# 1: INTRODUCTION

## BHARATI VIDYAPEETH

**Bharati Vidyapeeth**, the parent body of **Bharati Vidyapeeth (Deemed to be University)** was established on 10<sup>th</sup> May, 1964 by **Dr. Patangrao Kadam** with the objective of bringing about intellectual awakening and allround development of the people of our country through education.

Bharati Vidyapeeth is now a leading educational institution in the country, which has created a history by establishing within a short span of 53 years or so 180 educational institutions imparting education from the pre-primary stage to post graduate stage. Our colleges and institutions of higher education impart education in different disciplines including Medicine, Dentistry, Ayurved, Homoeopathy, Nursing, Arts, Science, Commerce, Engineering, Pharmacy, Management, Social Sciences, Law, Environmental Science, Architecture, Hotel Management and Catering Technology, Physical Education, Computer Science, Library Science, Information Technology, Biotechnology & Agriculture, Performing Arts etc.

These educational institutions which have achieved an acclaimed academic excellence cater to the educational needs of thousands of students coming from different parts of India and also abroad. Our teaching faculty includes highly qualified, experienced, dedicated and student-caring teachers. These educational institutions are located at various places viz. Pune, Navi Mumbai, Kolhapur, Solapur, Sangli, Karad, Panchgani, Jawhar and New Delhi. The spectacular success achieved by Vidyapeeth is mainly a creation of unusual foresight, exceptionally dynamic leadership and able guidance of the founder of Vidyapeeth, **Dr. Patangrao Kadam**. It has been our constant endeavour to impart high quality education and training to our students and therefore it is no wonder that our institutions have become nationally known for their academic excellence. In recognition of the academic merit achieved by its institutions and potential for development which they have, the Department of Human Resource Development, Government of India and the University Grants Commission of India have accorded the status of a deemed to be university to Bharati Vidyapeeth with its twenty nine constituent units.

Besides these 180 educational institutions, Bharati Vidyapeeth has also been successfully running a Co-operative Bank, Co-operative Consumer Stores, Co-operative Poultry, Co-operative Sugar Factory, Co-operative Spinning Mill, Charitable Hospitals and Medical Research Centre and the like.

## **1.2 : BHARATI VIDYAPEETH (DEEMED TO BE UNIVERSITY), PUNE, INDIA**

*Accredited (3<sup>rd</sup> cycle) with 'A+' Grade by NAAC  
'A' Grade University Status by MHRD, Govt. of India  
Accredited (2004) & Reaccredited (2011) with 'A' Grade by NAAC*

Bharati Vidyapeeth (Deemed to be University) came into existence in April, 1996, when the Ministry of Human Resource Development, Government of India, in exercise of the powers under section 3 of the University Grants Commission Act conferred the status of University to 12 institutions of Bharati Vidyapeeth on the advice of the University Grants Commission, the apex body concerned with higher education in India which made assessment of the academic excellence achieved by the institutions through a committee of experts. Subsequent to that, the Government of India, vide its various notifications brought several other institutions of Bharati Vidyapeeth under the ambit of this University. As on today the University is having 29 constituent units conducting study programmes in different disciplines, including Modern Medicine, Dentistry, Ayurved, Homoeopathy, Nursing, Arts, Science, Commerce, Engineering, Pharmacy, Management, Social Sciences, Law, Environment Science, Architecture, Hotel Management Tourism and Catering Technology, Physical Education, Computer Science, Library Science and Information Technology etc.

Bharati Vidyapeeth, the parent body of Bharati Vidyapeeth University was established in May, 1964 by Dr. Patangrao Kadam with the objective of bringing about intellectual awakening and all round development of people of our country through education. Bharati Vidyapeeth is now a leading educational institution in the country, which has created history by establishing within a span of 50 years, 180 educational institutions imparting education from the pre-primary to the post graduate stage.

These educational institutions which have achieved an acclaimed academic excellence cater to the educational needs of thousands of students coming from different parts of India and abroad. Our teaching faculty includes highly qualified, experienced, dedicated and student-caring teachers. These educational institutions are located at various places viz. Pune, Navi Mumbai, Kolhapur, Solapur, Sangli, Karad, Panchagani, Jawhar and New Delhi. The spectacular success achieved by Vidyapeeth is mainly the result of unusual foresight, exceptionally dynamic leadership and able guidance of the founder of Vidyapeeth, Dr. Patangrao Kadam. It has been our constant endeavour to impart high quality education and training to our students and we have achieved success in these pursuits so that our institutions have earned reputation and high acclaim for their high academic standard.

The University was accredited by the National Assessment and Accreditation Council (NAAC) with the prestigious 'A' grade in 2004. Once again the university is reaccredited with 'A' grade in 2011. In March 2017, under the third cycle of assessment, the university is accredited with 'A+' grade by NAAC. The Ministry of HRD Govt. of India has awarded 'A' Grade status to the University. Besides, the Institute of Management and Research, New Delhi, Poona College of Pharmacy, Pune and College of Engineering, Pune have received accreditation for their various courses by the National Board of Accreditation.

One of the distinctive features of this University is that it has three self-financing research institutes, which are involved in sophisticated researches in health related sciences, pharmaceutical sciences and social sciences.

The University has established its academic reputation so much that it is being preferred for admission by the students not only from India, but from abroad. At present there are about 734 overseas students coming from 45 countries.

It had been a long standing dream of our founder to get the status of a University to Bharati Vidyapeeth. That dream was realised when the Ministry of Human Resource Development (Department of Education, Government of India) on the recommendations of the University Grants Commission, New Delhi through their notification No. F.9-15/95-U.3 dated 26th April, 1996 declared a cluster of institutions of Bharati Vidyapeeth at Pune as Deemed to be University.

#### Present Constituent Colleges of the University

1. Medical College, Pune
2. Dental College & Hospital, Pune
3. College of Ayurved, Pune
4. Homoeopathic Medical College, Pune
5. College of Nursing, Pune
6. Yashwantrao Mohite College of Arts, Science and Commerce, Pune
7. New Law College, Pune
8. Social Sciences Centre (M.S.W.), Pune
9. Yashwantrao Chavan Institute of Social Science Studies & Research, Pune
10. Research and Development Centre in Pharmaceutical Sciences & Applied Chemistry, Pune
11. College of Physical Education, Pune
12. Institute of Environment Education & Research, Pune
13. College of Engineering, Pune
14. Poona College of Pharmacy, Pune
15. Institute of Management & Entrepreneurship Development, Pune.
16. Rajiv Gandhi Institute of Information Technology & Bio-Technology, Pune

17. Interactive Research School for Health Affairs, Pune.
18. Medical College & Hospital, Sangli.
19. Dental College & Hospital, Navi Mumbai.
20. Institute of Management & Research, New Delhi;
21. College of Architecture, Pune;
22. Institute of Hotel Management & Catering Technology, Pune;
23. Yashwantrao Mohite Institute of Management, Karad;
24. Institute of Management, Kolhapur;
25. Institute of Management & Rural Development Administration, Sangli.
26. Abhijit Kadam Institute of Management and Social Sciences, Solapur.
27. Dental College & Hospital, Sangli
28. College of Nursing, Sangli
29. College of Nursing, Navi Mumbai.

Thus, there are 29 institutions which are the constituent units of Bharati Vidyapeeth Deemed University.

As is widely known, the Central Govt. had constituted a high power Task Force consisting of very eminent and experienced academicians to evaluate the academic performance of deemed universities in the country. The Task Force appreciated the report submitted by the University and also the presentation made by Prof. Dr. Shivajirao Kadam Vice Chancellor. The Task Force noted the University's excellent performance with regard to teaching-learning process, research, scientific publications by faculty and their impact and potential, innovative academic programmes, enriched infrastructure and recommended to the Ministry of Human Resources Development, Govt. of India to award 'A' Grade status. The Central Government has accepted the recommendation of the Task Force and awarded 'A' Grade status to this University.

Ours is the only University established under section 3 of the U.G.C. Act having under its umbrella institutions of diverse disciplines of professional, technical and traditional categories such as Medicine, Dentistry, Physical Education, Natural and Physical Sciences, Social Sciences, Commerce, Law and Humanities, Pharmaceutical Sciences, Management Studies, Engineering and Technology. The UGC has recognised this University u/s 12 'B' of UGC Act.

This University is a Member of Association of Indian Universities and also a member of Association of Commonwealth Universities.

### 1.3 : YASHWANTRAO MOHITE COLLEGE OF ARTS, SCIENCE & COMMERCE, PUNE

Bharati Vidyapeeth, the parent institution has created a landmark in the history of higher education by establishing three institutes in June 1978 and Yashwantrao Mohite College is first of them. At present, the college is one of the constituent units of Bharati Vidyapeeth Deemed University. We have pleasure to introduce ourselves as one of the very few colleges in India which has been accredited in 2004 and re- accredited in 2011 with 'A' grade and accredited (3rd cycle) with 'A+' grade in 2017 by the National Assessment and Accreditation Council, Bangalore.

The college offers under graduate and post graduate programmes in various disciplines of Arts, Science, Commerce and Computer Science leading to B.A., B.Lib & I.Sc., B.Sc., B.Sc. (Computer Science), B.Com., M.A. (English), M.A. (Economics), M.Lib & I.Sc, M.Sc. (Physics), M.Sc. (Analytical Chemistry), M.Sc. (Organic Chemistry), M.Sc. (Microbiology), M.Sc. (Computer Science) and M.Com. degrees. The college is recognised Research Centre for Ph.D. degrees in English, Economics, Physics, Chemistry, Botany, Microbiology, Computer Science and Commerce.

The special feature of the college is that along with degree courses, the College also conducts two diploma programmes: (1) Diploma in Banking and (2) Diploma in Marketing, which have proved of great help to the students for their placements.

The college promotes national integration by admitting the students from 29 states and has attained international status by accommodating the students from 24 countries. The welfare of the students is always the prime concern of the college. Several activities are organized to support and enhance the capabilities of the students. Publication of the annual number Yashobharati, arranging Cultural Festival '*Sanskriti*' and conducting National Level General Knowledge Test, as well as organization of National / International Seminars and workshops every year are some of the features of the college.

The college is honoured with 'Best NSS UNIT Award' and the Programme Officer received 'Best NSS Programme Officer Award' as well as 5 students with 'Best NSS Volunteer Award' by Government of Maharashtra. The sports department of the college has created landmarks in the history. Sixteen of our students are felicitated with the highest honour in the field of sports offered by the state government i. e. 'Shiv Chhatrapati Sports Award' and the college has contributed to several National teams by participation of the students.

The college also provides the hostel facilities to both **boys and girls** students. The facilities like state-of-art laboratories, excellent library, health care centre, seminar hall, English language laboratory, Commerce laboratory, indoor and outdoor game facilities and gymnasium are provided to the students.

## **2 : ADMISSION TO THE COLLEGE (UG)**

  - e) Statement of Marks of previous examination
  - f) Character Certificate
  - g) Medical and H.I.V. Test (for international students)
- 6) Admission will be provisional till the student produces final eligibility certificate from Bharati Vidyapeeth Deemed University.
- 7) Please retain a set of xerox copies you are submitting to college.

## **2.1 : ELIGIBILITY FOR ADMISSION TO FIRST YEAR**

### **B.A. / B.Com. / B.Sc. / B.Sc. (Computer Science)**

#### **1. Eligibility for admission to B.A. degree programme:**

A candidate who has passed the Higher Secondary School Certificate Examination of the Maharashtra State Board or an equivalent examination of any other statutory Board or University with English as a passing subject will be admitted to the first year of this course.

#### **2. Eligibility for admission to B.Lib. & I.Sc. Course:**

Any graduate of this University or any other recognized University shall be admitted to B.Lib & I.Sc. Course.

#### **3. Eligibility for admission to B.Com. degree programme:**

A candidate who has passed the Higher Secondary School Certificate Examination in Commerce or Science of the Maharashtra State Secondary and Higher Secondary Board or an equivalent of any other Statutory Board or University with English as a passing subject will be admitted to the first year of this course.

#### **4. Eligibility for admission to B.Sc. degree programme:**

- Higher Secondary School Certificate Examination (10+2) of the Maharashtra State Board or its equivalent examination of any other statutory Board/University with English and with any three Science subjects such as (i) Physics (ii) Chemistry (iii) Biology (iv) Mathematics (v) Geography (vi) Geology etc
- Higher Secondary School Certificate Examination (10+2) with English and with any one of the following vocational subjects in technical group of +2 levels.
- Diploma in Pharmacy, Diploma in Engineering (polytechnic) or its equivalent examination recognized by MBTE, Mumbai or its equivalent of any other statutory Board or University.

<b>Subject code</b>	<b>Subject</b>
79	Auto Electrical
A1	Electrical Maintenance
A2	Mechanical Maintenance
A4	General Civil Engg.
C2	Electronics
C3	Chemical Plant Operation
C5	Elementary Laboratory Technology

<b>Subject code</b>	<b>Subject</b>
D9	Computer Science
J1/J2/J3	Electronics Technology
J4/J5/J6	Maintenance & Repairs of Electrical Domestic Appliances
K1/K2/K3	Auto Engg. Technician
P1/P2/P3	Medical Lab. Technician
P4/P5/P6	X-ray Technician
P7/P8/P9	Ophthalmic Technician
T1/T2/T3	Repair, Maintenance & Rewinding of Electrical Motors.

**5. Eligibility for admission to B.Sc. Computer Science degree programme:**

- A candidate who has passed the Higher Secondary School Certificate Examination of the Maharashtra State Board or Higher Secondary Examination of its equivalent of any other statutory Board or University and has passed in English and in two Science subjects (i) Physics (ii) Mathematics shall be eligible for admission to the First year B.Sc. (Computer Science) Degree course.
- Candidate who has passed H.S.C. examination (10+2) with English and any one of the following vocational subjects is also eligible for admission to the F.Y.B.Sc. (Computer Science) course.

<b>Subject code</b>	<b>Subject</b>
97	Information Technology
D9	Computer Science
C2	Electronics
J1/J2/J3	Electronics Technology

- Also student who has completed Diploma course in Engineering (Polytechnic) Computer Science, Electronics and Information Technology or its equivalent examination recognized by MBTE, Mumbai or its equivalent of any other statutory Board or University.

### **3 : COURSE STRUCTURE (UG PROGRAMME)**

**(CBCS 2018 COURSE)**

**(To be implemented from June 2018)**

#### **3.1 : Bachelor of Arts (B.A.)**

##### **Course Structure and scheme of credits of B.A. Course**

The B.A. programme will be of three years duration consisting of six semesters and of minimum 150 Credits: Semester I (24 Credits), Semester II (26 Credits), Semester III (26 Credits), and Semester IV (24 Credits) Semester V (26 Credits), and Semester VI (24 Credits). In all six Semesters, there will be six theory courses (Core and Elective Courses) of 04 credits each and one theory course (Ability Enhancement course OR Skill Enhancement course) in Semester II, Semester III and Semester V of 02 credits each. All 36 Core and Elective Courses papers will have 100 marks each out of which 40 marks will be for Internal Assessment and 60 marks for University Examination. The Ability Enhancement courses OR Skill Enhancement Courses will have 50 marks each out of which 20 marks will be for Internal Assessment and 30 marks for University Examination. Thus B.A. degree examination, six Semesters shall be of 3700 marks and of 150 credits altogether. The following shall be the course structure:

##### **F.Y.B.A.: (Semester I & II)**

A student joining the First year B.A. course shall offer six subjects mentioned below. He/she is advised to select the subjects of First Semester very carefully because he/she has to select subjects for the following semesters from the subjects offered at First Semester.

- 1) Subject in Core course is compulsory.
- 2) A student has to offer five subjects from Elective Courses given above.

F.Y.B.A. Semester I			F.Y.B.A. Semester II		
Subject Type	Code	Title of the paper	Subject Type	Code	Title of the paper
Core Course	A101	1. Compulsory English – I	Core Course	A201	1. Compulsory English – II
Elective Courses	<b>Any Five from the following:</b>		Elective Courses	<b>Any Five from the following:</b>	
	A111	1. English (G1) – I		A211	1. English (G1) – II

			Skill Enhancement Course	SEC21	Basics of Information Technology

### S.Y.B.A.

A student studying at Semester III & IV for the B.A. Degree shall study the subject as given below:

- 1) Compulsory English from Core courses.
- 2) He/she has to select one group as a special subject from the given Core courses groups and which is included in the subjects offered at the First Semester. There will be three papers of special subject.

- 3) He/she has to select two general subjects i.e. First paper in each Special Group and which is not included in Core courses and from the subjects offered at the First Semester.

### ENVIRONMENT STUDIES

As per the order of Honourable Supreme Court of India, this course is compulsory for every undergraduate student. The college is implementing this module course in Environment Studies in the second year of all degree courses. There will be 02 lectures per week for this course. The examination will be conducted at the end of Semester IV and will carry 50 marks. These marks will be converted into the grades accordingly. These grades will be mentioned in the degree Grade Sheet. It is mandatory for every student to pass this course. If any student fails in this course, the result of his/her degree course will be withheld by the university.

		AEC 51		Soft Skills			

### **3.2 Bachelor of Library & Information Science (B.Lib & I.Sc.)**

#### **Eligibility for admission to B.Lib. & I.Sc. Course**

Any graduate of this University or any other recognized University shall be admitted to B.Lib & I.Sc. Course.

#### **Course Structure of B.Lib & I.Sc. Course**

The B.Lib & I.Sc. programme will be of one year duration consisting of two semesters and of minimum 40 Credits: Semester I (20 Credits) and Semester II (20 Credits). In first Semester, there will be four theory papers of 04 credits each and two theory paper of 2 credit. In Second Semester, there will be three theory papers of 04 credits, three practical paers of 2 credits and one clipping project / viva voce of 2 credits. All 13 papers will have 100 marks each out of which 40 marks will be for Internal Assessment and 60 marks for University Examination. Thus B.Lib & I.Sc. degree examination, two Semesters shall be of minimum 1250 marks and of minimum 40 credits altogether. The following shall be the course structure:

**B.Lib & I.Sc. Semester – I**

**B.Lib & I.Sc. Semester – II**

Subject Type	Code	Title of the paper	Subject Type	Code	Title of the paper	
Core: Compulsory	BL 11	Foundation of Library & Information Science	Core: Com- pulsory	BL 21	Information Services & System	
	BL 12	Document Description: Cataloguing Theory		BL 22	Knowledge Organization Information Processing Classification Theory	
	BL 13	Information Sources & Reference Services		BL 23	Information Technology Basic Theory	
	BL 14	Management of Libraries & Information Centers		BL 24	Information Technology Practical	
Core: Elective	<b>Any one from the following:</b>			BL 25	Knowledge Organization Information Processing Classification Practical	
	BL 15	Library System		BL 26	Information Retrieval: Library Cataloguing Practical	
	BL 16	Public Libraries		BL 27	Information Sources & references Services : News Paper Clipping Project	
Skill Enhance ment Course	BL 17	Soft Skills				

\* For paper BL 27 Information Sources & Reference Services : News Paper Clipping Project internal evaluation is to be done by evaluation of the plan of the project submitted by the student. A student has to submit project plan with in a month from the begining of Semester II

### 3.3 : Bachelor of Science (B.Sc.)

#### F.Y.B.Sc.(Sem. I and II)

#### CORE SELECTIVE GROUPS

(SELECT ANY ONE GROUP FROM THE FOLLOWING)

Group I :- Physics, Chemistry, Mathematics and Statistics (PCMS)

Group II :- Physics, Mathematics, Statistics and Computer Application (PMSCA)

Group III :- Physics, Chemistry, Botany and Zoology (PCBZ)

Group IV :- Chemistry, Botany, Zoology and Microbiology (CBZM)

Group V: - Chemistry, Zoology, Microbiology and Geography (CZMG)

				<b>This course is compulsory for all the students.</b>	
			Core Course	UG-SEC-21	Renewable Energy And Energy Harvesting

## S.Y.B.SC. (SEM. III AND IV)

### CORE SELECTIVE GROUPS

(SELECT ANY ONE GROUP FROM THE FOLLOWING)

Group I :- Physics, Chemistry and Mathematics (PCM)

Group V :- Chemistry, Botany and Zoology (CBZ)

Group VI :- Chemistry, Botany and Microbiology (CBM)

Group VII :- Chemistry, Zoology and Microbiology (CZM)

### ENVIRONMENT STUDIES

As per the order of Honourable Supreme Court of India, this course is compulsory for every undergraduate student. The college is implementing this module course in Environment Studies in the second year of all degree courses. There will be 02 lectures per week for this course. The examination will be conducted at the end of Semester IV and will carry 50 marks. These marks will be converted into the grades accordingly. These grades will be mentioned in the degree Grade Sheet. It is mandatory for every student to pass this course. If any student fails in this course, the result of his/her degree course will be withheld by the university.

**Semester III**

**Semester IV**

**(From the Academic Year 2019-20)**

### Environment Studies

As per the order of Honourable Supreme Court of India, this course is compulsory for every undergraduate student. The college is implementing this module course in Environment Studies in the second year of all degree courses. There will be 50 lectures for this course. The examination will be conducted at the end of Semester IV and will carry 50 marks. These marks will be converted into the grades accordingly. These grades will be mentioned in the degree marksheet. If any student fails in this course, the result of his/her degree course will be withheld by the university.

### **3.5 : Bachelor of Commerce (B.Com.)**

#### **1. Course Structure and Scheme of Credits of B. Com. Course:**

The B. Com. programme will be of three years duration consisting of six semesters and of minimum 158 credits: Semester I (28 Credits), Semester II (30 Credits), Semester III (26 Credits), and Semester IV (24 Credits) Semester V (26 Credits), and Semester VI (24 Credits). In Semester I and II there will be seven theory papers (Core and Elective Courses) and Semester III to VI, there will be six theory papers (Core and Elective Courses) of 4 credits each. In addition, there will be one theory course (Ability enhancement or skill enhancement course) each in Semester II, Semester III and Semester V of 2 credits each. All 38 (Core and Elective Courses) papers will have 100 marks each out of which 40 marks will be for Continuous Assessment and 60 marks for University Examination. All Ability enhancement or skill in enhancement course will have 50 marks each out of which 20 marks will be for Continuous Assessment and 30 marks for University Examination. Thus, B. Com. Degree examination, six Semesters shall be of 3950 marks and of 158 credits altogether.

A student joining B. Com. Course should note that subjects in Core Courses are compulsory. In addition, he has to offer any subject or any one group from the Elective Courses. Fundamental Course is compulsory for all the students.

The following shall be the course structure :

F.Y.B.Com. Semester I			F.Y.B.Com. Semester II

## 4 : SCHEME OF EXAMINATION (2018 Course)

### FOR ALL UNDERGRADUATE PROGRAMMES

#### ● **University Terms**

The dates for the commencement and conclusion of the First and the Second terms shall be fixed by the University authorities. The terms can be kept by students, who have registered their names with the University.

#### ● **Scheme of Examination**

The assessment of students in the academic session 2018-19 and thereafter shall be based on-

- (a) University Examinations (UE)
- (b) Internal Assessment (IA)
- (c) Choice Based Credit System (CBCS) and
- (d) Semester Grade Point Average (SGPA) and Cumulative Grade Point Average System (CGPA).

For each paper of 100 marks, there will be Internal Assessment of 40 marks and the University Examination of 60 marks/3 hours duration at the end of each semester. The 4 credits will be given to a student who secures at least 40% of marks allotted to each paper. A candidate who does not pass the examination in any subject or subjects in one semester will be permitted to reappear in such failed subject or subjects along with the papers of following semesters.

The Internal Assessment (IA) for each paper will be of 40 marks. The Internal Assessment may be in the forms as follows:

- |   |          |
|---|----------|
| a) Attendance                                 | 10 Marks |
| b) Home Assignment/Tutorial/Test/Presentation | 15 Marks |
| c) Mid Semester Examination                   | 15 Marks |

#### ● **Practical : (Applicable to Commerce Faculty only)**

There shall be compulsory practical examination of 10 marks for B.Com. degree for all Elective Courses at the end of each semester but before UE. The practical examination will be based on the following:

- a) Journal : 5 Marks
- b) Oral : 5 Marks

Students should note that there is separate heads of passing in practical examination for B. Com.

The 60 marks in UE of the Elective Courses having practical will be converted into 50 marks.

#### ● **Diploma in Marketing and Diploma in Banking (along with to B.Com. Degree): (Applicable to Commerce Faculty only)**

A student admitted for B. Com. Semester I and opted for Marketing or Banking and Insurance as one of the elective courses, shall enroll himself/herself for Diploma in

Marketing or Diploma in Banking as the case may be. He/She has to apply for Diploma in the prescribed form. The duration of the Diploma is of three years and can be completed along with with B. Com. degree. The medium of instruction and examination shall be English.

For successful completion of the Diploma -

1. A student has to complete all practicals in Semester I, II, III and IV while in Semester V and VI he/she has to complete project report under the supervision of the concerned subject teacher.
2. The evaluation of project and viva voce examination shall be done by marks only and then it will be converted into grade in the ten point scale and awarded the same to the student.
3. A student shall have to obtain minimum 40% marks in project evaluation and viva voce taken together.

After successful completion of the diploma course, separate Diploma will be conferred on the students in the convocation of the University.

#### ● **Standard of Passing**

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, a student must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table.

Range of Marks (Out of 100)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} < 80$	A+	9
$60 \leq \text{Marks} < 70$	A	8
$55 \leq \text{Marks} < 60$	B+	7
$50 \leq \text{Marks} < 55$	B	6
$40 \leq \text{Marks} < 50$	C	5
Marks < 40	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weightage for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

● **Formula to Calculate Grade Points (GP)**

Suppose that 'Max' is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP, Set  $x = \text{Max} / 10$  (since we have adopted 10-point system). Then GP is calculated by the formulas shown as below.

Range of Marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} < 8x$	Truncate (Marks/x) +2
$4x \leq \text{Marks} < 5.5x$	Truncate (Marks/x) +1

Two kinds of performance indicators, namely, the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a student in all the courses in a particular semester, while the CGPA measures the cumulative performance in all courses since his/her enrolment to the course. The CGPA of learner when he/she completes the programme is the final result of the learner.

The SGPA is calculated by the formula  $SGPA = \frac{\sum C_k \times GP_k}{\sum C_k}$  where  $C_k$  is the credit-value assigned to a course and  $GP_k$  is the GPA obtained by the student in the course. In the above, the sum is taken over all the courses that the student has undertaken for the study during the semester, including those in which he/she might have failed or those for which he/ she remained absent. The SGPA shall be calculated up to two decimal place accuracy.

The CGPA is calculated by the formula  $CGPA = \frac{\sum C_k \times GP_k}{\sum C_k}$ , where  $C_k$  is the credit-value assigned to a course and  $GP_k$  is the GPA obtained by the student in the course. In the above, the sum is taken over all the courses that the student has undertaken for the study from the time of his/her enrolment to the course and also during the semester for which CGPA is calculated, including those in which he/she might have failed or those for which he/she remained absent. The CGPA shall be calculated up to two decimal place accuracy.

The Formula to compute equivalent percentage marks for specified CGPA

% Marks (CGPA) =	$10 \times CGPA - 10$	if $5.00 \leq CGPA \leq 6.00$
	$5 \times CGPA + 20$	if $6.00 \leq CGPA \leq 8.00$
	$10 \times CGPA - 20$	if $8.00 \leq CGPA \leq 9.00$
	$20 \times CGPA - 110$	if $9.00 \leq CGPA \leq 9.50$
	$40 \times CGPA - 300$	if $9.50 \leq CGPA \leq 10.00$

- **Award of Honours**

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Equivalent Range of Marks (%)	Final Grade	Performance Descriptor	Final Class
$9.50 \leq \text{CGPA} \leq 10.00$	$80 \leq \text{Marks} \leq 100$	O	Outstanding	First Class with Distinction
$9.00 \leq \text{CGPA} \leq 9.49$	$70 \leq \text{Marks} < 80$	A+	Excellent	
$8.00 \leq \text{CGPA} \leq 8.99$	$60 \leq \text{Marks} < 70$	A	Very Good	First Class
$7.00 \leq \text{CGPA} \leq 7.99$	$55 \leq \text{Marks} < 60$	B+	Good	Higher Second Class
$6.00 \leq \text{CGPA} \leq 6.99$	$50 \leq \text{Marks} < 55$	B	Average	Second Class
$5.00 \leq \text{CGPA} \leq 5.99$	$40 \leq \text{Marks} < 50$	C	Satisfactory	Pass Class
CGPA Below 5.00	Marks Below 40	F	Fail	Fail

- **Gracing**

The gracing shall be done as per existing rules of the University.

- **Verification and Revaluation**

There is a provision for verification and revaluation of the result. A student can apply for the verification and revaluation of the result within two weeks from the declaration of the results with the prescribed fee. The verification and revaluation shall be done as per the existing rules of the University.

- **Rule for ATKT**

A candidate shall be permitted to proceed further from the First Semester up to Fourth Semester irrespective of his/her failure in any of the Semester examinations subject to the condition that the candidate should register for all the backlog subjects of earlier semesters along with current (subsequent) semester subjects. However, he/she should have clear all the papers at Semester I & II when he/she is admitted to Semester V.

- **Span Period to Qualify a Degree**

As per the guidelines issued by the University Grants Commission (UGC) on "Determination of Uniform Span Period within which a student may be allowed to Qualify for a Degree", a student has to qualify for a degree within the period prescribed by the UGC. If a student could not, he/she will be allowed two more years beyond the prescribed period.

In exceptional cases, further extension of one more year may be considered by the University. This is applicable to those students who will be admitted from the academic year 2016-17 onwards as per the Notification (No. 775 dated 14/12/2015) issued by Bharati Vidyapeeth University.

- **Format of the Transcript**

A student will be given a transcript indicating his/her performance at the end of every semester examination. The transcript shall be given as per the following table along with other necessary details.

## **5. : ELIGIBILITY FOR ADMISSION TO POST GRADUATE PROGRAMMES**

### **Choice Based Credit System (CBCS) (2018 Course)**

**1. Eligibility for admission to M.A. (English) Course:**

Any graduate of this University or any other recognized University shall be admitted to M.A. (English) Course.

**2. Eligibility for admission to M.A. (Economics) Course:**

Any graduate of this University or any other recognized University shall be admitted to B.A. (Economics) Course.

**3. Eligibility for admission to M.Lib. & I.Sc Course:**

Any graduate of this University or any other recognized University shall be admitted to B.A. (Economics) Course.

**4. Eligibility for admission to M.Sc. (Chemistry) Course:**

A student shall be eligible for admission to the First Year M.Sc (Analytical/Organic/Inorganic Chemistry) degree course who has completed B.Sc (Chemistry) graduation from any recognized university satisfying the following conditions. The candidate should have secured at least 50% (45% for SC/ST) in aggregate at graduate level university examination.

**5. Eligibility for admission to M.Sc. (Microbiology) Course:**

**A candidate who has passed the**

- Bachelor of Science from any recognized university with Microbiology as Principle subject (Major) or Microbiology (Honors).
- Bachelor of Science from any recognized university with Botany/Zoology/Biochemistry/Biotechnology/Environmental science as major subjects with Microbiology as subsidiary subject.
- Bachelor of Science from any recognized university with Microbiology as one of the subjects.
- The candidate who has secured aggregate of 50% marks (45 % marks in case of SC/ST) in the graduate course as well as in the Microbiology Subject shall be eligible for admission to the First Year M.Sc. degree course.

**6. Eligibility for admission to M.Sc. (Computer Science) Course:**

A student shall be eligible for admission to the First Year M.Sc. (Computer Science) degree course who has completed B.Sc.(Computer Science) / B.Sc(Computer application )/B.Sc.(IT)graduation from any recognized university satisfying the following conditions. The candidate should have secured at least 50% (45% for SC/ST) in aggregate at graduate level university examination.

**7. Eligibility for admission to M.Com. Course:**

A candidate who has passed the B. Com. or B.B.A. of this University or any other recognised university or any graduate of this or any other recognised university shall be permitted to take admission to the M. Com. degree course of this University.

## 6 : Course Structure (PG Programme)(CBCS 2018 COURSE)

### 6.1 : Master of Arts (M.A. English)

#### 1. Course Structure of M.A. (English) Course:

The M.A. programme will be of two years duration consisting of four semesters and of minimum 70 Credits: Semester I (16 Credits), Semester II (18 Credits), Semester III (18 Credits), and Semester IV (18 Credits). In first three Semesters, there will be four theory papers of 04 credits each. In Fourth Semester, there will be three theory papers of 06 credits and one research project of 10 credits. All 16 papers will have 100 marks each out of which 40 marks will be for Internal Assessment and 60 marks for University Examination. All Ability enhancement or skill enhancement courses will have 50 marks each, out of which 20 marks will be for continuous assessment and 30 marks for university examination. Thus M.A. English degree examination, four Semesters shall be of minimum 1700 marks and of minimum 70 credits altogether. The following shall be the course structure:

**M.A. English: First Year** The M.A. programme will be of two years duration consisting

Semester I			Semester II		
Subject Type	Code	Title of the paper	Subject Type	Code	Title of the paper
Core: Compulsory	PGEN G 11	Literature in English from 1550 to 1832 – I	Core: Compulsory	PGENG 21	Literature in English from 1550 to 1832 – II
	PGEN G 12	Introduction to the Study of English Language – I		PGENG 22	Introduction to the Study of English Language – II

Skill Enhancement Course	PGSEC 31	Soft Skills			

## 2. Scheme of Examination:

The Assessment of Regular students of Master of Arts (M.A.) English course in the academic session 2018-19 and after, shall be based on

- University Examinations,
- Internal Assessment,
- Choice Based Credit System, and
- Semester Grade Point Average and Cumulative Grade Point Average system

For each paper of 100 marks, there will be Internal Assessment of 40 marks and the University Examination of 60 marks/3 hours duration at the end of each semester. The 04 credit will be given to a student who secures atleast 40% of marks allotted to each paper. A candidate who does not pass the examination in any subject or subjects in one semester will be permitted to reappear in such failed subject or subjects along with the papers of following semesters.

The Internal Assessment (IA) for each paper will be of 40 marks which will be carried out by the department during the term. The Internal Assessment may be in the forms as follows: Attendance, Written tests, seminars, term papers, presentations, assignments, orals or any such others. There will be at least two types of assessments from the types given above.

At the end of each semester, a cumulative grade point average (CGPA) and also Semester grade point average (SGPA) will be calculated as a weighted average of the GPI of all courses in which the student has passed till that semester.

A candidate shall be permitted to proceed from the First Semester up to Final Semester irrespective of his/her failure in any of the Semester examinations subject to the condition that the candidates should register for all the arrear subjects of earlier semesters along with current (subsequent) semester subjects.

#### **Research Project Work:**

There will be a Research Project to be prepared by a student during the fourth semester. The objective of the project work is to introduce students to research methodology in the subject and prepare them for pursuing research in theoretical or experimental or computational areas of the subject. The project work is to be undertaken under guidance of a teacher allotted to a student by the department.

#### **Division of Marks**

Synopsis with working bibliography (Internal Assessment)	: 40 Marks
A full Project Report (Minimum 50-80 pages) (University Assessment)	: 40 Marks
Viva Voce (University Assessment)	: 20 Marks

As the Research Project is based on the self study done by the candidate and evaluated for 100 marks altogether, 06 credits will be awarded to a successful candidate in this subject. The project may be evaluated by two examiners one internal and one external, selected from the panel of PG examiners of the University.

The candidate has to submit the project 15 days before the commencement of the fourth semester university examination. A candidate who fails to submit the project may resubmit the same in the subsequent semester examination for evaluation. The project work activities must be duly supported by documentary evidence to be endorsed by the Head or Guide.

### 3. Standard of Passing:

A candidate shall be declared to have passed in the paper provided he/she has secured minimum GP of 4.5 in the University Examination and a GPA of 4.0 in aggregate of University Examination and Internal Assessment taken together.

A student who passes in all the courses will be declared to have passed M.A. (English) with the following honours.

CGPA in [4.00, 4.99] -- Pass Class

CGPA in [5.00, 5.49] -- Second Class

CGPA in [5.50, 5.99] -- Higher Second Class

CGPA in [6.00, 7.99] -- First Class

CGPA in [8.00, 10.00] -- First Class with Distinction

### 4. Scheme of credits:

Four hours per week teaching in one semester will lead to four credits and research project will carry 06 credits.

### 5. Grade point scheme:

The 10-point scale would be used to convert marks out of 100 to grades and grade points according to the following table:

Marks as Percentage	Grade	Grade Point
[75.0, 100]	O	10.0
[70.0, 74.9]	A+	9.0
[65.0,69.9]	A	8.0
[60.0,64.9 ]	B+	7.0
[ 55.0,59.9]	B	6.0
[ 50.0,54.9]	C+	5.5
[ 45.0,49.9]	C	5.0
[40.0,44.9]	D	4.5

### GRACING:

The gracing shall be done as per existing rules of the University.

### VERIFICATION AND REVALUATION:

There is provision for verification and revaluation of the result. A student can apply for the verification and revaluation of the result within the two weeks from the declaration of the results with the prescribed fee. The verification and revaluation shall be done as per the existing rules of the University.

## **6.1 : Master of Arts (M.A.) Economics (CBCS 2019 Course)** **(Under : The Faculty of Arts, Social Sciences and Commerce)**

The M.A. Economics degree course provides an opportunity to acquire advanced knowledge in the main areas of Economics.

### **1. Course Structure of Objectives of the course:**

The Post Graduate Degree Programm M.A. (Economics), provides an opportunity to acquire in-depth knowledge of advance economic theories with a view to develop analytical skills for applying these theories to current economic problems in India and abroad.

### **Eligibility for admission to M.A. (Economics) Course:**

Any graduate of this university or any other recognized university shall be admitted to M.A. (Economics) Course. However, a student who has a degree other than Economics as a special subject shall have to clear the entrance test conducted by the department.

### **Medium of Instructions:**

The medium of instructions of M.A. (Economics) Course will be in English only.

### **Course Structure of M.A. (Economics) Course:**

The M.A. Economics course will be of two years duration consisting of two separate parts i.e. Part – I and Part – II. There will be four papers in each year i.e. Part – I and Part – II. All 08 papers will have 100 marks each out of which 40 marks will be for Internal Assessment and 60 marks for University Examination. Skill and Ability Enhancement Courses having (50 + 50 = 100 marks) Thus M.A. Economics degree examination, Part – I and Part – II shall be of 900 marks. The following shall be the course structure:

### M.A. Economics: Part – I

Code	Title of the paper	Maximum Marks		
		Internal Assessment	University Examination	Total
ECO 11	Micro Economic Analysis	40	60	100
ECO 12	Public Economics	40	60	100
ECO 13	Agricultural Economics	40	60	100
<b>Any one from the following:</b>				
ECO 14	a) Industrial Economics	40	60	100
ECO 15	b) Financial Institutions and Markets	40	60	100
Ability Enhancement Course	Fundamental of Investments (Semester II)	20	30	50

### M.A. Economics: Part – II

Code	Title of the paper	Maximum Marks		
		Internal Assessment	University Examination	Total
ECO 21	Macro Economic Analysis	40	60	100
ECO 22	International Economics	40	60	100
ECO 23	Research Methodology	40	60	100
<b>Any one from the following:</b>				
ECO 24	a) Economics of Growth and Development	40	60	100
ECO 25	b) Demography	40	60	100
Skill Enhancement Course	Consumer Protection (Semester III)	20	30	50

**(Note: Special paper for second year will be from the same group as chosen by the student in Part – I. In the column M. A. Economics Part I title of the papers are for the semester-I as well as for Semester II and at the same time in the column M. A. Economics Part II title of the papers are the same for the semester III and Semester IV)**

## 1. Scheme of Examination:

The Assessment of Regular students of Master of Arts (M.A.) Economics course in the academic session 2019-20 and after, shall be based on

- (a) University Examinations,
- (b) Internal Assessment,
- (c) Choice Based Credit System, and
- (d) Semester Grade Point Average and Cumulative Grade Point Average system

For each paper of 100 marks, there will be Internal Assessment of 40 marks and the University Examination of 60 marks/3 hours duration at the end of each semester. The 04 credit will be given to a student who secures at least 40% of marks allotted to each paper. A candidate who does not pass the examination in any subject or subjects in one semester will be permitted to reappear in such failed subject or subjects along with the papers of following semesters.

The Internal Assessment (IA) for each paper will be of 40 marks which will be carried out by the department during the term. The Internal Assessment may be in the forms as follows: Attendance, Written tests, seminars, term papers, presentations, assignments, orals or any such others. There will be at least two types of assessments from the types given above.

At the end of each semester, a cumulative grade point average (CGPA) and also Semester grade point average (SGPA) will be calculated as a weighted average of the GPI of all courses in which the student has passed till that semester.

A candidate shall be permitted to proceed from the First Semester up to Final Semester irrespective of his/her failure in any of the Semester examinations subject to the condition that the candidates should register for all the arrear subjects of earlier semesters along with current (subsequent) semester subjects.

### Research Project Work :

There will be a Research Project to be prepared by a student during the fourth semester. The objective of the project work is to introduce students to research methodology in the subject and prepare them for pursuing research in theoretical or experimental or computational areas of the subject. The project work is to be undertaken under guidance of a teacher allotted to a student by the department.

### Division of Marks :

Synopsis with working bibliography (Internal Assessment)	:	40 Marks
A full Project Report (Minimum 50-80 pages) (University Assessment)	:	40 Marks
Viva Voce (University Assessment)	:	20 Marks

As the Research Project is based on the self study done by the candidate and evaluated for 100 marks altogether, 06 credits will be awarded to a successful candidate in this subject. The project may be evaluated by two examiners one internal and one external, selected from the panel of PG examiners of the University.

The candidate has to submit the project report before the deadline announced by the department. A candidate who fails to submit the project may resubmit the same in the subsequent semester examination for evaluation. The project work activities must be duly supported by documentary evidences to be endorsed by the Head or the Guide.

## 2. Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, a student must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

Even a student fails in IA, he/she shall be declared 'pass' in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the student passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

A candidate shall be permitted to proceed further from the First Semester up to Fourth Semester irrespective of his/her failure in any of the Semester examinations subject to the condition that the candidates should register for all the backlog subjects of earlier semesters along with current (subsequent) semester subjects.

The 10-point scale Grades and Grade Points according to the following table.

Range of Marks (Out of 100)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} < 80$	A+	9
$60 \leq \text{Marks} < 70$	A	8
$55 \leq \text{Marks} < 60$	B+	7
$50 \leq \text{Marks} < 55$	B	6
$40 \leq \text{Marks} < 50$	C	5
Marks < 40	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weights for performance at UE and IA shall respectively be 60% and 40%.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

### 3. Formula to Calculate Grade Points (GP):

Suppose that 'Max' is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP, Set  $x = \text{Max}/10$  (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

Range of Marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} < 8x$	Truncate (Marks/x) +2
$4x \leq \text{Marks} < 5.5x$	Truncate (Marks/x) +1

Two kinds of performance indicators, namely, the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a student in all the courses in a particular semester, while the CGPA measures the cumulative performance in all courses since his/her enrolment to the course. The CGPA of a student when he/she completes the programme is the final result of the student.

The SGPA is calculated by the formula  $\text{SGPA} = \frac{\sum C_k \times \text{GP}_k}{\sum C_k}$ , where  $C_k$  is the credit-value assigned to a course and  $\text{GP}_k$  is the GPA obtained by the student in the course. In the above, the sum is taken over all the courses that the student has undertaken for the study during the semester, including those in which he/she might have failed or those for which he/ she remained absent. The SGPA shall be calculated up to two decimal place accuracy.

The CGPA is calculated by the formula  $\text{CGPA} = \frac{\sum C_k \times \text{GP}_k}{\sum C_k}$ , where  $C_k$  is the credit-value assigned to a course and  $\text{GP}_k$  is the GPA obtained by the student in

the course. In the above, the sum is taken over all the courses that the student has undertaken for the study from the time of his/her enrolment to the course and also the during the semester for which CGPA is calculated, including those in which he/she might have failed or those for which he/she remained absent. The CGPA shall be calculated up to two decimal place accuracy.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA) =	$10 \times \text{CGPA} - 10$	if $5.00 \leq \text{CGPA} \leq 6.00$
	$5 \times \text{CGPA} + 20$	if $6.00 \leq \text{CGPA} \leq 8.00$
	$10 \times \text{CGPA} - 20$	if $8.00 \leq \text{CGPA} \leq 9.00$
	$20 \times \text{CGPA} - 110$	if $9.00 \leq \text{CGPA} \leq 9.50$
	$40 \times \text{CGPA} - 300$	if $9.50 \leq \text{CGPA} \leq 10.00$

#### 4. Award of honours:

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} < 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} < 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} < 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} < 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} < 50$
CGPA Below 5.00	F	Fail	Mar

#### 5. Gracing:

The gracing shall be done as per existing rules of the University.

#### 6. Verification and Revaluation:

There is provision for verification and revaluation of the result. A student can apply for the verification and revaluation of the result within the two weeks from the declaration of the results with the prescribed fee. The verification and revaluation shall be done as per the existing rules of the University.

### **6.3 Master of Library & Information Science (M.Lib & I.Sc.) (CBCS 2018 COURSE)**

- 1. Eligibility for admission to M.Lib. & I.Sc. Course:** B.Lib. & I.Sc. degree of this University or any other recognized University shall be admitted to M.Lib & I.Sc. Course.

#### **Course Structure of M.Lib & I.Sc. Course:**

The M.Lib & I.Sc. programme will be of one years duration consisting of two semesters and of minimum 38 Credits: Semester I (20 Credits) and Semester II (18 Credits). In first Semester, there will be four theory papers of 04 credits each and two theory paper of 2 credit. In Second Semester, there will be four theory papers of 04 credits and one practical paer of 2 credits. All 10 papers will have 100 marks each out of which 40 marks will be for Internal Assessment and 60 marks for University Examination. Thus B.Lib & I.Sc. degree examination, two Semesters shall be of minimum 1050 marks and of minimum 36 credits altogether. The following shall be the course structure:

Subject Type	Code	Title of the paper	Subject Type	Code	Title of the paper
Core: Compulsory	ML 11	Information Communication and Society	Core: Compulsory	ML 21	Research Methods and statistical Techniques
	ML 12	Information Sources Services & System		ML 22	Applications of Information Technologies in LIS Theory
	ML 13	Management of libraries and Information Centers		ML 23	Information Processing and Retrieval
	ML 14	Academic and Public Library Systems		ML 24	Applications of Information Technologies in LIS: Practical
Core: Elective	<b>Any one from the following:</b>		Core: Elective	<b>Any one from the following:</b>	
	ML 15	Technical Writing Development		ML 25	Library and Users
	ML 16	Multimedia Application Development		ML 26	Social Science Information System
	ML 17	Information Analysis, Repackaging and Consolidation			
Skill Enhancement Course	ML 18	Use of of Social Media in LIS			

## **5. Scheme of Examination**

The Assessment of Regular students of Master of Library & Information Science (M.Lib & I.Sc.) course in the academic session 2018-19 and after, shall be based on

- (a) University Examinations,
- (b) Internal Assessment,
- (c) Choice Based Credit System, and
- (d) Semester Grade Point Average and Cumulative Grade Point Average system

For each paper of 100 marks, there will be Internal Assessment of 40 marks and the University Examination of 60 marks/3 hours duration at the end of each semester. The 04 credit will be given to a student who secures atleast 40% of marks allotted to each paper. A candidate who does not pass the examination in any subject or subjects in one semester will be permitted to reappear in such failed subject or subjects along with the papers of following semesters.

The Internal Assessment (IA) for each paper will be of 40 marks which will be carried out by the department during the term. The Internal Assessment may be in the forms as follows: Attendance, Written tests, seminars, term papers, presentations, assignments, orals or any such others. There will be at least two types of assessments from the types given above.

At the end of each semester, a cumulative grade point average (CGPA) and also Semester grade point average(SGPA) will be calculated as a weighted average of the GPI of all courses in which the student has passed till that semester.

A candidate shall be permitted to proceed from the First Semester up to Final Semester irrespective of his/her failure in any of the Semester examinations subject to the condition that the candidates should register for all the arrear subjects of earlier semesters along with current (subsequent) semester subjects.

## **6. Standard of Passing**

A candidate shall be declared to have passed in the paper provided he/she has secured minimum GP of 4.5 in the University Examination and a GPA of 4.0 in aggregate of University Examination and Internal Assessment taken together.

A student who passes in all the courses will be declared to have passed M.Lib & I.Sc. with the following honours.

- CGPA in [4.00, 4.99] -- Pass Class
- CGPA in [5.00, 5.49] -- Second Class
- CGPA in [5.50, 5.99] -- Higher Second Class
- CGPA in [6.00, 7.99] -- First Class
- CGPA in [8.00, 10.00] -- First Class with Distinction

### 7. Scheme of credits

Four hours per week teaching in one semester will lead to four credits and project will carry 02 credits.

### 8. Grade point scheme

The 10-point scale would be used to convert marks out of 100 to grades and grade points according to the following table:

<b>Marks as Percentage</b>	<b>Grade</b>	<b>Grade Point</b>
[75.0, 100]	O	10.0
[70.0, 74.9]	A+	9.0
[65.0, 69.9]	A	8.0
[60.0, 64.9]	B+	7.0
[55.0, 59.9]	B	6.0
[50.0, 54.9]	C+	5.5
[45.0, 49.9]	C	5.0
[40.0, 44.9]	D	4.5

At the end of each semester, student will be given a transcript showing the performance and result in each course. The transcript shows, for each course the title of the course, credit values, grade in UE, grade in IA, Grade point index, result as pass or fail. Also, the Semester grade point average and cumulative grade point average will be shown. Further, the equivalent percentage of marks corresponding to

SGPA and CGPA will be shown. The formula to convert SGPA or CGPA to equivalent percentage is given by:

$$10 \times \text{CGPA} \text{ if CGPA/SGPA is in } [4.00, 6.00]$$

$$\text{Equivalent percentage marks} = 05 \times \text{CGPA} + 30 \text{ if CGPA/SGPA is in } [6.00, 9.00]$$

$$25 \times \text{CGPA} - 150 \text{ if CGPA/SGPA is in } [9.00, 10.00]$$

The above formula computes to the following table:-

Range in % of marks	Range of CGPA	Letter grade	Division
[75.0, 100]	[9.00, 10.00]	O	First class with Distinction
[70.0, 74.9]	[8.00, 8.99]	A+	
[65.0, 69.9]	[7.00, 7.99]	A	First class
[60.0, 64.9]	[6.00, 6.99]	B+	
[55.0, 59.9]	[5.50, 5.99]	B	Higher second class
[50.0, 54.9]	[5.00, 5.49]	C+	Second class
[45.0, 49.9]	[4.50, 4.99]	C	Pass class
[40.0, 44.9]	[4.00, 4.49]	D	
[00.0, 39.9]	[0.00, 3.99]	F	Fail

Thus, the percentage of marks can be obtained by using the following table:

CGPA	% of Marks	CGPA	% of Marks	CGPA	% of Marks	CGPA	% of Marks
4.0	40.0	5.5	55.0	7.0	65.0	8.5	72.5
4.1	41.0	5.6	56.0	7.1	65.5	8.6	73.0
4.2	42.0	5.7	57.0	7.2	66.0	8.7	73.5
4.3	43.0	5.8	58.0	7.3	66.5	8.8	74.0
4.4	44.0	5.9	59.0	7.4	67.0	8.9	74.5
4.5	45.0	6.0	60.0	7.5	67.5	9.0	75.0
4.6	46.0	6.1	60.5	7.6	68.0	9.1	77.5
4.7	47.0	6.2	61.0	7.7	68.5	9.2	80.0
4.8	48.0	6.3	61.5	7.8	69.0	9.3	82.5
4.9	49.0	6.4	62.0	7.9	69.5	9.4	85.0
5.0	50.0	6.5	62.5	8.0	70.0	9.5	87.5
5.1	51.0	6.6	63.0	8.1	70.5	9.6	90.0
5.2	52.0	6.7	63.5	8.2	71.0	9.7	92.5
5.3	53.0	6.8	64.0	8.3	71.5	9.8	95.0
5.4	54.0	6.9	64.5	8.4	72.0	9.9	97.5
						10.0	100.0

## GRACING

The gracing shall be done as per existing rules of the University.

## VERIFICATION AND REVALUATION

There is provision for verification and revaluation of the result. A student can apply for the verification and revaluation of the result within the two weeks from the declaration of the results with the prescribed fee. The verification and revaluation shall be done as per the existing rules of the University.

## FORMAT OF THE TRANSCRIPT

The student will be given a transcript indicating his/her performance at the end of every semester examination. The transcript shall be given as per the following table along with other necessary details:

Course No.	Course Name	No. of Credits	University Examination		Internal Assessment		Grade Point Average	Result
			Grade	Grade Point	Grade	Grade Point		
1								
2								
3								
4								
5								
6								
Total Cumulative Credits Completed			SGPA		CGPA		Equivalent Marks (%)	
Note: GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to Grade Point, which will be the GPA.								

## **6.4 : Master of Science (Analytical/Organic/Inorganic Chemistry)**

### **1. INTRODUCTION**

The Master of Science (Analytical/Organic/Inorganic Chemistry), program is a full time 84 Credits program offered by BharatiVidyapeeth Deemed University, Pune.

### **2. GENERAL OBJECTIVES OF THE COURSE:**

Chemistry is a pervasive subject. All the branches of science need chemistry. It is an experimental science and students need to train in practicals to get expertise in doing fine experiments and handle sophisticated instruments. Along with the data obtained its statistical analysis is also required to establish authenticity in the fields like environmental science, space chemistry and biotechnology. There are immense potentialities for chemistry and post graduates to undertake advanced research or in Industries as skilled chemists.

**GOAL OF THE SYLLABUS:** To impart the thorough knowledge of Chemistry, capability of self thinking, self study, identifying the problems and develop the problem solving attitude. To make the student globally competent.

### **3. ELIGIBILITY FOR ADMISSION TO THIS COURSE**

A student shall be eligible for admission to the First Year M.Sc (Analytical/Organic/Inorganic Chemistry) degree course who has completed B.Sc (Chemistry) graduation from any recognized university satisfying the following conditions. The candidate should have secured at least 50% (45% for SC/ST) in aggregate at graduate level university examination.

### **4. COURSE STRUCTURE**

- 1) The M.Sc. (Chemistry) course will be of four semesters and with a minimum of 84 credits. The medium of instruction and examination will be on English.
- 2) Credits for Semester I-12 Credits, Semester II -30 Credits, Semester III- 18 Credits and Semester IV- 24 Credits.
- 3) The assessment of 1 credit at Semester IV of M.Sc.(Chemistry) that is for Industrial Training programme will be carried out as follows :-

- i) A student will inform the department about the joining date of the above mentioned training.
  - ii) The student will have to make presentation at the end of the programme and the student will have to submit a compiled report which will be assessed towards course credit as Internal Assessment Marks for Core Elective subject.
- 4) Each theory course prescribed for M. Sc. should be covered in 4 hours, each of 60 minutes duration per week per course
  - 5) Each practical course will require 4 hours of laboratory work per week and the course will be extended over two semesters and will be examined at the end of the academic year.
  - 6) For theory course the question paper should include at least 20 % weightage for problem solving. Problem solving would include numerical problems and may be objective type questions.
  - 7) Thus M.Sc (Analytical/Organic/Inorganic Chemistry) degree examination has four semesters and shall be of 2100 marks and of minimum 84 credits altogether. The following shall be the course structure:

**M.Sc. (Analytical Chemistry): SEMESTER – I**

Semester	Subject Type	Code	Title of the paper	Hrs/ Week	Credits	Exam Hrs	Maximum Marks		
							Internal Assessment	University Examination	Total
Semester I	Core: Compulsory	PGCH -101	Physical Chemistry- I	04	04	03	40	60	100
		PGCH -102	Inorganic Chemistry-I	04	04	03	40	60	100
		PGCH -103	Organic Chemistry-I	04	04	03	40	60	100

## SEMESTER – II

Semester	Subject Type	Code	Title of the paper	Hrs/Week	Credits	Exam. Hrs	Maximum Marks		
							Internal Assessment	University Examination	Total
Semester II	Core: Compulsory	PGCH - 201	Physical Chemistry- II	04	04	03	40	60	100
		PGCH - 202	Inorganic Chemistry-II	04	04	03	40	60	100
		PGCH - 203	Organic Chemistry-II	04	04	03	40	60	100
		PGCH - 204	Fundamentals of analytical Chemistry	04	04	03	40	60	100
		PGCH - 205	Physical Chemistry practical*	04	02+02	06	40	60	100
		PGCH - 206	Inorganic Chemistry practical*	04	02+02	06	40	60	100
		PGCH - 207	Organic Chemistry practical*	04	02+02	06	40	60	100
	Ability Enhancement Course	PGCH - 208	Scientific Writing	02	02	02	20	30	50

## SEMESTER – III

Semester	Subject Type	Code	Title of the paper	Hrs/Week	Credits	Exam. Hrs	Maximum Marks		
							Internal Assessment	University Examination	Total
Semester III	Core: Compulsory	PGAC 301	Thermal, Radio and Electro-analytical methods	04	04	03	40	60	100
		PGAC 302	Modern Aspects of Analytical Chemistry	04	04	03	40	60	100
		PGAC 303	Recent Analytical Techniques	04	04	03	40	60	100
		PGAC 304	Analysis of Pharmaceuticals	04	04	03	40	60	100
		PGAC 305	Assessment of Water Quality	02	02	02	20	30	50

## SEMESTER – IV

Semester	Subject Type	Code	Title of the paper	Hrs/Week	Credits	Exam . Hrs	Maximum Marks		
							Internal Assessment	University Examination	Total
Semester IV	Core: Compulsory	PGAC 401	Advanced Analytical Techniques	04	04	03	40	60	100
		PGAC 402	Recent Separation Techniques	04	04	03	40	60	100
<b>Any one from the following: From PGAC-403 to PGAC-405</b>									
Semester IV	Core: Elective#	PGAC 403	Environmental Analysis	04	3+1	03	40	60	100
		PGAC 404	Computer Interface with Chemistry	04	3+1	03	40	60	100
		PGAC 405	Modern Methods of Analysis	04	3+1	03	40	60	100
	Core: Compulsory	PGAC 406	Practical Course -I*	02	2+2	06	40	60	100
		PGAC 407	Practical Course -II*	02	2+2	06	40	60	100
		PGAC 408	Practical Course –III * OR Project Work*	02	2+2	06	40	60	100

\* Examination for practical courses will be conducted at the end of academic year.

# Core Elective Course includes Core: Elective subjects and Industrial project. Industrial Project includes one day visit, Internet survey, project writing, presentation or oral and be evaluated as the internal marks for Core: Elective Course (PGAC-403, PGAC-404, PGAC-405).

## M.Sc. (Organic Chemistry): SEMESTER – I

Semester	Subject Type	Code	Title of the paper	Hrs/Week	Credits	Exam Hrs	Maximum Marks		
							Internal Assessment	University Examination	Total
Semester I	Core: Compulsory	PGCH - 101	Physical Chemistry- I	04	04	03	40	60	100

Practical Course-III OR Project Work	2+2	-	-	2 30Hrs	2 30Hrs	4C 60Hrs	University

**Total Required Credits:**

Semester	Core Courses	Elective Course	SEC / AECC	Total
I	12	----	----	12
II	28	----	02	30
III	16	----	02	18
IV	20	04	----	24
<b>Grand Total</b>	<b>76</b>	<b>04</b>	<b>04</b>	<b>84</b>

**6. MEDIUM OF INSTRUCTION:**

The medium of instruction and examination shall be English.

**7. UNIVERSITY TERMS:**

The dates for the commencement and conclusion of the First and the Second terms shall be fixed by the University authorities. The terms can be kept by students, who have registered their names with the University.

**8. SCHEME OF EXAMINATION:**

The Assessment of Regular students of Master of Science (M.Sc.) course in the academic session 2018-19 and thereafter shall be based on

- (a) University Examinations (UE),
- (b) Continuous Internal Assessment (IA),
- (c) Choice Based Credit System (CBCS), and
- (d) Semester Grade Point Average (SGPA) and Cumulative Grade Point Average system (CGPA)

For each paper of 100 marks, there will be Internal Assessment of 40 marks and the University Examination of 60 marks/3 hours duration at the end of each semester. The 04 credit will be given to a student who secures atleast 40% of

marks allotted to each paper. A candidate who does not pass the examination in any subject or subjects in one semester will be permitted to reappear in such failed subject or subjects along with the papers of following semesters.

The Internal Assessment (IA) for each paper will be of 40 marks which will be carried out by the department during the term. The Internal Assessment may be in the forms as follows: Attendance, Written tests, seminars, term papers, presentations, assignments, orals or any such others. There will be at least two types of assessments from the types given above.

At the end of each semester, a cumulative grade point average (CGPA) and also Semester grade point average (SGPA) will be calculated as a weighted average of the GPI of all courses in which the student has passed till that semester.

A candidate shall be permitted to proceed from the First Semester up to Fourth Semester irrespective of his/her failure in any of the Semester examinations subject to the condition that the candidates should register for all the arrear subjects of earlier semesters along with current (subsequent) semester subjects.

#### **9. Research Project Work:**

There will be a Research Project optional for practical course –III to be prepared by a student. The objective of the project work is to introduce students to research methodology in the subject and prepare them for pursuing research in theoretical or experimental or computational areas of the subject. The project work is to be undertaken under guidance of a teacher allotted to a student by the department.

#### **Division of Marks**

Internal Assessment :40 Marks

A full Project Report&Viva Voce (University Assessment) : 60 Marks

As the Research Project is based on the self study done by the candidate and evaluated for 100 marks altogether, 04 credits will be awarded to a successful candidate in this subject. The project may be evaluated by three examiners one internal and two external, selected from the panel of PG examiners of the University.

The candidate has to submit the project report before the deadline announced by the department. A candidate who fails to submit the project may resubmit the

same in the subsequent semester examination for evaluation. The project work activities must be duly supported by documentary evidences to be endorsed by the Head or the Guide.

#### **10. STANDARD OF PASSING:**

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, a student must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

Even a student fails in IA, he/she shall be declared 'pass' in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the student passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table.

Range of Marks (Out of 100)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} < 80$	A+	9
$60 \leq \text{Marks} < 70$	A	8
$55 \leq \text{Marks} < 60$	B+	7
$50 \leq \text{Marks} < 55$	B	6
$40 \leq \text{Marks} < 50$	C	5
Marks < 40	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weighteg for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA

## FORMULA TO CALCULATE GRADE POINTS (GP):

Suppose that 'Max' is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP, Set  $x = \text{Max} / 10$  (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

Range of Marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} < 8x$	Truncate (Marks/x) +2
$4x \leq \text{Marks} < 5.5x$	Truncate (Marks/x) +1

Two kinds of performance indicators, namely, the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a student in all the courses in a particular semester, while the CGPA measures the cumulative performance in all courses since his/her enrolment to the course. The CGPA of learner when he/she completes the programme is the final result of the learner.

The SGPA is calculated by the formula  $SGPA = \frac{\sum Ck \times GPk}{\sum Ck}$  where  $Ck$  is the credit-value assigned to a course and  $GPk$  is the GPA obtained by the student in the course. In the above, the sum is taken over all the courses that the student has undertaken for the study during the semester, including those in which he/she might have failed or those for which he/ she remained absent. The SGPA shall be calculated up to two decimal place accuracy.

The CGPA is calculated by the formula  $CGPA = \frac{\sum Ck \times GPk}{\sum Ck}$  where  $Ck$  is the credit-value assigned to a course and  $GPk$  is the GPA obtained by the student in the course. In the above, the sum is taken over all the courses that the student has undertaken for the study from the time of his/her enrolment to the course and also during the semester for which CGPA is calculated, including those in which he/she might have failed or those for which he/she remained absent. The CGPA shall be calculated up to two decimals place accuracy.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA) =	$10 \times \text{CGPA} - 10$	if $5.00 \leq \text{CGPA} \leq 6.00$
	$5 \times \text{CGPA} + 20$	if $6.00 \leq \text{CGPA} \leq 8.00$
	$10 \times \text{CGPA} - 20$	if $8.00 \leq \text{CGPA} \leq 9.00$
	$20 \times \text{CGPA} - 110$	if $9.00 \leq \text{CGPA} \leq 9.50$
	$40 \times \text{CGPA} - 300$	if $9.50 \leq \text{CGPA} \leq 10.00$

### 11. AWARD OF HONOURS:

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} < 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} < 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} < 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} < 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} < 50$
CGPA Below 5.00	F	Fail	Marks Below 40

A candidate shall be permitted to proceed further from the First Semester up to Fourth Semester irrespective of his/her failure in any of the Semester examinations subject to the condition that the candidates should register for all the backlog subjects of earlier semesters along with current (subsequent) semester subjects.

### 12. GRACING:

The gracing shall be done as per existing rules of the University.

### 13. VERIFICATION AND REVALUATION:

There is provision for verification and revaluation of the result. A student can apply for the verification and revaluation of the result within two weeks from the declaration of the results with the prescribed fee. The verification and revaluation shall be done as per the existing rules of the University.

### 14. FORMAT OF THE TRANSCRIPT:

The student will be given a transcript indicating his/her performance at the end of every semester examination. The transcript shall be given as per the following table along with other necessary details:

Course No.	Course Name	No.of Credits	University Examination		Internal Assessment		Grade Point Average	Result
			Grade	Grade Point	Grade	Grade Point		
1								
2								
3								
4								
5								
Total Cumulative Credits Completed			SGPA		CGPA		Equivalent Marks (%)	

Note: GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to Grade Point, which will be the GPA.

## **6.5 : Master of Science (M.Sc. Microbiology)**

### **1. Structure of M.Sc. (Microbiology) CBCS degree program**

The overall structure of the course to be implemented from the academic year 2018-2019 onwards is as follows.

- A. The M.Sc. (Microbiology) course will be of 2 years duration. Each year will be of 2 semesters - Thus the entire course will be of 4 semesters.
- B. First, Second and Fourth semester will comprise of four theory and two practical courses each.
- C. Third semester will be totally for Internship (Major project).
- D. Entire M.Sc. course in Microbiology shall be covered in 14 theory papers including 'Ability enhancement course' and 'Skill enhancement course', 6 practical courses, and an Internship (major project with Dissertation). Each theory paper will be covered in 4 lectures of one hour per week. Each practical course shall be covered in two practical turns of three clock hours per week. Thus, the students will work for each practical on two days of the week, daily for minimum six hrs. Students will be given eight hrs in a week for library work.
- E. Students will have to complete an Internship program (Major project with dissertation) so as to learn research methodology and presentation of work. The Internship (major project with dissertation) shall carry 200 marks. The students will work for their projects, complete the experimental work in third semester, and complete the writing part of the project during the winter break. Minimum number of students participating in a project will be two and maximum number of students would be four. The assessment of the project will be at beginning of the fourth semester which includes the presentation and viva-voce by external and internal examiner

Semester I			Semester II		
Subject Type	Code	Title of the paper	Subject Type	Code	Title of the paper

	PGMB305	Internship (major project).

### SEMESTER-IV

Subject Type	Code	Title of the paper
Core: Compulsory	PGMB 401	Virology
	PGMB 402	Medical Microbiology
	PGMB 403	Food and Dairy Microbiology
Core: Elective	<b>Any one from the following:</b>	
	PGMB 404	Advanced Biotechnology
	PGMB 405	Advanced Analytical Techniques
Practical Course	PGMB 411	Practical course 5
	PGMB 412	Practical course 6
Skill Enhancement Course	PGSEC 401	Exploring Microbial Diversity

## 2. Rules for the examination: -

- A. A candidate shall not be admitted to the semester examination unless he / she has satisfactorily kept terms for the courses at the respective department of this university.
- B. An application (which must be in the prescribed form and accompanied by the prescribed fee) for admission to any of the examination of M.Sc. (Microbiology Degree course shall be submitted by a candidate to the Registrar through the Head of the Institution attended by him / her on or before the prescribed date along with a certificate from the Head of the Institution having attended the course and kept the terms in the various subjects and of having satisfied the other conditions laid down by the university and of being fit candidate for the examination.

### C. Assessment pattern

#### a. **Continuous Internal Assessment :**

**Theory:** Three Tutorials will be conducted through out the semester for each theory course and marks out of 40 per course will be submitted to the university as Internal marks.

**Practical:** Internal marks for the practical course will be based on the continuous assessment of the daily work, orals, seminars/presentations; Tour/visit reports, class tests, literature review and attendance(Any two). Students will be assessed for 40 marks for each practical course.

#### b. **Annual Examination :**

**Theory:** An University examination will be held at the end of every semester. This Examination in each subject will be of 60 marks for three hours duration

The final result of the students in each subject will be based on Final GPA obtained by the students for the internal assessment and University Examination.

**Practical:** There shall be Annual practical examination of 60 marks at the end of 2nd and 4th Semester.

The practical examination for the courses PGMB 111, PGMB 112, PGMB 211, and PGMB 212 will be conducted at the end of second semester. Practical examination for courses PGMB 411 and PGMB 412 will be conducted at the end of fourth semester. Practical courses PGMB 311 PGMB 312 are allotted for Internship. The assessment for the said courses will be as follows.

**Project Work:** Students have to undertake a major project so as to learn research methodology and presentation of work. The project shall carry 200 marks which will be allotted as follows:

**Project experimental work (140 marks)**

Assessment by the external examiner : 70 marks

Assessment by the project guide : 70 marks

**Presentation of the project (40 marks)**

Assessment by the external examiner : 20 marks

Assessment by the guide – (day to day) : 20 marks

**Two seminars presentations (20 marks)** : (10 marks per seminar)

Seminars in the third semester on the project work

The assessment for the said courses will be conducted at the beginning of the fourth semester.

The student will be assessed on the basis of following criteria for 140 marks.

- (i) Choice of the topic selected for the project.
- (ii) Aims and objectives of the project.
- (iii) Updated literature survey.
- (iv) Novel and other applications of the project (can a patent be filed on further work).Materials and methodology used.
- (v) Out come and Achievements of the project.
- (vi) Conclusion.
- (vii) Presentation of the project. (methodology of presentation)

Award of the Grade will be based on the following criteria.

**c. Rules regarding ATKT to second year M.Sc. Microbiology course.**

A student will be allowed to keep terms at the second year of the M.Sc. course if her / his terms for the first year have been granted.

**d. Standard of passing :**

- i. The candidate who has obtained at least D grade shall be declared to have passed in the said course.
- ii. The candidate who has not secured C grade in a particular paper in the University Examination will have to secure at least C grade in the subsequent examination in the particular paper.:

A) The 10-point scale would be used to convert marks out of 100 to grades and grade points according to the following table:-

Marks as Percentage	Grade	Grade Point
[75.0, 100]	O	10.0
[70.0, 74.9]	A+	9.0
[65.0,67.9]	A	8.0
[60.0,64.9 ]	B+	7.0
[ 55.0,59.9]	B	6.0
[ 50.0,54.9]	C+	5.5
[ 45.0,49.9]	C	5.0
[40.0,44.9]	D	4.5
[00.0, 39.9]	F	0.0

(B) For courses which have both University Examination (UE) and Internal Assessment(IA):

In order to pass in a course, the student must obtain a minimum of 'D' grade at the UE and a GPI of 4.0 in aggregate of UE and IA. There is no separate passing in IA. The GPI is calculated only if the student passes at UE by combining percentage marks at UE and IA with weights 0.6 and 0.4 respectively. A student who fails has to clear the course by appearing at UE only as a back-log candidate.

(C) For courses which have no University Examination:

There are some courses, the General courses, for which there is no UE. The respective institutes conduct 'continuous assessment' and EoTE( End of term examination).For such courses the computation of GPI, passing criteria, and back-log clearing rules are as in (B) above.

(D) At the end of each semester, a cumulative grade point average (CGPA) will be calculated as a weighted average of the GPI of all courses in which the student has passed till that semester.

(E) A student who passes in all the courses will be declared to have passed the entire M.Sc (Microbiology) with the following honours.

CGPI in [4.00, 4.99] -- Pass Class

CGPI in [5.00, 5.49] -- Second Class

CGPI in [5.50, 5.99] -- Higher Second Class

CGPI in [6.00, 6.99] -- First Class

CGPI in [7.00, 10.00] -- Distinction.

(F) PROMOTION RULES:

A student will be allowed to keep all terms for the duration of the programme.

(G) Continuous Assessment (CA)

40% marks of the course towards CA will be based on tests (Minimum 2). In addition, a teacher may consider one or more of the following evaluation systems:-

i) Seminar /presentation by the student

ii) Assignment by the student

Each theory paper is of 60 marks and internal paper is for 40 marks.

Each practical examination for lab course is of 60 marks and four hour duration for three consecutive days.. The project courses in Semester III will be evaluated for 200 marks for the allotted credits by a panel consisting of one internal and one external examiner.

## 6.6 : Master of Computer Science (M.Sc. Computer Science)

### 1. Course Structure

The M.Sc. (Computer Science) course will be two year full time course consisting of minimum four semesters and with a minimum of 94 credits. The medium of instruction and examination will be only English. The credit allotment for M.Sc.(Computer Science) course : Semester I (24 Credits), Semester II (26Credits), Semester III (26 Credits), and Semester IV (18 Credits). In each Semester, there will be four papers(three core compulsory and one core elective) of 100 marks each, two Laboratory course and minor project for each Semester of 100 marks each, out of which 40 marks will be for internal assessment and 60 marks for university examination. Fourth semester is internship for 200 marks. Thus M.Sc.(Computer Science) degree examination, four semesters shall be 2400 marks and of minimum 94credits altogether . The following shall be the course structure:

Semester I			Semester II		
Subject Type	Code	Title of the paper	Subject Type	Code	Title of the paper
Core: Compulsory	PGCS-101	Algorithm Design Patterns	Core: Compulsory	PGCS-201	Software Project Management

## 5. Scheme of Examination:

In order to pass in a course, the student must obtain a minimum of 'D' grade at the UE and a GPI of 4.5 in aggregate of University Examination and Internal Assessment. For each paper of 100 marks, there will be internal assessment of 40 marks and the university examination of 60 marks for 3 hours duration.

The Internal Assessment (IA) of each course will be for 40 marks and conducted by the college during the term. The assessment may be based on evaluations of the following: Written tests, seminar/presentation by the student, assignment, orals or any other. Hence there must be at least two evaluations of different kind.

Each practical examination for laboratory course is of 100 marks and three hours duration. The minor projects in Semesters I, II and III will be evaluated for 100 marks for the allotted credits by a panel consisting of one internal and one external examiner. For both laboratory course and minor project, there will be internal assessment of 40 marks and the university examination of 60 marks.

A candidate shall be permitted to proceed from the first semester upto final semester irrespective of their failure in any of the semester examinations subject to the condition that the candidate should register for all the arrear subjects of earlier semesters along with current (subsequent) semester subjects.

At the end of each semester, a cumulative grade point average (CGPA) and also Semester grade point average (SGPA) will be calculated as a weighted average of the GPI of all courses in which the student has passed till that semester.

A student who passes in all the courses will be declared to have passed the entire M.Sc (Computer Science) with the following honours.

CGPA in [4.00, 4.99]	-- Pass Class
CGPA in [5.00, 5.49]	-- Second Class
CGPA in [5.50, 5.99]	-- Higher Second Class
CGPA in [6.00, 7.99]	-- First Class
CGPA in [8.00, 10.00]	– First Class with Distinction

## 6. STANDARD OF PASSING:

A candidate shall be declared to have passed in the paper provided he/she has secured minimum GP of 4.5 in the University Examination and a GPA of 4.0 in aggregate of University Examination and Internal Assessment taken together.

A student who passes in all the courses will be declared to have passed M.Sc (Computer Science) with the following honours.

CGPA in [4.00, 4.99]	-- Pass Class
CGPA in [5.00, 5.49]	-- Second Class
CGPA in [5.50, 5.99]	-- Higher Second Class
CGPA in [6.00, 7.99]	-- First Class
CGPA in [8.00, 10.00]	-- First Class with Distinction

**7. Scheme of credits:**

The M.Sc(Comp.Sci) is of 94credits. The distribution of credits over semesters is given below.

Semester	Total credits
SEM I	24
SEM II	26
SEM III	26
SEM IV	18
Total	94

4 Credits	:	4 lectures per week
2 Credits	:	4 hours practical per week

**8. Grade point scheme:**

The 10-point scale would be used to convert marks out of 100 to grades and grade points according to the following table:

Marks as Percentage	Grade	Grade Point
[75.0, 100]	O	10.0
[70.0, 74.9]	A+	9.0
[65.0,69.9]	A	8.0
[60.0,64.9]	B+	7.0
[ 55.0,59.9]	B	6.0
[ 50.0,54.9]	C+	5.5
[ 45.0,49.9]	C	5.0
[40.0,44.9]	D	4.5

**9. GRACING:**

The gracing shall be done as per existing rules of the University.

**10. VERIFICATION AND REVALUATION:**

There is provision for verification and revaluation of the result. A student can apply for the verification and revaluation of the result within the two weeks from the declaration of the results with the prescribed fee. The verification and revaluation shall be done as per the existing rules of the University.

**6.7 : Master of Commerce (M. Com.) (CBCS 2018 Course)**

**1. Course Structure:**

The M. Com. degree course will be of two year duration consisting of four semesters and of minimum 70 credits as below:

Semester I (16 credits)] Semester II (18 credits), Semester III (18 credits) and Semester IV (18 credits). In each semester there will be four theory papers of 4 credits each. In addition there will be one theory course (Ability enhancement or skill enhancement course) each in semester II & III of 2 credits each in fourth semester there will be research project of 2 credits.

In each Semester, there will be four papers of 100 marks each out of which 40 marks will be for Internal Assessment (attendance, home assignments, class tests, long term papers, classroom presentations) and 60 marks for University Examination. All ability enhancement or skill enhancement courses will have 50 mark each, out of which 20 marks will be for continuous assessment and 30 marks for university examination. Thus M. Com. degree examination, four Semesters shall be of 1700 marks and of minimum 70 credits altogether. The following shall be the course structure.

## 5. Scheme of Examination:

The examination of regular students of M. Com. degree course of the Bharati Vidyapeeth (Deemed to be University), Pune, India admitted in the academic session 2018-19 and after shall be based on-

- (a) Semester Examinations,
- (b) Continuous Assessment,
- (c) Choice Based Credit System, and
- (d) Semester Grade Point Average and Cumulative Grade Point Average System

For each paper of 100 marks, there will be an Internal Assessment (IA) of 40 marks and the University Examination (UE) of 60 marks/3 hours duration at the end of each semester. A candidate who will secure atleast 40% of marks allotted to each paper will be given 4 credits. A candidate who does not pass the examination in any subject or subjects in one semester will be permitted to reappear in such failed subject or subjects along with the papers of following semesters.

The IA for each paper will be of 40 marks which will be carried out by the department during the term. The IA may be in the forms of written tests, seminars, term papers, presentations, assignments, orals or any such others. Here will be at least two types of assessments given above.

There shall be four semester examinations: first semester examination at the middle of the first academic year and the second semester examination at the end of the first academic year. Similarly, the third and fourth semester examinations shall be held at the middle and the end of the second academic year, respectively.

The candidates shall be permitted to proceed from the first semester up to final semester irrespective of their failure in any of the semester examinations subject to the condition that the candidates should register for all the arrear subjects of earlier semesters along with current (subsequent) semester subjects

At the end of each semester, a cumulative grade point (CGPA) & also semester grade point average (SGPA) will be calculated as a weighted average of the GPI of all course in which the student has passed till that semester.

## 6. **Research Project Work:**

There will be a Research Project to be prepared by a student during the fourth semester. The objective of the project work is to introduce students to research methodology in the subject and prepare them for pursuing research in theoretical or experimental or computational areas of the subject. The project work is to be undertaken under guidance of a teacher allotted to a student by the department.

Division of Marks

Synopsis with working bibliography (Internal Assessment) : 40 Marks

A full Project Report (Minimum 50-80 pages) : 40 Marks

Viva Voce : 20 Marks

As the Research Project is based on the self study done by the candidate and evaluated for 100 marks altogether, 6 credits will be awarded to a successful candidate in this subject. The project may be evaluated by two examiners one internal and one external, selected from the panel of PG examiners of the University. The viva voce must be conducted by the teachers selected out of the panel of PG examiners maintained by the University.

The candidate has to submit the project Report on or before the date declared by the department. The project report shall be typed and submitted in duplicate. A candidate who fails to submit the project may resubmit the same in the subsequent semester examination for evaluation. The project work activities must be duly supported by documentary evidence to be endorsed by the Head or Guide.

## 7. **Standard of Passing:**

A candidate shall be declared to have passed in the paper provided he/she has secured minimum GP of 4.5 in the UE and a GPA of 4.0 in aggregate of UE and IA taken together.

## 8. **Classification of Successful Candidates:**

Candidates who secured not less than 60% of aggregate marks (IA+UE) in the whole examination shall be declared to have passed the examination in the first class. All other successful candidates shall be declared to have passed in second

class. Candidates who obtain 70% of the marks in the aggregate (IA+UE) shall be deemed to have passed the examination in first class with distinction.

A student who passes in all the courses will be declared to have passed the M. Com. degree with the following honours.

CGPA in [4.00, 4.99]	-- Pass Class
CGPA in [5.00, 5.49]	-- Second Class
CGPA in [5.50, 5.99]	-- Higher Second Class
CGPA in [6.00, 7.99]	-- First Class
CGPA in [8.00, 10.00]	-- First Class with Distinction

**9. Scheme of Credits:**

Sixty (60) hours of teaching will lead to four credits (which mean four hours per week teaching in one semester) and long term paper as well as presentation will carry one credit each.

**10. Medium of Instruction:**

The medium of instruction and examination shall be in English. However, students can write their papers in Marathi also.

**11. Extra Credits:**

Regular students can also opt for extra credits if the departmental committee agrees. A student must at the commencement of the semester communicate which extra credits he/she is going to opt. A student can enroll for extra credits over and above the total 70 credits prescribed for the course by attending and appearing for the examination of the opted extra credits. However, in such case grades of the extra credit will not be counted for arriving at GPA.

The extra credit course can be selected from within the institute or any other faculties of Bharati Vidyapeeth University offering courses for Faculty of Arts, Social Sciences and Commerce or Faculty of Science, which will be declared at the commencement of session. Such extra credits will be mentioned separately in the grade sheet.

## 12. Grade Points Scheme:

The term grading system indicates a 10-point scale of evaluation of the performances of students in terms of marks obtained in the Internal and External Examination, grade points and letter grade. The total performance within a semester and continuous performance starting from the first semester are indicated respectively by Grade Point Average (GPA) and Cumulative Grade Point Average (CGPA). Candidates who pass all the examinations prescribed for the course in the first appearance itself alone are eligible for Ranking.

The 10-point scale would be used to convert marks out of 100 to grades and grade points according to the following table:

Marks as Percentage	Grade	Grade Point
[75.0, 100]	O	10.0
[70.0, 74.9]	A+	9.0
[65.0,67.9]	A	8.0
[60.0,64.9 ]	B+	7.0
[ 55.0,59.9]	B	6.0
[ 50.0,54.9]	C+	5.5
[ 45.0,49.9]	C	5.0
[40.0,44.9]	D	4.5
[00.0, 39.9]	F	0.0

### GRACING:

The gracing shall be done as per existing rules of the University.

### VERIFICATION AND REVALUATION:

There is provision for verification and revaluation of the result. A student can apply for the verification and revaluation of the result within the two weeks from the declaration of the results with the prescribed fee. The verification and revaluation shall be done as per the existing rules of the University.

● **Refund of Fees**

1. If a student submits his application for cancellation of admission in a prescribed form duly completed within 15 calendar days from the date of admission to that particular course, 10 per cent of the total amount of tuition fees prescribed for the course will be deducted from the amount of tuition fees paid by him.
2. If a student submits his application for cancellation of admission in a prescribed form duly completed within 30 calendar days from the date of admission to that particular

course, 25 per cent of the total amount of tuition fees prescribed for the course will be deducted from the amount of tuition fees paid by him.

3. If a student submits his application for cancellation of his admission after 30 calendar days from the date of admission to that particular course no refund of fees will be made
4. Under no circumstances other fees paid by the student will be refunded either in part or in full except the amount of college and university development fund.
5. If any student admitted to any of course leaves the course at any time after 90 calendar days after the date of his admission to that course in an academic year, he/she will be required to pay full amount of tuition fees for the entire Year of the course.

- **Hostel Accommodation**

Accommodation for boys and girls is available in the hostels. The students who have been admitted in the college will be eligible for admission in the hostel. They will have to apply separately in the prescribed form available in the hostel office.

- **Refund of Deposits**

A student should collect his/her deposit(s) within six months from the date of cancellation of his/her admission or within six months of completion of his/her course.

- **Grant of Terms**

The student will be granted terms and allowed to appear at university examination provided he has kept satisfactory **attendance of 75% for each subject / course / paper**.

- **Govt. Scholarships & Freeships**

Eligible and deserving students can avail of the facilities of various Govt. scholarships which are awarded on the basis of merit at S.S.C/H.S.C. examination and income of parents. This facility is not applicable for B.Sc. Computer Science students & Post Graduate Courses.

### **Scholarships**

- 1) National Merit Scholarship
- 2) National Loan Scholarship
- 3) State Govt./Central Government Open Merit Scholarship
- 4) Scholarship to Children of Primary and Secondary School Teachers
- 5) Talent Development in Maths and Physics Scholarship.
- 6) Freedom Fighter
- 7) Physically Handicapped Students Scholarship
- 8) Central Government Minority Scholarship
- 9) Single Girl Child - Indira Gandhi Scholarship
- 10) North-East / State Government Scholarship

NOTE : It will be the sole responsibility of the student to apply for freeships/ scholarships in the prescribed form and before the prescribed date. The college will not be responsible for any loss of scholarship / freeship due to negligence on the part of the student. Merit scholarship/freeship will be awarded to the deserving students by the college.

- **Extra Curricular Activities**

The following extra curricular activities are provided to the students by the college.

- 1) National Cadet Corps (N.C.C.)

The College has N.C.C. facility.

- 2) National Service Scheme (N.S.S.)

Interested students may join N.S.S.

- 3) Debating, Art Circle, Science Association, Commerce Association and Ladies Association.

- 4) Indoor, Outdoor Games

- **Library**

The college has a well equipped library. Needy and deserving students are given books under the Book-Bank Scheme.

- **Gymkhana**

Adequate arrangements are made for games and sports. Special equipments are made available for the development of the Gymnasium Section. The facilities for following games are provided by the college.

**Name of Games :**

- 1) Basket Ball

- 7) Table Tennis

- 2) Soft Ball

- 8) Chess

- 3) Foot Ball

- 9) Wrestling

- 4) Holly Ball

- 10) Athletics

- 5) Hand Ball

- 11) Swimming

- 6) Cricket

- 12) Gymnasium & Other Indian Games.

- **Earn and Learn Scheme**

Poor and meritorious students are given financial assistance under this scheme by providing some work to meet their expenses towards fees, books etc.

- **Medical Check-Up**

A medical check up is compulsory for all the students.

- **Student Safety Policy**

Bharati Vidyapeeth Deemed University provides facility of student safety policy for students studying in the Bharati Vidyapeeth Deemed University.

## 8 : RULES OF DISCIPLINE

- 1) Students should be regular and punctual in attending classes, tutorials and submission of the term-work in various subjects. Terms shall not be granted and a student shall not be certified for examination if his/her progress, conduct and attendance is not satisfactory.
- 2) Students, if found indulging in anti-national activities contrary to the provisions of the Acts & Laws enforced by Government will be liable to be expelled from the college without any notice by the Principal of the College.
- 3) Ragging of students in any form within or outside the College and hostel is strictly prohibited. Defaulters will be strictly dealt with as per Govt. instructions in this matter.
- 4) Smoking, drinking (alcohol) and use of drugs is strictly prohibited in the premises of the College and hostel.
- 5) Bicycles, scooters and vehicles should be parked only in areas provided for the purpose. The institute accepts no responsibility for their safe custody. Vehicles lodged elsewhere may be confiscated.
- 6) Any changes in the address of the student must be intimated by him in writing to the college office immediately.
- 7) Students must use aprons and uniforms of prescribed pattern while working in dissection hall, laboratories, class-room and in the college.
- 8) A student must carry Identity Card / Smart Card signed by the Principal and produce the same whenever asked by the College Authorities. **Without Identity card / Smart Card students will not be allowed to enter the college premises.**
- 9) A student is expected to read the notices put up on the notice board of the College. The College accepts no responsibility for loss of any advantage by student due to his failure to read the notice in time.
- 10) In case, a student requires to remain absent for some reasons, he/she will be required to take the prior permission of the Principal.
- 11) If any of the statement made in application form or any information supplied by the student in connection with his/her admission is later on, at any time found to

be false or incorrect, his/her admission will be cancelled, fees forfeited and he/she will be expelled from the college by the Principal and prosecuted by Govt., if deemed necessary.

- 12) A student shall not go to the press or any other publicity media without permission of the Principal.
- 13) Any damage to the college property, apparatus, furniture, equipments, library books, building etc. must be paid immediately by the students.
- 14) Students must attend social and national events organised by the College such as 26<sup>th</sup> January, 10<sup>th</sup> May and 15<sup>th</sup> August, and all other declared national celebrations.
- 15) A student will be bound by the rules and regulations framed by the College / University from time to time.
- 16) No student will be allowed to appear for the university examination unless he/she has paid all his/her dues and completed his/her practical journals and has kept satisfactory attendance.
- 17) Principal reserves the right to prescribe from time to time any rule/s of discipline and accordingly take necessary disciplinary action.

Bharati Vidyapeeth Deemed University framed general discipline code of conduct for the admitted students in the college premises entitled as "Student Discipline and Conduct Rule 2008" under the provision of Article 24(h) rules of Vidyapeeth. Students are required to go through in above "Student Discipline and Conduct Rule 2008". The same is displayed on the notice board for the information of admitted students.

### **IMPORTANT NOTE**

#### **Attendance of International Students :**

Office of the Commissioner of Police has made mandatory to the college to observe International students attendance in the college and send the monthly report of the individual international student to the police (FRO). In this context, International students are appealed to be regular and punctual in attending classes, practical work, tutorials, submission of the term-work in various subjects. If the progress, conduct and attendance of any international student is not satisfactory his/her terms shall not be granted

## **09 : Instructions to Newly admitted Students for Permanent Registration Number (PRN) Registration**

1. Student need to visit the “[www.bvuniversity.edu.in](http://www.bvuniversity.edu.in)” website.
2. Click on **Student PRN No. generation** link under the Admission Notice Column.

Soc. Ltd., Kadegaon • Sonhira Co-op. Poultry Society Ltd., Kadegaon, Dist. Sangli

*Where the mind is without fear and  
The head is held high;  
Where knowledge is free;  
Where the world has not been broken  
Up into fragments by narrow domestic walls;  
Where words come out from the depth of truth...  
Where the clear stream of reason has  
Not lost its way into the dreary desert  
Sand of dead habit...  
Into that heaven of freedom, my  
Father, let my country awake.*

*- Rabindranath Tagore*

## **COLLEGE OF PHYSICAL EDUCATION**

Dhankawadi, Pune-411 043 (Maharashtra), INDIA

### **DIPLOMA IN YOGA EDUCATION**

**(PG D.Y.Ed. - 1 Year)**

#### **GENERAL OBJECTIVES**

- 1) To train the candidates in the esoteric aspects of Yoga that deals with the problems of integration of personality.
- 2) To prepare the students to undertake teaching work in yoga.
- 3) To inculcate rational thinking and scientific temper among the students of yoga.
- 4) To use managerial and organizational skills for becoming a yoga teacher.
- 5) To help them understand varied responsibilities of a yoga teacher.
- 6) To acquaint the student with school/ college Health Programme.
- 7) To acquaint the students with the basic concept of management of yoga education in the school.
- 8) To understand the evaluation procedure in Physical Education.
- 9) To develop competencies and skills in yoga needed for becoming a healthy individual.
- 10) To enrich proper knowledge of yoga among the students to resolve emerging issues such as health & fitness, wellness etc.
- 11) To develop a special aptitude towards spiritual phenomenon through yoga.

#### **Programme outcome**

1. At the end of the course the students will be able to understand traditional Indian Yoga systems; the philosophy of the Yoga systems and the new thought in Yoga movement in the country.
2. The students will be able to understand the principles of Hatha Yoga and the texts in this field.
3. The programme will develop basic understanding of the human anatomy, the human physiology and a deeper understanding of the human systems
4. The students will be introduced to the essential elements of a yogic life style, the concept of health and disease and their remedies through yoga practice. They will also learn the overview of the five sheath human existence.
5. The students will be introduced to regular and rigorous practice (sadhana) of yoga practices that would make them disciplined and knowledgeable Yoga teachers

## REGULATIONS

### 1. **Duration of the Course:**

This is a co-education course. The duration of the course of study is for 1 year. The total Teaching days shall not be less than 200 days excluding examination.

### 2. **Eligibility for Admission:**

Candidate must be a graduate from any discipline.

### 3. **Selection Procedure for Admission:**

Admission to the eligible candidates will be given as per the selection procedure laid down by the College from time to time.

### 4. **Rules of examination**

- He/ she have completed all the practical and other work according to the syllabus up to the satisfaction of the principal. He/ she should have obtained such a certificate from the principal of the college. Unless and until the student obtains such a certificate, he will not be allowed to appear for university examination.
- Student who fails in any one or more internal practical works in the term end examination will be permitted to complete in the subsequent year of examination
- Student who fails in any one or more papers in the final examination will be permitted to rewrite the remained paper or papers in the subsequent year of examination
- **Medium of Instruction:** Medium of Instruction will be Marathi or Hindi or English or in combination. The candidate appearing for examination will have the option of answering all the examination subjects either in Marathi or in Hindi or in English.
- The college will complete the internal assessment of the heads mentioned in the syllabus. The internal assessment will be in the form of marks.
- For the rationalization of internal marks, the **College shall appoint moderation committee** (keeping the Principal of the college or his nominee as Chairman). The Committee will take the review of the internal marks given by the college faculties and advice the college if necessary. The college should take the appropriate action as per the advice of the committee.

### Calculation of Credit:

<b>For theory</b>	<b>For practical</b>
1 day = 2 hrs. For 200 days, total (200x2) = 400 hrs. 36 credits = 400 hrs. <b>1 credit = 11 hrs.</b>	1 day = 1 hrs (1 hr in morning + 1 hr in evening) For 200 days, total (200x2) = 400 hrs. 24 credits = 400 hrs. <b>1 credit = 16 hrs.</b>
<b>Minimum eligibility for exam:</b> Minimum 4 Credits in each paper = 11 hrs x 4=44 hrs. Thus, <b>44 hrs. to be spent</b> for each paper	<b>Minimum eligibility for exam:</b> Minimum 2 Credits in each event = 16 hrs. x 2= 32 hrs. Thus, <b>32 hrs. to be spent</b> for each event

A student must acquire 4 credits in each theory paper and 2 credits in practical event. Thus, the year-wise credit to be acquired is as follows:

<b>Year</b>	<b>Minimum CREDIT</b>		<b>Minimum TOTAL Credit needed</b>
	Theory paper	Practical	
1 <sup>st</sup> year	<b>Minimum 4 credits x 6 papers</b> <b>=24 credits</b>	<b>Minimum 2 credits x 6 events</b> <b>=12 credits</b>	<b>36 Credits</b> (Out of 60)

**Theory Lectures : 600                      Credits : 24**

**Practical                                        : 600                      Credits : 12**

(B.P.E.S)-3Years**

**(6 Semester Programme)**

**CURRICULUM FRAMEWORK  
2015-2018**

**GUIDELINES OF REGULATIONS AND SYLLABUS STRUCTURE FOR  
[B.P.E.S -3 years] (Six SEMESTERS)  
CHOICE BASED CREDIT SYSTEM (CBCS)**

**Preamble:** Bachelor of Physical Education and Sports i.e. B.P.E.S (Six Semesters Choice Based Credit System) for 3 year duration This is a professional programme meant for preparing basics to become teachers of physical education.

B.P.E.S programme shall be designed to integrate the study of physical activity in childhood, social context of Physical Education, historical development, subject knowledge of psychology, pedagogy, aim of Physical Education, communication language & skills etc. The B.P.E.S programme comprises of compulsory and optional theory papers as well as physical activity (practical courses).

**Programme Outcome**

1. Students will know and apply discipline specific scientific and theoretical concepts critical to development of physically educated person.
2. Students will plan, design and implement learning experiences that facilitate and enhance the growth of learners of diverse needs from varying backgrounds.
3. Students will use effective communication and pedagogical skills and strategies to enhance student engagement & learning.
4. Students will utilize assessments and reflection to foster student learning and to inform instructional decisions.
5. Students will inherit qualities essential to become effective professionals.
6. Students will understand the disciplinary content knowledge, application of content knowledge to teaching physical education.
7. Students will evaluate self and seek opportunities to grow professionally and humanistically.
8. Students will use appropriate technology to enhance teaching and learning and enhance personal and professional productivity.
9. Students will foster relationship with colleagues, parents, community and associated agencies to support student's growth & wellbeing.

**Duration, Intake, Eligibility and Admission Procedure:**

The Duration, Intake, Eligibility and Admission Procedure are as per the University norms and standards.

**Duration:** B.P.E.S programme shall be of duration of three academic years,

that is, Six semesters. However, the students shall be permitted to complete the B.P.E.S programme requirements within a maximum of Five years from the date of admission to the programme. However, if a student fails to complete the degree in 5 years he should take fresh admission.

**Intake:-**

50 seats are approved by University for B.P.E.S course.

\*No differently-abled candidate is eligible for the admission in B.P.E.S Course.

**Eligibility**

Candidate should have passed the higher secondary (10+2 standard) or equivalent examination with 40% marks. Relaxation of 5% marks will be given to the candidates belonging to S.C. & S.T. and other notified categories as per Government Rules or for extraordinary sportsman.

**Age:-**

For General category candidates, the upper age limit is 25 years as on 1<sup>st</sup> July of the academic year. Age relaxation for SC, ST and OBC candidate will be given according to the rules and regulation of Bharati Vidyapeeth University and GOI

**Admission procedure:-**

Admission shall be made on merit on the basis of marks obtained in the entrance examination consisting of 100 marks based on the following.

<b>a- Physical fitness test</b>	<b>50 marks</b>
<b>b- Written test</b>	<b>30 marks</b>
<b>c- Interview</b>	<b>10 marks</b>
<b>d- Sports achievement</b>	<b>10 marks</b>

The total entrance test will be conducted in two days and could be extended, if needed and it will be conducted at Bharati Vidyapeeth Deemed University College of Physical Education

There shall be Physical Fitness Test (modified AAHPER/CNADIAN/OR ANYOTHER fitness test) of 50 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education

- (A)** Theory Paper comprising of 30 multiple-choice questions of 30 minutes duration carrying 30 marks. Questions shall be based on Aptitude Test, Current Affairs and General Knowledge about sports.

**(B)** Interview comprising of 10 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education

**(C)** Sports Participation **Weightage** :- Candidate shall be given maximum 10 marks *weight age* on the basis of their sports participation in any one of the following level:

<b>Participation</b>	<b>Marks</b>
<input type="checkbox"/> <b>International:</b>	<b>10</b>
<input type="checkbox"/> <b>Senior National championship/ National Games:</b>	
1st Place :	<b>10</b>
2nd Place :	<b>08</b>
3rd Place :	<b>07</b>
Participation:	<b>05</b>
<input type="checkbox"/> <b>All India Inter-Zonal Inter University Competitions:</b>	
1st Place :	<b>08</b>
2nd Place :	<b>07</b>
3rd Place :	<b>06</b>
Participation:	<b>05</b>
<input type="checkbox"/> <b>Zonal Inter University Competitions/Junior National Competitions:</b>	
1st Place :	<b>07</b>
2nd Place :	<b>06</b>
3rd Place :	<b>05</b>
Participation:	<b>04</b>
<input type="checkbox"/> <b>Senior State Championship/Rural national games/Woman Festival:</b>	
1st Place :	<b>05</b>
2nd Place :	<b>04</b>

3rd Place :	<b>03</b>
Participation:	<b>02</b>

**Note:-**

\*The marks will be given in only those games/sports, which are in the competition list of Association of Indian Universities (**AIU**) and/or School Games Federation of India (**SGFI**).

\*The obtained position must be during last five academic sessions.

\*The school state championship and inter collegiate championship participation shall be considered for eligibility criteria only; the candidate shall not get any marks for sports **weightage**.

**Medical examination:-**

Qualified candidates will have to submit medical certificate by CMO and blood group certificate to the concern office.

**1. Rules of examination****(i) Eligibility for appearing at B. A. (Physical Education) examination:**

Students should have kept at least 80% attendance in each year for theory and practical.

He/ she must complete all the practical and other work according to the syllabus up to the satisfaction of the Principal. He/ she must obtain such a certificate from the Principal of the college. Unless and until the student obtains such a certificate, he will not be allowed to appear for university examination.

**(ii) Annual Examination:****Theory**

An annual examination will be held at the end of each year which shall be called "Annual Examination". This is a 6 semester course in semester-wise distribution of theory marks for each annual examination will be as follows:

1 <sup>st</sup> Semester:	400
2 <sup>nd</sup> Semester:	400
3 <sup>rd</sup> Semester:	400
4 <sup>th</sup> Semester:	400
5 <sup>th</sup> Semester:	400
6 <sup>st</sup> Semester:	400

### **Practical:**

There shall be practical examination to be conducted at the end of the completion of teaching every year. Year-wise distribution of practical marks for each annual examination will be as follows:

1 <sup>st</sup> Semester:	500
2 <sup>nd</sup> Semester:	500
3 <sup>rd</sup> Semester:	500
4 <sup>th</sup> Semester:	500
5 <sup>th</sup> Semester:	500
6 <sup>st</sup> Semester:	500

- N.B.-** (i) University Exam, internal assessment and practical will be done by a Panel of two examiners (One Internal And One External )appointed by University
- (ii) For the rationalization of internal marks, the **College shall appoint moderation committee** (keeping the Principal of the college or his nominee as Chairman). The Committee will take the review of the internal marks given by the college faculties and advice the college, if necessary. The college should take the appropriate action as per the advice of the committee and submit the internal marks to the University.

### **3. Standard of Passing**

A candidate should obtain minimum 40% of marks in each theory paper and also he/she should get 40% marks to pass the subject including theory and **sessional**. Similarly, to pass the examination, the candidate should also obtain minimum 40% marks in practical examination.

**4. A.T.K.T.**

A candidate may be allowed to take admission in succeeding year of the course irrespective of number of papers/ practical events in which he/she fails. It is mandatory that the whole course shall be completed within a period of 5 years from the date of admission.

**NOTES:**

- Each Theory Course shall have 4 Units and 3 hrs. Duration final examination except Sports Specialization which will have 3 units in each semester and 2-hour duration semester-end examination.
- The pattern of Semester-end question papers shall be:

**2.1. For papers having Max. Marks- 60: [12+12+12+12+(4x3)=60 marks]**

1. For University examination each question paper shall consist of 9 questions (4 long answer questions from each unit and 1 combined question of 4 short notes from all 4 units).
2. The candidate will attempt any one question from each unit. The 5<sup>th</sup> question will be compulsory consisting 4 short notes of 3 marks each.
3. For Internal Assessment of Theory Courses one Mid Semester Test of 30 marks for each course will be conducted by the college. For the mid semester test each question paper (of 30 marks) shall consist of 5 questions (4 long answer questions from first two unit and 1 combined question of 2 short notes from both units). The candidate will attempt any one question from each unit (2 questions of 12 marks each from first 4 questions). The 5<sup>th</sup> question will be compulsory consisting 2 short notes of 3 marks each. In addition, the teacher concerned shall conduct one open book examination consisting of 10 marks and submit the marks to the college exam department.
4. For Semester-end Examination in Activity Courses, the breaks-up of 100 Marks shall be as follows:
 

- Skill proficiency/playing ability	:	80
- Diary / Record book	:	20
5. For Specialization Sports Practice and Sports Training, the break-up of 100 Marks shall be as follows:
 

- Skill proficiency/playing ability	:	50
- Written Test	:	50
6. For Lesson Plan, student needs to complete perform 10 ground lesson in 3<sup>rd</sup> and 4<sup>th</sup> Semester at college itself.
 

- Lesson Plan	:	100 marks

A student shall select/opt for any one Game/Sport from amongst: Basketball, Cricket, Football, Handball, Table Tennis, Tennis, Track & Field, Volleyball, Weight Lifting, Kho-Kho, Kabaddi and Yoga.

**(Choice Based Credit System)****Standard of Passing:**

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0(40% of marks) at UE and also a minimum grade point of 5.0(40% marks) at IA.

If a student fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50 % in aggregate). The GPA for a course will be calculated only if the learner passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table:

<b>Range of Marks (Out of 100)</b>	<b>Grade</b>	<b>Grade Point</b>
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} \leq 80$	A+	9
$60 \leq \text{Marks} \leq 70$	A	8
$55 \leq \text{Marks} \leq 60$	B+	7
$50 \leq \text{Marks} \leq 55$	B	6
$40 \leq \text{Marks} \leq 50$	C	5
$\text{Marks} \leq 40$	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weights for performance at UE and IA shall respectively be 60% and 40%.

GPA is calculated by adding the UE marks of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

#### **Formula to calculate Grade Points (GP)**

Suppose that Max is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP. Sex  $x$ -Max/10 (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

<b>Range of marks at the evaluation</b>	<b>Formula for the Grade Point</b>
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (Marks/x)+2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (Marks/x)+1

Two kinds of performance indicators, namely, the semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester. While the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of learner when he/she completes the B.P.E.S programme is the final result of the learner.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA)	10x CGPA -10	If $5.00 \leq \text{CGPA} \leq 6.00$
	5x CGPA +20	If $6.00 \leq \text{CGPA} \leq 8.00$
	10x CGPA -20	If $8.00 \leq \text{CGPA} \leq 9.00$
	20x CGPA -110	If $9.00 \leq \text{CGPA} \leq 9.50$
	40x CGPA -300	If $9.50 \leq \text{CGPA} \leq 10.00$

### **Award of Honours:**

A student who has completed the minimum credits specified for the B.P.E.S programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honors are given below.

<b>Range of CGPA</b>	<b>Final Grade</b>	<b>Performance Descriptor</b>	<b>Equivalent Range of Marks (%)</b>
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA Below 5.00	F	Fail	Marks Below 40

**Educational Tour/Camp:** In addition to the above rules the student must fulfill the following requirements to acquire the degree which is mandatory. Educational Tour or Leadership Camp organized by the College of Physical Education of at least 07 days. The students shall contribute separately for these activities.

### **B.P.E.S**

#### **(Physical Education and Sports )**

#### **6 semester Credit system**

#### **Syllabus**

#### **Semester I**

## B.P.E.S /I/A/HC/01: **Fundamental of Physical Education**

### Unit I: Introduction

- a. Meaning, Definition, Scope and Functions of Physical Education
- b. Different Interpretations of Physical Education
- c. Concept of Movement Education
- d. Physical Education an Integral Part of Education
- e. Life time Physical Education for Fitness

### Unit II: Philosophical Foundations

- a. Meaning of Philosophy, Philosophical basis of Physical Education, Different Schools of Philosophy
- b. History of Physical Education
- c. Objectives of Preprimary, Primary and Secondary School Physical Education Programmes
- d. Concept of Physical Fitness
- e. Cultural aspect of sports and worthy use of Leisure time through Physical Education activities
- f. F) National and International understanding through Sports

### Unit III: Contribution of Thinkers & Competitions.

- |                       |                     |
|-----------------------|---------------------|
| a. Swami Kuvalayanand | b. Baren'Dcaubertin |
| c. Shri. Aurobindo    | d. Olympic Games    |
| e. Asian Games        |                     |

### Unit IV: Recreations.

- a. Meaning, Definition, Scope & Functions of Recreations
- b. Recreation in Rural, Urban & Industrial Area
- c. Age-Wise Planning & leadership in recreation

### **Book Recommended**

- i Principles of Education – R. M. Marathe, MoghePrakashan, Kolhapur
- ii Teacher and Education in Emerging Indian Society – NCERT, New Delhi.
- iii Human Values Education – S. P Rahela
- iv Foundation of Physical Education – Bucher Charles, WCB/McGraw Hill, 1999
- v The Principles of Physical Education – Willam J. E. W. B. Sounders Com. Philadelphia, 1964.

**B.P.E.S /I/A/HC/02: Anatomy****UNIT-I Introduction**

- a. Introduction of Basic concepts of Anatomy
- b. Structure and functions of cell.
- c Tissues and their classification.
- d Basic introduction of body systems.

**UNIT-II Skeleto Muscular Systems**

- a. Classification of Skeletal system.
- b. Types and structure of bones.
- c. Different types of joints.
- d. Classification of Muscle
- e. . Types of Muscles

**Unit III Respiratory and Digestive System**

- a) Meaning and types of Respiration, Organs of Respiratory System.
- b) Functions of Respiratory System, Vital capacity and its measurement. Mechanism of Respiration.
- c) Meaning, importance and organs of Digestive System.
- d) Functions, processes, mechanism of Digestive System.

**UNIT-IV**

- a. Circulatory System and Nervous System
- b. Meaning of the Circulatory System.
- c. Heart, its structure, functions.
- d. Cardiac Cycle. Meaning, functions compositions of Blood,
- e. Maintenance of Blood supply

**Books Recommended**

2. Sedey Rod R.- Anatomy and Physiology
3. Stephens & Tate P. St. lous, Mosby, 1992
4. Tortora G. J. : Introduction to Human Body, Ed. 4<sup>th</sup> California, Addison, Wesley, 1996

**B.P.E.S /I/A/HC/03: ENGLISH****UNIT-I : Vocabulary**

- 1.1 Synonyms
- 1.2 Antonyms
- 1.3 Common abbreviations in use
- 1.4 One word substitution
- 1.5 Words Commonly Misspel
- 1.6 Idiomatic Comparisons or Similes
- 1.7 Word Formation by Prefix and Suffix

**UNIT-II : Common Errors & Transformations**

- 2.1 Common errors in sentences especially regarding number, gender, Pronouns, prepositions, articles, degrees etc.
- 2.2 Punctuation
- 2.3 Kinds of sentences - Assertive, Interrogative, Exclamatory, Imperative, Optative
- 2.4 Transformation of sentences
- 2.5 Tenses

**UNIT-III : Correspondence**

- 3.1 Personal Letters
- 3.2 Applications for leave, scholarship etc.
- 3.3 Invitations- Formal and Informal with reply
- 3.4 Notice Writing

**UNIT-IV :- Descriptive Writing**

- 4.1 Paragraph writing (50 words)
- 4.2 Essay writing (250 words)
- 4.3 Comprehension of unseen passage
- 4.4 Summary Writing

**B.P.E.S/I/A/SC/01: Historical Development of Sports Movements (Elective Subject)**

**UNIT -Introduction**

- A. Physical Education in Ancient Civilization with reference to  
i) India ii) Greece iii) Rome iv) Egypt.
- B. Development of Physical Education & sports during 20<sup>Th</sup> Century with special reference to i) U.S.A. ii) Sweden iii) Germany iv) Olympics v) Asian Games.

**UNIT - II Sports Bodies of India**

- Physical Training for teacher working in school & college
- Movement of Akhadash & Vyayam Shalas.
- Central Advisory Board of Physical Education
- Sports authority of India (Sai)
- Awards National & state level.
- All India council of sports
- SNIPES, NSNIS, LNIPE.
- Nehru Yuwak Kendra

**UNIT - III A Study of the development of Physical Education sports & Games in Maharashtra with reference to**

- a) Pune International marathon  
b) The present Organization set up in state.  
c) Important schemes and activities including indigenous activities.  
d) Role of Voluntary Physical Education & sports Bodies in state...

**UNIT - IV Youth welfare & Youth Services:-**

- a) Concept of youth welfare & Youth work.  
b) Youth organization in India  
c) Programmers under youth development  
d) Youth services such as secreting & guiding N.C.C. N.S.S., Civil defense & scout & Guide movement.

**B.P.E.S /I/A/SC/01: First Aid****UNIT -I**

- a) Meaning and definition of first aids and its importance in sports
- b) Types of first aids and its objectives
- c) First aids box and its management
- d) Role and qualification of first aider

**Unit-II**

- a) Common sports injuries in different parts of body
- b) First aids for sports injuries
- c) Common causes of sports injuries and its prevention
- d) RICE & Bandage

**UNIT - III**

- a) Definition of safety education and its significant
- b) Aims and objectives of safety education
- c) Identify causes of accidents & List types and sources of accidents
- d) Safety measures at
  - Home
  - Road
  - School
  - Community

**UNIT – IV**

- a) Describe and demonstrate the management of the following:-
  - Stings and Snake bites
  - Fracture
  - Nose bleeding
  - Electric shocks and other shocks
- b) Fevers:-
  - Definition of fever
  - signs of fever
  - first Aid for fever
  - Management of fever.
- c) Fainting- Definition and causes of fainting, first aid for fainting
- d) Drowning/Near-drowning:- Definition of drowning, definition of near-drowning
- e) first aid for drowning/near drowning.

## **Semester II**

## B.P.E.S /II/A/HC/01: **Physiology of Exercise**

### **UNIT-I Introduction**

- a. Definition and importance of physiology and Exercise physiology
- b. Essential properties of living being.
- c. Effect of exercise on various system of the body.
  - a) Circulatory system
  - b) Respiratory system
  - c) Muscular system

### **UNIT-II**

#### **1. Cardiac functions and Blood**

- a. Cardiac cycle and its function in human body.
- b. Control of cardiac function.
- c. Blood pressure and it's regulation in human body.

#### **2. Kidney**

- a) Role of kidney in human body
- b) Function of kidney

#### **3. Physiology terminology**

a) Second wing	b) Second wing
c) Second wing	d) oxygen debt
e) $VO_2$ max	f) Vital capacity
g) Athletic heart	

### **Unit III**

#### **1. Nervous system**

- a) Definition of Nervous system, role of nerve fibers
- b) Parts of Brain & spinal cord its functions,
- c) Central nervous system and peripheral nervous system**

#### **2. Endocrine system**

a) Pituitary gland	b) Thyroid
c) Parathyroid	d) Adrenal
e) Sex organ	

### **3. Environment effect on the body**

- a) High altitude
- b) Hot condition
- c) Cold condition

#### **UNIT-IV**

- a) Physical fitness and its components.
- b) Training, conditioning, and warm-up.
- c) Types of muscle contraction.
- d) Lactic acid and its influence on sports performance.
- e) First aids and sports injuries

#### **Books Recommended**

## B.P.E.S /II/A/HC/02: **Information Technology**

### **Unit I: Introduction of Computer**

1. History, application, characteristics, types of computer (Analog, Digital, Hybrid) and generations of Computer.
2. Physical structure of computer.
3. Role of computer in various fields
4. Need of computer in Physical Education.

### **Unit-II Component of Computer System: An Introduction of Hardware and Soft ware**

1. Components of computer system
2. CPU (CU, ALU and Main memory)
3. Input devices (Keyboard, Mouse and Track Ball, Touchpad, Joysticks, Touch Sensitive Screens, Data Scanning Device, Bar Code Readers, Optical Mark Reader (OMR) and Magnetic Ink Character Reader (MICR)
4. Output Devices (Monitor, Printer, LCD)
5. Hardcopy Devices (Printers and Plotter)
6. UPS and types of UPS
7. Operating System Programme Languages translator.
8. Application program/package

### **UNIT-III: USE OF COMPUTERS IN SCHOOLS**

1. Functional knowledge of operating computers–on/off, word processing, use of power point, excel
2. Computer as a learning tool
3. Effective browsing of the internet for discerning and selecting relevant information
4. Survey of educational sites based in India
5. Downloading relevant material
6. Cross collating knowledge from varied sources
7. Competencies in developing original software

### **UNIT IV: VISUALISING TECHNOLOGY-SUPPORTED LEARNING SITUATIONS**

1. Preparation of learning schemes
2. Interactive use of audio-visual programme
3. Developing PPT slide show for classroom use
4. Use of available software or CDs with LCD projection for subject learning interactions
5. Generating subject-related demonstrations using computer software

## B.P.E.S /II/A/HC/03: **Psychology of Sports**

### **UNIT- I Introduction to Sport Psychology**

1. Meaning and scope, Importance, relationship with other sport sciences,
2. Development of sport psychology in India.
3. Scope of Sports Psychology

### **UNIT-II Concept and meaning of motor learning**

1. Stages of learning transfer of training, assessment of learning and factors affecting of motor learning.
2. Growth & Development: Concept of growth & development,
3. Play and its Theories.

### **UNIT III Personality in Sport:**

1. Concept and definition of Personality
2. Modern perspective, (trait, humanistic, social cognitive and biological),
3. Dynamics of personality in sport Anxiety in Sports

### **UNIT-IV Psychological Preparation and Competition:**

1. Motivation and Techniques of Motivation
2. Phenomenon of competitive
3. Psychological preparation for competition (arousal regulation, imagery, self-confidence, goal setting, concentration.)
4. Short term psychological preparation (upcoming competition) Mind to muscle and muscle to mind relaxation techniques.

B.P.E.S /II/A/SC/01: **Fitness and Wellness (Elective Subject)**

**FITNESS & WELLNESS**

**Unit-I**

- Definition of fitness & wellness, Components of fitness & wellness,
- Benefits of exercise & health, Fitness & wellness strategy,
- Fitness potential for popular sports, Fitness & wellness activities,
- Role of parents & community for the maintenance of fitness & wellness

**Unit-II –**

- Selection of machines for various parameters of health & wellness,
- Fitness center, Safety in gymnasium & sports field,
- Clothing & accessories, Carriers in fitness & wellness

**Unit-III –**

- Test, measurements & evaluation of fitness components, Cardiovascular endurance, Muscular strength, Muscular endurance, flexibility, body composition, agility, balance, co-ordination, speed, power, reaction time

**Unit-IV –**

- Assessment prior to fitness & wellness prescription,
- Principles of training, Training methods
- Diet prescription, Exercise prescription, Prescription for life style changes, Weight management
- Prevention of diseases through fitness & wellness, Diabetes & exercise, Cardiovascular diseases and exercise, Ageing and exercise, Addiction management- sustains abuse controls
- Stress management, Spiritual management

**B.P.E.S /II/A/SC/02: Adapted Physical Education (Elective Subject)****Unit 1: An Introduction to Adapted Physical Education**

- a) Meaning, Need and Importance of Adapted Physical Education and Sports
- b) Purpose, Aims and Objectives of Adapted Physical Education and Sports
- c) Program organization of Adapted Physical Education and Sports
- d) Adapted Sports- Para Olympics

**Unit 2: Development of Individual Education Program (IEP)**

- a) The student with a disability
- b) Components and Development of IEP.
- c) Principles of Adapted Physical Education and Sports
- d) Role of Physical Education teacher
- e) Teaching style, method & approach in teaching Adapted Physical Education

**Unit 3: Developmental Considerations of an Individual**

- 3.1 Motor development
- 3.2 Perceptual Motor development
- 3.3 Early childhood and Adapted Physical Education

**Unit 4: Individual with unique need and activities**

- 4.1 Behavioral and Special learning disability
- 4.2 Visual Impaired and Deafness
- 4.3 Health Impaired students and Physical Education
- 4.4 HRPF and its development for Individual with unique need
- 4.5 Role of games and sports in Adapted Physical Education

**Semester III**

## B.P.E.S /III/A/HC/01 :Kinesiology

### Unit-I : Introduction To Kinesiology

1. Meaning, aim & objectives, importance of kinesiology for physical education and sports
2. Fundamental concepts: Centre of gravity, line of gravity, axis and planes of motion, fundamental starting positions,
3. terminology of fundamental movements, and classification of muscles

### UNIT-II :Location& Action

1. Types of Joints
2. Location & Action of Muscles at Various Joints:- a) Upper extremity – shoulder girdle, shoulder joints, elbow joint b) Neck, trunk (Lumbothoracic region)
3. Lower extremity – Hip joint, knee joint, ankle joint
4. Muscular analysis of fundamental movements:- Walking, running, jumping, throwing, catching, pulling, pushing, striking, hangine

### UNIT-III Laws of Motion

1. Define mass, weight, force, pressure work, power energy, impulse, moments, impact, friction,
2. Newton's laws of motion
3. Angular kinetics: moment of inertias, conservation of moments, transfer of moments, levers, equilibrium

### UNIT-IV Motion

1. Meaning, aims, objectives and importance, types of motion, linear motion & angular motion
2. Linear kinematics: Speed, velocity acceleration uniform accelerated motion and projectile motion
3. Angular kinematics: Angular sped, angular velocity, angular acceleration and relationship between linear and angular motion

## B.P.E.S/III/A/HC/02: **METHODS OF TEACHING IN PHYSICAL EDUCATION**

### **UNIT I : Introduction of Teaching**

1. Meaning of teaching, coaching, officiating and as a career in Physical Education & Sports
2. Meaning and need for methods,
3. Factors effecting teaching method.

### **UNIT II Teaching methods**

1. Teaching methods and its Types- command, demonstration, imitation, discussion, part- whole, whole- part-whole, explanation and recitation
2. Techniques of presentation: personal and technical preparation.

### **UNIT III Class management**

1. Class management: techniques, formations, command (types and techniques)
2. factors effecting class management
3. Lesson Plan: Need, construction, Introduction development, skill/recreation

### **UNIT IV**

1. Qualification and qualities of a coach,
2. Personnel in physical education/sports.
3. Teaching Aids: Need and Importance, Types of teaching aids.
4. Fundamental skills of athletics, aquatics, badminton, basketball, cricket, football, hockey, handball, kabaddi, KhoKho, volleyball and Judo, Yoga Assanas,

## B.P.E.S /III/A/HC/03: **Health Education**

### **Unit-I Health**

1. Health-meaning, dimensions of health and their interrelationships,
2. Importance of health for individual, family, community and nation;
3. Factors influencing health,
4. Spectrum of health

### **Unit II Health Education**

1. Health Education- meaning, scope
2. Aims and objectives of Health Education
3. Principles, methods and media used in health education
4. Hygiene- personal hygiene, food hygiene, environmental hygiene-meaning, need and importance; associated practices related to maintenance and promotion of health

### **Unit-II Foods and Nutrition-**

1. Misconceptions about food, essential body nutrients- functions, food sources, balanced diet, diet prescription
2. Communicable and Non-communicable diseases- meaning, distinction between communicable and non-communicable diseases.
3. Communicable diseases- their mode of spread and prevention of diarrhea diseases, typhoid, malaria, STD Respiratory disease ; non-communicable diseases- causes and prevention of diabetes, CVD, cancers, renal diseases and respiratory diseases.

### **Unit-III Contemporary health problems of college youth-**

1. Alcohol, drugs, use of tobacco (chewing, sniffing, smoking)- their harmful effects substance abuse management
2. National health programmes- components of existing national health programmes

### **Unit IV Health Agencies:**

- 1 Introduction to Organizational and Administrative set-up of Health System in India
  - National level
  - State Level
  - District Leve
2. Steps of Planning of Health Education Programme
3. Internationals health agencies- WHO, UNICEF, Red Cross- their constitution and role in promoting health

B.P.E.S /III/A/SC/01: **Sports Entrepreneur (Elective)**

### **Unit I: Introduction to Sports Entrepreneurship**

1. Concept of entrepreneurship, innovation & knowledge management in sport
2. Business Planning Process - The business plan as an entrepreneurial tool
3. Elements of Business Plan, Objectives, Market Analysis, Development of product / idea, Marketing, Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition, Business Model Canvas and Drafting Business Proposal for Funding Agency.

### **Unit II : Introduction to Finance in Sports**

1. The Four Domains of Sports Marketing, Marketing Through Sports
2. Finance, Organization & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition,
3. Business Model Canvas and Drafting Business Proposal for Funding Agency.

### **Unit II. Management of Physical Education and sports**

1. Meaning, Need and scope of management of Physical Education
2. Principles of Sports Management
3. Construction, marking and maintenance of play grounds, track & field, gymnasium, swimming pool and athletic track

### **Unit IV: Organization of co-curricular activities and Physical Education programmes.**

1. Physical Education Budget : Need, Importance, procedure and principles of budget making,
2. Physical Education and sports programmes for - Primary, secondary and higher secondary School for sports awareness – demonstration, play days, sports rallies, sports exhibitions
3. Organization of National days (15<sup>th</sup> August & 26<sup>th</sup> January)., Organization of mass competition, sports day, hiking, trekking, Scout and Guide Camp and picnics
4. Ceremonies of competition – Opening, closing and victory

### **References:**

- Sports Marketing By Melissa Jane Johnson Morgan Jane

**B.P.E.S/III/A/SC/02: Professional Preparation in Physical Education (Elective)**

**Unit I- Foundation OF Professional Preparation**

- 1 Meaning of Professional
- 2 Components of Professional Preparation.
- 3 Contribution of physical education in attaining ideals of Indian democracy.
- 4 Forces and factors affecting educational policies and Programme.

**UNIT-II Historical Perspective**

1. Historical review of Professional Preparation in India.
2. Professional courses being offered in professional preparation colleges in India.
3. Professional Preparation in Physical Education in USA, USSR and UK.
4. Beginning of Professional Preparation in the world.

**UNIT-III Under-Graduate preparation of professional personnel.**

- 1 Purposes, Admission Requirements of Undergraduate preparation.
- 2 Theory, Teaching practice and practical.
- 3 Professional competencies to be developed.
- 4 Post-Graduate Preparation.
- 5 Methods of instruction.
- 6 Professional relations.

**UNIT-IV Teacher and Teaching**

- 1 Teaching as a career.
- 2 Basic Qualities of a successful teacher.
- 3 Preparation of the specialized physical education teacher.
- 4 Types of teaching jobs.
- 5 Types of non-teaching jobs.

**Reference**

Education, Washington, Aahper pub. 1974 Borozne Joseph & Pechar Stanley

## **Semester IV**

B.P.E.S /IV/A/HC/01: **EVENT MANAGEMENT**

### **Unit-1**

Meaning of Events, classification of events, Event Management, Designing an Event- 5C"s (Conceptualization, Costing, Canvassing, Customization, Carrying out).

Key Elements of Events- (Event Infrastructure, Organizers, Clients, Target Audience, Media, and Venue).

### **Unit-II**

Managing Sports Events- Planning, Organizing, Coordinating and Controlling Pre events,

During the Events & Post Events issues. Sponsors, Sports Management Companies, Spectators, Sports personalities, Media etc. Sports Management Companies- Introduction, Role, Scope of Work, Service rendered to the clients, Ways of Functioning- Team work, Departments etc.

### **Unit-III**

Sources of funds available for sports: Broadcasting:- What is broadcasting, The basics of sports broadcasting rights, Media providers:-Who are the media providers, How do they fund sports

Sponsorship:-Meaning of sponsorship, Sports and sponsorship, Major sponsors in sports

Team sponsors and individual sponsors, Endorsement, Sports and celebrity endorsement

### **Unit-IV**

Sports and advertisements Advertisement Suggested Readings

Advertisement and brand choice Aiming the right target, Top sports ad companies

Firms and their advertisement choices, Effects of advertisement, gate money

Budgetary Control in sports

Role of Mass Media in Event Promotion.- Introduction to different Sports Media (Television channels, Sports Magazines etc.) Popular Sports Channels Operating in India- ESPN STAR SPORTS, ZEE SPORTS, TEN SPORTS, DD SPORTS, and NEO SPORTS etc. Spectators control, Importance of Spectators for Sports & Games. Human resource management.

## B.P.E.S /IV/A/HC/02 : **Sports Sociology**

### **1. Introduction to Social Science**

- 1.1 Introduction & Meaning of Social Sciences.
- 1.2 Scope of Sociology and its relation with other subjects of Social Sciences.
- 1.3 Defining Society, Community, Association, Institutions, Customs;
- 1.4 Man as a Social animal;
- 1.4 Effect of various social forces on personality development;
- 1.5 Origin and growth of society & Culture.

### **2. Social Structure, Organization and Institutions :**

- 2.1 Socialization, social codes and social control, groups (primary and secondary, crowds and public, family, kinship and marriage;
- 2.2 Social stratification, social class and caste, social mobility;
- 2.3 Economical and political institutes for society;
- 2.4 Cultural and religious institutions;
- 2.5 Concept, factors and process of socio-cultural changes.

### **3. Main Features of Indian Society and Rural Scene:**

- 3.1 Demographic profile, social elements;
- 3.2 Religions pluralism – Hindu, Muslim, Christian and Tribal;
- 3.3 Linguistic Pluralism;
- 3.4 Indian policy – secularism, democracy, social justice;
- 3.5 Indian Rural Scene:
  - 3.5.1 Indian village, rural family, rural education;
  - 3.5.2 Indian village community, rural stratification;
  - 3.5.3 Community development projects and Panchayati-Raj;
  - 3.5.4 Trends in Rural change.

### **4. Sport and Society:**

- 4.1 Meaning and definition of sport sociology;
- 4.2 Sport as a social occurrence;
- 4.3 Socialization through games and sports;
- 4.4 Relationship between family and sport participation;
- 4.5 Relationship between politics and sports;
- 4.6 Social Stratification and sports;
- 4.7 Sports as a social phenomenon.

**B.P.E.S / IV / A/ HC/03: Environment Science**

1. **Introduction:**
  - 1.1 Multi – Disciplinary nature of environmental studies.
  - 1.2 Definition, Scope and Importance of environmental studies.
  - 1.3 Concept of environmental education.
  - 1.4 Historical Background of environmental education.
2. **Natural Resources and related environmental issues:**
  - 2.1 Forest Resources:
    - 2.1.1 Use and over exploitation, deforestation
    - 2.1.2 Timber extraction, mining, dams and their effects on forests and tribal people.
  - 2.2 Water Resources
  - 2.3 Flood Resources:
    - 2.3.1 World food problems
    - 2.3.2 Changes caused by agriculture and overgrazing
    - 2.3.3 Effects of modern agriculture
    - 2.3.4 Fertilizer-pesticide problems.
  - 2.4 Energy Resources:
    - 2.4.1 Growing energy needs
    - 2.4.2 Renewable and non-renewable energy sources
    - 2.4.3 Use of alternate energy sources.
  - 2.5 Land Resources:
    - 2.5.1 Land as a resource
    - 2.5.2 Land degradation
    - 2.5.3 Man induced Land Slides
    - 2.5.4 Soil erosion and desertification
  - 2.6 Role of an individual in conservation of Natural Resources.
- 3.1 **Ecosystem:**
  - 3.1.1 Concept, structure and function of an Ecosystem
  - 3.1.2 Producers, consumers and decomposers.
  - 3.1.3 Energy flow in the ecosystem
  - 3.1.4 Food chains, food Webs and ecological pyramids.

## 4.1 Environmental Pollution:

4.1.1 Definition, effects and control measure of:

- 4.1.1.1 Air Pollution
- 4.1.1.2 Water Pollution
- 4.1.1.3 Soil Pollution
- 4.1.1.4 Marine Pollution
- 4.1.1.5 Noise Pollution
- 4.1.1.6 Thermal Pollution
- 4.1.1.7 Nuclear Hazards

4.1.2 Solid Waste Management: causes, effects and control measures of urban and industrial wastes.

4.1.3 Role Disaster Management: Floods, earthquake, cyclone and Land slides.

## B.P.E.S /IV/A/SC/01: **FITNESS INSTRUCTOR**

### **Unit-I Introduction to health and fitness**

Health goals, fitness goals, performance goals, components of physical fitness and performance, behaviours that support fitness and performance, taking control of personal health and fitness, factors to consider prior to physical activity, exercise requirement for prevention of premature health problems, how to promote physical activity promotion of physical activity adherence

### **Unit-II Foundation to health fitness instructions:**

Energy cost of physical activity, measurement of energy expenditure, significance of cardiovascular fitness, risks of testing cardio respiratory fitness, components of health related and fitness related fitness

### **Unit-III Healthy body composition**

Measurement of body fat calculating target body weight, LBM and Body fat,

Muscular strength and endurance:- health fitness requirements, assessment of strength and muscular endurance

Flexibility: Importance of flexibility in health and fitness, factors affecting range of movement (ROM) spine and hip joint, flexibility and low back function

**Unit-IV Exercise prescription:** foundation of prescribing exercise, general guidelines for cardio-respiratory fitness programmes, determining intensity, general exercise testing, exercise programme selection, exercise prescription for body weight management

Muscular strength and endurance training: fundamental principles, types of strength training, muscular training modes, intensity and frequency. Overreaching and overtraining

Flexibility training: exercise considerations for improving flexibility, prophylactic exercise for improving low back function

B.P.E.S /IV/A/SC/02: **Sports Industry**

**SPORTS INDUSTRY**

**Unit-I**

Introduction, history in relation to „sports goods industry“ in India, Industrial relations in India, Peculiar characteristic, i.e. Hand Made Goods, Involving skilled workers-piece rated wages, Policy- five year plans for production, export strategy and potential

**Unit-II**

Sports Industry in Europe-USA, Canada and ASIA & other parts of the world, Major sports-World wide-Europe, ASIA & India including some local games, development of sports

**Unit-III**

Future need for mechanization to improve quality, Evaluation of management thought, planning-nature, objective, promises, strategies & tactical plan

**Unit-IV**

Organizations-Principles, structure, management, levels, quality control, Personnel management- recruitment selection, training, performance

**Unit-V**

Direction/controlling- production control, material control, quality control, sales distribution-government departments, whole sellers & retailers

**Reference**

**Semester V**

## B.P.E.S /V/A/HC/01: **Correctives in Physical Education**

### **Unit-I**

1. Definition of Remedial, physiotherapy and corrective exercises.
2. Concept of posture, its meaning and characteristics of correct and incorrect posture.
3. Causes of incorrect posture
4. Necessity and importance of correct posture.
5. Principles of correct posture.
6. Tests for correct posture.

### **Unit-II**

1. Classification of posture : a. Good Type b. Bantom Type c. Fatigue Type
2. Postural deformities and their causes : a. Kyphosis b. Lordosis c. Scoliosis d. Bow legs e. Knock knee f. Flat foot
3. Preventive and remedial measures for postural defects :
  - a. Psychological and habitual consideration in preventing and correcting postural defects.
  - b. Corrective exercises for various postural defects.
  - c. Physiotherapist treatment in correcting postural defects.

### **Unit-III**

1. Massage: **a.** Meaning, definition and a brief history of massage.  
**b.** Massage as means of relaxation and points to be considered while giving massage. **c.** General effects of massage.
2. Classification of the manipulation and movements in the massage :
3. Effleurage and stroking i. Petrissage ii. Percussion / Tapotement  
iii. Vibration and shaking.
4. Effects of manipulation and movements on the different systems of human body.

### **Unit-IV**

- Classification of positions : a. Fundamental positions b. Derived positions c. Modified positions
- Classification of exercises along with their practical instructions : a. Free mobility exercises b. Assisted exercise c. Resisted exercises

### **Reference Books:**

1. Smith Lara K. and Others, "Srunnstrem's Clinical Kinesiology", Jaypee Brothers P.B. No- 7193 New Delhi 1998.

## B.P.E.S /V/A/HC/02 : **Test measurement and Evaluation**

### **UNIT-I**

- Introduction to test, measurement and evaluation and their importance in the field of physical education
- Test constructions:- a) general consideration b) physical fitness/ efficiency test

### **UNIT – II**

- Meaning and importance of statistics in the field of physical education, “population” and “sample” “random sampling”
- Meaning of data, kinds of data- continuous and discrete Frequency distribution, construction of frequency tables, mean, median and mode.

### **UNIT –III**

- Measures of variability range, quartile, deviation, standard Deviation, co-efficient of variation
- Normal probability curve and meaning, uses its principles, Diagrammatic represent action

### **UNIT-IV**

- Physical fitness testing: components of physical fitness
- Strength test: - Kraus Weber strength test, Muscular Endurance test: Cardiopulmonary test:
- Endurance Test, Harvard step test.
- Anthropometric Measurements:- Weight, height, sitting height, chest circumference, thigh circumference, calf circumference, skin fold biceps, triceps, sub scapular and supra iliac.
- Measurement of skills, games and sports-Johnson badminton test, Brady volleyball test, McDonald soccer test, Cornish Handball test, Hockey skill test- SAI hockey Test

### **Reference**

## B.P.E.S /V/A/HC/03: **Yoga Education**

### **UNIT- I**

Origin of yoga, definition and scope of yoga, limitations and misconceptions, importance of yoga in physical education and other fields

### **UNIT- II**

Historical development of yoga in India.

Types of Yoga:- Hatha yoga, laya yoga, mantra yoga, bhakti yoga, karma yoga, jnana yoga, raj yoga

### **UNIT- III**

Patanjali yoga sutras- yama, niyama, asana, pranayama

Pratyahar- Benefits & utilities of these. Astanga yoga- Definition, objectives, dharna, dhyana, Samadhi & their psychological impact.

Shatkarm/cleansing process/ yogic methods and personal hygiene.

### **UNIT- IV**

Asanas: Types, importance of asanas in special reference to Physical Education & Sports.

Differentiate between asanas and exercise.

Pranayama and importance of pranayama in special reference to Physiological effects

Bandhas, mudras and their physiological effects.

### **UNIT- V**

Disease wise treatment through yoga therapy- Asthma, high & low B.P, diabetes, obesity, heart disease, insomania, arthritis, backache, female disease and importance of vegetarianism in yogic diet

### **SUGGESTED READINGS**

## B.P.E.S /V/A/SC/01: **GYM MANAGEMENT**

### **UNIT-I**

Concept of nutrition and health, balanced diet, dietary aids and gimmicks, Energy and activity, calculating calorie intake and expenditure

Obesity, anorexia and related health problems – measurements and management, Weight management programmes

### **UNIT-II**

Understanding of various forms of aerobics- floor aerobics, step – aerobics, weight, Aerobics and aqua aerobics, Training effects of aerobic fitness on various physiological systems namely skeletal Muscular, circulatory and respiratory

Improvement of aerobic fitness, Aerobic fitness programme

### **UNIT-III**

Location and Establishment of gym (Publicity, policy, reception, information, Registration, offer of programmes), Procurement, placement & maintenance of gym, Equipments , Marketing, clientage, Enrolments, record keeping, social activities, Public Relations, Individualized/group grooming programme, basic concepts of financial management

Gym-instructor – qualification, qualities, pay-roll, Performance – evaluation, grooming and presentation, Introduction to different exercise equipment, Gym management – Costing, Balance sheet, Promotional plans

### **UNIT-IV**

Measurement of Weight and Height, Calculating BMI (Body Mass Index ), Measurement of Fitness Components Flexibility (Sit and Reach Test, Hip Bend and Toe Touch), Strength (Sit-Ups, Leg-Raise for Minimal Strength), Cardiovascular Endurance (One-mile run, Physical Efficiency test, Harvard step test),

Self- evaluation –Personal Health and Well-being

### **UNIT-V**

Exercise schedules – Aerobics, Fitness and Weight Management

### **Reference**

## B.P.E.S V/A/SC/02 :SPORTS JOURNALISM

### UNIT-I

Meaning, scope and changing trends of journalism in sports

Historical development & role of print and electronic media in sports promotion

### UNIT-II

Language – vocabulary, spellings, figure of speech , dialect, grammar, punctuation

Fundamentals of a sports story/ news

### UNIT-III

Organizational set-up of a news paper- printing, process sequences of operations in the printing of a news paper/journals.

Introduction of various sports organization and agencies- Olympic Games, Asian games, commonwealth games, awards and trophies.

### UNIT-IV

Theory and principles of advertising in sports

Public relations in sports, press release, conferences

Research tools for developing a sports story

Process of news paper publishing and management

### Reference

**Semester VI**

## B.P.E.S /VI/A/HC/01: **Basic of Sports Training**

### **UNIT I: Introduction**

- Meaning and Definitions of Sports Training.
- Meaning of terms: Coaching, Teaching, Conditioning and Training.
- Aim and Tasks of Sports Training.
- Characteristics of Sports Training.
- Principles of Sports Training.
- Systematization of Sports Training.
  - Beginner
  - Intermediate.
  - High Performance.

### **UNIT-II: Training Load**

- Definition and Types of Training Load.
- Features/Factors of Training Load
- Principles of Intensity and Volume of Stimulus.
- Over Load.
- Meaning and types of over load.
- Causes of over load.
- Symptoms of over load.
- Tackling of over load.
- Judgment of Training Load.

### **UNIT-III :- Strength**

- Concept and types of Strength.
- Factors determining Strength.
- Methods of strength training.
- Management of strength training programme.

### **Endurance**

- Concept and types of endurance.
- Factors determining endurance.
- Methods of endurance training.

### **Speed**

- Concept and Classification of Speed.
- Factors determining speed.
- Methods of developing speed abilities.
- Reaction speed
- Speed of movement.
- Acceleration speed
- Sprinting speed.

- Speed endurance.

#### **UNIT-IV : Technical Training**

- Definition of Technique and Skill.
- Importance of Technique.
- Process of Skill Learning.
- Methods of Technique Training.

#### **Tactical Training**

- Concept of Tactics and Strategy.
- Methods of Tactical Training.

#### **Planning**

- Concept of Training Plan.
- Principles of Planning.
- Types of Training Plan.

#### **Periodization**

- Meaning and Importance of Periodization.
- Periods of Training Year.
- Aim and Contents of Periods.
- Types of Periodization.

## B.P.E.S /VI/A/HC/01: **STRESS MANAGEMENT**

### **Unit-I**

Definition of stress and anger, Causes of stress and anger, two main emotions of stress-fear and anger, Daily life stressors, Process of stress and anger- Psycho Physiology of stress

### **Unit-II**

Adaptation to stress-Reframing of habitual stress resistance, Occupational stress, Peer stress (Students stress), Family stress, Stress & elderly

### **Unit-III**

Stress & drug abuse

Stress related diseases- i) Sleep disorder, ii) Eating disorder, iii) Sexual and emotional disorder, iv) Other stress related diseases, v) Stress & Spirituality

### **Unit-IV**

Self awareness and stress management, Muscular tension reduction, Emotional tension reduction, Stress free living, Stress free examination, Stress management through physical activity, Stress management through recreation

### **Unit-V**

Anger management- Redford William's 12 steps of anger management

Stress management- behavior modification, time management, coping strategy

Relaxation technique- i) Diaphragmatic breathing, ii) Meditation, iii) Progressive muscle relaxation, iv) Yoga, v) Mental imagery, vi) Music therapy, vii) Massage therapy

**B.P.E.S /VI/A/HC/01: EDUCATIONAL TECHNOLOGY****UNIT-I : Introduction to Educational Technology**

- 1.1 Definition
- 1.2 Educative Process
- 1.3 The Teacher of Yesterday & Today
- 1.4 An outline of Teaching method used then and now
- 1.5 Use of sensory organ in the process of learning and remembering
- 1.6 Communication:
  - 1.6.1 Types of Communication
  - 1.6.2 Communication Cycle
  - 1.6.3 Communication in the Class room

**UNIT-II Teaching Aids:**

- 2.1 Importance of Teaching Aids
- 2.2 Criteria for selecting Teaching Aids
- 2.3 Difference between Teaching Method and Teaching Aid
- 2.4 Broad classification of Teaching Aids
  - 2.4.1 Audio Aids
  - 2.4.2 Visual Aids
  - 2.4.3 Audio-Visual Aids
  - 2.4.4 Effectiveness of Edger Dale's cone classification
- 2.5 Advantage and suggestions for effective use of selected teaching Aids.
  - 2.5.1 Verbal
  - 2.5.2 Chock Board
  - 2.5.3 Charts
  - 2.5.4 Models
  - 2.5.5 Slide Projector
  - 2.5.6 Over Head Projector
  - 2.5.7 Motion Picture
  - 2.5.8 Self Experiment and Projects.

**UNIT-III New Teaching Techniques and Innovations – I:**

- 3.1 Art of questioning and answering
  - 3.1.1 Purpose of Questioning
  - 3.1.2 Classification of Questioning
  - 3.1.3 Techniques of asking questions
- 3.2 Programmed Learning
  - 3.2.1 Concept of Programmed learning
  - 3.2.2 Fundamental Principles of Programmed learning

3.2.3 Steps involved in preparation of Programme

3.3 Team Teaching

3.3.1 Meaning

3.3.2 Guiding principles of Team Teaching

3.3.3 Advantage of Team Teaching.

#### UNIT-IV **New Teaching Techniques and INNOVATIONS – II :**

4.1 Micro Teaching

4.1.1 Concept and Features of Micro Teaching

4.1.2 Micro Teaching Verses Traditional Teaching

4.1.3 Steps in Micro Teaching

4.1.4 Principles of Micro Teaching

4.1.5 Micro Teaching Skills

4.1.6 Limitation of Micro Teaching

4.2 Simulation Teaching

4.2.1 Meaning of Simulation

4.2.2 Types of activities in simulation

4.2.3 Steps in Simulation

4.2.4 Advantages of Simulation

4.2.5 Limitations of Simulation

## B.P.E.S /VI/A/SC/01: **Recreation in Physical Education**

### **UNIT-I Introduction to Recreation**

- 1.1 Meaning, Definitions and characteristics of Recreation
- 1.2 Importance of Recreation
- 1.3 Misconceptions about Recreation
- 1.4 Scope of Recreation

### **UNIT-II Influence of Recreation in Social Institutions.**

- 2.1 Family
- 2.2 Educational institutions
- 2.3 Community/ Cultural
- 2.4 Religious organizations

### **UNIT-III Planning for Recreation**

- 3.1 Planning criteria and objectives of Recreation facilities
- 3.2 Different types of indoor and outdoor Recreation for Urban and Rural population
- 3.3 Operation and maintenance of different Recreation area and facilities
- 3.4 Sources of funding of Recreational activities

### **UNIT-IV Programmes in Recreation**

- 4.1 Criteria and principles of selecting a programme
- 4.2 Classification of Recreational activities:
  - 4.2.1 Indoor and outdoor activities
  - 4.2.2 Water activities
  - 4.2.3 Cultural activities
  - 4.2.4 Literary activities
  - 4.2.5 Nature and outing
  - 4.2.6 Social events
  - 4.2.7 Adventure activities
- 4.3 Hobbies – Introduction to hobbies and types of hobbies.
- 4.4 Agencies providing Recreation.
- Camping and leadership**
- 4.5 Aim, objectives and importance of Camping.
- 4.6 Organization and types of Camp.
  - Selection and layout of camp site.
  - Camping leadership.
- 4.7 Types and functions of Recreation leaders.
- 4.8 Qualification, Qualities and training & Recreation leaders.

