII

- Psychiatric Emergencies.
- Types of emergencies, psychopathology, clinical features, assessment and Diagnosis, treatment and nursing management of patient with psychiatric Emergencies.
- Crisis Intervention therapy.

UNIT VIII

- Therapeutic Modalities
- Principles, indication, contraindications and role of nurse in various Treatment methods:
 - Therapeutic community and Milieu therapy
 - Occupational therapy
 - Psychotherapy
 - Behavior therapy
 - Group therapy

- Family therapy
- Pharmacotherapy
- Electro convulsive therapy
- Other miscellaneous therapies.

UNIT IX

- Preventive psychiatry
- Model of prevention
- Role of nurse in preventive psychiatry
- Psychiatric social work.
- Community mental health nursing.
- Community mental health agencies
- National mental Health Programmes.

PRACTICUM

The student will be provided opportunity to:

- Observe, record and report the behavior of their selected patients
- Record the process of interaction.
- Assess the nursing needs of their selected patients, plan and implement the Nursing intervention.
- Counsel the attendant and family members of patient.
- Participate in the activities of psychiatric team.
- Write observation report after a field visit to the following places:
 - Child guidance clinic.
 - School/ Special Schools (For mentally subnormal)
 - Mental Hospital.
 - Community mental health centers.
 - De – addiction centre.

Introduction to Nursing Education

Placement: Second year

Time Allotted: Theory 60 hrs.
Practical – 75 hrs.

COURSE DESCRIPTION

The course introduces the students to principles and concepts of education, curriculum development and methods and media of teaching. It also describes the steps in curriculum development and implementation of educational programmes in nursing.

OBJECTIVES

At the end of the course, the student will

1. Describe the philosophy and principles of education.
2. Explain the teaching – learning process
3. Develop the ability to teach, using various methods and media.
4. Describe the process of assessment.
5. Describe the administrative aspects of school of nursing
6. Participate in planning and organizing an in- service education programme.
7. Develop basic skill of counseling and guidance.

COURSE CONTENTS

UNIT I

- Introduction to education
- Meaning of education, aims, function and principles.
- Philosophy of education
- Factors influencing development of philosophy of nursing education.

UNIT II

- Teaching learning process
- Nature and characteristics of learning.
- Principles and maxims of teaching.
- Formulating objectives.
- Lesson planning.

UNIT III

- Methods of teaching
 - Teaching methods
 - Lecture
 - Discussion
 - Demonstration
 - Group discussion
 - Project
 - Role play
 - Project
 - Role play
 - Panel discussion
 - Symposium
 - Seminar
 - Field trip
 - Workshop
 - Exhibition
 - Programmed instruction
 - Computer Assisted Learning.

Clinical teaching methods:

- Case methods
- Case presentation
- Nursing rounds and reports
- Bedside clinic
- Conference (individual and group)
- Recording of interaction process.

UNIT IV

- Educational media
- The communication process: factors affecting communication.
- Purposes and types of audio- visual aids.
- Graphics aid: Chalk – board, charts, graphs, posters, flash cards, flannel Graph/ khadigraph, bulletin, cartoon.
- Three dimensional aids: objects, specimen, models, puppets.
- Printed aids: slides, films and television, VCR, VCP, overhead projector, Camera, microscope.
- Audio – aids : tape recorder, public address system, computer.

UNIT V

- Methods of assessment
- Purpose and scope of evaluation and assessment.
- Criteria for selection of assessment techniques and methods.
- Assessment of knowledge: essay type question, SAQ (Short Answer Questions).
- MCQ (multiple choice questions).
- Assessment of skills: Observation, Check list, Practical Examination, Viva, Objective structured clinical examination.
- Assessment of attitude: Attitude scale.

UNIT VI

- Management of school of Nursing.
- Planning of School of nursing, organization.
- Recruitment of teaching staff, budget, facilities for the school, students Selection and admission procedure, administrative planning for students, Welfare services for students, maintenance of school records, preparation of Annual reports, INC guidelines for school of nursing.
- Curriculum Development.
 - Concept, Definition and meaning
 - Types of curriculum

- Levels of curriculum/ Approaches to curriculum
- Process/ steps in development of curriculum

- Rotation plan
- Clinical rotation

UNIT VII

- Guidance and Counseling Definition
- Basic principles of guidance and counseling
- Organization of guidance and counseling services
- Counseling process
- Managing disciplinary problems
- Management of crisis

UNIT VIII

- In – service education
- Introduction to nature and scope of in – service education programme.
- Principles of adult learning
- Planning for in service programme.
- Techniques, and methods of staff education programme
- Evaluation of in- service programme.

PRACTICUM

Each student should:

- Conduct five planned teaching using different methods and media.
- Prepare different types of teaching aids
- Plan, organize and conduct in service education programme.
- Conduct at least one counseling session.
- Prepare rotation plans.

Introduction to Nursing Service Administration

Placement: Second year
hrs.

Time Allotted: Theory 60

Practical – 180 hrs.

COURSE DESCRIPTION

The course is designed to give an opportunity to the student to gain an understanding of the principles of administration and its application to nursing service; it is also intended to assist the students to develop an understanding of professional leadership need.

OBJECTIVES

At the end of the course, the student will

1. Identify the principles of administration.
2. Describe the principles and techniques of supervision.
3. Explain the principles and methods of personnel management.
4. Explain the principles of budgeting
5. Organize and manage a nursing unit effectively.
6. Identify dynamics of organizational behavior. Styles and functions of effective leadership.

COURSE CONTENTS

UNIT – I

- Principles and Practice of administration
- Significance elements and principles of administration.
- Organization of Hospital – Definition, Aims, functions and

Classifications, health team.

- Policies of hospital, different departments with special emphasis to Department of nursing & office management.
- Responsibilities of the nursing personnel specially of ward sister, Medico Legal aspects, concept of cost effectiveness

- Planning
 - Planning process: Concept, principles, institutional policies
 - Mission, Philosophy, Objectives
 - Strategic Planning
 - Application to nursing service and education

UNIT – II

- Nursing unit Management
- Physical layout of a nursing unit and necessary facilities
- Factors affecting the quality of nursing care
- Maintenance of a therapeutic environment
- Administration of the unit management of patient care
- Maintenance of physical environment
- Assignment of duties and time plan
- Patient assignment, safety measures, prevention of accidents and Infections
- Maintenance of patient's records and reports, legal responsibilities
- Maintenance of quality nursing care, nursing audit

UNIT – III

- Personnel management
- Staff recruitment and selection, appointment, promotions, personnel Policies and job descriptions
- Job analysis
- Staffing the unit, staffing norms, rotation plan, leave planning, Performance appraisal, staff welfare and management of disciplinary Problems

UNIT – IV

- Supervision
- Principles of supervision, nature and objectives
- Tools and techniques of supervision
- Evaluation
- Nursing audit

- Staff development orientation program
- Skill training
- Leadership development
- Problem solving process

UNIT V

- Material Management
- Principles of material management
- Quality control
- Inventory, care of equipment, safekeeping
- Role of nursing personnel in material management

UNIT VI

- Financial Management
- Budgeting – Principles of budgeting, audit

UNIT VII

- Organizational Behavior
- Group dynamic and human relation, organizational communication
(Hospital Information System)
- Public relations, leadership styles and functions
- Methods of reporting
- Maintaining records and reports

PRACTICUM

- Observe the functioning of nursing administration at various level i.e.

Institution, department, unit.

- Each student will practice ward management under supervision.
- Student will prepare rotation plan of the staff, write reports, give verbal Reports of the ward and assist in maintaining the inventory of the nursing unit.
- Visit to private and government hospital and write observation reports.

Introduction to Nursing Research and Statistics

Placement: Second year
hrs.

Time Allotted: Theory 45

Practical – 120 hrs.

COURSE DESCRIPTION

The course is designed to assist the students to develop an understanding of basic concepts of research and statistics, use the findings of nursing research in nursing practice, apply the knowledge in conducting projects and solve problems related to nursing using scientific method.

OBJECTIVES

At the end of the course, the student will:

1. Define the terms and concepts of nursing research
2. Identify needs and scope of nursing research
3. Identify and define a research problem
4. Locate and list sources of literature for a specific study
5. Describe different research approaches, methods of data collection and sampling techniques with a special reference to survey method.
6. Develop tool for data collection.
7. Enumerate steps of data analysis and present data summary in tabular form.
8. Use descriptive and co- relational statistics in data analysis.
9. Conduct a group research project.

COURSE CONTENTS

A. INTRODUCTION TO RESEARCH METHODOLOGY

UNIT – I

- Steps of scientific methods
- Definition of research
- Need for nursing research
- Characteristics of good research, Research Process

UNIT II

- Statement of research problem.
- Statement of purpose and objectives.
- Definition of research terms.
- Review of literature.

UNIT III

- Research approaches: - historical, survey and experimental.

UNIT IV

- Sampling Techniques and methods of data collection.
- Sampling
- Instruments- questionnaire and Interview
- Observation schedule, records, measurements
- Reliability and validity of instruments.

UNIT V

- Analysis of Data : Tabulation
- Classification and summarization
- Presentation
- Interpretation of data.

UNIT VI

- Communication of research findings.
- Writing Report :
 - Organizing materials for writing
 - Format of the report
 - Use of computers

B. INTRODUCTION TO STATISTICS

UNIT VII

- Descriptive Statistics.
- Frequency Distribution – Types of measure – frequencies, class interval, Graphic methods of describing frequency
- Measures of Central Tendency – Mean, Median and Mode.
- Measures of Variability : Range, Standard deviation
- Introduction to normal probability.

UNIT VIII

- Correlation
- Computation by rank difference methods
- Uses of correlation co- efficient

UNIT IX

- Biostatistics : Crude rates and standardized rates , ratio and estimation of The trends

UNIT X

- Introduction to computers in nursing.
- Introduction to computers and disk- operating system.
- Introduction to word processing

- Introduction to data base
- Windows applications, word, excel, power point, multimedia.
- Use of statistical packages.
- Introduction to Internet & use of electronic mail
- Computer aided teaching & testing.

PRACTICUM

Students will conduct research project in small groups in selected areas of nursing and submit a report (group studies may include studying of existing health practices, improved practices of nursing (procedures), health records, patient records and survey of nursing literature.

BHARATI VIDYAPEETH
(Deemed to be University)

COLLEGE OF NURSING

SYLLABUS

BASIC B.Sc. NURSING

BHARATI VIDYAPEETH

(Deemed to be University)

INTRODUCTION

Bharati Vidyapeeth, which is the recent body of Bharati Vidyapeeth University, was established on 10th May 1964 by Dr.Patangrao Kadam with a wider objective of contributing to intellectual awakening and social cultural transformation through dynamic education. Under the imaginative, dynamic and socially committed leadership of the founder Dr.Patangrao Kadam, Bharati Vidyapeeth has made astonishing strides in the field of education .The Vidyapeeth has so far has so far established 171 educational institutions imparting education to the students' right from pre-primary stage to post graduate stage and PhD

The Ministry of Human Resources Development Government of India on the recommendation of University Grant Commission accorded the status of Deemed University to 12 units of Bharati Vidyapeeth through their notification no.F.9-15/95 U.3 dated 26th April 1996 under the section of the University Grant Commission Act of 1956.

Subsequently, the Government of India on the recommendation of UGC and AICTE included three more institutions of Bharati Vidyapeeth within the ambit of Bharati Vidyapeeth University vide its notification no.F.9-15/95-4-3 dated 28th July 2000.

The University Grant Commission vide their letter no.F.No.3-2/90 CPP-1 dated 17 August 2002 have agreed to bring two more research institutions within the ambit of Bharati Vidyapeeth University.

Government of India has brought the following seven institutions of Bharati Vidyapeeth located in different cities within the purview of Bharati Vidyapeeth Deemed University as its constituents units vide their notification no.F.9-16/2004-U-3dt 25/02/2005.With the inclusion of these seven institutions located at different places Bharati Vidyapeeth Deemed University has now become a multi campus University.

Medical college at Sangli and a Dental College at Navi Mumbai have also been brought within the ambit of Bharati Vidyapeeth University by Ministry of Human Resource Development vide its notification No.F.9-7/2004-U3 dt.19/08/2004 .

In Feb 2005 once again Government of India vide notification No.F.9-16/2004-U3 dt.25 Feb 2005 brought seven more institutions under the ambit of Bharati Vidyapeeth University.

This is probably the first and only university having under its umbrella diversified disciplines of professional and non-professional categories such as medicine , Dentistry, Nursing, Ayurvedic and homeopathic medicine, Physical education , natural and physical sciences , social science ,commerce law and humanities.

The degree and diploma awarded by the Universities have the same status and recognition as those awarded by any other Indian University recognized by University Grant Commission, New Delhi .The universities operates its educational programmes in accordance with the rules, regulations and guidelines of various statutory Central Government Bodies like Medical Council of India, Dental Council of India, Bar Council Of India, Indian Nursing Council and Central Council of Indian Medicine.

COLLEGE OF NURSING, PUNE

Bharati Vidyapeeth College of Nursing was established in the year 1992 with prior permission of University of Pune to which it was having affiliation .It is now a constituent unit of this university. This is the first College of Nursing in the non- government sector in Pune. Adequate facilities for clinical studies have been provided and the college is attached to the hospital of Bharati Vidyapeeth Medical Foundation, Dhanakwadi, Pune.

The college has 65 intake capacities for B.Sc Nursing ,40 seats for P.B.B.Sc Nursing, & 25 seats for M.Sc Nursing

The college has approval of Government of Indian, UGC, Indian Nursing Council, and Maharashtra Nursing Council. The college has separate hostel facilities for Boys and Girls. The curriculum and syllabus is made and updated as per the present needs in the Maharashtra Nursing Council and the needs of society.

COLLEGE OF NURSING, SANGLI

Bharati Vidyapeeth University, College of Nursing, started in 2007 at Bharati Vidyapeeth University campus, Sangli. The constituent unit of Bharati Vidyapeeth University. The college has the permission from Maharashtra Nursing council Mumbai and Indian Nursing council New Delhi.

The college has 50 intake capacities for B.Sc Nursing & 30 seats for P.B.B.Sc Nursing.The college is equipped with Nursing Arts, Community Health & Nutrition laboratories, teaching aids & a departmental Library

The college has its own Medical college in the same campus, the students get exposure to the teaching of faculty members having expertise in Anatomy, Physiology, Biochemistry, Pathology & Microbiology & other subjects.

Similarly, the students also have access to the library of our Medical College, which has a very vast collection of reference books. The college also subscribes to journals and makes audio- video material & equipment available to the students.

Hostel facilities with modern amenities are available to our student on the campus. The atmosphere in the college is very congenial for professional growth.

COLLEGE OF NURSING, NAVI MUMBAI

Bharati Vidyapeeth Deemed University, being one of the largest networks of educational institutions, established the full-fledged Degree College of Nursing in Navi Mumbai since 2009. It offers a four year Course leading to the B.Sc. Nursing Degree and two year P.B.BSc. nursing course and is approved by Indian Nursing Council and Maharashtra Nursing Council. It is accredited with prestigious 'A' grade in 2004 and reaccredited with 'A' grade in 2011 by the NAAC Bangalore. The college started with the objectives of training the students to become competent nurses for first level positions in nursing, to provide quality care in hospitals and to community. The College has become the most preferred destination of students aspiring for a career in nursing from all over India.

Committed to excellence in Nursing Education, Clinical Practice and Community Service, this college offers undergraduate programme in Nursing. The college has been recognized by the Indian Nursing Council (INS), State Nursing Council (MNC), & UGC.

The college has excellent infrastructure such as well-structured spacious class rooms, continuously updated laboratories, national and international books, journal and e-journals and hostels with all necessary amenities and facilities.

The clinical teaching and training of students are conducted in the 392 bedded Navi Mumbai Municipal Corporation Hospital at Vashi. The students are also deputed for training to other reputed local hospitals in Mumbai such as Thane Regional Mental Hospital, TATA Cancer Hospital, and Wadia Hospital for specialized experience. The community Health experience is given in PHC at Wavanje village (Rural) and Juhugaon (Urban).

PHILOSOPHY OF BHARATI VIDYAPEETH

Bharati Vidyapeeth was established in May, 1964 with a philosophy of contributing to the intellectual awakening and social transformation in different spheres including educational, economic, social and cultural fields in India and more particularly in Maharashtra. The activities have been geared to bring about all sided progress and welfare of different section in population including women, tribal and the rural people.

Bharati Vidyapeeth Nursing College also functions within the framework of Bharati Vidyapeeth philosophy.

AIM:

To prepare first level of nurse manager who can take up the responsibility in the hospitals community and educational institutions and provided primary secondary and tertiary care.

OBJECTIVES:

After completion of four years BSc Nursing course

Students will be able to

1. Develop skill in providing quality care by using nursing process in different clinical settings
2. Render comprehensive care to families by using nursing process.
3. Take leadership role at first level management in nursing services and education.
4. Participate in promotion, preventive and restorative health care delivery system
5. Practice ethical value in nursing profession.
6. Aware of research methodology and capable of assisting in research project

ADMISSION REQUIREMENTS:

1. The minimum age for admission shall be 17 years on or before 31st December of the year of admission
2. Minimum educational requirement shall be passing of Higher secondary school certificate examination (12 years course), or Senior School Certificate examination (10+2), Pre-degree examination (1-2) or an equivalent with 12 years schooling from a recognized board or university with science (Physics, Chemistry, Biology) and English with minimum of 50% aggregate marks (PCBE).
3. Candidates shall be medically fit.

ENTRANCE SELECTION TEST:

Selection of the candidate shall be based on the merit of entrance examination held by University.

DURATION:

Duration of the course shall be of four years

VACATION:

7 weeks of vacation shall be given in each year.

AWARD OF CLASS

First class with distinction	Aggregate 70% and above
First class	Aggregate 60% and above but less than 70%
Higher second class	Aggregate 55% and above but less than 55%
Second class	Aggregate 55% and above but less than 55%
Fail	Less than 50%

The award of class will be based on aggregate marks obtained by a student in F.Y, S.Y, T.Y and Fourth year taken together.

DURATION

Course Duration	4 years
Weeks available per year	52 weeks
Vacation	8 weeks
Gazetted holidays	3 weeks
Examination (including preparatory)	4 weeks
Available weeks	37 weeks
Hours per week	40 hours
Practical	30 hours per week
Theory	10 hours per week
Internship practical	48 hours per week
Hours available per academic year	1480 (37 week x 40 hours)

COURSE OF INSTRUCTION

FIRST YEAR

SUBJECT	Theory(in hrs) (Class &lab)	Practical (in hrs) (Clinical)	(In hrs)
1.* English	60		
2. Anatomy	60		
3. Physiology	60		
4. Nutrition	60		
5. Biochemistry	30		
6. Nursing Foundation	265+200	450	
7. Psychology	60		
8. Introduction to computers	45		
9. ** Marathi / Regional language	30		
10. Library work / self study			50
Total Hours	870	450	50
Total hours = 1420 hrs			

**** Optional**

SECOND YEAR

Subject	Theory(in hrs) (class & lab)	Practical (in hrs) (clinical)	(In hrs)
1. Sociology	60		
2. Pharmacology	45		
3. Pathology	30		
4. Genetics	15		
5. Medical surgical nursing (adult including geriatric)-I	210	720	
6. Community health nursing I	90	135	
7. Microbiology	60		
9.Environmental Science	50		
8. Library work/self study			50
9. Co-curricular activities			35
Total Hours	560	855	85
Total hours = 1450			

THIRD YEAR

Subject	Theory(in hrs) (class & lab)	Practical (in hrs) (clinical)	(In hrs)
1. Medical surgical nursing (adult including geriatric)-II	120	270	
2. Child Health Nursing	90	270	
3. Mental Health Nursing	90	270	
4. Communication & Educational Technology	60+30		
5. Nursing Research & Statistics	45	*	
5. Library work & Self study			50
6. Co-curricular activities			50
Total Hours	435	810	100
Total hours = 1300 hrs			

*Project Work

FOURTH YEAR

Subject	Theory(in hrs) (class & lab)	Practical (in hrs) (clinical)	(In hrs)
1. Midwifery & Obstetrical Nursing	90	360	
2. Community health nursing II	90	135	
3. Management of Nursing Service & Education	60+30		
Total Hours	270	495	
Total hours = 810 hrs			

INTERN-SHIP (Integrated practice)

48 hours per week

Subject	Theory(in hrs) (class & lab)	Practical (in hrs) (clinical)	(In weeks)
1. Midwifery & Obstetrical Nursing		240	5
2. Community health Nursing II		195	4
3. Medical surgical Nursing (adult including geriatrics)		430	9
4. Child Health Nursing		145	3
5. Mental Health Nursing		95	2
Total Hours		1150	23
Total hours = 1150hrs			

NOTE: -

1. Internship means 8 hours of integrated clinical duties in which two weeks of evening and night shift duties are included.
2. Internship should be carried out as 8 hours per day at 48 hours per week.
3. Student during internship will be supervised by nursing teachers.
4. Fourth final examination to be held only after completion of internship.

SCHEME OF EXAMINATION

FIRST YEAR

Subject	ASSESSMENT				
	Theory	Hours	Internal	External	Total
1. Anatomy & Physiology		3	25	75	100
2. Nutrition & Biochemistry		3	25	75	100
3. Nursing foundation		3	25	75	100
4. Psychology		3	25	75	100
5.English			25	75	100
6.Introduction to computers (Internal)			25	75	100
7. Marathi (Internal exam)		2		50	50
Practical & Viva					
1. Nursing Foundations			100	100	200

SECOND YEAR

Subject	ASSESSMENT				
	Theory	Hours	Internal	External	Total
1. Sociology		3	25	75	100
2. Medical surgical nursing		3	25	75	100
3.Pharmacology, Pathology & Genetics		3	25	75	100
4. Community Health nursing- 1		3	25	75	100
5. Microbiology		3	25	75	100
Practical & Viva					
1. Medical surgical nursing-1			100	100	200

THIRD YEAR

SUBJECT	ASSESSMENT			
Theory	Hours	Internal	External	Total
1. Medical surgical nursing-II	3	25	75	100
2. Child Health Nursing	3	25	75	100
3. Mental Health Nursing	3	25	75	100
4. Nursing Research & Statistics	3	25	75	100
4. Communication & Educational Technology	3	25	75	100
Practical & Viva				
1. Medical surgical nursing II		50	50	100
2. Child Health Nursing		50	50	100
3. Mental Health Nursing		50	50	100

FOURTH YEAR

SUBJECT	ASSESSMENT			
Theory	Hours	Internal	External	Total
1. Midwifery & Obstetrical Nursing	3	25	75	100
2. Community health nursing II	3	25	75	100
4. Management of Nursing Service & Education	3	25	75	100
Practical & Viva				
1. Midwifery & Obstetrical Nursing -II	3	50	50	100
2. Community Health Nursing -II	3	50	50	100

NOTE:-

1. Anatomy and physiology-Question paper will consist of section I MCQ's – 15 (Anatomy & Physiology), Section II – 30 marks (Anatomy), Section III – 30 marks (Physiology)
2. Nutrition & Biochemistry- Question Paper will consist of section I MCQ's – 15 marks (Nutrition & Biochemistry), Section II – 35 marks (Nutrition) , Section III – 25 marks (Biochemistry)
Nutrition of 45 marks & section B Biochemistry of 30 marks.
3. **Pharmacology, Pathology & Genetics-section A Pharmacology with 38.Marks, section B Pathology of 25 marks & genetics with 12 marks.**
4. Nursing research & statistics – Nursing research should be of 50 marks & statistics of 25 marks
5. Minimum pass marks shall be 40% for English only.
6. Theory and practical exam for introductions to computers to be conducted as college exams and marks to be sent to the university for inclusion in the mark sheet
7. Minimum pass marks shall be 50% in each of theory & practical paper separately.
8. The candidate must have minimum of 80% attendance (irrespective of the kind of absence.) In theory & practical in each subject for appearing of examination.
9. A candidate must have 100% attendance in each of the practical areas before award of the degree.
10. A candidate has to pass in theory & practical exam separately in each of the paper.
11. If the candidate fails in either theory or practical exam he/she has to reappear for both the papers (Theory & practical).
12. Maximum number of attempts permitted for each paper is 3 including first attempt.
13. **Candidate shall not be permitted to the subsequent higher examination unless the candidate has passed the previous examination.**
14. The maximum period to complete the course successfully should not exceed 8 years.
15. Maximum number of candidates for practical examination should not exceed 20 per day.
16. All practical examinations must be held in the respective clinical areas.
17. One internal & one external examiner should jointly conduct the practical exam for each student.
18. An examiner should be a lecturer or above in a college of nursing with M.Sc.(N) in concerned subject & minimum of 3 years of teaching experience. To be an examiner for Nursing Foundation course faculty having M.Sc.(N) with any shall be considered.
19. Student has to pass in internal assessment and university Exam separately with 50% marks each.

**B.Sc.
NURSING
FIRST YEAR**

ENGLISH

Placement- First Year

Time:-Theory- 60 hours

Course Description: The course is designed to enable students to enhance ability to comprehend spoken and written English (and use English) required for effective communication in their professional work. Student will practice their skills in verbal and written English during clinical and classroom experiences.

UNIT	CONTENT	HOURS
UNIT-1	<ul style="list-style-type: none">• Review of Grammar• Remedial study of Grammar• Building Vocabulary• Phonetics• Public Speaking	10 hrs.
UNIT-2	* Read and comprehend prescribed course books	30 hrs.
UNIT-3	* Various forms of composition <ul style="list-style-type: none">- Letter writing- Note taking- Precise writing- Nurse notes- Anecdotal records- Diary writing- Reports on health problems etc.- Resume/CV	10 hrs.
UNIT-4	* Spoken English <ul style="list-style-type: none">- Oral report- Discussion- Debate- Telephonic conversation	6 hrs.
UNIT-5	* Listening comprehension <ul style="list-style-type: none">- Media, audio, video, speeches etc.	4 hrs.

ANATOMY

Placement- First Year

Time:- Theory-60 hours

Course Description: The course is designed to enable students to acquire Knowledge of normal structure of various human body system and understand the alteration in anatomical structures in disease in disease and practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	Introduction to Anatomical terms organization of the human body - Human cell structure - Tissues – definition, types, characteristics, classification, location, function and formation - Membranes and glands – classification and structure. - Alteration in disease Application and implementation in nursing	5 hrs.
UNIT-2	The Skeletal System - Bones- types, structure, axial & appendicular skeleton - Bone formation and growth - Description of bones - Joint – classification and structure Alteration in disease Application and implication in nursing	6 hrs.
UNIT-3	The Muscular System - Types and structure of muscles - Muscle group Alteration in disease Application and implication in nursing	7 hrs.
UNIT-4	The Nervous System - Structure of neurologia & neurons - Somatic nervous system Structure of brain, spinal chord, cranial nerves, peripheral nerves - Autonomic nervous system- (Sympathetic, parasympathetic) Structure & location Alteration in disease Application and implication in nursing	6 hrs.

UNIT-5	<p>The Sensory Organs</p> <ul style="list-style-type: none"> - Structure of skin, eye, ear, nose, tongue (Auditory and olfactory apparatus) <p>Alteration in disease Application and implication in nursing</p>	6 hrs.
UNIT-6	<p>Circulatory and Lymphatic system</p> <ul style="list-style-type: none"> - The circulatory system <ul style="list-style-type: none"> * Blood - Microscopic structure * Structure of heart * Structure of blood vessels- Arterial and venous system *Circulation: systemic, pulmonary, coronary. - Lymphatic system <ul style="list-style-type: none"> * Lymphatic vessels and lymph * Lymphatic tissues <ul style="list-style-type: none"> - Thymus gland - Lymph nodes 8 spleen - Lymphatic Nodules <p>Alteration in disease Application and implication in nursing</p>	7 hrs.
UNIT-7	<p>The Respiratory System</p> <ul style="list-style-type: none"> - Structure of the organs of respiration - Muscles of respiration Intercostals and diaphragm <p>Alteration in disease Application and implication in nursing</p>	5 hrs.
UNIT-8	<p>The Digestive System</p> <ul style="list-style-type: none"> - Structure of alimentary tract and accessory organs of digestion <p>Alteration in disease Application and implication in nursing</p>	6 hrs.
UNIT-9	<p>The Excretory System (Urinary)</p> <ul style="list-style-type: none"> - Structure of organs of urinary - System: kidney, ureters, urinary bladder, urethra, structure of skin. <p>Alteration in disease Application and implication in nursing</p>	4 hrs.

UNIT-10	<p>The Endocrine System</p> <ul style="list-style-type: none"> - Structure of pituitary, pancreas, thyroid, parathyroid, thymus and adrenal glands <p>Alteration in disease Application and implication in nursing</p>	4 hrs.
UNIT-11	<p>The Reproductive System including Breast</p> <ul style="list-style-type: none"> - Structure of female reproductive organs - Structure of male reproductive organs - Structure of breast <p>Alteration in disease Application and implication in nursing</p>	4 hrs.

PHYSIOLOGY

Placement- First Year

Time : Theory 60 hrs.

Course Description: The course is designed to assist the students to acquire Knowledge of the normal physiology of various human body systems and under stand the alteration in physiology disease and practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	Cell physiology * Tissue – formation, repair * Membranes & gland – functions Alteration in disease Application and implication in nursing	4 hrs.
UNIT-2	Skeleton System * Bone formation and growth * Bones – functions and movements of bones of axial & appendicular skeleton, bone healing * Joints and joint movements Alteration in disease Application and implication in nursing	4 hrs.
UNIT-3	Muscular System * Muscle movements, muscle tone, physiology of muscle contraction, levels and maintenance of posture Alteration in disease Application and implication in nursing	4 hrs.
UNIT-4	Nervous System * Function of neuralgia & neurons * Stimulus & nerve-impulse- definition and mechanism * Function of brain, spinal cord, Cranial & spinal nerves * Cerebrospinal fluid-composition. Circulation and function * Reflex arc, reflex action and reflexes *Autonomic function - Pain: somatic, visceral and referred. - Autonomic learning and biofeedback Alteration in disease Application and implication in nursing	7 hrs.

UNIT-5	Circulatory System * Blood formation, composition, blood group, blood coagulation * Hemoglobin : structure, synthesis and breakdown, variation of molecules, estimation * Function of heart, conduction, cardiac cycle, circulation- principles, control, factors influencing BP & Pulse Alteration in disease Application and implication in nursing	8 hrs.
UNIT-6	The Respiratory System * Functions of respiratory system * Physiology of respiration * Pulmonary ventilation, volume * Mechanics of respiration * Gaseous exchange in lungs * Carriage of oxygen & carbon dioxide * Exchange of gases in tissues * Regulation of respiration Alteration in disease Application and implication in nursing	6 hrs.
UNIT-7	The Digestive System * Functions of organ of digestive tract. Movements of alimentary tract. Digestion in mouth stomach small intestine, large intestine, absorption of food, function of liver, gall bladder and pancreas. * Metabolism of carbohydrates, protein and fat. Alteration in disease Application and implication in nursing	6 hrs.
UNIT-8	The Excretory System * Function of Kidneys, ureters, urinary bladder & urethra. * Composition of urine * Mechanism of urine formation * Function of skin * Regulation of body temperature * fluid and electrolyte balance Alteration in disease Application and implication in nursing	5 hrs.
UNIT-9	The Sensory organs * Functions of skin, eye, ear, nose, tongue. Alteration in disease Application and implication in nursing	4 hrs.

UNIT-10	<p>The Endocrine System</p> <ul style="list-style-type: none"> * Function of Pituitary, pineal body, thymus, thyroid, parathyroid, pancreas, suprarenal, placenta & ovaries & testes. <p>Alteration in disease</p> <p>Application and implication in nursing</p>	5 hrs.
UNIT-11	<p>The Reproductive system</p> <ul style="list-style-type: none"> * Reproduction of cells-DNA. Mitosis, spermatogenesis, oogenesis * Function of female reproductive organs: function of breast, female sexual cycle * Introduction of embryology * Function of male reproductive organs, male function in reproduction, male fertility system. <p>Alteration in disease</p> <p>Application and implication in nursing</p>	5 hrs
UNIT-12	<p>Lymphatic and Immunological system</p> <ul style="list-style-type: none"> • Circulation of lymph • Immunity - Formation of T-cells & B-cells - Types of immune response - Antigens - Cytokines - Antibodies 	

NUTRITION

Placement- First Year

Time: Theory 60 hrs

Course Description: The course is designed to assist the students to acquire knowledge of Nutrition for maintenance of optimal health at different stages of life and its application for practice of nursing.

UNIT	CONTENT	HOURS
UNIT-1	<p>Introduction</p> <ul style="list-style-type: none">• Nutrition<ul style="list-style-type: none">- History- Concepts <p>* Role of nutrition in maintaining health</p> <p>* Nutritional problem in India</p> <p>* National Nutritional Policy</p> <p>* Factors affecting food and nutrition: socio-economic, cultural, tradition, production, system of distribution, life style and food habits etc.</p> <p>* Role of food and its medicinal value</p> <p>* Classification of food</p> <p>* Food standards</p> <p>* Element of Nutrition : macro and micro</p> <p>* Calorie BMR</p>	4hrs
UNIT-2	<p>Carbohydrates</p> <ul style="list-style-type: none">• Classification• Caloric value• Recommended daily allowances• Dietary Sources• Functions• Digestion, absorption and storage, metabolism of carbohydrates• Malnutrition: Deficiencies and over consumption	2 hrs.
UNIT-3	<p>Fats</p> <ul style="list-style-type: none">* Classification* Caloric Value* Recommended daily allowances* Dietary sources* Functions* Digestion, absorption and storage, metabolism of fats* Malnutrition: Deficiencies and over consumption	2 hrs.

UNIT-4	<p>Proteins</p> <ul style="list-style-type: none"> • Classification • Caloric value • Recommended daily allowances • Dietary sources • Functions • Digestion, absorption and storage & metabolism • Malnutrition: Deficiencies and over consumption 	2 hrs.
UNIT-5	<p>Energy</p> <ul style="list-style-type: none"> * Unit of energy- Kcal * Energy requirements of different categories of people * Measurement of energy * Body mass index (BMI) & basic metabolism * Basal metabolic rate (BMR) – determine the factors affecting. 	3 hrs.
UNIT-6	<p>Vitamins</p> <ul style="list-style-type: none"> • Classification • Recommended daily allowance • Dietary sources • Functions • Absorption, synthesis, metabolism, storage and excretion • Deficiencies • Hypervitaminosis 	4 hrs.
UNIT-7	<p>Minerals</p> <ul style="list-style-type: none"> * Classification * Recommended daily allowance * Dietary sources * Functions * Absorption, synthesis, metabolism, storage and exertion * Deficiencies * Over composition and toxicity 	4 hrs.
UNIT-8	<p>Water and Electrolyte Balance</p> <ul style="list-style-type: none"> * Water :- Daily requirements, regulation of water, metabolism, distribution of body water * Electrolytes: Types, sources, composition of body fluids * Maintenance of Fluid & electrolyte balance * Over Hydration dehydration and water intoxication * Electrolyte Imbalance 	3 hrs.

UNIT-9	<p>Cookery rules and preservation of Nutrients</p> <ul style="list-style-type: none"> * Principles, methods of cooking and serving <p>Preservation of nutrients</p> <ul style="list-style-type: none"> * Safe food handling – toxicity * Storage of Food * Food Preservation, food additives and its principles * Preservation of food adulteration Act(PFA) * Food standards * Preparation of simple beverages of different types of food 	5 hrs.
UNIT-10	<p>Balanced diet</p> <ul style="list-style-type: none"> * Elements * Food groups * Recommended daily allowance * Nutritive value of food * Calculation of balanced diet for different categories of people * Planning menu * Budgeting of food * Introduction to therapeutic diet: Naturopathy=Diet 	5 hrs.
UNIT-11	<p>Role of nurse nutritional programme</p> <ul style="list-style-type: none"> • National programme related to nutrition <ul style="list-style-type: none"> - Vitamin A deficiency programme - National iodine deficiency disorders (IDD) programme - Mid-day meal programme - Integrated child development scheme • National & International agencies working to wards food/nutrition <ul style="list-style-type: none"> - NIPCCD, CARE, FAQ, NIN, CFTRI (Central food technology and research institute) etc. • Assessment of nutritional status • Nutrition education and role of nurse. 	

BIOCHEMISTRY
Placement-First Year

Time: Theory 30 hrs.

Course Description: The course is designed to assist the students to acquire knowledge of the normal biochemical composition and functioning of human body and understand the alteration in biochemistry in disease for practice for practice of nursing

UNIT	CONTENT	HOURS
UNIT-1	Introduction <ul style="list-style-type: none"> • Definition and significance in nursing • Review of structure, composition and function of cell • Prokaryote and Eukaryote cell organization • Microscopy 	3hrs.
UNIT-2	Structure and Function of Cell membrane <ul style="list-style-type: none"> • Fluid mosaic model tight junction, cytoskeleton • Transport mechanism: diffusion, osmosis, filtration, active channel, sodium pump • Acid base balance- maintenance and diagnostic tests - PH buffers 	6hrs
Unit -3	Composition and Metabolism of Carbohydrates <ul style="list-style-type: none"> • Types structure, composition and uses • Monosaccharide, Disaccharides, Polysaccharides oligosaccharides • Metabolism - Pathways of Glucose <ul style="list-style-type: none"> - Glycolysis - Gluconeogenesis Cori's cycle Tricarboxylic acid(TCA) cycle - Glycogenolysis - Pentose phosphate - Pathways (Hexose mono phosphate) - Regulation of blood glucose level Investigation & their interpretation	6hrs
Unit -4	Composition and metabolism of lipids <ul style="list-style-type: none"> • Types, structure , composition and uses of fatty acids Nomenclature Roles and prostaglandin's • Metabolism of Fatty acids <ul style="list-style-type: none"> -Breakdown -Synthesis • Metabolism of Triglycerols • Cholesterol metabolism <ul style="list-style-type: none"> * Biosynthesis and its regulation <ul style="list-style-type: none"> - Bile salts and bilirubin - Vitamin D -Steroid hormones • Lipoproteins and their functions <ul style="list-style-type: none"> - VLDLs- IDLIS and HDLs - Transport of lipids 	4hrs

	- Arteriosclerosis Investigation and their interpretation	
Unit -5	<p>Composition and metabolism of Amino acids and proteins</p> <p>* Types, structure, composition and uses acids and proteins</p> <p>* Metabolism of amino acids and proteins</p> <ul style="list-style-type: none"> • Protein synthesis Targeting & glycosylation • Chemotherapy • Electrophoresis • Sequencing <p>* Metabolism of Nitrogen</p> <ul style="list-style-type: none"> • Fixation & assimilation • Urea cycle • Hems and chlorophylls <p>* Enzymes and co-enzymes</p> <ul style="list-style-type: none"> • Classification • Properties • Kinetics & inhibition • Control <p>Investigation and their interpretation</p>	6hrs
Unit -6	<p>Composition and Vitamins and minerals</p> <p>* Vitamins & Minerals</p> <ul style="list-style-type: none"> - Structure - Classification - Properties - Absorptions - Storage & transportations - Normal concentration investigation and their interpretation 	2hrs
Unit -7	<p>Immunochemistry</p> <ul style="list-style-type: none"> - Immune response - Structure & Classification of immunoglobins response - Mechanism of antibody production - Antigen: HLA typing - Free radical & antioxidants - Specialized proteins: Collagen Elastin Keratin Myosin, Lens Protein - Electrophoretic and quantitative determinations of immunoglobins- ELISA etc <p>Investigation and their interpretation</p>	3hrs

NURSING FOUNDATION**Placement: First Year****Theory-265hrs
Practical- 650hrs
(200lab and 450 clinical)**

Course Description: This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical setting. It is aimed at helping the students to acquire knowledge understanding and skill in techniques of nursing and practice them in supervised clinical setting

UNIT	CONTENT	HOURS
UNIT-1	<p>Introduction</p> <ul style="list-style-type: none">* Concept of health: Health – Illness continuum* Factors influencing health* Causes and risk factors for developing illness* Body defenses : Immunity and immunization* Illness & illness behavior* Impact of illness on patient and family* Health care services: health promotion and prevention primary care, diagnosis, treatment, rehabilitation and continuing care.* Health care team* Types of health care agencies* Hospitals; Types, organization and functions* Health promotion and level of disease prevention* Primary health care and its delivery: Role of nurse.	10 hrs.
UNIT-2	<p>Nursing as a profession</p> <ul style="list-style-type: none">* Definition and characteristics of a profession* Nursing<ul style="list-style-type: none">- Definition, concepts, philosophy, objectives.- Characteristics, nature and scope of nursing practice- Function of nurse- Qualities of nurse- Categories of nursing personnel- Nursing as a profession- History of nursing in India* Values : Definition, types, values clarification and values professional nursing: caring and advocacy* Ethics :<ul style="list-style-type: none">- Definition and ethical principles- Code of ethics and professional conduct for nurse.	16 hrs.

Unit -3	<p>Hospital admission and discharge</p> <ul style="list-style-type: none"> * Admission to the hospital <ul style="list-style-type: none"> - Unit and its preparation admission bed - Admission procedure - Special considerations - Medico-legal issues - Roles and responsibilities of the nurse * Discharge from the hospital <ul style="list-style-type: none"> - Types: Planned discharge, lamma and abscond, referral <p>And transfers</p> <ul style="list-style-type: none"> - Discharge planning - Discharge procedure - Special consideration - Medico- legal issues - Roles and responsibilities of the nurse - Care of the unit after discharge 	4 hrs.
Unit -4	<p>Communication and the nurse patient relationship</p> <ul style="list-style-type: none"> * Communication: Levels, elements, types, modes, process, factors influencing communication. <ul style="list-style-type: none"> - Methods of effective communication <ul style="list-style-type: none"> # Attending skills # Rapport building skills # Empathy skill - Barriers to effective communication * Helping relationship (NPR): dimensions of helping relationships, phases of a helping relationship * Communicating effectively with patient, families and team members and maintain effective human relation with special reference to communicating with vulnerable group (children, woman, physically and mentally challenged and elderly) * Patient teaching: Importance purpose, process, role of nurse and integrating teaching in nursing process. 	10 hrs

Unit -5	<p>The Nursing process</p> <ul style="list-style-type: none"> * Critical thinking and nursing judgment <ul style="list-style-type: none"> - Critical thinking: Thinking and learning - Competencies, attitude for critical thinking, levels critical thinking in nursing * Nursing process overview: <ul style="list-style-type: none"> Application in practice <ul style="list-style-type: none"> - Nursing process format: INC, current format - Assessment <ul style="list-style-type: none"> # Collection of data: types, sources, methods - Nursing Diagnosis <ul style="list-style-type: none"> # Identification of client problems # Nursing diagnosis statement # Difference between medical and nursing diagnosis - Planning - Establishing goals and expected outcomes - Selection of intervention: Protocols and standing orders - Writing the nursing care plan * Implementation <ul style="list-style-type: none"> - Implementing the plan of care * Evaluation <ul style="list-style-type: none"> - Outcome of care - Review and modify * Documentation and reporting 	15 hrs
Unit -6	<p>Documentation and reporting</p> <ul style="list-style-type: none"> * Documentation: purpose of recording and reporting * Communication within the health care team * Types of record: ward records, medical/nursing records * Common record-keeping forms, computerized documentation * Guidelines for reporting :Factual basis, accuracy , completeness, current ness, organization, confidentiality * Methods of recording. * Reporting change –of shift reports: transfer reports, incident reports * Minimizing legal liability through effective record keeping 	4hrs

Unit -7	<p>Vital sign</p> <ul style="list-style-type: none"> *Guidelines for taking signs: *Body temperature <ul style="list-style-type: none"> -Physiology, regulation .Factor affecting body Temperature. - Assessment of body temperature: sites, equipments and technique special considerations - Temperature alterations: Hyperthermia, heat stroke, hypothermia - Hot and cold applications * Pulse <ul style="list-style-type: none"> - Physiology and regulation, characteristics of the pulse, factors affecting pulse - Assessment of pulse: sites, location, equipment and technique, Special consideration - Alteration in pulse * Respiration <ul style="list-style-type: none"> - Physiology and regulation, mechanics of breathing Characteristics of the respiration, factors affecting respiration - Assessment of pulse: site, location, equipments and technique, special consideration - Alteration in pulse. * Respiration: <ul style="list-style-type: none"> - Physiology and regulation, mechanics of breathing, characteristics, Factors affecting respiration - Assessment of respiration: technique, special consideration - Alteration in respiration * Blood pressure <ul style="list-style-type: none"> - Physiology and regulation, characteristics of blood pressure, Factors affecting blood pressure. - Assessment of blood pressure: equipments, technique, special consideration. - Alteration in blood pressure * Reading of vital signs 	15hrs
UNIT 8	<p>Health assessment</p> <ul style="list-style-type: none"> # Purpose # Process of health assessment <ul style="list-style-type: none"> - Health history - Physical examination # Methods- inspection., palpation, percussion, auscultation olfaction # Preparation of examination; patient and unit # General assessment # Assessment of each body system # Recording of health assessment 	30 hrs

UNIT 9	<p>Machinery equipment and Linen</p> <ul style="list-style-type: none"> - Type Disposable and reusable – linen, rubber gods, glass ware, mental, plastics, furniture machinery <p>Introduction</p> <ul style="list-style-type: none"> - Indent - Maintenance - Inventory 	5hrs
UNIT 10	<p>Meeting needs of patient</p> <p>* Basic needs (Activity of daily living)</p> <ul style="list-style-type: none"> - Providing safe and clean environment - Physical- environment, temperature humidity, noise, ventilation, light, odors, pests control, reduction of physical hazards: Fire accidents - Safety devices restraints, side rails, airways, trapeze etc. - Role of nurse in providing safe and clean environment <p>* Hygiene - Factors influencing hygiene practices</p> <ul style="list-style-type: none"> - Hygienic care: care of the skin – bath and pressure points, feet and nail, oral cavity, hair care, eyes, ear and nose - Assessment, principles, types, equipments procedure, special considerations - Patent environment : Room equipment and linen, making patient beds - Types of beds and bed making - Comport:- - Factors influencing comport - Comport devices <p>* Physiological needs;</p> <p># Sleep & rest</p> <ul style="list-style-type: none"> - Physiology of sleep - Factors affecting Sleep - Promoting rest & sleep - Sleep disorders <p># Nutrition</p> <ul style="list-style-type: none"> - Importance - Factors affecting nutritional needs - Assessments of nutritional needs variables - meeting nutritional needs principles, equipments, procedure and special considerations <p>* Oral</p> <p>* Central : Naso/ orgastric, gastrostomy</p> <p>* Parental</p>	60hrs

*** Urinary elimination**

- Review of physiology of urine elimination, composition and characteristics of urine
- Factor influencing urination
- Alteration in urinary elimination
- Types & collection of urine specimen: observation, urine testing
- Facilitating urine elimination : assessment, types, equipments, procedure and special considerations
 - # Providing urinal & bed pan
 - # Condom drainage
 - # Perineal care
 - # Catheterization
 - # Care of urinary drainage
 - # Care of urinary diversion
 - # Bladder irrigation

*** Bowel elimination**

- Review of physiology of bowel elimination. Composition and characteristics of feces.
- Factor influencing bowel elimination Alteration in bowel elimination
- Types & collection of feces specimen: observation
- Facilitating bowel elimination: assessment, equipment, procedures and special considerations
 - # Passing of flatus tube
 - # Enemas
 - # Suppositories
 - # Sitz bath
 - # Bowel wash
 - # Care of ostomies

*** Mobility and immobility**

- Principles of body mechanics
- Maintenance of normal body alignment and mobility
- Factors affecting body alignment and mobility
- Hazards associated with immobility
- Alteration in body alignment and mobility
- Nursing intervention for impaired body alignment and mobility: assessment , types, devices used, method and special consideration, rehabilitation aspects
 - # Range of motion exercises
 - # Maintaining body alignment: positions
 - # Moving
 - # Lifting
 - # Transferring
 - # Walking
 - # Restraints

*** Oxygenation**

- Review of cardiovascular and respiratory physiology
- Factors affecting oxygenation

	<ul style="list-style-type: none"> - Alteration in oxygenation - Nursing intervention in oxygenation: assessment, types, equipments used, procedure and special consideration <ul style="list-style-type: none"> # Maintenance of patient airway # Oxygen administration # Suction # Inhalation: dry & moist # Chest physiotherapy and postural drainage # Pulse oxymetry # CPR- Basic life support * Fluid, electrolyte and acid-base balance <ul style="list-style-type: none"> - Review of physiological regulation of fluid, electrolyte, and acid-base balances - Factors affecting fluid, electrolyte, and acid base balance - Nursing intervention in fluid, electrolyte, and acid base balances : assessment, types, equipments, procedure and special considerations <ul style="list-style-type: none"> # Measuring fluid intake & output # Correcting fluid & electrolyte balance <ul style="list-style-type: none"> \$ Replacement of fluids: oral and parental venipuncture, regulating IV flow rates, changing IV solutions and tubing. Changing IV dressing <ul style="list-style-type: none"> \$ Administering blood transfusion \$ Restriction of fluids * Psychological needs <ul style="list-style-type: none"> - Concepts of cultural diversity, stress and adaptation, self concept, sexuality, spiritual health, coping with loss, death & grieving <ul style="list-style-type: none"> - Assessment of psychological needs - Nursing intervention for psychological needs <ul style="list-style-type: none"> # Assist with coping and adaptation # Creating therapeutic environment - Recreational and divers ional therapies 	
UNIT-11	<p>Infection control and clinical settings</p> <ul style="list-style-type: none"> * Infection control <ul style="list-style-type: none"> - Nature of infection - Chain of infection transmission - Defenses against infection: natural and acquired - Hospital acquired infection - Concept of asepsis: medical asepsis and surgical asepsis <ul style="list-style-type: none"> - Isolation precaution (barrier nursing) <ul style="list-style-type: none"> # Hand washing: simple, hand atisepsis and surgical antiseptis (scrub) <ul style="list-style-type: none"> # Isolation: source and protective # Personal protective equipments: types, uses and technique of wearing and removing 	20 hrs

	<ul style="list-style-type: none"> # Decontamination of equipments and unit # Transportation of infected patients # Transmission based precautions * Biomedical waste management <ul style="list-style-type: none"> - Importance - Types of hospital waste - Hazards associated with hospital waste - Decontamination of hospital waste - Segregation and transportation and disposal 	
UNIT-12	<p>Administration of Medication</p> <ul style="list-style-type: none"> * General principles/ considerations <ul style="list-style-type: none"> - Purpose of medications - Principles : 5 rights, special considerations, prescriptions, safety in administering medication and medication errors - Drug forms - Route of administration - Storage & maintenance of drug and nurses responsibility - Broad classification of drugs - Therapeutic effect, side effects, toxic effects, idiosyncratic reaction, allergic reaction, drug tolerance, drug interaction - Factors influencing drug action - Systems of drug measurements: metric system, apothecary system, households measurement, solution <ul style="list-style-type: none"> - Converting measurements units: Conversion within one system, conversion between system, dosage calculation - Terminologies and abbreviation used in prescription and medications. * Parenteral <ul style="list-style-type: none"> - General principles: decontamination of disposable syringes and needles - Types of parenteral therapies - Types of syringes, needles, canula and infusion sets - Protection from needles stick injuries: giving medication with the safety syringes - Routes of parenteral therapies <ul style="list-style-type: none"> # Intradermal: purpose, site, equipments, procedures, special consideration # Subcutaneous: purpose, site, equipments, procedure, special consideration # Intramuscular: purpose, site, equipments, procedure, special consideration # Intravenous: purpose, site, equipments, procedure, special consideration # Advanced techniques: epidural, intrathecal, intraosseous, intraperitoneal, intrapleural, intra arterial- role of nurse 	40 hrs.

	<p>* Topical administration: purpose, site, equipments, procedure, special consideration</p> <ul style="list-style-type: none"> - Application to skin - Application to mucus membrane <p># Direct application of liquids-Gargle and swabbing the throat</p> <p># Insertion of drug into body cavity: Suppository/ medicated packing in rectum/ vagina</p> <p># Instillation: Ear, eye, nasal, bladder and rectal</p> <p># Irrigation : Ear, eye, bladder, vaginal and rectal</p> <p># Spraying: Nose and throat</p> <p>* Inhalation: Nasal, oral, end tracheal / tracheal (steam, oxygen and medication) Purposes, types, equipments, procedure, special considerations</p> <ul style="list-style-type: none"> - Recording and reporting of medication administered. 	
UNIT-13	<p>Meeting needs of pre-operative patients</p> <ul style="list-style-type: none"> * Definition and concept of pre operative nursing * Pre-operative phase <ul style="list-style-type: none"> - Preparation of patient for surgery * Intra operative <ul style="list-style-type: none"> - Operative theatre set up and environment - Role of nurse * Post operative phase <ul style="list-style-type: none"> - Recovery unit - Post operative room - Post operative care * Wounds: types, classification, wound healing process, factors affecting wound, complication of wound healing * Surgical asepsis * Care of wound ; types, equipments, procedure and special considerations <ul style="list-style-type: none"> - Dressing, suture care - Care of drainage - Application of bandages, binders, splints and slings - Heat and cold therapy 	10 hrs.
UNIT-14	<p>Meeting special needs of the patient</p> <ul style="list-style-type: none"> * Care of patient having alteration in <ul style="list-style-type: none"> - Temperature (hyper & hypothermia): Types, assessment, management - Sensorium (Unconsciousness); Assessment and management - Urinary elimination (retention & incontinence); Assessment and management - Functioning of sensory organs(visual & hearing impairment); Assessment and management - Communication method and special considerations - Mobility (physically challenged, cast); Assessment and management - Mental state (mentally challenged); Assessment and 	15 hrs.

	<p>management</p> <ul style="list-style-type: none"> - Communication methods and special considerations - Respiration (distress); Types, assessment, management - Comfort-(pain) nature, types, Factors influencing pain, coping , assessment& management <p>* Treatment related to gastrointestinal system; naso-gastric suction, gastric irrigation, gastric analysis.</p>	
UNIT- 15	<p>Care of terminally ill patient</p> <ul style="list-style-type: none"> • Concepts of loss, grief, grieving process • Signs of clinical death • Care of dying patient, special considerations Advanced directives; euthanasia, will, dying declaration, organ donation etc. • Medic-legal issue • care of dead body • Equipment., procedure and care of unit • Autopsy • Embalming 	5hrs
UNIT- 16	<p>Professional nursing concepts and practices</p> <ul style="list-style-type: none"> • Conceptual and theoretical models of nursing practice introduction to models – holistic model, health belief Model, health promotion model etc. • Introduction to theories in nursing: peplum’s Henderson’s Orem. S Newman’s Roger’s and Roy’s • Linking theories with nursing process 	6hrs

Nursing Foundation practical

Placement: - First Year

Practical- 650hrs
(200 and 450 Clinical):

Course Description: This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical setting. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in supervised clinical settings

UNIT	CONTENT	HOURS
UNIT -1	<p>Hospital admission and discharge (III)</p> <ul style="list-style-type: none"> • Admission • Prepare unit for new patient • Prepare admission procedure <ul style="list-style-type: none"> New patient Transfer in • Prepare patient record <p>Discharge/Transfer out</p> <ul style="list-style-type: none"> • Gives discharge counseling • Perform discharge procedure (planned discharge, lamma and abscond, referrals and transfers) • Prepare records of discharge/transfer • Dismantle, and disinfect unit and equipment after discharge/transfer <p>Perform assessment</p> <ul style="list-style-type: none"> • History taking, nursing diagnosis, problem list, Prioritization goals & outcomes, selection of interventions • Write nursing care plan • Gives care as per the plan <p>Communication</p> <ul style="list-style-type: none"> • Use verbal and nonverbal communication techniques Prepare a plan for patient teaching session <p>Write patient report</p> <ul style="list-style-type: none"> • change of shift reports, transfer reports , incident report etc • Presents patient report <p>Vital sign</p> <ul style="list-style-type: none"> • Measure, record and interpret alteration in body temperature pulse respiration and blood pressure Health assessment 	<p>200 450 Minimum practice time clinical area</p>

	<ul style="list-style-type: none"> • Health history taking 	
	<ul style="list-style-type: none"> • Perform assessment <ul style="list-style-type: none"> -General - Body systems • Use various methods of physical examination • Inspection palpation, Percussion Auscultation, Olfaction • Identification of system wise deviations <p>Prepare patient's Unit</p> <ul style="list-style-type: none"> • Prepare beds <ul style="list-style-type: none"> - Open closed, occupied operation amputation - Cardiac, Fracture, burn and Fowler's bed - Pain assessment and provision for comfort <p>Use comfort devices</p> <p>Hygienic care</p> <ul style="list-style-type: none"> • Oral hygiene • Bath and care of pressure points • Hair wash pediculosis Treatment <p>Feeding</p> <ul style="list-style-type: none"> • Oral, Eteral, Naso/orogastric gastrostomy and parenteral feeding • Naso- gastric insertion suction and irrigation <p>Assisting patient in urinary elimination</p> <ul style="list-style-type: none"> • Provides urinal/bed pan • Condom drainage • Catheterization • Care of urinary drainage <p>Bladder irrigation</p> <p>Assisting bowel elimination</p> <ul style="list-style-type: none"> • Insertion of Flatus tube • Enemas • Insertion of suppository <p>Bowel wash</p> <p>Body alignment and mobility:-</p> <ul style="list-style-type: none"> - Range of motion exercises - Positioning Recumbent lateral fowlers, Sims, lithotomic, prone, trend burg position - Assist patient in moving lifting transferring, Walking - Rest rants <p>Oxygen administration</p> <p>Suctioning: Or pharyngeal, nasopharyngeal</p> <p>Chest physiotherapy and postural drainage</p> <p>Care of chest drainage</p> <p>CPR- Basic life support</p> <p>Intravenous therapy</p> <p>Blood and blood component therapy</p>	

	<p>Collect/ assist for collection of specimen for investigation urine, sputum, faces, vomit us, blood and other body fluid</p> <p>Perform lab tests:</p> <ul style="list-style-type: none"> • Urine: sugar, albumin and acetone • Blood: sugar (with stripe/ Glucometer) <p>Hot and cold application: Local and general sitz bath.</p> <p>Communicating and assisting self care of visually and hearing impaired patients</p> <p>Communicating and assisting self care of mentally challenged/ disturbed patients</p> <p>Recreational and divers ional therapies</p> <p>Caring of patient with alteration in sensation</p> <p>Infection control</p> <ul style="list-style-type: none"> * perform following procedures <ul style="list-style-type: none"> - Hand washing techniques - (Simple, hand antiseptis and surgical antiseptis) - Prepare isolation unit in lab/ward - Practice technique of wearing and removing personal protective equipments - Practice standard safety precaution (universal precautions) * Documentation of equipments and unit:- <ul style="list-style-type: none"> - Surgical asepsis # Sterilization # Handling sterilization equipment # Calculate strengths of lotions # Prepare lotion * Care of articles <p>Pre and post operative care</p> <ul style="list-style-type: none"> • Skin preparation for surgery: Local • Preparation of post operative unit • Pre & Post operative teaching and counseling • Pre and post operative monitoring • Care of the wound • Dressing, suture care, care of drainage, application of bandage, binders, splint and sling • Bandaging of various body parts. <p>Administration of medications</p> <ul style="list-style-type: none"> • Administer medication in different forms and routes • Oral, sublingual and buccal • Parenteral: intradermal, subcutaneous, intramuscular etc. • Assist with the intravenous medication 	
--	---	--

	<ul style="list-style-type: none"> • Drug measurement and dose calculation • Preparation of lotion and solution • Administer topical applications • Insertion of drug into the body cavity: suppository & medicated packing etc. • Instillation of medicine and spray into Ear, eye, nose and throat • Irrigation: eye, ear, bladder, vagina and rectum • Inhalation: dry and moist <p>Care of dying patient</p> <ul style="list-style-type: none"> • Caring and packing of dead body • Counseling and supporting grieving relatives • Terminal care of the unit 	
--	--	--

PSYCHOLOGY**Placement: First Year****Theory-60 hrs**

Course Description: This course is designed to assist the students to acquire knowledge of fundamentals of psychology and develop an insight into behavior of self, and others Further it is aimed at helping them to practice the principles and mental hygiene for promoting mental health in nursing practice

UNIT	CONTENT	HOURS
UNIT -1	Introduction <ul style="list-style-type: none"> • History and origin of science of psychology • Definition & scope of psychology • Relevance to nursing • Methods of psychology 	2 hrs
UNIT -2	Biology of behavior <ul style="list-style-type: none"> • Body mind relationship- modulation process in health and illness • Genetics and behavior-Heredity and environment • Brain and behavior- Nervous system, neurons and synapse • Association cortex, Rt and Lt hemisphere • Psychology of sensation • Muscular and glandular controls of behavior • Nature of behavior of an organism/ integrated responses 	4 hrs
UNIT -3	Cognitive process <ul style="list-style-type: none"> • Attention: types, determinants, duration and degree, alteration • Perception meaning principles, factors affecting errors. • Perception: types, determinants, duration and degree, alteration • Learning: Nature, types, learner and learning, factors influencing, laws and theories, process, transfer, study habits • Memory: Meaning, types nature, factors influencing, development theories and methods of memorizing and forgetting • Thinking: types and levels, stages of development, relationship with language and 	20 hrs.

	<p>communication</p> <ul style="list-style-type: none"> • Intelligence: Meaning , classification, uses, theories • Attitude Concept, types, individual difference and variability • Psychometric assessment of cognitive processes • Alteration in cognitive processes • Application 	
UNIT -4	<p>Motivation and Emotional process</p> <ul style="list-style-type: none"> • Motivation: Meaning, concept, types, theories, motives and behavior, conflicts and frustration conflict and resolution • Emotion and stress <ul style="list-style-type: none"> - Emotion: Definition , components, change in emotions, <p>Theories, emotions in health and illness</p> <ul style="list-style-type: none"> • Stress stressors cycle. Affect, adaptation and coping • Attitude meaning nature. Development factors affecting - Behavior and attitudes - Attitudinal Change • Psychometric assessment of emotions and attitudes • Alteration in emotions • Application 	8hrs
UNIT – 5	<p>Personality</p> <ul style="list-style-type: none"> • Definition topography, types, theories • Psychometric assessment of personality • Alteration in personality • Application 	7hrs
UNIT – 6	<p>Developmental psychology</p> <ul style="list-style-type: none"> • Psychology of people at different stages from infancy to old age • Psychology of Vulnerable individual challenged, Women, sick • Psychology of groups 	7 hrs
UNIT – 7	<p>Mental Hygiene and Mental Health</p> <ul style="list-style-type: none"> • concept of Mental Hygiene and mental health • Characteristics of mentally healthy person • Warning signs of poor mental health • Promotive and preventive mental health – 	8 hrs

	<p>Strategies and Services</p> <ul style="list-style-type: none"> • Ego defense mechanism and implication • Personal and social adjustment • Guidance and counseling • Role of nurse 	
UNIT- 8	<p>Psychological assessment and tests</p> <p>* Types, development, characteristics, principles, uses, interpretation and role of nurse in psychology assessment</p>	4 hrs

INTRODUCTION TO COMPUTERS

Placement: First Year

Theory-45 hrs.

Course Description: This course is designed for students to develop basic understanding of uses of computers and its application in nursing.

UNIT	CONTENT	HOURS	
		Theory	Prac.
UNIT - 1	Introduction <ul style="list-style-type: none">• Concepts of computers• Hardware and software : trends and technology• Application of computers in nursing	3 hrs	----
UNIT - 2	<ul style="list-style-type: none">• Introduction to disk operating system<ul style="list-style-type: none">- DOS- Window (all version)• Introduction<ul style="list-style-type: none">- MS – word- MS – Excel with pictorial presentation- MS – Access- MS – Power point	6 hrs	20 hrs
UNIT - 3	<ul style="list-style-type: none">• Multimedia : types and uses• Computer aided teaching and testing	2 hrs	3 hrs
UNIT - 4	<ul style="list-style-type: none">• Use of internet :e-mail	1hrs	3 hrs
UNIT - 5	<ul style="list-style-type: none">• Statistical Package : types and their feature	2 hrs	2 hrs
UNIT - 6	<ul style="list-style-type: none">• Hospital management system : types and uses	1 hrs	2 hrs

B.Sc. Nursing

Second Year

SOCIOLOGY

Placement: Second Year

Theory-60 hrs.

Course Description: This course is designed to introduce the concept of sociology related to community and social institutions in India and its relationship with health. Illness and nursing

UNIT	CONTENT	HOURS
UNIT -1	Introduction <ul style="list-style-type: none">• Definition of sociology• Nature and scope of discipline• Importance and application of sociology in nursing	1hrs
UNIT -2	Individual and Society <ul style="list-style-type: none">• Society and community• Nature of Society• Difference between society and Community• Process of socialization and individualization• Personal disorganization	3hrs
UNIT -3	Culture <ul style="list-style-type: none">• Nature of Culture• Evolution of Culture• Diversity and uniformity of Culture• Culture and Civilization• Tran cultural Society• Influence on health and disease	3 hrs
UNIT - 4	Social groups and Process <ul style="list-style-type: none">• The meaning and Classification of groups• Primary and Secondary group• In –group V/s Out put, class Tribe, caste• Economic, Political, religious groups, mob, crowd, public and audience interaction and social process• Co-operation, competition, conflict• Accommodation assimilation and isolation	4hrs
UNIT – 5	Population <ul style="list-style-type: none">• Society and population• Malthusian theory of population• Population explosion in India and its impact on health status• Family welfare programme	6 hrs.

UNIT – 6	<p>Family and marriage</p> <ul style="list-style-type: none"> • Family Functions • Types- joint nuclear, blended and extended Family: characteristics • The modern family- changes, problems-dowry etc. Welfare services • Changes and legislation on family and marriage in India-Marriage acts. • Marriage: forms and function of marriage • Marriage and family problem in India. • Family, marriage and their influence on health and health practice 	5 hrs
UNIT-7	<p>Social Stratification</p> <ul style="list-style-type: none"> • Meaning and types of social stratification • The Indian caste system-origin and feature • Features of caste in India today • Social class system and status • Social mobility- Meaning and types • Race as a biological concept, criteria of racial classification • Salient feature of primary races- racism • Influence of class, caste and race on health and health practices 	7hrs
UNIT-8	<p>Types of communication in India (Rural, urban regional)</p> <ul style="list-style-type: none"> • Features of village community and characteristics of Indian villages – panchayat system , social dynamics • Community development project and planning • Changes in Indian rural life • Availability of health facilities in rural and its impact on health and health practice • Urban – community – features • The growth of cities ; urbanization and its impact on health and health practices • Major urban problems – urban slums • Region : problems and impact on health 	6 hrs
UNIT - 9	<p>Social change</p> <ul style="list-style-type: none"> • Nature and process of social change • Factors influencing social change: cultural change, cultural lag. • Introduction to theories of social change: linear, cyclical Marxi functional <p>Role of Nurse - change agents</p>	4hrs
UNIT – 10	<p>Social organization and social change</p> <ul style="list-style-type: none"> • Social organization : elements, types • Democratic and authoritian modes of participation Voluntary associations • Social system : definition and types of social system • Inter – relationship of institutions 	4 hrs

UNIT-11	<p>Social control</p> <ul style="list-style-type: none"> • Nature and process of social control • Political, legal, religion, educational economic , industrial and Technological system norms and values – Folkways & mores customs laws and fashion <p>Role of nurse</p>	2hrs
UNIT- 12	<p>Social Problems</p> <ul style="list-style-type: none"> • Social disorganization • Control and planning poverty housing illiteracy, food supplies prostitution rights of women and children ,venerable groups Elderly, handicapped, minority group , child labor, substance abuse, HIV/AIDS • Social welfare programme in India <p>Role of Nurse</p>	15hrs

Pharmacology
Placement: Second Year

Theory – 45Hrs.

Course Description: This course is designed to enable students to acquire understanding of pharmaco-dynamics, pharmacokinetic, principles and therapeutic and nursing implication

UNIT	CONTENT	HOURS
UNIT 1	Introduction to pharmacology <ul style="list-style-type: none"> • Definition • Sources • Terminology used • Types, classification • Pharamacodynamics Action, therapeutic • Adverse toxic • Pharmacokinetics ablsorapti8on, interaction excretion • Review routes and principles of administration of drugs • Indian pharmacopoeia Legal issue • Rational use of drugs • Principles of therapeutics 	3 Hrs
UNIT-2	Chemotherapy <ul style="list-style-type: none"> • Pharmacology of commonly used <ul style="list-style-type: none"> - Penicillin - Sources - Cephalosporins - Aminnoglycosides - Macrolilde and Broad spectrum antibiotics - Sulfonamides - Quinolones - Ant amoebic - Antimalaria - Anthelminities - Antiscabies agents - Antiviral and anti fungal agents - Ant tubercular drugs - Anti leprosy - Anticancer drugs - Immunosuppressant Composition, action, dosage, route, indications contraindication, drugs Interaction, side effects, adverse effects, toxicity and role of nurse	6 Hrs

UNIT- 3	<p>Pharmacology of commonly used antiseptics, disinfectants and insecticides</p> <p>Antiseptics: Composition, action dosage route, indications, contraindication, drug Interaction, side effects, adverse effects, toxicity and role of nurse</p> <ul style="list-style-type: none"> • Disinfectants • Insecticides 	2 hrs.
UNIT- 4	<p>Drug action on GI system</p> <ul style="list-style-type: none"> • pharmacology of commonly used <ul style="list-style-type: none"> - Antiemetics - Emetics - Purgatives - Antacids - Cholinergic - Fluid and electrolyte therapy - Anti diarrhoeals - Histamines <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	2 hrs.
UNIT-5	<p>Drugs used on respiratory system</p> <ul style="list-style-type: none"> * Pharmacology of commonly used <ul style="list-style-type: none"> - Antiasthematics - Mucolyties - Decongestants - Expectorants - antitussives - Bronchodilators - Antihistamins <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	2 hrs.
UNIT- 6	<p>Drugs used in Urinary system</p> <ul style="list-style-type: none"> • Pharmacology of commonly used <ul style="list-style-type: none"> - Diuretics and ant diuretics - Urinary antiseptics - Cholinergic and anticholinergic - Acidifiers and alkalanizers <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	2 hrs.

UNIT-7	<p>Miscellaneous</p> <ul style="list-style-type: none"> • Drugs used in deaddiction • Drug used in CPR and emergency • Vitamins and minerals • Immunosuppressant • Antidotes • Antivenom • Vaccines and sera 	4 hrs.
UNIT- 8	<p>Drugs used on skin and mucus membranes</p> <ul style="list-style-type: none"> • Topical application for skin, eye, ear, nose, and buccal cavity Antipruritics <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effect, toxicity and role of nurse</p>	1 hrs.
UNIT- 9	<p>Drugs acting on nervous system</p> <ul style="list-style-type: none"> • Basic and applied pharmacology of commonly used • Analgesics <ul style="list-style-type: none"> # Non steroidal anti inflammatory drug (NSAID) • Antipyretics • Hypnotics and sedatives <ul style="list-style-type: none"> # Opioids # Non opioids # Tranquilizers # General and local anesthetics # Gases: oxygen, nitrous oxide, carbon dioxide • Cholinergic and anticholinergic <ul style="list-style-type: none"> - Muscle relaxants - Major Tranquilizers - Anti psychotics - Anticonvulsants - Adrenergics - Nonadnergics - Mood stablizers Acetylcholine - Stimulants <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effect, adverse effect, toxicity and role of nurse</p>	8 hrs.

UNIT- 10	<p>Cardiovascular drugs</p> <ul style="list-style-type: none"> • Haematinics • Cardio tonics • Anti anginals • Anti hypertensive and vasodilators • Anti-arrhythmic • Plasma expanders • Coagulants and anticoagulants • Antiplatelets and thrombolytics • Hyplipidemics <p>Composition, action, dosage, route, indications, contraindication, drug interaction, side effects, adverse effects, toxicity and role of nurse</p>	5 hrs.
UNIT-11	<p>Drug use for hormonal disorders and supplementation, contraception and medical termination of pregnancy</p> <ul style="list-style-type: none"> • Insulin and oral hypoglycemic • Thyroid supplement and suppressants • Steroids, antibotics • Uterine stimulants and relaxants • Oral contraceptives • Other estrogen- progesterone preparation • Corticotrophine & gonadotropines • Adrenaline • Prostaglandins • Calcitonins • Calcium salts • Calcium regulators <p>Composition, action, dosage, route, indications, contraindication, drug Interaction, side effects, adverse effects, toxicity and role of nurse</p>	4 hrs.
UNIT- 12	<p>Introduction to drug used in alternative systems of medicine</p> <p>* Ayurveda, Homeopathy, Unani & Siddha etc.</p>	6hrs.