## B.P.E.S /VI/A/SC/02: **ART OF DAILY SCHEDULING**

### **Unit-I**

Introduction:- Meaning and definition of Daily Schedule, art, science, management of time, shortage of time for daily activities

Types of daily activities: requirement of daily activities for various domains of personality, essential categories of daily activities, correct decision making to include all types of daily activities with in fixed 24 hours

### **Unit-II**

Art of living, art of scheduling, art and science of principles of time management, acronym and daily prayers, methods of recalling and rechecking daily activities

Attitudes and art of daily schedules: right knowledge of daily activities, developing correct attitude by learning the art of behaviour change, transdental theory of behaviour changes, relation between attitude and behaviour change

### **Unit-III**

Understanding the concept of perfection of nature, relation between nature known as superpower or god in religious terms, predisposing, enabling and reinforcing factors for strengthening the art of daily schedules

Cognition and daily schedules: necessity of right attitude and right information of essential components of daily schedules. Enlisting activities needed daily, relation between qualitative and quantitative balances

### **Unit-IV**

Alternative daily schedule patterns: effect of culture, race, gender and age on daily schedules, fundamentals of art of daily schedules, listing alternative daily schedules for different categories of human being based on culture, race. Gender, age, and geographical locations

Factors helping adherence to daily schedule: self responsibility, knowledge to body requirements, important body systems requiring daily attention

Analysis of lifestyles: role of active lifestyle and wellness activities, factors helping to promote daily schedules

Barriers to daily schedules – peer pressures, careless environment of , firm no to harmful barriers like smoking, drugs, alcohol and irresponsible sex urge

Wellness and daily schedules: art of inclusion of all wellness parameters to daily schedules, namely meditation, foods, right physical activities, right hygienic habits, right environmental care, right injury preventing behaviours, right decision towards sex, entertainment recreation, rest, sleep

**BHARATI VIDYAPEETH DEEMED UNIVERSITY**  
(Established u/s 3 of UGC Act 1956, vide notification no. F9. 15.U.3 of Govt. of India )

**COLLEGE OF PHYSICAL EDUCATION**

Dhankawadi, Pune-411 043 (Maharashtra), Tel.020-24373741

**REACCREDITED 'A' GRADE BY NAAC**

**Bachelor of Physical Education**

**(B.P.Ed.)**

**(4 Semester Programme)**

**CURRICULUM FRAMEWORK**

**GUIDELINES OF REGULATIONS AND SYLLABUS STRUCTURE FOR  
B. P. ED. (FOUR SEMESTERS)  
CHOICE BASED CREDIT SYSTEM (CBCS)**

**Preamble:** Bachelor of Physical Education (B. P. Ed.) two years (Four Semesters Choice Based Credit System) B.P.Ed programme is a professional B.P.Ed programme meant for preparing teachers of physical education in classes VI to X and for conducting physical education and sports activities in classes XI and XII.

B. P. Ed. B.P.Ed programme shall be designed to integrate the study of childhood, social context of Physical Education, subject knowledge, pedagogical knowledge, aim of Physical Education and communication skills. The B.P.Ed programme comprises of compulsory and optional theory as well as practical courses and compulsory school internship.

**Course Outcome**

1. Bachelor of Physical Education (B. P. Ed.) two years (Four Semesters Choice Based Credit System) programme is a professional programme meant for preparing teachers of Physical Education in classes VI to X and for conducting Physical Education and sports activities in classes XI and XII.
2. The course prepares the leaders in Physical Education who act as Mentors and Motivators for School children in inculcating healthy and hygienic habits.
3. To prepare the leaders who can work in Health and Fitness Industry as Fitness and Wellness experts.
4. To prepare Sports Experts in various capacities like Trainers, Physiotherapists, Rehabilitation Experts, Sports Counsellors, Game Officials, Scorers, Referees etc.
5. To prepares Experts who can work with various Sports Federations/Organisations/Leagues/Media Houses.

**Intake, Eligibility and Admission Procedure:**

The Intake, Eligibility and Admission Procedure are as per the NCTE norms and standards.

**Eligibility**

**(a)** Bachelor's degree in any discipline with 50% marks and having at least participation in the Inter-College/Inter-Zonal/District/School competition in sports and games as recognized by the AIU/IOA/SGFI/Govt. of India. (Sports participation in last 05 years.)

**Or**

**(b)** Bachelor's degree in physical education with 45%marks.

**Or**

(c) Bachelor's degree in any discipline with 45%marks and studied physical education as compulsory/elective subject.

**Or**

(d) Bachelor's degree with 45%marks and having participated in national/Inter University/State competitions or secured 1<sup>st</sup>, 2<sup>nd</sup> or 3<sup>rd</sup> position in Inter College/Inter-Zonal/District/School competition in sports and games as recognized by the AIU/IOA/SGFI/Govt. of India. (Sports participation in last 05 years.)

**Or**

(e) Bachelor's degree with participation in International competition or secured 1<sup>st</sup>, 2<sup>nd</sup> or 3<sup>rd</sup> position in National/Inter-University competition in sports and games as recognized by the AIU/IOA/SGFI/Govt. of India. (Sports participation in last 05 years.)

**Or**

(f) Graduation with 45%marks and at least three years of teaching experience (for deputed in-service candidates i.e. trained physical education teachers/coaches).

The relaxation in the percentage of marks in the qualifying examination and in the reservation of seats for SC/ST/OBC and other categories shall be as per the rules of the Central Government/State Government, whichever is applicable.

**Age:-**

For General category candidates the upper age limit is 32 years as on 1<sup>st</sup> July of the academic year. Age relaxation for SC, ST and OBC candidate will be given according to the rules and regulation of Bharati Vidyapeeth University and GOI

**Number of seats:-**

50 (Fifty) seats are approved by NCTE Bhopal for B.P.Ed. course.

**Note:-**

\*Married girl is eligible for admission to B.P.Ed. programme. But, it is also compulsory for her to sign an undertaking that she will discontinue the B.P.Ed programme at once for at least one academic year, if she gets pregnant during the course of study. She can join back afresh from the beginning of the semester keeping the guidelines pertaining to the maximum duration of the course in mind.

\*No differently-abled candidate is eligible for the admission in B.P.Ed. Course.

**Admission procedure:-**

Admission shall be made on merit on the basis of marks obtained in the entrance examination consisting of 100 marks based on the following.

<b>a- Physical fitness test</b>	<b>50 marks</b>
<b>b- Written test</b>	<b>30 marks</b>
<b>c- Interview</b>	<b>10 marks</b>
<b>d- Sports achievement</b>	<b>10 marks</b>

The total entrance test will be conducted in two days and could be extended, if needed and it will be conducted at Bharati Vidyapeeth Deemed University College of Physical Education

There shall be Physical Fitness Test (modified AAHPER/CNADIAN/OR ANYOTHER fitness test) of 50 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education

- (A) Theory Paper comprising of 30 multiple-choice questions of 30 minutes duration carrying 30 marks. Questions shall be based on Aptitude Test, Current Affairs and General Knowledge about sports.
- (B) Interview comprising of 10 marks will be conducted by Internal Examiners of Bharati Vidyapeeth Deemed University College of Physical Education
- (C) Sports Participation Weightage :- Candidate shall be given maximum 10 marks weightage on the basis of their sports participation in any one of the following level:

<b>Participation</b>	<b>Marks</b>
➤ <b>International:</b>	<b>10</b>
➤ <b>Senior National championship/ National Games:</b>	
1st Place :	<b>10</b>
2nd Place :	<b>08</b>
3rd Place :	<b>07</b>
Participation:	<b>05</b>
➤ <b>All India Inter-Zonal Inter University Competitions:</b>	
1st Place :	<b>08</b>
2nd Place :	<b>07</b>
3rd Place :	<b>06</b>
Participation:	<b>05</b>
➤ <b>Zonal Inter University Competitions/Junior National Competitions:</b>	
1st Place :	<b>07</b>
2nd Place :	<b>06</b>
3rd Place :	<b>05</b>
Participation:	<b>04</b>
➤ <b>Senior State Championship/Rural national games/Woman Festival:</b>	
1st Place :	<b>05</b>
2nd Place :	<b>04</b>
3rd Place :	<b>03</b>
Participation:	<b>02</b>

**Note:-**

\*The marks will be given in only those games/sports, which are in the competition list of Association of Indian Universities (**AIU**) and/or School Games Federation of India (**SGFI**).

\*The obtained position must be during last five academic sessions.

\*The school state championship and inter collegiate championship participation shall be considered for eligibility criteria only; the candidate shall not get any marks for sports weightage.

**Medical examination:-**

Qualified candidates will have to submit medical certificate by CMO and blood group certificate to the concern office.

**Course fee**

The course fee Rs 80,000/- shall be deposited in Four installments ie.

<b>Semester</b>	<b>Installment</b>	<b>Month</b>	<b>Amount</b>
1 <sup>st</sup>	1 <sup>st</sup>	July- At the time of admission	Rs.20,000
2 <sup>nd</sup>	2 <sup>nd</sup>	December	Rs 20,000
3 <sup>rd</sup>	3 <sup>rd</sup>	June	Rs.20,000
4 <sup>th</sup>	4 <sup>th</sup>	December	Rs.20,000

The mode of **DD/Banker's cheque** in favor of the **The Pricipal ,Bharati Vidyapeeth (Deemed to be) University, College of Physical Education, or candidate can deposit cash in Bharati Bank in prescribed bank account of the college through Challan obtaining from College office .**

**Duration:** The B.P.Ed programme shall be of duration of two academic years, that is, four semesters. However, the students shall be permitted to complete the B.P.Ed programme requirements within a maximum of three years from the date of admission to the programme.

The student, who discontinue the B.P.Ed programme after one year or more semesters due to extraordinary circumstances, are allowed to continue and complete the B.P.Ed programme with due approval from the principal .

**SCHEME OF EXAMINATION FOR B.P.ED. (4 SEMESTERS)**  
**(2015-2017)**

**Semester wise Distribution of Marks & Credits**

		Sem-I	Sem-II	Sem-III	Sem-IV	Total
<b>Part-A: Theory Courses</b>	<b>Marks</b>	400	400	400	200	<b>1500</b>
	<b>Credits</b>	16	16	16	8	<b>60</b>
<b>Part-B: Activity Courses (Games/Sports)</b>	<b>Marks</b>	400	300	300	400	<b>1300</b>
	<b>Credits</b>	8	6	6	8	<b>26</b>
<b>Part- C: Game/ Sport Specialization</b>	<b>Marks</b>	100	100	100	100	<b>400</b>
	<b>Credits</b>	2	2	2	2	<b>8</b>
<b>Part D -: Teaching Ability and Internship</b>	<b>Marks</b>	--	100	100	300	<b>400</b>
	<b>Credits</b>	--	2	2	6	<b>8</b>
<b>Grand Total</b>	<b>Marks</b>	<b>900</b>	<b>900</b>	<b>900</b>	<b>900</b>	<b>3600</b>
	<b>Credits</b>	<b>26</b>	<b>26</b>	<b>26</b>	<b>24</b>	<b>102</b>

**NOTES:**

- Each Theory Course shall have 4 Units and 3 hrs. duration final examination except Sports Specialization which will have 3 units in each semester and 2-hour duration semester-end examination.
- The pattern of Semester-end question papers shall be:
  - 2.1. For papers having Max. Marks- 60 : [12+12+12+12+(4x3)=60 marks]**  
For University examination each question paper shall consist of 9 questions (8 long answer questions from each unit and 1 combined question of 4 short notes from all 4 units). The candidate will attempt any one question from each unit (4 questions of 12 marks each from first 8 questions). The 9th question will be compulsory consisting 4 short notes of 3 marks each.
- For Internal Assessment of Theory Courses one Mid Semester Test of 30 marks for each course will be conducted by the college. For the mid semester test each question paper (of 30 marks) shall consist of 5 questions (4 long answer questions from first two unit and 1 combined question of 2 short notes from both units). The candidate will attempt any one question from each unit (2 questions of 12 marks each from first 4 questions). The 5th question will be compulsory consisting 2 short notes of 3 marks each. In addition, the teacher concerned shall conduct one open book examination consisting of 10 marks and submit the marks to the college exam department.

4. For Semester-end Examination in Activity Courses, the breaks-up of 100 Marks shall be as follows:

-	Skill proficiency/playing ability	:	80
-	Diary / Record book	:	20

5. For Specialization Sports Practice and Sports Training, the break-up of 100 Marks shall be as follows:

-	Skill proficiency/playing ability	:	60
-	Written Test	:	40

6. For internship, student needs to complete 150 hrs. as a physical education teacher in schools and also needs to prepare day to day lesson plan. Every day lesson plan will be evaluated and signed by School Administrator/Principal. Student needs to submit a report on his or her internship with the lesson plan duly signed by School Administrator/Principal. School Administrator/Principal will also be asked to give marks to the student according to his performance after the internship gets over. The break-up of 300 Marks shall be as follows

-	School Administrator Report	:	100 marks
-	Lesson Plan	:	100 marks
-	Viva-Voce	:	100 marks

## CURRICULUM FRAMEWORK FOR B.P.ED.

**(4 SEMESTERS 2015-2017)**

### **B.P.Ed. I-Semester (July 2015 to November 2016)**

#### **PART-A: THEORY COURSES:**

Subject Code	Courses	University Exam	Internal Assessment	Total	Lecture	Credits
BPEd/I/A/HC/01	Introduction & History of Physical Education	60	40	100	64	4
BPEd/I/A/HC/02	Anatomy, Physiology and Exercise Physiology	60	40	100	64	4
BPEd/I/A/HC/03	Computer Application & Communicative Skills in Physical Education	60	40	100	64	4

BPEd/IV/B/HC/03	Camping, Hiking and Tracking	100	48	2
	<b>Total</b>	<b>400</b>	<b>192</b>	<b>8</b>

### PART-C: GAME/SPORT SPECIALIZATION: (Continued from Semester - III)

Activity Code	Name of Area	University Exam	Class	Credits
BPEd/III/D/SCC/01	Sports Practice and Sports Training (in selected/opted Game/Sport)	100	48	2

### PART-D: TEACHING ABILITY AND INTERNSHIP (ACTIVITY TEACHING):

Activity Code	Name of Area	University Exam	Class	Credits
BPEd/III/C/HC/01	Internship	300	150	6

**(Choice Based Credit System)**

**Standard of Passing:**

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0(40% of marks) at UE and also a minimum grade point of 5.0(40% marks) at IA.

If a student fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50 % in aggregate). The GPA for a course will be calculated only if the learner passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table:

<b>Range of Marks (Out of 100)</b>	<b>Grade</b>	<b>Grade Point</b>
80 ≤ Marks ≤ 100	O	10
70 ≤ Marks ≤ 80	A+	9
60 ≤ Marks ≤ 70	A	8
55 ≤ Marks ≤ 60	B+	7
50 ≤ Marks ≤ 55	B	6
40 ≤ Marks ≤ 50	C	5
Marks ≤ 40	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weights for performance at UE and IA shall respectively be 60% and 40%.

GPA is calculated by adding the UE marks of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

**Formula to calculate Grade Points (GP)**

Suppose that Max is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP. Sex  $x$ -Max/10 (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

Range of marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (Marks/x)+2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (Marks/x)+1

particular semester. While the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of learner when he/she completes the B.P.Ed programme is the final result of the learner.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA)	10x CGPA - 10	If $5.00 \leq \text{CGPA} \leq 6.00$
	5x CGPA + 20	If $6.00 \leq \text{CGPA} \leq 8.00$
	10x CGPA - 20	If $8.00 \leq \text{CGPA} \leq 9.00$
	20x CGPA - 110	If $9.00 \leq \text{CGPA} \leq 9.50$
	40x CGPA - 300	If $9.50 \leq \text{CGPA} \leq 10.00$

#### **Award of Honours:**

A student who has completed the minimum credits specified for the B.P.Ed programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA Below 5.00	F	Fail	Marks Below 40

**Educational Tour/Camp:** In addition to the above rules the student must fulfill the following requirements to acquire the degree which is mandatory. Educational Tour or Leadership Camp organized by the College of Physical Education of at least 07 days. The students shall contribute separately for these activities.

# **B.P.Ed**

# **Semester I**

## **BPEd/I/A/HC/01: Introduction & History of Physical Education**

### **Subject Outcome:-**

1. Students will understand the concept of Philosophy and philosophy of physical education to acquaint student with the different Philosophies along with their implications in Physical education.
2. Students will understand the concept of Sociology and to acquaint student the implications of Physical education and sports in society.
3. Students will understand the concept of Education and Physical Education
4. Students will get acquainted with historical perspective as influence on physical education, Abroad and in India.
5. Students will get acquainted with different Issues, challenges and opportunities in Physical education & sports

### **Unit – 1: Introduction**

Meaning, Definition and Scope of Physical Education  
 Aims and Objective of Physical Education  
 Importance of Physical Education in present era.  
 Misconceptions about Physical Education.  
 Relationship of Physical Education with General Education.  
 Physical Education as an Art and Science.

### **Unit- II – Historical Development of Physical Education in India**

Indus Valley Civilization Period. (3250 BC – 2500 BC)  
 Vedic Period (2500 BC – 600 BC)  
 Early Hindu Period (600 BC–320 AD) & Later Hindu Period (320AD-1000AD)  
 Medieval Period (1000 AD – 1757 AD) British Period (Before 1947)  
 Physical Education in India (After 1947)  
 Contribution of Akhadas and Vyayamshalas  
 Y.M.C.A. and its contributions.

### **Unit- III- Foundation of Physical Education**

Philosophical foundation:  
 Idealism, Pragmatism, Naturalism, Realism, Humanism,  
 Existentialism and Indian Philosophy and Culture.  
 Fitness and wellness movement in the contemporary perspectives  
 Sports for all and its role in the maintenance and promotion of fitness.

### **Unit-IV- Principles of Physical Education**

Biological, Growth and development, Age and gender characteristics, Body Types  
 Anthropometric differences , Psychological, Learning types, learning curve Laws and principles of learning, Attitude, interest, cognition, emotions and sentiments. Sociological, Society and culture, Social acceptance and recognition, Leadership  
 Social integration and cohesiveness

## **BPEd/I/A/HC/02: Anatomy, Physiology and Exercise Physiology**

### **Subject Outcome:-**

1. Students will understand the basic structure and function of the human body
2. Students will understand the effect of exercise on the different systems
3. Students will understand the normal movements of the body
4. Students will understand how body gets fuel for its working.

### **Unit – 1 Introduction**

Brief introduction of Anatomy and Physiology  
 Need and importance of anatomy and physiology  
 Organization of Living organism  
 Essential Properties of living cell

### **Unit – II Skeletal System, Digestive System and Respiratory system**

#### **Skeletal System**

General structure of the bone, various kinds of bones, functions of the bones.  
 Joints, their structure, and their movements

#### **Digestive System**

Organs and its function in digestive system  
 Process of digestion in human body

#### **Respiratory system**

Organs and its function in respiratory system  
 Types of respiration

### **Unit – III Cardiovascular System and Nervous system**

#### **Cardiovascular System**

Heart, its location, structure and function.  
 Mechanism of blood circulation.  
 Blood pressure, cardiac output, cardiac cycle, heart rate, pulse rate and athletes heart.

#### **Nervous system**

Organs of nervous system  
 Function of brain  
 Function of spinal cords  
 Types of nervous system

### **Unit – IV- Effect of Exercise on Various Systems**

Cardio – respiratory system  
 Skeletal system  
 Muscular System  
 Digestive and Excretory system  
 Nervous system

## **BPEd/I/A/HC/03: Computer Application & Communicative Skills in Physical Education**

### Learning Outcome

1. Understand concept of information and communication technology in physical education field
2. Analyse sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Offer Hands on Knowledge in information and communication Technology .

### **Unit I: Introduction of Computer**

1. History, application, characteristics, types of computer (Analog, Digital, Hybrid) and generations of Computer.
2. Physical structure of computer.
3. Role of computer in various fields
4. Need of computer in Physical Education.

### **Unit-II Component of Computer System: An Introduction of Hardware and Software**

1. Components of computer system
2. CPU (CU, ALU and Main memory)
3. Input devices (Keyboard, Mouse and Track Ball, Touchpad, Joysticks, Touch Sensitive Screens, Data Scanning Device, Bar Code Readers, Optical Mark Reader (OMR) and Magnetic Ink Character Reader (MICR)
4. Output Devices (Monitor, Printer, LCD)
5. Hardcopy Devices (Printers and Plotter)
6. UPS and types of UPS
7. Operating System Programme Languages translator.
8. Application program/package

### **UNIT III Effective Communication**

#### **A) The Seven C's of the Effective Communication**

#### **B) Communication: Its interpretation**

- i)** Basics **ii).** Nonverbal Communication **iii).** Barriers to Communication

### **UNIT IV Business Communication and Writing**

#### **A) Business Communication at Work Place**

- i)** Letter Components and Layouts **ii).** Planning a letter **iii).** Process of Letter writing **iv).** Email Communication **v).** Memo and Memo Reports **vi).** Employment Communication **vii).** Notice Agenda and Minutes of Meeting **vii).** Brochures

#### **B) Report Writing**

i). Effective Writing ii). Types of Business Reports iii). Structure of Reports iv). Gathering Information v). Organization of the Material vi). Writing Abstracts and Summaries vii) Writing Definitions viii). Visual Aids ix). User Instruction Manual

**BPEd/I/A/SC/01: Development of Sports Movements (Elective)****Subject Outcome:-**

1. Students will understand the concept of Philosophy and philosophy of physical education to acquaint student with the different Philosophies along with their implications in Physical education.
2. Students will understand the concept of Sociology and to acquaint student the implications of Physical education and sports in society.
3. Students will understand the concept of Education and Physical Education
4. Students will get acquainted with historical perspective as influence on physical education, Abroad and in India.
5. Students will get acquainted with different Issues, challenges and opportunities in Physical education & sports

**UNIT - I A) Physical Education in Ancient Civilization with reference to**

- I) India ii) Greece iii) Rome IV) Egypt.
- B) Development of Physical Education & sports during 20 Th Century with special reference to 1) U.S.A. ii) Sweden iii) Germany iv) Olympics v) Asian Games.

**UNIT - II Physical Education in India during 20<sup>th</sup> century**

- a) Physical Training for teacher working in school & college.
- b) Movement of Akhadas & Vyayam Shalas.
- c) Central Advisory Board of Physical Education.
- d) All India council of sports.
- e) SNIPES, NSNIS, LNIPE.
- f) Sports authority of India ( sai)
- g) Nehru yuwak Kendra.
- h) Awards National & state level.

**UNIT - III A Study of the development of Physical Education sports & Games in Maharashtra with reference to**

- a) The present Organization set up in state.
- b) Important schemes and activities including indigenous activities.
- c) Role of Voluntary Physical Education & sports Bodies in state...

**UNIT - IV Youth welfare & Youth Services:-**

- a) Concept of youth welfare & Youth work.
- b) Youth organization in India
- c) Programmers under youth development
- d) Youth services such as secreting & guiding N.C.C. N.S.S., Civil defense & scout & Guide movement.

**Reference**

- 1) Manual of Physical Education of India - D.G. Wakharkar
- 2) A World History of Physical Education - Van Ten Micher
- 3) History of Physical Education C.W. Hyensmith
- 4) A Brief History of Physical Education - Emmel A Rice & John L Hutchinson
- 5) Physical Education in ancient India - Dr. S.H. Deshpande.

**BPEd/I/A/SC/02: First Aid & Safety Education (Elective)****Subject Outcome:-**

1. Students will understand classification of sports injuries and its first aid and immediate management.
2. Students will know the basics of therapeutic modalities and its physiological effects.
3. Students will know the process of rehabilitation
4. Students will understand good and bad posture, postural deformities, its causes and management.
5. Students will understand nutrition and diet plan pre, during and post competition.
6. Students will know the general first aid.

**UNIT - I**

- a) Meaning and definition of first aids and its importance in sports
- b) Types of first aids and its objectives
- c) First aids box and its management
- d) Role and qualification of first aider

**Unit-II**

- a) Common sports injuries in different parts of body
- b) First aids for sports injuries
- c) Common causes of sports injuries and its prevention
- d) RICE & Bandage

**UNIT - III**

- a) Definition of safety education and its significant
- b) Aims and objectives of safety education
- c) Identify causes of accidents & List types and sources of accidents
- d) Safety measures at
  - Home
  - Road
  - School
  - Community

**UNIT - IV**

- a) Describe and demonstrate the management of the following:-
  - Stings and Snake bites
  - Fracture
  - Nose bleeding
  - Electric shocks and other shocks
- b) Fevers:-
  - Definition of fever
  - signs of fever
  - first Aid for fever
  - Management of fever.
- c) Fainting- Definition and causes of fainting, first aid for fainting
- d) Drowning/Near-drowning:- Definition of drowning, definition of near-drowning
- e) first aid for drowning/near drowning.

# B.P.Ed

# Semester II

**BPEd/II/A/HC/01: Educational & Sports Psychology****Subject Outcome:-**

1. Students will know about psychology and sports Psychology.
2. Students will understand Human behavior and learning patterns of individuals.
3. Students will know learning process and different theories based on learning
4. Students will acquire theoretical perspectives and develop understanding of stages of human development with special reference to Motor Development for Skill Learning in Sport and PE.
5. Students will be aware about different attributes affecting learning and development process.
6. Students will understand range of cognitive capacities in learners.
7. Students will understand the Cognitive and higher mental processes involved in learning in sports and Physical Education.
8. Students will understand the differences of personality among various types of sports and its importance for character building.

**UNIT-I : Introduction of Sports Psychology**

- 1.1 Meaning, Scope of Sports Psychology
- 1.2 Importance of Sports Psychology for Physical Education teacher and Coach
- 1.3 Human behavior, Urge and instincts.

**UNIT-II: Cognitions Process and higher mental Processes in Physical Activities**

- 2.1 Learning: Definitions, Meaning and Types (Primary, Associate & Concomitant)
- 2.2 Laws of Learning and Transfer of Training
- 2.3 Meaning of Sensation & Perception, Thinking and Attention. 2.4 Fatigue.

**UNIT-III : Growth and Development and Personality**

- 3.1 Meaning and Concept of Motor Development
- 3.2 Motor Development during Childhood, Adolescence
- 3.3 Concept of personality and Personality traits of sportsmen.
- 3.4 Adjustment and maladjustment and causes of maladjustment.

**UNIT-IV : Individual Differences**

- 4.1 Meaning of Individual differences.
- 4.2 Heredity and Personality and their role in individual differences.
- 4.3 Interaction of Heredity and Environment.
- 4.4 Various Status of an Individual
- 4.5 Other Causes of individual differences.

## **BPEd/II/A/HC/02: Methodology of Teaching in Education & Physical Education**

### **Subject Outcome:-**

1. To understand the place of Physical Education in school curriculum.
2. To acquaint the learner with different methods of teaching physical activities.
3. To acquaint the students with planning, objectives of different types of lessons.
4. To acquaint the learner with organizing and conducting various types of tournaments and athletic meet.
5. To acquaint the learner with the constructions and marking of track and field events

### **Unit -I Introduction**

- I) Aims and Objectives of Physical Education.
- ii) Place of Physical Education in Curriculum.
- iii) Principles of Learning Process.
- iv) Principles of Teaching Process.

### **Unit -II Methods and importance of Teaching**

Orientation, Demonstration, Imitation, Command, Exploration, Set Drill, Progressive Part, Observation, Verbal Explanation, Whole- Part- Whole, Formal informal.

### **Unit III Procedure of Teaching Presentation Technique -**

- I) Personal Preparation
- ii) Technical Preparation.
- iii) Steps and characteristics of Presentation.
- iv) Principle of classes Management.
- v) Factors affecting class management.

### **Unit IV - Lesson Planning -**

- i) Micro Teaching - importance and skills.
- ii) Types of lesson - General & Specific
- iii) Planning and importance of lesson.
- iv) Teaching Aids- Importance Types and uses.

**BPEd/II/ A/HC/03: Sports Training****Subject Outcome:-**

1. To understand the basic concept and principles of officiating and coaching of different games and sports.
2. To enable the students to understand the rules, regulations and officiating of different games and sports.
3. To acquaint the students with the duties and responsibilities of an officials and coaches.
4. To acquaint the students with dimensions and actual markings of different play fields, courts and arenas.
5. To understand the concept, principles and forms of sports training

**UNIT – I Sports Training & Training Load**

- 1.1 Sports Training, Definition, Meaning, Aim & Tasks.
- 1.2 Coaching, Meaning, Aim and Objectives.
- 1.3 Principles of Sports Training.
- 1.4 Load, Intensity, Density, Duration and Frequency.
- 1.5 Over Load, Fatigue causes, symptoms and remedial measures.

**UNIT – II Development of Motor Components:**

- 2.1 Strength: Definition, Importance & Classification, Methods of Development.
- 2.2 Endurance: Definition, Importance & Classification, Methods of Development.
- 2.3 Speed: Definition, Importance & Classification, and Methods of Development.
- 2.4 Flexibility: Definition, Importance & Classification, Methods of Development.
- 2.5 Coordinative Abilities: Definition, Importance & Classification, Methods of Development.

**UNIT – III Technical & Tactical Preparation:**

- 3.1 Technique: Meaning & Definition and Importance, Stage of technical Development, correction of faults.
- 3.2 Methods of Technique Training.
- 3.3 Strategy & Tactics: Meaning, Importance.
- 3.4 Methods of Tactical Training.
- 3.5 Principles of Attack & Defence.

**UNIT – IV Planning and Periodisation:**

- 4.1 Meaning and Importance.

4.2 Types of Plan: Short term, Medium term and long-term training Programme.

4.3 Periodisation: Meaning & Importance.

4.4 Types of Periodisation.

**References:**

3. Bunn, J, N.: Scientific Principles of Coaching.
4. Kamlesh, M.I. : Methods in Physical Education.
5. Singh, H.: Scientific Principles of Sports Training.

## **BPEd/II/A/SC/01 : Fitness, Wellness and Sports Nutrition (Elective Subject)**

### **Subject Outcome:-**

1. Students will understand the concept of physical activity, exercise, fitness, and wellness and will be able to recognize the long term benefits of maintaining a high level of wellness for living in today's world.
2. Students will know the dimensions of wellness and strategies to improve them
3. Students will know the physiological benefits of exercise, physical activity, physical fitness and wellness
4. Students will understand the concept of overweight, obesity & their management.

### **Unit I Physical Fitness**

- a. Definition, meaning and concept of Physical fitness, Physical Activity and Exercise
- a. Components of HRPF, SRPF and Physical fitness
- b. Definition and concept of wellness and holistic health
- c. Factors affecting Physical Fitness and wellness

### **Unit II Doping and Nutrition**

- a. Prevention and first-aid for common sports injuries
- b. Nutrition-components, balance diet and diet for athlete
- c. Meaning and definition of doping, ergogenic aids

### **Unit III Development of Fitness**

- a. Benefits of physical fitness and exercise and principles of physical fitness
- b. Calculation of fitness index level 1-4
- c. Waist-hip ratio larger heart rate, BMI and types and principles of exercise (FITT)
- d. Methods of training – Continues, Interval, Circuit, Fartlek and Plyometric

### **Unit IV Wellness and Weight Management**

- a. Concept, meaning and Components of wellness
- b. Manipulation of energy balance to Induce weight loss and weight gain
- c. Methods of Weight Management
- d. Concept, types and causes of obesity and its management

## **BPed/II/A/SC/02 : Adapted Physical Education**

### **Subject Outcome:-**

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

### **Unit 1: Introduction to Adapted Physical Education**

- 1.1 Meaning, Need and Importance of Adapted Physical Education and Sports
- 1.2 Purpose, Aims and Objectives of Adapted Physical Education and Sports
- 1.3 Program organization of Adapted Physical Education and Sports
- 1.4 Adapted Sports- Para Olympics

### **Unit 2: Development of Individual Education Program (IEP)**

- 2.1 The student with a disability
- 2.2 Components and Development of IEP.
- 2.3 Principles of Adapted Physical Education and Sports
- 2.4 Role of Physical Education teacher
- 2.5 Teaching style, method and approach in teaching Adapted Physical Education

### **Unit 3: Developmental Considerations of an Individual**

- 3.1 Motor development
- 3.2 Perceptual Motor development
- 3.3 Early childhood and Adapted Physical Education

### **Unit 4: Individual with unique need and activities**

- 4.1 Behavioral and Special learning disability
- 4.2 Visual Impaired and Deafness
- 4.3 Health Impaired students and Physical Education
- 4.4 HRPF and its development for Individual with unique need
- 4.5 Role of games and sports in Adapted Physical Education

# **B.P.Ed**

## **Semester III**

**BPEd/III/A/HC/01: Measurement & Evaluation in Physical Education****Subject Outcome:-**

1. Students will understand the concept of Test, Measurement, Evaluation and Assessment Procedure in Physical Education and give examples of each
2. Students will differentiate formative and summative evaluation, Process and Product evaluation
3. Students will identify the purposes of measurement and Evaluation
4. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
5. Students will locate and select physical fitness and sports skill tests
6. Students will properly administer psychomotor tests.

**Unit- I Introduction to Test & Measurement & Evaluation**

Meaning of Test & Measurement & Evaluation in Physical Education

Need & Importance of Test & Measurement & Evaluation in Physical Education

Principles of Evaluation

**Unit- II Criteria; Classification and Administration of test**

Criteria of tests, scientific authenticity (reliability, objectivity, validity)

Type and classification of Test, Administration of test

**Unit- III Physical Fitness Tests**

AAHPER youth fitness test

National physical Fitness Test

Indiana Motor Fitness Test

JCR test

U.S Army Physical Fitness Test

**Unit- IV Sports Skill Tests**

Badminton Skill test

Basketball Skill test

Soccer Skill test

Volleyball Skill test

Hockey Skill test

## **BPEd/III/A/HC/02 : Kinesiology & Biomechanics**

### **Subject Outcome:-**

1. To understand the nature and scope of Biomechanics in Physical Education & Sports.
2. To understand the importance of movement analysis, kinesiological analysis and biomechanical Analysis.
3. To understand the knowledge regarding antagonistic and agonistic muscles in the movements.
4. To gain knowledge of the application of mechanical principles to fundamental skills and sports techniques.
5. To understand basic mathematical problems related to motion, force and levers.

### **Unit – I Introduction to Kinesiology and Sports Biomechanics**

Meaning and Definition of Kinesiology and Sports Biomechanics  
 Importance of Kinesiology and Sports Biomechanics to Physical Education Teacher, Athletes and Sports Coaches.  
 Terminology of Fundamental Movements  
 Fundamental concepts of following terms – Axes and Planes, Centre of Gravity, Equilibrium, Line of Gravity

### **Unit – II Fundamental Concept of Anatomy and Physiology**

Classification of Joints and Muscles  
 Types of Muscle Contractions  
 Posture – Meaning, Types and Importance of good posture.  
 Fundamental concepts of following terms- Angle of Pull, All or None Law, Reciprocal

### **Unit – III Mechanical Concepts**

Force - Meaning, definition, types and its application to sports activities  
 Lever - Meaning, definition, types and its application to human body.  
 Newton's Laws of Motion – Meaning, definition & its application to sports activities.  
 Projectile – Factors influencing projectile trajectory.

### **Unit – IV Kinematics and Kinetics of Human Movement**

Linear Kinematics – Distance and Displacement, speed and velocity, Acceleration  
 Angular kinematics – Angular Distance and Displacement, Angular Speed and velocity, Angular Acceleration.  
 Linear Kinetics – Inertia, Mass, Momentum, Friction.  
 Angular Kinetics – Moment of inertia, Couple, Stability.

### **BPEd/III/A/HC/03 : Yoga and Health Education**

#### **Subject Outcome:-**

1. To understand the concept and nature of yoga along with its historical background.
2. To gain knowledge regarding the application of yoga to Physical Education and Sports.
3. To understand the anatomy and Physiology of Asanas and Pranayamas.
4. To acquire the skills needed to understand and to overcome environmental problems.
5. To gain knowledge regarding the effect of yogic practices on health aspects.

#### **Unit – I Introduction of Yoga**

Meaning and Definition of Yoga

Aims and Objectives of Yoga

Yoga in Early Upanisads

The Yoga Sutra: General Consideration

Need and Importance of Yoga in Physical Education and Sports

#### **Unit - II: Foundation of Yoga**

Yoga in the Bhagavadgita - Karma Yoga, Raj Yoga, Jnana Yoga and Bhakti Yoga

The Astanga Yoga: Yama, Niyama, Asana, Pranayama, Pratyahara, Dharana, Dhyana and Samadhi

Effect of Asanas and Pranayama on various systems of the body

#### **Unit – III Health Education**

Concept, Dimensions, Spectrum and Determinants of Health

Definition of Health, Health Education, Health Instruction, Health Supervision

Aim, objective and Principles of Health Education

Health Service and guidance instruction in personal hygiene

#### **Unit – IV Health Problems in India**

Communicable and Non Communicable Diseases

Obesity, Malnutrition, Adulteration in food, Environmental sanitation,

Explosive Population,

Personal and Environmental Hygiene for schools

Objective of school health service, Role of health education in schools

Health Services – Care of skin, Nails, Eye health service, Nutritional service, Health appraisal, Health record, Healthful school environment, first- aid and emergency care etc.

**BPEd/III/A/SC/01: Sports Entrepreneur, Marketing & Sports Management  
(Elective)**

**Subject Outcome:-**

1. Identify the skills and knowledge base needed to foster entrepreneurial activity for individuals based on the experiences of successful sports entrepreneurs as well as assess and discuss the challenges they have faced.
2. Critically discuss ways in which entrepreneurial-minded individuals can thrive in large sports organizations despite the tendency of such organizations to resist innovation and to favor the status quo or only seek marginal gains.
3. Demonstrate an understanding of, and identify, new opportunities and translate them into viable business solutions or opportunities

**Unit I: Introduction to Sports Entrepreneurship**

Concept of entrepreneurship, innovation and knowledge management in sports.  
Business Planning Process - The business plan as an entrepreneurial tool  
Elements of Business Plan, Objectives, Market Analysis, Development of product / idea, Marketing, Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition, Business Model Canvas and Drafting Business Proposal for Funding Agency.

**Unit II : Introduction to Sports Marketing**

The Four Domains of Sports Marketing, Marketing Through Sports ,  
Marketing concepts – traditional and modern; Selling vs. marketing; Marketing mix; Marketing environment.

Sponsorship: Introduction , Sponsorship: Developing and Selling the Proposal

**Unit II. Management of Physical Education and sports**

Meaning, Need and scope of management of Physical Education

Principles of Sports Management

Construction, marking and maintenance of play grounds, track & field, gymnasium, swimming pool and athletic track

**Unit IV: Organization of co-curricular activities and Physical Education programmes.**

Physical Education Budget : Need, Importance, procedure and principles of budget making,

Physical Education and sports programmes for - Primary, secondary and higher secondary School for sports awareness – demonstration, play days, sports rallies, sports exhibitions

Organization of National days (15<sup>th</sup> August & 26<sup>th</sup> January)., Organization of mass competition, sports day, hiking, trekking, Scout and Guide Camp and picnics

Ceremonies of competition – Opening, closing and victory

## **BPEd/III/A/SC/02: Professional Preparation in Physical Education (Elective)**

### **Subject Outcome:-**

1. Students will develop understanding of the profession of Physical Education.
2. Students will be able to deal with issues experienced by Physical Education teachers.
3. Students will recognize that learning to teach is a lifelong process.
4. Students will develop a comprehensive view of Physical Education from a global perspective.
5. Students will understand the domains & hidden dimensions of Physical Education.
6. Students will Demonstrate basic knowledge & awareness about inclusion, differently-abled students & describe steps to inclusion.

### **UNIT I: Foundation of Professional Preparation**

- 1.1 Meaning of Professional
- 1.2 Components of Professional Preparation.
- 1.3 Contribution of physical education in attaining ideals of Indian democracy.
- 1.4 Forces and factors affecting educational policies and Programme.

### **UNIT-II Historical Perspective**

- 2.1 Historical review of Professional Preparation in India.
- 2.2 Professional courses being offered in professional preparation colleges in India.
- 2.3 Professional Preparation in Physical Education in USA, USSR and UK.
- 2.4 Beginning of Professional Preparation in the world.

### **UNIT-III Under-Graduate preparation of professional personnel.**

- 3.1 Purposes, Admission Requirements of Undergraduate preparation.
- 3.2 Theory, Teaching practice and practical.
- 3.3 Professional competencies to be developed.
- 3.4. Post-Graduate Preparation.
- 3.5 Purposes & Admission requirements.
- 3.6 Methods of instruction.
- 3.7 Professional relations.

### **UNIT-IV Teacher and Teaching**

- 4.1 Teaching as a career.
- 4.2 Basic Qualities of a successful teacher.
- 4.3 Preparation of the specialized physical education teacher.
- 4.4 Types of teaching jobs.
- 4.5 Types of non-teaching jobs.

# **B.P.Ed**

# **Semester IV**

## **BPEd/IV/ A/HCS/01: Sports Medicine, Physiotherapy and Rehabilitation**

### **Subject Outcome:-**

1. Students will understand classification of sports injuries and its first aid and immediate management.
2. Students will know the basics of therapeutic modalities and its physiological effects.
3. Students will know the process of rehabilitation
4. Students will understand good and bad posture, postural deformities, its causes and management.
5. Students will understand nutrition and diet plan pre, during and post competition.

### **Unit – I Sports Medicine**

- Meaning and concept of sports medicine
- Aim and objective of sports medicine
- Role of Sports trainers and physician in team

### **Unit-II Common Sports injuries**

- Types of sports injuries and their causes
- Common regional injuries and their management – shoulder, elbow, wrist, knee and ankle
- Low back problem cause, symptom and its management in sports
- First aid – meaning and its concepts
- Athletic bandage and massage – Its classification, indications & contra-indications, general principles of massage

### **Unit – III Athletic Care and Rehabilitation**

- Meaning of Physiotherapy and Rehabilitation
- Diagnosis of injuries – signs and symptoms of injuries
- Different forms of Hydrotherapy and Thermotherapy – hot and cold packs, whirlpool, contrast bath, infrared, short wave diathermy and ultrasound

### **Unit – IV Drugs and Doping**

- Meaning of drugs and doping
- Wada and Nada
- Types of doping and its advantage and disadvantage
- Types of dope test

## **BPEd/IV/A/HC/02: Research and Statistics in Physical Education**

Learning outcomes

1. Identify the research problem in the field of physical Education and sports
2. Know to Summarize the various research literature
3. Understand and apply the basics of statistics in research
4. Organize the samples and sampling techniques which is relevant to the study.

### **Unit-I Introduction to Research**

Definition of Research

Need and importance of Research in Physical Education and Sports.

Scope of Research in Physical Education & Sports.

Classification of Research

Research Problem, Meaning of the term, Location and criteria of Selection of Problem, Formulation of a Research Problem, Limitations and Delimitations.

### **Unit-II Survey of Related Literature**

Need for surveying related literature.

Literature Sources, Library Reading

Research Proposal, Meaning and Significance of Research Proposal.

#### **Preparation of Research proposal / project.**

Research Report: A group project is to be undertaken by a small batch of students under the supervision of a teacher, wherein it is expected to survey school facilities of physical education, health assessment, programme evaluation, fitness status of the students, staff and other stakeholders etc. and submit the report to the institution.

### **Unit-III Basics of Statistical Analysis**

Statistics: Meaning, Definition, Nature and Importance

Class Intervals: Raw Score, Continuous and Discrete Series, Class Distribution, Construction of Tables, Graphical Presentation of Class Distribution: Histogram, Frequency Polygon, Frequency Curve. Cumulative Frequency Polygon, Ogive, Pie Diagram

### **Unit- IV Statistical Models in Physical Education and Sports**

Measures of Central Tendency: Mean, Median and Mode-Meaning, Definition, Importance, Advantages, Disadvantages and Calculation from Group and Ungrouped data

Measures of Variability: Meaning, importance, computing from group and ungroup data

Percentiles and Quartiles: Meaning, importance, computing from group and ungroup data

**REACCREDITED 'A' GRADE BY NAAC**

**Master of Physical Education**  
(M.P.Ed)-2Years

**(4 Semester Programme)**

**Curriculum Framework & Syllabus**

**CURRICULUM FRAMEWORK**

**GUIDELINES OF REGULATIONS AND SYLLABUS STRUCTURE FOR M.P.  
ED. TWO YEARS PROGRAMME (FOUR SEMESTERS)  
CHOICE BASED CREDIT SYSTEM (CBCS)**

**Preamble:** The Master of Physical Education (M.P.Ed.) two years (Four Semesters, Choice Based Credit System) programme is a professional programme meant for preparing Physical Education Teachers for senior secondary (Class XI and XII) level as well as Assistant Professor/Directors/Sports Officers in Colleges/Universities and teacher educators in College of Physical Education.

The M.P.Ed. programme is designed to integrate the study of childhood, social context of Physical Education, subject knowledge, pedagogical knowledge, aim of Physical Education and communication skills. The programme comprise of compulsory and optional theory, Specialization and Teaching Practice

### **Programme Outcome**

1. The Master of Physical Education (M.P. Ed.) two years (Four Semesters, Choice Based Credit System) programme is a professional programme meant for preparing Physical Education Teachers for senior secondary (Class XI and XII) level as well as Assistant Professor/Directors/Sports Officers in Colleges/Universities and teacher educators in College of Physical Education.
2. To prepare the leaders who can work in Health and Fitness Industry as Fitness and Wellness experts.
3. To prepare Sports Experts in various capacities like Trainers, Physiotherapists, Rehabilitation Experts, Sports Counsellors, Game Officials, Scorers, Referees etc.
4. To prepares Experts who can work with various Sports Federations/Organisations/Leagues/Media Houses.

**Intake, Eligibility and Admission Procedure:** The Intake, Eligibility and Admission Procedure are as per the NCTE norms and standards.

**Eligibility**

(a) Bachelor of physical education (B.P.Ed.) or equivalent with at least **50% marks.**

**Or**

(b) A candidate, who has passed any one of B.Ed (Phy.Edu), B.P.E. (4 yrs) or any other equivalent degree.

**Number of seats:** As approved by NCTE for M.P.Ed. Course.

**Note:-**

\*Married girl is eligible for admission to M.P.Ed. programme. But, it is also compulsory for her to sign an undertaking that she will discontinue the programme at once for at least one academic year, if she gets pregnant during the course of study. She can join back afresh from the beginning of the semester keeping the guidelines pertaining to the maximum duration of the course in mind.

\*No differently-abled candidate is eligible for the admission in M.P.Ed. programme.

**Admission procedure:** Admission shall be made on merit on the basis of marks obtained in the entrance examination consisting of 100 marks based on the following.

<b>a- Written test</b>	<b>50 marks</b>
<b>b- Sports proficiency test</b>	<b>30 marks</b>
<b>c- Interview</b>	<b>10 marks</b>
<b>d- Sports achievement</b>	<b>10 marks</b>

The total entrance test will be conducted in two days and could be extended, if needed and it will be conducted at College of Physical Education, Bharati Vidyapeeth University.

- (A) **Theory Paper** comprising of 50 multiple-choice questions of one and half hours duration carrying 50 marks. Questions shall be based on B.P.Ed. course.
- (B) There shall be **Physical Fitness** of 30 marks will be conducted by Internal Examiners of College of physical education.
- (C) **Interview** comprising of 10 marks will be conducted by Internal Examiners of College of Physical Education

**(D) Weightage :-** Candidate shall be given maximum 10 marks weightage on the basis of their sports participation in any one of the following level:

<b>Participation</b>	<b>Marks</b>
➤ <b>International:</b>	<b>10</b>
➤ <b>Senior National championship/ National Games:</b>	
1st Place :	<b>10</b>
2nd Place :	<b>08</b>
3rd Place :	<b>07</b>
Participation:	<b>05</b>
➤ <b>All India Inter-Zonal Inter University Competitions:</b>	
1st Place :	<b>08</b>
2nd Place :	<b>07</b>
3rd Place :	<b>06</b>
Participation:	<b>05</b>
➤ <b>Zonal Inter University Competitions/Junior National Competitions:</b>	
1st Place :	<b>07</b>
2nd Place :	<b>06</b>
3rd Place :	<b>05</b>
Participation:	<b>04</b>
➤ <b>Senior State Championship/Rural national games/Women festival:</b>	
1st Place :	<b>05</b>
2nd Place :	<b>04</b>
3rd Place :	<b>03</b>
Participation:	<b>02</b>

**Note:-**

\*The marks will be given in only those games/sports, which are in the competition list of Association of Indian Universities (AIU) and/or School Games Federation of India (SGFI).

\*The obtained position must be during last five academic sessions.

\*The school state championship and inter collegiate championship participation shall be considered for eligibility criteria only; candidate shall not get any marks for sports weightage.

**Medical examination:** Qualified candidates will have to submit medical certificate by CMO and blood group certificate to the concern College

**Course fee:** It has been decided by the B.O.S. that the convener of the B.O.S. is authorized to submit the proposal of the M.P.Ed Fees Structure to the University Authorities with consultation with the Internal members of B.O.S.

**Duration:** The M.P.Ed programme shall be of duration of two academic years, that is, four semesters. However, the students shall be permitted to complete the programme requirements within a maximum of 4 years from the date of admission to the programme.

The student, who discontinues the programme after one year or more semesters due to extraordinary circumstances, are allowed to continue and complete the programme with due approval from the Principal.

**The CBCS System:** M.P.Ed Programmes shall run on Choice Based Credit System (CBCS). It is an instructional package developed to suit the needs of students, to keep pace with the developments in higher education and the quality assurance expected of it in the light of liberalization and globalization in higher education.

**Course:** The term course usually referred to, as 'papers' is a component of a M.P.Ed programme. All courses need not carry the same weight. The courses should define learning objectives and learning outcomes. A course may be designed to comprise Lectures/ tutorials/laboratory work/ field work/ outreach activities/ project work/ vocational training/viva/ seminars/ term papers/assignments/ presentations/ self-study etc. or a combination of some of the

**Courses of Programme:** The M.P.Ed. Programme consists of a number of courses, the term 'Course' applied to indicate a logical part of subject matter of the programme and is invariably equivalent to the subject matter of a "paper" in the conventional sense. The following are the various categories of courses suggested for the M.P.Ed. Programme.

**a) Theory:**

Core Course

Elective Course

**b) Practicum:**

**c) Specialization**

**d) Teaching Practices:**

### **Programme Outcome**

1. The Master of Physical Education (M.P. Ed.) two years (Four Semesters, Choice Based Credit System) programme is a professional programme meant for preparing Physical Education Teachers for senior secondary (Class XI and XII) level as well as Assistant

Professor/Directors/Sports Officers in Colleges/Universities and teacher educators in College of Physical Education.

2. To prepare the leaders who can work in Health and Fitness Industry as Fitness and Wellness experts.
3. To prepare Sports Experts in various capacities like Trainers, Physiotherapists, Rehabilitation Experts, Sports Counsellors, Game Officials, Scorers, Referees etc.
4. To prepares Experts who can work with various Sports Federations/Organizations/Leagues/Media Houses

**Semesters:** An academic year is divided into two semesters. Each semester will consist of 17-20 weeks of academic work equivalent to 100 actual teaching days. The odd semester may be scheduled from July to November/December and even semester from November / December to April/May.

**Credits:** The term 'Credit' refers to a unit by which the programme is measured. It determines the number of hours of instructions required per week. One credit is equivalent to one hour of teaching (lecture or tutorial) or one and half hours of practical work/field work per week. The term 'Credit' refers to the weight given to a course, usually in relation to the instructional hours assigned to it. The total minimum credits, required for completing a M.P.Ed. Programme is 90 credits and for each semester 20 credits. Total Number of hours required to earn 1 credit is 20-25 hrs in theory and 30 hrs in Practical.

**Condonation:** Student must have 75% of attendance in each course for appearing the examination. Students who have 74% to 65% of attendance shall apply for condonation in the prescribed form along with the Medical Certificate or proof of participation in intercollege or inter university competitions. Students who have 64% to 50% of attendance shall apply for condonation in prescribed form along with the Medical Certificate. Students who have below 50% of attendance are not eligible to appear for the examination.

### Provision of Bonus Credits Maximum 06 Credits in each Semester

S. No.	Special Credits for Extra Co-curricular Activities	Credit
1.	Sports Achievement at State level Competition (Medal Winner)	1
	Sports Achievement National level Competition (Medal Winner)	2
	Sports participation International level Competition	4
2.	Inter Uni. Participation (Any one game)	2
3.	Inter College Participation (min. two game)	1
4.	National Cadet Corps / National Service Scheme	2
5.	Blood donation / Cleanliness drive / Community services	2
6.	Mountaineering - Basic Camp, Advance Camp / Adventure Activities	2
7.	Organization / Officiating - State / National level in any two game	2
8.	News Reposting / Article Writing / book writing / progress report writing	1
9.	Research Project by any funding agencies	4

Students can earn maximum **06 Bonus credits** in each semester by his/her participation in the above mentioned activities duly certified by the Head of the institution / Department. **This Bonus credit will be used only to compensate loss of credits in academic activities.**

#### Examinations:

- i. There shall be examinations at the end of each semester, for first semester in the month of November /December: for second semester in the month of April/May. A candidate who does not pass the examination in any course(s) shall be permitted to appear in such failed course(s) in the subsequent examinations to be held in November/December or April/May.
- ii. A candidate should get enrolled /registered for the first semester examination. If enrollment/registration is not possible owing to shortage of attendance beyond condonation limit / rules prescribed OR belated joining OR on medical grounds, such candidates are not permitted to proceed to the next semester. Such candidates shall redo the semester in the subsequent term of that semester as a regular student; however, a student of first semester shall be admitted in the second semester, if he/she has successfully kept the term in first semester.

#### Pattern of Question Papers:

**A) For papers having Max. Marks- 60: [12+12+12+12+(4x3)=60 marks]**

For University examination each question paper shall consist of 9 questions (2 long answer questions from each unit and 1 combined question of 4 short notes from all 4 units). The candidate will attempt any one question from each unit. The 5<sup>th</sup> question will be compulsory consisting 4 short notes of 3 marks each.

**B) For Semester-end Examination in Activity Courses, the breaks-up of 100**

**Marks shall be as follows:**

- Skill proficiency/playing ability : 60
- Diary / Record book : 40

**C) For Specialization Sports Practice and Sports Training, the break-up of 100 Marks shall be as follows:**

- P=(Practical) Skill proficiency : 60
- IA=(Internal Assessment)Written Test : 40

**D) For Lesson Plan, student needs to complete perform lesson at college itself.-**

Lesson Plan : 100 marks

- P=(Practical) Skill proficiency : 60
- IA=(Internal Assessment)Written Test : 40

**Examiners:** There will be one internal and one external examiner based on the Game specialization that is from **Athletics, badminton, basketball, cricket, football, handball, kabaddi, kho-kho, table-tennis, volleyball and yoga.**

**Evaluation:** The performance of a student in each course is evaluated through continuous internal assessment (CIA), one test of 20 marks and of one to two hours duration is to be conducted around 10-14 weeks of academic work from the start of each semester; evaluation is to be done in terms of percentage of marks with a provision for conversion to grade point. If, any student is not able to give the internal test due to Medical reason or participation in inter college or inter university competitions, the concerned course teacher must conduct the student examination within a month time (there is no provision for seeking improvement of internal assessment). The marks obtain in CIA is added with end semester examination and will be consolidated at the end of course. The components for continuous internal assessment are;

<b>Internal Test</b>	20 Marks
<b>Seminar / Lab Practical / presentations</b>	5 Marks
<b>Open Book Test</b>	5 Marks
<b>Attendance</b>	10 Marks
<b>Total</b>	<b>40 Marks</b>

Attendance shall be taken as a component of continuous assessment, although the students should have minimum 75% attendance in each course. In addition to continuous evaluation component, the end semester examination, which will be written type examination of at least 3 hours duration, would also form an integral component of the evaluation. The ratio of marks to be allotted to continuous internal assessment and to end semester examination is 30:70. The evaluation of practical work, wherever applicable, will also be based on continuous internal assessment and on an end-semester practical examination.

<b>Attendance in Percentage</b>	<b>Marks</b>
Above 95	10
95-90	8
89-85	6
84-80	4
79-75	2
Below 75	0

**Minimum Passing Standard:** The minimum passing standard for CIA (Continuous Internal Assessment) and External Examinations shall be 40%, i.e. 16 marks out of 40 marks and 24 marks out of 60 marks respectively for theory courses. The minimum passing for both CIA & external examination shall be 50%, i.e. 20 marks out of 40 and 30 marks out of 60 marks for the practical courses.

**Grading:** Once the marks of the CIA (Continues Internal Assessment) and SEA (Semester End Assessment) for each of the courses are available, both (CIA and SEA)

will be added. The marks thus obtained for each of the courses will then be graded as per details provided in **Letter Grades and Grade Points table** from the first semester onwards the average performance within any semester from the first semester is indicated by Semester Grade Point Average (**SGPA**). while continuous performance (including the performance of the previous semesters also) starting from the first semester is indicated by Cumulative Grade Point Average (**CGPA**). These two are calculated by the following formula:

(i) **SGPA(S<sub>i</sub>)**  $S_i = \frac{\sum(C_i \times G_i)}{\sum C_i}$

where C<sub>i</sub> is the number of credits of the i<sup>th</sup> course and G<sub>i</sub> is the grade point scored by the student in the i<sup>th</sup> course.

(ii) The CGPA is also calculated in the same manner taking into account all the courses undergone by a student over all the semesters of a programme, i.e.  $CGPA = \frac{\sum(C_i \times S_i)}{\sum C_i}$

Where S<sub>i</sub> is the SGPA of the i<sup>th</sup> semester and C<sub>i</sub> is the total number of credits in that semester.

(iii) The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcript or certificate or marksheet.

**Classification of Final Results:** For the purpose of declaring a candidate to have qualified for the Degree of Master of Physical Education in the First class / Second class / Pass class or First class with Distinction, the marks and the corresponding CGPA earned by the candidate in Core Courses will be the criterion. It is further provided that the candidate should have scored the First / Second Class separately in both the grand total and end Semester (External) examinations.

**Award of the M.P.Ed. Degree:** A candidate shall be eligible for the award of the degree of the M.P.Ed. Only if he/she has earned the minimum required credit including Bonus Credits of the programme prescribed above.

**A.T.K.T.:** A candidate may be allowed to take admission in succeeding year of the course irrespective of number of papers/ practical events in which he/she fails. It is mandatory that the whole course shall be completed within a period of 4 years from the date of admission. Failing which candidate name will be removed from college.

## (Choice Based Credit System)

### Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing. In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0(40% of marks) at UE and also a minimum grade point of 5.0(40% marks) at IA.

If a student fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for the course is at least 6.0 (50 % in aggregate). The GPA for a course will be calculated only if the learner passes at the UE.

A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the head of passing. Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the head of passing.

The 10-point scale Grades and Grade Points according to the following table:

<b>Range of Marks (Out of 100)</b>	<b>Grade</b>	<b>Grade Point</b>
80 ≤ Marks ≤ 100	O	10
70 ≤ Marks ≤ 80	A+	9
60 ≤ Marks ≤ 70	A	8
55 ≤ Marks ≤ 60	B+	7
50 ≤ Marks ≤ 55	B	6
40 ≤ Marks ≤ 50	C	5
Marks ≤ 40	D	0

The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. The weights for performance at UE and IA shall respectively be 60% and 40%.

GPA is calculated by adding the UE marks of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

### **Formula to calculate Grade Points (GP)**

Suppose that Max is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP. Sex  $x$ -Max/10 (since we have adapted 10-point system). Then GP is calculated by the formulas shown as below.

Range of marks at the evaluation	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (Marks/ $x$ )+2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (Marks/ $x$ )+1

Two kinds of performance indicators, namely, the semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester. While the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of learner when he/she completes the B.P.E.S programme is the final result of the learner.

The Formula to compute equivalent percentage marks for specified CGPA:

% Marks (CGPA)	10x CGPA -10	If $5.00 \leq \text{CGPA} \leq 6.00$
	5x CGPA +20	If $6.00 \leq \text{CGPA} \leq 8.00$
	10x CGPA -20	If $8.00 \leq \text{CGPA} \leq 9.00$
	20x CGPA -110	If $9.00 \leq \text{CGPA} \leq 9.50$
	40x CGPA -300	If $9.50 \leq \text{CGPA} \leq 10.00$

### Award of Honors:

A student who has completed the minimum credits specified for the M.P.Ed programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honors are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 \leq \text{CGPA} \leq 10.00$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.00 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.00 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.00 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.00 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.00 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA Below 5.00	F	Fail	Marks Below 40

**Note:**

1. SGPA is calculated only if the candidate passes in all the courses i.e. get minimum C grade in all the courses.
2. CGPA is calculated only when the candidate passes in all the courses of all the previous and current semesters.
3. The cumulative grade point average will be calculated as the average of the SGPA of all the semesters continuously, as shown above.
4. For the award of the class, CGPA shall be calculated on the basis of:
  - Marks of each Semester End Assessment and
  - Marks of each Semester Continuous Internal Assessment for each course.
5. The final Class for M.P.Ed. Degree shall be awarded on the basis of last CGPA (grade) from all the one to four semester examinations.

**Grievance Redressal Committee:** The college/department shall form a Grievance Redressal Committee for each course in each college/department with the course teacher / Principal / Director and the HOD of the faculty as the members. This Committee shall solve all grievances of the students.

**Revision of Syllabi:** Syllabi of every course should be revised according to the NCTE.

- Revised Syllabi of each semester should be implemented in a sequential way.
- In courses, where units / topics related to governmental provisions, regulations or laws, that change to accommodate the latest developments, changes or corrections are to be made consequentially as recommended by the Academic Council.
- All formalities for revisions in the syllabi should be completed before the end of the semester for implementation of the revised syllabi in the next academic year.
- During every revision, up to twenty percent of the syllabi of each course should be changed so as to ensure the appearance of the students who have studied the old (unrevised) syllabi without any difficulties in the examinations of revised syllabi.
- In case, the syllabus of any course is carried forward without any revision, it shall also be counted as revised in the revised syllabi.

**Miscellaneous:**

1. The procedural details may be given by the university from time to time.
2. Any unforeseen problems/difficulties may be resolved by Vice Chancellor, whose decision in the matter shall be final.
3. The provision of any order, rules or regulation in force shall be inapplicable to

the extent of its inconsistency with these regulations.

### Semester-I

<b>Part- A Theoretical Course</b>						
<b>Course Code</b>	<b>Title of the papers</b>	<b>Total No of Class</b>	<b>Credits</b>	<b>Internal Assessment</b>	<b>University Exam</b>	<b>Total</b>
<b>Core Course</b>						
SOE/PE/C-501	Research Method in Physical Education	64	4	40	60	100
SOE/PE/C-502	Physiology of Exercise & Sports	64	4	40	60	100
SOE/PE/C-503	Psychology of Sports	64	4	40	60	100
<b>Elective course(Anyone)</b>						
SOE/PE/E-501	Sports technology/	64	4	40	60	100
SOE/PE/E-502	Adapted Physical Education					
<b>Part - B Practical Course</b>						
SOE/PE/P -501	Conditioning	96	4	40	60	100
SOE/PE/P -502	Lab Practical (Sports Psychology, Biomechanics & Kinesiology, Test & Measurement	96	4	40	60	100
<b>Part - C Specialization</b>						
SOE/PE/S -501	Games Specialization	96	4	40	60	100
<b>Part - D Teaching Practices</b>						
SOE/PE/T -501	Game Specialization Teaching Lesson theory Sports	96	4	40	60	100
	<b>Total</b>	40	32	320	480	800

## Semester-II

<b>Part- A Theoretical Course</b>						
Course Code	Title of the papers	Total no of Class	Credits	Internal Assessment	University Exam	Total
<b>Core Course</b>						
SOE/PE/C -601	Statistics for Research in Physical Education	64	4	40	60	100
SOE/PE/C -602	Kinesiology & Biomechanics	64	4	40	60	100
SOE/PE/C-603	Science of Sports Training & Advanced Coaching	64	4	40	60	100
<b>Elective course (Anyone)</b>						
SOE/PE/E-601	Athletic care and Rehabilitation	64	4	40	60	100
SOE/PE/E -602	Sports Journalism & Mass Media					
<b>Part - B Practical Course</b>						
SOE/PE/P-601	Pilot Study	96	4	40	60	100
SOE/PE/P -602	Measurement & Evaluation	96	4	40	60	100
<b>Part - C Specialization</b>						
SOE/PE/S-601	Games Specialization	96	4	40	60	100
<b>Part - D Teaching Practices</b>						
SOE/PE/T -601	Game Specialization Practical Lesson Plan (5 Lesson)	96	4	40	60	100
	<b>Total</b>		32	320	480	800

### Semester-III

<b>Part- A Theoretical Course</b>						
Course Code	Title of the papers	Total no of Class	Credits	Internal Assessment	University Exam	Total
<b>Core Course</b>						
SOE/PE/C-701	Professional preparation	64	4	40	60	100
SOE/PE/C -702	Management in PE & Sports	64	4	40	60	100
SOE/PE/C -703	Measurements and Evaluation in Physical Education	64	4	40	60	100
<b>Elective Course (Anyone)</b>						
SOE/PE/E-701	Information and communication technology in physical education	64	4	40	60	100
SOE/PE/E-702	Health Education and Sports Nutrition					
<b>Part - B Practical Course</b>						
SOE/PE/P -701	Conditioning	96	4	40	60	100
SOE/PE/P -703	Lab Practical (Sports Psychology, Biomechanics & Kinesiology, Test and Measurement)	96	4	40	60	100
<b>Part - C Teaching Practices</b>						
SOE/PE/T -701	Teaching Lesson theory	96	4	40	60	100

### Semester-IV

<b>Part- A Theoretical Course</b>						
Course Code	Title of the papers	Total no of Class	Credits	Internal Assessment	University Exam	Total
<b>Core Course</b>						
SOE/PE/C-801	Sports Medicine	64	4	40	60	100
SOE/PE/C-802	Pedagogy of Physical Education	64	4	40	60	100
SOE/PE/C-803	Sports Entrepreneur	64	4	40	60	100
<b>Elective Course (Anyone)</b>						
SOE/PE/E-801	Dissertation	64	4	40	60	100
SOE/PE/E-802	Exercise Prescription & Fitness Management					

**Note:-**

- 1. Games specialization will be given in following Games and sports: Athletics, basketball, cricket, football, handball, hockey, kabaddi, kho-kho, table-tennis, volleyball and yoga. Student will select One Game specialization for I and II semester**
2. Teaching theory lesson plan will consist of 5 lessons from theory subject of Master degree which will be taken on college students itself.

**SCHEME OF EXAMINATION FOR M.P.ED**  
**(4 SEMESTERS)**

**Semester wise Distribution of Marks & Credits**

		Sem-I	Sem-II	Sem-III	Sem-IV	Total
<b>Part-A: Theory Courses</b>	<b>Marks</b>	400	400	400	400	<b>1600</b>
	<b>Credits</b>	16	16	16	16	<b>64</b>
<b>Part-B:        Practical (Games/Sports)</b>	<b>Marks</b>	200	200	200		<b>600</b>
	<b>Credits</b>	8	8	8		<b>24</b>
<b>Part-C: Game/Sport Specialization</b>	<b>Marks</b>	100	100			<b>200</b>
	<b>Credits</b>	4	4			<b>8</b>
<b>Part D -: Teaching Ability</b>	<b>Marks</b>	100	100	100		<b>300</b>
	<b>Credits</b>	4	4	4		<b>12</b>
<b>Grand Total</b>	<b>Marks</b>	<b>800</b>	<b>800</b>	<b>700</b>	<b>400</b>	<b>2700</b>
	<b>Credits</b>	<b>32</b>	<b>32</b>	<b>28</b>	<b>16</b>	<b>108</b>

Semester I

## **SOE/PE/C-501: Research Process In Physical Education**

Learning outcomes

1. Identify the research problem in the field of physical Education and sports
2. Know to Summarize the various research literature
3. Understand and apply the basics of statistics in research
4. Organize the samples and sampling techniques which is relevant to the study.
5. Apply the systematic methods in writing research thesis

### **UNIT I - Introduction**

Meaning and Definition of Research - Need, Nature and Scope of research in Physical Education. Classification of Research, Location of Research Problem, Criteria for selection of a problem, Qualities of a good researcher.

### **UNIT II - Methods of Research**

Descriptive Methods of Research; Survey Study, Case study, Introduction of Historical Research, Steps in Historical Research, Sources of Historical Research: Primary Data and Secondary Data, Historical Criticism: Internal Criticism and External Criticism.

### **UNIT III - Experimental Research**

Experimental Research - Meaning, Nature and Importance, Meaning of Variable, Types of Variables. Experimental Design - Single Group Design, Reverse Group Design, Repeated Measure Design, Static Group Comparison Design, Equated Group Design, Factorial Design.

### **UNIT IV - Sampling**

Meaning and Definition of Sample and Population. Types of Sampling; Probability Methods; Systematic Sampling, Cluster sampling, Stratified Sampling. Area Sampling - Multistage Sampling. Non- Probability Methods; Convenience Sample, Judgement Sampling, Quota Sampling.

### **Research Proposal and Report**

Cauterization of Thesis / Dissertation, Front Materials, Body of Thesis - Back materials. Method of Writing Research proposal, Thesis / Dissertation; Method of writing abstract and full paper for presenting in a conference and to publish in journals ,Mechanics of writing Research Report, Footnote and Bibliography writing.

Subramanian, R, Thirumalai Kumar S & Arumugam C (2010) Research Methods in Health, Physical Education and Sports, New Delhi; Friends Publication

## **SOE/PE/C-502: PHYSIOLOGY OF EXERCISE AND SPORTS**

### Learning outcomes

1. Understand the basic principles of physiology and Exercise Physiology
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation.
4. Remember and recall the definition of physiology and co-relate the principles of physiology.
5. Appraise the effects during the training and practical sessions

### **UNIT I – Skeletal Muscles and Exercise**

Macro & Micro Structure of the Skeletal Muscle, Chemical Composition, Sliding Filament theory of Muscular Contraction. Types of Muscle fiber Muscle Tone, Chemistry of Muscular Contraction – Heat Production in the Muscle, Effect of exercises and training on the muscular system.

### **UNIT II – Cardiovascular System and Exercise**

Heart Valves and Direction of the Blood Flow – Conduction System of the Heart – Blood Supply to the Heart – Cardiac Cycle – Stroke Volume – Cardiac Output – Heart Rate – Factors Affecting Heart Rate – Cardiac Hypertrophy – Effect of exercises and training on the Cardio vascular system.

### **UNIT III – Respiratory System and Exercise**

Mechanics of Breathing – Respiratory Muscles, Minute Ventilation – Ventilation at Rest and During Exercise. Diffusion of Gases – Exchange of Gases in the Lungs –Exchange of Gases in the Tissues – Control of Ventilation – Ventilation and the Anaerobic Threshold. Oxygen Debt – Lung Volumes and Capacities – Effect of exercises and training on the respiratory system.

### **UNIT IV – Metabolism and Energy Transfer**

Metabolism – ATP – PC- Anaerobic Metabolism – Aerobic Metabolism – Aerobic and Anaerobic Systems during Rest and Exercise. Short Duration High Intensity Exercises – High Intensity Exercise Lasting Several Minutes – Long Duration Exercises.

### **Climatic conditions and sports performance and ergogenic aids**

Variation in Temperature and Humidity – Thermoregulation – Sports performance in hot climate, Cool Climate, high altitude. Influence of: Amphetamine, Anabolic steroids, Androstenedione, Beta Blocker, Choline, Creatine, Human growth hormone on sports performance. Narcotic, Stimulants: Amphetamines, Caffeine, Ephedrine, Sympathomimetic amines. Stimulants and sports performance.

Richard, W. Bowers. (1989). Sports Physiology. WMC: Brown Publishers.

## **SOE/PE/C-503: SPORTS PSYCHOLOGY**

### Learning outcomes

1. Explain group mechanisms and group psychology in a sports context
2. Reflect upon motivational psychology as applied to sports activities
3. Formulate relevant constructs of exercise psychology
4. Demonstrate the ability to discuss sociological theories, concepts, and ideas in large and small groups and to express empirically as well as theoretically-based opinions.
5. To apply core sociological theories to specific social problems in order to analyse social problems

### **UNIT I - Introduction**

Meaning, Definition, History, Need and Importance of Sports Psychology. Present Status of Sports Psychology in India. Motor Learning: Basic Considerations in Motor Learning- Motor Perception - Factors Affecting Perception - Perceptual Mechanism. Personality: Meaning, Definition, Structure - Measuring Personality Traits. Effects of Personality on Sports Performance.

### **UNIT II - Motivation**

Meaning & Definition, Types of Motivation: Intrinsic, Extrinsic. Achievement Motivation: Meaning, Measuring of Achievement Motivation. Anxiety: Meaning and Definition, Nature, Causes, Method of Measuring Anxiety. Competitive Anxiety and Sports Performance. Stress: Meaning and Definition, Causes. Stress and Sports Performance. Aggression: Meaning and Definition, Method of Measurement. Aggression and Sports Performance. Self-Concept: Meaning and Definition, Method of Measurement.

### **UNIT III - Goal Setting**

Meaning and Definition, Process of Goal Setting in Physical Education and Sports. Relaxation: Meaning and Definition, types and methods of psychological relaxation. Psychological Tests: Types of Psychological Test: Instrument based tests: Pass-along test - Tachistoscope - Reaction timer - Finger dexterity board - Depth perception box - Kinesthesiometer board. Questionnaire: Sports Achievement Motivation, Sports Competition Anxiety.

### **UNIT IV - Sports Sociology**

Meaning and Definition - Sports and Socialization of Individual Sports as Social Institution. National Integration through Sports. Fans and Spectators: Meaning and definition, Advantages and disadvantages on Sports Performance. Leadership: Meaning, Definition, types. Leadership and Sports Performance.

#### **Group Cohesion**

Group: Definition and Meaning, Group Size, Groups on Composition, Group Cohesion,

Group Interaction, Group Dynamics. Current Problems in Sports and Future Directions - Sports Social Crisis Management - Women in Sports: Sports Women in our Society, Participation pattern among Women, Gender inequalities in Sports.

## **SOE/PE/E-501: SPORTS TECHNOLOGY**

### **Learning Objectives:**

1. To enable students to learn the fundamental of sports technology.
2. To equip the students to learn the technology used in sports.
3. To understand the different types of playfield surfaces, sports equipment's and its advantages.
4. To familiarize the students with the latest technology involved in sports and games.

### **Unit I - Sports Technology**

Meaning, definition, purpose, advantages and applications, General Principles and purpose of instrumentation in sports, Workflow of instrumentation and business aspects, Technological impacts on sports.

### **Unit II - Science of Sports Materials**

Adhesives- Nano glue, nanomoulding technology, Nano turf. Foot wear production, Factors and application in sports, constraints. Foams- Polyurethane, Polystyrene, Styrofoam, closed-cell and open-cell foams, Neoprene, Foam. Smart Materials - Shape Memory Alloy (SMA), Thermo chromic film, High-density modeling foam.

### **Unit III - Surfaces of Playfields**

Modern surfaces for playfields, construction and installation of sports surfaces. Types of materials - synthetic, wood, polyurethane Artificial turf. Modern technology in the construction of indoor and outdoor facilities. Technology in manufacture of modern play equipments. Use of computer and software in Match Analysis and Coaching.

### **Unit IV - Modern equipment**

Playing Equipments: Balls: Types, Materials and Advantages, Bat/Stick/ Racquets: Types, Materials and Advantages. Clothing and shoes: Types, Materials and Advantages. Measuring equipments: Throwing and Jumping Events. Protective equipments: Types, Materials and Advantages. Sports equipment with nano technology, Advantages.

#### **Training Gadgets**

Basketball: Ball Feeder, Mechanism and Advantages. Cricket: Bowling Machine, Mechanism and Advantages, Tennis: Serving Machine, Mechanism and Advantages, Volleyball: Serving Machine Mechanism and Advantages. Lighting Facilities: Method of erecting Flood Light and measuring luminous. Video Coverage: Types, Size, Capacity, Place and Position of Camera in Live coverage of sporting events.

Kochar, S.K. Methods and Techniques of Teaching (New Delhi, Jullandhar, Sterling Publishers Pvt. Ltd.), 1982

## **SOE/PE/E-502: ADAPTED PHYSICAL EDUCATION**

### **Learning outcome**

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

### **Unit 1: An Introduction to Adapted Physical Education**

- 1.1 Meaning, Need & Importance of Adapted Physical Education and Sports
- 1.2 Purpose, Aims and Objectives of Adapted Physical Education and Sports
- 1.3 Program organization of Adapted Physical Education and Sports
- 1.4 Adapted Sports- Para Olympics

### **Unit 2: Development of Individual Education Program (IEP)**

- 2.1 The student with a disability
- 2.2 Components and Development of IEP.
- 2.3 Principles of Adapted Physical Education and Sports
- 2.4 Role of Physical Education teacher
- 2.5 Teaching style, method & approach in teaching Adapted Physical Education

### **Unit 3: Developmental Considerations of an Individual**

- 3.1 Motor development
- 3.2 Perceptual Motor development
- 3.3 Early childhood and Adapted Physical Education

### **Unit 4: Individual with unique need and activities**

- 4.1 Behavioral and Special learning disability
- 4.2 Visual Impaired and Deafness
- 4.3 Health Impaired students and Physical Education
- 4.4 HRPF and its development for Individual with unique need

#### 4.5 Role of games and sports in Adapted Physical Education

## Semester II

## **SOE/PE/C-601: STATISTICS FOR RESEARCH IN PHYSICAL EDUCATION**

### **Learning Outcome**

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

### **UNIT I - Introduction**

Meaning and Definition of Statistics. Function, need and importance of Statistics. Types of Statistics. Meaning of the terms, Population, Sample, Data, types of data. Variables; Discrete, Continuous. Parametric and non-parametric statistics.

### **UNIT II - Data Classification, Tabulation and Measures of Central Tendency**

Meaning, uses and construction of frequency table. Meaning, Purpose, Calculation and advantages of Measures of central tendency - Mean, median and mode.

### **UNIT III - Measures of Dispersions and Scales**

Meaning, Purpose, Calculation and advances of Range, Quartile, Deviation, Mean Deviation, Standard Deviation, Probable Error. Meaning, Purpose, Calculation and advantages of scoring scales; Sigma scale, Z Scale, Hull scale

### **UNIT IV - Probability Distributions and Graphs**

Normal Curve, Meaning of probability- Principles of normal curve - Properties of normal curve. Divergence from normality - Skewness and Kurtosis. Graphical Representation in Statistics; Line diagram, Bar diagram, Histogram, Frequency Polygon, O give Curve.

### **Inferential and Comparative Statistics**

Tests of significance; Independent "t" test, Dependent "t" test - chi - square test, level of confidence and interpretation of data. Meaning of correlation - co-efficient of correlation - calculation of co- efficient of correlation by the product moment method and rank difference method. Concept of ANOVA and ANCOVA.

## **SOE/PE/C-602: KINSESIOLGY AND BIOMECHANICS**

### **Learning Outcomes**

1. Analyze and explain the mechanisms underlying biomechanical, physiological, and psychological changes that occur during after acute and chronic exercise.
2. Understand mechanical principles can be applied to the analysis of human movement to assess and improve performance and reduce risk of injury.
3. Know effectiveness of human movement using mechanical principles.

### **UNIT I - Introduction**

Meaning, nature, role and scope of applied kinesiology and Sports Biomechanics. Meaning of Axis and Planes, Dynamics, Kinematics, Kinetics, Statics Centre of gravity -Line of gravity plane of the body and axis of motion, Vectors and Scalars.

### **UNIT II - Muscle Action**

Origin, Insertion and action of muscles: Pectoralis major and minor, Deltoid, Biceps, Triceps (Anterior and Posterior), Trapezius, serratus, Sartorius, Rectus femoris, Abdominis, Quadriceps, Hamstring, Gastrocnemius.

### **UNIT III - Motion and Force**

Meaning and definition of Motion. Types of Motion: Linear motion, angular motion, circular motion, uniform motion. Principles related to the law of Inertia, Law of acceleration, and law of counter force. Meaning and definition of force- Sources of force - Force components .Force applied at an angle - pressure -friction -Buoyancy, Spin - Centripetal force - Centrifugal force.

### **UNIT IV - Projectile and Lever**

Freely falling bodies - Projectiles -Equation of projectiles stability Factors influencing equilibrium - Guiding principles for stability -static and dynamic stability. Meaning of work, power, energy, kinetic energy and potential energy. Leverage -classes of lever - practical application. Water resistance - Air resistance -Aerodynamics.

**Movement Analysis:** Analysis of Movement, Equipment's used for Analysis, Methods of analysis - Qualitative, Quantitative, Predictive,

## **SOE/PE/C-603: SCIENCE OF SPORTS TRAINING AND ADVANCED COACHING**

### Learning Outcomes

1. Understand training as performance based science
2. Explain different means and methods of various training
3. Prepare training schedule for various sports and games
4. Appraise types of periodization for performance development
5. Create various training facilities and plans for novice to advance performers

### **UNIT I**

Introduction Sports training: Definition – Aim, Characteristics, Principles of Sports Training, Meaning of Coaching, Definition, Aim Characteristics, Principles of coaching, Over Load: Definition, Causes of Over Load, Symptoms of Overload, How to tackle over load, Judgement of Training load

### **UNIT II**

Sports Training, various Sports Training Methods: Continuous Training Method, Interval Training Method, Repetition Method, Circuit Training Method, Fartlek Training Method, Weight Training Method, and Plyometric Training Method. Components of Physical Fitness, Development of Physical fitness. Endurance, Strength, speed, flexibility, Co-ordinative Abilities

### **UNIT III**

Preparing for Competitions-Build-up competitions, Main Competition, Competition Frequency & Psychological Preparation, Training Plan: Macro Cycle, Meso-Cycle. Short Term Plan and Long Term Plans - Periodisation: Meaning, Single, Double and Multiple Periodisation, Preparatory Period, Competition Period and Transition Period.

### **UNIT IV**

Preparing lesson Plan, significance of lesson plan, Types of lesson plan, principles of lesson plan, contents in lesson plan, time allotment

Definition of Doping – Side effects of drugs – Dietary supplements – IOC list of doping classes and methods. Blood Doping – The use of erythropoietin in blood boosting – Blood doping control – The testing programmes – Problems in drug detection – Blood testing in doping control – Problems with the supply of medicines Subject to IOC regulations : over-

the- counter drugs (OTC) – prescription only medicines (POMs) – Controlled drugs (CDs).  
Reporting test results – Education

## **SOE/PE/E-601: ATHLETIC CARE AND REHABILITATION**

### Learning outcomes

1. Understand the primary responsibilities the sports trainer has in preventing sports injuries and providing initial care for injured athletes.
2. Demonstrate the basics of sport first aid during and after game situation.
3. Recognize and appropriately treat common sports injuries and conditions from onset through rehabilitation.
4. Identify and apply knowledge of anatomy to the design and execution of research studies.

### **Unit I – Corrective Physical Education**

Definition and objectives of corrective physical Education. Posture and body mechanics, Standards of Standing Posture. Value of good posture, Drawbacks and causes of bad posture. Posture test – Examination of the spine.

### **Unit II – Posture**

Normal curve of the spine and its utility, Deviations in posture: Kyphosis, lordosis, flat back, Scoliosis, round shoulders, Knock Knee, Bow leg, Flat foot. Causes for deviations and treatment including exercises.

### **Unit III – Rehabilitation Exercises**

Passive, Active, Assisted

Resisted exercise for Rehabilitation

Stretching, PNF techniques and principles.

### **Unit IV – Massage**

Brief history of massage – Massage as an aid for relaxation – Points to be considered in giving massage – Physiological, Chemical, Psychological effects of massage – Indication / Contra indication of Massage – Classification of the manipulation used massage and their specific uses in the human body – Stroking manipulation: Effleurage – Pressure manipulation: Petrissage Kneading (Finger, Kneading, Circular) ironing Skin Rolling – Percussion manipulation: Tapotement, Hacking, Clapping, Beating, Pounding, Slapping, Cupping, Poking, Shaking Manipulation, Deep massage.

### **Sports Injuries Care, Treatment and Support**

Principles pertaining to the prevention of Sports injuries – care and treatment of exposed and unexposed injuries in sports – Principles of apply cold and heat, infrared rays – Ultrasonic, Therapy – Short wave diathermy therapy. Principles and techniques of Strapping and

Bandages.

## **SOE/PE/E-602: SPORTS JOURNALISM AND MASS MEDIA**

### **Learning Outcome**

1. Know how to seek accreditation to sporting events and to report on such events.
2. Demonstrate analytic skills in relation to reporting sporting events
3. Produce a number of assignments that demonstrate their own style and perception of events

### **UNIT I - Introduction**

Meaning and Definition of Journalism, Ethics of Journalism – Canons of journalism- Sports Ethics and Sportsmanship – Reporting Sports Events. National and International Sports News Agencies.

### **UNIT II - Sports Bulletin**

Concept of Sports Bulletin: Journalism and sports education – Structure of sports bulletin – Compiling a bulletin – Types of bulletin – Role of Journalism in the Field of Physical Education: Sports as an integral part of Physical Education – Sports organization and sports journalism – General news reporting and sports reporting.

### **UNIT III - Mass Media**

Mass Media in Journalism: Radio and T.V. Commentary – Running commentary on the radio – Sports expert's comments. Role of Advertisement in Journalism. Sports Photography: Equipment- Editing – Publishing.

### **UNIT IV - Report Writing on Sports**

Brief review of Olympic Games, Asian Games, Common Wealth Games World Cup, National Games and Indian Traditional Games. Preparing report of an Annual Sports Meet for Publication in Newspaper. Organization of Press Meet.

Sports organization and Sports Journalism – General news reporting and sports reporting. Methods of editing a Sports report. Evaluation of Reported News. Interview with and elite Player and Coach.

Publication.

## Semester III

## **SOE/PE/C-701: PROFESSIONAL PREPARATION**

### **Learning outcome**

- 1 Students will develop understanding of the profession of Physical Education.
2. Students will be able to deal with issues experienced by Physical Education teachers.
3. Students will recognize that learning to teach is a lifelong process.
4. Students will develop a comprehensive view of Physical Education from a global perspective.
5. Students will understand the domains & hidden dimensions of Physical Education.
6. Students will Demonstrate basic knowledge & awareness about inclusion, differently-abled students & describe steps to inclusion

### **Unit 1: The profession**

- 1.1 Meaning, criteria & evaluation of profession
- 1.2 A professional & professionalism in Physical Education & sports
- 1.3 Physical Education as a profession
- 1.4 Legal regulation of profession

### **Unit 2: Professional Preparation**

- 2.1 Historical perspectives
- 2.2 Policy perspectives
- 2.3 Theoretical perspectives
- 2.4 Nature & content of professional preparation programs

### **Unit 3: Professional Development**

- 3.1 Meaning & process
- 3.2 Growth on the job- in service concept
- 3.3 Self appraisal & parameter influencing self appraisal
- 3.4 Guiding principles & professional relations
- 3.5 Qualifications & duties, responsibilities & job profiles of school Phy. Edu. teachers, directors of Physical Education in colleges & university

### **Unit 4: Curriculum**

- 4.1 Meaning, importance & fundamental principles of curriculum planning
- 4.2 Writing the curriculum guide
- 4.3 Physical Education curriculum models
- 4.4 Implementing the Physical Education curriculum

### **Suggested Reading:**

1. Kiran Sandhu (2004). Professional preparation and career development in Physical Education and sports. New Delhi: Friends publication.
2. Kiran Sandhu (2004). Trends and developments in Professional preparation in Physical Education and sports. New Delhi: Friends publication.

6. Pangrazi, R.P. & Dauer, V. P. (1995). *Dynamic Physical Education for elementary school children* (11th Ed.). Boston: Allyn and Bacon.
7. Pangrazi, R.P. & Dauer, V.P. (1985). *Dynamic Physical Education curriculum & instruction for secondary school student*. Minnesota: Burgess publishing company.
8. Lombardo, B. & Wuest, D. (1994). *Curriculum & instruction the secondary school Physical Education experience*. St. Louis: Mosby
9. Kasat, G. & Karmarkar, A. K. (1996). *Professional preparation in Physical Education and sports*. Amravati: Kasat

## **SOE/PE/C-702: MANAGEMENT IN PHYSICAL EDUCATION AND SPORTS**

1. Students will know the basic concept of management of Physical Education and Sports in the school.
2. Students will know the basic methods and technique and its principles to manage the programme of competitions, intramurals the basic level of competitions.
3. Students will know the duties and responsibilities of manager
4. Students will know the budget management, school programme of Phy. Edu. and sports.

### **UNIT I**

Introduction, Definition of Sports Management, Need & Importance. Basic Principles and Procedures of Sports Management. Functions of Sports Management, Scope of Sports Management

### **UNIT II**

Introduction, Organisation at school level, Organisation at University level, Organisation at National level, basic guiding Principles for organizing physical education and sports Programmes in the Institutions, Intramurals need and importance, Organisation and Administration of Intramural Activities, Extra murals- General Objectives, Policies for Organisation and management of Extra mural Programmes, Management of Personnel.

### **UNIT III**

Introduction , Importance, types and need of Sports Equipments, Procurement of Equipment, Principles of Purchase Procedure, Quotations and tenders, Principles of Equipment Purchase, Important considerations in Selecting sports Equipment, Receiving, Stock Taking and Storing Equipment, Disposal of Equipment.

### **UNIT IV**

Introduction, Planning the Facilities, administrative Principles for Planning a Facility, General Principles for Planning the Facilities, Types of Facilities, Principles for planning the Indoor facility, Outdoor facilities, facility requirements, Planning, Construction and Management of sports infrastructure, guidelines for layout of sports infrastructure, Surface, Fencing, Drainage, lighting, Beautification, Management, Gymnasium,

Swimming Pool, Management of Indoor facilities, Management in Care and Maintenance of the facility.

## SOE/PE/C-703: MEASUREMENT AND EVALUATION IN PHYSICAL EDUCATION

### Learning outcome

1. Students will understand the concept of Test, Measurement, Evaluation and Assessment Procedure in Physical Education and give examples of each
2. Students will differentiate formative and summative evaluation, Process and Product evaluation
3. Students will identify the purposes of measurement and Evaluation
4. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
5. Students will locate and select physical fitness and sports skill tests
6. Students will properly administer psychomotor tests

### **Unit1: Basics of Measurement & Evaluation**

- 1.1 Concept Test, measurement, evaluation & assessment & its importance
- 1.2 Classification of test in Physical Education
- 1.3 Different tools of evaluation in Physical Education
- 1.4 Trends in evaluation in Physical Education
- 1.5 Criteria of test selection

### **Unit2: Construction & Standardization of tools**

- 2.1 Methods for testing Validity, Reliability & Objectivity
- 2.2 Construction of psychomotor test
- 2.3 Construction of Questionnaire and Opinionnaire
- 2.4 Administration of psychomotor test.
- 2.5 Concept, importance, construction & administrative concern of Rating scales

### **Unit3: Measuring fitness & sports skills**

- 3.1 Measurement of HRPF, SRPF, GMA & Motor educability.
- 3.2 Measurement of skills of various sports & games: Soccer, Handball, Tennis, Basketball, volleyball.
- 3.3 Testing of psychological variable.
- 3.4 Fitness assessment Tests for SCoursecial Population & older adults

### **Unit4: Test batteries & norms for evaluation**

- 4.1 Meaning & characteristics of Test batteries: AAHCOURSERD youth Fitness test, JCR, FITNESS GRAM & ACSM Fitness test
- 4.2 Factors affecting measurement in Physical Education.
- 4.3 Anthropometric measurement & somatoty Course.
- 4.4 Norm referenced tests & criterion referenced tests

## **SOE/PE/E-701: INFORMATION AND COMMUNICATION TECHNOLOGY IN PHYSICAL EDUCATION**

### **Learning outcome**

1. Understand concept of information and communication technology in physical education field
2. Analyse sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Offer Hands on Knowledge in information and communication Technology

### **Unit I – Communication & Classroom Interaction**

Concept, Elements, Process & Types of Communication, Communication Barriers & Facilitators of communication  
Importance of ICT Need of ICT in Education  
Scope of ICT: Teaching Learning Process, Publication Evaluation, Research and Administration, Challenges in Integrating ICT in Physical Education

### **Unit II – Fundamentals of Computers**

Characteristics, Types & Applications of Computers Hardware of Computer: Input, Output & Storage Devices Software of Computer: Concept & Types  
Computer Memory: Concept & Types Viruses & its Management  
Concept, Types & Functions of Computer Networks Internet and its Applications Web Browsers & Search Engines Legal & Ethical Issues

### **Unit III – MS Office Applications**

MS Word: Main Features & its Uses in Physical Education  
MS Excel: Main Features & its Applications in Physical Education MS Access: Creating a Database, Creating a Table, Queries, Forms & Reports on Tables and its Uses in Physical Education  
MS Power Point: Preparation of Slides with Multimedia Effects MS Publisher: Newsletter & Brochure

### **Unit IV – ICT Integration in Teaching Learning Process**

Approaches to Integrating ICT in Teaching Learning Process  
Project Based Learning (PBL)  
Co-Operative Learning  
Collaborative Learning  
ICT and Constructivism: A Pedagogical Dimension  
**E-Learning & Web Based Learning**  
E-Learning

Web Based Learning  
Visual Classroom

## SOE/PE/E-702: HEALTH EDUCATION AND SPORTS NURTITION

### Learning Outcomes

1. Understand the basic principles of Anatomy, Physiology and Health Education
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation. .
4. Remember and recall the definition of anatomy and physiology and co-relate the principles of physiology.
5. Appraise the effects of health condition during the training and practical sessions

### **Unit - I Health Education**

Concept, Dimensions, Spectrum and Determinants of Health

Definition of Health, Health Education, Health Instruction, Health Supervision, Aim, objective and Principles of Health Education

Health Service and guidance instruction in personal hygiene

### **Unit - II Health Problems in India**

Communicable and Non Communicable Diseases

Obesity, Malnutrition, Adulteration in food, Environmental sanitation, Explosive, Population,

Personal and Environmental Hygiene for schools

Objective of school health service, Role of health education in schools

Health Services - Care of skin, Nails, Eye health service, Nutritional service, Health appraisal, Health record, Healthful school environment, first- aid and emergency care etc.

### **Unit- III - Hygiene and Health**

Meaning of Hygiene, Type of Hygiene, dental Hygiene, Effect of Alcohol on Health, Effect of Tobacco on Health, Life Style Management, Management of Hypertension, Management of Obesity, Management of Stress

### **Unit - IV- Introduction to Sports Nutrition**

Meaning and Definition of Sports Nutrition, Role of nutrition in sports, Basic Nutrition guidelines, Nutrients: Ingestion to energy metabolism (Carbohydrate, Protein and Fat), Role of carbohydrates, Fat and protein during exercise.

#### **Nutrition and Weight Management**

Concept of BMI (Body mass index), Obesity and its hazard, Dieting versus exercise for weight control Maintaining a Healthy Lifestyle, Weight management program for sporty child, Role of diet and exercise in weight management, Design diet plan and exercise schedule for weight gain and loss.

### **References:**

#### **Semester IV**

## **SOE/PE/C-801: SPORTS MEDICINE**

### **Learning Outcome**

1. Perform and report on the exploratory analysis of data collected using sports technology
2. Analyze sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Support a conclusion based upon quantitative prediction, performance and analysis of a sporting team, code, or gaming environment

### **UNIT I - Introduction**

Meaning, definition and importance of Sports Medicine, Definition and Principles of therapeutic exercises. Coordination exercise, Balance training exercise, Strengthening exercise, Mobilization exercise, Gait training, Gym ball exercise Injuries: acute, sub-acute, chronic. Advantages and Disadvantages of PRICE, PRINCE therapy, Aquatic therapy.

### **UNIT II - Basic Rehabilitation**

Basic Rehabilitation: Strapping/Tapping: Definition, Principles Precautions Contraindications. Proprioceptive neuromuscular facilitation: Definition hold, relax, repeated contractions. Show reversal technique exercises. Isotonic, Isokinetic, isometric stretching. Definition. Types of stretching, Advantages, dangers of stretching, Manual muscle grading.

### **UNIT III - Spine Injuries and Exercise**

Head, Neck and Spine injuries: Causes, Presentational of Spinal anomalies, Flexion, Compression, Hyperextension, Rotation injuries. Spinal range of motion. Free hand exercises, stretching and strengthening exercise for head neck, spine. Supporting and aiding techniques and equipment for Head, Neck and Spine injuries.

### **UNIT IV - Upper Extremity Injuries and Exercise**

Upper Limb and Thorax Injuries: Shoulder: Sprain, Strain, Dislocation, and Strapping. Elbow: Sprain, Strain, Strapping. Wrist and Fingers: Sprain Strain, Strapping. Thorax, Rib fracture. Breathing exercises, Relaxation techniques, Free hand exercise, Stretching and strengthening exercise for shoulder, Elbow, Wrist and Hand. Supporting and aiding techniques and equipment for Upper Limb and Thorax Injuries.

### **Lower Extremity Injuries and Exercise**

Lower Limb and Abdomen Injuries: Hip: Adductor strain, Dislocation, Strapping. Knee: Sprain, Strain, Strain, Strapping. Ankle: Sprain, Strain, Strapping. Abdomen: Abdominal wall, Contusion, Abdominal muscle strain. Free exercises - Stretching and strengthening exercise for Hip, knee, ankle and Foot. Supporting and aiding techniques and equipment for

Lower limb and Abdomen injures.

## **SOE/PE/C-802: PEDAGOGY OF PHYSICAL EDUCATION**

### Learning outcome

1. Students will use effective communication and pedagogical skills and strategies to enhance student engagement & learning.
2. Students will utilize assessments and reflection to foster student learning and to inform instructional decisions.
3. Students will inherit qualities essential to become effective professionals.
4. Students will understand the discipline

### **Unit 1: Systematic improvement in teaching skills**

- 1.1 Science & Art of teaching – Teaching, Learning, & Pedagogy, appropriate practices-goals & feedback
- 1.2 Stages of skill development in teaching, sources of help, expert PE teacher
- 1.3 Effective teacher- how are they identified? Active teachers, contextual variations of active teaching
- 1.4 What teachers do in PE? What students do in PE? Effective PE teaching

### **Unit 2: Assessing and improving teaching**

- 2.1 Assessment model, on-site assessment of teaching, steps in assessment process
- 2.2 Task system- ecology of PE, important concepts in ecological framework
- 2.3 Interpersonal skills in PE teaching – teacher-student interaction skills, effective communication skills
- 2.4 Legal, ethical & moral issues in teaching, promoting self growth in PE
- 2.5 Strategies for content development- factors affecting program level planning, differing visions of good in PE

### **Unit 3: Developing effective units of instructions**

- 3.1 Determining entry & exit levels, end of unit objectives, practical factors related to unit planning, constructing unit plan, writing instructional objectives
- 3.2 Generic instructional strategies- guided practice, independent practice, monitoring student performance
- 3.3 Instructional format- active teaching, task teaching, teaching through questioning, peer teaching, cooperative learning
- 3.4 Self-instructional formats- contracts, PSI, providing effective instruction for mainstream students

### **Unit 4: Measuring teaching & its outcomes**

- 4.1 Traditional methods for assessing teaching- intuitive judgment, eyeballing, anecdotal records, checklists, rating scale

4.2 Systematic observation records- event recording, duration recording, interval recording, group time sampling, self recording

4.3 Combining observation techniques, important decisions in developing observation strategies, building observation system

4.4 What to observe, training observers, calculating reliability of observation data, examples of observation system

**Suggested Readings:**

1. Siedentop, D. (1991). Developing teaching skills in Physical Education. Ca: Mayfield Publishing company

2. Mosston, M., Ashworth, S. (1994). Teaching Physical Education (4th Ed). NY: Macmillan College Publishing Company

3. Kelly, L.E., Nelogano, V.J. (2004). Developing the Physical Education curriculum. Champaign, IL: Human Kinetics

4. Hopple, C.J. (2005). Elementary Physical Education teaching & assessment- A practical guide. Champaign IL: Human Kinetic

## **SOE/PE/C-803: SPORTS ENTREPRENEUR**

### **Learning outcomes**

- Identify the skills and knowledge base needed to foster entrepreneurial activity for individuals based on the experiences of successful sports entrepreneurs as well as assess and discuss the challenges they have faced.
- Critically discuss ways in which entrepreneurial-minded individuals can thrive in large sports organizations despite the tendency of such organizations to resist innovation and to favor the status quo or only seek marginal gains.
- demonstrate an understanding of, and identify, new opportunities and translate them into viable business solutions or opportunities

### **Unit I: Introduction to Sports Entrepreneurship**

1. Concept of entrepreneurship, innovation & knowledge management in sports
2. Business Planning Process - The business plan as an entrepreneurial tool
3. Elements of Business Plan, Objectives, Market Analysis, Development of product / idea, Marketing, Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones, Value proposition, Business Model Canvas and Drafting Business Proposal for Funding Agency.

### **Unit II : Introduction to Finance in Sports**

1. The Four Domains of Sports Marketing, Marketing Through Sports
2. Finance, Organisation & Management, Ownership, Critical risk contingencies of the proposal, Scheduling & milestones, Value proposition,
3. Business Model Canvas & Drafting Business Proposal for Funding Agency.

### **Unit II. Management of Physical Education and sports**

1. Meaning, Need and scope of management of Physical Education
2. Principles of Sports Management
3. Construction, marking and maintenance of play grounds, track & field, gymnasium, swimming pool and athletic track

### **Unit IV: Organization of co-curricular activities & Physical Education programmes**

1. Physical Education Budget : Need, Importance, procedure and principles of budget making,

2. Physical Education and sports programmes for - Primary, secondary and higher secondary School for sports awareness - demonstration, play days, sports rallies, sports exhibitions
3. Organization of National days (15<sup>th</sup> August & 26<sup>th</sup> January)., Organization of mass competition, sports day, hiking, trekking, Scout and Guide Camp and picnics
4. Ceremonies of competition - Opening, closing and victory

**References:**

- Sports Marketing By Melissa Jane Johnson Morgan Jane
- Small Business, Entrepreneurship and Enterprise Development. Harlow: Pearson Education.

## **SOE/PE/E-801: DISSERTATION**

### Learning Outcome

1. Students will have basic knowledge of Research in Physical Education, Fitness & Sports to Student
2. Students will know the fundamentals of research
3. Students will be able to select research problem & know the steps of developing it
4. Students will understand methodology & research procedure
5. Students will know different sampling techniques & data collection tools
6. Students will know basic statistics & statistical techniques
7. Students will apply & interpret descriptive statistics
8. Students will recognize appropriate inferential statistical tool as per research method
9. Students will understand data processing

## **SOE/PE/E-802: EXERCISE PRESCRIPTION & FITNESS MANAGEMENT**

### **Learning objectives:**

- 1. To make the students understand the concepts of fitness**
  - 2. To equip the students to learn the tests to measure each component of fitness**
  - 3. To acquire the skills of pre exercise screening**
  - 4. To learn the principles of training**
  - 5. To equip the students to prescribe the exercise to the clients**
  - 6. To understand the fitness norms and prepare fitness report of the clients**
- Learning objectives:**

### **Unit 1: Basic Principles of Physical Fitness**

- 1.1. How much physical activity is enough? Benefits of physical activity
- 1.2. Health related components of physical fitness, skill related components of fitness
- 1.3. Principles of physical training: Specificity, progressive overload (FITT), Reversibility, individual difference
- 1.4. Designing your exercise program- guidelines for training, choosing activities for a balanced program

### **Unit 2: Developing fitness, improving quality of life**

- 2.2. Benefits of aerobic exercises, monitoring heart rate
- 2.3. Developing aerobic exercise program- setting goals, applying FITT, building & maintaining aerobic fitness
- 2.4. Benefits of muscular strength & endurance, assessing muscular strength & endurance, creating a successful strength training program
- 2.5. Applying FITT principle, weight machines versus free weights, weight training safety
- 2.6. Determinants of flexibility, benefits & additional potential benefits of flexibility & stretching exercises, Flexibility improvement- FITT principle

### **Unit 3: Developing a personal fitness plan**

- 3.1. Guidelines for personal fitness plan- set goals, select activity, set target, system of mini goals & rewards, lifestyle activity, monitoring, commitment
- 3.2. Putting plan into action, maintaining fitness program for life
- 3.3. Exercise guidelines for people with special concerns- arthritis, asthma, diabetes, heart disease, hypertension, obesity, and osteoporosis
- 3.4. Exercise guidelines for life stages- children & adolescents, pregnant women, older adults

#### **Unit 4: Behavior change & fitness management**

- 4.1. Psychosocial factors to consider, Behavioral change theories & exercise
- 4.2. Strategies to achieve fitness goals & maintaining fitness programs
- 4.3. Trends in weight loss, weight gain
- 4.4. Causes of obesity, implications of overweight & obesity
- 4.5. Underweight conditions & eating disorders

#### **Suggested Readings:**

1. Fahey, Insel, Roth (2004) Fit & well (6<sup>th</sup>Ed.) Boston: McGraw Hill co. Greenberg
2. Dintiman, Oakes. (2004). Physical fitness & wellness (3rd Ed.). IL: Human Kinetics
3. Howley& Franks (1997). Health fitness instructor's Handbook (3rd Ed.)IL: Human kinetics
4. ACSM (1998) ACSM's resource manual for guidelines for exercise testing & Prescription (3rd Ed.) Lippincott, Williams & Wilkins
5. Destine& Moore (2003) ACSM's exercise management for person's with chronic diseases & disabilities (2nd Ed.) IL: Human Kinetics

# **BHARATI VIDYAPEETH DEEMED UNIVERSITY**

(Established u/s 3 of UGC Act 1956, vide notification no. F9. 15.U.3 of Govt. of India )

## **COLLEGE OF PHYSICAL EDUCATION**

Dhankawadi, Pune-411 043 (Maharashtra), Tel.020-24373741

**REACCREDITED 'A' GRADE BY NAAC**

## **Master of Philosophy (M. Phil.) In Physical Education**

**CURRICULUM FRAMEWORK  
(2009-2010)**

# **BHARATI VIDYAPEETH UNIVERSITY**

## **Relevant Rules for Degree of Master of Philosophy (M. Phil.) In Physical Education**

### **1. Status :**

The M. Phil. Degree shall have the status of an intermediate Degree between the first Post-Graduate degree and Doctorate Degree. It will have both research and course components and will give the student adequate background for advanced research.

### **2. Learning Outcome**

- i.** The course would equip students of Gujarat with necessary qualification for lecturer in a college/ secondary teacher or principal / higher secondary teacher or principal.
- ii.** Use online resources, libraries, databases etc.
- iii.** Create/prepare research papers for Sports and Physical Education
- iv.** Present and publish research papers in field of Sports and Physical Education.
- v.** Research scholar comes out with his/her original research or translation under the guidance of respected faculties in the second term. 9 Documentation skills.
- vi.** Knowledge of Sports Medicine, Sports Psychology, Sports Sociology and Sports Management.
- vii.** Organize and participate in seminar, workshop, symposia, conference etc.
- viii.** Participate in group discussions.

### **3. Eligibility and Admission :**

An applicant seeking admission to the M. Phil. Course must have obtained a Master's Degree in Physical Education from this or any other recognized University.

Admission to the M.Phil. course shall be made on the basis of :

- 1) Satisfactory performance at the Masters Degree examination in Physical Education; and
- 2) The performance at a test conducted by the College / University concerned.

#### **4. Duration of the M.Phil. course :**

The M.Phil. Course can be done either on a full-time or on Vacational basis depending upon the availability of the programme in the College.

##### **(a) Full-time course:**

- 1.** The duration of the full-time M.Phil. course shall be 12 months.
- 2.** A full-time M.Phil. Student shall attend lectures, tutorials, practicals and seminars and must complete to the satisfaction of the institute.
- 3.** Although the duration of a full-time M.Phil. Course shall be for 1 yr., which can be maximally extended up to 2½ yrs from the date of admission to complete dissertation and after which the admission shall stand cancelled. In such a case, the student has to take fresh admission.

##### **(b) Vacational course :**

- i.** The vacational M.Phil. course shall extend over a period of 24 months (2 years). Such a Vacational M.Phil. student shall have to attend a minimum period of 4 months for his studies at the College / M.Phil. Centre. Like a regular student, a vacational student also may be permitted to complete his dissertation within the period of 2½ years from the date of admission. The facility of vacational M.Phil. course shall be restricted to teachers of any institutions.
- ii.** A student of vacational M.Phil. Course must attend lectures, tutorials, practicals and seminars for at least two months in a year to the satisfaction of the institution.
- iii.** The criteria for granting admission to the Vacational M.Phil. programme will be as follows :
  - a.** First preference will be given to the lecturers who are working in Universities and Colleges as per the merit of previous examination.
  - b.** Second preference will be lecturers of Junior College or School teachers.
- iv.** The duration of a vacational M.Phil. Course shall be for 2 yrs., However it can be extended up to 2½ yrs with the prior permission of the University authorities.

#### **4. Content:** - This course shall be divided into two parts-

**Part A** - Theory Paper (3 papers i.e., 2 compulsory & 1 optional).

**Part B** - Research Project (Dissertation, Seminar & Viva-Voce).

## 5. Evaluation :

- i. The evaluation of the performance of the student will be a continuous process and performance will be evaluated by the concern guide.
- ii. The dissertation will be evaluated by the guide of the candidate and an external referee appointed by the University authorities on recommendation of the principal.
- iii. Seminar and Viva-voce will be based on the dissertation. The evaluation of the final seminar and the viva-voce test will be done by a **committee** consisting of the following :
  - a. One expert (who is a senior research guide for Ph.D. of this or any other university) to be nominated by the Head/Professor-in-charge of the Institute;
  - b. The dissertation supervisor;
  - c. The Head of the Institute, who will act as Chairman of this Committee.
- iv. The following grade will be awarded to a student on the basis of marks obtain by him in the final exam as follows:

Percentage of Total Marks	Grade
50% & above but less than 55 %	“C” Grade
55% & above but less than 60 %	“B” Grade
60% & above but less than 65 %	“B”+ Grade
65% & above but less than 70 %	“A” Grade
Above 70%	“O” Grade / Outstanding

- v. In case a student fails in dissertation by not getting required marks for passing. The same dissertation may be sent to second examiner for evaluation. Even after second time evaluation, if the student fail he/she may be asked to resubmit the dissertation

with the suggestions and modification given by the examiners. He can resubmit and appear for final examination.

- vi.** All interested persons can attend the seminar and the viva-voce examination which will constitute the defense of the dissertation and they shall have the right to ask questions and participate in discussion on the dissertation. The chairman of M.Phil. Evaluation committee shall exercise his/ her discretion to allow or not to allow a question. However, the members of the audience at the defense shall have no right to express their opinion on the suitability or otherwise of the dissertation for the award of the M. Phil. Degree.

## **M. Phil. Structure**

**(Regular Course:- 1 yr. / Vacational Course:- 2 yrs.)**

**Intake: - 30 Students for each course**

**Structure of M. Phil.:-** This course shall be divided into two parts

Part A - Theory Paper

Part B - Research Project

### **Examination:**

#### **Part A:** Structure of Theory Paper

<b>Sr. No.</b>	<b>Paper Name</b>	<b>Optional / Compulsory</b>	<b>Theory / Practical</b>	<b>Marks</b>	<b>Min. Marks</b>	<b>Min.% of Passing</b>
01	Research Processes in Physical Education	Compulsory	Theory	100 Marks	40 Marks	50%
02	Advanced Statistics & Computer Application to Physical Education	Compulsory	Theory	100 Marks	40 Marks	
03	Yoga and Sports Achievement	Optional	Theory	100 Marks	40 Marks	
	Training method and applied Mechanics	Optional	Theory	100 Marks	40 Marks	
	Measurement & Evaluation in Physical Education	Optional	Theory	100 Marks	40 Marks	
	Sports Medicine	Optional	Theory	100 Marks	40 Marks	
	Exercise Physiology	Optional	Theory	100 Marks	40 Marks	
	Sports Psychology	Optional	Theory	100 Marks	40 Marks	
				<b>300 Marks</b>	<b>120 Marks</b>	

## Part B: Structure of Research Project

### 1. Dissertation / Thesis:-

Dissertation / Thesis shall be evaluated by both internal and external examiners for 100 Marks (i.e., Internal 50 Marks and External 50 Marks).

### 2. Seminar Presentation:-

Seminar Presentation shall be an open defense system, and will be evaluated by a three-member Committee which will consist of the Head of the Institute as Chairman of the committee, internal examiner and any one subject expert (Preferably a Ph.D. guide)

### 3. Viva Voce:-

Viva-voce shall be evaluated by a three-member Committee which will consist the Head of the Institute as Chairman of the committee, internal examiner and any one subject expert (Preferably a Ph.D. guide).

### Structure of Research Project:-

Sr. No	Research Project	Internal	External	Full Marks	Min. Marks of Passing	Minimum % of Passing
01	Dissertation/Thesis	50 Marks	50 Marks	100 Marks	40 Marks	50%
02	Seminar Presentation	50 Marks	50 Marks	100 Marks	40 Marks	
03	Viva - Voce	50 Marks	50 Marks	100 Marks	40 Marks	
		150 Marks	150 Marks			
	<b>Total</b>			<b>300 Marks</b>	<b>120 Marks</b>	<b>150 marks</b>

### STRUCTURE OF OVERALL MINIMUM PASSING MARKS:

Sr. No.	Name of Part	Total Marks	Minimum Passing Marks
01	Part "A"	300	150
02	Part "B"	300	150
Total		600	300

**STANDARD OF PASSING:**

- A student has to obtain minimum 40% Marks in each THEORY PAPER of Part-A and 50% marks in aggregate in Part-A total, also students has to obtain 40% marks in each a) Dissertation b) seminar & c) Viva-voce and 50% marks in aggregate in Part B
- If a student fails to get less than 50% marks in overall aggregate in theory, he / she may apply again in *one or more theory subject* to obtain 50% marks in Part-A.
- If any student fails to get 50% marks in Part-B (Dissertation / Seminar Presentation / Viva Voce), he / she has to reappear either in Seminar or Viva Voce or both to get 50% marks for passing in part-B.

**AWARDS OF GRADE:**

The following grade will be awarded to a student on the basis of marks obtain by him in the final exam as follows:

<b>Percentage of Total Marks</b>	<b>Grade</b>
50% & above but less than 55 %	“C” Grade
55% & above but less than 60 %	“B” Grade
60% & above but less than 65 %	“B”+ Grade
65% & above but less than 70 %	“A” Grade
Above 70%	“O” Grade / Outstanding

**System of Dissertation / Thesis Submission:**

The M. Phil. Course must be completed within 2½ years from the time of admission; otherwise the admission is treated as cancelled. In such a case, the student has to take fresh admission.

Students can submit their dissertation any time during the session. The dissertation will be sent to an expert for evaluation and Viva-voce will be conducted accordingly. After receiving the marks, the university will declare the final result.

**PATTERN OF QUESTION PAPER:  
M. Phil. Question Paper Structure**

Subject: - .....

Day: -

Time:-

Date: -

Marks:- 100

**N. B.** 1. Attempt any 04 questions from Q. No. 01 to 06

2. Q. No. 07 is **COMPULSARY**

01. ....(20)

02. ....(20)

03. ....(20)

04. ....(20)

05. ....(20)

06. ....(20)

07. Write to Short Note (Any Four) (20)

a) .....

b) .....

c) .....

d) .....

e) .....

f) .....

### Time Table of M. Phil. Examination

Paper No.	Subject	Full Marks	Day & Date	
			Regular Course	Vacational Course
Paper I (Compulsory)	Research Process in Physical Education	100	Monday 21 <sup>st</sup> June 2010	Monday 18 <sup>th</sup> June 2012
Paper II (Compulsory)	Advanced Statistics and Computer Application to Physical Education	100	Tuesday 22 <sup>nd</sup> June 2010	Tuesday 19 <sup>th</sup> June 2012
Paper III (Optional)	Yoga & Sports Achievement	100	Wednesday 23 <sup>rd</sup> June 2010	Wednesday 20 <sup>h</sup> June 2012
	Thesis/Dissertation (Submission)	100	Monday 03 <sup>rd</sup> May 2010	Monday 03 <sup>rd</sup> May 2012
	Final Seminar (Research Thesis)	100	7 <sup>th</sup> June 2010 To	4 <sup>th</sup> June 2012 To
	Viva-Voce (Research Thesis)	100	10 <sup>th</sup> June 2010	9 <sup>th</sup> June 2012
		600 Marks		

## **Syllabus For Master Of Philosophy (M. Phil.)**

### **Compulsory paper – I: - Research Processes in physical education**

Learning outcomes

1. Identify the research problem in the field of physical Education and sports
2. Know to Summarize the various research literature
3. Understand and apply the basics of statistics in research
4. Organize the samples and sampling techniques which is relevant to the study.
5. Apply the systematic methods in writing research thesis

#### **Unit I: - Introduction**

Meaning nature and scope of research importance of research in general and With special reference to physical education and sports Characteristics of research and research worker.

#### **Unit II:-**

Basic, Applied and action research-their relationship and difference.

Importance and methodology of research.

#### **Unit III:-**

Place of research in university, Historical perspective, relation to graduate study,

Organization & financing of research, problem of university sponsored research.

#### **Unit IV:- The Problem**

Located the problem – selection of problem

Developing problem statement

Meaning and significance of Hypothesis

Type of hypothesis

#### **Unit V:- Non-Laboratory Research Techniques**

Historical Research

Meaning and significance of Hypothesis

Examining validate of historical data

Principal of historical criticism

Pitfalls in historical Research

**Unit VI:- Philosophical studies.**

Meaning and significance.

Methodology of philosophical research.

Critical thinking continuum.

**Unit VII : - Descriptive studies – Board survey**

Questionnaire, Opinion ire and interview techniques.

Case studies and profiles.

**Unit VIII:- Laboratory Research**

Experimental designs.

**Unit XI:- Experimental Methods**

Control of Experiment Factors.

Principals of Experimental Enquiry (Mill's Canons)

Establishing a research Laboratory

**Unit X:- Research Report**

Deference between abstract, Research proposal & research reports.

Format of research reports

Table and Figures.

Footnote and Bibliography

**Reference Books:**

1. John w. Best Research Education (Fourth Ed.) New Delhi, prentice Hall of India.
2. M.L. Kamallesh- Methodology of research in physical education. New Delhi, 1994
3. R.H. Whitney, Techniques of research.
4. Good, Bar, Gatesw, Research in education.

5. Clark, David H. Clar. Harison H.: Research process in physical education.
6. Veit, Richard, Research – The students Guide. New York Macmillan publishing company, 1980.
7. Sadhu A.N., Sing Amarjit; Research Methodology In Social Sciences (Fourth Edition) Bombay Himalaya Publishing House-1998

## **Compulsory paper– II:- Advanced Statistics And Computer Application to physical Education**

### Learning Outcome

1. To equip the students to understand the basic of skills acquisitions of sports performance.
2. To make them understand the basic of skills and selected sports movement pattern
3. To enable them to understand the link between motor skills, ability, learning and performance
4. To familiarize the students with various theories improving and affecting the sports skills performance

### **Unit I :- Introduction to statistics**

Meaning – importance and need of statistics parametric and non parametric statistic.

**Unit II:-** Measure of central tendency – specific characteristics and use of central tendency

### **Unit III: Percentiles and quartiles –**

Meaning and importance – computation of percentiles and deciles.

### **Unit IV:- Measure of variability-**

Quartile deviation, mean deviation and standard deviation – Specific Characteristic and uses.

**Unit V:** Normal probability curve – principles and properties of normal curve

### **Unit VI: Analysis of variance :**

Need for analysis of variance – standard deviations of combined

Samples – one way analysis of variance – two way analysis of Variance post Hoc Tests of significance

### **Unit VII: Analysis of co-variance:-**

Need for co-variance. Application of analysis of co-variance, control of covariates.

**Unit VIII : Partial and multiple correlations :**

Meaning of partial correlation, First order part correlation – computation of partial standard deviation.

Meaning of multiple correlation computation of multiple correlation – Difference between multiple correlation.

**Unit IX : Prediction and Wherry – Doolittle method:**

Meaning of predication – Two Variables regression equations – Multiple regression equations.

**Unit X:- Wherry Doolittle method of multiple correlation.**

Unit XI Special Co relational and parametric methods:

Chi-Square

Rank – Difference method of correlation. Biserial Correlation

Phi-Coefficient, Contingency coefficient, Curvilinear, relationship

**Unit XII : Computer programmers with basic knowledge.****Reference Books:**

1. Ferguson, George A. Statistical Analysis in psychology and education (Fifth edi.) Singapore, Mc Graw-hill international Book Co.,1985.
2. Walpole Ronald E. Introduction to statistics (Third Edi) Macmillan publish co. Inc, New York 1982
3. Mendenhal, off Understanding statistics (Second Edi) Belmont california, Wadsworth publishing company Inc., 1976
4. Garrett, Henry E. Wood Worth R.S.; Statistic in psychology and education, Bombay, Vakil & sons Ltd. INDIA, 1981
5. Advance statistic by Clark & Clarke.
6. Steele Robert, and Torrid James A. Principles and procedure of statistics, New York, Mc Graw-hill Book CoM.,1960.
7. Garret, Harry E. and Wood worth R.S. statistic in psychology and education, Bombay, Allied Pacific Private Ltd. 1981

## **Optional Paper – Training Method and Applied Mechanics**

### **Part – ‘A’ Training Methods**

Learning outcome

1. Understand training as performance based science
2. Explain different means and methods of various training
3. Prepare training schedule for various sports and games
4. Appraise types of periodization for performance development
5. Create various training facilities and plans for novice to advance performers
6. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
7. Students will locate and select physical fitness and sports skill tests
8. Students will properly administer psychomotor tests

#### **Unit I :- Principals of training and Conditioning**

Type of training weight training, circuit training, interval, times

Running wind sprint, jogging miles, fartlek training.

Other factors: diet, sleep-rest musical ione and readiness

#### **Unit II :- Fitness**

Basic of physical fitness, basic physical characteristic fitness & training,

Emotional fitness and psychological training.

#### **Unit II :- Strength Development:**

Maximum strength, elastic strength, strength endurance, absolute and relative strength, external resistance and the athletes ability to express force, static muscular activity, dynamic muscular activity, strength development training

#### **Unit IV: Speed Development :**

Speed in Sports, Speed Development Training For Speed Development the Speed Barrier Endurance and Speed Training.

#### **Unit V : Endurance Development**

Training Method- Duratin-Repetirion Competition and Testing Endurance Sports.

**Unit VI: Mobility Development**

Mobility Classification Factors influencing Mobility Role of Mobility,  
Mobility Training: Mobility Unit Construction- Mobility Derivation.

**Unit VII:** Physiological Effort of Training:

**Unit VIII:** Training Schedules – Seasons and Levels-Concept of Trainer System  
Role of Trainer in Programmed Implementation.

**Unit XI:** Testing Processes & Tools Strength Speed- Endurance Vital Capacity  
Blood Pressure- Pulse rate. Apparatus Spire Meter Spignomono  
Meter-Lig Dynamo Meter-Intru Pulse Apparatus.

**Unit X:** The Erect or Drugs, Alcohol and Smoking on Performance.

**Unit XI:** Effect of climatic changes and High Altitude on Human Performance.

**Part-B Applied Mechanics**

**Unit I:** Nature and Scope of Applied Mechanics in Physical Education  
Movement Mechanics in the Body

**Unit II: a)** Concepts of Application of Mechanics in Sports Static and Dynamic  
Balance (Equilibrium).

Force-Movement of Force Centripetal and Centrifugal.

Force of Gravity, Spin and Friction, Impact -Leaves, Newton's

Laws of Motion Velocity and Action-Reaction types of Motion -Rotary  
and Linear Motion-Angular Kinetics, Linear Kinetics, Kinematics  
Linear, Kinematics Center of Gravity Falling Bodies. Path of  
Projection-Work Power and Energy.

**B)** Guiding Principles Derived From the Application of Above  
Mechanical Concepts.

**Unit III : Hydrodynamics constructions:**

Concepts & Application of Mechanics in Sports in the Aqua Media  
Flotation. Buoyant Force-Specific Gravity Center of Buoyancy-Rotative  
Motion Fluid Resistance-Gyro Scoping Action-Guiding Principles

Derived From the Application of the Above Mechanical Concepts in the Aqua Media.

**Unit IV: Aero Dynamic Constructs :**

Principal of Cinematographic Analysis-Application of Cinematographic & Video Analysis Motor Ideograms Avoidance of Errors of Measurements.

**Unit IV: Analysis dynamic constructions:**

Principal of cinematographic analysis – application of cinematographic & video analysis motor ideograms avoidance of errors of measurement

**Reference Books:**

7. Amol, Robert & Gaines, Charles Sport Talent New Zealand, Penguin Books.
8. Bunn, John W. Scientific Principal of Coaching Eagle wood Cliffs N.J. Prentice Hall.
9. Harre, Dierich Principles of Sports Training Berlin Sportverlag.

## **Optional Paper – Measurement And Evaluation In Physical Education**

### Learning outcome

1. Students will understand the concept of Test, Measurement, Evaluation and Assessment Procedure in Physical Education and give examples of each
2. Students will differentiate formative and summative evaluation, Process and Product evaluation
3. Students will identify the purposes of measurement and Evaluation
4. Students will describe the features of Technical and administrative feasibility that should be considered when selecting test
5. Students will locate and select physical fitness and sports skill tests
6. Students will properly administer psychomotor tests

**Unit I:** Meaning of the term Measurement and evaluation. Basic Principles & functions of measurements and evaluation – Brief history of Measurement in Physical Education –Place of measurement and evaluation in Phy.Edu.

**Unit II:** Critical of test selection – Scientific Authenticity, Reliability, Validity, Objectivity, Norms– Administrative feasibility & educational application

**Unit III:** Tests Classification – Standard test – Objective and Subjective tests. Construction of Tests: Knowledge tests (Written Tests) & Skill tests (Evaluation of knowledge test steps in constructions of knowledge & skill tests.)

**Unit IV:** Maturity, Nutrition Body Size and form \_ Nutrition – Evaluating Nutrition, Nutritional test evaluation body Dimensions – Somato types – Posture, Values Test of Antero Posterior Posture, Lateral Deviation and Spine foot measurement.

**Unit V:** Determination of Center of Gravity of the human body – Graphic method, and Analytical rate, Respiratory Volume, Tidal Volume – Vital Capacity Audition & visual Reaction time, body fat, Grip Strength. Leg Strength & Flexibility.

**Unit VI:** Strength test – Kraus Weber Muscular Tests – Rogers Physical Fitness, Index Suggested Changes in the PFI test. Physiological fitness – Mc curdy Larson test of Organic efficiency cremation blood – piosis tests, Harvard step test, Kuper's 12 minutes continuous Run / Walk test.

**Unit VII:** Testing instrument– Expire Graph, Peak Flow meter chromatograph, Duckle method and Analytical method.

**Unit VIII:** Motor fitness – Oregon motor fitness test, California physical performance tests, revised AAHPER Youth fitness tests, Motor fitness tests of the armed forces. The JCR test, New York State Physical Fitness test, Purdue University Motor fitness test, Shafer Girl’s motor fitness test, Evaluation of motor Fitness test, sit-ups and chins. Inter relationship and self-scoring.

**Unit IX:** General motor Abilities – the concept of general motor Ability equating by specific activities, equating by general abilities, strength index – strength abilities of girls. MC Cloy’s General motor ability & Capacity test, Motor educability – LOWA Brace test. Explosive muscular vertical jump & standing broad jump.

**Unit X:** Measurement of social efficiency – MC Dolly’s behavior rating scale, Blascrchand’s scale, Cowell Social behavior trend index, social Acceptance Evaluation Socio metric Questionnaire. Measurement of general social Efficiency – Bell Adjustment Inventory, the Bereuter Personality Inventory. Cattails Sixteen personality Factor questionnaire & California psychological Inventory.

**Unit XI:** Measurement Programmes – Suggestions for administering tests. Test Personnel, time for testing – Economy of tables, Graphics exhibits Preparation of reports – Co-Operative measurement projects central New York State Projects, Oregon Pilot Physical fitness project.

**Unit XII:** Use of test in meeting the individual needs:

- a) Presentation, interpretation and use of test results.
- b) The teacher
- c) The student
- d) The parent
- e) The Administrator

### **Reference Book:**

1. Clarke, Harrison, Application of measurement to physical Education, Englewood Cliffs, New Jersey: Prentice Hall’76

2. Mathews, Donald K. Measurement in physical Education Philadelphia, London W.B. Saunders co.'58.
3. Margaret H. Safrit, Evaluation in physical education Englewood cliffs, New Jersey: prentice Hall Inc. '81.
4. Barry L. Jonson and jack N. Nelson practical measurements for evaluation in physical education. Delhi: Surjeet Publication.

## **Optional Paper:- Sports Medicine**

### **Learning Outcome**

1. Perform and report on the exploratory analysis of data collected using sports technology
2. Analyze sporting data of various types via astute use of statistical packages.
3. Practice mathematics, statistics, information technology in sport technology related problems.
4. Support a conclusion based upon quantitative prediction, performance and analysis of a sporting team, code, or gaming environment

**Unit I:** - History of sports medicine – its definition aims and objective, nature and functional utility- preventive, curative and rehabilitative aspects.

**Unit II:-** Concept of physical fitness – specific fitness- definition and components of physical fitness.

**Unit III:-** Physiological, pathological and psychological problems of sportsmen before, during and after competition.

**Unit IV:-** Thermo-regulation and sports: Fluid balance, Climatic ant tomes and their possible effects on the physiological function – Heat Exhaustion, Heat camp, Heat stroke, Exposure, Mountain Sickness-High altitude & its effects on performance,

**Unit V:-** Nutrition and Hygiene : Athletic nutrition and malnutrition high calorie diets, Role of vitamins, Minerals, Salts Carballydrate protein, fat loading before tournament, Hygiene of sportsmen Athletes foot, ringworm etc. Importance and need of immunization

**Unit VI:-** Roll of Skills rule and regulation in the prevention of sports injuries and early rehabilitation.

**Unit VII:-** Regional and specific injuries in track and filels and ither major games and their management

**Unit VIII:-** Common injuries and their management

**Unit IX:-** Somato types, physique and performance.

**Unit X:-** Women in sorts: Special problem of female athlete.

**Unit XI:-** Aging and Sports

**Unit XII :-** Sports physiotherapy: History of massage, definition, Muscle relaxations an aid to massage factors to be considered in including relaxation – points to be considered in giving massage - classification, contra indication – effects & uses Hydrotherapy, sauna bath , Electrotherapy & exercise therapy – Sports therapy- Sports therapy.

**Unit XIII:** At tapping and supports – safety gadgets in sports and games.

**Unit XIV:** Drugs and doping: Ergogenic – Artificial aids, Anabolic substances its use and amuses in sports, its effects and dangers.

**Unit XV:** Evaluation in sports medicine – Biometrics – measurement analysis interpretation for evaluation & performance – selection – prediction.

**Reference Books:**

1. Peter G. Stroke A Guide to Sports Medicine Churchill Livingston. Edinburgh, London.79.
2. Armstrong and Trckter injuries and sports London stample press.
3. Dolon J.P. Treatment an prevention of Athletic injuries.
4. Johnson W.R. science and medicine of Exercise and sports, New York, Harper and Smither Publisher.
5. Encyclopedia of sports science and medicine London: Edward Arnold publish.

## **OPTIONAL PAPER – EXERCISE PHYSIOLOGY**

Learning outcomes

1. Understand the basic principles of physiology and Exercise Physiology
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation.
4. Remember and recall the definition of physiology and co-relate the principles of physiology.
5. Appraise the effects during the training and practical sessions

### **Unit I: Introduction and function of muscles:**

Classification of muscles, structure of muscles tissues, various theories of Muscular contraction, Hypertrophy of muscles in relation to physical activity.

### **Unit II: Neuromuscular Physiology:**

Neuron, motor units neuron muscular junction, Bio-electric Potential, Kinesthesia tone moisture and equilibrium.

### **Unit III: Bio-Energies:**

Fule for muscular work, energy for muscular contraction, Aerobic & Anaerobic systems. Inter relationship of aerobic and Anaerobic system with special reference to different activities Anaerobic – Threshold training.

### **Unit IV: Operational Dynamic:**

Physiological changes due to Exercise and training: Effect of exercise on various systems, - oxygen debt, second wind, micro circulation. Effect of Exercise and training on carbohydrates, Fat and protein metabolism- control of variables in training.

### **Unit V: Sports Ergonomics:**

Works capacity under different environmental conditions such as hot, humid, cold and high altitude.

### **Unit VI: Sports Nutrition:**

Physiological consideration of diet in relation components, quantities and significance, sports and diet, diet before during and after competition Glycogen boosting – calorie calculator. Determination of energy cost of various sports activities.

**Unit VII:** Sex differences and sports.

**Unit VIII:** Effect of smoking, drinking, drugs and athletic performance, Dope Testing.

**Unit IX:** Aging and Exercise, Basic principles and guidelines for construction of cardio respiratory endurance exercise for the aged.

**Unit X: Physical conditioning:**

General principles of physical training, development of muscular strength and local endurance, development of Aerobic & Anaerobic endurance.

**Unit XI:** Functional tests E.M.G. Instrumentation.

**Unit XII: Physiology for the physically handicapped**

- a) Neuro Muscular condition
- b) Skelete – Muscular condition.
- c) Cardio – Muscular condition

**Reference Books:**

1. Astrance: P.P. and K.Rodhal Text Book of work physiology, New York, MCGraw book company.

9. Sundarajan G.S. Sports Medical Lecturers, Madars, Rasha Publications.
10. Welsh R. Peter and Roy J. shafer (Eds) Current Therpy in Sports Medicine, Toronto: B.C. Becker Inc.

## **Optional Paper :- SPORTS PSYCHOLOGY**

Learning outcomes

1. Understand the basic principles of physiology and Exercise Physiology
2. Apply the knowledge in the field of physical education and movement activity.
3. Analyze the practical knowledge during the practical situation.
4. Remember and recall the definition of physiology and co-relate the principles of physiology.
5. Appraise the effects during the training and practical sessions

**Unit I:** The History and Development of Sports Psychology.

**Unit II:** Psychology and play  
Traditional theories of play  
Twentieth Century theories of Play

**Unit III: Psychology of motor learning.**

Measuring of the term, perceptual motor learning the retention of motor skills transfer of skill, measurement of learning, and learning curve, Attention and its role in learning motor skills.

**Unit IV: Children in Sports:**

Early Psychological experience, motivation of children in sport emotions of Children in sport, child and coach, children and competitive sports.

**Unit V:** Women in sport – issues and controversies.

**Unit VI:** Physical activity and the psychological development of the handicapped.

**Unit VII: Personality of sportsmen and coach:**

Nature of personality, the issue of heredity in personality, personality traits of sportsmen, assessment of personality traits of the coach and his personality.

**Unit VIII: Motivation in Sport:**

Theories in/ or/ motivation, achievement motivation, level of aspiration and achievement, methods and assessing aspiration level, motivation and participation in physical activity dropouts in sports.

**Unit IX: Socio psychological dimension of sport:**

Sport performance in groups, team cohesion, socio metry in sport, leadership sport, sport audience and their effect on performance.

**Unit X: Psychology of competition:**

Psychological characteristics of pre-during and post competition (Anxiety, fear, frustration) Mental training, Psychological preparation for competition – Autogenic training.

**Unit XI: Psycho Dynamics in sports:****Unit XII:**The Evaluation of the superior Athlete:

- a) Typology of Athletics activities based upon their Psychological demands.
- b) Personality assessment.
- c) Assessing the Athlete through field tests.
- d) Motivate of superior athletes.
- e) Psychological preparation of the superior athlete.

**Unit XIII: Aggression and performance:**

- a) Theories of aggression
- b) Aggression in Athletic competition
- c) Sex difference in Aggression
- d) Instruction in Aggression

**Unit XIV: Activation:**

- a) Basic research findings
- b) Activation in sports, research findings
- c) Method of adjusting activation levels of Athletes.

**Reference Books:**

2. Craty Bryant, 'Psychology in Contemporary Leadership' Englewood cliffs: prentice – Hall Inc. New Jersey.
3. Bruin Richard, 'Psychology in sports methods and application' Collarada state University, Fort Williams, Colorado, Surjeet Publications, Delhi.
4. Lee Wakyn Tackh, Judy Al Bliner, 'Psychology of coaching,Theory and application' Florida International University, Miami Florida Reprinted by Surjeet Publications, New Delhi.
5. Gratty Bryant, 'Movement Behavior and Motor Learning' Philadelphia: Lea and Febiger, 1989.
6. Gratly Bryant J. Career Potential in Physical Activity. Englewood Cliffs, New Jersey's Prentice Hall Inc.

7. Gratly Bryant **Psychology in contemporary sports**. Englewood Cliffs, New Jersey, Prentice Hall Inc.
8. Singer Robert N. **Motor Learning and human performance**. New York Mc Graw Hill Company, 1975.
9. J.N. Schultz and W. Luther '**Autogenic Therapy**' Grune and Stration New York.
10. Cox Richard H. 'Sport Psychology conepts and application' MC Graw Hill, New York.

**Optional Paper: Yoga and Sports Achievement:**

**Subject Outcome:-**

1. To understand the concept and nature of yoga along with its historical background.
2. To gain knowledge regarding the application of yoga to Physical Education and Sports.
3. To understand the anatomy and Physiology of Asanas and Pranayamas.
4. To acquire the skills needed to understand and to overcome environmental problems.
5. To gain knowledge regarding the effect of yogic practices on health aspects.

**Unit I: Understanding of Yoga:**

- Yoga – Definition of Yoga – steps, Asana: Definition of objectives, aims.
- Pranayama – Definition, Aims & Objectives, Mechanism of Pranayama.
- Kriyas, Bandhas, Mudras.
- Ardinal Principles of Yoga practives.

**Unit II: Philosophical Foundation of Yoga**

- Yogic Texts & Yoga Philosophy
- Patanjali Yoga.
- Yoga, Mysticism & Cultural Synthesis.

**Unit III: Scientific Foundation of Yoga**

- Various physiological systems in the body.
- Deep Breathing, Normal breathing – pranayama breathing
- Scientific explanation of Asana & Exercises.
- Physiological implications of different yogic practices.

**Unit IV: Yoga Psychology & Mental Health**

- Meaning & nature
- Characteristics of mental health in western Psychology and Yoga.
- Interpretation of Psychological disturbance in terms of Yoga.
- Mechanism of Patanjala Yoga in controlling psychosomatic disorders.

**Unit V: Yoga, Health & Fitness**

- Health related fitness
- Role of yoga in health & fitness
- Non-slip dominance in relation to health, fitness and performance
- Injuries in yoga & remedies

**Unit VI: Yoga Diet**

- Philosophy of Yoga diet.
- Process of Eating
- Balance diet & concept of Ahara (Svattik, Rajasik, Tamasik)
- Diet & Behavior

**Unit VII: Yoga Practical's (as suggested by Swami Kuvalayanada)**

- Short course of Yoga
- Easy course of Yoga
- Full course of yoga

**Unit VIII: Yoga Practicals**

- Methods of Teaching & Learning
- Yoga Lesson Planning
- Practice Teaching (One Lesson)

**Reference Book:**

**THE SEMESTER-WISE DETAILS OF COURSES/CREDITS ARE GIVEN BELOW:  
LL.B. (3 Year Degree Programme)**

<b>I</b>	<b>LL.B First Semester Examination</b>	<b>Credits</b>
1.	Constitutional Law – I	4
2.	Law of Contract	4
3.	Law of Crimes	4
4.	Legal Language	4
5.	Law of Torts Including Motor Vehicle Accident and Consumer Protection Act	4
6.	Optional – I	4
	<b>A. Business Law Group –</b> Banking Law including Negotiable Instrument Act	
	<b>B. Constitutional Law Group –</b> Media and Law	
		<b>Total = 24 Credits</b>
<b>II</b>	<b>LL.B Second Semester Examination</b>	<b>Credits</b>
1.	Constitutional Law – II	4
2.	Special Contract	4
3.	ICT and Legal Research (Soft Skills)	4
4.	Practical Paper – I (Professional Ethics, Accountancy for Lawyers and Bar Bench Relations)	6
5.	Jurisprudence	4

## COURSE DESIGN OF LL.B 3 YEARS PROGRAMME

The Scope of the Subjects shall be as indicated in the prescribed syllabus.

Semester	Foundational/ Compulsory Courses	Practical papers	Electives/ Optional	Total number of Papers	Total Marks Allotted	Total Credits
I	5	-	1	6	600	24
II	4	1	1	6	600	26
III	4	1	1	6	600	26
IV	5	-	1	6	600	24
V	4	1	1	6	600	26
VI	4	1	1	6	600	26
Total Number of Compulsory / Foundational Courses = <b>26</b>		Total Number of Practical Papers = <b>04</b>	Total Number of Electives = <b>06</b>	Total Number of papers = <b>36</b>	Total Marks = <b>3600</b>	Total number of Credits for LL.B 3 Years Programme = <b>152</b>

Dr. Ujwala Bendale  
Dean, Principal I/C  
New Law College

**GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM  
(Rules & Regulations)**

1	Class/ Home Assignments & Research Paper	- 10 Marks
2	Unit Tests / Moot Courts/ Legal Aid	- 20 Marks
3	Tutorials Based On Case Studies & Legislative Analysis	- 05 Marks
4	Attendance	- 05 Marks

---

**Total = 40 Marks**

**GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM  
(Rules & Regulations)**

**1. CLASS/ HOME ASSIGNMENTS & RESEARCH PAPER :-**

Long Term Paper	- 05 Marks
2 research papers	- 05 Marks (2.5 Marks Each)

---

**Total = 10 Marks**

**EXPLANATION:-**

In the Class/Home Assignments, the students are required to prepare a compulsory **Long Term Paper**. Besides this, the students shall also submit a minimum of **two compulsory Research papers** on any of the themes relating to the subject. The Submissions must be **free from plagiarism** and must meet international standards of modes of citation (except at places where only Indian Citation applies).

**2. UNIT TESTS:-**

Unit test I	- 10 Marks
Unit test II	- 10 Marks

---

**Total = 20 Marks**

**EXPLANATION:-**

There shall be a minimum of two compulsory Unit written tests to be appeared by the students which shall consist of 10 Marks for each paper. The Topics for each paper shall be notified by the concerned subject teacher well in advance. Similarly, a student can participate in the moot court/ legal aid and related activities.

### 3. TUTORIALS BASED ON CASE STUDIES & LEGISLATIVE ANALYSIS:-

Tutorial 1 (Case Study-I)	- 02 Marks
Tutorial 2 (Case Study-II)	- 02 Marks
Tutorial 3 (Legislative Analysis)	- 01 Marks

-----  
**Total = 05 Marks**

#### EXPLANATION:-

There shall be a minimum number of 3 Tutorials out of which 2 tutorials shall be based on the recent case studies while 1 tutorial shall be based on analysis of recent or landmark legislation relating to the subject to be appeared by the students in the Class.

### 4. ATTENDANCE:-

**Attendance = 05 Marks**

#### EXPLANATION:-

As per the norms of Bar Council of India, it shall be compulsory for all students to have a minimum of 75% of attendance per semester.

#### SPECIAL CLAUSE:-

The students who participate at the following activities with the prior permission of the Principal may be exempted from the above rules as a Special case:

- a) *A Student Who participated at Various national and International Moot Court Competitions in India or abroad; or*
- b) *A Student Who participated in Mock Trials, Debate, Essay or any other kind of competitions*
- c) *A Student who participated in any Model United Nations, Model Parliamentary Debate Competitions in India or abroad; or*
- d) *A Student Who actively volunteered in the College organized or any national NSS activity or any other extra-curricular activities; or*
- e) *A Student Who participated in assisting NLC's Free Legal Aid Clinic or other legal aid services, Legal Awareness camps etc. ; or*
- f) *A Student who participated in any cultural or sports activities held at national or international level; or*
- g) *A Student who is suffering from prolonged illness duly certified by the Registered medical practitioner*

Provided, the students who participated in the abovementioned activities, have sought prior permission, in writing, of the Principal, Law College to represent the institute at national and international level. The exemption granted under this rule shall solely be subject to the discretion of the Principal, Law College and no Student can claim the exemption as a matter of his/her right.

## SYSTEM OF EXAMINATION:

Each paper shall be of out of which 40 Marks shall be for Internal Assessment (IA) and 60 Marks shall be for University Examination (UE). Internal Assessment (IA) and University Examination (UE) shall be conducted by the University for each Paper.

## THE CREDIT SYSTEM:

The credits specified for LL.B. 3 year programme describe the weightages of various courses of the programme. The number of credits along with grade points that the student has satisfactorily completed measures the performance of the student. Satisfactory progress of a student is subject to his/ her maintaining a minimum Cumulative Grade Point Average (CGPA), as well as minimum grades in different courses of the programme. A certain number of credits must be earned by the student to qualify for the degree. Description of credit distribution for core Courses, elective Courses, and language course has already been shown. There shall be a 10-Point Absolute Grading System for grading in each head of passing. The system shall have seven, the highest being 10. The performance indicators **O, A+, A, B+, B, and F** shall respectively mean:

O	Outstanding
A+	Excellent
A	Very Good
B+	Good
B	Satisfactory
F	Fail

## THE GRADING SYSTEM UNDER CBCS

### Point Scale for Grading

Marks Range of marks (Out of 100)	Grade Point	Grade
80 ≤ Marks ≤ 100	10	O
70 ≤ Marks ≤ 80	9	A+
60 ≤ Marks ≤ 70	8	A
55 ≤ Marks ≤ 60	7	B+
50 ≤ Marks ≤ 55	6	B
Marks below < 50	0	F

## **EVALUATION AND COMPUTATION OF THE GRADE POINT AVERAGES:**

Cumulative performance indicators such as GPA, SGPA or CGPA shall be calculated as described and illustrated below.

- A) The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the Course/ Paper.
- B) The Weights for performance at UE and IA shall respectively be **60% and 40%**.
- C) The Grade Point Average (GPA) for a Course/ Paper shall be calculated by first finding the total marks out of 100 for the Course/ Paper.
- D) Two kinds of performance indicators, namely, the Semester Grade point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the Courses/ Paper in a particular Semester, while CGPA measures the cumulative performance in all courses/ papers since his/her enrollment. The CGPA of a learner when he/she completes the programme is the Final Result of the learner.

## **STANDARDS OF PASSING:**

- A) In order to pass in a Semester, a Student must obtain a minimum grade point of 6.00 (50%) both at the UE and IA.
- B) A Student who passes in a Course/ Paper is said to have completed the Credits assigned to the Course/ Paper.
- C) A Student who completed the minimum Credits required for a programme will be declared to have completed the programme.
- D) **Minimum passing grade** shall be Grade 'B' for each course/ Paper.

## **RULES OF PROMOTION FOR LL.B 3 YEARS PROGRAMME:**

The candidate, who has taken admission in LL.B 3 years Course, subject to the clearance of eligibility and after securing required credits as prescribed by the university, shall be automatically promoted to next year. However, a Student who has not put up sufficient credits shall not be promoted to next year. In order to take admission in the final year, the Candidate has to pass in all the papers of 1<sup>st</sup> year with minimum 6.00 Grade points at both University Examination and Internal Examination.

## AWARD OF HONOURS:

A Student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The Final result will be in terms of letter grade only and is based on the CGPA of all Courses studied and passed. The Criteria for the award of honours is given below.

*The Criteria for the award of Degree are given as follows:*

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
9.50 < CGPA < 10.00	O	Outstanding	80 < Marks < 100
9.00 < CGPA < 9.49	A+	Excellent	70 < Marks < 80
8.00 < CGPA < 8.99	A	Very Good	60 < Marks < 70
7.00 < CGPA < 7.99	B+	Good	55 < Marks < 60
6.00 < CGPA < 6.99	B	Satisfactory	50 < Marks < 55
CGPA Below 6.00	F	Fail	Marks below 50

Dean, Principal I/C  
New Law College

## COURSE DESIGN OF BB.A. LL.B 5 YEAR PROGRAMME

The Scope of the Subjects shall be as indicated in the prescribed syllabus.

Semester	Foundational/ Compulsory Courses	Practical Papers	Electives/ Optional	total number of Papers	total Marks Allotted	total Credits
I	5	-	-	5	500	25
II	6	-	-	6	600	30
III	5	-	-	5	500	25
IV	6	-	-	6	600	30
V	4	-	1	5	500	25
VI	4	1	1	6	600	31
VII	4	-	1	5	500	25
VIII	4	1	1	6	600	31
IX	3	1	1	5	500	26
X	4	1	1	6	600	32
Total Number of Compulsory /Foundational Courses  <b>=45</b>		Total Practical papers  <b>= 04</b>	Total Number of Electives  <b>= 06</b>	Total Number of papers  <b>= 55</b>	Total Marks  <b>= 5500</b>	Total number of Credits for BBA. LL.B 5 Years Programme  <b>= 280</b>

Dr. Ujwala Bendale  
Dean, Principal I/C  
New Law College

## GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM

### (Rules & Regulations)

- **Class/ Home Assignments & Research Paper** - 10 Marks
- **Unit Tests / Moot Courts/ Legal Aid** - 20 Marks
- **Tutorials Based On Case Studies & Legislative Analysis** - 05 Marks
- **Attendance** - 05 Marks

---

**Total = 40 Marks**

## GUIDELINES FOR INTERNAL ASSESSMENT SYSTEM

### (Rules & Regulations)

#### 1. CLASS/ HOME ASSIGNMENTS & RESEARCH PAPER :-

- Long Term Paper - 05 Marks
- 2 research papers - 05 Marks (2.5 Marks Each)

---

**Total = 10 Marks**

#### EXPLANATION:-

In the Class/Home Assignments, the students are required to prepare a compulsory **Long Term Paper**. Besides this, the students shall also submit a minimum of **two compulsory Research papers** on any of the themes relating to the subject. The Submissions must be **free from plagiarism** and must meet international standards of modes of citation (except at places where only Indian Citation applies).

#### 2. UNIT TESTS:-

- Unit test I - 10 Marks
- Unit test II - 10 Marks

---

**Total = 20 Marks**

#### EXPLANATION:-

There shall be a minimum of two compulsory Unit written tests to be appeared by the students which shall consist of 10 Marks for each paper. The topics for each paper shall be notified by the concerned subject teacher well in advance. Similarly, a student can participate in the moot court/ legal aid and related activities.

### 3. TUTORIALS BASED ON CASE STUDIES & LEGISLATIVE ANALYSIS:-

Tutorial 1 (Case Study-I)	- 02 Marks
Tutorial 2 (Case Study-II)	- 02 Marks
Tutorial 3 (Legislative Analysis)	- 01 Marks

---

**Total = 05 Marks**

#### EXPLANATION:-

There shall be a minimum number of 3 Tutorials out of which 2 tutorials shall be based on the recent case studies while 1 tutorial shall be based on analysis of recent or landmark legislation relating to the subject to be appeared by the students in the Class.

### 4. ATTENDANCE:-

**Attendance = 05 Marks**

#### EXPLANATION:-

As per the norms of Bar Council of India, it shall be compulsory for all students to have a minimum of 75% of attendance per semester.

### SPECIAL CLAUSE

The students who participate at the following activities with the prior permission of the Principal may be exempted from the above rules as a Special case:

- a) *A Student Who participated at Various national and International Moot Court Competitions in India or abroad; or*
- b) *A Student Who participated in Mock Trials, Debate, Essay or any other kind of competitions*
- c) *A Student who participated in any Model United Nations, Model Parliamentary Debate Competitions in India or abroad; or*
- d) *A Student Who actively volunteered in the College organized or any national NSS activity or any other extra-curricular activities; or*
- e) *A Student Who participated in assisting NLC's Free Legal Aid Clinic or other legal aid services, Legal Awareness camps etc. ; or*
- f) *A Student who participated in any cultural or sports activities held at national or international level; or*
- g) *A Student who is suffering from prolonged illness duly certified by the Registered medical practitioner*

Provided, the students who participated in the abovementioned activities, have sought prior permission, in writing, of the Principal, Law College to represent the institute at national and international level. The exemption granted under this rule shall solely be subject to the discretion of the Principal, Law College and no Student can claim the exemption as a matter of his/her right.

## SYSTEM OF EXAMINATION

Each paper shall be of out of which 40 Marks shall be for Internal Assessment (IA) and 60 Marks shall be for University Examination (UE). Internal Assessment (IA) and University Examination (UE) shall be conducted by the University for each paper.

### THE CREDIT SYSTEM:

The credits specified for BB.A. LL.B. 5 years programme describe the weightages of various courses of the programme. The number of credits along with grade points that the student has satisfactorily completed measures the performance of the student. Satisfactory progress of a student is subject to his/ her maintaining a minimum Cumulative Grade Point Average (CGPA), as well as minimum grades in different courses of the programme. A certain number of credits must be earned by the student to qualify for the degree. Description of credit distribution for core Courses, elective Courses, and language course has already been shown.

There shall be a 10-Point Absolute Grading System for grading in each head of passing. The system shall have seven, the highest being 10.

The performance indicators **O, A+, A, B+, B, and F** shall respectively mean:

O	Outstanding
A+	Excellent
A	Very Good
B+	Good
B	Satisfactory
F	Fail

## THE GRADING SYSTEM UNDER CBCS

### Point Scale for Grading

Marks Range of marks (Out of 100)	Grade Point	Grade
80 ≤ Marks ≤ 100	10	O
70 ≤ Marks ≤ 80	9	A+
60 ≤ Marks ≤ 70	8	A
55 ≤ Marks ≤ 60	7	B+
50 ≤ Marks ≤ 55	6	B
Marks below < 50	0	F

## **EVALUATION AND COMPUTATION OF THE GRADE POINT AVERAGES:**

Cumulative performance indicators such as GPA, SGPA or CGPA shall be calculated as described and illustrated below.

- A) The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the Course/ Paper.
- B) The Weights for performance at UE and IA shall respectively be **60% and 40%**.
- C) The Grade Point Average (GPA) for a Course/ Paper shall be calculated by first finding the total marks out of 100 for the Course/ Paper.
- D) Two kinds of performance indicators, namely, the Semester Grade point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the Courses/ Paper in a particular Semester, while CGPA measures the cumulative performance in all courses/ papers since his/her enrollment. The CGPA of a learner when he/she completes the programme is the Final Result of the learner.

## **STANDARDS OF PASSING**

- A) In order to pass in a Semester, a Student must obtain a minimum grade point of 6.00 (50%) both at the UE and IA.
- B) A Student who passes in a Course/ Paper is said to have completed the Credits assigned to the Course/ Paper.
- C) A Student who completed the minimum Credits required for a programme will be declared to have completed the programme.
- D) **Minimum passing grade** shall be Grade 'B' for each course/ Paper.

## **RULES OF PROMOTION FOR BB.A LL.B 5 YEARS PROGRAMME**

In a 5 year LL.B programme, a Student who is admitted in 1st year, subject to the clearance of eligibility and after securing required credits for that year, shall automatically be promoted to next year. However, a Candidate who has not put minimum credits shall not be promoted to next year of the programme. In order to get promotion in 3rd year, the Candidate has to pass in all the papers of 1st year with minimum 6.00 grade points in each paper at both University Examination and Internal Examination. Similarly, in order to get promotion to 4th Year, a Candidate has to pass in all the papers of 1st year and 2nd year. In order to get promotion in last year, a Candidate has to pass in all the papers of 1st year, 2nd year and 3rd year of the programme.

## SINGLE DEGREE:

As per the UGC rules, a Candidate admitted in **BB.A. LL.B 5 Years Programme** is entitled for Single Degree only (**BB.A. LL.B**) that too after the successful completion of 5 years programme. They shall not be entitled for Dual Degree as the duration of the Programme is only five years.

## AWARD OF HONOURS:

A Student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The Final result will be in terms of letter grade only and is based on the CGPA of all Courses studied and passed. The Criteria for the award of honours is given below.

*The Criteria for the award of Degree are given as follows:*

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
9.50 < CGPA < 10.00	O	Outstanding	80 < Marks < 100
9.00 < CGPA < 9.49	A+	Excellent	70 < Marks < 80
8.00 < CGPA < 8.99	A	Very Good	60 < Marks < 70
7.00 < CGPA < 7.99	B+	Good	55 < Marks < 60
6.00 < CGPA < 6.99	B	Satisfactory	50 < Marks < 55
CGPA Below 6.00	F	Fail	Marks below 50

Dr. Ujwala Bendale  
Dean, Principal I/C  
New Law College

**COURSE DESIGN OF LL.M (TWO YEAR PROGRAM)  
(SEMESTER PATTERN)**

Semester	Core Course	Elective Course	Practical Paper	Open Course	General Course	Total No. of Papers	Total Marks	Total Credits
First Semester	02	02	01	NIL	NIL	05	500	30
Second Semester	02	02	01	NIL	NIL	05	500	30
Third Semester	NIL	02	01	02	01	06	600	30
Fourth Semester	Dissertation	NIL	NIL	NIL	NIL	01	200	30
<b>Total</b>						17	1800	120

**1. Scheme of Examination:** The examinations for two year LL.M. Program will be held in each Semester. The medium of instruction and the examination shall be in English. Every paper shall carry 100 marks out of which 60 marks are for written examination i.e. University Examination (UE) & 40 marks for Internal Assessment (IA). There shall be no written examination (i.e UE) for Practical Paper and Dissertation.

▪ **Internal Assessment (IA) will be as follows:**

- Unit Tests - 15 marks
- Home assignment - 10 marks
- Tutorial/Class Presentation - 10 marks
- Attendance - 5 marks

▪ **Practical Paper**

- The student has to appear for a Practical Paper in First, Second and Third Semester each respectively.
- The practical paper shall carry 100 marks each which shall be evaluated on the basis of the performance of the students under following headings:
  - Research Project (Doctrinal/Non-doctrinal)
  - Research publication
  - Clinical work
  - Law teaching

▪ **Dissertation**

- Dissertation shall carry 200 marks which shall be evaluated as follows:
  - Written work submission – 100 Marks
  - Research Publication – 50 Marks  
(in Peer reviewed journal having ISSN No.)
  - Presentation and Viva voce – 50 marks

The student shall also have to submit two progress reports signed by their research guide highlighting the work carried out by the student during his research.

2. **Credit System:** Choice based credit system designed as per the University rules has been implemented for this program. The two year LL.M. program will have **120 credits**. Each credit is of 15 hours.
3. **Grading System:** The University has adopted a **10-point absolute grading system** for grading in each head of passing. The grading system shall be as shown in Table-1 below.

The Grading System under CBCS

Range of Marks (out of 100)	Grade Point	Grade
$80 \leq \text{Marks} \leq 100$	10	O
$70 \leq \text{Marks} < 80$	9	A+
$60 \leq \text{Marks} < 70$	8	A
$55 \leq \text{Marks} < 60$	7	B+
$50 \leq \text{Marks} < 55$	6	B
Marks < 50	0	D

The performance indicators O, A+, A, B+, B, and D shall respectively mean Outstanding, Excellent, Very Good, Good, Average, and Poor. It may be noted that entries in Table are meant for converting marks in individual courses to grade points. The respective grade points can also be computed from the following formulas given in Table-2.

**The Formula to calculate the Grade Points (GP):**

Suppose that '**Max**' is the maximum marks assigned for an examination or evaluation based on which GP will be computed. In order to determine the GP, set  $x = \text{Max}/10$  (since we have adapted 10-point system). Then GP is calculated by the formulas shown in Table-2. After computing the grade point the grade can be found from Table-1.

Table-2: Formula to Calculate Grade Point in Individual Evaluations

Range of Marks at the evaluation	Formula for the Grade Point
$8x \leq M \leq 10x$	10
$5.5x \leq M \leq 8x$	$\text{Truncate}(M / x) + 2$
$4x \leq M \leq 5.5x$	$\text{Truncate}(M/x) + 1$

**4. Computation of Grade Point Averages: Cumulative performance indicators such as GPA, SGPA, or CGPA shall be calculated as described and illustrated below.**

- I. The performances at UE and IA will be combined to obtain the Grade Point Average (GPA) for the course. **The weights for performance at UE and IA shall respectively be 60% and 40%.**
- II. The grade point average (GPA) for a course shall be calculated by first finding the total marks **out of 100 for the course. The corresponding GP (as per the table in (2) above) shall be the GPA for the course.**
- III. Two kinds of performance indicators, namely, the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all courses since his/her enrolment. The CGPA of a learner when he/she completes the programme is the final result of the learner.

- IV. The SGPA is calculated by the formula 
$$SGPA = \frac{\sum C_k \times GP_k}{\sum C_k}$$
, where  $C_k$  is the credit-value assigned to a course and  $GP_k$  is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

- V. The CGPA is calculated by the formula 
$$CGPA = \frac{\sum C_k \times GP_k}{\sum C_k}$$
, where  $C_k$  is the credit-value assigned to a course and  $GP_k$  is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrolment and also the during the semester for which CGPA is calculated, including those in which he/she might have failed or those for which he/she remained absent. **The CGPA shall be calculated up to two decimal place accuracy.**

- VI. The CGPA, calculated after the minimum credits specified for the programme are 'earned', will be the final result.

**5. Standards of Passing**

- For all courses, both UE and IE constitute separate heads-of-passing (HoP).
- In order to pass in such courses and to 'earn' the assigned credits the learner must obtain a minimum grade point of **6.0 (50% marks) at UE** and also a minimum grade point of **6.0 (50% marks) at IA**;
- The GPA for a course will be calculated only if the learner passes at the UE.
- A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the HoP.

- Similarly, a student who fails in a course at IA has to reappear only at IA as a backlog candidate and clear the HoP.

**6. Rules of Promotion:** - The admission of students to the Two Year LL.M Program shall be on the yearly basis. A student admitted to the First Year of the course who complies with norms of the credit system and internal assessment with minimum 75% of attendance in the first year shall be automatically promoted to the Second year.

**7. Award of Honours:**

1. A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given in Table 4.

Table 4: Criteria for the Award of Honours at the End of the Programme

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.50 < CGPA < 10.00$	O	Outstanding	$80 < Marks \leq 100$
$9.00 < CGPA < 9.49$	A+	Excellent	$70 < Marks \leq 80$
$8.00 \leq CGPA \leq 8.99$	A	Very Good	$60 \leq Marks < 70$
$7.00 < CGPA < 7.99$	B+	Good	$55 < Marks \leq 60$
$6.00 < CGPA < 6.99$	B	Satisfactory	$50 < Marks \leq 55$
CGPA below 6.00	F	Fail	Marks Below 50

2. Formula to compute equivalent percentage marks for specified CGPA:

$$\%Marks(CGPA) = \begin{cases} 10 \times CGPA - 10, & \text{if } 5.00 \leq CGPA \leq 6.00 \\ 5 \times CGPA + 20, & \text{if } 6.00 \leq CGPA \leq 8.00 \\ 10 \times CGPA - 20, & \text{if } 8.00 \leq CGPA \leq 9.00 \\ 20 \times CGPA - 110, & \text{if } 9.00 \leq CGPA \leq 9.50 \\ 40 \times CGPA - 300, & \text{if } 9.50 \leq CGPA \leq 10.00 \end{cases}$$

# COURSE STRUCTURE FOR LL.M (TWO YEAR PROGRAM) (SEMESTER PATTERN)

---

## ➤ Core courses

- Law and social transformation in India (5 credits)
- Indian constitutional law: The new challenges (5 credits)
- Judicial process (5 credits)
- Legal education and research methodology (5 credits)

## ➤ Elective Courses

### ▪ Business law

- Law of industrial and Intellectual property (5 credits)
- Legal regulation of economic enterprises (5 credits)
- Law of export import regulation (5 credits)
- Banking laws (5 credits)
- Insurance laws (5 credits)
- Corporate finance (5 credits)

### ▪ Human rights law

- Concept and development of human rights (5 credits)
- Human rights and international order (5 credits)
- Protection and enforcement of human rights in India (5 credits)
- Human rights of disadvantaged groups (5 credits)
- International humanitarian law and refugee law (5 credits)
- Science technology and human rights (5 credits)
- Dissertation (30 credits)

### ▪ Intellectual Property Law

- General Regime of Intellectual Property Rights (5 credits)
- Law Relating to Patents (5 credits)
- Law Relating to Trademarks (5 credits)
- Law Relating to Copyright (5 credits)
- Biotechnology and IPR (5 credits)
- Law of geographical indication and traditional knowledge (5 credits)

### ▪ Environment Law

- Environment and Development: Law and Policy (5 credits)
- Environment and international legal order (5 credits)
- Environment protection in India (5 credits)
- Environment protection and disaster management (5 credits)
- Climate change and legal order (5 credits)
- Biological diversity and legal order (5 credits)

➤ **Practical Paper**

- Practical Paper I (10 Credits)
- Practical Paper II (10 Credits)
- Practical Paper III (10 Credits)

➤ **Interdisciplinary Courses**

- Educational Technology and E-learning (3 credits)
- Computer Application and Legal research (3 credits)

➤ **Value Added Course**

- Soft skills and Personality Development (4 credits)

**BHARATI VIDYAPEETH (DEEMED to be UNIVERSITY), PUNE**  
**Faculty of Management Studies**  
**Master of Business Administration– (MBA-General)**  
**Revised Course Structure (To be effective from 2020-2021)**

**I. Title:**

- a) **Name of the Programme: Master of Business Administration (General)**
- b) **Nature & duration of the Programme: *FULL TIME* Post-Graduate Degree Programme of TWO YEARS (approved by AICTE).**

**II. Introduction :**

The Master of Business Administration (General) is a full time two-year program offered by Bharati Vidyapeeth (Deemed to be University), Pune and conducted at its Management Institutes in Pune, New Delhi, Karad, Kolhapur, Sangli, and Solapur. All the institutes have experienced faculty members, excellent Laboratories, Library, and other modern facilities to provide proper learning environment to the students. This programme is very well received by the industry.

**III. Rationale for Syllabus revision:**

The Vision and Mission statements of the MBA (General) program embodies the spirit of the mission of the University and vision of Hon'ble Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth (Deemed to be University), Pune, which is to usher in "Social Transformation through Dynamic Education

In view of the dynamic nature of the market, economy and evolving expectations of the stakeholders such as students, faculty members and industry in particular, the syllabus is revised periodically. Last revision was in the year 2016-17.

Over the past four years, feedback was received from various stakeholders and considering the changes that in the macro environment, a need was felt to revise the syllabus so as to suffice the requirements of the industry and society. This revised draft is the result of inputs received from the industry, academia, alumni and all stakeholders. This revised draft is the result of inputs received time to time from the industry, academia, alumni and all stakeholders

**IV. Vision Statement of MBA (General) Program :**

To facilitate creation of Dynamic and Effective Business Professionals, Managers and Entrepreneurs who can transform the corporate sector, cater to the needs of the society and contribute towards Nation building.

**V. Objectives of the MBA (General) Program :**

At Bharati Vidyapeeth (Deemed to be University), Pune the objective of MBA (General) Program is to provide world class Business Education and develop dynamic managers, entrepreneurs and business leaders. The Program aims to enhance decision

---

making capabilities of upcoming managers by imparting critical thinking and analytical abilities.

## **VI. MBA Program: Program Outcomes**

On the successful completion of this Program a student shall be able to:

1. Apply the knowledge of management theories and practices to solve business problems.
2. Foster analytical and critical thinking abilities for data-based decision making.
3. Learn new technologies with ease and be productive at all times
4. Ability to understand, analyze and communicate global, economic, legal and ethical aspects of business.
5. Read, write, and contribute to Business literature
6. Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.

## **VII. Eligibility for Admission:**

Admission to the programme is open to any graduate (10+2+3) of any recognized university satisfying the following conditions:

1. The candidate should have secured at least 50% (45% for SC/ST) in aggregate at graduate level university examination.
2. The Candidate studying in final year of Bachelor's degree may also apply. Admission of such candidates will remain provisional until submission of final result certificates in original.
3. Subject to the above conditions, the final admission is based solely on
  - a) The merit at the All India entrance test (B-MAT) followed by Group Discussion & Personal Interview conducted by Bharati Vidyapeeth (Deemed to be University), Pune
  - b) Submission of Migration Certificate, Transference Certificate, anti-ragging affidavit etc.

## **VIII. Structure of the Program:**

The MBA-General program is of **102** credits which need minimum two years divided into four semesters to complete. During third semester students have to opt for

specialization(s) and study the specialization courses in depth. The programme also includes Summer Internship / Summer Training of 50 days. The medium of instruction and examination will be only English.

A student would be required to complete the course within FOUR academic years from the date of admission.

## **IX. Credits – 102**

The definition of credits is based on the following parameters;

- i) Learning hours put in by the learner
- ii) Learning outcomes
- iii) Contents of the syllabus prescribed for the course etc.

In this system each credit can be described as a combination of 03 (**THREE**) components such as Lectures (L) + Tutorials (T) + Practice (P).

These components are further elaborated for an effective teaching learning process;

- Lectures (L): Classroom lectures delivered by Faculty member in an interactive mode.
- Tutorials (T): Sessions that includes participatory discussions, presentations by the students, case study discussions etc.
- Practice (P): It includes LAB sessions for IT related courses & Business Communication and practice sessions for courses like Accounts, Mathematics, Statistics and field assignments etc.
  
- ONE Credit = 12 Hours ; In terms of a Semester of 15 (FIFTEEN) weeks,
  
- Every ONE hour session per week of Lecture (L) = 01 (one) credit per Semester
  
- TWO hour sessions per week of Tutorial (T) = 01(one) credit per Semester
  
- TWO hour sessions per week of Practice (P) = 01(one) credit per Semester
- a) Every **ONE** hour session per week of Lecture (L) = 01 (one) credit per Semester
  
- b) **TWO** hour sessions per week of Tutorial (T) = 01(one) credit per Semester
  
- c) **TWO** hour sessions per week of Practice (P) = 01(one) credit per Semester

## **X: Examination :**

### **1. A) Scheme of Examination:**

Courses having Internal Assessment (IA) / *Internal Examination(IE)* and University Examinations (UE) shall be evaluated by the respective institutes and the University at the term end for 50(fifty) and 50(fifty) Marks respectively. The total marks of IA and UE shall be 100 Marks and it will be converted to grade points and grades.

For courses having *only Internal Assessment (IA) / Internal Examination(IE)* the respective institutes will evaluate the students in various ways through *Class Test, Presentations, Field Assignments and Mini Projects* for a total of 100 marks during the term. Then the marks will be converted to grade points and grades.

*Open Courses shall be evaluated for 100 marks only (hundred marks only).*

**B) Components of continuous evaluation system (CES) :**

Following are the suggested components of CES,

- a) Case Study/ Caselet /Situation Analysis- (Group Activity or Individual Activity)
- b) Class Test
- c) Field Assignment
- d) Role play
- e) Industry Analysis (Group Activity or Individual Activity)
- f) Business plan
- g) Quiz
- h) Workbook / scrapbook
- i) Presentations
- j) Mini Research Projects

**Breakup of CES marks (50)**

Class Participation / Attendance	10
Mid-term	15
End-term	15
Class Tests, Assignments, MOOCs, Presentation / Mini-Project, Case Study/Lab work etc.	10

**2. Grading System for Programmes under Faculty of Management Studies:**

The Faculty of Management Studies, Bharati Vidyapeeth (Deemed to be University), Pune has suggested the use of a 10-point grading system for all programmes designed by its different Board of Studies.

The 10 point Grades and Grade Points according to the following table

Range of Marks (%)	Grade	Grade Point
80≤Marks≤100	O	10
70≤Marks≤80	A+	9
60≤Marks≤70	A	8
55≤Marks≤60	B+	7
50≤Marks≤55	B	6
40≤Marks≤50	C	5
Marks < 40	D	0

### Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

- If learner fails in IA, the learner passes in the course provided, he/she obtains a minimum 25% marks in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the learner passes at UE.
- A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA he/she has to reappear only at IA as backlog candidate and clear the Head of Passing to secure the GPA required for passing.
- The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 50% and 50% respectively.
- GPA is calculated by adding the UE marks out of 50 and IA marks out of 50. The total marks out of 100 are converted to grade point, which will be the GPA.

### Formula to calculate Grade Points (GP)

Suppose that 'Max' is the maximum marks assigned for an examination or evaluation, based on which GP will be computed. In order to determine the GP, Set  $x = \text{Max}/10$  (since we have adopted 10 point system). Then GP is calculated by the following formulas

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

Two kinds of performance indicators, namely the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all the courses since his/her enrollment. The CGPA of learner when he /she completes the program is the final result of the learner.

The SGPA is calculated by the formula

$$SGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where, C<sub>k</sub> is the Credit value assigned to a course and GP<sub>k</sub> is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the Semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

The CGPA is calculated by the following formula

$$CGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where, C<sub>k</sub> is the Credit value assigned to a course and GP<sub>k</sub> is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrollment and also during the semester for which CGPA is calculated. **The CGPA shall be calculated up to two decimal place accuracy.**

**The formula to compute equivalent percentage marks for specified CGPA:**

% marks (CGPA)	10 * CGPA-10	If 5.00 ≤ CGPA ≤ 6.00
	5 * CGPA+20	If 6.00 ≤ CGPA ≤ 8.00
	10 * CGPA-20	If 8.00 ≤ CGPA ≤ 9.00
	20 * CGPA-110	If 9.00 ≤ CGPA ≤ 9.50
	40 * CGPA-300	If 9.50 ≤ CGPA ≤ 10.00

### **Award of Honours:**

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed.

The criteria for the award of honors are given below.

<b>Range of CGPA</b>	<b>Final Grade</b>	<b>Performance Descriptor</b>	<b>Equivalent Range of Marks (%)</b>
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA below 5.0	F	Fail	Marks below 40

### **3. ATKT Rules:**

A student is allowed to carry any number of backlog papers of Semester I and Semester II while going into Semester III. However, a student must clear all papers of Semester I and Semester II so as to become eligible for appearing in Examinations at Semester IV.

### **XI: A. Dual Specialization:**

M.B.A (General) Programme 2020-21 offers Dual Specialization to the students in second year of MBA Programme. Under dual specialization students are required to select any **Two Specialization Groups** from the list given below :

#### **i) Prerequisite for offering a combination of Specialization Groups**

The Institute will offer the Specializations proposed only if minimum **Ten** students opt for the same.

#### **ii) Specialization Combinations:**

Two Specializations may be chosen from the following choices :

<b>Specialization Choices</b>
Marketing Management
Financial Management
Human Resource Management
Information Technology Management
International Business Management
Production & Operations Management
Agribusiness Management
Retail Management
Project Management

## **B. Summer Internship:**

At the end of Semester II, each student shall undertake Summer Internship in an Industry for 50 (**Fifty Days**). It is mandatory for the students to seek written approval from the Faculty Guide about the Topic and the Organization before commencing the Summer Internship.

During Summer Internship students are expected to take necessary guidance from the faculty guide allotted by the Institute. To do it effectively they should be in touch with their guide through e-mail or phone.

Summer Internship Project should be a research project or it may be an operational assignment that involves working by the students in an organization.

### ***In case of an operational assignment***

- 1) Students are expected to do a project work in an organization wherein they are doing Summer Internship.
- 2) The students should identify specific problems faced by the organization in a functional area in which the assignment is given.  
e.g.
  - a) Sales - sales targets are not achieved for a particular product or service in a given period of time.
  - b) Finance – mobilization & allocation of financial resources.
  - c) HR – Increase in employee turnover ratio.
- 3) In this study students should focus on
  - Identifying the reasons / factors responsible for the problems faced by the organization
  - Collection of data(Primary & Secondary) related to reasons /factors responsible for these problems
  - Data Analysis tools & interpretation
  - Findings & observations.
  - Suggestions (based on findings & observations) for improving the functioning of the organization.

The ***learning outcomes and the utility to the organization*** must be highlighted in Summer Internship Project Report.

- 4) General chapterization of the report shall be as under;
- 1) Introduction and Literature Review: - This chapter will give a reader the background of problem area, specific problem & how you come across it?
  - 2) Company profile: -
  - 3) Objectives of the study:-
  - 4) Data collection: -
  - 5) Data analysis & interpretation: -
  - 6) Findings & observations: -
  - 7) Suggestions:-

Annexure: -

- Questionnaire
- References.

5. Technical details:

1. The report shall be printed on A-4 size white bond paper.
2. 12 pt. Times New Roman font shall be used with 1.5 line spacing for typing the report.
3. 1” margin shall be left from all the sides.
4. Considering the environmental issues, students are encouraged to print on both sides of the paper.
5. The report shall be hard bound as per the standard format of the cover page given by the Institute and shall be golden embossed.
6. The report should include a Certificate (on company’s letter head) from the company duly signed by the competent authority with the stamp.
7. The report shall be signed by the respective guide(s) & the Director of the Institute 10 (Ten) days before the viva-voce examinations.
8. Student should prepare two hard bound copies of the Summer Internship Project Report and submit one copy in the institute. The other copy of the report is to be kept by the student for their record and future references.
9. In addition to this, students should prepare two soft copies of their SIP reports & submit one each in Training & Placement Department of the Institute & Library

The Summer Internship shall be assessed out 100 Marks. The break-up of these marks is as under;

Sr. No.	Assessment Criteria	Marks
1	Summer Internship Report	50 (Fifty only)
2	Viva- voce examination	50 (Fifty only)

<b>TOTAL MARKS</b>	<b>100</b>
--------------------	------------

The examiners' panel shall be approved as per the University Guidelines.

The viva –voce shall evaluate the project based on

- i. Actual work done by the student in the organization
- ii. Student's knowledge about the company & Business Environment
- iii. Learning outcomes for the student
- iv. Utility of the study to the organization

## Question Paper Pattern for University Examinations

The pattern of question paper for the courses having University Examinations will be as follows:

**Title of the Course**

**Day:** **Total Marks: 50**

**Date:** **Time: 02 Hours**

**Instructions:**

- a. Attempt any **THREE** questions from Section I and any **TWO** questions from **SECTION II**.
- b. All questions carry **EQUAL** marks.
- c. Answers to both the Sections should be written in the **SAME** answer book.

<b>SECTION – I</b>		<b>30 Marks</b>
<i>It should contain 05 questions covering the syllabus &amp; should test the conceptual knowledge of the students.</i>		
Question		Marks
Q.1	.....	(10 marks)
Q.2		(10 marks)
Q.3		(10 marks)
Q.4		(10 marks)
Q.5.	Write <b>Short Notes</b> on ANY TWO	(10 marks)
<b>SECTION – II</b>		<b>20 Marks</b>
<i>It should contain 03 questions covering the entire syllabus &amp; should be based on application of the Concepts</i>		
Q.6.		(10 marks)
Q.7.		(10 marks)
Q.8		(10 marks)

### **XII. Structure of the Syllabus**

The MBA Programme as per Semesters, Credits and Marks is as follows:

Semester	Credits	Marks Distribution
I	25	900
II	25	900
III	31	1000
IV	21	800
<b>Total</b>	<b>102</b>	<b>3600</b>

The detailed structure is as follows

### MBA – (General)- Semester I

Course Code	Semester – I	Credits	IE	UE	Total Marks
101	Management Concepts & Applications	3	50	50	100
102	Managerial Economics	3	50	50	100
103	Financial & Management Accounting	3	50	50	100
104	Organizational Behaviour	3	50	50	100
105	Statistical Techniques	3	50	50	100
106	Legal Aspects of Business	3	50	50	100
107	Business Communication	3	50	50	100
108	Data Analysis Using Advance - Excel	2	100	-	100
See below	Open 1	2	100	-	100
	<b>Total No. of Credits</b>	25	550	350	900

*Open Courses: Students can opt any one course from the following*

Course Code	Open Course
109	Computers Application for Business
110	Social Media Management
111	Current Affairs

**\*\* In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

### MBA - (General)- Semester II

Course Code	Semester II	Credits	IE	UE	Total Marks
201	Marketing Management	3	50	50	100
202	Financial Management	3	50	50	100
203	Human Resource Management	3	50	50	100
204	International Business	3	50	50	100
205	Production & Operations Management	3	50	50	100
206	Research Methodology	3	50	50	100
207	Business Environment	3	50	50	100
208	Business Ethics and Corporate Governance	2	100	-	100
See below	Open	2	100	-	100
	<b>Total No. Credits</b>	25	550	350	900

*Open Courses: Any one course from the following*

Course Code	Open course
209	Introduction to Business Analytics
210	E-commerce Applications
211	Managerial Skills for Effectiveness

**\*\* In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

### MBA -(General)- Semester III

Course Code	Semester – III	Credits	IE	UE	Total Marks
301	Strategic Management	3	50	50	100
302	Operations Research for Managers	3	50	50	100
303	Entrepreneurship Development and Innovation Management	3	50	50	100
See groups	Specialization I - E-(i)	3	50	50	100
	Specialization I - E-(ii)	3	50	50	100
See groups	Specialization II - E-(i)	3	50	50	100
	Specialization II - E-(ii)	3	50	50	100
304	**Summer Internship	6	50	50	100
305	Change Management	2	100	-	100
See below	Open	2	100	-	100
	<b>Total No. of Credits</b>	<b>31</b>	<b>600</b>	<b>400</b>	<b>1000</b>

*Open Courses: Students can opt any one course from the following*

Course Code	Open Course
306	Digital Marketing
307	Corporate Taxation
308	Negotiation Management

**\*\* In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

**MBA - (General) -Semester IV**

<b>Course Code</b>	<b>Semester IV</b>	<b>Credits</b>	<b>IE</b>	<b>UE</b>	<b>Total Marks</b>
401	Project Management	3	50	50	100
See groups	Specialization I - E-(iii)	3	50	50	100
	Specialization I - E-(iv)	3	50	50	100
See groups	Specialization II - E-(iii)	3	50	50	100
	Specialization II - E-(iv)	3	50	50	100
402	Environment & Disaster Management	2	100	-	100
403	E-Business Management	2	100	-	100
See below	Open	2	100	-	100
	<b>Total No. Credits</b>	21	550	250	800

*Open Courses: Any one course from the following*

<b>Course Code</b>	<b>Open course</b>
404	Introduction to Data Science
405	Artificial Intelligence for Managers
406	Rural Entrepreneurship

**\*\* In addition to the above ;Add on Course having 02 (TWO) credits may be offered by the Institute on Extra fees for the course from the student.**

## LIST OF SPECIALIZATION - ELECTIVES

### Elective: Marketing Management :

Sem III	
Code.	Name of the Course
MK01	Consumer Behaviour
MK02	Services Marketing
Sem IV	
MK03	Sales & Distribution Management & B2B
MK04	Integrated Marketing Communication

### Elective: Financial Management

Sem III	
Code.	Name of the Course

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	103	<i>Financial and Management Accounting</i>	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

#### Course Objectives :

- i) To acquaint the learners with the fundamentals of Financial Accounting.
- ii) To orient to the Accounting mechanics involved in preparation of Books of Accounts and Financial Statements of a sole proprietor
- iii) To make the students familiar with International Accounting Standards and International Financial Reporting Standards (IFRS)
- iv) To introduce the concepts of Cost and Management Accounting
- v) To orient the students about application of budgetary control as a technique of Management Accounting
- vi) To acquaint the students with application of Standard Costing and Marginal Costing as techniques of Management Accounting.

#### Learning Outcomes :

- I. Learners will able to know the fundamentals of Financial Accounting and Accounting Principles
- II. Learners will demonstrate the ability to prepare Financial Statements of a sole proprietor
- III. Learners will understand the utility and importance of International Accounting Standards and International Financial Reporting Standards (IFRS)
- IV. Learners will be familiar with concepts of Cost and management Accounting
- V. Learners will be able to apply the technique of Budgetary Control
- VI. Learners will be able to apply the technique of Standard Costing and Marginal Costing.

Name : -	Syllabus – Financial and Management Accounting	Hrs.
Unit No : 1	<b>Introduction to Financial Accounting</b> Financial Accounting: Definition, Objectives and Scope Accounting Concepts and Conventions, GAAP, Branches of Accounting Accounting Cycle, End Users of Financial Statements	7
Unit No : 2	<b>Accounting Mechanics</b> Principles of Double Entry Book-Keeping, Journal Ledger and Preparation of Trial Balance Preparation of Trading, Profit & Loss Account and Balance Sheet of a Sole Proprietor	11
Unit No : 3	<b>Introduction to International Accounting Standards</b> Development of international accounting Standards and financial reporting rules. Role of ICAI and Ministry of Corporate affairs in setting up Accounting Standards. Need and Advantages of International Financial Reporting Standards (IFRS) IFRS for Small and Medium Enterprises(SMEs).	5
Unit No : 4	<b>Introduction to Cost and Management Accounting</b> Cost Accounting: Meaning and Importance Classification of Costs, Preparation of Cost Sheet Management Accounting: Definition, Nature and Scope Distinction between Financial Accounting and Management Accounting	6
Unit No : 5	<b>Techniques of Management Accounting (Budgetary Control)</b>	8

	Meaning, Objectives, Advantages and Limitations of Budgetary Control Types of Budgets Preparation of Flexible Budget and Cash Budget	
Unit No : 6	<b>Techniques of Management Accounting (Standard Costing and Marginal Costing)</b> Meaning of Standard Costing, Steps to implement Standard Costing Variance Analysis of Material and Labour Costs Marginal Costing – Meaning of Marginal Cost, Characteristics and Advantages of Marginal Costing, Cost-Volume-Profit Analysis – Profit/Volume ratio, Break-Even Analysis and Margin of Safety	11

Course : MBA CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	105	Statistical Techniques	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

### Course Objectives:

- I. To introduce to the learner the importance of statistical techniques in business applications
- II. To familiarize with the basic concepts of statistical techniques.
- III. To expose to the Graphical representation of data.
- IV. To impart skills in computation and application of correlation and regression.
- V. To understand the basics of probability and testing of hypotheses

### Learning Outcomes:

After learning the concepts of Statistical Techniques, students will be able to have a

- I) Develop numerical ability to solve examples on various topics and specifically formation and Testing of Hypothesis
- II) Have clear understanding of various statistical tools and their applications in Business.
- III) Analyze the importance of Statistical Techniques in different functional areas of Management.
- IV) Apply Correlation and Regression Techniques in Business applications.
- V) To apply the statistical techniques to small data sets for analysis and interpretation

Name : -	Contents	Hrs.
Unit No : 1	<b>Introduction to Statistics:</b> Introduction to Statistics, Importance of Statistics in modern business environment. Scope and Applications of Statistics. Advantages and limitations of Statistics. Sources of data – Primary and secondary, Universe or Population, Sample, Concept of Sampling, Advantages of Sampling, Types of Sampling. Classification, Tabulation and Presentation of Data, Requisites of a good classification, Types of classification, Methods of classification, Tabulation - Frequency and Frequency Distribution, Diagrammatic and graphic representation of Data – Bar diagrams, Pie chart, Histogram, Frequency polygon, Frequency curve, Ogive curves	08
Unit No :2	<b>Measures of Central Tendency and Dispersion:</b> Statistical Averages - Arithmetic mean, Median and Mode, Positional averages - Quartiles, deciles and percentiles. Dispersion – Range - Quartile deviations, Mean deviation, Standard Deviation - Properties of standard deviation, Variance, Coefficient of Variation. Applications in business and management.	10
Unit No :3	<b>Correlation:</b> Correlation, Types of Correlation, Scatter diagram, Karl Pearson's correlation coefficient, Properties of Karl Pearson's correlation	08

	coefficient, Spearman's Rank Correlation Coefficient. Association of attributes.	
Unit No : 4	Regression - Regression analysis, Regression lines, Regression coefficients. Business application.	06
Unit No : 5	Elementary probability concepts, Probability Distributions- Binomial, Poisson and Normal Distribution	06
Unit no 6	Introduction to Testing of Hypothesis: Null and alternate hypothesis, Significance Level, type I and Type II error, Chi – Square Test.	08

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	108	Data Analysis Using advance -Excel	
Type	Credits	Evaluation	Marks
Open	2	CES	IE = 100

**Course Objectives:**

- i) To train the student for using the spreadsheet package MS-Excel for business applications.
- To impart skills of analyzing data and presenting it using MS-Excel.

**Learning Outcomes :**

Understand the different functions of MS Excel  
Use MS Excel for analysis of Data

Unit No.	Contents	Hrs.
1	<b>Introduction to Excel</b> MS excel screen elements – Tool bar, title bar, ribbon, formula bar, status bar. Moving around a Worksheet, entering and formatting (e.g. Number, Text, Date and Currency) data. Cell referencing (relative, absolute, mixed), using formulae, Use of Find, Replace, Goto.	5
2	<b>Working with Excel</b> Insert, delete - cells, rows, columns. Sorting (basic, custom), filtering, grouping, ungrouping data, dealing with subtotals and grand totals. Validating data, protecting cells. Create, manage, and format pivot tables and pivot charts.	5
3	<b>Conditional Formatting</b> Once defined, it will automatically change the formats as per conditions user inputs. Work with functions to manipulate strings of text and data	5
4	<b>Commonly used functions</b> Sum, Max, Min, Average, Count, Today, Now, Datedif, Countif, CountA, CountBlank, Round, Roundup, Round Down, ABS, Sign, Ceiling, Floor, Trim, Value, Clean, sqrt, if, sumif	5
5	<b>Data Viewing and Reviewing</b> Inserting comments, spell checks and changes to the worksheet data etc, Viewing data in different ways eg. Page break, normal etc	5
6	<b>Creating and managing charts</b> Create and modify graphs / charts like Column, Line, Pie, Bar, Area, Scatter, 3D etc. Working with multiple sheets, hyper linking Work with spark lines. Perform Look UP tables. Analysis Tool pack: Correlation, Regression	5

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
II	203	Human Resource Management	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives:	
i.	To explain the significance of HRM and changing role of HRM
ii.	To explain the process of HRP, Recruitment and Selection.
iii.	To discuss the concept of training and development
iv.	To illustrate the job evaluation and wage determination concepts.
v.	To bring out the role of HR in organization's effectiveness and employee performance
Learning Outcomes :	
i.	Understand and apply Human resource Management functions for effective management of organization.
ii.	Ability of designing job analysis and ability to understand various manpower forecasting techniques
iii.	Understand the techniques of recruitment, selection and interview and ability to conduct the recruitment process
iv.	Understand the training needs in the organization and ability to design suitable training plan
v.	Understand the components of wages and salary and factors affecting it.
vi.	Ability to analyze issues related to performance appraisal, career planning and rewards management.

Unit No.	Contents	Hrs.
1	<b>Introduction to HRM :</b> Definition, Nature and Scope of HRM, Evolution of HRM, Challenges of HRM, HR Profession and HR Department, Functions of HRM, Global perspective of HRM	06
2	<b>Human Resource Planning:</b> HRP, Demand and Supply forecasting, factors Affecting HRP, Job analysis and Job Design, Recruitment and Selection – Recruitment Process, Sources and Methods of Recruitment, Steps in selection.	08
3	<b>Training and Development:</b> Need and Importance of Training and Development, Training Need Analysis and techniques, Design Training Programme, Methods of training, Training evaluation, Executive Development, Concept of Career Development	09
4	<b>Wages and salary Management</b> Job Evaluation-Process and methods. Wage Determination, Types of Wages, Salary Structure, Fringe benefits, Executive Compensation, Understanding Stock Options and designing incentive plans	10
5	<b>Performance Appraisal:</b> Need and Importance of Performance Appraisal ,Performance Appraisal Process, Methods of Performance Appraisal	07

<b>6</b>	<b>Overview of Employee Relations Management-</b> Meaning and importance of Employee Relations Management, Employee Relation Management Tools, Issues in Employee Relation Management, People Analytics	05

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
II	204	International Business	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

#### Course Objectives:

- vii) To prepare the students thoroughly with the domain knowledge and global issues of International business.
- viii) To discuss the reason of entering into International business through various trade theories propounded by economist and practical aspects.
- ix) To demonstrate through trade data analytics as to what to export and where to export from India.
- x) To discuss the role and functions of International organizations and trade organisation that is IMF, World Bank and WTO.
- xi) To familiarize the students with the key trade blocks such as NAFTA, EU etc.
- xii) To demonstrate the role of exchange rates in global markets.

#### Learning Outcomes :

- V) To enable the students to take decisions related to global issues and policies.
- VI) To be able to Interpret Foreign trade policy and avail incentives offered under various schemes.
- VII) To analyze the trade data for decision making as to what to export and where to export.
- VIII) To recall the role and functions of Global Institutions IMF, WTO and World Bank.
- IX) To acquaint with the trade blocks SAARC, NAFTA, EU etc.
- X) To comprehend the exchange rates practically and its implications on trade.

Unit No.	Contents	Hrs.
1	Introduction of International Business and Entry Strategies- Definition of International Business, Nature and Scope of International Business, Domestic Trade versus International Trade, Forms of Countertrade. Market Entry Strategies – Exporting, Importing, Joint venture, Franchising, Merger and acquisition.	06

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
II	205	Production and Operations Management	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives :	
i)	To understand fundamentalsofProduction and Operations Management.
ii)	To develop an understanding of the strategic importance of Production and Operations Management.
iii)	To understand Production System.
iv)	To learn EOQ concept.
v)	ToacquaintthestudentswithconceptsofallthefunctionsundertheManufacturingactivitiesby introducingtheUnits Maintenance Management,SCM,JIT,QAand ISOCertificationetc.
Learning Outcomes :	
After learning the concepts of Production and Operations Management, students will-	
I) Understand various concepts of Production and Operations Management.	
II) Analyze the importance of Production and Operations Management and compare various issues particular to manufacturing industry.	
III) Classify various Production Systems.	
IV)Develop numerical ability to solve examples on EOQ.	
V) Describe the advantages of Maintenance Management, SCM, JIT, QA and ISO Certification.	

Unit No.	Conents	Hrs.
1	<b>Introduction to POM</b> Nature, Scope, Importance and Functions of POM, Production Process, Difference between Production and Service operations, Responsibilities of Production Manager, Production process selection decisions, Production System, Classification of Production System.	7
2	<b>Production Planning Control</b> Objectives of PPC & it's various functions of common and optional nature, Co-ordination of PPC with other departments. Job sequencing, Assembly Line Balancing.	6
3	<b>Plant Location and Layout</b> Plant Location: Meaning, Need for selecting a suitable Location, Factors affecting Plant Location Decision, Plant Layout: objectives, types of Plant Layout.	8
4	<b>Maintenance Management</b> Concepts, Need of maintenance, Objectives & types of maintenance.	6
5	<b>Inventory management</b> Concept, Importance, Classification of Inventory System, EOQ Model with numerical, Basic concept of Material Requirement Planning(MRP).	8
6	<b>Emerging Trends in POM</b> Supply Chain Management(SCM),Just in Time (JIT),QualityControl,QualityAssurance(QA),ISOCertification,Enterprise Resource Planning(ERP), Total Quality Management(TQM),TPM, Quality Circles, Services Operations	10

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
II	206	Research Methodology	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives:	
i)	To introduce the role of research in business and management
ii)	To introduce the concepts of scientific research and methods of conducting scientific enquiry
iii)	To identify various sources of information for literature review and data collection.
iv)	To familiarize the learners with the key concepts in sampling techniques and instruments for data collection
v)	To develop basic understanding of conducting surveys and reporting the research
vi)	To educate on the ethical issues in conducting applied research.
Learning Outcomes :	
At the end of the course the learner will	
I)	Develop understanding on different applications of research for managerial decision making
II)	Explain key research and summarize the research articles and research reports
III)	Have basic awareness of data analysis-and hypothesis testing procedures
IV)	Design questionnaires and administer simple survey based projects.
V)	Describe sampling methods, measurement scales and instruments, and appropriate uses of each
VI)	Explain the rationale for research ethics

Unit No.	Contents	Hrs.
1	<b>Introduction to Research Methodology</b> Meaning, definition and objectives of research, motivations for research, type of research, Importance of research in managerial decision making , research in Research in functional / business areas. Qualities of a good researcher.	06
2	<b>Research process:</b> Steps in research process, Defining the research problem, Problem formulation and statement, Framing of hypothesis Research design: Meaning, characteristics, advantages and importance of research design. Measurement – types and errors in measurement. Development and designing of tools of data collection – Attitude measurement scales, Levels of measurement and questions of validity and reliability Designing of research projects – research proposal, Pilot surveys	08

3	<p><b>Sampling and Data Collection:</b>  Census and sample survey. Need and importance of sampling, probability and non-probability sampling technique.  Data collection – Primary and secondary sources of data, methods of collecting primary data - interview, observation, questionnaires, schedules through enumerators, surveys. Advantages and Limitations of different methods of data collection. Use of secondary data, precautions while using secondary data.</p>	08
4	<p><b>Processing and Analysis of Data</b>  Meaning, importance and steps involved in processing of data. Use of statistical tools and techniques for analysis of data.  Testing of Hypotheses, Basic concepts, importance of hypothesis. Procedure of testing of hypothesis. Chi-square test – Problems on Basic application of chi square test.  Analysis and Interpretation of data – Interpretations of results, Concept of Univariate, Bi-variate and multivariate analysis of data</p>	10
5	<p><b>Reporting of research :</b>  Importance of research reports, types of reports, Format of a research report, Precautions in writing a research report.. Plagiarism and its types.  References and Bibliography. Dissemination of research results. Ethical issues in conducting research.</p>	08
6	<p><b>Role of ICT in research</b>  Information and Computer Technology(ICT), Important characteristics, Computer Applications for research, Use of Statistical Software Packages for research</p>	06

Pedagogy- Teaching methods include readings, lectures, group discussions, exercises, and assignments and Mini Projects..

Evaluation: Assignments Presentation , Mini-project/End-Term Paper

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
II	209	Introduction to Business Analytics	
Type	Credits	Evaluation	Marks
Open	2	CES	IE = 100

**Subject / Course Objectives :**

- i) To gain an understanding of how managers use business analytics to formulate and solve business problems and to support managerial decision making.
- ii) To become familiar with the processes needed to develop, report, and analyze business data

**Learning Outcomes :**

After successful completion of this course the learner will be able to :

- i) Make sound managerial decisions aimed at furthering the business interests of the company.
- ii) Identify, analyze and understand the problems faced by the company.
- iii) Provide concrete solution to the identified business problems.

Unit No.	Contents	Hrs.
1	Introduction, What is Business Analytics, Overview of Areas where Business Analytics is applied	02
2	Visualization and Data Issues, organization of Source of Data, Importance of Data Quality, Dealing with Missing or incomplete data, data classification,	04
3	Data Mining: Introduction to Data Mining- classification, basic concepts, Data mining process, data mining tools XL MINER.	06
4	Applications of Business Analytics - Risk - Fraud Detection and Prediction, Recovery Management, Loss Risk Forecasting, Risk Profiling, Portfolio Stress Testing, Market share estimation and Sensitivity Analysis	06
5	Tableau: Extracting data into Tableau, data preparations, dimensions, transformation of variables, creating views , working with charts, exporting visualizations	07
6	CAPSTONE: A multifaceted assignment on any one of the following: Recruitment Analytics, Compensation Analytics, Talent Analytics, Training Analytics, Human Resource Retention Analytics, Workforce Analytics	05

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
II	210	E-commerce Application	
Type	Credits	Evaluation	Marks
Open	2	CES	IE = 100

**Course Objectives:**

- i) To enable basic concepts about E-commerce.
- ii) To study knowledge of business models
- iii) To learn need of e-commerce security.
- iv) To enable knowledge about E-payment system.
- v) To know the e-commerce Applications.
- vi) To have an overview of M-commerce.

**Course Objectives:**

- i) Basic concepts about E-commerce will be studied.
- ii) Knowledge of business models will be used.
- iii) Students will implement e-commerce security.
- iv) Better usage will be down with help of E-payment system.
- v) Where e-commerce Applications are used.
- vi) Use of M-commerce technology.

**Subject / Course Objectives :**

- i) To enable basic concepts about E-commerce.
- ii) To study knowledge of business models
- iii) To learn need of e-commerce security.
- iv) To enable knowledge about E-payment system.
- v) To know the e-commerce Applications.
- vi) To have an overview of M-commerce.

**Learning Outcomes :**

- i) Basic concepts about E-commerce will be studied.
- ii) Knowledge of business models will be used.
- iii) Students will implement e-commerce security.
- iv) Better usage will be down with help of E-payment system.
- v) Where e-commerce Applications are used.
- vi) Use of M-commerce technology.

Name : -	Syllabus – <i>E-commerce Application</i>	Hrs.
Unit No : 1	<b>Introduction to E-Commerce</b> Brief history of e-commerce, definitions of e-commerce, technical components and their functions, e-commerce versus traditional business, requirements of e-commerce. Advantages and disadvantages of e-commerce, Value chain in e-commerce, current status of e-commerce in India.	5
Unit No : 2	<b>Business Models for e-commerce</b> Types of business models (B2B, B2C, C2B,C2C) with examples. EDI – Requirement of EDI, types of EDI, advantages and disadvantages of EDI.	5
Unit No : 3	<b>Types of ISP</b> ISP, Types of ISP, Choosing an ISP, domain name, domain name types, how to register domain name.	5
Unit No : 4	<b>E-commerce Payment System</b> Overview of Electronic payment technology, limitations of the traditional payment system, requirements of e-payment system. B2B Electronic Payments, Third-Party Payment Processing, Electronic Payment Gateway Electronic or digital cash, properties of digital cash, how it works. Online credit cardpayment system, smart card.	5
Unit No : 5	<b>E-Commerce Applications</b> E-Commerce and banking, e-commerce and retailing, e-commerce and onlinepublishing, online marketing, e-advertising, e-branding.	5
Unit No : 6	<b>Mobile Commerce</b> Overview of M-Commerce - Wireless Application Protocol(WAP), Generations of Mobile Wireless Technology, Components of Mobile Commerce, Networking Standards for Mobiles Examples of M-Commerce, Current Status of M-Commerce in India, M-commerce applications, Mobile information Services, Mobile banking and trading.	5

# **MBA SEM III**

## **Core Courses**

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
III	301	Strategic Management	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives:

<p>Subject / Course Objectives :</p> <ul style="list-style-type: none"> <li>To provide a framework of strategic management</li> <li>To sensitize students about internal and external environments and enable them to integrate and practice strategic management skills</li> </ul>		
<p>Learning Outcomes :</p> <p>Having successfully completed this module, you will be able to demonstrate knowledge and understanding of:</p> <p>I) the key dimensions of strategic management – Analysis, Evaluation, Choice &amp; Implementation</p> <p>II) organizations’ ability to implement chosen strategies and identify the areas requiring change</p> <p>III) develop skills in generating alternative solutions to complex problem areas, underpinning each with a supportive and well researched rationale in order to achieve critical success</p> <p>IV) obtain, analyse and apply information from a variety of sources in the public domain</p>		
Units	Syllabus – <i>Strategic Management</i>	Hrs.
Unit No : 1	Introduction to Strategic Management: Concept, Definition, nature, scope, significance, Levels at which strategy operates , Process, Strategic Intent: Vision, Mission, Business Purpose, Objectives and Goals	10
Unit No : 2	External and Internal Resource Analysis External Business Environment –SWOT Analysis. Industry Analysis-Porters Five Force Model. Resource Based View – Resources – Capabilities – Competencies – Competitive Advantage, Value Chain Analysis. Strategic Analysis and Choice : BCG Matrix, Ansoff Matrix, GE 9 Cell Matrix, Business portfolio Analysis	10
Unit No : 3	Strategy Formulation Generic Strategies - Low Cost – Differentiation – Focus. Corporate Level Strategy – Stability –Expansion–Retrenchment – Combination.	10

	Functional level Strategy: H.R. Strategies, Marketing Strategies, Financial Strategies, Operational Strategies	
Unit No : 4	Implementation of Strategy Issues in implementation of strategy; Strategy Structure relationship; Implementing changes in structure; Restructuring and Re-Engineering; Resource Allocation; Behavioral issues in strategy implementation - organizational culture and change; McKinsey's 7s framework	10
Unit No : 5	Strategic Control Purpose and components of Strategic Control. Evaluation techniques. Control process and system.	10
Unit No : 6	Contemporary Strategic management Business model innovation - Disruptive Innovation, Blue Ocean Strategy. Global issues in strategic management – the global challenges, strategies for competing in global markets.	10

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
III	302	Operations Research for Managers	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

Course Objectives:

Subject / Course Objectives :

- i) To introduce students to use quantitative methods and techniques for effective decisions–making.
- ii) To familiarize the students with the quantitative techniques for data analysis
- iii) To formulate, analyze, and solve mathematical models that represent real-world problems.

Learning Outcomes : After completion of this course, students will

- I) Understand Operations Research Concepts.
- II) Know the importance of Operations Research tools and techniques.

Units: -	Syllabus – Operations Research for Managers	Hrs.
Unit No : 1	Introduction to Operations Research: Introduction, Historical background, Meaning, Significance, Scope and Limitations of O.R. Features of Operations Research, Phases of Operations Research. Applications of O.R. in Business and Management.	10
Unit No : 2	Linear Programming Problem (L.P.P.): Definition and Components of LPP, Formulation of LPP, Solution of LPP by Graphical Method, Examples on maximization and minimization, Examples on mixed constraints, Special cases in LPP: Alternative or multiple optimal solutions	10
Unit No : 3	Transportation problems (T.P.): Introduction and Formulation of TP, Initial Basic Feasible Solution I.B.F.S. by North West Corner Rule (NWCR), Matrix Minimum Method, Vogel’s Approximation Method (VAM), Checking Optimality by Modified Distribution Method (MODI Method), Special cases in TP: maximization, unbalanced TP, restricted TP, applications of T.P. in business.	10
Unit No : 4	Assignment Problems (A.P.): Meaning, definition of AP, Hungarian Method of solving AP, Assignment Problem for Maximization, minimization. unbalanced AP, restricted AP, Multiple /Optimal Solutions, applications of A.P. in business.	10
Unit No : 5	Simulation: Introduction to Simulation, Types of Simulation, steps of simulation process, Monte Carlo technique, business applications and	10

	limitations.	
Unit No : 6	Network Analysis by PERT and CPM: Introduction to Networks, Basic differences between PERT and CPM, Network models – PERT/CPM network components and precedence relationships. Critical Path Analysis, forward pass computation for earliest event time, backward pass computation for latest allowable event time, Program Evaluation and Review Technique (PERT). Determination of PERT times.	10

Course : MBA (HR) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
I	HR01	Human Resource Planning and Development	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

### Course Objectives:

Subject / Course Objectives :		
<ul style="list-style-type: none"> <li>i) Understanding the process of Human resource planning</li> <li>ii) Appraise the techniques of HR planning</li> <li>iii) Formulating the HR procurement and deployment</li> <li>iv) Understanding the role of training and executive development</li> <li>v) comparing and applying various methods of training</li> <li>vi) Determining the training designs and evaluation</li> </ul>		
Learning Outcomes :		
<ul style="list-style-type: none"> <li>i) Describe the process of human resource planning</li> <li>ii) applying the techniques for human resource planning</li> <li>iii) Identify the human resource procurement and deployment</li> <li>iv) IV) Explain the role of training and development</li> <li>v) distinguish different methods of training and their applications</li> <li>vi) assess the design and outcome of training</li> </ul>		
Units: -	Syllabus : <i>Human Resource Planning and Development</i>	Hrs.
Unit No : 1	Concept of Human Resource Planning ; Objectives ; Need and Importance ; Process ; Levels ; problems in HR planning and Factors influencing Human Resource Planning	10
Unit No : 2	Human Resource Demand & Supply forecasting tools and techniques – Managerial Judgment ; Work-study methods ; ratio-trend analysis ; work-force analysis; work-load analysis ; job analysis ; Staffing table ; markov analysis; skill inventory ; replacement chart ; labour supply ; cohort analysis ; scenario analysis	10
Unit No : 3	Recruitment plan ; career planning ; succession planning; redeployment planning; redundancy plan – retaining, retrenchment, VRS; Job-design	10
Unit No : 4	Concept of training, terms - education Knowledge, Skills, attitudes, need of training, importance, objectives of training, ADDIE model, Principles of training; concept of executive development: Objectives, importance, process of executive development	10
Unit No : 5	Training needs analysis (TNA): Meaning and purpose of TNA, TNA at different levels, Process of TNA, output of TNA, Training and Development methods : On-the-Job & Off-the-job, job instructions training, apprenticeship, internship, demonstrations, self-directed learning, coaching, job rotation, project assignment, simulation methods, lectures, case studies, group discussion, conferences, role playing,	10

	management games, in basket exercise, sensitivity training, vestibule training, e-training.	
Unit No : 6	Designing training programme – considerations in designing effective training programs selection of trainers, training material & aids, use of technology in training Evaluation of training – Need for evaluating training, Kirkpatrick evaluation criteria – reactions, learning, behavior, results, ROI, Cost-benefits analysis	10

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
III	IT01	System Analysis and Design	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	IE:UE:50:50

### Course Objectives:

#### Subject / Course Objectives :

- i) Explain what systems are and how they are developed.
- ii) Identify and describe the phases of the systems development life cycle.
- iii) Follow the analysis portion of the Systems Development Life Cycle in a disciplined manner.
- iv) Develop and evaluate system requirements.
- v) Work effectively in a team environment.
- vi) Describe the role and responsibilities of the systems analyst in the development and management of systems.

#### Learning Outcomes :

- i) Explain the need for and value of a formalized step-by-step approach to the analysis, design, and implementation of computer information systems.
- ii) Use tools and techniques for process and data modeling.
- iii) Describe the role and responsibilities of the participants in information systems<sup>o</sup> development.
- iv) Develop a feasibility analysis of a proposed system.
- v) Develop and deliver a Requirements Definition Proposal for a new system in a well-structured business proposal.
- vi) Explain the common ways projects fail and how to avoid these failures.
- vii) Implement various project management tools.

Units: -	Syllabus – System Analysis and Design	Hrs.
Unit No : 1	Introduction to system concepts: Introduction to System, characteristic, elements of system, types of system, categories of information system	10
Unit No : 2	General phases of system development life cycle: SDLC, waterfall model, prototyping model, spiral model and 4GT, system analysis	10
Unit No : 3	3 Requirement and Structured Analysis: Feasibility Study, Fact-finding techniques, Decision Tree and Decision Table Pseudocode, Structured English, DFD	10
Unit No : 4	Database Design and Documentation Techniques: ERD, System Flow Charts; Functional Decomposition Diagram; Structured Flow-Charts.	10
Unit No : 5	User Interface Design: Interface Design Dialogue, Strategies, Screen Management	10
Unit No : 6	Practical and case studies	10

Student has to upgrade Knowledge by using below inputs:

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
III	IT02	Information System Security & Audit	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

Course Objectives:

Subject / Course Objectives :		
<ul style="list-style-type: none"> <li>xx) Describe the general framework for IT risks and control.</li> <li>xxi) Identify the unique elements of computer environment and discuss how they affect the audit process.</li> <li>xxii) Describe the security aspect and audit issues related to computer security.</li> <li>xxiii) To enable the students to grasp knowledge of Auditing along with exposure to modern business information systems.</li> <li>xxiv) Understand the audit objectives and procedures used to test data management controls.</li> <li>xxv) Discuss the stages in the SDLC</li> </ul>		
Learning Outcomes :		
<ul style="list-style-type: none"> <li>I) Understand the difference between Security Metrics and Audits.</li> <li>II) Knowledge on Vulnerability Management</li> <li>III) Know the Information Security Audit Tasks, Reports and Post Auditing Actions</li> <li>IV) Understand Information Security Assessments</li> <li>V) Examine the multiple layers of IS security in organizations.</li> <li>VI) Analyze the risk management approach to information assets' security with respect to operational and organizational goals.</li> <li>VII) Evaluate physical and logical security controls, and the automated approaches in IS security.</li> </ul>		
Units: -	Syllabus – <i>Information System Security &amp; Audit</i>	Hrs.
Unit No : 1	What is Information Systems (IS) Auditing? ,Need for control and audit of computers, Effects of computers on internal controls, Effects of computers on auditing, Foundations of Information Systems Auditing, Organizational Responsibilities( Executive management, Auditors, IT and Information security and General users) Information system control techniques, categories of internal control, organizational controls, data processing environmental control, Business continuity planning control, user control, boundary control, input control, control over data integrity and security, logical access controls and issues , preventative, detective, deterrent, corrective, recovery, Administrative, Technical, Physical Types of audit procedures, Overview of steps in an audit, Auditing around or	10

	through the computer	
Unit No : 2	Meaning of Risk, Business risk, audit risk, security risk, and continuity risk. SEI risk statement (two things needed to express risk clearly) Components of risk: threat, vulnerability, exposure, impact, consequence Risk response options: manage, reduce, transfer, ignore, monitor Threat classes: natural, accidental and unintentional, intentional, political unrest, Threat agents, threat agent motives, Four basic steps to a risk assessment.	10
Unit No : 3	Information security programs- Relative importance of people, policy, and technology, Legal, Ethical and Professional Issues in Information Security Program foundation: policy, education, ownership, defined responsibilities Role of risk management in information security programs Information Security Management- Supporting role and purpose of: policy, training, culture, baselines, system acquisition and development, change management, configuration management, monitoring, personnel policies, assessments, metrics, and evaluation Incident response and basic steps: identification, containment, collection, recovery, analysis Cyber frauds, cyber attacks, impact of cyber frauds on enterprise, techniques to commit cyber frauds	10
Unit No : 4	Software / System Development Life Cycle- Four basic steps in SDLC: analysis, development, testing, implementation General sense for SDLC risks , Differences between pre- and postimplementation audits Pre-implementation and Post-implementation: approaches, role of auditor, advantages, disadvantages ( in both phases)	10
Unit No : 5	5 Evidence Collection- Audit software, Code review, test data, and code comparison, Concurrent auditing techniques, Interview, questionnaires, and control flowcharts, Performance measurement tools. Evaluating Asset Safeguarding and Data Integrity Introduction, measures of asset safeguarding and data integrity, Nature of the global evaluation decision, Determinants of judgment performance, Audit technology to assist the evaluation decision, Cost-effectiveness considerations, Overview of the efficiency evaluation process, Performance indices, Workload models, System models, combining workload and system models, Overview of the effectiveness evaluation process, A model of Information System effectiveness, Evaluating system quality, Evaluating information quality, Evaluating perceived usefulness, Evaluating perceived ease of use, Evaluating computer self-efficacy, Evaluating Information System use, Evaluating individual impact, Evaluating Information System satisfaction, Evaluating organizational impact	10
Unit No : 6	6 Audit planning - Scope, objectives, Audits vs. assessments Need for business continuity management, Business Continuity policy and Planning, objectives Goals, plan, implementation, testing, Types of Back up, Disaster recovery plan, Audit of BCP and DRP New trends- cloud computing, security issues, mobile computing, BYOD(bring your own device) threats of BYOD, web 2.0, social media and network – social network threats , Green IT security service and challenges	10

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
III	IB01	<i>Regulatory Aspects of International Business</i>	
Type	Credits	Evaluation	Marks
Core elective	3	CES	UE:IE = 50:50

Course Objectives:

Subject / Course Objectives :		
<ul style="list-style-type: none"> <li>• To enable the student to understand the international business transactions and legal compliances related to the smooth conduct of business.</li> <li>• To give background of legal framework of Cross border trade.</li> <li>• To make students aware of Regulatory framework and also keep abreast with latest cross border trade regulations</li> </ul>		
Learning Outcomes :		
<ul style="list-style-type: none"> <li>▪ The course will help students to understand the scenario of world trade and how regulations help the smooth conduct of trade processes.</li> <li>▪ The course will help students to know the various legal compliances and documentations in the cross border trade.</li> </ul>		
Units: -	Syllabus – <i>Regulatory Aspects of International Business</i>	Hrs.
Unit No : 1	International Business transactions – Nature of cross border trade, Need to govern the cross border trade, International Law, choice of Law, conflict of Laws, Legal & Regulatory aspects	10
Unit No : 2	Framework of Statutes that govern cross border trade, Statutes framed by country of origin of transaction & International Guidelines	10
Unit No : 3	Regulation of International Banking, High Financial gearing, BCCI International affair, Bank for International Settlement	10
Unit No : 4	Regulation of Monetary System, Period between wars, Breton Woods, Euro, Smithsonian Agreement, Snake in Tunnel, Plaza & Louvre Accord, Regulatory Arbitrage, Labuan Model, Currency Board	10
Unit No : 5	Indian scenario – Process of Regulation & Deregulation ,Exchange Control Manual, An Introduction to FEMA, FEDAI Role & Rules , UCPDC – ICC Publication URC – ICC Publication Important clauses & interpretation ,Customs & Baggage Rules – Sale of Goods Act, INCOTERMS	10
Unit No : 6	International Debt Crises, Herstst Bank Crisis, Asian & other crises, Sovereign Risk – State Immunity Act, International Accounting Standards, Trade related Intellectual Property Rights, World Transfer Pricing	10

Semester	Course Code	Course Title	
III	IB02	<i>Export Import Policies Procedures and Documentation</i>	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

### Course Objectives:

Subject / Course Objectives :		
<ul style="list-style-type: none"> <li>To make students aware about the cross border trade procedures and practices in International Logistics</li> </ul>		
Learning Outcomes :		
<ul style="list-style-type: none"> <li>The course will provide a clarity on the Import-Export cycle.</li> <li>The course will help students to know the various compliances and documentations in the Import Export Process</li> <li>The course will help students to know the logistic process and various agencies involved the export –import process.</li> </ul>		
Units: -	Syllabus – <i>Export Import Policies Procedures and Documentation</i>	Hrs.
Unit No : 1	International Business – Nature & Scope, Framework of International Business, Meaning of Export/ Deemed Export/ Import	10
Unit No : 2	World’s Foreign Trade Scenario and Trade Composition, India’s Foreign Trade, Important Statutes/Acts/Policies for International Trade, Export Procedure step by step from registration to final shipment and post shipment.	10
Unit No : 3	Documentation in Export/ Import required for Sales Contract, Shipment, Custom Clearance, Banks, Insurance and Transport etc.	10
Unit No : 4	Cross Border Payment Settlement Procedure with Advanced Payment Method, Open Account Method, Documentary Credit, Documentary Collection and Consignment Trading	10
Unit No : 5	International Trade Logistics – Meaning, Objective, International Logistic Agencies in India and outside India, their functions.	10
Unit No : 6	Warehousing, Ports in India, Port Efficiency and Productivity, Freight Forwarder, Custom House Agent, Multimodal Transport Operator,	10

	<p>Containerization – Types and Dimensions, Linear Shipping Services</p> <p><u>Project</u> –Students are supposed to select a product for export with the help of Product and Market selection techniques and need to explain each step involved in the export process from the registration stage to post shipment stage.</p>

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
III	AM01	Rural Marketing	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

Course Objectives:

Subject / Course Objectives :		
i) To sensitize the students towards the Agriculture and Rural Marketing environment so as to help them in understanding the emerging challenges in the Global Economic Environment ii) To familiarize the students with the basic concepts of Rural Marketing, iii) To make the students aware of nature of the Rural Consumer iv) To give insights of marketing of agricultural inputs and produce.		
Learning Outcomes :		
I) Understand the importance of Rural Markets II) Sensitize to the needs and behavior of consumers and channels III) Utilize the understanding on peculiarities of rural markets, channels and competition in marketing decision making IV) Understand the Rural Market Segmentation and Rural Products V) Expose the students to Rural Market Distribution and services		
Units: -	Syllabus – <i>Rural Marketing</i>	Hrs.
Unit No : 1	Rural marketing management perspectives, challenges to Indian marketer. Rural – urban disparities, policy interventions required rural face to reforms, towards cyber India	10
Unit No : 2	Rural marketing – concept, scope, nature, taxonomy attractiveness. Urban vs. rural marketing. Rural consumer behavior – buyer characteristics, decision process, and behavior patterns, evaluation procedure, brand loyalty, innovation adoption.	10
Unit No : 3	3 Information system for rural marketing – concepts, significance, internal reporting system, marketing research system, decision support system. Selecting and attracting markets – concepts and process, segmentation, degrees, bases, and guides to effective segmentation, targeting and positioning	10
Unit No : 4	Product strategy for rural markets. Concept and significance. Product mix and product item decisions. Competitive product strategies. Pricing strategy in rural marketing: Concept, Significance, Objectives, Policy and strategy.	10
Unit No : 5	Promotion towards rural audience, exploring media, profiling target audience, designing right promotion strategy and campaigns. Rural distribution – channels, old setup, new players, new approaches, coverage strategy	10

Unit No : 6	Cases related to the topics covered under earlier units.	10

III	AM02	<i>Supply Chain Management in Agribusiness</i>	
Type	Credits	Evaluation	Marks
Core elective	3	CES	UE:IE = 50:50

Course Objectives:

Subject / Course Objectives :		
I) Understand the principles of supply chain management and its importance in business management.		
II) Know the emerging practices, challenges and trends in supply chains.		
III) Understand the Supply Chain Strategy		
IV) Understand the Logistics Management in Supply Chains		
V) Understand the Information Technology for Supply Chain Management		
Learning Outcomes :		
I) Understand the principles of supply chain management and its importance in business management.		
II) Know the emerging practices, challenges and trends in supply chains.		
III) Understand the Supply Chain Strategy		
IV) Understand the Logistics Management in Supply Chains		
V) Understand the Information Technology for Supply Chain Management		
Units: -	<i>Syllabus Supply Chain Management in Agribusiness</i>	Hrs.
Unit No : 1	Supply Chain: Changing Business Environment; SCM: Present Need; Conceptual Model of Supply Chain Management; Evolution of SCM; SCM Approach; Traditional Agri. Supply Chain Management Approach; Modern Supply Chain Management Approach; Elements in SCM.	10
Unit No : 2	Demand Management in Supply Chain: Types of Demand, Demand Planning and Forecasting; Operations Management in Supply Chain, Basic Principles of Manufacturing Management.	10
Unit No : 3	Procurement Management in Agri. Supply chain: Purchasing Cycle, Types of Purchases, Contract/Corporate Farming, Classification of Purchases Goods or Services, Traditional Inventory Management, Material Requirements Planning, Just in Time (JIT), Vendor Managed	10

	Inventory.	
Unit No : 4	Logistics Management: History and Evolution of Logistics; Elements of Logistics; Management; Distribution Management, Distribution Strategies; Pool Distribution; 28 Transportation Management; Fleet Management; Service Innovation; Warehousing; Packaging for Logistics, Third-Party Logistics (TPL/3PL); GPS Technology.	10
Unit No : 5	Concept of Information Technology: IT Application in SCM; Advanced Planning and Scheduling; SCM in Electronic Business; Role of Knowledge in SCM; Performance Measurement and Controls in Agri. Supply Chain Management- Benchmarking: introduction, concept and forms of Benchmarking.	10
Unit No : 6	Food supply chain Networks, The advantages for supply chain members, Components of an Agri supply chain, Agri marketing and emergence of coordinated supply chains in India, Coordinated supply chains, Supply Chain Management in Horticulture, Value chain – Some Horticulture crops,	10

Semester	Course Code	Course Title	
III	R01	Introduction to Retailing	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

Course Objectives:

Subject / Course Objectives :		
i) To familiarize the students with evolution and growth of Retailing, expectations of customers and		
ii) To study the importance of retailing in the current business scenario.		
Learning Outcomes :		
I) Enable the students to gain knowledge on concepts, formats and managerial practices of retailing		
II) Enable the students to gain skills on analysis and decision making in retailing management		
III) Understand to the Product Categories, Types and Formats		
IV) Understand to the Retail Strategy		
V) Understand to the Store Operation and Services		
Units: -	Syllabus – <i>Introduction to Retailing</i>	Hrs.
Unit No : 1	Retailing- Meaning, Nature, Classification, Growing Importance of Retailing, Factors Influencing Retailing, Functions of Retailing, Retail as a career.	10
Unit No : 2	Developing and applying Retail Strategy, Strategic Retail Planning Process, Retail Organization,	10
Unit No : 3	The changing Structure of retail, Classification of Retail Units, Retail Formats: Corporate chains, Retailer Corporative and Voluntary system, Departmental Stores, Discount Stores, Super Markets, Warehouse Clubs.	10
Unit No : 4	4 Varsity of Merchandising Mix, Retail Models and Theory of Retail Development, Business Models in Retail, Concept of Life cycle Retail.	10
Unit No : 5	Emergence of Organized Retailing, Traditional and Modern retail Formats in India, Retailing in rural India, Environment and Legislation For Retailing, FDI in Retailing	10
Unit No : 6	Case Studies in Retail Management	10

Elective - Project Management: Course - Project Risk Management.

Course: MBA (General) CBCS 2020 – w.e.f. - Year 2021– 2022			
Semester	Course Code	Course Title	
III	PR01	Project Risk Management	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE =50:50

Course Objectives:

<p><b>Subject / Course Objectives:</b></p> <p>xxvi) To understand how to apply customizable, industry-robust Templates to create a Risk Management Plan and Risk Register</p> <p>xxvii) To understand how to Use Qualitative Risk analysis process to Identify Risk Exposure</p> <p>xxviii) To understand how to Translate Risk into actual Time and Cost impact using proven Quantitative Risk Analysis Tools</p> <p>xxix) To understand how to Utilize Technique to Design your Risk Response Strategies</p> <p>xxx) To understand how to Monitor Risk Triggers to control uncertainties and maximize project payoff</p>		
<p><b>Learning Outcomes:</b></p> <p>vii) Develop skills to help you enhance your skills on project risk management.</p> <p>viii) Help in identifying and measuring risks in project development and implementation,</p> <p>ix) Learn to quantify risks and create risk response strategies to deliver projects that meet stakeholder expectations..</p>		
Name: -	Syllabus – Project Risk Management	Hrs.
Unit No: 1	<p><b>Introduction to Risk Management</b></p> <p>Difference between Risk and Issue Management, Definitions of Risk and Key Terms, Risk vs. Opportunities, Impact of Risk on Organizations, Internal Control and Risk Management, Maturity in Risk Culture, Risk Management Strategy, Perspectives – Strategic, Programme, Project, Operations, Risk Management Policy and Processes, Risk Management Responsibilities, Risk Management Templates for Risk Management, Strategy and Risk Register</p>	5
Unit No: 2	<p><b>Risk Management Planning</b></p> <p>Risk Management Planning Process, Inputs to Risk Planning, Techniques for Risk Planning, Tailoring the Risk Register, Tailoring the Probability Impact Matrix, Define Roles and Responsibilities, Develop Project Risk Management Plan</p>	8
Unit No: 3	<p><b>Identify Risks</b></p> <p>Risk Identification Process, Inputs to Risk Identification, Techniques in Risk Identification, Determine Project Risk and Opportunities, Using Expert Judgment and historical Data Analysis, Discuss SWOT, Taxonomy, Checklist, Delphi, Cause and Effect, Pareto analysis, Where to look for Project Risks, Risk Breakdown Structure, Common risks in</p>	5

	Software Project	
Unit No: 4	<b>Risk Analysis</b> Risk Analysis Process, Qualitative vs. Quantitative Risk Analysis, When to use Quantitative Risk Analysis, Inputs for Qualitative Risks Analysis, Determine Risk Probability and Impact, Risk Urgency Assessment, Categorize Risks, Update Risk Register, Quantifying with Expected Monetary Value, Decision Tree Analysis	5
Unit No: 5	<b>Planning Risk Responses</b> Risk Response planning process, Inputs for Risk response planning, Strategies for Negative Risks, Strategies for Positive Risks, Secondary Risks and Residual Risks, Assigning Risk Ownership and Responsibilities, Contingency Planning	8
Unit No: 6	<b>Monitoring and Controlling Risks</b> Risk Monitoring and Controlling Process, Inputs to Risk Monitoring and Controlling Process, Techniques in Risk Monitoring and Controlling Risk Reassessment, Risk Audits, Variance and Trend Analysis Documenting Risk Data for future projects, Managing Issues	05

Elective - Project Management: Course – Microsoft Project 2010

Course: MBA (General) CBCS 2020 – w.e.f. - Year 2021– 2022			
Semester	Course Code	Course Title	
III	PR02	Microsoft Project 2010	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE =50:50

Course Objectives:

<p>Subject / Course Objectives:</p> <ul style="list-style-type: none"> <li>i) To understand best in class templates</li> <li>ii) To schedule tasks effectively.</li> <li>iii) To collaborate with project partners with ease.</li> <li>iv) To understand how to get updates and stay current</li> </ul>		
<p>Learning Outcomes:</p> <ul style="list-style-type: none"> <li>i) Understand the Microsoft Project 2010 Interface</li> <li>ii) Learn Best Practices in Planning and Scheduling using Microsoft Project and Checklists</li> <li>iii) Learn Resource Planning, How to resolve Resource Workload, Re-Assignments and Performance Review</li> </ul>		
Name	Syllabus – Microsoft Project 2010	Hrs.
Unit No: 1	<b>Best Practice Guidelines and Checklists on Project Scheduling</b> Scheduling in a Nut Shell, Scheduling Best Practices and Guidelines, Do's and Don'ts, Overview of Microsoft Project 2010	8
Unit No: 2	<b>Resolving Resource Workload Over Allocation</b> Determine Resource Workloads, Sharing Resources across Multiple Projects, Strategies for resolving Resource Workload over allocation, Level the Workload yourself, Let Microsoft Project level the Workload for you, Best practices on Workload Leveling	11
Unit No: 3	<b>Optimizing for Scope, Time, Cost and Resource</b> Strategies for Optimizing the Schedule, Managing Critical Path using Microsoft Project, Running What-if Scenarios in Microsoft Project, Determining Critical Resources	5
Unit No: 4	<b>Managing Multiple Projects</b> Project, Program and Portfolio Management Concepts, Combining Projects for Progress Review, Creating and Managing Sub Projects and Master Projects, Managing Project Task Dependencies, Sharing Resources amongst Projects	4
Unit No: 5	<b>Customizing and Sharing Objects</b> Customizing Project Objects, Sharing Objects between Projects, Using Project Templates	10
Unit No: 6	<b>Analyzing Projects</b> Analyzing Project Progress, Measuring Performance using Earned Value	07

	Analysis, Responding to Changes in your Project

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
IV	402	Environment and Disaster Management	
Type	Credits	Evaluation	Marks
Core	2	CES	IE = 100

### Course Objectives:

<b>Subject / Course Objectives :</b>		
<ul style="list-style-type: none"> <li>Understand and realize the multi-disciplinary nature of the environment, its components, and inter-relationship between man and environment.</li> <li>Understand the relevance and importance of the natural resources in the sustenance of life on earth and living standard.</li> <li>Comprehend the importance of ecosystem, biodiversity and natural bio geo chemical cycle.</li> </ul>		
<b>Learning Outcomes :</b>		
<ul style="list-style-type: none"> <li>Understand the natural environment and its relationships with human activities.</li> <li>Characterize and examine human affects at the environment.</li> <li>Capacity to obtain, analyse, and communicate information on risks, relief needs and lessons learned from earlier disasters in order to formulate strategies for mitigation in future scenarios</li> <li>Integrate facts, concepts, and methods from multiple disciplines and apply to environmental problems of disaster events at a local and global levels.</li> <li>Capacity to integrate knowledge and to analyse, evaluate and manage the different public health aspects</li> </ul>		
Units-	Environment and Disaster Management	Hrs.
<b>Unit No : 1</b>	<b>The Environment and Ecosystem:</b> Environment and Environmental studies: Definition, concept, components and importance Ecosystem and Ecology: Structure and Function of ecosystem, Brief concept of Autecology and Synecology. Food chain, food web and ecological pyramids . Biogeochemical cycles in an ecosystems: (Carbon, Nitrogen and Phosphorous cycle) Ecological succession: Definition, types, concept and process (Hydrosere, Xerosere and Lithosere).	4
<b>Unit No : 2</b>	<b>Environment as Science:</b> Introduction, Types of environment- Physical & Cultural, Environmental Science- meaning and definition, nature and scope, methods and importance of study. Impact of Technology on the environment, Environmental Degradation, Sustainable Development, Environmental Education.	4
<b>Unit No : 3</b>	<b>Biodiversity and its conservation:</b> Definition, genetic, species and ecosystem diversity.	4

	Value of biodiversity : consumptive use, productive use, social, ethical, aesthetic and option values Biodiversity at global, National and local levels. India as a mega-diversity nation Threats to biodiversity: habitat loss, poaching of wildlife, man wildlife conflicts. Endangered and endemic species of India Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.	
<b>Unit No : 4</b>	<b>Definition and types of disaster:</b> Hazards and Disasters, Risk and Vulnerability in Disasters, Natural and Man-made disasters, earthquakes, floods drought, landside, land subsidence, cyclones, volcanoes, tsunami, avalanches, global climate extremes. Man-made disasters: Terrorism, gas and radiations leaks, toxic waste disposal, oil spills, forest fires.	4
<b>Unit No : 5</b>	Natural Disasters: Epidemic, Cyclone, Drought, Food, Landslide, Fire and forest fire, Earthquake and Volcanoes, Tsunami. Man- made Disasters: War, Arson / Sabotage / Internal Disturbances / Riots, Nuclear Explosion /Accidents / Radioactive Leakages. Ecological disasters like Deforestation / Soil Erosion / Air / Water Pollution. CORONA,HIV / AIDS, Life Style Diseases.	4
<b>Unit No : 6</b>	Disaster Management: Components of Disaster Management, Government's Role in Disaster Management through Control of Information, Actors in Disaster Management, Organizing Relief measures at National and Local Level, psychological Issues, Carrying Out Rehabilitation Work, Government Response in Disaster	4

Semester	Course Code	Course Title	
IV	403	E-Business Management	
Type	Credits	Evaluation	Marks
Core	2	CES	IE = 100

### Course Objectives:

Subject / Course Objectives :		
<ol style="list-style-type: none"> <li>1. Understand the E-Commerce and E- business infrastructure and trends</li> <li>2. Analyze different types of portal technologies and deployment methodologies commonly used in the industry.</li> <li>3. Analyze the effectiveness of network computing and cloud computing policies in a multi-location organization.</li> <li>4. Analyze real business cases regarding their e-business strategies and transformation processes and choices.</li> <li>5. Integrate theoretical frameworks with business strategies.</li> </ol>		
Learning Outcomes :		
<ol style="list-style-type: none"> <li>1. After completion of this course, students will be able to understand the basic concepts and technologies used in the field of management information systems.</li> <li>2. Understand the processes of developing and implementing information Systems. Be aware of the ethical, social, and security issues of information systems.</li> <li>3. Understand the role of information systems in organizations, the strategic management processes, and the implications for the management.</li> <li>4. Develop an understanding of how various information systems work together to accomplish the information objectives of an organization.</li> </ol>		
Units	Syllabus – E-Business Management	Hrs.
Unit No : 1	<b>Introduction to E-Business and E-Commerce:</b> - Define the e-Commerce and e-Business, Define e-Commerce Types of EC transactions. Define e-Business Models. Internet Marketing and e-Tailing. Elements of e-Business Models. Explain the benefits and limitations of e-Commerce.	10
Unit No : 2	<b>E-Marketplaces:</b> Structures, Mechanisms, Economics, & impacts:- Define e-Marketplace and Describe their Functions. Explain e-Marketplace types and their features. Describe the various types of auctions and list their characteristics. Discuss the benefits, limitations and	10

	impacts of auctions. E-Commerce in the wireless environment. Competition in the DE and impact on industry	
Unit No : 3	<b>E-Business applications, E-Procurement and E- Payment Systems:-</b> Integration and e-Business suits. ERP, e-SCM, CRM, E-Payment. E-Procurement definition, processes, methods and benefits. Discuss the categories and users of smart cards. Describe payment methods in B2B EC	10
Unit No : 4	<b>The Impact of E-Business on Different Fields and Industries:-</b> E-Tourism · Employment and Job Market Online Real Estate. Online Publishing and e-Books. Banking and Personal Finance Online. On-Demand Delivery Systems and E-Grocers. Online Delivery of Digital Products.	10
Unit No : 5	<b>E-Learning and Online Education:-</b> Define electronic learning. Discuss the benefits and drawbacks of e-Learning. The e-Learning Industry. Discuss e-Content development and tools. Describe the major technologies used in e-Learning. Discuss the different approaches for e-Learning delivery. How e-Learning can be evaluated. <b>E-Government:-</b> Definition of e-Governments · Implementation. E-Government Services. Challenges and Opportunities. E-Government Benefits, Case Study	10
Unit No : 6	<b>Launching Online Business and E-Commerce Projects:-</b> Understand the requirements for starting an online business from different perspectives. Describe the funding options available to startup businesses. Understand the processes associated with managing Web site development. Know the techniques of search engine optimization. Evaluate Web sites on design criteria.	10

# **MBA SEM IV**

## **Open Courses**

<b>Programme: MBA (Gen) CBCS 2020 – w.e.f. - Year 2020 – 2021</b>			
<b>Semester</b>	<b>Course Code</b>	<b>Course Title</b>	
IV	404	<i>Introduction to Data Science</i>	
<b>Type</b>	<b>Credits</b>	<b>Evaluation</b>	<b>Marks</b>
Open	2	CES	IE: 100

Course Objectives :
1. Understanding the Role of Data Science in business.
2. Understanding the basic concept of data management and data mining techniques
3. To understand the basic concept of machine learning
4. To understand the application of business analysis.
Learning Outcomes:
Upon the successful completion of this course, the student will be able to:
CO1. Understand the basics of business analysis and Data Science Knowledge (K2)
CO2. Understand data management and handling and Data Science Project Life Cycle
CO3. Understand the data mining concept and its techniques Applying (K4)

Unit	Contents	Sessions
1	Introduction: What is Data Science? Historical Overview of data analysis, Data Scientist vs. Data Engineer vs. Business Analyst, Career in , What is data science, Why Data Science, Applications for data science, Data Scientists Roles and Responsibility	06
2	Data: Data Collection, Data Management, Big Data Management, Organization/sources of data, Importance of data quality, Dealing with missing or incomplete data.	08
3	Data Classification Data Science Project Life Cycle: Business Requirement, Data Acquisition, Data Preparation, Hypothesis and Modeling, Evaluation and Interpretation, Deployment.	06
4	Introduction to Data Mining, The origins of Data Mining, Data Mining Tasks, OLAP and Multidimensional data analysis, Basic concept of Association	08
5	Introduction to Machine Learning: History and Evolution, AI Evolution, Statistics Vs Data Mining Vs, Data Analytics Vs, Data Science, Supervised Learning, Unsupervised Learning, Reinforcement Learning, Frameworks for building Machine Learning Systems.	06

6	Application of Business Analysis: Retail Analytics, Marketing Analytics, Financial Analytics, Healthcare Analytics, Supply Chain Analytics.	08
---	---	----

Course : MBA (G/HR) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
IV	405	Artificial Intelligence For Managers	
Type	Credits	Evaluation	Marks
Core	2	CES	IE = 100

### Course Objectives:

Subject / Course Objectives:		
<ul style="list-style-type: none"> <li>i. the fundamental technical terms and concepts around machine learning necessary to apply these methods to building artificial intelligence systems for business.</li> <li>ii. Identify and describe problems that are amenable to solution by AI methods.</li> <li>iii. Understand key terms and components involved in machine learning approaches</li> <li>iv. TO understand the use of AI in business</li> </ul>		
Learning Outcomes:		
<ul style="list-style-type: none"> <li>I) Understand various AI concepts</li> <li>II) Solve the problems using neural networks techniques</li> </ul>		
Units	Syllabus – Artificial Intelligence For Managers	Hrs.
Unit No: 1	Artificial Intelligence: Role of AI in engineering, AI in daily life, Intelligence and Artificial Intelligence, Different task domains of AI, Programming methods, Limitations of AI Intelligent Agent: Agent, Performance Evaluation, task environment of agent, Agent classification, Agent architecture Components of AI, History of AI, Salient Points, Knowledge and Knowledge Based Systems, AI in Future, Applications. [Reference 1]	5
Unit No: 2	Problems, problem spaces and search: Define the problem as a state space search, Production systems, Problem characteristics, Production system characteristic, Issues in design of search Program Search Techniques: DFS, BFS, Hill Climbing	6
Unit No: 3	Knowledge Representation: Need to represent knowledge, Knowledge representation with mapping scheme, Properties of good knowledge-based system, Knowledge representation issues, AND-OR graph, Types of knowledge	5
Unit No: 4	<b>Knowledge-Based Systems:</b> Structure of an Expert System, Expert Systems in different Areas, Expert System Shells, Comparison of Expert Systems, Comparative View, Ingredients of Knowledge-Based Systems, Web-based Expert Systems. [Reference 1]	9

Unit No: 5	Natural Language Processing- need of NLP, natural Language understanding, Basic NLP techniques, Natural language generation, Applications of NLP [Reference 3]	6
Unit No: 6	AI for Management an overview, what is the value of firms in AI world, Evolving role of general managers in the age of AI, role managers in new economy, AI and leadership development of the future, AI and marketing science and sustainable profit growth, how human- computer super minds develop business strategies. [ Reference 6]	5

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
IV	IT03	RDBMS with Oracle	
Type	Credits	Evaluation	Marks
Core	3	CES	UE:IE = 50:50

**Course Objectives :**

- vii) To understand and learn how to work with an Oracle database.
- viii) To understand the Structured Query Language and be able to use it in conjunction with Oracle database.
- ix) To understand Procedural Language SQL (PL/SQL) and be able to use it in conjunction with an Oracle database.

**Learning Outcomes :**

At the end of this course, student should be able to:

- i) Simple Query using sample datasets
- ii) Complex queries using SQL.
- iii) Writing PL/SQL blocks

Units	Syllabus – RDBMS with Oracle	Hrs.
Unit No : 1	<b>Introduction to oracle RDBMS:</b> DBMS VS RDBMS, CODD's Rules, Introduction to Oracle: History, Features, Versions of oracle, introduction to oracle RDBMS, Tools of Oracle: SQL, SQL *Plus, SQL Form, SQL Reports.	04
Unit No : 2	<b>SQL and Components of SQL</b> Defining a database in SQL, Components of SQL: DDL, DML, DCL, DQL, SQL query Rules, Data types, Keywords, Delimiters, Literals. DDL Commands – Defining a database in SQL, Creating table, changing table definition, removing table. Truncating Table. DML Commands- Inserting, updating, deleting data, DQL Commands: Select Statement with all options. Renaming table, Describe Command, Distinct Clause, Sorting Data in a Table, Creating table from a table, Inserting data from other table, Table alias, and Column alias. Data Constraints: Primary key, Foreign Key, NOT NULL, UNIQUE, CHECK constraint	09

Unit No : 3	<b>Operators, Functions and Joins</b> Arithmetic, Logical, Relational, Range Searching, Pattern Matching, IN & NOT IN Predicate, all, % any, exists, not exists clauses, Set Operations: Union, Union All, Minus, Intersect. Relating data through join concept. Simple join, equi join, non equi join, Self join, Outer join, Sub queries, Aggregate Functions , Numeric Functions, String Functions, Conversion functions, Date conversion functions, Date functions.	08
Unit No : 4	<b>Database Objects</b> Index: Creating index, simple index, composite index, unique index, dropping indexes, multiple indexes on table, using rowid to delete duplicate rows from a table, Sequence: Creating sequence, altering sequence, dropping sequence. Views: Defining, modifying, deleting views.	06
Unit No : 5	<b>Introduction to PL/SQL programming</b> Introduction, Advantages, PL/SQL Block, PL/SQL Execution Environment, PL/SQL Character set, Literals, Data types, Variables, Constants, Displaying User Message on screen, Conditional Control in PL/SQL, Iterative Control Structure: While Loop, For Loop, Goto Statement.	9
Unit No : 6	<b>Advanced Programming Techniques of PL/SQL</b> <b>Cursors:</b> Introduction, Types of Cursors: Implicit Cursor, Explicit Cursors, Parameterized cursors, Programs on cursors, <b>Triggers:</b> Introduction, Use of triggers, Types of Triggers, Creating triggers, Examples on Triggers	9

Student has to upgrade Knowledge by using below inputs:

<b>Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021</b>			
<b>Semester</b>	<b>Course Code</b>	<b>Course Title</b>	
IV	IT04	<i>Enterprise Business Applications</i>	
<b>Type</b>	<b>Credits</b>	<b>Evaluation</b>	<b>Marks</b>
Core Elective	03	CES	UE:IE = 50:50

**Course Objectives:**

**Subject / Course Objectives: .**

1. To make student able to build an understanding of the fundamental concepts of ERP systems, their architecture, and working of different modules in ERP.
2. Students will also able to develop and design the modules used in ERP systems, and can customize the existing modules of ERP systems.
3. Identify the important business functions provided by typical business software such as enterprise resource planning and customer relationship management .
4. Describe basic concepts of erp systems for manufacturing or service companies
5. To study and understand the ERP life cycle.
6. 6. To learn the different tools used in ERP.

**Learning Outcomes :**

1. Understand the basic concepts of ERP.
2. Identify different technologies used in ERP.
3. Understand and apply the concepts of ERP Manufacturing Perspective and ERP Modules.
4. Discuss the benefits of ERP
5. Understand and implement the ERP life cycle.

6. Apply different tools used in ERP.		
Units	Syllabus – <i>Enterprise Business Applications</i>	Hrs.
Unit No : 1	<b>Introduction (Enterprise Resource Planning)</b> : Evolution of ERP-MRP and MRP II. Introduction to ERP. Basic ERP concepts. Benefits of ERP.	10
Unit No : 2	<b>ERP and Related Technologies</b> : Business Intelligence, E-commerce & e-Business, Business Process Reengineering, Data Warehousing & Data Mining, On Line Analytical Processing(OLAP), Product Life cycle Management, Supply Chain Management, Customer Relationship Management	10
Unit No : 3	<b>ERP Implementation:</b> ERP Implementation Life Cycle, Pre-implementation tasks, Requirements Definition, Implementation Methodologies, Process Definition, Dealing with Employee Resistance, Training & Education, Data Migration, Project Implementation & Monitoring, Post Implementation Activities, Success & Failure Factors of an ERP Implementation.	10
Unit No : 4	<b>Business Modules of an ERP Package: Finance, Manufacturing (Production) , Human Resources, Plant Maintenance,</b>	10
Unit No : 5	<b>Materials Management, Quality Management, Marketing , Sales , Distribution and Service.</b>	10
Unit No : 6	ERP Market: (Company and Product Features) SAP AG, Oracle Corporation, PeopleSoft, JD Edwards, SSA Global, Lawson Software.  Enterprise Application Integration, ERP and Total Quality Management, Future Directions and Trends in ERP.	10

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
IV	IB04	Global Business Strategies	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

### Course Objectives:

Subject / Course Objectives :		
v) Knowledge: Basic and broad knowledge in international business environment, strategies and management. Ability to apply concepts, principles and theories to simple business situations. vi) Global Perspective: Awareness of the different thinking and viewpoints of diverse cultures. vii) Awareness of the global business environment and its impacts on businesses. viii) . Practical Application: Use of excel tools in real world scenarios.		
Learning Outcomes :		
v) Explain the concepts in international business with respect to foreign trade/international business vi) Apply the current business phenomenon and to evaluate the global business environment in terms of economic, social and legal aspects vii) Analyse the principle of international business and strategies adopted by firms to expand globally viii) . Integrate concept in international business concepts with functioning of global trade		
Units	Syllabus – Global Business Strategies	Hrs.
Unit No : 1	Export – Import – Strategies, Third Party Intermediaries, Cause of Ethical dilemma ‘Is demand always Export’ Technology impact on Export Strategy	10
Unit No : 2	Global Manufacturing Strategies, Global Supply Chain Management, Ethical Dilemma –supplier relations approach that yields best result	10
Unit No : 3	Control Strategies – Introduction, Planning, Organizational Structure, Location of Decision making, Control in process of Internationalization, Control Strategy Mechanisms Corporate Culture & Co-ordinating Methods, Control in special situations Acquisitions, Shared ownership	10
Unit No : 4	Role of legal structure in Control Strategies – Control or No control Constant Balancing Act	10
Unit No :	Collaborative Strategies – Motives for collaborative arrangements,	10

5	Considerations in collaborative arrangements, Licensing/ Franchising / Contracts/ Joint Ventures/ Equity Alliances	
Unit No : 6	Problems of Collaborative Arrangements, Collaborative Importance, Differing Objectives, Control Problems, Cultural Difference, Compatible Partners, Steps to know how Innovation breeds collaboration	10

Course : MBA (General) CBCS 2020 – w.e.f. - Year 2020 – 2021			
Semester	Course Code	Course Title	
IV	AM03	Use of Information Technology in Agribusiness Management	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

### Course Objectives:

Subject / Course Objectives :		
<ul style="list-style-type: none"> <li>• Gain a solid understanding of core concepts of ICT in agriculture, with a focus on used cases and potential impact.</li> <li>• Learn about digital tools enhancing on-farm productivity.</li> <li>• Understand how to empower smallholder farmers through ICT/Digital Tools in market access and financial services.</li> <li>• Gain awareness of the forward-looking technologies and their scope in agriculture – artificial intelligence, remote sensing, crowdsourcing, and big data analytics.</li> </ul>		
Learning Outcomes :		
<ul style="list-style-type: none"> <li>i) Data analysis in Agribusiness</li> <li>ii) ICT in Agriculture</li> <li>iii) GIS and Remote Sensing application in Agriculture</li> <li>iv) Monitoring and Evaluation in Agriculture</li> </ul>		
Units	<i>Syllabus: Use of Information Technology in Agribusiness Management</i>	Hrs.
Unit No : 1	Introduction to Computers: Types of Computer systems, Basic Computer operations, Networks: Internet, Intranet and Extranet Applications, Functional units of Computers, Practical data processing application in business, and Computer applications in various areas of business.	10
Unit No : 2	The Software: Software types, Systems Software, Classification of Operating System, Application Software, Introduction to Programming Language, Types of Programming Languages. Introduction to Microsoft Office, working with MS Word, MS Excel, MS Power point, Data Base, Data Base Management System	10
Unit No : 3	Internet, Security and E-Commerce: Introduction, History and Core features of the Internet, Internet Applications, Internet and World Wide Web, Extranet and E-mail, Mobile Computing, Electronic Commerce, Types of E-Commerce and their utilities	10
Unit No : 4	Management Information Systems: Introduction to MIS, Principles of MIS, Characteristics, functions, structure & Classification of MIS, information for decisions; strategic importance of MIS, MIS in	10

	Manufacturing, Marketing, Finance Human Resource Management, Materials & Project Management; ERP: CRM	
Unit No : 5	Managing Knowledge: Introduction to Knowledge Management, Organizational Learning and Memory, knowledge management activities, Approaches to Knowledge management, Information Technology in Knowledge Management, knowledge Management Systems implementation, Roles of people in knowledge management, Managerial Issues in Knowledge Management.	10
Unit No : 6	Corporate Performance Management and Business Intelligence: A framework of Business Intelligence: Concepts and Benefits, Business Analytics: Online analytical processing reporting and querying, Data Text Web mining and Predictive Analytics, Data Visualization, Geographical Information Systems and virtual reality, Real time business intelligence and competitive Intelligence, Business Performance Management Scorecards and Dashboards.	10

Semester	Course Code	Course Title	
IV	R03	<i>Merchandising , Display &amp; Advertising</i>	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

### Course Objectives:

Subject / Course Objectives :		
<ol style="list-style-type: none"> <li>I. To familiarize the students with evolution and growth of Retailing, expectations of customers and to study the importance of retailing in present business scenario.</li> <li>II. Present and coordinate merchandise so that related goods are shown in a unique, desirable, and saleable manner.</li> <li>III. Use both written and oral English that emphasizes good organization, clarity, correct grammar which is appropriate for communication purposes in the business environment.</li> <li>IV. Understand the fundamentals of basic financial problems, and use good reason in financial decision making.</li> </ol>		
Learning Outcomes :		
<ol style="list-style-type: none"> <li>I. Understand the basic functions of retail store operations including store location and layout, shopping centre analysis, retail market segmentation and strategies, and the merchandising mix.</li> <li>II. Prepare and execute displays for exhibitions and promotional events using the visual dynamics of light as a design element.</li> <li>III. Prepare illustrative matter and layout for posters and advertising using graphic design principles including perspective, lettering, and logo design.</li> <li>IV. Understand basic personnel functions such as interviewing techniques, basic supervisory skills, motivation, and written and non verbal communication.</li> </ol>		
Units	<i>Syllabus: Merchandising , Display &amp; Advertising</i>	Hrs.
Unit No : 1	Introduction: stages of merchandise, management process, Developing merchandise plan (a) Decision related to buying organization and its process, (b) Factors to be considered in the process of devising merchandise plan	10
Unit No : 2	Elements of Merchandise Management: Introduction, issues of merchandise management (a) Sales forecasting, (b) Inventory planning, (c) Logistic.	10
Unit No : 3	Implementing Merchandise Plan: Steps involved in implementing the plan, (a) Logistic – performance goal, order processing & fulfillment, transportation & warehousing, customer transaction and customer service. (b) Inventory Management – Meaning, Retailer task, inventory levels,	10

	Merchandise security, Reverse logistic, Inventory analysis.	
Unit No : 4	Fundamentals of Merchandising: (a) Product - Merchandise strategy, Planning, Sourcing, Arranging & display, space management. (b) Pricing – objectives, pricing for markets, pricing calculations, pricing policies, pricing strategies.	10
Unit No : 5	Promoting the Store: Elements of promotion, communicating the image, selection of promotion mix, advertising and sales promotion, publicity, personal selling and relationship marketing.	10
Unit No : 6	Display Advertisement: Types of promotion, promotion in the channel, promotional objectives, steps in planning and retail advertising campaign, Management of sales promotion & publicity.	10

Semester	Course Code	Course Title	
IV	R04	Supply Chain Management in Retailing	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE = 50:50

### Course Objectives:

Subject / Course Objectives :		
<ul style="list-style-type: none"> <li>i) Familiarize the students with organized retail and, the value it creates.</li> <li>ii) The strategic and operational decision-making processes in the organized retail.</li> <li>iii) Relate the supply chain activities which create the value in the organized retail industry</li> </ul>		
Learning Outcomes :		
<ul style="list-style-type: none"> <li>i) Understand the functions of retail business and various retail formats and retail channels.</li> <li>ii) Understand the difference between Retail and Manufacturing Supply Chain</li> <li>iii) Understand, key drivers of retail supply chain and how to select a retail store location?</li> <li>iv) Analyze Retail Market and Financial Strategy including product pricing.</li> <li>v) Integrate the various Supply Chain partners and how to collaborate with them?</li> </ul>		
Units	Syllabus : <i>Supply Chain Management in Retailing</i>	Hrs.
Unit No : 1	Introduction to Supply Chain Management: Meaning, Objectives and Importance, Decision phases, Process View, Competitive and supply chain strategies, Achieving strategic fit, Supply chain drivers.	10
Unit No : 2	Planning Demand and Supply in Supply Chain: Supply Chain integration, Demand Forecasting in a supply chain, Managing Demand and supply in supply chain, Role of IT in forecasting.	10
Unit No : 3	Designing the Supply Chain Network: Designing the Distribution Network, Role of Distribution, Factors influencing distribution, Design options, Modeling for supply chain, Network design in Supply Chain.	10
Unit No : 4	Logistics in Supply Chain Management: Introduction, Elements, Logistics interfaces with other areas, Approach to analyze Logistics System, Logistics System Analysis-Techniques, Factors affecting the cost and Importance of logistics.	10
Unit No : 5	Sourcing and Pricing in Logistics: I. Sourcing- In-house or outsource, Supplier scoring and assessment, Procurement process, Sourcing- Planning and Analysis II. Pricing- Pricing and Revenue management for multiple customers, Perishable products, Seasonal demand, Bulk and spot contracts.	10
Unit No : 6	Information Technology in supply Chain Management: Role of IT in Supply Chain management, Customer Relationship Management, Internal Supply Chain management, EBusiness and Supply Chain Management, Building strategic partnerships and trust within a supply chain	10

Elective - Project Management: Course – Advance Project Management

Course: MBA (General) CBCS 2020 – w.e.f. - Year 2021– 2022			
Semester	Course Code	Course Title	
IV	PR03	Advance Project Management	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE =50:50

Course Objectives:

<p>Subject / Course Objectives:</p> <ul style="list-style-type: none"> <li>i) To understand the overall aspects of project management</li> <li>ii) To view at the project from a holistic view</li> <li>iii) To identify costs and control them while implementing project</li> <li>iv) To understand quality aspects in project</li> </ul>		
<p>Learning Outcomes:</p> <ul style="list-style-type: none"> <li>i) To know the details of project budgeting and costing</li> <li>ii) To learn various aspects of project monitoring and implementation</li> <li>iii) To understand how to manage project quality and project audit</li> <li>iv) To understand the aspects related to Human resource in Project Management</li> </ul>		
Name	Syllabus – Advance Project Management	Hrs.
Unit No: 1	<p><b>Baseline Cost Structure</b> Introduction to cost structure, Inputs for project costing, Project cost estimation, categories of costs such as Labor cost, Equipment cost, Cost of supplies, Travel cost, Training cost, Overhead cost, etc. <b>Project Procurement process:</b> Plan procurement , Conduct procurement, Control procurement and Close.</p>	8
Unit No: 2	<p><b>Project budgeting &amp; activity costing</b> Techniques to estimate project costs - Analogous Estimating, Parametric estimating, Bottom-up estimating, Project Budget planning, Identifying activities and Activity cost estimates, generation of Cost performance baseline, Project funding requirements, Project documents</p>	11
Unit No: 3	<p><b>Project Monitoring</b> General aspects of project monitoring, Importance of project monitoring and control, Monitoring and control method, Project monitoring activities, Project monitoring process, Project Monitoring Steps, Monitoring and control techniques, control with Gantt Chart, Earned Value Analysis</p>	5
Unit No: 4	<p><b>Project Quality Management</b> Project Quality Management Plan , identifying quality metrics and standard measures for project processes, regulatory compliance requirements, product functionality, documentation, etc., Development of Quality management plan, Process improvement plan, Quality metrics, Quality checklists, Project documents</p>	4
Unit No: 5	<p><b>Project Audit</b></p>	10

	Quality Assurance - analyzing project quality, improve project quality, checking whether the quality standards are met, Quality control measurements, Work performance information, checking Project management plan, Project documents updates, Organizational process assets updates	
Unit No: 6	<p><b>Project Human Resource Management</b></p> <p>Develop human resource plan with the help of Activity resource requirements, Enterprise environmental factors, Organizational processes</p> <p>Acquire project team - Project staff assignments, Resource calendars, Develop project team - improving the team efficiency, team member interaction and enhancing overall team and project performance</p> <p>Manage project team - tracking team member performance, resolving issues, providing feedback and managing a team to optimize project performance.</p> <p><b>Communication Management:</b> Organizing for Communication, Feedback communication. Reporting system.</p>	07

Elective - Project Management: Course – Scanning Business Environment for Project

Course: MBA (General) CBCS 2020 – w.e.f. - Year 2021– 2022			
Semester	Course Code	Course Title	
IV	PR04	Scanning Business Environment for Project	
Type	Credits	Evaluation	Marks
Core Elective	3	CES	UE:IE =50:50

Course Objectives:

<p>Subject / Course Objectives:</p> <ul style="list-style-type: none"> <li>i) To understand the business environment impacts project management</li> <li>ii) To understand how to scan internal business environment and to work on strengths and weaknesses</li> <li>iii) To understand how to scan external business environment to identify opportunities and threats</li> <li>iv) To understand the intricacies for preparing for unforeseen events.</li> </ul>		
<p>Learning Outcomes:</p> <ul style="list-style-type: none"> <li>i) To know how to scan business environment</li> <li>ii) To understand the impact of changes in business environment</li> <li>iii) To identify, evaluate and deliver project benefits and value in the complex business environment</li> <li>iv) To understand the impact of project on Organization culture through organizational change.</li> </ul>		
Name	Syllabus – Scanning Business Environment for Project	Hrs.
Unit No: 1	<p><b>Environmental Scanning for Implementing project</b>                      Importance of environmental scanning for project management, internal and external environment, global environment, SWOT analysis for readiness for project, preparation for unforeseen changes</p>	8
Unit No: 2	<p><b>Evaluating Internal Business Environment</b>                      Corporate mission, corporate culture, and leadership style, Organizational structure and suitability to project, Financial condition of organization, Skill sets of employees</p>	11
Unit No: 3	<p><b>Evaluating External business environment</b>                      Monitoring external business environmental changes ((e.g., regulations, technology, geopolitical, market), Assessing and prioritizing impact on project scope/backlog based on changes in external business environment, Identify options for scope/backlog changes</p>	5
Unit No: 4	<p><b>Plan and manage project compliance</b>                      Project compliance requirements (e.g., security, health and safety, regulatory compliance), Analysing potential threats to compliance, Use methods to support compliance, Conditions of non-compliance, consequences of noncompliance, Approach and Action to address compliance needs (e.g., risk, legal), Measure the extent to which the</p>	4

	project is in compliance	
Unit No: 5	<b>Evaluate and deliver project benefits and value</b> Identifying Project Benefits, Creating agreement on ownership for ongoing benefit realization, Establishing measurement system to track benefits, Evaluation of delivery options to demonstrate value, Appraise stakeholders of value gain progress	10
Unit No: 6	<b>Support organizational change</b> Assess organizational culture, Evaluating impact of organizational change to project, Impact of project on the organization culture	07

**BHARATI VIDYAPEETH**  
**DEEMED TO BE UNIVERSITY**  
**PUNE, INDIA**

**FACULTY OF MANAGEMENT STUDIES**

**Board of Studies in Computer Applications**

**Master of Computer Applications Programme**

**(Under Choice Based Credit System)**

**To be effective from 2018-19**

**BHARATI VIDYAPEETH**  
**DEEMED TO BE UNIVERSITY**  
**PUNE, INDIA**  
**FACULTY OF MANAGEMENT STUDIES**  
**Board of Studies in Computer Applications**  
**Master of Computer Applications Programme**  
**(Under Choice Based Credit System)**  
**To be effective from 2018-19 at Part I**

**1. INTRODUCTION**

The MCA Program is a full time 150 Credits programme offered by Bharati Vidyapeeth Deemed to be University, Pune and conducted at its management institutes in Pune, Karad, Kolhapur, Sangli, and Solapur. All the five institutes have excellent faculties, Laboratories, Library, and other facilities to provide proper learning environment. The University is reaccredited by NAAC with an 'A+' grade (3rd cycle). The expectations and requirements of the software industry, immediately and in the near future, are visualized while designing the MCA programme. This effort is reflected in the Vision and Mission statements of the MCA programme. Of course, the statements also embody the spirit of the vision of Late Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth Deemed to be University which is to usher in “Social Transformation through Dynamic Education.”

**2. VISION STATEMENT OF MCA PROGRAMME**

To create high caliber solution architects and innovators for software development.

**3. MISSION STATEMENT OF MCA PROGRAMME**

To teach 'things, not just words', 'how to think', and 'how to self-learn'.

**4. OBJECTIVES OF THE MCA PROGRAMME**

The main objectives of MCA Programme are to prepare the youth to take up positions as system analysts, system engineers, software engineers, programmers and of course as versatile teachers in any area of computer applications. Accordingly the course curriculum aims at developing 'systems thinking' 'abstract thinking', 'skills to analyze and synthesize', and 'skills to apply knowledge', through 'extensive problem solving sessions', 'hands on practice under various hardware/software environments', 'four minor projects and 'one

semester full-time internship project'. In addition, 'social interaction skills', 'communication skills', 'life skills', 'entrepreneurial skills', and 'research skills' which are necessary for career growth and for leading quality life are also imparted.

## **5. LEARNING OUTCOMES FROM THE MCA PROGRAMME:**

At the end of the course the student should be able to:

- (a) Analyze problems and design effective and efficient software solutions.
- (b) Develop software under latest Application Development Environments.
- (c) Learn new technologies with ease and be productive at all times.
- (d) Read, write, and contribute to technical literature.
- (e) Work in teams.
- (f) Be a good citizen in all respects.

## **6. ELIGIBILITY FOR ADMISSION TO THIS PROGRAMME:**

Admission to the programme is open to any candidate (Graduate) of any recognized University satisfying the following conditions.

1. The candidate should have secured at least 50% (45% for SC/ST).
2. Mathematics as one of the subject at 12<sup>th</sup> or graduation.

### **▪ DURATION OF THE PROGRAMME**

The duration of this programme is three years divided in to six semesters or a minimum of 150 credits whichever is later. The medium of instruction and examination will be only English.

### **▪ SCHEME OF EXAMINATION:**

For some courses there is Internal Assessment (IA) conducted by the respective institutes as well as a University Examination (UE) at the End-of-the Term. UE will be conducted out of 60 marks and IA will be conducted for 40 marks then these are converted to grade points and grades as per the Table I. For courses having only Continuous Assessment (CA) the respective institutes will evaluate the students in varieties of ways, three or four times,

during the term for a total of 100 marks. Then the marks will be converted to grade points and grades using the Table I.

- **STANDARD OF PASSING:**

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA. A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the Head of Passing to secure the GPA required for passing.

The 10 point Grades and Grade Points according to the following table:

<b>Range of Marks (%)</b>	<b>Grade</b>	<b>Grade Point</b>
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} < 80$	A+	9
$60 \leq \text{Marks} < 70$	A	8
$55 \leq \text{Marks} < 60$	B+	7
$50 \leq \text{Marks} < 55$	B	6
$40 \leq \text{Marks} < 50$	C	5
Marks < 40	D	0

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

- **Award of Honours:**

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade

only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

<b>Range of CGPA</b>	<b>Final Grade</b>	<b>Performance Descriptor</b>	<b>Equivalent Range of Marks (%)</b>
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} < 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} < 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} < 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} < 55$
$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} < 50$
CGPA below 5.0	F	Fail	Marks below 40

**RULES OF ATKT:**

- 1.A student is allowed to carry backlog of any number of subjects upto Semester IV.
- 2.A student must pass Part I (Semester I and II) to appear for Semester V.

**SEMESTER WISE COURSE STRUCTURE FOR MCA**  
(To be effective from July 2018)

**SEMESTER I**

Course Number	Course Title	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
101	C Programming	4	3	1	-	40	60
102	Computer Organization And Architecture	4	3	1	-	40	60
103	Database Management Systems	4	3	1	-	40	60
104	Discrete Structures	3	2	1	-	40	60
105	Management Functions	3	2	1	-	40	60
106	Web Supporting Technologies	4	2	-	4	40	60
107	C Lab	2	0	-	4	40	60
108	Soft Skills	2	2	-	-	50	0
109	Self learning-1 (Societal Related Topic)	2	0	-	-	50	0
Total		28	17	5	8	380	420

**SEMESTER II**

Course Number	Course Title	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
201	Data structure and Algorithms	4	3	1	-	40	60
202	Operating Systems	4	3	1	-	40	60
203	Software Engineering	4	3	1	-	40	60
204	Statistical Techniques	3	2	1	-	40	60
205	Financial Accounting	3	2	1	-	40	60
206	Database Management Systems Lab	4	2	-	4	40	60
207	Data Structures Lab	2	0	-	4	40	60
208	Project-I	2	2	-	-	0	100
209	Self-learning-2 (Societal Related Topic)	2	0	-	-	50	0
Total		28	17	5	8	330	520

### SEMESTER III

Course Number	Course Title	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
301	Artificial Intelligence	4	3	1	-	40	60
302	Computer Networks	4	3	1	-	40	60
303	Object Oriented Analysis And Design	4	3	1	-	40	60
304	Probability and Graph theory	3	2	1	-	40	60
305	Organizational Behaviour	3	2	1	-	40	60
306	Object Oriented Programming	4	3	1	0	40	60
307	Object Oriented Programming Lab	2	0	-	4	40	60
308	Project-II	2	2	-	-	0	100
309	Self learning-3 (Societal Related Topic)	2	0	-	-	50	0
Total		28	18	6	4	330	520

### SEMESTER IV

Course Number	Course Title	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
401	Data Warehousing and Data Mining	4	3	1	-	40	60
402	Information Security	4	3	1	-	40	60
403	Design Patterns	4	3	1	-	40	60
404	Elective-I	3	2	1	-	100	-
405	Elective-II	3	2	1	-	100	-
406	Lab Elective-I	4	2	-	4	40	60
407	Linux Lab	2	0	-	4	40	60
408	Project-III	2	2	-	-	0	100
409	Self learning-4 (Computer Related Topic)	2	0	-	-	50	-
Total		28	17	5	8	450	400

### SEMESTER V

Course Number	Course Title	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
501	Data Science	4	3	1	-	40	60
502	Optimization Techniques	4	3	1	-	40	60
503	Software Project Management	4	3	1	-	40	60
504	Elective-III	3	2	1	-	100	-
505	Elective-IV	3	2	1	-	100	-
506	Lab Elective-II	4	2	-	4	40	60
507	Lab on Current Trends	2	0	-	4	40	60
508	Project-IV	2	2	-	-	0	100
509	Self learning-5 (Computer Related Topic)	2	0	-	-	50	0
Total		28	17	5	8	450	400

#### List of Elective Groups:

These are the broad Elective groups and a student can select only one group for his specialization. Each group will have 4 subjects, of which a student will study first 2 in Semester IV and other 2 in Semester V.

Elective Group
Cloud Computing
Data Analytics
Linux
Open Source Technologies
Mobile Computing
Dot Net Technologies
Net Centric Technologies
Information Systems
IOT
Big Data
Cyber Security

<b>Elective No.</b>	<b>Elective Group</b>	<b>Course No</b>	<b>Course Name</b>
01	Cloud Computing	404-01-A	Virtualization
		405-01-B	Cloud Computing Concepts
		504-01-C	Cloud Solutions
		505-01-D	Cloud Computing
02	Data Analytics	404-02-A	Algorithms for Advanced Analytics
		405-02-B	Machine Learning Techniques
		504-02-C	Weka
		505-02-D	Statistical Computing
03	Linux	404-03-A	Linux Desktop Environment and Shell Programming
		405-03-B	Linux System Administration
		504-03-C	Linux Network Administration
		505-03-D	Linux Internals and Network
04	Open Source Technologies	404-04-A	Python
		405-04-B	Perl Scripting
		504-04-C	PHP
		505-04-D	Ruby
05	Mobile Computing	404-05-A	HTML 5
		405-05-B	Java Script Programming
		504-05-C	Android
		505-05-D	Hybrid Application Development
06	Dot Net Technologies	404-06-A	C# Programming
		405-06-B	ASP .NET with C#
		504-06-C	C# Windows Programming
		505-06-D	MVC
07	Net Centric Technologies	404-07-A	HTML 5
		405-07-B	Java Script Programming
		504-07-C	Ajax Programming
		505-07-D	Web Services

08	Information Systems	404-08-A	Enterprise Resource Planning
		405-08-B	E Commerce
		504-08-C	Recommender System
		505-08-D	Knowledge Management
09	IOT	404-09-A	IoT Architecture And Protocols
		405-09-B	Sensors and Fundamentals with Hands-on lab Node.js/Raspberry PI/Python
		504-09-C	Internet Of Things: Sensing And Actuator Devices
		505-09-D	Smart city use case, MQTT, Integrating on Cloud
10	Big Data	404-10-A	Business Intelligence Applications
		405-10-B	Business Intelligence Tools
		504-10-C	Introduction to Big Data
		505-10-D	Hadoop
11	Cyber Security	404-11-A	Cyber Security
		405-11-B	Information Security Concepts
		504-11-C	Information Security Threats
		505-11-D	Information Security Administration

## SEMESTER VI

Course Number	Course Title	Credits	Hours/Week			IA Marks	EoTE Marks
			L	T	P		
601	Internship Project	10	-	-	-		100

### **Practical Examinations:**

For course Nos. 106,107,206,207,307,406,407,506 and 507 there will be practical examination.

For course No 507 Lab on Current Trends, Every center can decide the Programming Language to be taught depending upon the current industry demand and students interest.

### **Project Viva:**

For course Nos. 208,308,408,508 there will be University Project Dissertation Viva carrying 100 marks.

### **Self Learning:**

For Self Learning- 1 (109), Self Learning- 2 (209), Self Learning- 3 (309), Self Learning- 4 (409), Self Learning- 5 (509), students should select any one recent/upcoming topic related to Societal Concerns (SEM I to SEM III) and on computer science (SEM IV and V) , study it thoroughly and submit a project report at the end of the semester.

# **SEMESTER I**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
101	C Programming	3 L + 1 T +0P = 4 C	2018-19
<p><b>Course Objective :</b></p> <p>This is a first course in programming. The objective of this paper is to teach the Programming Language C. However, the process of learning a computer language will also be emphasized. Emphasis is also on semantics and problem solving.</p>			
<p><b>Expected Outcome :</b></p> <p>At the end of the course a student should be able:</p> <ul style="list-style-type: none"> <li>• To solve a given problem using C Program C</li> <li>• Understand and use C libraries,</li> <li>• Trace the given C program manually</li> <li>• Effectively use of Arrays and functions</li> <li>• Write C program for simple applications of real life using structures and Unions.</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <ol style="list-style-type: none"> <li>1. Let us C - Y.Kanetkar, BPB Publications</li> <li>4. Yashawant Kanetkar, let Us C, BPB Publication</li> <li>2. Programming in C - Gottfried B.S., TMH</li> <li>3. The 'C' programming language - B.W.Kernighan, D.M.Ritchie, PHI</li> <li>4. Programming in ANSI C - Balaguruswami, TMH</li> <li>5. C- The Complete Reference - H.Sohildt, TMH</li> <li>6. A Structured Programming Approach using C – B.A. Forouzan&amp; R.F. Course Plan	
Unit	Contents
1	<p><b>Basics to learn a Programming Language:</b></p> <p>Evolution of programming languages, structured programming, the compilation process, object code, source code, executable code, operating systems, interpreters, linkers, loaders, compilers, fundamentals of algorithms, flow charts. Concepts of a Program and subprogram, Procedures and functions, Syntactic, Semantic, and Logical Errors in a program; Program Correctness- Verification and Validation, Concept of Test Data</p>
2	<p><b>C Language Fundamentals:</b></p> <p>Origins of C, Characters and Character Set of C, Variables and Identifiers, Built-in Data Types, Variable Definition, Constants and Literals, Simple Assignment Statement, Operators and operands, Unary and</p>

	Binary Operators, Concept of Expression, Arithmetic Expressions, Relational Expressions, Assignment Expressions. Evaluation of Expressions, Concepts of Precedence and Associativity, Table of Precedence and Associativity. Basic Input/Output Statement, The function main()
3	<b>Control Statements:</b> Control Structures, Decision Making within a Program, Conditions, Relational Operators, Logical Connectives, Decision Making and Branching: If Statement, If-Else Statement, Switch Statement Decision Making & Looping: While Loop, Do While, For Loop. Nested Loops, Infinite Loops, Structured Programming
4	<b>Arrays:</b> One Dimensional Arrays: Array Manipulation; Searching, Linear Search, Binary Search; Finding The Largest/Smallest Element in an Array; Two Dimensional Arrays: Addition/Multiplication of Two Matrices, Transpose of a Square Matrix; Strings as Array of Characters
5	<b>Functions:</b> User defined and standard functions, Formal and Actual arguments, Functions category, function prototypes, parameter passing, Call-by-value, Call-by-reference, Recursion, Storage Classes. Strings in C and String manipulation functions, Input, output of string statements
6	<b>Pointers:</b> Address Operators, Pointer Type Declaration, Pointer Assignment, Pointer Initialization, Pointer Arithmetic, Passing parameters by reference, pointer to pointer, linked list, pointers to functions, Arrays and Pointers, Pointer Arrays, Dynamic memory allocation
7	<b>Structures, Unions:</b> Declaration of structures, declaration of unions, pointer to structure & unions. <b>Additional Features in C:</b> Command line arguments, bit wise operators, enumerated data types, type casting, macros, the C preprocessor, more about library function

Course Number	Course Name	L-T-P- Credits	Year of Introduction
102	Computer Organization and Architecture	3 L+1 T+0 P=4 C	2018-19
<p><b>Course Objectives :</b> Main objective of this paper is to learn structure and functioning of various hardware components of digital computer. Also study the interactions and communication among these hardware components</p>			
<p><b>Expected Outcome :</b> At the end of this course, student should be able to understand</p> <ul style="list-style-type: none"> <li>• Simple machine architecture and the reduced instruction set computers.</li> <li>• Memory control, direct memory access, interrupts, and memory organization</li> <li>• Basic data flow through the CPU (interfacing, bus control logic, and internal communications).</li> <li>• Number systems, instruction sets, addressing modes, and data/instruction formats.</li> </ul>			
<p><b>References (Books, Websites etc) :</b> 1. M Morris Mano Computer systems Architecture third edition Prentice Hall of India Publication 2. Anita Goel : Computer Fundamentals Pearson Publications</p>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction To Computer Hardware &amp; Computer security:</b> Computer: Block diagram, Generations, types, Applications, Interconnecting the units of computer, performance of computer. Computer Security: threats and security attack, Malicious software, Hacking, Security services, Firewall.</p>		
2	<p><b>Introduction To Digital Computer –</b> Data Representation – Data Types – Complements – Arithmetic Operations – Representations – Fixed –Point, Floating – Point , Decimal Fixed – Point – Binary Codes- Logic Gates, Boolean Algebra, Map Simplification – Combinational Circuits: Half-Adder, Full Adder- Flip Flops - Sequential Circuits</p>		
3	<p><b>Introduction To Digital Components And Micro Operations</b> ICs – Decoders – Multiplexers – Registers – Shift Registers – Binary Counters – Memory Unit – Register Transfer Language – Register Transfer – Bus And Memory Transfers – Arithmetic, Logic And Shift Micro Operations , Arithmetic Logic Shift Unit.</p>		

4	<p><b>Computer organization And Programming –</b></p> <p>Instruction Codes – Computer Registers – Computer Instructions – Timing And Control – Instruction Cycle – Memory Reference Instructions – I/O And Interrupt – Machine Language – Assembly Language – Assembler - Program Loops – Programming Arithmetic And Logic Operations – Subroutines – I/O Programming.</p>
5	<p><b>Memory Organization And CPU –</b></p> <p>Memory Hierarchy – Main Memory – Auxiliary Memory – Associative Memory – Cache Memory – Virtual Memory – Memory Management Hardware – CPU: General Register Organization – Control Word – Stack Organization – Instruction Format – Addressing Modes – Data Transfer And Manipulation – Program Control, RISC</p>
6	<p><b>Input – Output Organization</b> Peripheral Devices – Input-Output Interface – Asynchronous Data Transfer – Modes Of Transfer – Priority Interrupt – DMA – IOP – Serial Communication</p>
7	<p><b>Pipeline And Vector Processing</b> – Parallel processing – Pipelining - Arithmetic pipeline - Instruction pipeline - RISC pipeline, - Vector processing - Array processor</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
103	Database Management Systems	3L + 1T + 0P = 4C	2018-19
<p><b>Course Objective:</b>  The goal of this course is to teach the fundamentals of the database systems at a master level. A variety of topics will be covered that are important for modern databases in order to prepare the students for real life applications of databases. The course aims to impart knowledge of the concepts related to database and operations on databases. It also gives the idea how database is managed in various environments with emphasis on security measures as implemented in database management systems.</p>			
<p><b>Expected Outcome :</b>  After going through this course a student should be able to:</p> <ul style="list-style-type: none"> <li>• Understand the concept of database and techniques for its management.</li> <li>• Design different data models at conceptual and logical level and translate ER Diagrams to Relational Data Model.</li> <li>• Normalize the database.</li> <li>• Write queries using Relational Algebra.</li> <li>• Describe the file organization schemes for DBMS.</li> <li>• Describe and use features for Concurrency and Recovery.</li> <li>• Understand data security standards and methods.</li> <li>• Understand the fundamentals of Distributed Database Systems.</li> </ul>			
<p><b>References :</b>  <b>Books:</b></p> <ol style="list-style-type: none"> <li>1. "Fundamentals of Database Systems" Global Edition By <u>RamezElmasri</u>, <u>Shamkant B. Navathe</u></li> <li>2. "Database System and Concepts" A Silberschatz, H Korth, S Sudarshan, McGraw-Hill.</li> </ol>			
<p><b>Suggested MOOC :</b>  Please refer these websites for MOOCS:  NPTEL / Swayam  www.edx.com  www.coursera.com</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction to DBMS:</b>  Difference between Data, Information, Data Processing &amp; Data Management. File Oriented Approach, Database oriented approach to Data Management, Need for DBMS, Characteristic of Database, Database Architecture: Levels of Abstraction, Database schema and instances, 3 tier architecture of DBMS, Data Independence. Database users, Types of Database System. Database Languages, DBMS interfaces.</p>		
2	<p><b>Data Modeling in Database :</b>  Data Models, Logical Data Modeling: Hierarchical Data Model, Network Data Model, Relational Data Model. Conceptual Data Modeling: Entity Relationship Model, Entities, Attributes, Types of Attributes, Relationships, Relationship set, Degree of relationship Set, Mapping Cardinalities, Keys, ER Diagram Notations, Roles Participation: Total and Partial, Strong and Weak Entity Set. The extended entity relationship (EER) model,</p>		

	<p>Subclass, Superclass, generalization, specialization, Attribute Inheritance. <b>Relational Data Model</b> Codd's Rules for RDBMS, Translating ER Diagram to Relational Database.</p>
3	<p><b>Normalization and Relational Algebra:</b> Normalization Vs De-Normalization, Decomposition, Lossy and Lossless Decomposition, Functional Dependencies, Normal forms 1NF, 2NF, 3NF, BCNF, Case Studies on Normalization. <b>Relational Algebra:</b> Keys: Composite, Candidate, Primary, Secondary, Foreign, Relational Relational Algebra Operators: Select, Project, Divide, Rename. Set Operations: Union, Intersect, Difference, And Product, Joins: Outer Joins, Inner Joins with example.</p>
4	<p><b>File Structures and Data Administration:</b> File Organization, Overview of Physical Storage Media, Magnetic Disk, RAID, Tertiary Storage, Storage Access, Data Dictionary Storage, Organization of File (Sequential, Clustering), Indexing and Hashing, Basic Concepts, indices, B+ Tree index file, B- tree index file, Static hashing, Dynamic Hashing.</p>
5	<p><b>Concurrency Control And Recovery Techniques:</b> <b>Concurrency Control:</b> Single User and Multiuser systems, Multiprogramming and Multiprocessing, Basic Database access operations, Concept of transaction, transaction state, ACID properties, Schedules, Serializability of schedules., Concurrency Control, Need for Concurrency control, lock based protocols, timestamp based protocols, Multiple granularity, Multiple Version Techniques, Deadlock and its handling, Wait-Die and Wound-Wait, Deadlock prevention without using timestamps, Deadlock detection and time outs, Starvation <b>Recovery Techniques:</b> Database Recovery, Types of Failures, Storage Structure: Volatile, Non Volatile and stable storage, Data access. Recovery and atomicity, Recovery Techniques / Algorithms: Log Based Recovery, Check points, Shadow Paging</p>
6	<p><b>Data Administration And Security:</b> Data administration, Role and Responsibility of DBA, Creating/Deleting/Updating table space, Database Monitoring, User Management, Basic data security principles – user privileges, data masking, encryption and decryption. Data Security Implementation, revalidation of user, role, privileges. Data Quality Management, Basic quality principles, data quality audit, data quality improvement</p>
7.	<p><b>Introduction to Advance Databases:</b> <b>Distributed Database:</b> Heterogeneous and Homogeneous Databases, Distributed database features and needs, Advantages and Disadvantages, Distributed Database Architecture. Levels of distribution, transparency, replication. Fragmentation. <b>Data Warehouse:</b> Data Warehouse defined, Need for Data Warehouse, Characteristics of Data Warehouse, Multidimensional Data Model, OLTP vs. OLAP, A three tier Data Warehouse Architecture, Data Mart Vs. Data Warehouse.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
104	Discrete Structures	2L + 1T + 0P = 3C	2018-19
<b>Course Objective:</b> 1.To learn basic mathematical course ,eg. Sets, Functions, Graph. 2. To be familiar with formal mathematical reasoning eg. Logic proofs. 3.To improve problem solving skills. 4. To see the connections between Discrete structure Computer Science			
<b>Expected Outcome :</b> a)Apply standard Mathematical methods. b)Write code to implement solution procedures. c)Search for information in tacking advanced problems. d)Formulate AI problems mathematically.			
<b>Reference Books:</b> <b>Kenneth H.Rosen,Discrete Mathematics and its Applications Edition 6 th Tata McGraw Hil</b> <b>Schaum’s outlines Discrete Mathematics</b> <b>Discrete Mathematics N CH S N Lyneger and K.A. Venkatesh</b>			
<b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www. edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Propositional logic:</b> Proposition logic, basic logic, logical connectives, truth tables, tautologies, contradiction , normal forms(conjunctive and disjunctive), modus ponens and modus tollens, validity, predicate logic, universal and existential quantification. Notion of proof: proof by implication, converse, inverse, contrapositive, negation, and contradiction, direct proof, proof by using truth table, proof by counter example.		
2	<b>Set and Relation</b> <b>Set Theory:</b> Definition of Sets, Venn Diagrams, complements, Cartesian products, power sets, counting principle, cardinality and count ability (Countable and Uncountable sets), Partition of set , proofs of some general identities on sets, Fuzzy set ,Fuzzy set operation, rough set concept <b>Relation:</b> Definition, types of relation, composition of relations, domain and range of a relation, pictorial representation of relation, properties of relation, partial ordering relation ,Equivalence Relation, Relation Matrices		
3	<b>Function:</b> Definition and types of function (one to one, onto, Inverse ) composition of functions, Graph of Functions, Some Functions in Computer Science, Growth of Functions recursively functions.		
4	<b>Algorithm, the Integers and Matrices:</b> Algorithm, growth of function, Complexity of algorithm, Primes and Greatest Common Divisors, Integers algorithm		

5	<p><b>Partial Order and Structure: Partially Ordered,</b>  Sets ,Lexico graphics Order, Hasse Diagram, Maximal and Minimal elements of a Poset, Concept of Lattice, Boolean Functions, Logic Gates, Minimization of Combinational circuit</p>
6	<p><b>Combinatorics :</b>  Mathematical induction, recursive mathematical definitions, basics of counting, permutations, combinations, inclusion-exclusion, recurrence relations (nth order recurrence relation with constant coefficients, Homogeneous recurrence relations, Inhomogeneous recurrence relation), generating function (closed form expression, properties of G.F., solution of recurrence relation using G.F, solution of combinatorial problem using G.F.)</p>
7	<p><b>Modelling Computation:</b>  Language and Grammar, Finite State Machine with output, , Finite State Machine with no output, Language Recognition</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
105	Management Functions	2L + 1T + 0P = 3C	2018-19
<b>Course Objective:</b> 1. To orient the students to principles of management 2.To make them comprehend the process of management 3.To internalize the principles through rigorous assignments where they shall observe, analyze and infer the presence of principles transformed into practice.			
<b>Expected Outcome :</b> At the end of the course, the students shall acquire 1. Understanding of functions of management 2. Understand the principle of management woven in to the process of management 3. Understand how they are modified in to practice to suit the requirements 4. How IT influences the process of management			
<b>References :</b> <b>Books:</b> 1.H.Welrcih, Mark Cannice, H. Koontz, Management , A Global and Entrepreneurial Perspective , McGraw-Hill Companies, 12th edition. 2.P.C.Tripathi, P.N.Reddy, Principles and Practice of Management , Tata Mcgraw Hill , Third Edition 3. L.M. Prasad, Principles and Practice of Management, Seventh Edition 4. Stephan Robbins, Mary Coutler, Management

<b>Course Plan</b>			
Unit	Contents		
1	The need of Management Study , Process of Management , Characteristics of Professional Management , Brief Review of Management Thought Social Responsibility of Management		
2	Decision Making Process , Planning and Steps in Planning , Types of Plan Making Planning Effective , Case Study on Planning, MBO		
3	Organization, Meaning and Process , Departmentalization,, Organization Structure , Authority and Delegation , Centralization verses Decentralization , Team Work , Case Study		
4	Co-ordination – meaning and need , Techniques of establishing Co-ordination Difficulties in establishing co-ordination , Case Study		
5	Formal and Informal Organization, Manpower Planning , Recruitment and Performance Appraisal, Compensation and Incentives , issues related to Retention Case study		
6	An overview of Communication, Supervision and Direction , Leadership Styles , Control – need and types and control techniques . In addition there shall be tutorials of written examination type, field study and presentation.		
7.	<b>Case Studies</b>		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
106	Web Supporting Technologies	2L-0T-2P = 4C	2018-19
<b>Course Objectives :</b> <ul style="list-style-type: none"> <li>▪ To understand the basic concepts of the World Wide Web</li> <li>▪ To understand and practice HTML as markup language</li> <li>▪ To understand and practice embedded dynamic scripting on client side Internet Programming</li> <li>▪ To understand and practice web development techniques on client-side</li> <li>▪ To understand and practice server-side scripting</li> </ul>			
<b>Syllabus Outline:</b> <ul style="list-style-type: none"> <li>▪ Understanding of internet and intranet- working of WWW, types Protocols and working of HTTP and types of servers</li> <li>▪ UI Design - Markup Language: Introduction to HTML5 - Cascading Style Sheet: Introduction to CSS3.</li> <li>▪ Client Side Scripting using JAVASCRIPT - Introduction to JavaScript - Document Object Model -Event Handling - Controlling Windows &amp; Frames and Documents - Browser Management and Media Management - Object-Oriented Techniques in JavaScript - JQuery.</li> <li>▪ Server Side Scripting using PHP - Introduction to PHP - Programming basics - Reading Data in WebPages - Embedding PHP within HTML - Establishing connectivity with MySQL database.</li> </ul>			
<b>Expected Outcome :</b> Upon successfully completing this course the student will be able to <ul style="list-style-type: none"> <li>- Understand concept of internet and how it functions</li> <li>- Use HTML tag to format contents of web page</li> <li>- Use Cascading Style Sheets (CSS) to apply user defined look and feel</li> <li>- Apply Java Script to validate form data and generate dynamic contents</li> <li>- Make use of PHP to generate server side response using MYSQL as database</li> </ul>

### Syllabus/Course Outline

Unit	Contents
1	Understanding internet and intranet, Introduction to WWW, WWW Architecture, Concept of protocol and its types: SMTP, POP3, File Transfer, Overview of HTTP, HTTP request and response. Various web server, using Apache as web server, Installation of Apache, Apache Directory Structure, apache configuration, creating application folder,

	storing and accessing files from server
2	Types of Markup Language and HTML as markup language, basic structure of HTML, Head Section and elements of head section, Meta tags and external link tags HTML body content tags: header tags, Paragraph, span and pre tags, text formatting tags, Ordered and unordered list tag, Table tag, div tag, Frames and framesets, Anchor Links and named anchors, image tag and using image mapping for hotspot, working with forms: Form tag, POST and GET methods, working with Text input, Text Area, Checkbox and radio and other form elements;
3	Introducing CSS, Types of style sheets: inline, embedded and external style sheets, working with CSS properties: text properties, color and background properties, border and shading, box and block properties, positioning with CSS, various types of CSS selectors: universal, class, ID, child, descendent, adjacent sibling, attribute and query.
4	Client Side Scripting: Introduction to JavaScript, data types, Operators, conditional and iterative Statements, Introduction to arrays, arrays with methods, Math, String and Date objects, working with DOM: Window, Navigator, History, Location, Link, Anchor and form elements, functions and objects, methods, handling events and form validations
5	Advanced JavaScript: Browser Management and Media Management – Classes – Constructors – Object-Oriented Techniques in JavaScript – Object constructor and Prototyping - Sub classes and Super classes – JSON - JQuery and AJAX.
6	Why PHP and MySQL?, Server-side web scripting, Installing PHP, Adding PHP to HTML Syntax and Variables, PHP control structures and loop, Passing information between pages, Strings, Arrays and Array, Functions, Numbers, working with String and Regular Expressions
7	Concept of Cookies and sessions, when and how to use cookies and sessions, Using MySQL to create database and tables, using queries to inset and update data, using PHP to interact with MySQL, Displaying data from tables in tables, using form data to insert, update database, deleting data from table by getting criterion through forms, working with E-Mail

Course Number	Course Name	L-T-P- Credits	Year of Introduction
107	C Lab	0L +0T + 4P= 2C	2018-19
<b>Course Objective :</b>			
This is companion course of C Programming			
<b>Syllabus Broad Units:</b>			
This Companion course of C programming; Practical aspects of C programming towards problem solving is covered.			
<b>Expected Outcome :</b>			
The students will develop adequate programming skills with respect to following			
<ol style="list-style-type: none"> <li>1. Implement a real world problem using basic constructs of C language.</li> <li>2. Develop an application using Decision making and looping</li> <li>3. Make use of proper operators to solve problem.</li> <li>4. Make use of Arrays and pointers efficiently and handling strings.</li> <li>5. Comprehend the dynamic memory allocation and pointers in C.</li> <li>6. Able to define new data types using enum, structures and typedef.</li> </ol>			
<b>References (Books, Websites etc) :</b>			
<ol style="list-style-type: none"> <li>1. Let us C - Y.Kanetkar, BPB Publications</li> <li>2. Programming in C - Gottfried B.S., TMH</li> <li>3. The 'C' programming language - B.W.Kernighan, D.M.Ritchie, PHI</li> <li>4. Programming in ANSI C - Balaguruswami, TMH</li> <li>5. C- The Complete Reference - H.Sohildt, TMH</li> <li>6. A Structured Programming Approach using C – B.A. Forouzan&amp; R.F. Gillberg, THOMSON Indian Edition</li> <li>7. Computer fundamentals and programming in C – PradipDey&amp; ManasGhosh, OXFORD</li> </ol>			

### C Lab Outline

Sr. No	Programming Exercises
1	Compilation and Executing programs Arithmetic operations Use of Symbolic constants Demonstrating the following gcc options -o, -c, -D, -l, -I, -g, -E Note : <i>Algorithm of every program should be written. Properly document the programs using comments. Author name and date, purpose of each variable and constructs like loop and functions should be indicated/ documented.</i> <i>gcc or an equivalent compiler is assumed.</i>
2	Program to demonstrate the following <ul style="list-style-type: none"> <li>- Branching</li> <li>- Nested Branching</li> <li>- Looping</li> <li>- Selection</li> </ul>

3	<p>Working with functions</p> <ul style="list-style-type: none"> <li>- Writing function prototype and definition</li> <li>- Using functions to solve problems (Calling a function )</li> <li>- Using recursion</li> <li>- Storage classes - Using register, extern and static</li> </ul>
4	<p>Using debugger and Creating Libraries</p> <p>Important Commands - break, run, next, print, display, help</p> <p>Functions</p> <p>Creating Header file for Function Prototype</p> <p>Compiling and storing Function Definition in Library (archive) file</p>
5	<p>Arrays</p> <p>1D - Linear Search, Sort</p> <p>2D - Matrix operations</p> <p>Strings, Structure, Union</p>
6	<p>Pointers, Dynamic Memory Allocation</p> <p>Structure Pointer</p> <p>Array of Pointers, Ragged Arrays, Function pointer</p>
7	<p>Structures</p> <p>Making use of structures to define new types(user defined types)</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
108	Soft Skills	2L+0T+0P=2C	2018-19
<b>Course Objective :</b> <ol style="list-style-type: none"> <li>To provide Confidence building and soft skills development.</li> <li>To develop decision making and analytical skills.</li> <li>To let students make a transition from the academic mode to the corporate and entrepreneurial mode</li> </ol>			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>This course would be handy for those who are attending interviews at the company premises, even if it is arranged by the institute. You need to differentiate yourself as a better candidate than others, which is the key to get a job.</li> <li>This will go a long way in improving your career prospects by developing skills required by a practicing manager. Thus, you will be able to handle challenging corporate assignments. Being a fresher, you will be closely monitored by your superior. This course will give you confidence to impress them with your professional attitude.</li> <li>Industry expects to spot out people for better positions, with the qualities of leadership. This is where this program will help you acquire some of the qualities of leadership.</li> </ul>			
<b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
<b>Course Plan</b>			
<b>Sr. No</b>			
<b>1</b>	<b>Business Communication Skills – Email correspondence:</b> E-mail etiquette and Writing Skills, Features of Business Correspondence, Tips for writing Business E-mails, Do's and Don'ts of Business Communication, Examples and Exercises		
<b>2</b>	<b>The Art of Effective Communication:</b> Communication skills: the importance of removing barriers, Source, Encoding, Channel, Decoding, Receiver, Feedback, Johari's Window, Public Speaking and Presentation tips, Body Language Tips, Listening skills, Common Grammatical mistakes in Written and spoken communication, Negotiation		
<b>3</b>	<b>Time Management:</b> Importance of setting Tasks, Applying basic principles of Time management; identify productivity cycles, and set goals and priorities, Create a time management plan and a daily plan, Effectively utilize time by using technology and reducing time wastage. Manage interruptions, increase meeting productivity, overcome personal time wasters, and prevent personal work overloads, Screen and organize information to reduce information overload		
<b>4</b>	<b>How to create a winning CV:</b> Designing an Impressive CV, Defining the objective, Customizing the CV for each job, Identifying and Highlighting the right set of strengths, Presentation of academic and		

	professional achievements, Formatting Styles, Do's and Don'ts and common mistakes, Examples and Exercises
<b>5</b>	<p><b>How to prepare for Interview:</b></p> <p>Introspection: Knowing yourself, your comfortable areas or subjects, Companies, sectors, functions, Employer Research, Skill set and competency mapping, Attire and Etiquette : Greetings, posture, handshakes, manners and actions, Common Interview blunders, Frequently asked questions for Freshers and Experienced professionals, Simulated Interview Situations, Do's and Don'ts before an Interview, Common formats of Company Interview assessments, What to speak?, Latest developments about the specific sector for last 5 years, Study of regulators for sectors.</p>
<b>6</b>	<p><b>Preparing for Group discussion and aptitude test:</b></p> <p>Structure and Format of a GD, Difference between a Discussion &amp; an Argument, Observing, Reflecting and designing responses within a group, The art of being assertive and persuasive, Defending your turf, Defining the correct Body Language and posture, Deconstructing Topics, Common Do's and Don'ts, Practice and Exercise</p>
<b>7</b>	<p><b>Fear Factor: Removing Stage Fear</b></p> <p>Presentation Skills, Public Speaking skills, Importance of Eye Contact, Audience engagement, Forms of speech, Content Preparation, Debating, Extempore, Do's and Don'ts, Sample Exercises</p>

# **SEMESTER II**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
201	Data Structures and Algorithms	3L + 1T+ 0P= 4C	2018-19
<b>Course Objective :</b> <ul style="list-style-type: none"> <li>To make familiar with linear &amp; non linear data structures</li> <li>To develop skills to analyze the problem given and to design &amp; develop an efficient solution to given problem</li> <li>To develop capability to choose appropriate data structures for given problems</li> <li>To imbibe programming skills &amp; thereby making industry ready</li> </ul>			
Syllabus Broad Units :			
<b>Expected Outcome :</b> After undergoing this course, student will <ol style="list-style-type: none"> <li>Have thorough knowledge about data structures</li> <li>Ability to design&amp; develop program using linear data structures&amp; non linear data structures for solving problems</li> <li>Ability to choose appropriate data structures for problem solving</li> <li>Ability to use combination of these data structures for problem solving.</li> </ol>			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>Behrouz A. Forouzan and Richard F. Course Plan	
Unit	Contents
1	<b>Elementary Data Structures</b> - Basic concepts such as data object, array, and record; Operations and relations on data objects; definition of data structure; Built-in data types as examples of data structures; concept of abstract data type; notation to specify an abstract data type; concepts of pre-conditions and post-conditions; Implementation of an ADT in a language; Specification and implementation of simple data structures such as Integer, Rational, Currency, Date, Temperature, distance, Pay, Marks, Grade_card etc.
2	<b>Linear Data Structures</b> ( Representation in Memory and operations like insertion, deletion and traversal) – one and multidimensional array, Sparse Matrics, Pointer arrays, single link list, circular link list, double link list, applications of Linked list,: Sparse Matrix Manipulation,

	Polynomial Representation, Dynamic storage Management
3	<b>Particular Linear Data Structures</b> ( Representation in Memory and operations like insertion, deletion and traversal) - Stacks: Applications: Evaluation of Arithmetic Expression, implementation of recursion, factorial calculation, Quick Sort, Tower of Hanoi Problem, queues, circular queue, dequeues; Application of queues abstract data types; Array and linked list implementations of stacks, queues, and dequeues;
4	File Handling: Creation, reading writing in a file. Pattern Matching and Extraction of data from a file. Reading and writing from files.
5	<b>Hierarchical data structures</b> - General trees and related concepts; depth first and breadth first traversal of trees; n-ary trees and important properties of n-ary trees; binary trees and their properties; binary tree traversal algorithms. Applications of Trees. B Trees : B Tree indexing, Operations on a B Tree, SETS: Representation of Sets, Operations on Sets, Applications of Sets
6	<b>The problem of search</b> – linear and binary search algorithms and their efficiency; binary search trees and operations on binary search trees; Improving the efficiency of search through Balanced trees – AVL trees and Red-black trees, concepts of rotation. Hash tables and related concepts in detail.
7	<b>The problem of sorting</b> – The standard sort algorithms and their efficiencies; Merge sort and quick sort algorithms and their efficiencies. The binary heaps, their array implementation; Operations on heaps and heap sort algorithm.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
202	Operating Systems	3+1+0 = 4C	2018-19
<b>Course Objective:</b> The overall aim of this course is to provide a general understanding of how a computer works. This includes aspects of the underlying hardware as well as the structure and key functions of the operating system. Case studies will be used to illustrate and reinforce fundamental concepts.			
Syllabus Broad Units : 7			
<b>Expected Outcome :</b> At the end of this course, student should be able to <ul style="list-style-type: none"> <li>• Explain the concepts of process, address space, and file</li> <li>• Compare and contrast various CPU scheduling algorithms</li> <li>• Understand the differences between segmented and paged memories, and be able to describe the advantages and disadvantages of each</li> <li>• Compare and contrast polled, interrupt-driven and DMA-based access to I/O devices</li> <li>• Understand functioning and working of Windows as well as Unix operating system.</li> </ul>			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>1. Operating systems design and implementation by Andrew Tanenbaum and Albert Woodhull</li> <li>2. Operating systems concept and design by Milan Milenkovic</li> </ol>			
<b>Suggested MOOC :</b> Please refer these websites for MOOCS: <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a> <a href="http://www.alison.com">www.alison.com</a>			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Unit1: Introduction to Operating system:</b> Definition, Importance and functions of operating systems, Types: Batch, Timesharing, Multitasking, multiprogramming, multiprocessing, Online operating system, Real time, distributed operating systems. Various Views: Command language users view, system call users view. Operating system concept: Processes, Files, The shell. Structures: Monolithic system, layered system, Virtual Machine, Client server model.		
2	<b>Processes:</b> Process concept, Implicit and explicit tasking, process relationship (cooperation and competitions). Operating systems view of processes OS services for process management. Scheduling and types of Schedulers, Scheduling algorithms: First come first served, shortest remaining time next, Time slice scheduling, Priority based preemptive scheduling, multiple level queues, multiple level queues with feedback, Guaranteed scheduling, Lottery scheduling. Performance Evolution.		