PATHOLOGY AND GENETICS

SECTION A – PATHOLOGY

Placement; Second year
hours

Time Theory – 30

Course Description; this course is designed to enable students to acquire knowledge of pathology of various disease conditions and apply this knowledge in practice of nursing

UNIT	CONTENT	TIME (HRS)	
UNIT - 1	<p>INTRODUCTION</p> <ul style="list-style-type: none"> • Importance of study of pathology • Definition of terms • Methods of technique • Cellular and tissue changes • Infiltration and regeneration • Inflammation and infection • Wound healing • Vascular changes <p>Cellular growth , Neoplasms</p> <ul style="list-style-type: none"> • Normal and cancer cell • Benign and Malignant growth • In situ carcinoma <p>Disturbances in fluid and electrolyte imbalance</p>	Thr. 3	Pr
UNIT -2	<p>Special pathology</p> <ul style="list-style-type: none"> • Pathological changes in disease conditions of various systems : • Respiratory tract Tuberculosis , Bronchitis, pleural effusion and pneumonia , Lung abscess Emphysema, Bronchiectasis. Bronchial asthma , Chronic obstructive pulmonary disease & tumors Cardio – vascular System <ul style="list-style-type: none"> • Pericardial effusion • Rheumatic heart disease • Infective endocarditis, atherosclerosis • Ischemia, infarction & aneurysm Gastro Intestinal Tract <ul style="list-style-type: none"> • Peptic ulcer, typhoid • Carcinoma of GI tract-buccal, esophageal • Gastric and intestinal 	10	5

	<p>Liver Gall bladder & pancreas</p> <ul style="list-style-type: none"> • Hepatitis, Chronic, liver abscess, cirrhosis • Tumors of liver gall bladder and pancreas • Cholecystitis <p>Kidneys and Urinary Tract:</p> <ul style="list-style-type: none"> • Glumerulonephritis, Pyelonephritis • Calculi, renal failure, renal carcinoma & cystitis <p>Male genital systems</p> <ul style="list-style-type: none"> • Cryptorchidism, testicular atrophy • Prostatic hyperplasia carcinoma penis,& prostrate <p>Female genital system</p> <ul style="list-style-type: none"> • Fibroids • Carcinoma cervix and endometrium • Vesicular mole, Choriocarcinoma • Ectopic gestation • Ovarian cyst & tumors <p>Cancer Breast</p> <p>Central Nervous System</p> <ul style="list-style-type: none"> • Hydrocephalus, Meningitis, Encephalitis • Vascular disorders- thrombosis, embolism • Stroke, paraplegia, Quadraplegia • Tumors, meningiomas- gliomas <p>Metastatic tumors</p> <p>Skeletal system</p> <ul style="list-style-type: none"> • Bone haling, osteoporosis, osteomyelitis <p>Arthritis & tumors</p>		
UNIT-3	<p>Clinical pathology</p> <ul style="list-style-type: none"> • Various blood and bone marrow test in assessment and monitoring of disease conditions • Hemoglobin • RBC, White cell & platelet counts • Bleeding time, clotting time and prothrombin time • Blood grouping and cross matching • Blood Chemistry • Blood culture • Serological and immunological test • Other blood test • Examination of bone marrow • Methods of collection of blood specimen for various clinical pathology, biochemistry, microbiology tests, <p>Inference and normal values</p>	4	3

UNIT 4	Examination of body cavity fluids, transudates and exudates <ul style="list-style-type: none"> • The laboratory tests used in CSF analysis • Examination of other body cavity fluids transudates and exudates sputum, wound discharge etc • Analysis of gastric and duodenal contents • Analysis of semen sperm count, motility and morphology and their importance in infertility 	2	1
UNIT- 5	Urine and Faeces <ul style="list-style-type: none"> # Urine <ul style="list-style-type: none"> • Physical characteristics • Analysis • Culture and sensitivity # Faeces <ul style="list-style-type: none"> • characteristics • Stool examination: occult blood, Ova, parasite and cyst, reducing substances etc. Methods of collection for various tests, inference and normal values	1	1

SECTION –B GENETICS

Placement: Second Year

Theory-15 hours

Course: Description: This course is designed to enable students to acquire understanding of Genetics, its role in causation and management of defects and diseases

UNIT	CONTENT	TIME (HRS)
UNIT -I	Introduction <ul style="list-style-type: none">• Practical application of genetics in Nursing• Impact of genetic condition on Families• Review of cellular division mitosis and meiosis• Characteristics and structure of genes• Chromosomes and sex determination• Chromosomal aberration patterns of inheritance<ul style="list-style-type: none"># Medallion theory of inheritance# multiple allots and blood groups# Sex linked inheritance# Errors in transmission (Mutation)	3
UNIT– II	Maternal, prenatal and genetic influence on development of defects and disease <ul style="list-style-type: none">• Condition affecting the mother genetic and infections• Consanguinity atopy• Prenatal nutrition and food allergies• Maternal age• Maternal drugs therapy• Prenatal testing and diagnoses• Effect of radiation, drugs and chemicals• Infertility• Spontaneous abortion• Neural tube defects and the role of folic acid in lowering the risk• Downs syndrome(Trisomy 21)	3
UNIT- III	Genetic testing in neonates and children <ul style="list-style-type: none">• Screening for<ul style="list-style-type: none"># Congenital abnormalities# Development delay# Dysmorphism	2
UNIT- IV	Genetic conditions of adolescents and adults <ul style="list-style-type: none">• Cancer genetics Familial Cancer• Inborn errors of metabolism• Blood group alleles and hematological disorder• Genetic haemochromatosis• Huntington’s disease• Mental illness	2

UNIT V	Services related to Genetics <ul style="list-style-type: none">• Genetic testing• Human genome project• Gene therapy• The Eugenics movement• Genetic Counseling• Legal and Ethical issues• Role of nurse	5
--------	--	---

Medical and Surgical
(Adult including Geriatrics)

Placement: Second Year

Time: theory – 210 hours
Practical -720hours

Course Description: - The purpose of this course is to acquire knowledge and develop proficiency in caring for patients with medical and surgical disorders in verities of health care settings and at home

UNIT	CONTENT	TIME(HRS)
UNIT – 1	<p>INTRODUCTION</p> <ul style="list-style-type: none"> • Introduction to medical surgical nursing – evolution and trends of medical and surgical nursing • Review of concepts of health and illness Disease – concepts. Diseases (ICD -10 or later version) Acute illness Chronic illness. Stages of illness. • Review of Concepts of comprehensive nursing care in medical surgical conditions based on nursing process. • Role of nurse patient and family in care of adult patient • Role and responsibilities of a nurse in of medical and surgical settings. Settings • Outpatient department • In - patient unit • Intensive care unit • Home and Community • Introduction to of Medical and surgical asepsis <ul style="list-style-type: none"> ▪ Inflammation and infection ▪ Wound healing ▪ Care of Surgical patient ▪ Pre-operative ▪ Intra-operative ▪ Post-operative 	15
UNIT- II	<p>Common signs and symptoms and management</p> <ul style="list-style-type: none"> • Fluid and electrolyte imbalance • Vomiting • Dyspnea and cough, respiratory obstruction • Fever • Shock • Unconsciousness, Syncope • Pain • Incontinence • Edema • Age related problem- Geriatric 	15

UNIT- III	<p>Nursing management of Patients (adults including elderly) with respiratory problems</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of respiratory systems • Nursing Assessment – History and physical assessment • Etiology, Pathphysiology, Clinical manifestations diagnosis, treatment modalities and medical - surgical, dietetics & nursing management of adults including elderly with. • Upper Respiratory tract infections • Bronchitis • Asthma • Emphysema • Empyema • Atelectasis • Chronic Obstructive Pulmonary Diseases(COPD) • Broncheectasis • Pneumonia • Pulmonary tuberculosis • Lung abscess • Pleural effusion • Cysts and tumors • Chest injuries • Respiratory arrest and insufficiency • Pulmonary embolism <p>Special therapies, alternative therapies Nursing procedures Drugs used in treatment of respiratory disorders</p>	20
Unit- IV	<p>Nursing management of Patients (adults including elderly) with disorders of digestive systems</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of digestive systems • Nursing Assessment – History and physical assessment • Etiology, Pathophysiology clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management ❑ Disorders of- oral cavity- lips, gums, tongue, salivary glands and teeth ❑ Oesohagus - inflammation, structure obstruction, bleeding and tumors. ❑ Stomach and Duodenum- hiatus hernia, gastritis, peptic ulcer, duodenum ulcer, bleeding, tumours, pyloric stenosis ❑ Small intestinal disorders-Colitis inflammation and infection, enteritis, obstruction, bleeding and tumour and perforation ❑ Large intestinal disorders- Colitis inflammation and infection, enteritis, obstruction, tumour and lump 	30

	<ul style="list-style-type: none"> <input type="checkbox"/> Hernias <input type="checkbox"/> Appendix- inflammation, mass, abscess, rupture <input type="checkbox"/> Anal & Rectum, hemorrhoids, fissures and fistulas <input type="checkbox"/> Peritonitis/acute abdomen <input type="checkbox"/> Pancreas: inflammation, cyst, abscess and tumour. <input type="checkbox"/> Liver: inflammation, cyst, abscess, cirrhosis, portal hypertension, hepatic failure and tumour <input type="checkbox"/> Gall Bladder: inflammation, obstruction, stones and tumour. <p>Special therapies, alternative therapies Nursing procedures Drug used in treatment of disorders of digestive systems.</p>	
Unit V	<p>Nursing management of patients (adults including elderly) with blood and cardio vascular problems.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of blood and cardio vascular system. • Nursing Assessment- History and physical assessment • Etiology pathphysiology Clinical manifestations diagnosis treatment modalities and medical surgical dietetics & nursing management of , • Vascular system • Hypertension hypotension • Artherosclerosis • Raynaud’s disease • Aneurysm and peripheral vascular disorder <p>Heart</p> <ul style="list-style-type: none"> • Coronary artery disease • Ischemic Heart Disease • Coronary arteriosclerosis • Angina pectoris • Myocardial infraction • Muscular disorders of the heart • Congenital and acquired • Rheumatic Heart diseases <p>Endocarditis, pericarditis/myocarditis</p> <ul style="list-style-type: none"> • Cardio Myopathies • Cardiac dysrhythmias, Heart Block • Congestive cardiac failure <ul style="list-style-type: none"> <input type="checkbox"/> Cor-pulmonale, pulmonary edema, cardiogenic shock cardiac tamponade • Cardiac emergencies and arrest • Cardio pulmonary Resuscitation (CPR) • Blood <ul style="list-style-type: none"> <input type="checkbox"/> Anemia’s <input type="checkbox"/> Polycythemia <input type="checkbox"/> Bleeding disorders, clotting factors defects and 	30

	<p>platelets defects</p> <ul style="list-style-type: none"> <input type="checkbox"/> Thalassemia <input type="checkbox"/> Leukaemias <input type="checkbox"/> Leukopenias and agranulocytosis <input type="checkbox"/> Lymphomas <input type="checkbox"/> Myelomas <p>• Special therapies</p> <ul style="list-style-type: none"> <input type="checkbox"/> Blood transfusion, safety checks, procedure and requirements, management of adverse transfusion, reaction, records for blood transfusion <input type="checkbox"/> Management and counseling of blood donors phlebotomy procedure, and post donation management Blood bank functioning and hospital transfusion committee Bio safety and waste management in relation to Blood transfusion <input type="checkbox"/> Role of a nurse in organ donation, retrieval and banking Alternative therapies <p>Nursing procedures Drug used in treatment of blood and cardio vascular disorders.</p>	
Unit-VI	<p>Nursing management of patients (adults including elderly) with Gento-Urinary problems.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of Gento-Urinary systems. • Nursing assessment-History and physical assessment • Etiology, pathophysiology clinical manifestations diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of- • Nephritis • Nephrotic syndrome • Nephrosis • Renal calculus • Tumours • Acute renal failure • Chronic renal failure • End stage renal disease • Dialysis, renal transplant • Congenital disorders, urinary infections • Benign prostate hypertrophy • Disorders of ureter, urinary bladder and urethra-inflammation, infection, structure, obstruction, tumour, prostrate <p>Special therapies, alternative therapies Nursing procedures Drug used in treatment of disorders of Gento-Urinary systems</p>	10

UNIT-VII	<p>Nursing management of disorders of male (adults including elderly) Reproductive system</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of male reproductive system • Nursing Assessment – History and physical assessment • Etiology, pathophysiology clinical manifestations diagnosis treatment modalities and medical, surgical dietetics & nursing management of male reproductive system • Congenital malformations , cryptorchidism • Hypospadiasiis Epispadiasis • Infection • Testis and adjacent structures • Penis • Prostate inflammation, infection hypertrophy tumour • Sexual dysfunction • Infertility • Contraception • Brast gynccomastia tumour • Climacteric Changes. Special theories alternative therapies • Nursing producers • Drugs used in treatment of disorders of male reproductive system 	5
UNIT-VIII	<p>Nursing management of patients (adults including elderly) with disorders of endocrine systems</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of endocrine system • Nursing Assessment -History and physical assessment Etiology, pathophysiology clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of- <ul style="list-style-type: none"> <input type="checkbox"/> Disorders of Thyroid and parathyroid <input type="checkbox"/> Diabetes mellitus <input type="checkbox"/> Adrenal tumour <input type="checkbox"/> Pituitary disorders <p>Special therapies, alternative therapies Nursing procedures. Drugs used in treatment of disorders of endocrine systems</p>	10

MEDICAL SURGICAL NURSING

(Adult including geriatrics)- I

Practical

Placement : Second Year

Time: 720 hours

AREA	SKILLS	DURATON (in Weeks)
General Medical Ward (Respiratory, Endocrine, Renal, Hematology)	<ul style="list-style-type: none">• Assessment of the patient<ul style="list-style-type: none">- Taking history- Perform general and specific Examination- Identify alteration and deviations• Practice Medical Surgical asepsis Standard safety Measures• Administer medications<ul style="list-style-type: none">- Oral, IV M Subcutaneous• IV Therapy<ul style="list-style-type: none">- IV Canulation- Maintenance and Monitoring• Oxygen therapy by different Methods• Mobilization• Chest Physiotherapy• Naso gastric Feeding• Assist in common diagnostic• Perform/Assist in therapeutic procedures• Blood and c component therapy• Throat suctioning• Collect specimen for common investigations• Maintain elimination<ul style="list-style-type: none">- Catheterization- Bowel wash- Enema- Urinary drainage• Maintain intake output and documentation• Counsel land teach related to specific disease conditions	6

<p>General Surgical Ward (GI Urinary, CTVS)</p>	<ul style="list-style-type: none"> • practice medical surgical asepsis • Standard safety Measures • Pre- operative preparation of the patients • Post operative care <ul style="list-style-type: none"> - Receiving patient , assessment - Monitoring care • Care of wounds and drainage • Sutures removal • Ambulating and exerciser • Naso gastric aspiration • Care of chest drainage • Ostomy care <ul style="list-style-type: none"> - Gastrostomy - Colostomy - Entrostomy • Blood component and therapy • Practice Universal precaution 	<p>6</p>
<p>Cardiology Ward</p>	<ul style="list-style-type: none"> • Physical examination of the cardio vascular system recoding and interpreting ECG • Monitoring of patient • Preparation and assisting in non- invasive and invasive diagnostic procedures • Administer cardiac drugs • Cardio pulmonary resuscitation • Teach patient and families • Practice medical and surgical asepsis standard safety measures 	<p>2</p>
<p>Skin and Communicable disease ward</p>	<ul style="list-style-type: none"> • Assessment of patient with skin disorders • Assist in diagnostic and therapeutic procedures • Administer topical medication • Practice medical and surgical asepsis standard safety measures • Use of personal protective equipment (PPE) • Give medicated baths • Counseling HIV positive patient • Teach prevention of infection disease 	<p>1</p>
<p>Orthopedic Ward</p>	<ul style="list-style-type: none"> • Assessment of orthopedic patient • Assist in application of plaster cast and removal of cast • Apply skin traction, buck's traction • Assist in application and removal of prosthesis • Physiotherapy and range of motion exercises (ROM) muscle strengthening exercises • Crutch maneuvering technique • Activities of daily living • Ambulance • Teach and counsel patients and families 	<p>2</p>

Operation theatre	<ul style="list-style-type: none"> • Scrubbing, gowning, gloving • Identify instruments • Suturing • Material for common operations • Disinfection, carbolization, Fumigation • Preparation of instrument sets for common operations • Sterilization of sharp and other instruments • Prepare OT table depending upon the operation • Positioning and monitoring of the patient • Endotracheal intubation • Assisting in minor and major operations • Handling specimens • Disposal of waste as per guidelines. 	6
-------------------	--	---

INTRENSHIP**TIME: 260 hrs. (9WEEKS)**

ICU, CCU, CARDIAC. O T	<ul style="list-style-type: none">• Assist in arterial Puncture for blood gas analysis• Perform ECG and interpret accordingly• Conduct and analysis Pulse toletry• care with artificial airway• Assist in en tracheal incubation• Setting up ventilators• Drugs Sheet• Observation of special procedure in OT	2
Neuro, ICU,ITU,OT	<ul style="list-style-type: none">• Assess neurological status• Implement care to head injury spinal injury• Drug sheet• Pre and post operative care with neureo surgery patients	2
Burns and plastic reconstructive surgery	<ul style="list-style-type: none">• Nursing care	2
OT, Laparoscopic Orthopedic, Eye, ENT		3

COMMUNITY HEALTH NURSING –I

Placement: Second Year

Theory- 90hrs

Practical – 135 hours

Course: description: This course is designed for students to appreciate principles of promotion and maintenance of health

UNIT	CONTENT	HOURS
UNIT- 1	Introduction <ul style="list-style-type: none"> • Community health nursing • Definition, concept and dimensions of health • Promotion of health • Maintenance of health 	2hrs
UNIT -2	Determinations of health <ul style="list-style-type: none"> • Eugenic • Environment <ul style="list-style-type: none"> - physical air, light ventilation, water, housing sanitation, disposal of waste, disposal of dead bodies forestation noise climate , communication infrastructure facilities and linkage - Acts regulating the environment: National pollution control board - Bacterial and viral agents, host carriers and immunity arthropods and rodents • food hygiene : Production, preservation, purchase, preparation, consumption • act Regulation food hygiene- prevention and food adulteration act, drug and cosmetic act • Socio-cultural <ul style="list-style-type: none"> - customs - Marriage system - Family structure - Status of special group females,. children elderly, challenged groups and sick persons • Life style • Hygiene • Physical activity <ul style="list-style-type: none"> - Recreation and sleep - Sexual life - Spiritual life philosophy - Self reliance - Dietary pattern 	20hrs

	<ul style="list-style-type: none"> - Education - Occupation • Financial management <ul style="list-style-type: none"> - Income - Budget - Purchasing power - Security 	
UNIT-3	<p>Epidemiology</p> <ul style="list-style-type: none"> • Definition: concept, aims, scope, uses and terminology used in epidemiology • Dynamics of disease transmission: epidemiological triad • Morbidity and mortality: measurements • Level of prevention • Methods of epidemiology <ul style="list-style-type: none"> - Descriptive - Analytical: Epidemic investigation - Experimental 	10 hrs.
UNIT-4	<p>Epidemiology and nursing management of common communicable disease</p> <ul style="list-style-type: none"> • Respiratory infection <ul style="list-style-type: none"> - Small pox - Chicken pox - Measles - Influenza - Rubella - ARI's and pneumonia - Mumps - Diphtheria - Mumps - Diphtheria - Whooping cough - Meningococcal meningitis - Tuberculosis - SARS • Intestinal infection <ul style="list-style-type: none"> - Poliomyelitis - Viral Hepatitis - Cholera - Diarrhoeal disease - Typhoid fever - Food poisoning 	25 hrs.

	<ul style="list-style-type: none"> - Amoebiasis - Hook worm infection - Ascariasis - Dracunculiasis • Arthropods infection <ul style="list-style-type: none"> - Dengue - Malaria - Filariasis • Zoonoses <p>Viral</p> <ul style="list-style-type: none"> - Rabies - Yellow fever - Japanese encephalitis - Kyasnur forest disease <p>• Bacterial</p> <ul style="list-style-type: none"> - Brucellosis - Plague - Human relationship - Anthrax - Leptospirosis <p>• Rickettsial disease</p> <ul style="list-style-type: none"> - Rickettsial zoo noses - Scrub typhus - Tick typhus - Q fever <p>• Parastic Zoonoses</p> <ul style="list-style-type: none"> - Taeniasis - Hydatid disease - Lsieshmaniasis <p>• Surface infection</p> <ul style="list-style-type: none"> - Trachoma - Tetanus - Leprosy - STD & RTI - Yaws - HIV/AIDS <p>Any other</p>	
UNIT-5	<p>Epidemiology and nursing management of non communicable disease</p> <ul style="list-style-type: none"> • Malnutrition: under nutrition, over nutrition, nutritional deficiencies • Anemia 	10 hrs.

	<ul style="list-style-type: none"> • Hypertension • Stroke • Rheumatic: heart disease • Coronary heart disease • Cancer • Diabetes mellitus • Blindness • Accidents • Mental illness • Obesity • Iodine deficiency • Fluorosis • Epilepsy 	
UNIT-6	<p>Demography</p> <ul style="list-style-type: none"> • Definition concept and scope • Method of collection analysis and interpretation of demographic data • Demographic rates and ratio 	6hrs
Unit -7	<p>Population and its control</p> <ul style="list-style-type: none"> • Population explosion and its impact on social, economic development of individual society and country • Population control: <ul style="list-style-type: none"> - Overall development : Women empowerment, social economic and educational devolvement - Limiting family size - Promotion of small family norm - Methods spacing (natural, biological chemical mechanical methods etc) - Terminal surgical methods - Emergency contraception 	17hrs

COMMUNITY HEALTH NURSING –I PRACTICAL

Placement: second Year

Practical 135 hours

AREAS	SKILLS	DURATION (in weeks)
Community Health nursing	<ul style="list-style-type: none">• Use techniques of interpersonal relation• Identification of health determinants of community• History taking• Physical examination• Collect specimens- sputum, malaria smear• Perform simple lab test at center blood for hemoglobin and sugar Urine for albumin and sugar• Administer vaccines and medications to adults• Counsel and teach individual family land community<ul style="list-style-type: none">- Nutrition- Hygiene- Self- health monitoring- Seeking health services- Healthy life style- Family welfare methods- Health promotion	2 weeks urban and 2 weeks rural

MICROBIOLOGY

Placement:

theory: 60 hrs (Theory 45+15 lab)

Course:- Description: This course is designed to enable students to acquire understanding of fundamentals for microbiology and identification of various microorganism . It also provides opportunities for practicing infection Control measures in Hospital and Community settings

UNIT	CONTENT	HOURS	
		Th.	Pr.
UNIT-1	Introduction <ul style="list-style-type: none"> • Importance and relevance to nursing • Historical prospective • Concepts and terminology • Principles of microbiology 	5hrs	----
UNIT 2	General Characteristics of microbes <ul style="list-style-type: none"> • Structure and classification of microbes • Morphological types • Size and form of bacteria • Motility • Colonization • Growth and nutrition of Microbes <ul style="list-style-type: none"> - Temperature Moisture - Blood and body fluids • Laboratory methods for identification fo micro organisms • Staining techniques, gram staining acid fast staining hanging drop0 preparation • Culture various medias - 	10hrs	5 hrs
UNIT -3	Infection control <ul style="list-style-type: none"> • Infection Sources portals of entry and exist, transmission • Asepsis • Disinfection: Types and methods • Sterilization : Types and methods • Chemotherapy and antibiotics • Standard safety measures • Biomedical waste management • Role of nurse • Hospital acquired infection • Hospital infection control programme <ul style="list-style-type: none"> - Protocols collection of samples preparation of report and status for rate of infection in the unit / hospital nurse accountability continuing education etc. 	10 hrs	2hrs

UNIT -4	Pathogenic organisms	12hrs	4 hrs
	<ul style="list-style-type: none"> • Micro organisms <ul style="list-style-type: none"> - Cocci - Gram positive and gram negative - Bacilli- Gram positive and gram negative - Spirochete - Mycoplasma - Rickettsiae - Chlamyidae • viruses • Fungi- Superficial and deep mycosis • Parasites • Rodents and vectors <ul style="list-style-type: none"> Characteristics sources portal of entry, transmission of Infection identification of disease production organisms Collection handling and transportation of various specimens 	8 hrs	4 hrs
Unit -5	Immunity <ul style="list-style-type: none"> • Immunity- types, classification • Antigen and antibody reaction • Hypersensitivity- skin test • Serological test • Immunoprophylaxis <ul style="list-style-type: none"> - vaccines & sera- types and classification, storage and handling, cold chain - Immunization for various disease - Immunization schedule 	8 hrs.	4 hrs.

**B.SC.
NURSING
THIRD YEAR**

MEDICAL SURGICAL NURSING
(ADULT INCLUDING GERIATICS)- II

Placement: third Year

Theory – 120 hrs

Practical – 270 hours

Course description: the purpose of this course is to acquire knowledge and develop proficiency in caring for patient with medical surgical disorders in various health care settings and at home

UNIT	CONTENT	HOURS
UNIT-1	<p>Nursing management of patient with disorders of Ear, Nose and throat</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of the ear, nose and throat • Nursing assessment History and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of ear, nose and throat disorders <p style="padding-left: 40px;"># External ear deformities otalgia, foreign bodies and tumors</p> <p style="padding-left: 40px;"># Middle ear impacted wax, tympanic membrane perforation, otitis media, tumors</p> <p style="padding-left: 40px;"># Inner ear Meniere's disease, labyrinthitis, ototoxicity, tumors</p> <p style="padding-left: 40px;"># Upper airway infections: Common cold sinusitis, ethmoiditis, and adenoiditis, peritonsillar abscess, laryngitis</p> <ul style="list-style-type: none"> • Upper respiratory airway • Nasal obstruction, laryngeal obstruction, cancer of the larynx • Cancer of the oral cavity • Speech defects and speech therapy • Deafness • Prevention, control and rehabilitation • Hearing aids, implanted hearing devices <p>Special therapies Nursing procedures Drug used in treatment of disorders of ear, nose and throat. Role of nurse communication with hearing impaired and deafness</p>	15 hrs.
UNIT- 2	<p>Nursing management of patient with disorders of Eye</p> <ul style="list-style-type: none"> • Review of anatomy, physiology of the eye • Nursing management-history and physical assessment • Etiology, pathophysiology, clinical, diagnosis, treatment modalities and medical and surgical nursing management of the eye disorders 	15 hrs.

	<ul style="list-style-type: none"> # Refractive errors # Eyelids- infection, tumors and deformities # Conjunctiva- inflammation and infection, bleeding # Cornea- inflammation and infection # Lens- cataract # Glaucoma # Disorders of posterior chamber and retina: retinal and vitreous problems # Retinal detachment # Ocular emergency and their prevention • Blindness • National blindness control program <ul style="list-style-type: none"> # Eye banking # Eye prostheses and rehabilitation <p>Role of a nurse- Communication with visually impaired patient, eye camps</p> <p>Special therapies</p> <p>Nursing procedures</p> <p>Drugs used in treatment of disorder of eye</p>	
UNIT-3	<p>Nursing management of patient with neurological disorders</p> <ul style="list-style-type: none"> # Review of anatomy and physiology of the neurological system • Nursing assessment- history and physical and neurological assessment and Glasgow coma scale • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of neurological disorders • Congenital malformation • Headache • Head injuries • Spinal injuries <ul style="list-style-type: none"> # Paraplegia # Hemiplegia # Quadraplegia • Spinal cord compression- herniation of in vertebral disc • Tumors of the brain and spinal cord • Intra cranial and cerebral aneurysms • Infection: <ul style="list-style-type: none"> # Meningitis, encephalitis, brain, abscess, neurocysticerosis • Movement disorders <ul style="list-style-type: none"> # Chorea # Seizures # Epilepsies • Cerebro vascular accidents (CVA) • Cranial, spinal neuropathies- Bells palsy trigeminal neuralgia • Peripheral Neuropathies Guillainbarr'e syndrome • Myasthenia gravis • Multiple sclerosis 	16 hrs.

	<ul style="list-style-type: none"> • Degenerative diseases <ul style="list-style-type: none"> #Delirium # Dementia # Alzheimer's disease # Parkinson's disease • Management of unconscious patient and a patient with stroke • Role of nurse in communicating with patient having neurological deficit • Rehabilitation of patient with neurological deficit Role of nurse in long stay facility (institution) and at home special therapies Nursing procedures Drug used in treatment of neurological disorders. 	
UNIT-4	<p>Nursing management of patients with disorder of female reproductive system.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of female reproductive system. • Nursing assessment- History and physical assessment • Breast self examination • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of disorder of female reproductive system • Sexuality and reproductive health • Menstrual disorders: Dysmenorrhea, amenorrhea, premenstrual syndrome • Abnormal uterine bleeding: menorrhagia, metrorrhagia • Pelvic Inflammatory disease • Ovarian and fallopian tube disorders: infection, cysts, tumors • Uterine and cervical and disorders: endometriosis, polyps, fibroids, cervical and uterine tumors uterine displacement, cystocele/ urethrocele/ rectocele • Vaginal disorders: infection and discharges fistulas • Vulvular disorders: infection, cysts and tumors • Diseases of breasts: deformities, infection cysts and tumors • Menopause and hormonal replacement therapy • Infertility • Contraception: types, methods, risk and effectiveness <ul style="list-style-type: none"> # Barrier methods, intra uterine device, hormonal, post conceptional methods etc. # Terminal methods Sterilization • Emergency contraception methods 	16 hrs.

	<ul style="list-style-type: none"> • Abortion- natural, medical and surgical abortion-MTP Act • Toxic shock syndrome • Injuries and trauma: Sexual Violence <p>Special therapies Nursing procedures Drug used in treatment of gynecological disorders National family welfare programme</p>	
UNIT-5	<p>Nursing management of patient with burns, reconstructive and cosmetic surgery</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of the skin and connective tissues and various deformities • Nursing assessment- History and physical assessment and assessment of burns and fluid and electrolyte loss • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of burns and reconstructive and cosmetic surgery • Types of re-constructive and cosmetic surgery: for burns, congenital deformities, injuries and cosmetic purposes • Role of nurse • Legal aspects • Rehabilitation • Special therapies <ul style="list-style-type: none"> □ Psychosocial aspects <p>Nursing procedures Drug used in treatment of burns, constructive and cosmetic surgery</p>	10 hrs.
UNIT-6	<p>Nursing management of patient with Oncological conditions</p> <ul style="list-style-type: none"> • Structure and characteristics of normal and cancer cells • Nursing assessment – history and physically assessment • Prevention, screening, early detections, warning sign of cancer • Epidemiology, etiology, classification, pathophysiology, staging, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of oncological condition • Common malignancies of various body system: oral, larynx, lung stomach, and colon, liver, leukemias, and lymphomas, breast, cervix, ovary, uterus, sarcoma, brain, renal, bladder, prostate etc. • Oncological emergencies • Modalities of treatment <ul style="list-style-type: none"> □ Immunotherapy □ Chemotherapy □ Radiotherapy □ Surgical intervention □ Stem cell and bone marrow transplants □ Gene therapy □ Other forms of treatment 	10 hrs.

	<ul style="list-style-type: none"> • Psychological aspects of cancer • Rehabilitation • Palliative care: Symptoms and pain management, nutritional support • Home care • Hospice care • Stomal therapy • Special therapies <ul style="list-style-type: none"> □ Psychosocial therapies <p>* Nursing procedures</p>	
UNIT-7	<p>Nursing management of patient in EMERGENCY AND DISASTER Situations</p> <p>Disaster Nursing:</p> <ul style="list-style-type: none"> • Concepts and principals of disaster nursing • Causes and types of disaster: Natural and manmade <ul style="list-style-type: none"> □ Earthquakes, floods, epidemics, cyclones □ Fire, explosion, accidents □ Violence, terrorism: biochemical, war • Policies related to emergency/ disaster management: Institutional, national state, institutional • Disaster preparedness: • Team, guidelines, protocols, equipments, resources • Co-ordination and involvement of : community, various Govt departments, non govt. organizations and international agencies • Role of nurse; working • Legal aspects of disaster nursing • Impact on health after effects: Post traumatic stress disorders • Rehabilitation: physical, psychosocial, financial relocation, Emergency nursing • Concept, priorities, principles and scope and scope and emergency nursing • Organization of emergency services: physical set-up, staffing, equipment and supplies, protocols, concepts of triage and role of triage nurse • Co-ordination and involvement of different departments and facilities • Nursing assessment-history and physical assessment • Etiology, classification, pathophysiology, staging, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of patient with medical and surgical emergency • Principles of emergency management • Common emergencies • Respiratory emergencies • Cardiac emergencies • Shock and hemorrhage 	10 hrs.

	<ul style="list-style-type: none"> • Pain • Poly-trauma, road accidents, crouch, injuries, wound • Bites • Poisoning; food, gas drug and chemical poisoning • Seizures • Thermal emergencies; heat stroke, and cold injuries • Pediatric emergencies • Obstetrical emergencies • Violence, abuse, sexual assault • Cardio pulmonary resuscitation • Crisis intervention • Role of nurse: communication and interpersonal relations • Medico legal aspects 	
UNIT-8	<p>Nursing care of the elderly</p> <ul style="list-style-type: none"> • Nursing assessment- history and physical assessment • Ageing • Demography: Myths and realities • Concepts and theories of ageing • Normal biological ageing • Age related body related changes • Psychosocial aspects of ageing • Medication and elderly • Stress and coping in elder patient • Common health problems and nursing management • Cardiovascular, respiratory, musculoskeletal • Endocrine, genitor-urinary, gastrointestinal • Neurological, skin and sensory organs <ul style="list-style-type: none"> <input type="checkbox"/> Psychosocial and sexual <input type="checkbox"/> Abuse of elderly • Role of nurse for care of elderly: ambulation, nutritional, communicational, psychosocial and spiritual • Role of family and formal and non formal caregivers • Use of aids and prosthesis (hearing aids, dentures) • Legal and ethical issues • Provision and programme for elderly, privileges, community Programs and health services * Home and institutional care 	10 hrs.
UNIT-9	<p>Nursing management of patients in critical care units</p> <ul style="list-style-type: none"> • Nursing assessment-history and physical assessment • Classification • Principles of critical care nursing 	10 hrs.

	<ul style="list-style-type: none"> • Organization: physical set-up, policies, staffing norms • Protocols, equipment, ventilators, cardiac monitors, defibrillators • Resuscitation equipments • Infection control and protocols 	
UNIT-10	<p>Nursing management of patients adults including elderly with Occupayional and Industrial disorders</p> <ul style="list-style-type: none"> • Nursing Assessment – History and Physical assessment • Etiology, Pathophysiology, clinical manifestations, diagnosis, diagnosis, treatment modalities and medical & surgical nursing management of occupational and industrial health disorders • Role of nurse • Special therapies, alternative therapies Nursing procedures • Drugs used in treatment of occupational and Industrial disorders. 	10 hrs.

MEDICAL SURGICAL NURSING
(Adult and geriatrics)-II Practical

Placement: Third year

Time: Theory-120 hrs
Practical – 270 hrs.
Internship - 430 hrs.

Areas	Skills to be developed	Duration (In weeks)
ENT	<ul style="list-style-type: none"> • Perform examination of ear, nose and throat • Assist with diagnostic procedures • Assist with therapeutic procedures • Instillation of drops • Perform/assist with irrigations • Apply ear bandage • Performs tracheotomy care • Teach patient and families 	1
Ophthalmology	<ul style="list-style-type: none"> • Perform examination of eye • Assist with diagnostic procedures • Assist with therapeutic procedures • Performs /assist with irrigations • Apply eye bandage • Apply eye drops/ointment • Assist with foreign body removal • Teach patient and families 	1
Neurology	<ul style="list-style-type: none"> • Perform neurological examination • Use Glasgow coma scale • Assist with diagnostic procedure • Assist with therapeutic procedures • Teach patient and families • Participate in rehabilitation program 	2
Gynecology ward	<ul style="list-style-type: none"> • Assist with gynecological examination • Assist with diagnostic procedure • Assist with therapeutic procedures • Teach patient and families • Teach self Breast examination • Assist with PAP smear collection 	1
Burns Unit	<ul style="list-style-type: none"> • Assessment of burns patient <ul style="list-style-type: none"> - Percentage of burns - Degree of burns • Fluid and electrolyte replacement therapy <ul style="list-style-type: none"> - Assess - Calculate - Replace - Record intake/output • Care of Burns wound <ul style="list-style-type: none"> - Bathing 	1

	<ul style="list-style-type: none"> - Dressing • Perform active and passive exercises • Practice medical and surgical asepsis • Counsel and teach patient and families • Participate rehabilitation program 	
Oncology	<ul style="list-style-type: none"> • Screen for common cancer-TNM classification • Assist with diagnostic procedures <ul style="list-style-type: none"> - Biopsies - Pap Smear - Bone- Marrow aspiration • Breast examination • Assist with therapeutic Procedures • Participates in various modalities of treatment <ul style="list-style-type: none"> - chemotherapy - radiotherapy - Pain management - Stomal therapy - Immuno therapy - Gene therapy - Alternative therapy • Participate in palliative care • Counsel and teach patient families • Self Breast examination • Warning signs • Participate in rehabilitation program - 	2
Critical care unit	<ul style="list-style-type: none"> • monitoring of patients in ICU • Maintain flow sheets • Care of patient on ventilators • Perform end tracheal suction • Demonstration use of ventilators, Carries monitors etc. • Collect specimen and interprets ABG analysis • Assist in arterial puncture • Maintain CVP line • Pulse oxymetry • CRP - ALS 	
	<ul style="list-style-type: none"> • Defibrillators • Pace makers • Bag-mask ventilation • Emergency tray trolley- Crash Cart • Administration of drugs <ul style="list-style-type: none"> - Infusion pump - Epidural - Intrathecal Intracardiac • Total parenteral therapy 	1

	<ul style="list-style-type: none"> • Chest physiotherapy • Perform active and passive exercises • Counsel the patient and family in dealing with grieving and bereavement 	
Casualty Emergency	<ul style="list-style-type: none"> • Practice triage • Assist with assessment examination investigations and their interpretation in emergency and disaster situations • Assist in legal procedures • In emergency unit • Participate in managing crowd • Counsel the patient and family in dealing with grieving and bereavement 	1

Placement: Internship

Time: 9 Weeks

MENTAL HEALTH NURSING**Placement: Third Year****Theory-90 hrs****Practical-270 Hours****Internship-95 Hours (2 Weeks)**

Course Description: This course is designed for developing an understanding of the modern approach to mental health, identification, prevention and nursing management of common mental problem with special emphasis on therapeutic intervention for individuals' family and community

UNIT	CONTENT	HOURS
UNIT-I	Introduction <ul style="list-style-type: none"> • Perspectives of mental health and mental health nursing: evaluation of mental health services, treatments and nursing practices • Prevalence and incidence of mental health problems and disorders • Mental health act. • National mental health policy • National mental health programme • Mental health team • Nature and scope of mental health nursing • Role and functions of mental health nurse in various settings and factor affecting the level of nursing practice • Concepts of normal and abnormal behavior 	5 hrs.
UNIT -2	Principles and concepts of mental health nursing <ul style="list-style-type: none"> • definition Mental health nursing and terminology used • classification of mental disorders CID • Review of personality development, defence mechanism • Maladaptive behavior of individuals and group stress crisis and disaster(s) • Etiology bio-psycho- social factors • Psychopathology of mental disorders review of structure and function of brain, limbic system and abnormal neuro transmission • Principles of mental health nursing • Standards of mental health nursing practices • Conceptual model and role of nurse <ul style="list-style-type: none"> <input type="checkbox"/> Existential model <input type="checkbox"/> Psycho-analytical model <input type="checkbox"/> Behavior model <input type="checkbox"/> Interpersonal model 	5 hrs

UNIT – 3	<p>Assessment of mental health status</p> <ul style="list-style-type: none"> • History taking • Mental health examination • Mini mental health examination • Neurological examination review • Investigations related blood ESEG,ECT,MRI • Psychological tests <p>Role and responsibilities of nurse</p>	8 hrs
Unit -4	<p>Therapeutic communication and the nurse- patient relationship</p> <ul style="list-style-type: none"> • Therapeutic communication types techniques, characteristics • Types of relationship • Ethics and responsibilities • Element of nurse patient contract • Review of technique of IPR- Johari windows • Goals, phases, tasks therapeutic techniques • Therapeutic impasse and its intervention 	6hrs
Unit -5	<p>Treatment modalities and therapies used in mental disorders</p> <ul style="list-style-type: none"> • Psycho pharmacology • Psychological therapies Therapeutic community, Psycho therapy, Psychoanalytical cognitive and supportive, Family group, behavioral, play psycho drama, Music, dance recreational and light therapy, relaxation therapies Yoga mediation bio feedback • Alternative system of medicine • Occupational therapy • Physical therapy. Electro convulsive therapy • Geriatric considerations <p>Role of nurse in above therapies</p>	14hrs
Unit -6	<p>Nursing management of patient with Schizophrenia and other psychotic disorders</p> <ul style="list-style-type: none"> • Classification: ICD • Etiology, psycho-pathology, types, clinical manifestations, diagnosis • Nursing assessment- history and physical assessment and mental assessment • Treatment modalities and nursing management of patient with schizophrenia and other psychotic disorders • Geriatric considerations • Follow-up and home care and rehabilitation 	5 hrs.
Unit-7	<p>Nursing management of patient with mood disorders</p> <ul style="list-style-type: none"> • Mood disorders: Bipolar affective disorder, Mania depression and dysthymia etc. • Etiology, psycho-pathology, types, clinical manifestations, diagnosis • Nursing assessment- history and physical assessment • Treatment modalities and nursing management of patient 	5 hrs.

	<p>with mood disorders</p> <ul style="list-style-type: none"> • Geriatric considerations • Follow-up and home care and rehabilitation 	
Unit-8	<p>Nursing management of patient with neurotic, stress related and somatization disorders.</p> <ul style="list-style-type: none"> • Anxiety disorders, phobias, dissociation and conversion disorders, post traumatic disorders • Etiology, psycho-pathology, clinical manifestations, diagnosis • Nursing assessment- History, physical and mental assessment • Treatment modalities and nursing management of patients with neurotic, stress related and somatization disorders • Geriatric considerations • Follow-up and home care and rehabilitation 	8 hrs.
Unit-9	<p>Nursing management of patient with substance use and disorders</p> <ul style="list-style-type: none"> • Community used psychotropic substance: classification, forms, routes, action, intoxication and withdrawal • Etiology of dependence: tolerance, psychological and physical dependence, withdrawal syndrome, diagnosis • Nursing assessment- history, physical, mental assessment and drug assay • Treatment (detoxification, antagonist therapy and harm reduction) and nursing management of patient with substance abuse. • Geriatric considerations • Follow-up and home care and rehabilitation 	5 hrs.
Unit-10	<p>Nursing management of patient with personality, sexual and eating disorders</p> <ul style="list-style-type: none"> • Classification of disorders • Etiology, psycho-pathology, clinical manifestations, diagnosis • Nursing assessment –history, physical, mental assessment • Treatment modalities and nursing management of patients with personality, sexual and eating disorders • Treatment modalities and nursing management 	4 hrs.
Unit-11	<p>Nursing management of childhood and adolescent disorders including mental deficiency</p> <ul style="list-style-type: none"> • Classification • Etiology, psycho-pathology, clinical manifestations, diagnosis • Nursing assessment – history, physical, mental assessment and IQ assessment • Treatment modalities and nursing management of childhood and adolescent disorders including mental 	6 hrs.

	deficiency <ul style="list-style-type: none"> • Follow-up and home care and rehabilitation 	
Unit-12	Nursing management of organic brain disorders <ul style="list-style-type: none"> • Classification ICD • Etiology, psycho-pathology, clinical manifestations, diagnosis and differential diagnosis(Parkinson's and Alzheimer's) • Nursing assessment-history, physical, mental assessment and neurological assessment • Treatment modalities and nursing management of organic brain disorders • Geriatric considerations • Follow-up and home care and rehabilitation 	5 hrs.
Unit-13	Psychiatric emergencies and crisis intervention <ul style="list-style-type: none"> • Types of psychiatric emergencies and their management • Stress adaptation mode: stress and stressors, coping, resources and mechanism • Grief: Theories of grieving, process, principles, technique of counseling • Crisis intervention; principles, techniques and process • Geriatric considerations and responsibilities of nurse 	6 hrs.
Unit-14	Legal issues in mental health nursing <ul style="list-style-type: none"> • The mental health Act 1987: Act, section, articles and their implications etc. • Indian lunacy act • Rights of mentally ill clients • Forensic psychiatry • Acts related to narcotic and psychotropic substance and illegal drug trafficking • Admission and discharge procedures Role and responsibilities of nurse	4 hrs.
Unit-15	Community mental health nursing <ul style="list-style-type: none"> • Development of community mental health services: • National mental health programme • Institutionalization versus deinstitutionalization • Model of preventive psychiatry: levels of prevention • Mental health services available at the primary, secondary, tertiary levels including rehabilitation and role of nurse • Mental health agencies: government and voluntary national and international • Mental health nursing issues for special population: children, adolescence, women, elderly, victims of violence and abuse, handicapped, HIV/AIDS etc 	

Mental Health Nursing

Practical

Placement: Third year

Fourth year

Time practical-270 hrs (9 weeks)

Internship- 95 hrs (2 weeks)

Areas	Skills	Duration (in weeks)
Psychiatric OPD	<ul style="list-style-type: none">• History taking• Perform mental status examination (MSE)• Assist in psychometric assessment• Perform neurological examination• Observe and assist in therapies• Teach patient and family members	1
Child Guidance Clinic	<ul style="list-style-type: none">• History taking• Assist in psychometric assessment• Observe and assist in various therapies• Teach family and significant others.	1
Inpatient ward	<ul style="list-style-type: none">• History taking• Perform mental status examination (MSE)• Perform neurological examination• Assist in psychometric assessment• Record therapeutic communication• Assist in Electro Convulsive therapy (ECT)• Participate in all therapies• Prepare patients for Activities of Daily Living (ADL)• Conduct admission and discharge counseling• Counsel and teach patient and families	6
Community psychiatry	<ul style="list-style-type: none">• Conduct case work• Identify individuals with mental health problems• Assist in mental health camps and clinics• Counsel and teach family members, patient and community	1
Internship		
Area	Skills	Duration
Psychiatry ward	Integrated practice	2 weeks

COMMUNICATION & EDUCATIONAL TECHNOLOGY

Placement: Third year

Time: Theory-90 hours

Course Description: This course is designed to help the students acquire an understanding of the principles and methods of communication and teaching it helps to develop skills in communicating effectively, maintaining effective interpersonal relations. Teaching individual and groups in clinical, community health and educational setting

UNIT	CONTENT	Time(Hrs)	Pr.(Hrs)
UNIT-1	Review of Communication process <ul style="list-style-type: none">• Process; elements and channel• Facilitators• Barriers and methods of overcoming• Techniques	5	
UNIT -II	Interpersonal relations <ul style="list-style-type: none">• Purposes & types• phases• Barriers an methods of overcoming• Johari Window	5	
UNIT- III	Human relations <ul style="list-style-type: none">• Understanding self• Social behaviour, motivation social attitudes• Individual and groups• Groups and individual• Human relation in context of nursing• Group dynamics• Team work	5	
UNIT- IV	Guidance and counseling <ul style="list-style-type: none">• Definition• Purposes, scope and need• Basic principles• Organization of counseling services• Types of counseling approaches• Role and preparation of counselor• Issues for counseling in nursing Students and parishioners• Counseling process-steps & techniques tools of counselor• Managing disciplinary problems• Management of crisis and referral	10	5
UNIT - V	Principles of education and teaching learning process	5	

	<ul style="list-style-type: none"> • Education meaning philosophy aims functions and principles • Nature and characteristics of learning • Principles and maxims of teaching • Formulating objectives general and specific • Lesson planning • Classroom management 		
UNIT- VI	<p>Methods of teaching</p> <ul style="list-style-type: none"> • Lectures Demonstration, seminar, symposium, panel discussion, role play, project, field trip, workshop, exhibition programmed instructions computer assisted learning micro teaching problems based learning self instructional Module and simulation etc • Clinical teaching methods - case method nursing round and report bedside clinic conference (individual and group) Process recording 	10	10
UNIT – VII	<p>Educational Media</p> <ul style="list-style-type: none"> • Purposes and types of AV Aids Principles and sources and etc • Graphic aids chalk board chart graph poster flash cards flannel graph bulletin board cartoon • Three dimensional aids, objects, specimens model puppets • Printed aids Pamphlet & leaflets • Projected aids slider overhead projector, Films TV. VCR, VCD, camera microscope, LCD • Audio aids : Tape recorder public address system, • Computer 	10	8
UNIT- VIII	<p>Assessment</p> <ul style="list-style-type: none"> • Purpose and scope of evaluation and assessment • Criteria for selection of assessments techniques and methods • Assessment of knowledge : Easy type question, short answer type question (SAQ), Multiple choice questions (MCQ) • Assessment of skills : observation Check list, Practical exam, Viva, objective structured clinical examination (OSCE) 	5	7

	<ul style="list-style-type: none"> • Assessment of attitudes , attitudes scale

Nursing Research and Statistics

Placement: Third Year

Time: Theory- 45 hrs

Practical -45 hrs

Course description: The course is designed to enable students to develop an understanding of basic concept of research process and statistics. It is further structured to conduct participate in needs based research studies in various setting and utilize the research findings to provide quality nursing care The burs foe practical will be utilized for conducting individual/ group research project

Unit	Content	Time (hrs)
	Research and research Process	
I	Research and research Process <ul style="list-style-type: none">• Introduction and need for nursing research• Definition of Research and nursing research• Steps of scientific method• Characteristics of good research• Steps of Research process- overview	4
II	Research Problem/Question <ul style="list-style-type: none">• Identification of problem area• Problem statement• Criteria of a good research Problem• Writing objectives	3
III	Review of literature <ul style="list-style-type: none">• Location• Sources• On line search: CINHALL, COCHRANE etc.• Purposes• Methods of review	3
IV	Research approaches and designs <ul style="list-style-type: none">• Historical, survey and experimental• Qualitative and quantitative designs•	4
V	Sampling and data collection <ul style="list-style-type: none">• Definition of populating sample• Sampling criteria, factors influencing sampling technique• Data why what from whom when and where to collect• Data collection methods and instruments<ul style="list-style-type: none">□ Methods of collection□ Questioning interviewing□ Observation record and analysis and measurements□ Types of instruments□ Validates and reliability of the instruments□ Pilot study□ Data collection procedureAnalysis of data <p>* Compilation, tabulation, Classification, Summarization,</p>	8

VI	Presentation, interpretation of data	4
VII	Introduction to statistics <ul style="list-style-type: none"> • Definition, use of statistics, scales of measurement • Frequency distribution and graphical presentation of data • Mean, Median, Mode, Standard Deviation • Normal probability and tests of significance • Co-efficient of correlation • Statistical packages and its application 	15
VIII	Communication and utilization of Research <ul style="list-style-type: none"> • Communication of research finding <ul style="list-style-type: none"> <input type="checkbox"/> Verbal report <input type="checkbox"/> Writing research report <input type="checkbox"/> Writing scientific article/paper <ul style="list-style-type: none"> - Critical review of published research - Utilization of research finding 	4

B.Sc. Nursing Fourth Year

MIDWIFERY AND OBSTETRICAL NURSING

Placement: Fourth Year

**Theory- 90 hrs.
Practical- 360 hrs.**

Course Description: This course is designed for students to the concepts and principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skills in rendering nursing care to normal and high risk pregnant woman during antenatal, natal and postnatal periods in hospital and community setting it also helps to develop skills in managing normal and high risk neonates and participate in family welfare programme

UNIT	CONTENT	HOURS
UNIT-1	Introduction to midwifery and obstetrical nursing <ul style="list-style-type: none">• Introduction to concept of midwifery and obstetrical nursing• Trends in midwifery and obstetrical nursing<ul style="list-style-type: none"><input type="checkbox"/> Historical perspective and current trends<input type="checkbox"/> Legal and ethical aspects<input type="checkbox"/> Pre-conception care and preparing for parenthood<input type="checkbox"/> Role of nurse in midwifery and obstetrical care<input type="checkbox"/> National policy and legislation in relation to material health and welfare<input type="checkbox"/> Maternal morbidity, mortality and fertility rates<input type="checkbox"/> Prenatal morbidity, mortality rates	3 hrs.
UNIT-2	Review of anatomy and physiology of female reproductive system and fetal development <ul style="list-style-type: none">• Female pelvis- general description of the bones joints, ligaments, planes of the pelvis diameters of the true pelvis important landmarks, variations in pelvic shapes• Female organs of reproduction – external genetlia, internal genital organs and their anatomical relation, musculature blood supply, nerves, lymphatic, pelvic cellular tissue, pelvic peritoneum• Physiology of menstrual cycle• Human sexuality• Fetal development<ul style="list-style-type: none"><input type="checkbox"/> Conception<input type="checkbox"/> Review of fertilization, implantation, development of the embryo and placement at term- functions, abnormalities, the fetal sac, amniotic fluid the umbilical chord<input type="checkbox"/> Fetal circulation, fetal skull, bones, sutures and measurements * Review of genetics	8 hrs.

<p>UNIT-3</p>	<p>Assessment and management of pregnancy (ante-natal)</p> <ul style="list-style-type: none"> • Normal pregnancy • Physiological changes during pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Reproductive system <input type="checkbox"/> Cardiovascular system <input type="checkbox"/> Respiratory system <input type="checkbox"/> Urinary system <input type="checkbox"/> Gastro intestinal system <input type="checkbox"/> Metabolic change <input type="checkbox"/> Skeletal change <input type="checkbox"/> Skin changes <input type="checkbox"/> Endocrine system <input type="checkbox"/> Psychological changes <input type="checkbox"/> Discomfort of pregnancy • Diagnosis of pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Signs <input type="checkbox"/> Differential diagnosis <input type="checkbox"/> Confirmatory tests • Ante natal care <ul style="list-style-type: none"> <input type="checkbox"/> Objectives <input type="checkbox"/> Assessment <ul style="list-style-type: none"> - History and physical examination - Antenatal examination - Signs of previous child birth <ul style="list-style-type: none"> <input type="checkbox"/> Relationship of fetus to uterus and pelvis lie attitude presentation. Position <input type="checkbox"/> per vaginal examination • Screening and assessment for high risk • Risk approach • History and physical examination • Modalities of diagnosis Invasive and non invasive ultrasonic cardio tomography, NST, CST • Antenatal preparation <ul style="list-style-type: none"> <input type="checkbox"/> Antenatal counseling <input type="checkbox"/> Antenatal exercises <input type="checkbox"/> Diet <input type="checkbox"/> Substance use <input type="checkbox"/> Education for childbirth <input type="checkbox"/> Husband and Families <input type="checkbox"/> Preparation for self confinement <input type="checkbox"/> Prevention from radiation • Psycho-social and cultural aspects <ul style="list-style-type: none"> <input type="checkbox"/> Adjustment to pregnancy <input type="checkbox"/> Unwed mother <input type="checkbox"/> Single parent 	<p>8 hrs.</p>
----------------------	---	----------------------

	<ul style="list-style-type: none"> <input type="checkbox"/> Teenage pregnancy <input type="checkbox"/> Sexual violence • Adoption 	
UNIT-4	<p>Assessment and management of intranatal period</p> <ul style="list-style-type: none"> • Physiology of labour • Management of labour • First stage <ul style="list-style-type: none"> <input type="checkbox"/> Signs and symptoms of onset of labour normal and abnormal <input type="checkbox"/> Duration <input type="checkbox"/> Preparation of <ul style="list-style-type: none"> # Labour room # Woman <input type="checkbox"/> Assessment and observation of woman in labour: Partogram- maternal and fetal monitoring <input type="checkbox"/> Active management of labour, induction of labour <input type="checkbox"/> Pain relief and comfort in labour • Second stage <ul style="list-style-type: none"> <input type="checkbox"/> Sign and symptoms: normal and abnormal <input type="checkbox"/> Duration <input type="checkbox"/> Conduct of delivery: principles and technique <input type="checkbox"/> Episiotomies (Only if required) <input type="checkbox"/> Receiving the new born <ul style="list-style-type: none"> - Neonatal resuscitation; initial steps and subsequent resuscitation - Care of umbilical cord - Immediate assessment including screening for congenital anomalies <ul style="list-style-type: none"> - Identification - Bonding - Initiate feeding - Screening and transportation of the neonate * Third stage <ul style="list-style-type: none"> <input type="checkbox"/> Sign and symptoms: normal and abnormal <input type="checkbox"/> Duration <input type="checkbox"/> Method of placenta expulsion <input type="checkbox"/> Management : principles and technique <input type="checkbox"/> Examination of the placenta <input type="checkbox"/> Examination of perineum • Maintaining records and reports • Fourth stage 	12 hrs

UNIT-5	Assessment and management of women during post natal period <ul style="list-style-type: none"> • Normal puerperium: physiology duration • Postnatal assessment and management <ul style="list-style-type: none"> <input type="checkbox"/> Promoting physical and emotional well being <input type="checkbox"/> Lactation management <input type="checkbox"/> Immunization • Family dynamics after child • Family welfare services, methods, counseling • Follow-up • Records and reports 	5 hrs.
UNIT-6	Assessment and management of normal neonates <ul style="list-style-type: none"> • Normal neonate: <ul style="list-style-type: none"> <input type="checkbox"/> Physiological adaptation <input type="checkbox"/> Initial and daily assessment <input type="checkbox"/> Essential newborn care, thermal control <input type="checkbox"/> Breast feeding prevention of infections • Immunization • Minor disorders of newborn and its management • Levels of neonatal care (level II, &III) • At primary, secondary and tertiary levels • Maintenance of reports and records 	6 hrs.
UNIT-7	High risk pregnancy – assessment and management <ul style="list-style-type: none"> • Screening and assessment <ul style="list-style-type: none"> <input type="checkbox"/> Ultrasonic cardio tomography , NST CST, non invasive and invasive <input type="checkbox"/> Newer modalities of diagnosis • High risk approach • Levels of care primary secondary and tertiary levels • Disorders of pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Hyper-emesis, gravidarum bleeding in early pregnancy, abortion , ectopic <input type="checkbox"/> Pregnancy vesicular mole <input type="checkbox"/> Ante-partum hemorrhage • Uterine abnormality and displacement • Disease complicating pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Medical and surgical conditions <input type="checkbox"/> Infection, RTI(STD) UTI, HIV, TORCH <input type="checkbox"/> Gynecological diseases complicating pregnancy <input type="checkbox"/> Pregnancy induced hypertension and diabetes , toxemia of pregnancy hydramnios <input type="checkbox"/> Rh incompatibility <input type="checkbox"/> Mental pregnancy <input type="checkbox"/> Abnormalities of placenta and cord <input type="checkbox"/> Intra-uterine growth – retardation <input type="checkbox"/> Nursing management of mothers with high risk pregnancy <input type="checkbox"/> Maintenance of records and reports 	10hrs

UNIT-8	<p>Abnormal labour- assessment and management</p> <ul style="list-style-type: none"> • Disorders in labour <ul style="list-style-type: none"> <input type="checkbox"/> CPD and contracted pelvis <input type="checkbox"/> Malposition and Malpresentations <input type="checkbox"/> Premature labour, disorders of uterine action, precipitate labour, prolonged labor <input type="checkbox"/> complication of third stage Injuries to birth canal • Obstetrical emergencies and their management <ul style="list-style-type: none"> <input type="checkbox"/> Presentation and prolapse of cord, vasa praveia amniotic fluid emblems rupture of uterus shoulder dystocia obstetrical shock • Obstetrical procedures and operation <ul style="list-style-type: none"> <input type="checkbox"/> Introduction of labour, forceps vacuum version manual removal of placenta. Caesar ear. Section. destructive operation <p>* Nursing management of women undergoing obstetrical operation and procedures</p>	10 hrs.
UNIT- 9	<p>Abnormalities during postnatal period</p> <ul style="list-style-type: none"> • Assessment and management of woman with postnatal complications <ul style="list-style-type: none"> <input type="checkbox"/> Puerperal infection breast engorgement and infections and infection, UTI, thrombo-embolic disorders, post partum hamburger, eclampsia and subinvolution <input type="checkbox"/> Psychological complications : <ul style="list-style-type: none"> - Post partum blues - Post partum depression - Post partum psychosis 	4hrs
UNIT- 10	<p>Assissetment and management of High risk newborn</p> <ul style="list-style-type: none"> • Admission of neonates in the neonatal intensive care units protocols • Nursing management of : <ul style="list-style-type: none"> <input type="checkbox"/> Low birth weight babies <input type="checkbox"/> Infection <input type="checkbox"/> Respiratory problems <input type="checkbox"/> Hemolytic disorders <input type="checkbox"/> Birth injuries <input type="checkbox"/> Malformation • Monitoring of high risk neonates • Feeding of high risk neonates • Organization and management of neonatal intensive care units • Infection control in neonatal intensive care units • Maintenance of reports and records 	10hrs
UNIT – 11	<p>Pharamaco- therapeutics in obstetrics</p> <ul style="list-style-type: none"> • Indication, dosage, action contraindication and side effects of drugs 	4 hrs

	<ul style="list-style-type: none"> • effect of drugs on pregnancy labour and puerperium • Nursing responsibilities in the admission of drugs in obstetric-oxytocin, anti-hypertensives, diuretics, laccolitic agents, anticonvulsants: • Analgesics and anesthesia in obstetrics • Effect of maternal medication on fetus on fetus and neonate 	
UNIT-12	<p>Family welfare programme</p> <ul style="list-style-type: none"> • Population trends and problems in India • Concept, aims importance and history of family welfare programme • National population dynamics policy and education • National family welfare programme RCH. ICDS. MCH. Safe motherhood • Organization and administration national state district block and village levels • A method of contrception's spacing. temporay and permanent, emergency contraception • Infertility and its management • Counseling for family welfare • Latest research in contraception • Maintenance of vital statistics • Role of nurse in Family welfare programme • Train supervision collaboration with other functionaries in community like ANMs, LHVs, Anganwadi workers TBA (Traditional birth Attendant Dai) 	10hrs

**Midwifery and obstetrical
Nursing- Practical**

**Placement: Fourth year
(Third year)**

Time Practical-180 hrs

Internship-240

Area	Skills	Duration (in weeks)
Antenatal clinical/OPD	<ul style="list-style-type: none">* Antenatal history taking* Physical examination* Recording of weight and BP* Hb and urine testing for sugar and albumin* Antenatal examination-abdomen and breast* Immunization* Assessment of risk status* Teaching antenatal mother.* Maintenance of Antenatal records	2

First Year B.Sc. NURSING

NURSING FOUNDATION

Placement: First Year

**Theory-265hrs
Practical- 650hrs
(200lab and 450 clinical)**

Course Description: This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical setting. It is aimed at helping the students to acquire knowledge understanding and skill in techniques of nursing and practice them in supervised clinical setting

UNIT	CONTENT	HOURS
UNIT-1	Introduction <ul style="list-style-type: none"> * Concept of health: Health – Illness continuum * Factors influencing health * Causes and risk factors for developing illness * Body defenses : Immunity and immunization * Illness & illness behavior * Impact of illness on patient and family * Health care services: health promotion and prevention primary care, diagnosis, treatment, rehabilitation and continuing care. * Health care team * Types of health care agencies * Hospitals; Types, organization and functions * Health promotion and level of disease prevention * Primary health care and its delivery: Role of nurse. 	10 hrs.
UNIT-2	Nursing as a profession <ul style="list-style-type: none"> * Definition and characteristics of a profession * Nursing <ul style="list-style-type: none"> - Definition, concepts, philosophy, objectives. - Characteristics, nature and scope of nursing practice - Function of nurse - Qualities of nurse - Categories of nursing personnel - Nursing as a profession - History of nursing in India * Values : Definition, types, values clarification and values professional nursing: caring and advocacy * Ethics : <ul style="list-style-type: none"> - Definition and ethical principles - Code of ethics and professional conduct for nurse. 	16 hrs.
Unit -3	Hospital admission and discharge	4 hrs.

	<ul style="list-style-type: none"> * Admission to the hospital <ul style="list-style-type: none"> - Unit and its preparation admission bed - Admission procedure - Special considerations - Medico-legal issues - Roles and responsibilities of the nurse * Discharge from the hospital <ul style="list-style-type: none"> - Types: Planned discharge, LAMMA and abscond, referral And transfers - Discharge planning - Discharge procedure - Special consideration - Medico- legal issues - Roles and responsibilities of the nurse - Care of the unit after discharge 	
Unit -4	<p>Communication and the nurse patient relationship</p> <ul style="list-style-type: none"> * Communication: Levels, elements, types, modes, process, factors influencing communication. <ul style="list-style-type: none"> - Methods of effective communication <ul style="list-style-type: none"> # Attending skills # Rapport building skills # Empathy skill - Barriers to effective communication * Helping relationship (NPR): dimensions of helping relationships, phases of a helping relationship * Communicating effectively with patient, families and team members and maintain effective human relation with special reference to communicating with vulnerable group (children, woman, physically and mentally challenged and elderly) * Patient teaching: Importance purpose, process, role of nurse and integrating teaching in nursing process. 	10 hrs
Unit -5	<p>The Nursing process</p> <ul style="list-style-type: none"> * Critical thinking and nursing judgment <ul style="list-style-type: none"> - Critical thinking: Thinking and learning - Competencies, attitude for critical thinking, levels critical thinking in nursing * Nursing process overview: <ul style="list-style-type: none"> Application in practice <ul style="list-style-type: none"> - Nursing process format: INC, current format - Assessment <ul style="list-style-type: none"> # Collection of data: types, sources, methods - Nursing Diagnosis <ul style="list-style-type: none"> # Identification of client problems # Nursing diagnosis statement # Difference between medical and nursing diagnosis - Planning - Establishing goals and expected outcomes - Selection of intervention: Protocols and standing orders - Writing the nursing care plan 	15 hrs

	<ul style="list-style-type: none"> * Implementation <ul style="list-style-type: none"> - Implementing the plan of care * Evaluation <ul style="list-style-type: none"> - Outcome of care - Review and modify * Documentation and reporting 	
Unit -6	<p>Documentation and reporting</p> <ul style="list-style-type: none"> * Documentation: purpose of recording and reporting * Communication within the health care team * Types of record: ward records, medical/nursing records * Common record-keeping forms, computerized documentation * Guidelines for reporting :Factual basis, accuracy , completeness, current ness, organization, confidentiality * Methods of recording. * Reporting change –of shift reports: transfer reports, incident reports * Minimizing legal liability through effective record keeping 	4hrs
Unit -7	<p>Vital sign</p> <ul style="list-style-type: none"> * Guidelines for taking signs: * Body temperature <ul style="list-style-type: none"> - Physiology, regulation .Factor affecting body Temperature. - Assessment of body temperature: sites, equipments and technique special considerations - Temperature alterations: Hyperthermia, heat stroke, hypothermia - Hot and cold applications * Pulse <ul style="list-style-type: none"> - Physiology and regulation, characteristics of the pulse, factors affecting pulse - Assessment of pulse: sites, location, equipment and technique, Special consideration - Alteration in pulse * Respiration <ul style="list-style-type: none"> - Physiology and regulation, mechanics of breathing Characteristics of the respiration, factors affecting respiration - Assessment of pulse: site, location, equipments and technique, special consideration - Alteration in pulse. * Respiration: <ul style="list-style-type: none"> - Physiology and regulation, mechanics of breathing, characteristics, Factors affecting respiration - Assessment of respiration: technique, special consideration - Alteration in respiration * Blood pressure <ul style="list-style-type: none"> - Physiology and regulation, characteristics of blood pressure, Factors affecting blood pressure. 	15hrs

	<ul style="list-style-type: none"> - Assessment of blood pressure: equipments, technique, special consideration. - Alteration in blood pressure <p>* Reading of vital signs</p>	
UNIT 8	<p>Health assessment</p> <ul style="list-style-type: none"> # Purpose # Process of health assessment <ul style="list-style-type: none"> - Health history - Physical examination # Methods- inspection., palpation, percussion, auscultation olfaction # Preparation of examination; patient and unit # General assessment # Assessment of each body system # Recording of health assessment 	30 hrs
UNIT 9	<p>Machinery equipment and Linen</p> <ul style="list-style-type: none"> - Type Disposable and reusable – linen, rubber gods, glass ware, mental, plastics, furniture machinery <p>Introduction</p> <ul style="list-style-type: none"> - Indent - Maintenance - Inventory 	5hrs

UNIT 10	<p>Meeting needs of patient</p> <p>* Basic needs (Activity of daily living)</p> <ul style="list-style-type: none"> - Providing safe and clean environment - Physical- environment, temperature humidity, noise, ventilation, light, odors, pests control, reduction of physical hazards: Fire accidents - Safety devices restraints, side rails, airways, trapeze etc. - Role of nurse in providing safe and clean environment <p>* Hygiene - Factors influencing hygiene practices</p> <ul style="list-style-type: none"> - Hygienic care: care of the skin – bath and pressure points, feet and nail, oral cavity, hair care, eyes, ear and nose - Assessment, principles, types, equipments procedure, special considerations - Patient environment : Room equipment and linen, making patient beds - Types of beds and bed making - Comport:- - Factors influencing comport - Comport devices <p>* Physiological needs;</p> <p># Sleep & rest</p> <ul style="list-style-type: none"> - Physiology of sleep - Factors affecting Sleep - Promoting rest & sleep - Sleep disorders <p># Nutrition</p> <ul style="list-style-type: none"> - Importance - Factors affecting nutritional needs - Assessments of nutritional needs variables - meeting nutritional needs principles, equipments, procedure and special considerations <p>* Oral</p> <p>* Central : Naso/ orgastric, gastrostomy</p> <p>* Parental</p> <p>* Urinary elimination</p> <ul style="list-style-type: none"> - Review of physiology of urine elimination, composition and characteristics of urine - Factor influencing urination - Alteration in urinary elimination - Types & collection of urine specimen: observation, urine testing - Facilitating urine elimination : assessment, types, 	60hrs
---------	---	-------

equipments, procedure and special considerations

- # Providing urinal & bed pan
- # Condom drainage
- # Perineal care
- # Catheterization
- # Care of urinary drainage
- # Care of urinary diversion
- # Bladder irrigation

*** Bowel elimination**

- Review of physiology of bowel elimination.

Composition and characteristics of faeces.

- Factor influencing bowel elimination
Alteration in bowel elimination

- Types & collection of faeces specimen: observation
- Facilitating bowel elimination: assessment,

equipment, procedures and special considerations

- # Passing of flatus tube
- # Enemas
- # Suppositories
- # Sitz bath
- # Bowel wash
- # Care of ostomies

*** Mobility and immobility**

- Principles of body mechanics
- Maintenance of normal body alignment and

mobility

- Factors affecting body alignment and mobility
- Hazards associated with immobility
- Alteration in body alignment and mobility
- Nursing intervention for impaired body alignment

and mobility: assessment, types, devices used, method and special consideration, rehabilitation aspects

- # Range of motion exercises
- # Maintaining body alignment: positions
- # Moving
- # Lifting
- # Transferring
- # Walking
- # Restraints

*** Oxygenation**

- Review of cardiovascular and respiratory physiology
- Factors affecting oxygenation
- Alteration in oxygenation
- Nursing intervention in oxygenation: assessment,

types, equipments used, procedure and special consideration

- # Maintenance of patient airway
- # Oxygen administration
- # Suction
- # Inhalation: dry & moist
- # Chest physiotherapy and postural drainage
- # Pulse oxymetry
- # CPR- Basic life support

* Fluid, electrolyte and acid-base balance

UNIT-11	<p>Infection control and clinical settings</p> <ul style="list-style-type: none"> * Infection control <ul style="list-style-type: none"> - Nature of infection - Chain of infection transmission - Defenses against infection: natural and acquired - Hospital acquired infection - Concept of asepsis: medical asepsis and surgical asepsis - Isolation precaution (barrier nursing) <ul style="list-style-type: none"> # Hand washing: simple, hand antisepsis and surgical antisepsis (scrub) # Isolation: source and protective # Personal protective equipments: types, uses and technique of wearing and removing # Decontamination of equipments and unit # Transportation of infected patients # Transmission based precautions * Biomedical waste management <ul style="list-style-type: none"> - Importance - Types of hospital waste - Hazards associated with hospital waste - Decontamination of hospital waste - Segregation and transportation and disposal 	20 hrs
UNIT-12	<p>Administration of Medication</p> <ul style="list-style-type: none"> * General principles/ considerations <ul style="list-style-type: none"> - Purpose of medications - Principles : 5 rights, special considerations, prescriptions, safety in administering medication and medication errors - Drug forms - Route of administration - Storage & maintenance of drug and nurses responsibility - Broad classification of drugs - Therapeutic effect, side effects, toxic effects, idiosyncratic reaction, allergic reaction, drug tolerance, drug interaction - Factors influencing drug action - Systems of drug measurements: metric system, apothecary system, households measurement, solution <ul style="list-style-type: none"> - Converting measurements units: Conversion within one system, conversion between system, dosage calculation - Terminologies and abbreviation used in prescription and medications. * Parenteral <ul style="list-style-type: none"> - General principles: decontamination of disposable syringes and needles - Types of parenteral therapies - Types of syringes, needles, canula and infusion sets - Protection from needles stick injuries: giving medication with the safety syringes 	40 hrs.

	<ul style="list-style-type: none"> - Routes of parenteral therapies # Intradermal: purpose, site, equipments, procedures, special consideration # Subcutaneous: purpose, site, equipments, procedure, special consideration # Intramuscular: purpose, site, equipments, procedure, special consideration # Intravenous: purpose, site, equipments, procedure, special consideration # Advanced techniques: epidural, intrathecal, intraosseous, intraperitoneal, intrapleural, intra arterial- role of nurse * Topical administration: purpose, site, equipments, procedure, special consideration <ul style="list-style-type: none"> - Application to skin - Application to mucus membrane # Direct application of liquids-Gargle and swabbing the throat # Insertion of drug into body cavity: Suppository/ medicated packing in rectum/ vagina # Instillation: Ear, eye, nasal, bladder and rectal # Irrigation : Ear, eye, bladder, vaginal and rectal # Spraying: Nose and throat * Inhalation: Nasal, oral, end tracheal / tracheal (steam, oxygen and medication) Purposes, types, equipments, procedure, special considerations <ul style="list-style-type: none"> - Recording and reporting of medication administered. 	
UNIT-13	<p>Meeting needs of pre-operative patients</p> <ul style="list-style-type: none"> * Definition and concept of pre operative nursing * Pre-operative phase <ul style="list-style-type: none"> - Preparation of patient for surgery * Intra operative <ul style="list-style-type: none"> - Operative theatre set up and environment - Role of nurse * Post operative phase <ul style="list-style-type: none"> - Recovery unit - Post operative room - Post operative care * Wounds: types, classification, wound healing process, factors affecting wound, complication of wound healing * Surgical asepsis * Care of wound ; types, equipments, procedure and special considerations <ul style="list-style-type: none"> - Dressing, suture care - Care of drainage - Application of bandages, binders, splints and slings - Heat and cold therapy 	10 hrs.
UNIT-14	<p>Meeting special needs of the patient</p> <ul style="list-style-type: none"> * Care of patient having alteration in <ul style="list-style-type: none"> - Temperature (hyper & hypothermia): Types, assessment, management 	15 hrs.

	<ul style="list-style-type: none"> - Sensorium (Unconsciousness); Assessment and management - Urinary elimination (retention & incontinence); Assessment and management - Functioning of sensory organs(visual & hearing impairment); Assessment and management - Communication method and special considerations - Mobility (physically challenged, cast); Assessment and management - Mental state (mentally challenged); Assessment and management - Communication methods and special considerations - Respiration (distress); Types, assessment, management - Comfort-(pain) nature, types, Factors influencing pain, coping , assessment& management * Treatment related to gastrointestinal system; naso-gastric suction, gastric irrigation, gastric analysis. 	
UNIT- 15	<p>Care of terminally ill patient</p> <ul style="list-style-type: none"> • Concepts of loss, grief, grieving process • Signs of clinical death • Care of dying patient, special considerations Advanced directives; euthanasia, will, dying declaration, organ donation etc. • Medic-legal issue • care of dead body • Equipment., procedure and care of unit • Autopsy • Embalming 	5hrs
UNIT- 16	<p>Professional nursing concepts and practices</p> <ul style="list-style-type: none"> • Conceptual and theoretical models of nursing practice introduction to models – holistic model, health belief Model, health promotion model etc. • Introduction to theories in nursing: peplum’s Henderson’s Orem. S Newman’s Roger’s and Roy’s • Linking theories with nursing process 	6hrs

Nursing Foundation practical

Placement: - First Year

Practical- 650hrs

(200 and 450 Clinical):

Course Description: This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various supervised clinical setting. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in supervised clinical settings

UNIT	CONTENT	HOURS
UNIT -1	<p>Hospital admission and discharge (III)</p> <ul style="list-style-type: none"> • Admission • Prepare unit for new patient • Prepare admission procedure <ul style="list-style-type: none"> New patient Transfer in • Prepare patient record <p>Discharge/Transfer out</p> <ul style="list-style-type: none"> • Gives discharge counseling • Perform discharge procedure (planned discharge, LAMMA and abscond, referrals and transfers) • Prepare records of discharge/transfer • Dismantle, and disinfect unit and equipment after discharge/transfer <p>Perform assessment</p> <ul style="list-style-type: none"> • History taking, nursing diagnosis, problem list, Prioritization goals & outcomes, selection of interventions • Write nursing care plan • Gives care as per the plan <p>Communication</p> <ul style="list-style-type: none"> • Use verbal and nonverbal communication techniques Prepare a plan for patient teaching session <p>Write patient report</p> <ul style="list-style-type: none"> • change of shift reports, transfer reports , incident report etc • Presents patient report <p>Vital sign</p> <ul style="list-style-type: none"> • Measure, record and interpret alteration in body temperature pulse respiration and blood pressure <p>Health assessment</p> <ul style="list-style-type: none"> • Health history taking 	<p>200 450 Minimum practice time clinical area</p>

MEDICAL SURGICAL NURSING

(Adult including geriatrics)- I

Practical

Placement: Second Year

times: 720 hours

AREA	SKILLS	DURATON (in Weeks)
General Medical Ward (Respiratory, Endocrine, Renal, Hematology)	<ul style="list-style-type: none"> • Assessment of the patient <ul style="list-style-type: none"> - Taking history - Perform general and specific Examination - Identify alteration and deviations • Practice Medical Surgical asepsis Standard safety Measures • Administer medications <ul style="list-style-type: none"> - Oral, IV M Subcutaneous • IV Therapy <ul style="list-style-type: none"> - IV Canulation - Maintenance and Monitoring • Oxygen therapy by different Methods • Mobilization • Chest Physiotherapy • Naso gastric Feeding • Assist in common diagnostic • Perform/Assist in therapeutic procedures • Blood and c component therapy • Throat suctioning • Collect specimen for common investigations • Maintain elimination <ul style="list-style-type: none"> - Catheterization - Bowel wash - Enema - Urinary drainage • Maintain intake output and documentation • Counsel land teach related to specific disease conditions 	6

General Surgical Ward (GI Urinary, CTVS)	<ul style="list-style-type: none"> • practice medical surgical asepsis • Standard safety Measures • Pre- operative preparation of the patients • Post operative care <ul style="list-style-type: none"> - Receiving patient , assessment - Monitoring care 	6
---	---	---

	<ul style="list-style-type: none"> • Care of wounds and drainage • Sutures removal • Ambulating and exerciser • Naso gastric aspiration • Care of chest drainage • Ostomy care <ul style="list-style-type: none"> - Gastrostomy - Colostomy - Entrostomy • Blood component and therapy • Practice Universal precaution 	
Cardiology Ward	<ul style="list-style-type: none"> • Physical examination of the cardio vascular system recoding and interpreting ECG • Monitoring of patient • Preparation and assisting in non- invasive and invasive diagnostic procedures • Administer cardiac drugs • Cardio pulmonary resuscitation • Teach patient and families • Practice medical and surgical asepsis standard safety measures 	2
Skin and Communicable disease ward	<ul style="list-style-type: none"> • Assessment of patient with skin disorders • Assist in diagnostic and therapeutic procedures • Administer topical medication • Practice medical and surgical asepsis standard safety measures • Use of personal protective equipment (PPE) • Give medicated baths • Counseling HIV positive patient • Teach prevention of infection disease 	1
Orthopedic Ward	<ul style="list-style-type: none"> • Assessment of orthopedic patient • Assist in application of plaster cast and removal of cast • Apply skin traction, buck's traction • Assist in application and removal of prosthesis • Physiotherapy and range of motion exercises (ROM) muscle strengthening exercises • Crutch maneuvering technique • Activities of daily living • Ambulance • Teach and counsel patients and families 	2
Operation theatre	<ul style="list-style-type: none"> • Scrubbing, gowing, gloving • Identify instruments • Suturing • Material for common operations • Disinfection, carbolization, Fumigation • Preparation of instrument sets for common operations • Sterilization of sharp and other instruments 	6

- Prepare OT table depending upon the operation
- Positioning and monitoring of the patient
- Endotracheal intubation
- Assisting in minor and major operations
- Handling specimens
- Disposal of waste as per guidelines.