3	<p><b>Memory Management:</b>  Basic Memory Management, monoprogramming without paging or swapping, multiprogramming with fixed partitions. Swapping: Memory Management with bit maps, and linked list. Virtual Memory, Page replacement algorithms: Optimal Page replacement algorithm, Not recently Page replacement algorithm, First in first out Page replacement algorithms, second chance Page replacement algorithms, clock Page replacement algorithms, least recently Page replacement algorithms, simulating LRU in software. Design issues for paging. Segmentation: Implementation of pure segmentation, segmentation with paging with example.</p>
4	<p><b>Interprocess communication and Synchronization:</b>  Need, Mutual Exclusion, Semaphore definition, Busy- wait implementation, characteristics of Semaphore. Queuing implementation of semaphore, Producer consumer problem. Critical region and conditional critical region, what are monitors? Need of it, format of monitor with example. Messages: Basics, issues in message implementation, naming, copying, Synchronous vs asynchronous message exchange, message length, ICS with messages, interrupt signaling via messages.</p>
5	<p><b>Deadlocks:</b>  Conditions to occurs the deadlock, Reusable and consumable resources, deadlock prevention, Deadlock Avoidance, resource request, resource release, detection and recovery,</p>
6	<p><b>File systems:</b>  Files- naming, structure, types, access, attributes, operation. Directories- system, path and operations. Implementing file and directories, disk space management, file system reliability and performance. Environment, Security flaws, Security attacks, principles for Security, user authentication. Protection domains, access control lists, capabilities.</p>
7	<p><b>Input/ output:</b>  Principles of I/O hardware: I/O devices, device controller, DMA, Principles of I/O software : goals, interrupt handler, device drivers, Device independent I/O software. RAM Disk Hardware and software, DISK Hardware and software.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
203	Software Engineering	3L + 1T +0P= 4C	2018-19
<b>Course Objective:</b> To introduce the current methodologies involved in the design and development of Software over its entire life cycle.			
<b>Expected Outcome :</b> At the end of this course, student should be able to: <ul style="list-style-type: none"> <li>• Understand life cycle models, Requirement elicitation techniques, understand the concept of Analysis and Design of software.</li> <li>• Implement software engineering concepts in software development to develop quality software which can work on any real machine.</li> </ul>			
<b>References (Books, Websites etc):</b> <ul style="list-style-type: none"> <li>• SOFTWARE ENGINEERING A PRACTITIONERS APPROACH seventh edition BY Roger S. Pressman McGraw Hill International Edition.</li> <li>• Software Engineering by Sommerville, Pearson Education, 7th edition</li> <li>• Software Engineering by K.K. Aggarwal&amp;Yogesh Singh, New Age International Publishers.</li> </ul>			
<b>Course Plan</b>			
Unit	Contents		
1.	<b>Introduction to Software Engineering</b> Software, software characteristics, Difference between software engineering and software programming, Members involved in software development. Need of Feasibility study, types of Feasibility study, Cost Benefit Analysis. General software development life cycle with all phases. Overview of software models (Waterfall, Prototyping, Spiral and Rapid Application Development model). Agile Software Development methodologies.		
2.	<b>Requirement Engineering Concepts and Methods</b> What is Requirement Engineering, Types of requirements, Requirement elicitation techniques- Traditional methods and Modern methods, Verification and validation process. Principles of Requirement Specification, Software Requirement Specification document Outline Characteristics of good SRS: - correct, complete, unambiguous, consistent, modifiable, traceable, Understandable Case study on DFD and ERD mechanism.		
3.	<b>Design Concept and Methods</b> Software Design and software Engineering. Software Design process and principles, Design concepts: Abstraction, Refinement, Modularity, Architecture, Control hierarchy, Structural partitioning, Data structure, Procedure and Data hiding  Modular design: Functional independence, Cohesion and Coupling concepts Architectural design process: Transform flow and Transaction flow User Interface design: - Elements of good design, design issues, Features of modern GUI, Guidelines for interface design Procedural design: - Structured Programming, Program Design Language Report Design		

4.	<p><b>Software Quality Assurance</b>  Quality concept: (quality, quality control, quality assurance, cost of quality), SQA activities, SQA plan.  Formal Technical review: Review meeting, review reporting and review guidelines  Software Configuration Management: - What is configuration management, Baseline, Software Configuration items.  SCM process- Identification of objects, Version control and Change control</p>
5	<p><b>Software Testing and Testing Strategies</b>  Software Testing Fundamentals:-Testing Objectives and Testing Principles.  White Box Testing, Black Box Testing: - Graph Based Testing Methods, Equivalence Partitioning, Boundary Value Analysis.  Testing Strategies for Conventional Software: - Unit Testing, Integration Testing (Top-down and Bottom-up Integration)  Validation Testing: - Validation Test Criteria, Configuration Review, Alpha and Beta Testing  System Testing: - Recovery Testing, Security Testing, Stress Testing, Performance Testing, Deployment Testing  The Art of Debugging – The Debugging Process.</p>
6	<p><b>Maintenance and Reengineering</b>  Software maintenance: - Importance and types of maintenance, Concept of Re-engineering, Software reengineering process model Reverse engineering: - to understand process, data and user interfaces  Restructuring: Code and Data restructuring  Forward engineering: - for client server architecture and user interfaces</p>
7	<p><b>Computer Aided Software Engineering</b>  What is CASE? Importance of CASE tools  Various Tools: -  1) Information engineering  2) Project planning tools  3) Risk analysis tools  4) Project management and testing tools  5) Tools for Quality assurance  6) Software Configuration Management  7) Analysis and design  8) Database management  9) Interface design and programming tools</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
204	Statistical Techniques	2+1+0 = 3C	2018-19
<b>Course Objective:</b> The main objective of this course is to acquaint students with some basic concepts in Statistics. They will be introduced to some elementary statistical methods of analysis of data.			
Syllabus Broad Units :			
<b>Expected Outcome :</b> (i) To compute various measures of central tendency, dispersion, skewness and kurtosis. (ii) To analyze data pertaining to attributes and to interpret the results. (iii) To compute the correlation coefficient for bivariate data and interpret it. (iv) To fit linear, quadratic and exponential curves to the bivariate data to investigate relation between two variables. (v) To fit linear regression model to the bivariate data (vi) They are able to construct predicate model.			
<b>Reference Books:</b> <b>Fundamentals of Statistics , S.C.Gupta, Seventh Edition ,Himalaya Publishing House</b>			
<b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com www.coursera.com			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to Statistics:</b> Meaning of Statistics as a Science, Importance of Statistics Scope of Statistics, Statistical organizations in India and their functions: CSO, ISI, NSS, IIPS (Devnar,Mumbai), Bureau of Economics and statistics, Types of data: Primary data, Secondary data , Cross-sectional data, time series data, directional data, Classification: Raw data and its classification, ungrouped frequency distribution,, grouped frequency distribution, cumulative frequency distribution, and relative frequency distribution.		
2	<b>Measures of Central Tendency</b> Concept of central tendency of statistical data, Statistical averages, characteristics of a good statistical average. Arithmetic Mean (A.M.): Definition, effect of change of origin and scale, combined mean of a number of groups, merits and demerits, trimmed arithmetic mean. Mode and Median: Definition, formulae (for ungrouped and grouped data), merits and demerits, Quartiles, Deciles and Percentiles (for ungrouped and grouped data), Geometric Mean (G.M.): Definition, formula, merits and demerits. Harmonic Mean (H.M.): Definition. Formula, merits and demerits. mean Weighted Mean: weighted A.M., G.M. and H.M. Measures of Dispersion :Concept of dispersion, characteristics of good measure of dispersion. Range, Quartile deviation Mean deviation: Definition, merits and demerits, Variance and standard deviation		
3	<b>Moments, Skewness and Kurtosis</b> Raw moments ( $m'_r$ ) for ungrouped and grouped data. , Central moments ( $m_r$ ) for ungrouped and grouped data, Concept of skewness of frequency distribution, positive skewness, negative skewness, symmetric frequency distribution, Karl Pearson's coefficient		

	of skewness, Measures of skewness based on moments ( $\beta_1, \gamma_1$ ) Concepts of kurtosis, Measures of kurtosis based on moments ( $\beta_2, \gamma_2$ ).
4	<p><b>Theory of Attributes</b></p> <p>Attributes: Concept of a Likert scale, classification, notion of manifold classification, dichotomy, class- frequency, order of a class, positive class frequency, negative class frequency, ultimate class frequency, relationship among different class frequencies (up to three attributes), and dot operator to find the relation between frequencies, fundamental set of class frequencies. Consistency of data upto 2 attributes. Concepts of independence and association of two attributes. Yule's coefficient of association (Q),</p>
5	<p><b>Correlation:</b></p> <p>Bivariate data, Scatter diagram and interpretation., Concept of correlation between two variables, positive correlation, negative correlation, no correlation. variance between two variables , Karl Pearson's coefficient of correlation (r) , Spearman's rank correlation coefficient, compute Karl Pearson's correlation coefficient between ranks</p>
6	<p><b>Regression:</b> Meaning of regression, difference between correlation and regression, Concept of error in regression, error modeled as a continuous random variable. Simple linear regression model Estimation of a, b by the method of least squares. Interpretation of parameters.</p>
7	<p><b>Times Series</b></p> <p>Introduction, Component of a time series, Analysis of time series, Mathematical models for time series, Measurement of Seasonal Variations, Measurement of Cyclical Variations ,Measurement of Irregular Variations.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
205	Financial Accounting	2L+1T+0P=3C	2018-19
<b>Course Objective :</b> <ol style="list-style-type: none"> <li>To impart basic accounting knowledge</li> <li>To enable the students to understand basic accounting principles, practice and its applications in modern business.</li> </ol>			
<b>Prerequisite :</b> Students should know the basic principles of accounts and concepts .			
<b>Expected Outcome :</b> <ol style="list-style-type: none"> <li>The knowledge of accounting and its principles at basic level.</li> <li>Practical's in Tally and Excel for Financial Accounting assignments</li> </ol>			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>Anil Chowdhry , Fundamentals of Accounting &amp; Financial Analysis (Pearson Education)</li> <li>M.E.ThukaramRao, Accounting for Managers.( New Age International Publishers)</li> <li>M.G.Patkar, Book-Keeping &amp;Accountancy.Std XI( FYJC) Commerce</li> <li>Dr. S. N. Maheshwari , Financial Accounting For Management: (Vikas Publishing House)</li> <li>Robert Anthony, David Hawkins , Business Accounting. (Tata McGraw –Hill)</li> </ol>			
<b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	<b>Unit 1: Introduction:</b> Need for Accounting, Financial Accounting-definition, Scope and objectives. Accounting v/s Book Keeping. Limitations of Financial Accounting, End users of financial statements. Accounting Concepts and Conventions, Branches of accounting. Accounting Standard-Scope and Functions.		
2	<b>Unit 2: Journal and Ledger:</b> Journal-importance and utility, classification of accounts, journalizing of transactions. Ledger- meaning and utility, posting and balancing of account, Trial Balance- meaning and purpose, preparation of a trial balance.		
3	<b>Unit 3: Preparation final accounts:</b> Preparation of Trading and Profit & Loss Account and Balance Sheet of sole proprietary business.		
4	<b>Unit 4: Depreciation:</b> Meaning, need & importance of depreciation, methods of charging depreciation.(WDV & SLM)		
5	<b>Unit 5: Introduction to International Accounting Standards:</b> Need for International Financial Reporting Standards (IFRS), Disclosure of Accounting Policies, reporting needs of emerging economies, IFRS for Small and Medium Enterprises(SMEs).		
6	<b>Unit 6:Computerized Accounting:</b> Computers and Financial application, Accounting Software packages. (Orientation level)		

7	<b>Unit-7: Practical Applications</b> on Tally package for accounting and its Implementation . Accounting formulas in Excel and its implementation for practical assignments

Course Number	Course Name	L-T-P- Credits	Year of Introduction
206	Database Management Systems Lab	2L+0T+2P=4C	2018-19
<b>Course Objective :</b> <ul style="list-style-type: none"> <li>The main objective is to teach the concepts related to database its techniques and Operations.</li> <li>SQL (Structured Query Language) is introduced in this subject.</li> <li>This helps to create strong foundation for application of database design.</li> </ul>			
<b>Pre-requisites:</b> <ul style="list-style-type: none"> <li>Concept of Database Management Systems,</li> <li>Familiarity with data processing concepts and applications.</li> </ul>			
<b>Expected Outcome :</b> At the end of this course, students should be able to: <ul style="list-style-type: none"> <li>Understand the theoretical and physical aspect of a relational database.</li> <li>Implementation of RDBMS concepts through Oracle.</li> <li>Construct Simple and complex queries on sample datasets</li> <li>Writing PL/SQL blocks</li> </ul>			
References (Books, Websites etc.):1. IvanBayross SQL,PL/SQLTheProgramming LanguageofOracle 3rd Revised Edition BPB Publications.			
<b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to Oracle and SQL:</b> History, Features, Versions of Oracle, Database Structure: Logical Structure and Physical Structure, Oracle Architecture: System Global Area Processes: Server Processes, Background Processes, Tools of Oracle: SQL * Plus, PL/SQL, Forms, Reports, Pre Compilers:SQL Loader, Import, Export. <b>Introduction to SQL:</b> Keywords, Delimiters, Literals, Data Types, Components of SQL: <b>DDL Commands</b> – Defining a database in SQL, Creating table, changing table definition, removing table, Creating Tables with constraints on row level and column level, primary key, foreign key, check. Altering Constraints. <b>DML Commands</b> - Inserting, updating, deleting data, <b>DQL Commands:</b> Select Statement with all options. Renaming table, Describe Command, Distinct Clause, Sorting Data in a Table, Creating table from a table, Inserting data from other table, Table alias, and Column alias. <b>DCL commands</b> - Granting and Revoking Permissions		
2	<b>Operators and Functions:</b> <b>Operators:</b>		

	<p>Arithmetic, Logical, Relational, Range Searching, Pattern Matching, IN &amp; NOT IN Predicate, all, % any, exists, not exists clauses, Set Operations: Union, Union All, Minus, Intersect, Grouping data.</p> <p><b>Functions:</b> Aggregate Functions, Numeric Functions, String Functions , Date Functions, Conversion Functions, Miscellaneous Sub queries</p>
3	<p><b>Joins:</b> Relating data through join concept. Simple join, equi join, non equi join, Self join, Outer join</p>
4	<p><b>Database Objects:</b> <b>Views:</b> Introduction, Creating a View, Selecting data from a view, Updateable views, Views on multiple tables, Destroying a View.</p> <p><b>Sequences:</b> Introduction, Creating a Sequence, Altering a Sequence, Referencing a Sequence, Dropping a Sequence.</p> <p><b>Index:</b> Introduction, Creating Index, Simple Index, Unique Index, Reverse Key Index, Dropping Index.</p>
5	<p><b>Introduction To PL/SQL:</b> Introduction, Advantages, PL/SQL Block, PL/SQL Execution Environment, PL/SQL Character set, Literals, Data types, PL/SQL Block: Attributes %type, %rowtype, Variables, Constants, Displaying User Message on screen, Conditional Control in PL/SQL, Iterative Control Structure: While Loop, For Loop, Goto Statement, Commit, Rollback, Savepoint</p>
6.	<p><b>Cursor Management and Triggers:</b> <b>Cursor:</b> Explicit &amp; Implicit Cursor, Declaring Cursor Variables, Constrained &amp; Unconstrained Cursor Variables, Opening Cursor, Fetching Cursor into Variables, Closing Cursor, Cursor For Loops, Parametric Cursors.</p> <p><b>Triggers:</b> Definition, Syntax, Parts of triggers: statement, body, restricted, Types of triggers: Enabling &amp; disabling triggers.</p>
7	<p><b>Stored Procedures / Functions and Exception Handling:</b> Introduction, How oracle executes procedures/ functions, Advantages, How to create Procedures &amp; Functions, Examples.</p> <p><b>Error Handling in PL/SQL:</b> Exception Handling &amp; Oracle Engine, Oracles Named Exception Handlers, User Named Exception Handlers.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
207	Data Structures Lab	0L+0T+4P =2C	2018-19

**Course Objective :**

This is companion course of Data Structures and Algorithm

**Syllabus Broad Units:**

This Companion course of Data Structure and algorithm. Algorithms to use different data structures are covered in theory. Students will implement C Programs for these data structures.

**Expected Outcome :**

The students will develop adequate programming skills with respect to following

1. Implement a real world problem using appropriate data structure.
2. Implement data structures like array, stack, queue, linklist and applications of these data structures.
3. Use files for reading, writing and manipulation.
4. Make use of appropriate searching and sorting techniques appropriately.

**References (Books, Websites etc) :**

1. Data Structures using C - Y.Kanetkar, BPB Publications
2. Yashawant Kanetkar, BPB Publication
3. Behrouz A. Forouzan and Richard F. Gilberg , 2nd Edition, Thomson, 2003, Computer Science A Structured Programming Approach Using C
4. Basavraj S Anami, Shanmukhappa Angadi, Sunil Kumar S Manvi, PHI Publications, 2010. A Holistic approach to learning C.
5. Andrew Tenenbaum, Thomson, 2005, Data Structures with C. Robert Kruse & Bruce Leung, Data Structures & Program Design in C, Pearson Education,

**Suggested MOOC :**

Please refer these websites for MOOCS:

NPTEL / Swayam

[www.edx.com](http://www.edx.com)

[www.coursera.com](http://www.coursera.com)

## DS Lab Outline

Sr. No	Programming Exercises
<b>1</b>	<p>Specification and implementation of simple data structures such as Integer, Rational, Currency, Date, Temperature, distance, Pay, Marks, Grade_card etc.</p> <p>Use Linux environment to execute C Programme.            Note :<i>Algorithm of every program should be written. Properly document the programs using comments. Author name and date, purpose of each variable and constructs like loop and functions should be indicated/ documented. gcc or an equivalent compiler is assumed.</i></p>
<b>2</b>	<p>Program to demonstrate the following:</p> <ul style="list-style-type: none"> <li>- insertion, deletion and traversal in one and multidimensional array, single link list, circular link list, double link list,</li> </ul> <p>Addition of Polynomial using array/ link list</p>
<b>3</b>	<p>insertion, deletion and traversal in Stacks, queues, circular queue, deque, :</p> <p>Programs to demonstrate:</p> <ul style="list-style-type: none"> <li>- Evaluation of Arithmetic Expression,</li> <li>- implementation of recursion like factorial calculation, Quick Sort, Tower of Hanoi Problem</li> <li>- linked list implementations of stacks, queues, and deque;</li> </ul>
<b>4</b>	<p>Programs to demonstrate:</p> <ul style="list-style-type: none"> <li>- Creation, reading writing in a file.</li> <li>- Pattern Matching and Extraction of data from a file.</li> <li>- Reading and writing from files.</li> </ul>
<b>5</b>	<p>Programs to demonstrate:</p> <ul style="list-style-type: none"> <li>- binary tree traversal</li> <li>- depth first and breadth first traversal of trees</li> </ul>
<b>6</b>	<p>Programs to demonstrate:</p> <ul style="list-style-type: none"> <li>- linear and binary search algorithms and their efficiency;</li> <li>- The standard sort algorithms (bubble,selection,insertion) and their efficiencies;</li> <li>- Merge sort and quick sort algorithms and their efficiencies.</li> </ul>

# **SEMESTER III**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
301	Artificial Intelligence	3L+1T+0P = 4C	2018
<p><b>Course Objective :</b>  Students After completion of the course will get the knowledge of area like machine learning, robotics, natural language processing, and multi-agent systems.  Students should be able to:</p> <ul style="list-style-type: none"> <li>• Representation an AI problem or domain model, and construct domain models in that representation</li> <li>• Choose the appropriate algorithm for reasoning within an AI problem domain</li> <li>• Implement and debug core AI algorithms in a clean and structured manner</li> <li>• Design and analyze the performance of an AI system or component</li> <li>• Describe AI algorithms and representations and explain their performance, in writing and orally</li> </ul>			
<p><b>Expected Outcome :</b>  At the end of the course a student should be able:</p> <ul style="list-style-type: none"> <li>• Understand various search methods</li> <li>• Use various knowledge representation methods.</li> <li>• Understand various Game Playing techniques</li> <li>• Use Prolog Programming language using predicate logic</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <ul style="list-style-type: none"> <li>• “Artificial Intelligence” -By Elaine Rich And Kevin Knight (2nd Edition) Tata McGraw-Hill</li> <li>• Artificial Intelligence: A Modern Approach, Stuart Russel, Peter Norvig, PHI</li> <li>• Introduction to Prolog Programming By Carl Townsend.</li> <li>• “PROLOG Programming For Artificial Intelligence” -By Ivan Bratko( Addison-Wesley)</li> <li>• “Programming with PROLOG” –By Klocksins and Mellish.</li> </ul>

### Syllabus:

Unit	Contents
1	<p><b>Introduction:</b>  What is AI? ,The AI Problems, Background/history, What Is An AI Techniques, The Level Of The Model, Criteria For Success, Some General References, High-level overview of field, State of the art.</p>
2	<p><b>Introduction and historical perspective, Hard and Soft AI –</b>  disciplines and applications, Theories of Intelligence, Detecting and Measuring Intelligence, Knowledge based approach, the prepare- deliberate engineering trade-off, Procedural v/s Declarative knowledge, Criticism of symbolic AI, Knowledge representation, desirable properties of KR schemata, Use of predicate calculus in AI.  Problems, State Space Search &amp; Heuristic Search Techniques:Defining The Problems As</p>

	A State Space Search, Production Systems, Production Characteristics, Production System Characteristics, And Issues In The Design Of Search Programs, Additional Problems. Generate – And-Test, Hill Climbing, Best-First Search, ProblemReduction, ConstraintSatisfaction, Means-Ends Analysis.
3	<b>Knowledge Representation Issues:</b> Representations And Mappings, Approaches To Knowledge Representation.Using Predicate Logic: Representation Simple Facts In Logic, Representing Instance And Isa Relationships, Computable Functions And Predicates, Resolution. Representing knowledge Using Rules: Procedural Versus Declarative Knowledge, Logic Programming, Forward Versus Backward Reasoning
4	<b>Symbolic Reasoning under Uncertainty:</b> Introduction To Non-monotonic Reasoning, Logics For Non monotonic Reasoning.Statistical Reasoning: Probability And Bays' Theorem, Certainty Factors And Rule-Base Systems, Bayesian Networks, Dumpster-Shafer Theory, Fuzzy Logic.Weak Slot – and-Filler Structure. Semantic Nets, Frames. Strong Slot and Filler Structures : Conceptual Dependency, Scripts, CYC
5	<b>Game Playing:</b> Overview, And Example Domain: Overview, MiniMax, Alpha-Beta Cut-off, Refinements, Iterative deepening, The Blocks World, Components Of A Planning System, Goal Stack Planning, Nonlinear Planning Using Constraint Posting, Hierarchical Planning, Reactive Systems, Other Planning Techniques.Understanding: What is understanding? , What makes it hard?, As constraint satisfaction
6	<b>Natural Language Processing:</b> Introduction, Syntactic Processing, Semantic Analysis, Semantic Analysis, DiscourseAnd Pragmatic Processing, Spell Checking. Connectionist Models: Introduction: Hopfield Network, Learning In Neural Network, Application Of Neural Networks, Recurrent Networks, Distributed Representations, Connectionist AI AndSymbolic AI.
7	<b>Introduction to Prolog :</b> Introduction To Prolog: Syntax and Numeric Function, Basic List Manipulation Functions In Prolog, Functions, Predicates and Conditional, Input, Output and LocalVariables, Iteration and Recursion, Property Lists and Arrays, Miscellaneous Topics, LISP and Other AI Programming Languages

Course Number	Course Name	L-T-P- Credits	Year of Introduction
302	Computer Networks	3L+1T+ 0P = 4C	2018
<p><b>Course Objective:</b> The key objective is to acquire a foundational understanding of computer network and communication technologies. Networking concepts will be illustrated using TCP/IP networks.</p>			
<p><b>Expected Outcome :</b> At the end of the course a student should be able:</p> <ul style="list-style-type: none"> <li>• Students will acquire a good knowledge of the computer network, its architecture and operation.</li> <li>• Student will be able to pursue his study in advanced networking courses (This knowledge will help them to create base for the Network Electives to be studied in the next semesters).</li> <li>• Students will be able to follow trends of computer networks. So, students will get exposed to advanced network technologies like MANET, WSN, and 7G, IoT.</li> </ul>			
<p><b>References (Books, Websites etc) :</b> <b>Text Books:</b></p> <ul style="list-style-type: none"> <li>• A.S. Tanenbaum, <b>Computer Networks</b> (4<sup>th</sup> ed.), Prentice-Hall of India, Latest Edition</li> <li>• W.Behrouz Forouzan and S.C. Fegan, <b>Data Communication and Networking</b>, McGraw Hill, Latest Edition</li> </ul> <p><b>Reference Books:</b></p> <ul style="list-style-type: none"> <li>• Network Essential Notes GSW MCSE Study Notes</li> <li>• Internetworking Technology Handbook CISCO System</li> <li>• Introduction to Networking and Data Communications Eugene Blanchard</li> <li>• Computer Networks and Internets with Internet Applications Douglas E. Comer</li> </ul>			
<p><b>Suggested MOOC :</b> NPTEL: <a href="http://www.nptel.ac.in/courses/106106091/">http://www.nptel.ac.in/courses/106106091/</a></p>			

### Syllabus:

Unit	Contents
1	<p><b>Introduction to Computer Network:</b> What is Computer Network? Network Goals and Motivations, Application of Networks, Network Topologies, Classification of Networks, Network software: Network Protocols, Protocol Hierarchies, Design issues for the Layers, Connection Oriented and Connectionless Services, Service Primitives, Relation of services to Protocols, Network Models: The OSI Reference Model, The TCP/IP Reference Model</p>
2	<p><b>Basics of Data Transmission / Physical Layer:</b> Analog and Digital Signals, Data Rate, Transmission Impairment, Signal Measurement: Throughput, Propagation Speed and Time, Wavelength, Frequency, Bandwidth, Spectrum Transmission Media&amp; its Characteristics: Guided and Unguided Media, Synchronous and Asynchronous Transmission, Multiplexing: FDM, WDM, TDM, Switching: Circuit, Message and Packet Switching, Mobile Telephone Systems: 1G to 7G</p>
3	<p><b>Network Layer: Network Layer Design Issues; Routing Algorithms:</b> Static/ Dynamic , Direct/ Indirect, Shortest Path Routing, Flooding, Distance Vector Routing , Link State</p>

	Routing, Hierarchical Routing, Broadcast Routing, Multicast Routing, <b>Congestion Control Algorithms:</b> General Principal of Congestion Control, congestion prevention polices, Load shedding, Jitter Control,
4	<b>IP Addressing:</b> IP-Protocol, IP-Address Classes (A, B, C, D, E), Broadcast address, Multicast address, Network Mask, Subnetting, Internet control Protocol-ICMP, IGMP, Mobile-IP, IPv6- packet format, addressing scheme, security, applications and limitations of IPv6. IPv4 Vs IPv6
5	<b>Domain Network Services (DNS) :</b> Domain Names, Authoritative Hosts, Delegating Authority, Resource Records, SOA records, DNS protocol, DHCP & Scope Resolution
6	<b>Transport and Application Support Protocols:</b> Transport Protocols: TCP/UDP, Remote Procedure Calls, RTP, Application Layer: Hyper Text Transfer Protocol (HTTP) HTTP request, Request Headers, Responses, MIME–Multipurpose Internet Mail Extensions, SMTP–Simple Mail Transfer Protocol, POP – Post Office Protocol, IMAP – Internet Message Access Protocol, FTP – File Transfer Protocol, Telnet – Remote Communication Protocol
7	<b>Advance Networks:</b> Concept of 7G Networks, Introduction of 802.16, 802.20, Bluetooth, Infrared, MANET, Sensor Networks. Technical Issues of Advanced Networks, Mobile Ad-hoc Networks: Introductory concepts, Destination-Sequenced Distance Vector protocol, Ad Hoc On-Demand Distance Vector protocol, Wireless Sensor Networks: Sensor networks overview: Introduction, applications, design issues, requirements. Introduction to IOT

Course Number	Course Name	L-T-P- Credits	Year of Introduction
303	Object Oriented Analysis And Design	3L + 1T + 0P= 4C	2018
<p><b>Course Objective :</b> The course aims at developing skills to analyze and design a software system using Object Oriented Analysis and Design (OOAD) and UML. And use these skills in Unified Process (UP) environment.</p>			
<p><b>Expected Outcome : At the end of the course a student should be able:</b></p> <ul style="list-style-type: none"> <li>• Understand and describe the Object Oriented concepts</li> <li>• Describe Object Oriented Analysis and Design(OOAD) concepts and apply them to solve problems</li> <li>• Prepare Object Oriented Analysis and Design documents for a given problem using Unified Modeling Language</li> <li>• Describe the activity carried out in each and every phase of Rational Unified Process(RUP)</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <ul style="list-style-type: none"> <li>• Martin Fowler (2003), UML Distilled, 3rd Edition, Pearson Education.</li> <li>• Applying UML and Patterns</li> <li>• Roger Pressman(2009), Software Engineering: A Practitioner's Approach, Roger Pressman, ; 7th edition, McGraw-Hill</li> <li>• Brett D. McLaughlin (2006), Head First Object-Oriented Analysis and Design , 1 edition, O'Reilly</li> </ul>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOC's: NPTEL / Swayam www.edx.com www.coursera.com</p>			

### Syllabus:

Unit	Contents
1	<p><b>Introduction To Object Orientation:</b>  <b>Overview:</b> Review of SDLC, waterfall, spiral, iterative and incremental models, Iterative development and Rational Unified Process(RUP),  <b>Object Orientation :</b> Introduction to Object Orientation, Principles of Object, Orientation: Abstraction, Encapsulation, Modularity, hierarchy, OO Concepts, Object Oriented Analysis (OOA) and Object Oriented Design(OOD)  <b>Concept of Modeling:</b> Importance of Modeling, principles of Modeling, object oriented Modeling, object Modeling techniques.</p>
2	<p><b>Introduction To UML:</b>  Basics of UML: What is UML? History of UML, Goals of UML,  Building Blocks of UML: Elements- structural, behavioral, grouping, annotation, relationships- links, dependency, association, aggregation, generalization, realization, Use Case modeling, conceptual modeling, behavioral modeling.</p>

3	<p><b>Use Case Model (Requirement Modeling):</b>  Understanding requirements, requirements types, goal and scope of use cases, levels of use cases, identifying use cases, identifying actors, naming use cases, elementary business processes, actors and actor types ,  Use Case Diagrams, examples, Use case relationships (include, extend and generalize);  Concrete, Abstract, Base, and Addition Use Cases</p>
4	<p><b>Activity Diagram:</b>  Decomposing an action, partitions, signals, tokens, flow and edges, pins and transformations, expansion regions, flow final, join specification decision, fork, join, swimlanes.</p>
5	<p><b>Domain Modeling:</b>  Introduction to Domain Models, Domain modeling guidelines, conceptual class identification , strategies to identify conceptual classes,  Adding Associations: Introduction to association, Finding and adding association, Common Associations List, Association Guidelines, Association Roles, Naming Associations, finding attribute and its types, UML Attribute Notation, attributes and foreign Keys, Multiplicity</p> <p><b>Class Diagram :</b>  Design Class Diagrams(DCD):When to create Class Diagrams, how to Design Class Diagrams, identify classes, class notations, stereotypes for classes, attribute and operation scope, types of classes, class relations, multiplicities, roles, class diagrams.</p>
6	<p><b>System Sequence Diagram :</b>  moving from inception to elaboration, system behavior, introduction to system sequence diagrams, Example of system sequence diagrams, Inter- System Sequence Diagram, system sequence diagrams and Use Cases,  System Events and the System Boundary, Example of System Sequence Diagrams.</p> <p><b>State Chart Diagram:</b>  Modeling behavior in state chart diagram, events, states, and transitions in state chart Diagrams.</p>
7	<p>Illustration of Collaboration diagram, component diagram, Deployment diagram with suitable examples.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
304	Probability and Graph Theory	2L + 1T +0P = 3C	2018
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>• Learn and become comfortable with a body of results and definitions,</li> <li>• Practice creative problem solving and improve skills in this area,</li> <li>• Practice and improve writing skills.</li> <li>• Understand some applications of graph theory to practical problems and other branches of mathematics.</li> <li>• Learn about how graph theory developed via a creative organic historical process.</li> <li>• See that the simplicity of graph theory (a) makes them ubiquitous, and (b) makes it easier to be creative in these fields than in others.</li> </ul>			
<b>Expected Outcome :</b> At the end of the course a student should be able: <ul style="list-style-type: none"> <li>• To perform Simple random experiment.</li> <li>• Analysis the data from Simulation experiments using appropriate Statistical Methods.</li> <li>• Aware of some important applications of probability and statistics in the analysis of information systems.</li> </ul>			
<b>Text/Reference Books:</b> <ul style="list-style-type: none"> <li>• Kenneth H. Rosen, “Discrete Mathematics and its Applications”, Mc.Graw Hill, 2002.</li> <li>• S.C.Gupta ,” Fundamentals of Statistics seven Revised Editions”</li> <li>• Desgin and Analysis of Algorithms, Prentice –Hall of India private Limited New Delhi -2008</li> <li>• Discrete Mathematics Schaum’s outlines</li> <li>• Discrete Mathematics and its Applications VII Edition Kenneth Rosen</li> <li>• Discrete Mathematics N Ch SN Iyengar</li> <li>• Narsing Deo- Graph Theory with Applications to Computer Science and Engineering ; Prentice Hall, India</li> <li>• Ron Clark and Derek Holton- Graph Theory, Narosa</li> </ul>			
<b>Suggested MOOC :</b> NPTEL: <a href="http://www.nptel.ac.in/courses/106106091/">http://www.nptel.ac.in/courses/106106091/</a>			

### Syllabus:

Course Plan	
Unit	Contents
1	<b>Theory of Probability:</b> Introduction, Permutation and Combination concept, types of probability, Mutually Exclusive and Mutually Exhaustive concept ,Independent event, Conditional probability ,Addition theorem of Probability, Multiplication Theorem, Bayes’s Theorem.
2	<b>Random Variable ,Probability distribution and Mathematical Expectation:</b> Random Variable, probability distribution of a Discrete Random variable, Probability distribution of a continuous random variable, Distribution function or cumulative probability function moments, Mathematical Expectation, Theorem on Expectation.

3	<p><b>Theoretical Distributions:</b>  Introduction, Binomial Distribution, probability functions of Binomial distribution, constant of Binomial distribution, mode of binomial distribution, Fitting of Binomial distribution. Poisson distribution, utilities or Importance, constant of Poisson distributions, mode, fitting of Poisson's distribution. Normal distribution, equation, curve, properties, importance, relation between binomial and normal distribution, relation between Poisson and Normal distribution.</p>
4	<p><b>Sampling Theory :</b>  Introduction, Population, Sampling, principles, Limitations, Types of Sampling, Simple random Sampling, Stratified random Sampling System sampling, Cluster sampling, Multistage sampling, Quota sampling.</p>
5	<p><b>Testing of Hypothesis:</b>  Introduction, Student's t distribution, properties, critical values of t, application of t – distribution, Fisher's transformation, critical values of F – distribution, Applications of F-distribution, chi square test.</p>
6	<p><b>Basic Concept of Graph:</b>  Introduction, Graphs and Multi graphs, sub graphs, Isomorphic Graphs, Homomorphism Graphs, Paths, Connectivity ,labeled Graphs, Weighted Graphs ,Complete graphs, Planer Graphs,  Introduction, Directed Graphs, Rooted Trees, Represented of Directed Graphs, Incidence and Adjacency Matrices, Eulerian and Hamiltonian Graphs, Tree Traversing, Prims Algorithm ,Hufmann Algorithm</p>
7	<p><b>Graph Applications and Algorithm:</b>  Bridges of Konigsberge, Travelling Salesmen Problem, Seating Arrangement problem ,Crossing of river problem, Sheep cabbage problem, Utilities problem  Shortest Algorithms: Warshall's Algorithm, Dijkstra's Algorithm, Travelling Salesman problem, Depth First search, Breadth First Search</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
305	Organizational Behavior	2L+1T+ 0P = 3C	2018
<b>Course Objective :</b>			
To understand the dynamics of individual and group behaviour in organisational setting to achieve optimum utilization of human resources.			
<b>Expected Outcome:</b>			
At the end of the course, a learner should be able to			
<ul style="list-style-type: none"> <li>• To understand the implications of different models of Organizational Behavior</li> <li>• To learn the effect of attitudes, values, group dynamics in organization</li> <li>• To utilize motivation and leadership theories for delivering best results for organization.</li> </ul>			
<b>References (Books, Websites etc) :</b>			
<ul style="list-style-type: none"> <li>• Stephen Robbins, Organizational Behaviour</li> <li>• Ashwathappa, Organizational Behaviour</li> <li>• Uma Sekaran, Organizational Behaviour</li> <li>• Ricky W. Griffin, Gregory Moorhead, OB, Cengage Publication</li> </ul>			

### Syllabus:

Unit	Contents
<b>1</b>	<b>Introduction to OB:</b> Definition, importance & scope of Organization Behaviour, Multi-disciplinary approach to OB, Models of OB-Autocratic, Custodial, Supportive, Collegial, SOBC, Recent developments and challenges in OB
<b>2</b>	<b>Individual Behaviour in Organizations:</b> Attitude - Definition, Components, Sources, Job satisfaction, Perception – Definition, Process, Implications for Management, Perceptual Errors, Values – Definition and meaning, Types of value, Personality – Determinants, Traits theory, BIG FIVE, MBTI
<b>3</b>	<b>Foundation of Group Behaviour:</b> Group- Definition, Stages of Group Development, Classification of Groups, Advantages of Group Decision Making, Team – Difference between Group and Team, Creating Effective Team
<b>4</b>	<b>Conflict and Stress Management:</b> Conflict – Definition, Conflict Process, Types – Constructive and Destructive Conflicts, Levels of Conflicts and conflict Management, Stress – Definition, Causes or Sources of stress, Symptoms of stress, Management of Stress, Quality of Work-Life
<b>5</b>	<b>Motivation and Leadership:</b> Motivation – Definition, Process, Theories – Maslow Hierarchy Theory of Needs, Herzberg's Two Factor Theory, Equity Theory, Vroom's Expectancy Theory
<b>6</b>	<b>Leadership:</b> Leadership- Definition, Traits of good leader, Difference between Leader & Manger, Types of Leadership Style, Likert's 4-M management styles, Managerial Grid and its application
<b>7</b>	<b>Organization Change Management:</b> Need for Change, Reasons for Resistance of Change, Building Support for Change, Role

	of Change Agent, Process of Change Implementation, Learning organization – characteristics, Creating Learning Organization

Course Number	Course Name	L-T-P- Credits	Year of Introduction
306	Object Oriented Programming	3L+1T+0P= 4C	2018
<b>Course Objectives :</b> <ul style="list-style-type: none"> <li>To understand the concepts of object-oriented programming paradigms and develop skills in these paradigms using Java.</li> <li>To provide an overview of characteristics of Java and make them familiarize to use JDK and Java API for concurrent programming, input/output, Java Collections</li> </ul>			
<b>Syllabus Outline:</b> Introduction to Object Oriented concepts - Java Basics - Arrays and Strings -Inheritance – Polymorphism – Interface – Packages - Exception Handling –Multithreaded Programming – Streams and collections			
<b>Expected Outcome :</b> At the end of this course, student should be able to <ul style="list-style-type: none"> <li>Design interfaces, abstract and concrete classes needed, given a problem specification</li> <li>Implement classes designed using object oriented programming language</li> <li>Learn how to test, verify, and debug object-oriented programs and create programs using</li> <li>Make them comfort to muse Java API for Input/output and Java Collections and utility classes</li> <li>Able to achieve object persistence using object serialization and write modules to take advantages of concurrent programming</li> </ul>			
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007</li> <li>Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008</li> <li>Bruce Eckel , Thinking In Java – Printice Hall, Fourth Edition</li> </ul>			
<b>Suggested MOOC :</b> Please refer these websites for MOOCs: NPTEL/Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			

### Syllabus/Course Outline

Unit	Contents
1	<b>Introduction to Java:</b> Introduction: Need for OOP paradigm, Procedural approach vs. Object-Oriented approach. Object Oriented concepts Java Basics: Features of Java, History of Java, Java features, data types, variables, operators, expressions, control statements, type conversion and casting, Java compiler, JVM, Garbage collection, Data types, concept of class and object, java naming conventions

	wrapper classes, control structures in java,
2	<p><b>Class and Object Concepts:</b>          Defining a class, creating objects from class, adding attributes and methods to the class, using constructors,          Passing values to the functions – pass by value, pass by reference, Function overloading.          Modifiers – public, private, protected, default, static, final</p>
3	<p><b>Arrays and Strings:</b>          One dimensional arrays, Multidimensional arrays, exploring String class and methods, String Buffer class. Packages - creating and accessing a package, importing, packages, creating user defined packages, Concept of package, Introduction to Exception Handling.</p>
4	<p><b>Inheritance and Polymorphism:</b>          Concept and importance of inheritance, is-a relationship, types of inheritance, Polymorphism – function overriding, dynamic method dispatch. Throws keyword and method overriding.          Using abstract and final keywords with class declaration, Concept of interface, Compression of Interface and class.          Access modifiers and data accessibility in derived classes, method access modifier and method overriding.</p>
5	<p><b>Concurrent Programming</b>          Concept of threads, lifecycle of threads, creating threads, Thread class, Runnable interface, Thread synchronization, inter thread communication – wait(), notify(), notifyAll() methods</p>
6	<p><b>Java Input/Output</b>          Concept of streams, types of streams – byte streams, character streams, The Console: System.out, System.in, and System.err          InputStream class, OutputStream class, File class, FileInputStreams, FileOutputStream, Reader class, Writer class, FileReader, FileWriter.          Buffered streams – BufferedInputStream, BufferedOutputStream, BufferedReader, BufferedWriter.          Object Streams, issue of ‘Serialization’</p>
7	<p><b>Java Collections and Utility Classes</b>          Collection Basics- A Collection Hierarchy, Using ArrayList and Vector, LinkedList, Using a Iterator, Set: HashSet, LinkedHashSet, TreeSet , Comparable and Comparator interfaces, Map, Hashmap, HashTable, TreeMap, LinkedHashMap          Generics – Basics, class parameters, bounded types, erasures.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
307	Object Oriented Programming Lab	0L+0T+4P = 2C	2018
<b>Course Objective :</b>			
This is companion course of Object Oriented Programming			
<b>Syllabus Broad Units:</b>			
This Companion course of OO programming, Practical aspects of OOP towards problem solving is covered.			
<b>Expected Outcome :</b>			
The students will develop adequate programming skills with respect to following			
<ul style="list-style-type: none"> <li>• Write simple programs to use basic programming language constructs</li> <li>• Design interfaces, abstract and concrete classes needed, given a problem specification</li> <li>• Implement classes designed using object oriented programming language</li> <li>• Learn how to test, verify, and debug object-oriented programs and create programs using</li> <li>• Make them comfort to muse Java API for Input/output and Java Collections and utility classes</li> <li>• Able to achieve object persistence using object serialization and write modules to take advantages of concurrent programming</li> </ul>			
<b>References (Books, Websites etc) :</b>			
<ul style="list-style-type: none"> <li>• Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007</li> <li>• Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008</li> <li>• Bruce Eckel , Thinking In Java – Printice Hall, Fourth Edition</li> </ul>			

### OOP Lab Outline

Sr. No	Programming Exercises
1	<b>Writing, compiling and Executing Java programs using basic language constructs as bellow :</b> <ul style="list-style-type: none"> <li>- Using Operators : arithmetic, relational, logical and bitwise</li> <li>- Control structures (if, if-else, switch)</li> <li>- Iterative statements (while, do-while, for)</li> </ul>
2	<b>Programming with Classes :</b> Wring a class, creating objects and using it Using constructors to initialize object Programs to demonstrate parameter passing Making use of access modifiers

3	<b>Working with Arrays and Strings:</b> <ul style="list-style-type: none"> <li>- Programs to work with single dimensional and multidimensional arrays</li> <li>- Searching and sorting</li> <li>- Programming with string and operations on it</li> <li>- Programs to understand and study string literal pool</li> </ul>
4	<b>Inheritance and Polymorphism:</b> <ul style="list-style-type: none"> <li>- Defining classes as generic types ; using it to write new class/classes</li> <li>- Need and example of method overriding</li> <li>- Writing abstract class and interface</li> <li>- Using abstract classes to write concrete classes</li> <li>- Using interface as base type to write new interface and implementing it to write new concrete class/classes</li> <li>- Anonymous and inner classes</li> </ul>
5	<b>Concurrent Programming :</b> <ul style="list-style-type: none"> <li>- Designing and using Thread class and Runnable interface</li> <li>- Thread synchronization</li> <li>- Program to demonstrate Thread priorities, thread join and making use of yield</li> <li>- Programs with classes making use of thread and inter communication between them.</li> </ul>
6	<b>Java Input/Output :</b> <ul style="list-style-type: none"> <li>- Programs to make using InputStream and OutputStream classes.</li> <li>- Reading and Writing data into files</li> <li>- Making use to console to read data.</li> <li>- Using readers and writers to write data into Files</li> <li>- Making use of Buffered Streams and reader and writer</li> <li>- Programs to take advantages of serialization</li> </ul>
7	<b>Java Collections and Utility Classes:</b> <ul style="list-style-type: none"> <li>- Programs to make use collections (ArrayList, Vector, Set and Maps)</li> <li>- Writing user defined data generic types</li> <li>- Programs to illustrate bounded types and erasures</li> </ul>

# **SEMESTER IV**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
401	Data Warehousing and Data Mining	3L+1T+0P=4C	2018
<p><b>Course Objective:</b>  This course will enable to expose the students to Study various design and implementation issues and techniques in data warehousing and data mining including, Basic concepts on knowledge discovery in databases process and tasks, Concepts, model development, schema design for a data warehouse, Data extraction, transformation, loading techniques for data warehousing, Concept description: input characterization and output analysis for data mining, Core data mining algorithms, implementation and applications, Data mining tools and validation techniques.</p>			
<p><b>Pre-requisites:</b>  Thorough understanding of: Relational database normalization techniques , Physical design of a database, Concepts of algorithm design and analysis, Basic understanding of: Software engineering principles and techniques, Probability and statistics – Bayesian theory, regression, hypothesis testing</p>			
<p><b>Expected Outcome :</b> After going through this course a student should be able to understand :</p> <ul style="list-style-type: none"> <li>• The Fundamentals concepts of Data warehouse and Data Mining</li> <li>• Differences between a data warehouses OLAP and operational databases OLTP</li> <li>• Multidimensional data model design and development</li> <li>• Techniques for data extraction, transformation, and loading</li> <li>• Learning schemes in data mining</li> <li>• Mining association rules (Apriori)</li> <li>• Classification and prediction (Statistical based: Naïve Bayes, regression trees and model trees; Distance based: KNN, Decision tree based: 1R, ID3, CART; Covering algorithm: Prism)</li> <li>• Cluster analysis (Hierarchical algorithms: single link, average link, and complete link; Partitional algorithms: MST, K-means; Probability based algorithm: EM)</li> <li>• Use of data mining tools: C5, Cubist, Weka</li> </ul>			
<p><b>References (Books, Websites etc.):</b></p> <ul style="list-style-type: none"> <li>• Bing Liu, “ Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data (Data-Centric Systems and Applications)”, Springer; 2nd Edition 2009</li> <li>• 2.. Alex Berson, Stephen J. Smith, Data Warehousing, Data Mining and OLAP, McGrawHill, 2004</li> <li>• D. Hand, H. Mannila, and P. Smyth, Principles of Data Mining, MIT Press, 2011</li> <li>• Jiawei Han, Micheline Kamber, Data Mining: Concepts and Techniques, Harcourt India Pvt., 2011.</li> </ul>			
<p><b>Suggested MOOC :</b>  Please refer these websites for MOOC’s:  NPTEL / Swayam  www.edx.com  www.coursera.com</p>			
<b>Syllabus</b>			
<b>Unit</b>	<b>Contents</b>		

1	<p><b>Data Warehousing:</b> Introduction, Definition, data transformation, ETL (Extract, Transform, Load) processes, OLAP operations, Differences between Operational Database Systems and Data Warehouses; Difference between OLTP &amp; OLAP, Overview of Multi-dimensional Data Model, and the basic differentiation between “Fact” and “Dimension”; Multi-dimensional Cube, Concept Hierarchies of “Dimensions” Parameters: Examples and the advantages, Star, Snowflakes, and Fact Constellations Schemas for Multi-dimensional Databases, Measures: Their Categorization and Computation, Pre-computation of Cubes, Constraint on Storage Space, Possible Solutions, OLAP Operations in Multi-dimensional Data Model: Roll-up, Drill-down, Slice &amp; Dice, Pivot (Rotate), Indexing OLAP Data; Efficient Processing of OLAP Queries, Type of OLAP Servers: ROLAP versus MOLAP versus HOLAP.</p>
2	<p><b>Data Warehouse Architecture:</b> Steps for Design &amp; Construction of A Data Warehouse, A 3-Tier Data Warehouse Architecture, Data warehouse implementation</p> <p><b>Data Pre-processing overview:</b> The need for Pre-processing, Data Cleaning: Missing Values, Noisy Data, Data Cleaning as a Process, Data Integration &amp; Transformation, Data Cube Aggregation; Attribute Subset Selection, Dimensionality Reduction: Basic Concepts only, Numerosity Reduction: Regression &amp; Log-linear Models, Histograms, Clustering, Sampling, Data Discretization &amp; Concept Hierarchy Generation, For Numerical Data, For Categorical Data</p>
3	<p><b>Introduction Data Mining :</b> Fundamentals of data mining, Data Mining Functionalities, Classification of Data Mining systems, Data Mining Task Primitives, Integration of a Data Mining System with a Database or a Data Warehouse System, Major issues in Data Mining. Data Preprocessing: Need for Preprocessing the Data, Data Cleaning, Data Integration and Transformation, Data Reduction, Discretization and Concept Hierarchy Generation.</p>
4	<p><b>Mining Association Rules :</b> Basic Concepts, Market Basket Analysis, Mining Multi-Level and single , Association Rules From Transaction Mining Multi-Dimensional Association Rules From Relational Databases &amp; Data Warehouses, From Association Mining To Correlation Analysis, Constraint Based Association Mining, Association Rules: Apriori Algorithm, Partition, Pincer search, Incremental, Border, FP-tree growth algorithms, Generalized association rule.</p>
5	<p><b>Classification &amp; Prediction:</b> Introduction to Classification and Prediction; Basics of Supervised &amp; Unsupervised Learning; Preparing the Data for Classification and Prediction; Comparing Classification and Prediction Methods, Classification by Decision Tree Induction, Attribute Selection Measures; Tree Pruning; <math>\alpha</math> -<math>\beta</math> pruning Scalability and Decision Tree Induction, Rule-based Classification: Using IF-THEN Rules for Classification; Rule Extraction from a Decision Trees; Rule Induction Using a Sequential Covering Algorithm, Bayesian Classification: Bayes’ Theorem, Naïve Bayesian Classification; Bayesian Belief Networks.</p>
6	<p><b>Cluster Analysis:</b> Introduction to Cluster Analysis; Types of Data in Cluster Analysis; A Categorization of major. Unsupervised Learning - K-means Clustering -Hierarchical Clustering –Partially Supervised Learning. <b>Applications of Cluster Analysis-</b>Clustering analysis in market research, pattern recognition, data analysis, and image processing.</p>

	<p><b>Requirements of Clustering in Data Mining:</b>  Scalability, Ability to deal with different kinds of attributes, Discovery of clusters with attribute shape, High dimensionality, Ability to deal with noisy data, Interpretability.</p> <p><b>Clustering Methods:</b>  Classification of clustering methods-Partitioning Method, Hierarchical Method, Density-based Method, Grid-Based Method, Model-Based Method, Constraint-based Method</p>
7	<p><b>Web Structure Mining:</b>  Web Link Mining – Hyperlink based Ranking – Introduction -Social Networks Analysis- Co-Citation and Bibliographic Coupling - Page Rank -Authorities and Hubs -Link-Based, Similarity Search -Enhanced Techniques for Page Ranking - Community Discovery – Web Crawling -A Basic Crawler Algorithm- Implementation Issues- Universal Crawlers- Focused Crawlers- Topical Crawlers Evaluation- Crawler Ethics and Conflicts - New Developments</p> <p><b>Web Usage Mining:</b>  Web Usage Mining – sources of data- Applications -Click stream Analysis -Web Server Log Files - Data Collection and Pre-Processing- Cleaning and Filtering- Data Modeling for Web Usage Mining – Issues- Discovery and Analysis of Web Usage Patterns – Used tools in Web Usage mining.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
402	Information Security	3L+1T+0P=4C	2018

**Course Objectives :-**

To Create awareness about important issue of Information Security, understand the concept of Information Security in Business Organizations, security measures and procedures at different levels within your IT environment. Procedure to manage the security issues in systematic and scientific way.

**Expected Out Come :**

- The expected outcome of this course is to understand security policy, Information security management at all functional levels of organization. The basic background of Security and its implementation is required to undertake this course.
- The course will provide the student with an understanding of the principles of information security for IT Industry and management of important resources of the organization. Students will come to know interrelationship between the various elements of information security and its role in protecting organizations information at all level.

**Reference Book(s) :**

- Information Security Management Handbook, Sixth Edition, Volume 5-2012 Amazon Books Edited by - Micki Krause Nozaki, Harold F. Tipton.
- Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives Nina Godbole and Sunit Belpure, Publication Wiley.
- Information Security: Principles and Practice 1st , Kindle Edition -2005 Amazon Books Author - Mark Stamp
- “Cryptography and information Security” V.K. Pachghare, PHI Learning Private Limited, Delhi India.
- Analyzing Computer Security by Charles P. Pfleeger, Shari Lawerance Pfleeger, Pearson Education India,
- Practical Information Security Management: A Complete Guide to Planning and Implementation-Dec-2016 Amazon Books . Tony Campbell
- Managing Risk and Information Security :- Protect to Enable A-Press Open Access Book (Free) at <http://www.freotechbooks.com/managing-risk-and-information-security-protect-to-enable-t1150.html>

NPTEL / Swayam  
[www.edx.com](http://www.edx.com)  
[www.coursera.com](http://www.coursera.com)

Unit	Contents
------	----------

1	<p><b>Introduction and Background:</b>  Information, Information Characteristics, sources of Information, Types of Information, and Generating Information in Organizations. Business Application of Information and Information System, What is Information security? Need for Information Security , Types of Organization , Functions of Business organization , Levels of Organization , How Organizations manage the information , flow of information , IT Policy for Information protecting.</p>
2	<p><b>Basics of Networking for Security Purpose –</b>  Network Installations , Types of Networks and their security issues , Types of Network of OS. Functions of Information security officer. Different measures to safe guard the important information in the organization . Network policy for protecting important resources of the Network. Basic concept of MIS and Organization flow of Information.</p>
3	<p><b>Importance of Information Security -</b> Improvement in corporate reputation based on the height of the level of information security, threat to business continuity due to accidents related to information systems, cyber space, information assets, threats, vulnerabilities. Information Security Measures.  <b>Threats :-</b> Types of threats: physical threats (accident, disaster, fault, destruction, theft, unauthorized intrusion, etc.), technical threats (unauthorized access, eave S dropping , spoofing, alteration, error, cracking, etc.), man-made threats (operational error, loss, damage, peep, unauthorized use, social engineering, etc.), cyber-attack, information leakage, intent, negligence, mistake, fraudulent behavior, sabotage, DoS attack, rumor, flaming, SPAM e-mail, file sharing software [Malware / malicious programs] computer virus, macro virus, worm, bot (botnet, remote operated virus), Trojan horse, spyware, ransom ware, key logger, root kit, backdoor, fake anti-virus software</p>
4	<p><b>Information security technology (cryptography)-CRYPTREC</b> ciphers list, cryptography (encryption key), decryption (decryption key), decoding, symmetric cryptography (common key), public key cryptography (public key, private key)), AES (Advanced Encryption Standard), S/MIME (Secure MIME), PGP (Pretty Good Privacy), hybrid encryption, hash function (SHA-256, etc.), key management, disk encryption, file encryption, compromise. digital signature (signature key, verification key), timestamp (time authentication), message authentication, MAC (Message Authentication Code), challenge-response authentication.</p>
5	<p><b>Information security Management:</b>  management of information based on the information security policy, information, information assets, physical assets, software assets, human assets (people, and their qualifications, skills, and experience), intangible assets, service, risk management (JIS Q 31000), monitoring, information security events, information security incidents.  <b>Risk analysis and evaluation (Information asset review / Classification)</b> information assets review, classification and management by importance of information assets, information assets ledger Risk analysis and evaluation (Risk type)loss of property, loss of responsibility, loss of net earnings, human cost, operational risk, supply chain risk, risk involved in usage of external service, risk involved in distribution of information by SNS, moral hazard, estimated annual loss, scoring method, cost factor .</p>
6	<p><b>Information security regulations:</b>  (Company regulations including information security policy)organizational operation according to the information security policy, information security policy, information security purpose, information security measures criteria, information management regulations, security control regulations, documentation control regulations, regulations on measures to be taken against</p>

	computer virus infection, regulations on measures against accidents, information security education regulations, privacy policy (personal information protection policy), employment agreement, office regulations, penal provisions, outward explanation regulations, regulations for exceptions, regulations for updating rules, procedure for approving regulations.
7	<p><b>Management of Information Asset:</b> Security Incidents management, reducing risk in Information loss and keeping the information safe from unauthorized users and threats.</p> <p><b>Information Technology Act:</b> Cyber Crimes and Cyber Laws. -What are cyber-crimes? Types of cyber-crimes. Categories of Cyber Crime, Online business threats, Online business frauds Safety tips for online business.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
403	Design Patterns	3L+1T+0P=4C	2018
<p><b>Course Objective:</b> The objective of the course to emphasize how to use design patterns as general reusable solution to a commonly occurring problem. Understand the Design patterns that are common in software applications and how these patterns are related to Object Oriented design.</p>			
<p><b>Pre-requisites:</b> This course assumes students should have following knowledge:</p> <ul style="list-style-type: none"> <li>• OOAD and UML.</li> <li>• Software Engineering, Java Programming</li> </ul>			
<p><b>Learning Outcomes:</b> After completing this course, students will be able to:</p> <ul style="list-style-type: none"> <li>• Understand meaning and types of design Patterns</li> <li>• Identify structure and describe structure of Design Pattern</li> <li>• Given a problem able to decide which design Pattern is used</li> <li>• Understand the Design patterns that are common in software applications</li> <li>• Understand how these patterns are related to Object Oriented design.</li> </ul>			
<p><b>Text Book(s) :</b></p> <ul style="list-style-type: none"> <li>• Design Patterns Elements of Reusable Object-oriented Software- Erich Gama, Richjard Helm, Ralph Jonson and Jon Vlissides.</li> <li>• Design Patterns- Vhristopher G. Lasater, BPB Publications, 1<sup>st</sup> Indian Edition 2007.</li> <li>• Head First Design Patterns, Eric Freeman, Elisabeth Freeman, Kathy Sierra, Bert Bates,</li> <li>• Ben Shneiderman, Designing the User Interface, Pearson Education, 1998</li> </ul>			
<b>Syllabus</b>			
Unit	Contents		
1	<p><b>Introduction to Design Patterns:</b> Reusable design Patterns: Meaning &amp; Use of Design Patterns, Organizing the Patterns, Describing pattern, how to use the patterns while solving the problem, Applications of different design patterns in various cases. Selection of a Design Pattern</p>		
2	<p><b>Creational Patterns:</b> <b>Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences and Implementation of following Creational Patterns :-</b> Factory Method, Abstract Factory, Builder, Prototype, Singleton. <b>Tutorial:</b> Tutorials should be conducted in LAB using JAVA for implementing Creational design pattern.</p>		
3	<p><b>Structural Patterns:</b> Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of Following Structural Patterns <b>Adapter (class), Adapter (object), Bridge, Composite, Decorator. Façade. Flyweight, Proxy.</b></p>		

	<p><b>Tutorial:</b> Tutorials should be conducted in LAB using JAVA for implementing Structural design patterns.</p>
4	<p><b>Behavioral Patterns:</b>  Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of following Behavioral Pattern  <b>Interpreter, Template Method, Chain of Responsibility, Command, Iterator, Mediator, Memento, Observer, State, Strategy, Visitor</b>  <b>Tutorial:</b> Tutorials should be conducted in LAB using JAVA for implementing Behavioral Design Pattern.</p>
5	<p><b>Introduction to Human Computer Interface:</b> Need &amp; Importance of HCI, HCI &amp; human diversity, Goals and Objectives of HCI.  <b>Models of HCI:</b> Conceptual, semantic, Syntactic and Lexical Model, GMOS Model, Object-Action Interaction model, Action-Object Interaction model.</p>
6	<p><b>Principles of Design:</b> Recognition and Diversity, Eight golden rules of interface design, Error Prevention.  <b>Interaction style of Design:</b> Guidelines for Data Display and Data Entry, Direct and Menu selection, Form filling, Command Language.</p>
7	<p><b>Computer Supported co-operation:</b> Goals of co-operation, Synchronous Interactions, asynchronous and face to face Interactions.  <b>Application to education and social issues:</b> Future Applications of HCI.  Tutorials should be conducted in LAB using JAVA for implementing design patterns of Creational, Structural and Behavioral design pattern.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
407	Lab on Linux Operating System	0L+1T+4P=2C	2018
<b>Course Objective:</b> The student would be able <ul style="list-style-type: none"> <li>• To obtain knowledge of how to manage files in Linux system.</li> <li>• To understand Linux commands and write shell programming.</li> <li>• To grasp the concepts of User Management in Linux.</li> <li>• To control the system running Ubuntu operating system.</li> </ul>			
<b>Expected Outcome :</b> The course is to provide the knowledge of the Linux Operating System. This course intends to teach various features that will help the students to use and learn the working of Ubuntu /Red Hat operating system			
<b>Prerequisite:</b> Students should have basic knowledge of working on an operating system. <ul style="list-style-type: none"> <li>• Linux for beginners : An introduction to the linux operating system and command line</li> <li>• Linux: the complete reference, sixth edition paperback by Richard Petersen, McGraw Hill education</li> <li>• Unix shell Programming: by yashwant Kanitkar</li> <li>• UNIX Concepts and Applications - by Sumitabha Das</li> </ul>			
<b>Course Plan</b>			
Unit	Contents		
1	Introduction to Linux Operating system, various flavors of Linux O.S., Learning to use and Install Linux, Booting Any one flavor of Linux like ubuntu, red hat etc, Starting up ,Logging in, Exploring the desktop ,Working with virtual desktops, Getting Everything up and running ,Viewing your hardware , Getting online Using an Ethernet Card ,Joining wireless network ,Configuring Email and instant messaging, Adding a Printer , Configuring a local printer, Configuring a network printer, Setting up digital imaging devices, Transferring photos from digital camera, Configuring scanner, Configuring Bluetooth.		
2	<b>General Purpose Utilities:</b> banner (display a blown-up message), cal (The calendar), date-display the system date, who-Login detail tty-knowing your terminal uname-know your machine name passwd-change your password lock-lock your terminal echo-display message bc-the calculator. who am i,- display login name		
3	<b>Navigating the file system:-</b> pwd-checking your current directory, cd-changing directories, mkdir-Making directories rmdir-moving directories		

	<p>ls-listing files</p> <p><b>Handling Ordinary files:</b></p> <p>cat-displaying and creating files,  touch-creating empty file  cp-copying a file  rm-deleting files  mv-renaming files  more-paging output  lp-printing a fiile  file-know the file type  wc-line, word and character counting  split-splitting file in to multiple files  cmp-comparing two files  comm.-finding common  chmod-changing file permission  files searches using find command,  locate command, mount and unmount command. Understanding vi modes, Using vi to edit the file, Creating a new text file using vi, Searching through files.</p>
4	<p><b>Filters:</b></p> <p>pr- paginating files  head-displaying the beginning of a file,  tail- displaying the end of file  cut- slitting a file vertically  paste- pasting file  sort- ordering file  uniq- locating repeated line  nl- line numbering  tr-translating characters.  regular expressions and grep to find text  ps-process status  kill-terminate process  Other process related commands</p>
5	<p>sh command, pattern matching- the wild cards, escaping-the backslash(\), quoting, redirection, pipes, tees</p>
6	<p>What is Shell, Different types of shells, Shell as command processor, shell variables, creating command substitution, various shell scripts using functions, conditionals, loops, customizing environment</p>

# **SEMESTER V**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
501	Data Science	3L+1T+0P= 4C	2018-19
<b>Course Objective :</b>			
You will learn data science basics, statistics, R programming fundamentals of big data, hadoop and mapreduce, and Machine Learning Basics. By the end of this students should be able to handle and program on machine learning techniques using R-tool			
<b>References (Books, Websites etc) :</b>			
Refer web sources			
<b>Suggested MOOC :</b>			
Please refer these websites for MOOC's: NPTEL / Swayam www.edx.com www.coursera.com			
<b>Syllabus:</b>			
Unit	Contents		
1	<b>Introduction To Data Science:</b> What is data science, relation to data mining, machine learning, big data and statistics, Several data science settings, Introduction to the WEKA tool		
2	<b>Data analysis:</b> <b>From data to features:</b> Interactive group discussion, Representing problems with matrices, Representing problem with relations, Examples <b>Computing simple statistics:</b> Means, variances, standard deviations, weighted averaging, modes, quartiles, Examples <b>Simple visualizations:</b> Histograms, Boxplots, Scatterplots, Time series, Spatial data <b>Case studies:</b> X & Y examples, Medical data ,Hands-on R-Tool		
3	<b>Exploratory Data Mining:</b> Introduction to Exploratory Data Mining, <b>Association discovery</b> What is association discovery?, What are the challenges? , In detail: Apriori <b>Clustering</b> What is clustering? , What are the challenges? ,In detail: agglomerative clustering Hands-on: clustering in WEKA		
4	<b>Evaluation And Methodology Of Data Science:</b> <b>Experimental setup</b> Training, tuning, test data, Holdout method, cross-validation, bootstrap method <b>Measuring performance of a model</b> Accuracy, ROC curves, precision-recall curves, Loss functions for regression		

	<p><b>Interpretation of results</b>  Confidence interval for accuracy  Hypothesis tests for comparing models, algorithms</p>
5	<p><b>Data Engineering:</b>  <b>Attribute selection</b>  Filter methods, Wrapper methods  <b>Data discretization</b>  Unsupervised discretization, Supervised discretization  <b>Data transformations</b>  PCA and variants  Exercises</p>
6	<p><b>Introduction To Machine Learning:</b>  <b>Linear Regression</b>  Learn to implement linear regression and predict continuous data values  <b>Classification</b>  Understand and implement algorithms like K-NN*, Naive Bayes and Logistic Regression  <b>Clustering</b>  Learn how to create segments based on similarities using K-Means and Hierarchical clustering</p>
7	<p><b>Big Data Analytics:</b>  <b>Introduction to Big Data And Hadoop:</b>  Understand the basic concepts of Big Data and Hadoop as processing platforms for Big Data  <b>Managing Big Data:</b>  Learn and Use Hadoop Ecosystem tools for data ingestion, extraction and management. Hadoop ecosystem tools namely Sqoop, Hive will be covered in this Module</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
502	Optimization Techniques	3L+1T+0P=4C4	2018
<p><b>Course Objective:</b> Operations Research is a method of mathematically based analysis for providing a quantitative basis for analytical decisions in management. It provides different techniques based on logic and mathematics, and hence form the backbone of computer science.</p>			
<p><b>Expected Outcome :</b> This module helps to introduce students to use quantitative methods and techniques for effective decisions–making model formulation and applications that are used in solving business decision problems.</p>			
<p><b>References (Books, Websites) :</b>  <b>Books:</b>  Operations Research Theory and Applications by J. K. Sharma  Operations Research: An Introduction (Pearson Publication, 8<sup>th</sup> edition) by H. A. Taha  <b>Web Resources :</b>  For video lectures refer to site – <a href="http://mech19.blogspot.in/2015/08/operation-research-video-lectures.html">http://mech19.blogspot.in/2015/08/operation-research-video-lectures.html</a></p>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOC's:  NPTEL / Swayam  www.edx.com  www.coursera.com</p>			
<b>Syllabus</b>			
Unit	Contents		
1.	<p><b>Introduction to OR and Linear Programming Problem:</b>  <b>Operation Research</b> – Introduction, Models, Areas of Application, Basic terminologies in OR.  <b>Introduction to LPP</b>  Mathematical Formulation of L.P.P.  <b>Solution to LPP using</b> –  Graphical Method (Minimization and Maximization).  Simplex Method – Concept of slack, surplus &amp; artificial variables. Manual solutions of L.P.P. (up to 3 iterations).  Solution using Big M method  Duality and sensitivity Analysis in LPP  <b>Variations of LPP</b> –  Alternative optimal, Unbounded solutions &amp; Infeasible solutions to be shown graphically &amp; also by simplex method.</p>		

2.	<p><b>Transportation</b>  Definition and mathematical formulation of the transportation model.  <b>Finding initial basic feasible solution using –</b>  North-West Corner Rule  Least cost method  Vogel’s approximation method  Checking for Optimality &amp; obtaining of optimal solution using MODI method.  <b>Variations of Transportation Problem-</b>  Unbalanced problems  Maximization.  Degenerate Solutions</p>
3.	<p><b>Assignment Model</b>  Definition and mathematical formulation of Assignment Problem.  Finding BFS and optimal solution for Assignment Problem using Hungarian method.  <b>Variations of Assignment Problem –</b>  Unbalanced problems  Maximization  Travelling Salesman Problem</p>
4.	<p><b>Network Analysis</b>  Introduction to project management and significance of PERT/CPM in project management. Components of network.  Construction rules and precautions Network of phases of project.  Critical Path Analysis (CPM): Calculating Earliest Time and Latest Time for events, finding critical path for project, Calculating floats (Total, free and independent float), Calculating probability for completion of projects.</p>
5.	<p><b>Simulation</b>  Introduction to simulation, types of simulation, advantages and disadvantages of simulation  Steps in solving problem using simulation  <b>Monte Carlo Method for Simulation for –</b>  Inventory, Queuing, PERT, Investment  Applications of Simulation</p>
6.	<p><b>Decision Theory and Decision Tree</b>  Introduction to terminologies in Decision Making (Decision alternatives, States of alternatives, payoff table) and steps in Decision Making.  Types of Decision Environments – Decision making under Uncertainty &amp; Decision making under Risk.  Criteria for Decision making under uncertainty-  Minimin or Maximax criteria,  Miximin or Minimax Regret criterion,  Laplace criterion,  Hurwicz criterion.  Criteria for Decision making under Risk-  Expected Monetary Value criterion,  Expected Opportunity Loss (E.O.L.)</p>

	Expected Value of Perfect Information (E.V.P.I.) Decision Tree introduction and building decision tree for Simple problems.
7.	<b>Queuing Theory</b> Introduction, structure of queuing System, Performance measures of a Queuing System, Probability Distributions in Queuing Systems of – Arrivals, Interarrival Times, Departures, Service times, Single Server Queuing Models, Multi Server Queuing Models

Course Number	Course Name	L-T-P- Credits	Year of Introduction
503	<b>Software Project Management</b>	3L+1T+0P=4C	2018
<p><b>Course Objective :</b></p> <p>To provide basic project management skills with a strong emphasis on issues and problems associated with delivering successful high quality IT projects.</p>			
<p><b>Expected Outcome :</b></p> <ul style="list-style-type: none"> <li>• Evaluate project to develop scope of work, provide accurate cost estimation and to plan the various activities.</li> <li>• Identify resources required for a project and to produce a work plan and resources schedule</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <ul style="list-style-type: none"> <li>• Software Project Management – Bob and Huges</li> <li>• Software Project Management in Practice, Pankaj Jalote, Pearson Education,2002</li> <li>• Software Engineering by Pressman</li> <li>• Basic of Software Management ,NIIT, Prentice-Hall India ,2004</li> <li>• SOFTWARE REQUIREMENTS - MS project 2007 onward , CoStar 7 Onwards</li> </ul>			
<b>Syllabus:</b>			
Unit	Contents		
<b>1</b>	<b>Introduction to project management -</b> Project, project management, software project management, characteristics of project, how software projects are diff. Than other projects, Problems with software projects, All parties (stakeholders) involved in project. Role of Project Manager. Phases of project management life Cycle.		
<b>2</b>	<b>Project Management Body of Knowledge –</b> Project management institute, PMBOK. Role of PMBOK , Knowledge area's identified by PMBOK, Various certifications provided by PMBOK with their importance, Association for project management , project planning, importance.		
<b>3</b>	<b>Project planning –</b> Various plans to be prepared in SPM , Stepwise project planning , Importance of Project scheduling, project and activities, sequencing and scheduling activities , Importance of resource allocation, nature of resources , Identifying resource requirement , Scheduling resources , Work breakdown structure , Gantt chart, Network Planning models, formulating network model , Critical path analysis , PERT, Hands on experience with Microsoft Project.		
<b>4</b>	<b>Cost and effort estimation –</b> Where estimation done?, problem with over and under estimation , Cost to be considered during estimation, factors affecting cost estimation , cost estimation methods-non algorithmic , COCOMO model, Function point analysis model , Hands on experience with Costar or other estimation software's.		
<b>5</b>	<b>Project risk management -</b> The importance, top risk in projects , Classic mistakes, Elements of risk management – Risk		

	identification, risk analysis , Elements of risk management – Risk prioritization, risk control.
<b>6</b>	<b>Managing Contract –</b> Types of contract, Contract management and Acceptance Managing people and organizing teams - Organizational behavior, understanding behavior, Selecting Right person for right job, Motivation, Becoming a team and decision Making, Leadership styles, Organizational structures .
<b>7</b>	<b>Software quality –</b> Place of software quality in planning, Defining software quality and importance of it, Software quality measures, ISO standards, CMM standards, Quality Assurance document.

# **ELECTIVES**

### Elective Group:(01) Cloud Computing

Course Number	Course Name	L-T-P- Credit	Year of introduction
404-01-A	Virtualization	2L+1T+0P=3C	2018
<p><b>Course Objective:</b> Students will learn an overview of the field of Cloud Computing Students will gain hands-on experience solving relevant problems through projects that will utilize existing public cloud tools. It is our objective that students will develop the skills needed to use cloud computing technique</p>			
<p><b>Course Outcome:</b> student will be able to:</p> <ul style="list-style-type: none"> <li>• Study core concept of cloud computing.</li> <li>• Study virtualization and outline its role in enabling the cloud computing system model.</li> <li>• Analyze various cloud computing models.</li> </ul>			
<p><b>References:</b></p> <ul style="list-style-type: none"> <li>• “Virtualization” – A Manager’s Guide, By Dan Kusnetzky, O’reilley Publications,</li> <li>• “Virtualization for Dummies”, 1<sup>st</sup> Edition, Kindle Edition, by Bernard Golden.</li> </ul>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOC’s: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a></p>			
Unit	Contents		
1	<p><b>Overview Of Virtualization :</b> Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare’s Virtualization Solutions</p>		
2	<p><b>Understanding Virtualization :</b> The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware.</p>		
3	<p><b>Hypervisor:</b> What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization : Full Virtualization, Emulation Virtualization Para virtualization., Installing Hyper-V In Windows Server 2012,</p>		
4	<p><b>Types Of Virtualization :</b> Server Virtualization, Client &amp; Desktop Virtualization Services and Applications Virtualization, Network Virtualization, Storage Virtualization</p>		
5	<p><b>Tools For Virtualization:</b> Virtualization with Xen, Virtualization with Bochs and QEMU, Virtualization with Lguest, Virtualization with KVM</p>		
6	<p><b>Virtualization For Businesses:</b> Need for Virtualization in a Business, Implementation of Virtualization in a Business, Cost-Benefit Analysis of Virtualization,</p>		

7	<b>Openstack And Its Role In Virtualization :</b> Understanding Openstack, nine Core key components of openstack. CASE STUDIES OF VIRTULIZATION : Xen Hypervisor, OpenVZ Hypervisor, MS Virtual Server 2005 R2, Oracle VM
---	--

### Elective Group :( 01) Cloud Computing

Course Number	Course Name	L-T-P- Credit	Year of introduction
405-01-B	Cloud Computing Concepts	2L+1T+0P=4C	2018

**Course Objective:**

Students will learn an overview of the field of Cloud Computing Students will gain hands-on experience solving relevant problems through projects that will utilize existing public cloud tools. It is our objective that students will develop the skills needed to use cloud computing technique.

**Course Outcome:**

student will be able to:

- Study core concept of cloud computing.
- Study cloud application with various service providers services
- Analyze various cloud computing models.

**References:**

- Cloud Computing Bible, Barrie Sosinsky, Wiley-India, 2010
- Cloud Computing: Principles and Paradigms, Editors: Rajkumar Buyya, James Broberg, Andrzej M. Goscinski, Wile, 2011

**Suggested MOOC :**

Please refer these websites for MOOC's:

NPTEL / Swayam

[www.edx.com](http://www.edx.com)

[www.coursera.com](http://www.coursera.com)

Unit	Contents
1	<b>Cloud Computing Fundamentals:</b> Definition of Cloud Computing , private, public and hybrid cloud. Cloud types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, public Vs private clouds
2	<b>Virtualization And Cloud Computing:</b> Role of virtualization in enabling the cloud; Business Agility: Benefits and challenges to Cloud architecture. Application availability, performance, security and disaster recovery; next generation Cloud Applications, Visualizing Virtualization, Managing Virtualization, Taking Virtualization into the Cloud
3	<b>Service Oriented Architecture And The Cloud :</b> Defining Service Oriented Architecture, Understanding the Coupling, Implementation of Service Oriented Architecture (SOA), Understanding Services in the Cloud, Serving the Business with SOA and Cloud Computing
4	<b>Cloud Applications :</b> Technologies and the processes required when deploying web services; Deploying a web service from inside and outside a cloud architecture, advantages and disadvantages
5	<b>Management Of Cloud Services:</b> Reliability, availability and security of services deployed from the cloud. Performance and scalability of services, tools and technologies used to manage cloud services deployment; Cloud Economics: Cloud Computing infrastructures available for implementing cloud based services. Economics of choosing a Cloud platform for an organization, based on application requirements, economic constraints and business needs (e.g Amazon, Microsoft and Google,

	Salesforce.com, Ubuntu and Redhat)
6	<b>Application Development:</b> Service creation environments to develop cloud based applications. Development environments for service development; Amazon, Azure, Google App.
7	<b>Cloud It Model:</b> Analysis of Case Studies when deciding to adopt cloud computing architecture. How to decide if the cloud is right for your requirements. Cloud based service, applications and development platform deployment so as to improve the total cost of ownership (TCO)

### Elective Group :( 01) Cloud Computing

Course Number	Course Name	L-T-P-Credit	Year of Introduction
504-01-C	Cloud Solutions	2L+1T+0P=3C	2018
<b>Course Objective:</b> Students will learn different cloud solutions available.			
<b>Course Outcome:</b> student will be able <ul style="list-style-type: none"> <li>• Design their cloud solution for organization.</li> <li>• Implement the cloud solutions. And</li> <li>• Analyze various cloud computing models.</li> </ul>			
<b>Reference Books:</b> <ul style="list-style-type: none"> <li>• “AWS System Administration: Best Practices for Sysadmins in the Amazon Cloud” by <u>Mike Ryan</u> , <u>Federico Lucifredi</u> .</li> <li>• “Expert AWS Development: Efficiently develop, deploy, and manage your enterprise apps on the Amazon Web Services platform” Kindle Edition, by <u>Atul Mistry</u>.</li> <li>• “VMware vSphere 6.5” Cookbook, 3rd Edition Kindle Edition</li> </ul>			
<b>Suggested MOOC :</b> Please refer these websites for MOOC’s: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
Unit	Contents		
1	<b>Coriolis Technologies :</b> About Coriolis Technologies, storage, virtualization, security, The Colama suite of products, benefits of colama suite, Virtualization of Computer Laboratories, Colama Powered Virtual Computer Laboratory		
2	<b>vmWare :</b> what is VmWare, Virtualization with Vmware, VmWare Products, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment		
3	<b>Microsoft :</b> Exploring Platform as a Service, Putting Platform as a Service Pedestal		
4	<b>Microsoft :</b> Integrated Lifecycle Platform, Anchored Lifecycle Platform as a Service Enabling Technologies as a Platform		
5	<b>Google :</b> Google App Engine, Details of Google app engine.		
6	<b>Amazon :</b>		

	Infrastructure as a Service, Tracing IaaS to ISP, Amazon EC2
7	<b>Other Solutions :</b> Infrastructure as a Service, Other IaaS Companies, IaaS-Enabling Technology, Issues related to Trust in Cloud, Infrastructure as a Service in a Business Organization

### Elective Group: Cloud Computing

Course Number	Course Name	L-T-P-Credit	Year of introduction
505-01-D	Cloud Computing	2L+1T+0P=3C	2018
<b>Course Objective:</b> Students will learn how to use Amazon web service portal and its services			
<b>Course Outcome:</b> Student will be able. Design their cloud solution using AWS. Implement the cloud solutions Using AWS. Practice of AWS applications			
<b>Reference Books:</b> <ul style="list-style-type: none"> <li>• “AWS System Administration: Best Practices for Sysadmins in the Amazon Cloud” by <u>Mike Ryan</u> , <u>Federico Lucifredi</u> .</li> <li>• “Expert AWS Development: Efficiently develop, deploy, and manage your enterprise apps on the Amazon Web Services platform” Kindle Edition, by <u>Atul Mistry</u>.</li> </ul>			
<b>Suggested MOOC :</b> Please refer these websites for MOOC’s: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a>			
1	<b>Getting Started with Amazon Cloud :</b> Introduction to AWS, AWS history, AWS Infrastructure, AWS ecosystem, Setting up AWS accounts Evaluating Service Level Agreements (SLA) Various AWS Services AWS Management Console The AWS CLI		
2	<b>Identity Access Management (IAM) :</b> Introduction to IAM, IAM users and their access, IAM roles and their permission Active Directory Federation Web Identity, Federation IAM Best Practices. Assignment: Configuring IAM users, groups and policies, AWS CLI/SDK access to manage services using Credentials and Roles lab. Programming, management console and storage on AWS Basic Understanding APIs - AWS programming interfaces, Web services, AWS URL naming, Matching interfaces and services, Elastic block store - Simple storage service, Glacier - Content delivery platforms		
3	<b>Elastic Load Balancing &amp; Auto Scaling :</b> Components and types of load balancing Auto scaling and its benefits Life cycle of auto scaling Components and policies of auto scaling Assignment - Configure Load Balancer, Auto scaling as per utilization in different situations		
4	<b>Amazon EC2 :</b> EC2 Overview Amazon Machine Images(AMI) AMI creation Security groups Key pairs Assigning elastic IP address Elastic IP v/s Public IP Bootstrap Scripts Overview of Amazon EBS , Various login ways from different OS, putty and putty keygen use, Assigning EIP, AMI assignment, Creating and restoring snapshot, snapshot to AMI, EC2 Bootstrapping, Cloudformation & CloudWatch assignments.		
5	<b>Amazon Simple Storage Service(S3) :</b> Introduction to S3 Creating an S3 bucket S3 Version Control S3 Lifecycle Management & Glacier S3 Uploading & Downloading S3 durability & redundancy Cloud front overview Create a CDN Security & Encryption Storage Gateway Import & Export using Snowball Cross		

	region replication Static website using S3 Assignment - Creating S3 bucket, S3 ACL, S3 permissions, hosting static website on S3, Cross region replication assignment, S3 lifecycle assignment
6	<b>Database Services:</b> Database overview Amazon Relational Database Service ( RDS) AMI databases Amazon Redshift DynamoDB Amazon ElastiCache AWS Database Migration Service(DMS) Amazon Aurora Assignment - Creating RDS instance, DB backups, RDS Read Replica
7	<b>AWS identity services, security and compliance Users, groups, and roles –</b> Understanding credentials, Security policies, IAM abilities and limitations, AWS physical security - AWS compliance initiatives, Understanding public/private keys, Other AWS security capabilities.

### Elective Group: (02) Data Analytics

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404-02-A	Algorithms For Advanced Analytics	2L+1T+0P = 3C	2018
<b>Prerequisite:</b> Knowledge in basic analytical algorithms			
<b>Course Objective :</b> <ol style="list-style-type: none"> <li>1. Learn concepts and techniques and how to find useful knowledge.</li> <li>2. Understanding of the topics that can create an ideal analytic environment that is better suited to the challenges of today's analytics demands.</li> <li>3. Harness the power of high performance computing architectures and data mining, text analytics, and machine learning algorithms.</li> </ol>			
<b>Expected Outcome :</b> At the end of the course a student should be able: This course gives a comprehensive coverage of algorithms specially meant for analyzing data at an in-depth level. Decision trees, Support Vector machines and Neural networks are considered to be highly effective in analyzing complex data.			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>1. Jiawei Han and Micheline Kamber, "Data Mining: Concepts and Techniques", Morgan Kaufmann Publishers, 3rd ed, 2010.</li> <li>2. Lior Rokach and Oded Maimon, "Data Mining and Knowledge Discovery Handbook", Springer, 2nd edition, 2010.</li> <li>3. Ronen Feldman and James Sanger, "The Text Mining Handbook: Advanced Approaches in Analyzing Unstructured Data", Cambridge University Press, 2006.</li> <li>4. <b>Suggested MOOC:</b> Please refer these websites for MOOC's: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus:</b>			
Unit	Contents		
1	<b>Predictive Analytics:</b> Predictive modeling and Analysis - Regression Analysis, Multicollinearity , Correlation analysis, Rank correlation coefficient, Multiple correlation, Least square, Curve fitting and goodness of fit.		
2	<b>Classification Algorithms:</b> Issues regarding classification and prediction, Bayesian Classification, Classification by back propagation, Classification based on concepts from association rule mining, Other Classification Methods, Classification accuracy.		

3	<p><b>Decision Trees:</b>  Introduction to Decision trees - Classification by decision tree induction – Various types of pruning methods – Comparison of pruning methods – Issues in decision trees – Decision Tree Inducers – Decision Tree extensions.</p>
4	<p><b>Text Analytics:</b>  Introduction, Core text mining operations, Preprocessing techniques, Categorization, Clustering, Information extraction, Probabilistic models for information extraction, Text mining applications.</p>
5	<p><b>Support Vector Machines:</b>  Learning and Soft Computing: Rationale, Motivations, Needs, Basics: Examples of Applications in Diverse Fields, Basic Tools of Soft Computing: Neural Networks, Fuzzy Logic Systems, and Support Vector Machines,</p>
6	<p><b>Computing:</b>  Basic Mathematics of Soft Computing, Learning and Statistical Approaches to Regression and Classification - Support Vector Machines - Risk Minimization Principles and the Concept of Uniform Convergence, The VC Dimension, Structural Risk Minimization, Support Vector Machine Algorithms.</p>
7	<p><b>Neural Networks:</b>  Single-Layer Networks: The Perception, The Adaptive Linear Neuron (Adaline) and the Least Mean Square Algorithm - Multilayer Perceptions: The Error Back propagation Algorithm – The Generalized Delta Rule, Heuristics or Practical Aspects of the Error Back propagation Algorithm.</p>

### Elective Group:(02) Data Analytics

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405-02-B	Machine Learning Techniques	2L+1T+0P = 3C	2018
<b>Prerequisite:</b> Knowledge in basic analytical algorithms.			
<b>Course Objective :</b> <ul style="list-style-type: none"> <li>• To introduce students to the basic concepts and techniques of Machine Learning.</li> <li>• To have a thorough understanding of the Supervised and Unsupervised learning techniques.</li> <li>• To study the various probability based learning techniques.</li> <li>• To understand graphical models of machine learning algorithms.</li> </ul>			
<b>Expected Outcome :</b> Upon completion of this course, the students will be able to: <ul style="list-style-type: none"> <li>• Distinguish between, supervised, unsupervised and semi-supervised learning</li> <li>• Apply the appropriate machine learning strategy for any given problem</li> <li>• Suggest supervised, unsupervised or semi-supervised learning algorithms for any given Problem</li> <li>• Design systems that uses the appropriate graph models of machine learning</li> <li>• Modify existing machine learning algorithms to improve classification efficiency</li> </ul>

<b>Suggested MOOC:</b> Please refer these websites for MOOC’s: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus:</b>			
Unit	Contents		
1	<b>Introduction:</b> Learning – Types of Machine Learning – Supervised Learning – The Brain and the Neuron – Design a Learning System – Perspectives and Issues in Machine Learning – Concept Learning Task – Concept Learning as Search – Finding a Maximally Specific Hypothesis – Version Spaces and the Candidate Elimination Algorithm – Linear Discriminants – Perceptron – Linear Separability – Linear Regression.		
2	<b>Linear Models :</b> Multi-layer Perception – Going Forwards – Going Backwards: Back Propagation Error – Multilayer Perception in Practice – Examples of using the MLP – Overview – Deriving Back Propagation – Radial Basis Functions and Spines – Concepts – RBF Network – Curse of Dimensionality – Interpolations and Basis Functions – Support Vector		

	Machines.
3	<b>Tree And Probabilistic Models:</b> Learning with Trees – Decision Trees – Constructing Decision Trees – Classification and Regression Trees – Ensemble Learning – Boosting – Bagging – Different ways to Combine Classifiers – Probability and Learning – Data into Probabilities.
4	<b>Basic Statistics:</b> Gaussian Mixture Models – Nearest Neighbor Methods – Unsupervised Learning – K means Algorithms – Vector Quantization – Self Organizing Feature Map
5	<b>Dimensionality Reduction And Evolutionary Models :</b> Dimensionality Reduction – Linear Discriminant Analysis – Principal Component Analysis – Factor Analysis – Independent Component Analysis – Locally Linear Embedding – Isomap – Least Squares
6	<b>Optimization:</b> Evolutionary Learning – Genetic algorithms – Genetic Offspring: - Genetic Operators – Using Genetic Algorithms – Reinforcement Learning – Overview – Getting Lost Example – Markov Decision Process.
7	<b>Graphical Models :</b> Markov Chain Monte Carlo Methods, Sampling – Proposal Distribution – Markov Chain Monte Carlo – Graphical Models – Bayesian Networks – Markov Random Fields – Hidden Markov Models – Tracking Methods

### Elective Group:(02) Data Analytics

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504-02-C	<b>Weka</b>	2L+1T+0P = 3C	2018
<b>Prerequisite:</b> Knowledge in basic analytical algorithms			
<b>Course Objective :</b> <ul style="list-style-type: none"> <li>• To introduce the basic concepts and various techniques of machine learning</li> <li>• To give idea about supervised and unsupervised learning techniques.</li> <li>• The purpose of machine learning is to discover patterns in your data and then make predictions based on those often, complex patterns to answer business questions, and help solve problems. Machine learning helps analyze your data and identify patterns</li> </ul>			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>• After Completion of this course students will be able to understand the difference between supervised, unsupervised and semi supervised learning.</li> <li>• To apply appropriate machine learning algorithms using weka tool to given problem.</li> <li>• To as per data result requirement to modify existing algorithms for better result.</li> </ul>			
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>• Data Mining Concepts and Techniques By Jiawei Han &amp; Micheline Kamber</li> <li>• Data Mining: Practical Machine Learning Tools and Techniques (The Morgan Kaufmann Series in Data Management Systems) 3rd Edition, Kindle Edition</li> <li>• An Introduction to Machine Learning Hardcover by Miroslav Kubat (Author)</li> <li>• An Introduction to weka: Machine Learning in Java by Giorgio Sironi</li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOC's: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus:</b>			
Unit	Contents		
1	<b>Machine Learning and Weka basics:</b> Overview about machine learning concepts, Data Cleaning by weka, Major issues of machine learning, core algorithm type, Overview about weka basics , File type, Experimenter and explorer. Bayesian network, neural network, Trees, Rule concepts		
2	<b>Creating Dataset for Weka:</b> Creating ARFF, CSV file format, Data Types, Class enumeration, filtering algorithms based on feature type in weka, Interpreting and refining results		
3	<b>Linear Model:</b> Classification concepts, how classification works in data sample, Classifying data in weka using classification rules. Concept of Regression, Choose algorithm for regression. Multilayer perception –forward and backward propagation. Support vector machine classification and regression for predictive analysis		
4	<b>Decision Tree and model:</b> Decision tree concepts, Attribute selection measures, visual mining for decision tree, rule based classification, Ensemble methods- Bagging and boosting, Random forest method,		

	cross validation concept.
5	<p><b>Dimensionality Reduction And Evolutionary Models:</b>  Dimensionality Reduction – Linear Discriminant Analysis – Principal Component Analysis – Factor Analysis – Independent Component Analysis ,parametric and nonparametric method</p>
6	<p><b>Cluster Analysis using different methods:</b>  Concept of cluster analysis, methods of clustering with constraints, dimensional reduction methods, biclustering, probabilistic model based clustering.</p>
7	<p><b>Knowledge Data Flow:</b>  Create knowledge data flow on data sample, Analysis data flow, Interpret results with weka , Generate the rules on the basis of result.</p>

### Elective Group:(02) Data Analytics

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-02-D	Statistical Computing	2L+1T+0P = 3C	2018
<b>Course Objective :</b> The main objective of this course is to acquaint students with some basic concepts in Statistics. They will be introduced to some elementary statistical methods of analysis of data.			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>• To compute various measures of central tendency, dispersion, skewness and kurtosis.</li> <li>• To analyze data pertaining to attributes and to interpret the results.</li> <li>• To compute the correlation coefficient for bivariate data and interpret it.</li> <li>• To fit linear, quadratic and exponential curves to the bivariate data to investigate relation between two variables.</li> <li>• To fit linear regression model to the bivariate data</li> <li>• They are able to construct predicate model.</li> </ul>			
<b>References (Books, Websites etc) :</b> Fundamentals of Statistics , S.C.Gupta, Seventh Edition ,Himalaya Publishing House			
<b>Suggested MOOC:</b> Please refer these websites for MOOC's: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus:</b>			
Unit	Contents		
1	<b>Random Number:</b> Concept of random number generator, congruential method of generating uniformvariate, Generation of Binomial, Poisson, Geometric, Negative Binomial& Multinomial variate. Proofs of related results. Generation of continuous random variables covering Exponential, Normal, Gamma, Chi-square, Bivariate exponential, Bivariate Normal distributions, and mixture of distributions.		
2	<b>R – Language:</b> Introduction to R, elementary programming, application to data analysis, Descriptive statistics, Fitting of Distributions, Cross Tables, Correlations and Regression, Hypothesis Testing, ANOVA.		
3	<b>Simulation Technique:</b> Concept of Simulation, advantage, Disadvantage, Phases of Simulation ,Application of Simulation Models, Types of Simulation Models, Random Numbers, Monte-Carlo(Computer) Simulation Procedure for Monto-Carlo Simulation.		
4	<b>Queuing and Forecasting:</b> Concept of Queuing, Queuing models, Forecasting techniques, forecasting methods: Subjective For casting, Structural and Economic Model, Determination Models, Moving Average, Regression Average, Least Square Method of curve fitting.		
5	<b>Statistical Decision Theory:</b> Concept, state of Nature or Events, Payoff table, Opportunity Loss, Decision Making Environment, Decision Making Under Certainty, Decision Making Under Uncertainty, Maximax, Minimin, Maximax, Laplace Criterion, Hurwicz ,EMV,EOL, EVIP, Bayes		

	Decision rule
6	<b>Statistical Applications:</b> Regression analysis, Paired test, T-test,F-test, Chi test, Decisions Tree, Probability distributions
7	<b>Programming in C++:</b> Concept of OOP, Data types, Variables, Statements, Expressions, Control structures, Looping, Functions, Pointers. Programming for problems based on all Unit .

**Elective Group: (03) Linux Environment**

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credit</b>	<b>Year of introduction</b>
404-03-A	Linux Desktop Environment and Shell Programming	2L+1T+0P=3C	2018

**Course Objective:**

The purpose of this course is to have understanding of Linux operating system and environment

**Expected Outcome :**

At the end of the course a student should be able:

To use Linux operating system for configuring the environment.

**Textbook:**

- Red Hat Linux Bible: Fedora and Enterprise Edition - by Christopher Negus
- UNIX Concepts and Applications - by Sumitabha Das

**Suggested MOOC :**

Please refer these websites for MOOC's:

NPTEL / Swayam

[www.edx.com](http://www.edx.com)

[www.coursera.com](http://www.coursera.com)

<b>Unit</b>	<b>Contents</b>
1	<p><b>Using Shell Interface:</b></p> <ul style="list-style-type: none"> <li>▪ Introduction to Linux</li> <li>▪ Internal and external commands</li> <li>▪ General purpose utilities</li> <li>▪ Navigating the file system</li> <li>▪ Handling ordinary files</li> </ul> <p><b>Using GUI Environments:</b></p> <ul style="list-style-type: none"> <li>▪ GNOME desktop environment</li> <li>▪ KDE desktop environment</li> </ul>
2	<p><b>Using open source office suite</b></p> <ul style="list-style-type: none"> <li>▪ Word processor application</li> <li>▪ Spreadsheet application</li> <li>▪ Presentation application</li> <li>▪ Desktop database application</li> </ul> <p><b>Using the Internet</b></p> <ul style="list-style-type: none"> <li>▪ World wide web</li> <li>▪ FTP</li> <li>▪ Telnet</li> </ul>
3	<p><b>Using Multimedia</b></p> <ul style="list-style-type: none"> <li>▪ Graphics</li> <li>▪ Audio</li> <li>▪ Video</li> </ul>
4	<p><b>Introduction to shell</b></p> <ul style="list-style-type: none"> <li>▪ Introduction to 'bash' shell</li> </ul>

	<ul style="list-style-type: none"> <li>▪ Redirection</li> <li>▪ Pipes</li> <li>▪ Tees</li> <li>▪ Command substitution</li> <li>▪ Introduction to other shells: Korn shell, C Shell etc.</li> </ul> <p><b>Shell environment</b></p> <ul style="list-style-type: none"> <li>▪ Shell variables</li> <li>▪ Handling the command line arguments</li> <li>▪ Login scripts</li> <li>▪ Terminal characteristics</li> <li>▪ Aliases</li> </ul>
5	<p><b>Text editors</b></p> <ul style="list-style-type: none"> <li>▪ 'vi' editor</li> <li>▪ 'emacs' editor</li> </ul>
6	<p><b>Shell commands</b></p> <ul style="list-style-type: none"> <li>▪ General purpose utilities</li> <li>▪ File management</li> <li>▪ Process management</li> <li>▪ Communication management</li> </ul> <p><b>Regular expressions</b></p> <ul style="list-style-type: none"> <li>▪ Pattern matching</li> <li>▪ Wild cards</li> <li>▪ Regular expressions</li> <li>▪ Utilities: grep, egrep, fgrep etc.</li> </ul> <p><b>Filters</b></p> <ul style="list-style-type: none"> <li>▪ Introduction to filters</li> <li>▪ Utilities: pr, head, tail, cut, paste, sort, uniq, nl, tr etc.</li> </ul>
7	<p><b>Shell scripting</b></p> <ul style="list-style-type: none"> <li>▪ Introduction to shell scripting</li> <li>▪ Programming constructs</li> <li>▪ Mathematical operators</li> <li>▪ Logical operators</li> <li>▪ String manipulation</li> <li>▪ Interactive scripts</li> <li>▪ Handling command line arguments</li> </ul>

**Elective Group :( 03) Linux Environment**

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credit</b>	<b>Year of introduction</b>
405-03-B	Linux System Administration	2L+1T+0P=3C	2018

**Course Objective:**

The purpose of this course is to have understanding of Linux operating system and system administration

**Expected Outcome :**

At the end of the course a student should be able:

1.To use Linux administration for user management and security.

**Reference books :**

UNIX Concepts and Applications - by Sumitabha Das

**Suggested MOOC :**

Please refer these websites for MOOC's:

### Elective Group :( 03) Linux Environment

Course Number	Course Name	L-T-P- Credit	Year of introduction
504-03-C	Linux Network Administration	2L+1T+0P=3C	2018

**Course Objective:**

The purpose of this course is to have understanding of Linux operating system and Network administration.

**Expected Outcome :**

At the end of the course a student should be able

1. To use Linux administration for creation of server and management.

**Reference books :**

1. Linux Administration : A Beginner's Guide, Shah, TMH
- 2.LINUX: The Complete Reference, Petersen, TMH
- 3.LINUX Network Administrator's Guide, Kirch,SPD/O'REILLY

**Suggested MOOC :**

Please refer these websites for MOOC's:

NPTEL / Swayam

www.edx.com

www.coursera.com

Unit No	Contents
1	<b>Setup And Manage a Local Area Network:</b> Basic Networking, Introduction to networking, OSI Model,IP addressing (IPV4, IPV6) & LAN establishment with Linux , Configuring internet in Linux through broadband, dial-up, data card & through mobile (gprs).
2	<b>Setup And Manage Proxy Server :</b> Basics of proxy services, Configuring proxy services, Creating ACL's for controlling access to internet, SQUID: Proxy server setup, Blocking Websites, content filtering, Bandwidth Management
3.	<b>Setup And Manage FILE Server:</b> NFS: network file sharing & resource sharing across Linux environment. YUM server: Setting up local YUM, FTP YUM, HTTP YUM, EPEL, REMI & RPMForge like YUM configuration, DHCP:Dynamic Host Configuration Protocol setting up, Allocating IP, Subnet mask, default gateway and hostname, communication with DNS and other protocols.
4.	<b>Setup And Manage FTP Server:</b> Basics of File Transfer Protocol., Configuring vsftpd for anonymous ftp service. FTP:Setting up file transfer protocol,user management for FTP,hands on with ftp clients, FTP security (file,user, host,network based). Remote Services:SSH, Telnet & VNC (remote access services) with security(file,user, host,network based). Network Installation: NFS, HTTP, FTP, Kickstart, TFTP SAMBA: Linux to window data sharing along with security (file,user, host,network based) & managing SAMA graphically. Ticket Server: (OS-Ticket & ORTS) installing, configuring and managing.
5.	<b>Setup And Manage Web Server :</b> Basics of Web Services, Introduction to Apache, Configuring Apache for main site, Configuring Apache for multiple sites using IP-based, port based and name-based, Web Server: Apache installation, configuring dedicated server, shared server, user based authentication, load balancing and apache tuning. NIS, LDAP: (user's liberty to sit into remote machine) MAIL Server: knowing MUA,MTA& MDA, setting up and configuring POSTFIX,PO3s v/sIMAPs,

	Squirrel mail, accessing via Outlook, Thunderbird and evolution. Multi/virtual domain management, email security. Postfix Administration.
6.	<b>Setup And Manage boot Server :</b> What is booting and boot process of Linux?, Init Process or Run levels
7.	<b>Setup And Manage DNS Server :</b> Basics of Internet, Basics of DNS and BIND 9, Configuring DNS primary server, DNS:master DNS, slave DNS with forward & reverse zone, one DNS resolving multiple domain, dynamic DNS etc

### Elective Group: (03) Linux Environment

Course Number	Course Name	L-T-P- Credit	Year of introduction
505-03-D	Linux Internals and Network	2L+1T+0P=3C	2018

**Course Objective:**

- To get acquainted with Linux kernel and system calls
- To get knowledge about Process and managing process life.
- Build deeper view IPC and its applications.
- To make able to use Signals and threads and using thread library.
- Make them understanding network communications and using API to write socket programs.
- Make them understand about scheduling and memory management.

**Expected Outcome :**

At the end of the course a student should be able:

- 1.To use programming for kernel management and networking.

**Suggested MOOC :**

Please refer these websites for MOOC's:

NPTEL / Swayam

[www.edx.com](http://www.edx.com)

[www.coursera.com](http://www.coursera.com)

Unit No	Contents
1	<b>Introduction</b> Architecture of Linux, User and Kernel Space, Introduction to System Calls, System Calls in Detail, trace – Tracing system calls.
2	<b>Process management</b> Introduction to Process and process attributes, process vs. Program, Process States, Creating Process, Process termination, process commands Special case of processes.
3.	<b>Inter Process Communication</b> Introduction to IPC, Pipe, FIFO, Shared Memory, Advantages and Disadvantages of various IPC mechanisms, Application of IPC
4.	<b>Working with Signals and Threads</b> Introduction to Signals, Default disposition of Signals, Handling the Signals, Signal Related Functions Introduction to Threads, Creating Thread, Data handling with Thread , Types of Threads – Thread Attributes, Thread Cancellation , Threads vs. Process
5.	<b>Thread and Process Synchronization</b> Threads and resources management, Race condition in multi-threaded applications, writing thread safe code, Mutex, POSIX Semaphores, Usage of Binary semaphores and Mutex Race condition in multi-process applications, Limitations of shared memory, Semaphore Implementation.
6.	<b>Linux Networking</b> OSI and TCP/IP models, Addressing in TCP/IP, IPv4 and IPv6 differences, TCP three-way handshake, Network packet analysis in Linux, Networking commands in Linux, Using socket API to implement client server communication, Working with TCP and UDP sockets, Synchronous I/O

7.

**Process and Memory Management**

Need of Process scheduler, scheduling algorithms,  
Memory Management Unit (MMU) introduction, Concept of Virtual memory, using Paging & Page fault, other MMU concepts: Relocation, Protection, Sharing, Logical and physical organization.

### Elective Group:(04) Open Source Technologies

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404-04-A	Python	2L+1T+0P=3C	2018
<b>Course Objective :</b> Main objective of this paper is to learn functioning of various commands of Python language. Also study the practical applications in the field of Software development.			
<b>Expected Outcome :</b> At the end of this course, student should be able to understand <ul style="list-style-type: none"> <li>• Basic familiarity with Python</li> <li>• Development tools used for the Python programming</li> <li>• Implementation of OO concepts.</li> </ul>			
<b>References (Books, Websites etc) :</b> A Python Book: Beginning Python, Advanced Python, and Python Exercises : Dave Kuhlman			
<b>Suggested MOOC :</b> Swayam			
Course Plan			
Unit	Contents		
1	<b>Introduction to Python:</b> Etc, Lexical matters : Lines, Comments, Names and tokens, Blocks and indentation, Doc strings, Program structure, Operators, Code evaluation		
2	<b>Built-in Data types :</b> Numeric types, Tuples and lists, Strings, 1 The new string. format method, Unicode strings, Dictionaries, Files, Other built-in Types, The None value/type, Boolean values, Sets and frozen sets		
3	<b>Statements:</b> Assignment statement, import statement, print statement, if: elif: else: statement, for: statement., while: statement., continue and break statements, try: except: statement., raise statement..., with: statement, del, case statement		
4	<b>Functions, Modules, Packages, and DebuggingFunctions :</b> The def statement Returning values, Parameters, Arguments, Local variables, Other things to know about functions, Global variables and the global statement, Doc strings for functions, Decorators for functions, lambda Iterators and generators, Modules, Doc strings for modules, Packages		
5	<b>Classes:</b> A simple class, Defining methods, The constructor, Member variables, Calling methods, Adding inheritance, Class variables, Class methods and static methods, Properties, Interfaces, New style Classes, Doc strings for classes, Private members		
6	<b>Extending and embedding Python:</b> Introduction and concepts, Extension modules, SWIG, Pyrex, SWIG vs. Pyrex, Cython, Extension types, Extension classes		
7	<b>GUI Applications:</b> Introduction PyGtk, EasyGUI, Guidance on Packages and Modules, End Matter,		

### Elective Group:(04) Open Source Technologies

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405-04-B	Perl Scripting	2L+1T+0P=3C	2018
<b>Course Objective :</b> To introduce the basic concepts of Perl Programming and write, modify, and run simple Perl scripts and study working with files and using perl as an object oriented language			
<b>Expected Outcome :</b> At the end of this course, student should be able to understand <ul style="list-style-type: none"> <li>• The syntax and semantics of the Perl language</li> <li>• how to develop and implement various types of programs in the Perl language</li> <li>• various forms of data representation and structures supported by the Perl language</li> <li>• the appropriate applications of the Perl language</li> </ul>			
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>• Mastering Perl : Brian, O'Reilly</li> <li>• <a href="http://www.tutorialspoint.com/perl/index.htm">www.tutorialspoint.com/perl/index.htm</a></li> </ul>			
<b>Suggested MOOC :</b> Swayam			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Perl – Introduction :</b> What is Perl? Perl features , Perl – Syntax Overview, Perl – Data Types , Numeric Literals String Literals , Perl – Variables , Creating Variables, Perl– Scalars, Scalar Operations Perl – Arrays Perl – Hashes		
2	<b>Control Flow and Looping Statement:</b> if statement ,if else statement, if elsif else statement, unless statement, switch statement, The ? : Operator <b>Perl – Loops :</b> while loop , until loop for loop, For each loop do while loop nested loops, next statement, last statement, continue statement, redo statement, go to statement, Infinite Loop		
3	<b>Perl – Operators :</b> What is an Operator? Perl Arithmetic Operators, Perl Equality Operators, Perl Assignment Operators, Perl Bitwise Operators, Perl Logical Operators, Quote-like Operators Perl – Date and Time, GMT Time Format, Date & Time, Epoch time, POSIX Function strftime()		
4	<b>Perl – Subroutines :</b> Define and Call a Subroutine, Passing Arguments to a Subroutine, Passing Lists to Subroutines, Passing Hashes to Subroutines, Returning Value from a Subroutine, Private Variables in a Subroutine, Temporary Values via local(), State Variables via state() Subroutine, Call Context <b>Perl – References :</b> Create References Dereferencing Circular References, References to Functions Perl – Formats Define a Format Using the Format, Define a Report Header Number of Lines on a Page, Define a Report Footer		

5	<p><b>Perl – File I/O :</b>  Opening and Closing Files, Open Function, Sysopen Function, Close Function, The Operator getc Function, read Function, print Function, Copying Files Renaming a file, Deleting an Existing File Positioning inside a File  <b>Perl – Directories :</b>Display all the Files, Create new Directory, Remove a directory, Change a Directory</p>
6	<p><b>Perl – Regular Expressions :</b>  Pattern Matching, Match Operator Match Operator Modifiers Matching Only Once Regular Expression Variables. The Substitution Operator Substitution Operator Modifiers. The Translation Operator Translation Operator Modifiers More Complex Regular Expressions Matching Boundaries Selecting Alternatives Grouping Matching. The \G Assertion Regular-expression Examples</p>
7	<p><b>Introduction to Object Oriented Programming in Perl :</b> Object Basics, Defining a Class Creating and Using Objects, Defining Methods, Inheritance Method Overriding , Default Auto loading, Destructors and Garbage Collection, Object Oriented Perl Example</p>

**Elective Group:(04) Open Source Technologies**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504-04-C	PHP	2L+1T+0P=3C	2018
<b>Course Objective:</b>			
To make students able to design and develop the web based applications and systems.			
<b>Expected Outcome:</b>			
After completion of this course students will able to develop static and dynamic web applications through Word press, PHP and Joomla.			
<b>References (Books, Websites etc) :</b>			
<ul style="list-style-type: none"> <li>• PHP and MySQL Web Development by Welling Thomson Fourth Edition, Pearson publication</li> <li>• Teach Yourself PHP, MySQL and Apache by Julie C. Meloni Pearson publication</li> </ul>			
<b>Suggested MOOC :</b>			
<b>SWAYAM</b>			
Unit	Contents		
1	<b>Introduction To PHP:</b> Installing and configuring PHP, <b>Building blocks of PHP:</b> PHP tags, variables, data types, operators, expressions, constants, <b>Control Structures:</b> conditional statements, loops, switch statement		
2	<b>Working With Functions And Arrays:</b> <b>Working with functions:</b> What is a function? Function declaration and definition, Calling function, user-defined functions, variable scope, <b>Working with arrays:</b> Creating, sorting and reordering arrays, PHP classes. <b>Working with strings, dates and time:</b> Formatting, investigating and manipulating strings with PHP, using date and time functions in PHP, <b>Working with forms:</b> Creating a simple input form		
3	<b>Working With Files:</b> Saving data, storing and retrieving Bob's order, processing files, opening file, writing to a file, closing a file, reading from a file, uses other useful file functions.		
4	<b>Working With Cookies And Sessions:</b> <b>Working with cookies:</b> Introducing cookies, setting and deleting cookies with PHP <b>Working with session:</b> starting a session, working with session variables, passing session IDs in the query string, destroying sessions and unsetting variables, using sessions		
5	<b>MYSQL:</b> Creating web database: Using MySQL monitor, logging into MySQL, creating databases and users, setting users and privileges, column data types <b>Working with MySQL database:</b> Inserting data into database, retrieving data from the database, retrieving data with specific criteria, retrieving data from multiple tables, retrieving data in particular order, grouping and aggregate data, using sub queries, updating records, deleting records from databases, dropping table and database		

6	<p><b>Accessing My-SQL Database From Web With PHP :</b></p> <p>Web database architecture</p> <p><b>Querying database from the web:</b> checking and filtering input data, setting up connection, Choosing database to use, querying database, retrieving the query result, disconnecting from the database.</p>
7	<p><b>WORDPRESS AND JOOMLA:</b></p> <p><b>WORDPRESS</b> - Word press Theme, Integration Adding Pages and posts Manage Widgets, Plug - In Project in Word press</p> <p><b>JOOMLA</b> – Joomla Installation, Template Integration, Adding content (articles management) Adding content (articles management) Project in Joomla</p>

**Elective Group:(04) Open Source Technologies**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-04-D	Ruby	2L-1T-0P=3C	2018
<p><b>Course Objective:</b> Main objective of this paper is to learn, object-oriented programming with Ruby, Rails fundamentals and how to create basic online applications. How to work with HTML controls, use models in Rails applications, and work with sessions. Details on working with databases and creating, editing and deleting database records, Methods for handling cookies and filters and for caching pages.</p>			
<p><b>Expected Outcome:</b> At the end of this course, student should be able to understand</p> <ul style="list-style-type: none"> <li>• Programming experience in an object-oriented language.</li> <li>• Basic familiarity with HTML important for Rails project.</li> </ul>			
<p><b>References (Books, Websites etc.):</b></p> <ul style="list-style-type: none"> <li>• Programming Ruby: The Pragmatic Programmers' Guide, Second Edition</li> <li>• Agile Web Development with Rails, Third Edition</li> <li>• <a href="http://www.webtechlearning.com">www.webtechlearning.com</a></li> </ul>			
<p><b>Suggested MOOC :</b> SWAYAM</p>			
Unit	Contents		
1.	<p><b>Introduction to Ruby :</b> Creating a first web application, getting started with Ruby, Checking the ruby documentation, working with numbers in ruby, working with strings in ruby.</p>		
2.	<p><b>Variables and Constants in Ruby :</b> Storing data in variables, creating constants, interpolating variables in Double-Quoted strings, reading text on the command line, creating symbols in ruby, working with operators, Handling operator precedence, working with Arrays, using Two Array Indices, working with Hashes, working with ranges.</p>		
3.	<p><b>Conditional Loops, Methods and Blocks:</b> If Statement, Using the case statement, using loops, creating and calling a method, making use of Scope, working with Blocks</p>		
4.	<p><b>Classes:</b> Encapsulation, creating a class, creating an object, basing one class to another,</p>		
5.	<p><b>Objects:</b> Understanding Ruby's object Access, overriding method, creating class variables, creating class methods, creating Modules, creating Mixins</p>		
6.	<p><b>Rails:</b> Putting Ruby to Rails, introducing Model View Controller Architecture, giving the view something to do, mixing ruby code and HTML inside the view, passing data from an action to a view, escaping sensitive text, adding a second action.</p>		
7.	<p><b>Building Simple Rails Applications :</b> Accessing data the user provides, using rails shortcuts for HTML controls, working with models, tying controls to models, initializing data in controls, storing data in sessions</p>

### Elective Group: (06) Dot Net Technologies

Course Number	Course Name	L-T-P-Credits	Year of Introduction
404-06-A	C# Programming	2L+1T+0P=4C	2018

**Course Objective :**

The objectives of the course is to introduce Object Oriented Programming using C#, make student to use C# for implementing object- oriented concepts. Make student to create, compile and run object-oriented C# programs using Visual Studio.

**Expected Outcome :**

At the end of this course, student should be able to

- Design classes using inheritance and polymorphism.
- Design interfaces, abstract and concrete classes.
- Design Console Based Applications.
- Design applications using event driven programming.
- Write basic LINQ programs.

**References (Books, Websites etc) :**

- C#: The Complete Reference, McGraw-Hill Osborne Media- Herbert Schildt.
- C # Programming- Wrox publication.
- Programming in C# -A Primer. E. Balaguruswamy.

**Suggested MOOC :** 1) Coursera ([www.coursera.org](http://www.coursera.org))  
 2) mymooc ([www.my-mooc.com](http://www.my-mooc.com))  
 3) Class Central ([www.class-central.com](http://www.class-central.com))  
 4) edX ([www.edx.org](http://www.edx.org))  
 5) Mooc List ([www.mooc-list.com](http://www.mooc-list.com))

**Syllabus:**

Unit No.	Contents
1.	<p><b>Introduction to C#</b>                      The Dot Net Framework, CLR, CLS, CTS, MSIL, Managed Code, Programming Features of C#, Compile and Execution of C# Program, Keywords in C#, Namespaces, Data Types, Declaration and Initialization of Variables, Operators, Type Conversions,                      If, If...else, switch, The ‘?:’ Operator, The while Loop, The do....while Loop, The for Loop, ‘var’ Variable.</p>
2.	<p><b>Methods and Arrays:</b>                      Define Method, Declaring and Calling a Method, Passing Method Parameters (Pass By Value, Pass by Reference), Method Overloading,                        Define Array, One Dimensional Array (Declaration, Creation and Initialization), Two Dimensional Array, Multidimensional Array, ArrayList Class, Jagged Array,                        Manipulating Strings, String Methods, Regular Expressions, foreach Loop.</p>
3.	<p><b>Class and Objects:</b>                      Basic Principles of OOP, Define a Class, Member Access Modifiers,                        Constructors, Types of Constructors (Default Constructor, Overloaded Constructor, Static</p>

	<p>Constructor, Private Constructor and Copy Constructor), Destructors,  ‘this’ Reference, Constant Members, Properties, Auto Implemented Properties, Object Initializer, Collection Initializer, Anonymous Types, Extension Methods,  Partial Class, Partial Methods, Indexers.</p>
4.	<p><b>Inheritance and Polymorphism</b>  Define Inheritance, Types of Inheritance, Method Overriding, Abstract Class, Abstract Methods, Sealed Class and Methods,  Define Polymorphism, Static Polymorphism: Function Overloading Operator Overloading, Overloadable and Nonoverloadable Operators, Dynamic Polymorphism,  Defining Interface, Extending interface, Interface and Inheritance, Explicit Interface.</p>
5.	<p><b>Errors and Exception Handling</b>  Types of Errors, Exceptions, Syntax for Exceptions Handling Code, Multiple catch Statements, finally Statement, Nested try Blocks, Throwing Our Own Exception.</p>
6.	<p><b>Delegates, Events and LINQ</b>  Define Delegate, Singlecast Delegate, Multicast Delegate, Events, Declaring Events,  Introduction to LINQ, LINQ Query Operators, LINQ-SQL, LINQ-Objects, LINQ-Dataset.</p>
7.	<p><b>Professional Techniques for C#</b>  Runtime Type Identification, Reflection, Attributes, Generics, Generic Structure, Unsafe code, Iterators Examples.</p>

### Elective Group: (06) Dot Net Technologies

Course Number	Course Name	L-T-P-Credits	Year of Introduction
405-06--B	ASP.Net with C#	3L+1T+0P=4C	2018

#### Course Objective:

The objective of the course is to introduce web programming using C#, make student to use C# for implementing different controls of ASP.Net. To introduce designing and interacting tools such CSS and JavaScript.

#### Expected Outcome :

At the end of this course, student should be able to

- Design websites using C# platform
- Work with various controls of ASP.Net
- Work with different states, cookies, themes etc.
- Work with data access controls using different databases.

#### References (Books, Websites etc) :

- ASP.Net: The Complete Reference, Matthew MacDonald
- Professional ASP.Net (4/4.5) in C #- Wrox publication.

**Suggested MOOC:** 1) Coursera ([www.coursera.org](http://www.coursera.org))  
 2) mymooc ([www.my-mooc.com](http://www.my-mooc.com))  
 3) Class Central ([www.class-central.com](http://www.class-central.com))  
 4) edX ([www.edx.org](http://www.edx.org))  
 5) Mooc List ([www.mooc-list.com](http://www.mooc-list.com))

#### Syllabus

Unit	Contents
1.	<b>Introduction of ASP.Net:</b> Introduction to ASP.Net, ASP.Net Architecture, ASP.Net Page Life Cycle, Page Life Cycle Events, ASP.Net Directives.
2.	<b>Using ASP.Net Rich, Validation, and Navigation Controls:</b> FileUpload Control, Calendar Control, AdRotator Control, MultiView Control, and Wizard Control Examples. RegularFieldValidator, RegularExpressionValidator, RangeValidator, CompareValidator, CustomValidator, ValidationSummary, Menu, SiteMapPath, TreeView Control.
3.	<b>Master Pages, CSS, and JavaScript:</b> Working With Master Pages, Nested Master Pages, CSS Overview, Adding Style Sheets into, Web Pages, Editing Styles, Applying Styles to Master Pages, Applying Styles to Web Page, JavaScript Overview, Adding JavaScript files into ASP.Net, Editing JavaScript Files, Applying JavaScripts to Master Pages, Applying JavaScripts to Web Page.
4.	<b>State Management:</b> View State, Hidden Field, Session State, Application State, QueryString, HttpContext, Cookies, Caching, Types of Caching

<b>5.</b>	<b>Personalization and Security:</b> Configuration Overview, Concept of Theme, Applying Themes, Types of Themes- Page Theme and Global Theme, Skins, Security in ASP.Net, Authentication and Authorization Membership and Roles.
<b>6.</b>	<b>Data Access in ASP.Net:</b> Data Source Controls, DataList, DataPager, GridView, DetailsView, FormView, Object Data Sources, ListView, DataPager, Repeater
<b>7.</b>	<b>Publishing and Testing Website:</b> IIS, Configuration of IIS, Setting Application Pool, Publish Website, Testing Website.

### Elective Group: (06) Dot Net Technologies

Course Number	Course Name	L-T-P-Credits	Year of Introduction
504-06-C	C# Windows Programming	3L+1T+0P=4C	2018

#### Course Objective:

The objective of the course is to introduce windows programming using C#, make student to use C# for implementing basic and advanced controls of windows applications. To introduce ADO.Net, XML, and Report Wizards with windows applications.

#### Expected Outcome :

At the end of this course, student should be able to

- Design Windows forms applications
- Work with advanced controls of windows forms application
- Work with ADO.Net classes and XML
- Generate reports

#### References (Books, Websites etc) :

- C#: The Complete Reference, McGraw-Hill Osborne Media- Herbert Schildt.
- C # Programming- Wrox publication.
- Programming in C# -A Primer. E. Balaguruswamy.

#### Suggested MOOC:

- 1) Coursera ([www.coursera.org](http://www.coursera.org))
- 2) mymooc ([www.my-mooc.com](http://www.my-mooc.com))
- 3) Class Central ([www.class-central.com](http://www.class-central.com))
- 4) edX ([www.edx.org](http://www.edx.org))
- 5) Mooc List ([www.mooc-list.com](http://www.mooc-list.com))

#### Syllabus

Unit	Contents
1	<b>Introduction to Windows Programming:</b> Overview of Windows Forms, Windows Forms Class Hierarchy, Windows of Visual Studio IDE (Start Page, Menu Bar, Solution Explorer Window, Properties Window, Server Explorer Window, Toolbox, Forms Designer), Dynamic Controls.
2	<b>Working with Windows Forms Controls:</b> Properties, Events and Examples of: Button, Label, LinkLabel, TextBox, RichTextBox, ListBox, ListView, ComboBox, RadioButton, CheckBox, CheckedListBox, DateTimePicker, PictureBox, Timer, ProgressBar, TrackBar, HScrollBar, VScrollBar
3	<b>Dialog Controls:</b> ColorDialog, FolderBrowserDialog, FontDialog, OpenFileDialog, SaveFileDialog. Examples.
4	<b>Menus, MDI and Containers:</b> ContextMenuStrip, MenuStrip, StatusStrip, ToolStrip, SDI and MDI, Visual Inheritance, GroupBox, Panel, TreeView, SplitContainer, TabControl Examples.
5	<b>File Handling using C#:</b> FileStream, BinaryReader, BinaryWriter, StreamReader, StreamWriter, StringReader, StringWriter, DirectoryInfo, FileInfo Examples.

6	<b>Data Access and Data Binding:</b> ADO.NET Overview, .NET Data Providers, ADO.Net Objects, Connections, Commands, Data Adapters, Data Readers , Data Sets , Data Tables , Data Views , Data Binding, Reports.
7	<b>XML with Windows Forms Applications:</b> XML file, Create XML file, Write data into XML, Read Data from XML file using C#. Update, Filter, and Delete data form XML File.

### Elective Group: (06) Dot Net Technologies

Course Number	Course Name	L-T-P-Credits	Year of Introduction
505-06--D	Advanced ASP.Net with MVC	2L+1T+0P=3C	2018

#### Course Objective:

The objective of the course is to introduce advanced ASP.Net using C#, make student to use C# for implementing advanced features of ASP.Net such JQuery and MVC framework.

#### Expected Outcome :

At the end of this course, student should be able to

- Work with web parts and AJAX controls.
- Create and consume web services using C#.
- Work with WPF and WCF.
- Work with JQuery and MVC framework.

#### References (Books, Websites etc) :

- ASP.Net: The Complete Reference, Matthew MacDonald
- Professional ASP.Net (4/4.5) in C #- Wrox publication.
- *Microsoft ASP.NET Step by Step (Microsoft Press)* - G. Andrew Duthrie

#### Suggested MOOC:

- 1) Coursera ([www.coursera.org](http://www.coursera.org))
- 2) mymooc ([www.my-mooc.com](http://www.my-mooc.com))
- 3) Class Central ([www.class-central.com](http://www.class-central.com))
- 4) edX ([www.edx.org](http://www.edx.org))
- 5) Mooc List ([www.mooc-list.com](http://www.mooc-list.com))

#### Syllabus

Unit	Contents
1	<b>ASP.Net Web Parts:</b> Introduction, Advantages of Web Parts, WebPartsManager, CatalogPart, PageCatalogPart, EditorPart, WebPartZone, EditorZone, CatalogZone Controls.
2	<b>ASP.Net AJAX:</b> AJAX control toolkit, Building a ASP.NET Page with Ajax ScriptManager Control, UpdatePanel Control, UpdateProgress Control, Timer Control.
3	<b>ASP.Net Web Services:</b> Introduction to Web services, Creating Web Services, Setting the Web Service Attributes, Test and Run Web Services, Consuming Web Services.
4	<b>Windows Presentation Foundation:</b> Overview of WPF, Creating Simple Program in WPF, WPF-Command line, WPF-Data Binding, WPF-Resources, and WPF-Templates.
5	<b>Windows Communication Foundation:</b> Overview of WCF, WCF-architecture, Creating WCF Service, Hosting WCF Service, Types of Hosting WCF Service, Consuming WCF Services. Difference between WCF and Web Services.

6	<b>JQuery:</b> Introduction to JQuery, Features, JQuery Selectors, Working of JQuery, JQuery UI Library, Document Ready Event, Events Handling, Effects Methods.
7	<b>Working with MVC:</b> Introduction to .Net MVC Framework, MVC Framework Features, MVC Architecture, MVC Components, MVC Application Folders, Configuration files- global.asax, packages.config, web.config, Working with Views, Working with Controls.

### Elective Group: (07) Net Centric Technologies

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404-07-A	<b>HTML5</b>	3L+1T+0P=4C	2018
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>• Understand the Concepts of HTML 5 &amp; the Applications of HTML 5 to Website Development.</li> <li>• Design and Develop Websites for various Business Applications.</li> <li>• Check information inputted into a Database and validate it.</li> </ul>			
<b>Pre-requisites:</b> Basic concepts of Languages and HTML tags with functions.			
<b>Expected Outcome :</b> After going through this course a student should be able to understand : <ul style="list-style-type: none"> <li>• The Learners will be able to write HTML 5 code for developing website applications.</li> <li>• The websites developed can be uploaded and implemented for the business areas .</li> </ul>			
<b>References (Books, Websites etc.):</b> <ul style="list-style-type: none"> <li>○ Bruce Lawson, Remy Sharp –Introducing HTML 5.0 –Google Books 2010.</li> <li>○ Jeffrey Zeldman and Jeremy Keith “HTML 5 for Webdesigners –Google Books-2010.</li> <li>○ Book by Brian Albers, Frank Salim, and Peter Lubbers “Pro HTML 5.0 Programming</li> <li>○ Christopher Murphy, Divya Manian, and Richard Clark :Beginning HTML5 and CSS3.2012.</li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOC’s: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus</b>			
Unit	Contents		
1	<b>Introduction to HTML:</b> MIME Types, Standards for the Internet, Evolution of HTML, Introduction to XHTML, Introduction to Working Group, W3C		
2	<b>Features of HTML5:</b> Detection of HTML5 Support, Modernizr: An HTML5 Detection Library, Canvas, Canvas , Text, Video, Video Formats, Local Storage, Web Workers, Offline Web Applications, Geolocation, Input Types, Placeholder Text, Form Autofocus, Microdata		
3	<b>Elements of HTML5:</b> The Doctype, The Root Element, The <head> Element, New Semantic Elements in HTML5, Handling of Unknown Elements by the Browsers, Headers, Articles, Dates and Times, Navigation, Footers		
4	<b>Drawing Surface:</b> Introduction to Canvas, Simple Shapes, Canvas Coordinates, Paths, Text, Gradients, Images		
5	<b>Video on the web</b> Video Containers, Video Codecs, Audio Codecs		

6	<b>Geolocation and Local Storage for Web Applications</b> Geolocation API, Handling Errors, geo.js Library, Evolution of Local Storage, Introduction to HTML5 Storage
7	<b>Web Forms and Offline Web Application</b> Introduction to Web Forms, Placeholder Text, Autofocus Field, e-Mail, Addresses, Web Addresses, Numbers as Spinboxes, Numbers as Sliders, Date Pickers, Search Boxes, Color Pickers, Introduction to Offline Web application, The Cache Manifest

**Elective Group: (07) Net Centric Technologies**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405-07-B	JavaScript Programming	2L+1T+0P=3C	2018

**Course Objective:**

- Understand the JavaScript language & the Document Object Model.
- Alter, show, hide and move objects on a web page.
- Check information inputted into a form.
- Javascript allows programming to be performed without server interaction.
- Javascript can respond to events, such as button clicks.
- Javascript can validate data before sending out a request.
- Javascript can adjust an HTML document for special effects

**Pre-requisites:**

Computer. Pre-requisite / Target Audience: An intermediate knowledge on Java and Advanced Java Technology.

**Expected Outcome :**

After going through this course a student should be able to understand :

- The Learners will be able to write Java Script code for developing website applications.
- The websites developed can be uploaded and implemented for the business areas in java Script Code.