INTRENSHIP

TIME: 260 hrs. (9WEEKS)

ICU, CCU, CARDIAC. O T	<ul style="list-style-type: none"> • Assist in arterial Puncture for blood gas analysis • Perform ECG and interpret accordingly • Conduct and analysis Pulse toiletry • care with artificial airway • Assist in en tracheal incubation • Setting up ventilators • Drugs Sheet • Observation of special procedure in OT 	2
Neuro, ICU,ITU,OT	<ul style="list-style-type: none"> • Assess neurological status • Implement care to head injury spinal injury • Drug sheet • Pre and post operative care with neureo surgery patients 	2
Burns and plastic reconstructive surgery	<ul style="list-style-type: none"> • Nursing care 	2
OT, Laparoscopic Orthopedic, Eye, ENT		3

COMMUNITY HEALTH NUSING –I

Placement: Second Year

Theory- 90hrs

Practical – 135 hours

Course: description: This course is designed for students to appreciate principles of promotion and maintenance of health

UNIT	CONTENT	HOURS
UNIT- 1	Introduction <ul style="list-style-type: none">• Community health nursing• Definition, concept and dimensions of health• Promotion of health• Maintenance of health	2hrs
UNIT -2	Determinations of health <ul style="list-style-type: none">• Eugenic• Environment<ul style="list-style-type: none">- physical air, light ventilation, water, housing sanitation, disposal of waste, disposal of dead bodies forestation noise climate , communication infrastructure facilities and linkage- Acts regulating the environment: National pollution control board- Bacterial and viral agents, host carriers and	20hrs

	<p>immunity arthropods and rodents</p> <ul style="list-style-type: none"> • food hygiene : Production, preservation, purchase, preparation, consumption • act Regulation food hygiene- prevention and food adulteration act, drug and cosmetic act • Socio-cultural <ul style="list-style-type: none"> - customs - Marriage system - Family structure - Status of special group females,. children elderly, challenged groups and sick persons • Life style • Hygiene • Physical activity <ul style="list-style-type: none"> - Recreation and sleep - Sexual life - Spiritual life philosophy - Self reliance - Dietary pattern - Education - Occupation • Financial management <ul style="list-style-type: none"> - Income - Budget - Purchasing power - Security 	
UNIT-3	<p>Epidemiology</p> <ul style="list-style-type: none"> • Definition: concept, aims, scope, uses and terminology used in epidemiology • Dynamics of disease transmission: epidemiological triad • Morbidity and mortality: measurements • Level of prevention • Methods of epidemiology <ul style="list-style-type: none"> - Descriptive - Analytical: Epidemic investigation - Experimental 	10 hrs.
UNIT-4	<p>Epidemiology and nursing management of common communicable disease</p> <ul style="list-style-type: none"> • Respiratory infection <ul style="list-style-type: none"> - Small pox - Chicken pox - Measles - Influenza - Rubella - ARI's and pneumonia - Mumps - Diphtheria - Mumps 	25 hrs.

- Diphtheria
- Whooping cough
- Meningococcal meningitis
- Tuberculosis
- SARS
- Intestinal infection
 - Poliomyelitis
 - Viral Hepatitis
 - Cholera
 - Diarrhoeal disease
 - Typhoid fever
 - Food poisoning
 - Amoebiasis
 - Hook worm infection
 - Ascariasis
 - Dracunculiasis
- Arthropods infection
 - Dengue
 - Malaria
 - Filariasis
- Zoonoses
- Viral
 - Rabies
 - Yellow fever
 - Japanese encephalitis
 - Kyasnur forest disease
- Bacterial
 - Brucellosis
 - Plague
 - Human relationship
 - Anthrax
 - Leptospirosis
- Rickettsial disease
 - Rickettsial zoo noses
 - Scrub typhus
 - Tick typhus
 - Q fever
- Parastic Zoonoses
 - Taeniasis
 - Hydatid disease
 - Lsieshmaniasis
- Surface infection
 - Trachoma
 - Tetanus
 - Leprosy
 - STD & RTI
 - Yaws
 - HIV/AIDS
- Any other

UNIT-5	<p>Epidemiology and nursing management of non communicable disease</p> <ul style="list-style-type: none"> • Malnutrition: under nutrition, over nutrition, nutritional deficiencies • Anemia • Hypertension • Stroke • Rheumatic: heart disease • Coronary heart disease • Cancer • Diabetes mellitus • Blindness • Accidents • Mental illness • Obesity • Iodine deficiency • Fluorosis • Epilepsy 	10 hrs.
UNIT-6	<p>Demography</p> <ul style="list-style-type: none"> • Definition concept and scope • Method of collection analysis and interpretation of demographic data • Demographic rates and ratio 	6hrs
Unit -7	<p>Population and its control</p> <ul style="list-style-type: none"> • Population explosion and its impact on social, economic development of individual society and country • Population control: <ul style="list-style-type: none"> - Overall development : Women empowerment, social economic and educational devolvement - Limiting family size - Promotion of small family norm - Methods spacing (natural, biological chemical mechanical methods etc) - Terminal surgical methods - Emergency contraception 	17hrs

COMMUNITY HEALTH NURSING –I PRACTICAL

Placement: second Year

Practical 135 hours

AREAS	SKILLS	DURATION (in weeks)
Community Health nursing	<ul style="list-style-type: none">• Use techniques of interpersonal relation• Identification of health determinants of community• History taking• Physical examination• Collect specimens- sputum, malaria smear• Perform simple lab test at center blood for hemoglobin and sugar Urine for albumin and sugar• Administer vaccines and medications to adults• Counsel and teach individual family land community<ul style="list-style-type: none">- Nutrition- Hygiene- Self- health monitoring- Seeking health services- Healthy life style- Family welfare methods- Health promotion	2 weeks urban and 2 weeks rural

B.SC.
NURSING
THIRD YEAR

Placement: third Year

**Theory – 12 hrs
Practical – 270 hours**

Course description: the purpose of this course is to acquire knowledge and develop proficiency in caring for patient with medical surgical disorders in various health care settings and at home

UNIT	CONTENT	HOURS
UNIT-1	<p>Nursing management of patient with disorders of Ear, Nose and throat</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of the ear, nose and throat • Nursing assessment History and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of ear, nose and throat disorders <p style="padding-left: 40px;"># External ear deformities otalgia, foreign bodies and tumors</p> <p style="padding-left: 40px;"># Middle ear impacted wax, tympanic membrane perforation, otitis media, tumors</p> <p style="padding-left: 40px;"># Inner ear Meniere's disease, labyrinthitis, ototoxicity, tumors</p> <p style="padding-left: 40px;"># Upper airway infections: Common cold sinusitis, ethmoiditis, and adenoiditis, peritonsillar abscess, laryngitis</p> <ul style="list-style-type: none"> • Upper respiratory airway • Nasal obstruction, laryngeal obstruction, cancer of the larynx • Cancer of the oral cavity • Speech defects and speech therapy • Deafness • Prevention, control and rehabilitation • Hearing aids, implanted hearing devices <p>Special therapies Nursing procedures Drug used in treatment of disorders of ear, nose and throat. Role of nurse communication with hearing impaired and muteness</p>	15 hrs.
UNIT- 2	<p>Nursing management of patient with disorders of Eye</p> <ul style="list-style-type: none"> • Review of anatomy, physiology of the eye • Nursing management-history and physical assessment • Etiology, pathophysiology, clinical, diagnosis, treatment modalities and medical and surgical nursing management of the eye disorders <p style="padding-left: 40px;"># Refractive errors</p> <p style="padding-left: 40px;"># Eyelids- infection, tumors and deformities</p> <p style="padding-left: 40px;"># Conjunctiva- inflammation and infection, bleeding</p> <p style="padding-left: 40px;"># Cornea- inflammation and infection</p> <p style="padding-left: 40px;"># Lens- cataract</p> <p style="padding-left: 40px;"># Glaucoma</p> <p style="padding-left: 40px;"># Disorders of posterior chamber and retina: retinal and vitreous problems</p>	15 hrs.

	<ul style="list-style-type: none"> # Retinal detachment # Ocular emergency and their prevention • Blindness • National blindness control program <ul style="list-style-type: none"> # Eye banking # Eye prostheses and rehabilitation <p>Role of a nurse- Communication with visually impaired patient, eye camps</p> <p>Special therapies</p> <p>Nursing procedures</p> <p>Drugs used in treatment of disorder of eye</p>	
UNIT-3	<p>Nursing management of patient with neurological disorders</p> <ul style="list-style-type: none"> # Review of anatomy and physiology of the neurological system • Nursing assessment- history and physical and neurological assessment and Glasgow coma scale • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of neurological disorders • Congenital malformation • Headache • Head injuries • Spinal injuries <ul style="list-style-type: none"> # Paraplegia # Hemiplegia # Quadraplegia • Spinal cord compression- herniation of in vertebral disc • Tumors of the brain and spinal cord • Intra cranial and cerebral aneurysms • Infection: <ul style="list-style-type: none"> # Meningitis, encephalitis, brain, abscess, neurocysticerosis • Movement disorders <ul style="list-style-type: none"> # Chorea # Seizures # Epilepsies • Cerebro vascular accidents (CVA) • Cranial, spinal neuropathies- Bells palsy trigeminal neuralgia • Peripheral Neuropathies Guillainbarr'e syndrome • Myasthenia gravis • Multiple sclerosis • Degenerative diseases <ul style="list-style-type: none"> #Delirium # Dementia # Alzheimer's disease # Parkinson's disease • Management of unconscious patient and a patient with stroke • Role of nurse in communicating with patient having neurological deficit • Rehabilitation of patient with neurological deficit 	16 hrs.

	<p>Role of nurse in long stay facility (institution) and at home special therapies Nursing procedures Drug used in treatment of neurological disorders.</p>	
UNIT-4	<p>Nursing management of patients with disorder of female reproductive system.</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of female reproductive system. • Nursing assessment- History and physical assessment • Breast self examination • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of disorder of female reproductive system • Sexuality and reproductive health • Menstrual disorders: Dysmenorrhea, amenorrhea, premenstrual syndrome • Abnormal uterine bleeding: menorrhagia, metrorrhagia • Pelvic Inflammatory disease • Ovarian and fallopian tube disorders: infection, cysts, tumors • Uterine and cervical and disorders: endometriosis, polyps, fibroids, cervical and uterine tumors uterine displacement, cystocele/ urethrocele/ rectocele • Vaginal disorders: infection and discharges fistulas • Vulvular disorders: infection, cysts and tumors • Diseases of breasts: deformities, infection cysts and tumors • Menopause and hormonal replacement therapy • Infertility • Contraception: types, methods, risk and effectiveness <ul style="list-style-type: none"> # Barrier methods, intra uterine device, hormonal, post conceptional methods etc. # Terminal methods • Sterilization • Emergency contraception methods • Abortion- natural, medical and surgical abortion-MTP Act • Toxic shock syndrome • Injuries and trauma: Sexual Violence <p>Special therapies Nursing procedures Drug used in treatment of gynecological disorders National family welfare programme</p>	16 hrs.
UNIT-5	<p>Nursing management of patient with burns, reconstructive and cosmetic surgery</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of the skin and connective tissues and various deformities • Nursing assessment- History and physical assessment and assessment of burns and fluid and electrolyte loss • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing 	10 hrs.

	<p>management of burns and reconstructive and cosmetic surgery</p> <ul style="list-style-type: none"> • Types of re-constructive and cosmetic surgery: for burns, congenital deformities, injuries and cosmetic purposes • Role of nurse • Legal aspects • Rehabilitation • Special therapies <ul style="list-style-type: none"> □ Psychosocial aspects <p>Nursing procedures Drug used in treatment of burns, constructive and cosmetic surgery</p>	
UNIT-6	<p>Nursing management of patient with Oncological conditions</p> <ul style="list-style-type: none"> • Structure and characteristics of normal and cancer cells • Nursing assessment – history and physically assessment • Prevention, screening, early detections, warning sign of cancer • Epidemiology, etiology, classification, pathophysiology, staging, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of oncological condition • Common malignancies of various body system: oral, larynx, lung stomach, and colon, liver, leukemias, and lymphomas, breast, cervix, ovary, uterus, sarcoma, brain, renal, bladder, prostate etc. • Oncological emergencies • Modalities of treatment <ul style="list-style-type: none"> □ Immunotherapy □ Chemotherapy □ Radiotherapy □ Surgical intervention □ Stem cell and bone marrow transplants □ Gene therapy □ Other forms of treatment • Psychological aspects of cancer • Rehabilitation • Palliative care: Symptoms and pain management, nutritional support • Home care • Hospice care • Stomal therapy • Special therapies <ul style="list-style-type: none"> □ Psychosocial therapies <p>* Nursing procedures</p>	10 hrs.
UNIT-7	<p>Nursing management of patient in EMERGENCY AND DISASTER Situations Disaster Nursing:</p> <ul style="list-style-type: none"> • Concepts and principals of disaster nursing • Causes and types of disaster: Natural and manmade <ul style="list-style-type: none"> □ Earthquakes, floods, epidemics, cyclones 	10 hrs.

	<ul style="list-style-type: none"> ❑ Fire, explosion, accidents ❑ Violence, terrorism: biochemical, war • Policies related to emergency/ disaster management: Institutional, national state, institutional • Disaster preparedness: • Team, guidelines, protocols, equipments, resources • Co-ordination and involvement of : community, various Govt departments, non govt. organizations and international agencies • Role of nurse; working • Legal aspects of disaster nursing • Impact on health after effects: Post traumatic stress disorders • Rehabilitation: physical, psychosocial, financial relocation, Emergency nursing • Concept, priorities, principles and scope and scope and emergency nursing • Organization of emergency services: physical set-up, staffing, equipment and supplies, protocols, concepts of triage and role of triage nurse • Co-ordination and involvement of different departments and facilities • Nursing assessment-history and physical assessment • Etiology, classification, pathophysiology, staging, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of patient with medical and surgical emergency • Principles of emergency management • Common emergencies • Respiratory emergencies • Cardiac emergencies • Shock and hemorrhage • Pain • Poly-trauma, road accidents, crouch, injuries, wound • Bites • Poisoning; food, gas drug and chemical poisoning • Seizures • Thermal emergencies; heat stroke, and cold injuries • Pediatric emergencies • Obstetrical emergencies • Violence, abuse, sexual assault • Cardio pulmonary resuscitation • Crisis intervention • Role of nurse: communication and interpersonal relations • Medico legal aspects 	
UNIT-8	<p>Nursing care of the elderly</p> <ul style="list-style-type: none"> • Nursing assessment- history and physical assessment • Ageing • Demography: Myths and realities • Concepts and theories of ageing • Normal biological ageing 	10 hrs.

	<ul style="list-style-type: none"> • Age related body related changes • Psychosocial aspects of ageing • Medication and elderly • Stress and coping in elder patient • Common health problems and nursing management • Cardiovascular, respiratory, musculoskeletal • Endocrine, genitor-urinary, gastrointestinal • Neurological, skin and sensory organs <ul style="list-style-type: none"> □ Psychosocial and sexual □ Abuse of elderly • Role of nurse for care of elderly: ambulation, nutritional, communicational, psychosocial and spiritual • Role of family and formal and non formal caregivers • Use of aids and prosthesis (hearing aids, dentures) • Legal and ethical issues • Provision and programme for elderly, privileges, community Programs and health services * Home and institutional care 	
UNIT-9	<p>Nursing management of patients in critical care units</p> <ul style="list-style-type: none"> • Nursing assessment-history and physical assessment • Classification • Principles of critical care nursing • Organization: physical set-up, policies, staffing norms • Protocols, equipment, ventilators, cardiac monitors, defibrillators • Resuscitation equipments • Infection control and protocols 	10 hrs.

MEDICAL SURGICAL NURSING (Adult and geriatrics)-II Practical

Placement: Third year

**Time: Theory-120 hrs
Practical – 270 hrs.
Internship - 430 hrs.**

Areas	Skills to be developed	Duration (In weeks)
ENT	<ul style="list-style-type: none"> • Perform examination of ear, nose and throat • Assist with diagnostic procedures • Assist with therapeutic procedures • Instillation of drops • Perform/assist with irrigations • Apply ear bandage • Performs tracheotomy care 	1

	<ul style="list-style-type: none"> • Teach patient and families 	
Ophthalmology	<ul style="list-style-type: none"> • Perform examination of eye • Assist with diagnostic procedures • Assist with therapeutic procedures • Performs /assist with irrigations • Apply eye bandage • Apply eye drops/ointment • Assist with foreign body removal • Teach patient and families 	1
Neurology	<ul style="list-style-type: none"> • Perform neurological examination • Use Glasgow coma scale • Assist with diagnostic procedure • Assist with therapeutic procedures • Teach patient and families • Participate in rehabilitation program 	2
Gynecology ward	<ul style="list-style-type: none"> • Assist with gynecological examination • Assist with diagnostic procedure • Assist with therapeutic procedures • Teach patient and families • Teach self Breast examination • Assist with PAP smear collection 	1
Burns Unit	<ul style="list-style-type: none"> • Assessment of burns patient <ul style="list-style-type: none"> - Percentage of burns - Degree of burns • Fluid and electrolyte replacement therapy <ul style="list-style-type: none"> - Assess - Calculate - Replace - Record intake/output • Care of Burns wound <ul style="list-style-type: none"> - Bathing - Dressing • Perform active and passive exercises • Practice medical and surgical asepsis • Counsel and teach patient and families • Participate rehabilitation program 	1
Oncology	<ul style="list-style-type: none"> • Screen for common cancer-TNM classification • Assist with diagnostic procedures <ul style="list-style-type: none"> - Biopsies - Pap Smear - Bone- Marrow aspiration • Breast examination • Assist with therapeutic Procedures • Participates in various modalities of treatment <ul style="list-style-type: none"> - chemotherapy - radiotherapy - Pain management 	2

	<ul style="list-style-type: none"> - Stomal therapy - Immuno therapy - Gene therapy - Alternative therapy <ul style="list-style-type: none"> • Participate in palliative care • Counsel and teach patient families • Self Breast examination • Warning signs • Participate in rehabilitation program 	
Critical care unit	<ul style="list-style-type: none"> - • monitoring of patients in ICU • Maintain flow sheets • Care of patient on ventilators • Perform end tracheal suction • Demonstration use of ventilators, Carries monitors etc. • Collect specimen and interprets ABG analysis • Assist in arterial puncture • Maintain CVP line • Pulse oximetry • CRP – ALS 	
	<ul style="list-style-type: none"> • Defibrillators • Pace makers • Bag-mask ventilation • Emergency tray trolley- Crash Cart • Administration of drugs <ul style="list-style-type: none"> - Infusion pump - Epidural - Intrathecal Intracardiac • Total parenteral therapy • Chest physiotherapy • Perform active and passive exercises • Counsel the patient and family in dealing with grieving and bereavement 	1
Casualty Emergency	<ul style="list-style-type: none"> • Practice triage • Assist with assessment examination investigations and their interpretation in emergency and disaster situations • Assist in legal procedures • In emergency unit • Participate in managing crowd • Counsel the patient and family in dealing with grieving and bereavement 	1

- Planning for health education
- Health education with individual, group and communities
- Communicating health messages
- Methods and media for communicating health messages
- Using mass media

B.Sc. Nursing

Fourth Year

MIDWIFERY AND OBSTETRICAL NURSING

Placement: Fourth Year

Theory- 90 hrs.
Practical- 180 hrs.

Course Description: This course is designed for students to the concepts and principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skills in rendering nursing care to normal and high risk pregnant woman during antenatal, natal and postnatal periods in hospital and community setting it also helps to develop skills in managing normal and high risk neonates and participate in family welfare programme

UNIT	CONTENT	HOURS
UNIT-1	Introduction to midwifery and obstetrical nursing <ul style="list-style-type: none">• Introduction to concept of midwifery and obstetrical nursing• Trends in midwifery and obstetrical nursing<ul style="list-style-type: none">☐ Historical perspective and current trends	3 hrs.

	<ul style="list-style-type: none"> <input type="checkbox"/> Legal and ethical aspects <input type="checkbox"/> Pre-conception care and preparing for parenthood <input type="checkbox"/> Role of nurse in midwifery and obstetrical care <input type="checkbox"/> National policy and legislation in relation to material health and welfare <input type="checkbox"/> Maternal morbidity, mortality and fertility rates <input type="checkbox"/> Prenatal morbidity, mortality rates 	
<p>UNIT-2</p>	<p>Review of anatomy and physiology of female reproductive system and fetal development</p> <ul style="list-style-type: none"> • Female pelvis- general description of the bones joints, ligaments, planes of the pelvis diameters of the true pelvis important landmarks, variations in pelvic shapes • Female organs of reproduction – external genitalia, internal genital organs and their anatomical relation, musculature blood supply, nerves, lymphatic, pelvic cellular tissue, pelvic peritoneum • Physiology of menstrual cycle • Human sexuality • Fetal development <ul style="list-style-type: none"> <input type="checkbox"/> Conception <input type="checkbox"/> Review of fertilization, implantation, development of the embryo and placement at term- functions, abnormalities, the fetal sac, amniotic fluid the umbilical chord <input type="checkbox"/> Fetal circulation, fetal skull, bones, sutures and measurements * Review of genetics 	<p>8 hrs.</p>
<p>UNIT-3</p>	<p>Assessment and management of pregnancy (ante-natal)</p> <ul style="list-style-type: none"> • Normal pregnancy • Physiological changes during pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Reproductive system <input type="checkbox"/> Cardiovascular system <input type="checkbox"/> Respiratory system <input type="checkbox"/> Urinary system <input type="checkbox"/> Gastro intestinal system <input type="checkbox"/> Metabolic change <input type="checkbox"/> Skeletal change <input type="checkbox"/> Skin changes <input type="checkbox"/> Endocrine system <input type="checkbox"/> Psychological changes <input type="checkbox"/> Discomfort of pregnancy • Diagnosis of pregnancy <ul style="list-style-type: none"> <input type="checkbox"/> Signs <input type="checkbox"/> Differential diagnosis 	<p>8 hrs.</p>

<ul style="list-style-type: none"> <input type="checkbox"/> Confirmatory tests • Ante natal care <ul style="list-style-type: none"> <input type="checkbox"/> Objectives <input type="checkbox"/> Assessment <ul style="list-style-type: none"> - History and physical examination - Antenatal examination - Signs of previous child birth <ul style="list-style-type: none"> <input type="checkbox"/> Relationship of fetus to uterus and pelvis lie attitude presentation. Position <input type="checkbox"/> per vaginal examination • Screening and assessment for high risk • Risk approach • History and physical examination • Modalities of diagnosis Invasive and non invasive ultrasonic cardio tomography, NST, CST • Antenatal preparation <ul style="list-style-type: none"> <input type="checkbox"/> Antenatal counseling <input type="checkbox"/> Antenatal exercises <input type="checkbox"/> Diet <input type="checkbox"/> Substance use <input type="checkbox"/> Education for childbirth <input type="checkbox"/> Husband and Families <input type="checkbox"/> Preparation for self confinement <input type="checkbox"/> Prevention from radiation • Psycho-social and cultural aspects <ul style="list-style-type: none"> <input type="checkbox"/> Adjustment to pregnancy <input type="checkbox"/> Unwed mother <input type="checkbox"/> Single parent <input type="checkbox"/> Teenage pregnancy <input type="checkbox"/> Sexual violence • Adoption 	
<p>UNIT-4 Assessment and management of intranatal period</p> <ul style="list-style-type: none"> • Physiology of labour • Management of labour • First stage <ul style="list-style-type: none"> <input type="checkbox"/> Signs and symptoms of onset of labour normal and abnormal <ul style="list-style-type: none"> <input type="checkbox"/> Duration <input type="checkbox"/> Preparation of <ul style="list-style-type: none"> # Labour room # Woman <input type="checkbox"/> Assessment and observation of woman in labour: Partogram- maternal and fetal monitoring <ul style="list-style-type: none"> <input type="checkbox"/> Active management of labour, induction of labour <input type="checkbox"/> Pain relief and comfort in labours • Second stage <ul style="list-style-type: none"> <input type="checkbox"/> Sign and symptoms: normal and abnormal 	<p>12 hrs</p>

- Duration
- Conduct of delivery: principles and technique
- Episiotomies (Only if required)
- Receiving the new born
 - Neonatal resuscitation; initial steps and subsequent resuscitation
 - Care of umbilical cord
 - Immediate assessment including screening for congenital anomalies
 - Identification
 - Bonding
 - Initiate feeding
 - Screening and transportation of the neonate
- * Third stage
 - Sign and symptoms: normal and abnormal
 - Duration
 - Method of placenta expulsion
 - Management : principles and technique
 - Examination of the placenta
 - Examination of perineum
- Maintaining records and reports
- Fourth stage

UNIT-5

- Assessment and management of women during post natal period
- Normal puerperium: physiology duration
 - Postnatal assessment and management
 - Promoting physical and emotional well being
 - Lactation management
 - Immunization
 - Family dynamics after child
 - Family welfare services, methods, counseling
 - Follow-up
 - Records and reports

UNIT-6

- Assessment and management of normal neonates**
- **Normal neonate:**
 - Physiological adaptation
 - Initial and daily assessment
 - Essential newborn care, thermal control
 - Breast feeding prevention of infections
 - Immunization
 - Minor disorders of newborn and its management
 - Levels of neonatal care (level II, &III)
 - At primary, secondary and tertiary levels
 - Maintenance of reports and records

6 hrs.

Process techniques bag technique and home visit 	25 hrs.
Unit - 5	<p>Assisting individuals and group to promote and maintain their health</p> <ul style="list-style-type: none"> • Empowerment for self care of individual families and group in 	15 hrs.

- A Assessment of self and family
- Monitoring growth and development
 - Mile stones
 - Weight measurement
 - Social development
 - Temperature and blood pressure monitoring
 - Menstrual cycle
 - Breast self examination and testicles
 - Warning signs of various diseases
 - Teats: Urine sugar and albumin, blood sugar

B Seek health service for

- Routine check – up
- Immunization
- Counseling
- Diagnosis
- Treatment
- Follow – up

C Maintenance of health records for self and family

D Continue medical care and follow – up in community for various disease and disabilities

E Carryout therapeutic procedures as prescribed / required for self and the family

F Waste management

G Sensitize and handle social issues affecting health and development for self and family

- Women empowerment
- Women and child abuse
- Abuse of elders
- Female foeticide
- Commercial sex worker
- Food adulteration
- Substance abuse

H Utilize community resources for self and family

- Trauma services
- Old age homes
- Orphanage
- Home of physically and mentally challenged individuals
- Homes for destitute

Unit - 6

National health and family welfare programmers and the role of a nurse

- National ARI programmer
- Revised national tuberculosis programmer (RNTCP)
- National anti-malaria programme
- National filarial control programme

20 hrs.

Unit - 7	<ul style="list-style-type: none"> • National guinea worm eradication programme • National leprosy eradication programme • National AIDS control programme • National STD control programme • Iodine deficiency disorder programme • Expanded programme of immunization • National family welfare programme • National water supply and sanitation programme • Minimum need programme • National diabetes control programme • Polio eradication programme • National cancer control programme • Yaws eradication programme • 20 pints programme • ICDS programme • Mid day meal applied nutritional programme • Health schemes <ul style="list-style-type: none"> <input type="checkbox"/> ESI <input type="checkbox"/> CGHS <input type="checkbox"/> Health insurance

P.B.BSC NURSING
MEDICAL –SURGICAL NURSING

Placement : Ist Year.

Allotted Theory: 90hrs.
Practical: 270hrs.

The purpose of this course is to widen the students' knowledge and develop proficiency in caring for patients with Medical Surgical problems. This course includes review of relevant anatomy & physiology, pathophysiology in Medical Surgical disorders & the nursing management of these conditions.

OBJECTIVES : At the end of the course, the F.Y.B.Sc. Nursing students will-

1. explain relevant Anatomy & Physiology of various systems of the body.
2. explain etiology, pathophysiology & manifestations of various disorders.
3. explain the actions, side-effects & nursing implications in administering drugs for various disorders.
4. discuss the recent advancement in the investigations, treatment & care of patients with Medical Surgical conditions.
5. develop skill in giving comprehensive nursing care to patients following the steps of nursing process.
6. assist the patients & their families in identifying & meeting their own health needs.
7. provide planned & incidental health education on various aspects related to disorder & relevant care.
8. appreciate the role of the nurse in the Medical Surgical health team.

COURSE CONTENTS :

UNIT I INTRODUCTION TO MEDICAL SURGICAL NURSING 4 hrs

- Introduction to medical surgical nursing.
- Review of concepts of comprehensive nursing care in medical surgical conditions.
- Nurse, patient & his/her family
- Functions of nurse in the outpatient department.
- Intensive care units. * Staff requirement. Client's needs & nsg. care.

UNIT II NURSING MANAGEMENT OF PATIENTS WITH SPECIFIC PROBLEMS 10 hrs

- Fluid & electrolyte imbalance.
- Dyspnoea, cough & respiratory obstruction.
- Fever & nursing care.
- Shock & nursing care.
- Unconsciousness & nursing care.
- Pain perception & nursing care.

- Acute & chronic illness & nursing care.
- Terminal illness & nursing care.
- Ageing & illness & nursing care.
- Pre & post-operative care.
- Nursing care of clients with incontinence.

UNIT III NURSING MANAGEMENT OF PATIENT WITH 08 hrs.
NEUROLOGICAL & NEURO-SURGICAL CONDITIONS.

- Review of anatomy & physiology of the nervous system & assessment of clients with CNS disorders.
- Pathophysiology, diagnostic procedures & management of :
 - cerebro-vascular accident & nursing care.
 - cranial, spinal & peripheral neuropathies & nursing care.
 - headache & intractable pain & nursing care.
 - epilepsy & nursing care.
 - nursing care of clients with infectious & inflammatory diseases & trauma of the nervous system.
 - nursing care of clients with common CNS disorders.
 - recent advances in diagnostic & treatment modalities & drugs used in CNS disorders.
 - brain, spinal tumours, congenital malformations, degenerative disorders.

UNIT IV NURSING MANAGEMENT OF PATIENTS WITH CARDIO- 08 hrs
VASCULAR PROBLEMS.

- Review of relevant anatomy & physiology of cardio-vascular system & assessment of clients with cardio-vascular disorders.
- Pathophysiology, diagnostic procedures & management of-
 - ischaemic heart disease.
 - cardiac arrhythmias.
 - congestive cardiac failure.
 - rheumatic & other valvular heart diseases.
 - endocarditis, cardiomyopathies, congenital heart diseases, hypertension, heart block.
 - cardiac emergencies: cardiac arrest, acute pulmonary oedema, cardiac tamponade, cardiogenic shock, aneurisms & periphero-vascular disorders, recent advancement in cardiology.

UNIT V NURSING MANAGEMENT OF PATIENT WITH 06 hrs
RESPIRATORY PROBLEMS.

- Review of anatomy & physiology of respiratory system & assessment of clients with respiratory disorders.
- Pathophysiology, diagnostic procedures and management of upper and lower respiratory track infection
 - Bronchitis, bronchiectasis & nursing care.
 - Asthama, emphysema, empyema, atelectasis, COPD and nursing care.

- Chest injuries, resp. arrest & insufficiency
- Special respiratory therapies & drugs used in the management.

UNIT VI NURSING MANAGEMENT OF CLIENTS WITH GENITO-URINARY PROBLEMS. 05 hrs.

- Review of anatomy & physiology of the genito-urinary system & assessment of clients with genito-urinary problems.
- Pathophysiology & management of-
 - congenital disorders, urinary infections.
 - nephritis, renal calculi.
 - acute renal failure, chronic renal failure, end stage renal disease.
 - special procedures : dialysis, renal transplant.
 - benign prostatic hypertrophy.
 - drugs used in the management of these patients.

UNIT VII NURSING MANAGEMENT OF CLIENTS WITH PROBLEMS OF THE DIGESTIVE SYSTEMS 10 hrs.

- Review of anatomy & physiology of gastro-intestinal system & accessory organs& assessment of clients with gastro-intestinal tract disorders.
- Pathophysiology, diagnostic procedures & management of -
 - gastro-intestinal bleeding.
 - peptic ulcer.
 - acute abdomen.
 - infections, colitis, diarrhoea, dysentery & mal-absorption syndrome.
 - cholecystitis.
 - hepatitis, hepatic coma & cirrhosis of liver, portal hypertension.
 - pancreatitis.
 - tumours, hernias, fistulas, fissures, haemorrhoids.
 - drugs used in the management of these patients.

UNIT VIII NURSING MANAGEMENT OF PATIENTS WITH ENDOCRINE PROBLEMS. 5 hrs

- Review of anatomy & physiology & assessment of clients with endocrine disorders.
- Pathophysiology, diagnostic procedures & management of -
 - thyroid disorders.
 - diabetes mellitus, diabetes insipidus.
 - adrenal tumours, pituitary disorders.
 - drugs used, diagnostic procedures & nursing management of patient with above problems.

UNIT IX NURSING MANAGEMENT OF PATIENTS WITH MUSCULO-

SKELETAL PROBLEMS.**5 hrs.**

- Review of anatomy, physiology & assessment of patients with musculo-skeletal disorders.
- Osteomalacia, osteoporosis, osteomyelitis, bursitis.
- Fractures, dislocation & trauma.
- Prolapsed disc.
- Prosthesis & rehabilitation.
- Transplant & replacement surgeries.

UNIT X NURSING MANAGEMENT OF PATIENTS WITH DISORDERS OF FEMALE REPRODUCTIVE TRACT. 3 hrs.

- Disorders of menstruation & inf. of genital tract. *Benign & malignant tumours of genital tract & RVF & VVF. * Climacteric changes & associated problems.

UNIT XI NURSING MANAGEMENT OF PATIENTS WITH ONCOLOGICAL DISORDERS. 5 hrs.

- Types of neoplasms & related pathophysiology, diagnostic procedures, modalities of treatment & nurses' role.
- Special therapies : chemotherapy & radiotherapy & nsg. care.
- Preventive measures, other therapies.

UNIT XII NURSING MANAGEMENT OF PATIENTS WITH BURNS & RECONSTRUCTIVE SURGERIES. 3 hrs.

- Pathophysiology, assessment & nursing management of patients with burns.
- Nursing management of patients with reconstructive surgeries.

UNIT XIII NURSING MANAGEMENT OF PATIENTS WITH COMMUNICABLE DISEASES, STDS & HIV/AIDS. 5 hrs.

- Nursing management of patients with common communicable diseases & STDs.
- Nursing management of patients with immunological disorders including HIV/AIDs.

UNIT XIV NURSING MANAGEMENT OF PATIENTS WITH DISEASES OF EYE,EAR,NOSE,THROAT & SKIN. 5 hrs.

- Assessment & nursing management of patients with eye disorders.
(eye injuries, cataract, inf., blindness)
- Assessment & nursing management of patients with ear disorders (deafness).
- Assessment & nursing management of patients with nose & throat disorders. (DNS, tonsillitis).

- Assessment & nursing management of patients with skin disorders.
(fungal inf., herpes, psoriasis etc)

UNIT XV NURSING MANAGEMENT OF PATIENTS WITH BLOOD DISORDERS. 5 hrs.

- Review of anatomy & physiology of blood & blood products.
- Pathophysiology, diagnostic procedures & management of blood disorders.
 - anaemia, leukaemia.
 - bleeding disorders, haemophilia, purpura etc.
 - blood transfusion, safety checks, procedure & requirements, management of adverse transfusion reaction, records for blood transfusion.
 - management & counseling of blood donors, phlebotomy procedure, & post-donation management.
 - blood bank functioning & hospital transfusion committee. Biosafety & waste management in relation to blood transfusion.

UNIT XVI NURSING IN EMERGENCIES. 3 hrs.

- Cardiac emergencies. (included in unit iv)
- Trauma.
- poisoning.
- crisis mgt :thyroid, hypertensive, & adrenal crisis included in unit viii & iv.

hrs.05.

MATERNAL NURSING

Placement: Ist Year

**Time Allotted Theory : 60 Hrs
Practical : 240**

COURSE DESCRIPTION :

The course is designed to widen the student's knowledge of obstetrics during pregnancy, labour and puerperium. It also helps to acquire knowledge and to develop skill in rendering optimum nursing care to a child bearing mother in a hospital or in community and help in the management of common gynaecological problems.

OBJECTIVES : At the end of the course, the student will be able to :

1. Describe the physiology of pregnancy, labour, and puerperium.
2. Manage normal pregnancy, labour and puerperium.
3. Explain the physiology of lactation, and advice on management of breast feeding.
4. Provide pre- and post operative nursing care in obstetric conditions.
5. Identify and manage high risk pregnancy including appropriate referrals.
6. Propagate the concept and motivate acceptance of family planning methods.
7. Teach , guide and supervise auxiliary midwifery personnel.

COURSE CONTENT

UNIT I INTRODUCTION AND HISTORICAL REVIEW 5 hrs.

- (a) Early history of midwifery and evolution of obstetrics
Maternity care and practices in various culture across the world.
Expanded role of the nurse in maternity and gynaecology.
- (b) Safe motherhood initiative
Maternal mortality, morbidity and perinatal mortality.
Legislation related to maternal benefits, MTP acts, incentives and Family planning. Family welfare programme.

UNIT II ANATOMY AND PHYSIOLOGY OF FEMALE REPRODUCTIVE SYSTEM 6 hrs.

- Review of anatomy and physiology of female reproductive system.
- Female pelvis and foetal skull.
- Menstrual cycle
- Human reproduction, gametogenesis, fertilization, embryo.
- Placenta, foetal membrane, liquor amnii, umbilical
- The foetus, foetal growth, foetal physiology, foetal circulation.

UNIT III	NORMAL PREGNANCY	8 hrs.
	<ul style="list-style-type: none"> - Physiological changes during pregnancy - Diagnosis of pregnancy and antenatal care - Antenatal assessment of foetal well being. - Physiology of normal labour - Mechanism of normal labour. - Management of I, II, and III stages of labour. - Physiology of puerperium. - Physiology of lactation and breast feeding - Management of normal puerperium 	
UNIT IV	NEW BORN BABY	6 hrs.
	<ul style="list-style-type: none"> - Resuscitation and immediate care of newborn.including SGA & LGA - Normal characteristics and essential care of newborn. - Asphyxia Neonatarum, respiratory distress - Jaundice in newborn - Birth injuries, congenital anomalies, infection in newborn, and vomiting in newborn. - Still birth – incidence, causes and prevention. - Care of low birth weight babies in labour room and nursery / NICU. 	
UNIT V	MEDICAL DISORDERS IN PREGNANCY	5 hrs.
	<ul style="list-style-type: none"> - Hypertensive disorders – Pregnancy induced hypertension, Eclampsia. - Anaemia in pregnancy - Diabetes mellitus in pregnancy - Heart diseases - Renal disorders in pregnancy - Jaundice in pregnancy - Pulmonary TB - Pregnancy with STD, HIV / AIDS. 	
UNIT VI	HIGH RISK PREGNANCY	10 hrs.
	<ul style="list-style-type: none"> - Abortion - Hydatiform mole - Ectopic pregnancy - Medical termination of pregnancy - Antepartum haemorrhage – Placenta previa, Abruption placenta - Vomiting in pregnancy - Pregnancy in Rh negative women - Multiple pregnancy, hydramnios - Preterm labour - Premature rupture of membrane 	

- IUGR, postdatism
- Pregnancy with previous caesarean section
- Fibroid with pregnancy
- Ovarian tumour with pregnancy

UNIT VII HIGH RISK LABOUR 3 hrs.

- Abnormal presentation – Unstable lie, Occipitoposterior, face and brow presentation
- Breech presentation, compound presentation
- Abnormal uterine action in labour and active management of labour
- Contracted pelvis and CPD
- Obstructed labour, rupture of uterus, injuries of maternal birth canal, cord prolapse.

UNIT VIII ABNORMALITIES OF PUERPERIUM 4 hrs.

- Puerperial pyrexia and sepsis
- Post partum haemorrhage
- Breast complications – Breast engorgement, breast abscess, acute mastitis
- Psychiatric disorders in puerperium

UNIT IX OBSTETRICAL EMERGENCIES & OPERATIVE OBSTETRICS 3 hrs.

- Uterine rupture, cervical tear
- D & E , S & E
- Use of instruments – Ephysiotomy Forcep, Vaccum
- Caesarean section

UNIT X PHARMACOTHERAPEUTICS 2 hrs.

- Oxytocics, Prostaglandins – use in obstetrics
- Anaesthesia and analgesics used in obstetrics

UNIT XI SPECIAL INVESTIGATIONS IN OBSTETRICS 2 hrs.

- USG, NST, CTG
- Radiography

UNIT XII CURRENT TRENDS IN REPRODUCTIVE HEALTH(RCH) 4 hrs.

- Infertility, genetic counseling
- Unwanted pregnancy
- Unwed mother
- Advances in obstetrics and maternity care.

UNIT XIII GYNAECOLOGICAL NURSING 4 hrs.

- Common Gynaecological Problems

- Cervical erosions, Carcinoma
- Fibroids, Uterine and Cervical Prolaps
- Uterine Inversion etc

PRACTICUM : Practice following Procedures

- Antenatal, Postnatal & per vaginal exam.
- Conduct normal delivery (For male candidates minimum conduct of 5 deliveries)
- Motivation of Planned Parenthood, advice on family planning methods.
- Assist in various diagnostic & therapeutic procedure including IUD insertion & removal.
- Follow Nursing process in providing care to 3-6 patients.

NURSING FOUNDATION

Placement: Ist Year

**Time Allotted: Theory : 45 Hrs
Practical : 30 Hrs**

COURSE DESCRIPTION :

This course will help students to develop an understanding of the philosophy, objectives and responsibilities of nursing as a profession. The purpose of the course is to orient to the current concepts involved in the practice of nursing and developments in the nursing profession.

OBJECTIVES : At the end of the course, the students will

1. Identify professional aspects of nursing
2. Explain theories of nursing
3. Identify ethical aspects of nursing profession
4. Utilise steps of nursing process
5. Identify the role of the nurse in various levels of health services
6. Appreciate the significance or quality assurance in nursing.
7. Explain current trends in health and nursing

COURSE CONTENTS :

UNIT I DEVELOPMENT OF NURSING AS A PROFESSION 6 hrs

- Philosophy
- Objectives and responsibilities of a graduate nurse
- Trends influencing nursing practice
- Expanded role of the nurse
- Development of nursing education in India and trends in nursing education
- Professional organizations, career planning
- Code of ethics & professional conduct for nurses.

UNIT II CONCEPTS OF HEALTH & ILLNESS 12 hrs

- Concepts of health and illness, effects on the person
- Stress and adaptation
- Health care concepts and nursing care concept
- Developmental concepts, needs, roles and problems of the developmental stages of individual – newborn, infant, toddler, pre-adolescent, adolescent, adulthood, middle-age, old age.

UNIT III	THEORY OF NURSING PRACTICE	5 hrs
	<ul style="list-style-type: none"> - Meta paradigm of nursing – characterized by four central concepts i.e. Nurse, Person (client/patient). Health and Environment. Nursing Theory; <ul style="list-style-type: none"> - Florence Nightingale - Virginia Henderson - Betty Neumen - Dorothea Orem - Martha Rogers etc. 	
UNIT IV	NURSING PROCESS	10 hrs
	<ul style="list-style-type: none"> - Nursing Process - Nursing diagnosis – Definitions, concepts, statements, types, interpretation - Planning: techniques for planning care, types of care plans. - Implementation: different approaches to care, organisations and implementation of care, recording. - Evaluation: tools for evaluation, process of evaluation. 	
UNIT V	QUALITY ASSURANCE	6 hrs
	<ul style="list-style-type: none"> - Quality assurance: nursing standards, nursing audit, total quality management - Role of council and professional bodies in maintenance of standards. 	
UNIT VI	APPROACHES TO HEALTH CARE	6 hrs
	<ul style="list-style-type: none"> - Primary health care concepts: <ul style="list-style-type: none"> - community oriented nursing - holistic nursing - primary nursing - family oriented nursing concepts: <ul style="list-style-type: none"> - Problem oriented nursing - Progressive patient care - Team nursing 	

CHILD HEALTH NURSING

Placement: Ist Year

Time Allotted Theory : 60hrs
Practical : 240hrs

COURSE DESCRIPTION :

This course is aimed at developing an understanding of the modern approach to child care, the principles of child health nursing and the common problems of neonates and children in health and sickness.

OBJECTIVES : At the end of the course, the students will be able to:-

1. Explain the modern concept of child care and the principles of child health nursing.
2. Describe the normal growth and development of children in various age groups.
3. Explain the physiological response of body to disease conditions in children.
4. Identify the health needs and problems of neonates and children, plan and implement appropriate nursing interventions.
5. Identify the various preventive, promotive and rehabilitative aspects of child care and apply them in providing nursing care to children in the hospital and in the community.

COURSE CONTENT

UNIT I INTRODUCTION TO CHILD HEALTH NURSING 8 hrs.

- Modern concept of child care
Internationally accepted rights of the child.
- Changing trends in hospital care, preventive, promotive and curative aspects of child health Child morbidity and mortality rates
- National policy and legislation"s in relation to child health and welfare.
- National programmes related to child health and welfare.
- Differences between adult and child
- Hospital environment for a sick child and role of a paediatric nurse in caring for the hospitalized child
- Principles of pre and post operative care of infants and children
- Paediatric nursing procedures Prepn of child for diagnostic tests, collection of specimens, calculation and administration of oral and parenteral medication, feeding, adm of oxygen, nebulisation ,collection of specimens ,exchange transfusion, restraints

UNIT II THE HEALTHY CHILD 12 hrs.

- Growth & development ---. Principles & factors affecting growth & development.
- Assessment of growth and development

- Growth & development from birth to adolescence, needs of normal children through stages of development and parental guidance.
- Nutritional needs of infants and children principles of paediatric nutrition
 - Breast feeding
 - Artificial feeding & Weaning
- Infancy ,toddler, pre schooler, school age child and adolescents.
- Role of play in children - Need, importance and value of play, selection of play material and nurse's role.
- Preventive immunization

UNIT III

CARE OF THE NEWBORN.

4 hrs.

- Characteristics and care of a newborn.
- Asphyxia neonatorum & neonatal resuscitation.
- Low birth weight infants
- Nursing management of common neonatal disorders.
 - Neonatal jaundice & photo therapy
 - Neonatal sepsis & hypoglycemia
 - Organization of Neonatal units, Prevention & Control of infection
 - Critical care concept in child health

UNIT IV

NURSING MANAGEMENT OF COMMON CHILDHOOD ILLNESS.

32 hrs.

- (a) **Nutritional deficiency disorders.**
 - Protein energy malnutrition
 - Vitamin deficiency disorders (Rickets, scurvy, Vit A deficiency disorders)
- (b) **Respiratory diseases & disorders .**
 - Acute bronchitis & Bronchiolitis
 - Pneumonia
 - Branchial Asthama
- (c) **Disorders of the gastro-intestinal system.**
 - Acute gastroenteritis
 - Tracheo esophageal fistula
 - Cleft lip and palate
 - Hypertrophic Pyloric Stenosis
 - Hirschsprung's disease & Intestinal Obstruction
 - Anorectal anomalies
- (d) **Cardiovascular system**
 - Rheumatic fever
 - Congenital heart diseases
 - Congestive cardiac failure
- (e) **Disorders of Genito urinary System**
 - Acute glomerulo nephritis
 - Nephrotic Syndrome
 - Wilm's tumour & Congenital disorders
- (f) **Neurological disorders**
 - Convulsions in children & Epilepsy

- Meningitis & Encephalitis
- Hydrocephalus, Meningocele and meningocele
- (g) **Haematological disorders**
 - Anaemia & Thalassemia
 - Idiopathic thrombocytic Purpura & Hemophilia
 - Leukaemia
- (h) **Endocrine Disorders**
 - Juvenile Diabetes Mellitus
- (i) **Orthopaedic Disorders**
 - CTEV (Club foot) , Congenital hip dislocation
 - Fractures
- (j) **Disorders of Skin, Eye & ENT**
 - Skin** : Eczema, urticaria, scabies, pediculosis, worm infestations
 - Eye & ENT** : Tonsillitis, Deafness, Otorrhoea, Otitis Media, Cong Cataract, hypertelorism
- (k) **Communicable Diseases in Children**
 - Measles/rubella, Chicken pox
 - Diphtheria, whooping cough
 - Tetanus, Poliomyelitis
 - AIDS
 - Tuberculosis
- (m) **Paediatric Emergencies**
 - Accidents, Poisoning ,Stings & Bites
 - Foreign bodies, Haemorrhage & Drowning Burns

UNIT V

MANAGEMENT OF BEHAVIOURAL PROBLEMS IN CHILDREN CHILDHOOD ILLNESS.

04 hrs.

- Enuresis, Encoprecis, temper tantrums somnambulism, juvenile delinquency, speech defects, tics, pica, antisocial behaviour
- **Management of challenged children**
Need for early diagnosis ,treatment and rehabilitation of Mentally challenged – Mental retardation
- Physically challenged – Cerebral palsy
Socially challenged – Child abuse & child labour

MENTAL HEALTH NURSING

Placement: IInd Year

Time Allotted Theory : 60 hrs.

Practical : 240 hrs.

COURSE DESCRIPTION

This course enables the students to recognize and appreciate the causes, symptoms and process of abnormal human behavior.

It also introduces the student to the present day treatment modalities in the light of psychological, social and cultural factors affecting human behavior.

This course helps the student to learn principles of mental health and psychiatric nursing and to develop skills in the management of the mentally ill in hospital and community.

OBJECTIVES : At the end of course, the student will

1. Identify and describe the philosophy and principles of mental health nursing.
2. Describe the historical development of mental health and psychiatric nursing.
3. Classify mental disorders.
4. Develop skills in history taking and performing mental status examination.
5. Describe etiological factors, psycho-pathology, clinical features, diagnostic criteria and treatment methods used for mental disorders.
6. Manage the patients with various mental disorders.
7. Communicate therapeutically with patients and their families.
8. Identify role of the nurse in preventive psychiatry.
9. Identify the legal aspects in practice of mental health and psychiatric nursing.

COURSE CONTENTS

UNIT-I	INTRODUCTION AND HISTORICAL DEVELOPMENT	5hrs.
-	Review of the concept of mental health and illness & mental mechanisms.	
-	History of psychiatry	
-	Historical development of mental health nursing.	
-	Philosophy, principles of mental health and psychiatric nursing.	
-	Theoretical approaches to Psychiatric Nursing.	
-	Concept of normal and abnormal behavior.	
-	Role and qualities of mental health and psychiatric nurse	
-	Mental health team and functions of team members.	
-	Legal aspects in psychiatry and mental health services.	
UNIT II	CLASSIFICATION AND ASSESSMENT OF MENTAL DISORDERS	5 hrs.
-	Terminologies used in Psychiatry	
-	Classification of mental disorders- ICD-10 classification	
-	Etiological factors and psychopathology of mental disorders	
-	History taking and mental status examination.	
UNIT III	THERAPEUTIC COMMUNICATION	4 hrs.
-	Communication process	
-	Interview skill	
-	Therapeutic communication techniques.	
-	Nurse patient Relationship.	
-	Therapeutic impasse and it's management	
-	process recording.	

UNIT IV	MANAGEMENT OF MENTAL DISORDERS	20 hrs.
-	Etiological factors, psychopathology, types, clinical features diagnostic criteria, treatment and nursing management of patient with following disorders.	
-	<u>Neurotic Disorders:</u>	
	- Anxiety disorders - General & Panic	
	- Depressive Neurosis	
	- Obsessive Compulsive Neurosis.	
	- Phobic Neurosis	
	- Hypochondriacal Neurosis.	
	- Stress related and Somatoform disorders	
	- Hysterical disorder.	
-	<u>Psychotic Disorders:</u>	
	- Schizophrenic disorders	
	- Affective disorders	
-	Organic Brain Syndromes – acute & chronic	
-	Epileptic disorders	
-	Sleep disorders	
-	Psychosomatic disorders	
-	Personality disorders	
-	Sexual Disorders	
-	Disorders of childhood:- Specific developmental disorders, Pervasive developmental disorders, Attention deficit disorders , Conduct disorders, Enuresis & Encopresis, Speech Disorders, Habit disorders, other disorders.	
-	Adolescent disorders –Attention deficit hyper activity disorder, conduct disorder, substance abuse, depression and suicide, eating disorders, running away.	
UNIT V	MANAGEMENT OF PATIENT WITH SUBSTANCE USE DISORDERS	3 hrs
-	Substance use and misuse	
-	Dependence, intoxication and withdrawal	
	- Classification of psychoactive substances	
	- Etiological & contributory factors	
	- Psychopathology	
	- Clinical features	
	- Diagnostic criteria	
-	Treatment and nursing management of patient with substance use disorders.	
-	Preventive and rehabilitative aspects in substance abuse.	
UNIT-VI	MANAGEMENT OF MENTAL SUB-NORMALITY / MENTALLY CHALLENGED-	2hrs
-	Classification of mental sub-normality	
-	Etiological factors	
-	Psychopathology	
-	Psychometric assessment	
-	Diagnostic criteria and management of sub-normality	
UNIT VII	PSYCHIATRIC EMERGENCIES	4 hrs.
-	Types of emergencies	
-	Psychopathology, Clinical feature, Assessment and diagnosis, Treatment and nursing management of patient with psychiatric emergencies such as-	
-	Suicide, Stupor & Catatonic syndrome, Aggression, other psychiatric emergencies	
-	Crisis Intervention therapy	
UNIT VIII	THERAPEUTIC MODALITIES-	12 hrs.
-	Principles, indication, contraindications and role of nurse in various treatment	

method:

- Pharmacotherapy
- Therapeutic community and Milieu therapy
- Psychotherapy- psychoanalysis, Behavior therapy, Cognitive Therapy, Supportive Therapy, Hypnosis, Abreaction, Relaxation Therapies, Biofeedback.
- Group therapy
- Family therapy
- Occupational Therapy
- Electro convulsive therapy
- Other miscellaneous therapies.

UNIT IX PREVENTIVE PSYCHIATRY- 5 hrs.

- Model of prevention
- Role of nurse in preventive psychiatry
- Psychiatric social worker
- Community mental health nursing
- Community mental health Services and agencies
- National mental health programme

COMMUNITY HEALTH NURSING

Placement : IInd year

Time Allotted Theory : 60 Hrs.

Practical : 240 Hrs.

COURSE DESCRIPTION:

The course enables the students to acquire knowledge and understanding of the changing concepts of comprehensive community health nursing practice, the national health care delivery system and to participate in the delivery of community health nursing practice.

This course also broadens the understanding in public health nursing administration, responsibility of nurse for early case finding, health assessment and health education based on principles of primary health care, Nursing process approach and comprehensive nursing care to the individual, family and community.

OBJECTIVES : At the end of the course the student will

- 1) Explain the concept of various factors contributing the health of individual family and community.
- 2) Explain and analyze health need of individual family and community based on factors contributing to health and illness
- 3) Describe national health care delivery system.

- 4) Describes epidemiological methods and principles of prevention and control of illness in the community.
- 5) Study implementation of national programmes and role of CHN in prevention and control of diseases.
- 6) Identify the role of personnel working in the community health setup and appreciate the integrated approach to community health.
- 7) Plan the work of community health nurse and supervise the health workers.
- 8) Study concept of public health administration and role of nurse as manager and supervisor.

COURSE CONTENT :

UNIT I	COMMUNITY HEALTH AND COMMUNITY HEALTH NURSING	8 hrs.
	<ul style="list-style-type: none"> - Changing concepts of health - Determinants of health - Introduction to community health & CH Nursing - Principles of working in a community. - Primary health care - concepts and principles. - Role of nurse in promoting primary health care. - Health for all - concepts strategy for HFA. - Community health assessment and diagnosis. 	
UNIT II	FAMILY HEALTH CARE & SERVICES	10 hrs.
	<ul style="list-style-type: none"> - Concepts, Objectives scope & Principles of family health services. - Family as a unit of community health service. - Factors influencing family health and high-risk families. - Family Health assessment, Health risk families. 	

- Principles and technique of home visits.
- Nursing process in family & community health care. Establishing working relationship with the family.
- Working with families in relation to prevention of disease and promotion of health.
- Care of Sick, & care of physically handicapped and mentally retarded at home
- Family health records.

UNIT III HEALTH ADMINISTRATION IN INDIA. 10 hrs.

- Health care delivery system in India.
- Health planning, National health policy and Five Years plan
- Organization and administration of health services at central, state, district level and Rural Health Services (Panchayati Raj).
- Monitoring and evaluation and health services
- System of medicines.
- Centrally sponsored health schemes.
- Role of voluntary health organization & International Health agencies.
- Health team concept, Public health legislation.
- Community Health Nursing Administration.
- Role of health personnel in community health Practice.
- Training Programmes for various health workers.
- Management and supervision in community health nursing practice.

UNIT IV HEALTH EDUCATION (IEC Information, Education, Communication) 5 hrs.

- Aims, concepts and scope of health education.
- Communication and health education.
- Methods and media for health education in community.
- Planning for health education and role of nurse in I.E.C.
- Central Health Education Bureau.

UNIT V ROLE OF NURSE IN NATIONAL HEALTH PROGRAMMES. 15 hrs.

- Development of community health services in India.
- Major health problem in India.
- National health programme for communicable and Non-communicable disease.
- Maternal and child health programme.
- Nutritional programme.
- Family welfare
- School health Programme.
- Occupational Health Programme.
- Disaster Management.
- As a health team members.
- Records and reports in Community health.

UNIT VI EPIDEMIOLOGY. 7 hrs.

- Epidemiology - Definition, Concepts, aims, objectives and methods and Principles.
- Epidemiology - Theories and Models.
- Application of Epidemiological Principles in community health.
- Monitoring and surveillance.
- Levels of prevention of disease

- Introduction, definition and scope, legislation.
- Report, recording and compiling of vital statistics at the local State, National and International level.
- Definitions and methods of computing vital statistics.
- Methods of presenting data.
- Management Information System.

**CLINICAL SPECIALITY – I MEDICAL
SURGICAL NURSING**

Hours of
instruction
Theory:

150 Hours
Practical: 650 Hours
Total : 800Hours

Course Description

This course is common for the students undergoing clinical speciality-II in neuro science nursing/cardiovascular & thoracic nursing/critical care nursing/oncology nursing/orthopaedic and rehabilitation nursing/nephro & urology nursing, gastroenterology nursing/ geriatric nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends & issues in the field of Medical –Surgical Nursing as a speciality.
2. Apply concepts & theories related to health promotion.
3. Appreciate the client as a holistic individual.
4. Perform physical, psychosocial assessment of Medical – Surgical patients.
5. Apply Nursing process in providing care to patients.
6. Integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness.
7. Recognize and manage emergencies with Medical- Surgical patients.
8. Describe various recent technologies & treatment modalities in the management of critically ill patients.
9. Appreciate the legal & ethical issues relevant to Medical – Surgical Nursing.
10. Prepare a design for layout and management of Medical – Surgical Units.

11. Appreciate the role of alternative systems of Medicine in care of patients.
12. Incorporate evidence based Nursing practice and identify the areas of research in the field of Medical – Surgical Nursing.
13. Recognize the role of Nurse practitioner as a member of the Medical – Surgical health team.
14. Teach Medical – Surgical Nursing to undergraduate nursing students & in-service nurses.

COURSE CONTENT:

Unit	Hours	Content
I	5	<p>Introduction:</p> <ul style="list-style-type: none"> □ Historical development of Medical- Surgical Nursing in India. □ Current status of health and disease burden in India. □ Current concept of health. □ Trends & issues in Medical – Surgical Nursing. □ Ethical & cultural issues in Medical – Surgical Nursing. □ Rights of patients. □ National health policy, special laws & ordinances relating to older people. □ National goals. □ Five year plans. □ National health programs related to adult health.
II	20	<p>Health Assessment of patients</p> <ul style="list-style-type: none"> □ History taking. □ Physical examination of various systems. □ Nutritional assessment. □ Related investigations and diagnostic assessment.

CLINICAL SPECIALTY –I

CHILD HEALTH (PAEDIATRIC) NURSING

Placement : 1st Year

Hours of Instruction
Theory 150 Hours
Practical 650 Hours
Total : 800Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and pediatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
3. Appreciate the child as a holistic individual
4. Perform physical, developmental, and nutritional assessment of pediatric clients
5. Apply nursing process in providing nursing care to neonates & children
6. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
7. Recognize and manage emergencies in neonates
8. Describe various recent technologies and treatment modalities in the management of high risk neonates
9. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
10. Prepare a design for layout and management of neonatal units
11. Incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatal nursing
12. Recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal health team
13. Teach pediatric nursing to undergraduate students & in-service nurses

Course Content

Unit	Hours	Content
I	10	Introduction <ul style="list-style-type: none"> □ Historical development of Pediatrics and Pediatric Nursing in India; □ Current status of child health in India; □ Trends in Pediatrics and Pediatric Nursing, □ Ethical and cultural issues in pediatric care □ Rights of children □ National health policy for children, special laws and ordinances relating to children. □ National goals, □ Five yearplans, □ National health programs related to child health.
II	10 Hrs	Assessment of pediatric clients <ul style="list-style-type: none"> □ History taking □ Developmental assessment □ Physical assessment □ Nutritional assessment □ Family assessment
III	10	Hospitalized child <ul style="list-style-type: none"> □ Meaning of hospitalization of the child, preparation for hospitalization, effects of hospitalization on the child and family □ Stressors and reactions related to developmental stages, play activities for ill hospitalized child. □ Nursing care of hospitalized child and family -principles and practices
IV	15	Pre-natal Pediatrics <ul style="list-style-type: none"> □ Embryological and fetal development, Prenatal factors influencing growth and development of fetus, □ Genetic patterns of common pediatric disorders, chromosomal aberrations, genetic assessment and counseling legal and ethical aspects of genetic, screening and counseling role of nurse in genetic counseling, □ Importance of prenatal care and role of pediatric nurse.

**CLINICAL SPECIALITY-I OBSTETRIC AND
GYNAECOLOGICALNURSING**

Placement : 1st year

Hours of Instruction

Theory :
150 Hours.

Practical : 650 Hours.
Total : 800 Hours.

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynaecological nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends in the field of midwifery, obstetrics and gynaecology as a speciality.
2. Describe the population dynamics and indicators of maternal and child health
3. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
4. Provide comprehensive nursing care to women during reproductive period and newborns.
5. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing.
6. Identify and analyze the deviations from normal birth process and refer appropriately.
7. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
8. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation
9. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing.
10. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.
11. Describe the recent advancement in contraceptive technology and birth control measures
12. Appreciate the legal and ethical issues pertaining to obstetric and gynaecological nursing

Course Content

Units	Hours	Content
I	10	<p>Introduction</p> <ul style="list-style-type: none"> □ Historical and contemporary perspectives □ Epidemiological aspects of maternal and child health □ Magnitude of maternal and child health problems □ Issues of maternal and child health : Age, Gender, Sexuality, psycho Socio cultural factors □ Preventive obstetrics □ National health and family welfare programmes related to maternal and child health: health care delivery system- National Rural health mission, Role of NGO's □ Theories, models and approaches applied to midwifery practice □ Role and scope of midwifery practice: Independent Nurse midwifery practitioner □ Legal and Ethical issues: Code of ethics and standards of midwifery practice, standing orders □ Evidence based midwifery practice □ Research priorities in obstetric and gynaecological nursing.
II	15	<p>Human reproduction</p> <ul style="list-style-type: none"> □ Review of anatomy and physiology of human reproductive system: male and female □ Hormonal cycles □ Embryology □ Genetics, teratology and counseling □ Clinical implications
III	25	<p>Pregnancy</p> <ul style="list-style-type: none"> □ Maternal adaptation : Physiological, psychosocial <ul style="list-style-type: none"> • Assessment – Maternal and foetal measures Maternal measures: History taking , examination-General, physical and obstetrical measure, identification of high risk, • Foetal measure- clinical parameters, biochemical- human estriol, Maternal Serum Alfa Feto Protein, Acetyl Choline esterase (AchE), Triple Test Aminocentesis, Cordocentesis, chorionic villus sampling (CVS)), • Biophysical- (US IMAGING, Foetal movement count, Ultra Sonography, Cardiotocography, cardiotomography, Non Stress Test(NST), Contraction stress test(CST), amnioscopy, foetoscopy, • Radiological examination, □ Interpretation of diagnostic tests and nursing implications □ Nursing management of the pregnant women, minor disorders of pregnancy and management, preparation for child birth and parenthood, importance of institutional delivery , choice of birth setting, importance and mobilizing of transportation, prenatal counseling, role of nurse and crisis intervention, identification of high risk pregnancy and refer □ Alternative/complementary therapies

Units	Hours	Content
IV	25	<p>Normal Labour and nursing management:</p> <ul style="list-style-type: none"> □ Essential factors of labour □ Stages and onset <p>First stage: Physiology of normal labour</p> <ul style="list-style-type: none"> • Use of partograph: Principles, use and critical analysis, evidence based studies • Analgesia and anaesthesia in labour • Nursing management <p>Second stage</p> <ul style="list-style-type: none"> • Physiology, intrapartum monitoring • Nursing management. • Resuscitation, immediate newborn care and initiate breast feeding (Guidelines of National neonatology forum of India) <p>Third stage</p> <ul style="list-style-type: none"> • Physiology and nursing management <p>Fourth stage – Observation, critical analysis and Nursing management.</p> <ul style="list-style-type: none"> • Various child birth practice: water birth, position change etc • Evidence based practice in relation to labour intervention <p>Role of nurse midwifery practitioner</p> <ul style="list-style-type: none"> • Alternative/complementary therapies
V	20	<p>Normal puerperium and nursing management</p> <ul style="list-style-type: none"> □ Physiology of puerperium □ Physiology of lactation, lactation management, exclusive breast feeding, Baby friendly hospital initiative (BFHI) □ Assessment of postnatal women. □ Minor discomforts and complications of puerperium □ Management of mothers during puerperium: Postnatal exercises, Rooming in, bonding, warm chain □ Evidence based studies <p>Role of nurse midwifery practitioner</p> <ul style="list-style-type: none"> • Alternative/complementary therapies
VI	20	<p>Normal Newborn</p> <ul style="list-style-type: none"> □ Physiology and characteristics of normal newborn □ Physical and Behavioural assessment of newborn □ Needs of newborn □ Essential newborn care: Exclusive breast feeding, Immunization, Hygiene measures, Newborn nutrition □ Organization of neonatal care, services (Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU □ Observation and care of newborn □ Parenting process

Units	Hours	Content
VII	10	<p>Pharmacodynamics in obstetrics</p> <ul style="list-style-type: none"> □ Drugs used in pregnancy, labour, post partum and newborn □ Calculation of drug dose and administration □ Effects of drugs used □ Anaesthesia and analgesia in obstetrics □ Roles and responsibilities of midwifery nurse practitioner □ Standing orders and protocols and use of selected life saving drugs and interventions of obstetric emergencies approved by the MOHFW
VIII	10	<p>Family welfare services</p> <ul style="list-style-type: none"> □ Population dynamics □ Demography trends: vital statistics, calculation of indicators especially maternal and neonatal mortality rates and problems and other health problems □ Recent advancement in contraceptive technology □ Role of nurses in family welfare programmes in all settings □ Role of independent nurse midwifery practitioner □ Family life education □ Evidence based studies □ Information, Education and Communication (IEC) □ Management information and evaluation system (MIES) □ Teaching and supervision of health team members
IX	5	<p>Infertility</p> <ul style="list-style-type: none"> □ Primary and secondary causes □ Diagnostic procedures □ Counseling: ethical and legal aspects of assisted reproductive technology (ART) □ Recent advancement in infertility management. □ Adoption procedures <p>Role of nurses in infertility management.</p>
X	5	<p>Menopause</p> <ul style="list-style-type: none"> □ Physiological, psychological and social aspects □ Hormone Replacement Therapy □ Surgical menopause □ Counseling and guidance <p>Role of midwifery nurse practitioner</p>
XI	5	<p>Abortion</p> <ul style="list-style-type: none"> □ Types, causes □ Legislations, Clinical rights and professional responsibility □ Abortion procedures □ Complications □ Nursing management <p>Role of midwifery nurse practitioner</p>

**CLINICAL SPECIALITY- I COMMUNITY
HEALTH NURSING**

Placement : 1st Year

Hours of Instructions
Theory 150 hours
Practical 650hours
Total 800hours

Course Description

The course is designed to assist students in developing expertise and in- depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

Objectives

At the end of the course, the student will be able to:

1. Appreciate the history and development in the field of Community Health and Community Health Nursing.
2. Appreciate role of individuals and families in promoting health of the Community.
3. Perform physical, developmental and nutritional assessment of individuals, families and groups.
4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the people.
5. Apply nursing process approach while providing care to individuals, families, groups and community.
6. Integrate the concepts of family centered nursing approach while providing care to the community.
7. Recognize and participate in the management of emergencies, epidemics and disasters.
8. Apply recent technologies and care modalities while delivering community health nursing care.
9. Appreciate legal and ethical issues pertaining to community health nursing care.
10. Conduct community health nursing care projects.
11. Participate in planning, implementation and evaluation of various national health and family welfare programmes at local, state and the national level.
12. Incorporate evidence based nursing practice and identify the areas of research in the community settings.

13. Participate effectively as a member of Community Health team.
14. Coordinate and collaborate with various agencies operating in the community by using inter-sectoral approach.
15. Teach community health nursing to undergraduates, in-service nurses and the community health workers.
16. Demonstrate leadership and managerial abilities in community health nursing practice

Course Content

Unit	Hours	Content
I	10	Introduction <ul style="list-style-type: none"> □ Historical development of Community Health and Community health Nursing- World and India, various health and family welfare committees □ Current status, trends and challenges of Community Health Nursing □ Health status of the Community-community diagnosis □ Scope of Community health Nursing practice □ Ethical and legal issues □ Socio-cultural issues in Community health Nursing □ National Policies, plans and programmes <ul style="list-style-type: none"> • National health policy • National Population policy • National Health and welfare Programmes • National Health goals/ indicators/ Millennium developmental goals(MDG)/ Strategies • Planning process: Five year plans • National Rural Health Mission • Panchayat raj institutions
II	10	Health <ul style="list-style-type: none"> □ Concepts, issues □ Determinants □ Measurements □ Alternate systems for health promotion and management of health problems □ Health economics □ Health technology □ Genetics and health □ Waste disposal □ Eco system
III	15	Population dynamics and control <ul style="list-style-type: none"> □ Demography □ Transition and theories of population □ National population policy □ National population programmes □ Population control and related programmes □ Methods of family limiting and spacing □ Research, Census, National Family Health Survey

Unit	Hours	Content
IV	30	<p>Community health Nursing</p> <ul style="list-style-type: none"> □ Philosophy, Aims, Objectives, Concepts, Scope, Principles, Functions □ Community health Nursing theories and models □ Quality assurance: Community health Nursing standards, competencies, Monitoring community health nursing, nursing audits □ Family nursing and Family centered nursing approach □ Family health nursing process <ul style="list-style-type: none"> ○ Family health assessment ○ Diagnosis ○ Planning ○ Intervention ○ Evaluation □ Nursing care for special groups: children, adolescents, adults, women, elderly, physically and mentally challenged- Urban and rural population at large □ Community nutrition □ Concept, role and responsibilities of community health Nurse practitioners/nurse midwifery practitioners-decision making skills, professionalism, legal issues <p style="text-align: right;">Hours of Instruction Theory 150 Hours Practical 150 Hours Total : 300Hours</p>
V	45	<p>Maternal and neonatal care</p> <ul style="list-style-type: none"> □ IMNCI(Integrated Management of Neonatal And Childhood Illnesses) module □ Skilled Birth Attendant (SBA)module
VI	15	<ul style="list-style-type: none"> □ Disaster nursing (INC module on Reaching out: Nursing Care in emergencies)
VII	10	<p>Information, education and communication</p> <ul style="list-style-type: none"> □ IEC/BCC: Principles and strategies □ Communication Skills □ Management information and evaluation system: Records and reports <p style="text-align: center;">CURRICULUM</p> <ul style="list-style-type: none"> □ Information technology □ Tele-medicine and teleNURSING EDUCATION □ Journalism □ Mass media □ Folk media
VIII	15	<p>Health care delivery system: Urban, rural, tribal and difficult areas</p> <ul style="list-style-type: none"> □ Health organization: National, State, District, CHC, PHC, Sub Centre, Village - Functions, Staffing, pattern of assistance, layout, drugs, equipments and supplies, Roles and Responsibilities of DPHNO □ Critical review of functioning of various levels, evaluation studies, recommendations and nursing perspectives □ Alternative systems of medicine □ Training and supervision of health workers

This course is designed to assist students to develop a broad understanding of Fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to:

1. Explain the aims of education, philosophies, trends in education and health: its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing.
9. Demonstrate skill in guidance and counseling.
10. Describe the problems and issues related to administration of nursing curriculum including selection and organization of clinical experience.
11. Explain the development of standards and accreditation process in nursing education programs.
12. Identify research priorities in nursing education.
13. Discuss various models of collaboration in nursing education and services.

14. Explain the concept, principles, steps, tools and techniques of evaluation
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

CLINICAL SPECIALITY – II MEDICAL

SURGICAL NURSING

SUB SPECIALITY – CARDIO VASCULAR AND THORACIC NURSING

Placement : II year

Hours of Instruction

Theory : 150 hours.
Practical : 950 hours.
Total : 1100hours.

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as Cardio vascular and Thoracic Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to cardio vascular and thoracic Nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of cardio vascular and thoracic conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions
7. Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.
8. Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
9. Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
10. Appreciate team work & coordinate activities related to patient care.
11. Practice infection control measures.
12. Identify emergencies and complications & take appropriate measures

13. Discuss the legal and ethical issues in cardio vascular and thoracic nursing
14. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
15. Appreciate the role of alternative system of medicine in care of patient
16. Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
17. Identify the sources of stress and manage burnout syndrome among health care providers.
18. Teach and supervise nurses and allied health workers.
19. Design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursing practice.

Content Outline

Unit	Hours	Content
I	5	Introduction <ul style="list-style-type: none"> □ Historical development, trends and issues in the field of cardiology. □ Cardio vascular and thoracic conditions – major health problem. □ Concepts, principles and nursing perspectives □ Ethical and legal issues □ Evidence based nursing and its application in cardio vascular and thoracic nursing (to be incorporated in all the units)
II	5	Epidemiology <ul style="list-style-type: none"> □ Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitus etc □ Health promotion, disease prevention, Life style modification □ National health programs related to cardio vascular and thoracic conditions □ Alternate system of medicine □ Complementary therapies
III	5	Review of anatomy and physiology of cardio vascular and respiratory system <ul style="list-style-type: none"> □ Review of anatomy and physiology of heart, lung, thoracic cavity and blood vessels. Embryology of heart and lung. □ Coronary circulation □ Hemodynamics and electro physiology of heart. □ Bio-chemistry of blood in relation to cardio pulmonary function.
IV	20	Assessment and Diagnostic Measures: <ul style="list-style-type: none"> □ History taking □ Physical assessment <ul style="list-style-type: none"> • Heart rate variability: Mechanisms , measurements, pattern, factors, impact of interventions on HRV □ Diagnostic tests <ul style="list-style-type: none"> • Hemodynamic monitoring: Technical aspects, monitoring, functional hemodynamic indices, ventricular function indices,

Unit	Hours	Content
		<p>output measurements (Arterial and swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand</p> <ul style="list-style-type: none"> • Radiologic examination of the chest: interpretation, chest film findings • Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination <ul style="list-style-type: none"> - ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance, • Echocardiography: technical aspects, special techniques, echocardiography of cardiac structures in health and disease, newer techniques • Nuclear and other imaging studies of the heart: Magnetic Resonance Imaging. • Cardio electrophysiology procedures: diagnostic studies, interventional and catheter ablation, nursing care • Exercise testing: indications and objectives, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period • Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data • Pulmonary function test: Bronchoscopy and graphies • Interpretation of diagnostic measures • Nurse’s role in diagnostic tests <p>□ Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, cardiac enzyme studies, Serum Concentration of Selected drugs.</p> <p>□ Interpretation and role of nurse</p>

III	5	<p>Cardiac rehabilitation</p> <ul style="list-style-type: none"> □ Process □ Physical evaluation □ Life style modification □ Physical conditioning for cardiovascular efficiency through exercise □ Counseling □ Follow up care
IV	5	<p>Intensive Coronary Care Unit/intensive cardio thoracic unit:</p> <ul style="list-style-type: none"> □ Quality assurance <ul style="list-style-type: none"> • Standards, Protocols, Policies, Procedures • Infection control; Standard safety measures • Nursing audit • Design of ICCU/ICTU • Staffing; cardiac team • Burn out syndrome □ Nurse's role in the management of I.C.C.U and ICTU. □ Mobile coronary care unit. □ Planning inservice educational programme and teaching

CLINICAL SPECIALITY – II OBSTETRIC AND GYNAECOLOGICALNURSING

Placement - II Year

Hours of Instruction	
Theory:	150 hrs
Practical	950 hrs
Total	1100 hrs

Course Description

This course is designed to assist the student in developing expertise and in- depth understanding in the field of Obstetric and gynecological Nursing .It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological nursing.

Objectives

At the end of the course, the student will be able to:

1. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment

- of women with obstetric and gynaecological conditions
2. Perform physical, psychosocial, cultural & spiritual assessment
 3. Demonstrate competence in caring for women with obstetrical and gynaecological conditions
 4. Demonstrate competence in caring for high risk newborn.
 5. Identify and Manage obstetrical and neonatal emergencies as per protocol.
 6. Practice infection control measures
 7. Utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical , gynecological and neonatal care.
 8. Demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatal care
 9. Teach and supervise nurses and allied health workers.
 10. Design a layout of speciality units of obstetrics and gynecology
 11. Develop standards for obstetrical and gynaecological nursing practice.
 12. Counsel women and families
 13. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecological nursing
 14. Function as independent midwifery nurse practitioner

Contents Outline

Unit	Hours	Content
I	25	<p>Management of problems of women during pregnancy</p> <ul style="list-style-type: none"> □ Risk approach of obstetrical nursing care , concept &goals. □ Screening of high-risk pregnancy, newer modalities of diagnosis. □ Nursing Management of Pregnancies at risk-due to obstetrical complication <ul style="list-style-type: none"> • Pernicious Vomiting. • Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblastic diseases. • Hemorrhage during late pregnancy, ante partum hemorrhage, Placenta praevia, abruptio placenta. • Hypertensive disorders in pregnancy, pre-eclampsia, eclampsia, Hemolysis Elevated liver enzyme Low Platelet count (HELLP) • Iso-immune diseases. Rh and ABO incompatibility • Hematological problems in pregnancy. • Hydramnios-oligohydramnios • Prolonged pregnancy- post term, post maturity. • Multiple pregnancies. • Intra uterine infection & pain during pregnancy. • Intra Uterine Growth Retardation(IUGR), Premature Rupture of Membrane(PROM), intra uterine death

**CLINICAL SPECIALITY - II PSYCHIATRIC
(MENTAL HEALTH) NURSING**

Placement: II Year

Hours of Instruction
Theory 150 hrs
Practical 950 hrs
Total : 1100Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of patients with mental disorders in hospital and community
2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
4. Identify and manage psychiatric emergencies.
5. Provide nursing care to critically ill patients with mental disorders
6. Utilize the recent technology and various treatment modalities in the management of patients with mental disorders
7. Demonstrate skills in carrying out crisis intervention.
8. Appreciate the legal and ethical issues pertaining to psychiatric nursing.
9. Identify areas of research in the field of psychiatric nursing.
10. Prepare a design for layout and describe standards for management of Psychiatric units/emergency units/hospitals
11. Teach psychiatric nursing to undergraduate students & in-service nurses.

Course Content

Unit	Hours	Content
I	2	Principles and practice of Psychiatric nursing <input type="checkbox"/> Review
II	10	Crisis Intervention <input type="checkbox"/> Crisis, Definition <input type="checkbox"/> Phases In The Development of A Crisis <input type="checkbox"/> Types of Crisis; Dispositional , Anticipated Life Transitions Traumatic Stress, Maturation/ Development , Reflecting Psychopathology <input type="checkbox"/> Psychiatric Emergencies and their management <input type="checkbox"/> Grief and grief reaction <input type="checkbox"/> Crisis Intervention; Phases <input type="checkbox"/> Post traumatic stress disorder (PTSD) <input type="checkbox"/> Role of the Nurse
III	4	Anger/ Aggression Management <input type="checkbox"/> Anger and Aggression, Types, Predisposing Factors <input type="checkbox"/> Management <input type="checkbox"/> Role of The Nurse

**CLINICAL SPECIALTY –II PEDIATRIC
(CHILD HEALTH) NURSING**

Placement : II Year

Course Description

Hours of Instruction
Theory 150 hours
Practical 950 hours Total :
1100hours

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
3. Recognize and manage emergencies in children
4. Provide nursing care to critically ill children
5. Utilize the recent technology and various treatment modalities in the management of high riskchildren
6. Prepare a design for layout and describe standards for management of pediatric units/hospitals
7. Identify areas of research in the field of pediatricnursing

Course Content

CLINICAL SPECIALITY – II COMMUNITY

HEALTH NURSING

Placement : II Year

Hours of Instruction
Theory- 150 hours
Practicals- 950 hours
Total- 1100 hrs

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of community health nursing. It will help students to develop advanced skills for nursing intervention in various aspects of community health care settings. It will enable the student to function as community health Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of community health nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to community health Nursing- reproductive and child health, school health, Occupational health, international health, rehabilitation, geriatric and mental health.
2. Apply epidemiological concepts and principles in community health nursing practice
3. Perform community health assessment and plan health programmes
4. Describe the various components of Reproductive and child health programme.
5. Demonstrate leadership abilities in organizing community health nursing services by using inter-sectoral approach.
6. Describe the role and responsibilities of community health nurse in various national health and family welfare programmes
7. Participate in the implementation of various national health and family welfare programme
8. Demonstrate competencies in providing family centered nursing care independently
9. Participate/Conduct research for new insights and innovative solutions to health problems
10. Teach and supervise nurses and allied health workers.
11. Design a layout of sub center/Primary health center/Community health centre and develop standards for community health nursing practice.

Content Outlines

Unit	Hours	Content
I	20	<p>Epidemiology</p> <ul style="list-style-type: none"> □ Introduction <ul style="list-style-type: none"> • Concept, scope, definition, trends, History and development of modern Epidemiology • Contribution of epidemiology • Implications □ Epidemiological methods □ Measurement of health and disease: □ Health policies □ Epidemiological approaches <ul style="list-style-type: none"> • Study of disease causatives • Health promotion • Levels of prevention □ Epidemiology of <ul style="list-style-type: none"> • Communicable diseases • Non-communicable diseases □ Emerging and re-emerging diseases Epidemics □ National Integrated disease Surveillance Programme □ Health information system □ Epidemiology study and reports □ Role of Community health nurse
Unit II	40	<p>National Health and Family Welfare Programmes</p> <ul style="list-style-type: none"> □ Objectives, Organisation/manpower/resources, Activities, Goals, inter-sectoral approach, implementation, item/purpose, role and responsibilities of community health nurse: <ul style="list-style-type: none"> • National Vector Borne Disease Control Programm (NVBDCP) • National Filaria Control Programme • National Leprosy Eradication Programme • Revised national TB Control Programme • National Programme for Control of Blindness • National Iodine Deficiency disorders Control Programme • National Mental Health Programme • National AIDS Control Programme • National Cancer Control Programme • RCH I and II • Non- communicable disease programmes • NRHM <ul style="list-style-type: none"> - Health Schemes: <ul style="list-style-type: none"> * ESI * CGHS * Health Insurance

Unit	Hours	Content
III	15	<p>School Health</p> <ul style="list-style-type: none"> □ Introduction: definition, concepts, objectives,. □ Health assessment, Screening, identification, referral and follow up, □ Safe environment □ Services, programmes and plans- first aid, treatment of minor ailments □ Inter-sectoral coordination □ Adolescent health □ Disaster, disaster preparedness, and management □ Guidance and counseling □ School health records - maintenance and its importance □ Roles and responsibilities of community health nurse

Changes in the contents of syllabus as per MOM of BOS meeting conducted on 24/12/2018

A meeting of Board of Studies in architecture was conducted on 24th December 2018 to discuss the feed by faculty members for implemented course of B.Arch CBCS 2015 and M.Arch CBCS 2018. Both the courses are approved through university notification 925 and in academic council meeting conducted on 4th December 2018. It is decided by the BOS in the meeting that the feedback should be carefully considered for next revision of syllabus in the syllabus formation meetings after detailed discussion. The specific suggestions for immediate action are follows for **B.Arch (CBCS 2015 course).**

1. **Working Drawing I (B.Arch CBCS 2015 amended in 2018)**- 'Municipal Drawing' needs to be included over and above the contents of the syllabus .
2. **Elective V-Sustainable architecture (B.Arch CBCS 2015 amended in 2018)**, the contents are revised as follows:

Aim: To understand the principles and practices of sustainable architecture.

- Concept of sustainable development and its relation to built environment
- Understanding relationship between climate and human comfort
- Understanding sustainable building design principles and practices

 11/11/2019

Prof. Archana Gaikwad

Rules of Structure for First To Fifth Year B. Arch

Rule No.1: Eligibility for Admission

Eligibility Criteria: Students seeking admission to First year of Bachelors Degree Course in Architecture must fulfill the eligibility criteria laid down by Council of Architecture and the University as applicable from time to time.

Rule No.2: Duration and stages of the course (as per Council of Architecture)

- The architecture course shall be of minimum duration of 5 academic years/ 10 semesters of approximately 18 working weeks each inclusive of 90 days of practical training in IX semester in a professional's office.
- The 5 years Bachelors Degree Course in Architecture shall be conducted in two stages.
- The First stage of the course shall be the first 3 academic years or 6 semesters of institutional academic studies. The First stage shall be completed within the stipulated time as prescribed by the Council of Architecture.
- The Second stage of the course shall be of 2 academic years/ 4 semesters including 90 days (15-18 weeks) of practical training.
- A candidate will be eligible to register as an architect under the Architects Act, 1972 only after successful completion of both the stages.

Rule No.3: Scheme of Assessment

A candidate to be eligible for the degree of Bachelor of Architecture will be required to appear for and pass all examinations as under:

Stage I

- Semester I Examination in Architecture (First Year Sem I)
- Semester II Examination in Architecture (First Year Sem II)
- Semester III Examination in Architecture (Second Year Sem III)
- Semester IV Examination in Architecture (Second Year Sem IV)
- Semester V Examination in Architecture (Third Year Sem V)
- Semester VI Examination in Architecture (Third Year Sem VI)

Stage II

- Semester VII Examination in Architecture (Fourth Year Sem VII)
- Semester VIII Examination in Architecture (Fourth Year Sem VIII)
- Semester IX Examination in Architecture (Final Year Sem IX)
- Semester X Examination in Architecture (Final Year Sem X)

-

Rule No. 4: Granting of Academic Term

Each semester shall comprise of Eighteen weeks (Minimum 90 working days).

The candidate will be permitted to appear for semester examination only if he/she has,

- 75% attendance in each course that constitute a head of passing, prescribed by the university.
- Satisfactory completion of the 100% term work prescribed for each course.
- Satisfactory conduct as a bonafide student

The Principal/ Director of the institution shall have the right to withhold the student from appearing for examination of a specific course if the above requirements are not fulfilled.

Rule No. 5: Progression Requisite

As general rule a student shall be allowed to keep the next year of study of the course if he/she has a backlog of not more than “**Six heads of passing**” in the preceding year.

Furthermore,

- A student shall be allowed to get admitted to Second Year B. Arch. course if he/she has a backlog of not more than **six heads** of passing at First year B. Arch (semester I and II considered together).
- A student shall be allowed to get admitted to Third Year B. Arch course, if he/she has cleared all the subjects of passing at First year B.Arch and if he/she has a backlog of not more than **six heads** of passing at Second Year B.Arch (semester III and IV considered together).
- A student shall be allowed to get admitted to Fourth Year B.Arch course if he/she has cleared all the subjects of passing at Second Year B.Arch (Semester III and IV considered together.) and if he/she has a backlog of not more than **six heads** of passing at Third Year B.Arch (semester V and VI considered together)
- A student shall be allowed to get admitted to Final Year B.Arch course if he/she has cleared all the subjects of passing at Third Year B. Arch (Semester V and VI considered together), and if he/she has a backlog of not more than **six heads** of passing at fourth Year B.Arch (semester VII and VIII considered together)

Rule No 6: Examinations

6.1. Conduct of Examinations

The university examinations for all the 10 semesters shall be conducted at the end of each semester by the University.

6.2. Pattern of Examination: The evaluation scheme for B.Arch comprises of;

University Examination (UE)

Internal Assessment (IA)

6.2.1: *University Examination*

UE will be conducted by the University and will be based on the entire syllabus. Assessment would be undertaken by internal examiner and external examiner jointly in equal weightage. Oral will be based on sessional work produced by the student covering entire syllabus.

The nature of assessment will vary depending upon the subject and its delivery and whether it is studio-based or theory based. Refer to detailed syllabus on the format of UE for individual subjects.

6.2.2: *Internal Assessment*

IA will be conducted by the Institution imparting B.Arch course. IA will be done by the teacher teaching the course through a continuous assessment system that is spread through the duration of course. The attendance will have weightage of 10 marks and 25 marks for IA of 40 marks and 100 marks respectively. For remaining at least **two** and a maximum **four** of the below components can be used for continuous assessment.

Individual faculty member shall have the flexibility to design the continuous assessment in a manner so as to evaluate students' capabilities across knowledge, skills and attitudes. IA may be undertaken through any or combination of the methods stated below:

- Seminar presentation
- Written Test /Open Book
- Reviews
- Essays
- Short answer questions
- Study of best practices /precedent study/field study
- Multiple choice questions/Quiz
- Projects/group projects/Dissertation
- Reflective Practical assignments
- Drawing Portfolios
- Report writings
- Learning logs/diaries

The faculty shall announce in advance the units based on which continuous assessment shall be conducted. This progressive assessment for the IA must be communicated by the Institute to the university as per the schedule declared by the university. Detailed records of continuous

assessment shall be maintained by the Institute. The student does not have facility of grade improvement, if he/she passes at IA in a course.

6.3: Assessment of Term work

- In respect of term work “due date” shall be fixed for the completion of each assignment and the same shall be collected on the due date.
- At the end of the semester term work shall be assessed jointly by the internal and external examiners from amongst the panel approved by the University.
- Performance of a candidate in viva-voce shall be assessed on basis of the depth of understanding of the principles involved.
- Students may use computers for preparing term work where nature of work is unique to an individual and stress is on content rather than skill. For common form of work, drawing and reports/notes shall be manually prepared.
- An examiner for any of the subjects of examinations shall have a minimum of 3 years teaching/ professional experience in his/her field of study.

Rule No. 7: Credits

- The credits are defined in terms of the student-time spent in hours which are divided into two parts such as face to face instruction and Notional (lectures and studio).
- The total credits to be earned by the student to achieve B.Arch degree will be 300credits.

Semester	I	II	III	IV	V	VI	VII	VIII	IX	X
Credits	30	30	30	30	30	30	30	30	30	30

- Where, one credit is equal to 1hour of Lectures and 1 hour of Studio.
- Note: If a student secure D grade in either or both IA and UE for a particular course credits earned by the student for that courses shall be zero

Rule No.8: Criteria for Passing

To pass in every semester examination and earn the assigned credits, a candidate must obtain minimum 40% marks in each head of passing.

- a) For all courses, Both UE and IA constitute separate heads of passing. In order to pass in such courses and earn the assigned credits

The student must obtain minimum grade point of 5.0(40% marks) at UE and also minimum grade point of 5.0 (40%) marks at IA.

Or

If he/she fails in IA, the student passes in the course provided he/she obtains a minimum of 25% in IA and grade point average(GPA) for course is at least 6.0(50%in aggregate).the GPA for a course will be calculated only if student passes at UE.

- b) A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog and clear heads of passing.
- c) Students with backlog in IA will have to present themselves and their work for progressive marking throughout the semester for which they intend to appear.

Rule No.9: Grading system

9.1: Conversion of Marks to Grade points and Grades.

The marks shall be converted to grade points and grades as given in table below.

Range of marks (out of 100)	Grade Point	Grade
$80 \leq \text{Marks} \leq 100$	10	O
$70 \leq \text{Marks} < 80$	9	A+
$60 \leq \text{Marks} < 70$	8	A
$55 \leq \text{Marks} < 60$	7	B+
$50 \leq \text{Marks} < 55$	6	B
$40 \leq \text{Marks} < 50$	5	C
Marks < 40	0	D

9.2: Performance

The performance of a student will be evaluated in terms of two indices, viz

- a) Semester Grade Point average (SGPA) which is grade point average for all the semester
- b) Cumulative Grade point average (CGPA) which is the grade point average for all the completed semesters at any point.

9.3: Semester Grade point average (SGPA)

SGPA measures the cumulative performance of a learner in all courses in a particular semester. SGPA is calculated by the formula

$$SGPA = \frac{\sum C_k \times GP_k}{\sum C_k}$$

Where C_k is the credit-value assigned to a course and GP_k is a GPA obtained by the learner in the course.

The SGPA shall be calculated up to two decimal place accuracy.

9.4: Cumulative Grade point average (CGPA)

CGPA measures the cumulative performance of a learner in all courses since his/her enrolment. CGPA is calculated by the formula

$$CGPA = \frac{\sum C_k \times GP_K}{\sum C_k}$$

Where C_k is the credit-value assigned to a course and GP_K is a GPA obtained by the learner in the course.

The CGPA shall be calculated up to two decimal place accuracy.

The CGPA calculated after the minimum credits specified for the programme are earned will be the final result.

9.5: Award of Honours

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are as given in table below

Range of CGPA	Final Grade	Letter Grade
$9.50 \leq CGPA \leq 10.00$	O	Outstanding
$9.00 \leq CGPA \leq 9.49$	A+	Excellent
$8.00 \leq CGPA \leq 8.99$	A	Very Good
$7.00 \leq CGPA \leq 7.99$	B+	Good
$6.00 \leq CGPA \leq 6.99$	B	Average
$5.00 \leq CGPA \leq 5.99$	C	Satisfactory
CGPA Below 5.00	F	Fail

Rule No.10: Introduction of this Curriculum

The new curriculum for the degree course in architecture B.Arch will be introduced from Academic Session 2015 -2016

- First year B.Arch Course from June 2015
- Second year B.Arch Course from June 2016
- Third year B.Arch Course from June 2017
- Fourth year B.Arch Course from June 2018
- Final year B.Arch Course From June 2019

Rule No 11: Completion

Completion of only Stage-I, shall not qualify the candidates for registration as an architect. Degree of Bachelors in architecture shall be awarded only after successful completion of stage II.

Registration as an architect by council of architecture will only be given as per the prevailing rule of Council of Architecture, India.

Degree Requirements

Earned credits: A candidate who has successfully completed all the Core courses and elective courses, not less than minimum number of credits prescribed shall be eligible to receive the degree.

Rule No.12: Subject Code

Code used for serial numbers of the subjects in the structure for B.Arch course shall be as follows (from left, five digit/alphabet code)

- First alphabet for faculty of engineering-K
- Second digit for Board of Studies of architecture
- Third digit representing the year of the course in architecture
- Fourth and Fifth digits representing number of that subject in the course structure of that particular year

								60				
		-	-	-					-	-	30	

Notations: L-Lectures, S-Studio

IA: Internal Assessment; UE: University Examination

Note 1: For practical training, a student is expected to work for standard office timings i.e. @ 8 hours a day and minimum five days per week. Student has to undergo minimum 15 -18 weeks (90 work days) of training per semester. The credit requirement for practical training as per circular No.265, pt.II.8 is 24. Since a student will spend the entire semester learning at an office as an intern he/she will be given the 30 credits which are consistent with the 30 credits that are allotted to all other semesters.

Note 2: The work from practical training will be assessed after the student completes the internship in this semester.

Note 3: Validity of training shall be only for a year after completion of training.

Semester – I

Architectural Design -I

Subject Code	K8101	Semester -I
Credits	6	Subject type-Core

Learning Objectives	
1	To acquire knowledge about elements of design and principles of design.
2	To explore and understand fundamentals of design central to architecture and space design.
3	To understand design as a composite process of elements, principles and fundamentals of design.

A. Learning Outcomes: Student will be able to	
1	explore elements of design, principles of design and fundamentals of design
2	assimilate the above three to understand comprehensive design process
3	learn and analyze built and/or non-built spaces with respect to above elements

Units	Contents
Unit I	Elements, Principles and Fundamentals of Design Introduction to <ul style="list-style-type: none"> - different Elements of design, - Principles of design and - Fundamentals of Design
Unit II	Design Process: Function <ul style="list-style-type: none"> - Introduction to ‘human dimensions’ (anthropometry, modes of measurement) - Introduction to function and circulation of various building types - Demonstration the relationship of the above two with elements and principals of design (form, organization, movement, openings, linkages, etc)
Unit III	Design Process: Structure <ul style="list-style-type: none"> - Introduction to different structural systems - Introduction to components of structure - Introduction to structural behavior of different materials
Unit IV	Design Process : Context <ul style="list-style-type: none"> - Introduction to buildings and climate - Introduction to building and site - Introduction to building and orientation - Analyze and demonstrate relationship of context with elements and principles of design

Learning Resources

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignment (Any 3)	
1	Analysis and study of design principles and elements using different kinds of examples of built and/or non-built spaces with help of sketches, photographs, drawings etc.
2	Study of structural systems, components of structures in built spaces.
3	Analysis of relationship between building and climate, building and site and orientation with the help of built and/or non-built environment with the help of sketches, photographs, drawings, etc.
4	Photo documentation and study of use of materials for various design components and design considerations.

Building Construction and Materials-I

Subject Code	K8102	Semester-I
Credits	6	Subject type-Core

Learning Objectives	
1	To understand the properties, characteristics, strength, processing and application of materials
2	To understand the different components of masonry construction

Learning outcomes: Student will be able to	
1	Explore materials, properties characteristics, methods of preservation, treatment and methods of construction and uses of different materials
2	Describe in detail the method of construction of superstructure with various masonry
3	Discuss different material used for fencing as well as for gates.
Units	Contents
Unit I	Introduction <ul style="list-style-type: none"> - Building construction as subject and its relevance to architectural design. - Introduction to various components of building from foundation to roof. - Basic structural systems load bearing and framed structure
Unit II	Study of Materials Properties, various types, market form available, standard sizes, cost, application in buildings resource use, defects and strengths of each material <ul style="list-style-type: none"> - Bricks and stones - Cement, Sand , aggregates - Mortar, Plaster, Pointing - Lime
Unit III	Superstructure Masonry <ul style="list-style-type: none"> - Fundamentals, principal of load bearing construction for medium rise structures using Brick, stone, Concrete Blocks, solid Blocks, Hollow Blocks, Cavity Block etc. - Introduction to various types and junctions of brick bond and types of stone masonry
Unit IV	Fencing And Entrance Gate <ul style="list-style-type: none"> - Fencing and compound wall construction in different materials like Barbed wire, Chain link, Wire mesh, R.C.C. Grills, M.S. Grills etc. - Constructional details of an entrance gate in a compound wall of following types: Sliding Gate, Entrance gate side hung with floor channel, Entrance gate side hung with wicket gate

Journals:	Construction and building materials -journal- else vier (www.journals.elsevier.com/construction-and-building-materials/) Journal of building construction and planning research (www.scirp.org/journal/jbcpr/)

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Portfolio of technical drawings of above mentioned topic with supporting documents of sketched booklet and pictographic presentation.(Min.4drgs.)
2	Field reports and Market survey of building technology topics.
3	Proposals of different designs in masonry construction and fencing designs for prescribed projects.(Under discretion of the subject faculty)

Theory of Structure -I

Subject Code	K8103	Semester-I
Credits	3	Subject type-Core

Learning Objectives	
1	To understand basic structural concepts
2	To understand behavior of different materials
3	To understand fundamentals of structure

Learning Outcomes: student will be able to	
1	Develop understanding of basic requirements of stability, strength of materials
2	Develop understanding of behaviour of basic structural elements
3	Understand importance of basic structural elements in structural systems.

Units	Contents
Unit I	Introduction Introduction to basic structural elements like column/post, beam, slab, load bearing walls. The load transfer mechanism. Introduction to dead load and live load. Simple calculation of dead load of one way slab and beam if their dimensions are known, in order to know how much load is transferred from each element
Unit II	Supports <ul style="list-style-type: none"> - Types Of Supports And Load Transfer To The Supporting Element : Explain beams as a system in equilibrium and explain conditions of equilibrium (Σf_x, Σf_y and $\Sigma m = 0$) - Types of supports: roller hinged and fixed supports. Explain in which practical connection we idealize it as hinge/ roller/ fixed. (theory only) - Type of beams: simply supported, cantilever and overhanged beam. Calculating the reaction they transfer to the support. (calculation should include udl and point load standard cases - UDL over entire span - Point load at centre and eccentric - UDL near one support - Shear force and Bending Moment and its importance
Unit III	Properties Of Section <ul style="list-style-type: none"> - Centre of gravity – its importance - How to find CG of standard T, Channel, I, angle section and combination of such sections
Unit IV	Moment of Inertia <ul style="list-style-type: none"> - Moment of inertia – its importance - MI formulae of standard sections. Calculations for rectangle and circle, T, Channel, angle and I section using parallel axis theorem. - Section modulus and radius of gyration – definition.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Calculate the load transferred on the supporting beam/ column for simply supported cantilever and overhang beam. (find reactions)
2	Study of various cross sections such T, C,L, I and O as various structural elements. Calculations of T,C, L ,I and o sections
3	Photo Documentation : various type of beams, various type of supports, various types of loads, various types of cross sections
4	Making models : various type of beams, various type of supports, various types of loads, various types of cross sections

Creativity & Communication -I

Subject Code	K8104	Semester -I
Credits	4	Subject type-Core

Learning Objectives	
1	To understand elements of design and principles of design as a basic creative activity.
2	To study/analyze principles of organizations.
3	To develop artistic and architectural vocabulary for effective verbal and written communication.
4	To appreciate visual art forms like sculpture, paintings, calligraphy, caricatures etc.

Learning Outcomes: Student will be able to	
1	Explore basic elements of design and their expressions artistically
2	Explore principles of design and their expressions artistically
3	Understand and explore principles of organizations
4	Understand and develop artistic and architectural vocabulary

Units	Contents
Unit I	Elements of Design <ul style="list-style-type: none"> - Introduction to Elements of design - Interpretation of points, lines and planes - Expressions through colors, textures and light
Unit II	Principles of Design <ul style="list-style-type: none"> - Introduction to Principles of Design - Theory on Lateral Thinking and exercise on generation of alternatives - Explorations of Principles of Design through 2D compositions
Unit III	Organization <ul style="list-style-type: none"> - Introduction to Organization - Explorations of Organization through 3D compositions
Unit IV	<ul style="list-style-type: none"> - Introduction to Visual arts (painting, sculpture, calligraphy etc.) - Understanding attributes of elements of visual and architectural aesthetics - Visual Arts appraisal
Unit V	Verbal and Written Communication <ul style="list-style-type: none"> - Exploration of different ways of verbal and written communication

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. Ching Francis, D. K. (2007) <i>Architecture: Form Space & Order</i>, New Jersey, John Willy and Sons 2. Ching Francis, D. K. (1999) <i>Visual Dictionary of Architecture</i>, New Jersey, John Willy and Sons

Assessment		Marks
IA	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
UE	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
Drawing portfolio consisting of relevant exercises including	
1	Self Portrait
2	Exercise on inter-relation of emotions and their expressions though lines and colors – in the form on thumb sketches or series of expressions explaining a story line OR creating a graphic strip explain a story OR creating a graphical story board for a concept
3	Exploration of textures in form of 3D models
4	Analysis of effects of different lighting conditions in architecture
5	Exploration of different generations of alternatives through modules
6	Exploration of Principles of Design based on 2D compositions of modules
7	Exploration of Vertical and Horizontal Planes based on modules to understand anthropometry
8	Exploration of Organization through 3D composition with solids like cubes, cuboids, pyramids, cones, cylinders, spheres etc.
9	Group work on Appreciation of Visual Arts
10	Exercise on verbal and written communication in the form of compilation of an architect's works and seminar presentation of the same or newspaper article etc.

Architectural Drawings and Graphics-I

Subject Code	K8105	Semester -I
Credits	6	Subject type-Core

Learning Objectives	
1	To understand visualization principles of various objects related to architecture.
2	To enable students to present in graphical form all building elements and free hand sketching.

Learning Outcomes: student will be able to	
1	Develop skills in free hand sketching
2	Represent different forms, building elements and materials
3	Visualize and represent in Two-Dimension And Three-Dimension Graphic communication

Units	Contents
Unit I	Basic skills of drafting <ul style="list-style-type: none"> - Lettering: Freehand architectural lettering. - Lines: Concept and types of lines, Dimension lines. - Drafting convention. - Study of Scales.
Unit II	Geometry <ul style="list-style-type: none"> - Geometrical constructions
Unit III	Represent 3D objects in 2 D <ul style="list-style-type: none"> - Definition, Meaning & concept. - Projection of points, lines, planes and solids through orthographic projections to understand 2D building representation. Sections <ul style="list-style-type: none"> - To represent the building through sections
Unit IV	Three dimensional representation <ul style="list-style-type: none"> - Existing building views through sketching

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. F. D K. Ching (2009) <i>Architectural Graphics</i>, New Jersey, John and Wiley and Sons 2. Hugh C. Browing (1996) <i>The Principles of Architectural Drafting</i>, New York, Watson-Guptill Publications 3. N.D.Bhatt (2012) <i>Engineering Drawing</i>, Gujrat, Charator Publishing House. 4. Rangwala(1991)<i>Civil Engineering Drawing</i>, Gujarat, Charator Publishing House

I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
UE	University Examination	60
	Theory paper of 03 hours	

Workshop –Model Making

Subject Code	K8106	Semester -I
Credits	5	Subject type-Core

Learning Objectives	
1	To equip students with the basic skills necessary to represent their ideas in a model format using simple materials like paper, thermocol, hardwood, Metals, glass fiber etc.
2	To familiarize students with cutting, drilling, grinding, slotting, shaping, bending and measuring instruments, filing, scraping and fitting etc.; processes used in making models.

Learning Outcomes: student will be able to	
1	Develop skills in making 2D and 3Dmodels.
2	Apply carpentry instruments and their uses.
3	Understand the importance of model making as a tool to represent ideas and visualize objects/ elements/structures in architecture.

Units	Contents
Unit I	Introduction to types of model - Block models, detailed model, Construction Model and interior, Models etc.
Unit II	Introduction to various materials - Experimentation with these materials for different geometries and scales of models
Unit III	Tools in model making - Development of the skill to use the tools with precision to obtain desired results in model making.
Unit IV	Exploration of Building materials - Hands on approach

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. Akiko Busch (1991) <i>The Art of Architectural Models</i>, Hong Kong, Design Press 2. Nick Bunn (2010) <i>Architectural Model Making</i>, London, Laurence KingPublishing. 3. Paul Jackson, Angela A Court, Marion Elliot (1993) <i>The Ultimate Papercraft and Origami Book</i>, United Kingdom, Acropolis Books 4. Assessment		Marks
I.A.	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Assignments	
1	Model making-design projects.
2	Model-Construction details.
3	Model -Creative Arts and crafts

Semester – II

Architectural Design -II

Subject Code	K8107	Semester -II
Credits	6	Subject type-Core

Learning Objectives	
1	To develop communication and representation skills
2	To document spaces in graphic form
3	To explore concepts of space design with a focus on function and anthropometry

Learning Outcomes: Student will be able to	
1	Develop skills to understand and represent design ideas through graphic communication.
2	Learn to measure, document and represent spaces.
3	Understand and demonstrate a simple design responding to functional requirements and appropriate scale.

Units	Contents
Unit I	Measured Drawing - Introduction and demonstration of modes of measurements and methods of documentation of built and/or non built spaces - Introduction and demonstration of different methods of representation
Unit II	Analysis - Study of function, circulation, scale and modes of measurement with respect to a specific activity.
Unit III	Design Demonstration - Design of single activity spaces reflecting understanding of the above.

Learning Resources

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Measured drawing of any structure relevant to the topic - Drawing Portfolio
2	Design of single activity unit with a demand of knowledge of function, circulation and anthropometry (e.g. Canteen, bus-stop, play school, library, clinic, boutique, etc.) – Drawing portfolio. Models to understand and explain the Designed Spaces.
3	Photo documentation and analysis of related / similar designed spaces.

Building Construction and Materials-II

Subject Code	K8108	Semester -I
Credits	5	Subject type-Core

Learning Objectives	
1	To involve students in a number of drawing exercises that will analyze the various building components in a simple load bearing structure.
2	To inform properties and characteristics of timber, its conversion, preservation and uses
3	To make students aware of various market forms of timber, their production, properties and application in the building industry

Learning Outcomes: Student will be able to	
1	Understand the different construction practices adapted for the various components of doors and windows to specific material in which it's made.
2	Understand the concept of opening and its construction techniques

Units	Contents
Unit I	Door, Windows and Openings <ul style="list-style-type: none"> - Introduction to various hardware used for doors, window - Terminology and construction aspects of door ,windowand opening
Unit II	Spanning Of Opening <ul style="list-style-type: none"> - lintel and arch construction - Terminology of arch construction and load transfer - Construction and formwork for lintel and arch - Spanning of opening using brick and stone for various types of arches like flat, segmental, semi circular etc. - Spanning of opening using brick, stone, timber, built-up sections for lintel construction
Unit III	Doors <ul style="list-style-type: none"> - Design considerations, single and double shutters, party glazed and partly paneled shutters - Glazed, Paneled and Flush doors in wood. Types of Flush doors. - Ledged, braced and battened and framed door. (Introduction) - Sliding and sliding- folding door in T.W. and Aluminum. - Steel Door Construction - Pressed sheet shutter - Box section frame and paneled shutter - Rolling shutter - Collapsible gates - Safety or Grilled doors
Unit IV	Windows <ul style="list-style-type: none"> - Underline principles for appropriate selection and application of different type of wooden windows & steel windows. - Paneled, fixed and partly and fully glazed and louvered, centrally pivoted, top hung windows, Side hung windows in wood. - Bay windows in wood - Steel window using 'Z' section - Steel window using Box section & of proprietary nature

Unit V	Study of Materials <ul style="list-style-type: none"> - Timber and Bamboo - Various timber joints - Hollow concrete block - Reinforced Brick work

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination Assignments or portfolios based on entire syllabus as mentioned below.	60

Assignments	
1	Portfolio of technical drawings of above mentioned topic with supporting documents of sketched booklet and pictographic presentation.(min.4 drawings.)
2	Field reports and Market survey of building technology topics.
3	Proposals of different designs in door and window construction and opening designs for prescribed projects (Under discretion of the subject faculty).

Theory of Structures-II

Subject Code	K8109	Semester -II
Credits	2	Subject type-Core

Learning Objectives	
1	To understand forces acting on members
2	To understand properties and behaviour of different materials
3	To understand shear and bending stresses

B. Learning Outcomes: Student will be able to	
1	Develop understanding of stresses and strains on members.
2	Develop understanding of properties of basic structural materials.
3	Understand importance of consideration of shear forces.

Units	Contents
Unit I	Stress and Strain - What is stress (axial, bending and shear), strain. - Calculation of axial stress, strain for composite material like RCC.
Unit II	Bending Stress - Calculation of bending stress using formulae for standard sections. T,C, L and I - What is combination of axial and bending stress,for a masonry column and base of retaining wall for stability.
Unit III	Shear Stress Calculation - Calculation of shear stress using formulae for standard sections. T, C, L and I.
Unit IV	Elastic constants and stresses - Structural properties: Elasticity, maximum Permissible Tensile/compressive stress, bending stress and shear stress for various materials like timber, masonry, concrete and steel. Explain the difference between behaviour of a ductile material like steel and brittle material like concrete subjected to tensile force. (stress-strain curve and Hooke's law).

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Numerical problems on calculation of axial stress and strain in composite elements.
2	Numerical problems on calculation of bending stress in beams and columns.
3	Numerical problems on calculation of combined stresses
	Photo Documentation: structural damages due to excessive stresses, identifying the reasons of damages.

Creativity & Communication-II

Subject Code	K8110	Semester -II
Credits	4	Subject type-Core

Learning Objectives	
1	To understand volume and form.
2	To study/analyze scale and proportions
3	To appreciate performing art forms like films, theatre, dance etc

Learning Outcomes: student will be able to	
1	Explore volume and form as basic elements of design
2	Understand scale and proportion and their impact on spaces
3	Appreciate performing arts

Units	Contents
Unit I	Volume and Form - Introduction to Attributes of Form and Space - Understanding derivatives of form - Volumetric Study of Spaces – positive and negative spaces
Unit II	Scale and Proportion - Theory on Scale and Proportion - Exploration of Scale and Proportion through 2D and 3D mediums
Unit III	Performing Arts Appraisal - Introduction to Performing arts (films, theatre, dance etc.) - Understanding attribute of elements of performing arts
Unit IV	Communication through performing art Exploration of different ways of communication through performing art

Learning Resources

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
Drawing portfolio consisting of relevant exercises including	
1	Understanding Volume as an element of design and exploration of positive and negative spaces in a volume or 3D composition
2	Exercise on exploration of derivatives of form
3	Understanding theory of scale and proportions and representing the same through study of anthropometry of spaces
4	Group work on Documentary/ Film as Performing Arts appraisal

Architectural Drawings and Graphics-II

Subject Code	K8111	Semester -II
Credits	5	Subject type-Core

Learning Objectives	
1	To develop perception and presentation of different forms and their spatial dimension.
2	To develop rendering techniques and presentation skill

Learning Outcomes: Student will be able to	
1	Visualize three Dimensional representations of complex objects and to relate the graphics content with Architectural Design.
2	Explore Rendering technique skills with various media, incorporating sciography and creating three-dimensional effects.

Units	Contents
Unit I	Three dimensional representation - Isometric, axonometric and oblique view of solid composition and building.
Unit II	Interpenetration of solids - Interpenetration of various solids and its relation in building design.
Unit III	Presentation of drawings - Rendering technique with various media.
Unit IV	Sciography - Introduction of sciography. - Representation of Shade and shadows in plans and elevations.

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. Calvin F. Schmid, Stanton E. Schmid, (1954) <i>Handbook on Graphic Presentation</i>, New York, The Ronald Press Company 2. F. D K. Ching (2009) <i>Architectural Graphics</i>, New Jersey, John and Wiley and Sons. 3. Francis DK Ching (1989) <i>Drawing A Creative Process</i>, Van Nostrad Reinhold 4. Hugh C. I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Theory paper of 03 hours	60

History of Architecture-I

Subject Code	K8112	Semester -II
Credits	3	Subject type-Core

Learning Objectives	
1	To understand development of architecture as a process of contextual and cultural evolution rather than simply as a product.
2	To acknowledge and interpret from history, best design guidelines which respond aptly to the vernacular character of that place, the lifestyle of the users and building traditions of that time.
3	To gain knowledge of the development of architectural form with reference to Technology, style and character.

Learning Outcomes: Student will be able to	
1	Discuss Geography, Politics, Economy, Social Systems, Religion, Paintings and Sculptures and its influence on Architecture at different periods of time.
2	Explore cultures and civilizations and settlements across the world

Units	Contents
Unit I	Pre-historic <ul style="list-style-type: none"> - Housing forms in the initial phase: Cave shelters- at Lascaux, Terra Amata - Community structures: Menhir, dolmen, gallery and passage graves, Stonehenge, Ggantija Malta
Unit II	River Valley Civilizations <ul style="list-style-type: none"> - Yellow River - Indus River - Nile River - Tigris River
Unit III	Vedic Architecture <ul style="list-style-type: none"> - Vedic culture and town planning layouts, Vedic Village, City Planning in later Vedic period, Building materials and construction techniques. Buddhist Phase <ul style="list-style-type: none"> - Major typologies – Stambha, Stupa, Chaitya, Vihara. - Development of Chaitya arch - Lomas Rishi, AshokanStambhas, The Great Stupa at Sanchi, Chaitya Hall at Karli, Viharas at Ajanta
Unit IV	Greek Civilization <ul style="list-style-type: none"> - History, evolution and characteristics Elements of special attributes: Classical Orders, Optical corrections – Acropolis, City of Athens - Major typologies - Temples, Theatres, Agora, Stoa, Council Halls
Unit V	Roman Civilization <ul style="list-style-type: none"> - History, evolution and characteristics Elements of special attributes: - Arches, lintels, bridges, aqueducts, Roman engineering skills - Major typologies - Temples- Pantheon, Basilica at Trajan, Amphitheatre, Hippodrome, Circus, Palaces, Thermae at Carcalla

	Theory paper	

Climatology and Climate Responsive Architecture

Subject Code	K8113	Semester -II
Credits	3	Subject type-Core

Learning Objectives	
1	To understand climate and its impact on architectural design.
2	To understand co-relation between climate and other environmental parameters and built form at individual and settlement level
3	To understand the use of surrounding environment as one of the strategic design parameters.

C. Learning Outcomes: Student will be able to-	
1	Familiarize with climatological influences on built environment and comfort conditions for inhabitants.
2	Explore design principles in different climatic zones

Units	Content
Unit I	Basic Climatology <ul style="list-style-type: none"> - Introduction: To climate, weather, earth, sun relationship. Global, Macro and Micro climate. Importance of climate in architecture. - Elements of climate: Temperature, rainfall, humidity, wind, solar radiation etc.
Unit II	Basic Climatology <ul style="list-style-type: none"> - Human Comfort: - Human heat balance and comfort, thermal comfort and means of thermal comfort, heat stress, effective temperature, bioclimatic chart, subjective variables - Thermal Comfort Indices - Active & Passive means of thermal control: Degree of control
Unit III	Basic Climatology <ul style="list-style-type: none"> - Structural control : Shadow formation, sun control and shading devices - Ventilation & Air movement: Study of ventilation & its functions in buildings, air flow through buildings, position & size of opening
Unit IV	Climate Responsive Architecture <ul style="list-style-type: none"> - Study of nature of climate, its physiological objectives and design criteria's and discomfort indices. Planning of internal and external spaces, surface treatments and openings etc. for various climatic zones - Case Study of a contemporary or traditional shelter in the given climate - Study of traditional /vernacular architecture from various climatic zones (Hot and Dry; Warm and Humid; Composite; Cold –Dry, Cold-wet) - Study of effect of orientation, topography, vegetation, form, building material and surfaces on building design in response to climate

Learning Resources	
Text Books:	1. Koenigsberger, Ingersoll, Mayhew, Szokolay, (1996) Manual of Tropical Housing and Building - Climatic Design, Orient Longman Limited
Reference Books:	2. G. Z. Brown and Mark Dekay, John Wiley and Sons, (2001) Sun, Wind and Light, 2nd Edition, New York

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignment	
1	Case study of a climate responsive building
2	Study of shading devices in a building.
3	Performance of openings for light and ventilation
4	Site-Analysis (Climatic context) considering various climatic elements.

Workshop-Model Making and Building Appraisal

Subject Code	K8114	Semester -II
Credits	2	Subject type-Core

Learning Objectives	
1	To understand appreciation in architecture.
2	To understand how to read a building.

Learning Outcomes: Student will be able to	
1	Explain building using architecture language.
2	Analyses components of the building.
3	Represent same building in model format.
4	Apply model making as a tool of expression.

Units	Contents
Unit I	Aspects of appraisal - Aesthetics, Technical, Financial, Economic, Environmental and anthropological appraisals.
Unit II	Art consciousness - Aesthetics, perception, symbolism, expression, style, fashion, appropriateness and values.
Unit III	Building Appraisal - Understanding the meaning of appreciation and its normative criteria such as Form, space, site, function, structure etc.
Unit IV	Analysing design - Identification of place, Basic and modifying elements of architecture, geometries, Themes in Spatial organization - Appreciation of designer skills, theories of perception and variability of perception.
Unit V	Model Making

Learning Resources	
Text Books:	1. Simon Unwin (2009). <i>Analysing Architecture</i> third edition, revised and enlarged. USA and Canada by Routledge
Reference Books:	1. Corol Davidson cragoe(2008). <i>How to read building: A crash course in architectural styles</i> .NewYork,Rizzoli. 2. Assessment		Marks
I.A.	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Assignment	
1	Building appraisal Essay/report with sketches /Photographs
2	Model of a structure

Semester – III

Architectural Design -III

Subject Code	K8201	Semester -III
Credits	6	Subject type-Core

Learning Objectives	
1	To study and explore properties and behavior of different structural materials
2	To introduce students to a design process with a focus on materials and structural systems
3	To develop capacity of third dimensional thinking in students
4	To understand the process of multi activity space designing

Learning Outcomes: students will be able to	
1	Make appropriate choice of material based on the requirements of the design project
2	Explore properties of a particular material to its fullest.
3	visualize and think in third dimension and translate it into two dimensional design
4	synthesize and reflect analytical understanding of multi activity spaces into Architectural Design

Units	Contents
Unit I	Exposure to Materials - Introduction and knowledge of different materials and innovative structural systems
Unit II	Exploration of Forms - Exploration of innovative forms of structures based on the behavior of materials
Unit III	Design Demonstration - Introduction to a complex multi activity space design - Demonstrating the best use of the studied material/s in this space

Learning Resources	
Text Books:	
Reference Books	<ol style="list-style-type: none"> 1. Ching F. D. K. (2007), <i>Architecture: form, space, and order</i>, New Jersey, Canada, John Wiley and sons. 2. Editors of Phaidon Press (2004), <i>The Phaidon Atlas of Contemporary World Architecture</i>, Phaidon Press; Comprehensive Edition. 3. Salvadori M., & Robert H., (1975), <i>Structure in architecture: the building of buildings</i>, Cornell University, Prentice-Hall 4. Shankar P., (2014) <i>Himalayan Cities: Settlement Patterns, Public Places and Architecture</i>, New Delhi, India, USA, Canada, Niyogi Books.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60

	Assignments or portfolios based on entire syllabus as mentioned below.	
--	--	--

Assignment	
1	Analysis of different materials and structural systems through research and market surveys
2	Experimentation with models to explore properties, strengths, weaknesses, possibilities of different configurations of chosen materials (application of lateral thinking process)
3	Drawing portfolio for design of a complex multi activity space design (e.g., bungalow of some celebrity or professional, a small neighborhood shopping, primary health clinic, departmental store, small scale community housing, etc.

Building Construction and Materials-III

Subject Code	K8202	Semester-III
Credits	6	Subject type-Core

Learning Objectives	
1	To involve students in a number of drawing exercises that will analyze the Various building components in a simple framed structure.
2	To inform the properties and characteristics of different roofing and flooring materials

Learning outcomes: Student will be able to	
1	Understand the construction techniques of different building components like staircase and roof.
2	Acquire the knowledge of different flooring materials and its construction techniques.

Units	Contents
Unit I	Staircase <ul style="list-style-type: none"> - Design Consideration - Principles and components of staircase - Types of staircases - Staircase in Timber, steel and stone
Unit II	Roof <ul style="list-style-type: none"> - Timber Roofs: General idea of various forms in timber for different spans. General information of timber trusses, fixing of Mangalore tiles. - Steel roofing: Simple ridge roof trusses for various spans, design consideration, advantages, Connections of various members supported on RCC column, Brick piers, fixing of G.I. and A.C. and Aluminum sheets, gutter types, wind bracing etc. - Steel North light Roofing system: Connections, Gutters, paneled glazing etc. - Steel Monitor roofs: on steel Stanchions, Connections, Gutters, paneled glazing etc. - R.C.C. roofing types: Flat slabs (one way and two ways), vaults, domes, Grid slabs. - Masonry vaults and domes
Unit III	Floors <ul style="list-style-type: none"> - Specialized timber flooring for: - Dance halls, Sports halls etc. - Parquet flooring details. - General idea of timber floors in relation to spans, load transmission, Jack arch and composite floors. - Flooring & paving materials such, IPS Finish, Mosaic Tiles, and Plain Cement Tiles. Natural stones like Shahabad, Tandoor, Kota, Kadappa, Marble, Granite, etc. - Glazed and Ceramic Tiles, PVC Rubber, Linolium, Carpet etc

Unit IV	Study of Materials <ul style="list-style-type: none"> - Roofing materials. - Different flooring materials. - Importance of water proofing, its need in building construction. - Traditional and modern systems of water proofing and various water proofing materials available in the market

Journals:	Journal of construction engineering, technology stmjournals.com/index.php?journal=jocetm Master builder -construction magazine, construction news(www.masterbuilder.co.in)

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Portfolio of technical drawings of above mentioned topic with supporting documents of sketched booklet and pictographic presentation. (min.4drgs.)
2	Field reports and Market survey of building technology topics.
3	Proposals of different design in staircase for prescribed projects. (Under discretion of the subject faculty)

Theory of Structure -III

Subject Code	K8203	Semester-I
Credits	2	Subject type-Core

Learning Objectives	
1	To understand types-indeterminate and analysis of structures
2	To understand behavior of different structural elements

Learning Outcomes: Student will be able to	
1	develop understanding of basic requirements of framed structure
2	develop understanding of behaviour of basic structural elements
3	understand importance of basic structural elements in structural systems

Units	Contents
Unit I	Shear force and bending moment diagram - Simply supported beams, cantilever beams and overhang beams for simple combinations of the cases mentioned in segment 1.
Unit II	Deflection in beams - Using formulae for standard cases simply supported and cantilevers reaction of propped cantilever. Maximum and zero deflection conditions for simply supported and cantilever beams. Factors affecting deflection. Importance of deflection in design of structural elements.(no complicated problems with double integration
Unit III	Introduction to arches - Two hinged and three hinged. Differentiate between beam and arch action. (no problems) - Suspension structures: their behaviour and sample analysis. (no problems)
Unit IV	Fixed beams - Concept of fixity and end moments using formulae.Deflected shape and placement of steel. (no analysis) - Continuous beams Concept of continuity and moments using co-efficients from IS 456, concept of distribution of moments based on stiffness only explanation (no analysis by moment distribution method)

Journals:	
------------------	--

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignment	
1	Problems of SFD, BMD
2	Deflection (limited to the standard load cases mentioned in segment 1) deflection problems using formulae, study of behavior of Arches, suspension bridges
3	Behavior of fixed and continuous beams.
	Making models of fixed beam, continuous beams, arches, suspension bridges, tensile structures, deflection of long span structures.

Creativity & Communication -III

Subject Code	K8204	Semester -III
Credits	3	Subject type-Core

Learning Objectives	
1	To enhance creative skills with different techniques and sources of inspiration.
2	To enhance digital communication skills.

Learning Outcomes: Student will be able to	
1	Understand various methods of improving creative skills.
2	Use different sources of inspiration to improve creative skills.

Units	Contents
Unit I	Techniques for improving Creativity - Brainstorming, Lateral Thinking, Random Combinations, Use of Manipulative Verbs, Tree of Possibilities, Abstraction, Transformation, Use of the Ridiculous, Matrix of Ideas, Role of Memory and Experience
Unit II	Sources of inspiration for Creativity - Material, Geometry, History, Nature & Climate, Mimesis, Multicultural, Association with other arts, Biographies, Fantasy.
Unit III	Graphical Communication - Introduction and application of computer software for graphical communication

Learning Resources

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination-	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
	Drawing portfolio consisting of relevant exercises including –
1	Any two exercises to demonstrate Techniques for improving Creativity (2D and 3D)
2	Any two exercises to explore Sources of inspiration for Creativity (2D and 3D)
3	One exercise to demonstrate Graphical Communication
	(The nature of exercises will depend on the focus of the studio)

Architectural Drawings and Graphics-III

Subject Code	K8205	Semester -III
Credits	5	Subject type-Core

Learning Objectives	
1	To understand the relation between depth of building elements and shades and shadows.
2	To understand three - dimensional view of architectural projects

Learning Outcomes: student will be able to	
1	Represent Sciography in Plan and Elevation of Architectural design project
2	Sketch perspective of Interior and Exterior.

Units	Contents
Unit I	Sciography - Sciography in buildings. - Projection of sciography in plan and elevation
Unit II	Perspective - Anatomy of perspective: Station point, Eye level, Cone of vision, Picture plane, Horizon line, Ground line, Vanishing points. - Types of perspectives: One point, Two point, Three point
Unit III	Perspective - Perspective drawing by, Measuring pt. method, directs projection method Grid method etc - Perspectives of simple and complex blocks - Perspectives of simple household furniture items. - Perspectives of interiors - Perspectives of Residences
Unit IV	Sciography in perspective

Learning Resources	
Text Books:	1. F. D K. Ching (2009) <i>Architectural Graphics</i> , New Jersey, John and Wiley and Sons. 2. Francis D K Ching (1989) <i>Drawing a creative process</i> , Van Nostrad Reinhold 3. 	20
	Refer To 'Rule number 6, sub point 6.2.2.'

U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments		
I.A. Assignments		
1	Sem II AD Project to be presented with 2 point Perspective using any method.	
2	Sciography of overhangs, stairs porticos pergolas to be enhanced on vertical, horizontal and curved surfaces.	
U.E. Assignments		
3	Drawing portfolio - Adequate number of drawings covering all the units.	

History of Architecture-II

Subject Code	K8206	Semester -III
Credits	3	Subject type-Core

Learning Objectives	
1	To understand development of architecture as a process of contextual and cultural evolution rather than simply as a product.
2	To acknowledge and interpret from history, best design guidelines which respond aptly to the vernacular character of that place, the lifestyle of the users and building traditions of that time.
3	To gain knowledge of the development of architectural form with reference to technology, style and character

Learning Outcomes: Student will be able to	
1	Explore Geography, Politics, Economy, Social Systems, Religion, Paintings and Sculptures and its influence on Architecture at different periods of time.
2	Acquire knowledge of the development of architectural form with reference to technology, style and character in the Indian context through the evolution of the temples, mosques and tombs in the various phases of Hindu and Islamic rule in India.
3	Acquire knowledge of the development of architectural form with reference to technology, style and character in the Western World through the evolution of the church from early Christian phase up to the Renaissance period

Units	Contents
Unit I	<p>Architecture in Indian sub-continent-Hindu Temple Architecture</p> <ul style="list-style-type: none"> - Evolution of architectural style, major influences on development of form and other architectural elements. - Gupta and early Chalukyan style - Gupta temple, Tigawa, Dasavatara Temple, Deogarh, Ladkhan and Durga temples, AiholeVirupaksha temple, Pattadakkal, Papanath temple, Pattadakkal, Cave temple, Badami, Kailash Temple, Ellora <p>Dravidian style</p> <ul style="list-style-type: none"> - Pallava - Rathas, Mamallapuram, Shore temple, Mamallapuram - Chola - Brihadeswara temple, Thanjavur - Hoysala - Keshava temple, Somnathpur - Vijayanagara - Vitthalaswami temple, Hampi, column orders - Madura - Meenakshi temple, Madurai, Sriranganathaswami temple, Srirangam <p>Indo Aryan Style</p> <ul style="list-style-type: none"> - Orissa - Parasurameswara, Mukteswara, Lingaraja temples, Bhubaneswar, Sun temple, Konark - Khajuraho - KandariyaMahadeo temple, Khajuraho - Gujarat - Sun temple, Modhera <p>Jain School</p> <ul style="list-style-type: none"> - Vimal Shah at Mount Abu, Chaumukh at Ranakpur
Unit II	<p>Architecture in Indian sub-continent -Islamic Architecture in India</p> <ul style="list-style-type: none"> - A brief introduction to origin and characteristics of Islamic architecture: building types, elements, structural systems, construction techniques

	<p>Imperial style of Delhi</p> <ul style="list-style-type: none"> - Slave dynasty - Quwat-ul-Islam Mosque, QutbMinar, Khirki Masjid, Sultan Ghari, Tomb of Iltumish, Tomb of Balban - Khilji Dynasty - Alai Darwaza., JamatKhana masjid <p>Provincial styles: (any two provinces)</p> <ul style="list-style-type: none"> - Punjab,Sind,Bengal,Gujrat,Kashmir,Jaunpur,Malwa,Deccan - Mosque: Jami – Ahmedabad, Champaner and Gulbarga - Tomb: GolGumbaj, Ibrahim Rauza, Bijapur - Civic work: Dada Hari stepped well, Adalaj <p>The Mughal phase</p> <ul style="list-style-type: none"> - Evolution of Mughal style and the different eras of rule: - Mosque: Jami – FatehpurSikri , Delhi - Tomb: Humayun, Akbar, Itmadud-daulla, TajMahal - Fort: FatehpurSikri, Red Fort, Delhi, - Regal Buildings: Birbal’s house, Jodhabai’s palace at FatehpurSikri
Unit III	<p>Architecture in Europe</p> <p>Early Christian and Byzantine Architecture</p> <ul style="list-style-type: none"> - Evolution of Church form, technique adopted to construct domes, surface treatment and material of construction - Elements of Special Attributes: - Domes, timber trusses, clear storey, pendentives - Major typologies - St. Peters, Rome (earlier one) Hagia Sophia, Constantinople <p>Romanesque</p> <ul style="list-style-type: none"> - Design evolution, planning principles and structural details - Elements of Special Attribute: Wall passages, raking arcades, triforium gallery, vaulting systems - Major typologies - Churches – St. Michelle Pavia, Campus at Pisa
Unit IV	<p>Architecture in Europe</p> <p>Gothic Phase</p> <ul style="list-style-type: none"> - Elements of Special Attribute: Structural innovations with buttresses, pointed arches, vaulting systems, window traceries, flying buttresses etc. - Major typologies - Churches- Amines Cathedral, Notre dame cathedral, Salisbury cathedral, West Ministers Abbey, castles <p>Renaissance Phase</p> <ul style="list-style-type: none"> - Elements of Special Attribute: Revived column orders, rusticated masonry, grand cornices, public architecture – piazzas- St Mark, Del Signoria - Major typologies - Churches – St. Peters Rome, St Paul’s, Palladian villas, buildings with respect to architects

Building Services-I

Subject Code	K8207	Semester -III
Credits	3	Subject type-Core

Learning Objectives	
1	To Study Water supply, treatments, distribution and plumbing system for various type of buildings.
2	To Study Waste water treatments, Sewer lines for various types of buildings
3	To Study Drainage system for a low and medium level building

Learning Outcomes : Students will be able to	
1	Understand how water supply and sanitation services are managed, in small and medium buildings.
2	Acquire knowledge about the principles of water supply and sanitation

Units	Contents
Unit I	Water supply - Sources of water supply. - Treatment plants and Pipe Appurtenances
Unit II	Distribution Patterns - Service Connection (Ferrule, water meter etc.) - Water storage tanks (Ground and overhead), their capacity and location. Calculation of water consumption. - Water Distribution pipes, their sizes, materials, jointing, fixing and laying
Unit III	Sanitation - Principles of sanitation. Introduction of various terminologies used in sanitation. Collection of waste matter in buildings. Various sanitary fittings and fixtures like washbasins, WC's, bathtubs, sink urinals, bidets, flushing cistern traps etc. Various traps and their functions. - Sewerage Systems: Dry conservancy method Water carriage systems. - Sewage collection and disposal system for individual house of urban areas. - Locations and use of appurtenances i.e. I.C, manholes, disconnecting chambers. - Various types of sanitary pipes, their joining, fixing and laying. Pipes and piping network. Anti- Siphonage Pipes.
Unit IV	Testing of house drains. - Sewage disposal system for individual house of rural areas or un-sewered localities (Septic tank, soak pit, cesspools, aqua privy, leeching pits. - Self-cleaning and non-scouring velocities for drain pipes. Invert levels and drains on sloping site

Learning Resources	
Text Books:	1. S.C.Rangwala,(1989) <i>Water supply and sanitary engineerin.</i> ,Gujarat, Charotar publishing house.
Reference Books:	1. AFE Wise, JA Swaffied Water,(2002) <i>Sanitary & Waste Services in buildings</i> . V Edition, Los Angeles, Mitchell Publishing, Co. Ltd. 2. C. shah,(1999) <i>Water supply and sanitary engineering</i> , Delhi,Galgotia publishers.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Theory paper	

Elective-I

Subject Code	K8208	Semester- III
Credits	2	Subject type-Elective

Learning Objectives	
1	To give students an opportunity to develop their skills in a subject they may opt for further studio.
2	To study the selected topic in depth of a particular subject that student is interested.
3	To prepare a technical base for students through in depth study.

Learning Outcomes: student will be able to	
1	Engage in systematic self study of topic they feel interested in.

Students can select one elective from the following list	
1	Traditional Building science
	<ul style="list-style-type: none"> - Introduction, Meaning, Elements etc. - Vastusastra Principles - Climatological, sustainable aspects of VastuSastra. - Relevance of vastushastra in Todays Built Environment
2	Vernacular architecture and settlements (Regionalism)
	<ul style="list-style-type: none"> - Defining Vernacular - Culture ,Tradition, Society, Climate and Shelter - Vernacular architecture in India - Study of traditional Building materials and Techniques - Study of Vernacular Settlements pattern - Style of the Maratha region
3	Environmental Studies
	<ul style="list-style-type: none"> - Environmental Factors effecting human habit such as climate,environmental pollution, environmental degradation, Green cover etc.at micro and macro scales. - Fundamentals of eco system - Environmental legislation
4	Photography
	<ul style="list-style-type: none"> - Introduction to Architectural Photography. - Techniques of Recording Building and surrounding on a film with respect to position of viewer and angle, light and shades, foreground and background, scale, colour, texture, mood, time etc. - Techniques of Photography for documentation - Photographs of drawings, models, feature of buildings and surroundings to be elaborated. - Close up Photographs - Photography practicals on: simple objects, still life composition with the play of light and shadow, Historical and modern Buildings with surroundings landscape ,Architectural details such as brackets, staircase etc.

Assessment		Marks
IA	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Semester – IV

Architectural Design -IV

Subject Code	K8209	Semester -IV
Credits	6	Subject type-Core

Learning Objectives	
1	To understand the contextual relationship of buildings with climate and landform
2	To document rural/traditional settlement to understand the context, people, function
3	To understand the process of complex multi-activity space design

Learning Outcomes: student will be able to	
1	understand relationship of building and site, climate and landform
2	document rural/traditional settlement
3	design multi-activity spaces responding to climate and landform

Units	Contents
Unit I	Documentation and analysis of Settlement <ul style="list-style-type: none"> - Document rural settlement in terms of settlement patterns, cluster configurations and building typology. - Document and analyze influence of climate and landform and all three levels - Document and analyze any traditional knowledge systems, structural system and architectural vocabulary of that place. - Documentation of social structure, religious and cultural practices that guide the built form
Unit II	Application of Context <ul style="list-style-type: none"> - Proposal of small design insert responding to existing context of the settlement based on the analysis
Unit III	Design Demonstration <ul style="list-style-type: none"> - Climate responsive design demonstrating passive design principles

Learning Resources	
Text Books:	
Reference Books:	<ol style="list-style-type: none"> 1. Baruch G., (1976), <i>Man, Climate and Architecture</i>, 2nd Edition, U. K., Applied Science Publishers. 2. Ching F. D. K. Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Rural/traditional settlement studio - Drawing portfolio, Models
2	Drawing portfolio or a detailed model for short design-insert related to settlement study shall be carried out as a time bound exercise
3	Drawing portfolio for design of a small campus involving complex issues of site, topography, integration, environment (primary school, sports club, small resort / institute, primary health care, nursing home, etc.)

Building Construction and Materials-IV

Subject Code	K8210	Semester -IV
Credits	6	Subject type-Core

Learning Objectives	
1	To involve students in construction process of special construction of cavity walls and retaining walls.
2	To aware student for natural disasters and techniques of protection
3	To inform the students about materials like steel and aluminum its properties

Learning Outcomes: student will be able to	
1	Understand special construction of masonry walls.
2	Understand site development with retaining walls with respect to different materials.
3	Be aware about earthquake resisting structures and its protections.

Units	Contents
Unit I	Retaining Wall - Retaining walls and its terminology, mass retaining wall in bricks, Stones etc. and cantilever retaining wall in R.C.C.
Unit II	Cavity Walls: - Principles of Cavity wall construction & advantages of Cavity wall - Cavity wall in Brick, Stone and Concrete blocks - Precautions in Hollow Concrete wall construction - Reinforced and Decorative Brick masonry, Jali construction
Unit III	Aluminum Doors & Windows - Aluminum and P.V.C. Windows - Aluminum and P.V.C. Doors
Unit IV	Earthquake Resistant Structures - For engineered and non-engineered construction.
Unit V	Study of Materials - Steel and Aluminum. - Water concrete admixtures. - Paints and varnishes

Learning Resources	
Text Books:	1. Rangwala S. C.(2007) <i>Engineering Materials</i> . Gujarat,Charotar, Publishing House. 2. Duggal S.K.(2009) <i>Building materials</i> . New Delhi, New Age International.
Reference Books:	1. J. S. Foster, Roger Greeno (2007) <i>Mitchell's Structure & Fabric: Part 2</i> .New York,Taylor and Francis group

Journals:	Journal of construction engineering, technology stmjournals.com/index.php?journal=jocetm) Master builder -construction magazine, construction news(www.masterbuilder.co.in)

Assessment	Marks
I.A.	Internal Assessment 40

	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Portfolio of technical drawings of above mentioned topic with supporting documents of sketched booklet and pictographic presentation. (min.4drgs.)
2	Field reports and Market survey of building technology topics.
3	Proposals of different design in aluminum door and window for prescribed projects. (Under discretion of the subject faculty).

Theory of Structures-IV

Subject Code	K8211	Semester -IV
Credits	2	Subject type-Core

Learning Objectives	
1	To understand basic structural concepts
2	To understand behavior of RCC as a material for framed structure
3	To understand fundamental beam column slab construction and loading

Learning Outcomes: student will be able to	
1	develop understanding of basic requirements of framed structure
2	develop understanding of strength of RCC structure
3	Understand different loads affecting strength and stability of structure.

Units	Contents
Unit I	<p>Design of RCC structures using limit state method (IS456)</p> <ul style="list-style-type: none"> - Different type of loads: dead load, live load, wind load, earthquake load. - Calculation of dead load (self weight) if dimensions of a beam, column, wall or slab and unit weight of material are given. - Principles and applications of live load and wind load in different types of structures such as residential, commercial, institutional etc. - Introduction to related IS specifications.
Unit II	<ul style="list-style-type: none"> - RCC framed structures flat roof i.e. beam slab column system - IS 456 provisions for removal of formwork, nominal cover. - Design of one way and two way slab, cantilever slab, load transfer from one way and two way slabs to beams and cantilever slab. - Beam design 1) simply supported 2) cantilever and 3) continuous. Continuous beam moments to be found using co-efficient. Explain similar details for continuous slab - Design of columns. Explain the structural actions on columns, explain slenderness ratio and its effect on load carrying capacity of columns, design of only short axially loaded columns. Explain uni-axial and biaxial bending cases. - Introduction to doubly reinforced beams and T or L beams. (no design problems)

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. Dr.Shah V.L. & Dr. Karve S.R.(2014)<i>RCC Theory and Design</i>.Pune,Structures Publishers. 2. Shah H.J. (2013)<i>Design of Reinforced Concrete Structures</i>.Anand,Charotar Publishing house. 3. Sinha S.N. (2014) <i>Reinforced Concrete Design</i>.New Delhi,Tata McGraw-Hill Publishing Company limited.
Reference Books:	<ol style="list-style-type: none"> 1. Dr.Shah V.L. & Dr. Karve S.R.2014) <i>Illustrated design of reinforced concrete buildings(design of G+3 storied office/residential building)</i>.Pune, Structures Publishers. 2. Negi L.S.&Jangid R.S.(2000)<i>Structural analysis</i>. New Delhi,Tata McGraw-Hill Publishing company limited
Websites:	Bureau of Indian standards

Journals:	IS: 456 - 2000
------------------	----------------

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	calculation of dead load, live load, G+1 building slab design, one beam, one column design, make drawings and schedule for the same

Computer Aided Design and Drawings

Subject Code	K8212	Semester -IV
Credits	4	Subject type-Core

Learning Objectives	
1	To develop computer aided drafting skill in 2D and 3D.
2	To familiarize with various software available for documentation, presentation and drawing purpose.
3	To understand the use of computer for graphical applications.
4	To introduce and use of various software's available for computer application in Architecture.

Learning Outcomes: Student will be able to	
1	Understand the use of computer as a tool for imagination and design.
2	Apply architectural presentation techniques using different software's.
3	Know how to use commands rather than what commands are.
4	Create 3D compositions and drafting plans.

Units	Contents
Unit I	Computer Aided Drawing (2D Composition) <ul style="list-style-type: none"> - Introduction of Auto CAD as drafting tool. - Basics of 2D drafting, Drawing simple objects, projections and plans etc. - Preparation of 2 dimensional drawing with dimensioning. - Creating layers, styles, Blocks, line types etc
Unit II	Computer Aided Architectural Modeling <ul style="list-style-type: none"> - Introduction to Auto cad 3D/Sketch up /3Dmax. - Drawing 3D standard solid models. - Drawing 3D planes and surfaces. - Complex 3D commands such as extrude/revolve, meshes and solids - Solid editing in 3D such as subtract - General introduction to rendering and light effects
Unit III	Computer aided presentation skills <ul style="list-style-type: none"> - Introduction of various software available for Architectural presentation. - Introduction to power point, Microsoft excel, Microsoft word
Unit IV	Animation/Walkthroughs

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. George Omura(1998).<i>Mastering Autocad</i>,Singapore,Tech publications. 2. Ted Boardman and Jercy Hubbell (1998).<i>Inside 3D studio Max2</i>, volume II,Modeling and Materials,New Delhi,G.C.Jain for techmedia. 3. Stephen Paul Jacobs(1991)<i>The CAD Design studio,3DModeling as a Fundamental Design Skill</i>,New York,McGraw-Hill,Inc. 4. Durvid Frey (1998)<i>Autocad 14</i>,New Delhi,BPB publications.
Reference Books	As required by subjects /topics in a particular semester.

Websites:	
Journals:	

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Rendering drafting for Sem.III design .
2	Prepare digital drawings for Sem.III design portfolio.
3	Create 3D model.

History of Architecture-III

Subject Code	K8213	Semester -IV
Credits	3	Subject type-Core

Learning Objectives	
1	To gain knowledge of the development of architectural form with reference to style and character in the Indian context through the evolution of colonial Architecture in the country
2	To understand the Industrial era as evolving within specific contexts including aspects of social and political factors.
3	To gain knowledge of the development of architectural form with reference to technology, style and character in the Western World through the Industrial revolution and in the phases covering the Art and Craft , Art Nouveau styles

Learning Outcomes: Students will be able to	
1	Explore spatial and stylistic qualities associated with Colonial architecture.
2	Explain architecture as an outcome of various social, political and economic upheavals
3	Comprehend the condition of Industrial Revolution and its impact on architecture
4	Understand Art and Craft, Art Nouveau styles with reference to Industrial Revolution.

Units	Contents
Unit I	<p>Colonial Architecture in India</p> <ul style="list-style-type: none"> - Colonial Architecture under British, Portuguese and French with reference to industrial revolution and emergence of new materials and construction techniques. - Indian Colonial architecture-British: The styles and trends of architecture brought by British to India and their evolution – The impact of Indo-Sarcenic style on the British Architecture in India – The characteristics of British Colonial Architecture with examples from work of Edwin Lutyens. - The Impact of Portuguese architecture in India – The characteristics of Portuguese Colonial Architecture with examples from Goa-Bom Jesus Cathedral Complex-Old Goa. - The Impact of French Architecture in India – The characteristics of French Colonial Architecture with examples from Puducherry, Maheetc - The Impact of French Architecture in India – The characteristics of French Colonial Architecture with examples from Puducherry, Maheetc
Unit II	<p>Baroque Art, Rococo Art</p> <ul style="list-style-type: none"> - Roman Baroque churches: The central plan modified – St. Peters, Rome; - French Baroque: Versailles - English baroque – Sir Christopher Wren; - St. Paul’s London – Domestic Architecture in England. - Rococo Architecture – Interiors – hotels
Unit III	<p>Neo classical Art and Architecture</p> <ul style="list-style-type: none"> - Beginnings of modernity –Origin and development of Neo Classicism Structural Neo classicists: Laugier, Soufflot, Schinkel, Labrouste - Romantic Neo classicists: Ledoux, Boullée, Durand, Jefferson

Unit IV	<p>Industrial Revolution</p> <ul style="list-style-type: none"> - Causes, consequence and impact in Architecture – Urbanization in Europe and America- split of design education into architecture and engineering streams- Emergent new building / space types. Growing need for mass housing .Its influences in building, technology and modern building materials Steel, glass, RCC etc. Industrial exhibitions- Chicago School and skyscraper development. - Arts and Crafts in Europe and America : Morris, Webb - Art Nouveau: Opposition to industrial arts and production Horta, Van De Velde, Gaudi, Guimard, Mackintosh Hoffman, Olbrich- Wright’s early works
----------------	--

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Theory paper	

Assignments	
1	Study of Colonial Architecture in India with literature survey
2	Analysis of various Architecture and Art styles studied and their development
3	Report based on field study.

Surveying & Leveling

Subject Code	K8214	Semester -IV
Credits	4	Subject type-Core

Learning Objectives	
1	To understand various land forms.
2	To introduce surveying as a method to explain land form and its utility in site planning.
3	To acquaint students with the physical surveying and levelling work in order to, Measure and document built and non-built spaces.
4	To prepare and interpret of Base Map for Architectural Design Projects.
5	To read and interpret various forms of cartographic presentation.

Learning Outcomes: Students will be able to	
1	Understand importance of land forms and topography and its significance in site planning /Design.
2	Calculate area of a site / plot.
3	Discuss slope of land for site planning.
4	Design services and buildings on sloping terrain

Units	Contents
Unit I	<ul style="list-style-type: none"> - Introduction to surveying and survey equipments, understanding land topography and its relevance in Architecture. - Methods of Surveying: Chain and Compass, Plane Table Survey, computation of areas
Unit II	<ul style="list-style-type: none"> - Methods of Levelling: Contour Survey, Use of Theodolite. - Use of electronic equipment like EDM, Total Station etc.
Unit III	<ul style="list-style-type: none"> - Introduction to remote sensing and aerial photographic surveying etc. - (Electronic Total Station) ETS Survey - Study and analysis of Topo-sheet

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. N.N. Basak ,(2004) <i>Surveying and Levelling</i> , New Delhi ,Tata Mcgraw Hill, 2. Kanetkar, T.P and Kulkarni, S.V (2013) <i>Surveying and Leveling</i>. Pune Vidyarthi Pune. 3. R.Subramanian (2012) <i>Surveying and Leveling</i>Roorkee,Cyber TechPublication.
Reference Books:	<ol style="list-style-type: none"> 1. David Clerk, Surveying Vol -I & II, 2. Dr. K.R. Arora, Surveying Vol -I & II, 3. S.K. Duggal, Fundamentals of Surveying Milton.O.Schimidit.
Websites:	<p>www.aboutcivil.org, www.cambridge.org, www.civilprojectsonline.com</p>
Journals:	<p>International Organization of Scientific Research (IOSR) IOP Science (Institute of Physics), American Journal of Engineering Research (AJER)</p>

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	To measure plot by linear method and determine the area.
2	To measure the contour plot and work out the site sections to understand levels and slopes.
3	To prepare small report with presentation of various equipments used in surveying and leveling
4	Measurement of plot by using different methods. (Equipments, plot selection can be done by the student and approved by instructor
5	To measure the live plot by using chain & compass, plane table survey, and prepare drawing for the area calculation
6	Survey of a given area of city road to understand slope, road details by using chain & compass, plane table survey .submission will in the form of drawings and digital presentation
7	Report on topics related to remote sensing and aerial photographic survey.

Building Services-II

Subject Code	K8215	Semester -IV
Credits	3	Subject type-Core

Learning Objectives	
1	To Study basics of electricity and wiring systems within domestic and commercial buildings.
2	To Study fundamentals of lighting and lighting design.
3	To familiarize the students with the fundamentals of acoustics and principles in designing various built environment

Learning Outcomes: Student will be able to	
1	Understand the basics of Electricity and wiring system
2	Understand various fundamentals of Lighting and Lighting design
3	Learn and evaluate fundamentals of acoustics and its applications in buildings.

Units	Contents
Unit I	Electrical Services. <ul style="list-style-type: none"> - Different wiring systems, fuses and MCBs, electrical fittings and appliances. Detailed layout of electrical services in residences
Unit II	Daylighting <ul style="list-style-type: none"> - Day lighting, sky condition, daylight availability graph, sky condition square. - Luminance levels for various sky conditions as a function of solar altitude, daylight factor, daylight factor standards, components of daylight factor, functional objectives of daylight, - Site criteria, building configuration, building orientation. - Day light apertures, glare control, shading devices- external and internal, measurement of day lighting
Unit III	Illumination (Artificial lighting) <ul style="list-style-type: none"> - Light radiation, its unit, laws of illumination, types of illumination schemes –direct, semi direct, diffused lighting and their design consideration - Light sources, various types of lamps and their characteristics - Types of luminaries for interior and exterior - Exterior lighting for monuments, gardens, fountains, sculptures etc
Unit IV	Acoustics <ul style="list-style-type: none"> - Frequency range of Audible sound. - Propagation of sound, sound reflection, diffusion, diffraction, sounds insulation. - Echo, Reverberation and Doppler effect. - Sound absorption, absorbing materials, their classification and application. Sound Reflection and reflecting materials, their classification and application. - Space layout consideration and Buffer zones - Noise and Noise control Noise criteria curves, noise from ventilation and AC systems. - Floor and ceiling construction for noise insulation. - Floating floors, outdoor barriers for noise Control. - At least one live case study in detail of acoustical treatment of

	<ul style="list-style-type: none"> - Auditorium, Lecture halls/Conference hall (any performing space) - Acoustical defects and remedies.
--	--

Learning Resources	
Text Books:	
Reference Books:	1. E.P. Ambrose,(1968) <i>Electric Heating</i> . New York, John Wiley & Sons Inc. 2. Philips,(1964) <i>Lighting in Architectural Design</i> . New York, McGraw Hill. 3. R. G. Hopkenson& J. D. Kay, (1969) <i>The lighting of Buildings</i> , London, Faber& Faber. 4. National Building Code of India, 2005 (NBC 2005)

Journals:	Building Services Engineering Research and Technology (bse.sagepub.com) Energy and buildings-Journal-Elsevier (www.journals.elsevier.com/energy-and-buildings/) Technical journals- CIBSE-(www.cibse.org/knowledge/technical-journals/technical-journals-bsert-lr-t)

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Theory paper	

Assignments(Any 2)	
1	Design electrical layout for a low or medium size building.(an individual /independent unit)
2	Layout of acoustical space with reverberation time calculations
3	Daylight Calculation in medium sized space.