**References (Books, Websites etc.):**

1. 1. Danny Goodman Michael Morrison Paul Novitski Tia GustaffRayl, “Javascript Bible” , 7th Edition Wiley India Pvt Ltd.
2. Kogent Learning Solutions Inc, “Web Technologies Black Book: HTML, JavaScript, PHP, Java, JSP, XML and AJAX , “ Dreamtech Press.
3. Fritz Schneider,Thomas Powell ,“JavaScript : The Complete Reference”, 2nd Edition Tata McGraw - Hill Education

**Suggested MOOC:**

Please refer these websites for MOOC’s:

NPTEL / Swayam

www.edx.com

[www.coursera.com](http://www.coursera.com)

**Syllabus**

Unit	Contents
1	<b>Introduction to Javascript:</b> JavaScript Overview , Comparison between Java, JavaScript & VB Script, JavaScript Programming Basics
2	<b>Variables and Operators:</b> Variables and Data Types , Using Variables and Literals , Operators
3	<b>Introduction to Objects, Methods and Events</b> Objects, Methods, and Events, Events and Program Flow, Jumping Right In, Running Scripts.
4	<b>Control Statements</b> Controlling the Flow: JavaScript Control Statements

5	<p><b>Understanding Functions</b> Built in Functions , Standard Date and Time Functions</p>
6	<p><b>The Window Object</b> The Window Object, Dialog Boxes , Status Bar Messages , Window Manipulations</p> <p><b>The Document Object</b> The Document Object, Writing to Documents, Dynamic Documents</p> <p><b>Dates and Math Objects</b> The Date Object , Using and Manipulating Dates , The Math Object , Doing Math with JavaScript</p>
7	<p><b>Frames , Forms and Forms-based Data and Form Validation .</b> HTML Frames Review, Scripting for Frames, The Form Object , Working With Form , Elements and Their Properties, Form Validation: A Process , Testing Data , Preparing Data for Validation and Reporting Results , Validating Non-text Form Objects</p> <p><b>The String and RegExp Objects</b> The String Object , Using String Object Methods to Correct Data Entry Errors , Creating Dynamic Effects with Substring Methods , The RegExp Object</p>

### Elective Group: (07) Net Centric Technologies

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504-07-C	AJAX Programming	2L+1T+0P=3C	2018
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>• Understand the Concepts of AJAX Programming &amp; the Applications of AJAX to Website Development.</li> <li>• Design and Develop Websites for various Business Applications using AJAX Programming.</li> <li>• Check information and handle database in websites.</li> </ul>			
<b>Pre-requisites:</b> Computer. Pre-requisite / Target Audience: An intermediate knowledge on Programming Languages and its structure for developing professional websites.			
<b>Expected Outcome :</b> After going through this course a student should be able to understand : <ul style="list-style-type: none"> <li>• Concepts of AJAX Programming and its Applications to website Development.</li> <li>• Design and develop professional web applications in the business domain.</li> </ul>			
<b>References (Books, Websites etc.):</b> <ul style="list-style-type: none"> <li>○ Ajax: The Definitive Guide: Interactive Applications by Anthony T. Holdener -2014.</li> <li>○ Kris Hadlock “Ajax for Web Developers Amazon Books 2012.</li> <li>○ Ajax: The Complete Reference by Thomas A. Powell-Amazon Books 2013</li> <li>○ Website :- <a href="https://www.amazon.com/Learn-JavaScript-Ajax-w3Schools-W3Schools/dp/0470611944/">https://www.amazon.com/Learn-JavaScript-Ajax-w3Schools-W3Schools/dp/0470611944/</a></li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOC’s: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus</b>			
Unit	Contents		
1	<b>Introduction to AJAX:</b> Introduction to Web Architecture, Traditional Web Communication Processes and Technologies , Introduction to AJAX		
2	<b>Interacting with the Web Server using XMLHttpRequest Object:</b> Introduction to Interaction with Web Server, Create an XMLHttpRequest Object, Interact with the Web Server		
3	<b>Working with PHP and AJAX:</b> Introduction to PHP , Process Client Requests , Accessing Files Using PHP		
4	<b>Manipulating XML Data:</b> Basics of XML , Create an XML Document Using DOM , Retrieve Data from XML		
5	<b>Working with XSLT and AJAX:</b> Basics of XSLT , Transform Responses Using XSLT		
6	<b>Working with JSON:</b> Introduction to JSON Format, Create Data in JSON Format , Implement JSON on the Server		

	Side
7	<p><b>Using Frameworks in AJAX:</b> Understand AJAX Frameworks , Use Prototype and Script.aculo.us , Use jQuery</p> <p><b>Applying Basic AJAX Techniques</b> Download Images Using AJAX, Auto-Populate Select Boxes</p> <p><b>Implementing Security and Accessibility in AJAX Applications</b> Create Secure AJAX Applications , Create Accessible Rich Internet Applications</p>

### Elective Group: (07) Net Centric Technologies

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-07-D	Web Services	2L+1T+0P=4C	2018
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>• Understand the Concepts of Web services the Applications for Website Development.</li> <li>• Design and Develop Websites for various Business Applications using XML</li> <li>• Check and Validate information inputted into a Database and validate it.</li> </ul>			
<b>Pre-requisites:</b> Computer. Pre-requisite / Target Audience: An intermediate knowledge on XML			
<b>Expected Outcome :</b> After going through this course a student should be able to understand : <ul style="list-style-type: none"> <li>• Learners will be able to write code in XML and Understand the basic concepts of web services .</li> <li>• The programmes written can be implemented for business applications using XML and apply web services in different areas of business .</li> </ul>			
<b>References (Books, Websites etc.):</b> <ul style="list-style-type: none"> <li>○ Book by Ethan Cerami Web Services Essentials Amazon Books 2014.</li> <li>○ Book by Eric Newcomer Understanding Web Services: XML, WSDL, SOAP, and UDDI-Amazon Books 2013.</li> <li>○ Erik T. Ray “Learning XML Google Books 2015.</li> <li>○ Website :- <a href="https://www.w3schools.com/xml/default.asp">https://www.w3schools.com/xml/default.asp</a></li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOC’s: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus</b>			
Unit	Contents		
1	<b>XML Technology Family:</b> Introduction to XML, Advantages of XML, EDI, Databases for Web, XML Based Standards, Structuring with Schemas: DTD, XMLSchemas , XML Processing: DOM, SAX , Presentation Technologies: XSL, XFORMS, XHTML Transformation: XSLT, XLINK, XPATH, XQuery		
2	<b>Architecting Web Services:</b> Business Motivations for Web Services , Technical Motivations for Web Services, Limitations of CORBA and DCOM, Service Oriented Architecture (SOA), Architecting Web Services, Implementation View: Web Services Technology Stack, Logical view: Composition of Web Services, Deployment View: From Application Server to Peer to Peer, Process View: Web Service Lifecycle		
3	<b>Building Blocks of Web Services:</b>		

	Transport Protocols for Web Services, Messaging with Web Services, Protocols for Web Services, SOAP, WSDL, UDDI
4	<b>Creation of Web Services:</b> Web Services using .Net, Web Services using J2EE
5	<b>Implementing XML in e-Business:</b> B2B Applications, B2C Applications, Different types of B2B Interactions, Components of e-Business XML Systems, ebXML, RosettaNet, Applied XML in Vertical Industry: Web Services for Mobile Devices
6	<b>XML Content Management:</b> Semantic Web, Role of Metadata in Web Content, Resource Description Framework: RDF Schema, Architecture of Semantic Web, Content Management Workflow: XLANG, WSFL
7	<b>Security in Web Services:</b> Meeting Security Requirements, XML Encryption, Client / Server Security Issues

### Elective Group:(08) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404-08-A	Enterprise Resource Planning	2L+1T+0P=3C	2018
<p><b>Course Objective:</b> The objective of the course is to enable students in learning basic concepts of Enterprise Resource Planning so that they can understand how to use the organizational resources effectively.</p>			
<p><b>Pre-requisites:</b> Knowledge of Business Process , Business Functions and MIS</p>			
<p><b>Expected Outcome :</b> After going through this course a student should be able to understand :</p> <ul style="list-style-type: none"> <li>• Will be able to understand the concepts of ERP.</li> <li>• Can be able to design and develop ERP systems for Business applications .</li> <li>• Implementation of ERP for various areas of Interest in Business Organizations .</li> </ul>			
<p><b>References (Books, Websites etc.):</b> 1. Alexis Leon, ERP (Demystified Hrs), 5/E, Tata McGraw-Hill, 2006. 2. David L Olson, Managerial Issues of Enterprise Resource Planning Systems, McGraw Hill, International Edition-2006. 3 Sinha; Enterprise Resource Planning , Cengage Learning, New Delhi,</p>			
<p><b>Suggested MOOC:</b> Please refer these websites for MOOC's: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a></p>			
<b>Syllabus</b>			
Unit	Contents		
1	<p><b>Introduction to ERP:</b> Overview of ERP, MRP, MRPII and Evolution of ERP, Integrated Management Systems, Reasons for the growth of ERP , Business Modeling , Integrated Data Model , ERP Market.</p>		
2	<p><b>ERP Technologies:</b> Business Process Re-engineering (BPR), BPR Process, Clean Slate Re-engineering Technology Enabled Re-engineering , Myths regarding BPR , Business Intelligence Systems- Data Mining, Data Warehousing, On-Line Analytical Processing (OLAP), Supply Chain Management, Best Practices in ERP.</p>		
3	<p><b>ERP Modules :</b> (a) Finance, Accounting Systems, Manufacturing and Production Systems, Sales and Distribution Systems, Human Resource Systems, Plant Maintenance System, Materials Management System, Quality Management System (b) ERP System Options and Selection (c) ERP proposal Evaluation.</p>		

4	<p><b>ERP Implementation:</b> Implementation Strategy Options, Features of Successful ERP Implementation, Strategies to Attain Success</p>
5	<p><b>Maintenance and Benefits of ERP:</b> Improvement opportunities , IT Maintenance, Business Needs , Business Priority , Maintenance Cost , User Training, ERP Solutions</p>
6	<p><b>ERP &amp; Information System:</b> Reduction of Lead Time, On-Time Shipment , Reduction in Cycle Time, Improved Resource Utilization, Better Customer Satisfaction, Improved Supplier Performance , Increased Flexibility , Reduced Quality Costs, Improved Information Accuracy and Decision Making Capabilities.</p>
7	<p><b>Case Studies on ERP :</b> ERP for Finance , Manufacturing , Supply Chain and Quality Management for any Business Organization</p>

### Elective Group:(08) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405-08-B	E-Commerce	2L+1T+0P=3C	2018
<p><b>Course Objective:</b> This course explores the basics of working with internet including WWW, Email, Browsing, Chatting etc., and understands the potential of secured electronic transactions, E-mail security and electronic publishing.</p>			
<p><b>Pre-requisites:</b> Knowledge of Internet and Internet Technologies , Programming knowledge and Network Technology basics.</p>			
<p><b>Expected Outcome :</b></p> <ul style="list-style-type: none"> <li>• Will be able to understand the concepts of E-Commerce.</li> <li>• Can be able to design and develop E-Commerce facilities for Business applications . Implementation of E-Commerce Websites for Business firms.</li> </ul>			
<p><b>References (Books, Websites etc.):</b></p> <ol style="list-style-type: none"> <li>1. Web Commerce Technology Handbook, byDanielMinoli, EmmaMinoli, McGraw-Hill.</li> <li>2. Frontiers of electroni commerce by Galgotia.</li> <li>3. E-Commerce fundamentals and applications Hendry Chan, Raymond Lee, Tharam Dillon, Ellizabeth Chang, John Wiley.</li> <li>4. E-Commerce, S.Jaiswal – Galgotia.</li> <li>5. E-Commerce, Efrain Turbon, Jae Lee, David King, H.Michael Chang.</li> <li>6. Electronic Commerce – Gary P.Schneider – Thomson.</li> <li>7. E-Commerce – Business, Technology, Society, Kenneth C.Taudon, Carol Guyerico Traver.</li> </ol>			
<p><b>Suggested MOOC:</b> Please refer these websites for MOOC's: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a></p>			
<b>Syllabus</b>			
Unit	Contents		
1	<p><b>Introduction and Concept</b> What is E-Commerce? Types of E-Commerce and Applications of E-Commerce, E-Commerce Basic Requirements, Internet and Concepts of Internet.</p>		
2	<p><b>Approaches to Safe Electronic Commerce:</b> Secure Transport Protocols, Secure Transactions, Secure Electronic Payment Protocol (SEPP), Secure Electronic Transaction (SET), Certificates for authentication Security on web Servers and Enterprise Networks, Electronic Cash and Electronic Payment Schemes: Internet Monetary, Payment &amp; Security Requirements. Payment and Purchase Order Process,On-line Electronic cash.</p>		

3	<p><b>Internet/Intranet Security Issues and Solutions:</b>  The need for Computer Security, Specific Intruder Approaches, Security Strategies, Security Tools, Encryption, Enterprise Networking and Access to the Internet, Antivirus Programs, Security Teams.</p>
4	<p><b>Master Card/Visa Secure Electronic Transaction:</b>  Introduction, Business Requirements Concepts, payment Processing, E-Mail and Secure E-mail , Technologies for Electronic Commerce: Introduction, The Means of Distribution, A model for Message Handling, E-mail working, Multipurpose Internet Mail Extensions, Message Object Security Services, Comparisons of Security Methods, MIME and Related Facilities for EDI over the Internet.</p>
5	<p><b>Internet Resources for E-Commerce</b>  Introduction, Technologies for web, Servers, Internet Tools Relevant to Commerce, Internet Applications for Commerce, Internet Charges, Internet Access and Architecture, Searching the Internet, Advertising on Internet: Issues and Technologies, Advertising on the Web, Marketing creating web site, Electronic Publishing Issues, Approaches and Technologies: EP and web based EP.</p>
6	<p><b>E-Commerce Website Development</b>  Website Development , Online Transactions and Payments , Security Issues in E-Commerce website</p>
7	<p><b>Case Studies on E-Commerce :-</b>  Amazon , Flip kart , Myantra</p>

## Elective Group:(08) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504-08-C	Recommender System	2L+1T+0P=3C	2018
<b>Course Objective:</b>			
<b>Pre-requisites:</b> Knowledge about Business Organizations and its functions , Theory of Recommender Systems and Decision Making process .			
<b>Expected Outcome :</b> After going through this course a student should be able to understand : <ul style="list-style-type: none"> <li>• Will be able to understand the concepts of Decision Making Process.</li> <li>• Can be able to design and develop Recommender for Business applications.</li> <li>• Implementation of Recommender System for various areas of Interest in Business Organizations .</li> </ul>			
<b>References (Books, Websites etc.):</b> <ol style="list-style-type: none"> <li>1. “Recommender systems An Introduction” by Dietmar Jannach, Markus Zanker, Alexzander Felfering, Gerhard friedrich by Cambridge university press 2011</li> <li>2. <a href="#">recommender systems handbook [book] by francesco ricci, lior rokach, paul b. kantor in books</a></li> </ol>			
<b>Suggested MOOC:</b> Please refer these websites for MOOC’s: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Syllabus</b>			
Unit	Contents		
1	<b>Introduction to Basic Concepts:</b> Collaborative Recommendation: User Based Nearest Neighbor recommendation, Item Based Nearest Neighbor recommendation, model based and pre-processing based approaches. Recent practical approaches and systems. Content based Recommendation: content representation and content similarity, similarity based retrieval, other text classification methods, Knowledge Based Recommendation: Knowledge representation and reasoning, interacting with constraint based recommenders, interacting with case based recommenders,		
2	<b>Hybrid recommendation approaches:</b> Opportunities for hybridization, Monolithic hybridization design, parallelized hybridization design, pipelined hybridization design,		
3	<b>Evaluating recommender systems :</b> General properties of Evaluation research, popular evaluation designs, evaluation on historical datasets, alternate evaluation design		
4	<b>Recent developments:</b> Attacks on collaborative recommender systems, Online consumer decision making		

5	<b>Recommender systems and the next-generation web</b> Recommendations in ubiquitous environments.
6	<b>Explanations in recommender systems</b> Explanations in constraint-based recommenders, explanation in case based recommenders, explanation in collaborative filtering recommenders.
7	<b>Case studies on Recommender System.</b>

### Elective Group:(08) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-08-D	Knowledge Management	2L+1T+0P=3C	2018
<p><b>Course Objective:</b> The objective of the course is to provide the basic skills of managing knowledge in organizations. Knowledge is an asset for retaining the competitive advantage of the organization. This course develops the capabilities of towards managing students to manage knowledge in organizations.</p>			
<p><b>Pre-requisites:</b> Knowledge about Information System and MIS with Implementation of MIS</p>			
<p><b>Expected Outcome :</b> After going through this course a student should be able to understand :</p> <ul style="list-style-type: none"> <li>• Will be able to understand the concepts of Knowledge and knowledge management .</li> <li>• Can be able to design and develop Knowledge management systems for Business applications .</li> <li>• Implementation of KM to various areas of Interest in Business Organizations .</li> </ul>			
<p><b>References (Books, Websites etc.):</b></p> <ol style="list-style-type: none"> <li>1. Madhukar Shukla:Competing Through Knowledge-Building a learning Organisation(Response Books, New Delhi.</li> <li>2. Tiwana, The Knowledge Management Toolkit: Practical Techniques for building a Knowledge Management Systemes, 2/e, Pearson Edu.</li> <li>3. Honey Cutt : “Knowledge Management Strategies”, PHI, New Delhi.</li> <li>4. A wad, KM, Pearson Edn, 2007.</li> <li>5. Barnes, Knowledge Management Systems, 1/e, Thomson 2006.</li> <li>6. Ikudiro Nonka &amp; Hirotaka Takeuchi, “ The Knowledge – Creating Company”, Oxford University Press, London.</li> </ol>			
<p><b>Suggested MOOC:</b> Please refer these websites for MOOC’s: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a></p>			
<b>Syllabus</b>			
Unit	Contents		
1	<p><b>Introduction:</b> Definition, Scope and Significance of Knowledge Management , Difficulties of Knowledge Management, Techniques of KM – Implementation of KM, Organizational knowledge, Characteristics and Components of Organizational Knowledge</p>		
2	<p><b>Drivers of knowledge Management:</b> Pillars of knowledge Management, KM framework , Supply Chain of KM , Formulation of KM strategy.</p>		
3	<p><b>Technology and KM:</b> Technology components of KM – IT &amp; KM , Ecommerce and KM</p>		

4	<p><b>Total Quality Management and KM:</b> TQM and KM , Bench marking and KM.</p>
5	<p><b>Implementation of KM:</b> Discussion on Roadblocks to success, Implementing a KM programme , Critical Success Factors in KM , Implementation of KM</p>
6	<p><b>KM and Organizational Restructuring:</b> The Mystique of Learning, Organization:- Outcomes of learning, Learning and Change – Innovation, continuous Improvements, Corporate Transformation.</p>
7	<p><b>Case studies in Knowledge Management</b> Knowledge management in Health Care, Knowledge Management in Human Resource Management</p>

### Elective Group:(09) Internet Of Things

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404-09-A	IoT Architecture And Protocols	2L+1T+0P=3C	2018

**Course Objective:**

The purpose of this course is to impart knowledge on IoT Architecture and various protocols, study their implementations

**Expected Outcome :**

At the end of the course a student should be able:

- 1.To Understand the Architectural Overview of IoT
2. To Understand the IoT Reference Architecture and Real World Design Constraints
3. To Understand the various IoT Protocols ( Datalink, Network, Transport, Session, Service)

**References:**

1. Jan Holler, VlasiosTsiatsis, Catherine Mulligan, Stefan Avesand, StamatisKarnouskos, David Boyle, “From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence”, 1 st Edition, Academic Press, 2014.
2. Peter Waher, “Learning Internet of Things”, PACKT publishing, BIRMINGHAM – MUMBAI
3. Bernd Scholz-Reiter, Florian Michahelles, “Architecting the Internet of Things”, ISBN 978-3-642-19156-5 e-ISBN 978-3-642-19157-2, Springer 46.

**Text Books:**

- Daniel Minoli, “Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications”, ISBN: 978-1-118- 47347-4, Willy Publications
- Vijay Madisetti and ArshdeepBahga, “Internet of Things (A Hands-onApproach)”, 1 st Edition, VPT, 2014.

**Suggested MOOC:**

Please refer these websites for MOOC’s:

NPTEL / Swayam

[www.edx.com](http://www.edx.com)

[www.coursera.com](http://www.coursera.com)

### Course Plan

Unit	Contents
1	IoT-An Architectural Overview– Building an architecture, Main design principles and needed capabilities, An IoT architecture outline, standards considerations. M2M and IoT Technology Fundamentals- Devices and gateways, Local and wide area networking, Data management, Business processes in IoT, Everything as a Service(XaaS), M2M and IoT Analytics, Knowledge Management
2	Architecture of IoT 1. Hardware 2. Software Reference Model and architecture, IoT reference Model - IoT Reference

	ArchitectureIntroduction, Functional View, Information View, Deployment and Operational View, Other Relevant architectural views. Real-World Design Constraints-Introduction, Technical Design constraints-hardware is popular again, Data representation and visualization, Interaction and remote control.
3	IOT DATA LINK LAYER & NETWORK LAYER PROTOCOLS (12 hours) PHY/MAC Layer(3GPP MTC, IEEE 802.11, IEEE 802.15),
4	WirelessHART,Z-Wave,Bluetooth Low Energy, Zigbee Smart Energy, DASH7 - Network Layer-IPv4, IPv6, 6LoWPAN, 6TiSCH,ND, DHCP, ICMP, RPL, CORPL, CARP
5	Transport Layer (TCP, MPTCP, UDP, DCCP, SCTP)-(TLS, DTLS)
6	Session Layer-HTTP, CoAP, XMPP, AMQP, MQTT
7	SERVICE LAYER PROTOCOLS & SECURITY - Service Layer -oneM2M, ETSI M2M, OMA, BBF – Security in IoT Protocols – MAC 802.15.4 , 6LoWPAN, RPL, Application Layer

**Elective Group: (09) Internet Of Things**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405-09-B	Sensors and Fundamentals with Hands-on lab Node.js/Raspberry PI/Python	2L+1T+0P=3C	2018

**Course Objective:**

The purpose of this course is to impart knowledge on IoT Architecture and various protocols, study their implementations

**Expected Outcome :**

At the end of the course a student should be able:

1.To Understand the basics of Python and node js to interface with sensors

**REFERENCES:**

1. Jan Holler, VlasiosTsiatsis, Catherine Mulligan, Stefan Avesand, StamatisKarnouskos, David Boyle, “From Machine-to-Machine to the Internet of Things: Introduction to a New Age of Intelligence”, 1 st Edition, Academic Press, 2014.

**Text Books:**

- Daniel Minoli, “Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications”, ISBN: 978-1-118- 47347-4, Willy Publications

**Suggested MOOC :**

Please refer these websites for MOOC’s:

NPTEL / Swayam

[www.edx.com](http://www.edx.com)

[www.coursera.com](http://www.coursera.com)

**Course Plan**

Unit	Contents
1	Sensing and Measurements 0-5 Voltage Analog I/O Pulse Width Mode I2C Communication
2	Sensor Types, Classification Visual, Fleet Tracking sensors Wiring Basics
3	Practical: Working with Temperature, Humidity, Light & Motion Detector, Promity Sensor
4	Edge Devices & Gateway Devices With hands-on using Raspberry PI using Node.js/Python Introduction to Edge Devices Wired, Wireless Communications Serial Port/UART BLE/WIFI

	<p>Introduction to Arduino [Serial port communication]  Introduction to ESP32 [WIFI/BLE Device] (Micro Controller for Edge Devices)  Hands-on using C [Arduino], Embedded JavaScript [ESP]</p>
5	<p>Actuators and Controllers with Hands-on using Raspberry PI with Node.js/Python  Actuators and Controllers  Controllers Introduction  Buzzer  Relay Switches  Servo Motors</p>
6	<p>Gateway with Raspberry PI  Gateway Introduction  Needs for Gateway, Roles of Gateway  Edge/Gateway Connectivity</p>
7	<p>Raspberry PI, Single Board Linux Computer  WIFI/BLE Communication with Edge Devices  Hands on using Node.js/Java/C#/Python based on training needs</p>

### Elective Group:(09) Internet Of Things

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504-09-C	Internet Of Things: Sensing And Actuator Devices	2L+1T+0P=3C	2018

#### Course Objective:

The purpose of this course is to impart knowledge on Internet of Things (IoT), which relates to the study of sensors, actuators, and controllers, among other Things, IoT applications and examples overview (building automation, transportation, healthcare, industry, etc.) with a focus on wearable electronics

**Expected Outcome :** At the end of the course a student should be able:

1. Understanding of IoT value chain structure (device, data cloud), application areas and technologies involved
2. Understand IoT sensors and technological challenges faced by IoT devices, with a focus on wireless, energy, power, RF and sensing modules
3. Market forecast for IoT devices with a focus on sensors
4. Explore and learn about Internet of Things with the help of preparing projects designed for Raspberry Pi

[www.coursera.com](http://www.coursera.com)

## Course Plan

Unit	Contents
1	Internet of Things Promises–Definition– Scope–Sensors for IoT Applications–Structure of IoT– IoT Map Device
2	SEVEN GENERATIONS OF IOT SENSORS TO APPEAR Industrial sensors – Description & Characteristics–First Generation – Description & Characteristics–Advanced Generation – Description & Characteristics–Integrated IoT Sensors – Description & Characteristics– Polytronics Systems – Description & Characteristics–Sensors' Swarm – Description & Characteristics–Printed Electronics – Description & Characteristics–IoT Generation Roadmap
3	TECHNOLOGICAL ANALYSIS - Wireless Sensor Structure–Energy Storage Module–Power Management Module–RF Module–Sensing Module
4	IOT DEVELOPMENT EXAMPLES:ACOEM Eagle – EnOcean Push Button – NEST Sensor – Ninja Blocks - Focus on Wearable Electronics
5	- PREPARING IOT PROJECTS (9 hours) Creating the sensor project - Preparing Raspberry Pi - Clayster libraries - Hardware- Interacting with the hardware - Interfacing the hardware- Internal representation of sensor values - Persisting data -
6	External representation of sensor values - Exporting sensor data - Creating the actuator projectHardware - Interfacing the hardware - Creating a controller - Representing sensor values - Parsing sensor data - Calculating control states
7	- Creating a camera - Hardware -Accessing the serial port on Raspberry Pi - Interfacing the hardware - Creating persistent default settings - Adding configurable properties - Persisting the settings - Working with the current settings - Initializing the camera

**Elective Group: (09) Internet Of Things**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-09-D	Smart city use case, MQTT, Integrating on Cloud	2L+1T+0P=3C	2018

**Course Objective:**

The purpose of this course is to impart knowledge on Internet of Things (IoT), which relates to the study of sensors, actuators, and controllers, among other Things, IoT applications and examples overview (building automation, transportation, healthcare, industry, etc.) with a focus on wearable electronics

**Expected Outcome :**

At the end of the course a student should be able to upload IoT application on cloud.

**Course Plan**

Unit	Contents
1	LoRA, LoRAWAN - Smart City Use Cases Working with Smart City Solutions Problem understanding Introduction to LoRA
2	LoRA Hardware and bandwidth Communication between Lora Devices,
3	LoRA Gateway, LoRAWAN WIFI vs BLE vs ZigBee vs LoRA
4	IoT and Cloud IoT and Cloud introduction

5	Data ingestion using MQTT
6	Understanding Device Management Device Security
7	Device Connectivity MQTT MQTT Introduction Brokers Publish/Service Topics QOS [0, 1, 2 levels] MQTT Message Format Messaging, Ack format Payload Security [TLS, User Authentication] MQTT Authorization

### Elective Group:(10) Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404-10-A	Business Intelligence Applications	2L-1T-0P= 3C	2018
<b>Course Objective :</b> To introduce learner with Business Intelligence Concept, decision making by Business Intelligence Tools on Applications such as Finance, Marketing, Education etc.			
<b>Pre-requisites:</b> Preliminary knowledge of computer, Big Data Analysis and Business Intelligence.			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>• Good knowledge of Business Intelligence Tools.</li> <li>• Knowledge of Decision making using analysis on the Big Data using Excel Tools.</li> <li>• Case Studies: Knowledge about different applications used in industries.</li> </ul>			
<b>Reference Books :</b> 1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo 2. Business Intelligence Strategy -By John Boyer, Bill Frank, Brain Green, Tracy Harris			
Course Plan			
Unit	Contents		
1	<b>Introduction To Business Intelligence Applications:</b> Introduction to Big Data, Business Intelligence Data Mining, and Data Warehousing, What are Business Intelligence Applications (BIA). Features of BIA.		
2	<b>Sales, Finance And Marketing:</b> Introduction to Sales, Finance and Marketing Concept, features of Sales, features of Finance, features of Marketing, Use of Business Intelligence in Sales, Finance and Marketing in any Organization, Case Study.		
3	<b>Education And Learning:</b> Introduction to Education System, Learning Concept, Difficulties in Education Systems, Use of Business Intelligence for Education and Learning, Case Study.		
4	<b>Vertical Ai Applications:</b> Overview of AI, What is Vertical AI, Features of Vertical AI, Use of Business Intelligence in Vertical AI, Case Study.		
5	<b>Security:</b> Define Security, Security in Big Data, Problems with Security, Business Intelligence for Security, Case Study.		
6	<b>Lifescience:</b> Introduction to Life Science, Life Science Intelligence, Features of Life Science Intelligence, Use of Life Science Intelligence in Decision Making, Case Study.		
7	<b>Ad Optimisation:</b> Define Optimization, Introduction to Ad Optimization, Uses of Ad Optimization for Industry, Use if Business Intelligence in Ad Optimization, Case Study.		

### Elective Group: (10) Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405-10-B	Business Intelligence Tools	2L-1T-0P= 3C	2018-2019
<p><b>Course Objective :</b>            To introduce learner with Big Data Concept. Using different Advance Excel Functions (like Optimization) and implementing it on Big Data for decision making. By solving Case Studies the students will get real example of using BI Tools in industry. To introduce learner with Business Intelligence Concept, decision making by Business Intelligence Tools on Applications such as Finance, Marketing, Education etc.</p>			
<p><b>Pre-requisites:</b> Preliminary knowledge of computer, Big Data Analysis and Business Intelligence.</p>			
<p><b>Expected Outcome :</b></p> <ul style="list-style-type: none"> <li>• Good knowledge of Business Intelligence Tools.</li> <li>• Knowledge of Decision making using analysis on the Big Data using Excel Tools.</li> <li>• Case Studies: Knowledge about different applications used in industries.</li> </ul>			
<p><b>Reference Books :</b></p> <ul style="list-style-type: none"> <li>▪ Tutorials Point for advance Excel Tools.</li> <li>▪ Excel 2010 Bible by John Walkenbach, John Wiley &amp; Sons, 2010 Edition.</li> <li>▪ <a href="https://office.live.com/start/Excel.aspx">https://office.live.com/start/Excel.aspx</a></li> <li>▪ <a href="https://www.talend.com/">https://www.talend.com/</a></li> </ul>			
Course Plan			
Unit	Contents		
1	<p><b>Introduction To Big Data:</b>  <b>Overview of</b> - Data Mining, Data Warehousing, Big Data, How Business Intelligence is useful for Big Data, Big Data Problems.</p>		
2	<p><b>Introduction To Business Intelligence:</b>            Introduction to BI, <b>Data Cleaning-</b> Editing a Workbook, Data Cleaning Using Te Functions, Using Validation To Keep Data Clean, <b>Working with Multidimension Data-</b> Pivot Tables, Pivot Charts.</p>		
3	<p><b>Applications Of Business Intelligence:</b>            CRM Domain, Banking Domain, Health Care Domain, Mobile Industry Domain, Creation of a New Product, Providing Personalized Services</p>		
4	<p><b>Optimization Modeling With Solver:</b>            Introduction to MS-Excel and MS-Excel Formulas, Understanding Optimization Modeling, Setting Up a Solver Worksheet, Solving an Optimization Modeling Problem, Reviewing the Solver Reports</p>		
5	<p><b>Working With Solver:</b>            Working With the Solver Options, Setting a Limit on Solver, Understanding the Solver Error Messages, Case Studies (Solver Problems).</p>		
6	<p><b>Advance Excel Tools:</b>  <b>Using Shared Work Books-</b> Sharing a workbook, Opening and editing a shared workbook, Tracking changes, Resolving conflict in a shared workbook, Multiple workbooks- Linking workbooks, Editing the Link, Consolidating the workbook.</p>		
7	<p><b>Working With Macros:</b></p>		

	Introduction to Macros? Where are Macros, Features of Macros, <b>Working with Macros-</b> Display the developer Tab, Changing Macro security Settings, Recording and running a Macro.
--	---

### Elective Group: (10) Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504-10-C	Introduction to Big Data	2L-1T-0P= 3C	2018

**Course Objective :**

To introduce learner with Big Data Concept, decision making by doing analysis on the data and managing the data using Big Data Tools like Apache Hadoop, Pig and Hive. What are the problems of Big Data and how it can be solved by different tools.

**Pre-requisites:** Preliminary knowledge of computer, Data Mining, Data Warehousing Concepts.

**Expected Outcome :**

- Good knowledge of Big Data Concepts
- Knowledge of Decision making using analysis on the Big Data
- Introduction to Big data Tools like Hadoop and Weka.

**Reference Books :**

1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo
2. Edureka lectures **Link:-** <https://www.youtube.com/watch?v=A02SRdyoshM>

#### Course Plan

Unit	Contents
1	<b>Introduction:</b> Big Data History, The Big Data Business Opportunity- Business Transformation Imperative, Big Data Business Model, Business Impact of Big Data
2	<b>Big Data In Organization:</b> Data Analytics Lifecycle, <b>Data Scientist Roles and Responsibilities</b> – Discovery, Data Preparation, Model Planning, Model Building, Communicate Results, Operationalize, New Organizational Roles, Liberating Organizational Creativity.
3	<b>Decision Theory And Strategy:</b> Business Intelligence Challenge, Big Data User Interface Ramifications, Human Challenge of Decision Making, <b>Strategy for Decision Making-</b> Big Data Strategy Document, Case Study.
4	<b>Value Creation Process:</b> Understanding Big Data Value Creation, Value Creation Drivers, <b>Michael Porter's Value Creation Models-</b> Michael Porter's Five Forces Analysis, Michael Porter's Value Chain Analysis, Case Study.
5	<b>Big Data User Experience:</b> The Unintelligent User Experience, Understanding the Key Decisions to Build a Relevant User Experience, Using Big Data Analytics to Improve Customer Engagement, Uncovering and Leveraging Customer Insights, Big Data can Power a New Customer Experience.
6	<b>Big Data Use Cases:</b> <b>The Big Data Envisioning Process</b> –1. Research Business Initiatives, 2. Acquire and Analyze your Data, 3. Brainstorm New Ideas , 4. Prioritize Big Data Use Cases, 5. Document Next Steps, The Prioritization Process.
7	<b>Big Data Architecture:</b>

	New Big Data Architecture, <b>Introducing Big Data Technologies</b> – Apache Hadoop, MapReduce, R, WEKA etc.
--	--

### Elective Group: (10) Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-10-D	HADOOP	2L-1T-0P= 3C	2018
<b>Course Objective :</b> To introduce learner with HADOOP Tool for Business Intelligence, decision making by doing analysis on the data using HADOOP Tool and also managing the Big Data using HADOOP.			
<b>Pre-requisites:</b> Preliminary knowledge of computer, Big Data Analysis and Business Intelligence. Also students must know Core Java, C Programming and Data Structure Languages.			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>• Good knowledge of HADOOP Tool.</li> <li>• Knowledge of Decision making using HADOOP analysis on the Big Data</li> <li>• Hands-on Big Data tools- Hadoop, Pig, Hive, HBase</li> </ul>			
<b>Reference Books :</b> 1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo 2. <a href="http://www.tutorialspoint.com">www.tutorialspoint.com</a>			
Course Plan			
Unit	Contents		
1	<b>BIG DATA Overview :</b> What is Big Data?, What Comes Under Big Data?, Benefits of Big Data, Big Data Technologies Operational vs. Analytical Systems, Big Data Challenges.		
2	<b>Introduction To HADOOP:</b> Hadoop Architecture, MapReduce, Hadoop Distributed File System, How Does Hadoop Work?, Advantages of Hadoop.		
3	<b>HDFS Overview:</b> Features of HDFS, HDFS Architecture, Starting HDFS, Listing Files in HDFS, Inserting Data into HDFS, Retrieving Data from HDFS, Shutting Down the HDFS.		
4	<b>MAPREDUCE:</b> What is MapReduce?, The Algorithm for MapReduce, Inputs and Outputs (Java Perspective), Analyze different use-cases where MapReduce is used, Differentiate between traditional way and MapReduce way.		
5	<b>Introduction To Hadoop Features:</b> New Big Data Architecture, Introducing HADOOP Features – Apache Hive, Apache HBase, Pig.		
6	<b>Multi Node Cluster:</b> Multi Node Cluster, Install Java, Creating User Account, Mapping the Nodes, Installing Hadoop, Configuring Hadoop, Start Hadoop Services, Adding New Data Node in the Hadoop Cluster, Removing New Data Node from the Hadoop Cluster.		
7	<b>Environment Setup:</b> Pre-installation Setup, Installing Java Downloading Hadoop Hadoop Operation Modes Installing Hadoop in Standalone Mode Installing Hadoop in Pseudo Distributed Mode Verifying Hadoop Installation, Implement basic Hadoop commands on terminal.		

### Elective Group: (11) Cyber Security

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404-11-A	Introduction to Linux	2L+1T+0P=4C	2018
<b>Course Objective:</b> Introduce the learner to Linux environment			
<b>Expected Outcome :</b> Practical understanding of Linux environment			
<b>References (Books, Websites etc) :</b> Red Hat Linux Bible: Fedora and Enterprise Edition - by Christopher Negus			
<b>Suggested MOOC :</b> SWAYAM			
<b>Syllabus</b>			
Unit	Contents		
1	Installation of Kali-Linux, Understanding Kali Linux		
2	<b>Using Shell Interface</b> Introduction to Linux, Internal and external commands, General purpose utilities, Navigating the file system, Handling ordinary files		
3	<b>Using GUI Environments</b> GNOME desktop environment, KDE desktop environment		
4	<b>Using open source office suite:</b> Word processor application , Spreadsheet application, Presentation application, Desktop database application		
5	<b>Using the Internet</b> World wide web, FTP, Telnet		
6	<b>Using Multimedia</b> Graphics, Audio, Video		
7	<b>Shell commands</b> General purpose utilities, File management , Process management, Communication management		

**Elective Group: (11) Cyber Security**

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
405-11-B	Information Security Concepts	2L+1T+0P=3C	2018
<b>Course Objective:</b> Introduce the learner to concepts involved in Information Security domain			
<b>Expected Outcome :</b> Theoretical understanding of Information Security Concepts			
<b>References (Books, Websites etc) :</b> CEH Study Guide - Sybex			
<b>Suggested MOOC :</b> SWAYAM			
<b>Syllabus</b>			
Unit	Contents		
1	<b>Information Security Concepts:</b> Confidentiality, Integrity and Availability of Information, Identification, Authentication and Authorization, Security Principles and Models		
2	<b>Physical Security:</b> Facility Requirement, Perimeter Security, Fire Protection, Fire Suppression, Power Protection, General Environmental Protection, Equipment Failure Protection		
3	<b>Network Security:</b> Secure Network design, Firewalls, WLAN Security, VPNs, Types and Sources of Network Threats		
4	<b>Operating System Security:</b> Windows, Linux/UNIX		
5	<b>Database Security:</b> MS SQL		
6	<b>Web Application Security:</b> Web Application Vulnerabilities, Secure Coding Techniques, Continuous Security Testing and Assessments		
7	<b>Compliance Standards :</b> IT Act, ISO 27001, ITIL Framework		

**Elective Group: (11) Cyber Security**

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
504-11-C	Information Security Threats	2L+1T+0P=4C	2018
<b>Course Objective:</b> Introduce the learner to threats involving Information Systems			
<b>Expected Outcome :</b> Practical understanding of threats involving Information Systems			
<b>References (Books, Websites etc) :</b> CEH Study Guide - Sybex			
<b>Suggested MOOC :</b> SWAYAM			
<b>Syllabus</b>			
<b>Unit</b>	<b>Contents</b>		
1	<b>Introduction to Information Security Threats</b> TCP/IP Fundamentals , Operating System Fundamentals , Web Application and Database Fundamentals , Introduction to Ethical Hacking, Advanced Persistent Threats		
2	<b>Information Gathering:</b> Footprinting, Advanced Google Hacking, Nmapping the network, Fingerprinting		
3	<b>Exploitation:</b> Hacking Networks, Hacking Servers, Hacking Databases, Password Cracking		
4	<b>Advanced Exploitation:</b> Hacking WLANs, Evading IDS, Firewalls, Web Application Hacking, Advanced Web Hacking, Hacking Web Browsers		
5	<b>Social Engineering:</b> Introduction to Social Engineering, Common Types of Attacks, Online Social Engineering		
6	<b>Cryptography:</b> Introduction to Cryptography, Encryption and Decryption, Cryptographic Algorithms, Digital Signature, Cryptography Tools, Cryptography Attacks		
7	<b>Malware Attacks:</b> Viruses, Worms, Trojans		

**Elective Group: (11) Cyber Security**

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
505-11-D	Information Security Administration	2L+1T+0P=3C	2018
<b>Course Objective:</b> Introduce the learner to concepts involving security administration			
<b>Expected Outcome :</b> Practical understanding of setting, managing and securing Information Systems			
<b>References (Books, Websites etc) :</b> Red Hat Linux Bible: Fedora and Enterprise Edition - by Christopher Negus			
<b>Suggested MOOC :</b> SWAYAM			
<b>Syllabus</b>			
<b>Unit</b>	<b>Contents</b>		
1	<b>Setup a Client:</b> Introduction to client-side devices, Setup, Manage and Secure a Desktop PC Setup, Manage and Secure a Mobile Device		
2	<b>Setup a LAN:</b> Introduction to LAN devices, Simulate a LAN, Setup, Manage and Secure a Local Area Network		
3	<b>Connect a LAN to the Internet:</b> Introduction to WAN devices, Setup, Manage and Secure a Connection to the Internet		
4	<b>Share an Internet Connection across a LAN:</b> Introduction to Internet Connection sharing, Introduction to NAT and PAT Setup, Manage and Secure a Proxy Server		
5	<b>Share resources over a LAN:</b> Setup, Manage and Secure a Print Server, Setup, Manage and Secure a File server		
6	<b>Host a Website:</b> Introduction to website hosting, Setup, Manage and Secure a Web Server		
7	<b>Setup support servers:</b> Setup, Manage and Secure a Mail Server, Setup, Manage and Secure a FTP Server, Setup, Manage and Secure a Boot Server, Setup, Manage and Secure a DNS Server		

# CC503: Software Project Management

(4 Credits, 3L + 2T)

**Objectives:** To provide basic project management skills with a strong emphasis on issues and problems associated with delivering successful IT projects and how the software is tested using various techniques to improve the quality of software. This course is designed to provide an understanding of the particular issues encountered in handling IT projects and to offer students methods, techniques and 'hands-on' experience in dealing with them.

**Learning Outcomes:** At the end of this course, student should be able to

- Understand and practice the process of project management and its application in delivering successful IT projects;
- Evaluate a project to develop the scope of work, provide accurate cost estimates and to plan the various activities;
- Identify the resources required for a project and to produce a work plan and resource schedule;
- Understand diff. types of testing and how it is conducted.
- Practice the automated tools available for testing

## **Text Book(s):**

A) Information Technology Project Management” Kathy schwalbe, International student edition, THOMSON course Technology, 2003

B) “Software project management “Bob Hughes and Mike Cottrell, Third edition, Tata McGraw-Hill

C) “Microsoft office Project 2003 Bible”, Elaine Marmel, Wiley publishing Inc.

**Software Requirement:** Microsoft project 2003

## **UNIT1:**

### **Introduction to project management: (5L)**

Project, project management, Importance, characteristics of project how software projects are diff. than other projects, Problems with software projects, Phases: Initiation phase, planning phase, execution phase, monitoring and controlling phase, and closing phase. All parties involved in project, Role of Project Manager, Project management framework, Software tool for project management

## **UNIT2:**

### **Project planning: (6L)**

Integration management: What is integration management, plan development and execution, What is scope management, methods for selecting project, scope statement, Work Breakdown Structure, main steps in Project planning: identify project scope and objective, identify project infrastructure, analyze project characteristics, identify project products and activities, estimate effort for each activity, identify risk activity, allocate resources, review plan, execute plan. Use of software (Microsoft Project) to assist in project planning activities

### **UNIT3:**

#### **Project scheduling: (6L)**

Time management: importance of Project schedules, schedules and activities, sequencing and scheduling activities, Network Planning models, duration estimation and schedule development, Critical path analysis, PERT, Use of software( Microsoft project) to assist in project scheduling

### **UNIT4:**

#### **Project cost management: (6L)**

Importance and principles of project cost management, Resource planning, Attributes to be considered in cost estimation, factors affecting the cost, various costs involved in it. Traditional method: Estimation by analogy, Expert judgment, Parkinson, price to win, top down, bottom up. COCOMO Model, Function point analysis, Function point analysis, Cost control, Use of software( Microsoft project) to assist in cost management

### **UNIT5:**

#### **Project quality management: (5L)**

Quality of information technology project, Stages of software quality management, PMBOK, Quality standards, Tools and techniques for quality control.

### **UNIT6:**

#### **Project risk management: (5L)**

The importance, Top risk in projects, Common sources of risk in IT projects, elements in risk mgt., Risk identification, Risk quantification, Risk response development and control, using software to assist in project risk management

### **UNIT7:**

#### **Fundamentals of Testing: (12L)**

Fundamentals of Software quality, quality views, People challenges in testing, Principles of Verification and validation, Techniques of verification, V model, Testing process, Unit testing, Integration testing, System Testing and Acceptance testing, Testing new product versions, Testing planning: test plan, test plan template, risk analysis, Test Design, good test case, test case template, test case mistakes, Testing Execution: objectives, execution considerations, test execution activities, executing test, Defect management: what is defect, defect life cycle, defect management process, Test Metrics: purpose, characteristics of good metrics, metrics, Functional testing tools, Unit testing tools, Test management tools.

# **CC501 SOFT COMPUTING**

(Credit 4 , L-3, T-2)

## **objectives**

- To introduce the ideas of fuzzy sets, fuzzy logic and use of heuristics based on human experience
- To become familiar with neural networks that can learn from available examples and generalize to form appropriate rules for inferencing systems
- To provide the mathematical background for carrying out the optimization associated with neural network learning
- To familiarize with genetic algorithms and other random search procedures useful while seeking global optimum in self-learning situations
- To introduce case studies utilizing the above and illustrate the intelligent behavior of programs based on soft computing

**Learning Outcomes:** To introduce the techniques of soft computing and adaptive neuro-fuzzy inferencing systems which differ from conventional AI and computing in terms of its tolerance to imprecision and uncertainty.

## **Text Books:**

**1. S. Rajsekaran & G.A. Vijayalakshmi Pai, “Neural Networks, Fuzzy Logic and Genetic Algorithm: Synthesis and Applications” Prentice Hall of India.**

**2. N.P. Padhy, “Artificial Intelligence and Intelligent Systems” Oxford University Press.**

## **Reference Books:**

**3. Siman Haykin, “Neural Networks” Prentice Hall of India**

**4. Timothy J. Ross, “Fuzzy Logic with Engineering Applications” Wiley India.**

**5. Kumar Satish, “Neural Networks” Tata Mc Graw Hill**

6. J.S.R. Jang, C.T. Sun and E. Mizutani, “Neuro-Fuzzy and Soft Computing”, PHI, 2004, Pearson Education 2004.

7. Timothy J. Ross, “Fuzzy Logic with Engineering Applications”, McGraw-Hill, 1997.

8. Davis E. Goldberg, “Genetic Algorithms: Search, Optimization and Machine Learning”, Addison Wesley, N.Y., 1989.

9. S. Rajasekaran and G.A.V.Pai, "Neural Networks, Fuzzy Logic and Genetic Algorithms", PHI, 2003.

10.. R.Eberhart, P.Simpson and R.Dobbins, "Computational Intelligence - PC Tools", AP Professional, Boston, 1996.

## **Syllabus:**

### **Unit-I**

Neural Networks-1(Introduction & Architecture)

Neuron, Nerve structure and synapse, Artificial Neuron and its model, activation functions, Neural network architecture: single layer and multilayer feed forward networks, recurrent networks. Various learning techniques; perception and convergence rule, Auto-associative and hetro-associative memory. (10)

### **Unit-II**

Neural Networks-II (Back propagation networks)

Architecture: perception model, solution, single layer artificial neural network, multilayer perception model; back propagation learning methods, effect of learning rule co-efficient ;back propagation algorithm, factors affecting back propagation training, applications. (10)

### **Unit-III**

Fuzzy Logic

Basic concepts of fuzzy logic, Fuzzy sets and Crisp sets, Fuzzy set theory and operations, Properties of fuzzy sets, Fuzzy and Crisp relations, Fuzzy to Crisp conversion. Membership functions, interference in fuzzy logic, fuzzy if-then rules, Fuzzy implications and Fuzzy algorithms, Fuzzyfications & Defuzzificataions, Fuzzy Controller, Industrial applications. (10)

### **Unit-IV**

Rough Sets

Introduction, Indisnibility Relations, Decernibility Matrix, Lower Approximation, Upper Approximation, Boundary, Accuracy of Approximation, Rule Induction, Case Study

## **Unit-V**

Genetic Algorithm (GA)

Basic concepts, working principle, procedures of GA, flow chart of GA, Genetic representations, (encoding) Initialization and selection, Genetic operators, Mutation, Generational Cycle, applications.  
(9)

## **CC502: Finite Automata and Grammars** (4 Credits, 3L + 2T, Level 3)

**Objectives:** The course introduces some fundamental concepts in automata theory and formal languages including grammar, finite automaton, regular expression, formal language, pushdown automaton, and Turing machine. Not only do they form basic models of computation, they are also the foundation of many branches of computer science, e.g. compilers, software engineering, concurrent systems, etc. The properties of these models will be studied and various rigorous techniques for analyzing and comparing them will be discussed, by using both formalism and examples. To introduce students the basic concepts in theoretical computer science, and the formal relationships among machines, languages and grammars.

**Learning Outcomes:** Upon successful completion of this course, students will be able to:

### **Sr.No. Learning Outcomes**

#### **Knowledge**

1. Explain the basic concepts of deterministic and non-deterministic finite automata, regular language, context-free language, Turing machines, Church's thesis, halting problem, computability and complexity
2. **Describe the formal relationships among machines, languages and grammars**

#### **Professional Skill**

3. **Perceive the power and limitation of a computer**
4. **Solve the problems using formal language**

#### **Attitude**

5. **Develop a view on the importance of computational theory**

**Textbook:** J. Hopcroft, R. Motwani, and J. Ullman. Introduction to Automata Theory, Languages, and Computation, 3rd edition, 2006, Addison-Wesley.

#### **Reference Books:**

- (1) P. Linz. Introduction to Formal Languages and Automata, 5th edition, 2011 (or 4th or 3rd edition), Jones and Barlett;
- (2) Michael Sipser, Introduction to the Theory of Computation, First Edition, 1997, PWS Publishing Company.

## **Syllabus:**

### **UNIT-1:**

Basic concepts of finite automata and languages, deterministic finite automaton, nondeterminism, equivalence between DFA and NFA, regular expression and equivalence to FA

### **UNIT-2:**

Algebraic laws for regular expressions pumping lemma and applications, properties of regular languages, minimization of automata and applications.

### **UNIT-3:**

Context-free grammars and languages, parsing (or derivation) and parse trees, ambiguity of grammar and language, Chomsky normal form of CFG, pumping lemma, properties of CFLs

### **UNIT-4:**

Pushdown automaton (PDA), various forms of PDA, equivalence between CFG and PDA, equivalence between CFG and PDA,

### **UNIT-5:**

Turing machines and (un)decidability

## **201: Computer Architecture**

**(4 Credits, 3L+2T, Level 3)**

**Objective:** Main objective of this paper is to learn structure and functioning of various hardware components of digital computer. Also study the interactions and communication among these hardware components.

### **Learning Outcomes:**

At the end of this course, student should be able to understand

- Simple machine architecture and the reduced instruction set computers.
- Memory control, direct memory access, interrupts, and memory organization
- Basic data flow through the CPU (interfacing, bus control logic, and internal communications).
- Number systems, instruction sets, addressing modes, and data/instruction formats.

**Text Book(s): M Morris Mano Computer systems Architecture third edition Prentice Hall of India Publication**

### **UNIT 1.Introduction To Digital Computer – (7L)**

Data Representation – Data Types – Complements – Arithmetic Operations – Representations – Fixed –Point, Floating – Point , Decimal Fixed – Point – Binary Codes- Logic Gates, Boolean Algebra, Map Simplification – Combinational Circuits: Half-Adder, Full Adder- Flip Flops - Sequential Circuits

### **Unit 2.Introduction To Digital Components And Micro Operations – (6L)**

ICs – Decoders – Multiplexers – Registers – Shift Registers – Binary Counters – Memory Unit – Register Transfer Language – Register Transfer – Bus And Memory Transfers – Arithmetic, Logic And Shift Micro Operations , Arithmetic Logic Shift Unit.

### **Unit 3.Computerorganization And Programming – (8L)**

Instruction Codes – Computer Registers – Computer Instructions – Timing And Control – Instruction Cycle – Memory Reference Instructions – I/O And Interrupt – Machine Language – Assembly Language – Assembler - Program Loops – Programming Arithmetic And Logic Operations – Subroutines – I/O Programming.

### **Unit 4: Memory Organization And CPU – (8L)**

Memory Hierarchy – Main Memory – Auxiliary Memory – Associative Memory – Cache Memory – Virtual Memory – Memory Management Hardware – CPU: General Register

Organization – Control Word – Stack Organization – Instruction Format – Addressing Modes – Data Transfer And Manipulation – Program Control, RISC

**Unit5: Pipeline And Vector Processing – (5L)**

Parallel processing – Pipelining - Arithmetic pipeline - Instruction pipeline - RISC pipeline, - Vector processing - Array processor

**Unit6: Input – Output Organization – (5L)**

Peripheral Devices – Input-Output Interface – Asynchronous Data Transfer – Modes Of Transfer – Priority Interrupt – DMA – IOP – Serial Communication.

**Unit7: Multiprocessors – (6L)**

Characteristics of Multiprocessors – interconnection structures – interprocessor Arbitration – interprocessor communication and synchronization – Cache coherence

## **202: Object Oriented Analysis and Design** **(4 Credits, 3L + 2T, Level 4)**

**Objectives:** The course aims at developing skills to analyze and design a software system using Object Oriented Analysis and Design (OOAD) and UML. And use these skills in Unified Process (UP) environment.

**Learning Outcomes:** At the end of the course, student should be able to

- A) Understand and describe the Object Oriented concepts
- B) Describe Object Oriented Analysis and Design(OOAD) concepts and apply them to solve problems
- C) Prepare Object Oriented Analysis and Design documents for a given problem using Unified Modeling Language
- D) Describe the activity carried out in each and every phase of Rational Unified Process(RUP)

**Text Book:**

1. Craig Larman (2004), Applying UML and Patterns: An Introduction to Object-Oriented Analysis and Design and Iterative Development, 3rd Edition, Pearson Education.

**Reference Books:**

1. Martin Fowler (2003), UML Distilled, 3<sup>rd</sup> Edition, Pearson Education.
2. Roger Pressman(2009), Software Engineering: A Practitioner's Approach, Roger Pressman, ; 7th edition, McGraw-Hill
3. Brett D. McLaughlin (2006), Head First Object-Oriented Analysis and Design , 1 edition, O'Reilly

### **Syllabus**

#### **Unit 1: ( 6L)**

Introduction to OO Concepts, Object, Abstraction, Class, Encapsulation, Message Sending, Inheritance and Polymorphism, Association, Aggregation, Concept of analysis and design, introduction to Object Oriented an Analysis and Design(OOAD), review of Software Development Life Cycle(SDLC), Iterative development and Rational Unified Process(RUP), Phases of RUP

#### **Unit 2: (6L)**

Understanding Inception and requirement, writing requirements in context, use case modeling, relating use cases to user goals and elementary business process, use cases for adding values and functional requirement, actors, actor types and goals in use cases, writing use cases in UI-free style, moving from inception to elaboration.

**Unit 3: (6L)**

Elaboration Iteration 1 emphasize and requirement, System behavior, System Sequence Diagrams, Inter-System SSDs, SSDs and Use Cases, System Events and the System Boundary, Naming System Events and Operation, SSD with Use Case Text, SSDs within the UP, UP Artifacts

**Unit 4: (6L)**

Domain Modeling, Conceptual Class Identification, Resolving Similar Conceptual Classes-Register vs. "POST", Specification or Description Conceptual Classes, UML Notation, Models, and Methods: Multiple Perspectives Lowering the Representational Gap, Domain Models Within the UP, Finding and adding association, Common Associations List and Guidelines, Association Roles, Naming Associations, finding attribute and its types, UML Attribute Notation, attributes and foreign Keys, Multiplicity

**Unit 5 : (6L)**

Use cases and operation contracts, pre and post conditions, contracts leads to domain model, contracts usefulness and guidelines, contract operations and UML, contracts within UP, GRASP: Designing Objects with Responsibilities, Patterns of General Principles in Assigning Responsibilities, Object Design and CRC Cards, Use Case Realization with GRASP Patterns, Determining visibility, Design Class Diagrams(DCD), from elaboration iteration 1 to 2, Iteration 2 emphasize and requirements, Refinement of Analysis-oriented Artifacts in this Iteration 2.

**Unit- 6: (7L)**

Elaboration Iteration 3 requirements and emphasis, Use case relationships (include, extend and generalize); Concrete, Abstract, Base, and Addition Use Cases, Modeling generalization, conceptual superclass and subclass, abstract conceptual class, modeling changing states, Class Hierarchies and Inheritance in Software, Association Classes, aggregation and composition, Association Role Names, Roles as Concepts vs. Roles in Associations, Derived Elements, Qualified and Reflexive Associations, Ordered Elements, Using Packages to Organize the Domain Model

**Unit 7: (8L)**

Modeling behavior in statechart diagram, events, states, and transitions in statechart Diagrams, statechart diagrams in the UP, Use Case State chart Diagrams, classes that benefit from statechart diagrams, external and Interval events, additional statechart diagram notation, Activity diagrams, activity diagrams Vs Statechart diagrams, concept of interface, interface realization, using stereotypes in UML, collaboration diagrams , putting sequence diagram as collaboration diagrams, component and deployment diagrams.

## **203: Business Information Systems** **(4 Credits, 3L + 2T, Level 4)**

**Objectives :** The main objective is to

- a) Acquaint students with basic concepts and major issues of Business Information Systems
- b) To describe current techniques and tools used for analysis and design.
- c) To understand and develop the functionalities of various types of systems.

**Learning Outcomes :**

At the end of this course, student should be able to

- (a) Analyze user requirements using different Information gathering tools.
- (b) Apply systematic approaches to software development
- (c) Provide solutions to different systems.

**Pre-requisites:** Students should know basic concepts of computer systems and DBMS.

**Text Book(s)**

- 1) Elias M. Awad Systems Analysis and Design
- 2) V. Rajaraman Analysis and Design of Information Systems
- 3) Dr. Arpita Gopal Engineering MIS for strategic Business Processes
- 4) James A. Senn Analysis & Design of Information Systems
- 5) S. Parthasarthy and B.W. Khalkar System Analysis & Design
- 6) S.A. Kelkar Structured System Analysis and Design

**Unit 1 : Introduction to system concepts(3L)**

Introduction to system Definition of system, its characteristics. Elements of system and system types. Categories of system. Examples of system: - Business, Computer, Human as system. Computer based information systems (MIS, DSS, ES) Phases of SDLC: - a) Preliminary Investigation (Problem Identification Feasibility Study with its types) b) System Analysis. c) System Design. d) Coding. e) Testing. f) Implementation. g) Maintenance.

**Unit 2 : System Development Life Cycle (6L)**

Various models of SDLC:- Waterfall, Rapid Application Development model, Prototyping model, Spiral model, Qualities of Software, Introduction to Agile Methodology.

**Unit 3 : Information Gathering Techniques(3L)**

Record Review about firm, user staff, work flow from various literatures, forms, Manuals, On site Observations. Interviews and its types, Questionnaires.

**Unit 4 : Structured Analysis Tools(6L)**

- a) Data Flow Diagram b) Data Dictionary, c) Structured English, d) Decision Trees
- e) Decision Table and its types.

**Unit 5 : Designing Methodologies(6L)**

Designing process: - Logical and Physical. Designing Tools: Structured Charts, Functional Decomposition (concept of module with coupling and cohesion), System Flowcharts, Entity Relationship Diagram. Normalizing Relations: First Normal form, Second Normal form, Third Normal form, Boyce-Codd Normal Form(BCNF). Data Input Methods: Coding techniques, Detection of Error in code, Validations, Interactive Data Inputs. Output Design : Objectives of Output Design, Design of Output Reports, Design of Screens.

Unit 6 : Control, Audit and security Control in Information system, Audit of Information System, Testing of Information System, Security of Information System. (3L)

**Unit 7: Overview of different Business Application Systems(18L)**

Education Institute Management System, Library Management Systems, Inventory Management System, Bank Management System, Hospital Management System, Payroll System, Financial Accounting System, Hotel Management System, Human Resource System.

## **204: Discrete Structures II**

**(3 Credits, 2L+2T, Level 3)**

### **Objectives:**

The aims of this Graph theory is a delightful playground for the exploration of proof techniques in discrete mathematics and its results have applications in many areas of the computing ,social and natural science,

### **Learning Outcomes:**

At the end of the course student should be able to:

- A) Use graphs as models in a variety of areas.
- B) Formulate several real- real world problems in mathematical terms

**Pre-requisites:** Discrete Structures I

### **Text Book:**

Kenneth H. Rosen , Discrete Mathematics and its Applications Edition 6<sup>th</sup> Tata McGraw Hill

### **Syllabus:**

#### **Unit -1(6L)**

Preliminary concept, Introduction, Konigsberg Bridges problem, Utilities problem, seating arrangement problem

Concept of Graph, Graph models, types of Graph, representing Graph, incidence and Adjacency Graph, Graph Isomorphism, Graph representing in computer, planner and Dual Graph

#### **Unit -2 (12 L)**

Walk, paths and Euler circuit, Hamiltonian Graph and Graph Algorithm, Konigsberge Bridge problem, city route ,puzzle problem, seating arrangement problem, Travelling salesman problem ,Warshall's algorithm, Floyd's algorithm, Dijkstra's algorithm, Depth-First Search in Directed Graph, coloring Graph and their theorem, Applications of Graph coloring

#### **Unit -3 (12 L)**

Concept of Trees, definition and properties of Trees, Application of Trees, Trees as Models, Game Trees, Tree Traversal, Infix and Postfix notation, Binary Trees and Properties , Spanning Tree, Minimum spanning Tree, Depth First search, Breadth –First search, Back tracking applications, Kruskal algorithm, Prims algorithm, Huffman's algorithm, sorting technique ( Merge sort, Heap sort),computer representation of Tree

#### **Unit-4 (9L)**

Basic counting principles-The product and Sums rules, The Inclusion-Exclusion principle, The Pigeonhole principle, Generalized Pigeonhole principle ,Application, Permutation and Combination, Generalized Permutation and Combination, Generating Permutation and

Combinations, Permutation with Indistinguishable objects, Binomial coefficients and their properties, Algorithm to compute Binomial coefficient Pascal Identity and triangle

**Unit-5 (6L)**

Advance Counting Technique-Recurrence relations and modeling with recurrence relations, Solutions to Linear recurrence relations, Divide and Conquer algorithms and recurrence relations, Master Theorem regarding recurrence relations

## **205: Financial Accounting and Management** **(3 Credits, 3L+1T, Level 2)**

### **Objectives:**

1. To orient the students to basic concepts of accounting. costs
2. To make them understand the techniques of management accounting
3. To make them understand the concepts of financial management
4. To give the dimensions of three aspects finance application background in IT packages

### **Learning outcome:**

At the end of the course the students shall be able to

1. The student shall be able to have basic understanding necessary for development of software for accounting and cost and finance
2. Interrelation of concepts as dimensions of financial management process.

**Prerequisites:** Good understanding of nature of business expenses and income/ revenue

### **Recommended Books:**

1. Ashok Sehagal and Deepak Sehagal , Financial Accounting – Taxman
2. Tulsian – Financial Accounting
3. Jain Naramg – Cost Accounting Principles and Practice
4. I.M. Pandey ,FinacialMangementVikas Publishing House
5. Book Keeping and Accountancy, M.G. Patkar

### **Syllabus:**

#### **Unit 1 : Introduction to Financial Accounting( 10 L )**

Principles of double entry book keeping, preparation of journal , ledger, trial balance and final accounts ( Trading and Profit and Loss Account and Balance Sheet ) for a sole proprietor. Accounting concepts and conventions

#### **Unit 2 : Introduction to Cost and Techniques ( 06 L )**

Concept of cost , classification of cost and preparation of cost sheet , Budgetary Control – concept and importance, Simple problems on flexible and cash budget

#### **Unit 3 : Standard and Marginal Costing ( 08 L )**

Concept of Standard Cost , Variance , advantages and limitations , Computation of basic variances of material and labour cost , concept of marginal cost P/V ration . Contribution, BEP, Margin of Safety and problems on above

**Unit 4 : Introduction to Financial Management : (04 L)**

Scope and Nature of Financial Management, Consideration while preparing financial plan.

Concept of Profit Maximization and Wealth Maximization .

Advantages and Limitation of Long Term Sources of Finance, Venture Capital

**Unit 5 : Sources of Short Term Finance (07 L)**

Concept of inventory management and EOQ.

Concept of Working Capital and factors affecting working capital, simple problems on estimation of working capital.

**Unit 6: Investment Decision( 10L )**

Concept of Time value of money, Risk and Return, Simple problems on Capital Budgeting Techniques – Simple Pay Back , Discounted Pay Back , NPV, ARR, Profitability Index

Ratio Analysis : ( At theory level ) significance of ratios with reference to examples of leverage ,profitability , activity, liquidity ratio

## **206: Database Management with Oracle** **(4 Credits, 2L + 4P, Level 3)**

**Objectives:** The main objective is to teach the concepts related to database its techniques and operations. SQL (Structured Query Language) is introduced in this subject. This helps creates strong foundation for application of data design.

**Learning Outcomes:** At the end of this course, student should be able to (a) Simple Query using sample datasets(b) Complex queries using SQL.(c) Writing PL/SQL blocks (d) Introducing Object Oriented Concepts in Oracle.

**Pre-requisites:** Concept of Database Management Systems

### **Text Books:**

1. Ivan Bayross SQL, PL/SQL The Programming Language of Oracle 3rd Revised Edition  
BPB Publications

### **Syllabus:**

#### **Unit 1: Introduction (6L)**

Concepts of RDMS, Introduction to Oracle, SQL, Defining a database in SQL, creating table, Dual, Arithmetic Operators, comparison operator, Logical operator,

DDL Commands – Creating table, changing table definition, removing table, Creating Tables with constraints on row level and column level, primary key, foreign key, check ,alter, copy. creating data integrity controls, DML Commands- Inserting, updating, deleting data – batch input, deleting database content, changing database content, processing single table clauses of select statement, using expressions, using functions, using wildcards, sorting results; order by clause, categorizing result; group by Having clause. Project Case – Library, Hospital, Reservation system. SET Operations, Intersect, Union, Minus, Union ALL, SUBMULTISET, MULTISET UNION. DCL commands- Granting and Revoking Permissions, Revoking Privileges given

#### **Unit 2: Database Objects: (3L)**

Creating index, simple index, composite index, unique index, dropping indexes, multiple indexes on table, using rowed to delete duplicate rows from a table, Creating sequence, altering sequence, dropping sequence, Views -Using and defining, modifying, deleting. Insert / Drop / filter view. Complex view.

#### **Unit 3: Joins and Oracle Functions: (3L)**

Table Alias, Inner Join, Outer Join, Self Join, cross join, Outer join left right, Aggregate Functions , Numeric Functions , String Functions, Conversion functions, Date conversion functions, Date functions

#### **Unit4: Introduction to PL/SQL programming – ( 6L)**

What is PL/SQL, Structure of PL/SQL block, header section, declaration section, execution section, exception section. Creating a simple PL/SQL procedure, procedure versus functions, creating stored procedure, creating a functions , PL/SQL variable and constants. Declaring PL/SQL variables and constants, assigning values to variable. Using variables, control structures in PL/SQL – conditional control, iterative control, sequential control. Error handling – Exceptions, System defining exceptions, user defined exception with example.

#### **Unit 5: Cursor and Triggers – (9L)**

Types of cursor, implicit cursor attributes, explicit cursor attributes, functionality of Open ,fetch and close commands , cursor FOR loops, parameterized cursors. Triggers- Introduction, Database Triggers, Database Triggerv/s Procedures,Database Triggers v/s Declarative Integrity constraints, Types of Triggers –Row Triggers, Statement Triggers, Before Triggers, After Triggers, Combination Triggers, Deleting a Trigger

#### **Unit 6: Object oriented concepts –(3L)**

Introductions to Object Oriented concepts in Oracle. V-array, object type, nested table with examples.

#### **Assignment on PL/SQL**

- 1) Print the name, salary and deptno of all employees who belong to deptno 10.
- 2) Print the name, job of employees having job as manager or analyst.
- 3) Write a PL/SQL block to print 3<sup>rd</sup>, 6<sup>th</sup>, and 7<sup>th</sup> record from employee.
- 4) Write a PL/SQL block which assign comm = 500 for those employee who are getting null commission.
- 5) Update the salary of employee by 20 for even records and 100 for odd records.
- 6) Print the information of all employees using cursor.
- 7) Print 4<sup>th</sup>, 6<sup>th</sup> and 10<sup>th</sup> records from employee table.
- 8) Print the names of employee having commission as null.
- 9) Print the information of 1<sup>st</sup> five highest salary earner.
- 10) Update salary of dept 10 by 1000 and dept 20 by 2000 using cursor.
- 11) Accept deptno and print the number of employees working in that department.
- 12) Accept the deptno and print department name and location.
- 13) Accept employee name and print date of joined.
- 14) Print the name of employee having maximum and minimum salary.

- 15) Accept salary and print number of employees having salary less than or equal to accepted salary.
- 16) Print the name of employees working in department no 10 and having maximum salary.
- 17) Print the number of employees joined in the month of December.
- 18) Increment the salary of employee by 1000 having location as New York.
- 19) Increment the salary of employee 'Raj' by 10% and of 'Ravi' by 20%.
- 20) Check whether Smith's salary is greater than Black's salary or not.
- 21) If Smith's salary is greater than Black's salary then update employee table and set Black's salary same as Smith's salary otherwise set Smith's salary same as Black's salary.
- 22) Write PL/SQL block to process an order for keyboard.
  - a. Check  $Quantity > 0$
  - b. If Yes then insert in purchase order 'One Keyboard purchased' and sysdate.
  - c. Less 1 from Product\_Master.
  - d. Else in purchase\_order 'No Keyboard Available' sysdate.
- 23) Accept a number and print factorial of it.
- 24) Accept a number and print it in reverse order.
- 25) Accept a number and print it in reverse order.
- 26) Accept a number and print it is prime or not.
- 27) Accept 10 numbers in loop and print sum of accepted numbers.
- 28) Accept 10 numbers in loop and print sum of accepted even numbers and odd numbers separately.
- 29) Accept a string and print it as follows:
  - O
  - Or
  - Ora
  - Orac
  - Oracl
  - Oracle
- 30) Using PL/SQL block generate square and cube of 1 to 10 numbers.  
Store the same in a table with columns no, square and cube.

## **207: Project I**

**(2 Credits, 4 Lab)**

**Objectives:** Few computing professionals can expect to work in isolation for very much of the time. Software development projects are always implemented by groups of people working together as a team. MCA students therefore need to learn about the mechanics and dynamics of effective team participation as part of their education. Moreover, because the value of working in teams (as well as the difficulties that arise) does not become evident in small-scale projects, students need to engage in team-oriented projects that extend over a reasonably long period of time, possibly a full semester or a significant fraction thereof. To ensure that students have the opportunity to acquire these skills, the MCA programme has four Minor Projects and one full semester project. The course 207 is the first in this series. Students in groups of 3 or 4 (only) are expected to undertake a project preferable in C environment. Every student in the group spends about 50 hours on the project. The guide should simulate the team environment and each student performance their major responsibilities satisfactorily.

\*\*\*\*\*

# **BHARATI VIDYAPEETH**

**[ DEEMED TO BE UNIVERSITY ]**

**‘A’ Grade University Status by Ministry of HRD, Govt. of India**

**Re-Accredited by NAAC with ‘A’ Grade**

## **FACULTY OF MANAGEMENT STUDIES**

### **BACHELOR OF BUSINESS ADMINISTRATION**

**Choice Based Credit System**

**(BBA - 2018) (CBCS)**

## **SYLLABUS**

**Course Structure**

**Applicable with effect from 2018-19**

**Bharati Vidyapeeth**  
**[ Deemed to be University],**  
**Pune**  
**Faculty of Management Studies**  
**Bachelor of Business Administration Programme (BBA)**  
**Revised Course Structure**  
**(To be effective from 2018-2019)**

**The BBA Programme.....**

The Bachelor of Business Administration Programme (BBA) is a full time three year programme offered by Bharati Vidyapeeth Deemed University (BVDU), Pune and conducted at its management institutes in New Delhi, Pune, Navi Mumbai, Kolhapur, Sangli, Karad and Solapur. All the seven institutes have excellent faculty, Laboratories, Library, and other facilities to provide proper learning environment. The University is accredited by NAAC with an 'A' grade. The Bachelor of Business Administration (BBA) is designed to provide a strong practical understanding of the principles, theories, and tools necessary to succeed in businesses. The BBA programme focuses on imparting to students the ability to demonstrate leadership, understand human relationships, and problem-solving abilities essential for success in any business endeavour. While designing the BBA course, the above facts are considered and the requirements for higher studies and immediate employment are visualized. This effort is reflected in the Vision and Mission statements of the BBA programme. Of course, the statements also embody the spirit of the vision of Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth Deemed University which is to usher in “Social Transformation Through Dynamic Education.”

**Vision**

To prepare the students to cope with the rigor of Post Graduate Programmes in India and Abroad as well as to prepare them for managing Businesses globally and as Entrepreneurs who will also be sensitive to societal concerns.

**Mission**

To impart sound conceptual knowledge and skills in the field of Business Management studies that can be leveraged for enhancing career prospects and higher education in the said discipline.

## **Objectives**

The Bachelor of Business Administration (BBA) degree programme has the following objectives...

- To provide students with an in-depth knowledge of Management and Business concepts
- To provide students with a firm foundation in both theoretical and practical concepts and applications to meet the various needs of business organisations at a global level
- To prepare students for the responsibilities and career opportunities with corporations and as entrepreneurs.

## **Duration :**

The duration of the BBA degree programme shall be of three years divided into six Semesters. i.e. BBA Part – I (Sem-I & II), BBA Part – II (Sem-III & IV) and BBA Part – III (Sem V & VI). The medium of instruction and examination will be only English.

## **Eligibility Requirements**

A candidate applying for BBA programme should have passed higher secondary or equivalent examination (10 + 2) of any recognized Board satisfying the following conditions:

1. Subject to the above conditions, every eligible candidate has to pass a common All India Entrance test (B-UMAT) conducted by Bharati Vidyapeeth Deemed University, Pune. The final admission is based solely on the merit at the B-UMAT test

**Note : Elective will be offered only if a minimum of ten (10) students opt for the same in semester V.**

## **Grading System for Programmes under Faculty of Management Studies:**

1. **Grade Points:** The Faculty of Management Studies, Bharati Vidyapeeth University has suggested the use of a 10-point grading system for all programmes designed by its various Board of Studies. A grading system is a 10-point system if the maximum grade point is 10. The system is given in Table I below.

**Table I: The 10-point Grading System Adapted for Programmes under FMS**

Range of Percent Marks	[80, 100]	[70, 79]	[60, 69]	[55, 59]	[50, 54]	[40, 49]	[00, 39]
Grade Point	10.0	9.0	8.0	7.0	6.0	5.0	0.0
<b>Grade</b>	<b>O</b>	<b>A+</b>	<b>A</b>	<b>B+</b>	<b>B</b>	<b>C</b>	<b>D</b>

Formula to calculate GP is as under:

Set  $x = \text{Max}/10$  where Max is the maximum marks assigned for the examination (i.e. 100)

Formula to calculate the individual evaluation

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

**2.Scheme of Examination:** Courses having Internal Assessment (IA) and University Examinations (UE) shall be evaluated by the respective institutes and the University at the term end for **40(forty)** and **60(Sixty)** Marks respectively. The total marks of IA and UE shall be 100 Marks and it will be converted to grade points and grades.

CCA – Comprehensive Continuous Assessment - Courses having *only Comprehensive Continuous Assessment (CCA)* the respective institutes will evaluate the students in various ways such as *Class Test, Presentations, Field Assignments and MiniProjects* for a total of 100 marks during the term. Then the marks will be converted to grade points and grades.

*Open Courses shall be evaluated for 50 marks only (fifty marks only).*

### 3. Standard of Passing:

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

If learner fails in IA, the learner passes in the course provided, he/she obtains a minimum 25% marks in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the learner passes at UE.

A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA he has to reappear only at IA as backlog candidate and clear the Head of Passing. to secure the GPA required for passing.

The 10 point Grades and Grade Points according to the following table

Range of Marks (%)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} \leq 80$	A+	9
$60 \leq \text{Marks} \leq 70$	A	8
$55 \leq \text{Marks} \leq 60$	B+	7
$50 \leq \text{Marks} \leq 55$	B	6
$40 \leq \text{Marks} \leq 50$	C	5
Marks < 40	D	0

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

### Formula to calculate Grade Points (GP)

Suppose that „Max“ is the maximum marks assigned for an examination or evaluation, based on which GP will be computed. In order to determine the GP, Set  $x = \text{Max}/10$  (since we have adopted 10 point system). Then GP is calculated by the following formulas

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

Two kinds of performance indicators, namely the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all the courses since his/her enrollment. The CGPA of learner when he /she completes the programme is the final result of the learner.

The SGPA is calculated by the formula

$$\text{SGPA} = \frac{\sum C_k * GP_k}{\sum C_k}$$

where,  $C_k$  is the Credit value assigned to a course and  $GP_k$  is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the Semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

The CGPA is calculated by the following formula

$$\text{CGPA} = \frac{\sum C_k * GP_k}{\sum C_k}$$

where,  $C_k$  is the Credit value assigned to a course and  $GP_k$  is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrollment and also during the semester for which CGPA is calculated.

**The CGPA shall be calculated up to two decimal place accuracy.**

**The formula to compute equivalent percentage marks for specified CGPA:**

% marks (CGPA)	$10 * \text{CGPA} - 10$	If $5.00 \leq \text{CGPA} \leq 6.00$
	$5 * \text{CGPA} + 20$	If $6.00 \leq \text{CGPA} \leq 8.00$
	$10 * \text{CGPA} - 20$	If $8.00 \leq \text{CGPA} \leq 9.00$
	$20 * \text{CGPA} - 110$	If $9.00 \leq \text{CGPA} \leq 9.50$
	$40 * \text{CGPA} - 300$	If $9.50 \leq \text{CGPA} \leq 10.00$

**Award of Honours:**

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA below 5.0	F	Fail	Marks below 40

**c) ATKT Rules:**

1. A student is allowed to carry backlog of any number of subjects for Semester IV.
2. A student must pass Semester I and Semester II to appear for Semester V.

**Courses Types**

- AECC/SEC – Ability Enhancement Compulsory Course / Skill Enhancement Course ( Lab / Practical / Demo etc )
- C - Core Course - Compulsory for BBA Discipline
- GE - Generic Elective – Open Elective / Interdisciplinary
- DSE - Discipline Specific Elective

**Exam Evaluation Pattern**

- CCA – Comprehensive Continuous Assessment
- UE – University Evaluation
- IA – Internal Assessment

**Specializations Offered:**

<b>Marketing Management</b>	<b>Human Resource Management</b>
<b>Financial Management</b>	<b>International Business Management</b>
<b>Entrepreneurship Development</b>	<b>Financial Markets</b>

**Note : ADD ON Courses :**

Courses such as mentioned below may be introduced as ADD-ON courses separately. The Add on Courses are not compulsory for the students and may be introduced on demand on Payment basis, with prior approval of concerned authorities)

- a) Foreign Language
- b) Office Automation Tools
- c) Supply Chain Management
- d) Event Management

## **Business English - Communication**

Credits : 4

**UE + IA: 60:40**

Course Type : AECC

### **Course Objectives:**

- To acquaint students in managerial communication from every perspective that is globally demanding.
- To acquaint students with the required skills for effective communication in business organizations
- To enable students to develop confidence and expertise in composing effective communication skills essential in Business Situations

### **Learning Outcomes:**

After studying this subject, the student should be able to:

- Understand how to converse in business situations
- Write effective e-mails, Letters
- Write formal and informal Reports

### **Unit 1: Concept and Nature of Communication**

**(12 hours)**

Meaning and Introduction, Importance and Nature of Communication. Process and Objectives of Communication. Channels of Communication, Barriers to Communication, Overcoming barriers, Seven C' s of effective communication

### **Unit 2: Verbal Communication**

**(12 hours)**

Verbal Communication (oral) – Meaning, Advantages, Disadvantages, Essentials of effective oral communication, Types. Speaking Skills – Meaning and importance – Guidelines for preparing a Speech – Strategies for good conversation

Exercises on Verbal communication.

**Unit 3: Non – Verbal Communication****(12 hours)**

Meaning , Importance, Uses of non verbal communication, Body Language, Gestures, Postures, Para Language, non verbal aspects of written communication.

**Unit 4: Listening, Reading Skills, Presentation Skills****( 12 hours)**

Listening Skills – Meaning and importance – Types – Listening Barriers – Overcoming barriers to improve Listening skills. Exercises on Listening Skills, Reading Skills – Meaning and importance – Steps for better reading. Exercises to improve Reading Skills ,

Introduction and importance, Planning the Presentation. Presentation Structure. Organizing the Presentation. Qualities of a skillful Presenter. Use of Visual aids in Presentation.

**Unit 5: Written Communication****(12 hours)**

Writing Skills – Meaning and importance of written communication in business, Business Letters : Tactful use of language – Structure of a Business letter - Business letter formats – Types of letters: Letters of inquiry and Reply, Letters placing orders and reply, Letter of Complaint, Claims and Adjustments, Sales letters, Job application letters.

## **Business Organization & Systems**

Credits : 4

**UE + IA: 60:40**

Course Type : Core

### **Course Objectives:**

- To acquaint students with fundamentals of business organization and management systems as a body of knowledge.
- To impart to the students an understanding of business concepts with a view to prepare them to face challenge of managing business in the new era.

### **Learning Outcomes:**

On successful completion of this syllabi the students will

- Understand the basic concepts in commerce, trade and industry. He will be exposed to modern business world.
- Understand modern business practices, forms, procedures and functioning of various business organizations.

### **Unit 1: Introduction to Business**

**14 hrs.**

Concept of business – meaning, definition, nature and scope, characteristics of business. Business as an economic activity. Objectives of business. Structure of business. Requisites for success in modern business. Meaning, scope and evolution of commerce & industry, Industrial Revolution, beginning and growth of Indian business, industrialisation in India. Globalization & challenges for Indian Business in the modern era.

### **Unit 2: Forms of Business Ownership**

**8 hrs**

Introduction to various forms – factors affecting choices of an ideal form of ownership, features merits and demerits of sole proprietorship – joint Hindu family business – partnership – joint stock company – co-operative organisation, public enterprises.

### **Unit 3: Formation of a Company**

**10 hrs**

Stages in formation and incorporation of a company (i.e. promotion – incorporation and registration – capital subscription – commencement of business. - documents of a company i.e. Memorandum of association – articles of association – prospectus.

**Unit 4: Establishment of Business Enterprise****12 hrs**

Various factors to be considered while starting a new business enterprise i.e. Identification of business opportunity – market assessment – suppliers – technology – location – human resource – finance etc. Small and medium enterprises – meaning characteristics and objectives. Role of support organisation such as trade associations and chambers of commerce.

**Unit 5: Organization of Trade****12 hrs**

Channels of distribution – meaning, functions and types. Internal trade – wholesale and retail

External trade – import and export. Role and importance of support services to business such as transport insurance etc. Business combinations – mergers and acquisitions. Franchising. Business process outsourcing. Multinationals – concept and role of MNCs. Stock Exchange and Produce Exchange: Definition and Meaning, Importance, Functions, Listing, Dealers.

BBA- Sem - I (CBCS 2018)

## Micro Economics

Credits : 4

UE + IA: 60:40

Course Type : Core

### Course Objectives:

- To expose students to basic micro economic concepts.
- To apply economic analysis in the formulation of business policies.

### Learning Outcomes:

Students will be able to use economic reasoning to problems of business.

### Unit 1: Introduction to Micro Economics 12 hrs.

Business economics –meaning nature and scope; Micro and macro; Basic economic problems; Market forces in solving problems; Circular flow of income and expenditure; Tools for analysis (Functional relationships, Schedules, Graphs, Equations)

### Unit 2: Demand Analysis and Utility Concept

**12hrs.**

Concept of demand; Law of demand ; Factors affecting demand ;Exceptions to law of demand; Market demand ;Changes in demand ;Elasticity of demand (Price ,Income ,Cross)  
Concept of Utility, Cardinal & Ordinal Utility, Law Of Diminishing Marginal Utility

### Unit 3: Supply and Cost & Revenue concepts 12 hrs.

Concept of supply, Factors affecting supply, Law of supply, Exceptions of law of supply  
Types of cost, Fixed and variable, Accounting and economic, Total cost, marginal cost, average cost, implicit & explicit cost, real and money cost, Short run and long run, Average revenue, total and marginal revenue. Opportunity cost, Money cost, , Law of returns to scale, Economies and diseconomies of scale, Law of Variable proportions

### Unit 4: Market Analysis 12 hrs.

Features of markets, Pure, Perfect, Monopoly, Duopoly, Oligopoly, Monopolistic competition  
Equilibrium of firm and industry under perfect competition, Price determination under monopoly, Price and output determination under monopolistic competition

### Unit 5: Theories of Distribution 8 hrs.

Marginal productivity theory of distribution, Rent –modern theory of rent, Role of trade union and collective bargaining in wage determination, Interest –liquidity theory of interest  
Profits- Dynamic, Innovation, Risk and uncertainty bearing theories of profits

**Reference Books :**

<https://alison.com/>: Fundamentals of Financial Accounting

Course Code 104

BBA- Sem - I (CBCS 2018)

## **Business Accounting**

Credits : 4

**UE + IA: 60:40**

Course Type : Core

### **Course Objectives:**

- To impart to the learners the basic accounting knowledge
- To train in the accounting process from entering business transactions to Journal to preparation of Final Accounts.

### **Learning Outcomes:**

After the completion of the course, the students will understand:

- Importance and utility of Financial Accounting
- Accounting process from entering the business transactions to journal to preparation of Final Accounts of a sole proprietor.

**Unit 1: Introduction to Financial Accounting: 6 hrs.**

Definition and Scope of Financial Accounting, Objectives of Financial Accounting, Book Keeping v/s. Accounting, Basic Terms used in Accounting, Users of Financial Statements, Limitations of Financial Accounting

**Unit 2: Accounting Principles and Accounting Standards: 6 hrs.**

Accounting Concepts, Accounting Conventions, Meaning of Accounting Standards, Significance of Accounting Standards.

**Unit 3: Journal & Subsidiary Books: 14 hrs.**

Accounting Process, Types of Accounts, Rules of Accounts, Preparation of Journal, Simple and Combined Journals entries.

Subsidiary Books: Purchase Book, Sales Book, Purchase Return Book, Sales Return Book, Cash Book

**Unit 4: Ledger Posting and Trial Balance: 12 hrs.**

Meaning and Utility of Ledger, Format of Ledger Account, Procedure of posting Journal entries to Ledger Accounts, Balancing of Ledger Account, Preparation of Trial Balance

**Unit 5: Depreciation: 8 hrs.**

Meaning of Depreciation, Causes of Depreciation, Methods of charging depreciation: Written Down Value & Straight Line Method, Accounting treatment of Depreciation

**Unit 6: Meaning and Preparation of Final Accounts: 14 hrs.**

Preparation of Trading and Profit & Loss Account and Balance Sheet of sole proprietary

business.

## Foundation of Mathematics & Statistics

Credits : 4

UE + IA: 60:40

Course Type : Core

### Course Objectives:

- i) To develop knowledge of key theories, concepts in Mathematics.
- ii) To enhance ability to problem solving
- iii) To build ability to apply mathematical and statistical concept for business applications

### Learning Outcomes:

- i) Students will be able to solve problems in Mathematics using appropriate concepts
- ii) Students will be able to effectively apply the statistical tools for business applications

### Unit 1:

12hrs.

Profit and Loss, Discount, Commission, Brokerage, Rates and Taxes, Insurance, Partnership, Bill of Exchange, Stock and Shares, Payroll

### Unit 2:

12 hrs.

Simple interest and Compound interest and Annuity:

Simple interest, Compound Interest,, Interest Compounded Continuously, Compound Amount at changing rate, Introduction of Annuity, Amount and Present Value of Immediate or Ordinary Annuity, Annuity Due,

### Unit 3:

12hrs.

Matrices and Determinants & Simultaneous Linear equations:

Definition of a Matrix, Matrix operations, Determinants, Properties of determinants. Applications in Business Problem, Solution of Simultaneous equations Linear Equation in two unknowns. Permutations and Combinations

### Unit 4:

12 hrs.

#### Introduction to Business Statistics

Definition, descriptive and inferential statistics in business, scope of statistics, Population and sample, data, types of data, sources of data, methods of data collection.

### Unit 5:

12 hrs.

#### Data presentations and graphical displays

Frequency, cumulative frequency distribution, Frequency distributions, importance of Diagrammatic and Graphic Representation of data, frequency polygons and frequency curves, histograms, Ogive Curves.

### Reference Books :

# BACHELOR OF BUSINESS ADMINISTRATION

## Generic Elective / Interdisciplinary

Course Code 106  
BBA- Sem - I (CBCS 2018)

### Community Work

**Credits : 2**

**CCA : 50 marks**

**Course Type : Generic Elective / Interdisciplinary**

#### Course Objectives:

This course aims to expose the students to social issues and help them Participate in community service through trips/events organized at institute, state level etc and also to Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc

- (I) To expose the students towards social reality and role of community development for social upliftment and well being
- (II) To involve students in community work through active involvement and participation

#### Learning Outcomes:

Students will be able to know the community needs and understand their role to contribute meaningfully towards community development

#### Unit 1:

**5 hrs**

History, meaning, Goals, values, functions, role and process of community work. Professional and voluntary community work. Attitudes, roles and skills of a community worker

#### Unit 2:

**10 hrs**

Social concerns in India: poverty, unemployment, population, problems faced by women – dowry, domestic violence, etc. Social problems - terrorism, corruption, caste conflict, drug abuse, AIDS, ETC.

#### UNIT 3:

**15 hrs**

Types of community work. Caring for needy, helping the poor, fundraising drives- organizing

#### COMMUNITY HOURS:

Participate in community service trips/events organized at institute, state level etc , Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc , Submit a report on a particular type of community involvement undertaken

Course Code 106

BBA- Sem - I (CBCS 2018)

## Career & Life Skills

Credits : 2

CCA : 50 marks

Course Type : **Generic Elective / Interdisciplinary**

### Course Objectives:

- To help students make well-informed, thoughtful decisions regarding your future as adults.
- To develop behaviours and attitudes that help students contribute to the community in a positive manner.
- Give you skills and knowledge to contribute to the well-being and respect of the self and others

### Learning Outcomes:

Students will be able to understand self potential and ways to enhance capabilities.

### Unit 1: Introduction to Life Management

Life management-definition, scope and application, concept of emotions, self belief, setting realistic goals, understanding system

### Unit 2: Developing Emotional Potential and Physical Potential

12 hrs

Improving thinking skills, improving study skills, planning education

Eating habits, healthy foods, staying healthy, changing habits-the self change model

### Developing Your Intellectual Potent

12 hrs

Effective communication, effective listening, effective speaking ,getting along with others, functioning in groups, how to delegate.

Definition-stress, handling change and stress, managing time, managing money, formulation of career plan, bring it all together

### Unit 3: Career and Life Choices

Managing personal, lifelong career development.

**Resource Choices...** Making responsible decisions in the use of finances and other resources that reflect personal values and goals as well as a commitment to self and others.

**Personal Choices...** Understand the emotional/psychological, intellectual, social, spiritual, and physical dimensions of health and how these dimensions of health work together to contribute to personal well-being.

Course Code 106  
BBA- Sem - I (CBCS 2018)

**Waste Management**

Credits : 2

CCA : 50 marks

Course Type : **Generic Elective / Interdisciplinary**

**Course Objectives:**

- to expose students to the issue of waste and waste management tools and techniques applicable for waste disposal and management.

**Learning Outcomes:**

After completion of the course students

- will be able to understand solid waste sources, health and environmental issues related to solid waste management.
- will get knowledge about Sources, handling and control of Biomedical, Chemical, Nuclear and e-wastes.
- will be able to understand the issues regarding waste disposal and management and will become aware of Environment and health impacts due to solid waste mismanagement

**Unit – I Solid Waste Management-**

**10 hrs**

**Introduction to waste Management**

Introduction, Meaning, Solid waste including municipal, hospital and industrial solid waste; health and environmental issues related to solid waste management. Provisions in Indian Penal Code for Environmental protection.

**Unit – II Biomedical, Chemical, Nuclear and e-wastes**

**10 hrs**

Biomedical wastes – Types – Management and handling – control of biomedical wastes, Chemical wastes – Sources – Environmental effects – Need for control – Health and environmental effects. Nuclear waste – Management of nuclear wastes, e-waste- sources and management.

**Unit – III**

**10 hrs**

**Waste reduction at source** – Treatment and disposal techniques for solid wastes – composting, vermin-composting, autoclaving, microwaving, incineration, non- incineration, Thermal techniques, use of refuse derived fuels, land-filling. **Reduce Reuse and Recycling Techniques:** Need for the concept- Various Types - Handmade Paper production – Reuse of materials- Recycle of material

**Books Recommended:**

# BACHELOR OF BUSINESS ADMINISTRATION

## SEMESTER 2

Course Code 201

BBA- Sem - II (CBCS 2018)

### **Environment Studies**

Credits : 2

CCA : 50 marks

Course Type : Generic / Open Elective

#### **Course Objectives:**

- To sensitize the students on the environmental issues
- To educate the students about the threats to the environment and natural resources

#### **Learning Outcomes:**

Learners will be able to understand the different aspects of environments, the threats posed by human activities and the solutions for the same.

#### **Unit 1: Nature and Scope**

**(8 Hrs)**

The Multidisciplinary Nature of Environmental Studies Definition, scope and importance Need for public awareness.

Natural Resources Renewable and Non-renewable Resources: (a) Forest resources: (b) Water resources: (c) Mineral resources: (d) Food resources: (e) Energy resources: (f) Land resources:

#### **Unit 2: Ecosystems**

**(6 Hrs)**

Concept, Structure and function of an ecosystem. Energy flow in the ecosystem.

Introduction, types, characteristic features, structure and function of the following ecosystem: (a) Forest ecosystem (b) Grassland ecosystem (c) Desert ecosystem (d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estauries)

Biodiversity and Its Conservation, Introduction, definition: genetic, species and ecosystem diversity. Threats to biodiversity: Endangered and endemic species of India. Conservation of biodiversity.

#### **Unit 3 : Pollution**

**(6 Hrs)**

Environmental Pollution (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards

#### **Unit 4: Social Issues and the Environment**

**(4 Hrs)**

Urban problems related to energy. Water conservation, rain water harvesting, watershed management. Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust.

**Unit 5: Environment and human health****(6 Hrs)**

Population growth, Environment and human health. Value education. HIV/AIDS. Women and Child Welfare. Role of Information Technology in environment and human health. Case Studies. Field Work -

Visit to a local area to document environmental assets—river/forest/grassland/hill/mountain. Visit to a local polluted site—Urban/Rural/Industrial/Agricultural.

## Macro Economics

Credits : 4

UE + IA: 60:40

Course Type : Core

### Course Objectives:

- To study the behavior and working of the economy as a whole.
- To study relationships among aggregates.
- To apply economic reasoning to problems of business and public policy.
- To enhance knowledge regarding current affairs of the economy as a whole.
- The course is designed to study the impact of monetary and fiscal policy on the aggregate behavior of individuals.

### Learning Outcomes:

The learner will get acquainted with the principles of Macroeconomics, determination of and linkages between major economic variables ; level of output and prices, inflation, interest rates and exchange rates.

### Unit 1: Basic Issues and features of Indian Economy

12 hrs

Macroeconomics- definition & nature, Scope , Importance, Limitations, Paradoxes, Macro economic variables. Concept and Measures of Development and Underdevelopment; Human Development; Composition of national income and occupational structure, Measurement of macroeconomic variables: National income accounting, Circular flow of income (four sector model ), Methods to calculate national income, Stock and flow concept, Gross domestic product(GDP), Gross national product(GNP), Net domestic product(NDP), Net national product(NNP), Personal and Personal disposable income; Classical theory of income and employment:

### Unit 2: Policy Regimes

12 hrs

- a) The evolution of planning and import substituting industrialization.
- b) Economic Reforms since 1991.
- c) Monetary and Fiscal policies with their implications on economy

### Unit 3:

12 hrs

Theory of Income & Employment, Says law of market, Keynes theory of Income & Employment: simple Keynesian model, components of aggregate demand, equilibrium income, changes in equilibrium, multiplier( investment, Government expenditure, lump sum tax, foreign trade), effect of fiscal and monetary policy, Classical aggregate demand curve, Classical theory

of interest rate, effect of fiscal and monetary policy.

**Unit 4: Money :**

**12 hrs**

Functions of money, quantity theory of money, determination of money supply and demand, Quantity Theory of Money

**Business cycle & Inflation & Deflation:**

Business cycle-nature, Features/Characteristics- Prosperity/Boom – Recession, Depression, Revival/Recovery

Inflation: Meaning , demand and supply side factors, causes & control,

Deflation: Meaning , causes & control, Phillips curve, Stagflation, Inflationary gap

**Unit 5: :**

**12 hrs.**

Macro economic policy: Monetary policy, Fiscal policy

Economic scenario analysis, Out of inflation & deflation , which is worst and why?

- What is the current CRR & SLR ratio? Are this ratios appropriate for current condition of the country
- Which trade cycle is prevailing in India at present

Which monetary & fiscal policy do you suggest for current condition of India?

Course Type : Core

### Course Objectives:

- To Impart the Knowledge of Basic cost concepts, element of cost & Preparation of Cost Sheet.
- To provide basic knowledge of important Methods & Techniques of costing.
- To have basic knowledge about concept of management and cost audit

### Learning Outcomes:

At the end of the course students should be able to

1. Understand basic cost concepts, element of cost & Preparation of Cost Sheet.
2. Have practical applications of important Methods & Techniques of costing.
3. Understand the application of concept of management and cost audit.

### Unit 1: Introduction

(8 Hours)

Definition, Nature and scope of Management Accounting, Limitations of Financial Accounting, Advantages and Limitations of Management Accounting, Difference between Financial and Management Accounting.

### Unit 2: Introduction of Cost Accounting

(12 Hours)

Concept and need of Cost Accounting, Material, Labour and other Expenses, Classification of cost & Types of Costs, Preparation of Cost Sheet, Methods and techniques of Costing,

### Unit 3: Budget and Budgetary Control

(12 Hours)

Meaning and objectives of Budget, Definition, Meaning and objectives of Budgetary control, Advantages and disadvantages of Budgetary Control, Types of Budget, Preparation of flexible budget and cash budget.

### Unit 4: Marginal Costing & Standard Costing

(20 Hours)

Definition and Meaning of Marginal Cost and Marginal Costing, importance and Limitations of Marginal Costing, Contribution, P/V Ratio, Break Event Point, Margin of Safety, Definition and Meaning of Standard Costing, Advantages and Limitations of Standard Costing ,Variance Analysis – Material and labour Variances only

### Unit 5: Management Audit

(8 Hours)

Concept and Process of Audit, Essentials of Audit, Cost Audit its Objectives and Advantages, Management Audit its Objective and Advantages, Contents of Management Audit Reports.

### Reference Books :

1. I.M. Pandey, Management Accounting
2. S.P.Jain and Narong., Advanced cost Accounting
3. S.N.Maheshwari, Cost Accounting.
3. Prabhu Dev , Cost Accounting, Himalaya Publication
4. Paul S Kr , Management Accounting. New Central Book Agency, Calcutta
5. Rebert N Anthony., Management Accounting D B taraporewala Sons, Bombay.

**Online Resources:**

1. Companies Annual Reports
2. Money control
3. SEBI and RBI Official Websites
4. NSE and BSE Official Websites

**MOOCs:**

- <https://swayam.gov.in/> :Accounting for Managerial Decisions  
<https://alison.com/>: Fundamentals of Financial Accounting

**Course Code 205**  
BBA- Sem - II (CBCS 2018)  
**Business Statistics**

Credits : 4

**UE + IA: 60:40**

Course Type : Core

**Course Objectives:**

- i) To familiarize the students with the basic statistical tools and their application in business decision-making.
- ii) To develop the quantitative skills of the students so as to make them skilled at understanding data, comparing two or more data sets and predicting business data etc.
- iii) To make the learner familiar with the processes needed to develop, report, and analyze business data.

**Learning Outcomes:**

- i) Students will be able to solve problems in Statistics using appropriate concepts
- ii) Students will be able to effectively apply the statistical tools for business applications

**Unit 1: Descriptive statistics – Measures of Central Tendency and Dispersion** **12 Hrs**

Arithmetic mean, median, Mode, G.M. Quartiles deciles, percentiles  
Absolute and relative measures of dispersion, Range, quartile deviation, mean deviation, standard deviation, variance.

**Unit 2: Correlation Analysis** **12Hrs**

Meaning of correlation, types of correlation, Methods of studying correlation, scatter diagram, Karl Pearson's coefficient, Rank Correlation

**Unit 3: Regression Analysis** **12Hrs**

Meaning and applications, Lines of regression, regression coefficients, Business applications  
Distinction between Correlation and regression

**Unit 4: Probability** **12Hrs**

Basic Concepts in probability, definition of probability, random experiment, sample space, independent events, mutually exclusive events, conditional probability, Expected Value and Variance –  $E(X)$  and  $V(X)$ , Bayes' Theorem

**Unit 5: Association of Attributes** **12Hrs**

Introduction, Meaning and importance, Yule's Coefficient of association and interpretation

**Teaching Methodology**

- Lectures, tutorial and Field Work.
- Field work on collection of data through surveys and presentation of data using EXCEL to be carried out by students under the guidance of faculty.

**Reference Books :**

1. Dr. P Hazarika, Business Statistics, S. Chand & Co.

2. Bharadwaj, Business Statistics.

**BACHELOR OF BUSINESS ADMINISTRATION  
OPEN COURSES SEMESTER II**

Course Code 206

BBA- Sem - II (CBCS 2018)

**Community Work – Swachh Bharat Abhiyan**

**Credits : 2**

**CCA : 50 marks**

**Course Type : Generic / Open Elective**

**Course Objectives:**

- i) This course aims to expose the students to Swachh Bharat Abhiyan initiative of the government.

**Learning Outcomes:**

Students will be able to understand the details about the Swachh Bharat Abhiyan and its impact on society.

**Unit 1:**

**5 hrs**

History, meaning, Goals of Cleanliness initiatives

**Unit 2:**

**10 hrs**

Initiators of cleanliness drive in India. Sant Ghadage Baba, Mahatam Gandhi, Efforts taken towards the Swachh Bharat Abhiyan, Swachh Bharat Mission.

**UNIT 3:**

**15 hrs**

Impact of Cleanliness initiatives. Social Awareness, Case Studies

**COMMUNITY HOURS:**

Internship of 15 days (100 hours) to be undertaken

Submit a report on a particular type of community involvement undertaken

**References:**

Course Code 206  
BBA- Sem - II (CBCS 2018)

**Smart Cities**

Credits : 2

CCA : 50 marks

Course Type : Generic / Open Elective

**Course Objectives:**

to give exposure to tools and techniques applicable for planning, controlling & monitoring of Smart Infrastructure and Cities. This subject would also enable to develop insight for managing project risks, uncertainties and complexities of smart cities project.

**Learning Outcomes:**

Students will get an understanding of road map for Planning Smart Cities and benchmarking their performance for Indian context

**Unit 1:**

**6 hrs**

Introduction to Smart Cities, •Introduction to "City Planning", Understanding Smart Cities

**Unit 2 :**

**12 hrs**

Dimensions of Smart Cities, Global Experience of Smart Cities, Smart Cities –Global Standards and Performance, Benchmarks, Practice Codes, India "100 Smart Cities" Policy and Mission

**Unit 3 :**

**12 hrs**

- Smart City Planning and Development
- Financing Smart Cities Development
- Governance of Smart Cities, Case Studies on Smart Cities

**Reference :**

[smartcities.gov.in](http://smartcities.gov.in)

<https://internetofthingsagenda.techtarget.com/definition/smart-city>

Course Code 206  
BBA- Sem - II (CBCS 2018)

**Sectoral Analysis**

Credits : 2

CCA : 50 marks

Course Type : Generic / Open Elective

**Course Objectives:**

- To expose the students to the different sectors of the economy
- To enable the students to understand the importance and contribution of the sectors to business, economy and global environment
- To expose the students towards rural problems To awaken sense of responsibility amongst students towards senior citizens

**Learning Outcomes:**

Students will get exposure to the different sectors of the economy and their contribution to the national development.

**Unit 1 :**

Introduction to the sectors of the economy

**8 hours**

**Units 2:**

Detailed view of the IT, Manufacturing, Agriculture, Banking Insurance, Service Sector, Retail etc

**12 hours**

**Unit 3:**

Project work on detailed analysis of any one sector – national and global scenario

**10 hours**

**Reference Books :**

1. S.A. Sherlekar ,Modern Business Organization And Management – (Himalaya Publishing House)
2. Y.K. Bhushan ,Fundamental Of Business Organization & Management – (S Chand Publishers)

**BHARATI VIDYAPEETH  
DEEMED TO BE UNIVERSITY**

**PUNE, INDIA**

**FACULTY OF MANAGEMENT STUDIES**

**Board of Studies in Computer Applications**

**Bachelor of Computer Applications Programme**

**(Under Choice Based Credit System)**

**To be effective from 2018-19**

**BHARATI VIDYAPEETH (DEEMED TO BE UNIVERSITY), PUNE**  
**FACULTY OF MANAGEMENT STUDIES**  
**Board of Studies in Computer Applications and Systems Studies**  
**Bachelor of Computer applications Programme**  
**(Under Choice Based Credit System)**  
**To be effective from 2018-19 at Part I**

**1. INTRODUCTION:**

The BCA Programme is a full time 150 Credits program offered by Bharati Vidyapeeth (Deemed to be University), Pune and conducted at its management institutes in Delhi, Karad, Kolhapur, Pune, Sangli, and Solapur. All the six institutes have excellent faculty, Laboratories, Library, and other facilities to provide proper learning environment. The University is reaccredited by NAAC with an 'A+' grade. The expectations and requirements of the Software Industry, immediately and in the near future, are visualized while designing the BCA programme. This effort is reflected in the Vision and Mission statements of the BCA programme. Of course, the statements also embody the spirit of the vision of Late Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth University which is to usher in “Social Transformation through Dynamic Education.”

**2. VISION STATEMENT OF BCA PROGRAMME:**

To create high caliber solution architects and innovators for software development.

**3. MISSION STATEMENT OF BCA PROGRAMME:**

To teach 'things, not just words', 'how to think', and 'how to self-learn'.

**4. OBJECTIVES OF BCA PROGRAMME:**

The main objectives of BCA Programme are to prepare the youth to take up positions as system analysts, system engineers, software engineers and programmers. Accordingly the course curriculum aims at developing 'systems thinking' 'abstract thinking', 'skills to analyze and synthesize', and 'skills to apply knowledge', through 'extensive problem solving sessions', 'hands on practice under various hardware/software environments' and 'three projects'. In addition, 'social interaction skills', 'communication skills', 'life skills', 'entrepreneurial skills', and 'research skills' which are necessary for career growth and for leading quality life are also imparted.

**5. LEARNING OUTCOMES FROM THE BCA PROGRAMME:**

At the end of the course the student should be able to:

- (a) Analyze problems and design effective and efficient software solutions.
- (b) Develop software under latest Application Development Environments.

- (c) Learn new technologies with ease and be productive at all times.
- (d) Read, write, and contribute to technical literature.
- (e) Work in teams.
- (f) Be a good citizen in all respects.

**6. ELIGIBILITY FOR ADMISSION TO THIS PROGRAMME:**

Admission to the course is open to any candidate who has passed (10+2) or equivalent examination of any recognized board.

Subject to the above condition, the final admission is based solely on the merit at the All India entrance test (BU-MAT) conducted by Bharati Vidyapeeth (Deemed to be University, Pune).

**7 DURATION OF THE PROGRAMME:**

The duration of this course is three years divided in to six semesters or a minimum of 150 credits whichever is later. The medium of instruction and examination will be only English.

**8 SCHEME OF EXAMINATION:**

For some courses there is Internal Assessment (IA) conducted by the respective institutes as well as a University Examination (UE) at the End-of-the Term. UE will be conducted out of 60 marks and IA will be conducted for 40 marks then these are converted to grade points and grades as per the Table I. For courses having only Continuous Assessment (CA) the respective institutes will evaluate the students in varieties of ways, three or four times, during the term for a total of 100 marks. Then the marks will be converted to grade points and grades using the Table I.

**9 STANDARD OF PASSING:**

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA. A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the Head of Passing to secure the GPA required for passing.

The 10 point Grades and Grade Points according to the following table:

<b>Range of Marks (%)</b>	<b>Grade</b>	<b>Grade Point</b>
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} < 80$	A+	9
$60 \leq \text{Marks} < 70$	A	8
$55 \leq \text{Marks} < 60$	B+	7
$50 \leq \text{Marks} < 55$	B	6
$40 \leq \text{Marks} < 50$	C	5
Marks < 40	D	0

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively. GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

#### **10 Award of Honours:**

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

<b>Range of CGPA</b>	<b>Final Grade</b>	<b>Performance Descriptor</b>	<b>Equivalent Range of Marks (%)</b>
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} < 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} < 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} < 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} < 55$

$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} < 50$
CGPA below 5.0	F	Fail	Marks below 40

**RULES OF ATKT:**

1. A student is allowed to carry backlog of any number of subjects upto Semester IV.
2. A student must pass Part I (Semester I and II) to appear for Semester V.

## SEMESTER-WISE COURSE STRUCTURE FOR BCA

(To be effective from July 2018)

### SEMESTER I

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
101	Fundamentals of Information Technology	4	3	1	-	40	60
102	Algorithm and program Design	4	3	1	-	40	60
103	C Programming – I	4	3	1	-	40	60
104	Business organization system	4	3	1	-	40	60
105	Business Mathematics	4	3	1	-	40	60
106	Lab on MS-Office Suite	2	-	-	4	40	60
107	Lab on C Programming – I	2	-	-	4	40	60
108	<b>General course-I:</b> Community Work I / Career & Life Skills / Waste Management	1	2	-	-	50	0
<b>Total</b>		<b>25</b>	<b>17</b>	<b>5</b>	<b>8</b>	<b>330</b>	<b>420</b>

### SEMESTER II

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
201	Computer Organization and Architecture	4	3	1	-	40	60
202	DBMS I	4	3	1	-	40	60
203	C Programming - II	4	3	1	-	40	60
204	Financial Accounting	4	3	1	-	40	60
205	Principles of Management	4	3	1	-	40	60
206	Lab on C Programming - II	2	-	-	4	40	60
207	Environmental Studies	2	2	-	-	40	60
208	<b>General Course II :</b> Community Work II (Swacchh Bharat Abhiyan) / Sectoral Analysis / Smart Cities	1	2	-	-	50	0
<b>Total</b>		<b>25</b>	<b>19</b>	<b>5</b>	<b>4</b>	<b>330</b>	<b>420</b>

### SEMESTER III

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
301	Operating Systems	4	3	1		40	60
302	Software Engineering	4	3	1		40	60
303	DBMS II	4	3	1		40	60
304	Statistics	4	3	1		40	60
305	Multimedia Technology	4	3	1		40	60
306	Lab on Oracle and Multimedia	2	-	-	4	40	60
307	Lab on Linux Operating System	2	-	-	4	40	60
308	<b>General Course III :</b> Community Work III / Start up management / Agro Tourism	1	2	-	-	50	0
<b>Total</b>		<b>25</b>	<b>17</b>	<b>5</b>	<b>8</b>	<b>330</b>	<b>420</b>

### SEMESTER IV

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
401	Computer Networks	4	3	1	-	40	60
402	Software Testing	4	3	1	-	40	60
403	Java Programming	4	3	1	-	40	60
404	Operations Research	4	3	1	-	40	60
405	Entrepreneurship Development	4	3	1	-	40	60
406	Lab on Java	2	-	-	4	40	60
407	Minor Project - I	2	2	-	-	0	100
408	<b>General Course IV:</b> Community work IV / Basics of Taxation / Meditation & Yoga	1	2	-	-	50	0
<b>Total</b>		<b>25</b>	<b>19</b>	<b>5</b>	<b>4</b>	<b>290</b>	<b>460</b>

### SEMESTER V

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
501	Introduction to the Internet Technologies	4	3	1	-	40	60
502	Object Oriented Analysis and Design	4	3	1	-	40	60
503	C# Programming	4	3	1	-	40	60
504	Graph Theory	4	3	1	-	40	60
505	Elective I	4	3	1	-	40	60
506	Lab on Internet Technology and C# Programming	2	-	-	4	40	60
507	Minor Project II	2	2	-	-	0	100
508	<b>General Course V:</b> Social Media Management / Road Safety and Management / Event Management	1	2	-	-	50	0
<b>Total</b>		<b>25</b>	<b>19</b>	<b>5</b>	<b>4</b>	<b>290</b>	<b>460</b>

### SEMESTER VI

Course Number	Course Title	Credits	Hours / Week			IA Marks	EoTE Marks
			L	T	P		
601	Data warehousing and Data Mining	4	3	1		40	60
602	Web Programming	4	3	1		40	60
603	Software project Management	4	3	1		40	60
604	Business Analytics	4	3	1		40	60
605	Elective II	4	3	1		40	60
606	Lab on Web programming	2	-	-	4	40	60
607	Major Project	2	2	-	-	0	100
608	<b>General Course VI:</b> Business Ethics / Basics of Hospitality Management / Aptitude	1	2	-	-	50	0
<b>Total</b>		<b>25</b>	<b>19</b>	<b>5</b>	<b>4</b>	<b>290</b>	<b>460</b>

**Electives:**

<b>Elective No.</b>	<b>Elective Group</b>	<b>Course No</b>	<b>Course Name</b>
01	<b>Information Security</b>	505-1-A	Information Security Concepts
		605-1-B	Information Security Administration
02	<b>Big Data</b>	505-2-A	Introduction to Big Data
		605-2-B	HADOOP
03	<b>Information Systems</b>	505-3-A	E-Commerce
		605-3-B	Knowledge Management

**Practical Examinations:**

For courses Nos. 106,107, 206, 306, 307,406, 506 and 606 there will be practical examination.

# SEMESTER I

Course Number	Course Name	L-T-P- Credits	Year of Introduction
<b>101</b>	<b>Fundamentals of Information Technology</b>	<b>3+1+0 = 4C</b>	<b>2018-19</b>
<p><b>Course Objective:</b>  The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization. It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry. The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive medias, Internet basics</p>			
<p><b>Expected Outcome :</b>  At the end of this course, student should be able to  (a) Understand basic concepts and terminology of information technology.  (b) Have a basic understanding of personal computers and their operations.  (c) Be able to identify issues related to information security.</p>			
<p><b>References (Books, Websites etc) :</b>  How to solve computer – Dromey  Computer Fundamentals by P. K. Sinha,</p>			
<p><b>Suggested MOOC :</b>  Please refer these websites for MOOCS:  NPTEL / Swayam  www.edx.com  www.coursera.com</p>			
<b>Course Plan</b>			
<b>Unit</b>	<b>Contents</b>		
1	<p><b>Introduction to Computers:</b>  Definition, .Basics of Computer, Characteristics of computers, Evolution of Computer, Block Diagram Of a computer, Generations of Computer, Classification Of Computers, Applications of Computer, Capabilities and limitations of computer.</p>		
2	<p><b>Computer Arithmetic:</b>  Binary, Binary Arithmetic, Number System: Positional &amp; Non Positional, Binary, Octal, Decimal, Hexadecimal, Converting from one number system to another , 1's Complements, 2's Complements, Computer Codes, Rules and laws of Boolean algebra, Basic Gates (NOT, AND &amp; OR)</p>		
3	<p><b>Input Output Devices:</b>  Role of I/O devices in a computer system. Input Units: Keyboard, Terminals and its types. Pointing Devices, Scanners and its types, Voice Recognition Systems, Vision Input System, Touch Screen, Output Units: Monitors and its types. Printers: Impact Printers and its types. Non Impact Printers and its types, Plotters, types of plotters, Sound cards, Speakers.</p>		

4	<p><b>Storage Fundamentals:</b>  Primary Vs Secondary Storage, Data storage &amp; retrieval methods. Primary Storage: RAM ROM, PROM, EPROM, EEPROM. Secondary Storage: Magnetic Disks. Flash Drives, DVD, Blue-Ray disc.</p>
5	<p><b>Software:</b>  Software and its needs, Types of S/W. System Software: Operating System, Utility Programs Programming Language: Machine Language, Assembly Language, High Level Language their advantages &amp; disadvantages. Application S/W and its types: Word Processing, Spread Sheets Presentation, Graphics, DBMS s/w, Algorithms and Flow Charts.</p>
6	<p><b>Data Communication:</b>  Communication Process, Data Transmission speed, Communication Types (modes), Data Transmission Medias, Modem and its working, characteristics, Types of Networks, LAN Topologies, Computer Protocols, Concepts relating to networking. Internet – Web Browsers, Web servers, Internet Protocol, Hyper text Transfer Protocol, Business Data Processing: Introduction, data storage hierarchy, Method of organizing data, File Types, File Organization, File Utilities.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
102	<b>Algorithm and Program Design</b>	3+1+0 = 4C	2018-19
<p><b>Course Objective:</b> To understand good principles of algorithm design, elementary analysis of algorithms, and fundamental data structures. The emphasis is on choosing appropriate data structures and designing correct and efficient algorithms to operate on these data structures.</p>			
<p><b>Expected Outcome:</b> This is a first course in data structures and algorithm design. Students will:</p> <ul style="list-style-type: none"> <li>• learn good principles of algorithm design;</li> <li>• learn how to analyze algorithms and estimate their worst-case and average-case behaviour (in easy cases);</li> <li>• become familiar with fundamental data structures and with the manner in which these data structures can best be implemented; become accustomed to the description of algorithms in both functional and procedural styles;</li> </ul>			
<p><b>References (Books, Websites etc) :</b> 1. Dromey R. G. : How to Solve it by a Computer. 2. Sartaj Sahni: Data Structure, Algorithms and Applications in C++ (Ch II).</p>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction:</b> Concept, of Problem, Procedure and Algorithm, Algorithm Representation through Pseudo - Code and Flow - Charts, Tracing of Algorithms Such as Swapping, Counting, Finding the Sum, Product, maximum, minimum, of a list of numbers.</p>		
2	<p><b>Concept of Structured Programming and Procedure Oriented Programming:</b> Introduction, Concept, Basic Control Structure, Benefits of Structured Programming and Procedure Oriented Programming</p>		
3	<p><b>Design of Algorithm:</b> Design of algorithm for problem such as Evaluation of polynomial, Sum of first n factorials, Finding nth term of Fibonacci sequence, Finding largest and second largest of list, Determining nth root of a number, compute, GCD and Base Conversion</p>		
4	<p><b>Problem Analysis and Design 1:</b> Problem Analysis and Design of Algorithms for problems such as (1) Swapping (2) Counting (3) Finding the Sum, Product, maximum, minimum of a finite list of numbers, and (4) Simple variations of the above problem realization that, there may be alternative algorithm and that one algorithm may be better (in some sense) than the other.</p>		

5	<b>Problem Analysis and Design2:</b> Problem Analysis Design of Algorithms for problems such as (1) Evaluation of a polynomial (2) Sum of first n factorials (3) Finding the nth term of a Fibonacci sequence, (4) Finding the largest and second largest of a finite list, (5) Evaluating in finite series and variations of these problems, (6) Determining nth root of a number.
6	<b>Concept of Array, Sort and Search Technique:</b> Introduction of Array, Array manipulation such as removing the duplicates, Partitioning of an array, listing of prime numbers, finding prime factor of a number, The problem of search and Merge, Linear, Binary search algorithms, The Problem of Sorting, Selection, Insertion and Bubble

Course Number	Course Name	L-T-P- Credits	Year of Introduction
<b>103</b>	<b>C Programming - I</b>	<b>3+1+0 = 4C</b>	<b>2018-19</b>
<b>Course Objective:</b>			
This is a first course in programming. The objective of this paper is to teach the Programming Language C. However, the process of learning a computer language will also be emphasized. Emphasis is also on semantics and problem solving.			
<b>Expected Outcome:</b>			
At the end of the course a student should be able:			
<ul style="list-style-type: none"> <li>• To solve a given problem using programming/algorithm</li> <li>• Understand and use C libraries,</li> <li>• Trace the given C program manually</li> <li>• Effectively use of Arrays and functions</li> <li>• Write C program for simple applications of real life using structures and Unions.</li> </ul>			
<b>References (Books, Websites etc) :</b>			
<ol style="list-style-type: none"> <li>1. Let us C - Y.Kanetkar, BPB Publications</li> <li>2. Programming in C - Gottfried B.S., TMH</li> <li>3. The 'C' programming language - B.W.Kernighan, D.M.Ritchie, PHI</li> <li>4. Programming in ANSI C - Balaguruswami, TMH</li> <li>5. C- The Complete Reference - H.Sohildt, TMH</li> <li>6. <b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to C language</b> Origins of C, Character Set of C, C Tokens, Keywords and Identifiers, Constants, Variables, Data types, Declaration of variables, Declaration of variables as constant, Operators, Types of operators, Precedence and associativity, Expression, Type conversions in expressions, Input and Output functions - printf(), scanf(), getchar(), putchar(), Formatted input and formatted output.		
2	<b>Decision Control and looping</b> Introduction, Control Statements- Sequential, Selection, Iteration Statements, Branching structure- if statement, if-else statement, Nested if-else statement, else if Ladder, Conditional operator, switch statement, Loop control structures- while loop, do-while loop, for loop, Nested for loop, Jump statements-break, continue, goto		
3	<b>Functions</b> Introduction, Purpose of function, Function declaration/ Function prototype, Function definition, Function call, return statement, Function parameters, Types of functions, Call		

	by value , Storage classes, Recursion, Examples on recursive function
4	<p><b>Arrays and Strings</b></p> <p>Introduction to one-dimensional Array, Definition, Declaration, Initialization, Accessing and displaying array elements, Arrays and functions, Introduction to two-dimensional Array, Definition, Declaration, Initialization, Accessing and displaying array elements, Introductions to Strings, Definition, Declaration, Initialization, Input, output statements for strings, Standard library functions, Implementations with standard library functions</p>
5	<p><b>Structures and union</b></p> <p>Introduction to structure, Defining a structure, Declaring structure variables, Accessing structure members, nested structure, Array of structure, Array within structure, Introduction to union, Definition, Declaration, Differentiate between structure and union</p>
6	<p><b>Pointers</b></p> <p>Introduction to pointer, Definition, Declaring and Initializing pointer variable, Indirection operator and address of operator, Accessing variable through its pointer, Pointer arithmetic, Dynamic memory allocation, Pointers &amp; Functions, Pointers &amp; Array, Pointers &amp; Structures</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
<b>104</b>	<b>Business Organization System</b>	<b>3-1-0 = 4C</b>	<b>2018-19</b>
<p><b>Course Objective:</b> To acquaint students with fundamentals of Business Organization and management systems as a body of knowledge.</p>			
<p><b>Expected Outcome :</b> 1. Students shall know about business and structure 2. Students shall know about various forms of business 3. Students will have sound knowledge about overall business environment.</p>			
<p>References (Books, Websites etc) :</p> <p><b>Reference Books:</b> S.A. Sherlekar ,Modern Business Organization and Management – (Himalaya Publishing House) Y.K. Bhushan ,Fundamental of Business Organization &amp; Management – (S Chand Publishers) Basu, C. R.; <i>Business Organization and Management</i>, Tata McGraw Hill, Publishing House, New Delhi, 1998 B S Moshal, J P Mahajan, J S Gujral, Business Organization and Management –. Galgotia Publishing Co, New Delhi Redmond James, Robert Trager , Media Organization and Management –, Biztantra, New Delhi</p>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www. edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a></p>			
<p>Laboratory Experiments:</p>			
1	<p><b>Nature of Business</b> Concept of Business – Meaning, Definition, Nature and Scope, Characteristics of Business. Business as an Economic Activity. Objectives of Business. Structure of Business (Classification of Business Activities. Requisites for Success in Modern Business.</p>		
2	<p><b>Evolution of Business</b> Beginning and development of Commerce, Evolution of Industry, Industrial Revolution, Beginning and growth of Indian Business, Industrialization in India.</p>		
3	<p><b>Forms of Business Ownership</b> Introduction to various forms – Factors affecting choices of an deal form of ownership, features Merits and Demerits of Sole Proprietorship – Joint Hindu Family Business – Partnership – Joint Stock Company – Co-operative Organisation, Public Enterprises.</p>		
4	<p><b>Formation of a Company</b> Stages in formation and incorporation of a company (e Promotion – incorporation and registration – Capital Subscription – Commencement of Business. - Documents of a Company i.e. Memorandum of Association – Articles of Association – Prospectus.</p>		

5	<p><b>Establishment of Business Enterprise</b>  Various factors to be considered while starting a new Business enterprise i.e. identification of Business Opportunity – Market Assessment – Suppliers – Technology – Location – Human Resource – Finance etc. Small and Medium Enterprises – Meaning Characteristics and objectives. Role of Support Organisation such as Trade Associations and Chambers of Commerce.</p>
6	<p><b>Organization of Trade</b>  Channels of Distribution – Meaning, Functions and types. Internal Trade – Wholesale and Retail  External Trade – Import and Export. Role and importance of support services to Business such as Transport Insurance etc. Business Combinations – Mergers and Acquisitions. Franchising. Business Process Outsourcing. Multinationals – Concept and role of MNCs</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
105	<b>Business Mathematics</b>	3+1+0 =4C	2018-19
<b>Course Objective:</b>			
To give general idea about mathematics and its application in Business			
<b>Expected Outcome:</b>			
The students will be able to solve small business problems by using the concepts of Business Mathematics			
<b>References (Books, Websites etc) :</b>			
Discrete Mathematics & its Applications by Kenneth Rosen			
<b>Suggested MOOC :</b>			
Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Set Theory :</b> Definition of a set, Representation of elements of sets, Methods of representing sets , types of sets, operations on sets , cardinality of a set, Principle of Inclusion and Exclusion , Venn Diagram , Proof by using Venn diagram		
2	<b>Functions and Relations :</b> Definition of Function, Types of Functions ,Composite Function, Relation definition, representation of relations		
3	<b>Logic:</b> Propositions, Logic Operations-Negation, Disjunction, Conjunction, Conditional and Biconditional, Truth Tables of compound propositions, Translating English sentences in to logical statements and vice versa, Logic gates and circuits		
4	<b>Matrices:</b> Matrix Definition, General Form, Representation of matrix in computers, Types of matrices, Operations on matrices: Addition, Subtraction and Multiplication, transpose , row / column transformations , Inverse of the matrix by Co-factor and Adjoint method, solutions to three variable problems by using matrices, application problems of matrices		
5	<b>Permutations and Combinations:</b> Concept- Permutation, Combination, Sum and Product rules, problems on Permutation and combination (with wording atleast, atmost, neither nor, any one etc.)		
6	<b>Probability:</b> Concept and problem solving, general probability, conditional probability, partitions, Bayes Theorm		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
106	Lab on MS-Office Suite	2-0-4 = 4C	2018-19
<p><b>Course Objective:</b> The objective of this course is to help the student gain proficiency in text editing and formatting, spreadsheet and database management, and presentation preparation. An additional objective of the course is for the student to gain basic knowledge of modern-day computing technology.</p>			
<p><b>Expected Outcome :</b> Upon completion of this course students will be able to:</p> <ul style="list-style-type: none"> <li>• Demonstrate an advanced knowledge of the Word Processing package, MS Office and a knowledge of how to design &amp; create effective and structured documents like technical reports, letters, brochures, etc.,</li> <li>• Demonstrate the skills in the appropriate use of various features of the spread sheet package MS Excel and also to create useful spreadsheet applications like tabulated statements, balance sheets, statistical charts, business statements, etc.</li> <li>• Demonstrate the skills in making an effective presentation with audio and video effects using the MS Excel package</li> <li>• Draw graphical pictures, flow charts, block diagrams etc., using the drawing tools available in MS Word or MS Power Point and incorporate them into documents and presentations.</li> </ul>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a></p>			
<b>Course Plan</b>			
Unit	<b>Information Technology Essentials, Windows and Internet Explorer:</b>		
1	Verify the components of a typical computer system, Explore, maintain files, and customize the Windows operating system, Review using the Internet Explorer.		
2	<p><b>MS Word:</b> Introduction: Introduction to MS Word, Menus, Shortcuts, Document types Working with Documents:</p> <ol style="list-style-type: none"> <li>a) Opening Files – New &amp; Existing, Saving Files</li> <li>b) Formatting page and Setting Margins</li> <li>c) Converting files to different formats : Importing, Exporting , Sending files to others</li> <li>d) Editing text documents : Inserting , Deleting ,Cut, Copy, paste , Undo, Redo , Find, Search, Replace</li> <li>e) Using Toolbars, Ruler, Icons and help</li> </ol> <p>Formatting Documents:</p> <ol style="list-style-type: none"> <li>a) Setting Font Styles: Font selection – style, size, color etc., Type face – Bold Italic, underline, Case settings, Highlighting, Special symbols</li> <li>b) Setting Paragraph style: Alignments, Indents, Line space, Margins and Bullets</li> </ol>		

	<p>and Numbering</p> <p>c) Setting Page Style: Formatting, Border &amp; Shading, Columns, Header &amp; footer, Setting Footnotes, Inserting manual Page break, Column break and line break, Creating sections and frames, Inserting Clip arts, inserting pictures and other files, Anchoring &amp; Wrapping</p> <p>d) Setting Document Styles: Table of Contents, Index, Page Numbering, data &amp; Time, Author etc., Creating Master Documents</p> <p>Creating Tables: Table settings, Borders, Alignments, Insertion, deletion, Merging, Splitting, Sorting, Formula</p> <p>Drawing: Inserting Pictures/Files etc., Drawing Pictures, Formatting &amp; Editing pictures, Grouping and ordering, Rotating</p> <p>Tools: Word Completion, Spell Checks, Macros, Mail merge, Templates, Using Wizards, Tracking, Changes, Security</p>
3	<p><b>MS Power Point:</b></p> <p>Introduction: Opening new Presentation, Different presentation templates, Setting backgrounds, Selecting presentation layouts</p> <p>Creating a presentation: Setting presentation style, Adding Text to the presentation</p> <p>Formatting a presentation: Adding style, Color, gradient fills, Arranging objects, Adding Header &amp; Footer, Slide background, Slide layout</p> <p>Adding Graphics to the presentation: Inserting pictures, movies, tables, etc into the presentation, Drawing Pictures using Draw</p> <p>Adding effects to the presentation: Setting Animation &amp; transition effect, Adding audio and video</p> <p>Printing Handouts and Generating standalone presentation viewer</p>
4	<p><b>MS Excel:</b></p> <p>Introduction: Spreadsheet &amp; its Applications, Opening spreadsheet, Menus &amp; Toolbars &amp; icons, Shortcuts, Using help</p> <p>Working with Spreadsheets: Opening a File, Saving Files, Setting Margins, Converting files to different formats: Importing, Exporting and Sending files to others</p> <p>Spreadsheet addressing: Rows, Columns &amp; Cells, Referring cells and Selecting cells</p> <p>Entering and Editing Data:</p>

	<p>Entering Data, Cut, Copy, paste, Undo, Redo, Find, Search &amp; Replace, Filling continuous rows, columns, Inserting -Data, cells, column, rows &amp; sheets, Manual breaks</p> <p>Computing data :  Setting Formula, Finding total in a column or row, Mathematical Operations(Addition, Subtraction, Multiplication, Division, Exponentiation), Using other Formula</p> <p>Formatting Spreadsheets:  Formatting – Cell, row, column &amp; Sheet:  Alignment, Font, Border &amp; shading, highlighting values Hiding/Locking Cells</p> <p>Worksheet :  Sheet Name , Row &amp; Column Headers, Row Height, Column Width, Visibility – Row, Column, Sheet , worksheet Security</p> <p>Formatting – worksheet:  Sheet Formatting &amp; style - background, color, Borders &amp; shading, Anchoring objects, Formatting layout for Graphics, Clipart etc.,</p> <p>Working with sheets :  Sorting, Filtering, Validation, Consolidation, Subtotal , Creating Charts, Selecting charts, Formatting charts, label, scaling etc.,</p> <p>Using Tools:  Error Checking, Spell Checks, Macros, Formula Auditing, Creating &amp; using Templates, Tracking changes, customization, printing worksheet</p>
5	<p><b>Working with Excel Functions:</b>  Concept of Functions, Commonly used functions: Sum, Max,Min, Average, Count, Today, Now, Datedif, Countif, CountA, CountBlank, Round, RoundUp, RoundDown, ABS, Sign, Ceiling, Floor, Trim, Value, Clean, sqrt, if, sumif</p>
6	<p><b>MS Access:</b>  What is an Access Database, Opening a Database File, Create Table, Create and modify fields of tables, Construct simple queries, Saving and Running Queries</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
107	<b>Lab on C Programming I</b>	<b>0-0-4- = 2 C</b>	<b>2018</b>
<b>Course Objective :</b>			
This is companion course of C Programming I			
<b>Syllabus Broad Units:</b>			
This Companion course of C programming; Practical aspects of C programming towards problem solving is covered.			
<b>Expected Outcome :</b>			
The students will develop adequate programming skills with respect to following			
<ol style="list-style-type: none"> <li>1. Implement a real world problem using basic constructs of C language.</li> <li>2. Develop an application using Decision making and looping</li> <li>3. Make use of proper operators to solve problem.</li> <li>4. Make use of Arrays and pointers efficiently and handling strings.</li> <li>5. Comprehend the dynamic memory allocation and pointers in C.</li> <li>6. Able to define new data types using enum, structures and typedef.</li> </ol>			
<b>References (Books, Websites etc) :</b>			
<ol style="list-style-type: none"> <li>1. Let us C - Y.Kanetkar, BPB Publications</li> <li>2. Programming in C - Gottfried B.S., TMH</li> <li>3. The 'C' programming language - B.W.Kernighan, D.M.Ritchie, PHI</li> <li>4. Programming in ANSI C - Balaguruswami, TMH</li> <li>5. C- The Complete Reference - H.Sohildt, TMH</li> <li>6. A Structured Programming Approach using C – B.A. Forouzan &amp; R.F. Gillberg, THOMSON Indian Edition</li> <li>7. Computer fundamentals and programming in C – Pradip Dey &amp; Manas Ghosh, OXFORD</li> </ol>			

### Outline of Lab on C programming – I

Sr. No	Programming Exercises
1	Compilation and Executing programs Arithmetic operations Use of Symbolic constants Demonstrating the following gcc options -o, -c, -D, -l, -I, -g, -E Programs to demonstrate use of operators and Input/ output <i>gcc or an equivalent compiler is assumed.</i>
2	Program to demonstrate the following – Branching

	<ul style="list-style-type: none"> <li>- Nested Branching</li> <li>- Looping</li> <li>- Selection</li> </ul>
<b>3</b>	<p>Working with functions</p> <ul style="list-style-type: none"> <li>- Writing function prototype and definition</li> <li>- Using functions to solve problems (Calling a function )</li> <li>- Using recursion</li> <li>- Storage classes - Using register, extern and static</li> </ul>
<b>4</b>	<p>Arrays and Strings</p> <p>1D - Linear Search, Sort</p> <p>2D - Matrix operations</p> <p>Strings: program to do operations on string using library and user defined functions</p> <p>Finding length of string, String concatenation, removing extra spaces, get substring, check whether second string is part of another, converting string to lowercase, uppercase etc.</p>
<b>5</b>	<p>Structures</p> <p>Making use of structures to define new types(user defined types)</p> <p>Arrays of structure, display all elements of array and sorting of them.</p>
<b>6</b>	<p>Pointers,</p> <p>Programs to demonstrate working of pointer; need of pointer</p> <p>Pointer as parameter to function</p> <p>Comparison of pointer with arrays and using pointer to refer an array</p> <p>Creating pointer dynamically by using dynamic memory allocation</p> <p>Array of Pointers, Ragged Arrays, Function pointer</p>

Course Number	Course Name	L-T-P-Credits	Year of Introduction
<b>108</b>	<b>Community Work</b>	<b>2-0-0 =1 C</b>	<b>2018-19</b>
<b>Course Objective:</b> This course aims to expose the students to social issues and help them Participate in community service through trips/events organized at institute, state level etc and also to Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc (I) To expose the students towards social reality and role of community development for social upliftment and well being (II) To involve students in community work through active involvement and participation			
<b>Expected Outcome:</b> Students will be able to know the community needs and understand their role ito contribute meaningfully towards community development			
<b>Course Plan</b>			
<b>Unit</b>	<b>Contents</b>		
1	History, meaning, Goals, values, functions, role and process of community work. Professional and voluntary community work. Attitudes, roles and skills of a community worker .		
2	Social concerns in India: poverty, unemployment, population, problems faced by women – dowry, domestic violence, etc. Social problems - terrorism, corruption, caste conflict, drug abuse, AIDS, ETC.		
3	Types of community work. Caring for needy, helping the poor, fundraising drives-organizing.		
	<b>COMMUNITY HOURS:</b> Participate in community service trips/events organized at institute, state level etc , Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc , Submit a report on a particular type of community involvement undertaken.		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
<b>108</b>	<b>Career &amp; Life Skills</b>	<b>2-0-0 =1 C</b>	<b>2018-19</b>
<b>Course Objective:</b> <ol style="list-style-type: none"> <li>To help students make well-informed, thoughtful decisions regarding your future as adults.</li> <li>To develop behaviours and attitudes that help students contribute to the community in a positive manner.</li> <li>Give you skills and knowledge to contribute to the well-being and respect of the self and others</li> </ol>			
<b>Expected Outcome:</b> Students will be able to understand self potential and ways to enhance capabilities.			
<b>References (Books, Websites etc) :</b> <i>LifeChoices Series: - LifeChoices: Careers, Healthy &amp; Well, Relationships, Venturing Out</i>			
<b>Online Resources:</b> <ol style="list-style-type: none"> <li>the life-changing magic of tidying up: the japanese art of decluttering and organizing - marie kondo</li> <li>how to organize (just about) everything: more than 500 step-by-step instructions for everything from organizing your closets to planning a wedding to creating a flawless filing system – peter walsh</li> </ol> Mindset: the new psychology of success -carol s. Dweck			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Unit 1: Introduction to Life Management</b> Life management-definition, scope and application, concept of emotions, self belief, setting realistic goals, understanding system		
2	<b>Unit 2: Developing Emotional Potential and Physical Potential</b> Improving thinking skills, improving study skills, planning education Eating habits, healthy foods, staying healthy, changing habits-the self change model		
3	<b>Developing Your Intellectual Potent</b> Effective communication, effective listening, effective speaking ,getting along with others, functioning in groups, how to delegate. Definition-stress, handling change and stress, managing time, managing money, formulation of career plan, bring it all together		
4	<b>Career and Life Choices</b> Managing personal, lifelong career development. <b>Resource Choices...</b> Making responsible decisions in the use of finances and other resources that reflect personal values and goals as well as a commitment to self and others. <b>Personal Choices...</b> Understand the emotional/psychological, intellectual, social, spiritual, and physical dimensions of health and how these dimensions of health work together to contribute to personal well-being.		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
<b>108</b>	<b>Waste Management</b>	<b>2-0-0 =1 C</b>	<b>2018-19</b>
<p><b>Course Objective:</b> To expose students to the issue of waste and waste management tools and techniques applicable for waste disposal and management.</p>			
<p><b>Expected Outcome:</b> After completion of the course students</p> <ul style="list-style-type: none"> <li>• will be able to understand solid waste sources, health and environmental issues related to solid waste management.</li> <li>• will get knowledge about Sources, handling and control of Biomedical, Chemical, Nuclear and e-wastes.</li> </ul> <p>will be able to understand the issues regarding waste disposal and management and will become aware of Environment and health impacts due to solid waste mismanagement</p>			
<p><b>References (Books, Websites etc) :</b></p> <ol style="list-style-type: none"> <li>1. D. Bhide and B.B. <b>Course Plan</b>			
Unit	Contents		

1	<p><b>Solid Waste Management- Introduction to waste Management</b> Introduction, Meaning, Solid waste including municipal, hospital and industrial solid waste; health and environmental issues related to solid waste management. Provisions in Indian Penal Code for Environmental protection.</p>
2	<p><b>Biomedical, Chemical, Nuclear and e-wastes</b> Biomedical wastes – Types – Management and handling – control of biomedical wastes, Chemical wastes – Sources –Environmental effects – Need for control – Health and environmental effects. Nuclear waste – Management of nuclear wastes, e-waste- sources and management.</p>
3	<p><b>Waste reduction at source</b> Treatment and disposal techniques for solid wastes–composting, vermin-composting, autoclaving, microwaving, incineration, non- incineration, Thermal techniques, use of refuse derived fuels, land-filling. <b>Reduce Reuse and Recycling Techniques:</b> Need for the concept-Variou Types - Handmade Paper production –Reuse of materials-Recycle of material</p>

# SEMESTER II

## Semester II

Course Number	Course Name	L-T-P- Credits	Year of Introduction
<b>201</b>	<b>Computer Organization and Architecture</b>	<b>3-1-0 = 4C</b>	<b>2018-19</b>
<p><b>Course Objective:</b> Main objective of this paper is to learn structure and functioning of various hardware components of digital computer. Also study the interactions and communication among these hardware components.</p>			
<p><b>Expected Outcome :</b> At the end of this course, student should be able to understand</p> <ul style="list-style-type: none"> <li>• Simple machine architecture and the reduced instruction set computers.</li> <li>• Memory control, direct memory access, interrupts, and memory organization</li> <li>• Basic data flow through the CPU (interfacing, bus control logic, and internal communications).</li> <li>• Number systems, instruction sets, addressing modes, and data/instruction formats.</li> </ul>			
<p><b>References (Books, Websites etc) :</b> M Morris Mano Computer systems Architecture third edition Prentice Hall of India Publication</p>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a></p>			
Course Plan			
Unit	Contents		
1	<p><b>Introduction To Digital Computer:</b> Data Representation – Data Types – Complements – Arithmetic Operations – Representations – Fixed –Point, Floating – Point , Decimal Fixed – Point – Binary Codes- Logic Gates, Boolean Algebra, Map Simplification – Combinational Circuits: Half-Adder, Full Adder- Flip Flops - Sequential Circuits</p>		
2	<p><b>Introduction To Digital Components And Micro Operations:</b> ICs – Decoders – Multiplexers – Registers – Shift Registers – Binary Counters – Memory Unit – Register Transfer Language – Register Transfer – Bus And Memory Transfers – Arithmetic, Logic And Shift Micro Operations , Arithmetic Logic Shift Unit.</p>		
3	<p><b>Computer organization:</b> Instruction Codes – Computer Registers – Computer Instructions – Timing And Control – Instruction Cycle – Memory Reference Instructions – I/O And Interrupt – Machine Language – Assembly Language – Assembler.</p>		
4	<p><b>Memory Organization:</b> Memory Hierarchy – Main Memory – Auxiliary Memory – Associative Memory – Cache Memory – Virtual Memory – Memory Management.</p>		
5	<p><b>Central Processing Unit:</b> General Register Organization – Control Word – Stack Organization – Instruction Format – Addressing Modes – Data Transfer And Manipulation – Program Control, RISC</p>		