Elective - II

Subject Code	K8216	Semester IV
Credits	2	Subject type-Elective

Learning Objectives	
1	To give students an opportunity to develop their skills in a subject they may opt for further studio.
2	To study the selected topic in depth of a particular subject that student is interested.
3	To prepare a technical base for students through in depth study.

Learning Outcomes: student will be able to	
1	Engage in systematic self study of topic they feel interested in.

Students can select one elective from the following list	
1	Passive Design Principles (SBDP) <ul style="list-style-type: none"> - Meaning ,Need of Passive Cooling - Principles of Passive Cooling - Passive Cooling in Different Climatic zones - Case studies
2	Seminar –I (Design Philosophies of Master Architects) <ul style="list-style-type: none"> - Independent study and documentation of architectural and allied subjects by individual student along with oral and visual presentation. - The seminar shall be a research paper on a topic related to Architecture.
3	Human settlements <ul style="list-style-type: none"> - Origin and growth of human settlement. - Role of River Banks in growth of human settlement. - Study of ancient Indian settlements like Mohenjodaro, Taxila, Nalanda. - Study of ancient Indian cave settlements of Ajanta, Ellora, Elephanta. - Ancient texts and treatises on settlement and area planning in India. - Historical survey of the city as an expression of the vitality of a civilization. - Human settlements during ancient medieval and modern periods in and India, and other parts of the world. - Characteristics of human settlements built by Hindu and Islamic Rulers in India
4	Communication skill/public speaking <ul style="list-style-type: none"> - Basic principles and Benefits of Better Communication, Communication Theory, Organizing Thoughts, Valuing People, Choosing Appropriate Words, Using Non Verbal Behaviors (Body Language, Voice Inflection) - Conducting Meetings, Giving Presentations, Writing for Business, Writing Letters, Memos and minutes, Writing Reports and reviews, Using Visuals, Interviewing and facing interviews. - English usage, grammar and composition, learning to listen and speak correctly (One to one communication, on the telephone, Group discussions) - Basic knowledge of effective use of ms word and excel and power point. - Business Etiquettes: Professional Image, Introductions and Greetings, Networking Manners, General, Workplace Manners, Life on the Cube Farm, Interacting With Superiors, Manager's Manners, Business Meetings,

	Business Gifts, Business Cards, Telephone Manners, Cell Phone Etiquette, E-Mail Etiquette, Gender-Free Etiquette, Business Dining, Avoiding Social Blunders When Abroad, Dealing with Angry Customers
--	---

Assessment		Marks
IA	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Semester – V

Architectural Design -V

Subject Code	K8301	Semester -V
Credits	8	Subject type-Core

Learning Objectives	
1	To understand and reflect 'culture as maker of space'

Learning Outcomes: Students will be able to	
1	Develop analytical skill set for spatial design of built spaces
2	Synthesize and translate analytical understanding into Architectural Design

Units	Contents
Unit I	Research and analysis of community living with examples.
Unit II	Study of theories on neighborhood planning concepts, community living, campus planning principles etc.
Unit III	It can be a small eskii project like a club house, small community hall, badminton court.

Learning Resources	
Text Books:

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Design Project demonstrating principles of community living, neighborhood planning etc. on any one of the following - Group Housing, High-end residential building, housing for economically weaker sections, Community Housing etc. –

	Drawing portfolio and model.
2	Design Project on any one of the following – Club House, Community Hall, Sports Club etc. which can be an extension of the projects mentioned above - Drawing portfolio and model.

Building Construction and Materials-V

Subject Code	K8302	Semester-V
Credits	6	Subject type-Core

Learning Objectives	
1	To introduce construction of building components in Reinforced Cement Concrete.
2	To introduce water proofing, insulation & protection systems and their methods of construction
3	To explain the concept of curtain wall and its architectural relevance.

Learning outcomes: Student will be able to	
1	Understand different foundation systems with respect to site and building character
2	Explore special construction techniques of curtain wall and design integration.
3	Become knowledgeable of alternative building materials used in construction

Units	Contents
Unit I	Foundation : <ul style="list-style-type: none"> - Concept of bulb of pressure and its significance for site investigation. - Introduction to relevance of soil mechanics in foundation design - Soil types & its behavior under different loading conditions
Unit II	Types Of Foundation <ul style="list-style-type: none"> - Mass concrete strip foundation. - Foundation for brick piers, entrance steps, compound walls etc. - Foundation on sloping site. - Foundation for point load. - Isolated R.C.C. footing for columns - Combined R.C.C. footing - Cantilever R.C.C .footing & eccentric footing - Foundation on weak strata. - Raft Foundation. - Pile Foundation
Unit III	Foundation and D.P.C. <ul style="list-style-type: none"> - Damp proof course treatment using rigid & flexible treatment - Brick on edge - Rough Shahabad stone - Bitumen sheets
Unit IV	Misc. Constructions : <ul style="list-style-type: none"> - Construction Details of Curtain Walls and Structural Glazing Including External Fixing and Cladding Details. Special Construction: <ul style="list-style-type: none"> - Basement Construction, Water Proofing details, etc. (Sketches, notes etc.) - Shoring and Underpinning - Flying, raking & dead shoring - Wall, Jack and mega pile, needle & pile, column underpinning

Unit V	Study of Materials <ul style="list-style-type: none"> - R.C.C. end connection details.(beam and column. Slab and beam etc.) - Reinforcement. - Fly ash brick, Stabilized earth block, Rammed earth block, Ferrocete, Concrete debri block. - Timbering & shuttering for French excavation - Glass
---------------	---

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Portfolio of technical drawings of above mentioned topic with supporting documents of sketched booklet and pictographic presentation. (min.4drgs.)
2	Field reports and Market survey of building technology topics.
3	Proposals of different design in aluminum door and window for prescribed projects. (Under discretion of the subject faculty).

Theory of Structure -V

Subject Code	K8303	Semester-V
Credits	2	Subject type-Core

Learning Objectives	
1	To understand basic structural concepts in steel design.
2	To understand behavior of steel as a structural materials.
3	To understand fundamentals of steel structure.

Learning Outcomes: Student will be able to	
1	Develop understanding of basic requirements of steel structure
2	Develop understanding of behavior of use of steel structures
3	Explain importance of types of steel connections and jointing

Units	Contents
	Steel design (working stress and limit state both are acceptable – IS: 800)
Unit I	Sloping roof system - truss, loads acting on truss, design of purlin (working stress or limit state both shall be acceptable), analysis of truss using method of joints, identifying ties and struts, design of tension and compression members.
Unit II	Connections - Riveted, welded bolted connections, their strength. Explain single and double shear (no calculations, no zigzag riveting). Finding length of weld and arranging it along member edges
Unit III	Design of steel beams
Unit IV	Design of steel columns - (Compression members) single and built in (Introducing lacing and battening. No calculations for lacing and battening design) - Introduction to masonry structures and timber structural members. (no numericals)

Learning Resources

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Design of an industrial building, show column locations for given plan area, determine type of truss, design of purlin, purlin-truss connection detail, analysis of any three joints of truss, design of tension member with rivet/weld/bolt, design of compression member, design of columns (built in) supporting the trusses. Drawings and schedule

Working Drawing-I

Subject Code	K8304	Semester -V
Credits	5	Subject type-Core

Learning Objectives	
1	To understand and prepare working drawings necessary for construction/execution of buildings on site.
2	To make student understand how to read “Working drawings” on site

Learning Outcomes: Students will be able to	
1	Prepare working drawings for load bearing structure.
2	Prepare Detailed drawings such as doors, windows, toilets, kitchen, flooring etc.
3	Prepare drawing which are readable for all agencies which are involved in execution of the project.

Units	Contents
Unit I	Introduction to WD, their significance, study of Example of Working Drawings, site visit
Unit II	Translating design into working drawing of entire project.
Unit III	Drawing showing construction details.
Unit IV	Details of toilets, doors, windows etc

Learning Resources	
Text Books:	
Reference Books:	1. Wakita, Osamu A., Richard M. Linde, and Nagy R. Bakhom (2011). "The Professional Practice Of Architectural Working Drawings" 2. Drawings from ISO certified architect office
Websites:	
Journals:	Gawne, Eleanor. "Cataloguing architectural drawings." Journal of the Society of Archivists 24.2 (2003): 175-187

Assessment	Marks
I.A.	40
Internal Assessment	
	Refer To ‘Rule number 6, sub point 6.2.2.’
U.E.	60
University Examination	
	Assignments or portfolios based on entire syllabus as mentioned below.

Assignments	
1	Site visit report, Common project assignment.
2	Assignment of Time bound working studio assignment.
3	A portfolio of working drawings where student selects their own design.

History of Architecture-IV

Subject Code	K8305	Semester -V
Credits	3	Subject type-Core

Learning Objectives	
1	To introduce the idea of modernity and demonstrate its impact in the realm of Architecture.
2	To study modern architecture as evolving from specific aspects of modernity industrialization, urbanization, material development, modern art.
3	To study in detail different post modern and contemporary directions in World Architecture
4	To study quest for Indianness in architecture of India from the end of colonial rule to contemporary period

Learning Outcomes: student will be able to	
1	Acquire knowledge of the development of architectural form with reference to technology, materials, style and character of the decades of modernism, post modernism and contemporary architecture and architects.
2	Obtain an overall understanding of the architectural developments of Architecture of post-colonial India

Units	Contents
Unit I	<p>Modernism</p> <ul style="list-style-type: none"> - Introduction to Modern Architecture. <p>Isms in Art and Architecture</p> <ul style="list-style-type: none"> - Adolf Loos and critique of ornamentation- Raumplan: Peter Behrens-Werkbund. Expressionism: Mendelsohn, Taut, Polzeig- Futurism-Constructivism, Cubism-Suprematism- De-Stijl. Bauhaus- Gropius, Meyer and Mies. Bauhaus School, Chicago School of Architecture and Taliesin School of Architecture – Great masters like Louis Sullivan, Frank Lloyd Wright <p>International Style</p> <ul style="list-style-type: none"> - Post WW II developments and spread of international style –works of Corbusier:- Brasilia, Unite - Works of later modernists: Louis Kahn, Paul Rudolph, Eero Saarinen, Philip Johnson
Unit II	<p>Post Modernism</p> <ul style="list-style-type: none"> - Critiquing Modernism - Brutalism- projects of Smithsons and Aldo Van Eyck – writing of Jane Jacobs, Robert Venturi, Aldo Rossi and Christopher Alexander - Deconstructivism –Critical regionalism - Innovation and ideas of Archigram – post modern architects like Peter Cook, Paolo Soleri, Robert Venturi - Contemporary architects: Norman Foster, Richard Rogers, James Sterling, Peter Eisenman, Renzo Piano, Daniel leibskind, Zahahadid, Frank O Gehry, Santiago Calatrava, , Rem koolhaas
Unit III	<p>Post Colonial Architecture in India and any two examples across the globe</p> <ul style="list-style-type: none"> - Architectural debates associated with nation formation– early modernist architecture-

	- Post-independence city planning: Chandigarh and Bhuvanesar- influences on post-independence architects- Architecture of Kanvinde, Raje, Doshi, Correa, Nari Gandhi, Raj Rewal.
Unit IV	Master Architects influenced by Vernacular/Regional Architecture of India

Learning Resources	
Text Books:	
Reference Books:	<ol style="list-style-type: none"> 1. Kenneth Frampton, (1994) <i>Modern Architecture: A Critical History</i>. London, Thames & Hudson. 2. Kenneth Frampton, Richard Ingersoll, (2000) <i>World Architecture-A Critical Mosaic 1900-2000 Vol 1</i>. New York, China Architecture and Building Press. 3. Journals:	JSAH-Society of Architectural Historians (www.sah.org/publications-and-research/jsah) Architectural Heritage-Edinburgh University Press(www.euppublishing.com/journal/arch)

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
Note	Based on the Assignments listed below with continuous assessment and attendance scrutiny. The final presentation in standard specified Portfolio with all written reports and graphical representations (sketches, pictures)
1	Analytical study of Post-Colonial Architecture in India with literature survey
2	Power point Presentation and discussion of Modern, Post modern, Contemporary World Architects with references to their styles, designs, technologies, materials and directions
3	Critical Analysis through book /literature survey of various architects and their buildings with relevance to vernacular architecture of India
4	Report based on field study.
5	Model making.

Specification Writing

Subject Code	K8306	Semester -V
Credits	2	Subject type-Core

Learning Objectives	
1	To develop skill of writing specifications for materials and works.

Learning Outcomes: students will be able to	
1	Write specifications with reference to building trades, materials, workmanship and performance of different items of work
2	Discuss specifications as integral part of contract document for building projects

Units	Contents
Unit I	<ul style="list-style-type: none"> - Specifications as part of contract document, definition, need and importance, its relationship with working drawings, bill of quantities and Schedule of rates. - Types of specifications, open, closed, restricted, prescriptive, performance based, or combination of above types. Use of manufacturers guide etc. - Specification writing method to include master list, sectional formats, page formats, general material items, tests, performance, mode of measurements etc
Unit II	<ul style="list-style-type: none"> - Methodology of writing detailed specifications including methods and forms of writing descriptive notes on materials and workmanship based on working drawings. - Collection of catalogues and technical information on various materials, products and specialized items. - Preparation of checklist for writing detailed specifications
Unit III	<ul style="list-style-type: none"> - Study of different building trades, their scope and contents. - Introduction to writing specifications for building services and checklist for services such as Water Supply, Drainage, Electrical and HVAC installations. - Writing specifications of a previous design project in full or part as final assignment

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. S. Patil (2013) <i>Civil Engineering Contracts and Estimate</i>. Anand. Orient Blackswan, Bangalore 2. B.N.Datta (2011) <i>Estimation and Quantity Surveying</i>, UBS Publishers & Distributors Ltd. Mumbai.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Theory paper.	

Building Services-III

Subject Code	K8307	Semester -V
Credits	2	Subject type-Core

Learning Objectives	
1	To expose students to the science behind HVAC system.
2	To familiarize students with the various air- conditioning systems and their applications
3	To study various aspects of Natural Ventilation

Learning Outcomes: student will be able to	
1	Acquire knowledge of various air conditioning systems and their applications.
2	Address various issues in design of HVAC system
3	Understand various issues in natural ventilation systems in buildings

Units	Contents
Unit I	HVAC <ul style="list-style-type: none"> - Air distribution systems, ducts and ducting layout. - Costing data and space requirements. Integration of AC systems in Design. - Principles of Psychometrics and heat transfer
Unit II	Components of HVAC <ul style="list-style-type: none"> - Unit AC's, Central AC's split AC's. - Components of AC system such as chilling plant, cooling towers, air handling units, calculation of AC load. - Water consumption for AC
Unit III	Ventilation of buildings <ul style="list-style-type: none"> - Natural ventilation (passive.) - Ventilation functions and requirements. - Physical mechanism of ventilation. - Design factors affecting ventilation
Unit IV	Mechanical ventilation (active) <ul style="list-style-type: none"> - Need of mechanical ventilation a) Forced ventilation – Exhaust fans, Axial flow fans, Blowers for industrial ventilation. b) Introduction to Air conditioning, heating and cooling

Learning Resources	
Text Books:	1. Benjamin Stein and John Renolds.(2006) <i>Mechanical and Electrical Equipment for Building</i> , New York, John Wiley and Sons.
Reference Books:	1. Vasisth K.(2011) <i>Waste management</i> New Delhi, Essential books. 2. National Building Code of India, 2005 (NBC 2005)

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Theory paper	

Elective- III

Subject Code	K8308	Semester IV
Credits	2	Subject type-Elective

Learning Objectives	
1	To give students an opportunity to develop their skills in a subject they may opt for further studio.
2	To study the selected topic in depth of a particular subject that student is interested.
3	To prepare a technical base for students through in depth study.

Learning Outcomes: Student will be able to	
1	Engage in systematic self study of topic they feel interested in.

Students can select one elective from the following list	
1	<p>Barrier Free Architecture</p> <ul style="list-style-type: none"> - Types of disabilities and its implications in Architecture, barrier free environment, access- provisions to facilities and amenities. - Typical barrier problems of the physically challenged people-parking, approaches to buildings travel within buildings etc. - Special design considerations in residential buildings, congregational buildings like auditoriums, theatres, studios, transport terminals etc, Institutional buildings, outdoor appurtenances, garden – parks etc. - Study of norms set by Central Government
2	<p>Appropriate technology</p> <ul style="list-style-type: none"> - Introduction to the concept of Appropriate technology and services suitable in Indian context for both rural and urban application - Study of theoretical and practical aspects of innovative /alternative materials and construction techniques developed in recent past. - Mud wall, suitability of soil for mud walls - Waffle and daub walls, Rammed earth walls, adobe walls - Walls, vaults using soil cement, compressed mud blocks, Nubian arch roof - Use of Bamboo as material its properties ,available in country - Burnt clay tile roofing, ferro cement roofing units, doubly curved tile roofing
3	<p>Contemporary Design Theory(History and Design)</p> <ul style="list-style-type: none"> - Detail study and analysis of styles of contemporary Indian and foreign Architects - Study of spatial order, structural, constructional and material order, manner of articulation, symbols, and meanings as these evolved in time and space. - Comparative study of building typologies in vernacular and architecture in modern period
4	<p>Seminar II</p> <ul style="list-style-type: none"> - Independent study and documentation of architectural and allied subjects by individual student alongwith oral and visual presentation. - The seminar shall be a research paper on a topic related to Architecture

Assessment		Marks
I.A.	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Semester – VI

Architectural Design -VI

Subject Code	K8309	Semester -VI
Credits	8	Subject type-Core

Learning Objectives	
1	To explore and demonstrate ‘technology and services as major determinants of Architectural form’ and understand co-relation between function, structure, services and form.

Learning Outcomes: Student will be able to	
1	Develop analytical skill set for understanding built and non-built spaces
2	Synthesize and translate the analytical understanding into Architectural Design

Units	Contents
Unit I	Research and Analysis of innovative technologies and materials prevailing in market, state of the art services and systems.
Unit II	Multi-functional public buildings like IT Complex, Hospitals, Commercial Centers, High Rise Structures
Unit III	Extension of the large project mentioned above e.g. Design of gymnasium, bank, departmental store, operation theatre, auditorium, etc.

Learning Resources	
Text Books:	
Reference Books:	<ol style="list-style-type: none"> 1. Bhatt V. & Seniver P., (1990), <i>Contemporary Indian Architecture: After The Masters</i>, Ahmedabad, USA, Mapin Publishing Pvt. LTD. 2. Journals:	

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Design project demonstrating integration of the building components and

	technology, services, vertical circulation, byelaws etc. on any one of the following – 3-star hotel, commercial complex, hospital, civic center, convention centre etc – Drawing portfolio and models
2	Design Project on any one of the following – gymnasium, bank, departmental store, operation theatre, auditorium, etc. - Drawing portfolio and models

Building Construction and Materials-VI

Subject Code	K8310	Semester -VI
Credits	6	Subject type-Core

Learning Objectives	
1	To introduce construction of building components in Reinforced Cement Concrete.
2	To introduce construction of building components in steel and its use in industrial construction
3	To introduce methods of the pre-engineered structures

Learning Outcomes: student will be able to	
1	Explore different R.C.C components of framed construction as well as special component construction.
2	Discuss different steel components and its construction
3	Understand concept of pre-engineered construction with respect to industrial construction

Units	Contents
Unit I	R.C.C. Framed Construction Element study <ul style="list-style-type: none"> - Principles and practices of R. C. Framed construction and its components - R. C. C. Footing for column, Isolated footing - R. C. C. Plinth beams and Plinth formation - R. C. C. Lintels and Chajja projections - R. C. C. Slab – one way, two way, single span and continuous spans - R. C. C. Beams – singly and doubly reinforced, single and continuous spans, cantilever beams - R. C. C. Columns
Unit II	R.C.C. Framed Construction Special Component study <ul style="list-style-type: none"> - R.C.C., Balconies, Canopies, fins, parapets - R.C.C. its potential and application - Details of junctions of slab and beam, slab-beam- column, primary, secondary beams - Study of form work construction - R.C.C. Staircase
Unit III	Steel Structures <ul style="list-style-type: none"> - Study of portal frames, its various types & connection details. - Study of Castellated Beam, Veradale girder, Portal Frames & Lattice Construction with - Connection details. - Medium span Roof Trusses with Sheet Cladding details & Rain Water Disposal details. - Introduction to framed steel structures using steel sections & steel decking
Unit IV	Industrial Building: <ul style="list-style-type: none"> - Study of constructional details for industrial buildings. - Details for lighting, Ventilation & Rain water disposal for industrial buildings. - Study of Machine foundation, gantry & high Strength flooring etc
Unit V	Study of Materials

	<ul style="list-style-type: none"> - Different cladding materials with fixing details. - Pre engineered structures. - Pre-stressed and post-tensioning methods pros and cons.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Portfolio of technical drawings of above mentioned topic with supporting documents of sketched booklet and pictographic presentation. (min.4drgs.)
2	Field reports and Market survey of building technology topics.
3	Proposals of different design in industrial building for prescribed projects. (Under discretion of the subject faculty).

Theory of Structures-VI

Subject Code	K8311	Semester -IV
Credits	2	Subject type-Core

Learning Objectives	
1	To understand basic concepts for RCC foundations
2	To understand behavior of different soils and foundation choice
3	To understand different types of RCC footings

Learning Outcomes: student will be able to	
1	develop understanding of basic staircase design.
2	develop understanding of behaviour of footings
3	understand importance of prestressing structural elements

Units	Contents
Unit I	Staircases - Types based on supports, loads, design of simply supported doglegged staircase
Unit II	Soil types and foundations - Soil types and determining suitable foundation (only theory) : safe bearing capacity, shear failure, excessive settlement, differential settlement, trial pits, need of pile foundation, need of raft foundation. - Design of rcc isolated pad footing. Explain (not design)rcc details of isolated circular and sloped footing, eccentric footing. - Necessity of combined footing, behaviour of combined footing, rcc details. (no design problem)
Unit III	Foundation for steel columns - Theory.(no numerical)
Unit IV	Prestressing - Introduction to prestressed structural elements, procedures, advantages, disadvantages, simple numerical beam problem to explain the concept of prestressing

Learning Resources	
Text Books:	1. Shah H.J. (2014) <i>Design of RCC structures part II</i> . Anand, Charotar publishing house.
Reference Books:	1. Dr.Shah V.L.& Dr. Karve S.R.(2014) <i>RCC Theory and Design</i> .Pune,Structures Publishers. 2. Journals:	IS: 456-2000 code of practice for plain and reinforced concrete SP:16-Design aids for reinforced concrete

Assessment	Marks
I.A.	Internal Assessment
	40

	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Design of simply supported doglegged stair case, drawing and schedule
2	Design of isolated pad footing, drawing and schedule
3	Making a typical RCC structural drawing with column location, numbering, beams (identifying beams to be designed as simple/cantilever/continuous...slabs to be identified as one way/two way/cantilever/continuous...typical detail of each element and schedule – no design)
4	Photo documentation of various foundation problems and their solutions

Working Drawings -II

Subject Code	K8312	Semester -VI
Credits	4	Subject type-Core

Learning Objectives	
1	To understand and prepare advanced drawings necessary for construction/ execution of the buildings on site

Learning Outcomes: Student will be able to	
1	Prepare working drawings for RCC Framed structure
2	Prepare Detailed drawings such as OHWT, staircase, electrical layout, toilet details
3	Ability to coordinate with other consulting agencies involved in the project.

Units	Contents
Unit I	Preparation of working drawing for RCC structure
Unit II	Details
Unit III	Fieldwork: Setting of structure on Site

Learning Resources	
Text Books:	
Reference Books:	1.Wakita, Osamu A., Richard M. Linde, and Nagy R. Bakhoum (2011). "The Professional Practice Of Architectural Working Drawings
Websites:	
Journals:	Gawne, Eleanor. "Cataloguing architectural drawings." Journal of the Society of Archivists 24.2 (2003): 175-187

Assessment	Marks
I.A.	Internal Assessment
	Refer To 'Rule number 6, sub point 6.2.2.'
U.E.	University Examination
	Assignments or portfolios based on entire syllabus as mentioned below.

Assignment	
1	Common project
2	Field assignments
3	Individual design translated to working drawing portfolio with all details necessary for construction.

Landscape Architecture

Subject Code	K8313	Semester -VI
Credits	3	Subject type-Core

Learning Objectives	
1	To emphasis learning of architecture beyond building, in the outdoor environment and spaces
2	To introduce the role and importance of landscaping and site planning in enhancing and improving the quality of building environs, functionally and aesthetically.
3	To explain site and its context while designing of buildings
4	To use landscape elements to create and enhance exterior spaces and to achieve climatic control at the buildings and site level.

Learning Outcomes: Students will be able to	
1	Explore various aspects of site planning and relationship between built and openspaces
2	Understand role of landscape in architecture.
3	Design small scale landscape project using landscape elements.

Units	
Unit I	<p>Introduction to landscape architecture – Importance, need and scope</p> <p>Landscape Elements</p> <ul style="list-style-type: none"> - Plant element: Different aspects of - trees, shrubs, lawns, climbers, hedges, Indoor plants as elements. Basic idea about plants, plant selection, planting design and care of plants. Importance and use of NATIVE vegetation - Land element: Different aspects –soils, topography, levels, grading, earth forms, and foundations. - Water elements: Fountains, waterfalls, pools, cascades, channels, irrigation etc. - Architectural elements: sculptures, curbs, walls, steps, fence, etc
Unit II	<p>Historical and contemporary landscape practices and case studies</p> <p>Integration of indoor and outdoor spaces</p>
Unit III	<p>Climate</p> <ul style="list-style-type: none"> - Macro and microclimatic consideration in landscaping; effect on landscape and microclimate <p>Site analysis and planning</p> <ul style="list-style-type: none"> - Methodology and process of site study. Landform analysis, site analysis techniques. Importance of site planning for landscape design and architecture. <p>Principles of landscape design</p> <ul style="list-style-type: none"> - Aesthetical consideration
Unit IV	<p>Relation between built and open spaces</p> <p>Pedestrian and vehicular circulation</p> <p>Landscape construction details</p> <p>Services related to landscape</p> <ul style="list-style-type: none"> - Plumbing, water supply, electrical, sewage management

Learning Resources	
Text Books:	
Reference Books:	<ol style="list-style-type: none"> 1. Jellicoe, G. A., & Jellicoe, S. (1982). <i>The Landscape of Man: Shaping the Environment from Prehistory to the Present Day</i>: Van Nostrand Reinhold. 2. Simonds, J. O. (1998). <i>Landscape Architecture: A Manual of Site Planning and Design</i>: McGraw-Hill. 3. Booth, N. K., & Hiss, J. E. (2012). <i>Residential Landscape Architecture: Design Process for the Private Residence</i>: Prentice Hall. 4. Reid, G. W. (2007). <i>From Concept to Form in Landscape Design</i>: Wiley. 5. Robinette, G. O. (Ed.). (1983). <i>Landscape Planning for Energy Conservation</i>. NewYork: Van Nostrand Reinhold Company. 6. White, S., & Stein, J. A. (1993). <i>Building in the garden: the architecture of Joseph Allen Stein in India and California</i>: Oxford University Press. 7. Kanvinde, A., & Miller, H. J. (1969). <i>Campus Design in India: Experience of a Developing Nation</i>: Jostens/American Yearbook Company. 8. Lynch, K. (1984). <i>Site Planning</i> (Third ed.): M.I.T. Press
Websites:	
Journals:	Journal of landscape Architecture (LA)

Assessment	Marks
I.A.	Internal Assessment
	Refer To 'Rule number 6, sub point 6.2.2.'
U.E.	University Examination
	Assignments or portfolios based on entire syllabus as mentioned below.

Assignments	
1	Comprehensive landscape proposal(Drawing portfolio) <ol style="list-style-type: none"> a) One project for Functional and Aesthetic considerations, at residence level. (Especially landscape places like interiors, courtyards, terrace gardens, window landscaping etc.) b) One project for campus planning including vegetation, parking, road sections, footpaths, lighting etc.
2	Case studies of landscape project under consideration in the form of report

Estimation and Costing

Subject Code	K8314	Semester -VI
Credits	3	Subject type-Core

Learning Objectives	
1	To equip students with necessary technical knowledge for calculating estimates and detailed costing for small to medium projects with developing the skill of writing specifications for materials and item works.

Learning Outcomes: Students will be able to	
1	Compute quantities of various building items for simple load bearing structures and be acquainted with various types of Estimates including mode of measurements as adopted by I.S.1200.
2	Compute quantities and rate analysis of various building items of R.C.C. framed structure along with building services such as water supply, sanitation and drainage, electrical installations etc

Units	Contents
Unit I	Introduction, purpose of “Quantity Computation” i.e. estimating, types of estimates (preliminary, Detailed) - Study of I.S.-1200. - A small project in load bearing and R.C.C. frame construction or their part to work out quantities and to understand market rate of materials and labours.
Unit II	- Bill of quantities for single story structures - Load bearing construction system. - R.C.C. Frame construction system.
Unit III	- Methods of calculating quantities for building works - Preparation of Bill of Quantities (B.O.Q.) Mode of measurements of quantities. Market rates of labour and building materials. Labour requirement and norms for consumption of basic materials. - Schedule of rates
Unit IV	- Study of different agencies involved in construction e.g. CPWD, PWD, etc. - Rate analysis and cost index. - Study of rate of innovative building materials in the market. - General factors affecting the rate of an item .rate analysis for different components of construction. - Software for calculation of quantities of various building items

Learning Resources

Journals:	Specifications Consultants in Independent Practice (SCIP) International Cost Estimating and Analysis Association (ICEAA)

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Theory paper	

Assignments	
	Exercises for IA
1	To work out the quantities of a small load bearing structure having area not more than 40 sqm.
2	To work out the quantities of items of construction work of load bearing and R.C.C. framed structure along with presentation
3	To prepare the list of items in construction and work out the quantities of items as directed by instructor

Building Services-IV

Subject Code	K8315	Semester -VI
Credits	2	Subject type-Core

Learning Objectives	
1	To study different high rise systems with respect to service core designs and building automation systems.
2	To familiarize the students with firefighting equipment and their installation
3	To familiarize students with water supply and sanitation systems in high rise
4	To study various aspects of vertical communication systems.

Learning Outcomes: Student will be able to	
1	Explore various services including core and building automation systems.
2	Understand fire safety, fire fighting, fire prevention and installations in buildings including codal requirements
3	Address various design issues of water supply and sanitation systems in high rise buildings.
4	Understand various systems of vertical communication

Units	Contents
Unit I	Advanced Building Services - Types of High Rise Buildings - Building Core Arrangements
Unit II	- Water distribution systems in High rise buildings- downfeed water distribution, pumped upfeed distribution, constant pressure upfeed, gravity downfeed system - Sanitation systems in High rise buildings- two pipe system, solvent system.
Unit III	- Vertical communication systems for high rise buildings-Types of Elevators, Sky lobby Elevator system, double- deck elevator system, Hydraulic Elevators
Unit IV	- Fire fighting in high rise buildings- Water fire suppression systems and other fire suppression systems, Fire detection systems - Codal provision and standards for Fire fighting
Unit V	- Building automation system

Learning Resources	
Text Books:	1. Benjamin Stein and John Renolds.(2006) <i>Mechanical and Electrical Equipment for Building</i> , New York, John Wiley and Sons.
Reference Books:	1. "Fire Safety: National Building Code of India 1983" published by Bureau of Indian Standards. 2. Andrew H Buchanan, (2001) <i>Design for fire safety</i> .New York,John Wiley & Sons Ltd 3. Yeang K.(2002) <i>Service cores details in building</i> . New York, John Wiley and sons. 4. Journals:	Building Services Engineering Research and Technology (bse.sagepub.com) Energy and buildings-Journal-Elsevier (www.journals.elsevier.com/energy-and-buildings/) Technical journals- CIBSE-(www.cibse.org/knowledge/technical-journals/technical-journals-bsert-lr-t)
------------------	--

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Theory paper	

Elective-IV

Subject Code	K8316	Semester IV
Credits	2	Subject type-Elective

Learning Objectives	
1	To give students an opportunity to develop their skills in a subject they may opt for further studio.
2	To study the selected topic in depth of a particular subject that student is interested.
3	To prepare a technical base for students through in depth study.

Learning Outcomes; student will be able to	
1	Engage in systematic self study of topics they feel interested in.

Students can select one elective from the following list	
1	Architectural Journalism <ul style="list-style-type: none"> - Structure of architecture Journals - Writing Descriptive and analytical reports - Editing write ups, Photo Journalism. - Book reviews - Page compositions - The public process - Electronic media
2	Theatre /Film set Design <ul style="list-style-type: none"> - History of set and backdrop design for performance - Theme based design strategies - Period and modern sets, Technology applications
3	Green material/advanced material <ul style="list-style-type: none"> - Green material Selection, factors in selection, Resources to assist in determining materials appropriateness. - Material consideration when using the LEED rating program - Finishing materials for interior and exterior - Insulating materials :organic binders and bitumen and tar based materials like Bitumen, tar, emulsions, mastics, waterproofing items - Polymer sand polymer –based materials and components, polymer based building material for walls, pipes, sanitary-ware, glues and mastics - Metals in advanced building systems, steel cables, structural glazing and curtain walling - Light weight roofing materials :asbestos, galvanized iron, acrylic, polycarbonate
4	Visual Communication <ul style="list-style-type: none"> - Visual communication in architecture - Non verbal communication –signs, symbols, metaphor. - General concepts of image and schema - Concept sketches, bubble Diagrams, Area Diagram - Exploring methods of presentation for design through photographs, ppt, sketching, rendering etc. - Built forms and environment, Way finding in architecture and space between environment

Assessment		Marks
I.A.	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Semester – VII

Architectural Design -VII

Subject Code	K8401	Semester -VII
Credits	10	Subject type-Core

Learning Objectives	
1	To learn different visual mapping methods in architecture
2	To understand and analyze the urban context and respond through design of a public space /public building

Learning Outcomes: Student will be able to	
1	Learn methods of mapping data
2	Develop analytical skills responsive to the broader socio-economic & physical context of the study area
3	Synthesize and translate analytical understanding into Architectural Design

Units	Contents
Unit I	Data Collection, Representation <ul style="list-style-type: none"> - Learning different methods of data collection, documentation and representation through mapping - Documenting the socio-economic & physical context of the study area, understanding character and distinctive features of the same. - Understanding of the legislative provisions including land-use, zoning, DCR& relevant acts as applicable to the study area.
Unit II	Data Analysis <ul style="list-style-type: none"> - Analyzing the available data to arrive at issues, concerns and design decisions based on methods like SWOT analysis. - Arriving at a design proposal and developing design brief based on the analysis
Unit III	Design Proposal <ul style="list-style-type: none"> - Design of a public space/building responsive to the context - site and people

Learning Resources	
Text Books:	
Reference Books:	<ol style="list-style-type: none"> 1. Alexander C., Ishikaw S., Silverstein M. & Jacobson, <i>A Pattern Language, Town, Buildings, Construction</i>, Oxford University Press 2. Journals:	

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignment	
1	Data collection and analysis of urban fabric of selected site
2	Site responsive design demonstration of the following building typologies may be encouraged — residential, industrial, museums, libraries, transportation, institutional, hospitality buildings, recreational, any public activity spaces, etc. - Drawing portfolio and 3 - d model

Building Construction and Materials-VII

Subject Code	K8402	Semester-VII
Credits	4	Subject type-Core

Learning Objectives	
1	To introduce students to the advanced construction systems.
2	To introduce large scale roof constructions like stadiums, industrial buildings etc, and related materials.
3	To introduce types of swimming pool design and construction.
4	To introduce student to concepts of modular design and construction.

Learning outcomes: Student will be able to	
1	Understand various typologies and technologies of long span structures.
2	Understand various design and construction parameters of swimming pools.
3	Analyze modular concept of design and construction in large scale projects.
4	Explore sport stadiums, their field area and support space as well as building envelopes.

Units	Contents
Unit I	Long Span Structures <ul style="list-style-type: none"> • Shell structure like single curvature and double curvature etc. • Folded slab structure • Tension Structures like membrane, cable net and air supported etc. • Grid structure and skeletal like Space frames etc.
Unit II	Multi-basement <ul style="list-style-type: none"> - Soil bearing capacity and excavation techniques for basement. - Different uses of basement, it's planning criteria, Techniques of construction techniques like retaining wall, diaphragm wall, caissons, cofferdam etc. - Various services related to Basement like waterproofing, drainage, Ventilation, Ramps, elevators etc.
Unit III	Auditorium <ul style="list-style-type: none"> - Auditorium shape and size, seating arrangements. - Cone of vision, sightlines, stage and back stage design. - Acoustical design consideration, Noise and its criteria, sound defects etc. - Ancillary spaces like projection room, balcony, green rooms, orchestra pit etc. required for Auditorium. - Services related to Auditorium like fire protection and ventilation etc.
Unit IV	Modular coordination. <ul style="list-style-type: none"> • Precast and prefabricated building components used for roof, wall, interior and floor construction etc.
Unit V	Study of Materials <ul style="list-style-type: none"> - Study of modern building materials with respect to long span roof, modular system ,Acoustics ,basement etc.

Learning Resources

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2’	
U.E.	University Examination	60
	Theory paper	

Theory of Structures -VII

Subject Code	K8403	Semester-VII
Credits	2	Subject type-Core

Learning Objectives	
1	To understand trends and challenges in contemporary building structural systems.
2	To understand complex building structures and large spans
3	To understand importance and need for structural modeling

Learning Outcomes :Student will be able to	
1	Develop connections between Design, Construction and Material.
2	Design Ground and First floor structures with R.C.C. and steel building with simple configuration
3	Apply software as tool for modeling structures

Units	Contents
Unit I	<ul style="list-style-type: none"> - Earthquake zoning, base shear, lateral forces. Introduction to IS: 1893 - Introduction to shear wall, structural behaviour, typical details. - Ductile detailing: introduction to IS: 13920, typical details of beams, columns, junctions
Unit II	<ul style="list-style-type: none"> - Introduction to flat slab (beamless). Major structural actions, behaviour and RCC details. - Introduction to plate girders, gantry girders, castellated girders. - Introduction to flitched beams.
Unit III	<ul style="list-style-type: none"> - Introduction to shell roofs. Behaviour, structural actions and rcc details of spherical dome. - Understanding space frame and space truss (3D elements, equilibrium conditions and concepts only) - Introduction to long span structures: arches, open web sections, bow string girders, typical details. - Modelling and analysis of structure on STAAD-Pro software.

Learning Resources	
Text Books:	<ol style="list-style-type: none"> 1. Sarma T.S. (2014) <i>STAAD Pro V8i for Beginners with Indian Examples</i>. Chennai, Notion Press. 2. Shah H.J.(2014)<i>Design of RCC Structures part II</i>.Anand,Charotar Publishing house.
Reference Books:	<ol style="list-style-type: none"> 1. Dr.Shah V.L.& Dr. Karve S.R.(2014)<i>Illustrated design of reinforced concrete buildings(design of G+3 storeyed office/residential building)</i>.Pune,Structures Publishers. 2. Negi L.S.&Jangid R.S.(2000)<i>Structural analysis</i>.New Delhi,Tata McGraw-Hill Publishing company limited.
Websites:	<p>www.nicee.org www.bis.org www.nptel.ac.in INSDAG website</p>
Journals:	IS :1893 and IS: 13920

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignment	
1	Sketching and explaining structural behaviour of above topics.
2	Case study of structural systems implemented by imminent architects in their projects
3	Modelling and analysis of simple structure on STAAD-Pro

Interior Design I

Subject Code	K8404	Semester -VII
Credits	4	Subject type-Core

Learning Objectives	
1	To make students understand various aspects of interior spaces
2	To make students understand qualities of interior spaces to develop skills in designing for functional and aesthetical meaningful interior spaces.

Learning Outcomes: Student will be able to	
1	Design interior spaces of buildings.
2	Design furniture with all necessary details.
3	Develop competence for working with various materials & construction techniques used in interior design

Units	Contents
Unit I	- Introduction to the field of interior design and various parameters. market survey of various interior materials
Unit II	- Market survey of various interior materials.
Unit III	- Case study of a small interior project. (100sq.m to 150 sq,m) Carpet area.
Unit IV	- A detailed design of the interior projects. (50sq.m to 100 sq,m) Carpet area.

Learning Resources	
Text Books:	1. John Coles & Naomi, (2007) The fundamentals of interior architecture/AVA Publishing SA.
Reference Books:	1. Mitcheil Beazley (2004), The new colour book/octopus publishing group ltd. 2. Julie Savill (2001), Good homes magazine(101 colour schemes that really works)/BBC World wide. 3. Elizabeth wilhide. (2007), Surface & Finish(Directory of materials for interiors) /Quadrille publishing Ltd. UK
Websites:	www.quadrille.co.in. www.theaid.in.
Journals:	Magazine published by IIID “Insite” International journal of interior architecture & spatial design.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Study Example report with drawings & Studio based time bound Interior design project.
2	Report on survey of materials in market (This will be referred for UE examination)
3	Drawing portfolio comprising of Individual interior design layout, elevations,

	sections and views
4	Constructional drawing of various interior components and specification of the above interior finalized project.

Advance Landscape Architecture

Subject Code	K8405	Semester -VII
Credits	3	Subject type-Core

Learning Objectives	
1	To understand the complex issues related to landscape architecture and respond comprehending natural, man-made and social environment.
2	To understand various factors affecting landscape design at urban scale

Learning Outcomes: student will be able to	
1	Respond to complex issues related to landscape architecture at macro level
2	Understand influences of various factors on design of landscape at urban scale

Units	Contents
Unit I	Understanding advancements in Landscape Architecture -Terrace Gardens, Roof Gardens, Vertical Landscapes, etc. -Landscape for atriums -Innovative Landscape construction techniques.
Unit II	Understanding the process of site analysis and planning at macro level (involving complex issues such as physical, functional, environmental and socio-cultural) - Physical factors such as topography, geology, site features, hydrology, surrounding land-use, buildings and soil conditions - Environmental factors such as climate, existing flora and fauna - Socio-cultural such as existing use, structures of historic or religious importance if any , - Aesthetics such as views from and within site - Storm water management
Unit III	Understanding role of landscape for energy conservation -Role of vegetation -Role of water bodies -Role of land form -Effect on temperature, air movement, noise and pollution
Unit IV	Understanding the various factors affecting design and planning of urban open spaces and provide landscape solution for the same. - Physical Factor - Social Factors - Environmental Factors - Functional Aspects

Learning Resources

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Case studies based on unit I
2	Assignment based on unit III
3	Case studies or readings based on unit IV
4	One large scale studio project based on unit II or IV

Urban Planning I

Subject Code	K8406	Semester -VII
Credits	3	Subject type-Core

Learning Objectives	
1	To introduce students to the basic concepts of Town and Urban Planning.
2	To understand the hierarchy of planning.
3	To understand the importance of Town Planning with respect to legislative guidelines, through Acts and Byelaws
4	To introduce the subject of Urban Design in order to enable students to establish a larger context for Architectural Design

Learning Outcomes: Student will be able to	
1	Understand the basic concepts of Town and Urban Planning
2	Legislation and rules of Town Planning
3	Do the Subdivision of Layout, and Municipal Drawings.
4	Understand the evolution of urban form of cities

Units	Contents
Unit I	Introduction to the subject of Urban Planning. Introduction to the Basic concepts in planning like landuse, zoning, byelaws etc Need and importance of study of Rural/ Town /Urban Planning for an architect.
Unit II	Evolution of planning in settlements from ancient to contemporary times. Principles, influences on Indus cities, Egyptian cities, Greek cities, Roman cities, Industrial cities etc.
Unit III	Planning Theories By Patrick Geddes; Kevin Lynch; Clarence Perry; Frank Lloyd Wright; Ebenezer Howard; Le Corbusier, C.A. Doxiadis, Lewis Mumford. Conceptual study of Garden city, Satellite towns, Industrial Towns, New Towns, Planned Cities, Twin Cities, Neighbourhood Etc. City plan patterns -Linear, Radial, Grid Iron layout and Ribbon development
Unit IV	Introduction to Housing and Housing Typologies Characteristics of Urban housing. Study of Housing typologies based on Topographical and Social, Economics aspects. Housing scenario and its impact. Study of Housing Neighbourhoods with reference to planning concepts and principles by planners.
Unit V	Introduction to Planning Legislation Introduction to various planning related laws, their contents and provisions, viz: M.R.T.P. Act of 1966, Land Acquisition Act of 1894, Maharashtra Slum Redevelopment Act, Urban Arts Commission Act, Municipal Act etc
Unit VI	Introduction to urban form and space Urban Form and space in historical and theoretical terms.

Learning Resources

U.E.	University Examination	60
	Theory paper	

Building Services-V

Subject Code	K8407	Semester -VII
Credits	2	Subject type-Core

Learning Objectives	
1	To expose students to the various integrated services of water supply And drainage at campus level.
2	To familiarize students with solid waste management.
3	To study various Building Management Systems.

Learning Outcomes: student will be able to	
1	Acquire knowledge of various integrated building services.
2	Address various issues of solid waste management.
3	Understand various Building management systems

Units	Contents
Unit I	Water Distribution systems <ul style="list-style-type: none"> - For housing schemes and high rise buildings. Schematic water distribution from treatment plant to town, group housing etc. - Hot water supply in high rise buildings. - Water heaters, boilers - Solar water heating
Unit II	Sewage collection and disposal <ul style="list-style-type: none"> - For large campuses, complexes, High rise Buildings etc. Mechanical methods of removal of sewage from basements (Shone's ejector). - Sewage treatment, Waste water conservation, recycling, biogas etc
Unit III	Urban Drainage Systems <ul style="list-style-type: none"> - For private and public places. - Drainage ,sub drains, culverts, ditches, gutters, drop inlets and catch basins - Rain water Harvesting.
Unit IV	Solid waste or refuse Disposal <ul style="list-style-type: none"> - Refuse chutes. - Waste /kitchen - waste Managements
Unit V	Integration of Services <ul style="list-style-type: none"> - ETP, STP and other building management services like CCTV, PG & UPS

Learning Resources	
Text Books:	1. Benjamin Stein and John Renolds.(2006) <i>Mechanical and Electrical Equipment for Building</i> , New York, John Wiley and Sons.
Reference Books:	1. Vasisth K.(2011) <i>Waste management</i> New Delhi, Essential books. 2. National Building Code of India, 2005 (NBC 2005)
Websites:	http://bst1.cityu.edu.hk/e-learning
Journals:	CIBSE journal http://www.cibsejournal.com/ Building Services Engineering Research and Technology (bse.sagepub.com) Energy and buildings-Journal-Elsevier (www.journals.elsevier.com/energy-and-buildings/) Technical journals- CIBSE-(www.cibse.org/knowledge/technical-journals/technical-journals-bsert-lr-t)
Assessment	Marks

I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Detail services layout which includes water supply and sanitation requirements for a campus project. (Project is preferably the architectural design project which the students have already worked on)

Elective- V

Subject Code	K8408	Semester IV
Credits	2	Subject type-Elective

Learning Objectives	
1	To give students an opportunity to develop their skills in a subject they may opt for further studio.
2	To study the selected topic in depth of a particular subject that student is interested.
3	To prepare a technical base for students through in depth study.

Learning Outcomes: Student will be able to	
1	Engage in systematic self study of topics they feel interested in.

Students can select one elective from the following list	
1	<p>Housing</p> <ul style="list-style-type: none"> - Housing survey and methodologies - Factors effecting housings - Housing demand, slums, Typologies, finance, etc. - Comparative study of various housing policies and programmes. - Housing case studies - Post Occupancy evaluation. - Importance of housing in urban and regional development - Structural concepts, use of traditional and new building materials ,self help and low cost housing - Role of co-operative and public and private agencies
2	<p>Disaster Management</p> <ul style="list-style-type: none"> - Study of building designs to resist following types of disasters: Earthquake; Fire; Flood; Cyclone; Tsunami; Other natural disasters - Post-disaster problems - Study of geological structure and its deformation - Study of behaviour of the structure in such disasters - design aspects and considerations for various types of buildings especially the residential, congregational and institutional buildings
3	<p>Sustainable architecture</p> <ul style="list-style-type: none"> - Study of effects of Luminous Environment on comfort condition in built space, including Analysis Techniques, Design Strategies and Evaluation Procedures - Introduction and Analysis of the Precedent - Analysis of the site and climate - Analysis of the building programme and use. - Schematic design. - Design development. - System integration - Various rating systems like LEED, GRIHA.
4	<p>Industrial Architecture</p> <ul style="list-style-type: none"> - Location and planning aspects of Industrial areas - Indoor and Outdoor working environment in Industries - Services essential for Industries, considerations f industrial safety (Fire) - Various acts applicable to construction of industries such as Factory act,

	Pollution control Act etc. - Review of structural systems used for Industries with materials. - Environmental pollution as resultant of industrial activity.
--	--

Assessment		Marks
I.A.	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Semester – VIII

Architectural Design VIII

Subject Code	K8409	Semester -VIII
Credits	10	Subject type-Core

Learning Objectives	
1	To develop understanding of present day urban/socio-economic/technological/infrastructural issues and identify redevelopment triggers.
2	To evaluate performance of a built space with respect to present day urban parameters.
3	To develop skill of feasibility analysis and design capacity in given urban context.

Learning Outcomes: Student will be able to	
1	Learn building Design issues such as parking, additional FSI with design and work out feasibility due to change in life style.
2	Redevelop a precinct to meet the present day needs like innovative technology
3	Study of relevant bylaws applicable for the above mentioned project.

Units	Contents
Unit I	Identify, Research and analyze urban issues such as parking/changed life style/changed urban fabric/infrastructure of a given plot of land and feasibility study.
Unit II	Case study of redevelopment projects
Unit III	Design of given plot (Redevelopment)

Learning Resources	
Text Books:	
Reference Books:	1. Shah Jagan, 2008, Contemporary Indian Architecture, Lustre Press 2008 8 ISBN 174364463, 9788174364463 2. National Building Code of India, 2016
Websites:	
Journals:	

Assessment		Marks
I.A.	Internal Assessment Refer To 'Rule number 6, sub point 6.2.2.'	40
U.E.	University Examination Assignments or portfolios based on entire syllabus as mentioned below.	60

Assignment	
1	Collecting data about a project/site to be developed.
2	Feasibility study and formulation of design brief
3	Design: The project that can be taken up can be redevelopment of a plot, addition and alterations to existing structures/change of use.

Building Construction and Material VIII

Subject Code	K8410	Semester -VIII
Credits	04	Subject type-Core

Learning Objectives	
1	To introduce the concept of multi-basement and its construction systems.
2	To introduce the Acoustical design considerations for Auditorium and its construction systems.
3	To introduce various considerations in Design and Construction of high rise structures.

Learning Outcomes: Student will be able to	
1	Understand different systems of basement constructions and its services.
2	Understand different systems of Semi- permanent structures and its installation techniques.
3	Understand different design consideration for Auditorium and its systems of construction.

Units	Contents
Unit I	Swimming Pool <ul style="list-style-type: none"> • Components of Swimming pool like basin, drain, filter, deck, ladder, diving board, lane and lane marking etc. • Types like private, public, recreational, theme based, sports etc. • Materials used for swimming pool like brick, concrete, fiber reinforced etc. • Techniques used for constructions of swimming pool like underground, above ground, elevated etc. - Services related to swimming pool like filtration, electrical, drainage , maintenance etc.
Unit II	Stadium: <ul style="list-style-type: none"> • Introduction to Components of Stadiums like stadium field area, Seating area, envelope and roof. • Field area and their shapes, orientation, field drainage, field protection etc. • Stadium Bowl design parameters like viewing distances and sightlines, gangways, vomitories, media boxes, VIP areas, player areas, facility areas like food and services. • Building Envelope and roof materials and their technologies. • Roof design considerations like wind and sun. • Services related to Stadium like lighting, access control, signage, toilet, maintenance etc. -
Unit III	Semi-permanent Structures <ul style="list-style-type: none"> - Need, Planning and Layout, Installation techniques used worldwide. - Various Semi-permanent Structural systems for floor, wall, roof etc. - Services related to water and sanitation layout, natural and mechanical ventilation, lighting, insulation etc.
Unit IV	High Rise Structures <ul style="list-style-type: none"> - Design consideration like wind and seismic, foundation, form work systems,

	Construction Techniques and Building Envelope, mechanical floors. - Systems in steel and Concrete. - Structural glazing, elevators,
Unit V	Study of Materials - Study of different modern building materials with respect to Swimming Pool, Stadium, installable structures and high rise.

Learning Resources	
Text Books:	1. T.D Ahuja and G.S. Birdie (1996) <i>Fundamentals of Building Construction</i> New Delhi, Dhanpat Rai Publishing Company Pvt. Ltd
Reference Books:	2. J. S. Foster, Roger Greeno(2007) <i>Mitchell's Structure & Fabric: Part 2</i> .New York,Taylor and Francis group. 3. Gorenc, Tinyou, Syam(2005) <i>Steel Designer's Handbook</i> New Delhi,CBS Publishers and Distributor. 4. Ralph Monletta (1989) <i>Plastics in Architecture” – A guide to acrylic and Polycarbonate</i> .New York, Marcel Dekker Inc.

Journals:	Journal of Construction Engineering, Technology stmjournals.com/index.php?journal=jocetm) Master Builder -Construction Magazine, Construction News(www.masterbuilder.co.in)

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Theory paper	

Assignments	
1	Portfolio of technical drawings of above mentioned topic with supporting documents of sketched booklet and pictographic presentation. (min.4drgs.)
2	Field reports and Market survey of building Material topics.
3	Proposals of different designs of swimming pool and sitting area for small scale stadia. (as per discretion of the subject faculty)

Vocabulary and Repertoire

Subject Code	K8411	Semester -VII
Credits	3	Subject type-Core

Learning Objectives	
1	To express understanding of architecture writings.
2	To learn vocabulary to be used for analyzing Architecture.

Learning Outcomes: student will be able to	
1	Acquire effective verbal communication in architecture
2	Write essays, research papers, book reviews etc.

Units	Contents
Unit I	Architectural expression <ul style="list-style-type: none"> - Form and expression - structural expression - society - culture and expression - spatial expression Vocabulary and grammar of form Glossary of technical words
Unit II	Architectural Journalism <ul style="list-style-type: none"> - Writing Descriptive and analytical reports - Book reviews - Page compositions
Unit III	Elements of Architecture <ul style="list-style-type: none"> - Basic elements of architecture - Modifying elements of architecture
Unit IV	Seminar on Architects Biography and Concepts in contemporary architecture

Learning Resources	
Text Books:	Simon Unwin (2009). <i>Analysing Architecture</i> third edition, revised and enlarged. USA and Canada by Routledge.
Reference Books:	John Ruskin (1989). <i>The seven lamps of Architecture</i> . London, Dover Publications Neelkanth Chhaya (2014). <i>Harnessing the intangible, collected essays on the work of Balkrishna Doshi</i> , New Delhi, NIASA Council of Architecture.

Assessment	Marks
I.A.	40
Internal Assessment Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	60
University Examination Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Writing Journals on Theory of design
2	Any one Book review and Any one Architects Biography

Interior Design II

Subject Code	K8412	Semester -VIII
Credits	04	Subject type-Core

Learning Objectives	
1	In this subject students will apply their skills, knowledge gained in the previous interior design studio for more complex interior design projects with all details of services.
2	The students will also understand the complex interior designing process, specification, various detailing and tentative estimate of to fulfill the needs of client.

Learning Outcomes: Student will be able to	
1	Acquire knowledge of various high end interior building materials their specification its cost and its application in interior design project.
2	Design complex Interior spaces with services, construction details with cost consideration to suit its function and aesthetics in a Systematic cad presentation with all detail drawings.

Units	Contents
Unit I	Introduction to the field of interior design with respect to services.
Unit II	Market survey of application of various finishing interior materials and techniques.
Unit III	Detailed Case study of a medium scale interior project. (150 sq.m to 250 sq.m.)
Unit IV	A detailed design of the medium scale interior projects showing all necessary services, specifications and costing. Carpet Area (150 sq.m to 250 sq.m.)

Learning Resources	
Text Books:	Office Spaces – Crane Dixon, Architectural Data Sheets
Reference Books:	Corporate Interiors – Kogek Yee, Office Interiors – Alan Phillips
Websites:	www.quadrille.co.in. www.theaid.in.
Journals:	Architectural Digest, Elle Décor, Home and Design, Interior Design etc.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignment	
1	Report based on Market survey of interior Materials
2	Live Case Study of a completed Interior Project
3	Detailed drawings of the Interior Design project of the following – residential, public, commercial etc with thrust on services, specification and tentative

	estimate etc.
4	Design of the decorative ceiling, paneling, lightings, floor details, toilet details etc for the above projects.
5	Detailed design of two furniture units with specification and construction/ joinery details.

Urban Planning II

Subject Code	K8413	Semester -VIII
Credits	03	Subject type-Core

Learning Objectives	
1	To introduce students to the advanced concepts of Town and Urban Planning.
2	To understand the planning procedures at various levels of planning.
3	To understand the holistic relationship of planning with various other aspects of physical developments.
4	To develop an urban vocabulary required to understand urban form and public spaces

Learning Outcomes: Student will be able to	
1	Understand the interrelated concepts of Town and Urban Planning
2	Exposure to the various laws and rules for planning and balanced development.
3	Understand the effects of various policies on physical development.
4	Understand urban form and space

Units	Contents
Unit I	Introduction to the process of formulation and implementation of : Regional Plan, Development Plan and Town Planning Schemes. Study of various Planning agencies and their role in planning like HUDCO, CIDCO, HDFC, MHADA etc.
Unit II	Role and relevance of Transport Planning, Landscape and Environmental issues, Heritage etc in Urban Planning.
Unit III	Introduction to various planning tools. Methodology of conducting town planning surveys, types of surveys (physical, social, and economical, Aesthetic Surveys etc) and analysis of data collected.
Unit IV	Urbanization and Its Impacts. Introduction to Study of Contemporary Issues of Urban Development and concerns in the City.
Unit V	Policies and legal framework for contemporary planning development: National Missions, Schemes for funding various planning activities, infrastructure development schemes like JNNURM, HRIDAY, SMART CITY etc.
Unit VI	Introduction to urban design terminologies and definitions To understand the urban form derived from theories as well as empirical evidence.

Learning Resources	
Text Books:	6. Kevin Lynch (1960) <i>The Image of the City</i> USA, MIT press. 7. Lewis Mumford (1972) <i>The City in History: Its Origins, Its Transformations, and Its Prospects</i> .USA, Harcourt, Inc. 8. Peter Geoffrey Hall (1996 Updated Edition) <i>Cities of Tomorrow: An Intellectual History of Urban Planning and Design in the Twentieth Century</i> USA, Blackwell publishing. 9. Anthony J. Catanese, James C. Snyder (2014) <i>Urban Planning</i> . New Delhi, McGrawHill Education Private Limited.

	10. AbirBandyopadhyay, (2010) <i>Town Planning</i> , Kolkata, ArunabhaSen
Reference Books:	4. Brown A.J.(1969) <i>Introduction to town and country planning</i> Australia, Angus and Robertson publisher. 5. P.Healey,(1981) <i>Planning Theory</i> .UK, Pergamon Press 6. Arthur Gallion(1993) <i>The Urban Pattern</i> . New York, John Wiley and Sons

Journals:	Cities: The International Journal of Urban Policy and Planning Urban Policy and Research Urban Studies
Assessment	
I.A.	Internal Assessment
	Refer To 'Rule number 6, sub point 6.2.2.'
U.E.	University Examination
	Theory paper
	Marks
	40
	60

Research Skills

Subject Code	K8414	Semester -VIII
Credits	04	Subject type-Core

Learning Objectives	
1	To inculcate in students methodical process to approach an architectural design project holistically.
2	To develop research skills necessary to provide approach and directions in design of architectural project.
3	To develop a systematic approach of research for application in Architectural Design Project.
4	To develop skill sets of writing research paper

Learning Outcomes: student will be able to	
1	Develop primary skills to conduct research in Architecture
2	Demonstrate Visual Research Methods.
3	Demonstrate acquired research skills through the topic selected for Architectural Design Project.

Units	Contents
Unit I	Introduction to Research Skills , Types of research , Methods of data collection , Ethics ,and Referencing
Unit II	Visual Research Methods in Design Imageability Environmental mapping – Direct observation and direct communication Visual representation Environmental behaviour
Unit III	Selection of topic for Architectural Design project giving overview of introduction, background, context, relevance, scope and limitation, methodology and identification of case studies.
Unit IV	Demonstration of Case study and its analysis (Minimum two Book /live case studies) to understand the Project. Literature review minimum three research papers relevant to the research project
Unit V	Research Paper Writing

Learning Resources	
Text Books:	
Reference Books:	1. Robert Bechtel et al (eds). Methods in Environmental and Behavioral Research, NY:VanNostrand Reinhold, 1987. 2. Gary T Moore et al. Environmental Design Research Directions: Process and Prospect. New York: Preager Publishers, 1985. 3. Henry Sanoff. Visual Research Methods in Design. New York: Van Nostrand Reinhold, 1991
Websites:	
Journals:	

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To 'Rule number 6, sub point 6.2.2.'	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Synopsis of Architectural design project.
2	Literature review.
3	Case studies and its analysis (minimum two).
4	Research Paper Writing.
5	Seminar presentation of components level research areas based on selected Architectural Design Project .

Elective- VI

Subject Code	K8415	Semester IV
Credits	2	Subject type-Elective

Learning Objectives	
1	To give students an opportunity to develop their skills in a subject they may opt for further studio.
2	To study the selected topic in depth of a particular subject that student is interested.
3	To prepare a technical base for students through in depth study.

Learning Outcomes: Student will be able to	
1	Engage in systematic self study of topics they feel interested in.

Students can select one elective from the following list	
1	<p>Real Estate Management</p> <ul style="list-style-type: none"> - Real estate development: Fundamental concepts and techniques, recognizing institutional and entrepreneurial elements, issues encountered in various phases of development like site evaluation and land procurement, development team assembly, -market study and development scheme, construction & project management, project marketing and hand-over of completed projects. -Development & project financing: Project Feasibility, Development Financing, Asset Disposal and Redevelopment Options, -Analyses of Development Sites and Case Studies, integrated case study on a specific development project, which requires reviewing, analyzing and resolving the problems or strategic issues. - Urban policy & real estate markets : Impact of Government Regulations and Public Policies on Real Estate Markets, include urban land rent and location theories, land use structures, community and neighbourhood dynamics, degeneration and renewal in urban dynamics, private-public participation, government policies on 95 public and private housing, and urban fiscal policy including property taxation, local government finance. - Corporate real estate asset management: Strategic plans to align real estate needs with corporate business plans; -Performance measurement techniques to identify asset acquisition or disposal; methods for enhancing value through alternative uses, efficient space utilization or improving user satisfaction. - Commercial real estate appraisals: Determination of the capitalization rates across different types of properties;-Appraisal of freehold and leasehold interests; -Critical analysis of the valuation approaches adopted for securitized real estate; Asset pricing models; investment flexibility and future redevelopment opportunities.
2	<p>Architectural Conservation</p> <ul style="list-style-type: none"> - History and theory of conservation - Philosophy of conservation

	<ul style="list-style-type: none"> - Pioneers of conservation - Definition of conservation, preservation, restoration, reconstruction ,Adoption - Broad concepts of terms such as Reuse, Rehabilitation, Revitalization, Regeneration, Up gradation etc. - Value and ethics - Traditional building materials and their decaying characteristics. Environmental influences: thermal effect, corrosion and oxidation. - Preparation of Inspection reports. - Cultural Heritage - Conservation methods - Classifications - Management of historic sites - Studies of various charters. <p>Role of INTACH,UNESCO, ECOMOS and other organizations</p>
3	<p>Digital architecture (can be a combination of seminar and workshop - project and practice based course)</p> <ul style="list-style-type: none"> -Compare approaches of design processes - conventional process focused on architects' style and contemporary process influences by digital tools -Introduce the new tools of design, production and fabrication in architecture that affect various stages of architectural production, from conception and visualization to development and manufacturing -Provide opportunities to integrate the use of the computer for design, production, and presentation with the help of individual projects -Provide understanding of software packages, and modeling techniques
4	<p>Architectural Software</p> <ul style="list-style-type: none"> -Provide hands-on exposure to various software packages to work on design, modelling, and simulations used in architectural design -Use of various (relevant at the time) 2D drafting and 3D modeling tools for rendering and architectural presentation -Use of various software packages for analysing building systems and services performance (this can be for passive and/or active measures relevant to the semester focus) -Options <p>Advanced AutoCAD Advanced SketchUp with various plugins Revit</p>

Assessment		Marks
I.A.	Internal Assessment	100
	Refer To 'Rule number 6, sub point 6.2.2.'	
Note	There is no 'University Examination' for this subjects	

Semester – IX

Practical Training

Subject Code	K8501	Semester -IX
Credits	30	Subject type-Core

Learning Objectives	
1	To acquaint students with prevalent purview and procedure of architectural and allied practice
2	To invite practitioners participation in the education of the 'would-be entrants' to the profession for up datedness of information and orientation
3	To boost the dialogue between 'practice' and 'academics' of architecture for progressive learning of a student

Learning Outcomes: student will be able to	
1	Develop skills in professional behavior
2	Explore different facets of office management including preparation of working drawings, detailed drawings, perspectives, study of filing systems of documentation, preparation of tender documents etc.
3	Gain site experience in respect of supervision of construction activity, observation, layout on site, taking the measurements and recordings.

Units	Contents
Unit I	Indoor activities, office administration <ul style="list-style-type: none"> - Routine correspondence with client's local authorities, contractors and other agencies dealing in building industries - Systematic filing and registering office correspondence for easy re-reference. - Regular maintenance of work-diaries with notes on principal's instructions, interviews with various agencies, indoor and/or outdoor work and time-spent - Systematic filing and indexing of technical catalogues and price lists for handy reference. - Systematic ordering and use of office library
UnitII	Indoor activities, drawing and designing <ul style="list-style-type: none"> - Making of preliminary designs and drawings accountably by requisite prior study, research, and case studies. - Preparing 'Presentation' 'statutory ', 'working' and 'detailed' drawings of customary contents and format by understanding their propriety and logic - Reading and making use of 'Contour Plans' while at VI & VII above - Dependably efficient handling of auxiliary routine operations like taking off and codified rendering of prints and electronic and/or computerized communication, drafting, copying etc - Briefing with various technical consultants and co-coordinating their drawings. - Preparation of 'study' and 'Presentation' models of buildings and/or development lay-outs in different levels and chromatic material-textures
Unit III	Outdoor activities: <ul style="list-style-type: none"> - Attending routine meetings with clients, local authorities, contractors and other trade representatives - Checking of lining-out of buildings on site - Systematic surveying of sites and/or existing buildings of moderate size and complexity in conventionally comprehensive format - Architecturally monitoring the work-progress on site/s through periodic

	supervisions, instructions and reports thereon
--	--

Learning Resources	
Reference	Architects Drawings

Assessment		Marks
I.A.	Internal Assessment- Refer To ‘Rule number 6, sub point 6.2.2.’	40
1	The Log-Book duly filled in and authenticated by the said responsible registered architect- member of the employer-organization. (one member-signatory throughout Log-Book)	15
	Diary- The day to day hand-written preformed Work-Diary maintained by the student during the period of ‘training’ (as stipulated hereinabove) and certified by the said responsible registered architect-member of the employer-organization- one and the same members signatory who authenticates the Log-Book. (preferably initialed per day)	15
	Work report- The manually laboured ‘Work-Report’ structured as herein after prescribed under ‘Term work’ and authenticated too only by the said responsible registered architect-member of the employer organization. (One member-signatory who certifies Log-Book and Work-Diary).	10
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
	Portfolios consisting of drawings prepared by the student as intern in the office

Details of training	<p>-The practical training of minimum duration of 15 to 18 working weeks (90 work days) shall be carried out in the office of an architect or an organization Operating in an allied field of practice or research, duly approved by the institution, under mentorship of an architect having experience of at least 5 years.</p> <p>-Training in Foreign Country shall be done under the Registered Architect of that Country and to be approved and monitored by the Head of the Institution.</p>
----------------------------	---

Semester – X

Architectural Design Project

Subject Code	K8502	Semester-X
Credits	16	Subject type-Core

Learning Objectives	
1	To inculcate in the students methodological process to approach an architectural project holistically.
2	To prepare students to handle large scale complex architectural projects individually.

Learning Outcomes: student will be able to	
1	Include intensive study of relevant literature, case studies, climatology and analysis of problems concerned with development of functional organisation of space form and structure.
2	Study based on correlation and interpretation of the social, economic and physical data.

Units	Contents
Unit I	The architectural project should consist of 2 parts: A. Technical Report: well documented report consisting of hypothesis formulation, data acquisition, verification, and analysis by following qualitative and quantitative research methods. B. Design Solution: Self explanatory drawings, covering various aspects of construction, function, technology, services, and site planning etc. few suggested buildings types are institutional projects, civic amenities, commercial, industrial, sports and recreation, administrative, transportation facilities, housing, specialized building, etc.
Unit II	Technical report: - A hard bound copy of original report shall be submitted, which will be certified and signed by the college authorities as authentication of the work and by the guide who has guided the work - Size: Project Report size A4 Sized '120 Mm x 297 mm portrait with embossed title necessarily on the spine and front page. - Total Pages: There Shall Be Maximum 50 Pages with double side printing excluding drawings. - Printing: Font type like Arial/ Times New Roman With 12-point size shall be used for regular typing with 15- point size shall be used for captions. The typing shall be done with 1.5 lines spacing throughout. - The presentation copy shall be necessarily a hard bound copy. Number of copies shall be as prescribed by the college. (1 copy for the student, 1 original copy for the college library and 1 soft copy on a CD.)
Unit III	Design solution: Graphically presented design solution with minimum 5000 Sq.M Built up area shall be in form of a drawing portfolio. It shall consist sufficient number of architectural drawings (manually drawn / computerized) with models, etc. Since the architectural project is the culmination of five years of learning in various aspects of architecture, it is expected that student demonstrates an ability of holistic and comprehensive thinking in the areas of, - Site Planning - Structural considerations

	<ul style="list-style-type: none"> - Space Designing - Landscape Design - Building Services - Climate Responsive, Energy Efficient and Exhibiting Qualities of sustainable architecture. - Architectural Detailing. <p>The portfolio will consist of drawings (minimum of 10 and maximum of 15) sufficiently in detail to demonstrate consideration given to above mentioned attributes. The emphasis shall be given to prepare self-explanatory drawings.</p>
--	---

Learning Resources: As required by individual project.

Assessment		Marks
I.A.	Internal Assessment	40
	The Internal Assessment of “Architectural Project shall be carried out stage wise as decided by the subject Coordinator for the year which shall be announced to the students at the beginning of the semester.	
U.E.	University Examination	60
	The final assessment in the examination shall be done by both internal and external examiners in which the student will display his/her work and answer all the queries raised by the examiner.	

Capstone Project

Subject Code	K8503	Semester -X
Credits	06	Subject type-Core

Learning Objectives	
1	To study interrelationship of all subjects that a student has learned in the curriculum of architectural studies.
2	To understand the architecture as a “craft”.

Learning Outcomes; Student will be able to	
1	Develop competence in transforming architectural drawing to professional working document
2	Prepare documents of building design project minimum 500 Sq.M. such as Presentation drawings, Working drawings, Specifications, Quantities, Estimates, and Tender document.

Units	Contents
Unit I	Preparation of working drawing, municipal drawing of the above
Unit II	Preparation of Specifications and Bill of Quantities (BOQ)
Unit III	Preparation of Contract Document

Learning Resources	
Text Books:	
Reference Books:	<ol style="list-style-type: none"> 1. Wakita, Osamu A., Richard M. Linde, and Nagy R. Bakhom (2011) "The Professional Practice of Architectural Working Drawings. 2. Reference drawings from an ISO certified architect’s office 3. Handbook of Professional Documents: 2011, Council of Architecture, New Delhi, India 4. Indian Institute of Architects, Handbook
Websites:	
Journals:	Gawne, Eleanor. "Cataloguing Architectural Drawings." Journal of the Society of Archivists 24.2 (2003): 175-187.

Assessment		Marks
I.A.	Internal Assessment	40
	Refer To ‘Rule number 6, sub point 6.2.2.’	
U.E.	University Examination	60
	Assignments or portfolios based on entire syllabus as mentioned below.	

Assignments	
1	Assignment I: Preparation of Presentation Drawings with rough estimates
2	Assignment II: Preparation of Set of Working Drawings, Specifications, BOQ, and Contract Document

Professional Practice

Subject Code	K8504	Semester -X
Credits	4	Subject type-Core

Learning Objectives	
1	To introduce aspects of professional conduct, duties and responsibilities, legal rights and procedures of architectural profession.
2	To enable student to acquaint with various responsibilities of professional architect.
3	To acquaint students with documentation and procedures for execution of building work/projects as well as with management aspects

Learning Outcomes	
1	Visualise various working situations that may arise in practice as an architect
2	Manage his/her professional environment towards fair practice
3	Understand ethics of architectural profession
4	Learn to work with various agencies in practice

Units	Contents
Unit I	Laws, Rules and Guidelines related to Architectural Practice <ul style="list-style-type: none"> - Architects Act 1972 - brief overview, introduction to nature, scope and functions of Council of Architecture - Detailed study of professional conduct regulation - Comprehensive architectural services, scale of professional fees as framed by Council of Architecture - Architectural competitions guidelines by Council of Architecture - Architects Liability
Unit II	Setting up architectural practice as profession, tax liabilities <ul style="list-style-type: none"> - Nature of profession, difference between trade, business and profession - Emerging Role of architectural profession - Accounting and taxation - Organization of architects office and different models of business
Unit III	Land tenures and contracts <ul style="list-style-type: none"> - Introduction to valuation, land tenures and easements and dilapidations - Architects role in construction contracts

Self Study

Subject Code	K8505	Semester -X
Credits	4	Subject type-Core

Learning Objectives	
1	To facilitate the students to learn out of a pool of specialized subjects, which provides extended scope or which enables exposure to cross-disciplinary subjects
2	To facilitate the students to learn cross-disciplinary subjects.

Learning Outcomes	
1	Engage in systematic self study.

Units	Contents
	Under this, the student can select any one subject related the parent course or other than the parent course. The choice of the subject is not restricted. If a student is interested in a subject of a particular discipline he/she has to inform accordingly to the Principal and academic Co-ordinator of that department.

Learning Resources: As required by subject.

Assessment		Marks

NOTIFICATION NO. 1055

It is hereby notified for the information of all concerned that the proposal to revise the course structure, syllabus and rules of examinations of B.Arch. programme proposed by the concerned Board of Studies and recommended by the Faculty of Engineering and Technology is considered by the authorities of the University.

The authorities of the University have approved the course structure, rules of examinations and 1st year syllabus of B.Arch. programme offered under the Faculty of Engineering and Technology to be implemented from the academic year 2020-21 :

Ref. No. BVDU/ 2020-21/1786
Date : November 5, 2020

VISION OF BV (DU) UNIVERSITY

“To be a world class University for Social Transformation through Dynamic Education”

MISSION OF BV (DU) UNIVERSITY

- To provide quality technical education with advanced equipment, qualified faculty members, infrastructure to meet needs of profession and society.
- To provide an environment conducive to innovation, research and entrepreneurial leadership.
- To practice and promote professional ethics, transparency, and accountability for social community, economic and environmental conditions.

VISION OF BV (DU) COLLEGE OF ARCHITECTURE PUNE

“Inculcate Sensitivity towards Sustainable Built Environment through Architectural Education”

MISSION OF BV (DU) COLLEGE OF ARCHITECTURE PUNE

The institution shall strive

- To inculcate knowledge, skills, values and ethics to create ‘**socially responsible**’, ‘**environmentally sensitive**’, ‘**economically conscious**’, architectural professionals.
- To promote innovations and research for sustainable built environment.

PROGRAMME: BACHELOR OF ARCHITECTURE (B.ARCH)

Programme Objectives:

- To develop creative, capable, future ready architectural professionals.
- To create responsible and dedicated individuals who are intellectually mature, emotionally sensitive and self-motivated towards sustainable built environment.
- To orient courses and course content in order to develop holistic learners, for taking up challenging responsibilities in the respective field.
- To offer courses which help the graduates to emerge as competent professionals fully aware of their commitment to the society and nation.

Programme Outcomes:

The graduates will be able to:

- Imbibe the fundamental knowledge of built environment.
- Identify and analyze current architectural issues.
- Create and envision built environment responding to physical, social, cultural, economical and environmental context.
- Communicate effectively in verbal, written and graphical form.
- Use modern architectural tools, technology and software for analysis, design and construction.
- Imbibe ethics and values as learners and professionals.
- Develop research ability and promote experiential learning.
- Function effectively as individual; work cooperatively and responsibly as team.
- Encourage interdisciplinary learning.
- Prepare for professional, societal and environmental challenges.
- Promote managerial, entrepreneur and leadership qualities in profession.