6

**Input – Output Organization:**

Peripheral Devices – Input-Output Interface – Asynchronous Data Transfer – Modes Of Transfer – Priority Interrupt – DMA – IOP – Serial Communication.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
<b>202</b>	<b>Database Management System</b>	<b>3-1-0 = 4C</b>	<b>2018-19</b>
<p><b>Course Objective:</b>  This is a foundational course on Data Modeling. The course aims to impart knowledge of the concepts related to database and operations on databases. It also gives the idea how database is managed in various environments with emphasis on security measures as implemented in database management systems.</p>			
<p><b>Expected Outcome :</b>  At the end of the course, student should be able to  A) Understand the concepts of database and techniques for its management.  B) Different Data Models at Conceptual and Logical level.  C) Differentiate between the role of DBA and Data Architect  D) Understanding Data Security standards and Methods</p>			
<p><b>References (Books, Websites etc) :</b>  1) Database System Concepts By Henry korth and A. Silberschatz  2) Database Systems Concepts, Designs and Application by Shio Kumar Singh, Pearson  3) Database Management Systems by Debabrata Sahoo ,Tata Macgraw Hill</p>			
<p><b>Suggested MOOC :</b>  Please refer these websites for MOOCS:  NPTEL / Swayam  www. edx.com  www.coursera.com</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction of Database Management System:</b>  Difference between Data, Information, Data Processing &amp; Data Management. File Oriented Approach, Database oriented approach to Data Management, Need for DBMS, Characteristic of Database, Database Architecture: Levels of Abstraction, Database schema and instances, 3 tier architecture of DBMS, Data Independence. Database users, Types of Database System. Database Languages, DBMS interfaces.</p>		
2	<p><b>Data Modeling:</b>  Data Models, Logical Data Modeling: Hierarchical Data Model, Network Data Model, Relational Data Model, Advantages and Disadvantages of Logical Data Modeling. Conceptual Data Modeling: Entity Relationship Model, Entities, Attributes, Types of Attributes, Relationships, Degree of relationship Set, Mapping Cardinalities, Keys, ER Diagram Notations, Roles Participation: Total and Partial, Strong and Weak Entity Set. Case studies on ERD.</p>		
3	<p><b>Normalization:</b>  Keys: Composite, Candidate, Primary, Secondary, Foreign, Super key, CODD's Rules, Mapping conceptual model into Relational Model. Functional Dependencies, Decomposition, Lossy and Lossless Decomposition, Dependency Preserving Decomposition Advantages and Disadvantages of Normalization, Normal Forms (1NF, 2NF, 3NF,) Case Studies on Normalization.</p>		

4	<p><b>File Structures and Data Administration:</b>  File Organization, Overview of Physical Storage Media, Magnetic Disk, RAID, Tertiary Storage, Storage Access, Data Dictionary Storage, Organization of File (Sequential, Clustering), Indexing and Hashing, Basic Concepts, indices, B+ Tree index file, B- tree index file, Static hashing, Dynamic Hashing, Data administration, Role and Responsibility of DBA</p>
5	<p><b>Transaction and Concurrency Control</b>  Multiprogramming and Multiprocessing, Basic Database access operations, Concept of transaction, transaction state, ACID properties, Schedules, Serializability of schedules., Concurrency Control, lock based protocols, timestamp based protocols, Multiple granularity, Multiple Version Techniques, Deadlock and its handling, Wait-Die and Wound-Wait, Deadlock prevention without using timestamps, Deadlock detection and time outs</p>
6	<p><b>Database Recovery and security Management:</b>  Database Recovery, Types of Failures, and Data access. Recovery and atomicity, Recovery Techniques Algorithms: Log Based Recovery, Check points, Shadow Paging, Recovery with concurrent transactions</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
<b>203</b>	<b>C Programming - II</b>	<b>3-1-0 = 4C</b>	<b>2018-19</b>
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>To understand file handling in C.</li> <li>To develop skills to analyze the problem given and to design &amp; develop an efficient solution to given problem</li> <li>To develop capability to choose appropriate data structures for given problems</li> <li>To imbibe programming skills &amp; thereby making industry ready</li> </ul>			
<b>Expected Outcome:</b> After undergoing this course, student will <ol style="list-style-type: none"> <li>Have thorough knowledge about data structures</li> <li>Ability to design&amp; develop program using linear data structures&amp; non linear data structures for solving problems</li> <li>Ability to choose appropriate data structures for problem solving</li> <li>Ability to use combination of these data structures for problem solving.</li> </ol>			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>Behrouz A. Forouzan and Richard F. A Holistic approach to learning C.</li> <li>Andrew Tenanbaum, Thomson, 2005, Data Structures with C.Robert Kruse &amp; Bruce Leung, Data Structures &amp; Program Design in C, Pearson Education,</li> </ol>			
<b>Suggested MOOC :</b> Data structures and Algorithms, Prof. Sudarshan Iyengar, IITRopar, 8 weeks, Rerun Feb 05, 2018 <a href="https://onlinecourses.nptel.ac.in/noc16_cs06">https://onlinecourses.nptel.ac.in/noc16_cs06</a> at NEPTEL			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Elementary Data Structures:</b> Basic concepts such as data object, array, and record; Operations and relations on data objects; definition of data structure; Built-in data types as examples of data structures; concept of abstract data type; notation to specify an abstract data type; concepts of pre-conditions and post-conditions; Implementation of an ADT in a language; Specification and implementation of simple data structures such as Integer, Rational, Currency, Date, Temperature, distance, Pay, Marks, Grade_card etc.		
2	<b>Linear Data Structures:</b> ( Representation in Memory and operations like insertion, deletion and traversal) – one and multidimensional array, Pointer arrays, single link list, circular link list, double link list		
3	<b>Particular Linear Data Structures:</b> Representation in Memory and operations like insertion, deletion and traversal) - Stacks: Applications: implementation of recursion, factorial calculation, queues, circular queue, deque;		

4	<b>File Handling:</b> Creation, reading writing in a file. Pattern Matching and Extraction of data from a file. Reading and writing from files.
5	<b>Hierarchical data structures :</b> General trees and related concepts; depth first and breadth first traversal of trees; n-ary trees and important properties of n-ary trees; binary trees and their properties; binary tree traversal algorithms.
6	<b>The problem of search and Sorting :</b> Linear and binary search and their efficiency; Hash tables, The standard sort algorithms (Bubble/insertion/selection) and their efficiencies; Merge sort and quick sort algorithms and their efficiencies.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
<b>204</b>	<b>Financial Accounting</b>	<b>3-1-0 = 4C</b>	<b>2018-19</b>
<b>Course Objective:</b>			
<ol style="list-style-type: none"> <li>To impart basic accounting knowledge</li> <li>To lay a foundation for further study of accounting at higher level</li> <li>To enable the students to understand basic accounting principles, practice and its applications in modern business activities.</li> </ol>			
<b>Expected Outcome :</b>			
<ul style="list-style-type: none"> <li>The knowledge of accounting and its principles at basic level.</li> <li>Practical's in Tally and Excel for Financial Accounting assignments</li> </ul>			
<b>References (Books, Websites etc) :</b>			
<ol style="list-style-type: none"> <li>Dr. S. N. Maheshwari , Financial Accounting For Management: (Vikas Publishing House)</li> <li>Robert Anthony, David Hawkins, Business Accounting. (Tata McGraw –Hill)</li> <li>M.G.Patkar, Book-Keeping &amp; Accountancy. Std XI( FYJC) Commerce</li> <li>Anil Chowdhry , Fundamentals of Accounting &amp; Financial Analysis (PearsonEducation)</li> <li>M.E.Thukaram Rao, Accounting for Managers.( New Age International Publishers)</li> </ol>			
<b>Suggested MOOC :</b>			
Please refer these websites for MOOCS:			
NPTEL / Swayam			
www. edx.com			
www.coursera.com			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction:</b> Need for Accounting, Meaning and definition of book keeping, System of Book keeping. Financial Accounting-definition, Scope and objectives. Accounting v/s Book Keeping. Limitations of Financial Accounting, End users of financial statement.		
2	<b>Accounting Principles, Concepts and Conventions:</b> Accounting Principles-definition and importance, Accounting Concepts and Conventions, Branches of accounting.		
3	<b>Journal and ledger:</b> Journal-importance and utility, classification of accounts, journalizing of transactions. Ledger- meaning and utility, posting and balancing of account		
4	<b>Subsidiary Books And Trial Balance:</b> Cash book, purchase book, sales book. Trial Balance- meaning and purpose, preparation of a trial balance.		
5	<b>Preparation of final accounts:</b> Preparation of Trading and Profit & Loss Account and Balance Sheet of sole proprietary business.		
6	<b>Computerized Accounting:</b> Computers and Financial application, Accounting Software packages. (Orientation level)		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
205	<b>Principles of Management</b>	3+1+0 = 4C	2018-19
<b>Course Objective:</b> To understand the concepts in Management and to develop the skills related to practice of management.			
<b>Expected Outcome:</b> To understand the functions and processes of business management.			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>1. Heinz Wehrich &amp; Harold Koontz , Principles and Practice of Management</li> <li>2. Tripathi &amp; Reddy , Principles of Management</li> <li>3. Dr. L.M.Prasad, Principles of Management</li> <li>4. Richard Daft., Management. Thomson South Western Publishers, Australia</li> </ol>			
<b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to Management:</b> Definitions and Meaning of Management, Characteristics of Management, Management Vs. Administration, Levels of Management, Functions of management, Scope and Importance of Management, Henry Fayol' s contribution to Management, Fredrick Taylor's contribution to Scientific Management, Social Responsibility of Management.		
2	<b>Planning:</b> Meaning, Steps in planning process, Nature of planning , Types of plans, Mission and Objectives, Process of setting Objectives, Management by Objectives, Decision making - process.		
3	<b>Organizing:</b> Meaning, Process of Organizing, Organization Structure, Forms of Organization		
4	<b>Staffing:</b> Recruitment and its Sources, Selection process, Payment of Wages and Salaries, Incentives - Types, Motivation - Positive and Negative motivation.		
5	<b>Directing:</b> Defining Leadership, Types of leadership. Authority & Responsibility, Delegation of Authority, Decentralization - Determinants of decentralization, Distinction between Delegation and Decentralization.		
6	<b>Controlling:</b> Meaning, Characteristics of Control, Process of Controlling, Modern methods of controlling, Requirements for Effective Control, Relationship between Planning & Controlling. Use of IT in Controlling. Zero Based Budgeting and Management audit.		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
206	<b>Lab on C Programming -II</b>	0-0-4 = 2C	2018-19
<b>Course Objective :</b>			
This is companion course of C Programming II			
<b>Syllabus Broad Units:</b>			
This Companion course of C programming II; Practical aspects of C programming towards problem solving is covered.			
<b>Expected Outcome :</b>			
The students will develop adequate programming skills with respect to following			
<ol style="list-style-type: none"> <li>1. Define basic data structures such as Date, Currency and Rational; and using it.</li> <li>2. Defining and using and updating Linear data structures : arrays and Linked List</li> <li>3. Should define data types such as stack, queue and List</li> <li>4. Able to read and write data into files.</li> <li>5. Able to define hierarchical data types; manipulate and use it.</li> <li>6. Able to understand searching and sorting mechanism and use various algorithms on it.</li> </ol>			
<b>References (Books, Websites etc) :</b>			
<ol style="list-style-type: none"> <li>1. Behrouz A. Forouzan and Richard F. Gilberg , 2nd Edition, Thomson, 2003, Computer Science A Structured Programming Approach Using C</li> <li>2. Basavraj S Anami, Shanmukhappa Angadi, Sunil Kumar S Manvi, PHI Publications, 2010. A Holistic approach to learning C.</li> <li>3. Andrew Tenanbaum, Thomson, 2005, Data Structures with C. Robert Kruse &amp; Bruce Leung, Data Structures &amp; Program Design in C, Pearson Education,</li> </ol>			

### Lab on C programming -II

Sr. No	Programming Exercises
1	Elementary Data Structures <ul style="list-style-type: none"> <li>- Write a program having functionality of one dimension and two dimension arrays with use of simple data types such as Integer, Float, Date etc.</li> <li>- Write a program wherein mathematical calculations involves such as average, percentage calculation, Factorial calculation and Matrix multiplication</li> <li>- Write program for structure implementation for array and pointers.</li> <li>- Create a object of the class to achieve various functionalities of accounting such as Net Pay calculation, Tax deduction, Gross pay etc.</li> </ul>
2	Linear Data Structures <ul style="list-style-type: none"> <li>- Demonstrate various functionalities for Link list, Circular link list and double link list with the reference of array and pointer.</li> </ul>

	<ul style="list-style-type: none"> <li>- Write a C program to insert and delete string / integer data from specific place of linked list.</li> <li>- Search a specific string/ integer in a given data set also find how many time it occurs or repeats in a set given</li> </ul>
<b>3</b>	<p>Particular Linear Data Structures</p> <ul style="list-style-type: none"> <li>- Write program for implementation of recursion</li> <li>- Demonstrate Insertion, Deletion and Searching functionalities with their nomenclatural for – <ul style="list-style-type: none"> <li>o Stack</li> <li>o Queues</li> <li>o Circular Queues</li> </ul> </li> <li>- Do necessary assumption for implementation of it</li> </ul>
<b>4</b>	<p>File Handling</p> <ul style="list-style-type: none"> <li>- Program to create and write data into files</li> <li>- Program to read data from files.</li> <li>- Programs on pattern matching on data of files and using this pattern matching at the time of reading and writing data into file</li> </ul>
<b>5</b>	<p>Hierarchical data structures</p> <ul style="list-style-type: none"> <li>- Programs for defining data structure to represent a tree. Creating tree and adding data/nodes into it.</li> <li>- Programs to traverse trees: DFS, BFS and other</li> <li>- Deleting and nodes in tree</li> </ul>
<b>6</b>	<p>The problem of search and Sorting</p> <ul style="list-style-type: none"> <li>- Programs to use linear/sequential searching and binary searching</li> <li>- Programs to implement standard sorting algorithms with efficiency measurement</li> <li>- Reading data form and using it with various sorting algorithms</li> </ul>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
207	Environment Studies	2-0-0 = 2C	2018-19
<b>Course Objective:</b> To Understand and the nature and function of the natural environment affecting society.			
<b>Expected Outcome :</b> Understand the importance of Environment in the life of living things.			
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>• Agrawal K.C.:Environmental Biology:Nidhi Publishers Ltd(2001)</li> <li>• Bharucha Erach: The Biodiversity of India: Mapin Publishing Pvt. Ltd.</li> <li>• Jadhav H and Bhosale V.M.: Environmental Protection and Laws: Himalaya Publishing House.</li> <li>• Miller T.G. Jr.: Environmental Science: Wadsworth Publishing Co.</li> </ul>			
Suggested MOOC :			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>The multidisciplinary nature of environment studies:</b> Definition, scope and importance-need of public awareness.</p> <p><b>Natural Resources:</b> <b>Renewable and non-renewable resources:</b> <b>Forest resources:</b> Use and over- exploitation, deforestation. Case studies. Timber extraction, mining, dams and their effects on forest and tribal people.</p> <p><b>Water resources:</b> Use and over-utilization of surface and groundwater, floods, droughts, conflicts over water, dams- benefit and Problems.</p> <p><b>Mineral Resources:</b> Use and exploitation ‘environmental effects of extracting and using mineral resources, case studies.</p> <p><b>Food resources:</b> World food problems, changes caused by agriculture. Fertilizer-pesticide problems, water logging, salinity, case studies.</p> <p><b>Energy resources:</b> Growing energy needs, renewable and non-renewable energy resources, use of alternative energy sources.</p> <p><b>Land resources:</b> Land as resources, land degradation, man induced landslides, desertification. Role of individual in conservation of natural resources. Equitable use of resources for sustainable lifestyles</p>		
2	<p><b>Ecosystem:</b> Concept of ecosystem, structure and function of an ecosystem, producers, consumers and decomposers .Energy flow in the ecosystem, Ecological succession, food chains, food webs and ecological pyramids, introduction, types, characteristics features structure and function of the following ecosystem, forest ecosystem ,grassland ecosystem, Desert ecosystem, Aquatic ecosystems, ponds, stream, lakes, rivers, estuaries.</p>		
3	<p><b>Biodiversity and its conservations:</b> Introduction, Definition: genetic, species and ecosystem diversity, Biogeographically classification of India, value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option vales, India as a mega diversity nation, Hot-Spots of biodiversity, Threats to biodiversity: habitat loss, poaching of wildlife, Man wildlife</p>		

	conflicts, Endangered and endemic species of India, Conservation of biodiversity: In situ and Ex-situ conservation of biodiversity.
4	<p><b>Environmental Pollution:</b>  Definition- Causes, effects and control measures of:-Air pollution, water pollution, soil pollution, marine pollution, noise pollution, thermal pollution, and nuclear hazards .Soil waste management: cause, effects and control measures of urban and industrial waste. Role of an individual in prevention of pollution. Pollution case studies. Disaster management: floods, earthquakes, cyclone and landslide.</p>
5	<p><b>Social issues and Environment:</b>  From unsustainable to sustainable development, urban/problems related to energy, water conservation, rain water harvesting, watershed management, Resettlement and rehabilitation of people; its problems and concerns Case Studies, Environment ethics: Issues and possible solutions ,wasteland reclamation, Consumerism and waste products, Environment protection Act, Air(presentation and Control of Pollution)Act. Water (Prevention and Control of Pollution) Act. Wildlife Protection Act. Forest Conservation Act. Issues involved in enforcement of environmental legislation. Public awareness.</p>
6	<p><b>Human Population and the Environment:</b>  Population growth, variation among nations, population explosion-Family Welfare Programme. Environment and Human health. Human Rights Value Education. HIV/AIDS Women and Child Welfare. Role of Information Technology in Environment and human health.</p>

Course Number	Course Name	L-T-P-Credits	Year of Introduction
208	Community Work – Swachh Bharat Abhiyan	2-0-0 =1 C	2018-19
<b>Course Objective:</b> This course aims to expose the students to Swachh Bharat Abhiyan initiative of the government.			
<b>Expected Outcome :</b> Students will be able to understand the details about the Swachh Bharat Abhiyan and its impact on society.			
<b>References (Books, Websites etc) :</b> <a href="http://www.swachhbharaturban.in/">www.swachhbharaturban.in/</a> swachhbharatmission.gov.in			
<b>Course Plan</b>			
Unit	Contents		
1	History, meaning, Goals of Cleanliness initiatives		
2	Initiators of cleanliness drive in India. Sant Ghadage Baba, Mahatam Gandhi, Efforts taken towards the Swachh Bharat Abhiyan, Swachh Bharat Mission		
3	Impact of Cleanliness initiatives. Social Awareness, Case Studies.		
	COMMUNITY HOURS: Internship of 15 days (100 hours) to be undertaken Submit a report on a particular type of community involvement undertaken		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
<b>208</b>	<b>Sectoral Analysis</b>	<b>2-0-0 =1 C</b>	<b>2018-19</b>
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>• To expose the students to the different sectors of the economy</li> <li>• To enable the students to understand the importance and contribution of the sectors to business, economy and global environment</li> <li>• To expose the students towards rural problems To awaken sense of responsibility amongst students towards senior citizens</li> </ul>			
<b>Expected Outcome :</b> Students will get exposure to the different sectors of the economy and their contribution to the national development.			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>1. S.A. Sherlekar ,Modern Business Organization And Management – (Himalaya Publishing House)</li> <li>2. Y.K. Bhushan ,Fundamental Of Business Organization &amp; Management – (S Chand Publishers)</li> <li>3. Basu, C. R.; <i>Business Organization And Management</i>, Tata Mcgraw Hill, Publishing House, New Delhi, 1998</li> <li>4. Business World</li> </ol>			
<b>Course Plan</b>			
Unit	Contents		
1	Introduction to the sectors of the economy		
2	Detailed view of the IT, Manufacturing, Agriculture, Banking Insurance, Service Sector, Retail		
3	Project work on detailed analysis of any one sector – national and global scenario		

Course Number	Course Name	L-T-P-Credits	Year of Introduction
208	Smart Cities	2-0-0 =1 C	2018-19
<b>Course Objective:</b> To give exposure to tools and techniques applicable for planning, controlling & monitoring of Smart Infrastructure and Cities. This subject would also enable to develop insight for managing project risks, uncertainties and complexities of smart cities project.			
<b>Expected Outcome :</b> Students will get an understanding of road map for Planning Smart Cities and benchmarking their performance for Indian context.			
<b>References (Books, Websites etc) :</b>			
<b>Suggested MOOC :</b>			
<b>Course Plan</b>			
Unit	Contents		
1	Introduction to Smart Cities, •Introduction to "City Planning", Understanding Smart Cities		
2	Dimensions of Smart Cities, Global Experience of Smart Cities, Smart Cities –Global Standards and Performance, Benchmarks, Practice Codes, India "100 Smart Cities" Policy and Mission		
3	<ul style="list-style-type: none"> <li>•Smart City Planning and Development</li> <li>•Financing Smart Cities Development</li> <li>•Governance of Smart Cities, Case Studies on Smart Cities</li> </ul>		

# SEMESTER III

Course Number	Course Name	L-T-P- Credits	Year of Introduction
---------------	-------------	----------------	----------------------

301	Operating Systems	3L-1T-0P=4C	2018
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>To provide an understanding of the major operating system components</li> <li>To provide coverage of basic computer system organization</li> <li>The overall aim of this course is to provide a general understanding of how a computer works. This includes aspects of the underlying hardware as well as structure and key functions of the operating system.</li> </ul>			
<b>Expected Outcome :</b> At the end of this course, student should be able to <ul style="list-style-type: none"> <li>Explain the concepts of process, address space and file</li> <li>Compare and contrast various CPU scheduling algorithms</li> <li>Understand functioning and working of Windows as well as Unix Operating System</li> </ul>			
<b>Prerequisite:</b> Students should have basic knowledge of working on an operating system			
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>Operating systems design and implementation by Andrew Tanenbaum and Albert Woodhull</li> <li>Operating systems concept and design by Milan Milenkovic</li> <li>Operating system Concepts by Silberschulz, Abraham and Galvin, peter raer</li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
Course Plan			
Unit	Contents		
1	<b>Introduction to Operating System:</b> Definition and concept of OS, History of OS, Importance and function of Operating system. Types of OS-Batch System, timesharing, Multitasking, multiprogramming, multiprocessing, online operating system, real time, distributed operating system. Views-command language users view, system call users view, structure of OS- simple, monolithic system and layered system, client server model. User operating-system interface: command line interface, GUI, system calls.  <b>Case Study:</b> Unix History, General Structure of Unix, The shell of Unix operating system, The shell of Unix operating system		
2	<b>Process Management:</b> Process concept, Process Control Block, process states and its transitions, context switch, OS services for Process management, scheduling and types of schedulers, scheduling algorithm-First come first served, shortest job first, shortest remaining time next, time slice scheduling, priority based scheduling, multilevel queue, multilevel queue with feedback  <b>Case Study:</b> Process management in Unix		
3	<b>Storage Management:</b> Basic concept of storage management, logical and physical address space, swapping, contiguous allocation, non-contiguous allocation, fragmentation, segmentation, paging, demand paging, virtual memory, page replacement algorithms- FIFO, Optimal page		

	replacement algorithm, least recently page replacement algorithm, clock page replacement algorithm, design issue of paging, thrashing,
<b>4</b>	<p><b>Inter-process communication and synchronization:</b>  Need, Mutual Exclusion, Semaphore, Busy-wait Implementation, characteristics of semaphore, queuing implementation of semaphore, producer consumer problem, critical region and conditional critical area. What is deadlock? Conditions to occur the deadlock, deadlock prevention, deadlock avoidance- banker's algorithm. resource request, resource release.</p>
<b>5</b>	<p><b>File Systems:</b>  Files-basic concept, file attributes, operations, file types, file structure, access methods, Directory- structure-single level directory system, two level directory system, hierarchical directory system, directory operations, protection, security, allocation method.</p> <p><b>Case Study: Unix File Management and Security</b></p>
<b>6</b>	<p><b>Input/output System:</b>  Principles of I/O hardware, I/O devices, device controller, DMA, Principles of I/O software-goals, interrupt handler, device driver.  Mass storage structure-disk structure, disk scheduling (FCFS, SSTF, SCAN, LOOK, C-SCAN, C-LOOK)</p> <p><b>Case Study: Input output management in Unix</b></p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
302	Software Engineering	3L-1T-0P = 4C	2018
<b>Course Objective:</b> To introduce the current methodologies involved in the development and maintenance of Software over its entire life cycle.			
<b>Learning Outcome : At the end of this course, student should be able to</b> <ul style="list-style-type: none"> <li>Understand life cycle models, Requirement elicitation techniques, understand the concept of Analysis and Design of software.</li> <li>Develop SRS as per any of the existing standards.</li> <li>Implement software engineering concepts in software development to develop quality software.</li> </ul>			
<b>Pre-requisites:</b> Preliminary knowledge of computer, their operations and applications.			
<b>References (Books, Websites etc):</b> <ul style="list-style-type: none"> <li>SOFTWARE ENGINEERING A PRACTITIONERS APPROACH seventh edition BY Roger S. Pressman McGraw Hill International Edition.</li> <li>Software Engineering by Sommerville, Pearson Education, 7th edition</li> <li>Software Engineering by K.K. Aggarwal &amp; Yogesh Singh, New Age International Publishers.</li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to Software Engineering:</b> Software, Program vs Software, software characteristics, Definition of Software Engineering, importance, principles of software engineering, Difference between software engineering and software programming, Members involved in software development.		
2	<b>Software process and Feasibility study:</b> Need of Feasibility study, types of Feasibility study, Cost Benefit Analysis. General software development life cycle with all phases. Overview of software models (Waterfall, Prototyping, and Spiral and Rapid Application Development model).		
3	<b>Requirement Engineering Concepts and Methods:</b> What is Requirement Engineering, Types of requirements, Requirement elicitation techniques- Traditional methods and Modern methods, Verification and validation process. Principles of Requirement Specification, Software Requirement Specification document Outline Characteristics of good SRS: - correct, complete, unambiguous, consistent, modifiable, traceable, Understandable		
4	<b>Analysis and Structured System Design tools:</b> <b>Analysis and Design Tools :</b> Entity-Relationship Diagrams, Decision Tree and Decision Table , Data Flow Diagrams (DFD) , Data Dictionary , Elements of DD		

	<p>Advantage of DD , Pseudo code , Input And Output Design</p> <p><b>Structured System Design:</b>  Modules Concepts and Types of Modules Structured Chart , Qualities of Good Design , Coupling, Types of Coupling , Cohesion, Types of Cohesion, CASE STUDIES (Based on Above Topic)</p>
5	<p><b>Software Testing and Software Quality Assurance</b></p> <p><b>Software Testing:</b>  Definition, Test characteristics, Types of testing: Black-Box Testing , White-Box Testing ,Unit testing , Integration testing, Validation, Verification.</p> <p><b>Quality concept:</b>  (Quality, quality control, quality assurance, cost of quality), SQA activities, SQA plan. Formal Technical review: Review meeting, review reporting and review guidelines  Software Configuration Management: - What is configuration management, Baseline, Software Configuration items, SCM process- Identification of objects, Version control and Change control.</p>
6	<p><b>Software Maintenance:</b>  What is software maintenance? Problems during software maintenance.</p> <p><b>Categories of Software Maintenance:</b> Corrective maintenance, Adaptive maintenance, Perfective maintenance, and preventive maintenance. Cost of Maintenance, Maintenance Activities.</p> <p><b>Maintenance Process and Models:</b>  Maintenance processes, Fix Model, Iterative Enhancement Model, Reuse Oriented Model, Boehm Model, and Taute’s Models.</p>

Course Number	Course Name	L – T – P Credits	Year of Introduction
303	DBMS – II	3L – 1T – 0P=4C	2018
<p><b>Course Objectives:</b> The main objective is to teach the concepts related to database its techniques and operations. SQL (Structured Query Language) is introduced in this subject. This helps creates strong foundation for application of data design.</p>			
<p><b>Expected Outcome:</b> At the end of this course, the student should be able to:</p> <ul style="list-style-type: none"> <li>• Creating tables, and queries using SQL</li> <li>• Applying SQL Operators and SQL Functions in the created tables in SQL;</li> <li>• Writing and solving complex queries based on joins, sub queries</li> <li>• Writing PL/SQL blocks, objects</li> </ul>			
<p><b>Text Books:</b> Ivan Bayross. SQL, PL/SQL The Programming Language of Oracle 3rd Revised Edition BPB Publications</p>			
<p><b>Suggested MOOC:</b> Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com <a href="http://www.coursera.com">www.coursera.com</a></p>			
<b>Syllabus</b>			
1.	<p><b>Introduction to Oracle and SQL:</b> Introduction to Oracle: History, Features, Versions of Oracle, Oracle File Management, Spool command <b>SQL:</b> Defining a database in SQL, Components of SQL: DDL, DML, DCL, DQL, SQL query Rules, Data types, Keywords, Delimiters, Literals. DDL Commands – Defining a database in SQL, Creating table, changing table definition, removing table. DML Commands- Inserting, updating, deleting data. DQL Commands: Select Statement with all options. Renaming table, Describe Command, Distinct Clause, Sorting Data in a Table. Data Constraints: Primary key, Foreign Key, NOT NULL, UNIQUE, CHECK constraint.</p>		
2.	<p><b>Operators:</b> Arithmetic, Logical, Relational, Range Searching, Pattern Matching, IN &amp; NOT IN Predicate, all, % any, exists, not exists clauses, Set Operations: Union, Union All, Minus, Intersect.</p>		
3.	<p><b>Joins and Oracle Functions:</b> Join Concept. Simple join, equi join, non equi join, Self join, Outer join, Sub queries, Aggregate Functions, Numeric Functions, String Functions, Conversion</p>		

	functions, Date conversion functions, and Date functions.
<b>4.</b>	<p><b>Database Objects:</b></p> <p><b>Index:</b> Creating index, simple index, composite index, unique index, dropping indexes, multiple indexes on table</p> <p><b>Sequence:</b> Creating sequence, altering sequence, dropping sequence.</p> <p><b>Views:</b> Concept, creation, usage</p> <p><b>Objects:</b> declaring and initializing objects in SQL, Manipulating object in PL/SQL</p>
<b>5.</b>	<p><b>Introduction to PL/SQL programming:</b></p> <p>Introduction, Advantages, PL/SQL Block, PL/SQL Execution Environment, PL/SQL Character set, Literals, Data types, Variables, Constants, Displaying User Message on screen, Conditional Control in PL/SQL, Iterative Control Structure: While Loop, For Loop, Goto Statement</p>
<b>6.</b>	<p><b>Advanced Programming Techniques of PL/SQL:</b></p> <p><b>Cursors:</b></p> <p>Introduction, Types of Cursors: Implicit Cursor, Explicit Cursors, Parameterized cursors, Programs on cursors</p> <p><b>Triggers:</b></p> <p>Introduction, Use of triggers, Types of Triggers, Creating triggers, Examples on Triggers</p> <p><b>Stored Procedures / Functions:</b></p> <p>Introduction, How oracle executes procedures/ functions, Advantages, How to create Procedures &amp; Functions, Examples</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
304	Statistics	3L-1T-0P=4C	2018
<b>Course Objective:</b>			
The main objective is to introduce basic concepts of statistics to the students and make them competent in collecting and analyzing the data by using statistical techniques			
<b>Expected Outcome :</b> At the end of this course, student is expected to			
<ul style="list-style-type: none"> <li>• Tabulate the raw data by using frequency distribution and represent the data graphically.</li> <li>• Analyse the data by using measures of central tendency and dispersion</li> <li>• Estimate the value of dependent variable</li> <li>• Generate the relationship between two variables in the form of degree or equation</li> </ul>			
<b>Prerequisite:</b>			
Students should have basic knowledge of use of calculator and research attitude			
<b>References:</b>			
1) Fundamentals of Statistics , S.C. Gupta , Himalaya Publishing House (5th Edition)			
2) Business Statistics , S.P. Gupta, M.P. Gupta –Sultan Chand & Sons, New Delhi (16 <sup>th</sup> Edition)			
<b>Suggested MOOC:</b>			
Please refer these websites for MOOCS:			
NPTEL / Swayam			
www.edx.com			
<a href="http://www.coursera.com">www.coursera.com</a>			
<b>Course Plan</b>			
Unit	Contents		
<b>1</b>	<b>Introduction to Statistics:</b> Definition of Statistics, Importance of Statistics, Scope of statistics : Economics, Computer Science, Business and Management, limitations of Statistics .		
<b>2</b>	<b>Data Collection and representation:</b> Primary and Secondary data, Sources of Data collection, Tabular Representation of data: Ungrouped and grouped frequency distribution, Graphical representation of data: Simple bar, subdivided bar, percentage bar diagram, pie diagram, histogram, frequency polygon, ogive curves.		
<b>3</b>	<b>Measures of central tendency:</b> a) <b>Mean:</b> Definition, problems on mean for listed data items, discrete distribution and continuous distribution, merits and demerits b) <b>Median:</b> Definition, problems on median for listed data items, discrete distribution and continuous distribution, merits and demerits c) <b>Mode:</b> Definition, problems on mode for listed data items, discrete distribution and continuous distribution, merits and demerits.		
<b>4</b>	<b>Measures of Dispersion:</b> <b>a)Range:</b> Definition, problems on range for listed data items, discrete distribution and continuous distribution, merits and demerits of range <b>b)Mean Deviation:</b> Definition, problems on mean deviation about mean for listed data items, discrete distribution and continuous distribution, merits and demerits		

	<p><b>c) Standard Deviation:</b> Definition, problems on standard deviation for listed data items, discrete distribution and continuous distribution, merits and demerits.</p> <p><b>d) Deciles, percentiles, quartiles</b></p>
<b>5</b>	<p><b>Regression and Correlation:</b></p> <p>a) <b>Regression:</b> Definition, regression equations, regression coefficients, problems on finding regression equations and estimations</p> <p>b) <b>Correlation:</b> Definition, Karl Pearson's correlation coefficient, Spearman's Rank correlation with correction factor</p>
<b>6</b>	<p><b>Time series analysis:</b></p> <p>Components of Time series Analysis , Fitting a straight line <math>y=ax+b</math>, fitting a curve <math>y=ax^2+bx+c</math>, 3 yearly and 5 yearly moving averages</p>

Course Number	Course Name	L-T-P-Credits	Year of Introduction
305	Multimedia Technology	3L-1T-0P=4C	2018
<b>Course Objective:</b>			
The main objective of this course is to know the concept of multimedia by students. To know different software tools used in multimedia technology. To know multimedia computing.			
<b>Expected Outcome:</b> After learning this course, student will be able			
<ul style="list-style-type: none"> <li>▪ To understand about various interactive multimedia devices, the basic concept about images and image formats.</li> <li>▪ To understand different software tools used in multimedia.</li> </ul>			
<b>Reference Books:</b>			
<ul style="list-style-type: none"> <li>• Principles of Multimedia – Ranjan Parekh, Publisher: Tata McGraw Hills</li> <li>• Multimedia: Making It Work (8th Edition) – by Tay Vaughan, Publisher: Tata McGraw Hills.</li> <li>• Multimedia Communications: Applications, Networks, Protocols and Standards - Fred Halsall, Publisher: Pearson Education.</li> </ul>			
<b>Suggested MOOC:</b>			
<ol style="list-style-type: none"> <li>1) <a href="http://www.openlearning.com">www.openlearning.com</a></li> <li>2) <a href="http://www.mooc-list.com">www.mooc-list.com</a></li> <li>3) <a href="http://www.coursera.org">www.coursera.org</a></li> </ol>			
<b>Course Plan</b>			
Unit	Contents		
1	What is multimedia? History of Multimedia, Steps for Creating multimedia presentation, Delivering multimedia, Where to Use multimedia? (Business, Schools, Home, and Public Places), Multimedia authoring tools, types of multimedia authoring tools, features of multimedia authoring tools.		
2	Storage technology, Magnetic media (Hard disk, RAID), Optical Media (CD Storage, CD standards), DVD (Size and capacity of DVD, DVD video, DVD audio).		
3	Using text in multimedia, text types, designing with text, Hypertext and Hypermedia, Characteristics of Hypertext and Hypermedia. Using image in multimedia, image color models, Dithering, Image file formats, Macintosh formats, Windows formats, Cross-platform formats.		
4	What is sound? Characteristics of Sound, Digital Audio, MIDI audio, MIDI Vs Digital audio, Audio file formats, Copyright issues. Principles of animation, Animation techniques, Animation file formats, Making animation (A Rolling Ball, A Bouncing Ball), Creating animated scene.		
5	Working of video, Video signal formats (Component Video, Composite Video and S-Video), Digital Video, Digital Video Standards (EDTV, CCIR Recommendations), HD Video and HDTV.		

6	Multimedia communications, Multimedia information representation, Multimedia networks, Multimedia applications, Media types, Communication modes, network types, Multipoint conferencing, Network QOS.
---	--

Course Number	Course Name	L – T – P Credits	Year of Introduction
306	Lab on Oracle and Multimedia	0L-0T-4P=2C	2018

**Course Objectives:**

The main objective is to teach the concepts related to SQL (Structured Query Language) and multimedia. The different SQL commands to be introduced. It helps to the students in writing SQL queries and its implementations. It basically helps to design and develop database structure. This is foundational course for building up database and processing through different queries.

**Expected Outcome:**

At the end of this course, the student should be able to:

- Creating tables, and queries using SQL
- Applying SQL Operators and SQL Functions in the created tables in SQL;
- Writing and solving complex queries based on joins, sub queries
- Writing PL/SQL blocks, objects
- Creating multimedia file
- Understanding the use of multimedia in web sites

**Text Books:**

Ivan Bayross. SQL, PL/SQL The Programming Language of Oracle 3rd Revised Edition BPB Publications

**Suggested MOOC:**

In house on [www.bharatividyaapeeth.edu](http://www.bharatividyaapeeth.edu)

**Part A: Lab on Oracle**

Q. No.	Question																																								
1	<p>Create following tables in your user with specified constraints.</p> <p><u>Client Master</u></p> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Data Type</th> <th>Size</th> <th>Constraints</th> </tr> </thead> <tbody> <tr> <td>ClientNo</td> <td>VARCHAR2</td> <td>6</td> <td>PRIMARY KEY, First Letter must start with 'C'</td> </tr> <tr> <td>Name</td> <td>VARCHAR2</td> <td>20</td> <td>NOT NULL</td> </tr> <tr> <td>Address</td> <td>VARCHAR2</td> <td>30</td> <td></td> </tr> <tr> <td>City</td> <td>VARCHAR2</td> <td>15</td> <td></td> </tr> <tr> <td>State</td> <td>VARCHAR2</td> <td>15</td> <td></td> </tr> <tr> <td>PinCode</td> <td>NUMBER</td> <td>6</td> <td></td> </tr> <tr> <td>Bal_Due</td> <td>NUMBER</td> <td>10,2</td> <td></td> </tr> </tbody> </table> <p><u>Product Master</u></p> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Data Type</th> <th>Size</th> <th>Constraints</th> </tr> </thead> <tbody> <tr> <td>ProductNo</td> <td>VARCHAR2</td> <td>6</td> <td>PRIMARY KEY, First Letter must start with 'P'</td> </tr> </tbody> </table>	Column Name	Data Type	Size	Constraints	ClientNo	VARCHAR2	6	PRIMARY KEY, First Letter must start with 'C'	Name	VARCHAR2	20	NOT NULL	Address	VARCHAR2	30		City	VARCHAR2	15		State	VARCHAR2	15		PinCode	NUMBER	6		Bal_Due	NUMBER	10,2		Column Name	Data Type	Size	Constraints	ProductNo	VARCHAR2	6	PRIMARY KEY, First Letter must start with 'P'

6	<p><b>Describe all tables.</b></p> <p><b>Retrieve all records.</b></p>																																			
7	<p>Based on above created tables Write down following queries.  <u>Selection, Renaming, Logical Operators and Pattern Matching</u></p> <ol style="list-style-type: none"> <li>Select ProductNo, Description and compute <math>Sell\_Price * 0.05</math> and <math>Sell\_Price * 1.05</math> for each row retrieved. Rename the columns Increase and New Price respectively.</li> <li>Select client information like client no, name, address, city for all clients in 'BOMBAY' or 'DELHI'.</li> <li>Select ProductNo, Description, and Profit Percent where Profit Percent is between 10 and 30 both inclusive.</li> <li>Select supplier name where the second letter of name is 'r' or 'h'.</li> <li>Select supplier name, city where name is 3-character long and the first two characters are 'ja'.</li> </ol>																																			
8	<p>Based on above created tables Write down following queries.  <u>Grouping</u></p> <ol style="list-style-type: none"> <li>Select Product No with description and total qty_ordered for each product.</li> <li>Select Product No and description for which total qty_ordered of the products 'P00001', 'P03453'.</li> </ol>																																			
9	<p>Based on above created tables Write down following queries.  <u>Manipulating Date</u></p> <p>Display the information like SalesOrderNo, ClientNo, SalesOrderDate for all the orders placed by the client in the ascending order of date. The SalesOrderDate should be displayed in 'DD/MM/YY' format.</p>																																			
10	<p>Based on above created tables Write down following queries.  <u>Joins</u></p> <ol style="list-style-type: none"> <li>Display the information like SalesOrderNo, ClientName, SalesOrderDate for all the orders placed by the client in the ascending order of date. The SalesOrderDate should be displayed in 'DD/MM/YY' format.</li> <li>Select ProductNo, Description and total qty_ordered for each product.</li> </ol>																																			
11.	<p>Based on above created tables Write down following queries.</p>																																			

	Print the information of the client_Master, product_master, sales_order table in the following format fro all records: {Description} worth Rs. {total sales for the product} was ordered in the month of {s_order_date}																												
12.	Based on above created tables Write down following queries. Find the list of clients who stay in city 'Bombay' or city 'Madras' or city 'Delhi'.																												
13.	Based on above created tables Write down following queries. <u>Using UNION, INTERSECT and MINUS Clause</u> a) Select all clients and the salesman in the city of 'Bombay'. b) Select salesman name in 'Bombay' who has at least one client located at 'Bombay'. c) Select all the productno of non-moving items in the product_master table. d) Select the productno, description, qty_on_hand, cost_price of non-moving items in the product_master table.																												
14.	Based on above created tables Write down following queries. a) Retrieve the list of names and the cities of all the clients. b) List the various products available from the product_master table. c) Find the names of the clients having 'a' as the second letter in their names. d) Find the list of clients who stay in city 'Bombay' or city 'Madras' or city 'Delhi'. e) Print the list of clients whose bal_due greater than values 10000. f) Display the Order Information for Clients 'C00002' and 'C00001'. g) Find the products whose selling price is more than 1500 and also find the new selling price as original selling price * 15.  h) List the products in sorted order of their description. i) Calculate the average price of all the products. j) Determine the maximum and minimum products prices. Rename the titles as 'Max-Price' and 'Min-Price' respectively. k) Count the number of products having price greater than or equal to 1500. l) Find all the products whose Qty_On_Hand is less than Re_Order_Level. m) Change the Sales_Order_Date of Client_No 'C00001' to 24/07/96. n) Change the cost price of '1.22 Floppy Drive' to Rs. 950.00. o) Delete all records having delivery date before 10 <sup>th</sup> July' 96																												
15.	<b>Exercise following functions using DUAL Table.</b> <ul style="list-style-type: none"> <li>• <u>Number Functions</u> <table style="width: 100%; border: none;"> <tr> <td>1. ABS ()</td> <td>2. 16.	<p><b>Granting and Revoking Privileges to/from user</b></p> <ol style="list-style-type: none"> <li>a) Grant all privileges on the table product_master to the user Pradeep.</li> <li>b) Grant SELECT and UPDATE privilege on table client_master to Neeta.</li> <li>c) Grant all privileges on the table client_master to the user Ivan with grant option.</li> <li>d) Select all records from product_master table belonging to Sunita.</li> <li>e) Revoke DELETE privilege on supplier_master from Florian.</li> <li>f) Revoke the remaining privileges on supplier_master that were granted to Florian.</li> </ol>						
17.	<p><b>Writing PL/SQL Block</b></p> <ol style="list-style-type: none"> <li>a) Write a PL/SQL Block to generate any n odd and even numbers.</li> <li>b) List the contents of product_master.</li> <li>c) Write a PL/SQL Block that inverse the string or number. [if given number is 8973 then its inverse is 3798]. If the price of the product 'P00001' is &lt; 4000 then change the price to 4000. The price change is recorded in the old_price table along with product_no and the date on which price was changed last.</li> <li>d) Write a PL/SQL block that processes an order for "540 HDD". [Check the availability of the product, if yes update its value.]</li> </ol>						
18.	<p><b>Writing CURSORS</b></p> <ol style="list-style-type: none"> <li>1. Write a PL/SQL block that updates the acctmast table and sets the balance depending upon the account is debited or credited. The updation should be done only for those values that are not processed i.e. the processed flag is 'N' in the accttrans table. acctmast (acctno*, name, balance) accttrans (acctno, trndate, debt_crdt, amount, processed)</li> <li>2. The HRD manager has decided to raise the salary of employees by 0.15. Write a PL/SQL block to accept the employee number and update the salary of that employee. Display appropriate message based on the existence of the record in the employee table.</li> <li>3. The HRD manager has decided to raise the salary of employees working as "Programmers" by 0.25. Write a PL/SQL block to accept the employee number and update the salary of that employee. Display appropriate message based on the existence of the record in the employee table.</li> <li>4. Create following 2 tables item-mast (item-id*, description, bal-stock) item-trans (item-id, description, operation, qty, status) -&gt; the operations are for UPDATE – U, for INSERT –I, for DELETE –D Based on the value in the operation column of table item-trans the records for table item-mast is inserted, updated or deleted. On the basis of success/failure of insert, update and delete operation the status column in the table item-trans is updated with appropriate text indicating success or reason for failure.</li> </ol>						

	<p>Following are the 3-cases which are to be taken care of:</p> <ul style="list-style-type: none"> <li>• if operation = 'I' then the item-id against along with description and qty is inserted into the required columns of the table item-mast. If the insert is successful then the status field of item-trans table is updated to 'SUCCESSFUL' else 'ITEM ALREADY EXIST'.</li> <li>• if operation = 'D' then row from item-mast is deleted whose item-id is equal to the item-id in the table item-trans with the operation column having the value 'D'. If delete is successful then the status column of item-trans table is updated to 'SUCCESSFUL' else 'ITEM DOES NOT EXIST'.</li> <li>• if operation = 'U' then the qty against this operation column is added to bal-stock column of the table item-mast where item-id of table item-mast is same as that of item-trans. if update is successful then the status of item-trans table is updated to 'SUCCESSFUL' else 'ITEM DOES NOT EXIST'.</li> </ul> <p>Write a parameterized CURSOR that defines all the above cases.</p>
19.	<p><b>Writing TRIGGERS</b></p> <ol style="list-style-type: none"> <li>1. Create a transparent audit system for a table client-master. The system must keep track of the records that are being deleted or modified and when they have been deleted or modified.  client-master (client-no, name, city, state, pin, bal-due)  audit-client (client-no, name, bal, operation, o-date) <ul style="list-style-type: none"> <li>• operation: the operation performed on the client-master table</li> <li>• o-date: the date when the operation was performed.</li> </ul> </li> <li>2. Write a database triggers that checks that the qty-on-hand does not become negative.</li> </ol>
20	<p><b>Writing PROCEDURES</b></p> <p>Create following 2 tables  item-mast (item-id*, description, bal-stock)  item-trans (item-id, description, operation, qty, status)  -&gt; the operations are for UPDATE – U, for INSERT –I, for DELETE –D</p> <p>Base on the value in the operation column of table item-trans the records for table item-mast is inserted, updated or deleted. On the basis of success/failure of insert, update and delete operation the status column in the table item-trans is updated with appropriate text indicating success or reason for failure.</p> <p>Following are the 3-cases which are to be taken care of:</p> <ol style="list-style-type: none"> <li>i. if operation = 'I' then the item-id against along with description and qty is inserted into the required columns of the table item-mast. If the insert is successful then the status field of item-trans table is updated to 'SUCCESSFUL' else 'ITEM ALREADY EXIST'.</li> <li>ii. if operation = 'D' then row from item-mast is deleted whose item-id is equal to the item-id in the table item-trans with the operation column having the value 'D'. If delete is successful then the status column of item-trans table is updated to 'SUCCESSFUL' else 'ITEM DOES NOT EXIST'.</li> <li>iii. if operation = 'U' then the qty against this operation column is added to bal-stock column of the table item-mast where item-id of table item-mast is same as that of item-trans. if update is successful then the status of item-</li> </ol>

	<p>trans table is updated to ‘SUCCESSFUL’ else ‘ITEM DOES NOT EXIST’.</p> <p>Write a database procedure which will check for the existence of item-id in the table item-mast. The procedure must have one argument which receives a value for which a matching pattern for item-id in the table item-mast and another which will return value indicating whether a match has been found or not. The value returned by the procedure can be used to make a decision to perform further processing or not.</p>

### Part B: Lab on Multimedia

Q.No.	Question
1	<p>Create a new document in a word processing application. Next, type in a line of text and copy the line five times. Now change each line into a different font. Recopy the entire set of lines three times. Finally, change the size of the first set to 10-point text, the second set to 18-point text, and the third set to 36-point text.</p> <p>a) Which of the smallest lines of text is most readable? b) Which line of text stands out the most?</p>
2	<p>Download three different images from a web site. One should be photographic, one should be a graphic (solid colors or gradients), and one should be a mix. Convert the images to 256 colors. Use the tools available to use different dithering patterns and palettes. Print out the files before and after reducing to 256 colors. Write the file sizes on each one.</p>
3	<p>Visit different web sites. Describe the use of colors for each in subjective terms. Is each site vibrant? childish? muted? subtle? Why? What cultural or other factors determined the color selection? Print out a page from each site, and write a paragraph describing the colors and images used in each one.</p>
4	<p>Open an image in an image-editing program capable of identifying colors. Select three different pixels in the image. Sample the color and write down its value in RGB, HSB, CMYK, and web (hexadecimal) color.</p>
5	<p>Visit three web sites that use sound (you may need to find Flash-based web sites). Where, when, and how is sound used? Does the sound fit the mood of the site? Is there background sound? Can the sounds be turned on and off? Document your findings.</p>
6	<p>Locate three web sites that offer “royalty-free” or “buyout” music. Such sites almost always allow visitors to listen to low-quality samples. What formats are the samples provided in? Listen to some of the samples. Try to identify which are synthesized and which are actual instruments playing the music. What are the license arrangements for using the music? Document your findings, noting the various lengths and formats the music is provided in.</p>
7	<p>Use a search engine to search on the words “animation” and “definition.” Create a document that provides many different definitions of the term animation. Describe the differences among definitions. Which elements make the most difference among them—type of motion, process used for creation, method of playback, or something else? What do all (or, at least, most) of the definitions have in common?</p>
8	<p>Conceptualize a brief animated sequence. Include a number of moving elements that move into and out of the frame. Consider where the key frames should be. How do the elements move? Do they get bigger or smaller? Do they rotate? Do they “deform” (change shape)?</p>

	Create a storyboard with sketches showing at least ten of the key frames.
9	Locate three web sites that include video clips. What format are they served in? Examine the HTML source code to discover what method of video delivery is used. Make a note of your findings.
10	Prepare five graphic images using paint or drawing program. Be sure to include a variety of colors and contrasts. Add text to the images. Use small text, large text, text with serifs, bold text, and text in contrasting and similar colors. Add drop shadows. Add boxes and other shapes to the images, in various weights.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
307	Lab on Linux Operating System	0L-0T-4P=2C	2018
<b>Course Objective:</b> The student would be able <ul style="list-style-type: none"> <li>To obtain knowledge of how to manage files in Linux system.</li> <li>To understand Linux commands and write shell programming.</li> <li>To grasp the concepts of User Management in Linux.</li> <li>To control the system running Ubuntu operating system.</li> </ul>			
<b>Expected Outcome :</b> The course is to provide the knowledge of the Linux Operating System. This course intends to teach various features that will help the students to use and learn the working of Ubuntu /Red Hat operating system			
<b>Prerequisite:</b> Students should have basic knowledge of working on an operating system. <ul style="list-style-type: none"> <li>Linux for beginners : An introduction to the linux operating system and command line</li> <li>Linux: the complete reference, sixth edition paperback by Richard Petersen, McGraw Hill education</li> <li>Unix shell Programming: by yashwant Kanitkar</li> <li>UNIX Concepts and Applications - by Sumitabha Das</li> </ul>			
<b>Course Plan</b>			
Unit	Contents		
1	Introduction to Linux Operating system, various flavors of Linux O.S., Learning to use and Install Linux, Booting Any one flavor of Linux like ubuntu, red hat etc, Starting up ,Logging in, Exploring the desktop ,Working with virtual desktops, Getting Everything up and running ,Viewing your hardware , Getting online Using an Ethernet Card ,Joining wireless network ,Configuring Email and instant messaging, Adding a Printer , Configuring a local printer, Configuring a network printer, Setting up digital imaging devices, Transferring photos from digital camera, Configuring scanner, Configuring Bluetooth.		
2	<b>General Purpose Utilities:</b> banner (display a blown-up message), cal (The calendar), date-display the system date, who-Login detail tty-knowing your terminal uname-know your machine name passwd-change your password lock-lock your terminal echo-display message bc-the calculator. who am i,- display login name		
3	<b>Navigating the file system:-</b> pwd-checking your current directory, cd-changing directories, mkdir-Making directories		

	<p>rmdir-moving directories  ls-listing files  <b>Handling Ordinary files:</b>  cat-displaying and creating files,  touch-creating empty file  cp-copying a file  rm-deleting files  mv-renaming files  more-paging output  lp-printing a fiile  file-know the file type  wc-line, word and character counting  split-splitting file in to multiple files  cmp-comparing two files  comm.-finding common  chmod-changing file permission  files searches using find command,  locate command, mount and unmount command. Understanding vi modes, Using vi to edit the file, Creating a new text file using vi, Searching through files.</p>
4	<p><b>Filters:</b>  pr- paginating files  head-displaying the beginning of a file,  tail- displaying the end of file  cut- slitting a file vertically  paste- pasting file  sort- ordering file  uniq- locating repeated line  nl- line numbering  tr-translating characters.  regular expressions and grep to find text  ps-process status  kill-terminate process  Other process related commands</p>
5	<p>sh command, pattern matching- the wild cards, escaping-the backslash(\), quoting, redirection, pipes, tees</p>
6	<p>What is Shell, Different types of shells, Shell as command processor, shell variables, creating command substitution, various shell scripts using functions, conditionals, loops, customizing environment</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
308	Community Work III	2L-0T-0P=2C	2018
<p><b>Course Objective:</b>  This course aims to expose the students to the societal issues and help them participate in the community service through trips/events organized at institute, state level etc and also to Volunteer at events like fundraising activities, fairs, festivals, slums, nonprofit organization etc.</p> <ul style="list-style-type: none"> <li>To expose the students towards social reality and role of community development for social upliftment and well being</li> <li>To involve students in community work through active involvement and participation</li> </ul>			
<p><b>Expected Outcome :</b>  Students will be able to know the community needs and understand their role towards community development.</p>			
<p><b>Reference Books :</b></p> <ul style="list-style-type: none"> <li>An Introduction to Community Development, Rhonda Phillips, Robert Pittman – 2014</li> <li>Community Development in Asia and The Pacific, Manohar S. Pawar, 2009</li> </ul>			
<p><b>Online Resources:</b>  <a href="https://community-wealth.org/sites/clone.community-wealth.org/files/downloads/tool-enterprise-directory.pdf">https://community-wealth.org/sites/clone.community-wealth.org/files/downloads/tool-enterprise-directory.pdf</a>  <a href="https://www.ahaprocess.com/solutions/community/events-resources/free-resources/">https://www.ahaprocess.com/solutions/community/events-resources/free-resources/</a></p>			
<p><b>Community Hours:</b>  Participate in community service trips/events organized at institute, state level etc , Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc , Submit a report on a particular type of community involvement undertaken.</p>			
<p><b>MOOCs:</b>  <a href="https://alison.com/course/diploma-in-community-development">https://alison.com/course/diploma-in-community-development</a></p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Community work through Education:</b>  Teaching at Schools, Teaching at Orphanages, Teaching to poor children ,study the role of government in the education sector ,study the NGOs particularly working in education sector.</p>		
2	<p><b>Community Work for Slums:</b>  Learn the government facilities, NGOs which are working for the slums and try to connect any NGO.</p>		
3	<p><b>Community Work for Environment:</b>  Role of Govt. and NGOs which are working to save the environment, Initiatives like Clean your city drive, Cycle day, Awareness of Dry and wet waste classification, Tree Plantation Drive, Environment awareness activities etc.</p>		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
308	<b>Start-Up Management</b>	2L-0T-0P=2C	2018
<b>Course Objective:</b> The objectives of the course is <ul style="list-style-type: none"> <li>To Introduce to the students the idea of start ups and their role in the society and nation</li> <li>To impart knowledge about the organization and management of start ups</li> </ul>			
<b>Expected Outcome :</b> Students will be able to understand the role of start ups and case studies of well known start ups in India.			
<b>Reference Books :</b> <ul style="list-style-type: none"> <li>Khanka S. S. – Entrepreneurship Development, S. Chand.</li> <li>Burns, P. (2001). Entrepreneurship and small business. New Jersey:Palgrave.</li> <li>Mullins, J. (2004). New business road test. New Delhi: Prentice Hall.</li> </ul>

<b>MOOCs:</b> <a href="https://startupindia.upgrad.com/">https://startupindia.upgrad.com/</a> - Startup India Learning Programme Swayam			
<b>Course Plan</b>			
<b>Unit</b>	<b>Contents</b>		
1	Meaning of Start ups, Formation of a start up, idea generation for start ups, scaling up process.		
2	Managing a startup, Customer Development, Market Sizing, Lean Startups, Support by government for startups,		
3	Case Studies on well known startups.		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
308	Agro Tourism	2L-0T-0P=2C	2018
<b>Course Objective:</b> The objectives of the course are to familiarize students with principles and relationship between tourism and agricultural activities.			
<b>Expected Outcome :</b> Students will be able to obtain and diversify knowledge from tourism, rural tourism and their specific form agri-tourism.			
<b>Reference Books :</b> <ul style="list-style-type: none"> <li>• Talwar, Prakash. Travel and Tourism Management. Gyan Books Pvt., Ltd., Main Ansari Road, Darya Ganj, New Delhi- 110 002.</li> <li>• Bagri, S. C. Trends in Tourism Promotion 2003. International Books Distributors, 9/3, Rajpur Road, Dehradun-248 001 Uttarakhand (India).</li> </ul>			
<b>Online Resources:</b> <a href="http://www.agritourism.in">http://www.agritourism.in</a> <a href="http://www.ecoindia.com">http://www.ecoindia.com</a>			
<b>MOOCs:</b> <a href="https://www.mooc-list.com/tags/tourism">https://www.mooc-list.com/tags/tourism</a> <a href="https://www.coursera.org/">https://www.coursera.org/</a> <a href="https://swayam.gov.in/">https://swayam.gov.in/</a> <a href="https://alison.com/courses?query=agriculture+tourism">https://alison.com/courses?query=agriculture+tourism</a>			
Course Plan			
Unit	Contents		
1	Introduction, importance, scope, forms of agro-tourism, advantages and implementations, sustainability component, difficulties involved.		
2	Govt. policies and legislations in respect of tourism and agro-tourism and environment protection laws. Requirements for Agro-tourism Farm, forest, garden, fish tank/ponds, residential huts, etc. Introduction to Indian culture through agro tourism.		
3	Profiling the tourist for: age, sex, life cycle, education, employment, income, satisfaction and expectations, values, purpose of visit, accommodation, duration of stay, preferences and perceptions regarding area management, environmental concerns, involvement and responsibility, motivations, etc.		

# **SEMESTER IV**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
401	Computer Networks	3L-1T- 0P = 4C	2018
<p><b>Course Objectives:</b> The key objective is to acquire a foundational understanding of computer network and communication technologies. Networking concepts will be illustrated using TCP/IP networks. To enable the learner with Network Technologies and applications of Network.</p>			
<p><b>Learning Outcomes:</b> At the end of this course, student should be able to</p> <ul style="list-style-type: none"> <li>• Students will acquire a good knowledge of the computer network, its architecture and operation.</li> <li>• Student will be able to pursue his study in advanced networking courses (This knowledge will help them to create base for the Network Electives to be studied in the next semesters).</li> <li>• Students will be able to follow trends of computer networks. So, students will get exposed to advanced network technologies like MANET, WSN, and 4G.</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <ul style="list-style-type: none"> <li>• 1.A.S. Tanenbaum, <b>Computer Networks</b> (4<sup>th</sup> ed.), Prentice-Hall of India, Latest Edition</li> <li>• 2.W.Behrouz Forouzan and S.C. Fegan, <b>Data Communication and Networking</b>, McGraw Hill, Latest Edition</li> </ul>			
<p><b>Other Books:</b></p> <ul style="list-style-type: none"> <li>• Network Essential Notes GSW MCSE Study Notes</li> <li>• Internetworking Technology Handbook CISCO System</li> <li>• Introduction to Networking and Data Communications Eugene Blanchard</li> <li>• Computer Networks and Internets with Internet Applications Douglas E. Comer</li> </ul>			
<p><b>Suggested MOOC :</b></p>			
<p><b>Course Plan</b></p>			
Unit	Contents		
1	<p><b>Introduction to Computer Networks:</b> What is Computer Network? Network Goals and Motivations, Application of Networks, Network Topologies, Classification of Networks, <b>Network software:</b> Network Protocols, Protocol Hierarchies, Design issues for the Layers, Connection Oriented and Connectionless Services, Service Primitives, Relation of services to Protocols, <b>Network Models:</b> The OSI Reference Model, The TCP/IP Reference Model, Comparison of OSI and TCP/IP Reference Model, A critique of OSI Model, A critique of TCP/IP Model, <b>Examples of some networks:</b> Internet, X.25, ISDN, Frame relay, ATM, Ethernet, Wireless Lans- (wi-fi)</p>		
2	<p><b>Data Transmission and Physical Layer:</b> <b>Signals:</b> Analog and Digital Signals, Data Rate, Transmission Impairment, Signal Measurement: Throughput, Propagation Speed and Time, Wavelength, Frequency, Bandwidth, Spectrum <b>Transmission Media&amp; its Characteristics:</b> Guided and Unguided Media, Synchronous and Asynchronous Transmission, Multiplexing: FDM, WDM, TDM, Switching: Circuit, Message and Packet Switching, <b>Mobile Telephone Systems:</b> 1G, 2G, And 3G</p>		

3	<p><b>Network Layer: Network Layer Design Issues; Routing Algorithms:</b> Static/ Dynamic , Direct/ Indirect, Shortest Path Routing, Flooding, Distance Vector Routing , Link State Routing, Hierarchical Routing, Broadcast Routing, Multicast Routing, <b>Congestion Control Algorithms:</b> General Principal of Congestion Control, congestion prevention polices, Load shedding, Jitter Control, <b>IP Addressing:</b> IP- Protocol, IP-Address Classes (A, B, C, D, E), Broadcast address, Multicast address, Network Mask, Subnetting, Internet control Protocol-ICMP, IGMP, Mobile-IP, IPv6</p>
4	<p><b>Transport and Application Support Protocols,:</b> Transport service, Service Primitives, Internet, and Transport Protocols: TCP/UDP, Remote Procedure Calls, RTP, <b>Session Layer:</b> Token Concept <b>Presentation Layer:</b> Data Encryption and Data Security, Message Authentication, <b>Application Layer:</b> Domain Name Service, Telnet, FTP, SMTP, SNMP, MIME, POP, IMAP, WWW,HTTP</p>
5	<p><b>Advance Networks:</b> Concept of 4G Networks, Introduction of 802.16, 802.20, Bluetooth, Infrared, MANET, Sensor Networks. Technical Issues of Advanced Networks, <b>Mobile Ad-hoc Networks:</b> Introductory concepts, Destination-Sequenced Distance Vector protocol, Ad Hoc On-Demand Distance Vector protocol, <b>Wireless Sensor Networks:</b> Sensor networks overview: Introduction, applications, design issues, requirements.</p>
6	<p><b>Internet Basics:</b> Concept and Characteristics of Internet , Intranet, Extranet . Structure of Internet through Client Sever . Domain name , Website Development formats for Business Applications.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
402	Software Testing	3L-1T-0P=4C	2018
<p><b>Course Objective :</b>  The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization. It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry. The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive medias, Internet basics.</p>			
<p><b>Expected Outcome :</b>  At the end of this course, student should be able to:</p> <ul style="list-style-type: none"> <li>• Understand basic concepts and terminology of information technology.</li> <li>• Have a basic understanding of personal computers and their operations.</li> <li>• Be able to identify issues related to information security.</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <ul style="list-style-type: none"> <li>• Software Testing by Renu Rajani and Pradeep Oak</li> <li>• Software Engineering by Roger S. Pressman</li> <li>• Software Testing Principles And Practices by Srinivasan Desikan and Gopaldaswamy</li> <li>• Ramesh</li> </ul>			
<p><b>Suggested MOOC :</b>  Please refer these websites for MOOCS:  NPTEL / Swayam  www.edx.com  www.coursera.com</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction to Software Concepts:</b>  Introduction, Definition and Characteristics of software, Importance of Software, Software types, Software components, Members involved in software development, Overview of SDLC.</p>		
2	<p><b>Introduction to Testing:</b>  What is testing, Why, When and How Testing, Importance of Testing. Testing goals and characteristics, Testing during planning stage, Testing during design stage, Testing during coding stage.</p>		

3	<p><b>Software Testing Lifecycle &amp; Software Testing Process:</b>  Overview of STLC, Principles of Verification and Validation, Techniques of verification (review, inspections, walkthroughs),  V testing model  Software development V &amp; V  Software acquisition V &amp; V  Software supply V &amp; V  <b>Software Testing Process:</b>  Testing process: a) Plan b) Develop c) Execute d) Manage  Conventional Software Architectures.</p>
4	<p><b>Software Testing Strategies:</b>  Test strategies for conventional software</p> <ul style="list-style-type: none"> <li>a) Unit Testing</li> <li>b) Integration Testing <ul style="list-style-type: none"> <li>i) Top-Down Integration</li> <li>ii) Bottom-Up Integration</li> <li>iii) Regression Testing</li> <li>iv) Smoke Testing</li> <li>v) Integration test documents</li> </ul> </li> <li>c) Validation Testing <ul style="list-style-type: none"> <li>a. 6	<p><b>Risk Management:</b></p> <p>Introduction and Characteristics of Risks, Role of Testing in Risk Management, Types of Risks:</p> <ol style="list-style-type: none"> <li>a) Project Risks</li> <li>b) Technical Risks</li> <li>c) Business Risks</li> <li>d) Predictable Risks</li> <li>e) Unpredictable Risks</li> </ol>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
403	Java Programming	3L-1T-0P=4C	2018
<b>Course Objective :</b> The Objectives of the course is to introduce Object Oriented Programming using Java, Make student to use Java for implementing OO Concepts and also make them familiarize to use JDK and Java API for concurrent programming, input/output, Java data structures and GUI (AWT) programming using java.			
<b>Expected Outcome :</b> At the end of this course, student should be able to understand <ul style="list-style-type: none"> <li>• Design interfaces, abstract and concrete classes</li> <li>• Use concurrent programming, java Collections and utility classes</li> <li>• Able to achieve object persistence using object serialization.</li> <li>• Design applications using event driven programming.</li> <li>• Get the main features of Java Programming for Business Applications</li> </ul>			
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>• Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007</li> <li>• Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008</li> <li>• Bruce Eckel , Thinking In Java – Printice Hall, Fourth Edition</li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOCS: NPTEL / Swayam www. edx.com <a href="http://www.coursera.com">www.coursera.com</a>			
Course Plan			
Unit	Contents		
1	<b>Introduction to Java:</b> Features of Java, Java compiler, JVM, Garbage collection, Data types, concept of class and object, java naming conventions wrapper classes, control structures in java, arrays in java, array of objects.		
2	<b>Class and Object Concepts:</b> Concepts of OOP, Defining a class, creating objects from class, adding attributes and methods to the class, using constructors, Passing values to the functions – pass by value, pass by reference, Function overloading. Modifiers – public, private, protected, default, static, final, Concept of package, Introduction to Exception Handling.		
3	<b>Inheritance and Polymorphism:</b> Concept and importance of inheritance, is-a relationship, types of inheritance, Polymorphism – function overriding, dynamic method dispatch. Using abstract and final keywords with class declaration, Concept of interface and class.		

4	<p><b>Concurrent Programming :</b>  Concept of threads, lifecycle of threads, creating threads, Thread class, Runnable interface, Introduction to Tread Synchronization .</p>
5	<p><b>Java Input/Output:</b>  Concept of streams, types of streams – byte streams, character streams.  The Console: System.out, System.in, and System.err, InputStream class, OutputStream class, File class, FileInputStreams, File OutputStream, Reader class, Writer class, FileReader, FileWriter. Buffered streams – BufferedInputStream, BufferedOutputStream, BufferedReader, BufferedWriter. Object Streams</p>
6	<p><b>Java Applets and GUI:</b>  Applet concept, creating basic applet, applet lifecycle, controlling applet content, introduction to AWT controls – Button, Lable, TextField, TextArea, List, Checkbox and RadioButtons, Scrollbar, Menu etc. ( Only AWT Component)</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
404	Operations Research	3L-1T-0P=4C	2018
<p><b>Course Objective :</b> Main objective of this paper is to learn historical development of O.R., need and characteristics of OR in business and management. Formulate a real-world problem as a mathematical programming model. To aware the students about the basic terms in operations research. Students will be able to formulate and solve optimization problems related to job/ work assignments.</p>			
<p><b>Expected Outcome :</b> At the end of this course, student should be able to understand:</p> <ul style="list-style-type: none"> <li>• Students will be able to describe characteristics and scope of OR.</li> <li>• Students will be able to define and formulate mathematical problems.</li> <li>• Students will be able to select optimal problems solving techniques for a given problem using LP.</li> <li>• Students will be able to formulate and solve transportation, travelling sales problems.</li> <li>• Students will be able to demonstrate and solve simple models of Game theory.</li> <li>• Students will be able to solve different problems related to Network.</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <ul style="list-style-type: none"> <li>○ Operations Research: An Introduction by Hamdy Taha, Pearson</li> <li>○ Operations Research by A M Natarajan, P Balasubramani, A Tamilarasi, Pearson Education Inc</li> <li>○ Operations Research by P Mariappan, Pearson</li> <li>○ Operations Research by H N wagner, Prentice hall.</li> <li>○ Optimization in Operations Research by Ronald Rardin, Pearson Education Inc.</li> <li>○ Operations Research by R. Paneerselvam, Prentice Hall of India Pvt. Ltd.</li> <li>○ Quantitative Techniques in Management by N D Vohra, Tata McGraw-Hill</li> </ul>			
Suggested MOOC : List of Open Source Software/learning website: <a href="http://www.nptel.ac.in/">www.nptel.ac.in/</a>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Basics of Operation Research :</b> Origin of Operation Research, Historical Standpoint, Methodology, Different Phases, Characteristics, Scope and Application of Operations Research, limitations of OR.</p>		
2	<p><b>Linear Programming :</b> Introduction, Requirement of LP, Basic Assumptions, Formulation of LP, General Statement of LP, Solution techniques of LP: Graphical Methods, Analytical Methods: Simplex Method , Concept of slack, surplus &amp; artificial variables. Manual solutions of L.P.P. upto 3 iterations. Minimization &amp; Maximization Problems.</p> <p>Special Cases – i)Alternative solution (ii) Unbounded solutions (iii) Infeasible solutions to be shown graphically &amp; also by simplex method.</p>		

3	<p><b>Transportation Model :</b>  North-West Corner rule, Least-cost method, Vogel’s approximation method, Final Transportation cost using MODI method,  <b>Special cases :</b> i)Degeneracy in transportation problem, ii)unbalanced supply and demand, iii)profit maximization problem iv) prohibited transportation routes</p>
4	<p><b>Assignment Model:</b>  Hungarian method for solution, non square matrix, <b>Special Cases :</b>i) unbalanced problem ii)restriction on assignments iii)Maximization problem iv)alternate solution</p>
5	<p><b>Network Analysis :</b>  Terms used in network analysis, Network or arrow diagram, Fulkerson’s rule, Programme Evaluation and Review Technique (PERT), Critical path method (CPM), Time estimates for activities. Probability of completion of project. Determination of floats (total, free, independent &amp; interfering) , Crashing of Simple Networks.</p>
6	<p><b>Decision Theory And Decision Tree:</b>  Introduction, Decision under certainty, Decision under risk, Payoff table, Regret table, Decision making under uncertainty, Maximin &amp; Maximax criteria,Minimax Regret criterion, Laplace criterion, Hurwicz criterion, Expected Monetary Value criterion, Expected Value of Perfect Information (E.V.P. I), Expected Opportunity Loss (E.O.L.), Decision Tree, Simple examples</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
405	Entrepreneurship Development	3L-1T-0P=4C	2018
<b>Course Objectives :</b> To develop an understanding of entrepreneurship concepts To provide sufficient knowledge to students aspiring to be entrepreneurs To provide ways and means to start an enterprise			
<b>Expected Outcome :</b> At the end of this course, student should be able to understand <ul style="list-style-type: none"> <li>• Evolution, definition, characteristics, function and types of entrepreneurs.</li> <li>• Role of Entrepreneurship in Economic Development.</li> <li>• Business Opportunity Identification</li> <li>• Importance of Business plan</li> <li>• Support Agencies</li> <li>• Concept of Intellectual property rights</li> </ul>			
<b>Reference Books :</b> <ul style="list-style-type: none"> <li>• Dr. Dilip Sarwate, Entrepreneurship Development and Project Management, Everest Publishing house</li> <li>• Vasant Desai, Dynamics of Entrepreneurship development and Management, Himalaya Publishing House</li> <li>• David H Holt, Entrepreneurship and New Venture Creation, Prentice Hall</li> <li>• Paul Ajit Kumar, Paul, Entrepreneurship Development, Himalaya Publishing House Mumbai</li> <li>• Raj Shankar – “Entrepreneurship: Theory and Practice” – Vijay Nicole Imprints Pvt. Ltd.</li> <li>• S.S. Khanka – Entrepreneurial Development – S. Chand And Company Ltd., New Delhi – 1999</li> </ul> <b>Websites</b> <ul style="list-style-type: none"> <li>• <a href="http://www.startupindia.gov.in">www.startupindia.gov.in</a></li> <li>• <a href="http://www.india.gov.in">www.india.gov.in</a></li> <li>• <a href="http://www.makeinindia.com/home">http://www.makeinindia.com/home</a></li> </ul>			
<b>Suggested MOOC :</b> <b>Note:</b> <ol style="list-style-type: none"> <li>1. Case studies to be discussed on various aspects mentioned in the syllabus.</li> <li>2. Visiting/Interaction with successful local entrepreneurs should be done.</li> </ol>			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to Entrepreneurship :</b> Evolution, Concept and definition of an entrepreneur, Characteristics, function and types of entrepreneurs, Qualities of an Entrepreneur, Growth of Entrepreneurship in India, role of Entrepreneurship in Economic Development, Women Entrepreneurship in India		
2	<b>Business Opportunity Identification :</b> Search for Business Ideas, Market Assessment, Sources of Information, Environmental Analysis, Entrepreneurial opportunities in India, Business Opportunity identification and selection		

3	<p><b>Business Plan Preparation :</b>  Meaning of Business plan, Significance and Contents of a Business Plan, developing Business Plan, Presenting Business Plan, Elevator Pitch</p>
4	<p><b>Project Finance :</b>  Types of Finance, Sources of Finance, Venture Capital, Start-up and Make-in-India program, MUDRA</p>
5	<p><b>Support Agencies :</b>  Support to Entrepreneurs by DIC, SIDBI, SIDCO, SSIB, NSIC, SISI, Other Institutions etc. Entrepreneurship promotion by Government through various schemes.</p>
6	<p><b>Entrepreneurial Motivation and Development :</b>  Factors motivating entrepreneurs, Basic course contents of EDP's Evaluation of EDP's, Organizations involved in EDP's. Basics of Intellectual property rights</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
406	BCA-II-SEM-IV	2	2018
Course Objective :			
To develop logical abilities of students using Java Programming language			
Expected Outcome: Provide foundation for programming and Enable the students to analyze and efficiently solve the problems using Java Programming.			
References (Books, Websites etc) :			
<ul style="list-style-type: none"> <li>• Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007</li> <li>• Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008</li> <li>• Bruce Eckel , Thinking In Java – Printice Hall, Fourth Edition</li> </ul>			
Sr. No.	Contents		
1	Program to demonstrate the following: <ol style="list-style-type: none"> <li>1. Branching Statements</li> <li>2. Looping Statements</li> <li>3. Classes and objects</li> <li>4. Wrapper classes</li> <li>5. Arrays</li> <li>6. Array of objects.</li> </ol>		
2	Design Programs on following concepts: <ol style="list-style-type: none"> <li>1. Constructor</li> <li>2. Constructor Overloading</li> <li>3. Pass by value</li> <li>4. Method Overloading</li> <li>5. Package</li> <li>6. Exception Handling</li> </ol>		
3	Working with Inheritance and Interface: <ol style="list-style-type: none"> <li>1. Programs to demonstrate working of Inheritance, types of inheritance and Polymorphism – function overriding.</li> <li>2. Making use of abstract and final keywords with class declaration.</li> <li>3. Programs to demonstrate working of interface.</li> </ol>		
4	Design Programs on following concepts: <ol style="list-style-type: none"> <li>1. Thread class, Runnable interface and Tread Synchronization.</li> </ol>		
5	Program to demonstrate Java Input/Output : <ol style="list-style-type: none"> <li>1. Concept of streams, byte streams, character streams.</li> <li>2. The Console: System.out, System.in, and System.err</li> <li>3. Making use of InputStream class, OutputStream class, File class, FileInputStreams, File OutputStream, Reader class, Writer class, FileReader, FileWriter. Buffered streams – BufferedInputStream, BufferedOutputStream, BufferedReader, BufferedWriter. Object Streams</li> </ol>		
6	Working with Java Applets and GUI: <ol style="list-style-type: none"> <li>1. Design program to demonstrate Applet concept.</li> </ol>		

	2. Making use of AWT controls through programs– Button, Lable, TextField, TextArea, List, Checkbox and RadioButtons, Scrollbar, Menu etc.

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
407	Minor Project I	2 Credits	2018-19

**Course Objective :**

Student has to complete a Minor project work under the guidance of the faculty member in the institute. Students has to develop any software using C in a group of 2 to 3. Each team has to give 4 minimum PPT presentation to the Project Guide during the semester. Final project viva will be conducted as per University Time Table.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
408	Community Work-IV	2L-0T-0P=2C	2018
<p><b>Course Objective:</b>  This course aims to expose the students to social issues and help them Participate in community service through trips/events organized at institute, state level etc and also to Volunteer at events like fundraising activities, fairs, festivals, slums, nonprofit organization etc.</p> <ul style="list-style-type: none"> <li>To expose the students towards social reality and role of community development for social upliftment and well being</li> <li>To involve students in community work through active involvement and participation</li> </ul>			
<p><b>Expected Outcome :</b>  Students will be able to know the community needs and understand their role to contribute meaningfully towards community development.</p>			
<p><b>Reference Books :</b></p> <ol style="list-style-type: none"> <li>An Introduction to Community Development, Rhonda Phillips, Robert Pittman – 2014</li> <li>Community Development in Asia and The Pacific, Manohar S. Pawar, 2009,</li> </ol>			
<p><b>Online Resources:</b>  <a href="https://community-wealth.org/sites/clone.community-wealth.org/files/downloads/tool-enterprise-directory.pdf">https://community-wealth.org/sites/clone.community-wealth.org/files/downloads/tool-enterprise-directory.pdf</a>  <a href="https://www.ahaprocess.com/solutions/community/events-resources/free-resources/">https://www.ahaprocess.com/solutions/community/events-resources/free-resources/</a></p>			
<p><b>MOOCs:</b>  <a href="https://alison.com/course/diploma-in-community-development">https://alison.com/course/diploma-in-community-development</a></p>			
<p><b>COMMUNITY HOURS:</b>  Participate in community service trips/events organized at institute, state level etc , Volunteer at events like fundraising activities, fairs, festivals, slums, non profit organization etc , Submit a report on a particular type of community involvement undertaken</p>			
<b>Course Plan</b>			
Unit	Contents		
1	Community work in Food and Nutrition related social concerns ,role of government and NGOs in India		
2	Community work for old age people and its related social concerns, role of government and NGOs in India		
3	Community work for woman empowerment ,its related social concerns ,role of Govt. and NGOs in in India		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
408	Basics of Taxation	2L-0T-0P=2C	2018
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>To provide a basic knowledge about direct tax system in India</li> <li>To provide a basic knowledge about indirect tax system in India.</li> <li>To upgrade with the latest amendments in taxation policy of India.</li> </ul>			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>Students will be able to have a basic knowledge about direct tax system in India</li> <li>Students will be able to have a basic knowledge about indirect tax system in India.</li> <li>Students will be upgraded and upskilled with the latest amendments in taxation policy of India.</li> </ul>			
<b>Reference Books :</b> <ol style="list-style-type: none"> <li>Shukla and Grewal: Advanced Accounts. (S. Chand &amp; Co. Ltd. New Delhi)</li> <li>Jain and Narang: Advanced Accounts.(Kalyani Publishers, Ludhiana)</li> <li>Sr. K. Paul: Accountancy, Volume-I and II.(New Central Book Agency, Kolkata)</li> <li>R. K. Lele and Jawaharlal: Accounting Theory (Himalaya Publishers)</li> <li>Dr. L. S. Porwal: Accounting Theory (Tata McGraw Hill).</li> <li>Robert Anthony, D.F.Hawkins&amp; K.A. Merchant: Accounting Text &amp; Cases (Tata McGrawHill)</li> </ol>

<b>MOOCs:</b> Alison Swayam			
Course Plan			
Unit	Contents		
1	<b>Introduction :</b> Basic concepts: Income, agricultural income, person, assessee, assessment year, previous year, gross total income, total income, maximum marginal rate of tax; Permanent Account Number (PAN) Residential status; Scope of total income on the basis of residential status Exempted income under section 10		
2	<b>Direct and Indirect Tax:</b> Income from Salaries; Income from house property, Profits and gains of business or profession; Capital gains; Income from other sources, Deductions from gross total income; Rebates and reliefs Computation of total income of individuals and firms; Tax liability of an individual Indirect taxes.		
3	<b>Overview of GST:</b> Overview Of GST: Introduction to GST-Key Concepts – Taxes under GST – Central GST – State GST – Union Territory GST – Integrated GST - Cess		
Course Number	Course Name	L-T-P- Credits	Year of Introduction

408	YOGA - I	2L-0T-0P=2C	2018
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>To introduce the practice of yoga and its benefits to students</li> <li>To impart practices of basic yogic kriyas</li> </ul>			
<b>Expected Outcome :</b> Students will be able to understand the advantages of Yoga and practice basic yog kriyas			
<b>Reference Books :</b> <ul style="list-style-type: none"> <li>Yoga – Asanas, Pranayam, Mudras, Kriya, Vivekananda Ashram</li> <li>Yoga – Sivanand Yog Vedanta Center</li> </ul>			
<b>Online Resources:</b> <a href="https://www.yogatoday.com/">https://www.yogatoday.com/</a> <a href="https://www.youtube.com/user/yogatoday">https://www.youtube.com/user/yogatoday</a> <a href="https://m.youtube.com/user/yogawithadriene/playlists">https://m.youtube.com/user/yogawithadriene/playlists</a>			
<b>MOOCs:</b> Swayam			
<b>Course Plan</b>			
<b>Unit</b>	<b>Contents</b>		
1	i) Origin of Yoga & its brief development. ii) Meaning of Yoga & its importance iii) Yoga as a Science of Art (Yoga Philosophy). iv) Meaning of meditation and its types and principles.		
2	i) Classification of Yoga/Types of Yoga ii) Hatha Yoga , Raja Yoga, Laya Yoga, Bhakti Yoga, Gyan Yoga, Karma Yoga. iii) Asthang Yoga.		
3	i) Principles of Yogic Practices. ii) Meaning of Asana, its types and principles. iii) Meaning of Pranayama, its types and principles. iv) Meaning of Kriya its types and principles. v) Yogic therapies and modern concept of Yoga vi) Naturopathy, Hydrotherapy, Electrotherapy, Messothrapy, Acupressure, acupuncture.		

# **SEMESTER V**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
501	Introduction to the Internet Technologies	3L-1T-0P = 4C	2018
<p><b>Course Objective :</b></p> <ul style="list-style-type: none"> <li>To teach the basic internet concepts and train them to develop internet applications.</li> <li>An overview of the HTML5 specification</li> <li>Practical knowledge to implement new HTML5 elements and attributes.</li> <li>Overview of Javascript</li> </ul>			
<p><b>Pre-requisites:</b> Preliminary knowledge of computer, their operations and applications.</p>			
<p><b>Expected Outcome :</b></p> <ul style="list-style-type: none"> <li>Describe and use client-side technologies of the World Wide Web: HTML5, CSS3, Javascript.</li> <li>To implement different constructs and programming techniques provided by Java Script.</li> </ul>			
<p><b>References (Books, Websites etc) :</b></p> <p><b>Text Books:</b></p> <ol style="list-style-type: none"> <li>The Complete Reference HTML -Thomas A.Powell</li> <li>The ABC's of JavaScript –Lee Purcell &amp; May Jane Mara</li> <li>Internet Technology at work - Hofstetterfred</li> <li>Beginning HTML5 &amp; CSS3 - Christopher Murphy, Richard Clark &amp;oliStudholme</li> </ol> <p><b>Reference Books :</b></p> <ol style="list-style-type: none"> <li>Web Enabled Commercial Application Development using HTML, DHTML, JavaScript, Perl CGL –Bayross Ivan</li> <li>Internet Technology at work Hofstetterfred</li> <li>Web Design Technology-D.P. Nagpal- S. Chand Technical</li> <li>JavaScript Bible</li> </ol> <p><b>Reference Sites:</b></p> <ol style="list-style-type: none"> <li><a href="http://www.w3schools.com">www.w3schools.com</a></li> <li>www.devguru.com</li> </ol>			
<p><b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Overview Of Internet And Intranet:</b> Understanding internet and its need, concept of intranet, difference between internet and intranet, a brief history, internet applications, Internet Service Providers (ISP) concept of client and server, concept of a web browser and web server, communicating on the internet, concept of domain- Physical domain, virtual domain,</p>		

	registering a domain, need of IP addressing, process to assign IP addresses, World Wide Web
2	<p><b>Introduction To HTML:</b>  <b>Introduction:</b> Overview of HTML, need of HTML, Use of HTML  <b>HTML Tags:</b> concept of Tag, types of HTML tags, structure of HTML program  <b>Text formatting through HTML:</b> Paragraph breaks, horizontal rules, heading style, line breaks, background and BGcolor attributes  <b>Emphasizing material in a web page:</b> Heading styles, drawing lines, text styles.  <b>Text styles and other text effects-</b>centering, spacing, controlling font size &amp; color  <b>Lists:</b> Using unordered, ordered, definition lists  <b>Adding Graphics To HTML Documents:</b> Using Image tag, attributes of Image tag, changing width &amp; height of image</p>
3	<p><b>Tables, Frames And Linking Documents:</b>  <b>Handling Tables:</b> To define header rows &amp; data rows, use of caption tag, changing height &amp; width of table, cellpadding, cellspacing, bgcolor, colspan, rowspan  <b>Linking Documents:</b> Concept of hyperlink, types of hyperlinks, linking to the beginning of document, linking to a particular location in a document, Images as hyperlinks  <b>Frames:</b> Introduction To frames, using frames &amp; frameset tags, named frames.  <b>Forms :</b> INPUT tag, TYPE Attribute : text, password, button, checkbox, radio button, image</p>
4	<p><b>Introduction to CSS:</b>  Introducing CSS, Types of style sheets: inline, embedded and external Style.  Working with CSS properties: text properties, color and background properties, border and shading, box and block properties, positioning with CSS, Various types of CSS selectors: universal, class, ID, child, descendent, adjacent sibling, attribute and query.</p>
5	<p><b>Introduction To HTML5 and CSS3:</b>  Features of HTML5 and CSS3 with few elements.</p>
6	<p><b>Introduction To JavaScript:</b>  <b>Introduction to scripting:</b> overview of Java Script, Advantages, Features of JavaScript, Client side java Script, writing JavaScript into HTML, First Hello World Program  <b>Basic JavaScript Techniques:</b> Data types, literals, variables and operators, Java Script arrays, dense array, operators, expressions  <b>Java Script Programming Construct:</b> Assignment, data declaration, if, switch, while, for, do while, label, break, Continue  <b>Functions and Objects-</b>Built-In Function and User defined function. User defined functions, function declaration, passing parameters, variable scope, return values, recursive functions, String, Date, Math Objects  <b>Dialog boxes</b> -Alert dialog box, prompt dialog box, confirm dialog box,  <b>Working with form-</b> Forms and Form elements and the associated events. Form validation.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
502	Object Oriented Analysis and Design	3L-1T-0P – 4C	2018
<b>Course Objective :</b>			
<ul style="list-style-type: none"> <li>To Understand concept of system design using UML.</li> <li>2. To understand system development through object oriented techniques.</li> </ul>			
<b>Expected Outcome :</b>			
At the end of course students will know –			
<ul style="list-style-type: none"> <li>Advantages of using OOP platforms for development.</li> <li>Process carried out while designing Object Oriented Systems.</li> </ul>			
<b>References (Books, Websites etc) :</b>			
<ul style="list-style-type: none"> <li>The Unified Modeling Language User Guide by Grady Booch, James Raumbaugh, Ivar Jacobson.</li> <li>Object Oriented Software Engineering by Ivar Jacobson</li> <li>3. Software Engineering by Pressman</li> </ul>			
<b>Suggested MOOC : Refer NPTEL</b>			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Object Oriented Concepts, Modeling and UML:</b> What is Object Orientation : (Introduction to class, object, inheritance, polymorphism), Model : Introduction of Modeling, Object Oriented Modeling , Object oriented system development: Function/data methods, Object oriented analysis, Object oriented construction, Object oriented testing		
2	<b>Iterative Development and UML:</b> Understanding requirements, Rational Unified process & RUP Phases – Inception, Elaboration, Construction, Transition UML : Designing Tool for OOAD : Introduction to UML, Overview of UML, Conceptual Model of UML, Diagrams in UML, Advantages of UML <b>Behavioral Modeling</b> Use Case Diagram : Realization of Use Cases, Finding Actors, Defining Relations among Use case, Writing Use Cases, Activity Diagram		
3	<b>Basic and Advanced Structural Modeling</b> Class Diagram : Identifying the elements of an object model, Identifying classes and objects, Specifying the attributes, Defining operations, Finalizing the object definition, Advanced class Modelling, Interface, Types and Roles <b>Diagrams Based on Classes :</b> State Chart Diagram, Package Diagram, Object Diagram		

4	<p><b>Interaction Modelling :</b></p> <p>Introduction to Interaction Diagrams, Need of Interaction Diagrams, Interaction Diagrams, Collaboration Diagram, Sequence Diagram</p>
5	<p><b>Architectural Modeling</b></p> <p>Component Diagram: Need of Component Diagram, Realization of Components, Relating Components.</p> <p>Deployment Diagram : Purpose of deployment diagram, Architecture of System, Different Architectures used for System, Representing Architecture using Deployment Diagram</p>
6	<p><b>Object Oriented Programming Styles</b></p> <p>Object Oriented Style with reference to Reusability and Extensibility, Robustness, 3 Programming in the Large, Discussion on case Studies e.g. Library Management System, Hospital Management System, . Online Shopping, Nukari.com website, Matrimonial website</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
503	C# Programming	3L-1T-0P-=4C	2018
<b>Course Objectives</b> <ul style="list-style-type: none"> <li>• Learn the fundamentals of C# programming in Visual Studio.</li> <li>• To Use .Net Framework</li> <li>• To Handle Exceptions in C#</li> <li>• To implement Object oriented technology in C#</li> <li>• To operate with Arrays</li> <li>• To use Class Designer and Object Test Bench tools.</li> </ul>			
<b>Expected Outcome :</b> This COURSE focuses on building applications with a graphical user interface (GUI) for the Microsoft Windows operating system although GUI interfaces on other operating systems, and on the Web Topics include: event-driven programming, Win32 API, dialog boxes and standard GUI controls, dynamic link libraries, .NET Framework. The C# programming languages will be used to build applications.			
<b>Reference Books:</b> <ul style="list-style-type: none"> <li>• The Complete Visual C# Programmer's Guide</li> <li>• A Programmer's Introduction to C# 2.0, Third Edition</li> <li>• 3. C# and the .NET Platform, Second Edition</li> </ul>			
<b>Course Plan</b>			
UNIT	Contents		
1	<b>The .net Framework:</b> Introduction, common language runtime, common type system, common language specification, the base class library, the .net class library, Intermediate language, Just in time compilation, garbage collection, assemblies, web services, COM, localization		
2	<b>Introduction to C # :</b> Evaluation of C#, characteristics of C#, application of C#,difference between C++ and C#, difference between Java and C#.Introduction to C# environment : The .NET strategy, the origins of the .NET technology, the .NET framework, the common language runtime, framework base classes, user and programs interface, visual studio .NET, .NET languages, benefits of the .NET approach, C# and .NET. Data types, identifiers, variables, constants, C# statements, OOPs concept,array and strings, operators, control statements, type conversions, Mathematical functions.		
3	<b>Classes and Objects :</b> Basic principles of OOP's, class, objects, constructors, static members, static constructors, private constructors, copy constructors, destructors, member initialization, the this reference, nesting of classes, constant members, read only members, properties, indexers.Inheritance and polymorphism : overloading, inheritance, overriding, interfaces		
4	<b>Visual studio IDE features, introduction to Window forms, components, control:</b> textbox, label, linklabel, status bar, checkedlistbox, combobox, listbox, listview, radiobutton, button, panel, groupbox, dialog box, menu control, properties, methods, events of controls.		
5	<b>ADO.net:</b> the component model, creating database connection, database command, data repeater, connecting to data sources, choosing a .net data provider, manage a connection, building		

	command objects, executing commands, building datasets and datatables, data adapter
6	<b>Managing Console I/O operations :</b> Console class, console input, console output, formatted output, numeric formatting, standard numeric format, custom numeric format. Managing Errors and Exceptions : Types of errors, exceptions, syntax of exception handling code, multiple catch statement, the exception hierarchy, general catch handler, using final statement, nested try blocks, throwing our own exceptions, checked and unchecked operators, using exceptions for debugging.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
504	Graph Theory	3L-1T-0P =4C	2018-19
<b>Course Objective :</b>			
The aims of this Graph theory is a delightful playground for the exploration of proof techniques in discrete mathematics and its results have applications in many areas of the computing ,social and natural science			
<b>Expected Outcome :</b>			
At the end of the course student should be able to:			
<ul style="list-style-type: none"> <li>• Use graphs as models in a variety of areas.</li> <li>• Formulate several real world problems in mathematical terms</li> </ul>			
<b>References (Books, Websites etc) :</b>

Discrete Mathematics and its Applications Edition 6 <sup>th</sup> - Tata McGraw Hill by Kenneth H. Rosen			
<b>Suggested MOOC :</b>			
NPTEL			
<b>Course Plan</b>			
Unit	Contents		
<b>1</b>	<b>Fundamental Concepts :</b> Definition, Graph Models, Sub Graph, Decomposition and special Graphs, Connection in Graphs, Bipartite Graph, Degree, Directed Graph, Undirected Graph, weighted graph, Regular Graph, dual graph, Representing Graph in computer memory, <b>Examples</b>		
<b>2</b>	<b>Connectivity:</b> Walk, paths, trail, circuits, Connected Graph, Bridge, Isomorphism, Eulerian Circuits, Euler's path, Euler graph, Hamiltonian Graph and Graph Algorithm, Konigsberge Bridge problem, shortest path problems, city route,puzzle problem, Seating arrangement problem, Travelling salesman problem, <b>Examples</b>		
<b>3</b>	<b>Algorithms :</b> Fleury's algorithm, Warshall's algorithm, Floyde's algorithm, Dijkstra's algorithm, Depth-First Search/ Breadth First search in Directed Graph, <b>Examples</b>		
<b>4</b>	<b>Coloring of Graphs and planarity:</b> Vertex Coloring and upper bonds, Graph with Large Chromatic Number, 4 color theorem,Applications of graph coloring, Planar Graph, Euler's Formula, Homomorphism, Theorems, <b>Examples</b>		
<b>5</b>	<b>Trees and Distance:</b> Concept of Trees, Definition and properties of Trees, Application of Trees, Trees as Models, Game Trees, Tree Traversal, Infix and Postfix notation of arithmetic expression, Binary Trees and its Properties, Binary Search Trees, Spanning Tree, Minimum spanning Tree, Depth First search, Breadth –First search, Back tracking applications, Kruskal algorithm, Prims algorithm, Huffman's algorithm <b>Excercises</b>		
<b>6</b>	<b>Matchings :</b> Matching, Hall's Condition, MinMax Theorem, covers, Maximum Bipartite Matching, Weighted Bipartite Matching, Maximum Networks Flow, Examples		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
506	Lab on Internet Technology and C# Programming	3L-1T-0P=4C	2018-19
<b>Course Objective :</b> <ul style="list-style-type: none"> <li>To teach the basic internet concepts and train them to develop internet applications.</li> <li>An overview of the HTML5 specification</li> <li>Practical knowledge to implement new HTML5 elements and attributes.</li> <li>Overview of Javascript</li> <li>Learn the fundamentals of C# programming in Visual Studio.</li> <li>To Use .Net Framework</li> <li>To Handle Exceptions in C#</li> <li>To implement Object oriented technology in C#</li> <li>To operate with Arrays</li> <li>To use Class Designer and Object Test Bench tools.</li> </ul>			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>Describe and use client-side technologies of the World Wide Web: HTML5, CSS3, Javascript.</li> <li>To implement different constructs and programming techniques provided by Java Script.</li> <li>This COURSE focuses on building applications with a graphical user interface (GUI) for the Microsoft Windows operating system although GUI interfaces on other operating systems, and on the Web Topics include: event-driven programming, Win32 API, dialog boxes and standard GUI controls, dynamic link libraries, .NET Framework. The C# programming languages will be used to build applications.</li> </ul>

Nagpal- S. Chand Technical, JavaScript Bible</li> <li>The Complete Visual C# Programmer's Guide</li> <li>A Programmer's Introduction to C# 2.0, Third Edition</li> <li>3. C# and the .NET Platform, Second Edition</li> </ul>			
<b>Suggested MOOC :</b> Swayam			
<b>Course Plan</b>			
<b>Unit</b>	<b>Contents</b>		
<b>Internet Technology:</b>			
Design A webpage which have student's biodata with proper formatting and having student name as title.			
Design a form using HTML that accepts information about your qualification, extra curricular activities, achievements, skill sets, hobbies, and expectation for a particular job.			
Design a website for a class which shows student's list linked with their biodata pages			

Design a website for PNG jewelers, having images of different types of jewelries which are linked with the pages giving details about the items.

Design a Style sheet to give following effects  
The first letter of the paragraph should have 150% font size  
The first line of the paragraph should have purple as background color and white as the fore color.

Design a website for the college which lists all the faculties(ordered lists), courses (definition lists) every course explains details (fees, duration, intake capacity) as unordered list.

Design a website for Samsung products using frames having design as-

<logo>	<title>		
<Links to various products>	<images products>	of	<form to purchase the product>

Design a website for a college showing features of the university, college and list of different courses running in the institute. Course names have links with the pages having details of the courses having similar design using stylesheets.

Design a CSS(inline) that displays the regular text at the center with green as background color and white as fore color and should be bold, using class

Design a web page to display the following output

- List of subjects
    - Semester III
      - C++
      - Dot.Net
    - Semester IV
      - Java
      - Industrial Projects
- Internet Programming
- a. HTML
  - b. VBScript
  - c. Java Script
  - d. DHTML

Design a webpage which accepts users information with validations(name, std code(should not exceed 4 digits),landline number(no. of digits should be between 5 to 7), mobile number(exactly 10 digits),email(should have @ and .))

Write a HTML code to display timetable of your class.

Write a HTML code to display the mark sheet of entered seat number

Write an HTML code to accept the students's

Design a website which accepts a number from user and performs the selected operation(even/odd, prime/not prime, positive/negative)
Design a webpage which provides calculator facilities.
Design webpage which accepts no of lines and prints it in the form of triangular shaped pyramid.
Write JavaScript to display table of numbers 2-10 (use form and form elements)
Write a JavaScript code which contains “show” button. When user clicks on show button, first 10 terms of Fibonacci series will be displayed in text box on another HTML page. This page contains button “back”. With this button user can come back to original page.
Create a form having textboxes, radio button and check boxes and reset button. On clicking the reset button the entire form should be reset.
Design a webpage for a restaurant which accepts online order from user and shows the calculated total amount.
Accept login name and password from user and display biodata of the corresponding user.
Design a page for a user to create his login by accepting desired login name, password and confirm the password.
Accept data of a student wants to appear for entrance(name, marks at matriculation, higher secondary and graduation). Ask student to select the course he want to take admission. If the student scores above 55 at matriculation, above 60 at higher secondary and graduation then he is eligible for any course. If he has science degree or maths at 11th and 12th then only he is eligible for MCA.Design the form accordingly. Give the according message.
Design a webpage to conduct aptitude for maths. The test is objective, each question having 4 options. Let the students select the option. For every correct option he scores 2 marks and for every wrong answer he loose 1 mark. Calculate & show score of a student.
Design the registration form for a Web site and when the user clicks on Submit button the login form should be appeared on screen.
Create a purchase order form using Javascript.
Create a Java script code with show button. User click on show button, all string functions should be implemented.
Write JAVA script that finds occurrence of letter “m” in the string entered by user in textbox and replace it with “a” and write string to page.
Develop HTML form to accept mathematical expression in one textbox and display its result in another textbox after clicking on button showing mathematical operations.

<b>C#</b>	
SET-I	Basic Console Applications

	<ul style="list-style-type: none"> <li>• Write a C# Program to design simple calculator</li> <li>• Write a C# Program to Check whether the Entered Number is Even or Odd.</li> <li>• Write a C# Program to Swap 2 Numbers</li> <li>• Write a C# Program to Get a Number and Display the Sum of the Digits</li> <li>• Write a C# Program to Get a Number and Display the Number with its Reverse</li> <li>• Write a Program in C# to demonstrate Command line arguments processing</li> <li>• Write a Program in C# to demonstrate boxing and Unboxing.</li> </ul>
SET-II	Date and Time
	<ul style="list-style-type: none"> <li>• Write a C# Program to Display the Date in Various Formats</li> <li>• Write a C# Program to Check Whether the Entered Year is a Leap Year or Not</li> <li>• Write a C# Program to find difference between Two Dates</li> </ul>
SET-III	Classes
	<ul style="list-style-type: none"> <li>• Write a program to demonstrate abstract class and abstract methods in C#.</li> <li>• Find the sum of all the elements present in a jagged array of 3 inner arrays.</li> <li>• Write a program to demonstrate Operator overloading.</li> <li>• Demonstrate arrays of interface types (for runtime polymorphism) with a C# program.</li> </ul>
SET-IV	<ul style="list-style-type: none"> <li>• Consider the Database STUDENT consisting of following tables: Course (C_ID: int, C_Name: string)</li> <li>• Student (RollNo:int, S_Name: string, Address: string, C_ID: int, Admissiyear: int) Develop suitable windows application using C#.NET having following options: <ol style="list-style-type: none"> <li>1. Entering new course details.</li> <li>2. Entering new student details.</li> <li>3. Display the details of students (in a Grid) who belong to a particular course.</li> <li>4. Display the details of the students who have taken admission in a particular year</li> </ol> </li> <li>• write a program in C# to demonstrate error handling.</li> </ul>

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
507	Minor Project II	2 Credits	2018-19

**Course Objective :**

Student has to complete a Minor project work under the guidance of the faculty member in the institute. Students has to develop any software using Java in a group of 2 to 3. Each team has to give 4 minimum PPT presentation to the Project Guide during the semester. Final project viva will be conducted as per University Time Table.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
508	Social Media Management	2L-0T-0P=2C	2018
<b>Course Objective:</b> This Course Teaches student to use social media strategically to create value for a client or organization.			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>Students will learn by doing assignments focusing on social media, post writing and publishing, management and measurement tools, a social media audit, editorial calendar and crises management.</li> <li>Students will master the skills necessary to become successful social media managers.</li> </ul>			
<b>Reference Books :</b> <ul style="list-style-type: none"> <li>Guy Kawasaki &amp; Peg Fitzpatrick, “The art of social media: power tips for power users</li> <li>Social media marketing all in one for dummies, Jan Zimmerman &amp; Deborah N</li> <li>Social media explained by Mark W. Schaefer</li> </ul>			
<b>Online resources</b> <a href="http://www.gov.pe.ca/photos/original/IPEI_ebiz_smmkt.pdf">http://www.gov.pe.ca/photos/original/IPEI_ebiz_smmkt.pdf</a> <a href="https://www.coursehero.com/file/10513028/Media-Management-Notes/">https://www.coursehero.com/file/10513028/Media-Management-Notes/</a>			
<b>MOOCs:</b> Swayam			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction To Social Media:</b> Introduction to Social Media, importance of social Media, History and evolution of Social Media, Managing Information, Aggregators. Facebook, Twitter, Instagram, LinkedIn, Youtube, Blogs.		
2	<b>Using Social Media:</b> Strategy Plan for Social Media Management, Touchpoint, Analysis Scheduling, Creating Content, Managing Content programmes, Planning Worksheet, Social media campaign.		
3	<b>Evaluating Social Media:</b> <ul style="list-style-type: none"> <li>Evaluation of Social Media Platforms</li> <li>Tools to manage and measure performance of social media content and campaigns</li> </ul> Handling critical issues in social media management and legal aspects of social media.		

4	<b>Setting-up own professional site</b> Content management, design, connectivity with social media
	<b>Assignments:</b> <ol style="list-style-type: none"><li>1.Explain atleast one social media management tool in detail.</li><li>2.Describe social media analytics tool in bried with example.</li><li>3.Detailed social media campmaign: The campaign can be any example presented in social media for Lead Generation. Describe the objectives for campaign, outline the tools, preapare budget for campaign.</li><li>4.Budget for social media plan: Based on the understanding of your client, prepare a budget for social media management. Include the individual cost of your tactis, your proposed social media campaign and social media tools. Include the total cost as a bottom line of your budget. Include the ROI of your plan and why that budget should be allocated to social media.</li></ol> <p>List different types of content to be used in creating brand by using social media campaigns. Describe merits and demerits of each type of content used in social media.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
508	Road Safety Management	2L-0T-0P=2C	2018
<p><b>Course Objective:</b> The vehicle population in India is growing at an exponential rate. This phenomenon is bringing in its wake a host of health related, environmental, safety and behavioral problems in the society. The problem is compounded due to absence of effective means of mass transportation system in most big cities in India.</p>			
<p><b>Reference Books :</b></p> <ul style="list-style-type: none"> <li>• Pratibha Shastri Ranade , Road Safety Management, ICFAI University</li> <li>• Vijay Vinayak Revankar, Road Safety – Vimleshwar Automobile Industry and Road Safety Community Forum</li> </ul>			
<p><b>MOOCs:</b> Alison</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction to Road Safety Management:</b> Importance and need of road safety management.</p>		
2	<p><b>Management of Traffic and Traffic Rules:</b> Use of traffic signals, signs by hand, knowledge/applications of automatic signals, parking rules, driving around, Traffic islands ,traffic joints, subways and flyovers. Signs of roads: meaning of yellow, green and red lights, zebra crossings, bus stops, use of road by physically disadvantaged persons, elderly persons, women and children, special right of way for ambulance, firefighting vehicles, school bus and V.I.P vehicles.</p>		
3	<p><b>Management of Road Mishaps and Accidents:</b> First aid to accident victims- First aid techniques, co-ordination with hospitals and other health centres for emergency treatment of accident victims, role of Insurance companies in providing relief to accidents victims, Management of Ambulance Services, Importance of voluntary blood donation in saving accident victims,Rehabilitation of persons affected by accidents. Qualities of a good Driver: Good health, tolerance, responsibility, knowledge of rules and laws, self confidence, politeness, familiarity with the vehicle and its maintenance requirements, self discipline.</p>		

Course Number	Course Name	L-T-P- Credits	Year of Introduction
508	Event Management	2L-0T-0P=2C	2018
<b>Course Objective:</b> The basic purpose and spirit of this course is to expose the students to hands-on experience of event management.			
<b>Expected Outcome :</b> The students are oriented to event management in order to strengthen their skills of planning, organizing and other such management functional skills.			
<b>Reference Books :</b> <ul style="list-style-type: none"> <li>• S. R. Singh, Event Management, HPH.</li> <li>• Alex Genadelik, Event Planning: Management &amp; Marketing For Successful Events: Become an event planning pro &amp; create a successful event series</li> </ul>			
Online Resources: <a href="https://blog.komodoplatform.com/notes-on-social-media-and-community-management-for-blockchain-cryptocurrency-and-ico-projects-4d0f328bdfb3">https://blog.komodoplatform.com/notes-on-social-media-and-community-management-for-blockchain-cryptocurrency-and-ico-projects-4d0f328bdfb3</a>			
<b>MOOCs:</b> Alison			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to Event Management:</b> The concept of event. need and importance of events.		
2	<b>Types of Events :</b> Different types of event in Corporates, Social Programmes and Private Programmes. Following units are entirely based on practice part of the event management		
3	<b>Assessment of Events :</b> Post event assessment of any 05 programmes A student or a group of 03 students shall be assigned the event which has taken place in near past at any place and they shall make an inquiry into its success and effectiveness by rating them on the basis of appropriate parameters and shall submit the assignment to the respective teacher . Preparation of Learning Value report : A student shall prepare a report on what he learnt from the events and submit it to the concerned teacher. The report shall include mainly the description of occasion, the person involved and what guiding principles they have received from them.		

# **SEMESTER VI**

Course Number	Course Name	L-T-P- Credits	Year of Introduction
601	Data Warehousing And Data Mining	3L-1T-0P= 4C	2018
<b>Course Objective :</b> <ul style="list-style-type: none"> <li>To introduce the basic concepts of Data Warehouse and Data Mining techniques.</li> <li>Examine the types of the data to be mined and apply preprocessing methods on raw data.</li> <li>Discover interesting patterns, analyse and estimate the accuracy of the algorithms.</li> </ul>			
<b>Expected Outcome :</b> At the end of this course, student should be able to understand <ul style="list-style-type: none"> <li>Process raw data to make it suitable for various data mining algorithms.</li> <li>Discover and measure interesting patterns from different kinds of databases.</li> <li>Apply the techniques of clustering, classification, association finding, feature selection and visualization to real world data.</li> </ul>			
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>Jiawei Han and Micheline Kamber , “Data Mining Concepts and Techniques” ELSEVIER</li> <li>M.Humphires, M.Hawkins, M.Dy,“Data Warehousing: Architecture and Implementation”, Pearson Education</li> <li>Kargupta, Joshi., “Data Mining: Next Generation Challenges and Future Directions”, Prentice Hall of India</li> </ul>			
<b>Suggested MOOC:</b> Please refer these websites for MOOCS: NPTEL / Swayam www.edx.com www.coursera.com			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to Data warehousing:</b> Data Warehousing, Difference between operational database system and data warehouse, Data Warehouse Users, Benefits of Data Warehousing, Metadata, Classification of Metadata, and Importance of Metadata. Data Marts, Reasons for creating Data Marts, Building Data Marts: Top down Approach & Bottom up Approach, Data Warehouse Architecture, Two Tier Architecture, Three Tier Architecture. Data Warehouse Schema, Star, Snow Flake & Fact Constellation Schema. OLAP, Need for OLAP, OLAP Operations, OLAP Models.		
2	<b>Data Preprocessing:</b> Need, Objectives and Techniques, Descriptive data summarization, Data Cleaning, Data Integration, Data Transformation, Data Reduction.		
3	<b>Introduction to Data Mining:</b> Introduction, Need for Data Mining, KDD Process, Data Mining Architecture, Data		

	Mining Functionalities, Data Mining Task Primitives, Integration of a Data Mining System with a Database or Data Warehouse System
4	<b>Mining Frequent Items and Associations:</b> Frequent Item Set, Closed Item Set, Association Rule Mining, Market Basket Analysis, Classification of Association Rules, Apriori Algorithm
5	<b>Classification and Prediction:</b> Classification & Prediction, Issues regarding classification & Prediction, Comparing Classification Methods, Classification by Decision Tree Induction
6	<b>Clustering:</b> Introduction, Cluster Analysis, Need, Categorization of Major clustering methods. Types of Data in Cluster Analysis, Partitioning Methods: K-Means Method, K-Medoids Method, Applications of data mining in various sectors

Course Number	Course Name	L-T-P- Credits	Year of Introduction
602	Web Programming	3L-1T- 0P= 4C	2018-19
<b>Course Objective :</b>			
To make students able to design, develop the various types of web based applications.			
<b>Expected Outcome :</b>			
By using JavaScript, PHP and My SQL, at the end of the course student should be able to :			
<ul style="list-style-type: none"> <li>• Design web pages</li> <li>• Knowledge about different types of web sites</li> <li>• Navigation amongst web pages</li> <li>• Knowledge about presenting information on web interfaces</li> </ul>			
<b>References (Books, Websites etc) :</b>			
<ul style="list-style-type: none"> <li>• PHP and MySQL Web Development by Welling Thomson Fourth Edition, Pearson publication</li> <li>• Teach Yourself PHP, MySQL and Apache by Julie C. Meloni Pearson publication</li> </ul>			
<b>Suggested MOOC :</b>			
Please refer these websites for MOOCS:			
NPTEL / Swayam			
www.edx.com			
www.coursera.com			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction To PHP:</b> Installing and configuring PHP, Building blocks of PHP:PHP tags, variables, data types, operators, expressions, constants, Control Structures: conditional statements, loops, switch statement		
2	<b>Working With Functions And Arrays:</b> Working with functions: What is a function? Function declaration and definition, Calling function, user defined functions, variable scope, working with arrays: Creating, sorting and reordering arrays, PHP classes.		
3	<b>String Manipulation:</b> Working with strings, dates and time: Formatting, investigating and manipulating strings with PHP, using date and time functions in PHP, working with forms: Creating a simple input form. File Handling: Saving data, storing and retrieving Bob's order, processing files, opening file, writing to a file, closing a file, reading from a file, uses other useful file functions.		
4	<b>Working With Cookies And Sessions :</b> Working with cookies: Introducing cookies, setting and deleting cookies with PHP Working with session: starting a session, working with session variables, passing session IDs in the query string, destroying sessions and unsetting variables, using sessions		

5	<p><b>MYSQL :</b></p> <p>Creating web database: Using MySQL monitor, logging into MySQL, creating databases and users, setting users and privileges, column data types</p> <p>Working with MySQL database: Inserting data into database, retrieving data from the database, retrieving data with specific criteria, retrieving data from multiple tables, retrieving data in particular order, grouping and aggregate data, using sub queries, updating records, deleting records from databases, dropping table and database.</p>
6	<p><b>Accessing MYSQL Database From Web With PHP :</b></p> <p>Web database architecture, Querying database from the web: checking and filtering input data, setting up connection, Choosing database to use, querying database, retrieving the query result, disconnecting from the database.</p>

Course Number	Course Name	L-T-P- Credits	Year of Introduction
603	Software Project Management	3L-1T-0P= 4C	2018-19

**Course Objective :**

To provide basic project management skills with a strong emphasis on issues and problems associated with delivering successful IT projects. The course is designed to provide an understanding of the particular issues encountered in handling IT projects and to offer students methods, techniques and 'hands-on' experience in dealing with them.

**Expected Outcome :**

At the end of this course, student should be able to understand

- Understand and practice the process of project management and its application in delivering successful IT projects;
- Evaluate a project to develop the scope of work, provide accurate cost estimates and to plan the various activities;
- Identify the resources required for a project and to produce a work plan and resource schedule.

**References (Books, Websites etc) :**

- Information Technology Project Management: Kathy schwalbe, International student edition, THOMSON course Technology, 2003.
- B)Software project management : Bob Hughes and Mike Cottrell, Third edition, Tata McGraw-Hill
- Microsoft office Project 2003 Bible: Elaine Marmel, Wiley publishing Inc.
- **Software Requirement:** Microsoft project Tool.

**Suggested MOOC:**

Please refer these websites for MOOCS:

NPTEL / Swayam

[www.edx.com](http://www.edx.com)

[www.coursera.com](http://www.coursera.com)

**Course Plan**

Unit	Contents
1	<b>Introduction to project management:</b> Project, project management, Importance, characteristics of project how software projects are diff. than other projects, Problems with software projects, Phases: Initiation phase, planning phase, execution phase, monitoring and controlling phase, and closing phase. All parties involved in project, Role of Project Manager, Project management framework, Software tool for project management
2	<b>Project planning:</b> Integration management: What is integration management, plan development and execution, What is scope management, methods for selecting project, scope statement, Work Breakdown Structure, main steps in Project planning: identify project scope and

	objective, identify project infrastructure, analyze project characteristics, identify project products and activities, estimate effort for each activity, identify risk activity, allocate resources, review plan, execute plan. Use of software (Microsoft Project) to assist in project planning activities.
3	<b>Project scheduling:</b> Time management: importance of Project schedules, schedules and activities, sequencing and scheduling activities, Network Planning models, duration estimation and schedule development, Critical path analysis, PERT, Use of software( Microsoft project) to assist in project scheduling.
4	<b>Project cost management:</b> Importance and principles of project cost management, Resource planning, Attributes to be considered in cost estimation, factors affecting the cost, various costs involved in it. Traditional method: Estimation by analogy, Expert judgment, Parkinson, price to win, top down, bottom up. COCOMO Model, Function point analysis, Function point analysis, Cost control, Use of software( Microsoft project) to assist in cost management.
5	<b>Project quality management:</b> Quality of information technology project, Stages of software quality management, PMBOK, Quality standards, Tools and techniques for quality control.
6	<b>Project risk management:</b> The importance, Top risk in projects, Common sources of risk in IT projects, elements in risk mgt., Risk identification, Risk quantification, Risk response development and control, using software to assist in project risk management.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
604	Business Analytics	3L-1T-0P=4C	2018-19
<b>Course Objective :</b> <ul style="list-style-type: none"> <li>To gain an understanding of how decision makers use business analytics to formulate and solve business problems and to support Information System based decision making.</li> <li>To become familiar with the processes needed to develop, report, and analyze business data</li> </ul>			
<b>Expected Outcome :</b> At the end of this course, student should be able to understand <ul style="list-style-type: none"> <li>Identify and prioritize information &amp; data modelling.</li> <li>Identify and prioritize threats to information assets.</li> <li>Define an Geographical information system.</li> <li>Understand various types of Analytics and its significance.</li> <li>Understand text &amp; web mining</li> <li>Applications of business analytics</li> </ul>			
<b>References (Books, Websites etc) :</b> <ol style="list-style-type: none"> <li>Efraim Turban, Ramesh Sharda : Decision Support and Business Intelligence systems : PHI 8<sup>th</sup> Edition</li> </ol>			
<b>Suggested MOOC :</b> NPTEL, SWYAM			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Business Analytics &amp; Data Visualization:</b> Business Analytics (BA), Overview of Areas where Business Analytics is applied, OLAP, Reports & Queries, Multidimensionality, Advanced Business Analytics, Data Visualization, Geographical Information system, Real time Business Intelligence Automated Decision support, and Competitive Intelligence, BA & Web, Usage benefits & success		
2	<b>Visualization and Data Issues:</b> Organization of Source of Data, Importance of Data Quality, Dealing with Missing or incomplete data, data classification, Introduction to Data Mining, Data mining process, data mining tools XL MINER.		
3	<b>Data, Text &amp; Web Mining :</b> Data Mining concepts & applications, Data Mining Techniques & Tools, Data Mining Project Processes, Text Mining, Web Mining		
4	<b>Applications of Business Analytics :</b> Risk - Fraud Detection and Prediction, Recovery Management, Loss Risk Forecasting, Risk Profiling, Portfolio Stress Testing, Market share estimation and Sensitivity Analysis		
5	Loyalty Analytics, Customer Life Time Value, Propensity Analytics, Churn Analytics, Customer Analytics Customer Segmentation, Cross- Sell or Up sell Models		

6	Recruitment Analytics, Compensation Analytics, Talent Analytics, Training Analytics, Human Resource Retention Analytics, Workforce Analytics Project Work
---	---

Course Number	Course Name	L-T-P- Credits	Year of Introduction
606	Lab on Web Programming	0L-0T-4P=2C	2018-19

1. Write a Program for finding the biggest number in an array without using any array functions.
2. Write a program to square of a number.
3. Write a program to print Factorial of any number.
4. Write a program in PHP to print Fibonacci series.
5. Write a program to find whether a number is Armstrong or not.
6. Write a program to find HCF of two numbers
7. Write a program to demonstrate four built in functions.
8. Program to print the below format

```

*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****
*****

```

9. Write a program to make a chess:

10. Create the following form and based on the user selection print a message in the format given below:

Please select your favourite car

Nissan

Toyota

Mitsubishi

**Your favourite car is: Nissan**

11. Write a PHP script to accept personal details of student (rno, name, class) on first page. On second page accept marks of six subjects (out of 100). On third page print marklist (rno, name, class, marks, total, percentage)
12. Write a PHP file that will output a form containing 2 fields: username and password. Upon submission of the form, the code should check against the database to see whether the username-password pair was correct. If so, display a welcome message. If not,

display the message “Invalid username or password” followed by the same login form.

**13.** Write a PHP file that can be added to other PHP files using the include or require functions. This file should:

- a. Make a connection to a MySQL database, and log in with valid credentials. The connection resource should be stored in a variable with an appropriate name.
- b. Create a database TEST if it does not exist.
- c. Select the TEST database.
- d. Create a table USER exerciseusers if it does not exist with the following fields:
  - i. USERNAME VARCHAR(100) , PASSWORD\_HASH CHAR(40),  
PHONE VARCHAR(10)
- e. The USERNAME field should be designated as UNIQUE.
- f. If any of these operations cause an error, stop execution and print the error message

**14.** Design a web page that accepts inputs(username and password) and authenticate the username and password from a given database using PHP.

Note : Similar experiments can be designed.

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
607	Major Project	2 Credits	2018-19

**Course Objective :**

Student has to complete a Major project work under the guidance of the faculty member in the institute. Students has to develop any software using Web Development / Dot Net Framework in a group of 2 to 3. Each team has to give 4 minimum PPT presentation to the Project Guide during the semester. Final project viva will be conducted as per University Time Table.

Course Number	Course Name	L-T-P- Credits	Year of Introduction
608	Business Ethics	2L-0T-0P=2C	2018
<p><b>Course Objective:</b> The objective of this paper is to make the students more clear about the importance of ethics in business and practices of good corporate governance. It also talks about the corporate social responsibility</p>			
<p><b>Expected Outcome :</b> This course exposes the student to the issues of values and ethics in management so that decision making and decision execution are undertaken in a human manner, as this will add to the flexibility and dynamism of the corporate culture. The course will take the student from managerial ethics to organizational ethics and business sustainability.</p>			
<p><b>Reference Books :</b></p> <ul style="list-style-type: none"> <li>• Management by Values; Chakraborty S.K.; OxfordUniversity Press, Kolkata 2005.</li> <li>• Professional Ethics by R. Subramanian, Second Edition, OXFORD</li> <li>• Theory and Practice of Managerial Ethics; Jayashree S. <p><b>MOOCs:</b> <a href="https://www.edx.org/learn/business-ethics">https://www.edx.org/learn/business-ethics</a></p>			
Course Plan			
Unit	Contents		
1	Ethics – Meaning, and Nature of Ethics. Types of Ethics, Importance of Ethics. Business Ethics : Meaning, Nature and Importance of ethics in business, meaning of corporate social responsibility, Relation between corporate responsibility & Business Ethics.		
2	Concept of Morals, Values, Beliefs; Moral issues in business, Spirituality and Ethics; Influence of Major religions on ethics: Hinduism, Islam, Christianity, Buddhism, Sikhism, and Zoroastrianism. Influence of spirituality on ethics.		
3	Relationship between Business, Business Ethics & Business Development, Role of Business ethics in building a good society.		

	Case Studies on Business Ethics
--	---------------------------------

Course Number	Course Name	L-T-P- Credits	Year of Introduction
608	Basics of Hospitality Management	2L-0T-0P=2C	2018
<b>Course Objective:</b>			
<ul style="list-style-type: none"> <li>• Recognize scope and career in the hospitality industry.</li> <li>• 2. Identify the major segments and specialization of the industry and their operations.</li> </ul>			
<b>Reference Books :</b>			
<ul style="list-style-type: none"> <li>• Introduction to Hospitality Management, John R. Walker ,Pearson</li> <li>• Food and Beverage Service, D.R. Lillicrap,John A. Cousins &amp; <a href="#">Suzanne Weekes</a>, Book Power.</li> <li>• Food and Beverage Management, Bernard Davis , Sally Stone, Butterworth Heineman Ltd.</li> <li>• Hotel House Keeping and Management, Raghubalan, Oxford University Press.</li> <li>• Managing Front Office Operations, Michael Kasavanna, Richard Brooks , Charles Steadmon, AH&amp;LA.</li> </ul>

<a href="https://www.ifitt.org/hospitality-and-tourismmoocs/">https://www.ifitt.org/hospitality-and-tourismmoocs/</a>			
<b>Course Plan</b>			
Unit	Contents		
1	<b>Introduction to the Hospitality Industry:</b> <ol style="list-style-type: none"> <li>a. History and scope of the hospitality industry.</li> <li>b. Economic impact of the hospitality and tourism industries.</li> <li>c. Careers in the industry.</li> <li>d. Link between hospitality and travel and tourism.</li> <li>e. Major segments and specialization of the industry.</li> <li>f. medical tourism</li> </ol>		
2	<b>Recreation/Travel and Tourism:</b> <ol style="list-style-type: none"> <li>a. Operation of recreational facilities such as resorts, spas, theme parks, and clubs.</li> <li>b. Meetings, conventions, exhibitions, banquets, and other events.</li> <li>c. Travel agencies and concierge desks.</li> <li>d. Gaming entertainment industry.</li> </ol>		
3	<b>Operations:</b> <ol style="list-style-type: none"> <li>a. Leadership and management in the industry.</li> <li>b. Hospitality marketing.</li> <li>c. Human resources and risk management and safety procedures.</li> </ol>		

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
608	Aptitude	2L-0T-0P=2C	2018
<p>The objective of this paper is to increase the capabilities of the student required by the industry. As per the need of the industry, the students will be trained in the latest Mathematical, Statistical, Logical, Verbal Ability, Current Trends in IT etc by the industry experts.</p>			

**ELECTIVES:****Elective Group: (I) Information Security**

<b>Course Number</b>	<b>Course Name</b>	<b>L-T-P- Credits</b>	<b>Year of Introduction</b>
505-1-A	Information Security Concepts	3L+1T+0P=4C	2018
<b>Course Objective:</b> Introduce the learner to concepts involved in Information Security domain			
<b>Expected Outcome :</b> Theoretical understanding of Information Security Concepts			
<b>References (Books, Websites etc) :</b> CEH Study Guide - Sybex			
<b>Suggested MOOC :</b> SWAYAM			
<b>Syllabus</b>			
Unit	Contents		
1	<b>Information Security Concepts:</b> Confidentiality, Integrity and Availability of Information, Identification, Authentication and Authorization, Security Principles and Models		
2	<b>Physical Security:</b> Facility Requirement, Perimeter Security, Fire Protection, Fire Suppression, Power Protection, General Environmental Protection, Equipment Failure Protection		
3	<b>Network Security:</b> Secure Network design, Firewalls, WLAN Security, VPNs, Types and Sources of Network Threats		
4	<b>Operating System Security:</b> Windows, Linux/UNIX		
5	<b>Database Security:</b> MS SQL		
6	<b>Web Application Security:</b> Web Application Vulnerabilities, Secure Coding Techniques, Continuous Security Testing and Assessments		
7	<b>Compliance Standards :</b> IT Act, ISO 27001, ITIL Framework		

### Elective Group (I) Information Security

Course Number	Course Name	L-T-P- Credits	Year of Introduction
605-1-B	Information Security Administration	3L+1T+0P=4C	2018
<b>Course Objective:</b> Introduce the learner to concepts involving security administration			
<b>Expected Outcome :</b> Practical understanding of setting, managing and securing Information Systems			
<b>References (Books, Websites etc) :</b> Red Hat Linux Bible: Fedora and Enterprise Edition - by Christopher Negus			
<b>Suggested MOOC :</b> SWAYAM			
<b>Syllabus</b>			
Unit	Contents		
1	<b>Setup a Client:</b> Introduction to client-side devices, Setup, Manage and Secure a Desktop PC Setup, Manage and Secure a Mobile Device		
2	<b>Setup a LAN:</b> Introduction to LAN devices, Simulate a LAN, Setup, Manage and Secure a Local Area Network		
3	<b>Connect a LAN to the Internet:</b> Introduction to WAN devices, Setup, Manage and Secure a Connection to the Internet		
4	<b>Share an Internet Connection across a LAN:</b> Introduction to Internet Connection sharing, Introduction to NAT and PAT Setup, Manage and Secure a Proxy Server		
5	<b>Share resources over a LAN:</b> Setup, Manage and Secure a Print Server, Setup, Manage and Secure a File server		
6	<b>Host a Website:</b> Introduction to website hosting, Setup, Manage and Secure a Web Server		
7	<b>Setup support servers:</b> Setup, Manage and Secure a Mail Server, Setup, Manage and Secure a FTP Server, Setup, Manage and Secure a Boot Server, Setup, Manage and Secure a DNS Server		

## Elective Group II- Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-2-A	Introduction to Big Data	3L-1T-0P= 4C	2018
<p><b>Course Objective :</b> To introduce learner with Big Data Concept, decision making by doing analysis on the data and managing the data using Big Data Tools like Apache Hadoop, Pig and Hive. What are the problems of Big Data and how it can be solved by different tools.</p>			
<p><b>Pre-requisites:</b> Preliminary knowledge of computer, Data Mining, Data Warehousing Concepts.</p>			
<p><b>Expected Outcome :</b></p> <ul style="list-style-type: none"> <li>• Good knowledge of Big Data Concepts</li> <li>• Knowledge of Decision making using analysis on the Big Data</li> <li>• Introduction to Big data Tools like Hadoop and Weka.</li> </ul>			
<p><b>Reference Books :</b></p> <ol style="list-style-type: none"> <li>1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo</li> <li>2. Edureka lectures <b>Link:-</b> <a href="https://www.youtube.com/watch?v=A02SRdyoshM">https://www.youtube.com/watch?v=A02SRdyoshM</a></li> </ol>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction:</b> Big Data History, The Big Data Business Opportunity- Business Transformation Imperative, Big Data Business Model, Business Impact of Big Data</p>		
2	<p><b>Big Data In Organization:</b> Data Analytics Lifecycle, <b>Data Scientist Roles and Responsibilities</b> – Discovery, Data Preparation, Model Planning, Model Building, Communicate Results, Operationalize, New Organizational Roles, Liberating Organizational Creativity.</p>		
3	<p><b>Decision Theory And Strategy:</b> Business Intelligence Challenge, Big Data User Interface Ramifications, Human Challenge of Decision Making, <b>Strategy for Decision Making-</b> Big Data Strategy Document, Case Study.</p>		
4	<p><b>Value Creation Process:</b> Understanding Big Data Value Creation, Value Creation Drivers, <b>Michael Porter’s Value Creation Models-</b> Michael Porter’s Five Forces Analysis, Michael Porter’s Value Chain Analysis, Case Study.</p>		
5	<p><b>Big Data User Experience:</b> The Unintelligent User Experience, Understanding the Key Decisions to Build a Relevant User Experience, Using Big Data Analytics to Improve Customer Engagement, Uncovering and Leveraging Customer Insights, Big Data can Power a New Customer Experience.</p>		
6	<p><b>Big Data Use Cases:</b> <b>The Big Data Envisioning Process</b> –1. Research Business Initiatives, 2. Acquire and Analyze your Data, 3. Brainstorm New Ideas , 4. Prioritize Big Data Use Cases, 5. Document Next Steps, The Prioritization Process.</p>		

7

**Big Data Architecture:**

New Big Data Architecture, **Introducing Big Data Technologies** – Apache Hadoop, MapReduce, R, WEKA etc.

## Elective Group II Big Data

Course Number	Course Name	L-T-P- Credits	Year of Introduction
605-2-B	HADOOP	3L-1T-0P= 4C	2018
<b>Course Objective :</b> To introduce learner with HADOOP Tool for Business Intelligence, decision making by doing analysis on the data using HADOOP Tool and also managing the Big Data using HADOOP.			
<b>Pre-requisites:</b> Preliminary knowledge of computer, Big Data Analysis and Business Intelligence. Also students must know Core Java, C Programming and Data Structure Languages.			
<b>Expected Outcome :</b> <ul style="list-style-type: none"> <li>• Good knowledge of HADOOP Tool.</li> <li>• Knowledge of Decision making using HADOOP analysis on the Big Data</li> <li>• Hands-on Big Data tools- Hadoop, Pig, Hive, HBase</li> </ul>			
<b>Reference Books :</b> <ol style="list-style-type: none"> <li>1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo</li> <li>2. <a href="http://www.tutorialspoint.com">www.tutorialspoint.com</a></li> </ol>			
Course Plan			
Unit	Contents		
1	<b>BIG DATA Overview :</b> What is Big Data?, What Comes Under Big Data?, Benefits of Big Data, Big Data Technologies Operational vs. Analytical Systems, Big Data Challenges.		
2	<b>Introduction To HADOOP:</b> Hadoop Architecture, MapReduce, Hadoop Distributed File System, How Does Hadoop Work?, Advantages of Hadoop.		
3	<b>HDFS Overview:</b> Features of HDFS, HDFS Architecture, Starting HDFS, Listing Files in HDFS, Inserting Data into HDFS, Retrieving Data from HDFS, Shutting Down the HDFS.		
4	<b>MAPREDUCE:</b> What is MapReduce?, The Algorithm for MapReduce, Inputs and Outputs (Java Perspective), Analyze different use-cases where MapReduce is used, Differentiate between traditional way and MapReduce way.		
5	<b>Introduction To Hadoop Features:</b> New Big Data Architecture, Introducing HADOOP Features – Apache Hive, Apache HBase, Pig.		
6	<b>Multi Node Cluster:</b> Multi Node Cluster, Install Java, Creating User Account, Mapping the Nodes, Installing Hadoop, Configuring Hadoop, Start Hadoop Services, Adding New Data Node in the Hadoop Cluster, Removing New Data Node from the Hadoop Cluster.		
7	<b>Environment Setup:</b> Pre-installation Setup, Installing Java Downloading Hadoop Hadoop Operation Modes Installing Hadoop in Standalone Mode Installing Hadoop in Pseudo Distributed Mode Verifying Hadoop Installation, Implement basic Hadoop commands on terminal.		

### Elective Group: (III) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
505-3-1	E-Commerce	3L-1T-0P-4C	2018-19
<p><b>Course Objective :</b></p> <ul style="list-style-type: none"> <li>• To thoroughly understand the information technology for supporting E-commerce;</li> <li>• To understand the necessary infrastructure and functional components to develop Ecommerce systems;</li> <li>• To understand the design and application of E-commerce systems.</li> </ul>			
<p><b>Expected Outcome :</b></p> <p>Upon successful completion of the course students will be able to:</p> <ul style="list-style-type: none"> <li>• Recognize the impact of Information and Communication technologies, especially of the Internet in business operations</li> <li>• Recognize the fundamental principles of e-Business and e-Commerce</li> <li>• Use tools and services of the internet in the development of a virtual e-commerce site</li> </ul>			
<p><b>References :</b></p> <ul style="list-style-type: none"> <li>• E-commerce - C.S.V. Murthy, Himalaya Publishing House</li> <li>• E-commerce A Managerial Perspective - P.T. Joseph, Prentice Hall Of India</li> <li>• Frontiers of Electronics Commerce - Kalakota and Whinston, Pearson Education</li> </ul>			
<p><b>Suggested MOOC :</b> Swayam</p>			
<b>Course Plan</b>			
Unit	Contents		
1	<p><b>Introduction to E-Commerce:</b> Definition, E-commerce fundamentals, different types of E-commerce E-Commerce Infrastructure - The Internet and World Wide Web, Web system, Internet basics, Characteristics of Internet, Components of Internet – Uniform Resource Locators, Internet Protocol, Hypertext Transfer Protocol (HTTP), Internet Service Provider (ISP), Types of ISP, domain name, domain name types E-commerce vs Traditional Commerce, Networking Categories, Mobile Commerce</p>		
2	<p><b>Business Models for e-commerce:</b> Business-to-Consumer (B2C), Consumer-to-Consumer (C2C), Business-to-Business( B2B) <b>Electronic Data Interchange</b> Requirement of EDI, types of EDI, Advantages and Disadvantages of EDI</p>		
3	<p><b>E-commerce Payment System:</b> Limitations of traditional payment system, requirement of e-payment system, Internet payment systems - Credit card payment (e.g., SET protocol), E-cash, E-check, smart card, Electronic Funds Transfer, Digital Token Based E-Payment Systems, Modern Payment Systems, Steps for Electronic Payment, Payment Security, Net Banking</p>		

4	<p><b>Applications of E-Commerce:</b> E-commerce in banking, retailing, online publishing, online marketing, e-advertising, e-branding.</p>
5	<p><b>E-commerce Security:</b> Security issues, Privacy issues, Computer Security, security threats, security tools, Denial-of-Service attacks, Viruses, Unauthorized access to a computer network, Vulnerability of Internet Sites requirements, malicious code, intruders, attacking methods, Cryptography- encryption and decryption, public key encryption, private key cryptography, message digest, digital signature, digital certificate, firewalls, SSL. Firewall – Packet filtering, Application gateways.</p>
6	<p><b>Implementation of E-Commerce:</b> WWW.EBAY.COM - B2C Website – Registration, Growth of eBay, PayPal – New Trend in Making Payments Online, National Electronic Funds Transfer.</p>

### Elective Group: (III) Information Systems

Course Number	Course Name	L-T-P- Credits	Year of Introduction
605-3-B	Knowledge Management	3L+1T+0P=4C	2018
<p><b>Course Objective:</b> The objective of the course is to provide the basic skills of managing knowledge in organizations. Knowledge is an asset for retaining the competitive advantage of the organization. This course develops the capabilities of towards managing students to manage knowledge in organizations.</p>			
<p><b>Pre-requisites:</b> Knowledge about Information System and MIS with Implementation of MIS</p>			
<p><b>Expected Outcome :</b> After going through this course a student should be able to understand :</p> <ul style="list-style-type: none"> <li>• Will be able to understand the concepts of Knowledge and knowledge management .</li> <li>• Can be able to design and develop Knowledge management systems for Business applications .</li> <li>• Implementation of KM to various areas of Interest in Business Organizations .</li> </ul>			
<p><b>References (Books, Websites etc.):</b></p> <ol style="list-style-type: none"> <li>1. Madhukar Shukla:Competing Through Knowledge-Building a learning Organisation(Response Books, New Delhi.</li> <li>2. Tiwana, The Knowledge Management Toolkit: Practical Techniques for building a Knowledge Management Systmes, 2/e, Pearson Edu.</li> <li>3. Honey Cutt : “Knowledge Management Strategies”, PHI, New Delhi.</li> <li>4. A wad, KM, Pearson Edn, 2007.</li> <li>5. Barnes, Knowledge Management Systems, 1/e, Thomson 2006.</li> <li>6. Ikudiro Nonka &amp; Hirotaka Takeuchi, “ The Knowledge – Creating Company”, Oxford University Press, London.</li> </ol>			
<p><b>Suggested MOOC:</b> Please refer these websites for MOOC’s: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a></p>			
<b>Syllabus</b>			
Unit	Contents		
1	<p><b>Introduction:</b> Definition, Scope and Significance of Knowledge Management , Difficulties of Knowledge Management, Techniques of KM – Implementation of KM, Organizational knowledge, Characteristics and Components of Organizational Knowledge</p>		
2	<p><b>Drivers of knowledge Management:</b> Pillars of knowledge Management, KM framework , Supply Chain of KM , Formulation of KM strategy.</p>		
3	<p><b>Technology and KM:</b> Technology components of KM – IT &amp; KM , Ecommerce and KM</p>		

4	<p><b>Total Quality Management and KM:</b> TQM and KM , Bench marking and KM.</p>
5	<p><b>Implementation of KM:</b> Discussion on Roadblocks to success, Implementing a KM programme , Critical Success Factors in KM , Implementation of KM</p>
6	<p><b>KM and Organizational Restructuring:</b> The Mystique of Learning, Organization:- Outcomes of learning, Learning and Change – Innovation, continuous Improvements, Corporate Transformation.</p>
7	<p><b>Case studies in Knowledge Management</b> Knowledge management in Health Care, Knowledge Management in Human Resource Management</p>

**Teaching Scheme:**  
**Lectures: 3Hrs/Week**  
**Tutorials: 1Hr/Week**

**Examination scheme:**  
**Semester Examination: 60 marks**  
**Continuous Assessment: 40 marks**

**Credits Allotted:**  
**Theory : 03**  
**Tutorial : 01**

**Unit I**

**MATRICES**

Rank, Normal form, System of Linear Equations, Linear Dependence and Independence, Linear and Orthogonal Transformations. Eigen values, Eigen Vectors, Cayley – Hamilton Theorem. Application to problems in Engineering .

**(08 Hours)**

**Unit II**

**COMPLEX NUMBERS AND APPLICATIONS**

Definition, Cartesian, Polar and Exponential Forms ,Argand's Diagram, De'Moivre's theorem and its application to find roots of algebraic equations., Hyperbolic Functions, Logarithm of Complex Numbers, Separation into Real and Imaginary parts, Application to problems in Engineering.

**(08 Hours)**

**Unit III**

**DIFFERENTIAL CALCULUS**

Successive Differentiation, nth Derivatives of Standard Functions, Leibnitz's Theorem.

**EXPANSION OF FUNCTIONS**

Taylor's Series and Maclaurin's Series.

**(08 Hours)**

**Unit IV**

**DIFFERENTIAL CALCULUS**

Indeterminate Forms, L' Hospital's Rule, Evaluation of Limits.

**INFINITE SERIES**

Infinite Sequences, Infinite Series, Alternating Series, Tests for Convergence, Absolute and Conditional Convergence, Power series, Range of Convergence.

**(08 Hours)**

**Unit V**

**PARTIAL DIFFERENTIATION AND APPLICATIONS**

Partial Derivatives, Euler's Theorem on Homogeneous Functions, Implicit functions, Total Derivatives, Change of Independent Variables. Errors and Approximations.

**(08 Hours)**

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**Unit VI**

**JACOBIAN**

Jacobians and their applications, Chain Rule, Functional Dependence.

**MAXIMA AND MINIMA**

Maxima and Minima of Functions of two variables, Lagrange's method of undetermined multipliers.

**(08 Hours)**

**Assignments**

1. Rank ,System of Linear Equations.
2. Complex Numbers.
3. Differential Calculus and Expansion of Functions.
4. Indeterminate Forms and Infinite Series.
5. Partial Derivatives, Euler's Theorem on Homogeneous Functions.
6. Jacobians, Maxima and Minima of Functions of two variables.