SALIENT FEATURES OF SYLLABUS

- Imparting '**Outcome Based Education**'.
- Included programme outcome, programme specific outcome, course outcome and intended learning outcome.
- Categorisation of courses focusing on development of 'Cognitive', 'Affective' and 'Psychomotor' domains of learning and learners.
- Offered wide range of electives in every semester, which facilitates choice to learners in selecting courses of their own interests. Introduced open electives at First year B.Arch
- Skill enhancement facilitated through professional skill courses as well as open electives.
- Practical training incorporated in VIII semester which helps for students in achieving research ability by providing consecutive courses such as Research projects and Architectural design Project in IX and X semesters respectively.
- Social and environmental awareness through 'Audit Courses'.
- Vertical progression and horizontal integration of courses considering the stage of development of learning.

RULES FOR FIRST TO FIFTH YEAR B. ARCH

❖ Rule No.1: Eligibility for Admission

Eligibility Criteria: Students seeking admission to First year of Bachelors Degree Course in Architecture must fulfil the eligibility criteria laid down by Council of Architecture, New Delhi, India and the University as applicable from time to time.

❖ Rule No.2: Duration of the course (as per Council of Architecture)

The Architecture course shall be of minimum duration of 5 academic years/ 10 semesters of approximately 15 to 18 working weeks (90 work days)each, inclusive of one semester of approximately 16 working weeks of Practical Training during Semester-VIII in a Professional's office.

❖ Rule No.3: Scheme of Assessment

A candidate to be eligible for the degree of Bachelor of Architecture will be required to appear for and pass all examinations as under:

- Semester I Examination in Architecture (First Year Semester-I)
- Semester II Examination in Architecture (First Year Semester-II)
- Semester III Examination in Architecture (Second Year Semester-III)
- Semester IV Examination in Architecture (Second Year Semester-IV)
- Semester V Examination in Architecture (Third Year Semester-V)
- Semester VI Examination in Architecture (Third Year Semester-VI)
- Semester VII Examination in Architecture (Fourth Year Semester-VII)
- Semester VIII Examination in Architecture (Fourth Year Semester-VIII)
- Semester IX Examination in Architecture (Final Year Semester-IX)
- Semester X Examination in Architecture (Final Year Semester-X)

❖ Rule No. 4: Granting of Academic Term

Each semester shall comprise of Eighteen weeks (Minimum 90 working days).

The candidate will be permitted to appear for semester examination only if he/she has,

-75 % attendance in each course that constitute a head of passing as prescribed by the university.

- **Satisfactory completion of the sessional work as prescribed in the syllabus.**
-

Good conduct: The Principal/ Director of the institution shall have the right to withhold the student from appearing for examination of a specific course if the above requirements are not fulfilled.

❖ Rule No. 5: Progression Requisite

As general rule, a student shall be allowed to keep the next year of study of the course, if he/she has a backlog of not more than “**Six heads of passing**” in the preceding year.

Furthermore,

- A student shall be allowed to get admitted to Second Year B. Arch. course, if he/she has a backlog of not more than “**Six heads of passing**” at First year B. Arch (semester I and II considered together).
- A student shall be allowed to get admitted to Third Year B. Arch course, if he/she has cleared all the heads of passing at First year B.Arch and if he/she has a backlog of not more than “**Six heads of passing**” at Second Year B.Arch (semester III and IV considered together).
- A student shall be allowed to get admitted to Fourth Year B.Arch course, if he/she has cleared all the heads of passing at Second Year B.Arch (Semester III and IV considered together) and if he/she has a backlog of not more than “**Six heads of passing**” at Third Year B.Arch (semester V and VI considered together).
- A student shall be allowed to get admitted to Final Year B.Arch course, if he/she has cleared all the heads of passing at Third Year B. Arch (Semester V and VI considered together), and if he/she has a backlog of not more than “**Six heads of passing**” at fourth Year B.Arch (semester VII and VIII considered together).

❖ Rule No 6: Examinations

6.1. Conduct of Examinations

The university examinations for all the 10 semesters shall be conducted at the end of each semester by the University.

6.2. Pattern of Examination: The evaluation scheme for B.Arch comprises of --

University Examination (UE) -60 marks (for courses having IA and UE both)

Internal Assessment (IA)- 40 marks (for courses having IA and UE both)

Internal Assessment (IA) - 100 marks (for courses having only IA)

UE and IA will constitute two separate heads of passing.

6.2.1 University Examination (UE)

- UE will be conducted by the University and will be based on the entire syllabus.
- UE shall be assessed jointly by the internal and external examiners from amongst the panel approved by the University in equal weight-age. An examiner for any of the courses of examinations shall have a minimum of 5 years teaching or 5 years of professional experience in his/her field of study. However, an external examiner for Semester-X Architectural Design Project shall have minimum of 10 years teaching/ professional experience after Council of Architecture registration.

- The nature of assessment will vary depending upon the course and its delivery and whether it is studio-based or theory based. **Refer to detailed syllabus for individual courses.**
- Work done by the student which is assessed for UE i.e Sessional (SS) or Sessional + Oral (SO) will be based on entire syllabus.
- Number of assignments for UE will be minimum **three** and a maximum **five** .
- UE may be undertaken through following suggestive form of assignments (but not restricted to):
 - Portfolio
 - Models
 - Reports

University Examination (UE) head will constitute ANY ONE of the following:

a. Sessional(SS) : Assessment by internal & external examiner in equal weight-age of the sessional , that is ,work done by the student during the semester and certified by the course teacher.

b. Sessional + Oral(SO): Assessment by internal & external examiner in equal weight-age of the sessional ,that is, work done by the student during the semester and certified by the course teacher along with oral of the student is to be conducted (i.e provided that the student appears for UE).

c. Terminal paper(TP): Assessment by internal & external examiner in equal weight-age of total maximum marks.(Duration of paper: 2-1/2 hrs for theory paper & 3 hrs. for drawing paper.)

6.2.2: Internal Assessment (IA)

IA will be conducted by the Institution imparting B.Arch course. IA will be done by the teacher teaching the course through a continuous assessment system that is spread through the duration of course and weight-age will be for the sessional , that is, work done by the student during the semester & assessed by the course teacher covering the entire syllabus. The marks assigned for attendance in IA weight-age will be 5(five) only. Number of assignments for IA will be minimum **three** and a maximum **five** .

There will be 15(fifteen) teaching and 3(three) assessment weeks in a semester.

Individual faculty member shall have the flexibility to design the continuous assessment assignments in a manner so as to evaluate student's capabilities across knowledge, skills and attitudes. IA may be undertaken through any or combination of the methods stated below:

The following components can be used-

- Seminar presentation
- Written Test /Open Book
- Reviews
- Essays

Final Draft B.Arch CBCS 2020 Course

- Short answer questions
- Study of best practices /precedent study/field study
- Multiple choice questions/Quiz
- Projects/group projects/Dissertation
- Reflective Practical assignments
- Drawing Portfolios
- Report writings
- Learning logs/diaries
- Hands on workshops and participation

For IA, in case of courses having Terminal paper (TP), it is mandatory to conduct minimum one class- test as a form of assignment.

The faculty shall announce in advance the units based on which continuous assessment shall be conducted. Detailed records of continuous assessment shall be maintained by the teaching faculty and these will be submitted to the institute at the end of the semester.

❖ Rule No. 7: Credits

The total credits for B.Arch degree programme are 296 credits.

Semester-wise distribution of credits is as follows:

Semester	I	II	III	IV	V	VI	VII	VIII	IX	X
Credits	30	30	30	30	30	30	30	30	28	28

7.1. Evaluation criteria for additional credits:

Credit may also be given for participation in extra-curricular/co-curricular activities. There will be maximum of **10 credits at UG level. 25-30 hours** of extra-curricular/ co-curricular work may be considered as one credit.

Participation in these activities at national/ international/state level can be claimed to earn maximum 10 extra credits which are over and above the minimum number of credits the student has to complete for award of the degree. These credits would be awarded for type of activity undertaken from the joining of course till end of course. Students have to submit the necessary documents at the end of Semester-X.

7.2. Award of extra credits per participation

Sr.No	Type of Activity	Credits Awarded
1	Publication in International/ National Journal(for 1st or 2nd author only)	01
	Publication in Scopus/ Referred Journal	02
2	Participation with presentation in seminar, workshop, conference, etc (national/ international/state/	01

3	Participation in seminar, workshop, conference, etc (national/ international /state/ local)	0.5
4	Sending entry to design competition held at state / national / international level	01
5	Winning award at the contest mentioned above	02
6	Publication of Final year Architectural Design Project in International/ National Journal under guidance & co-	1
7	MOOC Courses with certificate:	
	1. 4 hr/week course	1
	2. 12 hr/week course	3

The student has to accumulate and submit the respective documents to the Principal, to become eligible for getting the credits as mentioned above.

7.3. *Non-credit courses -Audit Courses:*

Audit Courses will be conducted in Semester-IV and Semester-VI as per the syllabus. University will conduct examination and it is mandatory for students to pass in these courses. Passing in these courses is by clearance. **Audit courses are Non-credit courses**

7.4. *Credit Transfer:*

Credit transfer option may be made available to students on exchange with other universities under MoUs if any after verifying the equivalency for particular courses on case to case basis.

❖ **Rule No.8: Criteria for Passing**

To pass in every semester examination and earn minimum grade point , a candidate must obtain minimum 50% marks in each head of passing and 50% marks in aggregate.

8.1. For all courses, both UE and IA constitute separate heads of passing.

- In order to pass in such courses and earn minimum grade point.
- The student must obtain minimum grade point of 6.0(50% marks) at UE and also minimum grade point of 6.0 (50%) marks at IA.
- A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

8.2. Students with backlog in IA will have to present themselves and their work for continuous assessment throughout the semester for which they intend to appear.

8.3. In case of backlog courses, a student can work on same topic of assignment for two more chances. Even after two chances in case he/she fails, the course teacher may change or modify the topic of assignment.

❖ Rule No.9: Grading system

The grading system will be 10-point absolute grading system.

9.1 Award of Grades (Ten point Grading systems):

The assignment of score obtained by the candidate (out of maximum 100) to a grade may be done as follows:

Range of % of marks	Grade Point	Grade Letter
80<= Marks <100	10	O
70<= Marks <80	9	A+
60<= Marks <70	8	A
55<= Marks <60	7	B+
50<= Marks <55	6	B
Marks <50	0	D

9.2 Performance

The performance of a student will be evaluated in terms of two indices, viz

- Semester Grade Point average (SGPA) is calculated separately after every end-semester examination.
- Cumulative Grade point average (CGPA) is calculated across all the semesters at the end of the programme.

9.3 Semester Grade point average (SGPA)

SGPA measures the cumulative performance of a learner in all courses in a particular semester. SGPA is calculated by the formula

$$SGPA = \frac{\sum C_k \times GP_K}{\sum C_k}$$

Where C_k the credit-value is assigned to a course and GP_K is a GPA obtained by the learner in the course.

The SGPA shall be calculated up to two decimal place accuracy.

9.4 Cumulative Grade point average (CGPA)

CGPA measures the cumulative performance of a learner in all courses since his/her enrolment. CGPA is calculated by the formula

$$CGPA = \frac{\sum C_k \times GP_K}{\sum C_k}$$

Where C_k is the credit-value assigned to a course and GP_K is a GPA obtained by the learner in the course.

The CGPA shall be calculated up to two decimal place accuracy.

❖ Rule No.10: Award of Degree (B.Arch)

A student who has completed the minimum grade point specified for the programme and obtains required CGPA as prescribed (in the table below) shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed within the time permissible by the University & as per COA Rules prescribed.

The criteria for the award of **Degree (B.Arch)** are as given in table below:

Range of CGPA	Final Grade	Letter Grade
$9.50 \leq CGPA \leq 10.00$	O	Outstanding
$9.00 \leq CGPA \leq 9.49$	A+	Excellent
$8.00 \leq CGPA \leq 8.99$	A	Very Good
$7.00 \leq CGPA \leq 7.99$	B+	Good
$6.00 \leq CGPA \leq 6.99$	B	Satisfactory
CGPA Below 6.00	F	Fail

Degree Requirements:

A candidate who has successfully completed all the Core and Elective courses and obtains required CGPA as prescribed (in the table above), shall be eligible to receive the Degree.

Registration (as an Architect) will only be given by Council of Architecture, New Delhi, India as per the prevailing rules .

University & Council of Architecture, New Delhi may frame additional rules and regulations or modify these rules if needed and once approved they would be binding on the students.

❖ Rule No.11: Introduction of this Curriculum

The new curriculum for the degree course in architecture B.Arch will be introduced from Academic Session 2020 -2021

- First year B.Arch Course from June 2020

Final Draft B.Arch CBCS 2020 Course

- Second year B.Arch Course from June 2021
- Third year B.Arch Course from June 2022
- Fourth year B.Arch Course from June 2023
- Final year B.Arch Course From June 2024

❖ Rule No.12: Course Code

Code used for serial numbers of the courses in the structure for B.Arch course shall be as follows :

12.1. First Character: will be Faculty and for Engineering Faculty BVDU has assigned K character.

12.2. Second Character: will be for BoS to which that course belongs (H for Architecture)

12.3. Third character: relates to Department for which course is to be conducted (M for Architecture)

12.4. Fourth character: will be for UG or PG course (U for UG in Architecture)

12.5. Fifth Character: will stand for Semester No.

Semester Code :

1. First Semester
2. Second Semester
3. Third Semester
4. Fourth Semester
5. Fifth Semester
6. Sixth Semester
7. Seventh Semester
8. Eighth Semester
9. Ninth Semester
10. Tenth semester

12.6. Sixth character: will be serial no. of course in that semester structure from 1 to 9.

❖ Rule No.13: Maximum period for duration of course

Students have to qualify for a degree within the period prescribed by the University Grants Commission. If the student could not, he/she will be allowed two more years beyond prescribed period. In exceptional cases, further extension of one more year, may be considered by the University. University & Council of Architecture, New Delhi may frame additional rules and regulations or modify these rules if needed and once approved they would be binding on the students.

In case a candidate is not able to complete the course in the prescribed duration, the university or institution may provide an exit option for the candidate if has completed and earned all credits for the first three years of study.

STRUCTURE OF B.ARCH DEGREE PROGRAMME

Structure of B.Arch degree programme is proposed to be implemented from academic year 2020-21, to provide students centric educational philosophy.

A. Course Categories:

Under CBCS, the degree programme will consist of the following categories of courses, in the framework of council of Architecture:

1. Professional Core Courses (PC)
2. Building Science and Applied Engineering (BS& AE)
3. Enhancement Course
4. Skill Enhancement Courses (SEC)
5. Professional Ability Enhancement Courses (PAEC)
6. Elective Courses
 - a. Open Electives (OE)
 - b. Professional elective (PE)

In addition, a student should satisfactorily complete Audit courses (AC) minimum 2 Nos prescribed in the curriculum. Audit courses are non credit courses.

A.1. Compulsory courses consisting of

- a. **Professional Core (PC)**) courses introducing the students the foundation of architectural topics
- b. **Building Science and Applied Engineering (BS& AE)** courses informs the Professional Core courses
- c. **Skill Enhancement (SEC)** Courses nurtures skill of the
- d. **Professional Ability Enhancement (PAEC)** Courses

A.2. Elective Course enables students to take up a course of their own interest and facilitates students a freedom in selecting courses.

- a. **Open Elective Courses** enables an exposure to some other discipline
- b. **Professional Elective Courses** supportive to the core discipline of the study or provides an extended scope; may be very specific; specialized; advanced.

A.3. Audit Course courses consisting of

- a. Disaster Management
- b. Environmental Studies

B. Credits:

Credits are the weightages are assigned to the courses based on the following general pattern:

- | | |
|---|----------|
| 1. lecture period | 1 credit |
| 2. Periods Lab/Workshop/ Tutorial | 1 credit |
| 3. Period of Design/ Construction/ Practical Training/ Thesis | 1 credit |

B.1.The curriculum for B. Arch. Programme is designed to have a minimum of 296 credits + 2Non CGPA credits distributed across ten semesters of study for the award of degree.

B.2.A student must earn a minimum number of credits under each category as shown in Table 1 and also a minimum total of credits (296 credits + 2 Non CGPA courses) for the award of B. Arch degree.

Table1: Distribution of credits

No.	Category	Code	Credits	Percentage
1	Professional Core	PC	149	50.34%
2	Building Science and Applied Engineering	BSAE	60	20.27%
3	Skill Enhancement Course	SEC	17	05.74%
4	Professional Ability Enhancement Courses	PAEC	34	11.49%
5	Open Elective	OE	10	03.38%
6	Professional Electives	PE	26	8.78%
	Total Credits		296	100.00%
		NON CGPA		
	Audit courses		----	---

LIST OF ELECTIVES

Following is the list of electives under various streams for each semester to facilitate choice to learners in selecting courses of their own interest. However, the list given is only suggestive and can expand or modify it for enrichment of the course. The college will offer electives based upon the availability of resources in the college, provided minimum 20 students choose the particular elective. However colleges have to ensure that the student does not repeat a particular elective. Wide range of 'Open Electives are offered for Sem I , II & VIII as below. Students have to choose any one from the list.

Semesters	Open Electives
Sem-I	Physical Education and Yoga
	Performing Arts
	Culinary Art
	Stress Management
	Community Engagement
	Pottery
Sem-II	Architectural Photography
	Personality development and Communication Skills
	Foreign Languages
	Calligraphy Techniques
	Ayurveda as a lifestyle
	Cyber Security
Sem.VIII	Certificate Course
	Study in their interest area

For Sem. VIII students can take up certificate course such as MOOC, SWAYAM etc. It could be online course, or conduct study in their interest area.

From Sem-III to Sem X, students can choose electives as per structure of the syllabus from any of the three streams (Professional Electives) mentioned in the table below. A student may adhere to a particular stream of elective of his/her choice and nurture his/her area of interest and develop his/her expertise across semesters. In the semesters where two electives are offered per semester, students have to choose them from two different streams.

Semesters	Design	Technology and Management	Allied (Art, legalities, culture, environment, etc)
Sem-III	Vernacular Architecture	Alternative Building Materials and	Sketching
	Theory of Design	Presentation Techniques in Architecture	Horticulture
Sem-IV	Climate Responsive Building Design	Modular Co-ordination	Visual Communication
	Vastu Shastra	Glass in Architecture	Study of Iconography in Temples
	Graphic Design	Sustainable Water Management	Introduction to Indology
Sem-V	Universal Design	Building Automation	Rural development
	Light in Architecture	Sustainable Waste Management	Architectural Journalism
	Water in Architecture	Cost Effective Construction	Ekistics
Sem-VI	Furniture Design	Auditorium Acoustics and Services	Affordable Housing
	Gendered Spaces	Fenestrations in Buildings	Building Economics
	Architects and Their Philosophies	Facility Management	Introduction to Archaeology
Sem-VII	Product Design	Long Span Structures	Gender in Architecture
	Architectural Conservation	Disaster Resistance Structures	Behaviour Psychology
	Healthcare Design	Pre-Fabricated and Pre-Stressed Structures	Ergonomics
	Critical Thinking of Modern Architecture	Steel Structures	Housing Laws and Policies
Sem-IX	Set Design	Office Management	Study of Cities
	Hospitality Design	Real Estate Management	Intellectual Property Rights
	Urban Design	Fire Fighting Systems in Buildings	Art in Architecture
	Landscape Urbanism	Pneumatic Structures	Urban Infrastructure Planning
Sem-X	Digital Architecture	Construction Management	Cultural Landscapes
	Industrial Design	Intelligent Building Systems	Geographic Information System
	Modular Furniture Design	Valuation	Legalities in Architectural Profession
	Specialized Architecture(Defence/	Specialized Services in Buildings	Green Building Rating Systems

GUIDELINES FOR PAPER-SETTING SYLLABUS CBCS-2020

1. Question paper to cover questions from entire syllabus.
2. All UE theory papers are for maximum 60 marks.
3. Duration:
 - a. 2&1/2 hrs. for writing papers
 - b. 3hrs. for drawing papers.
4. There will be Two sections of max. marks 30 each.
 - a. Section-I from Units-I,II& III of syllabus
 - b. Section-II from Units-IV,V& VI of syllabus
5. There will be Four questions in each section of 10 marks each.
6. Maximum marks for each question will be in whole numbers & not in fractions.
7. In each Section following pattern will be followed:

Section –I

 - a. Question no. 1 is compulsory
 - b. Attempt any Two questions out of Question no. 2,3,4.

Section –II

 - a. Question no. 5 is compulsory
 - b. Attempt any Two questions out of Question no. 6,7,8.
8. In each section 20% marks will be assigned for Analytical questions i.e in each section out of 30 marks 6 marks are assigned for Analytical component. This component will be in compulsory question i.e Question no.1 and Question no.5.

SEMESTER I

First Year B Arch.

Architectural Design-I

Course Code:KHMU11	Course Category: Professional Core		Semester: I
Credits :	6	Internal Assessment	40 Marks
Lectures per week	2	Terminal Paper	-
Studio Projects per week	2	Sessional Oral (SO	60marks
Workshops or studio exercises / week	2	Sessionals (SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	108Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	90 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	18 Hours

Course Objectives:

1. To apply knowledge gained in other subjects and present them in graphic form using manual medium.
2. To imbibe the importance of pre-study in design process
3. To provide knowledge and understanding of design with special attention to design fundamentals and orientation

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Define anthropometry and recognize the importance of cardinal directions in design.
2.	Understanding	Comprehend design fundamentals in relation to space design.
3.	Applying	Develop visualization of liveable spaces by understanding relationship between the activities and spaces through case studies and site visits.
4.	Analyzing	Analyze the aspects related to function, space, structure, and aesthetics
5.	Evaluating	Relate knowledge in the domain of fundamentals of design
6.	Creating	Design a single activity space and create final project and model

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Study of Design Fundamentals <ul style="list-style-type: none"> - Study of anthropometry, (study of basic human activities in Indian and Global context) - Study of function and circulation (Relationship between function and space) 	12
Unit -II	Study of orientation of buildings <ul style="list-style-type: none"> - Study of cardinal and ordinal directions - Study of building orientation with respect to basics of sun and wind - Understanding the preferred/ non preferred, favorable/ non favorable orientation with respect to cardinal directions and climate 	12
Unit -III	Pre-study: Learning from primary and secondary resources <ul style="list-style-type: none"> - Case-studies and site visits - Books, reports, articles - Films and documentaries 	24
Unit-IV	Architectural Design <ul style="list-style-type: none"> - Single activity architectural design project (approximately 50 sqm.), with application of the learning's from study of design fundamentals, study of cardinal directions, climate, and the pre-study. 	30
Unit-V	3-D models <ul style="list-style-type: none"> - Study models - Physical model of the final design proposal with site development 	12
Total Contact Hours		90

First Year B Arch.

Building Construction and Material-I

CourseCode:KHMU13	Course Category: BSAE		Semester: I
Credits :	6	Internal Assessment	40 Marks
Lectures per week	2	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO	60marks
Workshops or studio exercises / week	4	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	108Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	90 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	18 Hours

Course Objectives:

1. To enable students to understand materials, principles and methods of construction
2. To cover the breadth of students including components and systems of buildings

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Define various components of building and know technical terms, different materials available for masonry work
2.	Understanding	Understand the concept of load transmission and distinguish load bearing and framed structure
3.	Understanding	Describe purpose ,methods and types of finishes
4.	Applying	Apply knowledge gained in Theory of Structure and develop understanding about basic principles of construction method
5.	Analyzing	Analyze different materials in terms of properties, types, application in design ,market forms available ,advantages and disadvantages etc
6.	Evaluating	Compare different types of materials in masonry work
7.	Creating	Design masonry element and entrance gate applying alternative materials and methods of construction
8.	Creating	Create drawings, models and relate structural behaviourism and construction techniques

Course Contents:

Units	Contents of The Course	Hours
Unit -I	<p>Introduction Introduction to building construction as course and its relevance to Architectural design.</p> <ul style="list-style-type: none"> - Introduction to various components of building from foundation to roof. - Structural elements of load bearing and framed structure and its differences 	7
Unit -II	<p>Materials</p> <ul style="list-style-type: none"> - Properties, sustainability aspects, various types, cost, application in buildings, defects and strengths, market survey of bricks , stones ,cement, sand, aggregates, mortar and lime. 	7
Unit -III	<p>Finishes</p> <ul style="list-style-type: none"> - Pointing: Purpose and types - Plastering: Method and types i.e. neeru faced, sand faced, rough cast, pebble finish and all proprietary types. <p>Innovative materials used for pointing and plastering</p>	7
Unit-IV	<p>Foundation</p> <ul style="list-style-type: none"> - Excavation: purpose and types, plinth formation - Introduction to shallow foundation - Strip foundation for a load bearing structure in stone and brick upto plinth level including plinth formation - Foundation for brick piers, entrance steps, compound walls. 	21
Unit-V	<p>Masonry</p> <ul style="list-style-type: none"> - Fundamentals, principles of load bearing construction for medium rise structures using brick, stone, concrete blocks, solid blocks, hollow blocks, cavity blocks etc. - Introduction to various types of brick masonry. - Bonds: English, Flemish, header, stretcher, garden wall, rat trap and other types. - Junctions: Tee, crossed and right angled - Introduction to stone masonry and its types : dry rubble, uncoursed rubble, random rubble, squared, polygonal, etc. - Composite masonry 	31
Unit-VI	<p>Entrance gate and Fencing</p> <ul style="list-style-type: none"> - Entrance gate - Constructional details of entrance gate in a compound wall of following types: Sliding Gate with floor channel, Sidehung , side hung with wicket gate. - Fencing - Construction in different materials like Barbed wire, Chain link, Wire mesh, R.C.C. Grills, M.S. Grills etc. 	17

Theory of Structures-I

CourseCode:KHMU13	Course Category: BSAE		Semester: I
Credits :	2	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises/ week	1	Sessionals(SS)	60marks
No.s of Weeks in Semester	18	No.s of hours in Semester	36 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	30 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	6 Hours

Course Objectives:

1. To understand the structural concepts and behaviour of structural element

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Recognize the significance of the main structural elements in structural analysis
2.	Understanding	Explain structural concepts, fundamentals of structure and describe of the various loading conditions acting on the structure
3.	Understanding	Illustrate the concept of free body diagram of structures and structural elements
4.	Applying	Calculate self weight, resolution of forces, centre of gravity, moment of inertia, material constants for all types of structures, and stress calculations of structural members having different material properties
5.	Applying	Develop an ability to analyse internal response of structure
6.	Analyzing	Compare response of structural system for various materials
7.	Evaluating	Evaluate the behaviour of structural elements of ancient and modern structures
8.	Creating	Design stepped foundation, wall of uniform thickness and variable thickness and relate principals of this subject to the other subjects such as Building Construction, Architectural design, Architectural drawing and graphics, History of Architecture

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Introduction to fundamental concepts of structure:- Introduction to fundamental concepts of Applied Mechanics relevant to structures and characteristics of material like unit weight, elasticity, plasticity, ductility, hardness. Understanding of rigid body, deformable body, force systems, characteristics of forces, transmissibility, types of structures. Concept of tension, compression in structures	04
Unit -II	Resolution of forces :- Types of loads and moment a) calculation of self weight based on density for load bearing elements. b) Resultant of concurrent force system with simple practical examples. c) Concept of moment and resultant of non concurrent force system with simple practical examples	06
Unit -III	Equilibrium of forces acting on beam:- Introduction to i) Equilibrium conditions of force systems. ii) Types of loads - point loads, uniformly distributed load(udl), uniformly varying load(uvl), types of supports (hinge, simple, roller, fixed) , types of beams (simply supported, cantilever, overhanging, fixed, continuous) iii) Support reactions in beams.	06
Unit-IV	Centroid & Centre of Gravity: Importance and application of centroid and centre of gravity for plane sections like Rectangle, circle, semicircle, triangle.iii) Calculation of centroid for shapes-- C,T,L,I	04
Unit-V	Moment of Inertia: Moment of Inertia For standard sections, Parallel axis theorem, Perpendicular axis theorem, Radius of gyration. Moment of Inertia of sections considered for center of gravity (Unit IV).Importance and Application	04
Unit-VI	Simple stress & Strain:- Concept of Simple stress and strain. Calculation of self weight for load bearing elements and downward soil pressure due to the same. Simple numerical based composite (modular ratio) and compound elements. Behaviour of ductile and brittle material in terms of stress and strain curve. Introduction to elastic constants and its significance. Definition of fatigue, creep. Introduction to flinched beams	06
Total Contact Hours		30

History of Architecture-I

CourseCode:KHMU14	Course Category: Professional Core		Semester: I
Credits :	3	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	60marks
Studio Projects per week	-	Sessional Oral (SO)	-
Workshops or studio exercises / week	2	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	54 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	45 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	9 Hours

Course Objectives:

1. To learn from the wisdom of traditional knowledge systems.
2. To imbibe the fundamental knowledge of the built environment
3. To study history of architecture as a response to climate, culture and socio political conditions.

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Identify issues with reference to cultures, civilizations and settlements across the world at different periods of time
2.	Remembering	Know technology and its impact on built environment and building for
3.	Understanding	Understand the development of architecture as a process through a holistic approach of contextual and cultural evolution
4.	Understanding	Differentiate between various styles and elements of development and describe prominent historic buildings
5.	Applying and Analyzing	Develop ability to analyze the evolutionary aspects of stage of progress
6.	Evaluating	Compare architectural style across culture of that time with reference to location -geography , Social Systems, Religion ,climate, art etc.
7.	Creating	Derive materials ,construction techniques in design from historic civilization

Course Contents:

Units	Contents of The Course	Hours
Unit -I	<p>Prehistoric Housing forms in the initial phase: Cave shelters- (suggestive examples at Lascaux, Terra Amata etc) Community structures: (suggestive examples Menhir , dolmen, gallery and passage graves, Stonehenge, Ggantija Malta etc)</p>	6
Unit -II	<p>River Valley Civilizations –Asia Introduction to development of the settlements - location, social and cultural aspects, climate, construction techniques, building materials, building typologies and architectural characteristics, settlement principles etc - Yellow River, Indus River</p>	9
Unit-III	<p>Vedic Architecture Vedic culture and settlement planning layouts, City Planning in later Vedic period and Buildings and construction techniques. Buddhist Architecture Introduction to the Evolution and development of Major typologies like Stambha, Chaitya, Vihara ,Stupa. Development of Chaitya arch(suggestive examples Ashokan Stambhas, Lomas Rishi Cave,The Great Stupa at Sanchi, Chaitya Hall at Karli, Chaitya and Viharas at Verul and Ajanta etc)</p>	7
Unit-IV	<p>River Valley Civilizations -Western Introduction to development of the settlements - location, social and cultural aspects, climate, construction techniques, building materials, building typologies and architectural characteristics, settlement principles etc - Nile River ,Tigris River</p>	7
Unit-V	<p>Greek Civilization Introduction to the, Social and cultural Systems, political scenario, History and evolution of Architectural typologies, Characteristics of Buildings, construction technology and elements evolved like Classical Orders, Optical corrections etc. (suggestive examples Acropolis, City of Athens Temples, Theatres, Agora, Stoa, Council Halls etc)</p>	8
Unit-VI	<p>Roman Civilization Introduction of the History, evolution and characteristics Elements of special attributes. Introduction to the, Social and cultural Systems, political scenario, History and evolution of Architectural typologies, Characteristics of Buildings, construction technology and elements evolved like Arches, arcuated construction, bridges, aqueducts, etc(suggestive examples</p>	8

	City of Rome ,Temples- Pantheon, Basillica at Trajan, Amphitheatre, Hippodrome, Circus, Palaces-hydrian's villa , Thermae at Carcalla etc

Architectural Drawing and Graphics-I

CourseCode:KHMU15	Course Category: Professional Core		Semester: I
Credits :	5	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	60marks
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises / week	4	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	90 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	75Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	15 Hours

Course Objectives:

1. To develop visualization and presentation skills as tools for creative thinking and representation of ideas and concepts
2. To acquire effective communication in graphical form in Architecture
3. To impart basic knowledge and skill to draft a drawing manually.

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Know architectural drawing techniques using drafting tools.
2.	Remembering	Acquire vocabulary and grammar such as scale, annotations, labelling ,dimensioning etc.
3.	Understanding	Understand the concept of orthographic projection, surface development.
4.	Applying	Use freehand techniques for preparing drawings and develop perception and presentation of different forms
5.	Analyzing and Evaluating	Analyze and relate Architectural Drawing Graphics with Architectural Design, Building Construction, Working Drawing etc
6.	Creating	Create conceptual and presentation drawings for various purposes

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Introduction to graphic language and its components <ul style="list-style-type: none"> - Introduction to instruments - Line types: meaning and application - Architectural lettering and dimensioning techniques and their role and application in composition of drawings with various examples - Architectural annotations and conventions 	12
Unit -II	Orthographic Projections <ul style="list-style-type: none"> - Geometrical construction, planar geometry - Method of Orthographic projections - Drawing 2-dimensional drawings from 3-dimensional objects 	18
Unit -III	Surface Development <ul style="list-style-type: none"> - Surface Development of various three-dimensional objects 	13
Unit-IV	Study of Graphical Scales <ul style="list-style-type: none"> - Introduction to graphic scale and their applications - Scaled enlargement and reduction of simple objects and site plans of complex shapes - Scaled drawings (plan/s section/s and elevation/s) of complex objects/ simple building of sufficient size to demonstrate use of various scales, conventions and standard annotations 	9
Unit-V	Sketching <ul style="list-style-type: none"> - Introduction to architectural sketching and principles of free hand sketching such as proportions, light and shade: with primary thrust on sketching of building elements and built/un-built environment. 	8
Unit-VI	Sections: from simple geometrical elements to complex architectural elements <ul style="list-style-type: none"> - Graphical and visual communication through sections of geometrical forms along with the understanding of the line weights, material indications, etc. - Graphical and visual communication through sections of architectural elements / building along with the understanding of the line weights, material, indications, etc 	15

Workshop

CourseCode:KHMU16	Course Category: Professional Core		Semester: I
Credits :	3	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises / week	2	Sessionals(SS)	60
No.s of Weeks in Semester	18	No.s of hours in Semester	54 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	45 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	09 Hours

Course Objectives:

1. To introduce various types of models at appropriate scales such as site model, study model, block model, finished presentation models
2. To introduce students to various materials, tools and techniques used in making architectural models.
3. To introduce students to various skills such as joinery, cutting, finishing in carpentry, smithy.

Course Outcomes:

CO No.	Psychomotor levels	On successful completion of course the learner will be able to:
1.	Imitation	Observe the nature and texture of different materials
2.	Manipulation	Replicate forms in drawing by making models
3.	Precision	Choose tools and joinery techniques required for model making
4.	Precision	Integrate two dimensional drawing and three dimensional form
5.	Articulation	Construct or Compose three dimensional forms using different model making materials and equipment in different scale
6.	Naturalisation	Make everyday objects, some building elements ,building forms with a wide variety of available materials and handle simple tools in carpentry

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Materials for model making: Introduction to various materials like various types of papers, mount boards, softwood (balsa), cork, clay etc for architectural model making.	6
Unit -II	Tools and techniques in model making Introduction to various tools and techniques cutting, scoring, folding and gluing techniques, using templates, measuring aids, to build surfaces and simple/ solids such as cubes, prism, cylinders, pyramids, cones, spheres etc or interpenetrated forms.	9
Unit-III	Adv. Materials, methods and tools: Using materials such as plastics, films, plaster of paris, clay, acrylic, wax, metals, glass, fabric etc and their moulding, scooping, cutting, joining methods etc	6
Unit -IV	Wood and metal work: Exercises in cutting and joinery with planers, saw, lathe, and jigs; Joinery details in wood, metal, blocks, pipes, plates, etc, composition of basic and complex geometrical forms.	9
Unit-V	Finishing: Exercises in finishing with planers, sander; Finishing surfaces with various protective coats, paints, varnishes, oils etc	9
Unit-VI	Prototyping and advanced modelling: Introduction to model making using machines - explore laser cutting, acid etching, stereo lithography, 3D printing, etc. Introduction to various types of model making for Architectural studies like block model, working models, contour models, site models ,openable models, service models etc.	6

Basic Design -I

CourseCode:KHMU17	Course Category: Professional Core		Semester: I
Credits :	3	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO)	60marks
Workshops or studio exercises / week	2	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	54 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	45 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	09 Hours

Course Objectives:

1. To develop the basic understanding of the fundamentals of design
2. To provide knowledge and understanding of elements and principals of design; its importance

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Know elements of Design
2.	Understanding	Understand effects of scale, the concept of form, space and structure through creative thinking
3.	Applying	Develop lateral thinking and apply the principles of design
4.	Analyzing	Analyse aspects of form, space and aesthetics
5.	Evaluating	Appraise design forms in terms of visual character and critique basic design composition
6.	Creating	Create two dimensional and three dimensional composition with various media

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Elements of Design: Introduction to: - Different Elements of design - Fundamentals of Design	08

Unit -II	Scale, Proportion: <ul style="list-style-type: none"> - Proportion & scale: Material proportions, structural proportions - Golden Section - Anthropometry Visual Scale and Human Scale	08
Unit -III	Principles of Design <ul style="list-style-type: none"> - Introduction to Principles of Design - Theory on Lateral Thinking and exercise on generation of alternatives - Explorations of Principles of Design through 2D and 3D compositions 	09
Unit-IV	Volume , Form & Space <ul style="list-style-type: none"> - Properties of Form - Subtractive & additive forms - Degree of enclosure – Planes - Volumetric Study of Spaces – positive and negative spaces 	08
Unit-V	Organization: <ul style="list-style-type: none"> - Organization of Form & Space - Spatial Relationships - Spatial Organizations - Explorations of Organization through 3D compositions 	08
Unit-VI	Indian Aesthetics: Introduction to all art forms including architecture as a holistic sacred domain with reference from Vishudharmottar purana. ·Introduction to Art in India as a way of life, as a ritual, as a socio-cultural expression, and more, e.g. Rangoli, Mehendi, Serving of food, ornamentation, arrangement of puja, and so on.	04

Elective -I

CourseCode:KHMU18	Course Category: Open elective		Semester: I
Credits :	2	Internal Assessment	100 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises / week	1	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	36 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	30 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	06 Hours

Course Objectives:

1. To facilitate the students to learn out of a pool of specialized courses, which provides extended scope or which enables exposure to discipline-centric courses as well as cross-disciplinary courses.
2. To encourage interdisciplinary learning and imbibe values as learners
3. To give students an opportunity to develop their attitudes and skills in a subject they may opt for making carrier

Course Outcomes:

CO No.	Affective levels	On successful completion of course the learner will be able to:
1.	Receiving	Identify and describe the aspects or issues of offered contents
2.	Responding	Report case study
3.	Valuing	Justify their ideas /opinions in relation to contents of elective
4.	Organization	Document and present the data collected in systematic way.
5.	Internalizing	Display a technical base through in depth study

Course Contents:

Units	Contents of The Course	Hours
	The detail course contents will vary as per options selected for elective and expert teaching the course will frame the contents at the beginning of semester along with objectives, outcomes, references and details for assignments.

SEMESTER-II

First Year B Arch.

Architectural Design -II

CourseCode:KHMU21	Course Category: Professional Core		Semester: II
Credits :	6	Internal Assessment	40 Marks
Lectures per week	2	Terminal Paper	-
Studio Projects per week	2	Sessional Oral (SO	60 Marks
Workshops or studio exercises / week	2	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	108 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	90 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	18 Hours

Course Objectives:

1. To make the students familiar with design and the architectural design process as a synthesis of factors such as climate, comfort, land, technology
2. To equip the students with communication and presentation skills
3. To inculcate sensitivity towards environment through climate responsive design

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Represent built/un-built spaces in graphic form
2.	Understanding	Understand the concept of form, space and structure through documentation
3.	Applying	Use isometric, axonometric, and rendering techniques and demonstrate their ideas and observations graphically as well as verbally
4.	Applying	Develop understanding to respond to the climate in order to achieve human comfort
5.	Analyzing	Analyze measured drawing with respect to structure ,form ,material, climate etc.
6.	Creating	Design multi activity space
7.	Creating	Make 3D views of design proposal

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Documentation Measured drawing of a well-articulated structure with its surrounding context	18
Unit -II	Pre-study: place, climate, scale, people and their activities - Study of place and climate - Site analysis, activity and/or function analysis (Learning from primary and secondary resources such as case-studies and site visits, books, reports, articles, films and documentaries, etc.)	12
Unit -III	Analysis Analysis and presentation of measured drawing with respect to structure, material, planning, context, climate, geography, resources, form, function, elements of design, aesthetics, etc.	18
Unit-IV	Architectural Design - Context based multi-activity architectural design project (approximately 300 sq. m.)	30
Unit-V	Time bound project - Single-activity architectural design project: this project shall be based on values in architecture (e.g. universal design, etc.)	12
Total Contact Hours		90

Building Construction and Materials -II

CourseCode:KHMU22	Course Category: BSAE		Semester: II
Credits :	6	Internal Assessment	40 Marks
Lectures per week	2	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO	60 Marks
Workshops or studio exercises / week	4	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	108 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	90 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	18 Hours

Course Objectives:

1. To enable students to understand materials, principles and methods of construction
2. To introduce timber construction and its elements in detail.

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Know timber as materials in depth and its elements in building construction.
2.	Remembering	Define terms of different timber elements
3.	Understanding	Describe different flooring and roofing materials and understand the concept of spanning for roof element
4.	Applying	Apply appropriate type of timber elements such as door windows, staircase, floor and roof in design considering form..
5.	Analyzing	Classify different timber elements used in construction and compare different types of materials for roofing ,flooring etc
6.	Evaluating	Evaluate suitable joinery for openings
7.	Creating	Summarise knowledge gained in this subject to the architecture design and create drawings and models

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Introduction <ul style="list-style-type: none"> · Introduction to timber construction · Properties, strength, defects and preservation of timber. · Various timber joints : widening joints, halved joints, cogged joints, bearing joints, oblique joints, etc. 	7
Unit -II	Materials <ul style="list-style-type: none"> · Mud blocks ,rammed earth blocks · Roofing materials - types, purpose, characteristics, advantages and disadvantages · Flooring and paving - different flooring and paving materials 	7
Unit -III	Timber doors and windows <ul style="list-style-type: none"> · Terminology and construction aspects of doors and windows · Timber doors & Partitions - Design consideration and construction for single and double shutters, partly glazed and partly panelled, fully glazed, fully panelled, flush doors, ledged, braced and battened doors. · Timber windows -Design considerations, principles and construction for sash types-panelled, fixed, partly glazed, fully glazed and louvered. · Timber windows -Types of opening- centrally pivoted, top hung, side hung, casement, bay window and sliding. · Hardwares used for doors and windows 	28
Unit-IV	Timber roofs and trusses <ul style="list-style-type: none"> · Timber roofs - Types of roof construction with respect to slope, span and spanning members · Terminology of sloping roof and members · Need and types of sloping roofs : lean to roof, couple roof, close couple roof and collar roof. · Timber trusses – Principles and considerations of trusses. Forces in truss members. Construction of trusses such as king post, queen post truss, ,mansard roof and trusses for various spans 	28
Unit-V	Timber floors <ul style="list-style-type: none"> · Timber flooring - General idea of timber floors in relation to spans, load transmission · Types :Single joist, double joist, triple joist 	15
Unit-VI	Staircase <ul style="list-style-type: none"> · Design Consideration and components · Types of staircase · Timber staircase 	5
Total Contact Hours		90

Theory of Structures -II

CourseCode:KHMU23	Course Category: BSAE		Semester: II
Credits :	2	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises / week	1	Sessionals(SS)	60 Marks
No.s of Weeks in Semester	18	No.s of hours in Semester	36 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	30 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	6 Hours

Course Objectives:

1. To understand the structural concepts and behaviour of structural element
2. To introduces forces acting on members in structures

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Recognize the significance of shear force and Bending moment diagram in structural analysis
2.	Understanding	Categorize the forces acting on members in structural analysis
3.	Applying	Develop an understanding of stresses and strain on members
4.	Analyzing	Analyze the behaviour and response of structural system to various load consideration
5.	Evaluating	Justify the dimensions assigned to structural elements of structure for serviceability and safety criteria
6.	Creating	Calculate the load for various load combinations and nature of load (Dead load, Live load)

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Introduction to Shear Force Diagram (SFD) and Bending Moment Diagram (BMD) for Simply supported, cantilever, and overhang. Definition of Shear Force (SF),Bending Moment (BM), Sign convention, sagging ,hogging, Point of contra flexure, contra shear, effect of couple on beams	04

Unit -II	Details of Shear Force Diagram (SFD) and Bending Moment Diagram (BMD). Details for simply supported, cantilever, overhang beam for a combination of uniformly distributed load(UDL) and point load.	06
Unit -III	Theory of Simple Bending:- Theory of simple bending and bending stress. Details based on standard section with bending stress distribution diagrams.	06
Unit-IV	Shear Stress of Beam:- Shear stress. Details based on standard section with shear stress distribution diagram. Introduction to shear centre.	06
Unit-V	Slope And Deflection:- slope and deflection in beams based on standard cases (no derivations).	04
Unit-VI	Arches:- Introduction to arches as structural element, two hinged, three hinged and fixed.	04

First Year B Arch.

History of Architecture -II

CourseCode:KHMU24	Course Category: Professional Core		Semester: II
Credits :	3	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	60 Marks
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises / week	2	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	54 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	45 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	09 Hours

Course Objectives:

1. To learn from the wisdom of traditional knowledge systems.
2. To imbibe the fundamental knowledge of the built environment
3. To study history of architecture as a response to climate, culture and socio political conditions.

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Identify issues with reference to cultures, civilizations and settlements across the world at different periods of time
2.	Remembering	Know technology and its impact on built environment and building fo
3.	Understanding	Understand evolution of various styles of art and architecture
4.	Understanding	Differentiate between various styles and elements of development and describe prominent historic buildings
5.	Applying and Analyzing	Develop ability to analyze the evolutionary aspects of stage of progress
6.	Evaluating	Compare architectural style across culture of that time with reference to location -geography , Social Systems, Religion ,climate, art etc.
7.	Evaluating	Appraise structures as a developmental process rather than simply as a product and critique building forms, structure
8.	Creating	Design buildings in historic architectural styles

Course Contents:

Units	Contents of The Course	Hours
Unit -I	<p>Evolution of -Hindu Temple Architecture</p> <p>Evolution of architectural style, principles and major influences on development of form, Spatial organisation, structural development and ornamentation style and other architectural elements during.</p> <ul style="list-style-type: none"> - Gupta period (suggestive examples Temple no 17 , Sanchi, Dasavatara Temple Deogarhetc) - Early and later Chalukyan Temple Development at Aihole , Badami Pattadakal. (suggestive examplesLadkhan and Durga temples-Aihole , Cave temple-Badami, Virupaksha and Papanath temple- Pattadakal, etc)3. - Temple Development by Rashakutas. (suggestive example Kailash Temple Ellora) - Temple Development by Pallava - Rock cut and Structural Temples (suggestive examples Rathas, Rock cut caves, Shore temple at Mamallapuram etc) 	9
Unit -II	<p>Introduction to Dravidian style (Development in South India)</p> <p>Evolution of architectural style, principles and major influences on development of form, Spatial organisation, structural development and ornamental style and other architectural elements during</p> <ul style="list-style-type: none"> - Hoysala Temple Development.(suggestive example Keshava temple at Somnathpur) - Temple development by Cholas. (suggestive example - Brihadeshwara temple, ThanjavoreEtc - Development of gopuram during Pandya Period. - Vijayanagara Period. (suggestive example -Vitthalaswami temple, Hampi, column orders etc) - Development of Temple cities during Madura period. (suggestive examples - Meenaksi temple atMadurai, Sriranganathaswami temple at srirangametc) 	9
Unit -III	<p>Introduction to Nagara style (Development in North India)</p> <p>Evolution of architectural style, principles and major influences on development of form, Spatial organisation, structural development and ornamental style and other architectural elements in</p> <ul style="list-style-type: none"> - Orissa -(suggestive examples Mukteshwar Temple, Lingaraja temples at Bhubaneswar, Sun temple at Konark) - Khajuraho- (suggestive examples –Kandariya Mahadeo temple, Khajuraho etc) - Western regions of Gujarat -(suggestive example Sun temple, Modheraetc) - Jain Temple Development in Western India. (suggestive 	9

	examples Vimal Shah at Mount Abu, Chaumukh Temple at Ranakpuretc)	
Unit-IV	<p>Early Christian and Byzantine Architecture</p> <p>Introduction to the social systems, aspects of Spatial organization, structural development, planning principles and ornamentation elements in the Evolution of Church form.</p> <p>Introduction to the special elements like timber trusses, clerestory, pendentives, dome construction, surface treatment, materials of construction etc. (suggestive examples -St. Peters at Rome (earlier one) Hagia Sophia at Constantinople etc)</p>	6
Unit-V	<p>Romanesque</p> <p>Introduction to the social systems, aspects of Spatial organization, structural development, planning principles and ornamentation elements in the Evolution of Church form.</p> <p>Introduction to the special elements like Wall passages, raking arcades, triforium gallery, vaulting systems etc(suggestive examples – St. Michelle Pavia, Campus at Pisa etc)</p>	6
Unit-VI	<p>Gothic Phase</p> <p>Introduction to the Spatial organization, planning principles and ornamentation elements in the Evolution of Church form.</p> <p>Introduction to the special elements like buttresses with Structural innovations, pointed arches, vaulting systems, window traceries, flying buttresses etc.(suggestive examples -Amines Cathedral, Notre dame cathedral, Salisbury cathedral, West Ministers Abbey, castles etc)</p>	6

Architectural Drawing and Graphics -II

CourseCode:KHMU25	Course Category: Professional Core		Semester: II
Credits :	5	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	60 Marks
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises / week	4	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	90Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	75 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	15 Hours

Course Objectives:

1. To introduce various techniques of three-dimensional presentation of simple , complex objects and building elements.
2. To enable the students to understand and express Composite three-dimensional built forms through additive and interpenetrated elements using various graphical projection systems through sections
3. To understand scale proportions in buildings and communication through architectural drawings

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Recognize , three dimensional drawing and its importance in architectural drawing
2.	Understanding	Understand interpenetration of solids and explain concept of isometric, axonometric projections
3.	Applying	Develop understanding of sciography and apply in plan and elevations of design
4.	Analyzing Evaluating	Analyze and relate the graphics content with Architectural Design
5.	Creating	Create 3D views using isometric and axonometric

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Advanced orthographic projections <ul style="list-style-type: none"> - To draw and compose composite solids and its orthographic projection - Drawing Plan/s, Section/s, Elevation/s of building elements by using methods of orthographic projection 	15
Unit -II	Three dimensional drawings-I <ul style="list-style-type: none"> - Drawing of isometric, axonometric and oblique views of solid objects and their compositions 	15
Unit-III	Three dimensional drawings - II <ul style="list-style-type: none"> - Drawing of isometric, axonometric and oblique views of building elements 	10
Unit -IV	Interpenetration of objects <ul style="list-style-type: none"> - Intersection and interpenetration of solid geometric objects and their compositions - Intersection and interpenetration of architectural elements and their compositions 	15
Unit-V	Introduction to Sciography <ul style="list-style-type: none"> - Introduction to sciography of simple objects - Representation of shade and shadows in plans and elevations 	8
Unit-VI	Architectural drawings. <ul style="list-style-type: none"> - Learning to make architectural drawings of Master Architect's building drawings (referred from books) in terms of plans, elevations and sections. - Architectural representation of trees, hedges, foliage, human figures, cars, etc., - Building Elements: Techniques of representing building elements such as doors, windows, steps, chajja, porch, canopy, etc. 	12

Climatology

CourseCode:KHMU26	Course Category: Professional Core		Semester: II
Credits :	3	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO)	-
Workshops or studio exercises / week	2	Sessionals(SS)	60 Marks
No.s of Weeks in Semester	18	No.s of hours in Semester	54 Hours
No.s of Weeks for Teaching + Sessional Work	15	No.s of Hours for Teaching + Sessional Work	45 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	09 Hours

Course Objectives:

1. To understand climate and its impact on Architectural Design
2. To encourage sensitivity towards environments

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Outline elements of climate, nature of climate and its zone and recognize importance of climate in architecture
2.	Understanding	Understand the climatic influences on built environment and comfort conditions for inhabitants
3.	Applying	Use the surrounding environment as one of the strategic design parameters
4.	Applying	Employ solar charts and sun path and apply fundamentals of climatology in building design
5.	Analyzing	Analyse characteristic of climatic zone in India
6.	Evaluating	Justify opening position, its size in building design by considering air movement
7.	Creating	Relate climate, other environmental parameters and built form at individual and settlement level
8.	Creating	Design climate responsive building

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Introduction: <ul style="list-style-type: none"> - Climate, weather, earth- sun relationship - Elements of climate: Temperature, rainfall, humidity, wind, solar radiation etc. - Importance of climate in Architecture - Global, Macro and Micro climate 	6
Unit -II	Human Comfort: <ul style="list-style-type: none"> - Human heat balance and comfort - Thermal comfort and means of thermal comfort - Heat stress, Effective temperature 	6
Unit -III	Comfort conditions: <ul style="list-style-type: none"> - Bioclimatic chart - Subjective variables - Thermal Comfort Indices - Active & Passive means of thermal control - Degree of control. 	9
Unit-IV	Solar charts & Sun-path: <ul style="list-style-type: none"> - Study of Sun-path, Azimuth & Altitude Angle - Structural control : Sun control and shading devices 	9
Unit-V	Ventilation & Air movement: <ul style="list-style-type: none"> - Study of ventilation & its functions in buildings - Air flow through buildings - Position & size of opening 	6
Unit-VI	Study of Climatic zones & Built environment: <ul style="list-style-type: none"> - Study of nature of climate, its physiological objectives and design criteria - Planning Principles of internal and external spaces, surface treatments and openings etc. for various climatic zones 	9

Basic Design-II

CourseCode:KHMU27	Course Category: Professional Core		Semester: II
Credits :	3	Internal Assessment	40 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO)	60 Marks
Workshops or studio exercises / week	2	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	54 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	45 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	09 Hours

Course Objectives:

1. To introduce to the design process as a synthesis of a variety of factors, analysed and studied.
2. To enhance creative thinking skill

Course Outcomes:

CO No.	Cognitive levels	On successful completion of course the learner will be able to:
1.	Remembering	Acquire ,creative thinking and theory of Rasa
2.	Understanding	Understand various techniques for improving creativity
3.	Applying	Use the sources of inspiration for creating concepts for design
4.	Analyzing	Select tools for concept Building
5.	Evaluating	Decide inspiration for concept Building
6.	Creating	Synthesis knowledge gained in this subject with Architectural Design

Course Contents:

Units	Contents of The Course	Hours
Unit -I	Techniques for improving Creativity I: <ul style="list-style-type: none"> - Theories by Edward De Bono: Six thinking hats, lateral thinking - Brainstorming, - Random Combinations - Tree of Possibilities 	08

Unit -II	Techniques for improving Creativity II - Abstraction - Transformation - Matrix of Ideas	08
Unit -III	Sources of inspiration for Creativity: - Role of experience - Mimesis - Literature	08
Unit-IV	Inspiration for concept building: - Material - Geometry - History	08
Unit-V	Tools for Concept building: - Nature and geometry - Visual Memory - Association with other arts	08
Unit-VI	Indian Aesthetics: Introduction to theories of Indian aesthetics specifically the ‘Rasa’ theory by Abhinavgupta, Bharatmuni, Abhinavbharati, etc., with examples from Natyashastra	05

Elective-II

CourseCode:KHMU28	Course Category: Open Elective		Semester: II
Credits :	2	Internal Assessment	100 Marks
Lectures per week	1	Terminal Paper	-
Studio Projects per week	-	Sessional Oral (SO	-
Workshops or studio exercises / week	1	Sessionals(SS)	-
No.s of Weeks in Semester	18	No.s of hours in Semester	36 Hours
No.s of Weeks for Teaching+ Sessional Work	15	No.s of Hours for Teaching+ Sessional Work	30 Hours
No.of weeks for Assessment	3	No.of Hours for Assessment	06 Hours

Course Objectives:

1. To facilitate the students to learn out of a pool of specialized courses, which provides extended scope or which enables exposure to discipline-centric courses as well as cross-disciplinary courses.
2. To encourage interdisciplinary learning and imbibe values as learners
3. To give students an opportunity to develop their attitudes and /or skills in a subject they may opt for making carrier

Course Outcomes:

CO No.	Affective levels	On successful completion of course the learner will be able to:
1.	Receiving	Identify and describe the aspects or issues of offered contents
2.	Responding	Report case study
3.	Valuing	Justify their ideas /opinions in relation to contents of elective
4.	Organization	Document and present the data collected in systematic way.
5.	Internalizing	Display a technical base through in depth study

Course Contents:

Units	Contents of The Course	Hours
	The detail course contents will vary as per options selected for elective and expert teaching the course will frame the contents at the beginning of semester along with objectives, outcomes, references and details for assignments.

----	---------------------

Bharati Vidyapeeth
(Deemed to be University)
Pune, India

College of Engineering, Pune

B.Tech. (Computer Science and Business Systems)
Program Curriculum
(2021 Course)

VISION OF UNIVERSITY:

Social Transformation Through Dynamic Education.

MISSION OF UNIVERSITY:

- To make available quality education in different areas of knowledge to the students as per their choice and inclination.
- To offer education to the students in a conducive ambience created by enriched infrastructure and academic facilities in its campuses.
- To bring education within the reach of rural, tribal and girl students by providing them substantive fee concessions and subsidized hostel and mess facilities.
- To make available quality education to the students of rural, tribal, and other deprived sections of the population.

VISION OF THE INSTITUTE:

To be World Class Institute for Social Transformation Through Dynamic Education.

MISSION OF THE INSTITUTE:

- To provide quality technical education with advanced equipment, qualified faculty members, infrastructure to meet needs of profession and society.
- To provide an environment conducive to innovation, creativity, research, and entrepreneurial leadership.
- To practice and promote professional ethics, transparency and accountability for social community, economic and environmental conditions.

Vision of the Department

To syndicate industry and institute to impart high quality knowledge through scholarship, research and creative endeavour

Mission of the Department

- To impart contemporary technology conforming to a dynamic curriculum.
- To engage in professional development and scholarly endeavour through knowledge of common business principles.
- To promote the awareness of business discipline and ethical responsibility through industry alliance

Programme Educational Objectives (PEOs)

1. Prevail technical competency to concord the industry engrossment.
2. Assimilate business management skills.
3. Instigate business level innovation with societal consideration.

Program Specific Outcomes (PSOs)

Students of B. Tech (CSBS) will be

PSO1: Able to apply pragmatic, innovative and critical thinking approach for solving complex business problems.

PSO2: Able to choose effective business communication techniques in professional Institute/organization.

PSO3: Able to use financial domain understanding to formulate technological strategy.

PSO4: Skilled in contemporary courses from emerging domains such as artificial intelligence, Machine learning and data science.

Programme Outcomes (POs)

The students of B.Tech (Computer Science & Business Systems) will be able to

- a. Demonstrate logical and programming skills through comprehensive programming foundation.
- b. Apply knowledge of mathematics, computer engineering and basic science to comprehend and solve real world problems.
- c. Develop software applications and processes for complex problems to provide efficient solutions by assessing its environmental, social and ethical constraints.
- d. Investigate and solve complex computing problems with alternate solutions.
- e. Use functional skills of modern IT tools and techniques for engineering activities.
- f. Understand the social and cultural impact of computing on society.
- g. Provide optimized computational solutions that apprehend the societal and environmental aspects.
- h. Exhibit the professional, ethical and legal responsibilities related to industry.
- i. Perform as an individual and efficient team player to accomplish a goal.
- j. Present professional concepts through effective communication skills and documentation.
- k. Demonstrate management skills for developing time-bound projects within the available budget and resources.
- l. Develop the ability of lifelong learning for new IT practices.

SEMESTER – I

COURSE SYLLABUS

Discrete Mathematics

<u>Teaching Scheme</u>		<u>Examination Scheme</u>		<u>Credit Scheme</u>	
	Hours/Week		Marks		Credits
Theory:	03 Hours/Week	End Semester Examination	60 Marks	Theory	03 Credits
Practical:	02 Hours/Week	Internal Assessment	40 Marks	Practical	01 Credit
		Term work & Oral	50 Marks	Total	04 Credits

Course Prerequisite:

Basic knowledge of Elementary Linear Algebra, Numerical Mathematical Computation, Programming basics.

Course Objective:

The objective is to provide a mathematical foundation and skills those are required in further study of Computer Science. The course Discrete Mathematics deals with discrete objects, countable sets. It helps to develop logical thinking and a wide variety of real-world applications to computer science. It is a very good tool for improving reasoning and problem-solving capabilities.

Course Outcomes: On completion of the course, students will have the ability to:

1. Demonstrate the ability to write the sentences in the symbolic logic and evaluate a proof technique.
2. Apply the basic principles of set theory to analyse the data relationship and prove basic properties of set.
3. Analyse the properties of relations and functions to determine their properties.
4. Apply the knowledge of Boolean algebra for building basic electronic and digital circuits.
5. Solve problems of combinatorics and recurrence relations.
6. Model problems in Computer Science using graphs and trees.

Unit I

06 Hours

Logic: Propositional calculus - propositions and connectives, syntax; Semantics – truth assignments and truth tables, validity and satisfiability, tautology; Adequate set of connectives; Equivalence and normal forms; Compactness and resolution; Formal reducibility - natural deduction system and axiom system; Soundness and completeness.

Unit II

06 Hours

Set Theory: Types of sets, Sets operations and laws, Algebra of Sets, Multisets, Application of the principle of inclusion and exclusion.
Boolean algebra: Introduction of Boolean algebra, basic logic gate, basic postulates of Boolean algebra, principle of duality, canonical form, Karnaugh map.

Unit III

06 Hours

Relations: Basic definition, properties and types of relations, relations and digraphs, paths in relations and digraphs, equivalence and partially ordered relations.
Functions: Types of functions, Identity functions, Composition of functions, Mathematical functions, Pigeonhole principle.

Unit IV

06 Hours

Algebraic Structures: Isomorphism and Homomorphism. Algebraic Structures with Binary Operations, rings, Cyclic groups, codes.

Unit V

06 Hours

Combinatorics: Basic counting, balls and bins problems, generating functions, recurrence relations. Proof techniques, principle of mathematical induction, pigeonhole principle.

Unit VI

06 Hours

Graph Theory Graphs and digraphs, complement, isomorphism, connectedness and reachability, adjacency matrix, Eulerian paths and circuits in graphs and digraphs, Hamiltonian paths and circuits in graphs and tournaments, trees; Planar graphs, Euler's formula, dual of a planer graph, independence number and clique number, chromatic number, statement of Four-color theorem.

Textbooks:

1. Topics in Algebra, I. N. Herstein, John Wiley and Sons.
2. Digital Logic & Computer Design, M. Morris Mano, Pearson.
3. Elements of Discrete Mathematics, (Second Edition) C. L. LiuMcGraw Hill, New Delhi.
4. Graph Theory with Applications, J. A. Bondy and U. S. R. Murty, Macmillan Press, London.
5. Mathematical Logic for Computer Science, L. Zhongwan, World Scientific, Singapore.

Reference Books:

1. Introduction to linear algebra. Gilbert Strang.
2. Introductory Combinatorics, R. A. Brualdi, North-Holland, New York.
3. Graph Theory with Applications to Engineering and Computer Science, N. Deo, Prentice Hall, Englewood Cliffs.
4. Introduction to Mathematical Logic(Second Edition), E. Mendelsohn, Van-Nostrand, London.

List of Assignments:

The sample class assignments are given below.

1. Given a fact or a statement prove or disprove using suitable technique.
2. Write the given English language sentences represent in the Symbolic logic.
3. Given the statement forms Infer the validity of the statement form.
4. Draw a Hasse diagram and find chains and antichains.
5. Find the number of ways for any event or given sample space.
6. Given a problem represent in a graph and compute the optimal solution.
7. Given a communication network find the path between the given nodes.

List of Laboratory Exercises:

1. Perform set Operations.
2. Compute a power set of a given set.
3. List various properties of Relation and construct a program to evaluate it with a program.
4. Apply Warshall's algorithm to compute a Transitive Closure of a given relation entered by the user(Use any suitable programming language).
5. Solve a programming problem based on application of Eulerian and Hamiltonian Graph.
6. Develop a program using RSA algorithm.
7. Develop a program to apply different algorithms on graph and solve areal tie problem.

List of Project Based Learning Topics:

1. Discrete Mathematics in Railway Planning using graph theory and linear algebra.
2. Object transformations using linear algebra.
3. Discrete mathematics in cryptography.
4. In Google maps to determine fastest driving routes and times.
5. In image processing
6. In relation database using sets.
7. In cyber security using graph theory.
8. Shortest path between two cities using a transportation system.
9. Data compression system with the help of Huffman coding.

10. Find the shortest tour that visits each of a group of cities only once and then ends in the starting city using graphs.

Syllabus for Unit Tests:

Unit Test -1
Unit Test -2

Unit – I, Unit – II, Unit - III
Unit – IV, Unit – V, Unit - VI

Statistics, Probability and Calculus

TEACHING SCHEME:

Lectures: 3 Hrs/Week
Tutorials: 1 Hr/Week
Practical: Nil

EXAMINATION SCHEME:

Semester Examination: 60 Marks
Internal Assessment: 40 Marks
Term Work: Nil

CREDITS ALLOTTED:

Theory: 3 Credits
Tutorial :1 Credit
Total : 4 Credit

Course Pre-Requisites:

The students should have basic knowledge of high school mathematics and calculus.

Course Objective:

The course introduces fundamental concepts of statistics and probability.

Course Outcomes:

1. Students will be able to use appropriate statistical terms to describe data.
2. Students will be able to use appropriate statistical methods to collect, organize, display and analyse relevant data.
3. Students will be able to apply concepts of various probability distributions to find probabilities and understand mathematical expectation and moments generating function.
4. Students will be able to apply concepts of Normal, Poisson, Binomial, uniform, exponential, t and F-distribution.
5. Students will be able to apply concepts of differentiation.
6. Students will be able to apply concepts of integration to find area and volume using double and triple integral.

UNIT – I

6 Hours

Introduction to Statistics: Definition of Statistics. Basic objectives. Applications in various branches of science with examples

Collection of Data: Internal and external data, Primary and secondary data. Population and sample, Representative sample.

UNIT – II

6 Hours

Descriptive Statistics: Classification and tabulation of univariate data, graphical representation, Frequency curves. Descriptive measures - central tendency and dispersion. Bivariate data. Summarization, marginal and conditional frequency distribution. Linear regression and correlation. Rank correlation.

UNIT III

6 Hours

Probability Theory: concept of experiments, sample space, event. Definition of Combinatorial Probability. Conditional Probability, Bayes Theorem

Mathematical expectation: Expected values & moments: mathematical expectation & its properties, Moments (including variance) & their properties, interpretation, Moment generating function

UNIT – IV

6 Hours

Probability distributions: Discrete & continuous distributions, Binomial, Poisson & Geometric distributions, Uniform, Exponential, Normal, Chi-square, t, F distributions

UNIT – V

6 Hours

Differential Calculus: Differential equation and its application

UNIT – VI

6 Hours

Integral Calculus: Multiple integral, application of double and triple integral.

List of Assignments:

Problem sets to be shared by faculty covering the following topics:

Graphical representation of data, Histograms, Descriptive measures - central tendency and dispersion
Estimating moments, Distribution parameters.

List of Project Based Learning Topics:

1. Prepare a questionnaire for survey
2. Do the population survey of a certain area
3. Prepare survey model of literate/illiterate
4. Prepare survey model of employed/ unemployed
5. Classify primary and secondary data
6. Collect the raw data, analyse it and plot it using graphs
7. Find the stability of the data using coefficient of variation
8. Use concept of correlation to find coefficient of correlation between different observations
9. Use Rank correlation to find correlation for qualitative data
10. Derive Spearman's Rank correlation
11. Data fitting using linear regression
12. Data fitting using nonlinear regression
13. Find the chance of happening particular event using Baye's theorem
14. Find the Moment generating function of given function.
15. Use probability theory to estimate the life of electric equipments
16. Find the height, weight of the population using the example of normal distribution
17. Evaluate the electric circuit problem using differential equations
18. Evaluate the heat conduction problem using differential equations
19. Find the area using double integrals
20. Find the volume using triple integrals

Textbooks:

1. Introduction of Probability Models, S.M. Ross, Academic Press, N.Y.
2. Fundamentals of Statistics, vol. I & II, A. Goon, M. Gupta and B. Dasgupta, World Press.
3. Higher Engineering Mathematics, B. S. Grewal, Khanna Publication, Delhi.

Reference Books:

1. A first course in Probability, S.M. Ross, Prentice Hall.
2. Probability and Statistics for Engineers (Fourth Edition), I.R. Miller, J.E. Freund and R. Johnson, PHI.
3. Introduction to the Theory of Statistics, A.M. Mood, F.A. Graybill and D.C. Boes, McGraw Hill Education.
4. Advanced Engineering Mathematics, (Seventh Edition), Peter V. O'Neil, Thomson Learning.
5. Advanced Engineering Mathematics, (Second Edition) M. D. Greenberg, Pearson Education.
6. Applied Mathematics, Vol. I & II, P. N. Wartikar and J. N. Wartikar, VidyarthiPrakashan.

Syllabus for Unit Test:

Unit Test -I

UNIT - I, II and III

Unit Test -II

UNIT - IV, V and VI

Principles of Electrical Engineering

TEACHING SCHEME:

Theory: 03 Hours / Week

Practical: 02 Hours / Week

EXAMINATION SCHEME:

End Semester Examination: 60 Marks

Internal Assessment: 40 Marks

Term Work: 25Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical: 1 Credit

Total : 4 Credits

Course Pre-requisites:

The Students should have knowledge of Mathematics, physics.

Course Objectives:

The course introduces fundamental concepts of DC and AC circuits, Electrostatics electromagnetism, transformer, electrical wiring and illumination.

Course Outcomes: After learning this course the students will be able to

1. Apply knowledge of basic concepts of work, power, energy for energy conversion and calculate current in electrical network using Kirchoff's laws.
2. Calculate response of electrical circuit using network theorems.
3. Define basic terms of single phase and three phase ac circuits and supply systems.
4. Describe construction, principle of operation, specifications and applications of capacitors and batteries
5. Describe and apply fundamental concepts of magnetic and electro-mechanics for operation of single phase transformer.
6. Describe illumination, types of wiring and earthing system.

UNIT – I

6 Hours

Introduction: Concept of EMF, Potential difference, voltage, current, resistance. Fundamental linear passive and active elements to their functional current-voltage relation, Terminology and symbols in order to describe electric networks, voltage source and current sources, ideal and practical sources, concept of dependent and independent sources, Kirchoff-s laws and applications to network solutions using mesh and nodal analysis, Concept of work, power, energy, and conversion of energy.

UNIT – II

6 Hours

DC Circuits: Current-voltage relations of the electric network by mathematical equations to analyze the network (Thevenin's theorem, Norton's Theorem, Maximum Power Transfer theorem) Simplifications of networks using series-parallel, Star/Delta transformation. Superposition theorem.

UNIT III

6 Hours

AC Circuits: AC waveform definitions, form factor, peak factor, study of R-L, R-C,RLC series circuit, R-L-C parallel circuit, phasor representation in polar and rectangular form, concept of impedance, admittance, active, reactive, apparent and complex power, power factor, 3 phase Balanced AC Circuits (Y- Δ & Δ -Y).

UNIT – IV

6 Hours

Electrostatics: Electrostatic field, electric field strength, concept of permittivity in dielectrics, capacitor composite, dielectric capacitors, capacitors in series and parallel, energy stored in capacitors, charging and discharging of capacitors, Principle of batteries, types, construction and working, application.

UNIT – V

6 Hours

Electro-Mechanics: Electricity and Magnetism, magnetic field and Faraday's law, self and mutual inductance, Ampere's law, Magnetic circuit, Magnetic material and B-H Curve, Single phase transformer, principle of operation, EMF equation, voltage ratio, current ratio, KVA rating, losses in transformer, efficiency and regulation, Determination of Efficiency & Regulation by direct load test, Electromechanical energy conversion

UNIT – VI

6 Hours

Measurements and Sensors: Introduction to measuring devices/sensors and transducers (Piezoelectric and thermo-couple) related to electrical signals, Elementary methods for the measurement of electrical quantities in DC and AC systems(Current & Single-phase power), Basic concept of indicating and integrating instruments, Electrical Wiring and Illumination system: Basic layout of the distribution system, Types of Wiring System & Wiring Accessories, Different types of lamps (Incandescent, Fluorescent, Sodium Vapour, Mercury Vapour, Metal Halide, CFL, LED),Necessity of earthing, Types of earthing, Safety devices & system.

List of Assignments:

Respective subject teacher shall design minimum six assignments on above units.

List of Laboratory Exercises:

1. Familiarization of electrical Elements, sources, measuring devices and transducers related to electrical circuits.
2. Determination of resistance temperature coefficient
3. Verification of Superposition Theorem
4. Verification of Thevenin's Theorem
5. Verification of Norton's Theorem
6. Verification of Kirchoff's Laws
7. Verification of Maximum power transfer Theorem
8. Simulation of Time response of RC circuit
9. Study of R-L-C series circuits for $X_L > X_C$, $X_L < X_C$ & $X_L = X_C$
10. Verification of relation in between voltage and current in three phase balanced star and delta connected loads.
11. Direct loading test on Single phase transformer
12. a) Voltage and current ratios.
b) Efficiency and regulations.
13. Demonstration of measurement of electrical quantities in DC and AC systems.

List of Project Based Learning Topics:

Student shall demonstrate minimum one concept based on syllabus topic.

1. Demonstration of conversion of energy.
2. Study and understand practical specifications of transformer.
3. Demonstration of electrostatics and understand practical specifications of batteries.
4. Demonstration of phenomenon of electromagnetic induction.
5. Demonstration of electromagnetism, electro mechanics and their applications by using professional software tool.
6. Development of practical kits for understanding different theorems related to electrical circuits. (Thevenin's theorem, Norton's Theorem, Maximum Power Transfer theorem, Superposition theorem etc.)
7. Demonstration of illumination system.
8. Demonstration of distribution system.
9. Study and understand safety practices in electrical system.
10. Study and understand electrical earthing system.

Textbooks:

1. Electric Machinery,(Sixth Edition) A.E. Fitzgerald, Kingsely Jr Charles, D. Umans Stephen, Tata McGraw Hill.
2. A Textbook of Electrical Technology,(vol. I),B. L. Theraja, Chand and Company Ltd., New Delhi.
3. Basic Electrical Engineering, V. K. Mehta, S. Chand and Company Ltd., New Delhi.
4. Theory and problems of Basic Electrical Engineering, (SecondEdition), J. Nagrath and Kothari, Prentice Hall of India Pvt. Ltd.

Reference Books:

1. Basic of Electrical Engineering, T. K. Nagsarkar and M. S. Sukhija, Oxford University Press. T. K. Nagsarkar and M. S. Sukhija, Basic of Electrical Engineering, Oxford University Press, 2011.
2. Introduction to Electrodynamics, D. J. Griffiths, (Fourth Edition), Cambridge University Press.
3. Engineering Circuit Analysis, William H. Hayt & Jack E. Kemmerly, McGraw-Hill Book Company Inc.
4. Fundamentals of Electrical and Electronics Engineering, Smarjith Ghosh, Prentice Hall (India) Pvt. Ltd.
5. Edward Hughes – “Electrical Technology”- Seventh Edition, Pearson Education Publication
6. H. Cotton – “Elements of Electrical Technology”, C.B.S. Publications
7. John Omalley Shawn – “Basic circuits analysis” McGraw Hill Publications
8. Vincent Del Toro – “Principles of Electrical Engineering”, PHI Publications

Syllabus for Unit Test:

Unit Test -1
Unit Test -2

UNIT – I, UNIT – II, UNIT - III
UNIT – IV, UNIT – V, UNIT - VI

Fundamentals of Computer Science

TEACHING SCHEME:

Lectures: 3Hrs/Week

Tutorials: Nil

Lab: 4 Hrs/Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term work & Practical: 50 Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical: 2 Credits

Total : 5 Credits

Course Pre-Requisites:

Basic knowledge of computers.

Course Objective:

The course introduces fundamental concepts of computer science

Course Outcomes:

1. Understand the basics of computer science & the process of moving from a problem statement to a computational formulation of a method for solving the problem.
2. Apply the basic concepts of control structures.
3. Understand basic concepts of function.
4. Implement concept of arrays and pointers.
5. Develop an application using the concept of file handling.
6. Describe unix system interface and programming method.

UNIT – I

6 Hours

General problem-Solving concepts and Imperative languages: Algorithm, and Flowchart for problem solving with Sequential Logic Structure, Decisions and Loops.

Imperative languages: Introduction to imperative language; syntax and constructs of a specific language (ANSI C). Types Operator and Expressions with discussion of variable naming and Hungarian Notation: Variable Names, Data Type and Sizes (Little Endian Big Endian), Constants, Declarations, Arithmetic Operators, Relational Operators, Logical Operators, Type Conversion, Increment Decrement Operators, Bitwise Operators, Assignment Operators and Expressions, Precedence and Order of Evaluation, proper variable naming and Hungarian Notation

UNIT – II

6 Hours

Control Flow with discussion on structured and unstructured programming: Statements and Blocks, If-Else-If, Switch, Loops – while, do, for, break and continue, Goto Labels, structured and un- structured programming

UNIT – III

6 Hours

Functions and Program Structure with discussion on standard library: Basics of functions, parameter passing and returning type, C main return as integer, External, Auto, Local, Static, Register Variables, Scope Rules, Block structure, Initialization, Recursion, Pre-processor, Standard Library Functions and return types

UNIT – IV

6 Hours

Pointers and Arrays: Pointers and address, Pointers and Function Arguments, Pointers and Arrays, Address Arithmetic, character Pointers and Functions, Pointer Arrays, Pointer to Pointer, Multi-dimensional array and Row/column major formats, Initialisation of Pointer Arrays, Command line arguments, Pointer to functions, complicated declarations and how they are evaluated.

UNIT – V

6 Hours

Structures: Basic Structures, Structures and Functions, Array of structures, Pointer of structures, Self-referral Structures, Table look up, Typedef, Unions, Bit-fields

Input and Output: Standard I/O, Formatted Output – printf, Formated Input – scanf, Variable length argument list, file access including FILE structure, fopen, stdin, sdtout and stderr, Error Handling including exit, perror and error.h, Line I/O, related miscellaneous functions

UNIT – VI

6 Hours

Unix system Interface: File Descriptor, Low level I/O – read and write, Open, create, close and unlink, Random access – lseek, Discussions on Listing Directory, Storage allocator
Programming Method: Debugging, Macro, User Defined Header, User Defined Library Function, make file utility.

List of Assignments:

1. Define Algorithm. Explain Characteristics of Algorithm.
2. Explain all types of Operators in detail with example.
3. Explain control structures in detail with example.
4. Define function. Explain types of Functions with example.
5. Write a short note on:
i) Pointers ii) Types of Array iii) Pointer Array
6. Define Structure. Explain concept of Array of Structure with suitable example.
7. Explain File Descriptor and Storage Allocator in detail.

List of Laboratory Exercises:

1. Algorithm and flowcharts of small problems like GCD
2. Structured code writing with:
 - i. Small but tricky codes
 - ii. Proper parameter passing
 - iii. Command line Arguments
 - iv. Variable parameter
 - v. Pointer to functions
 - vi. User defined header
 - vii. Make file utility
 - viii. Multi file program and user defined libraries
 - ix. Interesting substring matching / searching programs
 - x. Parsing related assignments

List of Project Based Learning Topics:

1. Inventory Management System using File Handling
2. Online Jewellery Shopping System using File Handling
3. Library Management System using File Handling
4. Online Examination System using File Handling
5. Hospital Management System using File Handling
6. Railway Reservation System using File Handling
7. Payroll Management System using File Handling
8. Cooking Recipe Portal using File Handling
9. Art Gallery Management System using File Handling
10. Student Database Management System using File Handling
11. Restaurant Management Database System using File Handling
12. Electric Bill System using File Handling
13. Online Examination System using File Handling
14. Event Management System using File Handling
15. Attendance Management System using File Handling
16. Slam book using File Handling.

Textbooks:

1. B. W. Kernighan and D. M. Ritchi, “The C Programming Language”, Second Edition, PHI.
2. B. Gottfried, “Programming in C”, Second Edition, Schaum Outline Series.

Reference Books:

1. Herbert Schildt, "C: The Complete Reference", Fourth Edition, McGraw Hill.
2. Yashavant Kanetkar, "Let Us C", BPB Publications.

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Physics for Computing Science

TEACHING SCHEME:

Lectures: 3Hrs/Week

Tutorials: Nil

Lab: 2 Hrs/Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term work :25 Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical : 1 Credit

Total : 4 Credits

Course Prerequisites: -

Students are expected to have a basic understanding of physics and calculus.

Course Objectives:-

To impart knowledge of basic concepts in physics relevant to engineering applications in a broader sense with a view to lay foundation for the Computer Science and Business System.

Course Outcomes: -

1. Summarise the terms damping constant, characteristic frequency, kinetic and potential energy of a spring.
2. Appraise the wave nature of light and apply it to measure stress, pressure and dimension etc.
3. Solve quantum physics problems to micro level phenomena and solid-state physics.
4. Summarise the arrangement of atoms in solids and its influence the properties of matter.
5. Summarise the structure and properties of lasers to their performance and intended applications such as fibre optics.
6. Summarise the applications of thermodynamics.

Unit I. Oscillation

6 Hours

Periodic motion-simple harmonic motion-characteristics of simple harmonic motion-vibration of simple spring-mass system. Resonance-definition damped harmonic oscillator – heavy, critical and light damping, energy decay in a damped harmonic oscillator, quality factor, forced mechanical and electrical oscillators.

Unit II. Wave Optics

6 Hours

Interference-Principle of superposition-Young's experiment: Theory of interference fringes-types of interference-Fresnel's prism-Newton's rings.

Diffraction-Two kinds of diffraction-Difference between interference and diffraction- Fraunhofer diffraction at single slit-plane diffraction grating, Temporal and Spatial Coherence.

Polarization of light- Polarization - Concept of production of polarized beam of light from two SHM acting at right angle; plane, elliptical and circularly polarized light, Brewster's law, double refraction.

Unit III. Quantum Mechanics

6 Hours

Introduction- Planck's quantum theory- Matter waves, de-Broglie wavelength, Heisenberg's Uncertainty principle, time independent and time dependent Schrödinger's wave equation, Physical significance of wave function, Particle in a one-dimensional potential box.

Unit IV. Crystallography and Semiconductor Physics

6 Hours

Crystallography: Basic terms-types of crystal systems, Bravais lattices, miller indices, d spacing, Atomic packing factor for SC, BCC, FCC and HCP structures, X-ray diffraction.

Semiconductor Physics: Conductor, Semiconductor and Insulator; Origin of Band Theory, Basic concept of Band theory.

Unit V. Laser and Fiber optics

6 Hours

Einstein's theory of matter radiation interaction and A and B coefficients; amplification of light by population inversion, different types of lasers: Ruby Laser, CO₂ and Neodymium YAG (Neodymium-doped Yttrium Aluminum Garnet); Properties of laser beams: mono-chromaticity, coherence, directionality and brightness, laser speckles, applications of lasers in engineering. Fiber optics and Applications, Types of optical fibers.

Unit VI. Thermodynamics and Electromagnetism

6 Hours

Thermodynamics: Zero-th law of thermodynamics, first law of thermodynamics, brief discussion on application of 1st law, second law of thermodynamics and concept of Engine, entropy, change in entropy in reversible and irreversible processes.

Basic Idea of Electromagnetisms: Continuity equation for current densities, Maxwell's equation in vacuum and non-conducting medium.

List of Assignments:

Six assignments to be given by the subject teacher (Theory)-one from each unit/one mini project with report-students can work in group of 4 Maximum

List of Laboratory Exercises:

1. Determination of radius of planoconvex lens/wavelength of light/Flatness testing by Newton's rings
2. Determination of wavelength of light using diffraction grating
3. Determination of resolving power of telescope
4. Determination of thickness of a thin wire by air wedge
5. Determination of refractive index for O-ray and E-ray
6. Determination of divergence of a laser beam
7. Particle size by semiconductor laser
8. Determination of wavelength of laser by diffraction grating
9. To study Hall effect and determine the Hall voltage
10. Calculation of conductivity by four probe method
11. Study of solar cell characteristics and calculation of fill factor
12. Determination of band gap of semiconductor
13. Determination of Planck's Constant by photoelectric effect
14. Magnetic field along the axis of current carrying coil – Stewart and Gee
15. Determination of Stefan's Constant

List of Project Based Learning Topics:

1. Design and simulation of automatic solar powered time regulated water pumping
2. Solar technology: an alternative source of energy for national development
3. Double pendulum and its application
4. The study on the effect of length on the resistance of a copper wire (verification of ohms law r directly proportional to l)
5. Possible effects of electromagnetic fields (emf) on human health
6. Design and construction of digital distance measuring instrument
7. Design and construction of automatic bell ringer
8. Design and construction of remote control fan
9. Design and construction of sound or clap activated alarm
10. Electronic eye (Laser Security) as autoswitch/security system
11. Study of vibration of bars
12. Determination of absorption coefficient of sound absorbing materials
13. Determination of velocity of O-ray and E-ray in different double refracting materials
14. Need of medium for propagation of sound wave
15. Thin film interference in soap film-formation of colours

10. Renewable Energy: Power for a Sustainable Future, Boyle, Oxford University Press (2012)

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Business Communication & Value Science-I

TEACHING SCHEME:

Lectures: 3 Hr./Week

Lab: 2 Hrs./Week

EXAMINATION SCHEME:

Semester Examination: 50 marks

Internal Assessment: Yes

Term work & Oral -50 Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical: 1 Credit

Total : 4 Credits

Course Prerequisites: -

1. Students should have knowledge of Basic English grammar
2. Students should have basic information of sound system of English language
3. Basics of written communication

Course Objective:-

The course objective of Business Communication & Value Science-I aims to augment student's overall communication and interpersonal skills by engaging them in group activities and thus aid in helping them to emerge as professionals. The English language topics for this semester focus on the development of basic fluency in English, usage of words and introduce them to the concept and importance of interpersonal skills so as to effectively present their personalities. Understand what life skills are and their importance in leading a happy and well-adjusted life. Motivate students to look within and create a better version of self.

Course Outcomes: -

Graduates will able to:

1. Recognize the need for life skills, values and own strengths and opportunities and apply the life skills to different situations
2. Understand and apply applications of sounds of English language for correct pronunciation
3. Construct the error free sentences of English language and do implementation of it in the spoken and written business communication
4. Understand communication process and principles to do applications in professional communication
5. Build up the ability to study employment professional communication skills and its proper implications
6. Recognize the core of professional skills and apply them for future venture through activities

Unit 1 Skills and Values and Basics of Grammar:

6 Hours

Recognize the need for life skills and values, **Overview of LOL** (include activity on introducing self), **Self-awareness** – identity, body awareness, forms of tense, articles, preposition, use of auxiliaries and modal auxiliaries, common errors.

Unit II Vocabulary/Phonetics/study of sounds in English:

6 Hours

Vocabulary development through GRAPS-PT, types of sentences voice, direct indirect speech, degree of comparison, Introduction to phonetics, study of speech organs, study of phonetic script, transcriptions of words, articulation of different sounds in English

Unit III Honing Spoken Communication:

6 Hours

Situational conversation, Law of nature- Importance of listening skills, Difference between listening and hearing, Types of listening, building team, team communication dynamics

Unit IV Communication Skills

6 Hours

Introduction, forms and function of communication process, non-verbal codes in communication, barriers to communication and overcoming them, digital communication

Unit V Mechanics of Written Communication**6 Hours**

Principles of effective writing, Email writing, technical report writing, format, structure and its types, real time report writing, create a podcast on an interested topic, create a musical using the learnings from unit

Unit VI Skill allied to professionalism:**6 Hours**

Introduction to professional skills, overview of leadership, dealing with ambiguity, Time management, Pareto Principle (80/20) Rule in time management, Time management matrix, creativity and result orientation, working under pressure, stress management.

List of Laboratory Exercises:

01. Presentation on favourite cricket captain in IPL and the skills and values they demonstrate
02. Learning Vocabulary through activity
03. Self-work with immersion – interviews a maid, watchman etc.
04. Write a newspaper report on an IPL match
05. Expressing self, connecting with emotions, visualizing and experiencing purpose
06. Evaluation on Listening skills – listen to recording and answer questions based on them
07. Written Communication: Summary writing, story writing
08. Understanding Life Skills: Movie based learning-**Pursuit of Happiness**.
09. Multiple Intelligences, Embracing diversity – Activity on appreciation of diversity
10. Life skill: Leadership, teamwork, dealing with ambiguity, managing stress, motivating people, creativity, result orientation etc.

Project:	01	Create a podcast on a topic that will interest college students
	02	Create a musical using the learnings from the whole course

List of Project Based Learning Topics:

01. Communication Origami
02. Preparing a model for the LOL activity
03. Investigating values around you and imbibing
04. Vocabulary: play-way method by using cards
05. Investigating into linguistic by creating models
06. Interviewing your role model for situational conversation
07. Honing LSRW: Preparing a model on each skill
08. Knowing body language: Making a video of professional presentation
09. Preparing a model of report writing (preferably real time report)
10. Analysis of Pareto Principle for Time Management
11. Creating a model of Leadership styles and their functions
12. Analysis of Time Management Matrix for effective time Management

Reference Books:

1. Business Communication by Meenakshi Raman, Prakash Singh published by Oxford University press, second edition,
2. Spoken English- A manual of Speech and Phonetics by R. K. Bansal, J. B. Harrison published by Orient Blackswan
3. Communication Skills by Sanjay Kumar, PushpLata, published by Oxford University press, second edition
4. Technical Communication by Meenakshi Raman, Sangeeta Sharma published by Oxford University press
5. Developing Communication Skills by Krishna Mohan, MeeraBanerji published by Macmillan India Pvt Ltd

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

B. TECH (Computer Science & Business Systems)

SEMESTER – II

COURSE SYLLABUS

Linear Algebra

TEACHING SCHEME:

Lectures: 3Hrs./Week

Tutorials: 1Hr./Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

CREDITS ALLOTTED:

Theory: 3 Credits

Tutorial: 1 credit

Total : 4 Credits

Course Pre-Requisites:

The students should have basic Knowledge of high school math, Boolean algebra and calculus.

Course Objective:

To develop ability to use the mathematical techniques, skills, and tools necessary for computer science.

Course Outcomes:

At the end of the course, a student will be able to:

1. Apply knowledge of basics of Matrices, Determinants.
2. Solve the consistency of any type of systems.
3. Describe Vector space, Orthogonality and Projection.
4. Apply methods Gram-Schmidt orthogonalization and QR decomposition.
5. Calculate Eigenvalues and Eigenvectors.
6. Describe Singular value decomposition and Principal component analysis.

UNIT – I

6 Hours

Introduction to Matrices and Determinants, Solution of Linear Equations, Cramer's rule, Inverse of a Matrix.

UNIT – II

6 Hours

Vectors and linear combinations, Rank of a matrix, Gaussian elimination, LU Decomposition, Solving Systems of Linear Equations using the tools of Matrices.

UNIT – III

6 Hours

Vector space, Dimension, Basis, Orthogonality, Projection.

UNIT – IV

6 Hours

Gram-Schmidt orthogonalization and QR decomposition.

UNIT – V

6 Hours

Eigenvalues and Eigenvectors, Positive definite matrices, Linear transformations, Hermitian and Unitary matrices.

UNIT – VI

6 Hours

Singular value decomposition and Principal component analysis, Introduction to their applications in Image Processing and Machine Learning.

List of Assignments:

Assignments & tutorials covering the following: Vectors and linear combinations, Matrices, Determinants, Linear transformations, Complete solution to $AX=b$, Eigenvalues and Eigenvectors.

List of Project Based Learning Topics:

Students are expected prepare report on any one topic, write its definition, applications and illustrate with few examples. Also, write pseudo code for it, wherever applicable.

1. Cramer's rule
2. System of linear equations solution
3. Rank of matrix
4. Gauss elimination

5. LU-decomposition method
6. Dimension and basis
7. Gram Schmidt Orthogonalization
8. QR decomposition
9. Single value ecomposition
10. Principal component analysis
11. Eigen values and eigen vectors
12. Hermitian and unitary matrices
13. Positive definite matrices
14. Image processing
15. Machine learning

Textbook:

1. B. S. Grewal, "Higher Engineering Mathematics", Khanna Publication, Delhi.

Reference Books:

1. Advanced Engineering Mathematics, 7e, by Peter V. O'Neil.
2. Advanced Engineering Mathematics, 2e, by M. D. Greenberg, Pearson Education.
3. Introduction to linear algebra, 5th Edition, Gilbert Strang.
4. Applied Mathematics (Volumes I and II) by P. N. Wartikar & J. N. Wartikar, Pune Vidyarthi Griha Prakashan, Pune.
5. Digital Image Processing, R C Gonzalez and R E Woods.

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Statistical Methods

TEACHING SCHEME:

Lectures: 3 Hrs/Week

Tutorials: Nil

Laboratory: 02 Hrs/week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term Work: 25

CREDITS ALLOTTED:

Theory: 3 Credits

Practical: 1 Credit

Total : 4 Credits

Course Pre-requisites:

Basic of statistics and probability, Basic programming experience (in any language).

Course Objective:

The course introduces fundamental concepts of linear statistical models, estimation methods, hypothesis testing and fundamental concepts of programming in R.

Course Outcomes:

The students completing this course will be able to

1. Understand the basic concepts of Statistical Inference,
2. Understand the basic concepts of Estimation methods,
3. Understand the basic concepts of Hypothesis Testing
4. Understand the basic concepts of linear statistical models.
5. Understand Introductory R language fundamentals, basic syntax and how to use R; what R is and how it's used to perform data analysis.
6. Understand major R data structures and create visualizations using R.

UNIT – I

6 Hours

Sampling Techniques: Random sampling. Sampling from finite and infinite populations. Estimates and standard error (sampling with replacement and sampling without replacement), Sampling distribution of sample mean, stratified random sampling

UNIT – II

6 Hours

Linear Statistical Models: Scatter diagram. Linear regression and correlation. Least squares method. Rank correlation. Standard multiple regression models with emphasis on detection of collinearity, outliers, non-normality and autocorrelation, Validation of model assumptions. Multiple correlation, Analysis of variance (one way, two way with as well as without interaction)

UNIT – III

6 Hours

Estimation: Point estimation, criteria for good estimates (un-biasedness, consistency), Methods of estimation including maximum likelihood estimation.

UNIT – IV

6 Hours

Test of hypothesis: Concept & formulation, Type I and Type II errors, Neyman Pearson lemma, Procedures of testing

UNIT – V

6 Hours

Non-parametric Inference: Comparison with parametric inference, Use of order statistics. Sign test, Wilcoxon signed rank test, Mann-Whitney test, Run test, Kolmogorov-Smirnov test. Spearman's and Kendall's test.

UNIT – VI

6 Hours

Basics of Time Series Analysis & Forecasting: Stationary, ARIMA Models: Identification, Estimation and Forecasting.

List of Assignments:

Problem sets to be shared by faculty covering the following topics: Estimation Methods: Parametric & Non – Parametric, Hypothesis Testing

List of Laboratory Exercises:

R statistical programming language: Introduction to R, Functions, Control flow and Loops, Working with Vectors and Matrices, Reading in Data, Writing Data, Working with Data, Manipulating Data, Simulation, Linear model, Data Frame, Graphics in R

List of Project Based Learning Topics:**Project Based learning topics:**

Students are expected prepare report on any one topic, write its definition, applications and analyze the hypothetical data. Also, write pseudo code for it, wherever applicable.

1. Random Sampling
2. Stratified random sampling
3. Linear regression
4. Rank correlation
5. Method of least squares
6. Multiple correlation
7. One way analysis of variance
8. Two way analysis of variance
9. Estimation
10. Maximum likelihood estimation
11. Testing of hypothesis
12. Types of errors
13. Nonparametric tests
14. Time series
15. Forecasting

Textbooks:

1. Probability and Statistics for Engineers (4th Edition) - I.R. Miller, J.E. Freund and R. Johnson.
2. Fundamentals of Statistics (vol. I and vol. II) - A. Goon, M. Gupta and B. Dasgupta.
3. Hands-on Programming with R - Garrett Grolemond
4. R for Everyone: Advanced Analytics and Graphics - Jared P. Lander

Reference Books:

1. Statistical Theory with Engineering Application - A. Hald.
2. Statistical Methods - G.W. Snedecor and W.G. Cochran.
3. Statistical Concepts & Methods - G.K. Bhattacharyya and R.A. Johnson.
4. Introduction to Linear Regression Analysis - D.C. Montgomery & E. Peck
5. Introduction to the Theory of Statistics - A.M. Mood, F.A. Graybill & D.C. Boes.
6. Practical Non-Parametric Statistics - W.J. Conover
7. Applied Regression Analysis - N. Draper & H. Smith

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Data Structures and Algorithms

TEACHING SCHEME:

Lectures: 3 Hrs./ Week

Tutorials: Nil

Lab: 4 Hrs./ Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term work & Practical: 100Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical: 2 Credits

Total : 5 Credits

Course Pre-Requisites:

Students should have knowledge of Fundamentals of data types and programming concepts

Course Objective:

The course is aimed to provide an understanding of key concepts underlying the choice and implementation of data structures, algorithms and step by step approach in solving problems with the help of these fundamental data structures.

Course Outcomes:

Students will be able to:

1. Understand the fundamentals and analysis of algorithms
2. Implement Linear data structures
3. Implement Non-Linear data structure of Trees.
4. Implement Non-Linear data structure of Graphs.
5. Implement the sorting algorithms
6. Understand the concepts of different file system organisation.

UNIT – I

6 Hours

Basic Terminologies & Introduction to Algorithm and Data Organization: Algorithm specification, Recursion, Performance analysis, Asymptotic Notation - The Big-O, Omega and Theta notation, Programming Style, Refinement of Coding - Time-Space Trade Off, Testing, Data Abstraction

UNIT – II

6 Hours

Linear Data Structure: Array, Stack, Queue, Linked list and its types, Various Representations, Operations & Applications of Linear Data Structures

UNIT – III

6 Hours

Non-linear Data Structure Trees: Binary Tree, Threaded Binary Tree, Binary Search Tree, B & B+ Tree, AVL Tree, Splay Tree), Various Representations, Operations: search and traversal algorithms and complexity analysis Applications of Trees.

UNIT – IV

6 Hours

Non-linear Data Structure Graphs: Graphs: Directed and Undirected, Various Representations Operations: Search and traversal algorithms and complexity analysis Applications of Graphs.

UNIT – V

6 Hours

Searching and Sorting: Sequential Search, Binary Search, Breadth First Search, Depth First Search, Insertion Sort, Selection Sort, Shell Sort, Divide and Conquer Sort, Merge Sort, Quick Sort, Heap Sort, Introduction to Hashing

UNIT – VI

6 Hours

File: Organisation (Sequential, Direct, Indexed Sequential, Hashed) and various types of accessing schemes

List of Assignments:

Respective subject teacher shall design any six assignments on above units.

List of Laboratory Exercises:

1. Towers of Hanoi using user defined stacks.
2. Reading, writing, and addition of polynomials.
3. Trees with all operations.
4. All graph algorithms.
5. Saving / retrieving non-linear data structure in/from a file

List of Project Based Learning Topics:

1. Create an appropriate data structure for student data and result representation. Provide operations on these structures.
2. Develop a string reverser using stack. The stack operations called herein should be defined in file other than the reverser.
3. Develop a polynomial multiplier. The polynomials should be stored using linked lists.
4. Develop a phonebook using double linked list.
5. Demonstrate the bubble sort technique on doubly linked list.
6. Develop a two way threaded binary tree with its traversals.
7. Develop a customer database using direct access file which provides functions to read, write, modify, add and search records.
8. Write students information to a sequential file. Extract these records and construct a binary search tree out of these records. Use any parameter of the information for search/arranging criteria.
9. Develop a file merge application. It should have provision to create new files or add records to existing files. Any selected two or more files should be merged into a single new one.
10. Convert a graph representation using adjacency matrix to represent the same using adjacency list.

Textbooks:

1. Fundamentals of Data Structures, E. Horowitz and S. Sahni, 1977.
2. Data Structures and Algorithms, Alfred V. Aho, John E. Hopcroft, Jeffrey D. Ullman

Reference Books:

1. The Art of Computer Programming: Volume 1: Fundamental Algorithms, Donald E. Knuth
2. Introduction to Algorithms, Thomas, H. Cormen, Charles E. Leiserson, Ronald L. Rivest, Clifford Stein.
3. Open Data Structures: An Introduction (Open Paths to Enriched Learning)), 31st ed. Edition , Pat Morin

Syllabus for Unit Test:

Unit Test -1
Unit Test -2

UNIT – I, UNIT – II, UNIT - III
UNIT – IV, UNIT – V, UNIT - VI

Fundamentals of Economics

TEACHING SCHEME:

Lectures: 3 Hrs/Week

Tutorials: Nil

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

CREDITS ALLOTTED:

Theory: 3 Credits

Total : 3 Credits

Course Pre-Requisites:

Knowledge of Class XII level Mathematics

Course Objective:

1. To impart knowledge, with respect to concepts, principles of Economics, which govern the functioning of a firm/organization.
2. To explain the students about concept of production, cost, national income, an aggregate supply and aggregate demand consumption.

Course Outcomes:

After completing this course, students should be able to:

1. Demonstrate an understanding of the methods and principles of microeconomic and macroeconomic theory, including tradeoffs, opportunity costs, and marginal decision making.
2. Explain how markets work and how market prices are determined using principles of supply and demand.
3. Assess the impact of market failure such as externalities, and public goods and evaluate possible public policy remedies.
4. Analyze financial markets and investments, including the stock market, and their relation to the economy.
5. Evaluate key economic indicators (including GDP, unemployment, inflation) and their use in evaluating macroeconomic conditions.
6. Understand major macroeconomic tools, including fiscal and monetary policies, and their use in managing the economy. Also apply ethical principles in a variety of economic contexts.

UNIT – I

6 Hours

Microeconomics

Principles of Demand and Supply – Supply Curves of Firms – Elasticity of Supply Demand Curves of Households – Elasticity of Demand Equilibrium and Comparative Statics (Shift of a Curve and Movement along the Curve) Welfare Analysis – Consumers' and Producers' Surplus – Price Ceilings and Price Floors

UNIT –II

6 Hours

Consumer Behaviour – Axioms of Choice – Budget Constraints and Indifference Curves

Consumer's Equilibrium – Effects of a Price Change, Income and Substitution Effects – Derivation of a Demand Curve ,Applications – Tax and Subsidies – Intertemporal Consumption – Suppliers' Income Effect

UNIT – III

6 Hours

Theory of Production – Production Function and Iso-quants – Cost Minimization Cost Curves – Total, Average and Marginal Costs – Long Run and Short Run Costs ,Equilibrium of a Firm Under Perfect Competition Monopoly and Monopolistic Competition

UNIT – IV

6 Hours

Macroeconomics

National Income and its Components – GNP, NNP, GDP, NDP Consumption Function Investment Simple Keynesian Model of Income Determination and the Keynesian Multiplier Government Sector – Taxes and Subsidies External Sector – Exports and Imports

UNIT – V**6 Hours**

Money – Definitions ,Demand for Money – Transitional and Speculative Demand
Supply of Money – Bank’s Credit Creation Multiplier ,Integrating Money and Commodity Markets – IS, LM Model ,Business Cycles and Stabilization – Monetary and Fiscal Policy – Central Bank and the Government .

UNIT – VI**6 Hours**

The Classical Paradigm – Price and Wage Rigidities – Voluntary and Involuntary Unemployment.

List of Assignments: -

In the discussion topics mentioned above, students should be asked to prepare in advance in groups and present in class .

List of Project Based Learning Topics:

1. Types of markets (Monopoly, Monopolistic, Perfect Competition) and their real time examples in the economy.
2. Fiscal and Monetary Policy of India.
3. Concept of Price Ceilings and Price Floors and it's practical working in the economy.
4. Elasticity of Demand and it's types.
5. Elasticity of Supply and it's types.
6. Types of Costs in a Firm.
7. Money and it's demand
8. Understanding Credit Creation by banks using real time data from various banks.
9. Studying Unemployment and its types and the type of unemployment prevailing in India.

Textbooks:

1. Microeconomics- Pindyck, Robert S., and Daniel L. Rubinfeld Microeconomics
2. Macroeconomics- Dornbusch, Fischer and Startz

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Principles of Electronics Engineering

TEACHING SCHEME:

Lectures: 3 Hrs/Week

Tutorials: Nil

Lab: 2 Hrs/ Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term Work: 25 marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical :1 Credit

Total : 4 Credits

Course Pre-Requisites:

The students should have knowledge of Class XII level Electronics, Physics & Mathematics

Course Objective:

The course introduces fundamental concepts of electronics

Course Outcomes:

Students will be able to,

1. Identify semiconductor materials, draw band-diagrams and distinguish between intrinsic and extrinsic semiconductors.
2. Explain the phenomenon of rectification, draw the I-V characteristics and calculate ripple factor.
3. Explain the I-V characteristics of BJTs: Input and output, learn to bias transistors as an amplifier.
4. Describe FET and MOSFET and differentiate between BJT, FET and MOSFET.
5. Explain the fundamentals of feedback amplifiers, Oscillators and Operational Amplifier.
6. Demonstrate the knowledge of Boolean algebra including simplification techniques and operation of basic types of flip-flops.

UNIT – I

6 Hours

Semiconductors: Crystalline material: Mechanical properties, Energy band theory, Fermi levels; Conductors, Semiconductors & Insulators: electrical properties, band diagrams. Semiconductors: intrinsic & extrinsic, energy band diagram, P&N-type semiconductors, drift & diffusion carriers.

UNIT –II

6 Hours

Diodes and Diode Circuits: Formation of P-N junction, energy band diagram, built-in-potential, forward and reverse biased P-N junction, formation of depletion zone, V-I characteristics, Zener breakdown, Avalanche breakdown and its reverse characteristics; Junction capacitance and Varactor diode. Simple diode circuits, load line, linear piecewise model; Rectifier circuits: half wave, full wave, PIV, DC voltage and current, ripple factor, efficiency, idea of regulation.

UNIT – III

6 Hours

Bipolar Junction Transistors: Formation of PNP / NPN junctions, energy band diagram; transistor mechanism and principle of transistors, CE, CB, CC configuration, transistor characteristics: cut-off active and saturation mode, transistor action, injection efficiency, base transport factor and current amplification factors for CB and CE modes. Biasing and Bias stability: calculation of stability factor.

UNIT – IV

6 Hours

Field Effect Transistors: Concept of Field Effect Transistors (channel width modulation), Gate isolation types, JFET Structure and characteristics, MOSFET Structure and characteristics, depletion and enhancement type; CS, CG, CD configurations; CMOS: Basic Principles

UNIT – V

6 Hours

Feed Back Amplifier, Oscillators and Operational Amplifiers: Concept (Block diagram), properties, positive and negative feedback, loop gain, open loop gain, feedback factors; topologies of feedback amplifier; effect of feedback on gain, output impedance, input impedance, sensitivities (qualitative), bandwidth stability;

effect of positive feedback: instability and oscillation, condition of oscillation, Barkhausen criteria. Introduction to integrated circuits, operational amplifier and its terminal properties; Application of operational amplifier; inverting and non-inverting mode of operation, Adders, Subtractors, Constant-gain multiplier, Voltage follower, Comparator, Integrator, Differentiator.

UNIT – VI

6 Hours

Digital Electronics Fundamentals: Difference between analog and digital signals, Logic ICs, half and full adder/subtractor, multiplexers, demultiplexers, flip-flops, shift registers, counters.

List of Assignments: -

1. Describe applications of diodes as Clippers and Clampers.
2. Describe application of Zener diode as Voltage regulator.
3. Study of characteristic curves for CB configuration of BJT using Virtual Lab.
4. Simulation of BJT amplifier using Virtual Lab.
5. Design and Implementation of Various Arithmetic Circuits using Virtual Lab.
6. To design, built and test any electronic circuit (Group activity)/ Presentation on any Electronic circuit application.

List of Laboratory Exercises:

1. To plot V-I characteristics of PN junction diode.
2. To plot regulation characteristics of half wave rectifier
3. To plot regulation characteristics of Full wave rectifier
4. To plot input-output characteristics of CE configuration of BJT.
5. To study Biasing techniques of BJT- to find stability factor of self bias, collector to base bias, fixed bias circuits.
6. To plot frequency response of single stage FET amplifier (CS/CD configuration) and find its bandwidth.
7. To study Colpitts Oscillator.
8. Study of OP-AMP circuits: Inverting and Non-inverting Amplifier.
9. Implementation and verification of DeMorgan's theorem .
- 10 Implementation and verification of half adder and full adder.

List of Project Based Learning Topics:

1. Water Level Indicator.
2. LED Emergency Light.
3. Security control System
4. AC to DC converter.
5. Automatic Street Light controller
6. Rain Alarm system.
7. Flashing LED
8. Dancing Light
9. Voltage regulator using Zener diode.
10. Amplifier using Op-Amp.
11. JFET as an analog switch.
12. BJTs as a digital switch.
13. Sine wave generator
14. Adder/ Subtractor circuit

15. Up/Down counter

Textbooks:

1. Microelectronics Circuits, Adel S. Sedra and Kenneth Carless Smith, Oxford University Press.
2. Millman's Integrated Electronics, Jacob Millman, Christos Halkias, Chetan Parikh, McGraw Hill Education.
3. Digital Logic & Computer Design, M. Morris Mano, Pearson

Reference Books:

1. Electronic Devices and Circuit Theory, Robert L. Boylestad, Louis Nashelsky.
2. Solid State Electronic Devices, 6th Edition, Ben Streetman, Sanjay Banerjee
3. Electronic Principle, Albert Paul Malvino.
4. Electronics Circuits: Discrete & Integrated, D Schilling C Belove T Apelewicz R Saccardi.
5. Microelectronics, Jacob Millman, Arvin Grabel.
6. Electronics Devices & Circuits, S. Salivahanan, N. Suresh Kumar, A. Vallavaraj
7. Electronic Devices & Circuit Theory, 11th Edition, Robert L. Boylestad, Louis Nashelsky

Business Communication & Value Science – II

TEACHING SCHEME:

Lectures: 03 Hrs/Week

Lab: 04 Hrs/ Week

EXAMINATION SCHEME:

Semester Examination: 50 marks

Internal Assessment: Yes

Term work & Oral:50 marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical:2 Credits

Total : 5 Credits

Course Prerequisites: -

Basic knowledge of the parts of speech in English.

Vocabulary covered in the previous semester along with basic knowledge of verbs & adverbs.

Basic awareness of the need of speaking skills within social circle.

The elements of team dynamics done during the previous semester with proper application and basic awareness of the concepts of feedback, criticism.

The various common conflicts that may arise at varied situations

Course Objective:-

The course objective of Business Communication & Value Science-I aims to augment student's overall communication and interpersonal skills by engaging them in group activities and thus aid in helping them to emerge as professionals. The soft skills topics for this semester are intended to develop student's expertise on public speaking skills and to deal positively with criticism and to effectively present their personalities

Course Outcomes: -

Graduates will able to:

1. To understand the concept of soft skills, Business Values and its implication at workplace
2. To construct the error free sentences of English language and develop proper reading Skills for Oral and written business communication
3. To develop team building and leadership skills by applying motivational factors
4. To construct effective business presentation and do effective implementation of it through activities
5. To inculcate appropriate business ethics and etiquettes for effective professionalism
6. To understand the concept of Diversity and Inclusion and its application at workplace

Unit I Importance of Soft skills and Values Sciences:

6 Hours

Soft skills, meaning, need and importance, difference between soft skills and hard skills, life skills and personal skills, applying soft skills across culture values of a good manager, Respect for Individual and Integrity. Importance of Ethics and Values in Business World.

Unit II Enhancing Writing and Reading Skills:

6 Hours

Good and Bad Writing. Common errors, punctuation rules, use of words Formation of an E-magazine, Blog writing, writing notice, agenda and Minutes of meeting, Introduction to skimming and scanning Techniques of Good Reading, Bad reading Habits [

Unit III Developing interpersonal skills:

6 Hours

Team Building Skills, Team dynamics, Types of teams Classification of teams, Bruce Tuckman's Team Building Model, Challenges and Remedies of Team Development Belbin's 8 Team Roles and Lindgren's Big 5 personality traits. Belbin's 8 team player styles Leadership Skills: Good Leadership Skills, Difference between Leadership and Management Defining Qualities and Strengths of leadership

Unit IV Public Speaking and Presentation Skills:**6 Hours**

Public Speaking: fundamentals of effective public speaking, types- Extempore speech, manuscript speech, and ways to enhance public speaking skills, storytelling, oral review Power Point presentations, Effective ways to structure the presentation, importance of body language Group discussion, interview skills

Unit V Corporate / Business Etiquettes:**6 Hours**

Corporate grooming & dressing, etiquettes in social & office Setting-Understand the importance of professional behaviour at the workplace, Understand and Implement etiquettes in workplace, presenting oneself with finesse and making others comfortable in a business setting. Importance of first impression, Grooming

Unit VI Diversity and Inclusion:**6 Hours**

Concepts, Advantages and Disadvantages, Different forms of Diversity in our society. Socio-Cultural and Cross-Cultural Sensitivities at the Workplace: PWD and LGBT at the workplace, Learning disabilities at the workplace; Caste, class, regionalism, religion and poverty: the different identities of Indian employees and employers and how to include everyone; Global diversity identities of race, religion, nationhood; Appropriate Social Media Use

List of Laboratory Exercises:

- 1) Join Hands Movement'. Individual identification of social Issues
- 2) SATORI – Participants share the personal take away acquired from GD, writing and reading skills activities captured in their handbook
- 3) Form an NGO. Create Vision, Mission, Value statement, tagline and Design a logo.
- 4) Plan and design an E Magazine.
- 5) Lucid Writing, Catherine Morris and Joanie McMahon's writing techniques.
- 6) Speed Reading session: Introduction to skimming and scanning; practice the same.
- 7) Design a skit- a) write the script articulating the message of their respective NGOs. Read out the script. (Skit time-5 minutes).
- 8) Promote the play through a social media and gather your audience. Enact the play. Capture the numbers of likes and reviews
- 9) Team Falcon Practical to identify individual personality traits with Belbin's 8 team player styles
- 10) Ten minutes of your time – a short film on diversity. Play the video, Discuss the concept of empathy
- 11) Touch the target (Blind man) - Debriefing of the Practical. Film: "The fish and I" by Babak Habibifar"
- 12) To create a story – 10 minutes of a person's life affected by the social issue groups
- 13) Research on a book, incident or film based on the topic of your respective NGO and Discuss
- 14) Interviews of people from diverse groups (Ask 5 questions). Share the recordings in FB
- 15) Prepared speech- Every student will narrate the challenges faced by a member of a diverse group in 4 minutes (speech in first person)
- 16) Discussion on TCS values, Respect for Individual and Integrity.

Project:	01	Form an NGO with a social cause in a group and make an awareness among people by doing different activities
-----------------	----	---

List of Project Based Learning Topics:

1. Analysing difference between Soft Skills and Hard skills
2. Preparing a model for evaluating Values and Ethics of Good Managers
3. Developing Reading and writing Skills: Preparing a model on each skill
4. Form a model for communicative writing which avoid grammar mistakes and common errors
5. Develop Bruce Tuchman's Team Building Models with classmates/Teammates
6. Analysing difference between Leadership and Management skills
7. Watch and Listen the best videos of Good Public Speaker s and List out their Qualities and Attributes
8. Knowing body language and Paralinguistic Features for the Presentation: Making a video of professional presentation

9. Visit one nearest origination/Firm and find out what etiquettes and mannerism are being used there that enhance the capacity of their work place
10. Preparing a model of dress codes and attire for different professional situations
11. Analysing the majors aspects of diversity and inclusion in the workplace
12. Creating a good model for increasing diversity and enhancing the proper inclusion that will help in achieve the goal of the origination effectively
13. Analysing markers of global identities for inclusive work culture

B. TECH (Computer Science & Business Systems)

SEMESTER – III

COURSE SYLLABUS

Formal Language & Automata Theory

TEACHING SCHEME:

Lectures: 3Hrs./Week

Tutorials: 1Hr./Week

Lab: Nil

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term Work: Nil

CREDITS ALLOTTED:

Theory: 3 Credits

Tutorial: 1 Credit

Total : 4 Credits

Course Pre-Requisites:

The students should have basic Knowledge Set algebra, elementary formal logic, constructing proofs, recurrence relations, Discrete Structures and Data structures and problem solving.

Course Objective:

1. To understand problem classification and problem solving by machines.
2. To understand the basics of automata theory and its operations.
3. To study computing machines by describing, classifying and comparing different types of computational models.
4. Encourage students to study theory of computability and complexity.
5. To understand the P and NP class problems and its classification.
6. To understand the fundamentals of problem decidability and reducibility.

Course Outcomes:

- 1) To construct finite state machines to solve problems in computing.
- 2) To write mathematical expressions for the formal languages.
- 3) To understand context free and context sensitive languages.
- 4) To construct Turing Machine for formal languages.
- 5) To express the understanding of the decidability and undecidability problems.
- 6) To identify NP Hard and complete problems.

UNIT – I

6 Hours

Introduction: Alphabet, Strings and languages, Graphs, Directed Graphs, Trees, FSM.

UNIT – II

6 Hours

Regular languages and finite automata: Regular expressions and languages, deterministic finite automata (DFA) and equivalence with regular expressions, nondeterministic finite automata (NFA) and equivalence with DFA, regular grammars and equivalence with finite automata, properties of regular languages, *Keene's theorem*, pumping lemma for regular languages, Myhill-Nerode theorem and its uses, minimization of finite automata.

UNIT – III

6 Hours

Context-free languages and pushdown automata: Productions and Derivation, Context-free grammars (CFG) and languages (CFL), Chomsky hierarchy of languages, Chomsky Normal Forms and Greibach normal forms, nondeterministic pushdown automata (PDA) and equivalence with CFG, parse trees, ambiguity in CFG, pumping lemma for context-free languages, deterministic pushdown automata, closure properties of CFLs.

Context-sensitive languages: Context-sensitive grammars (CSG) and languages, linear bounded automata and equivalence with CSG.

UNIT – IV

6 Hours

Turing machines: The basic model for Turing machines (TM), Turing recognizable (recursively enumerable) and Turing-decidable (recursive) languages and their closure properties, variants of Turing machines, nondeterministic TMs and equivalence with deterministic TMs, unrestricted grammars and equivalence with Turing machines, TMs as enumerators.

UNIT – V**6 Hours**

Undecidability: Church-Turing thesis, universal Turing machine, the universal and diagonalization languages, reduction between languages and Rice's theorem, undecidable problems about languages.

UNIT – VI**6 Hours**

Basic Introduction to Complexity: Introductory ideas on Time complexity of deterministic and nondeterministic Turing machines, P and NP, NP-completeness, Cook's Theorem, other NP-Complete problems.

List of Assignments:

YACC, the parser-generating tool (Chapter 5 of Introduction to Automata Theory, Languages, and Computation (John E. Hopcroft, Rajeev Motwani and Jeffrey D. Ullman.)

List of Project Based Learning Topics:

1. Design a FA for Vending Machine
2. Explain Pigeon hole Principle
3. Implement Push Down Automata
4. Implement Regular Expression
5. Implement lexical Analyzer
6. Implement Turing Machine for Mathematical Expression
7. Design an application to search a string from given text using FA
8. Implement a FSM for residing mod 3.
9. Provide solutions for Missionaries and Cannibals problems.

Textbooks:

1. Introduction to Automata Theory, Languages, and Computation John E. Hopcroft, Rajeev Motwani and Jeffrey D. Ullman. Pearson Publication.

Reference Books:

1. Elements of the Theory of Computation, Harry R. Lewis and Christos H. Papadimitriou.
2. Automata and Computability, Dexter C. Kozen.
3. Introduction to the Theory of Computation, Michael Sipser.
4. Introduction to Languages and the Theory of Computation, John Martin.
5. Computers and Intractability: A Guide to the Theory of NP Completeness, M. R. Garey and D. S. Johnson.

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Computer Organization & Architecture

TEACHING SCHEME:

Theory: 03 Hours / Week
Practical: 02 Hours / Week

EXAMINATION SCHEME:

End Semester Examination: 60 Marks
Internal Assessment: 40 Marks
Term Work: 25 Marks

CREDITS

ALLOTTED:

Theory: 3 Credits
Practical :1 Credit
Total : 4 Credits

Course Pre-Requisites:

The students should have basic Knowledge Digital electronics and computer system

Course Objective:

To understand the design of the various functional units of computer system.

Course Outcomes:

After completion of this course students will be able to

1. Explain the architecture and functions of Central Processing Unit.
2. Solve fixed point and floating-point arithmetic problems using algorithms
3. List the design approaches and functional requirements for implementing control unit.
4. Analyze the characteristics of memory system.
5. Describe the I/O organization and interconnections.
6. Infer parallel processing and multiprocessor configuration.

UNIT – I

6 Hours

Revision of basics in Boolean logic and Combinational/Sequential Circuits.

Functional blocks of a computer: CPU, memory, input-output subsystems, control unit.

Introduction to x86 architecture

Instruction set architecture of a CPU: Registers, instruction execution cycle, RTL interpretation of instructions, addressing modes, instruction set. Outlining instruction sets of some common CPUs.

UNIT – II

6 Hours

Data representation: Signed number representation, fixed and floating-point representations, character representation.

Computer arithmetic: Integer addition and subtraction, ripple carry adder, carry look-ahead adder, etc. multiplication – shift-and-add, Booth multiplier, carry save multiplier, etc. Division restoring and non-restoring techniques, floating point arithmetic, IEEE 754 format.

UNIT – III

6 Hours

CPU control unit design: Hardwired and micro-programmed design approaches, design of a simple hypothetical CPU.

UNIT – IV

6 Hours

Memory system design: Semiconductor memory technologies, memory organization.

Memory organization: Memory interleaving, concept of hierarchical memory organization, cache memory, cache size vs. block size, mapping functions, replacement algorithms, write policies.

UNIT – V

6 Hours

Peripheral devices and their characteristics: Input-output subsystems, I/O device interface, I/O transfers – program controlled, interrupt driven and DMA, privileged and non-privileged instructions, software interrupts and exceptions. Programs and processes – role of interrupts in process state transitions, I/O device interfaces – SCSI, USB

UNIT – VI

6 Hours

Pipelining: Basic concepts of pipelining, throughput and speedup, pipeline hazards.

Parallel Processors: Introduction to parallel processors, Concurrent access to memory and cache coherency.

List of Assignments:

Assignments covering the following topics should be given

1. Booth's algorithm for multiplication
2. Restoring and non-restoring division
3. Fixed point and floating-point representation
4. Programmer's model of 80386
5. Hardwired and micro-programmed design approaches.
6. Characteristics of Memory system
7. Cache organization and address mapping
8. Virtual memory and replacement algorithms
9. Calculating throughput and speed in pipelining
10. Multiprocessor architecture

List of Laboratory Exercises:

1. Circuits on breadboard or simulators

(a) Implementation of Combinational Digital/Boolean Circuits: Adder, Subtractor, Multiplication Module, Division Module, Multiplexer, Demultiplexer, Encoder, Decoder.

(b) Implementation of Sequential Circuits: Counters, Linear Feedback Shift Registers (LFSR)

2. C/C++ programming to understand the formats of char, int, float, double, long etc.
3. Machine language programming on x86 or higher version kits or simulators

List of Project Based Learning Topics:

1. Automatic night lamp with morning alarm
2. Traffic light with sensor + 7segment
3. Multi pattern running lights.
4. .Washing machine
5. Simple Lock Using Keypad and 7 segment
6. Electronic quiz table
7. Electronic Digital Clock
8. .temperature controller
9. Plant Irrigation System
10. Car Parking Management
11. Customer counter for supermarket
12. Electronic queue management system in food stall
13. Safety box
14. Shop lot automatic door with 7segment display
15. Bank queue management system
16. Water level controller
17. Automatic home system
18. Commuter system
19. Automatic room light control
20. Elevator control system

Textbooks:

1. Computer System Architecture M. M. Mano: 3rd ed., Prentice Hall of India, New Delhi, 1993.
2. Computer Organization and Design: The Hardware/Software Interface, David A. Patterson and John L. Hennessy.
3. Computer Organization and Embedded Systems, Carl Hamacher.

Reference Books:

1. Computer Architecture and Organization, John P. Hayes.
2. Computer Organization and Architecture: Designing for Performance, William Stallings

Syllabus for Unit Test:

Unit Test -1
Unit Test -2

UNIT – I, UNIT – II, UNIT - III
UNIT – IV, UNIT – V, UNIT - VI

Object Oriented Programming

TEACHING SCHEME:

Lectures: 3Hrs./Week

Practical: 2Hrs/Week

EXAMINATION SCHEME:

Semester Examination: 60 Marks

Internal Assessment: 40 Marks

Term work & Practical: 50 Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical :1 Credit

Total : 4 Credits

Course Pre-Requisites:

The students should have basic Knowledge of “C” programming language.

Course Objective:

The course introduces fundamental concepts of Object-oriented programming.

Course Outcomes:

At the end of this course students will able to:

1. Understand basic concepts of Procedural programming and, the overview of C programming language
2. Understand some basic difference between C and C++.
3. Understand basic concepts of Object Oriented Programming, classes and objects in OOP.
4. Apply the concept of Access Specifier, friend function, constructor, destructor and Error Handling using C++ programs
5. Implement the concept of polymorphism, virtual functions and inheritance using C++
6. Develop OOP applications using Templates and file Handling.

UNIT – I

6 Hours

Procedural programming, An Overview of C: Types Operator and Expressions, Scope and Lifetime, Constants, Pointers, Arrays, and References, Control Flow, Functions and Program Structure, Namespaces, error handling, Input and Output (C-way), Library Functions (string, math, stdlib), Command line arguments, Pre-processor directive

UNIT – II

6 Hours

Some difference between C and C++: Single line comments, Local variable declaration within function scope, function declaration, function overloading, stronger type checking, Reference variable, parameter passing – value vs reference, passing pointer by value or reference, #define constant vs const, Operator new and delete, the typecasting operator, Inline Functions in contrast to macro, default arguments

UNIT – III

6 Hours

The Fundamentals of Object Oriented Programming: Necessity for OOP, Data Hiding, Data Abstraction, Encapsulation, Procedural Abstraction, Class and Object.

UNIT – IV

6 Hours

More extensions to C in C++ to provide OOP Facilities: Scope of Class and Scope Resolution Operator, Member Function of a Class, private, protected and public Access Specifier, this Keyword, Constructors and Destructors, friend class, error handling (exception)

UNIT – V

6 Hours

Essentials of Object Oriented Programming: overloading, Inheritance – Single and Multiple, Class Hierarchy, Pointers to Objects, Assignment of an Object to another Object, Polymorphism through dynamic binding, Virtual Functions, Overloading, overriding and hiding, Error Handling.

UNIT – VI

6 Hours

Generic Programming: Template concept, class template, function template, template specialization

Input and Output: Streams, Files, Library functions, formatted output

Object Oriented Design and Modelling: UML concept, Use case for requirement capturing, Class diagram, Activity diagram and Sequence Diagram for design, Corresponding C++ code from design

List of Assignments:

1. Define Procedural Oriented Programming. Explain basic concepts of procedural oriented programming.
2. Differentiate between C and C++ in detail with suitable example.
3. Explain basic concepts of Object-Oriented Programming in detail with suitable example.
4. Write short note on:
 - i) Scope Resolution Operator
 - ii) Access Specifiers
5. Explain Virtual Function and Function Overloading in detail with Example.
6. Explain Concepts of Object-Oriented Design and Modelling.

List of Laboratory Exercises:

1. Parameter passing: passing parameter by value vs by reference, passing array as constant pointer
2. Function overloading: writing string operations like strcat and strncat, strcpy and strncpy as overloaded functions.
3. Dynamically allocating space for a pointer depending on input and doing this repeatedly, depending on different inputs and finally de-allocating the pointer.
4. Define class complex with all possible operations: constructor, destructor, copy constructor, assignment operator with the data members stored as pointer to integers.
5. Define class vector of integers with all possible operations like constructor, destructor, copy constructor and assignment operators
6. Define class matrix of integers with all possible operations like constructor, destructor, copy constructor and assignment operators
7. Define class matrix of integers using vector, with all possible operations like constructor, destructor, copy constructor and assignment operators
8. Define class stack, queue, linked-list, array, set using some data-type (int) with data members kept as private and functions kept in both protected and public sections.
9. Define class complex with all possible operators: constructor, destructor, copy constructor, assignment operator and operators >, <, >=, <=, ==, ++ (pre and post), +, +=, (), with the data members stored as pointer to integers.
10. Define class vector of integers with all possible operations like constructor, destructor, copy constructor and assignment operators >, <, >=, <=, ==, ++ (pre and post), +, +=, ()
11. Define class matrix of integers with all possible operations like constructor, destructor, copy constructor and assignment operators >, <, >=, <=, ==, ++ (pre and post), +, +=, ()
12. Define class matrix of integers using vector, with all possible operations like constructor, destructor, copy constructor and assignment operators >, <, >=, <=, ==, ++ (pre and post), +, +=, ()
13. Define stack and queue inherited from array class, with standard functions and operators
14. Define a class called 'array' with data type passed as template type with constructor, destructor, copy constructor and assignment operators and index operator.
15. Define template functions for compare and use it in the algorithms like bubble sort, insertion sort, merge sort.
16. Formatted input-output examples
17. Input manipulators
18. Overriding operators <<, >>
19. Define class model for complex number, student class, book class and show it using UML diagram as well as concrete class.
20. Show behavioural modelling through sequence diagram and activity diagram for workflow in a typical log-in, log-out situation.

List of Project Based Learning Topics:

1. Employee Management System.
2. Trading Software.
3. Billing System.
4. Intuitive Gadgets.
5. Traffic Management System
6. Security Systems.
7. Car Rental System.
8. Login and Registration System.
9. Bookshop inventory system.
10. Student Report Management System.
11. Calendar application.

Text Books:

1. The C++ Programming Language, Bjarne Stroustrup.
2. C++ and Object-Oriented Programming Paradigm, Debasish Jana

Reference Books:

1. Programming – Principles and Practice Using C++, Bjarne Stroustrup.
2. The Design and Evolution of C++, Bjarne Stroustrup.

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Computational Statistics

TEACHING SCHEME:

Theory: 03 Hours / Week

Practical: 04 Hours / Week

EXAMINATION SCHEME:

End Semester Examination: 60 Marks

Internal Assessment: 40 Marks

Term work & Practical -50 Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical :2 Credits

Total : 5 Credits

Course Pre-requisites: The Students should have knowledge of basics of statistics.

Course Objectives:

The aim of this course is to give graduate students knowledge of statistical concepts like factor analysis, regression analysis and Python programming. The course objective is to exercise students for data set handling, data wrangling, data visualization etc. using Python.

Course Outcomes:

1. Understand basics of normal distribution and linear regression model.
2. Apply knowledge of multivariate regression and discriminant analysis.
3. Outline component analysis and factor analysis.
4. Design various clusters.
5. Understand and demonstrate fundamentals of Python programming.
6. Demonstrate visualization in Python.

UNIT – I

6 Hours

Python Concepts, Data Structures, Classes: Interpreter, Program Execution, Statements, Expressions, Flow Controls, Functions, Numeric Types, Sequences and Class Definition, Constructors, Text & Binary Files - Reading and Writing.

Data Wrangling: Combining and Merging Datasets, Reshaping and Pivoting, Data Transformation, String Manipulation, Regular Expressions

UNIT – II 6 Hours

Data Aggregation, Group Operations, Time series: GroupBy Mechanics, Data Aggregation, Groupwise Operations and Transformations, Pivot Tables and Cross Tabulations, Time Series Basics, Data Ranges, Frequencies and Shifting.

UNIT – III

6 Hours

Multivariate Normal Distribution: Multivariate Normal Distribution Functions, Conditional Distribution and its relation to regression model, Estimation of parameters.

Multiple Linear Regression Model: Standard multiple regression models with emphasis on detection of collinearity, outliers, non-normality and autocorrelation, Validation of model assumptions.

UNIT – IV

6 Hours

Multivariate Regression: Assumptions of Multivariate Regression Models, Parameter estimation, Multivariate Analysis of variance and covariance.

Discriminant Analysis: Statistical background, linear discriminant function analysis, Estimating linear discriminant functions and their properties.

UNIT - V

6 Hours

Principal Component Analysis: Principal components, Algorithm for conducting principal component analysis, deciding on how many principal components to retain, H-plot.

Factor Analysis: Factor analysis model, Extracting common factors, determining number of factors, Transformation of factor analysis solutions, Factor scores.

UNIT – VI

6 Hours

Clustering and Segmentation Analysis: Introduction, Types of clustering, Correlations and distances, clustering by partitioning methods, hierarchical clustering, overlapping clustering, K-Means Clustering- Profiling and Interpreting Clusters.

List of Assignments:

Respective subject teacher shall design any six assignments on above units.

List of Laboratory Exercises:

1. Introduction to python programming (String operation, Mathematical operation, loops, branching).
2. Implementation of classes and constructor in Python.
3. Implementation of basic data structures in Python.
4. File Handling in the Python.
5. Introduction to data set handling in Python.
6. Implement various pre-defined libraries in Python like Panda, NumPy, Cbor (Drawing of statistical graph).
7. Implementation of Multivariate Normal Distribution.
8. Implementation of Multiple Linear Regression Model
9. Implementation of Multivariate Regression
10. Implementation of Discriminant Analysis
11. Implementation of clustering and segmentation
12. Implementation of data wrangling, data aggregation, group operations and time series operations.
13. Data Visualization in Python.

Textbooks:

1. An Introduction to Multivariate Statistical Analysis, T.W. Anderson.
2. Applied Multivariate Data Analysis, Vol I & II, J.D. Jobson.
3. Statistical Tests for Multivariate Analysis, H. Kris.
4. Programming Python, Mark Lutz.
5. Python 3 for Absolute Beginners, Tim Hall and J-P Stacey.
6. Beginning Python: From Novice to Professional, Magnus Lie Hetland. Edition, 2005.

List of Project Based Learning Topics:

1. Design and development of Student management system using object oriented approach and file structure.
2. Development of student performance analysis system (Use of file, OO Python and regression model, Graphical dash board).
3. Development of multivariate predictive model for rain forecasting (use rainfall data for last 50 years).
4. Development of multivariate predictive model for gold rate. (Use daily gold rate data for last 10 years).
5. Development of multivariate predictive model for patrol rate. (Use daily patrol rate data for last 10 years).
6. Comparative analysis of predictions of single multivariate predictive model against multiple linear predictive models.
7. Comparative analysis of dimensionality reduction performance using principle component analysis (PCA) and linear discriminant analysis (LDA).
8. Comparative analysis of classification performance of principle component analysis (PCA) and linear discriminant analysis (LDA) techniques.
9. Study of effectiveness of analysis of variance (ANOVA) and analysis of covariance (ANCOVA) for predictive analysis.
10. Comparing operating differences of various clustering Techniques.
11. Comparative analysis of performance for parameter (variable/factors) selection using principle component analysis (PCA) and factor analysis (FA) for multivariate analysis.

Reference Books:

1. Regression Diagnostics , Identifying Influential Data and Sources of Collinearity, D.A. Belsey, E. Kuh and R.E. Welsh
2. Applied Linear Regression Models, J. Neter, W. Wasserman and M.H. Kutner.
3. The Foundations of Factor Analysis, A.S. Mulaik.
4. Introduction to Linear Regression Analysis, D.C. Montgomery and E.A. Peck.
5. Cluster Analysis for Applications, M.R. Anderberg.
6. Multivariate Statistical Analysis, D.F. Morrison.
7. Python for Data Analysis, Wes Mc Kinney.

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Software Engineering

TEACHING SCHEME:

Lectures: 4Hrs./Week
Lab: 2Hrs./Week

EXAMINATION SCHEME:

Semester Examination: 60 Marks
Internal Assessment: 40 Marks
Term work & Practical: 25 Marks

CREDITS ALLOTTED:

Theory: 4 Credits
Practical: 1 Credit
Total : 5 Credits

Course Pre-Requisites:

The students should have sound knowledge of data structures, programming experience and an extensive hands-on experience of using software.

Course Objective:

The course introduces key aspects of software engineering processes for the development of a complex software system.

Course Outcomes:

1. Learn importance of software engineering process and its principles
2. Understand the software development life cycle with appropriate models
3. Understand software quality concepts
4. Document user requirements using suitable techniques
5. Analyze the software design from and Object-Oriented perspective.
6. Apply appropriate testing techniques on a software

UNIT – I

8 Hours

Introduction: Programming in the small vs. programming in the large; software project failures and importance of software quality and timely availability; engineering approach to software development; role of software engineering towards successful execution of large software projects; emergence of software engineering as a discipline.

UNIT – II

8 Hours

Software Project Management: Basic concepts of life cycle models – different models and milestones; software project planning – identification of activities and resources; concepts of feasibility study; techniques for estimation of schedule and effort; software cost estimation models and concepts of software engineering economics; techniques of software project control and reporting; introduction to measurement of software size; introduction to the concepts of risk and its mitigation; configuration management.

UNIT – III

8 Hours

Software Quality and Reliability: Internal and external qualities; process and product quality; principles to achieve software quality; introduction to different software quality models like McCall, Boehm, FURPS / FURPS+, Dromey, ISO – 9126; introduction to Capability Maturity Models (CMM and CMMI); introduction to software reliability, reliability models and estimation.

UNIT – IV

8 Hours

Software Requirements Analysis, Design and Construction: Introduction to Software Requirements Specifications (SRS) and requirement elicitation techniques; techniques for requirement modeling – decision tables, event tables, state transition tables, Petri nets; requirements documentation through use cases; introduction to UML, introduction to software metrics and metrics-based control methods; measures of code and design quality.

UNIT – V

8 Hours

Object Oriented Analysis, Design and Construction: Concepts -- the principles of abstraction, modularity, specification, encapsulation and information hiding; concepts of abstract data type; Class Responsibility Collaborator (CRC) model; quality of design; design measurements; concepts of design patterns; Refactoring; object oriented construction principles; object oriented metrics.

UNIT – VI

8 Hours

Software Testing: Introduction to faults and failures; basic testing concepts; concepts of verification and validation; black box and white box tests; white box test coverage – code coverage, condition coverage, branch coverage; basic concepts of black-box tests – equivalence classes, boundary value tests, usage of state tables; testing use cases; transaction-based testing; testing for non-functional requirements – volume, performance and efficiency; concepts of inspection.

List of Assignments:

Teaching faculty will design home assignment on following topics

1. Software development Models
2. Software Requirement Specification
3. Data Flow Diagrams
4. Testing
5. Object Oriented Analysis, Design and Construction
6. Software project covering various software development methodology techniques will be implemented.

List of Laboratory Exercises:

1. Develop Flow-Charts for (any open-ended problem statement) to understand basic problem solving technique using suitable tool.
2. Perform domain analysis for given problem.
3. Develop requirements specification document as per IEEE format for a given problem
4. Develop DFD model (level-0, level-1 DFD and Data dictionary) of the project under consideration.
5. Perform Structured design for the developed DFD model.
6. Calculate Cyclomatic complexity for given code snippet.
7. Identify the usage of regression testing.
8. Identify the different types of performance testing

List of Project Based Learning Topics:

1. Fingerprint voting system
2. Weather forecasting system
3. Android local train ticketing system
4. Railway tracking and arrival time prediction system
5. Android Patient Tracker
6. Opinion mining for social networking platforms
7. Automated payroll system with GPS tracking and image capture
8. Data leakage detection system
9. Credit card fraud detection
10. AI shopping system
11. Camera motion sensor system
12. Bug tracker
13. e-Learning platform
14. Smart health prediction system
15. Software piracy protection system

Text Books:

1. Software Engineering, Ian Sommerville
2. Object Oriented Software Engineering: A Use Case Driven Approach --Ivar Jacobson

Reference Books:

1. Fundamentals of Software Engineering, Carlo Ghezzi, Jazayeri Mehdi, Mandrioli Dino

2. Software Requirements and Specification: A Lexicon of Practice, Principles and Prejudices, Michael Jackson
3. The Unified Development Process, Ivar Jacobson, Grady Booch, James Rumbaugh
4. Design Patterns: Elements of Object-Oriented Reusable Software, Erich Gamma, Richard Helm, Ralph Johnson, John Vlissides
5. Software Metrics: A Rigorous and Practical Approach, Norman E Fenton, Shari Lawrence Pfleeger
6. Software Engineering: Theory and Practice, Shari Lawrence Pfleeger and Joanne M. Atlee
7. Object-Oriented Software Construction, Bertrand Meyer
8. Object Oriented Software Engineering: A Use Case Driven Approach --Ivar Jacobson
9. Touch of Class: Learning to Program Well with Objects and Contracts --Bertrand Meyer
10. UML Distilled: A Brief Guide to the Standard Object Modeling Language --Martin Fowler

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Business Communication & Value Science-III

TEACHING SCHEME:

Lectures: 2 Hr./Week

Lab: 4 Hrs./Week

EXAMINATION SCHEME:

Semester Examination: 50 Marks

Internal Assessment: Yes

Term work & Oral: 50Marks

CREDITS ALLOTTED:

Theory: 2 Credits

Practical: 2 Credits

Total : 4 Credits

Course Prerequisites: -

Good knowledge of Business Communication and Value Science (Covered Semester I and II) Basic Knowledge of English (verbal and written) Completion of all units from Semesters I and II

Course Objective

The course objective of **Business Communication & Value Science-III** aims to develop technical writing skills; introduce students to Self-analysis techniques like SWOT & TOWS and develop the sense of Pluralism in cultural spaces, Cross-cultural communication, Science of Nation building

Course Outcomes: -

Graduates will able to:

1. Apply & analyze the basic principles of SWOT & life positions.
2. Understand, analyse & leverage the power of motivation in real life Identify & respect pluralism in cultural spaces.
3. Understand and apply the concepts of Global, glocal and trans-locational & analyse cross cultural communication
4. Apply the science of Nation building, the diverse culture of India
5. Identify & analyze the common mistakes made in cross-cultural communication, tools of technical writing,
6. Recognize the roles and relations of different genders. Understand Artificial intelligence & recognize its impact in daily life

Unit I SWOT and Life Positions:

4 Hours

Summarize the basic principles of SWOT and Life Positions; apply SWOT in real life scenarios. TOWS analysis, research on TOWS and find out how you can turn your threat into opportunity

Unit II VUCA World & Motivation:

4 Hours

Research through SWOT and TOWS on what are the strengths they have identified to survive in the VUCA World, Motivation: its role and application in real life.

Unit III Pluralism in cultural spaces:

4 Hours

Identify pluralism in cultural spaces, Respect pluralism in cultural spaces, Differentiate between the different cultures of India.

Unit IV Cross cultural communication

4 Hours

Define the terms global, glocal and translocational, differentiate between global, glocal and translocational culture, implications of cross-cultural communication, common mistakes made in cross-cultural communication, roles and relations of different genders.

Unit V Technical Communication

4 Hours

Role of science in nation building, tools and best practices of technical writing, technical writing in real-life scenarios.

Unit VI Role of technical writing in science and technology

4 Hours

AI (artificial intelligence), the importance of AI, Designing College in the year 2090 with help of technical writing and technology, role of technical writing in science and technology, IOT

List of Laboratory Exercises:

- 01 SWOT and Life Positions Meet Dananjaya Hettiarachchi:
<https://www.youtube.com/watch?v=bbz2boNSeL0&t=24s>
- 02 SWOT Vs. TOWS: The Balancing Act <https://www.youtube.com/watch?v=RHR04t86phA>
- 03 Presentation on what are the strengths they have identified to survive in the VUCA World.
- 04 Maslow's Theory: Present their findings and approaches as groups. They need to explain the idea of motivation with the help of examples
- 05 Cultural diversity: Awareness and respect for pluralism in cultural spaces
- 06 Pluralism through the representation of Indian rivers
- 07 Global, glocal, translocational
- 08 Group discussion on the implications of cross-cultural communication.
- 09 Gender awareness: An activity to sensitize gender awareness
- 10 Role of science in nation building
- 11 Role of science post- independence
- 12 Practice activity on technical writing.
- 13 How will a voice assistant evolve in 25 years from now?
- 14 Design your college in the year 2090
- 15 Applying technical writing in profession
- 16 Scenario-based Assessment on technical writing
- 17 Explain IOT to your helping hand at home
- 18 Will machines control us in future?
Debate in the presence of an external moderator.

Project:	01	Visit rural area/ underprivileged parts of city to address some of the local issues; if relevant suggest a practical technology solution to the issues.
-----------------	----	---

List of Project Based Learning Topics:

01. Preparing strategies by using SWOT and TWOS analysis
02. Analysis of SWOT and TWOS for VUCA world
03. Application of motivation for surviving in VUCA world
04. Identify pluralism in cultural spaces and presentation on its application for organization
05. Preparing a model of local, global and translocational
06. Preparing a model by using translocational strategies for marketing purpose
07. Preparing a model on benefits and limitation of cross-cultural communication
08. Real time application of Technical Writing for scientific topics
09. Investigation into contribution of science in nation building and preparing a model of technical writing
10. Identifying the role of technical writing in science and preparing five blogs on current scientific inventions
11. Using learning of earlier semester; prepare a technical document
12. Investigation into a research paper of your area of interest and preparing a review paper on them.

B.TECH (Computer Science & Business Systems)

SEMESTER – IV

COURSE SYLLABUS

Operating System

TEACHING SCHEME:

Lectures: 4 Hrs./Week

Tutorials: nil

Lab: 2 Hrs./Week

EXAMINATION SCHEME:

Semester Examination: 60 Marks

Internal Assessment: 40 Marks

Term Work: 25 Marks

CREDITS ALLOTTED:

Theory: 4 Credits

Practical: 1 Credit

Total : 5 Credits

Course Pre Requisites:

Prerequisites for this course include thorough knowledge in some high-level programming language as C or C++ and UNIX / Linux operating system environment. As programs are to be implemented by writing C code during the course and will cover the details of C and its close relationship to UNIX and Linux in the case study in 6th unit.

Course Objectives:

1. To learn the basic concepts of Operating Systems.
2. To learn the mechanisms of OS to handle processes and threads and their communication.
3. To learn the methods of process scheduling.
4. To gain knowledge on Mutual exclusion, deadlock detection algorithms.
5. To know the concept of memory management and virtual memory.
6. To learn programmatically file management techniques.

Course Outcomes:

1. To learn and apply the basic concept of operating system.
2. To infer the concept of process and process state transition and concept of thread and multithreading.
3. Understand the importance of scheduling and types of scheduling algorithms.
4. To gain the knowledge of interprocess communication strategies, concept of deadlock along with its avoidance.
5. To analyse the memory management techniques, paging and segmentation.
6. To understand the file management and disk management techniques.

UNIT – I

8Hours

Introduction: Concept of Operating Systems (OS), Generations of OS, Types of OS, OS Services, Interrupt handling and System Calls, Basic architectural concepts of an OS, Concept of Virtual Machine, Resource Manager view, process view and hierarchical view of an OS.

UNIT – II

8 Hours

Processes: Definition, Process Relationship, Different states of a Process, Process State transitions, Process Control Block (PCB), Context switching.

Thread: Definition, Various states, Benefits of threads, Types of threads, Concept of multithreads.

UNIT – III

8 Hours

Process Scheduling: Foundation and Scheduling objectives, Types of Schedulers, Scheduling criteria: CPU utilization, Throughput, Turnaround Time, Waiting Time, Response Time.

Scheduling algorithms: Pre-emptive and non-pre-emptive, FCFS, SJF, RR; Multiprocessor scheduling: Real Time scheduling: RM and EDF.

UNIT – IV

8Hours

Inter-process Communication: Concurrent processes, precedence graphs, Critical Section, Race Conditions, Mutual Exclusion, Hardware Solution, Semaphores, Strict Alternation, Peterson's Solution, The Producer / Consumer Problem, Event Counters, Monitors, Message Passing, Classical IPC Problems: Reader's & Writer Problem, Dining Philosopher Problem, Barber's shop problem.

Deadlocks: Definition, Necessary and sufficient conditions for Deadlock, Deadlock Prevention, Deadlock Avoidance: Banker's algorithm, Deadlock detection and Recovery.

Concurrent Programming: Critical region, conditional critical region, monitors, concurrent languages, communicating sequential process (CSP); Deadlocks - prevention, avoidance, detection and recovery.

UNIT – V**8 Hours**

Memory Management: Basic concept, Logical and Physical address maps, Memory allocation: Contiguous Memory allocation – Fixed and variable partition–Internal and External fragmentation and Compaction.

Virtual Memory: Basics of Virtual Memory – Hardware and control structures – Locality of reference, Page allocation, Partitioning, Paging, Page fault, Working Set, Segmentation, Demand paging, Page Replacement algorithms: Optimal, First in First Out (FIFO), Second Chance (SC), Not recently used (NRU) and Least Recently used (LRU).

UNIT – VI**8Hours**

I/O Hardware: I/O devices, Device controllers, Direct Memory Access, Principles of I/O.

File Management: Concept of File, Access methods, File types, File operation, Directory structure, File System structure, Allocation methods (contiguous, linked, indexed), Free-space management (bit vector, linked list, grouping), directory implementation (linear list, hash table), efficiency and performance.

Disk Management: Disk structure, Disk scheduling - FCFS, SSTF, SCAN, C-SCAN, Disk reliability, Disk formatting, Boot-block, Bad blocks.

Case study: UNIX OS file system, shell, filters, shell programming, programming with the standard I/O, UNIX system calls.

List of Assignments:

1. To learn evolution and structure of operating system.
2. To understand the concept of Real Time scheduling.
3. To analyse the problem of process synchronization.
4. To implement the shell programming in UNIX OS.

List of Laboratory Exercises:

1. Unix commands (files directory, data manipulation, network communication etc), shell programming and vi editor
2. C program implementation of the following:
 - a. Scheduling Algorithms
 - b. Shared memory
 - c. Thread and Multi Thread
 - d. Inter Process Communication
 - e. Deadlock Avoidance and Deadlock Detection
 - f. Semaphore
 - g. Memory Management
 - h. Indexing and Hashing

List of Project Based Learning Topics:

1. Virtual traffic management system using threads with semaphore to control traffic.
2. Virtual memory management system.
3. File system handling.
4. A Client -Server application, use of IPC.
5. A simple web browser.
6. Device driver for some device.
7. Design of mail system project.
8. Design of RTOS for embedded system.
9. Mini project on Linux Shell.
10. Railway reservation system using scheduling.

Textbooks:

3. Operating System Concepts Essentials. Abraham Silberschatz, Peter Baer Galvin and Greg Gagne.

Reference Books:

1. Operating Systems: Internals and Design Principles. William Stallings.
2. Operating System: A Design-oriented Approach. Charles Patrick Crowley.
3. Operating Systems: A Modern Perspective. Gary J. Nutt.
4. Design of the Unix Operating Systems. Maurice J. Bach.

5. Understanding the Linux Kernel, Daniel Pierre Bovet, *Marco Cesati*

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Database Management Systems

TEACHING SCHEME:

Lectures: 4 Hrs./Week

Tutorials: NIL

Practical: 4 Hrs./Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term work & Practical: 50 marks

CREDITS ALLOTTED:

Theory: 4 Credits

Practical: 2 credits

Total : 6 Credits

Course Prerequisites:

Students should have knowledge of

- 1) Basic understanding of data and data structure
- 2) Basic understanding of programming language

Course Objectives:

1. Identify various techniques to communicate with database.
2. Relate relevant data for effective processing of data.
3. Construct a database to maintain data adroitly.
4. Study various queries and tools to deal with the data.
5. Understand the relation between data set and respective means to access it.
6. Understand influence of data in the effective development of software.

Course Outcomes:

After successful completion of this course students will be able to:

1. Model an application's data requirements using conceptual modeling tools
2. Demonstrate concepts of relational algebra and queries
3. Demonstrate concepts of relational database design
4. Interpret the query processing and optimization activities in database
5. Interpret the transaction activities in database
6. Recognize the emerging database applications and security concerns

UNIT – I

8 Hours

Introduction: Introduction to Database. Hierarchical, Network and Relational Models. Database system architecture: Data Abstraction, Data Independence, Data Definition Language (DDL), Data Manipulation Language (DML). Data models: Entity-relationship model, network model, relational and object oriented data models, integrity constraints, data manipulation operations.

UNIT – II

8 Hours

Relational query languages: Relational algebra, Tuple and domain relational calculus, SQL3, DDL and DML constructs, Open source and Commercial DBMS - MYSQL, ORACLE, DB2, SQL server.

UNIT – III

8 Hours

Relational database design: Domain and data dependency, Armstrong's axioms, Functional Dependencies, Normal forms, Dependency preservation, Lossless design.

UNIT – IV

8 Hours

Query processing and optimization: Evaluation of relational algebra expressions, Query equivalence, Join strategies, Query optimization algorithms.

Storage strategies: Indices, B-trees, Hashing.

UNIT – V

8 Hours

Transaction processing: Concurrency control, ACID property, Serializability of scheduling, Locking and timestamp-based schedulers, Multi-version and optimistic Concurrency Control schemes, Database recovery.

UNIT – VI

8 Hours

Database Security: Authentication, Authorization and access control, DAC, MAC and RBAC models, Intrusion detection, SQL injection.

Advanced topics: Object oriented and object relational databases, Logical databases, Web databases, Distributed databases, Data warehousing and data mining.

List of Assignments:

Respective subject teacher shall design any six assignments on above units.