**02: Fundamentals of Civil Engineering**

<b>TEACHING SCHEME:</b>		<b>EXAMINATION SCHEME:</b>		<b>CREDITS ALLOTTED:</b>	
Theory: 03 Hours / Week		End Semester Examination: 60 Marks		03 Credits	
Practical: 02 Hours / Week		Continuous Assessment: 40 Marks			
		Term Work: 25 Marks		01 Credit	
<b>Course Pre-requisites:</b>					
The Students should have					
1.	Concepts of units and conversions of units.				
2.	Basic knowledge of Chemistry				
3.	Basic knowledge of geography, concept of latitude and longitude.				
<b>Course Objectives:</b>					
To make student understand the scope and application of Civil Engineering					
<b>Course Outcomes:</b>					
Students will be able to understand					
1.	Different building components and material				
2.	Classification of surveying				
3.	Levelling of the ground				
4.	Planning of building				
5.	Methods of irrigation and water supply				
6.	Different methods of transportation				
<b>UNIT - I</b>	<b>Civil Engineering Scope And Applications.</b>				<b>(06 Hours)</b>
	Civil Engineering scope, importance and applications to other disciplines of Engineering; Civil Engineering construction process and role of Civil engineer; Government authorities related to Civil Engineering; Types of structures based on loading, material and configuration; Building components and their functions; Civil Engineering materials: concrete, construction steel, bricks, flooring material and tiles, paints, plywood, glass and aluminum.				
<b>UNIT - II</b>	<b>Surveying</b>				<b>(06 Hours)</b>
	Objectives, Principles and Classification of Surveying; Linear, angular, Vertical and area Measurements and related instruments.				
<b>UNIT - III</b>	<b>Building Planning And Bye Laws</b>				<b>(06 Hours)</b>
	Site selection for residential building; Principles of building planning; Building bye laws- necessity, Floor Space Index, Heights, open space requirements, set back distance, ventilation and lighting, concept of carpet and built up area, minimum areas and sizes for residential buildings; Concept of Eco friendly structures and Intelligent buildings.				
<b>UNIT - IV</b>	<b>Foundations and Earthquakes</b>				<b>(06 Hours)</b>
	Function of foundation, concept of bearing capacity and its estimation, types of foundation and its suitability, causes of failure of foundation. Earthquakes causes, effects and guidelines for earthquake resistant design, earthquake zones.				
<b>UNIT - V</b>	<b>Irrigation And Water Supply</b>				<b>(06 Hours)</b>
	Rainfall measurement and its use in design of dams; Types of dams, canals, methods of irrigation and their merits and demerits; hydropower structures; Water supply, drinking water requirements and its quality, water and				

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

	sewage treatment flow chart.	
<b>UNIT - VI</b>	<b>Infrastructure</b>	<b>(06 Hours)</b>
	Roads- types of roads and their suitability, cross section of roads, meaning of terms ; width of roads, super elevation, camber, gradient ,sight distance, materials used for construction of roads. Railways- Types of gauges, section of railway track, components of railway track, advantages. Bridges: Components - Foundation, Piers, Bearings, Deck. Airways- Components -Runway, Taxiway and Hangers.	
<b>Term Work:</b>		
( Term work shall consist of any eight exercises from the list given below.)		
1.	Study and use of prismatic compass and measurement of bearings.	
2.	Study and use of Dumpy level and reduction of levels by collimation plane method.	
3.	Area measurement by Digital Planimeter.	
4.	Drawing plan and elevation of a residential bungalow.	
5.	Study of features of topographical maps.	
6.	Assignment on collection of information on Civil Engineering materials.	
7.	Assignment on types of foundations.	
8.	Assignment problem on irrigation and hydropower structures.	
9.	Assignment on study of flow chart of water and sewage treatment.	
10.	Assignments on types of transportation systems.	
<b>Text Books:</b>		
1.	“ Surveying- Vol I “ - S.K. Duggal , Tata McGraw Hill Publication.	
2.	“Built Environment” – Shah , Kale, Patki, , Tata McGraw Hill Publication	
3.	“Building Construction” – Dr. B.C. Punmia , Laxmi Publication	
4.	“Irrigation and water Power Engineering “- Dr. P.N. Modi,Standard Publishers ,New Delhi	
5.	“Text book of Transportation Engineering “- Arora, Charotar Publishers.	
6.	Water supply and sanitary engineering-Rangawala, Charotar Publishers.	
7.	“Basic Civil engineering”- M.S. Palanichamy- Tata McGraw Hill Publication

<b>Syllabus for Unit Test:</b>		
Unit Test -1	Unit I to III	
Unit Test -2	Unit IV to VI	

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**ENGINEERING GRAPHICS**

<b>Teaching Scheme:</b>	<b>Examination Scheme:</b>	<b>Credits Allotted</b>
Theory: -04 Hours / Week	End Semester Examination: - 60Marks	<u>05</u>
Practical: 02 Hours / Week	Continuous Assessment: -40Marks	
	Term Work: 25 Marks	

Unit I	<p><b>Lines and Dimensioning in Engineering Drawing</b> Different types of lines used in drawing practice, Dimensioning – linear, angular, aligned system, unidirectional system, parallel dimensioning, chain dimensioning, location dimension and size dimension.</p> <p><b>Curves used in Engineering Practice</b> Ellipse by Directrix-Focus method, Arcs of Circle method, Concentric circle method and Oblong method. Involute of a circle, Cycloid, Archimedean Spiral, Helix on cone, Loci of points- Slider Crank mechanisms.</p>	(6)
Unit II	<p><b>Orthographic Projection</b> Basic principles of orthographic projection (First and Third angle method). Orthographic projection of objects by first angle projection method only. Procedure for preparing scaled drawing, sectional views and types of cutting planes and their representation, hatching of sections.</p>	(6)
Unit III	<p><b>Isometric Projections</b> Isometric view, Isometric scale to draw Isometric projection, Non-Isometric lines, and construction of Isometric view from given orthographic views and to construct Isometric view of a Pyramid, Cone, and Sphere.</p>	(6)
Unit IV	<p><b>Projections of Points and Lines and planes</b> Projections of points, projections of lines, lines inclined to one reference plane, Lines inclined to both reference planes. (Lines in First Quadrant Only) Traces of lines, Projections of Planes, Angle between two planes, Distance of a point from a given plane, Inclination of the plane with HP, VP</p>	(6)
Unit V	<p><b>Projection of Solids</b> Projection of prism, pyramid, cone and cylinder by rotation method.</p>	(6)
Unit VI	<p><b>Section of Solids</b> Types of section planes, projections of solids cut by different sections of prism, pyramid, cone and cylinder.</p>	(6)

**Term work**

Term work shall consist of five half-imperial size or A2 size (594 mm x 420 mm) sheets.

Assignment 05 Problems on each unit in A3 size Drawing Book

**SHEETS**

1. Types of lines, Dimensioning practice, Free hand lettering, 1st and 3rd angle methods symbol.

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

2. Curves and loci of points
3. Projections of Points and Lines and planes
4. Orthographic Projections
5. Isometric views
6. Projection of Solids

**Text Books**

1. "Elementary Engineering Drawing", N.D. Bhatt, Charotar Publishing house, Anand India,
2. "Text Book on Engineering Drawing", K.L.Narayana & P.Kannaiah, Scitech Publications, Chennai.
3. "Fundamentals of Engineering Drawing", Warren J. Luzzader, Prentice Hall of India, New Delhi ,
4. "Engineering Drawing and Graphics", Venugopal K., New Age International Publishers.
5. M. B. Shah and B. C. Rana, "Engineering Drawing", 1st Ed, Pearson Education, 2005
6. P. S. Gill, "Engineering Drawing (Geometrical Drawing)", 10 Edition, S. K. Kataria and Sons, 2005
7. P. J. Shah, "Engineering Drawing", C. Jamnadas and Co., 1 Edition, 1988

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**ENGINEERING PHYSICS**

<b>Teaching Scheme:</b>	<b>Examination scheme:</b>	<b>Credits Allotted:</b>
<b>Lectures: 4Hrs/Week</b>	<b>End Semester Examination: 60 marks</b>	<b>Theory: 04</b>
<b>Practical: 2Hr/Week</b>	<b>Continuous Assessment: 40 marks</b> <b>Term Work: 25marks</b>	<b>Practical: 01</b>

**UNIT – I**

**MODERN PHYSICS**

Motion of a charged particle in electric and magnetic fields, Electrostatic and Magnetostatic focussing, Wavelength and resolution, Specimen limitation, Depth of field and focus, Electron microscope, Positive rays, Separation of isotopes by Bainbridge mass spectrograph.

**NUCLEAR PHYSICS**

Nuclear fission, Liquid drop model of nucleus, Nuclear fission in natural uranium, Fission energy, Critical mass and size, Reproduction factor, Chain reaction and four factor formula, Nuclear fuel and power reactor, Nuclear fusion and thermonuclear reactions, Merits and demerits of nuclear energy, Particle accelerators, Cyclotron, Betatron,

**(08hours)**

**UNIT – II**

**SOLID STATE PHYSICS**

Band theory of solids, Free electron theory, Fermi-Dirac probability function and position of Fermi level in intrinsic semi-conductors (with derivation) and in extrinsic semi-conductors, Band structure of p-n junction diode under forward and reverse biasing, Conductivity in conductor and semi-conductor, Hall effect and Hall coefficient, Photovoltaic effect, Solar cell and its characteristics.

**SUPERCONDUCTIVITY**

Introduction, Properties of a super conductor, Meissner's effect, Critical field, Types of superconductors, BCS theory, High temperature superconductors, Application of superconductors.

**(08hours)**

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**UNIT – III**

**THERMODYNAMICS**

Zeroth law of thermodynamics, first law of thermodynamics, determination of  $J$  by Joule's method, Applications of first law, heat engines, Carnot's cycle and Carnot's engine, second law of thermodynamics, entropy, change in entropy in reversible and irreversible processes, third law of thermodynamics.

**NANOSCIENCE**

Introductions of nanoparticles, properties of nanoparticles (Optical, electrical, Magnetic, structural, mechanical), synthesis of nanoparticles (Physical and chemical), synthesis of colloids, growth of nanoparticles, synthesis of nanoparticles by colloidal route, applications.

**(08hours)**

**UNIT-IV**

**OPTICS - I**

**INTERFERENCE**

Interference of waves, Visibility of fringes, interference due to thin film of uniform and non-uniform thickness, Newton's rings, Engineering applications of interference (optical flatness, interference filter, non-reflecting coatings, multi-layer ARC).

**DIFFRACTION**

Classes of diffraction, Diffraction at a single slit (Geometrical method), Conditions for maximum and minimum, Diffraction at a circular aperture (Result only), Plane diffraction grating, Conditions for principal maxima and minima, Rayleigh's criterion for resolution, Resolving power of grating and telescope.

**(08 hours)**

**UNIT-V**

**OPTICS - II**

**POLARISATION**

Introduction, Double refraction and Huygen's theory, Positive and negative crystals, Nicol prism, Dichroism, Polaroids, Elliptical and circular polarisation, Quarter and half wave plates, Production of polarised light, Analysis of polarised light, half shade polarimeter, LCD.

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**LASERS**

Spontaneous and stimulated emission, Population inversion, Ruby laser, Helium-Neon laser, Semiconductor laser, Properties of lasers, Applications of lasers (Engineering/ industry, medicine, communication, Computers), Holography.

**(08 Hours)**

**UNIT-VI**

**ARCHITECTURAL ACOUSTICS**

Elementary acoustics, Limits of audibility, Reverberation and reverberation time, Sabine's formula, Intensity level, Sound intensity level, Sound absorption, Sound absorption coefficient, different types of noise and their remedies, Sound absorption materials, basic requirement for acoustically good hall, factors affecting the architectural acoustics and their remedies.

**QUANTUM MECHANICS**

Electron diffraction, Davisson and Germer's experiment, Wave nature of matter, De-Broglie waves, Wavelength of matter waves, Physical significance of wave function, Schrodinger's time dependant and time independent wave equation, Application of Schrodinger's time independent wave equation to the problems of Particle in a rigid box and non rigid box.

**(08hours)**

**TERM WORK**

**Experiments**

Any ten experiments from the following:

1. Determination of band gap of semi-conductor.
2. Solar cell characteristics.
3.  $e/m$  by Thomson's method.
4. Uses of CRO for measurement of phase difference and Lissajos figures.
5. Hall effect and Hall coefficient.
6. Conductivity by four probe method.
7. Diode characteristics (Zener diode, Photo diode, LED, Ge/Si diode).
8. Plank's constant by photodiode.
9. Wavelength by diffraction grating.
10. Newton's rings.
11. Ultrasonic interferometer.
12. Sound intensity level measurement.
13. Wavelength of laser by diffraction.
14. Determination of refractive index for O-ray and E-ray.
15. Brewester's law.

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**Assignments**

1. Recent advances in Nanotechnology
2. Nuclear radiation detectors.
3. Atomic force microscope (AFM).
4. Advanced opto-electronic devices.
5. Laser in Industry.
6. Different spectroscopic methods – a comparison (Raman, IR, UVR, etc.).

**Unit Tests:**

Unit Test I : Unit I, II, III

Unit Test II: Unit IV, V, VI

***Reference Books:***

5. Fundamentals of Optics – Jenkins and White
6. A Textbook of Sound – Wood
7. Engineering Physics – Sen, Gaur and Gupta

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**02: Fundamentals of Electrical Engineering**

<b>TEACHING SCHEME:</b>		<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 04 Hours / Week		End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week		Continuous Assessment: 40 Marks	
		Term Work: 25 Marks	01 Credit
<b>Course Pre-requisites:</b>			
The Students should have			
1.	Mathematics		
2.	Physics		
<b>Course Objectives:</b>			
	The course introduces fundamental concepts of DC and AC circuits, electromagnetism, transformer and measuring instruments and electronic components to all first year engineering students.		
<b>Course Outcomes:</b>			
1.	Understand and apply knowledge of basic concepts of work ,power ,energy for electrical, mechanical and thermal systems		
2.	Understand and apply knowledge of Kirchoff's laws and network theorems to solve electrical networks		
3.	Describe construction, principle of operation, specifications and applications of capacitors and batteries		
4.	Describe and apply fundamental concepts of magnetic and electromagnetic circuits for operation of single phase transformer		
5.	Define basic terms of single phase and three phase ac circuits and supply systems		
6.	Know and use electrical safety rules		
<b>UNIT - I</b>	<b>Basic concepts</b>		<b>(06 Hours)</b>
	Concept of EMF, Potential Difference, current, resistance, Ohms law, resistance temperature coefficient, SI units of Work, power, energy. Conversion of energy from one form to another in electrical, mechanical and thermal systems		
<b>UNIT - II</b>	<b>Network Theorems</b>		<b>(06 Hours)</b>
	Voltage source and current sources, ideal and practical, Kirchoff's laws and applications to network solutions using mesh analysis, Simplifications of networks using series- parallel, Star/Delta transformation. Superposition theorem, Thevenin's theorem, Max Power Transfer theorem.		
<b>UNIT - III</b>	<b>Electrostatics</b>		<b>(06 Hours)</b>
	Electrostatic field, electric field intensity, electric field strength, absolute permittivity, relative permittivity, capacitor composite, dielectric capacitors, capacitors in series& parallel, energy stored in capacitors, charging and discharging of capacitors, Batteries-Types, Construction& working.		

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

<b>UNIT - IV</b>	<b>Magnetic Circuit &amp; Transformer</b>	<b>(06 Hours)</b>
	<p>Magnetic effect of electric current, cross and dot convention, right hand thumb rule, concept of flux, flux linkages, Flux Density, Magnetic field, magnetic field strength, magnetic field intensity, absolute permeability, relative permeability, B-H curve, hysteresis loop, series-parallel magnetic circuit, composite magnetic circuit, Comparison of electrical and magnetic circuit</p> <p>Farady's law of electromagnetic induction, statically and dynamically induced emf, self inductance, mutual inductance, coefficient of coupling, Single phase transformer construction, principle of operation, EMF equation, voltage ratio, current ratio, kVA rating, losses in transformer, Determination of Efficiency &amp; Regulation by direct load test.</p>	
<b>UNIT - V</b>	<b>AC Fundamentals &amp; AC Circuits</b>	<b>(06 Hours)</b>
	<p>AC waveform definitions , form factor, peak factor, study of R-L, R-C, RLC series circuit, R-L-C parallel circuit, phasor representation in polar &amp; rectangular form, concept of impedance, admittance, active, reactive, apparent and complex power, power factor, 3-ph AC Circuits.</p>	
<b>UNIT - VI</b>	<b>Electrical Wiring and Illumination system</b>	<b>(06 Hours)</b>
	<p>Basic layout of distribution system, Types of Wiring System &amp; Wiring Accessories, Necessity of earthing, Types of earthing, Different types of lamps (Incandescent, Fluorescent, Sodium Vapour, Mercury Vapour, Metal Halide, CFL, LED), Study of Electricity bill.</p>	

**Term Work:**

The term work shall consist of record of minimum eight exercises / experiments.

1. Determination of resistance temperature coefficient
2. Verification of Superposition Theorem
3. Verification of Thevenin's Theorem
4. Verification of Kirchoff's Laws
5. Verification of Maximum power transfer Theorem
6. Time response of RC circuit
7. Study of R-L-C series circuits for  $X_L > X_C$  ,  $X_L < X_C$  &  $X_L = X_C$
8. Verification of current relations in three phase balanced star and delta connected loads.
9. Direct loading test on Single phase transformer
  - a) Voltage and current ratios.
  - b) Efficiency and regulations .
10. Study of a Residential (L.T.) Bill

**Text Books:**

3. John Omalley Shawn – “Basic circuits analysis” Mc Graw Hill Publications	
4. Vincent Del Toro – “Principles of Electrical Engineering”, PHI Publications	
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**Workshop Technology**

**TEACHING SCHEME:**

Theory: -  
Practical: 02 Hours / Week

**EXAMINATION SCHEME:**

End Semester Examination: -  
Continuous Assessment: -  
Term Work: 50 Marks

**CREDITS ALLOTTED:**

01 Credit

**Course Pre-requisites:** Basic knowledge of hand tools used in day to day life.

**Course Objectives:** Make the students familiar with basic manufacturing processes

**Course Outcomes:** students should be able to understand

1. basic Manufacturing Processes used in the industry,
2. importance of safety

**Term work shall consist of any three jobs, demonstrations on rest of the trades and journal consisting of six assignments one on each of the following topics.**

**Carpentry- Introduction** to wood working, kinds of woods, hand tools & machines, Types of joints, wood turning. Pattern making, types of patterns, contraction, draft & machining allowances  
Term work includes one job involving joint and woodturning.

**Fitting-** Types of Fits, concepts of interchangeability, datum selection, location layout, marking, cutting, shearing, chipping, sizing of metals, drilling and tapping.  
Term work to include one job involving fitting to size, male-female fitting with drilling and tapping.

**Sheet Metal Practice** Introduction to primary technology processes involving bending, punching and drawing various sheet metal joints, development of joints.

**Joining-** Includes making temporary and permanent joints between similar and dissimilar material by processes of chemical bonding, mechanical fasteners and fusion technologies.  
Term work includes one job involving various joining processes like riveting, joining of plastics, welding, brazing, etc.

**Forging** -Hot working, cold working processes, forging materials, hand tools & appliances, Hand forging, Power Forging.

**Moulding** -Principles of moulding, methods, core & core boxes, preparation of foundry sand, casting, Plastic moulding.

**Plumbing (Demonstration Common for Electrical & Non electrical Group)**

Types of pipe joints, threading dies, Pipe fittings.

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**ENGINEERING MATHEMATICS-II**

**Teaching Scheme:**  
**Lectures: 3Hrs/Week**  
**Tutorials: 1Hr/Week**

**Examination scheme:**  
**End Semester Examination: 60 marks**  
**Continuous Assessment: 40 marks**

**Credits Allotted:**  
**Theory : 03**  
**Tutorial : 01**

**Unit I**

**DIFFERENTIAL EQUATIONS (DE)**

Definition, Order and Degree of DE, Formation of DE. Solutions of Variable Separable DE, Exact DE, Linear DE and reducible to these types.

**(08 Hours)**

**Unit II**

**APPLICATIONS OF DIFFERENTIAL EQUATIONS**

Applications of DE to Orthogonal Trajectories, Newton's Law of Cooling, Kirchoff's Law of Electrical Circuits, Motion under Gravity, Rectilinear Motion, Simple Harmonic Motion, One-Dimensional Conduction of Heat, Chemical engineering problems.

**(08 Hours)**

**Unit III**

**FOURIER SERIES**

Definition, Dirichlet's conditions, Fourier Series and Half Range Fourier Series, Harmonic Analysis.

**INTEGRAL CALCULUS**

Reduction formulae, Beta and Gamma functions.

**(08 Hours)**

**Unit IV**

**INTEGRAL CALCULUS**

Differentiation Under the Integral Sign, Error functions.

**CURVE TRACING**

Tracing of Curves, Cartesian, Polar and Parametric Curves. Rectification of Curves.

**(08 Hours)**

**Unit V**

**SOLID GEOMETRY**

Cartesian, Spherical Polar and Cylindrical Coordinate Systems. Sphere, Cone and Cylinder.

**(08 Hours)**

**Unit VI**

**MULTIPLE INTEGRALS AND THEIR APPLICATIONS**

Double and Triple integrations, Applications to Area, Volume, Mean and Root Mean Square Values.

**(08 Hours)**

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**Assignments**

1. Differential Equations.
2. Application of DE.
3. Fourier Series and Integral Calculus.
4. DUIS and Curve Tracing.
5. Solid Geometry.
6. Double and Triple integrations, area and volume.

**Syllabus for Unit Test:**

**Unit Test I :- Unit I,II,III**

**Unit Test II :- Unit IV,V,VI**

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**FUNDAMENTALS OF MECHANICAL ENGINEERING**

<b>Teaching Scheme:</b>	<b>Examination Scheme:</b>	<b>Credits Allotted</b>
Theory: -03Hours / Week	End Semester Examination: - 60Marks	<u>04</u>
Practical: 02 Hours / Week	Continuous Assessment: -40Marks	
	Term Work: 25 Marks	

UNIT-I	<p><b>Thermodynamics-</b> Heat, work and Internal Energy, Thermodynamic State, Process, Cycle, Thermodynamic System, First Law of Thermodynamics, Application of First Law to steady Flow and Non Flow processes, Limitations of First Law, PMM of first kind (Numerical Treatment), Second Law of Thermodynamics – Statements, Carnot Engine and Carnot Refrigerator, PMM of Second Kind (Elementary treatment only)</p>	(08)
UNIT-II	<p><b>Introduction to I.C. Engines and turbines-</b> Two stroke, Four Stroke Cycles, Construction and Working of C.I. and S.I. Engines, Hydraulic turbines, steam turbines, gas turbines.(Theoretical study using schematic diagrams)</p> <p><b>Introduction to refrigeration, compressors &amp; pumps-</b> Vapor compression and vapor absorption system, house hold refrigerator, window air conditioner. Reciprocating and rotary compressor, Reciprocating and centrifugal pump. (Theoretical study using schematic diagrams)</p>	(08)
UNIT-III	<p><b>Energy Sources -</b> Renewable and nonrenewable, solar flat plate collector, Wind, Geothermal, Wave, Tidal, Hydro power, Bio-gas, Bio-Diesel, Nuclear power.</p> <p><b>Heat transfer-</b> Statement and explanation of Fourier’s law of heat conduction, Newton’s law of cooling, Stefan Boltzmann’s law. Conducting and insulating materials and their properties, types of heat exchangers and their applications.</p>	(08)

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

UNIT-IV	<p><b>Properties of fluids-</b> Introduction, Units of measurements, mass density, specific weight, specific volume and relative density, viscosity, pressure, compressibility and elasticity, gas laws, vapor pressure, surface tension and capillarity, regimes in fluid mechanics, fluid properties and analysis of fluid flow.</p> <p><b>Properties of Materials and their Applications-</b> Metals – Ferrous and Non-Ferrous, Nonmetallic materials, smart materials, Material selection criteria.</p>	(08)
UNIT-V	<p><b>Mechanical devices -</b> Types of Belts and belt drives, Chain drive, Types of gears, Types of Couplings, friction clutch (cone and plate), brakes, Power transmission shafts, axles, keys, bush and ball bearings.</p> <p><b>Mechanisms-</b> Slider crank mechanism, Four bar chain mechanism, List of various inversions of Four bar chain mechanism, Geneva mechanism, Ratchet and Paul mechanism</p>	(08)
UNIT-VI	<p><b>Machine Tools-</b> Lathe Machine – Centre Lathe, Drilling Machine – Study of Pillar drilling machine, Introduction to NC and CNC machines, Grinding machine, Power saw, Milling Machine.</p> <p><b>Introduction to manufacturing processes and Their Applications-</b> Casting, Sheet metal forming, Sheet metal cutting, Forging, Fabrication, Metal joining processes.</p>	(08)

**List of experiments-**

The Term Work shall consist of **any Eight** experiments of following list

1	Measurement of viscosity using Redwood viscometer.
2	Assembly and working of 4-bar, 6-bar, 8-bar planer mechanisms
3	Finding relation between input angle and output angle for various link lengths.
4	Study of domestic refrigerator & window air-conditioner
5	Demonstration of operations of centre lathe
6	Demonstration of operations on drilling machines
7	Demonstration of Two stroke and four stroke engine
8	Study of power transmitting elements: Coupling, Gears and bearings
9	Demonstration of pumps and compressor
10	Study and demonstration of different types of clutches.

<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks	01 Credit

**Course Pre-requisites:**

The Students should have knowledge of

1. Scalar and Vector
2. Newton's law of motion
3. Law of friction
4. Concept of physical quantities, their units and conversion of units
5. Concept of differentiation and integration

**Course Objectives:**

To develop and apply the concept of resultant and equilibrium for various static and dynamic engineering problems.

**Course Outcomes:**

**The student should be able to**

1. calculate resultant and apply conditions of equilibrium.
2. analyze the truss and calculate friction force.
3. calculate centroid and moment of inertia.
4. solve problem on rectilinear motion.
5. solve problems on curvilinear motion.
6. use D'Alembert's principle, Work Energy principle and Impulse Momentum principle for particle.

<b>UNIT - I</b>	<b>Resultant and Equilibrium</b>	<b>(06 Hours)</b>
	Types and Resolution of forces, Moment and Couple, Free Body Diagram, Types of Supports, Classification and Resultant of a force system in a Plane - Analytical and Graphical approach.. Equilibrant, Conditions of Equilibrium, Equilibrium of a force system in a Plane, Force and Couple system about a point.	
<b>UNIT - II</b>	<b>Truss and Friction</b>	<b>(06 Hours)</b>
	Coefficient of Static Friction, Impending motion of Blocks, Ladders and Belts. Analysis of Perfect Trusses - Method of Joint, Method of Section and Graphical Method.	
<b>UNIT - III</b>	<b>Centroid and Moment of Inertia</b>	<b>(06 Hours)</b>
	Centroid of line and plane areas, Moment of Inertia of plane areas, parallel and perpendicular axis theorem, radius of gyration, least moment of inertia.	
<b>UNIT - IV</b>	<b>Kinematics of Rectilinear motion of a Particle</b>	<b>(06 Hours)</b>
	Equations of motion, Constant and variable acceleration, Motion Curves,	

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

	Relative motion, Dependent motion.	
<b>UNIT - V</b>	<b>Kinematics of Curvilinear motion of a Particle</b>	<b>(06 Hours)</b>
	Motion of a Projectile, Cartesian components, Normal and Tangential components of a curvilinear motion.	
<b>UNIT - VI</b>	<b>Kinetics of a Particle</b>	<b>(06 Hours)</b>
	D'Alemberts Principle, Work-Energy Principle and Impulse-Momentum Principle, Coefficient of Restitution, Direct Central Impact.	
<b>Term Work:</b>		
<b>A)</b> The term-work shall consist of minimum <b>Five</b> experiments from list below.		
1. Determination of reactions of Simple and Compound beam.		
2. Study of equilibrium of concurrent force system in a plane.		
3. Determination of coefficient of friction for Flat Belt.		
4. Determination of coefficient of friction for Rope.		
5. Study of Curvilinear motion.		
6. Determination of Coefficient of Restitution.		
<b>B)</b> The term-work shall also consist of minimum <b>Five</b> graphical solutions of the problems on different topics.		
<b>Text Books:</b>

<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I to III	
Unit Test -2	UNIT – IV to VI	

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

**ENGINEERING CHEMISTRY**

**Teaching Scheme:**  
**Lectures: 4Hrs/Week**  
**Practical: 2Hr/Week**

**Examination scheme:**  
**End Semester Examination: 60 marks**  
**Continuous Assessment: 40 marks**

**Credits Allotted:**  
**Theory: 04**  
**Practical: 01**  
**Term Work: 25marks**

**Unit I**

**WATER**

Introduction, Hardness of water, Effect of hard water on boilers and heat exchangers: a) boiler corrosion b) caustic embrittlement c) scales and sludges d) priming and foaming  
Water softening methods for industrial purposes :a) Zeolite process b) Phosphate conditioning Numerical based on the zeolite process  
**(08 Hours)**

**Unit II**

**MATERIAL CHEMISTRY**

**Crystallography** : Unit cell, Laws of crystallography, Weiss indices and Miller indices, Crystal defects (point and line defects), X-ray diffraction – Bragg's Law and numerical.  
**Cement** : Introduction of cement, Hydraulic/ Non-hydraulic cementing materials, classification of cement, chemistry of portland cement, chemical composition and compound constituents of portland cement, properties of cement and its applications.  
**(08 Hours)**

**Unit III**

**FUELS**

Introduction, classification of fuels, calorific value of fuels, NCV and GCV, Determination of calorific values using Bomb calorimeter and Boys' gas calorimeter.  
Theoretical calculation of calorific value of a fuel, Analysis of coal a) Proximate b) Ultimate analysis of coal, Numericals based on NCV, GCV.  
**(08 Hours)**

**Unit IV**

**CORROSION AND ITS PREVENTION**

Corrosion: - Definition, atmospheric corrosion-mechanism, Wet corrosion-mechanism, Electrochemical and galvanic series, Factors affecting corrosion-nature of metal, nature of environment.  
Methods of prevention of corrosion- Cathodic and Anodic protection, Metallic coatings, Electroplating, Hot dipping.  
**(08 Hours)**

**Unit V**

**ELECTROCHEMISTRY**

Introduction, Arrhenius Ionic theory, Kohlrausch's law of independent migration of ions  
Laws of electrolysis: Faradays Laws, Ostwald's dilution law, Acids and Bases, concept of pH and pOH, Buffer solutions, Solubility Product, Redox Reactions.  
Electrode Potential, electrochemical cell, concentration cell, reference Electrodes, Overvoltage, Conductometric Titrations, Fuel cells, Lead Acid Storage Cell and numericals based on the above articles.  
**(08 Hours)**

**Unit VI**

**STEREOCHEMISTRY**

Introduction, chirality, optical activity, Enantiomers, Diastereomers, projection formula of tetrahedral carbon- Newman projection, Wedge projection, Fischer projection, Geometrical isomerism :- cis and trans isomerism, E and Z isomers

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

Optical isomerism :- Mesoform, the number of optical isomers for chiral molecules,  
Conformations :- conformations of ethane, conformations of n-butane

**(08 Hours)**

**TERM WORK**

**Experiments**

**Any Ten experiments from the following:**

1. Estimation of hardness of water by EDTA method.
2. Estimation of chlorine by Mohr's method.
3. Determination of percentage of Ca in given cement sample
4. Determination of coefficient of viscosity by Ostwald's viscometer
5. Study of Bomb calorimeter for determination of calorific value.
6. Determination of calorific value of gas fuel by using Boy's gas calorimeter.
7. Determination of dissolved oxygen in a water sample.
8. To determine the Molecular Weight of polymer
9. Estimation of Copper from brass sample solution by Iodometrically
10. Estimation of percentage of Iron in Plain Carbon Steel by Volumetric Method
11. To standardize NaOH solution and hence find out the strength of given hydrochloric Acid solution
12. To determine Surface Tension of given liquid by Stalagmometer
13. Study of corrosion of metals in medium of different pH.
14. To set up Daniel cell
15. To determine pH of soil
16. To determine Acidity of soil

**Assignments**

7. Effect of hard water on boilers and heat exchangers
8. Hydraulic/ Non-hydraulic cementing materials
9. Analysis of coal a) Proximate b) ultimate analysis of coal
10. Wet corrosion-mechanism, Electroplating, Hot dipping
11. Geometrical isomerism :- cis and trans isomerism, E and Z isomers
12. Fuel cells

**References / Text Books :**

7. Engineering Chemistry by Jain and Jain, Dhanpat Rai Company (P) Ltd, New Delhi
8. Chemistry of Engineering Materials, Agarwal C.V, Rata Publication Varanasi, 6<sup>th</sup> edition (1979)
9. Chemistry in Engineering and Technology, Volume W, Tata McGraw Hill Publishing Company Ltd, New Delhi (1988)
10. Applied Chemistry, O. P. Vidyankar, J. Publications, Madurai, (1955)
11. Engineering Chemistry, S. N. Chand and Co., Jalandhar, 31st Edition (1990)
12. Engineering Chemistry by Dara S. S. S Chand Publications
13. Fundamentals of Electrochemistry, V. S. Bagotsky (Ed) Wiley NY (2006)

**Syllabus for Unit Test:**

**Unit Test I :- Unit I,II,III**

**Unit Test II :- Unit IV,V,VI**

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

<b>02: Electrical &amp; Electronic Devices</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1.	Fundamentals of semiconductor physics	
<b>Course Objectives:</b>		
	This course introduces basic knowledge about electrical and electronics devices and measuring instruments .The course is designed for beginners to learn specifications, construction, characteristics and application circuits of It also introduces concepts of digital components	
<b>Course Outcomes:</b>		
1.	Classify different resistors, inductors and capacitors and select as per the application requirement.	
2.	Explain construction, characteristics, principle of operation of PMMC,MI, dynamometer type instruments and errors associated with them.	
3.	Describe and apply different methods of resistance measurement.	
4	Identify and describe electronic components, their circuits and electronic instruments (Diode, zener diode , LED, opto electronic device and CRO. Function generator, Digital mutimeter)	
5	Explain characteristics, principle of operation and applications of transistor and FET.	
6	Draw diagram and explain operation of transistor amplifiers , multivibrators and oscillators	
<b>UNIT - I</b>	<b>Electrical Components</b>	<b>(06 Hours)</b>
	Types of Resistors (Fixed, Variable, Precision-Carbon film, metal film, wire wound) ,their standard values, specifications and applications, Classification of capacitors based on dielectrics(Electrolytic, Ceramic, Polyester), their standard values, specifications and applications, Types of Inductors, Specifications & applications, Ferrite core, electromagnets	
<b>UNIT - II</b>	<b>Electrical Measuring Instruments</b>	<b>(06 Hours)</b>
	Static characteristics of an instrument, Accuracy, linearity, sensitivity, reproducibility, resolution, Types of errors, necessity of different torques in indicating instruments, recording instrument integrating instrument., Measurement of current and voltage : Construction, Principle of operation torque equation and sources of errors in PMMC, Moving Iron instrument, dynamometer type instrument, Extension of ranges using shunts and multipliers. Galvanometer: construction, principle of operation of D'Arsonval, vibration and ballistic galvanometer.	
<b>UNIT - III</b>	<b>Measurement of Resistance</b>	<b>(06 Hours)</b>
	Classification of resistances , measurement of Medium resistance ,	

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

	ammeter voltmeter method , Wheatstone bridge, sensitivity of Wheatstone bridge, limitations of the method , measurement of low resistance .D.C. Potentiometer- Calibration of ammeter and voltmeter application, Kelvin bridge, Ohmmeter , measurement of high resistance , difficulties in measurement , use of guard circuit, direct deflection method , loss of charge method , earth tester and measurement of earth resistance, megger.	
<b>UNIT - IV</b>	<b>Basic Electronic Devices</b>	<b>(06 Hours)</b>
	Diode construction, characteristics , Half wave and full wave rectifier, filters, clipping and clamping circuits, zener diode, LED, seven segment display, photodiode , photo transistor ,opto coupler and optoisolator, DC regulated power supply, Series , Shunt regulator, line and load regulation, Three pin regulator ICs, Function Generator block diagram and working, front panel controls . Cathode Ray Oscilloscope block diagram and working, front panel controls, measurement of voltage and frequency , Digital multimeter block diagram and working	
<b>UNIT - V</b>	<b>BJT Circuits</b>	<b>(06 Hours)</b>
	Construction, characteristics and principle of operation of CE, CB, CC configuration, comparison, biasing circuits, DC operating point Transistor as an amplifier, current gain, $\alpha$ , $\beta$ relationships, voltage gain , other parameters ,Hybrid parameters ( for CE only), frequency response of amplifier . FET construction, characteristics, principle of operation, parameters, FET as an amplifier, Comparison of BJT and FET	
<b>UNIT - VI</b>	<b>Amplifiers &amp; Multivibrators</b>	<b>(06 Hours)</b>
	Multistage transistor amplifier- direct, RC coupled and transformer coupled , Classes of Power amplifiers , efficiency of operation, Feedback amplifiers , concept effect of feedback on gain Transistor Oscillators- Tuned collector, Colpitt's, Hartley, Wien Bridge , RC phase shift oscillator , Transistor as switch - Multivibrators - Astable, Mono stable , Bi-stable.	

**Term Work:**

The term work shall consists of record of minimum eight experiments. Four from first 6 and four from next 6 out of given below.

1. Study of data sheets & specifications of Electrical Components
2. Study of PMMC,MI & Dynamometer type electrical measuring instruments.
3. Measurement of low resistance by Kelvin's Double Bridge.
4. Measurement of resistance by Voltmeter –Ammeter method.
5. Measurement of earth resistance.
6. Study and use of Megger.
7. Use of cathode ray oscilloscope for voltage and frequency measurement

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

8. Study of half wave, full wave rectifiers with and without filter.
9. To plot characteristics of CB/ CE configuration of transistor.
10. To plot characteristics of FET.
11. Frequency response of RC coupled amplifier.
12. Study of Multivibrators.

**Text Books:**

1. V K Mehta – “Principles of Electronics” S. Chand Publications
2. B L Theraja – “Electrical Technology”, Vol I & III, S. Chand Publications

**Reference Books:**

1. A.K.Sawhney - “Electrical measurements & measuring instruments” Dhanpatrai Publications
2. Allen Mottershed, - “Electronics Device and circuit an introduction” PHI Publications
3. Boylestad - “Electronics Devices Circuits & Theory”, PHI Publications.

**Syllabus for Unit Test:**

Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

<b>02: Fundamentals of Computer Programming</b>		
<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Theory: -- Hours / Week	End Semester Examination: --	-- Credits
Practical: 02 Hours / Week	Continuous Assessment: --	
	Term Work: 25 Marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have		
1.	Knowledge of operation of computer as a user	
2.	Basic arithmetic concepts	
3.	Possible awareness of use of software programming language for computation	
<b>Course Objectives:</b>		
	Understand programming fundamentals like algorithms, flow charts, computations, data types, looping, conditions, variables, branching, arrays, files and reporting using C++ with future application in solving mathematical, analytical and algorithm based engineering problem computations..	
<b>Course Outcomes:</b>		
1.	Knowledge of programming fundamentals, programming practices and its use in solving problems	
2.	Knowledge of software programming language C++	
3.	Hands on practical experience of usage of C++ programming for various operations	
<b>UNIT - I</b>	<b>INTRODUCTION TO COMPUTER FUNDAMENTALS</b>	<b>(06 Hours)</b>
	Introduction to: Operating Systems, System Folders, Graphical User Interface, Types of Users, Configuration, System Files, Programming Languages (High level, Assembly, Machine level, Scripting, Natural, 4GL and others), Concept of automation and use of computer programming, Modern Computer Hardware Accessories (Dongle, Wi-Fi, Bluetooth, others)	
<b>UNIT - II</b>	<b>INTRODUCTION TO PROGRAMMING FUNDAMENTALS</b>	<b>(06 Hours)</b>
	Algorithms, Flow-charts, Use and practice of Algorithms and Flow-charts (exchanging values, ascending / descending order, evaluation of series like sin(x) and others), editors, compilers, libraries, interpreters, pseudo code, programming planning, Good programming practices	
<b>UNIT - III</b>	<b>INTRODUCTION TO DATA TYPES AND COMPUTATIONS</b>	<b>(06 Hours)</b>
	Various data types (Integer, Boolean, Binary, Character, Floating, Image, Long, Short and others), data formats like date, time, currency, etc, constants, computations (arithmetic, trigonometric, scientific and others), Concept of structured programming, Iterations, Looping, Flow of programming	
<b>UNIT - IV</b>	<b>PROGRAMMING CONCEPTS USING C++</b>	<b>(06 Hours)</b>
	History of C++, Structured programming concepts, C++ programming basics, Keywords, Include and header files, Instructions, Operands, Data	

**BHARATI VIDYAPEETH  
DEEMED UNIVERSITY, PUNE**

	formatting, Basic programming for printing on console, Printing in file, Accepting inputs and managing input and output, Basic reporting	
<b>UNIT - V</b>	<b>OBJECT ORIENTED PROGRAMMING</b>	<b>(06 Hours)</b>
	Object Oriented Programming (OOPS) concepts, Class and objects, Abstraction, Encapsulation, Inheritance, Polymorphism, Functions and its types (inline, static, virtual, member), Parameter passing, Overloading, Constructors and Destructors, Access control	
<b>UNIT - VI</b>	<b>OBJECT ORIENTED PROGRAM DEVELOPMENT USING C++</b>	<b>(06 Hours)</b>
	Software development process, Files and file structure, Common errors and debugging, Introduction to arrays, Programming using OOPS concepts, Functions, Arrays, Calculations and reporting	
<b><u>Term Work:</u></b>		
<ol style="list-style-type: none"> <li>1. Draw algorithm, develop flow chart and write pseudo code for arranging input in ascending / descending order</li> <li>2. Develop flow-chart of a program using multiple data types, operations / calculations and printing the output in formatted manner (marks, grades and mark list printing)</li> <li>3. Develop a basic C/C++ program to accept user input, format the input and print the input</li> <li>4. Develop C/C++ program for experiment no. 1</li> <li>5. Develop C/C++ program for experiment no. 2</li> <li>6. Develop C/C++ program using functions and passing variables</li> <li>7. Develop C/C++ program for using input and output files and arrays</li> <li>8. Develop C/C++ program for printing report to console and output file using data from input file, user input and arrays with the use of functions</li> </ol>		
<b>Text Books:</b>

## B.Tech (Electrical) – SEM-III

<b>Engineering Mathematics-III</b>		
<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	04 Credits
	Continuous Assessment: 40 Marks	
<b>Course Pre-requisites:</b>		
Students should have basic knowledge of:		
1.	Differential calculus	
2.	Integral calculus	
3.	Complex numbers	
4.	Vector algebra	
<b>Course Objectives:</b>		
	To develop ability to use the mathematical techniques, skills, and tools necessary for engineering practice.	
<b>Course Outcomes:</b> At the end of the course , the students will be able to:		
1.	Form mathematical modeling of systems using differential equations and ability to solve linear differential equations with constant coefficient.	
2.	Apply basics of analytic functions and the basics in complex integration which is used to evaluate complicated real integrals.	
3.	Apply theorems to compute the Laplace transform, inverse Laplace transforms.	
4	Solve difference equation by Z-transform.	
5	Calculate the gradients and directional derivatives of functions of several variables.	
6	Use Green's theorem to evaluate line integrals along simple closed contours on the plane.	
<b>UNIT - I</b>	<b>Linear Differential Equations (LDE)</b>	<b>(09 Hours)</b>
	Solution of nth order LDE with Constant Coefficients, Method of Variation of Parameters, Cauchy's & Legendre's DE, Solution of Simultaneous & Symmetric Simultaneous DE, Modeling of Electrical Circuits.	
<b>UNIT - II</b>	<b>Complex Variables</b>	<b>(09 Hours)</b>
	Functions of Complex Variables, Analytic Functions, C-R Equations, Conformal Mapping, Bilinear Transformation, Cauchy's Theorem, Cauchy's Integral Formula, Laurent's Series, Residue Theorem	
<b>UNIT - III</b>	<b>Transforms</b>	<b>(09 hours)</b>
	Fourier Transform (FT): Complex Exponential Form of Fourier Series, Fourier Integral Theorem, Sine & Cosine Integrals, Fourier Transform, Fourier Sine and Cosine Transform and their Inverses. Introductory Z-Transform (ZT): Definition, Standard Properties, ZT of Standard Sequences and their Inverses. Solution of Simple Difference Equations.	
<b>UNIT – IV</b>	<b>Laplace Transform (LT)</b>	<b>(09 hours)</b>
	Definition of LT, Inverse LT. Properties & theorems. LT of standard functions. LT of some special functions viz., Periodic, Unit Step, Unit Impulse, ramp, jump, Problems on finding LT & inverse LT. Applications of LT and Inverse LT for solving ordinary differential equations.	
<b>UNIT - V</b>	<b>Vector Differential Calculus</b>	<b>(09 Hours)</b>

	Physical Interpretation of Vector Differentiation, Vector Differential Operator, Gradient, Divergence and Curl, Directional Derivative, Solenoidal, Irrotational and Conservative Fields, Scalar Potential, Vector Identities.	
<b>UNIT - VI</b>	<b>Vector Integral Calculus</b>	<b>(09 Hours)</b>
	Line, Surface and Volume integrals, Work-done, Green's Lemma, Gauss's Divergence Theorem, Stoke's Theorem, Applications to Problems in Electro-Magnetic Fields.	
<b>Term Work:</b>		
1. Linear Differential Equations		
2. Complex Variables		
3. Transforms		
4. Laplace Transform		
5. Vector Differential Calculus		
6. Vector Integral Calculus		
<b>Text Books:</b>		
1. Advanced Engineering Mathematics by Peter V. O'Neil (Cengage Learning).		
2. Advanced Engineering Mathematics by Erwin Kreyszig (Wiley Eastern Ltd.).		
<b>Reference Books:</b>		
1. Engineering Mathematics by B.V. Raman (Tata McGraw-Hill).		
2. Advanced Engineering Mathematics, 2e, by M. D. Greenberg (Pearson Education).		
3. Advanced Engineering Mathematics, Wylie C.R. & Barrett L.C. (McGraw-Hill, Inc.)		
4. Higher Engineering Mathematics by B. S. Grewal (Khanna Publication, Delhi).		
5. Applied Mathematics (Volumes I and II) by P. N. Wartikar & J. N. Wartikar (Pune Vidyarthi Griha Prakashan, Pune).		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

<b>Electrical Machines - I</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks Practical : 25 Marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
	Basic of Machine, Magnetic theory, AC & DC Fundamentals	
<b>Course Objectives:</b>		
	To develop the students to identify, analyze & to understand the fundamentals, classification, application and selection of DC machine, Transformer & Induction Machines for a particular application as per the operational characteristics.	
<b>Course Outcomes:</b> The students will be able to		
1.	To draw equivalent circuit, phasor diagram and calculate the efficiency and regulation of single phase transformer	
2.	Identify the difference between the single phase and three transformers and also will Apply the concepts and application of the three phase transformer and also can analyze using the basics of additional terms & various connections of the three phase transformer.	
3.	Apply the concepts and application of Electromagnetic Laws, Energy balance.	
4.	Identify different parts, Describe the basics of machine, armature reaction, commutation, characteristics & applications of dc generators, dc motors	
5.	Apply the concepts and application of single phase induction motors and other small size motors.	
6.	Apply the concepts and application of advancements in DC machines & transformers.	
<b>UNIT – I</b>	<b>Single Phase Transformers</b>	<b>(06 Hours)</b>
	Introduction to Single phase transformer, Development of equivalent circuit, Approximate & Exact equivalent circuit, & Phasor diagram, Efficiency of a Transformer, Condition for maximum efficiency, All day efficiency of Transformer, single phase Autotransformer, saving in copper. Kapp regulation diagram, Back to back test, Open circuit and Short circuit tests on single phase Transformer, Routine and Type Test on single phase transformer as per IS, Parallel operation of single phase Transformer.	
<b>UNIT – II</b>	<b>Polyphase Transformers</b>	<b>(06 Hours)</b>
	Comparison between single three phase unit and three single phase units, standard connections & phasor groups, parallel operation of three phase transformers, Three winding transformers, On-Load Tap Changer. Concept of polarity & Polarity Test, open circuit and short circuit tests, Direct Load Test, Sumpner's test (Back to back), I.S. Specifications of transformers. Concept of routine and type tests. Testing of transformers as per I.S. specifications.	
<b>UNIT – III</b>	<b>Principles of Electromechanical Energy Conversion</b>	<b>(06 Hours)</b>
	Introduction, Basic Electromagnetic Laws, EMF induced in a coil rotating in a magnetic field, forces and torques in magnetic field systems, Energy balance, Energy in singly excited magnetic field systems, Determination of magnetic force and torque from Energy, Multiply excited magnetic field systems, Forces and torques in systems with permanent magnets, Dynamic equations	
<b>UNIT – IV</b>	<b>DC Machines</b>	<b>(06 Hours)</b>

	Basic principle of working, Construction, E.M.F. equation of D.C. generators. Process of commutation & types, causes of bad commutation and remedies, Basic principle of working of DC motor, Significance of Back e.m.f., Torque equation, Types, characteristics and applications of d.c. motors, Starting, reversing and armature voltage and field control method of speed control, Armature reaction, Losses, efficiency, condition for maximum efficiency and maximum power output. Testing of DC motor.	
<b>UNIT – V</b>	<b>Fractional Kilowatt Motors</b>	<b>(06 Hours)</b>
	Construction of single phase induction motors, types, double revolving field theory, methods of self-starting, torque-speed/slip characteristics, equivalent circuit, applications, Shaded Pole motor, Commutator motors, Universal motor, Repulsion motors, Servo motors	
<b>UNIT – VI</b>	<b>Modern Trends in DC Machines and Transformers</b>	<b>(06 Hours)</b>
	Construction, working, characteristics and applications of: PMDC Motor, Stepper motor, BLDC motor, Printed Circuit Board Motor, Air Motor, dry type transformer, isolation transformer, Optical CT/PT	
<b>Term Work:</b>		
The Practical's shall consist of record of minimum eight experiments.		
<ol style="list-style-type: none"> <li>1. Open circuit and short circuit tests on a single phase transformer</li> <li>2. Performance of standard connections (Scott and open delta) for three phase transformers</li> <li>3. Sumpner's test on two identical single phase transformers</li> <li>4. Parallel operation of two single phase transformers</li> <li>5. Three phase to six phase transformation</li> <li>6. Identification of DC machine windings and resistances</li> <li>7. Speed control of D. C. Shunt motor by Armature and Field control</li> <li>8. Brake test on DC shunt motor</li> <li>9. Swinburn's Test on DC shunt Motor</li> <li>10. Load test on single phase induction motor (Split phase induction motor)</li> <li>11. Computation of Equivalent Circuit of single phase induction motor</li> <li>12. Load test on ac series motor</li> </ol>		
<b>Text Books:</b>

2. A. E. Fitzgerald, Charles Kingsley, Jr. Stephen D. Umans, "Electric Machinery", Tata McGraw Hill		
3. M. G. Say, "Alternating Current Machines", Pitman Publishing Ltd.		
4. Ashfaq Husain, "Electric Machines", Dhanat Rai & Co.		
<b>Reference Books:</b>		
1. Dr. S. K. Sen, "Electric Machinery", Wiley Eastern		
2. B. H. Deshmukh, "Electrical Technology", Nirali Prakashan		
3. A. S. Langsdorff, "Theory of Alternator Current Machinery", Tata McGraw Hill		
4. Bhag S. Guru, Huseyin R. Hiziroglu, "Electric Machinery & Transformers", Oxford.		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

<b>Linear and Digital Integrated Circuits</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks Oral 25marks	01 Credit
<b>Course Prerequisites:</b>		
The students should have knowledge of		
1.	Fundamentals of semiconductor physics, electronics devices	
<b>Course Objectives:</b>		
	This course introduces basic knowledge about linear and Digital integrated circuits. It describes fundamentals of Operational amplifier characteristics and application circuits. It also introduces concepts of digital components, combinational and sequential circuits.	
<b>Course Outcomes:</b> After learning this course the students will be able to		
1.	Specify operational amplifier parameters and connect the operational amplifier to perform basic applications.	
2.	Describe the operation of circuit with proper component ratings, circuit diagram, input, output waveforms.	
3.	Compare specifications of voltage regulator ICs and select as per requirements. Identify pins of IC 555 and analyze circuits of IC 555	
4	Apply knowledge of number conversion and binary arithmetic and to use Boolean algebra to develop K map logic.	
5	Draw logic circuits of multiplexer , de-multiplexer, ADC, DAC	
6	Describe different flip- flops with circuit diagram, truth table and applications such as registers, counters	
<b>UNIT - I</b>	<b>Operational Amplifiers</b>	<b>(06Hours)</b>
	Block diagram and working of operational amplifier, pin diagram and specifications of IC 741, IC 324, operational amplifier parameters input offset current, input offset voltage, Common Mode Rejection Ratio (CMRR), PSRR, slew rate, bandwidth and frequency response, Basic op-amp applications: Inverting amplifier, Non-inverting amplifier, Adder, Subtractor, Instrumentation amplifier, AC voltage follower, V to I and I to V converter	
<b>UNIT - II</b>	<b>Waveform Generators using Operational Amplifiers</b>	<b>(06 Hours)</b>
	Integrator, differentiator, Square, triangular, sine wave generator, saw-tooth, Comparator, zero crossing detector, Schmitt trigger, precision rectifier, peak detector, clipper, clamper, V to F and F to V converter, sample and hold circuit	
<b>UNIT - III</b>	<b>Applications of Op-Amp and Other IC's</b>	<b>(06Hours)</b>
	Voltage regulators using ICs Viz. 78xx, 79xx, LM 317, IC 723 Active filters - configuration with frequency response, Analysis of first order low pass and high pass filters, Timer IC555 construction, working and modes of operation: astable, monostable and sequence timer	
<b>UNIT - IV</b>	<b>Numbering Systems and Boolean Algebra</b>	<b>(06 hours)</b>
	Numbering systems - binary, octal, decimal and hexadecimal and their conversion, codes - BCD, ASCII, Grey and excess3, Binary arithmetic: addition and subtraction by 1's and 2's compliment. Logic gates, Booleans algebra, De-Morgon's theorem, K-map: structure for two and three variables, SOP and POS form reduction of Boolean expressions by K-	

	map 1-bit comparator analysis using K-map	
<b>UNIT - V</b>	<b>Combinational Logic Circuits</b>	<b>(06Hours)</b>
	Comparator, parity generator, Multiplexer, De-multiplexer using K-map, adder, subtractor, arithmetic logic unit, decimal to BCD encoder (74147), BCD to 7 segment decoder/driver (7446/7447), display device, ADC, Dual slope SAR, DAC - binary weighted, ladder type, Memories: RAM - static and dynamic, ROM, PROMS and EPROMS, EEPROMS detailing.	
<b>UNIT - VI</b>	<b>Sequential Logic Circuits</b>	<b>(06 Hours)</b>
	Flip Flops: S-R, Clocked S-R, D latches, Edge triggered D flip-flops, Edge triggered JK flip flops, JK Master-slave flip flop, Registers, Buffer registers, shift registers, controlled shift registers, asynchronous counters, synchronous counter, twisted ring counters, N-module counters, Counter IC's	
<b>Term Work:</b>		
The term work shall consist of record of minimum eight experiments. Four from first 6 and four from next 6 out of given below.		
<ol style="list-style-type: none"> <li>To Study Data sheet of IC 741, 324, IC555, IC 723</li> <li>To observe op. amp as adder, subtractor</li> <li>To observe operational amplifier as square, triangular wave, sine wave generator.</li> <li>To observe operation of operational amplifier as comparator, ZCD, Schmitt trigger</li> <li>To observe input, output waveforms of an Operational amplifier as integrator and differentiator.</li> <li>Operational amplifier as low pass or high pass filter and observe frequency response</li> <li>To connect IC 555 as mono-stable multi vibrator and observe waveforms.</li> <li>To connect logic gates as per pin diagram and verify truth table</li> <li>To design half adder and full adder using basic gates.</li> <li>To verify operation of various flip flops by truth table</li> <li>To observe shift register operation using IC7495</li> <li>To understand features of synchronous and asynchronous counter and use them for different modes such as up/down, mode N, frequency divider.</li> <li>To use BCD to 7 segment decoder (7446,7447) BCD to decimal decoder (7441, 7442)</li> <li>To study specifications of ADC and DAC chips</li> </ol>		
<b>Text Books:</b>

5. Charles H. Roth –“Fundamental of Logic Design” –Jaico book		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

## Digital Computational Techniques

<b>Digital Computational Techniques</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks    Practical : 25 Marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1.	Mathematics (integration, differentiation, simultaneous equations, polynomial equations), Basics of programming, C++ language, Program debugging skills, Flowchart and algorithm development	
<b>Course Objectives:</b>		
	To develop the students for understanding, analyzing and applying numerical methods using digital techniques (C++ and MATLAB) to solve mathematical and engineering problems.	
<b>Course Outcomes:</b> The students will be able to		
1.	Refresh the basics of C++ language and MATLAB and solve problems using multiple numerical techniques with C++ and MATLAB	
2.	Understand importance of high speed calculations, errors involved and preliminary mathematical theorems	
3.	Find the roots of transcendental & polynomial equations	
4.	Understand and use various numerical interpolation methods to solve polynomial equations	
5.	Perform numerical differentiation and integration using multiple methods/techniques	
6.	Solve linear algebraic simultaneous equations using elimination and iterative methods	
<b>UNIT – I</b>	<b>Basics of C++ and MATLAB Programming</b>	<b>(06 Hours)</b>
	Data types, Operator, Variables, Control Statements, Loops, Access Control, Arrays, Functions and their types, Object Oriented Programming (OOPS) concepts, Class and Object, Abstraction, Encapsulation, Inheritance, Polymorphism, Parameter passing, Function overloading, Inline functions, Virtual functions, Friend functions, Members and Functions, MATLAB Basics (operations, built-in functions, commands, arrays, display, files, programming in MATLAB	
<b>UNIT – II</b>	<b>Introduction to Numerical Computations:</b>	<b>(06 Hours)</b>
	Basic principle of numerical methods and necessity of computers for high speed calculations, Floating point algebra with normalized floating point technique, Significant digits, Mathematical preliminaries: Rolle's Theorem, Generalized Rolle's Theorem, Intermediate Value Theorem, Mean Value Theorem for derivatives, Errors and their computations: Absolute, Relative and Percentage errors	
<b>UNIT – III</b>	<b>Transcendental and Polynomial Equations:</b>	<b>(06 Hours)</b>
	Roots of an equation and methods to find the same, Solve equations using Bisection, Secant, Regula-Falsi and Newton-Raphson methods, Single variable and multi variable Newton-Raphson techniques, Curve fitting using least square approximation – first order and second order.	
<b>UNIT – IV</b>	<b>Interpolation:</b>	<b>(06 Hours)</b>
	Introduction to interpolation and calculus of finite differences, Polynomial interpolation methods: Lagranges, Newton's forward, backward & central difference methods, Sterling and Bessel's interpolation	
<b>UNIT – V</b>	<b>Differentiation and Integration:</b>	<b>(06 Hours)</b>
	Numerical differentiation using simple interpolation techniques like Lagrangian and Newton Gregory methods, Numerical integration using Trapezoidal, Simpsons	

	Rule, Solution of ordinary differential equation using Euler's, Modified Euler's, Taylor Series, Runge-Kutta second and fourth order techniques using Hune's and Polygon method	
<b>UNIT – VI</b>	<b>Linear Algebraic Simultaneous Equations:</b>	<b>(06 Hours)</b>
	Direct methods like Gauss Elimination method and Gauss Jordan method, Concept of pivoting – partial and complete, Iterative methods like Gauss-Siedel, Accelerated Gauss-Siedel and Jacobi's method, Matrix inversion using Jordan method and Eigen Values using Power method and Jacobi methods	
<b>Term Work:</b>		
The Practical's shall consist of record of minimum eight experiments.		
13. Newton-Rhapson method using C++ Programming 14. Gauss Elimination method using C++ Programming/MATLAB 15. Gauss Seidel Method using MATLAB 16. Jacobi Method using MATLAB 17. Lagranges Interpolation method using C++ Programming 18. Newtons Divided Difference Interpolation method using C++ Programming 19. Trapezoidal method using C++ Programming 20. Euler's method using C++ Programming 21. Runge-Kutta 4 <sup>th</sup> Order method using C++ Programming 22. C++ Program on Inheritance 23. C++ Program on Polymorphism 24. C++ Program on derived class constructor and destructor

Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

<b>Electrical Measurement and Instrumentation</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03	End Semester Examination: 60 Marks	03 Credits
Practical: 02	Continuous Assessment: 40 Marks	
	Practical:	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1.	Basic electrical Engineering Parameters such as Voltage, current, Power, Energy, etc.	
2.	Various physical Parameters such as, Temperature, Pressure, Flow, vibration, etc.	
<b>Course Objectives:</b>		
	This course introduces knowledge about electrical measurement and instrumentation. The course is designed to learn different methods of measurements of various electrical parameters and also to learn the different physical parameters with the help of the various measurement and instrumentation techniques.	
<b>Course Outcomes: After learning this course students will be able to</b>		
1.	Explores the importance of measurement and various terms related to measurement. Measure /calculate unknown inductance and capacitance by balancing of AC bridge. State specifications of instrument transformers and use them for high voltage and high current measurement.	
2.	Draw circuit diagram, connect wattmeter for measurement of three phase active and reactive power and energy meter for measurement of energy.	
3.	Draw block diagram, state specifications, functions of various digital/automated meter, harmonic analyzer	
4.	Classify various types of transducers. Explain principle of operation, characteristics, specifications of displacement and level transducers and different methods of measurement.	
5.	Explain principle of operation, characteristics, specifications of Pressure and temperature transducers and different methods of measurement.	
6.	Select appropriate transducer, recorder and display device as per requirement	
<b>UNIT – I</b>	<b>Introduction</b>	<b>(06 Hours)</b>
	<p><b>Introduction:</b> significance of measurement, classification of instruments, mechanical, electrical, electronic instruments, deflection and null type, applications of measurement system.</p> <p><b>AC Bridges:</b> Introduction, sources and detectors for ac bridge, general equation for bridge at balance. Measurement of Inductance: Maxwell's Inductance &amp; Maxwell's Inductance – Capacitance Bridge, Anderson's Bridge, Schering Bridge for measurement of capacitance, Wien's Bridge for measurement of frequency, Universal Impedance Bridge</p> <p><b>Instrument Transformers:</b> Introduction to CT &amp; PT as instrument transformers. Difference between CT operated meter &amp; whole current meter. Advantages of instrument transformers over shunts and multipliers, Accuracy class, burden on instrument transformers, expression for ratio and phase angle errors in case of C.T. and P.T. (No derivation), and precaution in using instrument transformers. Clip on ammeter.</p>	
<b>UNIT - II</b>	<b>Measurement of Power and Energy</b>	<b>(06 Hours)</b>
	<p><b>Measurement of Power:</b> Construction, working principle, torque equation, advantages/disadvantages, errors and their compensation of dynamometer type wattmeter, low power factor wattmeter, Active &amp; reactive power measurement in three phase balanced &amp; unbalanced system (one wattmeter and two wattmeter methods), Power Measurement using Instrument Transformer, Three Phase wattmeter.</p>	

	<b>Measurement of energy:</b> Energy Meters in AC circuits, Single Phase Induction Type Energy Meter - Construction, principle of operation, torque equation of induction type energy meter, errors and adjustments. Three phase three wires, and three phase four wire energy meter, Electronic energy meter	
<b>UNIT - III</b>	<b>Electronic Devices and Signal Analyzer's</b>	<b>(06 Hours)</b>
	Electronic Voltmeters and their Advantages, Vacuum Tube Voltmeters, difference Amplifier Type Voltmeters, DC Voltmeters with direct Coupled Amplifier, Measurement of Power at Audio and Radio Frequencies. Digital Storage Oscilloscope – Principle of operation and waveform reconstruction. Concept of: Numeric meter & its types (TOD, ABT, Prepaid & panel mounted meters.) Measurement of power & energy by sampling technique automatic meter reading (AMR) and advanced metering infrastructure (AMI), Meter reading instrument (MRI). Wave Analyzers – Frequency Selective Wave Analyzers and Heterodyne Wave Analyzers and its applications. Harmonic Distortion Analyzer, Spectrum Analyzer, Standing Wave Ratio, Power Analyzer.	
<b>UNIT - IV</b>	<b>Displacement and Level Measurement</b>	<b>(06 Hours)</b>
	Introduction to Transducers, classification, basic requirements for transducers and Advantages of Electrical Transducers. <b>Displacement measurement:</b> Potentiometer as displacement transducer, Strain Gauge: Theory of Strain Gauges, Types of strain gauges: Un-bonded and Bonded types their construction, working, advantages and disadvantages, load cell, LVDT & RVDT – construction, working, application, null voltage, specifications, advantages/disadvantages, effect of frequency on performance. Capacitive transducers – Advantages, Disadvantages and Applications. <b>Level measurement:</b> Introduction and importance of level measurement, level measurement methods: mechanical, hydraulic, pneumatic, Electrical types of level gauges using resistance, capacitance, nuclear radiation and ultrasonic sensors	
<b>UNIT - V</b>	<b>Pressure and Temperature Measurement</b>	<b>(06 Hours)</b>
	Pressure Measurement:, classification of pressure as low/medium/ high, absolute/gauge/vacuum, static/dynamic & head pressure. Types of Pressure Measurements Devices, Pressure Measurement using Electrical Transducers as Secondary Transducers. Low Pressure Measurement – Thermocouple Vacuum Gauge, Pirani Gauges and Ionization Type Vacuum. Temperature Measurement: Electrical Resistance Thermometer, Platinum Resistance Thermometer, Semi conductor Thermometers, Thermocouples, Thermistors, Quartz Crystal Thermometers, Bimetallic Thermometers. Electrical methods of temperature measurement – signal conditioning of industrial RTDs and their characteristics – 3 lead and 4 lead RTDs.	
<b>UNIT - VI</b>	<b>Measurement of Velocity and Flow, Recorders and Display Devices</b>	<b>(06 Hours)</b>
	<b>Measurement of Velocity</b> – Moving Magnet Type, Moving Coil Type, Seismic Tape Type. Measurement of Angular Velocity. <b>Measurement of flow</b> – Turbine Meter, Electromagnetic Flow Meters, Hot Wire Anemometer, Ultrasonic Flow Meter. <b>Recorders and Display Devices:</b> Recording Requirement, Analog Recorders, Graphic Recorders, Strip Chart Recorders, Null Type Recorders, X-Y Recorders, Ultraviolet Recorders, Direct Recorders. Digital Display Methods, Digital display Units, Rear Projector Display, Light Emitting Diodes (LED), Liquid Crystal Diodes (LCD), Resolution and Sensitivity of Digital Meters	
<b>Term Work:</b>		
The term work shall consist of record of minimum eight experiments.		
<ol style="list-style-type: none"> <li>1. Calibration of ammeter and voltmeter with the help of potentiometer.</li> <li>2. To extend range of wattmeter by use of CT and PT.</li> <li>3. To measure power in three phase balanced load by one wattmeter method.</li> <li>4. To measure power in three phase balanced/ unbalanced load by two wattmeter method.</li> <li>5. To measure reactive power in three phase circuit by one wattmeter method.</li> </ol>		

6. To study and analyze the various electrical parameters using Power Analyzer.
7. To calibrate single phase energy meter at (i) unity power factor (ii) 0.5 lagging power factor (iii) 0.5 leading power factor (analog / Digital)
8. Study of digital storage oscilloscope C.R.O.s of different types and their applications.
9. Measurement of capacitance and loss angle by Schering Bridge.
10. Measurement of inductance by Anderson's bridge.
11. Displacement measurement by LVDT.
12. Strain measurement using strain gauge.
13. Bourdon Tube
14. Study of process control application of using the instrumentation kit.
15. Introduction to thermography, detection of hot spots, oil level, defective winding in transformer using thermo vision techniques.

**Text Books:**

1. A Course in Electrical and Electronic measurements & Instrumentation – by A. K. Sawhney, Dhanpat Rai & Sons.
2. Electronic Instrumentation: H.S. Kalsi – THM, 2<sup>nd</sup> Edition 2004.
3. A Course in Electronic and Electronic measurements by J. B. Gupta, S. K. Kataria & Sons.
4. Measurement by Baldwin

**Reference Books:**

1. Electrical Measurement & Measuring Instruments Fifth edition, by E. W. Golding & Widdies, A. H. Wheeler & Co. Ltd.
2. Electronic measurement and instrumentation by Dr. Rajendra Prasad, Khanna Publisher, New Delhi.
3. Introduction to Measurements and Instrumentation, Second Edition by Ghosh, PHI Publication.
4. Introduction to Measurements and Instrumentation by Anand .PHI Publication

**Syllabus for Unit Test:**

Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

## B.Tech (Electrical) - SEM-IV

<b>Power Electronics</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks    Oral 25 marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1.	Fundamentals of Electronics Engineering.	
<b>Course Objectives:</b>		
This course introduces basic knowledge about electronics devices used for control of power. It describes characteristics, application circuits of SCR and other power devices.		
<b>Course Outcomes:</b> After learning this course the students will be able to		
1.	Describe specifications, characteristics of power electronics components.	
2.	Explain operation of AC-AC converters at different load conditions with mathematical equation and waveforms	
3.	Explain operation of AC-DC converters at different load conditions with mathematical equation and waveforms	
4	Compare and select among switching device (IGBT, MOSFET, MCT) as per the application requirement.	
5.	Compare and select various Choppers based on application requirements.	
6.	Compare Voltage Source Inverter (VSI) and Current Source Inverter (CSI)	
<b>UNIT - I</b>	<b>Thyristor Power Devices</b>	<b>(06 Hours)</b>
	SCR - static and dynamic characteristics, specifications, two transistor analogy, gate characteristics, triggering circuits, protection of SCR Protection of power circuit from - over voltage, over current & temperature rise (thermal) Design of Snubber circuit.	
<b>UNIT - II</b>	<b>AC to DC Convertors (Single phase and three phase)</b>	<b>(06 Hours)</b>
	Single phase convertor, three phase semi controlled and fully controlled bridges with R, RL and RLE loads, derivation of average and RMS output voltage and current, rectification and inversion mode of operation, concept of overlap angle and associated voltage drop calculation, dual convertor and selection of transformer and semiconductor devices for convertors. Total Harmonic Distortion (THD).	
<b>UNIT - III</b>	<b>AC Voltage Controllers</b>	<b>(06 Hours)</b>
	DIAC, TRIAC - construction, characteristics, four mode operation, specifications, triggering of TRIAC using DIAC, AC voltage regulator principle, single phase and three phase analysis with R and RL Load, Harmonics and ripple factor, Applications of two stage, three stage and multistage voltage controllers, derivation of average and RMS output voltage and current	
<b>UNIT - IV</b>	<b>Transistor Power Devices</b>	<b>(06 Hours)</b>
	MOSFET, IGBT, MCT - Construction, Characteristics, Specifications, Safe Operating Areas, protection, switching action and their control circuit requirement, comparison and area of application of these devices, Diagram and working of Switched Mode Power supply (SMPS) and Uninterrupted Power Supply (UPS)	
<b>UNIT - V</b>	<b>DC to DC Convertors</b>	<b>(06 Hours)</b>
	Principle of operation of chopper, classification on the basis of operating quadrants control techniques, CLC, TRC, PWM and FM techniques, analysis of step up choppers and numerical with RLE load, area of application, necessity of input filter, derivation of average and RMS output voltage and current	
<b>UNIT - VI</b>	<b>DC to AC Inverters</b>	<b>(06 Hours)</b>
	Single phase and three phase inverters principle of operation, VSI and CSI inverters, applications, operating frequency range. PWM inverters: single pulse, multi-pulse and sinusoidal pulse modulation, PWM techniques for voltage control and harmonic elimination.	

<b>Term Work:</b>	
The term work shall consist of record of minimum eight experiments. Four from first 6 and four from next 6 out of given below.	
1. V-I Characteristic of SCR, DIAC & TRIAC	
2. V-I characteristic of power semiconductor devices GTO, MOSFET, IGBT	
3. 1 Phase half Controlled & Full controlled converter (R & RL Load)	
4. 3 phase converter (R, RL, RLE Load)	
5. Step down Chopper circuit (RC technique)	
6. 3 phase Voltage Source transistorized inverter	
7. Firing circuit for 3 phase converter	
8. 1 phase or 3 phase AC voltage regulator	
9. 3 phase AC – DC converter with RLE Load	
10. 1 phase PWM bridge inverter	
11. Commutation circuit of SCR	
12. Design of Snubber Circuit	
13. Collection of data sheets of Power Devices	
14. Summary reports of NPTEL videos on Power Devices	
<b>Text Books:</b>	
1. M. H. Rashid – “Power Electronics” 2009 Edition, Pearson publication	
2. Ned Mohan, Undeland, WP Robins - “Power Electronics” 3 <sup>rd</sup> edition, John Wiley & Sons International Student edition	
3. B. W. Williams – “Power Electronics” 2 <sup>nd</sup> edition -Macmillan publication	
4. Dr. P. S. Bhimbra - “Power Electronics” third edition, Khanna Publication	
5. K Hari Babu - “ Power Electronics” - Scitech Publication	
<b>Reference Books:</b>	
1. Vedam SubraManyam - “Power Electronics” - New Age international, New Delhi	
2. Dubey, Donald, Joshi, Sinha - “Thyristerised Power Controller”- Wiley Eastern New Delhi	
3. M. D Singh & K B Khandchandani, “Power Electronics” - Tata McGraw hill	
4. Jai P Agarwal - “Power Electronics, Systems theory & design” LPE Pearson Education	
5. L Umanand - “Power Electronic, Essentials & Applications” - Wiley publication	
6. Randall , Shaffer - “Fundamental of Power Electronics with Matlab”	
7. J. Michale, Jacob - “Power Electronics Principles & Applications”	
8. V K Mehta – “Principles of Electronics” – S. Chand Publications	
9. NPTEL website Video lectures by B. G. Fernandes	
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

<b>Electrical Machines-II</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	04 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1.	Basic laws of rotating machines like Faraday's Law, Lenz's Law, etc	
2.	Basics of Electrostatics and electromagnetic	
3.	Transformer operation	
4.	Induction machine operation	
5.	DC Machine operation	
<b>Course Objectives:</b>		
	To understand the theory, operation, characteristics and applications of Three phase Induction, Synchronous Machines and special purpose machines.	
<b>Course Outcomes:</b> The students will be able to		
1.	Describe the basics of synchronous generators & identify the different parts, different excitation systems, armature windings, to find the regulation by different methods of non-salient pole alternator.	
2.	Apply the concepts of three phase synchronous generator and analyze using the basics of different tests on Syn. Gen.	
3.	characteristics of alternators	
4	Understand the concept of synchronization and parallel operation of alternators	
5	Understand working principle, characteristics, operation and applications of synchronous motors	
6	Understand working, characteristics and usage of special purpose electrical machines	
<b>UNIT - I</b>	<b>Synchronous Generators (Alternators) - Principles</b>	<b>(08 Hours)</b>
	Types of synchronous machines & their constructional features, Excitation Systems. <b>Synchronous generator (cylindrical rotor type):</b> Principle of working, Armature Windings & Estimation of winding factor, EMF Equation, Rating of Generator, Generator on no load & balanced load, Armature reaction & its effect under load power factors, Synchronous Impedance, Equivalent Circuit & Phasor Diagram, <b>Synchronous Generator (Salient Pole):</b> Two Reaction Theory model, Estimation of Direct & Quadrature axes Synchronous Reactance by Slip Test, Phasor Diagram. Power Flow (Transfer) Equations, Power – Power angle relation and Capability Curves of synchronous generators.	
<b>UNIT - II</b>	<b>Synchronous Generators (Alternators) - Operation</b>	<b>(08 Hours)</b>
	DC resistance test, Open circuit Test & Short Circuit Test on synchronous generator, Determination of Voltage Regulation by direct load test & by Indirect Methods-EMF, MMF & Potier Triangle Method, Losses & Efficiency and Short Circuit Ratio. Parallel Operation of alternators - Necessity, Conditions, Prime Mover Characteristics & load Sharing. Concept of Infinite bus, alternators connected to infinite bus bar, Methods of	

	synchronizing alternators (synchronizing lamps and synchro-scope), Significance of Synchronizing Power Coefficient.	
<b>UNIT - III</b>	<b>Three Phase Synchronous Motor</b>	<b>(08 Hours)</b>
	Principle of operation, Methods of starting, Equivalent Circuit & Phasor Diagrams, Pull-in & Pull-Out Torque, Power Flow Equations, Operation with constant excitation & variable load and with Constant load & variable excitation (V Curves & Inverted V Curves), Phenomenon of Hunting & its remedies, Applications.	
<b>UNIT - IV</b>	<b>Three Phase Induction Motor – Principles</b>	<b>(08 Hours)</b>
	Construction (Squirrel cage, Wound rotor), Concept of rotating magnetic field, Principle of Operation, Concepts of Speed & Slip, Frequency of rotor voltage & current, Power Flow Diagram & development of Equivalent Circuits, Losses, Relationship between rotor copper loss, rotor input & gross mechanical power developed, Efficiency, Torque–Slip/Speed characteristics, Effect of rotor resistance on Torque-Slip characteristics, Condition for maximum torque, Relations between starting, Full load & Maximum torque.	
<b>UNIT - V</b>	<b>Three Phase Induction Motor – Operation</b>	<b>(08 Hours)</b>
	Starters for cage rotor & wound rotor induction motors (DOL, Star/Delta, Auto transformer, Stator resistance, Rotor resistance, soft starters), Open circuit and short circuit test, Circle diagram and computation of performance parameters, High Torque Cage Motors - Deep bar & Double cage rotor, Speed control mechanisms (VFD, cascading, pole changing, slip power recovery), Cogging & Crawling of induction motors, Applications.	
<b>UNIT - VI</b>	<b>Special Purpose Machines</b>	<b>(08 Hours)</b>
	Construction, working principle, characteristics and applications – Induction Generator, Induction Voltage Regulator, Linear Induction Motor, Synchronous Induction Motor, Permanent Magnet Synchronous Machine, Reluctance motor, Hysteresis motor, AC Series Motor.	
<b>Term Work:</b>		
The term work shall consist of record of minimum eight experiments. Four from first 6 and four from next 6 out of given below.		
<ol style="list-style-type: none"> <li>1. Direct loading test on alternator</li> <li>2. Open circuit and short circuit test on alternator – regulation by emf and mmf method</li> <li>3. Slip test on salient pole alternator – regulation by two reaction theory</li> <li>4. Synchronization of alternator with bus bar</li> <li>5. V-Curves of synchronous motor</li> <li>6. Load test on synchronous motor</li> <li>7. Load Test on three phase induction motor</li> <li>8. No load &amp; Blocked Rotor Test on three phase induction motor: Determination of Equivalent Circuit Parameters/Plotting Circle diagram</li> <li>9. Measurement of Slip by Stroboscopic Method</li> <li>10. Speed Control of Wound Rotor Induction Motor</li> <li>11. Demo and study of three phase Linear Induction Motor</li> <li>12. Study &amp; comparison of Starters of three phase induction motor.</li> <li>13. Load test on Universal Motor</li> <li>15. Load Test on PMSM</li> </ol>		
<b>Text Books:</b>		
<ol style="list-style-type: none"> <li>1. Nagrath Kothari, “Electrical Machines”, Tata McGraw Hill</li> <li>2. B L Theraja, “Electrical Technology”, Vol II, Chand Publications</li> </ol>		

<b>Reference Books:</b>

4.	A. S. Langsdorff, "Theory of Alternator Current Machinery", Tata McGraw Hill
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

<b>Network Analysis</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03 Hrs/Week	End Semester Examination: 60 Marks	Theory : - 03
Practical: 02 Hrs/Week	Continuous Assessment: 40 Marks	Practical : - 01
Tutorial:- 1Hr/Week	Term Work : 25 Marks, Practical: 25 Marks	Total : - 04
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1.	Engineering Physics, Fundamentals of Electrical Engineering	
2.	Engineering Mathematics ( Differential equations, Integrations, Laplace Transforms, Fourier Transform	
<b>Course Objectives:</b>		
	This course introduces concepts of Network Analysis such that simplification of any complex network applying theorems, classical method (Transient response) or Laplace transform method or Fourier transform method.	
<b>Course Outcomes: The students will be able to</b>		
1.	Calculate solution of differential equation of an active (Excited by an ac source or DC source), Linear, bilateral complicated network using various network theorems.	
2.	Analyze transient response of passive elements in pre-excited or unexcited conditions ( initial conditions) using classical method	
3.	Apply Laplace Transform Technique to analyze the behavior & response of passive elements in pre-excited or unexcited conditions ( initial conditions)	
4	Represent any network as two port network, Define and calculate various parameters like open circuit impedance, short circuit admittance, Transmission & Hybrid parameters and their applications in electrical domain	
5	Formulate network function for a given circuit and comment about stability from poles and zeros of function.	
6	Analyze a given circuit / waveform using Fourier Transform method.	
<b>UNIT - I</b>	<b>Network Theorems in AC circuits</b>	<b>(06 Hours)</b>
	Introduction, Practical sources, Source transformations, Network reduction using Star – Delta transformation, Loop and node analysis With linearly dependent and independent sources for AC networks, Concepts of super node and super mesh. Thevenin’s theorem, Norton’s theorem, Superposition theorem, Maximum power transfer theorem, Millman’s theorem, Reciprocity theorem, Substitution theorem, Compensation theorem, Tellegen’s Theorem	
<b>UNIT - II</b>	<b>Transient Response of Passive Circuits</b>	<b>(06 Hours)</b>
	Introduction, transient response of series R-L and R-C circuit having DC excitation, Transient response in RL and RC circuit with sinusoidal excitation. Transient response in RLC circuit with DC and sinusoidal excitation Resonance, Coupled circuits, Scattering matrix and its application in network analysis	
<b>UNIT - III</b>	<b>Laplace Transformation and its application</b>	<b>(06 Hours)</b>
	Laplace transform of a derivative and integration. Laplace transform of common forcing functions, Initial and final value theorem, Time displacement theorem, Convolution theorem, Impulse response of R-L and R-C Circuit, Application of Laplace transformation technique in electric circuit analysis.	
<b>UNIT - IV</b>	<b>Two Port Networks:</b>	<b>(06 Hours)</b>
	Short circuit admittance, open circuit impedance, transmission and inverse transmission, hybrid and inverse hybrid parameters. Relation between parameter sets, $T, \pi$ , Ladder, lattice, twin T networks. Input and out put impedance in terms two port parameters. Interconnection of networks. Symmetry and reciprocity	
<b>UNIT - V</b>	<b>Network Functions:</b>	<b>(06 Hours)</b>
	Network function for one port and two port networks: ladder networks, general network,	

	poles and zeros of network functions, Restriction on poles and zeros for driving point functions and transfer functions. Network synthesis of RL,RC,LC circuits	
<b>UNIT - VI</b>	<b>Fourier analysis</b>	<b>(06 Hours)</b>
	Exponential form of Fourier series, trigonometric form of Fourier series, symmetry in Fourier series, Frequency spectrum, properties of Fourier analysis, shifting of function, applications in circuit analysis. Fourier series representation of periodic signals, Fourier integral & Fourier transform analysis with Fourier transform. Convolution integral.	
<b>Term Work:</b>		
The term work shall consist of record of minimum eight experiments.		
<ol style="list-style-type: none"> <li>1. Verification of Superposition theorem in A.C. circuits.</li> <li>2. Verification of Thevenin's theorem in A.C. circuits.</li> <li>3. <b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

<b>Generation, Transmission &amp; Distribution</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03	End Semester Examination: 60 Marks	Theory : - 03
Practical: 02	Continuous Assessment: 40 Marks	Practical : - 01
	Term Work : 25 Marks, Practical: 25 Marks	Total : - 04
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1.	Electromagnetic energy conversion system	
2.	Fundamentals of Electrical Engineering	
<b>Course Objectives:</b>		
	This course introduces knowledge about electrical power generation, its transmission and distribution. The course is designed to learn different methods of power generation. Also it focuses on performance of transmission line and distribution system along with its design consideration.	
<b>Course Outcomes:</b> Students will be able to		
1.	Draw block diagram and describe the function of components of various Power Generation techniques by Conventional energy Sources.	
2.	Define and analyze the significance of terms such as load factor , diversity factor etc on economics of power generation Draw block diagram and describe the function of components of various Power Generation techniques by Non Conventional energy Sources.	
3.	Draw block diagram and describe the function of components of various Power Generation techniques by Non Conventional energy Sources.	
4	Calculate string efficiency, sag and R, L, C parameters of different types of transmission line.	
5	Represent TEE and PI model of line and analyze the performance of transmission line.	
6	Explore different type of cables & its calculations along with the computation of performance of AC distribution.	
<b>UNIT - I</b>	<b>Power Generation techniques by Conventional energy Sources</b>	<b>(06 Hours)</b>
	Introduction to energy sources, selection of site – classification – general arrangements and operations – functions of each component – types of turbines – electric generators – advantages and disadvantages - list of major power stations : of Hydro electric , Thermal and Nuclear power plants in India with capacity. Basic layout and working of diesel and gas power plant. Concept of grid, types of grids	
<b>UNIT - II</b>	<b>Load Curves and Economic Aspects</b>	<b>(06 Hours)</b>
	Load Curves: load curve – base load station and peak load station - demand factor – maximum demand – average demand – diversity of load – load factor – diversity factor – significance of high load factor & diversity factor – plant factor – capacity factor – connected load – load duration curve – integrated load duration curve – selection of units. Per capita energy consumption of developed & developing countries. Concept of cogeneration and captive generation.	
<b>UNIT - III</b>	<b>Power Generation techniques by Non -Conventional energy Sources</b>	<b>(06 Hours)</b>
	Different types of Nonconventional Energy Sources, Comparative benefits over conventional type, contribution of conventional & nonconventional energy sources, Solar energy – Its characteristics, basic concept of solar power plant, major solar power plants in India/world, Wind power plant– schematic arrangement - vertical axis, horizontal axis – electrical generator Hybrid solutions : Wind Turbine, diesel, WT-solar etc. – major wind farms in India / world, Power generation by bio gas, biomass, geothermal energy and tidal energy– its types, Magneto Hydro Dynamics (MHD), Concept of carbon credit.	
<b>UNIT - IV</b>	<b>Design of Transmission Line</b>	<b>(06 Hours)</b>

	<p>Transmission Line Components and its types - Line Supports, Conductors, Insulators, Potential distribution over a string of insulators, methods of equalizing the potential, string efficiency.</p> <p>Sag: Catenary curve – calculation of sag and tension – effects of wind and ice loading sag templates – vibration dampers for transmission lines.</p> <p>Corona and interference, Various effects – Skin, Proximity, Ferranti etc.</p> <p>Various Parameters of Transmission Line – Resistance, Inductance and capacitance - their calculation.</p>	
<b>UNIT - V</b>	<b>Transmission Line Performance analysis :</b>	<b>(06 Hours)</b>
	<p>Circuit Representation of Transmission Line: Representation and performance of short, medium and long transmission line – Surge Impedance Loading (SIL), Characteristic Impedance, Generalized circuit constants: - Representation of tee and pi models of lines as two port networks – evaluation and estimation of ABCD constants –sending end and universal power circle diagrams.</p>	
<b>UNIT - VI</b>	<b>Underground Cables and Distribution System</b>	<b>(06 Hours)</b>
	<p>Underground Cables - Classification – construction - insulation resistance – capacitance – dielectric stress in single core cable. Grading of cables. Laying of cables – cable jointing – causes of failure – cable faults and location of faults.</p> <p>Distribution System – Classification – A.C. distribution connection schemes - requirements of distribution system – design consideration – design of radial, ring distributors for concentrated, distributed loads</p>	
<b>Term Work:</b>		
The term work shall consist of record of minimum eight experiments from below list.		
<ol style="list-style-type: none"> <li>1. Measurement of A, B, C, D constants of short transmission line.</li> <li>2. Measurement of A, B, C, D constants of Medium transmission line.</li> <li>3. Measurement of A, B, C, D constants of Long transmission line.</li> <li>4. Circle diagram of medium transmission line.</li> <li>5. Circle diagram of short transmission line.</li> <li>6. Drawing Sheet on power generation by Conventional energy Sources</li> <li>7. Drawing Sheet on power generation by non Conventional energy Sources</li> <li>8. Drawing Sheet on types of insulator</li> <li>9. Drawing Sheet on types of cables</li> <li>10. Industrial visit to cable manufacturing</li> <li>11. Industrial Visit report of HPS</li> <li>12. Industrial Visit report of TPS / GAS PP</li> <li>13. Industrial Visit report of WPS / Solar PP</li> </ol>		
<b>Text Books:</b>		
<ol style="list-style-type: none"> <li>1. A Course in Power System - J. B. Gupta - S. K. Kataria &amp; Son's</li> <li>2. V. K. Mehta, "Electrical Power System", S. Chand Publications</li> </ol>		
<b>Reference Books:</b>		
<ol style="list-style-type: none"> <li>1. Electrical Power - S. L. Uppal - Khanna Publication</li> <li>2. Energy Technology - S. Rao, Dr. B B Panelkar - Khanna Publication</li> <li>3. A Course in Power Plant Engineering - Arrora, Domkundwar - Dhanpatrai &amp; Co. Publications</li> <li>4. A Course in Electrical Power - Soni, Gupta, Bhatanagar - Dhanpatrai &amp; Co. Publications</li> </ol>		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

<b>Electrical Engineering Materials</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03Hours / Week	End Semester Examination: 60 Marks	03 Credits
	Continuous Assessment: 40 Marks	
<b>Course Pre-requisites:</b> Engineering Physics		
The Students should have knowledge of		
1.	Electrical Engineering materials	
<b>Course Objectives:</b>		
	To understand in detail the properties of interest of the materials used in Electrical Engineering	
<b>Course Outcomes:</b> Student should able to		
1.	get knowledge about conducting materials.	
2.	get knowledge about magnetic materials.	
3.	get knowledge about insulating materials.	
4	get knowledge about dielectric & optical properties of materials.	
5	get knowledge about Nano materials.	
6	get knowledge about materials for electronics components	
<b>UNIT - I</b>	<b>Electrical Conducting Materials</b>	<b>(06 Hours)</b>
	High conductivity materials : Copper, Aluminum, Iron & Steel ,Alloys of Copper Materials of High Resistivity: Materials used in precision work, Materials used for rheostat, materials used for heating devices. Electrical carbon materials, Superconductivity, Thermoelectric effects, operation of thermocouple, alloys, Thermobimetals, Study of Electrolyte.	
<b>UNIT - II</b>	<b>Magnetic Materials</b>	<b>(06 Hours)</b>
	Classification of magnetic materials: Diamagnetism, Paramagnetism, Ferromagnetism, Anti-ferromagnetism, Ferrimagnetism. Soft magnetic materials, Solid core materials, Sheet steel, electric steel, cold rolled grain oriented silicon steel, hot rolled grain oriented silicon steel, hot rolled silicon steel sheet. Special purpose alloy, Alloyed steels with silicon, high silicon, alloy steel for transformers, low silicon alloy steel for electric rotating machines. Common magnetic materials, Magnetic resonance, Magnetic Shielding	
<b>UNIT - III</b>	<b>Insulating Materials</b>	<b>(06 Hours)</b>
	Electrical properties of insulating materials, Temperature rise and insulating materials, Classification of insulating materials. Insulating materials used in modern electrical machines. Applications of insulating materials: Insulating materials for wires, Insulating materials for laminations, Insulating materials for machines, Insulating materials for transformers. Thermoplastic materials: Poly-vinyl chloride (PVC), Polyethylene, silicons, their important properties & applications. Natural insulating materials: Mica, Asbestos, Ceramic materials, Glass, Cotton, Silk, Jute, Paper, Rubber	
<b>UNIT - IV</b>	<b>Dielectric &amp; Optical Properties of Materials</b>	<b>(06 Hours)</b>
	<b>A).Dielectric Properties of Insulating Materials:</b> Static Field ,Dielectric Parameters [Dielectric constant, Dipole moment, Polarization, Polarizability], Mechanisms of Polarizations-Electronic, Ionic and Orientational Polarization (Descriptive treatment only), Clausius Mossotti Equation, Piezo-Electric, Pyro-Electric & Ferro-Electric Materials, Dielectric Loss and loss Tangent. <b>B) Optical Properties of Materials &amp; Cells used for Power Generation:</b> Photo-Conductivity, Photo-Electric Emission, Photo-Voltaic cells [Materials Used, Construction, Equivalent Circuit, Working and Application], Photo-Conductive cells, Photo-Emissive cells, Photo emitters, photo transistors, photo resistors, application of photo sensitive materials (CRT, Tube Light, Photo Panals)	
<b>UNIT - V</b>	<b>Nano Materials</b>	<b>(06 Hours)</b>

	Introduction, Concepts of Energy bands & various Conducting Mechanism in Nano-structures, Carbon Nano-structures, Carbon Molecules, Carbon Clusters, Carbon Nano-tubes, Applications of Carbon Nano-tubes, Special Topics in Nano Technology such as Single Electron Transistor , Molecular Machines, BN Nanotubes, Nano wires, Application of Nano materials in electrical engineering.	
<b>UNIT - VI</b>	<b>Materials for Electronics Components</b>	<b>(06 Hours)</b>
	Introduction, Resistors: Carbon composition resistors, Insulated moulded resistors, Film type resistors, Cracked carbon resistors, Alloy resistors, Metallic–oxide film resistors, Wire wound resistors, High value resistors, Non linear resistors, Varistors, Variable resistors. Capacitors: Capacitor paper, Loss tangent, Electric strength & operating stress, Mica dielectric capacitors, Ceramic dielectric capacitors, Glass dielectric capacitors, Vitreous enamel dielectric capacitors, plastic dielectric capacitors, Electrolytic capacitors, Air dielectric capacitors, variable capacitors Inductors : Construction, Air cored coils, cored coils	
<b>Text Books:</b>		
1. A Course in Electrical Engineering Materials by S. P. Seth, Dhanpat Rai and Sons, Delhi -6.		
2. Electrical Engineering Materials by K. B. Raina & S. K. Bhattacharya, S. K. Kataria & Sons, Delhi-06.		
3. Electrical & Electronics Engineering Materials By Navneet Gupta , Dhanpat Rai & Co.		
4. Nanotechnology - A gentle introduction to next big idea by Mark Ratner & Daniel Ratner, Pearson Education		
5. Introduction to Nanotechnology by Charles P. Poole, Jr. Frank & J. Ownes (Wiley Student Edition)		
6. Introduction to Nano Science & Technology – Chattopadhyay – PHI Publication		
<b>Reference Books:</b>		
1. Electrical Engineering Materials by C. S. Indulkar & S. Thiruvengadam, S. Chand & Com.Ltd		
2. Electrical Engineering Materials by S. P. Chalotra & B. K. Bhatt, Khanna Publishers		
3. Introduction to Material Science for Engineering by James F. Shackelford, M.K. Muralidhara, Pearson Education, Sixth Edition.		
4. Insulation Technology Course Material of IEEMA, Ratner, Pearson Education.		
5. Electrical Engineering Materials, Dekkar, PHI Publications.

## Linear Control Systems

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks    Oral 25marks	01 Credit

### Course Prerequisites:

The students should have knowledge of

Mathematics , Laplace transform , Ordinary differential equation

### Course Objectives:

This course introduces concepts of feedback control system. It provides foundation for mathematical modeling of components. It includes application of analytical and graphical techniques for stability analysis of system. These techniques can be used for any industrial system.

**Course Outcomes:** After learning this course the students will be able to

1. Calculate transfer function of components using mathematical equations.
2. Draw block diagram and signal flow graphs of system and evaluate overall transfer function of closed loop system.
3. Apply different techniques for stability analysis of any system in time domain.
4. Design PID controller and design compensator using root locus technique.
5. Draw Bode plot and Nyquist. plot and comment about stability in frequency domain.
6. Design a system using compensator to meet the desired needs and specifications by bode plot

<b>UNIT I</b>	<b>Introduction</b>	<b>(06 Hours)</b>
	Classification of control system, open loop, closed loop, examples, Block Diagram reduction, signal flow graph, Mason's gain formula. Mathematical Modeling and Transfer function of Electrical, mechanical system , Analogy for mechanical and electrical systems, Potentiometer, Synchronos, AC- DC Servomotor, Stepper motor, Gear Trains, AC-DC servomechanism, Tachogenerator, optical encoder	
<b>UNIT II</b>	<b>Time domain analysis</b>	<b>(06 Hours)</b>
	Standard test signals, Type and order of the system ,Time response of first and second order system to unit step input , Specifications for second order system, Steady state error, static error constants, Characteristic Equation, its roots in complex plane and time response	
<b>UNIT III</b>	<b>Stability analysis in time domain</b>	<b>(06 Hours)</b>
	Concept of stability absolute, relative, Routh-Hurwitz stability criteria , special cases, limitations. Root Locus: Basic properties of root locus. Construction of root locus. Angle and magnitude condition for stable	

	system. Determination of gain for specified damping ratio, Effect of pole, zero addition on root locus, cancellation of poles and zeros	
<b>UNIT IV</b>	<b>Design in time domain</b>	<b>(06 hours)</b>
	Basic concept of PID controller, tuning rules of PID controller, step response of system without and with PID controller, rate feedback , Need of compensation, transfer function of lead, lag, lag- lead , lead and lag compensator design using root locus. Use of SISO design tool in MATLAB	
<b>UNIT V</b>	<b>Frequency domain Analysis</b>	<b>(06 Hours)</b>
	Frequency response of first order and second order system to sinusoidal input, frequency domain specifications, Correlation between time domain and frequency domain , Polar plot, Nyquist stability Criteria, Nyquist plot, Gain margin, Phase margin and stability analysis using polar plots, Bode plot, Determination of Gain margin , phase margins and stability analysis using Bode Plot, Deduction of transfer function using bode plot	
<b>UNIT VI</b>	<b>Design in frequency domain</b>	<b>(06 Hours)</b>
	Bode plot of lead, lag, lag- lead compensating network, Design specifications, Design of lead, lag compensators using bode plot. Comparison of lag, lead compensator effect on system performance. Use of SISO design tool in MATLAB	

**Term Work:**

The term work shall consist of record of minimum eight experiments. Four from first seven, four from next seven and to ensure at least one experiment on each unit.

1. To plot characteristics of potentiometer and observe potentiometer pair as an error detector.
2. To plot characteristics of Synchro and observe Synchro pair as an error detector.
3. To determine transfer function of D C servomotor.
4. To observe step response of RLC series circuit for different values of R.
5. To analyze i) effect of gain ii) effect of tachometer feedback on output response of D.C. position servomechanism
6. To tune PID controller and analyze step response of temperature/ pressure control system.
7. To plot root locus using MATLAB and determine value of K for given value of damping ratio from the plot. ii) To analyze effect of addition of zero/ pole on root locus
8. To observe frequency response and to draw bode plot of lag, lead network.
9. To analyze stability of system in frequency domain by i) Nyquist plot ii) Bode plot using MATLAB .
10. To design lead compensator using bode plot and observe step response of uncompensated and compensated system.(SISOTOOL in MATLAB)
11. To design lag compensator using root locus technique and observe step response of uncompensated and compensated system. .(SISOTOOL in MATLAB)
12. To design PID controller for second order system to obtain desired performance specifications.
13. To use various commands for block diagram reduction like series, parallel, append, connect, feedback.(MATLAB)

14. To calculate steady state error for different inputs and different types of system(MATLAB)	
<b>Text Books:</b>	
1. I.J. Nagrath, M. Gopal, ““Control System Engineering”, New Age International Publishers – Fourth edition	
2. Katsuhiko Ogata, “Modern control system engineering”, Prentice Hall, 2010.	
3. M.N.Bandopadhyay, “ Control Engineering Theory and practice”- Prentice Hall of India 2006	
<b>Reference Books:</b>	
1. Nise N. S. “Control Systems Engineering”, John Wiley & Sons, Incorporated, 2011	
2. D. Roy Choudhary, "Modern Control Engineering", PHI Learning Pvt. Ltd., 2005	
3. Dorf, Bishop - “Modern control system”, Pearson Education	
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

**Assignments:** Assignments should be able to verify course outcome and skills of group work, communication skills

1. To solve numerical on block diagram reduction to calculate overall transfer function of system and verify with Mason’s gain formula
2. To calculate transfer function of equivalent electrical system for given mechanical system.
3. Quiz –Multiple Choice Questions 20
4. To solve numerical on time domain and analyze parameter variations on transient response and steady state error.
5. Solve two years question paper of Pune university unit wise.
6. Solve two years question paper of GATE unit wise.
7. To observe NPTEL video lecture by M. Gopal on any topic of control and give presentations, group discussion.
8. To collect information about controllers used in process control in thermal power plant.
9. To collect information about controllers used in power system for voltage and frequency control.
10. To collect information about controllers used in machine control.
11. To validate the design by hardware.

## Microcontroller

<b><u>TEACHING SCHEME:</u></b>		<b><u>EXAMINATION SCHEME:</u></b>		<b><u>CREDITS</u></b>
				<b><u>ALLOTTED:</u></b>
Theory: 03 Hours / Week		End Semester Examination: 60 Marks		03 Credits
Practical: 02 Hours / Week		Continuous Assessment: 40 Marks		
		Term Work: 25 Marks Oral : 25 Marks		01 Credit
<b>Course Pre-requisites:</b>				
The Students should have knowledge of				
<b>1.</b>	Digital electronics & Microprocessor 8085.			
<b>Course Objectives:</b>				
	This course introduces basic knowledge of Microcontroller 8031/51 & PIC Microcontroller.			
<b>Course Outcomes:</b>				
<b>1.</b>	Understand basic architecture and block diagram of microcontroller 8051.			
<b>2.</b>	Understand the different addressing modes and use them to write instructions			
<b>3.</b>	Understand the basics of interrupt structure of 8051			
<b>4</b>	Understand the 8051 programming.			
<b>5</b>	Introduction to PIC microcontrollers			
<b>6</b>	Understand PIC peripherals			
<b>Introduction</b>				
<b>UNIT - I</b>	Introduction to the concept of micro-controllers. Comparison of microprocessor and microcontroller. Difference between RISC and CISC microcontrollers. Harvard and Von Neumann Architectures, Architecture of 8031/51 microcontroller, Pin diagram, special function registers. Ports, Internal Memory, External memory, Counters and timers in 8051, Clock, Timer modes.			<b>(06 Hours)</b>
<b>UNIT - II</b>	<b>MCS-51 Addressing modes and Instructions</b>			
	Addressing modes, MCS-51 Instruction set, external data moves, code memory read only data moves, Push and Pop, data exchanges, byte level logical operations, bit level logical operations. Rotate and swap operations. Instructions affecting flags, incrementing/decrementing, Arithmetic operations, Jump and call instructions.			<b>(06 Hours)</b>
<b>UNIT - III</b>	<b>Interrupts</b>			
	Serial data I/O, serial data mode interrupt, serial port interrupt, external hardware interrupts, software generated interrupts, interrupt control, interrupt priority in the 8051.			<b>(06 Hours)</b>
<b>UNIT - IV</b>	<b>Applications</b>			
	Applications like Interfacing of 8051 with ADC , Interfacing of 8051 with DAC Interfacing of 8051 to stepper motor, Interfacing of 8051 to DC motor, Application for Traffic Control System.			<b>(06 Hours)</b>

<b>UNIT - V</b>	<b>Introduction to PIC Microcontroller</b>	
	Introduction to PIC 16F8XX family and development tools. CPU architecture and instruction set. Harvard architecture and pipelining, program memory considerations, register file structure and addressing modes, CPU registers.	<b>(06 Hours)</b>
<b>UNIT - VI</b>	<b>PIC Peripherals</b>	
	I/O ports, external interrupts and timers, timer operation, ADC, short overview of synchronous serial port, serial peripheral interface I2C bus.	<b>(06 Hours)</b>
<b>Term Work:</b>		
The term work shall consists of record of minimum eight experiments		
<ol style="list-style-type: none"> <li>1. Programs of addition, subtraction, multiplication etc.</li> <li>2. Programs on logical and decision making group of instructions</li> <li>3. <b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

**Assignments:**

1. Group discussions on any one of the topics.
2. Watch the NPTEL video on this subject of any TWO modules and summarize it.
3. Open book class test on this subject.
4. Give presentation on PIC microcontroller.
5. Solve questioners in the class room on microcontroller.
6. List different microcontroller & compare them.
7. Prepare report on different microcontrollers used in your laboratory.
8. Give a presentation on “commercial aspects of microcontroller”.
9. Give presentation on different applications on PIC microcontroller.
10. Give presentation on different applications on 8051 microcontroller.
11. Program 8051 microcontroller for addition, subtraction & multiplication operations.
12. Write a note on PIC peripherals.
13. Study instruction set of 8051 microcontroller.
14. Study instruction set of PIC microcontroller.

## Electrical Machine Design

<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	05 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
Tutorial: 01 Hours/ Week	Term Work: 25 Marks & Oral: 25 Marks	01 Credit

### **Course Pre-requisites:**

The Students should have knowledge of

1. Various Materials Used in Electrical Machines
2. Types, construction & working of Transformers
3. Types, construction & working of DC & AC Machines

### **Course Objectives:**

This course introduces Design of Electrical machines for the given specifications

### **Course Outcomes: The students will be able to**

1. Apply the concepts of machines and materials in design of machines.
2. Analyze and estimate the transformer performance parameters
3. To estimate the main dimensions and performance parameters of 3- Induction Machines by understanding the general concepts and constraints in design.
4. To estimate the main dimensions and performance parameters of 1- Induction Machines by understanding the general concepts and constraints in design.
5. To estimate the main dimensions and performance parameters of Synchronous Machines & DC machines by understanding the general concepts and constraints in design.
6. To use different software (AutoCAD) for design.

<b>UNIT - I</b>	<b>Fundamental Aspects, Thermal Design Aspects and General concepts, Constraints in design of Electrical Machines.</b>	<b>(10 Hours)</b>
	<p>Introduction, Design factors, Limitations in design, Modern trends in Design of Electrical Machines, Basic Principles.</p> <p>Modes of heat dissipation, Heating and cooling curves, calculation of heating and cooling time constants, Rating of machines, selection of motor power ratings, Cooling of rotating of rotating machines, Types of duties and ratings and selection of motor capacity. Methods of measurement of temperature rise. Measurement of winding temperature.</p> <p>Relation between Rating and Dimensions of Rotating Machines: Main dimensions, Total loadings, Specific loadings, Output equation, Factors affecting size of rotating machines, Choice of specific magnetic &amp; specific electric loading</p>	

<b>UNIT - II</b>	<b>Design Of Transformer.</b>	<b>(08 Hours)</b>
	Output equation with usual notations, design of core, yoke and windings of transformer. Estimation of resistance and leakage reactance of transformer. Estimation of no-load current, regulation of transformers. Calculation of mechanical forces, methods of cooling & tank design. Design of small single phase transformers.	
<b>UNIT - III</b>	<b>Design of 3- Induction Motors.</b>	<b>(07 Hours)</b>
	General Specifications of 3- Induction Motor. Stator winding design, Stator slot design, Stator teeth design, Depth of stator core, Rotor design: Air gap length, squirrel cage rotor and wound rotor, Design of rotor teeth & rotor core, Estimation of operating characteristics, Dispersion Coefficient.	
<b>UNIT - IV</b>	<b>Design of 1- Induction Motors.</b>	<b>(07 Hours)</b>
	Design of single phase Induction motor: Choice of specific loadings. Determination of main dimensions. Relative size of three phase and single phase Induction motor for same output. Design of main and starting winding for split phase, capacitor start motors. Design of rotor. Operating characteristics.	
<b>UNIT - V</b>	<b>Design of DC &amp; Synchronous Machines.</b>	<b>(08 Hours)</b>
	<b>Design of DC Machines:</b> Design of field system and interpoles. Design of armature. Design of commutator and brushes. Design of heating coil, motor resistance starter, regulators, lifting magnets. <b>Alternators:</b> Output equation, Main dimensions, Choice of specific electric and magnetic loadings, choice of speed and number of poles, different types of pole structure used in synchronous machines. Design of armature: conductors, slots. Armature winding, Design of air-gap, Design of rotor: Height of pole, pole shoe, damper winding. open circuit characteristics, Losses and temperature rise.	
<b>UNIT - VI</b>	<b>Modern Tools for Machine Design.</b>	<b>(08 Hours)</b>
	Design optimization using various FEA (Finite Element Analysis) based machine design packages- Maxwell 2D, 3D, Magnet, 2D FEA analysis. FEMM (Finite Element Method Magnetics) free software.	

<b>Industrial Visit: Industrial visit to a manufacturing unit of transformer or Induction motor.</b>	
<b>Term Work:</b>	
The term work shall consist of 3 Drawing sheets and Design problems. (three in AutoCAD)	
<ol style="list-style-type: none"> <li>1. Details (Elevation, side view, top view) and assembly of 3- phase (power or distribution) transformer with design report.</li> <li>2. Details and layout of AC &amp; DC winding with design report.</li> <li>3. Assembly of 3- phase induction motor.(only sheet)</li> <li>4. Report based on Industrial visit to a manufacturing unit. (Transformer or Induction motor).</li> <li>5. Details and assembly of 3-phase Alternator with design report.</li> <li>6. Assembly of 1- phase transformer.</li> <li>7. Details and assembly of 3- phase Induction Motor with design report.</li> <li>8. Assembly of 1- phase Induction Motor.</li> </ol>	
<b>Text Books:</b>	
<ol style="list-style-type: none"> <li>1. Sawhney A. K., <i>Electrical Machine Design</i>, Dhanpath Rai &amp; Co. (P) Ltd Sixth Edition: 2006</li> <li>2. M.G. Say – Theory and Performance and Design of A.C. Machines, 3rd Edition, ELBS London.</li> <li>3. P. P. Silvester and Ferraris’s book on Electrical Machine Design using FEA</li> </ol>	
<b>Reference Books:</b>	
<ol style="list-style-type: none"> <li>1. A Shanmugasundaram, G. Gangadharan, R. Palani, - Electrical Machine Design Data Book, 3rd Edition, 3rd Reprint 1988 - Wiely Eastern Ltd., - New Delhi</li> <li>2. K.L. Narang , A Text Book of Electrical Engineering Drawings, Reprint Edition : 1993 / 94 – Satya Prakashan, New Delhi.</li> <li>3. Vishnu Murti, “Computer Aided Design for Electrical Machines”, B.S. Publications</li> </ol>	
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

### Assignments

1. Students should compile the list of vendors (manufacturers of Transformers, DC Machines, Single phase Induction Motors, PMDC motor, Stepper Motor, contact, and address) along with the details like types, specifications, and costs and should prepare the comparative for the same.
2. Students should prepare the report on “Estimation of no-load current of transformer” or “Estimation of operating characteristics of 3- Induction Motor”.
3. One industrial visit to the Manufacturing industry and the students will prepare the report which includes the consumption pattern of the products produced, process flow diagram and process description, major engineering problems in the industry.
4. Students should prepare the plant-layout for the industry visited.

5. Watch the NPTEL video on this subject of any TWO modules and summarize it
6. Solve Design problems for all types of machines.
7. Students should prepare the Datasheet for different machines.
8. Open book class test (Objective test).
9. Students have to study any One NPTEL videos related to a particular unit in group and prepare/present power point presentation.
10. Visit to Winding workshops, any machine repairing shop and prepare a report on detailed specifications of a machine, construction, types, material used and applications.
11. Students should prepare the report on modern tools in Design of Machines.
12. Prepare models for any types of machines related to the subject and write industrial applications.

## Electrical Estimation, Costing & Installation

<b><u>TEACHING SCHEME:</u></b>		<b><u>EXAMINATION SCHEME:</u></b>		<b><u>CREDITS ALLOTTED:</u></b>
Theory: 03 Hours / Week		End Semester Examination: 60 Marks		03 Credits
		Continuous Assessment: 40 Marks		
<b>Course Pre-requisites:</b>				
The Students should have knowledge of				
<b>1.</b>	Introduction of Electrical supply system, typical A.C. power supply scheme, Classification of Supply systems			
<b>2.</b>	Single line diagram of electrical supply system			
<b>Course Objectives:</b>				
	1. To understand the basic concepts, installation, estimation and costing of distribution systems, substation and residential electrification.			
	2. To enable candidate to understand earthing system for residential and commercial Installation.			
	3. To understand practical aspects of condition monitoring and maintenance of various electrical equipments			
<b>Course Outcomes: Student will be able to</b>				
<b>1.</b>	Draft tender documents.			
<b>2.</b>	Do estimation and costing of residential and commercial buildings.			
<b>3.</b>	Select appropriate method for service connection.			
<b>4</b>	Calculate total electrical load.			
<b>5.</b>	Do detail Estimation and costing of industrial installation.			
<b>UNIT - I      Contracts, Tenders And IE Rules      (06 Hours)</b>				
	Concept of Contracts and Tenders, Types of Contracts and Contractors, types of tenders, tender notice, procedure for submission and opening of tenders ,requirements of valid contract and good Contractor, comparative statements for selection of contractors, IE rules related to electrical installation, work to permit.			
<b>UNIT - II      Service Connections      (06 Hours)</b>				
	Concept of service connections, types of service connections and their features, methods of installation of service connections, difference between underground and over head service connections, service connections for 11KV HT consumers, panel designing, cable jointing.			
<b>UNIT - III      Electrification Of Residential Installation      (06 Hours)</b>				
	General rules and guidelines for installation of residential electrification and positioning of equipments, calculation of total electrical load in the residential installation, procedure for the design of number of sub circuits, load calculations and selection of size of wire by considering overload and future expansion, determine length of batten and length of wire, selection of rating for main switch, distribution board, MCB, ELCB			

	and wiring accessories, total estimation and costing of overall residential installation with proper cost of material, labor charges	
<b>UNIT-IV</b>	<b>Electrification Of Commercial Installation</b>	<b>(06 Hours)</b>
	Concept of commercial installation, difference between residential and commercial installation ,types of cables required for commercial installations according to size and core ,general requirements and selection factors for commercial installation, load calculations and selection of size of service connections and nature of supply, decide number of lighting and power sub circuits as per IE rules, decide length of wire required for every sub circuit, decide ratings of wiring accessories, main switch, bus bar MCB,ELCB etc. Decide proper method of earthing for commercial installation find out the estimation chart with proper cost of material,cost of labor, contingencies charges and profit margin.	
<b>UNIT - V</b>	<b>Electrification Of Industrial Installation</b>	<b>(06 Hours)</b>
	Concept of motor wiring circuit and single line diagram, guidelines about power wiring and motor wiring, design considerations of electrical installations in industry/factory/workshop, machine current calculations ,selection of size of wires, cables required for the machines and its controlling unit, decide length and size of cable required for every industrial load, decide ratings of wiring accessories, main switch, bus bar MCB,ELCB etc. for every industrial load, decide proper method of earthing for industrial installation with their costing, find out the estimation chart with proper cost of material, cost of labor, contingencies charges and profit charges and profit margin.	
<b>UNIT - VI</b>	<b>Maintenance</b>	<b>(06 Hours)</b>
	Definition, Need of maintenance, Types of maintenance, Breakdown maintenance, Preventive maintenance, Condition monitoring, Advanced tools and techniques of condition monitoring, Maintenance strategy, Maintenance type selection, Comparison of different maintenance types,	
<b>Text Books:</b>		
4. Surjit Singh – “Electrical Estimating and Costing” Dhanpat Rai Publications		
<b>Reference Books:</b>		
1. S. L. Uppal - “Electrical wiring, estimating & costing” Khanna Publishers		
2. B. V. S. Rao - “Operation and Maintenance of electrical equipments” (Vol. 2) Media promoters and publishers Pvt. Ltd.		
3. Raina.K.B and Bhattacharya S.K.,”Electrical design,Estimating and Costing”,Tata McGraw Hill,NewDelhi		
4. B.D. Arora-Electrical wiring,Estimation and costing-New Heights,New Delhi		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

Assignments:

1. To solve numerical on calculations of total electrical load in the residential installation.
2. To solve numerical on calculations of total electrical load in commercial installation.
3. To solve numerical on calculations of total electrical load in industrial installation.
4. To calculate the total electrical load of electrical machine laboratory/any building.
5. To solve two years question papers of University unit wise.
6. To collect information about the recent/new installation techniques.
7. To observe and study the earthing system of our collage & to prepare a report on the earthing system which is used.

## Elective I: Engineering Economics and Accountancy

<b><u>TEACHING SCHEME:</u></b>		<b><u>EXAMINATION SCHEME:</u></b>		<b><u>CREDITS ALLOTTED:</u></b>		
Theory: 03 Hours / Week		End Semester Examination: 60 Marks		03 Credits		
		Continuous Assessment: 40 Marks				
<b>Course Pre-requisites:</b>						
The Students should have knowledge of						
<b>1.</b> Fundamental of Electrical Engineering Economics						
<b>Course Objectives:</b>						
<ul style="list-style-type: none"> <li>• This course will introduce various concepts and methods of economic analysis in engineering, including the time value of money and its effect on economic decisions, economic equivalence, economic measures of worth, cash flow analysis, equipment depreciation, effects of taxation and inflation, decision making under uncertainty, capital budgeting, replacement decisions, and benefit-cost analysis.</li> </ul>						
<b>Course Outcomes:</b>						
The student will be able to						
<b>1.</b> Understand the economic fundamentals.						
<b>2.</b> Learn about principles of decision making involved in engineering projects.						
<b>3.</b> They learn about: cash flows, time value of money and evaluation of investments and projects.						
<b>UNIT - I</b>	<b>Introduction</b> Managerial Economics - Relationship with other disciplines - Firms: Types, objectives and goals - Managerial decisions - Decision analysis.				<b>(06 Hours)</b>	
<b>UNIT - II</b>	<b>Demand &amp; Supply Analysis</b> Demand - Types of demand - Determinants of demand - Demand function – Demand elasticity - Demand forecasting - Supply - Determinants of supply - Supply function -Supply elasticity.				<b>(06 Hours)</b>	
<b>UNIT - III</b>	<b>Production And Cost Functions</b> Production function - Returns to scale - Production optimization - Least cost input - Isoquants - Managerial uses of production function.				<b>(06 Hours)</b>	
<b>UNIT - IV</b>	<b>Cost Analysis</b> Cost Concepts - Cost function – Types of Cost - Determinants of cost - Short run and Long run cost curves - Cost Output Decision - Estimation of Cost.				<b>(06 Hours)</b>	

<b>UNIT - V</b>	<b>Pricing</b>	<b>(06 Hours)</b>
	Determinants of Price - Pricing under different objectives and different market structures - Price discrimination - Pricing methods in practice – role of Government in pricing control.	
<b>UNIT - IV</b>	<b>Financial Accounting (Elementary Treatment)</b>	<b>(06 Hours)</b>
	Balance sheet and related concepts - Profit & Loss Statement and related concepts - Financial Ratio Analysis - Cash flow analysis - Funds flow analysis – Comparative financial statements - Analysis & Interpretation of financial statements. Investments - Risks and return evaluation of investment decision - Average rate of return - Payback Period - Net Present Value - Internal rate of return.	
<b>Assignment:</b>		
1. Managerial Economics - Relationship with other disciplines		
2. Demand and supply Analysis		
3. Production and cost function		
4. Cost analysis		
5. Pricing		
6. Financial accounting		
<b>Text Books:</b>		
1. McGuigan, Moyer and Harris, 'Managerial Economics; Applications, Strategy and Tactics', Thomson South Western, 10th Edition, 2005.		
2. Prasanna Chandra. 'Fundamentals of Financial Management', Tata Mcgraw Hill Publishing Ltd., 4th edition, 2005.		
<b>Reference Books:</b>		
1. Samuelson. Paul A and Nordhaus W.D., 'Economics', Tata Mcgraw Hill Publishing Company Limited, New Delhi, 2004.		
2. Paresh Shah, 'Basic Financial Accounting for Management', Oxford University Press, New Delhi, 2007.		
3. Salvatore Dominick, 'Managerial Economics in a global economy'. Thomson South Western, 4th Edition, 2001.		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT – III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT – VI	

## Elective I: Six Sigma

<b>Elective I: Six Sigma</b>		
<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
	Continuous Assessment: 40 Marks	
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
<b>1.</b>	Computer Programming	
<b>Course Objectives:</b>		
	<ol style="list-style-type: none"> <li>1. To explore the concept of six sigma thoroughly.</li> <li>2. The actual working of six sigma in industries.</li> <li>3. Various terms related with six sigma.</li> <li>4. The outcome and analysis of six and sigma.</li> </ol>	
<b>Course Outcomes: The students will be able to</b>		
<b>1.</b>	Recognize the six sigma organization and concepts of six sigma matrix.	
<b>2.</b>	Explore the six sigma administration	
<b>3.</b>	Explore the Basic Quality Tools & Statistical concepts related with six sigma.	
<b>4.</b>	Explore the Capability Analysis Process capability indices.	
<b>5.</b>	Explicit the concept of DFSS.	
<b>6.</b>	Explore the various concepts regarding objectives and benefits of SPC and Lean Principles.	
<b>UNIT - I</b>	<b>Introduction of Six Sigma Origin of Six Sigma &amp; Basic concept</b>	<b>(06 Hours)</b>
	<p><b>Six Sigma Overview:-</b>Recognize why organizations use Six Sigma, how they apply its philosophy of Value Focus and goals. Concepts of CTQ / CTP / <math>Y=f(X)</math></p> <p><b>Six Sigma Metrics:-</b>Recognize key drivers for business (profit, market share, customer satisfaction, efficiency, product differentiation) and how key metrics and scorecards are developed and impact the entire organization. Calculate process performance metrics such as defects per unit (DPU), rolled throughput yield (RTY), cost of poor quality (COPQ), defects per million opportunities (DPMO) &amp; sigma levels</p>	
<b>UNIT - II</b>	<b>Six Sigma Administration</b>	<b>(06 Hours)</b>
	<p>Describe the project selection process, Six Sigma improvement methodology (DMAIC). Six Sigma and other team roles and responsibilities, Describe and define the roles and responsibilities of participants on Six Sigma and others including Black Belt, Master Black Belt, Green Belt, Champion, executive, coach, facilitator, team member, sponsor, process owner.</p> <p><b>Voice Of Customer</b> Use various methods to collect customer feedback (e.g., surveys, focus groups, interviews, observation) and identify the key elements that make these tools effective. Review survey questions to eliminate bias, vagueness, etc. Define Internal &amp; External Customers,</p>	

	DEFINE Project charter, Stake-holders, Project Team dynamics	
<b>UNIT - III</b>	<b>Basic Project Management &amp; Planning Tools</b>	<b>(06 Hours)</b>
	Describe Process Mapping, SIPOC/COPIS, process inputs, outputs. Design and process failure mode and effects analysis (DFMEA & PFMEA). Basic Tools:- 1) Affinity Diagrams, 2) Interrelationship Digraphs, 3) Tree Diagrams, 4) Prioritization Matrices, 5) Matrix Diagrams, 6) Process Decision Program (PDPC) Charts, 7) Activity Network Diagrams. Quality function deployment (QFD), <b>Basic Quality Tools &amp; Statistical concepts</b> Graphical, Enumerative Tools, Population parameters and sample statistics. Data Types, Measurement scales, Sampling Techniques, Data collection tools - Check Sheets, Stratification. Data Analysis Tools - Pareto diagram, Cause & Effect analysis, Trend Charts, Multi-Vary analysis, Scatter Diagrams, Histogram & Control Charts. Basic Probability Concepts, Measures of Distribution, Dispersion and Central Tendency, Probability distributions - Discrete data - Binomial & Poisson. Continuous data - Normal distribution. Z transform, Central Limit Theorem. Student's t distribution & Chi square distribution.	
<b>UNIT - IV</b>	<b>Capability Analysis Process capability indices</b>	<b>(06 Hours)</b>
	- Short term - Process Capability - Cp, Cpk. Long Term - Process performance indices - Pp, Ppk. Confidence Intervals CI for Means & for Variance. Hypothesis Testing ANOVA & Regression One Way & Multiway ANOVA, Co-relation & Regression analysis MSA Bias, Linearity, Stability and precision/tolerance (P/T) ratio for Continuous data & Percent agreement for Discrete Data. Calculate, analyze, and interpret measurement system capability using repeatability and reproducibility (GR&R) for continuous data. Kappa agreement concepts for Discrete data.	
<b>UNIT - V</b>	<b>DFSS Concepts</b>	<b>(06 Hours)</b>
	DMADV (define, measure, analyze, design, verify) and IDOV (identify, design, optimize, verify), Robust Design Concept. <b>Experimental Methods</b> Introduction to Design of Experiments	
<b>UNIT - VI</b>	<b>Control Methods</b>	<b>(06 Hours)</b>
	Describe the objectives and benefits of SPC, including controlling process performance, identifying special and common causes, Rational sub-grouping, Control Charts for Continuous & Discrete data. <b>Lean Principles</b> Define and describe concepts such as Theory of Constraints, value chain, flow, pull, etc., and tools commonly used to eliminate waste, including kaizen, 5S, error-proofing, value-stream mapping, etc. Value-added and non-value-added activities Identify waste in terms of excess inventory, space, test inspection, rework, transportation, storage, etc., and reduce cycle time to improve throughput.	

--	--	--

<b>Text Books:</b>	
1.	The Six Sigma Black Belt Handbook by MacCarty, Daniels, Bremer and Gupta, TMGH, 2010 Edition Juran Institute's Six Sigma Breakthrough and Beyond by De Feo and Barnard, TMGH. What is Six Sigma? by Peter Pande, TMGH
2.	Six Sigma Management by Blashka, TMGH
3.	All about Six Sigma by Warren Brussee, TMGH
<b>Reference Books:</b>	
1.	Lean Six Sigma by Hubert Ramprasad, Sara Books Pvt.Ltd.
2.	The Certified Six Sigma Black Belt Hand Book, Donald Benbow, Pearson
3.	The Certified Six Sigma Black Belt Hand Book, Donald Benbow, Pearson
4.	Achieving Business Excellence by Pravin Rajpal, Om Books International, India.
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

**Assignments:** Assignments should be able to verify course outcome and skills of group work, communication skills

1. To solve numerical on block diagram reduction to calculate overall transfer function of system and verify with Mason's gain formula
2. To calculate transfer function of equivalent electrical system for given mechanical system.
3. Quiz –Multiple Choice Questions 20
4. To solve numerical on time domain and analyze parameter variations on transient response and steady state error.
5. Solve two years question paper of Pune university unit wise.
6. Solve two years question paper of GATE unit wise.
7. To observe NPTEL video lecture by M. Gopal on any topic of control and give presentations, group discussion.
8. To collect information about controllers used in process control in thermal power plant.
9. To collect information about controllers used in power system for voltage and frequency control.
10. To collect information about controllers used in machine control.
11. To validate the design by hardware.

## Elective- I Risk and Derivatives

<b>Elective- I Risk and Derivatives</b>		
<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
<b>Course Prerequisites:</b>		
The students should have knowledge of		
<b>1.</b>	Management Studies	
<b>Course Objectives:</b>		
	<ol style="list-style-type: none"> <li>1. To explore the concept of Risk and Derivatives thoroughly.</li> <li>2. The actual working of Risk and Derivatives in industries.</li> <li>3. Various terms related with Risk and Derivatives.</li> </ol>	
<b>Course Outcomes:</b> After learning this course the students will be able to		
<b>1.</b>	Explore the various terms related with derivatives	
<b>2.</b>	Explore the various contracts related with the future.	
<b>3.</b>	Explore the term options and various terms associated with options	
<b>4.</b>	Explore the term SWAPS and terms associated with SWAPS.	
<b>5.</b>	Explore to the meaning of risk management and associated terms .	
<b>6.</b>	Explore with various Instruments of External techniques of Risk Management	
<b>UNIT I</b>	<b><u>Derivatives</u></b>	<b>(06 Hours)</b>
	Definition and Types Forward Contracts, Futures Contracts, Options, Swaps, Differences between Cash and Future Markets, Types of Traders ,OTC and Exchange Traded Securities, Types of Settlement, Uses and Advantages of Derivatives, Evolution of Derivatives Market in India, Regulations – Framework, Exchange Trading in Derivatives	
<b>UNIT II</b>	<b><u>Futures Contract</u></b>	<b>(06 Hours)</b>
	Specifications of Futures Contract, Margin Requirements, Marking to Market, , Hedging using Futures, Types of Futures Contracts – Securities, Stock Index Futures, Currencies and Commodities, Delivery Options, Relationship between Future Prices, Forward Prices and Future Spot Prices, Commodity Futures, Contract Terminology and Specifications for Stock Options and Index Options in NSE, Contract Terminology and specifications for Stock Futures and Index futures in NSE, Contract Terminology and Specifications for Interest Rate Derivatives.	
<b>UNIT III</b>	<b><u>Options</u></b>	<b>(06 Hours)</b>
	Meaning and Definition, Exchange Traded Options, OTC Options – Specifications of Options, Call and put Options, American and European	

	Options, Intrinsic Value and Time Value of Options, Option payoff options on Securities, Stock Indices, Currencies and Futures, Options pricing models Differences between Future and Option contracts	
<b>UNIT IV</b>	<b><u>SWAPS</u></b>	<b>(06 Hours)</b>
	Definition of SWAP, Interest Rate SWAP, Currency SWAP, Role of Financial Intermediary, Warehousing, Valuation of Interest rate SWAPs and Currency SWAPs Bonds and FRNs	
<b>UNIT V</b>	<b>Introduction to Risk Management</b>	<b>(06 Hours)</b>
	Identifying types of risks, Management of Translation, Transaction and economic Exposure, Quantifying Risk and Hedging techniques, Internal and External Techniques viz Netting, Matching, Leading and Lagging, Price variation, Short Term borrowing, Pricing in Foreign Currency, Assets Liability Management	
<b>UNIT VI</b>	<b>Instruments of External techniques of Risk Management</b>	<b>(06 Hours)</b>
	Forwards, Futures, Swaps, Options, Forward Rate Agreement, Caps, Collars, Floors and their applications, Pricing techniques, Operational aspects.	
<b>Text Books:</b>		
1. Derivatives simplified – An Introduction to Risk Management- P.Vijaya Bhaskar & B.Mahapatra		
<b>Reference Books:</b>		
4. Options and Futures- Hull		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

**Assignments:** Assignments should be able to verify course outcome and skills of group work, communication skills

1. To solve numerical on derivatives
2. Quiz –Multiple Choice Questions 20
3. Solve two years question paper of Pune university unit wise.
4. Solve two years question paper of GATE unit wise.
5. To observe NPTEL video lecture on any topic of control and give presentations, group discussion.
6. Case study on risk management related with any factory or commercial industry.

### Elective I: Total Quality Management

<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
	Continuous Assessment: 40 Marks	

#### **Course Pre-requisites:**

The Students should have knowledge of

1. Power Quality Management

#### **Course Objectives:**

1. To introduce the fundamental concepts of total quality management, statistical process control, six sigma and the application of these concepts.
2. To introduce philosophies and strategies to quality related issues.
3. To provide skills in diagnosing and analyzing problems causing variation in manufacturing and service industry processes.
4. To provide a basic understanding of "widely-used" quality analysis tools and techniques.

#### **Course Outcomes:**

The student will be able to

1. Develop an understanding on quality management philosophies and frameworks
2. Develop in-depth knowledge on various tools and techniques of quality management
3. Learn the applications of quality tools and techniques in both manufacturing and service industry.

<b>UNIT - I</b>	<b>Quality, Strategic Planning, and Competitive Advantages</b>	<b>(06 Hours)</b>
	Brief History - Definitions of Quality. Quality in Manufacturing and Service Systems. Quality and Price - Quality and Market Share - Quality and Cost - Quality & Competitive Advantage.	
<b>UNIT - II</b>	<b>Principles of Total Quality Management:</b>	<b>(06 Hours)</b>
	Introduction - Elements of Total Quality Management - Malcolm Baldrige National Quality Award Criteria. Benefits of Total Quality Management. The Deming Management Philosophy – The Juran Philosophy – The Crosby Philosophy	
<b>UNIT - III</b>	<b>Customer Focus :</b>	<b>(06 Hours)</b>
	The Customer-Driven Quality Cycle - Quality Function Deployment –Customer Satisfaction Measurement Techniques - Customer Relationship Management Techniques.	
<b>UNIT - IV</b>	<b>TQM Tools &amp; Techniques (I)</b>	<b>(06 Hours)</b>

	The seven traditional tools of quality – New management tools – Six-sigma: Concepts, methodology, applications to manufacturing, service sector including IT – Bench marking – Reason to bench mark, Bench marking process – FMEA – Stages, Types.	
<b>UNIT - V</b>	<b>TQM Tools &amp; Techniques (Ii)</b>	<b>(06 Hours)</b>
	Quality circles – Quality Function Deployment (QFD) – Taguchi quality loss function – TPM – Concepts, improvement needs – Cost of Quality – Performance measures.	
<b>UNIT - VI</b>	<b>Quality Systems</b>	<b>(06 Hours)</b>
	Need for ISO 9000-2008 quality system – elements, documentation, quality auditing- as 9000 –ISO 14000 – concepts, requirements and benefits – case studies of TQM implementation in manufacturing and service sectors.	
<b>Assignment:</b>		
1. Quality , strategic Planning and competitive Advantages		
2. Principles of total quality management		
3. Customer Focus :		
4. TQM tools and techniques (I)		
5. TQM Tools & Techniques (II)		
6. Quality Systems		
<b>Text Books:</b>		
1. Total Quality Management – Sundarajan		
2, Quality Control & Total Quality Management – Jain		
3.Dale H.Besterfiled, et at., “Total Quality Management”, Pearson Education Asia,3rd Edition, Indian Reprint (2006).		
<b>Reference Books:</b>

2.Oakland, J.S., “TQM – Text with Cases”, Butterworth – Heinemann Ltd., Oxford, 3rd Edition, 200UNIT III		
3.Suganthi,L and Anand Samuel, “Total Quality Management”, Prentice Hall (India) Pvt. Ltd.,2006.		
4.Janakiraman, B and Gopal, R.K, “Total Quality Management – Text and Cases”, Prentice Hall (India) Pvt. Ltd., 2006.		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT – III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT – VI	

## Elective I: New Enterprise Creation and Management

<b>Elective I: New Enterprise Creation and Management</b>		
<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
	Continuous Assessment: 40 Marks	
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
<b>1.</b>	Progressive Skills	
<b>Course Objectives:</b>		
<b>1.</b>	Develop an understanding of the importance of entrepreneurship in society and the different forms of entrepreneurial activity	
<b>2.</b>	Develop an understanding of the new venture creation process and the life cycle of a new venture from idea development and launch through growth and various exit strategies	
<b>3.</b>	Gain knowledge of business plans, sources of capital, marketing and distribution strategies, operations, organization issues, as well as key legal and ethical considerations affecting entrepreneurial ventures	
<b>Course Outcomes:</b>		
The student will be able to		
<b>1.</b>	Develop your analytical skills: thinking, problem solving, and decision-making	
<b>2.</b>	Learn to analyze and critically evaluate ideas and viewpoints	
<b>3.</b>	Acquire an interest in learning more by questioning and seeking answers	
<b>4.</b>	Learn to find and use resources to answer your questions	
<b>5.</b>	Learn to form conclusions and recommendations and to support them with logic and Evidence.	
<b>UNIT - I</b>	<b>Foundations of Entrepreneurship Development:</b>	<b>(06 Hours)</b>
	<p>Concept and Need of Entrepreneurship Development Definition of Entrepreneur, Entrepreneurship, Innovation, Invention, Creativity, Business Idea, Opportunities through change.</p> <p>Concepts of Entrepreneur, Manager, Entrepreneur / Corporate Entrepreneur –Comparative study - Roles, Responsibilities, Career opportunities.</p> <p>Entrepreneurship as a career, Entrepreneurship as a style of management, The changing role of the entrepreneur: mid-career dilemmas – Closing the window: Sustaining Competitiveness - Maintaining competitive advantage.</p>	

<b>UNIT - II</b>	<b>Theories of Entrepreneurship:</b>	<b>(06 Hours)</b>
	Innovation Theory by Schumpeter & Imitating Theory of High Achievement by McClelland X-Efficiency Theory by Leibenstein Theory of Profit by Knight Theory of Social change by Everett Hagen	
<b>UNIT - III</b>	<b>Influences on Entrepreneurship Development :</b>	<b>(06 Hours)</b>
	Entrepreneurial Traits, External Influences on Entrepreneurship Development: Socio-Cultural, Political, Economic, Personal. Entrepreneurial culture with special reference to Entrepreneurship / Corporate Entrepreneurship. Entrepreneurial Success and Failure: Reasons and Remedies.	
<b>UNIT - IV</b>	<b>Women Entrepreneurs and Business Planning Process</b>	<b>(06 Hours)</b>
	<b>Women Entrepreneurs:</b> Challenges to Woman Entrepreneurs, Achievements of Woman Entrepreneurs, Role Models of Woman Entrepreneurs. <b>Business Planning Process</b> - The business plan as an entrepreneurial tool Elements of Business Plan, Objectives, Market Analysis, Development of Product / idea, Marketing, Finance, Organization & Management, Ownership, Critical risk contingencies of the proposal, Scheduling and milestones.	
<b>UNIT - V</b>	<b>Creating Entrepreneurial Venture</b>	<b>(06 Hours)</b>
	Entrepreneurship Development Cycle Entrepreneurship Development and Government. Role of Central Government and State Government in promoting Entrepreneurship with various incentives, subsidies, grants etc. – with special reference to ‘Export oriented unites’ Role of the following agencies in the Entrepreneurship Development DIC – District Industrial Center SISI – Small Industries Services Institute EDII – Entrepreneurship Development Institute of India NIESBUD – National Institute of Entrepreneurship and Small Business Development NEDB – National Entrepreneurship Development Board	
<b>UNIT - VI</b>	<b>Project Management</b>	<b>(06 Hours)</b>
	Technical, Financial, Marketing Personnel and Management feasibility Reports Financial schemes offered by various financial institutions like Commercial Banks, IDBI, ICICI, SIDBI, SFCs, Venture Capital Funding, Angle Capitalist Case studies of Entrepreneurs – successful, failed, turnaround ventures should be discussed in the class.	
<b>Assignment:</b>		
1. Foundation of entrepreneurship development		
2. Theories of entrepreneurship		
3. Influence pf entrepreneurship development		
4. Women Entrepreneurs and Business Planning Process		
5. Creating Entrepreneurial Venture		
6. Project management		

<b>Text Books:</b>	
1. Dynamics of Entrepreneurship Development – Vasant Desai.	
2. Entrepreneurship Development New Venture Creation – Satish Taneja, S.L.Gupta	
3. Entrepreneurship and Small Business Management – Siropolis	
<b>Reference Books:</b>	
1. Project management – K. Nagarajan.	
2. Corporate Entrepreneurship – Vijay Sathe	
3. New Vistas of Entrepreneurship: Challenges & Opportunities – A. Sahay, M.S.Chhikara	
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT – III
Unit Test -2	UNIT – IV, UNIT – V, UNIT – VI

## Elective I: Operational Research

**TEACHING SCHEME:**

Theory: 03 Hours / Week

**EXAMINATION SCHEME:**

End Semester Examination: 60 Marks

Continuous Assessment: 40 Marks

**CREDITS ALLOTTED:**

03 Credits

**Course Pre-requisites:**

The Students should have knowledge of

1. Basics about literature reviews and surveys.

**Course Objectives:**

1. The objective of this course is to help the students acquire quantitative tools, and use these tools for the analysis and solution of business problems.
2. The emphasis will be on the concepts and application rather than derivations.

**Course Outcomes:**

The student will be able to learn

1. Methods for making decisions
2. Analyzing the outcome of events
3. Mining and analyzing data using statistics
4. Programming methods
5. Problem-solving and organization
6. Computing algorithms

<b>UNIT – I</b>	<b>Quantitative Techniques and Operations Research</b>	<b>(06 Hours)</b>
-----------------	--	-------------------

Meaning, Scope of Quantitative Techniques and Operations Research in Management, Advantages and Limitations of Quantitative Techniques ,OR Models

<b>UNIT – II</b>	<b>Linear Programming</b>	<b>(06 Hours)</b>
------------------	---------------------------	-------------------

Meaning of Linear .Programming, General Mathematical Formulation of LPP, Graphical Analysis, Simplex Method, Two-phase Method, Big M-Method. Duality and Post Optimality Analysis Advantage and Limitations of LPP.

<b>UNIT - III</b>	<b>Transportation Model</b>	<b>(06 Hours)</b>
-------------------	-----------------------------	-------------------

Mathematical Formulation, Initial Basic Feasible Solution, Vogel's Approximation Method, Optimization (Minimization and Maximization) Using Modified Distribution Method and Stepping Stone Method.

<b>UNIT - IV</b>	<b>Dynamic Programming</b>	<b>(06 Hours)</b>
	Nature of Dynamic Programming Problem, Dynamic Programming Solutions for Knap Sack, Traveling Salesman (Stage Coach), Assignment of Salesmen to Sales Area and Capital Budgeting. Integer linear programming: Meaning, Application, integer programming algorithm (branch and bound algorithm, cutting plan algorithm).	
<b>UNIT – V</b>	<b>Waiting Line Models and Replacement Models</b>	<b>(06 Hours)</b>
	Introduction, Scope in Management Decisions, Queuing Models M/M/1 (Infinite and Finite Population), Probability Calculations and Application of M/M/C (Infinite Population) Introduction Scope in Management, Single Equipment Replacement Model and Group Replacement.	
<b>UNIT - VI</b>	<b>Game Theory &amp; Markov Chain Analysis</b>	<b>(06 Hours)</b>
	Introduction to Games, Maximin and Minimax Principles, Pure and Mixed Strategies, Solution of Games Using-Algebraic and Graphical Methods. Computation of Sequential Probability of States for Different Periods, Steady State Probability of States and Application of Markov Chain.	
<b>Assignment:</b>		
1. Quantitative Techniques and Operations Research		
2. Linear Programming		
3. Transportation Model		
4. Dynamic Programming		
5. Waiting Line Models and Replacement Models		
6. Game Theory & Markov Chain Analysis		
<b>Text Books:</b>		
1. Hamdy A.Taha, <b>Operations Research: An Introduction</b> , Pearson 2008		
2. H.M. Wagner, <b>Principles of Operations Research with Application to Managerial Decisions</b> , PHI Learning. 2nd Ed., 2009.		
3.Chawla, <b>Operation Research</b> , Kalyani Publication Ludhiyana,2009		
<b>Reference Books:</b>		
1.V. K. Kapoor, <b>Problems and Solutions in Operations Research</b> , New Delhi, Suitan Chand and Sons, 2001		
2. F. Hillier, <b>Introduction to Operation Research</b> , TMH, 2005		
3. Bobby Srinivasan and C.L. Sandblom, <b>Quantitative Analysis for Business Decisions</b> , Singapore, McGraw Hill Publications, 2001.		
4. C.R. Kothari, <b>An Introduction to Operational Research</b> , New Delhi, Vikas Publications, 3rd Ed., 2009.		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT – III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT – VI	

**Name of subject: Engineering Mathematics-IV (Optional Subject)**

<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks Continuous Assessment: 40 Marks	04 Credits

**Course Pre-requisites:**

The Students should have knowledge of

1. Determinants
2. Matrices
3. Differentiation
4. Integration of functions
5. Differential equation

**Course Objectives:**

The course aims at making the students familiar about the most basic numerical methods and Concepts like error estimation helpful in various fields of engineering and can be used to simulate the results of various numerical methods.

**Course Outcomes:**

**The student should be able to**

1. Derive appropriate numerical methods to solve algebraic and transcendental equations
2. Evaluate the accuracy of common numerical methods.
3. Develop appropriate numerical methods to solve a difference equation.
4. Be familiar with numerical interpolation and approximation of functions, numerical integration and differentiation.
5. Be familiar with numerical solution of ordinary differential equations.
6. To compute Numerical Solution of Partial Differential Equations.

<b>UNIT - I</b>	<b>Numerical solutions of algebraic and transcendental equations</b>	<b>(08 Hours)</b>
	Bisection method, Regula-Falsi method, Newton-Raphson method, Direct iterative method.	
<b>UNIT - II</b>	<b>Solution of system of linear algebraic equation</b>	<b>(08 Hours)</b>
	Matrix inversion method, Gauss- elimination Method, Jordan's method, Crout's method. Gauss-Seidel and Gauss Jacobi's iterative method.	
<b>UNIT - III</b>	<b>Difference equation and Solution of difference equations</b>	<b>(08 Hours)</b>
	Definition of difference equations, formation of difference equation. Solution of Homogeneous and non-homogeneous difference equation with constant and variable coefficients using Boole's operator method and generating functions. Simultaneous difference equation.	
<b>UNIT - IV</b>	<b>Interpolation and Numerical differentiation and integration</b>	<b>(08 Hours)</b>
	Finite difference operator, Interpolation formula with equal and unequal intervals. Divided differences and central differences. Curve fitting: Method of least squares. Straight line, Second degree, parabola, Exponential curve.	