List of Laboratory Exercises:

Assignments & tutorials covering the relational database design and operations in SQL and PL/SQL

List of Project Based Learning Topics:

1. Make a project to maintain employee data using files and dynamic object/structure. The project should be able to read, write, modify, add and search records. Also demonstrate the effect of performing change in employer data definition after few records have been added.
2. Make an extended ER diagram for insurance management system. Transform this into relation design and implement these relations with appropriate domain and integrity constraints.
3. Employ various data control restrictions on databases, relations and attributes of relations.
4. Create a phonebook which enables user to save contacts with additional information and provides various retrieval mechanisms. Provisions should be made to view data in multiple ways.
5. Design and develop a library management system. The relations in the system should be normalized upto BCNF
6. Design and develop a inventory management system and create multiple views on the relations so that users not authorised to edit the relations should be able to views the data.
7. Implement of audit trails and backup on relations.
8. Create a student result calculation system. However when updating final results after calculation should be only of students who paid complete fees, such that transaction of each row is executed separately. Hint- use explicit cursor
9. Develop a student data management system using hash files.
10. Installation of a NoSQL database and implementing a simple student database to compare with SQL database.

Textbooks:

1. Database System Concepts. Abraham Silberschatz, Henry F. Korth and S. Sudarshan.

Reference Books:

1. Principles of Database and Knowledge – Base Systems, Vol 1 by J. D. Ullman.
2. Fundamentals of Database Systems. R. Elmasri and S. Navathe.
3. Foundations of Databases. Serge Abiteboul, Richard Hull, VictorVianu.

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Software Design with UML

TEACHING SCHEME:

Lectures: 3Hrs./Week

Practical: 2Hrs./Week

EXAMINATION SCHEME:

Semester Examination: 60 Marks

Internal Assessment: 40 Marks

Term work & Practical: 50Marks

CREDITS ALLOTTED:

Theory: 3 Credits

Practical: 01 Credit

Total : 4 Credits

Course Pre Requisites:

The students should have sound knowledge software engineering and programming experience using data structures.

Course Objective:

To model software solutions, application structures, system behaviour and business processes using UML.

Course Outcomes:

1. Apply Unified Modeling Language (UML) for representation of an object-oriented system using different modeling views
2. Analyze requirements to represent logical design that is recognized by various object relationships.
3. Identify interaction among structural elements to translate analysis model into design model.
4. Model dependencies among packages and package able element ownership
5. Model dynamic behavior of the system and message flow from one object to other.
6. Envision the topology of the physical components of a system where the software components are utilized

UNIT – I

6 Hours

Introduction to on Object Oriented Technologies and the UML Method: Software development process: The Waterfall Model vs. The Spiral Model; The Software Crisis, description of the real world using the Objects Model; Classes, inheritance and multiple configurations; Quality software characteristics; Description of the Object Oriented Analysis process vs. the Structure Analysis Model. UML Language: Standards; Elements of the language; General description of various models; The process of Object Oriented software development; Description of Design Patterns; Technological Description of Distributed Systems.

UNIT – II

6 Hours

Requirements Analysis Using Case Modeling AND The Logical View Design: Analysis of system requirements; Actor definitions; Writing a case goal; Use Case Diagrams; Use Case Relationships. **The Static Structure Diagrams:**The Class Diagram Model; Attributes descriptions; Operations descriptions; Connections descriptions in the Static Model; Association, Generalization, Aggregation, Dependency, Interfacing, Multiplicity.

UNIT – III

6 Hours

Transfer from Analysis to Design in the Characterization Stage: Interaction Diagrams: Description of goal; Defining UML Method, Operation, Object Interface, Class; Sequence Diagram; Finding objects from Flow of Events; Describing the process of finding objects using a Sequence Diagram; Describing the process of finding objects using a Collaboration Diagram.

UNIT – IV

6 Hours

Package Diagram Model: Description of the model; White box, black box; Connections between packagers; Interfaces. ; Create Package Diagram; Drill Down.

UNIT – V

6 Hours

Dynamic Model: State Diagram / Activity Diagram: Description of the State Diagram; Events Handling; Description of the Activity Diagram; Exercise in State Machines.

UNIT – VI

6 Hours

Component Diagram Model: Physical Aspect; Logical Aspect; Connections and Dependencies; User face; Initial DB design in a UML environment. **Deployment Model:** Processors; Connections; Components; Tasks; Threads; Signals and Events.

List of Assignments:

Teaching faculty will take assignment on following topic for internal assessment.

1. Study of UML notations
2. Class diagram
3. Interaction diagrams
4. Activity diagram
5. State diagram
6. Software project covering various software development methodology techniques will be implemented.

List of Laboratory Exercises:

1. For Object Oriented Modeling, choose a hypothetical system of significant complexity (on your project topic) and write an SRS.
2. Draw one or more Use Case diagrams for capturing and representing requirements of the system. Use case diagrams must include various scenarios as per template.
3. Draw basic class diagrams to identify and describe key concepts like classes, types in your system and their relationships.
4. Draw sequence diagrams with advanced notation for your system to show objects and their message exchanges.
5. Draw activity diagrams to display either business flows or activity flow.
6. Draw component diagrams assuming that you will build your system reusing existing components along with a few new ones.
7. Draw deployment diagrams to model the runtime architecture of your system.
8. Implement Singleton Pattern, Abstract Factory Pattern and Singleton Pattern using Java.

List of Project Based Learning Topics:

1. Implementation level UML class diagram to illustrate usage of Android Camera API
Deployment diagram for Android application deployment.
2. Online shopping UML diagrams
3. Ticket vending machine UML diagrams
4. Bank ATM UML diagrams
5. Hospital management UML diagrams
6. Airport check-in and security screening Use case modeling and Requirement analysis
7. e-Library online public access UML
8. Coffee vending machine UML diagrams.
9. Online order Processing UML diagrams.

Textbooks:

1. Object-Oriented Software Engineering: using UML, Patterns, and Java. Bernd Bruegge and Allen H. Dutoit.
2. The Unified Modelling Language User Guide. Grady Booch, James Rumbaugh, Ivar Jacobson, Pearson Education.

Reference Books:

1. Design Patterns: Elements of Reusable Object-Oriented Software. Erich Gamma, Richard Helm, Ralph Johnson, and John M. Vlissides.

Syllabus for Unit Test:

Unit Test -1

UNIT – I, UNIT – II, UNIT - III

Unit Test -2

UNIT – IV, UNIT – V, UNIT - VI

Introduction to Innovation, IP Management & Entrepreneurship

TEACHING SCHEME:

Lectures: 3 Hrs./Week

Tutorials: 1Hr./Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

CREDITS ALLOTTED:

Theory: 3 Credits

Tutorial: 1 Credit

Total : 4 Credits

Course Pre-Requisites:

Good knowledge of Fundamentals of Management.

Course Objective:

The major emphasis of the course will be on creating a learning system through which management students can enhance their innovation and creative thinking skills, acquaint themselves with the special challenges of starting new ventures and use IPR as an effective tool to protect their innovations and intangible assets from exploitation.

Course Outcomes:

1. Learn to be familiar with creative and innovative thinking styles.
2. Learn opportunity reorganization and entrepreneurship skills.
3. Learn to investigate, understand and internalize the process of founding a startup.
4. Understand financial aspects of Entrepreneurship.
5. Learn to manage various types of IPR to protect competitive advantage.
6. Understand the types of IP.

UNIT – I

6 Hours

Innovation: What and Why?

Innovation as a core business process, Sources of innovation, Knowledge push vs. need pull innovations.
Class Discussion- Is innovation manageable or just a random gambling activity?

UNIT – II

6 Hours

Building an Innovative Organization

Creating new products and services, exploiting open innovation and collaboration, use of innovation for starting a new venture
Class Discussion- Innovation: Co-operating across networks vs. 'go-it-alone' approach

UNIT – III

6 Hours

Entrepreneurship:

Opportunity recognition and entry strategies, Entrepreneurship as a Style of Management, Maintaining Competitive Advantage- Use of IPR to protect Innovation

UNIT – IV

6 Hours

Entrepreneurship- Financial Planning: Financial Projections and Valuation. Stages of financing, Debt, Venture Capital and other forms of Financing

UNIT – V

6 Hours

Intellectual Property Rights (IPR): Introduction and the economics behind development of IPR: Business Perspective, IPR in India – Genesis and Development, International Context, Concept of IP Management, Use in marketing.

UNIT – VI

6 Hours

Types of Intellectual Property: Patent- Procedure, Licensing and Assignment, Infringement and Penalty, Trademark- Use in marketing, example of trademarks- Domain name, Geographical Indications- What is GI, Why protect them?, Copyright- What is copyright, Industrial Designs- What is design? How to protect?

Class Discussion- Major Court battles regarding violation of patents between corporate companies.

List of Assignments:

1. Case study materials book will be given to students. Students are required to meet in groups before coming to class and prepare on the case for the day. Instructor may ask the student groups to present their analysis and findings to the class.
2. Further, the topic for class discussion will be mentioned beforehand and students should be ready to discuss these topics (in groups) in class. Students are required to meet in groups before coming to class and prepare on the topic. Few topics are mentioned below as examples. Instructor can add or change any topic as per requirement.
3. Topic 1- Is innovation manageable or just a random gambling activity?
4. Topic 2- Innovation: Co-operating across networks vs. 'go-it-alone' approach.
5. Topic 3- Major Court battles regarding violation of patents between corporate companies.

List of Project Based Learning Topics:

Design case studies for based on any of the following technologies

1. Artificial intelligence
2. Machine Learning
3. Cloud Computing
4. IOT
5. HCI
6. Brain Computer Interface
7. Web Designing
8. Blockchain

Textbooks:

1. Joe Tidd, John Bessant. Managing Innovation: Integrating Technological, Market and Organizational Change
2. Case Study Materials: To be distributed for class discussion

Syllabus for Unit Test:

Unit Test -1
Unit Test -2

Unit

UNIT – I, UNIT – II, UNIT - III
UNIT – IV, UNIT – V, UNIT - VI

Business Communication & Value Science – IV

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Lectures: 02 Hr./Week	Semester Examination: 50 Marks	Theory: 02 Credits
Practical: 04 Hrs./Week	Internal Assessment: Yes	Practical: 02 Credit
	Term work & Oral: 50 Marks	Total : 4 Credits

Course Prerequisite: -

Basic Knowledge of English (verbal and written).

Course Objectives:

Recognize the importance of diversity in workplace, Recognize the best practices of communicative writing, Understand the importance of emotional intelligence in personal and professional lives, Apply emotional intelligence in real life scenarios, Use the best practices of public speaking in real life scenarios, Understand the importance of corporate social responsibility (CSR), Understand the importance of corporate etiquettes, Practice corporate etiquettes in real life scenarios

Course Outcomes: -

Upon completion of the course, students shall have ability to

1. Understand the importance of diversity in workplace
2. Recognize the best practices of communicative writing
3. Apply knowledge of multiple intelligences and learning styles in interpersonal interactions
4. Recognize the attributes needed to function and grow in a corporate environment
5. Identify the best practices to manage stress
6. Understand the importance of corporate social responsibility (CSR)

Unit I Diversity and Inclusion at workplace 4 Hours

Recapitulation activity of Satori. Introduce the concept of Diversity in corporate environments through an activity. Understand the importance of diversity and inclusion at workplace, Diversity and inclusion matter at workplace.

Unit II Communicative Writing: 4 Hours

Aspects of communicative writing, Application of communicative writing in real life scenarios, Use of charts and graphs in communicative writing, The best practices of communicative writing

Unit III Emotional Intelligence 4 Hours

what is emotional intelligence? Emotional intelligence in personal and professional lives its importance need and application, public speaking at workplace, Importance, need and ways, The best practices of public speaking, Apply public speaking in real life scenarios

Unit IV Corporate Social Responsibility (CSR) 4 Hours

Corporate social responsibility (CSR) its importance and need, Stalwarts in CSR, the attributes needed to function and grow in a corporate environment, the best practices to share and receive feedback for CSR

Unit V Intelligences and learning styles in interpersonal interactions: 4 Hours

Application of emotional intelligence in real life scenarios, intelligences and learning styles in interpersonal interactions, the impact of conflicts, Basic guidelines required to manage conflicts.

Unit VI Corporate etiquette, Stress & Time Management: 4 Hours

The key features of corporate etiquette, Application of the business idioms and corporate terms, the impact of stress in life and work, the best practices to manage stress, the importance of time management, the best time management practices

List of Laboratory Exercises:

- 1) Introduce the concept of Diversity in corporate environments through Role play activity
- 2) Students will be asked to create a business writing proposal to get funding to begin a start-up of their choice.
- 3) How to tell a story with charts and graphs: how to visually represent information to tell complete story. Students will be required to use the proposal for the start-up that they created in the previous class for this.
- 4) Introduce the concept of EI and give them the experience through a game/activity. Discuss the findings that students with higher EQ Ask students to note down the names of at least two movies in their Satori slam book, in which the characters display EI. Ref reading: 10 Ways to Build EI by Daniel Goleman
- 5) Public speaking – best practices Ask each group (formed earlier) to research and come up with a list of best practices along with examples (in the class)
- 6) Get, Set, Go – sell your start-up ideas
- 7) Tell a CSR story Activity - Groups will research in class, prepare and present CSR activity of Tata Steel, Microsoft, Google, TCS, Starbucks, Titan, Tata Chemicals and TOMS Shoes
- 8) Who am I? (Image Management. Building a perfect image) connect to importance of personal branding to stay relevant
- 9) Examination Result Activity - Locus of control
- 10) Applying emotional intelligence
- 11) Understanding conflicts
- 12) Corporate etiquette Mock interview rounds for each group with a prospective employer followed by discussions on corporate etiquette (leverage Interview Ready app)
- 13) Each group will present their posters and the class will come up with a list of stress management tips to be put up on the Fb/Insta page.
- 14) Managing your time better through activities
- 15) Business idioms and Corporate Terms Identify the business idioms and corporate terms from given excerpts Download the TCS BizVocab on their Smartphone
- 16) Create memories and Satori Discussion

Project: (Summative Assessment based on End Semester Project)	Each group to create a POC (Proof of Concept) for their start-up applying their learning's from the CSBS course (core subjects + BCVS). The evaluation for this POC will be done as part of the Sem end assessment by the TCS team. During the assessment, students need to share the journey of creating their start-up: from inception to POC.
--	---

List of Project Based Learning Topics:

1. Diversity and inclusion at workplace.
2. Challenges in workplace due to diversity.
3. Importance and Benefits of Inclusion in Workplace.
4. Use of charts and graphs in communicative writing,
5. Best practices of communicative writing
6. Emotional intelligence in personal and professional lives
7. The best practices of public speaking.
8. Public speaking at workplace.
9. Importance and need of Corporate social responsibility (CSR)
10. Best CSR Practices in India.
11. Learning styles in interpersonal interactions.
12. Best Practices of Conflict Management.
13. Effective ways of Stress Management.
14. Time Management Practices

15. Corporate etiquettes and its implications

Reference Books:

1. Emotional Intelligence: Why it Can Matter More Than IQ by Daniel Goleman
2. Putting Emotional Intelligence to Work by Ryback David.
3. How to Develop Self Confidence and Improve Public Speaking - Time - Tested Methods of Persuasion by Dale Carnegie.
4. TED Talks: The official TED guide to public speaking: Tips and tricks for giving unforgettable speeches and presentations
5. Diversity, Inclusion and Engagement 3rd Edition by Mervyn Hyde Lorelei Carpenter, Shelley Dole

Operations Research

TEACHING SCHEME:

Lectures: 2 Hrs./Week

Lab: 2 Hrs./Week

EXAMINATION SCHEME:

Semester Examination: 60 marks

Internal Assessment: 40 marks

Term Work :25 marks

CREDITS ALLOTTED:

Theory: 2 Credits

Practical: 1Credit

Total : 3 Credits

Course Pre-Requisites:

Good knowledge of mathematics.

Course Objective: The students will be able to understand various models in operations research used in industries to solve problems

Course Outcomes:

As a part of this course, students will:

1. Understand OR problem and associated models.
2. Understand Linear Algebra.
3. Use transportation and assignment problems.
4. Use PERT for modelling.
5. Use Inventory Control System.
6. Apply queuing theory and modulation techniques.

UNIT – I

4 Hours

Introduction to OR:

Origin of OR and its definition. Concept of optimizing performance measure, Types of OR problems, Deterministic vs. Stochastic optimization, Phases of OR problem approach – problem formulation, building mathematical model, deriving solutions, validating model, controlling and implementing solution.

UNIT – II

4 Hours

Linear Programming:

Linear programming – Examples from industrial cases, formulation & definitions, Matrix form. Implicit assumptions of LPP.

Some basic concepts and results of linear algebra – Vectors, Matrices, Linear Independence/Dependence of vectors, Rank, Basis, System of linear eqns., Hyperplane, Convex set, Convex polyhedron, Extreme points, Basic feasible solutions.

Geometric method: 2-variable case, Special cases – infeasibility, unboundedness, redundancy & degeneracy, Sensitivity analysis.

Simplex Algorithm – slack, surplus & artificial variables, computational details, big-M method, identification and resolution of special cases through simplex iterations.

Duality – formulation, results, fundamental theorem of duality, dual-simplex and primal-dual algorithms.

UNIT – III

4 Hours

Transportation and Assignment problems:

TP - Examples, Definitions – decision variables, supply & demand constraints, formulation, Balanced & unbalanced situations, Solution methods – NWCR, minimum cost and VAM, test for optimality (MODI method), degeneracy and its resolution.

AP - Examples, Definitions – decision variables, constraints, formulation, Balanced & unbalanced situations, Solution method – Hungarian, test for optimality (MODI method), degeneracy & its resolution.

UNIT – IV

4 Hours

PERT – CPM:

Project definition, Project scheduling techniques – Gantt chart, PERT & CPM, Determination of critical paths, Estimation of Project time and its variance in PERT using statistical principles, Concept of project crashing/time-cost trade-off.

UNIT – V**4 Hours****Inventory Control:**

Functions of inventory and its disadvantages, ABC analysis, Concept of inventory costs, Basics of inventory policy (order, lead time, types), Fixed order-quantity models – EOQ, POQ & Quantity discount models. EOQ models for discrete units, sensitivity analysis and Robustness, Special cases of EOQ models for safety stock with known/unknown stock out situations, models under prescribed policy, Probabilistic situations.

UNIT – VI**4Hours****Queuing Theory:**

Definitions – queue (waiting line), waiting costs, characteristics (arrival, queue, service discipline) of queuing system, queue types (channel vs. phase).

Kendall's notation, Little's law, steady state behavior, Poisson's Process & queue, Models with examples - M/M/1 and its performance measures; M/M/m and its performance measures; brief description about some special models.

Simulation Methodology:

Definition and steps of simulation, random number, random number generator, Discrete Event System Simulation – clock, event list, Application in Scheduling, Queuing systems and Inventory systems.

List of Assignments:

Respective subject teacher shall design any six assignments on above units.

List of Laboratory Exercises:

1. Formulation of linear programming problems.
2. Solution of linear programming problem using graphical method with:
 - i. Multiple constraints
 - ii. Unbounded solution
 - iii. Infeasible solution
 - iv. Alternative or multiple solution
3. Enumeration of all basic solutions for linear programming problem.
4. Solution of linear programming problem with simplex method.
5. Problem solving using Big M method.
6. Problem solving using two phase method.
7. Solution on primal problem as well as dual problem.
8. Solution based on dual simplex method.
9. Verification of weak duality, strong duality and complementary slackness property.
10. Solution of transportation problem.
11. Solution of assignment problem.
12. Solution of integer programming problem using Branch and Bound method.
13. Solution of integer programming problem using Gomory's cutting plane method.
14. Simulation: Random number generation.
15. Monte Carlo method.
16. Performance measures for M/M/1 queuing model.
17. ABC analysis.
18. Inventory model.

List of Project Based Learning Topics:

1. Students must work on one of the projects listed below (but not limited to) during the semester
2. Find the companies that used OR as a tool to sort a problem successfully and unsuccessfully. Compare them and analyze as to why certain strategies worked and others failed.
3. Visit any industry and choose one of their products. Develop a LPP for maximizing profits on the sale of that product considering the various constraints on it. Solve the LPP and make suggestions of the same for the company.
4. Develop a software that helps in making timetable for the department by making and solving an LPP.
5. Visit a small departmental store/hotel, collect data, and make an LPP for optimum use of space. Solve the LPP and make relevant suggestions

6. Write a research paper on how LPP helps companies to solve problems referencing latest papers.
7. Write a research paper on how assignment tools help companies to solve problems referencing latest papers.
8. Write a research paper on how transportation tools help companies to solve problems referencing latest papers.
9. Visit a small-scale industry. Collect data and make WBS and a network diagram. Solve it by CPS and PERT methods and make relevant suggestions
10. Write a research paper on how network analysis tools help companies to solve problems referencing latest papers.
11. Write a research paper on how queuing models help companies to solve problems referencing latest papers.
12. Go to a nearby petrol pump, bank, departmental store, hotel. Record the arrival and service rates for multiple days. Analyze the data and make relevant suggestions
13. Write a research paper on how inventory models help companies to solve problems referencing latest papers.
14. Go to a nearby petrol pump, departmental store, hotel. Record inventory levels and inventory practices for multiple days. Analyze the data and make relevant suggestions

Textbooks:

1. Operations Research: An Introduction. H.A. Taha.

Reference Books:

1. Linear Programming. K.G. Murthy.
2. Linear Programming. G. Hadley.
3. Principles of OR with Application to Managerial Decisions. H.M. Wagner.
4. Introduction to Operations Research. F.S. Hillier and G.J. Lieberman.
5. Elements of Queuing Theory. Thomas L. Saaty.
6. Operations Research and Management Science, Handbook: Edited By A. Ravi Ravindran.
7. Management Guide to PERT/CPM. Wiest & Levy.
8. Modern Inventory Management. J.W. Prichard and R.H. Eagle.

Syllabus for Unit Test:

Unit Test -1
Unit Test -2

Unit

UNIT – I, UNIT – II, UNIT - III
UNIT – IV, UNIT – V, UNIT - VI

ALGEBRA AND STATISTICS		
Designation: Mathematics		
Pre-requisite Courses: Basic knowledge of mathematics		
Teaching Scheme	Examination Scheme	Credits Allotted
Lectures : 04 Hours/Week	End Semester Examination : 60 Marks	Theory : 04
Tutorial : 01 Hours/Week	Continuous Assessment : 40 Marks	Tutorial : 01
Total : 05 Hours/Week	Total : 100 Marks	Total Credits : 05
Topics Covered		
UNIT-I	Matrices Determinant, Adjoint, Rank, Inverse of matrix, Normal form, System of linear equations, Linear dependence and independence, Linear and Orthogonal transformations. Eigen Values, Eigen Vectors, Cayley – Hamilton Theorem, Application to problems in Engineering.	(08Hours)
UNIT-II	Complex Numbers and Applications Definition, Cartesian, Polar and Exponential forms, Geometrical representation of imaginary and complex numbers, De' Moivre's theorem and its application to find roots of algebraic equations., Hyperbolic functions, Logarithm of complex numbers, Separation into Real and Imaginary parts, Application to problems in Engineering.	(08Hours)
UNIT-III	Statistics Collection of data, Graphical representation of data, Measure of central tendency, Measures of dispersion, Coefficient of variation, Standard deviation, Correlation and coefficient of correlation, Standard error estimates, Rank correlation. Statistical test : t-test, F test, χ^2 test Data fitting: Linear, Multilinear and nonlinear regression	(08Hours)
UNIT-IV	Probability Laws of probability and notations, Random variable, Probability distribution-normal, Binomial, Poisson Weibull, Interpretation of failure data, Equal likely hood and Boolean algebra, Probability of union, Joint and marginal probability, Conditional probability, and Distribution function.	(08Hours)

UNIT-V	Vector Algebra and Calculus Vector, Space coordinates and mathematical operations, Physical applications, Differentiation of vectors, Identities involving gradient divergence curl and their physical meaning, Line and surface integrals, Green, Guass and Stoke's theorem.	(08Hours)
UNIT-VI	Solid Geometry Equation of line, Equation of plane, Conditions for line on plane, Coplanar lines, Intersection of three planes, Equation of sphere, Cone, Cylinder, Quadric surface, Surface of revolution, Combination of surfaces.	(08 Hours)

Project Based Learning

1. Find the Eigen values and Eigen vectors of any random matrix.
2. Check the consistency of algebraic equations.
3. Find roots of any algebraic equation.
4. Separate into Real and Imaginary parts of complex numbers
5. Collect the raw data, analyse it and plot it using graphs
6. Find the stability of the data using coefficient of variation
7. Use concept of correlation to find coefficient of correlation between different observation.
8. Use Rank correlation to find correlation for qualitative data.
9. Derive Spearman's Rank correlation.
10. Data fitting using linear regression.
11. Data fitting using nonlinear regression.
12. Find work done using vector integral.

Syllabus for Unit Tests

Unit Test I	Units I, II, and III
Unit Test II	Units IV, V, and VI

ORGANIC CHEMISTRY - I

Designation: Basic Science

Pre-requisite Courses: Basic knowledge of Chemistry, Stereoisomerism, Reactive intermediates.

Teaching Scheme		Examination Scheme		Credits Allotted	
Lectures	: 04 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 04
Practical	: 02 Hours/Week	Continuous Assessment	: 40 Marks	Tutorial	: -
Total	: 06 Hours/Week	Term-work (TW)	: 25 Marks	Practical	: 01
		Practical/Oral	: 25 Marks	Total Credits	: 05
		Total	: 150 Marks		

Course Outcomes

1	Understand the concept of generation, stability of intermediates and mechanisms of various named reactions.
2	Illustrate the principles of stereochemistry and study the skills for stereochemical assignment related to cycloalkane
3	Explain and illustrate the knowledge about the synthesis of alkanes, alkenes and alkynes with its chemical reactions
4	Explain and illustrate the knowledge about the synthesis of Haloalkanes and alcohols with its chemical reactions.
5	Understand and apply the knowledge about preparation reactions of Aldehydes, ketones and Phenols and their chemical reactions.
6	Understand importance of synthesis reactions for Carboxylic acids and derivatives and their chemical reactions.

Topics Covered

UNIT-I	<p>Structural effects and Reactive intermediates Electron Displacement:- Effects-Inductive, Electromeric, Mesomeric and Hyperconjugative effects.</p> <p>Reactive intermediates – Carbocations and Carbanions Introduction, Classification of carbocations, Preparation of carbocations, Reactions of carbocations, Carbocations stabilisation, Introduction, Classification of carboanions, Preparation of carboanions, Reactions of carboanions, Carboanions stabilization, Kinetic and thermodynamic controls, Effect of solvent, temperature.</p>	(06 Hours)
UNIT-II	<p>Stereoisomerism Optical isomers with two chiral centres [A, A and A, B type], erythro, threo, meso, diastereomers, Stereo isomers in cycloalkanes – Baeyer's strain theory, heats of combustion and relative stability of cycloalkanes, Factors affecting the stability of conformation, Conformations of cyclohexane, equatorial and axial bonds in cyclohexane. Mono substituted cyclohexanes</p>	(06 Hours)
UNIT-III	<p>Chemistry of alkanes, alkenes and alkynes Introduction, Classification, Physical properties of alkanes, alkenes and alkynes, Preparation of alkanes from hydrogenation of alkenes and alkynes,</p>	(06 Hours)

	Wurtz Reaction, Reactions of alkanes - and Halogenation ,Preparation of alkenes from alkyl halides and alcohols, Reactions of alkenes - Electrophilic additions their mechanisms (Markownikoff/Anti-Markownikoff addition), oxymercuration-demercuration. Preparation of alkynes - calcium carbide, vicinal dihalides, Reactions of alkynes - Electrophilic and Nucleophilic additions	
UNIT-IV	Haloalkanes, alcohols Introduction, Classification, Nomenclature of alkyl halides ,Preparation of alkyl halides from alkanes and by addition of HX to alkenes, Reactions of alkyl halides- Substitution and Elimination reactions, Introduction, Classification, Nomenclature of alcohols, Preparation of alcohols- Hydrolysis of alkyl halides and Reduction of aldehydes and ketones, Reactions of alcohols- Hydrogen halides and Dehydration of Alcohols	(06 Hours)
UNIT-V	Aldehydes, ketones and Phenols Structure of carbonyl group, Nomenclature of aldehydes and ketones and physical properties, Preparation of aldehydes from primary alcohols and methyl benzenes ,Preparation of ketones from secondary alcohols and Friedel-Crafts acylation, Reactions of aldehydes and ketones – Aldol condensation, reduction- Clemmensen's, Cannizzaro's reaction, Preparation of phenols from laboratory method, Reactions of phenols – Nitration and Sulphonation	(06 Hours)
UNIT-VI	Carboxylic acids and derivatives Structure, classification, Nomenclature and physical properties, Preparation of carboxylic acids from primary alcohols and oxidation of alkyl benzene, Reactions of carboxylic acids – acidity, salt formation, Acid derivatives – Structure and Nomenclature, Preparations and properties of acid chlorides.	(06 Hours)
Project based learning		
<ul style="list-style-type: none"> • Prepare and give the composition and role of ingredients in dry hand sanitizer. • Prepare a safe way to make fruit vinegar at home. • Write a review paper based on the role of terpenes and derivatives in the cosmetic, food, and pharmaceutical industries and get it published in reputed journal (eg. Google Scholar). • With the help of extraction from cinnamon/discharge essential oil. How to present and introduce cinnamon/lemongrass essential oil products? • Prepare a hardware model based on a simple automatic handwashing device. • Write a review paper based on organic compounds are used as explosives in practice and get it published in reputed journal (eg. Google Scholar). 		
*Students in a group of 3 to 4 shall complete any one project from the above list.		
Term work		
Term work will consist of the experiments listed below, which are to be performed in laboratory by the students		
1	Purification of organic compounds by crystallization using the following solvents: <ol style="list-style-type: none"> 1. Water 2. Alcohol 3. Alcohol-Water 	
2	Effect of impurities on the melting point – mixed melting point of two unknown organic compounds.	
3	Determination of boiling point of liquid compounds. (boiling point lower than and more than	

	100 °C by distillation and capillary method)

Syllabus for Unit Tests	
Unit Test I	Units I, II, and III
Unit Test II	Units IV, V, and VI

MATERIAL AND WAVE PHYSICS

Designation: Basic Science

Pre-requisite Courses: Students are expected to have a basic understanding of physics and calculus.

Teaching Scheme		Examination Scheme		Credits Allotted
Lectures	: 04 Hours/Week	End Semester Examination	: 60 Marks	Theory : 04
Practical	: 02 Hours/Week	Internal Assessment	: 40 Marks	TW/OR/PR : 01
Total	: 06 Hours/Week	Term-work (TW)	: 25 Marks	Total Credits : 05
		Practical/Oral	: 25 Marks	
		Total	: 150 Marks	

Course Objective: To impart knowledge of basic concepts in physics relevant to engineering applications in a broader sense with a view to lay foundation for the Chemical Engineering.

Course Outcomes

1	Appraise the atomic spectra of one and two valance electron atoms and the change in behavior an external applied electric and magnetic field.
2	Solve quantum physics problems to micro level phenomena and solid state physics.
3	Summarise the arrangement of atoms in solids and its influence the properties of matter.
4	Use the knowledge of nanoscience to develop new materials with tunable properties.
5	Connect the problems associated with defects and use ultrasonic as a tool in industry form on destructive testing.
6	Infer the wave nature of light and apply it to measure stress, pressure and dimension etc.

Topics Covered

UNIT-I	Atomic and Molecular Physics Inroduction - JJ Thomson and Bohr, Sommerfeld and Vector Models, Origin of quantum numbers, Vector model for two valance electrons atom, LS and JJ coupling, origin of spectra (Electronic, atomic and molecular), Stark effect.	(08 Hours)
UNIT-II	Quantum Mechanics Dual nature of matter, concept of wave packet, group and phase velocity and relation between them, Physical significance of wave function, Schrodinger's time dependant and time independent wave equation, Application of Schrodinger's time independent wave equation to the problems of Particle in a rigid box, step potential and potential barrier (analytical discussion), tunnelling effect.	(08 Hours)
UNIT-III	Crystallography Introduction-Lattice, basis, Unit cell and Bravais lattice, cubic system, lattice planes and Miller indices, packing factor, inter planar distances, Bragg's law (Statement only), Origin of Line and Continuous Spectrum of X-ray, Mosley's law, Crystal defects (1.Point defects vacancies, interstitial defects, substitution defects, 2. Line defect-screw dislocation, edge dislocation, 3.surface defects-material surface, grain boundaries).	(08 Hours)
UNIT-IV	Nanoscience Introductions of nanoparticles, properties of nanoparticles (Optical, electrical,	(08 Hours)

	Magnetic, structural, mechanical), synthesis of nanoparticles (Physical and chemical), synthesis of colloids, growth of nanoparticles, synthesis of nanoparticles by colloidal route, applications, quantum dots – wide band semiconductors, direct/indirect band gap semiconductors	
UNIT-V	Ultrasonics Introduction to ultrasonics, Production of ultrasonics by magnetostriction and piezoelectric methods - acoustic grating –Non Destructive Testing – pulse echo system through transmission and reflection modes - A, B and C–scan displays, Medical applications – Sonogram, emulsification, cavitation, thickness measurement, flaw detection,	(08 Hours)
UNIT-VI	Wave Optics Interference Interference of waves, interference due to thin film (Uniform and non-uniform), Applications of interference (optical flatness, interference filter, non-reflecting coatings). Diffraction Introduction, Classes of diffraction, Diffraction at a single slit (Geometrical method), Conditions for maximum and minimum, Plane diffraction grating, Conditions for principal maxima and minima Polarisation Introduction, Double refraction and Huygen's theory, Positive and negative crystals, Nicol prism, Dichroism.	(08 Hours)

Term Work

Term work will consist of the experiments listed below, which are to be performed in laboratory by the students. (Any Eight of the Following)

1	Determination of Planck's Constant by photo electric effect
2	To study Hall effect and determine the Hall voltage
3	Calculation of conductivity by four probe method
4	Synthesis of metal oxide nanoparticles (ZnO/ZnS/Gold)
5	UV-VIS spectra of synthesised semiconductor nanoparticles
6	Determination of radius of plan convex lens/wavelength of light/Flatness testing by Newton's rings
7	Determination of wave length of light using diffraction grating
8	Determination of resolving power of telescope
9	Determination of thickness of a thin wire by air wedge
10	Determination of refractive index for O-ray and E-ray
11	Determination of velocity of sound in liquid by ultrasonic interferometer
12	Ultrasonic probe-a study

Project Based Learning

1	Design and simulation of automatic solar powered time regulated water pumping
2	Solar technology: an alternative source of energy for national development
3	The study on the effect of length on the resistance of a copper wire (verification of ohms law R directly proportional to l)
4	Possible effects of electromagnetic fields (emf) on human health
5	Design and construction of digital distance measuring instrument using ultrasonics
6	Measurement /simulation of reverberation time
7	Study of vibration of bars

8	Determination of absorption coefficient of sound absorbing materials
9	Determination of velocity of O-ray and E-ray in different double refracting materials
10	Quantum confinement effect in wide band semiconductors
11	Need of medium for propagation of sound wave
12	Small wind turbines as a source of electricity
13	Tesla Coil
14	Thin film interference in soap film-formation of colours
15	LiFi- wireless data transfer system using light

Syllabus for Unit Tests

Unit Test I	Units I, II, and III
Unit Test II	Units IV, V, and VI

Computer Aided Graphics		
Designation: Engineering Science		
Pre-requisite Courses: Fundamentals of Mathematics		
Teaching Scheme	Examination Scheme	Credits Allotted
Lectures : 3 Hours/Week	End Semester Examination : 60 Marks	Theory : 03
Practical : 4 Hours/ Week	Internal Assessment : 40 Marks	TW/OR/PR : 02
Total : 7 Hours / Week	Term-work (TW) : 25 Marks	Total Credits : 05
	Practical/Oral : 25 Marks	
	Total : 150Marks	
Course Objectives:		
To understand the basic principles of engineering drawing and highlight the importance of Computer Aided Drafting in engineering		
To develop the graphical skills for communication of concepts & idea through technical drawings		
Course Outcomes:		
After completion of the course students would be able to:		
1	Understand the fundamental concepts of CAD Drawing, its applications, different types of lines, curves and dimension technique with practical application.	
2	Understand the concept of Orthographic projections and apply it to draw detail views by using 1st angle projection method	
3	Understand the concept of isometric projection and apply it to construct 3D view of a component.	
4	Understand the concept of projections of Point, Line and plane; and apply to draw its projection by using 1st angle projection method and to locate its traces	
5	Understand the concept of projections of different types of solids and sectioned solids; and apply to draw its projection by using 1st angle projection method	
6	Understand the concept of Development of Lateral surfaces; and apply to development of simple and sectioned Solids.	
Topics covered		
UNIT-I	Fundamentals of CAD and Engineering Curves Introduction to Engineering Drawing, Types of lines and Dimensioning, Layout and size of drawing sheets, Scales. Engineering Curves -Ellipse drawing by Focus-Directrix Circle Method and Concentric Circle Method, Involute of a circle, Cycloid, Archimedean Spiral, Helix on cone and Cylinder. Fundamentals of Computer Aided Drafting (CAD) and its applications, Various softwares for Computer Aided Drafting. AutoCAD initial setting and AutoCAD commands	(08 Hours)
UNIT-II	Orthographic Projection Basic principle planes of Projections, First and Third angle method of Projection, Orthographic Projections of given Pictorial view by first angle projection method only, Sectional orthographic Projection. Orthographic Drawing by using AutoCAD.	(08 Hours)
UNIT-III	Isometric Projections Principles of Isometric Projections-Isometric Scale, Isometric Axes, Isometric Projections and Isometric Drawing. Constructions of Isometric view from given Orthographic Views and given origin. Isometric Drawing by using AutoCAD.	(08 Hours)

UNIT-IV	Projection of Points, Lines and Plane Surfaces Projections of Points, Projections of Oblique lines in First Quadrant, Traces. Projections of Planes- Projection of perpendicular and oblique planes (polygonal and circular surfaces), Obtaining true shape of plane surface. Projection of Points, Lines and Plane Surfaces by using AutoCAD.	(08 Hours)
UNIT-V	Projection of Solids and Sectioned Solids Introduction of solids-Types of solids, Projection of solid inclined both references plane, Projection of common solids such as prism, pyramid, cylinder and cone. Projection of solids cut by AIP and AVP, obtaining true shape of a section. Projection of Solids and Sectioned Solids by using AutoCAD.	(08 Hours)
UNIT-VI	Development of Lateral Surfaces Development of the lateral surfaces of solids like Prisms, pyramids, cylinders and cones. Development of cut solids. Development of Lateral Surfaces by using AutoCAD.	(08 Hours)

Project Based Learning

Following is the list topic for project based learning (Not Limited to) based on the syllabus contents:

1	To obtain industrial drawings to identify the types of lines, dimensioning methods and method of projection.
2	To develop the model/charts based on engineering curves
3	To prepare model/chart for identification of engineering curves in nature for industrial, societal, etc application
4	To demonstrate different methods of orthographic projection.
5	To demonstrate projection of Points
6	To demonstrate projection of Lines
7	To demonstrate projection of Planes.
8	To demonstrate projection of Solids
9	To demonstrate developments of surfaces for solids
10	To demonstrate industrial application of development of surfaces such as steam carrying pipes, Ducts of air conditioning systems, etc.
11	To demonstrate Isometric projection method through model of a cube

*Students in a group of 3 to 4 shall complete any one project from the above list.

Term Work

Term work shall consist of **seven** A2 size (594 mm x 420 mm) sheets using **AutoCAD**.

1	Types of lines, Dimensioning practice, 1st and 3rd angle methods symbol
2	Engineering Curves
3	Orthographic Projections
4	Isometric views
5	Projections of Points and Lines and planes
6	Projection of Solids and Section of solids
7	Development of Lateral surfaces

Syllabus for Unit Test:	
Unit Test : I	Units : I, II, and III
Unit Test : II	UNIT : IV, V, and VI

CHEMICAL ENGINEERING: SCOPE AND SIGNIFICANCE

Designation: Basic Science

Course Pre-requisites: Basic Chemistry

Teaching Scheme	Examination Scheme	Credits Allotted
Lectures : 03 Hours/Week	End Semester Examination : 60Marks	Theory : 03
	Internal Assessment : 40Marks	Total credits : 03
	Total : 100Marks	

Course Outcomes

After completion of the course students will be able to

1. Appraise the importance of chemical engineering and related processes
2. Select unit operations and processes for desired application
3. Justify the importance of chemical engineering in Petroleum and Petrochemical industries
4. Justify the importance of chemical engineering in Food and Pharmaceutical industries
5. Justify the importance of chemical engineering in agricultural industries
6. Design a pathway to face today's and upcoming challenges using knowledge of chemical engineering

Topics Covered

UNIT - I	Introduction Chemical Engineering: Origin and development; Definition of Chemical Engineering; Major components and scope of Chemical Engineering; Role of Chemical Engineer in Chemical and allied industries; Chemical Engineering and national economy	(06 Hours)
UNIT - II	Unit operations and Unit processes Definition of unit operations and unit processes; Unit operations: fluid flow, heat and mass transfer, and mechanical operations; Unit processes: Addition, condensation, substitution; Application of unit operations and unit processes: industrial case studies.	(06 Hours)
UNIT - III	Petroleum and Petrochemical Industry Overview of petroleum and petrochemical industry; Major petroleum and petrochemical products; Unit operations and processes in petroleum and petrochemical industry; Economical impact.	(06 Hours)
UNIT - IV	Food and Pharmaceutical Industry Overview of food and pharmaceutical industries; Unit operations involved in food and pharmaceutical industries; Application of Chemical Engineering: industrial case studies; Role of Chemical Engineers; Economical impact.	(06 Hours)
UNIT - V	Agro-chemical Industry Significance of agro-chemicals; Role of chemical engineer in synthesis of agro-chemicals; Value added products: biofertilizers, biofuel, bioadsorbents, etc.; Fertilizers, pesticides, herbicides, crop growth enhancers, etc.; Social and economical importance of agricultural chemicals	(06 Hours)

UNIT - VI	Chemical Engineering and challenges (i) Energy: Sources of energy and constraints; Need for renewable energy (ii) Air: Sources of air pollution; Air quality parameters; Air pollution control (iii) Water: Water quality parameters; Water recycle and reuse; Water treatment methodologies Role of Chemical Engineer in Energy, Air and Water sectors; Economical impact.	(06 Hours)

5	R. Trebal: Mass Transfer operations, McGraw Hill Publications 1997	
6	McCabe, Smith, Harriot: Unit Operations of Chemical Engineering, McGraw Hill Publications, 1997	
Project based learning: Below is the list of possible topics, which is for guidance faculty can design and provide relevant topics in addition to these		
1	Study and prepare a report on the activities and roles carried out by chemical engineers in different industries	
2	Study and prepare a report on the chemical and allied industries and their importance in national economy and social upliftment	
3	Study and prepare a report on the fluid flow operations used in any one chemical industry and their importance on overall processing	
4	Investigate and prepare a report on the heat transfer operations used in any one chemical industry and their importance on overall processing	
5	Investigate and prepare a report on the mass transfer operations used in any one chemical industry and their importance on overall processing	
6	Investigate and prepare a report on the mechanical operations used in any one chemical industry and their importance on overall processing	
7	Investigate and prepare a report on the unit processes used in any one chemical industry and their importance on overall operation	
8	Study the life and work of eminent chemical engineer from India and prepare a report on the economical and societal impact of their work	
9	Investigate and prepare a report on formation, processing, life cycle, application and role of chemical engineering in any one petroleum product and its societal and economical impact, along with the role of chemical engineer	
10	Investigate and prepare a report on formation, processing, life cycle, application and role of chemical engineering in any one petrochemical product and its societal and economical impact	
11	Investigate and prepare a report on formation, processing, life cycle, application and role of chemical engineering in any one processed food product and its societal and economical impact	
12	Investigate and prepare a report on formation, processing, life cycle, application and role of chemical	

	engineering in any one processed pharmaceutical product or drug and its societal and economical impact
13	Investigate and prepare a report on formation, processing, life cycle, application and role of chemical engineering in any agrochemical and its societal and economical impact
14	Investigate and prepare a report on the challenges of air and water pollution, its effects and role of chemical engineering in overcoming the same
15	Investigate and prepare a report on the challenges in energy sector, its effects and role of chemical engineering in overcoming the same
Syllabus for Unit Test:	
Unit Test : I	UNIT : I, II, and III
Unit Test : II	UNIT : IV, V, and VI

DATA STRUCTURE (C PROGRAMMING)

Designation: Computational

Pre-requisite Courses: Basic knowledge of computers

Teaching Scheme		Examination Scheme		Credits Allotted
Practical	: 04 Hours/Week	Term-work (TW)	: 50 Marks	TW/OR/PR : 02
Total	: 04 Hours/Week	Practical/Oral	: 50 Marks	Total Credits : 02
		Total	: 100 Marks	

Course Outcomes

1	Apply the knowledge of constant, variables, data types and various standard input output functions to write C-programs.
2	Design a flow chart and write C-programs using control constructs and looping statements and arrays.
3	Develop C-programs using string and pointers.
4	Elucidate the basic concepts of Data structure
5	Clarify dynamic store management.
6	Plot graphs using C- Programming

Topics Covered

UNIT-I	C-Programming Language Introduction; Character sets; Constant; Variables and Data Types: integer, float, double, char, string; Operators: arithmetic, relational, logical, increment and decrement, assignment, conditional; Standard input-output functions: printf (), scanf (), getch () or getchar (); Programs using if statement, if-else statement, goto statement, etc.; Programs based on standard input-output functions used in C-Programming. 1. Programs based on if-else statements. 2. Programs based on goto statements. 3. Programs based on switch-case statements
UNIT-II	Loops and Arrays Programs using while loop; do-while loop and for loop; Single dimensional and multi-dimensional arrays. 4. Programs based on while loop. 5. Programs based on do-while loop. 6. Programs based on for loop. 7. Write algorithm and flowchart for array. 8. Programs based on single dimensional arrays. 9. Programs based on multi-dimensional arrays.
UNIT-III	String and Pointers Programs using string; String functions: strlen()/ strcpy()/ strcmp()/ strcat ()/strlwr ()/strupr ()/ strcmp (); Programs using pointers; Use of * and & operators; Pointer arithmetic's; Use of pointers; Pointer and function: parameter passing to function by

	reference and by value; File handling; Linked list. 10. Programs based on strings and string functions. 11. Programs based on pointers and function.
UNIT-IV	Introduction to data structures Storage structure for arrays; Sparse matrices, Stacks and Queues: Representation and application; Linked lists: Single linked lists, linked list representation of stacks and Queues; Operations on polynomials; Double linked list; circular list. 12. Programs based on Array implementation of stack and queues. 13. Programs based on Linked list implementation of stack and queues
UNIT-VI	Dynamic storage management Garbage collection and compaction; Infix to post fix conversion; postfix expression evaluation; Trees: Tree terminology, Binary tree, Binary search tree. 14. Programs based on checking balanced parentheses in an expression. 15. Programs based on implementation of tree and tree traversal. 16. Programs based on implementation of binary search tree.
UNIT-VI	Graphs: Graph terminology; Representation of graphs; path matrix; BFS (breadth first search); DFS (depth first search); Topological sorting;Warshall's algorithm (shortest path algorithm.); Sorting and Searching techniques : Bubble sort, selection sort, Insertion sort, Quick sort, merge sort, Heap sort, Radix sort. Linear and binary search methods. 17. Programs based on bubble sort, insertion sort, quick sort, merge sort 18. Programs based on implementation of linear and binary search methods
In addition to these above stated programs / practical's concern faculty member may design his/her own programs / practical's.	
Term Work	
Term work will consist of the programs/practical's listed above, out of which any ten programs/practical's are to be performed in laboratory by the students.

DIFFERENTIAL AND INTEGRAL CALCULUS		
Designation: Mathematics		
Pre-requisite Courses: Basic knowledge of mathematics		
Teaching Scheme	Examination Scheme	Credits Allotted
Lectures : 04 Hours/Week	End Semester Examination : 60 Marks	Theory : 04
Tutorial : 01 Hours/Week	Continuous Assessment : 40 Marks	Tutorial : 01
Total : 05 Hours/Week	Total : 100 Marks	Total Credits : 05
Topics Covered		
UNIT-I	Ordinary Differential Equations Formation of the ordinary differential equations(ODEs), Solution of an ordinary differential equation, Equations of the first order and first degree, Linear differential equation, Bernoulli's equation, Exact differential equations, Equations reducible to exact equations, Ordinary differential equation of higher order with constant and variable coefficients.	(08 Hours)
UNIT-II	Partial Differential Equations Functions of two or more variables, Partial derivatives, Homogeneous functions, Euler's theorem, Total derivative, Change of variables, Jacobians - Geometrical interpretation: Tangent plane and normal to a surface.	(08 Hours)
UNIT-III	Applications of Ordinary and Partial Differential Equations Taylor's theorem for two variables, Errors and approximations, Maxima and Minima of functions of two variables, Lagrange's method of undetermined multipliers, Differentiation under the integral Sign, Leibnitz's rules. Solution of Higher order ODE with constant and variable coefficients and its applications, Series solution of differential equations, Bessel functions, Legendre Polynomials, Error function. Applications of partial differential equations to chemical engineering problems.	(08 Hours)
UNIT-IV	Integral Calculus Beta and Gamma functions, Change of order of integration, Differentiation under the integral sign, Surface integrals, Volume integrals, Error functions, Double and Triple integrations.	(08 Hours)
UNIT-V	Applications of Integral Calculus Applications to Area, Volume, Mean and Root Mean Square Values.	(08 Hours)
UNIT-VI	Fourier and Laplace Transforms Fourier series: Trigonometric series, Even and odd functions, Half-range series, Parseval's identity, Complex form, Fourier integrals, Fourier sine and cosine integrals. Fourier transform: Fourier sine and cosine transforms and	(08 Hours)

	<p>their elementary properties. Convolution theorem, Application of Fourier transforms to boundary value problems.</p> <p>Laplace Transform</p> <p>Laplace and inverse Laplace transform of some standard functions, Shifting theorems, Laplace transform of derivatives and integrals. Convolution theorem, Initial and final value theorem. Laplace transform of periodic functions, Error functions, Heaviside unit step function and Dirac delta function. Applications of Laplace transform.</p>	
--	--	--

Project Based Learning

Term work will consist of the experiments listed below, which are to be performed in laboratory by the students.

1.	Formation of differential equation
2.	Evaluate the electric circuit problem using differential equations.
3.	Evaluate the heat conduction in 1-D using differential equations.
4.	Find the error using the concept of total derivative.
5.	Solving the wave equation using partial differential equations.
6.	Solving the heat equation in 2-D using partial differential equations.
7.	Find Maxima and Minima of functions of two variables.
8.	Use differentiation under the integral Sign to solve integrals.
9.	Find root mean square values using integrals.
10.	Find the volume using triple integrals.
11.	Find work done using Green's theorem.
12.	Find scalar potential using vectors.
13.	Evaluating integrals using Green's theorem, Gauss's and stoke's theorem.
14.	Use Laplace transform to solve differential equations.
15.	Use Laplace transform to solve integrals equations.

Syllabus for Unit Tests

Unit Test I	Units I, II, and III
Unit Test II	Units IV, V, and VI

Organic Chemistry- II

Designation: Basic Science

Pre-requisite Courses: Basic knowledge of chemistry

Teaching Scheme		Examination Scheme		Credits Allotted
Lectures	: 4 Hours/Week	End Semester Examination	: 60 Marks	Theory : 04
Practical	: 2 Hours/ Week	Internal Assessment	: 40 Marks	TW/OR/PR : 01
Total	: 6 Hours / Week	Term-work (TW)	: 25 Marks	Total Credits : 05
		Practical/Oral	: 25 Marks	
		Total	:150Marks	

Course Objectives:

To develop the interest among the students regarding chemistry and their applications in engineering

To develop confidence among students about chemistry, how the knowledge of chemistry is applied in technological field.

The student should understand the concepts of chemistry to lay the groundwork for subsequent studies in the field such as Chemical Engineering.

Course Outcomes:

After completion of the course students would be able to:

1	Understand the fundamentals of reaction kinetics for nucleophilic substitution reactions and apply the knowledge to determine reaction mechanisms.
2	Understand and apply the concept of reaction kinetics for elimination reactions and determine reaction mechanisms.
3	Explain and illustrate the knowledge about the synthesis of haloalkanes and haloarenes with its chemical reactions.
4	Explain the importance of ionic liquids with synthesis and structural determination of natural products.
5	Apply the knowledge about the synthesis, properties and uses of such heterocyclic compounds like pyrrole, pyridine, thiophene and furan.
6	Illustrate the principles of organometallic chemistry and importance of synthesis reactions and their applications

Topics covered

UNIT-I	Nucleophilic Substitution at saturated carbon Introduction, Nucleophiles and leaving groups, Mechanism of nucleophilic substitution:-SN1 reaction: Kinetics and Mechanism. SN1 reaction: stereochemistry (Racemisation) The SN2 reaction: Kinetics and Mechanism. SN2 reaction: stereochemistry (Inversion) Comparison of SN1 and SN2 reaction.	(08 Hours)
UNIT-II	Elimination Reactions and Aromatic substitution reactions Introduction, Mechanism of 1, 2-elimination reactions, The E2 mechanism, Evidence for E2 mechanism, Orientation and reactivity in E2:- Saytzeff rule, Hoffmann elimination. E1 mechanism, Evidence for E1 mechanism, Orientation in E1 General mechanism of Electrophilic substitutions, Friedel-Crafts alkylation and acylation reactions, nitration, halogenations, sulphonation, chloro-sulphonation.	(08 Hours)
UNIT-III	Haloalkanes and haloarenes Alkyl halides: Methods of preparation, nucleophilic substitution reactions – SN1 and SN2 mechanisms and effect of solvent etc. Aryl halides: Methods of preparation-diazonium salts. nucleophilic aromatic substitution. Relative reactivity of alkyl,	(08 Hours)

	allyl/benzyl, vinyl and aryl halides towards nucleophilic substitution reactions. Nitro and amino arenes: General reactions, Basicity of aminoarenes	
UNIT-IV	Ionic Liquids and Natural products Ionic Liquids: Introduction to Ionic liquids, structure and formation of ionic liquids, Physical properties of ionic liquids. Natural Products: Terpenoids :- Introduction, Isolation and Purification Classification of Terpenoids, General methods for structure determination of Terpenoids, Isoprene rule. Alkaloids :- Introduction, Extraction and Purification General properties of Alkaloids, General methods for structure determination of Alkaloids.	(08 Hours)
UNIT-V	Heterocyclic Compounds Definition, classification and nomenclature of heterocyclic compounds. Five membered heterocyclic compounds - Furan, Thiophene and Pyrrole Structure and Method of synthesis, Properties and reactions, Electrophilic orientation. Six membered heterocyclic compounds – Pyridine, Structure and Method of synthesis, Properties and chemical reactions.	(08 Hours)
UNIT-VI	Metal Organics Introduction to Organometallic Chemistry: Metal- carbon bond formation, factors affecting M-C bond formation; Transition metal- π alkene complexes: synthesis, reactions, bonding and stability, Metal Organometallics: Organo-Lithium Compounds and Organo-Magnesium Compounds Applications of organometallic compounds: in catalytic processes such as hydroformylation and hydrogenation.	(08 Hours)

Assignments

Six assignments to be given by the subject teacher (Theory)-one from each unit/one mini project with report-students can work in group of 4 Maximum.

Project Based Learning

Following is the list topic for project based learning (Not Limited to) based on the syllabus contents:

1	Prepare and give the composition and role of chelating compounds in engineering applications.
2	Prepare a safe way to make surface disinfectant at home.
3	Write a review paper based on the role of alkaloids and derivatives in the cosmetic, food, and pharmaceutical industries and get it published in reputed journal (eg. Google Scholar).
4	With the help of extraction from rose petals/discharge essential oil. How to present and introduce rose petals essential oil products?
5	Prepare a model based on structure and formation of ionic liquids.
6	Write a review paper based on diazonium salts with nucleophilic aromatic substitution
7	In practice and get it published in reputed journal (eg. Google Scholar).

*Students in a group of 3 to 4 shall complete any one project from the above list.

Term Work

1	Determination of R _f values and identification of organic compounds.
	1) To prepare tribromobenzene from aniline.
	2) To prepare p-nitro aniline from acetanilide.
	3) To separate green leaf pigments by thin layer chromatography and determine their R _f values
2	Determine the type and performs functional group test for the given organic compounds-
	1) Aldehydes
	2) Ketones
	3) Phenols
	4) Carboxylic acids

	5) Esters
	6) Ethers

Syllabus for Unit Test:	
Unit Test : I	Units : I, II, and III
Unit Test : II	UNIT : IV, V, and VI

INORGANIC CHEMISTRY

Designation: Basic Science

Pre-requisite Courses: Basic knowledge of Chemistry, Types of bonding, Periodic Table.

Teaching Scheme		Examination Scheme		Credits Allotted	
Lectures	: 03 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 04
Practical	: 02 Hours/Week	Continuous Assessment	: 40 Marks	Tutorial	: -
Total	: 05 Hours/Week	Term-work (TW)	: 25 Marks	Practical	: 01
		Practical/Oral	: 25 Marks	Total Credits	: 04
		Total	: 150 Marks		

Course Outcomes

1	Appraise the importance, formation and rearrangement of chemical bonding.
2	Infer the chemical bonding as per the molecular structure.
3	Justify the chemical bonding based on the properties of s, p, d, f elemental orbitals and chemistry of group IA, IIB, IIIB and VIIB.
4	Justify the importance of transition metal complexes and design their chemical interactions.
5	Appraise the importance, formation and rearrangement of chemical bonding based upon acid base chemistry.
6	Design a pathway for chemical transformation through chemical kinetics

Topics Covered

UNIT-I	Chemical Bonding Quantum mechanical methods in chemical bonding: molecular orbital theory, symmetry of molecular orbitals, MOs for homonuclear diatomic molecules, application of MO theory to heteronuclear diatomics, valence bond theory, hybridization, hybridization involving d orbitals, conjugated molecules, Huckel molecular orbital theory of conjugated systems, metallic bonding, band theory.	(06 Hours)
UNIT-II	Chemical Bonding and Molecular structure Orbital concept and its implications for periodicity and chemical reactivity, Lewis bonding and the derivation of Lewis structures, Octet rule and extensions to the octet rule, VSEPR theory, Valence Bond theory and hybrid orbitals, Molecular Orbital theory and delocalised orbitals.	(06 Hours)
UNIT-III	s, p, d, f elements and chemistry of group IA, IIB, IIIB and VIIB Periodic Table, s, p, d and f elements and their general properties, correlations among various properties. Main group Chemistry: Hydrogen, Chemistry of Group IA, II B and Group IIIB to VIIB elements and noble gases	(06 Hours)
UNIT-IV	Transition Metal Bonding in transition metal complexes: coordination compounds, crystal field theory, octahedral, tetrahedral and square planar complexes, crystal field stabilization energies, Jahn-Teller theorem, spectral and magnetic properties.	(06 Hours)

UNIT-V	Acid-base and solution Brønsted and Lewis acids, pH concept and pK values, Hydrolysis equilibria of weak acids and bases, Hydrolysis equilibria of polyprotic acids/bases, Speciation Diagrams, Hydrolysis equilibria in salt solutions, Buffers, Solubility and solubility product, Simple coordination (complex formation) equilibria, Simultaneous equilibria	(06 Hours)
UNIT-VI	Chemical kinetics Rate of reaction and rate laws, Elementary and non-elementary reactions, Empirical kinetics, First and second order reactions, Integral and differential evaluation, Isolation method, Initial rate method, Complex mechanisms, Parallel reactions, Reactions with equilibrium, Sequential reactions, Radical chain reactions, Derivation of a mechanistic rate law, Steady-state approximation, Quasi-equilibrium approximation, Reaction intermediates and transition states, Temperature dependence of rates (Arrhenius law).	(06 Hours)
Project based learning		
<ul style="list-style-type: none"> • Prepare a hardware model based on Huckel molecular orbital theory of conjugated systems. 		
<ul style="list-style-type: none"> • With the help of Hydrolysis equilibria, select for study various salt solutions. 		
<ul style="list-style-type: none"> • Write a review paper based on applications of Bonding in transition metal complexes and get it published in reputed journal (eg. Google Scholar). 		
<ul style="list-style-type: none"> • With the help of, d and f elements and their general properties, prepare a model based on correlations among various properties, 		
<ul style="list-style-type: none"> • Prepare a hardware model based on VSEPR theory. 		
<ul style="list-style-type: none"> • Write a review paper based on applications of MO theory to heteronuclear diatomics and get it published in reputed journal (eg. Google Scholar). 		
*Students in a group of 3 to 4 shall complete any one project from the above list.		
Term work		
Term work will consist of the experiments listed below, which are to be performed in laboratory by the students		
1	To determine the equivalent weight of the given metal (Zn or Mg) Eudiometrically.	
2	To determine distribution coefficient of iodine between water and CCl ₄ .	
3	To standardize Na ₂ SO ₄ solution by preparing K ₂ Cr ₂ O ₇ & to estimate % of copper from given solution.	
4	Heat of neutralization.	
5	Thermodynamic parameters.	
6	To determine loss in weight & percentage composition of NaHCO ₃ by gravimetric method.	
7	To determine water of crystallization of MgSO ₄ .xH ₂ O by gravimetric method.	
8	To determine water of crystallization of BaCl ₂ . xH ₂ O by gravimetric method.	
9	Determine λ-max for KMnO ₄ and find concentration of unknown solution by using colorimetric measurements.	
10	Determine surface tension of a given liquid by stalagmometer.	
11	Experiments based on chemical reaction equilibria	
12	Experiments based on chemical reaction kinetics	

13	Experiments based on electrolyte systems, acid- base and solution chemistry
14	Experiments based on surface and interfacial phenomena

Syllabus for Unit Tests	
Unit Test I	Units I, II, and III
Unit Test II	Units IV, V, and VI

BIOLOGICAL SCIENCES		
Designation: Professional Core		
Pre-requisite Courses: Biology, Chemistry		
Teaching Scheme	Examination Scheme	Credits Allotted
Lectures : 3 Hours/Week	End Semester Examination : 60 Marks	Theory : 03
Practical : 4 Hours/ Week	Internal Assessment : 40 Marks	TW/OR/PR : 02
Total : 7 Hours / Week	Term-work (TW) : 25 Marks	Total Credits : 05
	Practical/Oral : 25 Marks	
	Total : 150Marks	
Course Outcomes:		
After completion of the course students would be able to:		
1	Identify the microorganism and its structure.	
2	Learn the basics of biochemistry.	
3	Analyze the enzyme technology with different aspects.	
4	Identify the biomaterials and their applications.	
5	Learn the concept of Biodiversity and applications of biological science.	
6	Analyze the Bio safety framework in India.	
Topics covered		
UNIT-I	Molecular Cell Biology Introduction to cell; Eukaryotes and prokaryotes; Classification of microorganisms and important cell types; Structures of the bacterial cell; Classification and Identification of microorganisms; Cultivation of bacteria; Reproduction and growth.	(06 Hours)
UNIT-II	Biochemistry Biological oxidations; Photosynthesis; Carbohydrates, lipids and their metabolism; Structure of biomolecules; Intra and intermolecular forces; Introduction to kinetics of biological systems.	(06 Hours)
UNIT-III	Enzymes for Life Sciences Classification of enzymes; Specificity of enzyme action; Factors modifying enzyme activity; Biotechnological applications of enzymes in various industries; Enzyme Immobilization.	(06 Hours)
UNIT-IV	Bio-materials Classification of biomaterials; Comparison of properties of some common biomaterials; Effects of physiological fluid on the properties of biomaterials; Biodegradable materials; Introduction to bio-materials in medicine.	(06 Hours)
UNIT-V	Biodiversity and Applications of Biological science Components of Biodiversity; Biodiversity crisis and biodiversity loss, Importance of biodiversity in daily life; Biodiversity and climate change; Biofuel; Bio fertilizers; Biocides; Application in food industry.	(06 Hours)
UNIT-VI	Biosafety-regulatory Framework in India Food Adulteration Act (1955), Standard safety methods for handling microorganisms; National Environment Policy (2006); Storage of hazardous microorganisms/genetically engineered organisms or cells; Case studies for	(06 Hours)

	handling of various microorganisms.	
*Project Based Learning		
1	Identification of microorganisms according to structure of bacterial cell	
2	Learn to cultivate bacteria	
3	Analyze enzyme applications in medical field	
4	Analyze enzyme applications in chemical engineering	
5	Analyze enzyme applications in food industry	
6	Illustration of Biomaterial applications in medical field	
7	Learn the concept of Biodiversity and climate change	
8	Analyze application of biofuel	
9	Analyze application of biocides in agricultural industry	
10	Learn handling of microorganisms at various conditions	
*Students in a group of 3 to 4 shall complete any one project from the above list.		
Term Work		
Term work will consist of the experiments listed below, which are to be performed in laboratory by the students.		
1	Enzyme catalysis	
2	Enzyme activity assay	
3	Yeast fermentation	
4	Enzyme concentration	
5	Substrate concentration effect on enzyme activity	
6	Temperature effect on enzyme activity	
7	Effect of pH on enzyme activity	
8	Effect of inhibitors on the enzymatic activity	
9	Effect of inhibitors on the enzyme activity

MATERIAL AND ENERGY BALANCE CALCULATIONS

Designation: Professional Core

Course Pre-requisites: Basic knowledge of chemistry

Teaching Scheme		Examination Scheme	Credits Allotted		
Lectures	: 04 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 04
Total	: 04 Hours/Week	Internal Assessment	: 40 Marks	Total Credits	: 04
		Total	: 100 Marks		

Course Outcomes:

1	Solve problems based on basic chemical calculations with considering the concepts of units and dimensions.
2	Estimate material balance calculations without chemical reaction for the systems involved in various unit operations.
3	Estimate material balance calculations involving chemical reaction for the unit processes carried out in chemical industry.
4	Elaborate the concept of recycle, bypass, purge operations and solve problems based on humidification, recycle, bypass and purge operations.
5	Interpret the concept of energy balance and solve the problems based on energy balance calculations.
6	Evaluate gross and net calorific values of fuel and solve the problems based on them.

Topics covered

UNIT-I	Basic Chemical Calculations Units and dimensions; Mole, atomic mass, and molar mass concept; Gas mixtures; Gas –liquid mixtures; Joule Thomson effect; Basic composition calculations for homogeneous two phase and three phase systems.	(08 Hours)
UNIT-II	Material Balances without Chemical Reactions Generalized law of conservation of mass; Mass conservation without chemical reaction; Mass balances for unit operations encountered in chemical process industry : Distillation, extraction, evaporation, crystallization, blending etc.	(08 Hours)
UNIT-III	Material Balances involving Chemical Reactions Generalization of law of conservation of mass involving chemical reaction and its simplification; Chemical equations and stoichiometry; Basic concepts: conversion, yield, selectivity; Material balance for unit processes encountered in chemical process industry: nitration, esterification, acylation, sulfonation etc.	(08 Hours)
UNIT-IV	Recycle, Bypass and Purge Operations Necessity of recycle, bypass and purge streams; Basic calculations of recycle, bypass and purge streams for unit operations and unit processes; Industrial examples of recycling, bypassing and purging with complete mass balance viz. biofuel synthesis, food processing etc.; Humidification operation.	(08 Hours)
UNIT-V	Energy Balance Basic concepts; Heat capacity; Sensible heat and latent heat: Clausius-Clapeyron equation; Standard heat of formation, combustion and reaction; Hess's law; General equation of energy balance; Energy balance approach and calculations for exothermic and endothermic reactions with industrial examples; Steam table and its utility; Utility energy balance calculations; Simultaneous heat and energy balance; Humidification operation.	(08 Hours)

UNIT-VI	Fuels and Combustion Types of fuels: solid, liquid and gas; Calculations of energy content of fuel; Analysis of fuel; Oxygen requirement and excessity; Adiabatic flame temperature calculations; Endothermic and exothermic reaction; Energy analysis and calculations.	(08 Hours)
Project Based Learning:		
1.	Investigate and prepare a report on mass and energy balance for any one of following unit operations for given system.	
	a) Distillation	
	b) Evaporation	
	c) Extraction	
	d) Crystallization	
	e) Drying. etc	
2.	Investigate and prepare a report on mass and energy balance for any one of following unit processes for given system. It may include overall energy and/or mass balance over a given chemical process equipment.	
	a) Nitration	
	b) Esterification	
	d) Fermentation	
	e) Sulfonation etc.	
3.	Visit chemical industry and prepare a detailed report on various unit operations and unit processes used in industry along with their mass and energy balance.	
4.	Measure the calorific values of any two types of fuel and prepare an assessment on the factors affecting calorific value.	
5.	Prepare an report and present the mass and energy balance for unit operations and unit processes with chemical reaction carried out in chemical industry.	
6.	Solve last five years GATE question papers with reference to material and energy balance calculations.	
7.	Students have to study any five NPTEL videos related to material and energy balance calculations and prepare/present power point presentation.	
8.	Technical interview based on knowledge of material and energy balance calculations.	
9.	Prepare models for recycle, bypass and purge operations carried out in chemical industry.	
10.	With the help of this subject knowledge, write a report on how you would apply your concepts in industry.	
11.	Prepare a report on unit operations which are newly introduced in the current year.	
12.	Write a report on your visit to research and development laboratory of national/international repute.	
Students in a group of 3 to 4 shall complete any one project from the above list. In addition to these above stated topics concern faculty member may design his/her won topics.

Syllabus for Unit Test:

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

JAVA PROGRAMMING

Designation: Computing

Pre-requisite Courses: Basic knowledge of computer fundamentals, C/C++ programming.

Teaching Scheme	Examination Scheme	Credits Allotted
Practical : 04 Hours/Week	TW : 50 Marks	TW/OR/PR : 02
	Practical/Oral : 50 Marks	Total Credits : 02
	Total : 100 Marks	

Course Outcomes

- | | |
|---|---|
| 1 | Elucidate basic OOPs concepts and requirement of Java |
| 2 | Clarify class fundamentals |
| 3 | Apply OOPs concept using inheritance |
| 4 | Elucidate runtime exceptions |
| 5 | Comprehend reading and writing files in java |
| 6 | Clarify collection of objects with searching and sorting. |

Topics Covered

UNIT-I	<p>Introduction to Java : OOPs concepts; Need of Java; Java Virtual Machine (JVM); Java Development Kit (JDK); byte code; variable; Data types, Handling strings, arrays, operators, and control flow statements: command line arguments, Automatic type promotion.</p> <ol style="list-style-type: none"> 1. Programs based on if-else, switch-case statements. 2. Programs based on loop statements. 3. Programs based on arrays.
UNIT-II	<p>Class Fundamentals: Java classes and objects; Methods and constructors; 'this' keyword; Method accepting and returning objects; Method overloading and constructor overloading; static and final keywords; Nested classes.</p> <ol style="list-style-type: none"> 4. Programs based on method accepting and returning objects. 5. Programs based on method overloading and constructor overloading. 6. Programs based on object arrays.
UNIT-III	<p>Inheritance: Simple inheritance; Member access in inheritance; super class variable can refer subclass object; super keyword; Multilevel hierarchy of inheritance; Method Overriding; Dynamic method dispatch (Run time polymorphism); Abstract classes; Interfaces; DMD using abstract classes and interfaces; Interfaces can be extended; final keyword to restrict inheritance; Creating packages.</p> <ol style="list-style-type: none"> 7. Programs based on multilevel hierarchy of inheritance. 8. Programs based on super keywords. 9. Programs based on dynamic method dispatch (DMD).
UNIT-IV	<p>Exception handling: Exception introduction; Uncaught exception; try-catch blocks; Describing an exception; 'throw' keyword; 'throws' keyword; finally keyword; Manual exception.</p> <ol style="list-style-type: none"> 10. Programs based on dynamic method dispatch using abstract classes and interfaces 11. Programs based on manual exception.

	12. Programs based on Buffered Reader class.
UNIT-V	IO Mechanism: Byte stream; Character stream; Reading data from console: BufferedReader, DataInputStream class; Reading and writing files: FileInputStream and FileOutputStream class. 13. Programs based on DataInputStream class. 14. Programs based on FileInputStream class. 15. Programs based on File Output Stream class.
UNIT-VI	Collection Framework: Equals () and hashCode () methods, instanceof operator; Lists; Sets; Maps; Sorting and searching. 16. Programs based on Sorting. 17. Programs based on searching.

In addition to these above stated programs / practicals concern faculty member may design his/her own programs / practicals.

Term Work

Term work will consist of the programs/practicals listed above, out of which any ten programs/practicals are to be performed in laboratory by the students.

CHEMICAL ENGINEERING THERMODYNAMICS- I		
Designation: Professional Core		
Pre-requisite Courses: Basic knowledge of chemistry, physics and mathematics, Material and energy balance calculations.		
Teaching Scheme	Examination Scheme	Credits Allotted
Lectures : 04 Hours/Week	End Semester Examination : 60 Marks	Theory : 04
Tutorial : 01Hours/Week	Internal Assessment : 40 Marks	Tutorial : 01
Total : 05 Hours/Week	Total : 100 Marks	Total Credits : 05
Course Outcomes		
1	Differentiate between energy, work and heat	
2	Estimate energy requirement for a system using first law of thermodynamics	
3	Estimate efficiency of heat engines and entropy of system using second law of thermodynamics	
4	Estimate pressure, volume and temperature of fluid.	
5	Estimate thermodynamic properties of pure fluids using pressure, volume and temperature conditions.	
6	Apply laws of thermodynamics to refrigeration and steam power plants	
Topics Covered		
UNIT-I	Basic concepts of Thermodynamics Scope of Thermodynamics; Macroscopic and microscopic Thermodynamics; Dimensions and units; Thermodynamic properties: pressure, temperature, volume; Work, energy and heat; Thermodynamic systems: Closed, open, and isolated systems; Concept of continuum; Intensive and extensive properties; State function and path function; Thermodynamic equilibrium: Mechanical, thermal and chemical; Phase rule; Reversible and irreversible processes.	(08 Hours)
UNIT-II	First Law of Thermodynamics and its applications Joule's experiment and internal energy; First law of Thermodynamics and its generalized mathematical form; Enthalpy; Heat Capacity; Constant volume and constant pressure processes; Applications of first law of Thermodynamics: Mass and energy balance equations for flow process; Limitations of first law of Thermodynamics.	(08 Hours)
UNIT-III	Second Law of Thermodynamics Necessity of second law of Thermodynamics; Kelvin-Plank and Clausius statements of second law of thermodynamics; Heat engine: Carnot cycle and efficiency; Entropy; Clausius entropy inequality; Entropy change of ideal gas; Mathematical statement of second law of thermodynamics; Third law of thermodynamics and its mathematical statement.	(08 Hours)

UNIT-IV	Volumetric Properties of Pure Fluids PVT behaviour of pure substance: PT and PV diagrams; Basic equation of state; Ideal gas and real gas; PVT behaviour of ideal gas; Thermodynamic relations for ideal gas for isochoric, isobaric, isothermal, adiabatic, and polytropic processes; PVT behaviour of real gas: (i) the Virial equations, (ii) two parameter equations such as van der Waal equation, Redlich-Kwong equation, etc. (iii) compressibility factor: two and three parameter theorems of corresponding state.	(08 Hours)
UNIT-V	Thermodynamic Properties of Fluids Fundamental property relations for homogeneous phases: (i) Internal energy, Enthalpy, Helmholtz energy, and Gibbs energy, (ii) Maxwell relationships; Two-phase systems: Clausius - Clapeyron equation and Antoine equation; Fugacity and fugacity coefficient: Estimation of fugacity of pure gas; Thermodynamic diagrams: (i) temperature-entropy, (ii) pressure-enthalpy, and (iii) enthalpy-entropy (the Mollier diagram).	(08 Hours)
UNIT-VI	Major Applications of Laws of Thermodynamics (i) Refrigeration Carnot theory and ideal efficiency for refrigeration; Industrial refrigeration cycles and efficiency calculations: Vapor compression cycle and gas absorption cycle. (ii) Steam power plant Carnot theory and ideal efficiency for steam power plant; Industrial steam power plants and efficiency calculations: Rankine cycle, reheat cycle, and regenerative cycle.	(08 Hours)

Project Based Learning

1.	Draw P-T and P-V diagrams for pure substances.
2.	Numerical involving Pure Fluid Properties Coupled to 1st and 2nd Laws.
3.	Solving numerical based on application of thermodynamics to transient open and closed systems
4.	Students have to study any five NPTEL videos related to Chemical Engineering Thermodynamics I and prepare/present power point presentation.
5.	Group discussions on any of the following topics: a) Importance of Chemical Engineering Thermodynamics in chemical industries. b) Practical applications involving various thermodynamic processes. c) Ideal Gas, Real Gas, Ideal gas mixture, Ideal solution.
6.	Questions involving first law applied to pure component systems.
7.	Solving numerical in connection with entropy changes of ideal gas for various thermodynamic processes.
8.	Solving numerical based on Refrigeration and Liquefaction.
9.	Enhancement in collaborative learning is done through, group assignments that will be given to

	encourage students to work with classmates to discuss and complete homework assignments.
10.	Solve question papers of CET I of previous THREE years.
11.	Unsolved numerical from the reference books on various topics studied.
12.	Preparation of a brief report on applicability of equations of states (EOS) in chemical engineering systems.