	Differentiation using forward, backward and divided difference General quadrature formula, Trapezoidal rule, Simpson's 1/3rd rule, Simpson's 3/8th rule, Weddle's rule.	
<b>UNIT - V</b>	<b>Numerical solution of I order ordinary differential equation</b>	<b>(08 Hours)</b>
	Solution by Euler's, method Euler' Modified method Taylor's series. Runga-kutta method. Milne's Predictors and Correctors method.	
<b>UNIT - VI</b>	<b>Numerical Solution of Partial Differential Equations</b>	<b>(08 Hours)</b>
	Classification of second order partial differential equations, Solution of Laplace's, Poisson's, heat and wave equations by finite difference methods, Use of method of characteristics for solution of initial and boundary value problems.	
<b>Text Books:</b>		
1. Gupta P.P.& Malik G.S., <i>Calculus of Finite Differences and Numerical Analysis</i> , Krishna Prakashan Mandir, Meerut, 21/e, 2006.		
2. B.S.Grewal, <i>Engineering Mathematics</i> , Khanna Publishers, 12/e, 2006.		
<b>Reference Books:</b>

2. S. S. Sastry, <i>Engineering Mathematics</i> , Vol I, II Prentice Hall Publication, 3/e, 2004.		
3. C.Ray Wylie & Louis C. Barretle, <i>Advanced Engineering Mathematics</i> , Tata McGraw Hill Publishing Co Ltd., 6/e, 2003.		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I,II,III	
Unit Test -2	UNIT – IV,V,VI	

## Switchgear And Protection

<b>Switchgear And Protection</b>		
<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks    Oral : 25 Marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
	Generation, Transmission & distribution of electrical energy.	
<b>Course Objectives:</b>		
	To develop the students to identify, analyze & to understand the fundamentals, classification, application and selection of various switchgears and different protection schemes of power system components.	
<b>Course Outcomes:</b> The students will be able to		
1.	Elaborate construction and working principle of different types of Circuit interrupting devices & to compute fault levels.	
2.	Describe the need of protective Relaying and operating principles of different types of relays.	
3.	Study different type of faults in transformer, alternator, I.M. and various protective schemes related to them.	
4.	Learn transmission line protection schemes, and characteristics of different types of distance relays.	
5.	Learn over voltage protection schemes, and different neutral earthing.	
6.	Learn substation layouts and PC applications in short circuit studies for designing relaying scheme	
<b>UNIT – I</b>	<b>Fundamentals of power system protection &amp; Circuit interrupting devices.</b>	<b>(06 Hrs.)</b>
	<p><b>Fundamentals of power system protection:</b> Functions of protective system, Normal and abnormal conditions and their effects on power system, Fault-types, Causes, Essential qualities of protections, Short circuit kVA calculations, and Current limiting reactors.</p> <p><b>Circuit interrupting devices:</b> Arc formation process, Methods of arc extinction, important terms - re-striking and recovery voltage RRRV. Construction, working &amp; application of low tension switchgear - Fuses, Isolators, MCB, MCCB, ELCB, Contactor, ACB.</p> <p>Construction, working &amp; application of low tension switchgear: - OCB, MOCB, SF6 CB, VCB. Rating of circuit Breaker, Resistance switching and current chopping, capacitive current breaking, auto re-closures. Introduction to HVDC circuit breaking.</p>	
<b>UNIT – II</b>	<b>Protective Relaying</b>	<b>(06 Hrs.)</b>
	Evolution of protective relaying, classification of relays, zones of protection, primary and backup protection, essential qualities of protective relaying. Trip circuit of circuit breaker. Various basic operating principles of protection- over current, (current graded & time graded),directional over current, differential, distance, induction type	

	<p>relay, torque equation in induction type relay, current and time setting in induction relay, Numerical on TSM, PSM and operating time of relay.</p> <p><b>Static &amp; Digital Relaying</b></p> <p>Overview of Static relay, block diagram, operating principal, merits &amp; demerits of static relay. Numerical Relays :-Introduction, Block diagram of numerical relay, Sampling theorem, Anti –Aliasing Filter, Block diagram of Phasor Measurement Unit (PMU).</p>	
<b>UNIT–III</b>	<b>Protection of Power System Components</b>	<b>(06 Hrs.)</b>
	<p><b>Protection of Alternator &amp; Transformer</b></p> <p>Various faults in Alternator, abnormal operating conditions, protection against stator faults, Protection against rotor faults, protection against loss of excitation and loss of prime mover.</p> <p><b>Protection of Transformer :</b></p> <p>Types of faults in transformer. Percentage differential protection in transformers, Restricted E/F protection. Incipient faults, Buchholz relay. Protection against over fluxing. Protection against inrush current</p> <p><b>3 Phase Induction Motor Protection-</b> Abnormal conditions &amp; causes of failures in 3 phase Induction motor, single phasing protection, Overload protection, Short circuit protection.</p>	
<b>UNIT–IV</b>	<b>Protection of Busbar &amp; Transmission Line</b>	<b>(06 Hrs.)</b>
	<p><b>Bus bar Protection:</b> Differential protection of bus bars. Selection of C.T. ratios for bus bar protection. High impedance differential relay.</p> <p><b>Transmission line:</b> over current protection for feeder using directional &amp; non-directional over current relays, Introduction to distance protection, impedance relay, reactance relay, mho relay &amp; Quadrilateral Relays, Introduction to PLCC, block diagram, advantages, disadvantages, three stepped distance protection, Effect of arc resistance, and power swing on performance of distance relay. Realization of distance relays (impedance, reactance and mho relay) using numerical relaying algorithm (flowchart, block diagram), Introduction to Wide Area Measurement (WAM) system.</p>	
<b>UNIT – V</b>	<b>Over voltage protection &amp; System grounding</b>	<b>(06 Hrs.)</b>
	<p><b>Over voltage protection :</b> Overvoltage, causes of overvoltage, Lightning phenomenon, direct &amp; indirect strokes, protection of overhead transmission lines from direct lightning strokes, Lightning arresters, rod gap type, horn gap type, Thyrite type, Metal oxide (ZnO) type lightning arrester.</p> <p><b>System grounding:</b> Introduction and importance of earthing, terms and definitions, types of earthing, substation earthing.</p>	
<b>UNIT-VI</b>	<b>Substation layouts &amp; PC applications in short circuit studies for designing relaying scheme :</b>	<b>(06 Hrs.)</b>
	<p><b>Substation layouts :</b> Classification of substation, selection &amp; location of site, main connection schemes, Equipments used in substation, various symbols – C.B. , L.A., fuses, relays, power transformer, bus bar and its arrangement, CT.- PT, isolators, earthing switch, capacitor bank, batteries PLCC, control room, etc., Connection diagram and its layout.</p> <p><b>PC applications in short circuit studies for designing relaying scheme:</b> Introduction, Types of faults, and Assumptions for conducting short circuit studies,</p>	

	steps in development of algorithm.	
<b>Term Work:</b>		
The Practical's shall consist of record of minimum eight experiments.		
<ol style="list-style-type: none"> <li>1. To find the characteristics of MCB using relay testing kit.</li> <li>2. To find the characteristics of MCCB using relay testing kit.</li> <li>3. To find the characteristics of Fuse using relay testing kit.</li> <li>4. To find the pickup and drop off voltage of Contactor</li> <li>5. To find the characteristics of Induction type over current relay</li> <li>6. To find the characteristics of Induction type under voltage relay</li> <li>7. To find the characteristics of microprocessor based over current relay</li> <li>8. To find the characteristics of microprocessor based under voltage relay</li> <li>9. To find the characteristics of microprocessor based over voltage relay</li> <li>10. Differential protection of 3 phase alternator.</li> <li>11. Protection of transmission line.</li> <li>12. Report on industrial visit to switchgear training centre /or switchgear/relay manufacturing unit/ or H.T. substation visit.</li> </ol>		
<b>Text Books:</b>		
1. S. Rao, "Switchgear Protection & Power Systems", Khanna Publications		
2. Y. G. Paithankar, S. R. Bhide, "Fundamentals of Power System Protection", Prentice Hall of India		
3. Bhavesh Bhalja, R.P. Maheshwari, N.G. Chothani," Protection and Switchgear", Oxford University Press, 2011 Edition.		
4. A Course in Electrical power – M L Soni, P V Gupta, U S Bhatanagar - Dhanpat Rai and sons		
<b>Reference Books:</b>		
5. Badri Ram, D. N. Vishwakarma, "Power System Protection & Switchgear", Tata McGraw Hill Publishing Co. Ltd.		
6. J. Lewis Blackburn , Thomas J. Domin, "Protective Relaying: Principles and Applications", Fourth Edition, CRC Press.		
7. Prof. Dr S.A. Soman, IIT Mumbai , A Web course on "Digital Protection of power System" <a href="http://www.cdeep.iitb.ac.in/nptel/Electrical%20Engineering/Power%20System%20Protection/Course_home_L27.html">http://www.cdeep.iitb.ac.in/nptel/Electrical%20Engineering/Power%20System%20Protection/Course_home_L27.html</a>		
8. A.G. Phadke and J.S. Thorp , Computer relaying for Power System, Research Studies Press LTD, England.(John Willy & Sons Inc New York)		
9. Crussel Mason, "The Art and Science of Protective Relaying", Wiley Eastern Limited.		
10. Power system Protection and Switchgear – B Ravindranath and M M Chander – Wilsey Eastern Ltd.		
11. L. P. Singh, Digital Protection, New age international Publisher		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

#### Assignments:

1. Market survey for various switchgear devices and prepare report on the same.
2. Industrial visits to Manufacturer of switchgear devices and prepare report.
3. Solve 3 University exam question papers.
4. Prepare report on NPTEL Video lectures on any topic related with syllabus.

5. Solved the unsolved questions from books for every Unit.
6. Solve the GATE question papers Unit wise.
7. Prepare self-study report on topics related with Units.

## Power System Analysis

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	04 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	TW: 25Marks                      Practical:25 Marks	01 Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
<b>1.</b>	Structure of Power System, Transmission & Distribution Systems, Network Analysis.	
<b>Course Objectives:</b>		
	This course aims at understanding the components of interconnected power system, Representation of these system components in terms of mathematical models and Tools for analyzing the system operation during the normal & abnormal operating conditions.	
<b>Course Outcomes:</b>		
<b>1.</b>	To apply the concepts of Complex Power.	
<b>2.</b>	To interpret Single Line Diagram of power systems & model the power system in per unit	
<b>3.</b>	To formulate the load flow problem for 3-4 bus system & interpret the results.	
<b>4</b>	To compute fault current on the occurrence of symmetrical fault on power system	
<b>5</b>	To convert the unbalanced system parameters to sequence components & vice versa & to compute fault current on the occurrence of SLG, LL and DLG fault on power system	
<b>6</b>	To Derive swing Equation & apply solution to understand the rotor dynamics of synchronous machines	
<b>UNIT - I</b>	<b>Complex Power</b>	<b>(08Hour)</b>
	Structure of Interconnected & Integrated Power System, Formation of National Grid, Present Indian Power Industry, Power system analysis and their necessity. Concept of complex power, Complex power flow through transmission lines, Load on the system, its composition, nature of load curves for various consumer categories, Load voltage-frequency specifications & permissible variations, Real power-frequency and reactive power- voltage dependency, Conventional methods of voltage control of Power system.	
<b>UNIT - II</b>	<b>Power System Modeling</b>	<b>(08Hour)</b>
	Representation of power system-Single line diagram, Representation and modeling of long line, Synchronous generator-simple model such as emf behind reactance, power transformer, three winding transformer. Impedance and Reactance diagrams of power systems and their use. The per unit system of parameter value representation-selection of base, change of base, advantages, its application to impedance/reactance diagram.	
<b>UNIT - III</b>	<b>Load Flow Analysis</b>	<b>(08Hour)</b>
	Development of mathematical models of simple systems by network reduction, Driving point & Transfer Admittance, Concept of Z-bus and Y-	

	bus matrices, Formation of Y Bus Matrix ,Introduction to load flow analysis, Classification of buses, Formation of power flow equations (PFES) for n bus power system, Classification of variables& solution techniques, Newton-Raphson Method(Polar form) for load flow solution ,Introduction to optimal power flow and DC power flow, its importance, necessity and difference from conventional power flow.	
<b>UNIT - IV</b>	<b>Symmetrical Fault Analysis</b>	<b>(08Hour)</b>
	Symmetrical faults on power system, Sudden three [phase short circuit fault on unloaded alternator, Sub-transient, transient and steady state currents and impedances, DC offset and effect of the instant of short circuit on the waveforms, Estimation of fault currents with and without pre-fault current for simple power system, Selection of circuit breakers and current limiting reactors.	
<b>UNIT - V</b>	<b>Unsymmetrical Fault Analysis</b>	<b>(08Hour)</b>
	Methods of symmetrical components, relationships, sequence impedances. Representation of power systems by positive, negative and zero sequence networks, Nature of sequence impedance of power system components. Line-Line, Line-Ground, Line-Line-Ground faults, Analysis of unloaded and pre loaded alternators and simple power systems with and without fault impedance.	
<b>UNIT - VI</b>	<b>Power System Stability</b>	<b>(08Hour)</b>
	Concept of steady state, dynamic and transient stability of power systems and the factors controlling each, Steady state stability, its evaluation and variation of limits of stability under system conditions, Transient stability and importance of rotating machine dynamics in the power system stability evaluation,. The swing equation, its derivation, Equal Area Criteria (Consideration of one machine-infinite bus problem only.)	
<b>Term Work:</b>		
The term work shall consist of record of minimum eight experiments.		
<ol style="list-style-type: none"> <li>1. Study of effect of VAR compensation on receiving end voltage profile on a transmission line using capacitor bank.</li> <li>2. Determination of steady state stability limit for transmission line.</li> <li>3. Determination of steady state limit of a synchronous motor and plotting P- curve.</li> <li>4. Measurement of sub transient reactance of a salient pole synchronous machine by Static impedance /Dalton – Cameron method.</li> <li>5. Measurement of negative sequence reactance of synchronous machine.</li> <li>6. Measurement of zero sequence reactance of synchronous machine.</li> <li>7. Fault analysis for symmetrical fault by simulation or AC/DC network analyzer.</li> <li>8. Unsymmetrical fault analysis by simulation or AC/DC network analyzer.</li> <li>9. Computer aided solution of 3 bus load flow problem using Gauss-Seidel method.</li> <li>10. Formation of Y bus matrix using computer programming.</li> <li>11. Study of load flow on 3 bus system using by actual simulation/ AC network analyzer.</li> </ol>		
<b>Text Books:</b>		
<ol style="list-style-type: none"> <li>1. I J Nagrath , D P Kothari, "Modern Power System Analysis", Tata McGraw Hill Publication</li> <li>2. Grainger Jhon J, W D Stevenson Jr, "Power System Analysis" Mc-Graw Hill Publication</li> </ol>		

<b>Reference Books:</b>	
1.	O I Elgerd, "Electrical Energy Systems Theory: An Introduction", Tata McGraw Hill Publication
2.	Hadi Sadat," Power Sysem Analysis", McGraw Hill International Publication
3.	A R Bergen and Vijay Vittal,"Power System Analysis", Pearson Education Asia.
4.	J D Glover and M Sarma," Power System Analysis & Design",
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

#### Assignments:

1. Refer the following web sites& prepare presentation on Power Scenario of India  
Ministry of Power, CERC, MNRE
2. Sketch the load curves for Residential, Industrial, Agriculture, Municipal and Commercial categories of consumers and compare them with reference to Load factor, Diversity factor. Also plot the monthly load curve of the college substation. Estimate the maximum demand, Load factor.
3. Sketch the single line diagram (SLD) of the college & department power supply system. Enter all the specifications of the power system components & develop SLD using the ETAP software.
4. Develop the power system model of the department/College power system/any other power system (up to 50 buses) & conduct the load flow analysis using E TAP software. Analyse the results using N-R method.
5. Develop the power system model of the department/College power system/any other power system (up to 50 buses) & conduct the short circuit analysis using E TAP software. Analyse the results to confirm the Circuit Breaker ratings.
6. Develop the model of long transmission line and synchronous machine & estimate the steady state stability limit using ETAP/MATLAB software.
7. Self-learn NPTEL sessions on i) Symmetrical Fault Analysis ii) Unsymmetrical Fault Analysis & Generate presentation to explain the concepts: i) Nature of Short Circuit Current ii) Selection of Circuit Breakers iii) Symmetrical components
8. Arrange Industrial Visit to Load Dispatch Center: Prepare Study Report on Control Functions applied by the load dispatcher for Power System Analysis

## Modern Control Systems

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	04 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks    Oral 25marks	01 Credit
<b>Course Prerequisites:</b>		
The students should have knowledge of		
	Linear control system , methods of stability analysis, Matrix algebra, Z transform,	
<b>Course Objectives:</b>		
	This course introduces state space modeling and stability analysis of system. It includes phase plane and describing function method of stability analysis of nonlinear system. It also introduces fundamental mathematical concepts and stability analysis of digital control system	
<b>Course Outcomes:</b> After learning this course the students will be able to		
<b>1.</b>	Represent the system equation in various state space models (physical, phase variable, canonical	
<b>2.</b>	Draw block diagram and signal flow graph from state space model of system.	
<b>3.</b>	Calculate the solution of state equation; calculate transfer function from state space model.	
<b>4</b>	Recognize various nonlinearities and its effect on system stability	
<b>5</b>	Compare between Linear and nonlinear, analog and digital, state space and transfer function model	
<b>6</b>	Calculate pulse transfer function of digital system. Explain the mathematical model of digital system and select appropriate sampling frequency.	
<b>7</b>	Describe principle of operation and applications of adaptive control, robust control and Artificial neural network, Fuzzy logic .	
<b>UNIT I</b>	<b>State Variable representation</b>	<b>(08Hours)</b>
	Comparison of transfer function and state variable analysis, concept of state, state space, state vector, state equation of the system, state space representation using physical variable, phase variable and canonical variables with block diagram, Decomposition of transfer function, Eigen values and Eigen Vectors, Diagonalization of the system matrix with distinct and repeated roots.	
<b>UNIT II</b>	<b>State variable stability analysis and design</b>	<b>(08Hours)</b>
	Solution of state equation with and without inputs, State Transition Matrix (STM), Methods to determine STM using Infinite series method ,Laplace transform, Caley Hamilton theorem. Definition of controllability, observability, Kalman's test, Gilbert's test, Determination of transfer	

	functions from state model. State feedback control, pole placement design through state feed back	
<b>UNIT III</b>	<b>Nonlinear system</b>	<b>(08Hours)</b>
	Different types of nonlinearities, peculiar behavior of nonlinear system-response, jump resonance, limit cycle: stable and unstable, amplitude as function of frequency oscillation, nonlinear spring mass system, sub harmonic oscillation, asynchronous quenching, frequency Phase plane method, singular points, phase plane plots using delta method determination stability from state trajectory, relation with time domain analysis. Concept of Describing Function, derivation of describing function of various nonlinear elements, Stability analysis using describing function, existence of limit cycle, Merits demerits of describing function method	
<b>UNIT IV</b>	<b>Discrete time system</b>	<b>(08Hours)</b>
	Basic elements of discrete data system, merits of discrete system, Sampling and selection of sampling period, Sample and hold circuit, A/D and D/A converter, modeling of zero order hold , reconstruction of signals from samples, Shannon's sampling theorem. Z transform – definition, simple functions, Inverse Z transform, linear difference equations and their solution	
<b>UNIT V</b>	<b>Analysis of Discrete time system</b>	<b>(08Hours)</b>
	Derivation of Pulse Transfer function, , pulse transfer function of closed loop system, Bilinear transformation, stability in Z plane, Jury's test, Routh's criteria , State space representation of discrete time systems, state space models from pulsed transfer function.	
<b>UNIT VI</b>	<b>Introduction to advances in control system</b>	<b>(08Hours)</b>
	Adaptive control , Model reference Adaptive control block diagram and working with practical applications, Robust control ,Fuzzy logic , Artificial neural network, algorithm and learning architecture	

**Term Work:**

The term work shall consist of record of minimum eight experiments .To ensure that at least one experiment on each unit.

1. To convert transfer function into state model i) phase variable form ii) canonical form
2. To derive state model of DC servo motor from physical variables and observe step response, i.e. to solve state equation of DC servo motor
3. To determine Eigen values, Eigen vectors and diagonalises the system.
4. To determine controllability and observability by Kalman's test and Gilbert's test.
5. Design of state feedback gain matrix by pole placement.
6. To plot phase plane trajectory of system with nonlinear elements using SIMULINK.
7. To analyze stability of nonlinear system using describing function.
8. To convert continuous time system to discrete time system and to observe effect of sampling time on step response.
9. To determine the gain for stability in Z domain.

10. To study adaptive control and robust control applications with MATLAB demos.	
<b>Text Books:</b>	
4. I.J. Nagrath, M. Gopal, ““Control System Engineering”, New Age International Publishers – Fourth edition	
5. Katsuhiko Ogata, “Digital control system”, Prentice Hall, 2010.	
6. M.Gopal , “ Digital control system”	
7. Dorf and Bishop , “Modern Control systems”- Pearson education	
<b>Reference Books:</b>

6. D. Roy Choudhary, "Modern Control Engineering", PHI Learning Pvt. Ltd., 2005	
7. Dorf, Bishop - “Modern control system”, Pearson Education	
8. M. N. Bandyopadhyay, “Control Engineering – Theory and Practice”, Prentice Hall of India Ltd. Delhi	
9. Geir E. Dullered, F.G.Paganini - “ A course in robust control theory “- Springer	
10. Jan Jan tzen- ‘Foundation of Fuzzy control – a practical apporoach – Wiley	
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

#### Assignments:

- To solve numerical on decomposition of transfer function to state variable (different forms)and to draw state diagram
- To identify state variables of physical system and write down state model.
- To determine transfer function from given state model
- To calculate STM by three different methods.
- To derive describing function of different nonlinearities
- To draw phase plane trajectory by isoclines method
- To derive pulse transfer function
- To prepare comparative analysis of discrete time and continuous time system.
- To prepare chart of Z transform of standard functions
- To solve question papers of GATE unit wise.
- To study Research paper on adaptive control and prepare presentation.
- To observe NPTEL video on robust control and group discussion related to it.

## Industrial Organization & Management

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks Continuous Assessment: 40 Marks	03 Credits
<b>Course Pre-requisites:</b>		
The Students should have knowledge of Professional skill development 1 to 5.		
<b>Course Objectives:</b>		
	<ul style="list-style-type: none"> <li>• This course will help the students to understand the basic operations in any organization.</li> <li>• With the technical skill sets, there are also some more things that to be studied to be in any organization.</li> <li>• This course will help the students to learn these aspects. They are going to learn about Management related terms like Depreciation, Replacement engineering, Product Engineering, Production Planning and Inventory Control.</li> <li>• This course will also help to understand the Job Evaluation techniques, Personnel Management, Behavioral Aspects of Management and Operations Research.</li> <li>• This course will complete the overall aspects of the student with technical knowledge with needed management skills.</li> </ul>	
<b>Course Outcomes:</b>		
The student will be able to		
<b>1.</b>	Explore the basic terms related to management like function, principles. Leadership qualities will also get improved.	
<b>2.</b>	Explore the type of companies and the various financial aspects related with the company.	
<b>3.</b>	Exculpate the terms related with the depreciation, replacement and products of the company and to deal with it.	
<b>4</b>	Explore the production and inventory related terms. The control on the inventory and information related with it.	
<b>5</b>	Explore the company's requirement as per the human resource requirement, which also very important part in any company.	
<b>6</b>	Behaviors and ethics of an employee in the organization are to be studied which will be requiring in carrying out the operations research.	
<b>UNIT - I</b>		
<b>Management</b>	<b>(06 Hrs)</b>	
	Introduction, Phases in Management: scientific management, Behavioral management and Information technology and operations research. Industrial Management, Contents and Principle of Management, Functions of Management: Planning, coordination, motivation and control. Leadership: Qualities of leader, Leading Process. Education and Training of Management. Elements of Quality Management System ISO 9001-2008.	

<b>UNIT - II</b>	<b>Formation of Company and Financial Planning</b>	<b>(06 Hrs)</b>
	Introduction, Company definition, Types of company Structure: Proprietorship, Partnership, Joint Stock companies, Limited and Unlimited Company, Private and Public, Corporative, Public, Private and Joint Sector, Trust and Holding Companies. Classification of Capital, Capital Procurement, Structure of Authorized Pattern, Economic Aspects of Cost Patterns, Breakeven Analysis, Financial Management.	
<b>UNIT - III</b>	<b>Depreciation, Replacement and Product Engineering</b>	<b>(06 Hrs)</b>
	Introduction, objective of Business Enterprise, Depreciation and Depreciation Calculation, Estimation of Life of an Engineering Aspects, Replacement of Plant and Machinery, Product Classification, Initiation of Product, Production Analysis, simplifications and Standardization, Product Research, Diversification and specialization, Patent Analysis.	
<b>UNIT - IV</b>	<b>Production Planning and Inventory Control</b>	<b>(06 Hrs)</b>
	Introduction, Production System, Production Types, Production Planning functions, Efficiency of Production planning and Drawing Office Organization. Inventory Control Functions, Procedures for Purchase, Principles of Inventory Control, Inventory Policies, Economic Batch Quantities, Purification of Inventory, control of incoming materials and store Issues. Information flow analysis.	
<b>UNIT - V</b>	<b>Job Evaluation and Personnel Management</b>	<b>(06 Hrs)</b>
	Introduction, Job Evaluations and Analysis, Classification of Job evaluation techniques, Evaluation of wages structures, system of merit rating, measurement of responsibility and wage incentives. Importance of personnel management, human relations, attitude of employers towards employees. Functions of personnel management. Personnel research, labour participation in management. Labour turnover, industrial disputes.	
<b>UNIT - VI</b>	<b>Behavioral Aspects of Management and Operations Research</b>	<b>(06 Hrs)</b>
	Scientific management, Hawthorne Studies, Elton Mayo, Theory X and Theory Y, Herzberg's motivation and Hygiene Theory, Organizational goals and Culture. Stresses at workplace, Interpersonal Behavior, power and Politics in organization. Phases of an Operations Research, formation of some typical problems, competitive model, Program Evaluation and Review Techniques, Graphical and Matrix solution of linear programming models.	

**Assignment:**

1. Introduction to management
2. Formation of Company and Financial Planning
3. Depreciation, Replacement and Product Engineering
4. Production Planning and Inventory Control
5. Job Evaluation and Personnel Management
6. Behavioral Aspects of Management and Operations Research

**Text Books:**

1. "Industrial Organization and Management", S. K. Basu, K. C. Sahu, B. Rajiv, PHI learning Private Limited, New Delhi.
2. "Industrial Engineering and Management", O.P. Khanna, Dhanpat Rai & Sons. New Delhi.

<b>Reference Books:</b>	
1.	“Industrial Organization and Management: Principles and Practice”, S. Sundaramurthy, R. V. R. Sivagnanam, United Book Corporation.
2.	“Industrial Organization and Management Fundamentals”, Herman B. Henderson, Albert E. Haas Industrial Press.
3.	“Professional Management in Industrial Organisations”, K.P. Kaur, Deep and Deep Publications.
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

## Elective II: Renewable Energy Systems

<b>TEACHING SCHEME:</b>			<b>EXAMINATION SCHEME:</b>			<b>CREDITS ALLOTTED:</b>		
Theory: 03 Hours / Week			End Semester Examination: 60 Marks			03 Credits		
Practical: 02 Hours / Week			Continuous Assessment: 40 Marks					
			Term Work: 25 Marks Oral:25Marks			01 Credit		
<b>Course Pre-requisites:</b>								
The Students should have knowledge of								
<b>1.</b>	Fundamentals of Electrical Engineering, Power Generation Techniques							
<b>Course Objectives:</b>								
1.	To create awareness of renewable energy sources like wind, solar energy, biogas plant, mini-hydro plant and fuel cell							
2.	To impart knowledge of biogas plant, tidal energy, wave energy, ocean thermal and geothermal energy							
3.	To impart knowledge of energy storage and hybrid systems.							
<b>Course Outcomes:</b>								
	Students are able to							
<b>1.</b>	Uses renewable energy sources							
<b>2.</b>	Utilize wind energy							
<b>3.</b>	Apply solar energy to any equipment							
<b>4</b>	Describe biogas plant, mini-hydro plant and fuel cell							
<b>5.</b>	Compare tidal energy, wave energy, ocean thermal and geothermal energy							
<b>6.</b>	Decide energy storage and hybrid systems for particular application							
<b>UNIT - I</b>	<b>Energy scenario</b>						<b>(06 Hours)</b>	
	<p>Classification of energy sources, energy needs of India and energy consumption patterns, worldwide potential of these sources, energy efficiency and energy security, energy economics, energy conservation supply curves,</p> <p>Environmental issues, environmental impacts, global warming and climate change, carbon trading, concept of carbon credits, carbon footprints, carbon dioxide sequestration, atmospheric pollutants, Kyoto protocol, ozone depletion. Concept of clean development CDM and prototype carbon funds PCF. Impacts of renewable energy, Factors favoring and against renewable energy sources. Market survey, International electro technical commission standards for renewable energy sources.</p>							

<b>UNIT - II</b>	<b>Wind energy systems</b>	<b>(06 Hours)</b>
	Types of wind turbines, electrical generators for wind turbines, power in the wind, impact of tower height, measurement of wind speed, maximum rotor efficiency, various controls in wind turbines, fixed speed and variable speed wind turbines, power converters, wind turbine economics, specific wind turbine performance calculations, impacts of wind turbines. Wind turbine specification, stand alone and grid connected wind turbines, offshore wind farm, magnetic levitated wind turbine, floating wind turbine, wind turbines on vessels, installation, maintenance and commissioning of wind turbines. wind turbine system market survey, design, layout, costing, grid integration issues, case studies, data analysis, numericals	
<b>UNIT - III</b>	<b>The solar resource and solar thermal systems</b>	<b>(06 Hours)</b>
	The solar spectrum, the earth's orbit, altitude angle of the sun at solar noon, solar position at any time of day, sun path diagrams for shading analysis, solar time and civil (clock) time, clear sky direct-beam radiation, total clear sky insolation on a collecting surface, monthly clear-sky insolation, solar radiation measurements, average monthly insolation. Direct and diffused radiation and effect on power generation. Solar thermal water heating, types of collectors, efficiency, solar thermal energy generation. Applications of solar thermal system, solar ponds, solar cooker, issues in solar energy, case studies, data analysis, system design, layout, costing, numericals	
<b>UNIT - IV</b>	<b>Solar photovoltaic systems</b>	<b>(06 Hours)</b>
	Basic semiconductor physics, a generic photovoltaic cell, the simplest equivalent circuit for a photovoltaic cell from cells to modules to arrays, the P-V I-V curve under standard test conditions (STC), impacts of temperature and insolation on i-v curves, shading impacts on i-v curves, crystalline silicon technologies, single-crystal czochralski (CZ) silicon, ribbon silicon technologies, cast multi-crystalline silicon, crystalline silicon modules, thin-film photovoltaic, efficiency of PV system. Methods of measurements. : introduction to the major photovoltaic system types, current-voltage curves for loads, grid-connected systems: interfacing with the utility, dc and ac rated power, the "peak-hours" approach to estimating PV performance, capacity factors for PV grid-connected systems, stand-alone PV systems, concentrating solar power (CSP) technologies, PV-powered water pumping, building integrated solar systems, solar facades, solar cars, PV systems – off grid systems and scope for inclusive growth of rural India. Grid autonomy. Bi-directions metering. maximum power point tracking, Calculation of system details. Grid integration issues, case	

	studies, data analysis, grid-connected PV system economics, system trade-offs, dollar-per-watt ambiguities, amortizing costs, grid connected and standalone system sizing, design, layout, costing, payback period,numericals	
<b>UNIT - V</b>	<b>Other sustainable energy sources and hybrid systems</b>	<b>(06 Hours)</b>
	Micro-turbine generation, wave energy conversion systems, tidal energy conversion systems, ocean thermal energy systems, clean coal power plants, biogas, biomass to electrical energy conversion, gasifires, biomass fired boilers, co-firing, cogeneration in sugar industry, energy from municipal solid waste, geo-thermal energy, biomechanical energy, bio-chemical and photosynthesis techniques. Biomass for electricity, small hydro, mini hydro, micro-hydropower, pico hydro,nano hydro systems, electricity from water pipelines, fuel cells, fuel cell efficiency, types of fuel cells, hydrogen production, standalone system,hybrid systems, wind solar hybrid, wind diesel, solar diesel, wind mini hydro hybrid system, numericals	
<b>UNIT - VI</b>	<b>Energy storage</b>	<b>(06 Hours)</b>
	Battery storage, charge regulators, battery types, maintenance, management, fly wheel energy storage, pumped water energy storage, hydrogen energy storage, super capacitor energy storage systems, compressed air energy storage systems, cryogenic energy storage, thermal energy storage, seasonal thermal energy storage. Use of various energy storage techniques in renewable energy sources, numericals	
<b>Term Work:</b>		
1. Fabrication of solar over.		
2. Fabrication of solar cooker.		
3. Desalination of water using solar still.		
4. Fabrication of solar car.		
5. Fabrication of solar updraft tower.		
6.Fabrication of small horizontal axis wind turbine and testing.		
7. Fabrication of small vertical axis wind turbine and testing.		
8. Fabrication of small biogas plant.		
9. Fabrication of a simple fuel cell.		
10. Fabrication of small hydro turbine.		
11. Testing of super capacitor.		
12. Comparison of performance of wind turbine with and without flywheel.		
<b>Text Books:</b>		
1. G. D. Rai, “Non-Conventional Energy Sources”,Khanna Publication		
2. R. Ramesh, “ Renewable energy Technologies”,Narosa Publication		
3. S. Rao, Dr. B. B. Parulekar, “Energy Technology – Non Conventional, Renewable and Conventional”,Khanna Publication		
4. Mittal, “ Non-conventional systems ”,Wheelers publication		

5. Gilbert M. Masters, "Renewable and Efficient Electrical Power Systems", Wiley -IEEE Press, August 2004

**Reference Books**

12. Tony Burton et al, "Wind Energy Hand Book", John Wiley & Sons Inc.
13. Siegfried Heier, Rachel Waddington, "Grid Integration of Wind Energy Conversion Systems", Wiley Publications

**Syllabus for Unit Test:**

Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

**Assignments**

1. Market survey for solar thermal system for water heating and solar photo voltaic system for power generation. Collection of information charts brochures / leaflets from suppliers, manufacturers, cost, technical specification etc. comparative tables for techno commercial information of various products from various companies. List of solar power plants in India and nearby Pune city
2. Clean development mechanism CDM, Carbon credit, carbon credit certificate, types of Carbon Credits, carbon footprints, Measuring carbon footprints, Average carbon emissions per person by country
3. Various wind generators and their comparison w.r.t techno commercial information, their suitability to grid and standalone system, suitability of installation
4. Design of water pumping system for irrigation purpose using wind energy system with a 5 hp pump. Design of suitable water storage facility and drip irrigation system. Size of storage tank. Detailed design with required techno commercial information, turbine size, tower size, cost, market survey for procurement.
5. Design of solar thermal system for hot water system for Bharati Vidyapeeth College of engineering hostel and guest house. The report should involve all techno-commercial

information. Complete design of solar thermal system. Block diagram and detailed diagram of plant for installation and costing. List of suitable vendors for procurement of raw material also should be available in the report with their detailed address, phone numbers, website and email-ID.

6. Design of solar Photovoltaic system for water pumping system for Bharati Vidyapeeth College of engineering campus. The report should involve all techno-commercial information. Complete design of photovoltaic system. Block diagram and detailed diagram of plant for installation and costing. List of suitable vendors for procurement of raw material also should be available in the report with their detailed address, phone numbers, website and email id.
7. Detailed report for grid integration and challenges in grid integration. Recent trends in grid integration. Methods of grid integration for solar and wind power plants. Detailed report.
8. Design of Canteen waste management system for Bharati Vidyapeeth College of engineering canteen with detailed report for feasibility of biogas plant for cooking in canteen and possibility of generation of electricity. The report should involve all techno-commercial information. Complete design of biogas plant for canteen waste. Block diagram and detailed diagram of plant for installation and costing. List of suitable vendors for procurement of raw material also should be available in the report with their detailed address, phone numbers, website and email id.
9. Design of fuel cells for a PMPML bus with all techno commercial information.
10. Design of Solid waste management for katraj area, Pune city, system design and detailed report with all techno commercial information and layout.
11. Design of micro hydro power plant for canal and piped drinking water at parwati pumping station with all techno commercial information and layout.
12. Design of nano hydro system for electrical energy generation system using kinetic energy of water through pipes in a large housing r society with suitable energy storage and illumination system using LED for parking of the society.
13. Types of storage systems for electrical energy. The storage systems suitable for wind energy, solar energy should be given. All other new unconventional methods of storage of energy along with conventional methods should be explained. e.g. super capacitors, compressed air storage, pumped water storage, hydrogen energy storage etc. Techno-commercial comparison all methods should be done. Actual sites where these methods are used should also be mentioned.
14. Industrial visit report for a renewable energy power plant.

Note : - Each practical needs power point presentation and detailed report with techno-commercial information.

## Elective II: Programmable Logic Controllers

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks Oral:25Marks	01Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
<b>1.</b>	Logic gates operations, Boolean algebra, Data types (integer, float, unsigned)	
<b>Course Objectives:</b>		
	This course aims at understanding the basic concepts PLC hardware and PLC software and Programming language like ladder, construction of ladder diagram, their symbol and component of the instruction. Knowledge of analog and digital input and Output devices, PID, SCADA and Communication Protocols.	
<b>Course Outcomes:</b>		
<b>1.</b>	Describe Programmable Logic Controller along with the block diagram with its components in detail.	
<b>2.</b>	Develop architecture of SCADA explaining each unit in detail.	
<b>3.</b>	Develop a software program using modern engineering tools and technique for PLC and SCADA.	
<b>4</b>	Enlist various industrial applications using PLC and SCADA.	
<b>5</b>	Describe the importance of SCADA in critical infrastructure.	
<b>6</b>	Execute, debug and test the programs developed for digital and analog operations.	
<b>UNIT -I</b>	<b>Introduction to PLC</b>	<b>(06 Hours)</b>
	History of PLC, PLC system, Block Diagram of general PLC, PLC input and output module, Sensors and actuators for PLC, Central Processing Unit, Monitors, solid state memory, Power supplies, HMI and Interfaces, Selection criteria for PLC, PLC advantages and disadvantages, Present PLC manufacturers.	
<b>UNIT – II</b>	<b>Programming of PLC</b>	<b>(06 Hours)</b>
	Input ON/OFF switching devices, Input analog devices, Output ON/OFF devices, Output analog devices, Programming equipments, Introduction of Programming languages, Basic components & symbols in ladder diagram, Construction of PLC ladder diagram for programming, Fundamentals of ladder diagram, Boolean logic & relay logic, programming ON/OFF Inputs to produce ON/OFF outputs.	
<b>UNIT – III</b>	<b>PLC Applications</b>	<b>(06 Hours)</b>
	Analog PLC operation, PID control of continuous processes, closed loop systems and common problems, closed loop system using Proportional, Integral & Derivative (PID), PLC interface. Industrial process example: Motors Controls - AC Motor starter, AC	

	motor overload protection, DC motor controller, Variable speed (Variable Frequency) AC motor Drive. Temperature, level and Flow control.	
<b>UNIT - IV</b>	<b>SCADA Systems Overview</b>	<b>(06 Hours)</b>
	Introduction and definitions of SCADA, Principles of SCADA systems, SCADA system evolution. Basic SCADA system Architecture: Human Machine Interface, Master Terminal Unit, Remote Terminal Unit. SCADA data transfer through PLCC. Communication Technologies, Communication system components, SCADA Communication in an electrical power system. SCADA system desirable Properties, Real Time System, SCADA server, SCADA functions.	
<b>UNIT - V</b>	<b>SCADA Architecture</b>	<b>(06 Hours)</b>
	First generation - Monolithic, Second generation - Distributed, Third generation – Networked Architecture, Intelligent Electronic Devices. Operation and control of interconnected power system, Automatic substation control, SCADA configuration, Energy management system, system operating states, system security, State estimation, and SCADA system security issues overview. SCADA systems in the critical Infrastructure: Conventional Electric Power Generation, water Purification System, Chemical Plant, Petroleum Refining Process.	
<b>UNIT - VI</b>	<b>The Evolution Protocols</b>	<b>(06 Hours)</b>
	Overview of Open systems interconnection (OSI) Model, Functions of OSI Model Layers, OSI Protocols, Functions of Transmission control protocol / Internet protocol (TCP/IP) Layers, TCP/IP protocol, DNP3 protocol, IEC layered architecture, Ethernet/IP, Process Field bus (Profibus), Modbus, The Security Implications of the SCADA protocols.	
<b><u>Term Work:</u></b>		
The term work shall consist of record of minimum eight experiments. Four from first 6 and four from next 6 out of given below.		
<ol style="list-style-type: none"> <li>1. Interfacing of lamp &amp; button with PLC for ON &amp; OFF operation. Verify all logic gates.</li> <li>2. Performed delayed operation of lamp by using push button.</li> <li>3. UP/DOWN counter with RESET instruction.</li> <li>4. Combination of counter &amp; timer for lamp ON/OFF operation.</li> <li>5. Set / Reset operation: one push button for ON &amp; other push button for OFF operation.</li> <li>6. DOL starter &amp; star delta starter operation by using PLC.</li> <li>7. PLC interfaced with HMI&amp; status read/command transfer operation.</li> <li>8. Parameter reading of PLC interface with SCADA.</li> <li>9. Alarm annunciation using PLC &amp;SCADA.</li> <li>10. Tank level control by using PLC &amp;SCADA.</li> <li>11. Temperature monitoring by using PLC &amp;SCADA.</li> <li>12. Reporting &amp; trending in SCADA system.</li> </ol>		

<b>Assignments:</b>	
<ol style="list-style-type: none"> <li>1. Automation requirement in industries</li> <li>2. Recent trends in automation</li> <li>3. Basic concepts in Ladder diagrams</li> <li>4. Basic programming for automation</li> <li>5. A solar panels automatic tracking system based on PLC</li> <li>6. Automated water supply control system using PLC</li> <li>7. PID implementation of heating tank in industrial plant</li> <li>8. PLC based SCADA for oil storage</li> <li>9. Web based remote access laboratory using SCADA</li> <li>10. Three layer PLC/SCADA system architecture in process automation</li> </ol>	
<b>Text Books:</b>	
3. John R. Hackworth, Frederick D., Hackworth Jr., “Programmable Logic Controllers Programming Methods and Applications”, PHI Publishers.	
4. John W. Webb, Ronald A. Reis, “Programmable Logic Controllers: Principles and Application”, PHI Learning, New Delhi, 5 <sup>th</sup> Edition.	
5. Ronald L. Krutz, “Securing SCADA System”, Wiley Publications.	
6. Wiley Boltan	
<b>Reference Books:</b>	
5. Batten G. L., “Programmable Controllers”, McGraw Hill Inc., Second Edition	
6. Gordan Clark, Deem Reynders, “Practical Modern SCADA Protocols”, ELSEVIER	
7. P. K. Srivstava, “Programmable Logic Controllers with Applications”, BPB Publications	
8. Krishna Kant, “Computer Based Industrial Control”, PHI	
9. Catalogues and user manuals PLC and SCADA	
<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

## Elective II: Signal and Systems

<b><u>TEACHING SCHEME:</u></b>		<b><u>EXAMINATION SCHEME:</u></b>		<b><u>CREDITS</u></b>
				<b><u>ALLOTTED:</u></b>
Theory: 03 Hours / Week		End Semester Examination: 60 Marks		03 Credits
Practical: 02 Hours / Week		Continuous Assessment: 40 Marks		
		Term Work: 25 Marks Oral:25Marks		01 Credit
<b>Course Pre-Requisites:</b>				
The Students should have				
1.	Mathematics			
2.	Physics			
3.	Fundamentals of Electrical Engineering			
<b>Course Objectives:</b>				
The course introduces fundamental concepts of signals,.				
<b>Course Outcomes:</b>				
1.	Understand and apply knowledge of various types of signals			
2.	Understand and apply knowledge of Fourier analysis to signals			
3.	Understand and apply knowledge of Laplace transforms in Analysis of CT systems .			
4.	Understand and apply fundamental concepts of DTFT			
5.	Understand and apply the Z transform analysis			
6.	Understand and apply the concept of Fourier and Laplace to real time applications			
<b>UNIT - I</b>	<b>CLASSIFICATION OF SIGNALS AND SYSTEMS.</b>			<b>(06 Hours)</b>
	Continuous time signals (CT signals) - Discrete time signals (DT signals) - Step, Ramp, Pulse, Impulse, Sinusoidal, Exponential, Classification of CT and DT signals - Periodic & A periodic signals, Deterministic & Random signals, Energy & Power signals - CT systems and DT systems- Classification of systems – Static & Dynamic, Linear & Nonlinear, Time-variant & Time-invariant, Causal &No causal, Stable & Unstable			
<b>UNIT - II</b>	<b>ANALYSIS OF CONTINUOUS TIME SIGNALS</b>			<b>(06 Hours)</b>
	Fourier series analysis-spectrum of Continuous Time (CT) signals-Fourier and Laplace Transforms in CT Signal Analysis - Properties.			
<b>UNIT - III</b>	<b>LINEAR TIME INVARIANT- CONTINUOUS TIME SYSTEMS</b>			<b>(06 Hours)</b>
	Differential Equation-Block diagram representation-impulse response, convolution integrals-Fourier and Laplace transforms in Analysis of CT systems .			
<b>UNIT - IV</b>	<b>ANALYSIS OF DISCRETE TIME SIGNALS</b>			<b>(06 Hours)</b>
	Baseband Sampling - DTFT – Properties of DTFT - Z Transform – Properties of Z Transform			
<b>UNIT - V</b>	<b>LINEAR TIME INVARIANT-DISCRETE TIME SYSTEMS</b>			<b>(06 Hours)</b>
	Difference Equations-Block diagram representation-Impulse response - Convolution sum- Discrete Fourier and Z Transform Analysis of			

	Recursive & Non-Recursive systems	
<b>UNIT - VI</b>	<b>Real Life Application presentations</b>	<b>(06 Hours)</b>
	Analysis of obstacle detection, Speech and hearing, applications of Fourier Transform, Neuro Electronics, Automation for Smart traffic controller, Image processing, CDMA, Speaker verification, Pattern recognition in forex rates, Use of signals in SETI, SAS in radio astronomy, SAS in economic analysis, SAS in meteorology, SAS in Fourier optics	
<b>Term Work:</b>		
1. Generation of Signals: continuous time and discrete time		
2. Convolution of Signals, Solution of Difference equations		
3. Fourier series representation of continuous time signals		
4. Fourier transform of continuous time signals.		
5. Discrete time Fourier analysis		
6. Introduction to SIMULINK and calculation of output of systems represented by block		
7. Sampling and reconstruction of continuous time signals		
<b>Text Books:</b>		
1) 'Signals and systems' by Rajiv Kapadia, Jaico Publishing		
2) 'Signals and systems' by Anand Kumar		
3) 'Linear Systems and signals' by B.P.Lathi		
4) Textbook on Signals and systems' by Harish Parthasarathy, I.K.International Publishing		
<b>Reference Books:</b>		
1. 'Signals and systems' by Allen Openheim and Wilsky, Prentice Hall Publication		
2. Schaum's outline series book on 'Signals and systems' by H.Hsu and R.Ranjan		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

**Assignments:**

1. Solve the unsolved question from the books Unit wise.
2. Prepare report from NPTEL video lectures.
3. Prepare programming assignments from the syllabus topic.
4. Solve the University Question Papers Unit wise.
5. Group Discussions from syllabus topics from students and prepare report on the same.
6. Topics preparation from students on any topics and prepare PPT on the same.

## Elective II: Introduction to JAVA and .NET

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks Oral:25Marks	01Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
<b>1.</b>	Object Oriented Programming like C++ and Internet concepts	
<b>Course Objectives:</b>		
	To expose students to the programming in JAVA and .NET for basic level programming so that they can program static and dynamic web pages using JAVA and .NET platforms.	
<b>Course Outcomes:</b> After learning the subject students will be able to		
<b>1.</b>	Use basic JAVA programming using JDK	
<b>2.</b>	Construct JAVA programs and applications deployed on server with server components and communication	
<b>3.</b>	Develop JAVA platform applications with database connectivity for dynamic and static web pages	
<b>4</b>	Use basics of .NET platform programming using .NET technologies	
<b>5</b>	Construct web applications using .NET technologies involving server communication and front end	
<b>6</b>	Use .NET platform for building applications using web services	
<b>UNIT - I</b>	<b>Introduction to JAVA</b>	<b>(06 Hours)</b>
	Why Java, Java Virtual Machine (JVM), Features, Variables, Data Types, Operators, Control Statements, Object Oriented Concepts in Java, Libraries, Packages,	
<b>UNIT – II</b>	<b>Server Programming Concepts in JAVA</b>	<b>(06 Hours)</b>
	Java Development Kit (JDK), Exception Handling (try-catch, throws and finally), Java API, Compile and Runtime Environment, JAVA – J2EE, JAVA.awt - Applets, JAVA GUI Components, Java Scripting	
<b>UNIT – III</b>	<b>Database and Application Programming Concepts in JAVA</b>	<b>(06 Hours)</b>
	Java Beans, Web Servers, Servelets, HTTP Request and Response, JDBC, Accessing Database from JSP Page, Exploring JAVA Programs and Applications	
<b>UNIT – IV</b>	<b>Introduction to .NET</b>	<b>(06 Hours)</b>
	Introduction to .NET Framework, Evolution of .NET technologies - CTS, CLS, CLR, MSIL, Introduction to Base Class Library, Introduction to VB.NET - Working with Visual Studio IDÉE – IDE Components, VB.NET Fundamentals – Variables, Data Types, Control Flow Statements, Subroutines, Functions, Object Oriented Concepts in .NET	

<b>UNIT - V</b>	<b>Building Applications with .NET</b>	<b>(06 Hours)</b>
	.NET Class Library, Input and Output, Windows Forms, Building Forms, Responding to User Inputs/Events, Menu Design, Information Presentation, Dialog Control, Working with XML, GUI's	
<b>UNIT - VI</b>	<b>Advanced .NET and Applications</b>	<b>(06 Hours)</b>
	ADO.NET Architecture, Web Programming, Web Services, Database Controls, ADO .NET Programming, Exploring .NET Applications and Programs, Comparison Between J2EE and .NET	
<b>Term Work :</b>		
The term work / assignments shall consist of record of topics from the list given below.		
<ol style="list-style-type: none"> <li>1. Development of static pages using HTML of an online Departmental Store having home page, login page and items catalog page.</li> <li>2. Add validations to above static pages of home page, login and items page using Java Script.</li> <li>3. Creation of a XML document of 20 students. Add their roll numbers, marks obtained in 5 subjects, total and percentage and save this XML document at the server. Write a program that takes students' roll number as an input and returns the students' marks, total and percentage by taking the students' information from the XML document on server.</li> <li>4. Creation of a JavaBeans which gives converted value of Temperature (in degree Celsius) into equivalent Fahrenheit.</li> <li>5. Do the assignment using JSP by converting the static web pages of assignment 2 into dynamic web pages. Create database with User Information and Item information. The Item catalog should be dynamically loaded from the database.</li> <li>6. Implementation of "Hello World!" program using JSP Struts Framework.</li> <li>7. Repeat all / some of the above experiments using VB.NET.</li> </ol>		
<b>Text Books:</b>

<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT – III
Unit Test -2	UNIT – IV, UNIT – V, UNIT – VI
<b><u>Assignments:</u></b>	
<ol style="list-style-type: none"><li>1. Solve the unsolved question from the books Unit wise.</li><li>2. Prepare report from NPTEL video lectures.</li><li>3. Prepare programming assignments from the syllabus topic.</li><li>4. Industrial visit to software company for the learning the applications of JAVA and .NET.</li><li>5. Solve the University Question Papers Unit wise.</li><li>6. Group Discussions from syllabus topics from students and prepare report on the same.</li></ol>	

## Elective II: Special Purpose Machines

<b>TEACHING SCHEME:</b>		<b>EXAMINATION SCHEME:</b>		<b>CREDITS ALLOTTED:</b>
Theory: 03 Hours / Week		End Semester Examination: 60 Marks		03 Credits
Practical: 02Hours / Week		Continuous Assessment: 40 Marks		
		Term Work: 25 Marks Oral:25Marks		01Credit
<b>Course Pre-requisites:</b>				
The Students should have knowledge of				
<b>1.</b>	Electrical machines (AC and DC)			
<b>Course Objectives:</b>				
To expose students to construction, principle of operation, performance and applications of special electrical machines as an extension to the study of basic electrical machines.				
<b>Course Outcomes:</b> After learning the subject students will be able to				
<b>1.</b>	Use the MMF and EMF equations for rotating machines			
<b>2.</b>	Analyze, perform basic experiments and can apply use of BLDC and PMSM motors for different applications			
<b>3.</b>	Analyze, perform basic experiments and can apply use of SRM and SYNREL motors for different applications			
<b>4</b>	Analyze, perform basic experiments and can apply use of Linear Induction Motors and Traction Motors for different applications			
<b>5</b>	Analyze, perform basic experiments and can apply use of Transverse Flux - Axial Flux machines and PMSG and DFIG Generators for different applications			
<b>6</b>	Analyze, perform basic experiments and can apply use of small control motors like servo motors, stepper motors, universal motors and PCB motors for different applications			
<b>UNIT - I</b>	<b>Generalized Machine Theory</b>			<b>(06 Hours)</b>
	Energy in singly excited magnetic field systems, Magnetic force and torque from energy, Magnetic force and torque from co-energy, Forces and torques in systems with permanent magnets, Magnetic field production of EMFs in rotating machines			
<b>UNIT – II</b>	<b>Permanent Magnet Special Motors</b>			<b>(06 Hours)</b>
	Types, Construction, Principle of Operation, Characteristics, Drives / Control and Applications of – 1. Brushless DC Motor (BLDC) 2. PM Synchronous Motor (PMSM)			
<b>UNIT – III</b>	<b>Reluctance Type Special Motor</b>			<b>(06 Hours)</b>
	Types, Construction, Principle of operation, Characteristics, Drives / Control and Applications of – Reluctance Motor – includes 1. Switched Reluctance Motors (SRM) 2. Synchronous Reluctance (SYNREL) Motors			

<b>UNIT – IV</b>	<b>Linear and Traction Motors</b>	<b>(06 Hours)</b>
	Types, Construction, Principle of Operation, Characteristics, Drives / Control and Applications of – 1. Linear Induction Motor (LIM) 2. Traction Motors	
<b>UNIT - V</b>	<b>Transverse Flux &amp; Axial Flux Machines and Special Generators</b>	<b>(06 Hours)</b>
	Types, Construction, Principle of Operation, Characteristics, Drives / Control and Applications of – 1. Axial Flux Permanent Magnet (PM) Synchronous Generators 2. Doubly Fed Induction Generators (DFIG) 3. Transverse Flux Machines	
<b>UNIT - VI</b>	<b>Control of Small Special Motors</b>	<b>(06 Hours)</b>
	Types, Construction, Principle of Operation, Characteristics, Drives / Control and Applications of – 1. Stepper / Stepping Motors 2. Servo Motors 3. Printed Circuit Board (PCB) Motors 4. Universal Motors	

**Term Work:**

The term work / assignments shall consist of record of topics from the list given below.

1. Laboratory demonstration of PMSM motor and drive.
2. Laboratory demonstration of BLDC Drive.
3. Experimental analysis of Reluctance Motor Drive.
4. Laboratory demonstration of Stepper Motor Drive.
5. Laboratory demonstration of Linear Induction Motor.
6. Laboratory demonstration of AC / DC Servo motor.
7. Laboratory demonstration of Induction Generator.

**Text Books:**

7. P. S. Bimbhra “Generalized Theory of Electrical Machines” Khanna Publishers
8. K. Venkatratnam, ‘Special Electrical Machines’, University Press
9. A. E. Fitzgerald, Charles Kingsley, Stephen Umans, ‘Electric Machinery’, Tata McGraw Hill Publication
10. V. V. Athani, ‘Stepper Motors: Fundamentals, Applications and Design’, New Age International
11. T. J. E. Miller, ‘Brushless Permanent Magnet and Reluctance Motor Drives’, Clarendon Press, Oxford Publication
12. Ion Boldea, ‘Linear Electric Machines, Drives and Maglevs’, CRC Press

**Reference Books:**

5. M. G. Say “Alternating current Machines”, Pitman & Sons
6. T. Kenjo, ‘Stepping Motors and Their Microprocessor Controls’, Clarendon Press London
7. P. C. Sen, “Principles of Electrical Machines and Power Electronics”, John Willey & Sons

--	--

<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

**Assignments:**

1. Solve the unsolved question from the books Unit wise.
2. Prepare report from NPTEL video lectures.
3. Solve the University Question Papers Unit wise.
4. Group Discussions from syllabus topics from students and prepare report on the same.
5. Industrial visit to electrical machine manufacturing company and prepare report on the same.
6. Market survey for various electrical special machines and preparing report on the same.

## Elective II: Illumination Engineering

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 03 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks Oral:25Marks	01Credit
<b>Course Pre-requisites:</b>		
The Students should have knowledge of		
1. Fundamentals of Electrical Engineering & Color acknowledgement.		
<b>Course Objectives:</b>		
1. Basics of Illumination Engineering.		
2. Illumination Design		
3. Interior & Exterior Illumination		
<b>Course Outcomes:</b>		
1. To study working of various light sources.		
2. To design illumination systems as per illumination laws.		
3. To make students perform interior lighting design		
4. To make students perform Exterior lighting design		
5. To study various lighting systems such as solar, cold lighting		
6. To make students able to apply lighting design in green buildings.		
<b>UNIT 1</b>	<b>Basic physics of Light</b>	<b>(06 Hours)</b>
	Nature And Properties Of Light. Radiation, color, eye & vision; different entities of illuminating systems; Light sources: daylight, incandescent, electric discharge, fluorescent, arc lamps and lasers;	
<b>UNIT 2</b>	<b>Illumination design</b>	<b>(06 Hours)</b>
	Luminaries, wiring, switching & control circuits; Laws of illumination; illumination from point, line and surface sources. Photometry and spectrophotometry; photocells. Environment and glare. General illumination design.	
<b>UNIT 3</b>	<b>Interior lighting</b>	<b>(06 Hours)</b>
	Industrial, residential, office departmental stores, indoor stadium, theater and hospitals. Lighting For <i>Hazardous Areas</i>	
<b>UNIT 4</b>	<b>Exterior lighting</b>	<b>(06 Hours)</b>
	Flood, street, aviation and transport lighting, lighting for displays and signaling- neon signs, LED-LCD displays beacons and lighting for surveillance. <i>Sports lighting.</i>	

<b>UNIT 5</b>	<b>Other lighting designs</b>	<b>(06 Hours)</b>
	1) Solar Lighting 2) Day-lighting for building 3) Cold Lighting 4) Energy efficient lighting.	
<b>UNIT 6</b>	<b>Lighting in sustainable buildings</b>	<b>(06 Hours)</b>
	1) Reduction methods of Lighting pollution 2) Significance of Lighting in Green building design. 3) Comparison of conventional and new energy saving lighting appliances. 4) LEED certification	
<b>TermWork:</b>		
1. Study of commercial catalog for LEDs, CFLs and Tubes for understanding lumens output and wattages of each lamps.		
2. Study of Design and assemble various Illuminating lamps.		
3. Study of Design of illumination for Hotel.		
4. Study of Design of illumination for residential sector		
5. Study of Design of illumination for office departmental stores.		
6. Study of Design of illumination for Hospital.		
7. Study of Design of Solar Lighting for College.		
8. Study of Design of Energy efficient lighting		
<b>Text Books:</b>		
National Lighting Code- Published by Govt of India		
<b>Reference Books:</b>		
1) Lamps and Lighting – Edited by J.R.Coaton and A.M.Marsden, 4th Edition		
2) IES Lighting Handbook – IES North America		
3) Interior Lighting – Boer, Fischer, Pub – Philips Technical Library		
4) Website: <a href="http://lighting.sustainableources.com/">http://lighting.sustainableources.com/</a>		
<b>Syllabus for Unit Test:</b>		
Unit Test -1	UNIT – I, UNIT – II, UNIT - III	
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI	

**Assignments:-**

1. Define and explain Radiation, color, eye & vision
2. Discuss Different entities of illuminating systems
3. Write a short note on General illumination design
4. State and explain Laws of illumination
5. Design illumination for Industrial, residential, office departmental stores,
6. Design illumination for indoor stadium, theater and hospitals.
7. Design illumination for Flood, street, aviation and transport lighting
8. Design illumination for lighting for displays

9. Write in brief about Solar Lighting
10. What is Significance of Lighting in Green building design

**Total Credits Sem – III : 25**

**Total Credits Sem – IV : 25**

**Grant total : 50**

**B.Tech.(Biomedical) Sem-III**

**Bharati Vidyapeeth Deemed University,  
College of Engineering, Pune**

**Class: B.Tech (Biomedical) Sem:- III**

**SUBJECT: - Engineering Mathematics-III**

**Lecture: 3 hours/week**

**Tutorial: 1 hours/week**

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

---

**Course prerequisites:**

Students should have basic knowledge of:

- Differential calculus
- Integral calculus
- Complex numbers
- Vector algebra

---

**Course objective:**

To develop ability to use the mathematical techniques, skills, and tools necessary for engineering practice.

---

**Course Outcomes:** On successful completion of this course, students will be able to

1. Form mathematical modeling of systems using differential equations and ability to solve linear differential equations with constant coefficient.
2. Apply basics of analytic functions and the basics in complex integration which is used to evaluate complicated real integrals.
3. Apply theorems to compute the Laplace transform, inverse Laplace transforms.
4. Solve difference equation by Z-transform.
5. Calculate the gradients and directional derivatives of functions of several variables.
6. Use Green's theorem to evaluate line integrals along simple closed contours on the plane.

## **Contents:**

### **Unit-I**

#### **Linear Differential Equations (LDE) (08Hours)**

Solution of nth order LDE with Constant Coefficients, Method of Variation of Parameters, Cauchy's & Legendre's DE, Solution of Simultaneous & Symmetric Simultaneous DE, Modeling of Electrical Circuits.

### **Unit-II**

#### **Complex Variables (08Hours)**

Functions of Complex Variables, Analytic Functions, C-R Equations, Conformal Mapping, Bilinear Transformation, Cauchy's Theorem, Cauchy's Integral Formula, Laurent's Series, Residue Theorem

### **Unit-III**

#### **Transforms (08Hours)**

Fourier Transform (FT): Complex Exponential Form of Fourier Series, Fourier Integral Theorem, Sine & Cosine Integrals, Fourier Transform, Fourier Sine and Cosine Transform and their Inverses. Introductory Z-Transform (ZT): Definition, Standard Properties, ZT of Standard Sequences and their Inverses. Solution of Simple Difference Equations.

### **Unit-IV**

#### **Laplace Transform (LT) (08Hours)**

Definition of LT, Inverse LT. Properties & theorems. LT of standard functions. LT of some special functions viz., Periodic, Unit Step, Unit Impulse, ramp, jump, . Problems on finding LT & inverse LT. Applications of LT and Inverse LT for solving ordinary differential equations.

### **Unit -V**

#### **Vector Differential Calculus (08Hours)**

Physical Interpretation of Vector Differentiation, Vector Differential Operator, Gradient, Divergence and Curl, Directional Derivative, Solenoidal, Irrotational and Conservative Fields, Scalar Potential, Vector Identities.

## Unit-VI

### Vector Integral Calculus

(08Hours)

Line, Surface and Volume integrals, Work-done, Green's Lemma, Gauss's Divergence Theorem, Stoke's Theorem, Applications to Problems in Electro-Magnetic Fields.

#### Assignments:

1. Solve the problem based on Linear Differential Equations
2. Solve the problem based on Complex Variables
3. Solve the problem based on Fourier and Z -Transforms
4. Solve the problem based on Laplace Transform
5. Solve the problem based on Vector Differential Calculus
6. Solve the problem based on Vector Integral Calculus

**Content Delivery Methods:** Chalk & talk, Power point presentation

#### Assessment Methods:

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

#### Text Books:

1. Advanced Engineering Mathematics by Peter V. O'Neil (Cengage Learning).
2. Advanced Engineering Mathematics by Erwin Kreyszig (Wiley Eastern Ltd.).

#### Reference Books:

1. Engineering Mathematics by B.V. Raman (Tata McGraw-Hill).
2. Advanced Engineering Mathematics, 2e, by M. D. Greenberg (Pearson Education).
3. Advanced Engineering Mathematics, Wylie C.R. & Barrett L.C. (McGraw-Hill, Inc.)
4. Higher Engineering Mathematics by B. S. Grewal (Khanna Publication, Delhi).
5. Applied Mathematics (Volumes I and II) by P. N. Wartikar & J. N. Wartikar (Pune Vidyarthi Griha Prakashan, Pune).

**Bharati Vidyapeeth Deemed University,  
College of Engineering, Pune**

**Class: B.Tech (Biomedical) Sem:- III**

**SUBJECT: - Analog Electronics**

**Lecture: 4 hours/week**

**Practical: 2 hours/week**

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

**TW & Practical.: 50 marks**

---

**Course prerequisites:**

- Knowledge of Electronic Components
- Fundamentals of P-N diode.
- Knowledge of BJT and its configuration

---

**Course objective:**

1. To make student understand working of bipolar junction transistor and field effect transistor with different biasing techniques
2. To make student understand a practical approach of design and analysis of waveshaping circuits using diode and multivibrator using transistors
3. To make student understand working of FET and MOSFET and its applications
4. To make student understand working of optoelectronic devices and its applications.
5. To make student understand the fabrication process of PCB

---

**Course Outcomes:** On successful completion of this course, students will be able to

1. Demonstrate knowledge of working and applications of diode.
2. Demonstrate knowledge of working of BJT with different biasing techniques.
3. Analyze applications of BJT as an amplifier and multivibrator.
4. Explain working of FET and MOSFET and its applications.
5. Demonstrate knowledge of working of optoelectronic devices.
6. Design, built and test any small electronic circuit on PCB.

## **Contents:**

### **Unit-I**

#### **Transistor Biasing (08Hours)**

Need of biasing, DC load line analysis, operating point, Thermal runaway. Requirements of a biasing circuit, Different biasing circuits: fixed bias, collector to base bias & voltage divider bias. Stability factor, General expression for stability factor, stability factor for all biasing circuits, Design of biasing circuits, Transistor as an amplifier.

### **Unit-II**

#### **BJT Amplifiers (08Hours)**

Two port device and Hybrid model, transistor Hybrid model, h- parameters, Simplified CE Hybrid Model, Analysis of amplifiers using Approximate Model(CE, CC, CB), BJT Single Stage Amplifiers, Small Signal Analysis of Single Stage BJT Amplifiers, Distortion in Amplifiers.

### **Unit-III**

#### **Field Effect Transistor (FET) (08Hours)**

Types of FET viz. JFET, MOSFET, JFET -construction, VI characteristics, transfer characteristics, Characteristics Parameters of JFET, FET Biasing(Self Bias, Fixed Bias, Current Source Bias), JFET amplifiers-CS, CD and CG amplifiers, Application of FET.

### **Unit-IV**

#### **MOSFETs (08Hours)**

Types of MOSFET viz. D-MOSFET, E-MOSFET, n-MOS, p-MOS and CMOS devices, DMOSFET and EMOSFET characteristics and parameters, non-ideal V-I characteristics viz. finite output resistance, body effect, subthreshold conduction, breakdown effects and temperature effects, MOSFET as VLSI device

### **Unit -V**

#### **Wave shaping and Multivibrator Circuits (08Hours)**

Diode as clipper- series and parallel forms of clipper circuits, biased clipper, their operations, Diode as a clamper, voltage multiplier circuits-voltage doubler, tripler and quadrupler configuration, Multivibrator circuits-astable and monostable multivibrator circuit using BJT.

## Unit-VI

### Optoelectronic devices and PCB design

(08Hours)

Construction, V-I characteristics and applications of LED, LDR, Photodiode, Phototransistor, Photoconductive cell, Photovoltaic cell, optocoupler.

PCB: types of PCB, PCB design rules, layout design, artwork design, fabrication process of single sided PCB, different copper clad laminates, composition of solder metal.

#### List of Experiments:

1. Biasing techniques of BJT- to find stability factor of self bias, collector to base bias, fixed bias
2. To plot frequency response of single stage CE amplifier and find its bandwidth
3. To plot frequency response of single stage FET amplifier (CS/CD configuration) and find its bandwidth.
4. To study different types of Clipper circuits
5. To study different types Clamper circuits
6. To plot transfer characteristics of Optocoupler
7. To plot V-I and optical characteristics of LED and LDR
8. To plot V-I and optical characteristics of Photodiode and phototransistor

#### Assignments:

1. Simulation of BJT amplifier using Multisim.
2. Define h-parameters for CE, CB, CC configuration and describe how these parameters are determined from BJT characteristics.
3. Describe fabrication process of MOSFET and any two real time applications of MOSFETs
4. Real time applications of optoelectronics devices such as LED, Optoisolator
5. To design, built and test given electronic circuits (Group activity)
6. Obtain industry exposure based on product design industry and prepare report for the same.

**Content Delivery Methods:** Chalk & talk, Power point presentation

**Assessment Methods:**

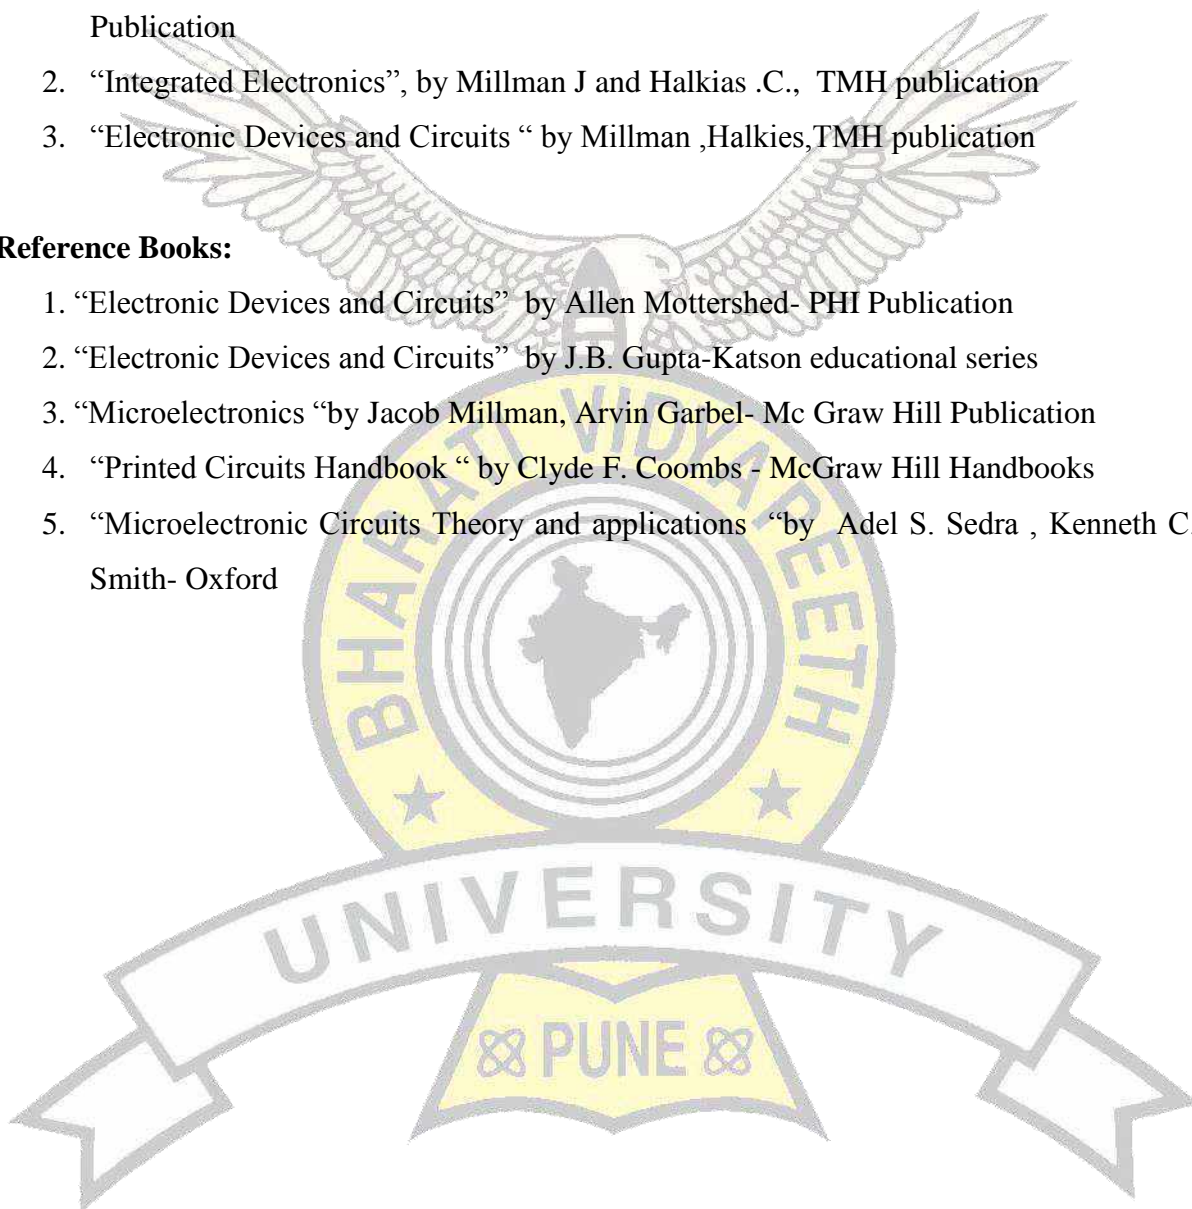

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

**Text Books:**

1. “Electronic Devices and Circuits” by S. salivahanan,Suresh kumar- Mc Graw Hill Publication
2. “Integrated Electronics”, by Millman J and Halkias .C., TMH publication
3. “Electronic Devices and Circuits “ by Millman ,Halkies,TMH publication

**Reference Books:**

1. “Electronic Devices and Circuits” by Allen Mottershed- PHI Publication
2. “Electronic Devices and Circuits” by J.B. Gupta-Katson educational series
3. “Microelectronics “by Jacob Millman, Arvin Garbel- Mc Graw Hill Publication
4. “Printed Circuits Handbook “ by Clyde F. Coombs - McGraw Hill Handbooks
5. “Microelectronic Circuits Theory and applications “by Adel S. Sedra , Kenneth C. Smith- Oxford

**Bharati Vidyapeeth Deemed University,  
College of Engineering, Pune**

**Class: B.Tech (Biomedical) Sem:- III**

**SUBJECT: - Signals and Systems**

**Lecture: 3 Hrs/week**

**Tutorial: 01 Hr/Week**

**Theory: 60 marks**

**Unit Test: 20 Marks**

**Attendance: 10Marks**

**Assignments: 10Marks**

**TW & Oral: 50 Marks**

---

**Course prerequisites:**

Before proceeding with this tutorial, you must have a basic understanding of differential and integral calculus, limits and adequate knowledge of mathematics.

**Course objective:**

The course aims to develop good understanding about signals, systems and their classification and analysis tools in the time and frequency domain. It also provides knowledge of correlation function and sampling.

---

**Course Outcomes:** On successful completion of this course, students will be able to

1. Represent & classify signals, Systems & identify LTI systems
2. Analyze the systems in time domain using convolution.
3. Apply Fourier transform, Laplace transform and Z-Transform for analysis of LTI systems.
4. Conceptualize the effects of sampling on signal and describe the auto correlation and cross correlation between signals.

**Contents:**

**Unit-I**

**Introduction to signals**

**(06 Hours)**

Definition of signals, classification of signals: continuous time signals & discrete time signals, even & odd signals, periodic & non-periodic, deterministic & non-deterministic,

energy & power, elementary signals: unit impulse, unit step, unit ramp, exponential & sinusoidal, basic operations on signals.

## **Unit-II**

### **Classification of Discrete time systems (06 Hours)**

Definition, Classification of System, System Interconnections, state space analysis, Linear & non-linear, Time-Invariant & Time variant, causal & non-causal, static & dynamic, stable & unstable systems, stability & impulse response of systems to standard signals.

LTI system Analysis: Introduction to LTI systems. Block Diagram, Linear Convolution-Convolution Integral, Impulse response, Methods of Convolution. Properties of convolution

## **Unit-III**

### **Continuous Time system Analysis: (06 Hours)**

Response of LTI Systems to exponential signals, periodic signals. Fourier series, Fourier Transforms, properties, applications of Fourier series & Fourier transforms to the system analysis.

## **Unit-IV**

### **System Analysis in Laplace Transform (06 Hours)**

Laplace Transform: Definition and its properties, ROC and pole zero concept. Applications of Laplace transforms to the LTI system analysis. Inversion using duality, numerical based on properties.

## **Unit-V**

### **System Analysis in Z-Transform (06 Hours)**

Z-Transform: Definition and its properties, Region of Convergence for the Z-Transform, the Inverse z-Transform, Applications of Z-Transform to the LTI system analysis

## **Unit VI:**

### **Correlation and Spectral Density (06 Hours)**

Definition of Correlation and Spectral Density, correlogram, analogy between correlation, covariance and convolution, conceptual basis, auto-correlation, cross correlation, energy/power spectral density, properties of correlation and spectral density, inter relation between correlation and spectral density, Sampling theorem & its proof, aliasing, reconstruction of sampled signals, interpolation.

**Assignments:**

Perform the following assignments using MATLAB (any three) and Virtual Lab (any three)

1. Generation of Signals
2. Linear convolution of any two signals
3. Fourier transform of given signal
4. Laplace Transform of given signal
5. Z-transform of given signal
6. Sampling Theorem & aliasing effect.

**Content Delivery Methods:** Chalk & talk, Power point presentation, Quiz

**Assessment Methods:**

1. Continuous Assessment (Attendance, Assignments/Tutorials, Unit Test)
2. End term Examination

**Text Books:**

1. Alan V Oppenheim, Alan S, Willsky and A Hamid Nawab, "Signals and Systems" Pearson Education Asia / PHI, 2nd edition, 1997. Indian Reprint 2002
2. Simon Haykins and Barry Van Veen, Signals and Systems John Wiley & sons , Inc,2004.

**Reference Books:**

College of Engineering, Pune**

**Class: B.Tech (Biomedical) SEM: - III  
SUBJECT: - Circuit Theory**

**Lecture: 3 hours/week**

**Practical: 2 hours/week**

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

**TW & Practical: 50 marks**

---

**Course prerequisites:**

- Knowledge of KCL and KVL Laws from Basic Electrical Engineering
- Knowledge of Linear Differential Equations and Systems of Linear Equations from Engineering Mathematics - I and II.

---

**Course objective:**

The objective of the course is to enable the student to perform any of the network analysis task required in the subsequent courses. The student is exposed to some concepts in graph theory for providing a good foundation for the methods of Mesh Analysis and Node Analysis. The transient analysis using Laplace Transforms is also included. The series and parallel resonance circuits which occur quite frequently in electronics are analyzed. The topic of constant K filter is included as it finds many applications in electronic design. The two port network parameters which are of fundamental importance in many courses on electronic devices are included in the last unit.

---

**Course Outcomes:** On successful completion of this course, students will be able to:

1. To find voltages and currents in a given network using Mesh Analysis or Node Analysis or Network Theorems.
2. To find voltages and currents in a given network by formulating network equilibrium equations from graph theory.
3. To find the transient response in a given network consisting of series or a parallel combination of resistance, capacitance and inductance.

4. To find all the parameters relating to a given series or a parallel resonant circuit.
5. To design a constant K prototype low pass, high pass, band pass or a band stop passive filter
6. To find any of the two port parameters of a given two port network.

**Contents:**

**Unit I**

**Fundamentals Of Network**

**(6 Hours)**

KCL, KVL, Source Transformation, Source Shifting, Mesh Analysis, Node Analysis, Super Mesh, Super Node, Mesh and Node Analysis in Sinusoidal Steady State Network Theorems: Superposition Theorem, Thevenin's Theorem, Norton's Theorem, Maximum Power Transfer Theorem, Reciprocity Theorem.

**Unit II**

**Application Of Graph Theory**

**(6 Hours)**

Network Graph, tree, cotree & loops, Incidence Matrix, tie set matrix, cut-set matrix, Formulation of equilibrium equations in matrix form, Solution of resistive networks, Principle of Duality

**Unit III**

**Transient Analysis**

**(6 Hours)**

Initial Conditions in networks. A procedure for evaluating initial conditions. Solution of step response in RC, RL, RLC circuits using classical method, Analogous equivalence of mechanical system.

**Unit IV**

**Resonance**

**(6 Hours)**

Resonant condition, Definition of Quality factor. Finding resonant frequency, impedance at resonance, voltage and current variation with frequency, bandwidth, selectivity, magnification factor for series and parallel resonant circuits. General case of resistance present in both branches of parallel resonant circuit. Comparison of series and parallel resonant circuits, Applications of resonant circuits

## Unit V

### Passive Filters

(6 Hours)

Filter Fundamentals, Image impedance, Characteristic impedance, Propagation constant. Constant K prototype for LPF, HPF, BPF and BSF, m-derived LPF, HPF, Terminating half sections, Composite filters

## Unit VI

### Two Port Networks

(6 Hours)

Network Functions, Two port network parameters, Z, Y, H, ABCD and other parameters, Relationships between two-port network parameters, Interconnections of two-ports, Reciprocity and Symmetry conditions

### List of Experiments:

1. To verify Thevenin's and Norton's Theorem.
2. To verify Superposition and Reciprocity Theorem.
3. To find resonant frequencies of series and parallel circuit.
4. To plot frequency response of frequency selective network (Twin T or Wein Bridge).
5. To plot frequency response & cut-off frequency of constant-k LPF and HPF.
6. To plot frequency response & cut-off frequency of constant-k BPF and BSF.
7. To find Z and Y parameters of given two port network.
8. To find H and ABCD parameters of given two port network.

### Assignments:

1. Analyze the circuit using mesh and node analysis.
2. Apply graph theory for circuit.
3. Describe any two real time applications of passive filters.
4. Simulation of series and parallel resonance circuit using Multisim.
5. Transient response of RC, RL and RLC circuit using Multisim.
6. Obtain industry exposure based on product design industry and prepare report for the same.

**Content Delivery Methods:** Chalk & talk, Power point presentation

**Assessment Methods:**

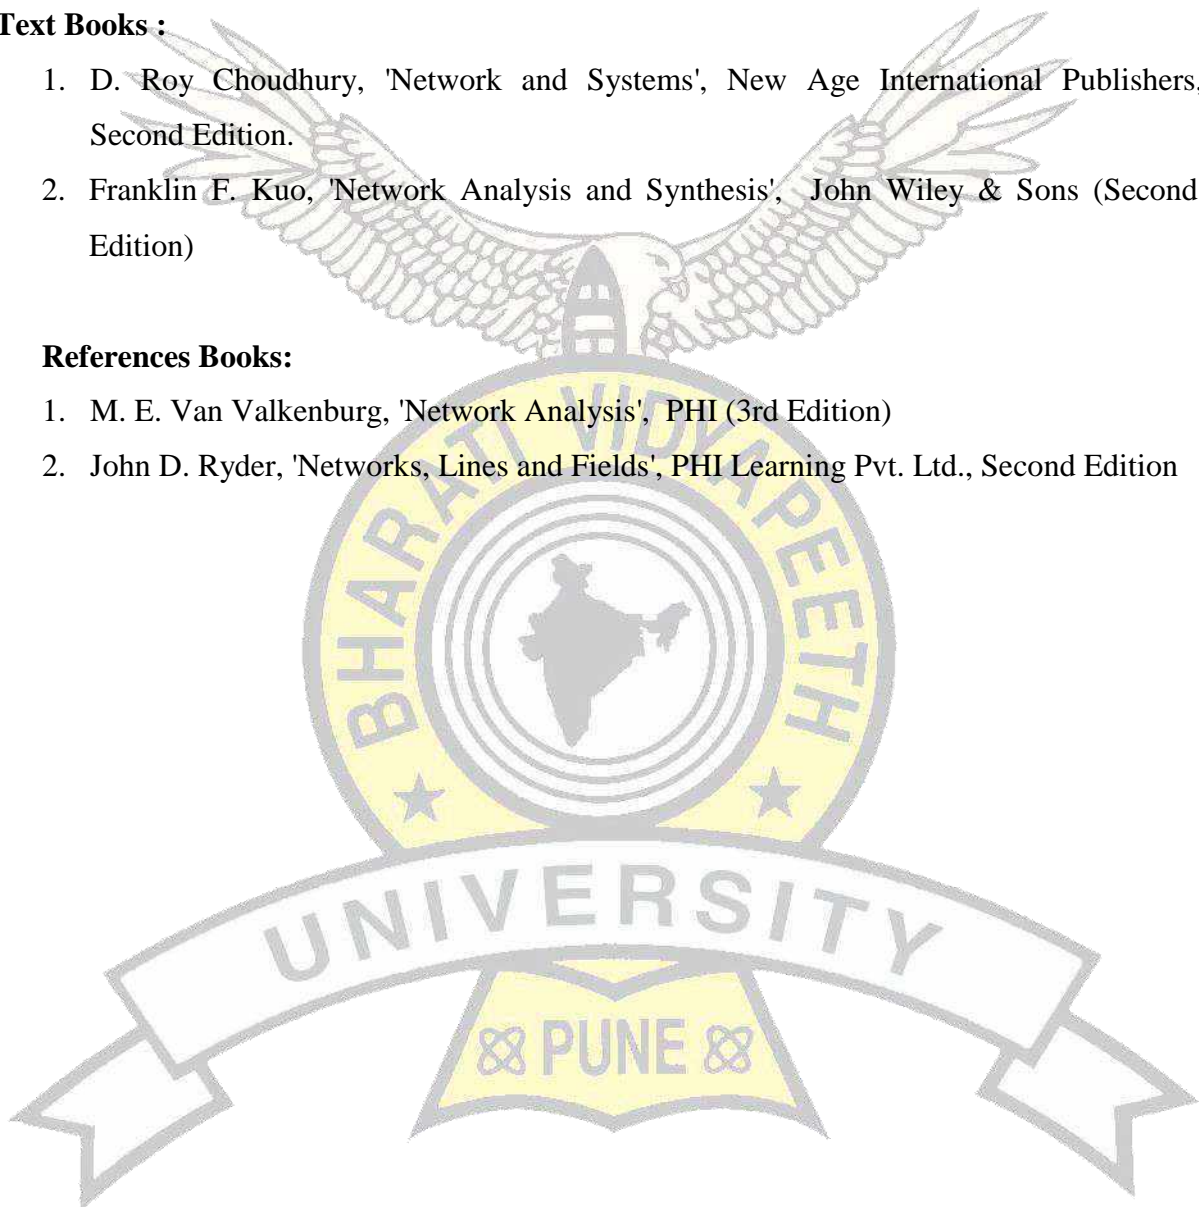

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

**Text Books :**

1. D. Roy Choudhury, 'Network and Systems', New Age International Publishers, Second Edition.
2. Franklin F. Kuo, 'Network Analysis and Synthesis', John Wiley & Sons (Second Edition)

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

**TW & Oral: 50 marks**

---

**Course prerequisites:**

- Basic knowledge of Human body parts.

---

**Course objective:**

This course provides in depth knowledge on Anatomy of Physiology of Different systems exist in Human body.

---

**Course Outcomes:** On successful completion of this course, students will be able to

1. Classify types of Bones
2. Demonstrate anatomy of various systems such as cardiovascular Respiratory, Gastrointestinal & Excretory System, various special senses & Central nervous system.
3. Demonstrate Physiology of various systems such as cardiovascular Respiratory, Gastrointestinal, Excretory System & various special senses.

**Contents:**

**Unit-I**

**General Anatomy**

**(06 hours)**

Anatomy of Cell, Tissues & bones, Types of bones of Upper and Lower extremity.

**Unit-II**

**Systemic Anatomy**

**(06 hours)**

Structure & anatomy of Cardiovascular system, Respiratory system, Gastrointestinal system, Excretory system & reproductive system.

### **Unit-III**

#### **Anatomy of Special Senses & Central nervous system (06 hours)**

Anatomy of special senses: Nose, Eye, Ear, Tongue, Skin & CNS: Cerebrum, Cerebellum, Brain Stem & Spinal Cord.

### **Unit-IV**

#### **Physiology of Cardio-respiratory System (06 hours)**

Blood: composition, blood groups, blood vessels, blood pressure, blood transfusion, blood clotting, parts of heart, conduction system, ECG, Physiology of respiration

### **Unit-V**

#### **Physiology of Gastrointestinal & Excretory System (06 hours)**

Blood, Blood Groups, Blood Transfusion, Blood Pressure, Blood Clotting Physiology of Gastrointestinal system, Excretory system: Physiology of Nephron, urine formation, Functions of Kidney, Physiology of Endocrine System

### **Unit-VI**

#### **Physiology of special Senses (06 hours)**

Physiology of Nose, Eye, Ear, Tongue & Skin.

**Content Delivery Methods:** Chalk & talk, Charts & Models

**Assessment Methods:**

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

**Text Books/ References Books:**

1. Arthur C. Guyton "Medical Physiology" Prismbook.
2. B.D. Chaurasia "General Anatomy", Third edition, CBS publication.
3. Tortora and Graabowski, "Principles of Anatomy and Physiology", Haper colin Publication

**B.Tech.(Biomedical) Sem-IV**

**Bharati Vidyapeeth Deemed University,  
College of Engineering, Pune**

**Class: B.Tech (Biomedical) Sem:- IV**

**SUBJECT: - Analog Integrated Circuits**

**Lecture: 3 hours/week**

**Practical: 2 hours/week**

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

**TW & Oral: 50 marks**

---

**Course prerequisites:**

- Knowledge of KCL and KVL Law
- Basic knowledge of Op-Amp and its configurations

---

**Course objective:**

This course provides in depth knowledge on the Op-Amp. Also it introduces the design of PLL, Waveform generators, Timer IC's and Converters.

---

**Course Outcomes:** On successful completion of this course, students will be able to

1. Design linear and nonlinear applications of Op-Amp.
2. Design of first and second order active filters.
3. Analyze and design Waveform Generators.
4. Demonstrate knowledge of Phase Locked Loop IC 565 and Converters.
5. Design of multivibrators using Timer IC 555

**Contents:**

**Unit-I**

**Fundamentals of Operational Amplifier**

**(06 hours)**

Block diagram representation of a typical op-amp, Schematic symbol for op-amp, Definition of integrated circuits, Types of Integrated Circuits, Manufacturers, Designation for IC, IC package types, PIN identification & temp ranges, Ordering information, Characteristics of an op-amp, Internal & external offset voltage compensation, Frequency Response of an op-amp.

## **Unit-II**

### **Operational Amplifier – Linear circuits**

**(06 hours)**

Inverting amplifier, Non-inverting amplifier, Voltage Follower, Adder, Subtractor, Scaling averaging amplifier, Integrator, Differentiator, Instrumentation amplifier using 1, 2 and 3 op-amps, Instrumentation amplifier using transducer bridge, Peaking amplifier

## **Unit-III**

### **Operational Amplifier - Non-linear circuits**

**(06 hours)**

Precision half wave rectifier & full wave rectifier, comparator, Schmitt trigger, window detector, log-antilog amplifier and its temperature compensation techniques, log ratio, sample and hold circuit.

## **Unit-IV**

### **Active filters and waveform generators**

**(06 hours)**

First and second order low pass Butterworth filters, first and second order high pass Butterworth filter, Band pass filter, Band reject filter, All-pass filter, notch filter, Square wave, Triangular wave, Sawtooth wave generator and study of function generator or IC 8038

## **Unit-V**

### **Special function IC's**

**(06 hours)**

IC 555- as Monostable and Astable Multivibrators and its applications.

IC 565- operating principle of Phase Locked Loop IC 565, Applications like Frequency multiplier, FSK and FM detector

## **Unit-VI**

### **Interfacing circuits**

**(06 hours)**

V to I & I to V converter, D to A converter- Binary weighted resistors and R & 2R resistors, A to D Converter- Counter-ramp type, Successive approximation and Dual Slope.

### **List of Experiments:**

1. To design and build Integrator and draw frequency response
2. To design and build Differentiator and draw frequency response
3. To design and build precision rectifier

4. To design and build schmitt trigger and find threshold levels
5. To design and build first order Butterworth low pass filter
6. To design and build first order Butterworth high pass filter
7. To design and build triangular waveform generator using IC 741
8. To design and build Function generator using IC 8038
9. To design and build Astable multivibrator using timer IC 555.

**Assignments:**

1. Find out any three ICs of op-amp other than IC 741 and compare the characteristics with IC 741.
2. List out any two linear applications of op-amp which are not specified in syllabus and explain the working along with circuit diagrams.
3. List out any two non-linear applications of op-amp which are not specified in syllabus and explain the working along with circuit diagrams.
4. Design sinusoidal generators using op-amp for a given frequency.
5. Real time applications of IC555/ IC565.
6. Obtain industry exposure based on product design and prepare report for the same.

**Content Delivery Methods:** Chalk & talk, Power point presentation

**Assessment Methods:**

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

**Text Books:**

1. Ramakant A.Gayakwad, OP-AMP and Linear ICs, Prentice Hall of India, 4<sup>th</sup> Edition, 2010.
2. K. R. Botkar, Integrated Circuits, khanna Publishers, 10<sup>th</sup> edition, 2010

**References Books:**

3. D.Roy Choudhry, Shail Jain, Linear Integrated Circuits, New Age International Pvt. Ltd., 4<sup>th</sup> edition, 2010.

**Bharati Vidyapeeth Deemed University,  
College of Engineering, Pune**

**Class: B.Tech (Biomedical) Sem:- IV**

**SUBJECT: - Electronic Circuits and applications**

**Lecture: 4 hours/week**

**Practical: 2 hours/week**

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

**TW & Practical.: 50 marks**

---

**Course prerequisites:**

- Knowledge of linear circuit theory
- Basic concept of BJT

---

**Course objective:**

1. To make student understand analysis of multistage transistor amplifier.
2. To make student understand a practical approach of design and analysis of feedback amplifiers ,power amplifiers and oscillators
3. To make student understand analysis and design of voltage regulators.
4. To make student understand the behavior of high frequency BJT amplifiers

---

**Course Outcomes:** On successful completion of this course, students will be able to

1. Analyze multistage amplifier.
2. Analyze and design feedback amplifier and power amplifier and oscillators
3. Analyze and design voltage regulators.
4. Characterize behavior of high frequency BJT amplifiers.

**Contents:**

**Unit-I**

**Multistage amplifiers**

**(08hours)**

Need of Multistage amplifiers, Parameter evaluation such as  $R_i$ ,  $R_o$ ,  $A_v$ ,  $A_i$  & Bandwidth for general multi stage amplifier, Analysis & design at low frequency & mid frequency of direct

coupled, RC coupled, transformer coupled (Two stage) amplifier, Darlington amplifier, cascode amplifier

## **Unit-II**

### **Feedback amplifiers (08 hours)**

Concept of feedback, classification of amplifiers, Negative feedback topologies with their block diagram representation, Effect of negative feedback on Input impedance, Output impedance, Gain and Bandwidth with derivation, method of analysis of feedback amplifier, analysis of all feedback topologies.

## **Unit-III**

### **Power amplifiers (08 hours)**

classification of power amplifiers - Class A, Class B, Class C, and Class AB. Operation of - Class A with resistive load; Transformer coupled class A Amplifier; Class B Push – pull amplifier ; Class B Complementary symmetry amplifier. Efficiency analysis for Class A transformer coupled amplifier and Class B push – pull amplifier, cross over distortion in power amplifiers, harmonic analysis

## **Unit-IV**

### **Oscillators (08 hours)**

Positive feedback, Barkhausen criterion, Classification of oscillators, derivation and analysis of RC oscillators, Wien bridge Oscillators, LC Oscillators for frequency of oscillation, Tuned collector oscillator, Piezo-electric effect in crystals and Crystal Oscillator

## **Unit- V**

### **Regulators (08 hours)**

Block schematic of linear regulators, Performance parameters – Load and Line regulations, Ripple rejection, Output resistance Emitter follower regulator, Transistor series regulator, shunt regulator Study and design of regulators using IC's :78XX,79XX,723,LM317, Method of boosting output current using external series pass transistor. Protection circuits – Reverse polarity protection, over circuit, fold back current limiting, over voltage protection.

## Unit-VI

### High frequency amplifiers

(08hours)

High frequency T model. Common base short circuit current frequency response, alpha cut-off frequency, CE short circuit current frequency response, high frequency hybrid  $\pi$  CE model, Amplifier response taking into account source and load resistances.

#### List of Experiments:

1. Study of CE two-stage amplifier with capacitive coupling
2. Study of Voltage series and current series feedback amplifiers
3. Study of Voltage shunt and current shunt feedback amplifiers
4. Study of Class B/AB push – pull/ Complementary Symmetry power amplifier.
5. Study of RC Oscillators - phase shift and wien bridge oscillators
6. Study of LC oscillators – Hartley, Colpitt oscillators
7. Study of Linear voltage regulators – series regulator using series pass transistor, shunt regulator using zener diode
8. Study of Fold back current limiting using IC 723

#### Assignments:

1. Analyze given feedback amplifier.
2. Describe any two real time applications of power amplifier.
3. Simulation of oscillator using Multisim.
4. Describe any two real time applications of regulator.
5. To design, built and test given electronic circuits(Group activity)
6. Obtain industry exposure based on electronic product design and prepare report for the same.

**Content Delivery Methods:** Chalk & talk, Power point presentation

#### Assessment Methods:

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

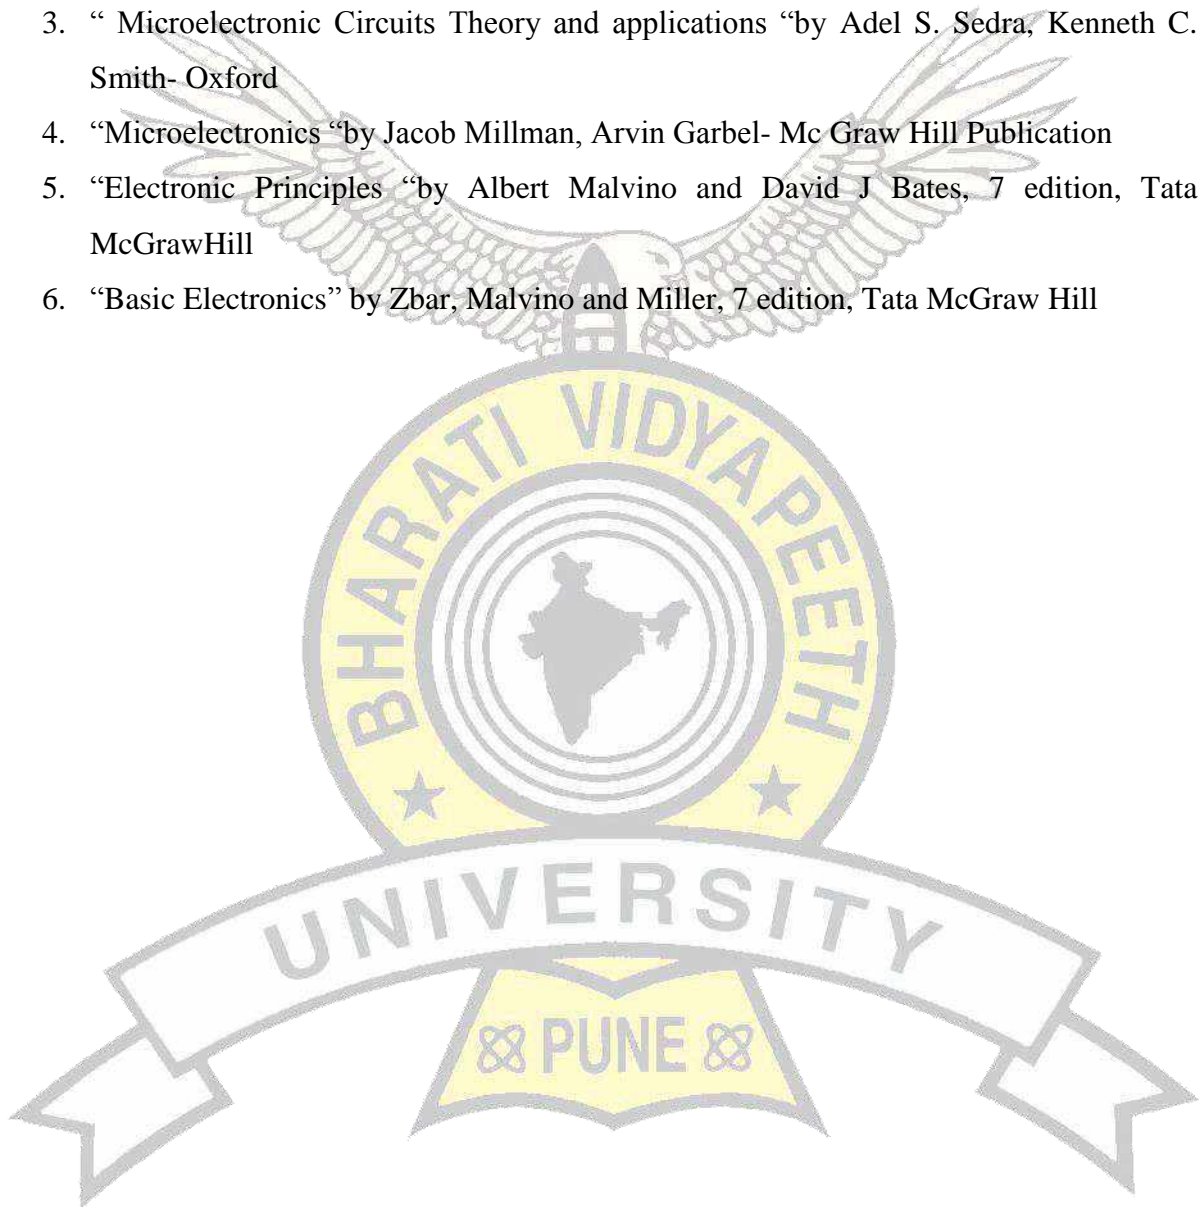

#### Text Books:

1. “Electronic devices and circuits” by S. Salivahanan, Suresh Kumar Vallavaraj, Mc Graw Hill Publication

2. "Electronic devices and circuits "by Millaman Halkies ,TMH publication
3. "Integrated Electronics", by Millman J and Halkias .C., TMH publication

**Reference Books:**

2. "Electronic Devices and Circuits "by J.B. Gupta- KATSON educational series books
3. " Microelectronic Circuits Theory and applications "by Adel S. Sedra, Kenneth C. Smith- Oxford
4. "Microelectronics "by Jacob Millman, Arvin Garbel- Mc Graw Hill Publication
5. "Electronic Principles "by Albert Malvino and David J Bates, 7 edition, Tata McGrawHill
6. "Basic Electronics" by Zbar, Malvino and Miller, 7 edition, Tata McGraw Hill

**Class: B. Tech. (Biomedical) Sem:- IV**

**SUBJECT: - Electronic Instruments and Measurement Systems**

**Lecture: 4 hours/week**

**Practical: 2 hours/week**

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

**TW & Practical: 50 marks**

---

**Course prerequisites:**

- Knowledge of process instrumentation.
- Knowledge of Integrated circuits.

---

**Course objective:**

The objective of the course is to introduce the fundamentals of Electronics Instruments and Measurement. Students learn the essential topics in Measurement systems. The course includes an in-depth understanding of oscilloscope, digital storage oscilloscope, analyzers, communication Measurements.

---

**Course Outcomes:** On successful completion of this course, students will be able to:

1. Explain the basic operation of measuring instruments.
2. Describe functioning, specifications, and applications of signal analyzing instruments.
3. Describe the basic features of oscilloscope and the internal structures of different types of oscilloscopes.

**Contents:**

**Unit-I**

**Fundamentals of Instrumentation & Measurement:**

**(08 hours)**

Necessity of Electronic Measurements, Block diagram of electronic measuring system, Concepts of Accuracy, Precision, Linearity, Sensitivity, Resolution, Hysteresis, Calibration

etc. Measurement Errors, Voltage, Current, Resistance measurement using DMM- 4 ½ & 6 ½, Auto zeroing, Auto ranging.

## **Unit-II**

### **Measuring Instruments**

**(08 hours)**

Voltage , current and impedance measurement, VTVM, TVM, DVMs, AC voltmeters true RMS meters, vector voltmeter, vector impedance meter, direct current probes, alternating current probes ,LCR-Q meter.

## **Unit-III**

### **Signal Generators & counters**

**(08 Hours)**

Sine-wave generator, standard signal generators, Frequency synthesized signal generator, swept frequency generator, random noise generator, Audio frequency signal generation, RF generator, Pulse generator (block diagram), Function generator Time, Frequency, Ratio, Time interval, Period & Multiple Period averaging using digital universal frequency counter.

## **Unit-IV**

### **Signal Analyzers & computer aided measurements:**

**(08 hours)**

Harmonic and Wave analyzer, Distortion factor meter, Spectrum analyzer -FFT analyzer, tracking generator, Logic analyzer, logic timing analyzer, logic state analyzer, FFT analyzer, Mixed signal oscilloscope, IEEE 488, VXI based instruments, Introduction of Lab view software.

## **Unit-V**

### **Communication Measurements:**

**(08 hours)**

Communication measurements, Measurements on transmitter and receiver: sensitivity, selectivity, phase jitter, S/N ratio, co-channel interference, SINAD test etc. Network analyzer- system elements, measurement accuracy, scalar network analyzer, vector network analyzer, S-parameter measurement using network analyzer.

## **Unit-VI**

### **Oscilloscopes:**

**(08 hours)**

Overview of analog CRO, dual/ Multi-trace CRO, Various CRO probes & its applications. Digital Storage Oscilloscope - Sampling speed & Memory depth of DSO, Design

considerations, Attachments to DSO for enhancing the functionality, Measurements such as FFT, Math Functions, Curve Tracer, and Power scope.

**Content Delivery Methods:** Chalk & talk, Power point presentation

**Assessment Methods:**

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

**List of Experiments:**

Any 8 assignments should be conducted from the following list.

1. Peak ,average and r.m.s. measurement using rectifier circuit.
2. Calibration of DVM for any one range: e.g. 200 V dc, 200 V ac, 200mA dc, using Standard calibrator or standard 6½DMM.
3. Measurement using spectrum analyzer and tracking generator. Observing spectrum of AM and FM waveforms for different modulation indices
4. Measurements on DSO:
  - i) FFT analysis of LF signal
  - ii) Capturing transients
  - iii) Storing and retrieving number of different signals
  - iv) Study of various operations like add, subtract, integrate, differentiate.
5. Measurement and timing analysis of digital signals using Logic Analyzer.
6. Experiment with virtual instruments using software such as Lab view.
7. Measurement of Total harmonic distortion using distortion factor meter.
8. Measurements on L-C-R Q meter.
9. Measurements with Universal counter (Frequency, Period, frequency ratio, Period Averaging and Time interval).
10. Study of characteristics of Diode, Transistors using Curve Tracer.
11. Study of Power scope.

**Text Books/ Reference Books:**

1. Oliver-Cage, “Electronic measurements and instrumentation”, TMH edition.
2. M.M.S. Anand, “Electronics instruments and instrumentation technology”, PHI.

3. Coombs, Clide F. Jr., “Electronic instrument handbook”, McGraw –Hill.
4. Car Joseph, “elements of Electronics Instrumentation and Measurement”, PHI
5. A. J. Bouwens, “Digital Instrumentation”, TATA McGraw Hill.

**Bharati Vidyapeeth Deemed University,  
College of Engineering, Pune**

**Class: B.Tech (Electronics) SEM: - III  
SUBJECT: - Digital Logic Circuits**

**Lecture: 3 Hours/Week**

**Practical: 2 Hours/Week**

**Theory: 60 marks**

**Unit Test: 20 Marks**

**Attendance: 10Marks**

**Assignments: 10Marks**

**TW & Practical: 50 Marks**

---

**Course Prerequisite:**

1. Fundamentals of Number Systems.

---

**Course Objective:**

1. To understand principles, characteristics & operations of combinational & sequential logic circuits.
2. To design combinational circuits by using logic gates, MSI circuits, PLDs.
3. To design, implement analyze, asynchronous & synchronous sequential circuits using flip flops.

---

**Course Outcomes:** On successful completion of this course, students will be able to

1. Demonstrate the knowledge of Boolean algebra including simplification techniques.
2. Describe the characteristics of Logic families TTL, CMOS, ECL & explain the fundamentals of semiconductor memories.
3. Analyze & design digital combinational circuits such as of multiplexers, Demultiplexer, encoder, decoder and arithmetic circuits.
4. Demonstrate the knowledge of operations of basic types of flip-flops, registers, counters & the design of Finite State Machine.
5. Describe the characteristics of PLDs, Semiconductor memories and their applications.

**Contents:**

## **Unit –I**

### **Number Systems, Codes & reduction techniques:**

**(6 Hours)**

Review of Binary number system: Binary addition and subtraction using 1's, 2's complement method, sign magnitude representation. BCD codes, 8421, Excess –3, Grey code, codes with more than four bits, ASCII code.

Fundamental theorems of Boolean algebra, Canonical and standard forms (SOP and POS), minimization of logic functions, Karnaugh maps up to 4 variables, Don't care conditions, Quine Mc-Cluskey method.

## **Unit-II**

### **Combinational Logic Modules and their Applications**

**(6 Hours)**

Adder, subtractor, carry look ahead adder, BCD adder, magnitude comparator, Excess-3 Adder, series and parallel adder, ALU.

Code conversion, Multiplexer, Demultiplexer, Encoder, Decoder and their applications. Parity generator and checker.

## **Unit-III**

### **Logic Families**

**(6 Hours)**

Parameter definitions - Noise margin, power dissipation, voltage and current parameters, propagation delay. Typical values for TTL, CMOS & ECL. Two input TTL NAND gate, TTL logic families standard, Totem – pole, open collector, tri-state (concept & application). TTL-CMOS/CMOS-TTL interfacing, comparison of TTL & CMOS ECL.

## **Unit-IV**

### **Sequential Logic Modules**

**(7 Hours)**

Basic sequential circuits-latches and flip-flops: SR-latch, D-latch, D flip-flop, JK flip-flop, MS J-K flip flop, T flip-flop.

Definition of state machines, Moore and Mealy machine, Design of state machines: state table, state assignment, transition/excitation table, excitation maps and equations, logic realization.

## **Unit-V**

## **Shift Registers & Counters**

**(5 Hours)**

Registers, Shift registers, Counters (ring counters, twisted ring counters), Sequence Generators, ripple counters, up/down counters, synchronous counters, lock out, Clock Skew, Clock jitter.

## **Unit-VI**

### **PLDs & Memories**

**(6 Hours)**

Study of PROM, PAL, PLAs. Designing combinational circuits using PLDs.

Classification and characteristics of memory, different types of RAMs, ROMs and their applications, Double Data Rate RAMs.

### **List of Experiments:**

1. Implementation of Boolean functions using logic gates
2. Study of characteristics of typical 74 TTL / 74 CMOS family like: fan in, fan out standard load , noise margin & interfacing with other families
3. Half, Full Adder and subtractor using gates and IC's
4. Code conversion using digital IC's
5. 1 & 2 bit digital comparator and ALU verification
6. Function implementation using Multiplexer and Demultiplexer
7. Sequence generator using MSJK flip flop IC's
8. Study of counters : Ripple , Synchronous , Ring , Johnson , Up-down counter and its application
9. Study of shift registers : Shift left , Shift right , parallel loading and Pulse Train generator
10. BCD Adder/Subtractor with Decoder driver and 7 segment display

### **Assignments:**

1. Implement a multiplexer using Virtual laboratory
2. Design example based on combinational circuit
3. Design for e.g. digital clock, digital event counter, timers, and various multi-vibrator circuits, small processor ports or scrolling display
4. Implementation of combinational logic using PLAs
5. Design a pulse train generator using shift register
6. Design example based on state machine

**Content Delivery Methods:** Chalk & talk, Power point presentation

**Assessment Methods:**

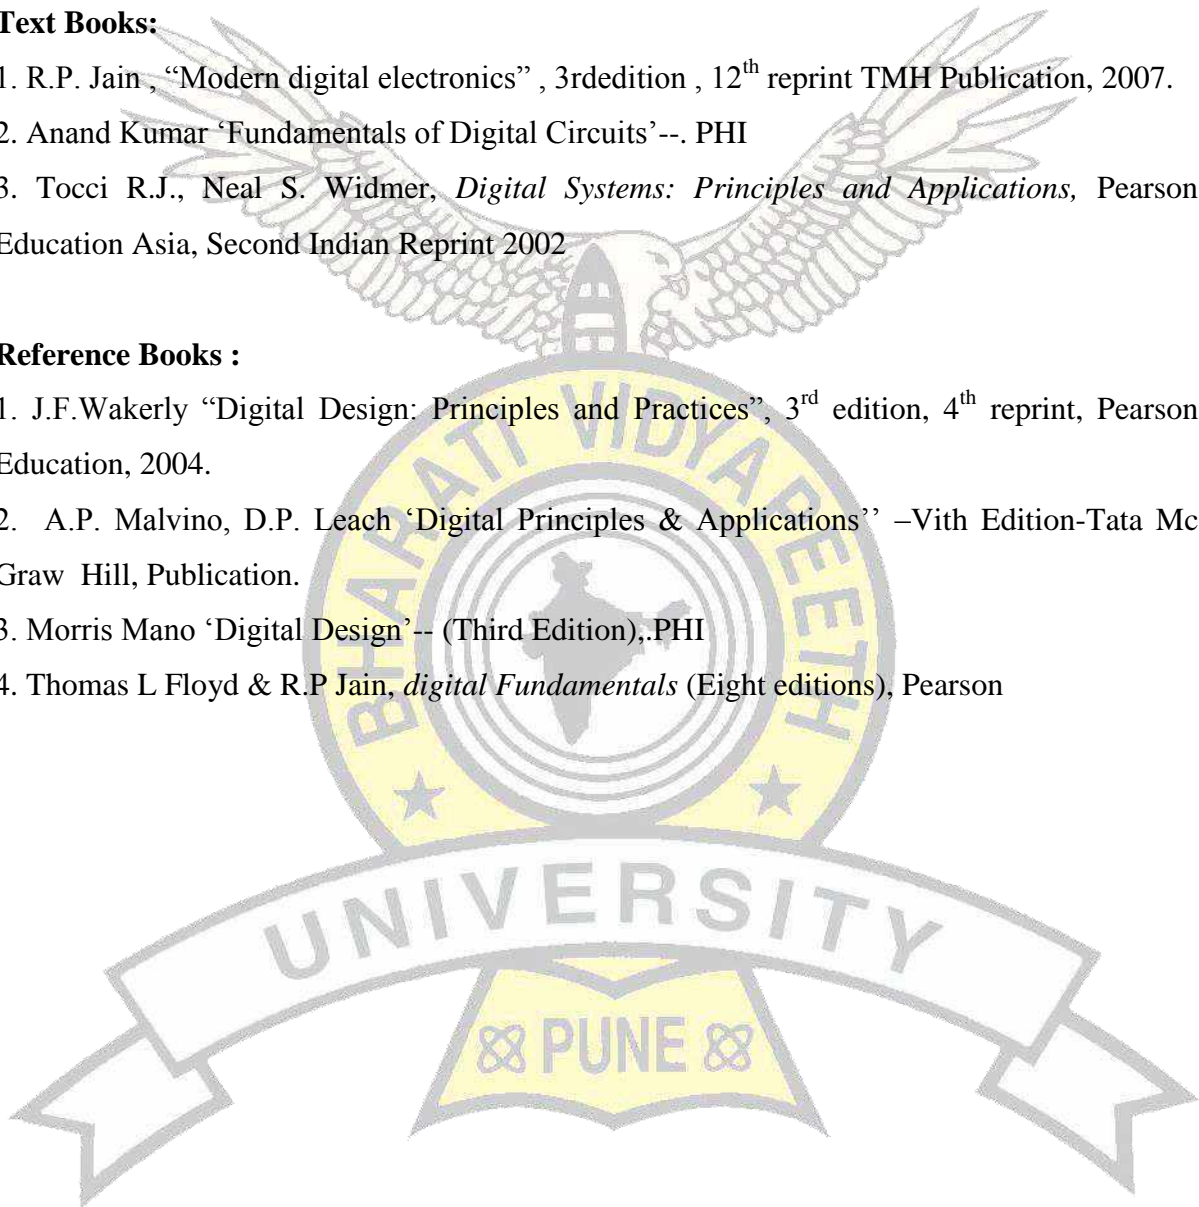

1. Continuous Assessment (Attendance, Assignments/Tutorials, Unit Test)
2. End term Examination

**Text Books:**

1. R.P. Jain , “Modern digital electronics” , 3rd edition , 12<sup>th</sup> reprint TMH Publication, 2007.
2. Anand Kumar ‘Fundamentals of Digital Circuits’--. PHI

**Bharati Vidyapeeth Deemed University,  
College of Engineering, Pune**

**Class: B.Tech (Biomedical) Sem:- IV**

**SUBJECT: - Rehabilitation Engineering**

**Lecture: 3 hours/week**

**Practical: 2 hours/week**

**Theory: 60 marks**

**Unit Test: 20marks**

**Attendance: 10 marks**

**Assignments: 10 marks**

**TW & oral: 50 marks**

---

**Course prerequisites:**

- Basic Knowledge of Bones in Upper & lower Extremity
- Basic knowledge of Joints in Upper and Lower Extremity.

---

**Course objective:**

This course provides in depth knowledge on biomechanics of all soft tissues and also about prosthetic and orthotic devices introduces for upper and lower Extremity..

---

**Course Outcomes:**

On successful completion of this course, students will be able to:

1. Demonstrate Mechanical properties of soft tissues.
2. Classify various types of Orthosis and Prosthesis.
3. Demonstrate applications of orthosis and prosthesis.
4. Design of Prosthesis for upper extremity

**Contents:**

**Unit-I**

**Tissue Biomechanics**

**(06 hours)**

General Principles of Biomechanics, Biomechanics of Soft Tissues: Stress strain behaviour, creep stability, biomechanics of Skin, biomechanics of Muscles, Biomechanics of Ligaments, biomechanics of Tendon & Bones.

## **Unit-II**

### **Movement Biomechanics**

**(06 hours)**

Gait analysis, Forces transmitted by joints, Mass motion action, joint forces results in normal & disabled person, Biomechanical analysis of human motion using instrumentation

## **Unit-III**

### **Classification of Orthosis**

**(06 hours)**

Principles in designing orthosis, Principles of Three point pressure, International conventions for providing orthosis, upper extremity orthosis, lower extremity orthosis, Recent developments

## **Unit-IV**

### **Classification of Prosthesis**

**(06 hours)**

Principles in designing prosthesis, International Conventions for Providing Prosthesis, Upper extremity prosthesis, lower Extremity Prosthesis, Recent developments.

## **Unit-V**

### **Design of upper Extremity Prosthesis**

**(06 hours)**

Introduction to Rehabilitator, Design of Artificial arms, nature of problem, general design considerations, safety & control, biomaterials used for the same.

## **Unit-VI**

### **Design of Lower Extremity prosthesis**

**(06 hours)**

Design of Artificial limb for lower Extremity ,History of lower limb Prosthesis, Amputation surgery ,recent development.

### **List of Experiments:**

- 1.study of Knee Ankle Foot Orthosis
- 2.Study of Hip Knee Ankle Foot Orthosis
- 3.Study of Below elbow Orthosis
- 4.Lamination of prosthesis
- 5.Study of Milwaukee brace

## 6.Study of Hand prosthesis and Orthosis

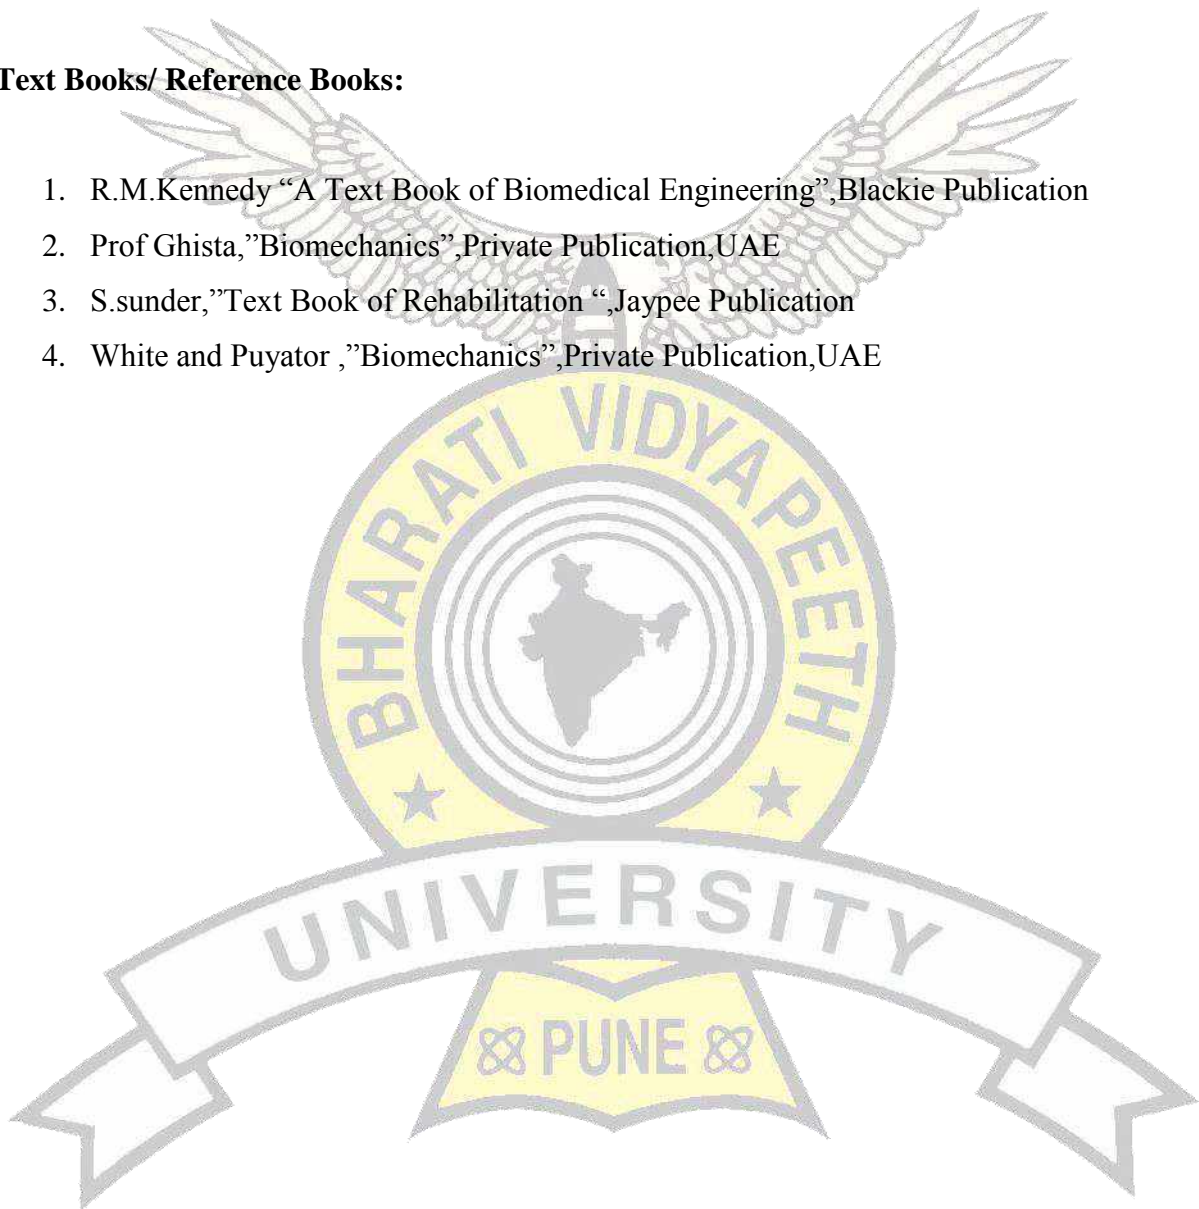

**Content Delivery Methods:** Chalk & talk, Models

**Assessment Methods:**

1. Continuous Assessment (Unit Test, Tutorials/ Assignments, Attendance)
2. End term Examination

**Text Books/ Reference Books:**

1. R.M.Kennedy “A Text Book of Biomedical Engineering”,Blackie Publication
2. Prof Ghista,”Biomechanics”,Private Publication,UAE
3. S.sunder,”Text Book of Rehabilitation “,Jaypee Publication
4. White and Puyator ,”Biomechanics”,Private Publication,UAE

**Teaching Scheme:**  
**Lectures: 3Hrs/Week**  
**Tutorials: 1Hr/Week**

**Examination scheme:**  
**Semester Examination: 60 marks**  
**Continuous Assessment: 40 marks**

**Credits Allotted:**  
**Theory : 03**  
**Tutorial : 01**

**Unit I**

**MATRICES**

Rank, Normal form, System of Linear Equations, Linear Dependence and Independence, Linear and Orthogonal Transformations. Eigen values, Eigen Vectors, Cayley – Hamilton Theorem. Application to problems in Engineering .

**(08 Hours)**

**Unit II**

**COMPLEX NUMBERS AND APPLICATIONS**

Definition, Cartesian, Polar and Exponential Forms ,Argand's Diagram, De'Moivre's theorem and its application to find roots of algebraic equations., Hyperbolic Functions, Logarithm of Complex Numbers, Separation into Real and Imaginary parts, Application to problems in Engineering.

**(08 Hours)**

**Unit III**

**DIFFERENTIAL CALCULUS**

Successive Differentiation, nth Derivatives of Standard Functions, Leibnitz's Theorem.

**EXPANSION OF FUNCTIONS**

Taylor's Series and Maclaurin's Series.

**(08 Hours)**

**Unit IV**

**DIFFERENTIAL CALCULUS**

Indeterminate Forms, L' Hospital's Rule, Evaluation of Limits.

**INFINITE SERIES**

Infinite Sequences, Infinite Series, Alternating Series, Tests for Convergence, Absolute and Conditional Convergence, Power series, Range of Convergence.

**(08 Hours)**

**Unit V**

**PARTIAL DIFFERENTIATION AND APPLICATIONS**

Partial Derivatives, Euler's Theorem on Homogeneous Functions, Implicit functions, Total Derivatives, Change of Independent Variables. Errors and Approximations.

**(08 Hours)**

**Bharati Vidyapeeth  
Deemed University, Pune**

**Unit VI**

**JACOBIAN**

Jacobians and their applications, Chain Rule, Functional Dependence.

**MAXIMA AND MINIMA**

Maxima and Minima of Functions of two variables, Lagrange's method of undetermined multipliers.

**(08 Hours)**

**Assignments**

1. Rank ,System of Linear Equations.
2. Complex Numbers.
3. Differential Calculus and Expansion of Functions.
4. Indeterminate Forms and Infinite Series.
5. Partial Derivatives, Euler's Theorem on Homogeneous Functions.
6. Jacobians, Maxima and Minima of Functions of two variables.

**Syllabus for Unit Test:**

**Unit Test I :- Unit I,II,III**

**Unit Test II :- Unit IV,V,VI**

**Bharati Vidyapeeth  
Deemed University, Pune**

**02: Fundamentals of Civil Engineering**

<b><u>TEACHING SCHEME:</u></b>		<b><u>EXAMINATION SCHEME:</u></b>		<b><u>CREDITS ALLOTTED:</u></b>	
Theory: 03 Hours / Week		End Semester Examination: 60 Marks		03 Credits	
Practical: 02 Hours / Week		Continuous Assessment: 40 Marks			
		Term Work: 25 Marks		01 Credit	
<b>Course Pre-requisites:</b>					
The Students should have					
1.	Concepts of units and conversions of units.				
2.	Basic knowledge of Chemistry				
3.	Basic knowledge of geography, concept of latitude and longitude.				
<b>Course Objectives:</b>					
	To make student understand the scope and application of Civil Engineering				
<b>Course Outcomes:</b>					
Students will be able to understand					
1.	Different building components and material				
2.	Classification of surveying				
3.	Levelling of the ground				
4.	Planning of building				
5.	Methods of irrigation and water supply				
6.	Different methods of transportation				
<b>UNIT - I</b>					
	<b>Civil Engineering Scope And Applications.</b>				<b>(06 Hours)</b>
	Civil Engineering scope, importance and applications to other				

**Bharati Vidyapeeth**  
**Deemed University, Pune**

	disciplines of Engineering; Civil Engineering construction process and role of Civil engineer; Government authorities related to Civil Engineering; Types of structures based on loading , material and configuration; Building components and their functions; Civil Engineering materials: concrete, construction steel, bricks, flooring material and tiles, paints, plywood , glass and aluminum.	
<b>UNIT - II</b>	<b>Surveying</b>	<b>(06 Hours)</b>
	Objectives, Principles and Classification of Surveying; Linear, angular, Vertical and area Measurements and related instruments.	
<b>UNIT - III</b>	<b>Building Planning And Bye Laws</b>	<b>(06 Hours)</b>
	Site selection for residential building; Principles of building planning; Building bye laws- necessity, Floor Space Index, Heights , open space requirements, set back distance , ventilation and lighting, concept of carpet and built up area, minimum areas and sizes for residential buildings ; Concept of Eco friendly structures and Intelligent buildings.	
<b>UNIT - IV</b>	<b>Foundations and Earthquakes</b>	<b>(06 Hours)</b>
	Function of foundation, concept of bearing capacity and its estimation, types of foundation and its suitability, causes of failure of foundation.  Earthquakes causes, effects and guidelines for earthquake resistant design, earthquake zones.	
<b>UNIT - V</b>	<b>Irrigation And Water Supply</b>	<b>(06 Hours)</b>
	Rainfall measurement and its use in design of dams; Types of dams, canals, methods of irrigation and their merits and demerits; hydropower structures ;Water supply, drinking water requirements and its quality, water and sewage treatment flow chart.	
<b>UNIT - VI</b>	<b>Infrastructure</b>	<b>(06 Hours)</b>
	Roads- types of roads and their suitability, cross section of roads, meaning of terms ; width of roads, super elevation, camber, gradient ,sight distance, materials used for construction of roads.  Railways- Types of gauges, section of railway track, components of	

**Bharati Vidyapeeth  
Deemed University, Pune**

	<p>railway track, advantages.</p> <p>Bridges: Components - Foundation, Piers, Bearings, Deck.</p> <p>Airways- Components -Runway, Taxiway and Hangers.</p>	
<b>Term Work:</b>		
( Term work shall consist of any eight exercises from the list given below.)		
1.	Study and use of prismatic compass and measurement of bearings.	
2.	Study and use of Dumpy level and reduction of levels by collimation plane method.	
3.	Area measurement by Digital Planimeter.	
4.	Drawing plan and elevation of a residential bungalow.	
5.	Study of features of topographical maps.	
6.	Assignment on collection of information on Civil Engineering materials.	
7.	Assignment on types of foundations.	
8.	Assignment problem on irrigation and hydropower structures.	
9.	Assignment on study of flow chart of water and sewage treatment.	
10.	Assignments on types of transportation systems.	
<b>Text Books:</b>		
1.	“ Surveying- Vol I “ - S.K. Duggal , Tata McGraw Hill Publication.	
2.	“Built Environment” – Shah , Kale, Patki, , Tata McGraw Hill Publication	
3.	“Building Construction” – Dr. B.C. Punmia , Laxmi Publication	
4.	“Irrigation and water Power Engineering “- Dr. P.N. Modi,Standard Publishers ,New Delhi	
5.	“Text book of Transportation Engineering “- Arora, Charotar Publishers.	
6.	Water supply and sanitary engineering-Rangawala, Charotar Publishers.	
7.	“Basic Civil engineering”- M.S. Palanichamy- Tata McGraw Hill Publication	

**Bharati Vidyapeeth  
Deemed University, Pune**

<b>Reference Books:</b>	
1.	“Surveying –Theory and Practice”-James Anderson- Tata McGraw Hill Publication
<b>Syllabus for Unit Test:</b>	
Unit Test -1	Unit I to III
Unit Test -2	Unit IV to VI

**Bharati Vidyapeeth**  
**Deemed University, Pune**  
**ENGINEERING GRAPHICS**

Teaching Scheme:	Examination Scheme:	Credits Allotted
Theory: -04 Hours / Week	End Semester Examination: - 60Marks	<u>05</u>
Practical: 02 Hours / Week	Continuous Assessment: -40Marks	
	Term Work: 25 Marks	

Unit I	<p><b>Lines and Dimensioning in Engineering Drawing</b></p> <p>Different types of lines used in drawing practice, Dimensioning – linear, angular, aligned system, unidirectional system, parallel dimensioning, chain dimensioning, location dimension and size dimension.</p> <p><b>Curves used in Engineering Practice</b></p> <p>Ellipse by Directrix-Focus method, Arcs of Circle method, Concentric circle method and Oblong method. Involute of a circle, Cycloid, Archimedean Spiral, Helix on cone, Loci of points- Slider Crank mechanisms.</p>	(6)
Unit II	<p><b>Orthographic Projection</b></p> <p>Basic principles of orthographic projection (First and Third angle method). Orthographic projection of objects by first angle projection method only. Procedure for preparing scaled drawing, sectional views and types of cutting planes and their representation, hatching of sections.</p>	(6)
Unit III	<p><b>Isometric Projections</b></p> <p>Isometric view, Isometric scale to draw Isometric projection, Non-Isometric lines, and construction of Isometric view from given orthographic views and to construct Isometric view of a Pyramid, Cone, and Sphere.</p>	(6)
Unit IV	<p><b>Projections of Points and Lines and planes</b></p> <p>Projections of points, projections of lines, lines inclined to one reference plane, Lines inclined to both reference planes. (Lines in First Quadrant Only) Traces of lines, Projections of Planes, Angle between two planes, Distance of a point from a given plane, Inclination of the plane with HP, VP</p>	(6)
Unit V	<p><b>Projection of Solids</b></p> <p>Projection of prism, pyramid, cone and cylinder by rotation method.</p>	(6)

**Bharati Vidyapeeth  
Deemed University, Pune**

Unit VI	<b>Section of Solids</b>  Types of section planes, projections of solids cut by different sections of prism, pyramid, cone and cylinder.	(6)
---------	--	-----

**Term work**

Term work shall consist of five half-imperial size or A2 size (594 mm x 420 mm) sheets.  
Assignment 05 Problems on each unit in A3 size Drawing Book

**SHEETS**

1. Types of lines, Dimensioning practice, Free hand lettering, 1st and 3rd angle methods symbol.
2. Curves and loci of points
3. Projections of Points and Lines and planes
4. Orthographic Projections
5. Isometric views
6. Projection of Solids

**Text Books**

1. "Elementary Engineering Drawing", N.D. Bhatt, Charotar Publishing house, Anand India,
2. "Text Book on Engineering Drawing", K.L.Narayana & P.Kannaiah, Scitech Publications, Chennai.
3. "Fundamentals of Engineering Drawing", Warren J. Luzzader, Prentice Hall of India, New Delhi ,
4. "Engineering Drawing and Graphics", Venugopal K., New Age International Publishers.
5. M. B. Shah and B. C. Rana, "Engineering Drawing", 1st Ed, Pearson Education, 2005
6. P. S. Gill, "Engineering Drawing (Geometrical Drawing)", 10 Edition, S. K. Kataria and Sons, 2005
7. P. J. Shah, "Engineering Drawing", C. Jamnadas and Co., 1 Edition, 1988

**Bharati Vidyapeeth**  
**Deemed University, Pune**  
**ENGINEERING PHYSICS**

<b>Teaching Scheme:</b>	<b>Examination scheme:</b>	<b>Credits Allotted:</b>
<b>Lectures: 4Hrs/Week</b>	<b>End Semester Examination: 60 marks</b>	<b>Theory: 04</b>
<b>Practical: 2Hr/Week</b>	<b>Continuous Assessment: 40 marks</b>	<b>Practical: 01</b>
	<b>Term Work: 25marks</b>	

**UNIT – I**

**MODERN PHYSICS**

Motion of a charged particle in electric and magnetic fields, Electrostatic and Magnetostatic focussing, Wavelength and resolution, Specimen limitation, Depth of field and focus, Electron microscope, Positive rays, Separation of isotopes by Bainbridge mass spectrograph.

**NUCLEAR PHYSICS**

Nuclear fission, Liquid drop model of nucleus, Nuclear fission in natural uranium, Fission energy, Critical mass and size, Reproduction factor, Chain reaction and four factor formula, Nuclear fuel and power reactor, Nuclear fusion and thermonuclear reactions, Merits and demerits of nuclear energy, Particle accelerators, Cyclotron, Betatron,

**(08hours)**

**UNIT – II**

**SOLID STATE PHYSICS**

Band theory of solids, Free electron theory, Fermi-Dirac probability function and position of Fermi level in intrinsic semi-conductors (with derivation) and in extrinsic semi-conductors, Band structure of p-n junction diode under forward and reverse biasing, Conductivity in conductor and semi-conductor, Hall effect and Hall coefficient, Photovoltaic effect, Solar cell and its characteristics.

**SUPERCONDUCTIVITY**

Introduction, Properties of a super conductor, Meissner's effect, Critical field, Types of superconductors, BCS theory, High temperature superconductors, Application of superconductors.

**(08hours)**

**Bharati Vidyapeeth  
Deemed University, Pune**

**UNIT – III**

**THERMODYNAMICS**

Zeroth law of thermodynamics, first law of thermodynamics, determination of  $J$  by Joule's method, Applications of first law, heat engines, Carnot's cycle and Carnot's engine, second law of thermodynamics, entropy, change in entropy in reversible and irreversible processes, third law of thermodynamics.

**NANOSCIENCE**

Introductions of nanoparticles, properties of nanoparticles (Optical, electrical, Magnetic, structural, mechanical), synthesis of nanoparticles (Physical and chemical), synthesis of colloids, growth of nanoparticles, synthesis of nanoparticles by colloidal route, applications.

**(08 hours)**

**UNIT-IV**

**OPTICS - I**

**INTERFERENCE**

Interference of waves, Visibility of fringes, interference due to thin film of uniform and non-uniform thickness, Newton's rings, Engineering applications of interference (optical flatness, interference filter, non-reflecting coatings, multi-layer ARC).

**DIFFRACTION**

Classes of diffraction, Diffraction at a single slit (Geometrical method), Conditions for maximum and minimum, Diffraction at a circular aperture (Result only), Plane diffraction grating, Conditions for principal maxima and minima, Rayleigh's criterion for resolution, Resolving power of grating and telescope.

**(08 hours)**

**UNIT-V**

**OPTICS - II**

**POLARISATION**

Introduction, Double refraction and Huygen's theory, Positive and negative crystals, Nicol prism, Dichroism, Polaroids, Elliptical and circular polarisation, Quarter and half wave plates, Production of polarised light, Analysis of polarised light, half shade polarimeter, LCD.

**LASERS**

Spontaneous and stimulated emission, Population inversion, Ruby laser, Helium-Neon laser, Semiconductor laser, Properties of lasers, Applications of lasers (Engineering/ industry, medicine, communication, Computers), Holography.

**(08 Hours)**

**Bharati Vidyapeeth  
Deemed University, Pune**

**UNIT-VI**

**ARCHITECTURAL ACOUSTICS**

Elementary acoustics, Limits of audibility, Reverberation and reverberation time, Sabine's formula, Intensity level, Sound intensity level, Sound absorption, Sound absorption coefficient, different types of noise and their remedies, Sound absorption materials, basic requirement for acoustically good hall, factors affecting the architectural acoustics and their remedies.

**QUANTUM MECHANICS**

Electron diffraction, Davisson and Germer's experiment, Wave nature of matter, De-Broglie waves, Wavelength of matter waves, Physical significance of wave function, Schrodinger's time dependant and time independent wave equation, Application of Schrodinger's time independent wave equation to the problems of Particle in a rigid box and non rigid box.

**(08hours)**

**TERM WORK**

**Experiments**

Any ten experiments from the following:

1. Determination of band gap of semi-conductor.
2. Solar cell characteristics.
3. e/m by Thomson's method.
4. Uses of CRO for measurement of phase difference and Lissajos figures.
5. Hall effect and Hall coefficient.
6. Conductivity by four probe method.
7. Diode characteristics (Zener diode, Photo diode, LED, Ge/Si diode).
8. Plank's constant by photodiode.
9. Wavelength by diffraction grating.
10. Newton's rings.
11. Ultrasonic interferometer.
12. Sound intensity level measurement.
13. Wavelength of laser by diffraction.
14. Determination of refractive index for O-ray and E-ray.
15. Brewester's law.

**Assignments**

1. Recent advances in Nanotechnology
2. Nuclear radiation detectors.
3. Atomic force microscope (AFM).
4. Advanced opto-electronic devices.

**Bharati Vidyapeeth**  
**Deemed University, Pune**

5. Laser in Industry.
6. Different spectroscopic methods – a comparison (Raman, IR, UVR, etc.).

**Unit Tests:**

Unit Test I : Unit I, II, III

Unit Test II: Unit IV, V, VI

**Reference Books:**

1. Physics for Engineers – Srinivasan M.R.
2. A text Book of Engineering Physics- M.N. Avadhanulu, P.G. Kshirsagar
3. Engineering Physics- K. Rajagopal
4. Electronics Principles – A.P.Molvino
5. Fundamentals of Optics – Jenkins and White
6. A Textbook of Sound – Wood
7. Engineering Physics – Sen, Gaur and Gupta

**Bharati Vidyapeeth**

**Chemical Engineering Materials**

<b>Teaching Scheme</b>		<b>Examination Scheme</b>		<b>Credits</b>
<b>Lectures</b>	<b>: 3Hrs/week</b>	<b>End semester examination:60 Marks</b>		<b>3</b>
<b>Tutorials</b>	<b>: 1 Hr/week</b>	<b>Continuous assessment</b>	<b>: 40 Marks</b>	
		<b>Term work</b>	<b>: 25 Marks</b>	<b>1</b>
		<b>Total</b>	<b>: 125Marks</b>	<b>4</b>

---

**Course Pre-requisite:** Basic understanding of chemistry of bonds

**Course Objectives:** To get knowledge of selection of material for process industry

**Course outcome:** Understand material properties, metal and their alloys, polymers, plastics, paints, coatings adhesives, ceramic, cement, glass, material failures and prevention measures.

---

**Unit –I** **(06 Hours)**

**Introduction**

Materials and criteria for selection of material in process industries. Material properties: Mechanical, thermal, chemical, electrical, magnetic and technological properties, modification and control of material properties.

**Unit- II** **(06 Hours)**

**Metal and their alloys**

- A. Ferrous materials: Pure iron, cast iron, mild steel, stainless steels, special alloy steels-iron and iron carbide, phase diagram-heat treatment of plain-carbon steels.
- B. Nonferrous materials: Lead, Tin, aluminium, zinc, nickel, copper, Magnesium and their alloys. Properties and applications in process industries.

**Unit –III** **(06 Hours)**

**Hydrocarbon materials**

**Natural & synthetic polymeric materials**

Selection of polymeric materials for equipment linings, fiber reinforced plastic, application of special polymers like Nylon 66, Teflon in engineering. Polymer Composites and blends.

**Bharati Vidyapeeth  
Deemed University, Pune**

**Paints, coatings and adhesives**

**Unit-IV**

**(06 Hours)**

**Ceramic, glasses and cement**

Definition of ceramics and glasses; interaction between structure, processing, and properties; Applications of ceramic and glass materials; Crystalline and non-crystalline ceramics, silicates, refractories, clays, glass, vitreous silica, and borosilicate

Cement and its properties- special cements, cement concrete, RCC- Pre stressed concrete.

**Unit- V**

**(06 Hours)**

**Material failure analysis**

**Thermal and mechanical failures:** Creep, stress, crystal structure and defects.

**Chemical failure:** acid base environment, water, Corrosion: Corrosion attack methods, Different types of corrosion: chemical, biochemical, and electrochemical; Internal and external factors affecting corrosion of chemical equipments; corrosion charts for process equipments.

**Unit-VI**

**(06 Hours)**

**Material failure prevention**

Property enhancement by electroplating, glass and ceramic linings, polymer lining, paints, coatings, alloy preparation, composite and blend formation.

**Unit tests** would follow as:

- |             |   |                   |
|-------------|---|-------------------|
| Unit test 1 | : | Unit 1 and unit 2 |
| Unit test 2 | : | Unit 3 and unit 4 |
| Unit test 3 | : | Unit 5 and unit 6 |

**Term work** includes assignments on

1. Basic criteria for material selection, material properties
2. Ferrous and non-ferrous material recent advanced material of actual application in industry
3. Polymeric advanced material presently applied in industry
4. Cement, ceramic and glass variety to be used in industry
5. Industrial example with analysis of thermal, mechanical and chemical failure.
6. Industrially applied case studies for prevention of material prevention

**Bharati Vidyapeeth  
Deemed University, Pune**

**Text Books**

1. Kodgire V. D. "Material Science and Metallurgy for Engineers", Everest publication India
2. Gowarikar V. R., Vishwanath N V, JaydevShreedhar, "Polymer science", New age International publication, India

**References books**

1. Budinsky K G and Budinsky K M "Engineering materials- Properties and Selection", Prentice Hall of India.
2. Henry R Clauser, "Industrial and Engineering materials", McGraw Hill Book Co.
3. James F. Shackelford, Introduction to Material Science, Mc-Millan Publishing Company, New-York.
4. D.Z. Jestrzebaski, Properties of Engineering Materials, 3<sup>rd</sup> Ed. Toppers. Co. Ltd.
5. J.L. Lee and Evans, Selecting Engineering Materials for Chemical and Process Plants, Business Works.

**Bharati Vidyapeeth  
Deemed University, Pune  
Workshop Technology**

**TEACHING SCHEME:**

Theory: -

Practical: 02 Hours / Week

**EXAMINATION SCHEME:**

End Semester Examination: -

Continuous Assessment: -

Term Work: 50 Marks

**CREDITS ALLOTTED:**

01 Credit

**Course Pre-requisites:** Basic knowledge of hand tools used in day to day life.

**Course Objectives:** Make the students familiar with basic manufacturing processes

**Course Outcomes:** students should be able to understand

1. basic Manufacturing Processes used in the industry,
2. importance of safety

**Term work shall consist of any three jobs, demonstrations on rest of the trades and journal consisting of six assignments one on each of the following topics.**

**Carpentry- Introduction** to wood working, kinds of woods, hand tools & machines, Types of joints, wood turning. Pattern making, types of patterns, contraction, draft & machining allowances

Term work includes one job involving joint and woodturning.

**Fitting-** Types of Fits, concepts of interchangeability, datum selection, location layout, marking, cutting, shearing, chipping, sizing of metals, drilling and tapping.

Term work to include one job involving fitting to size, male-female fitting with drilling and tapping.

**Sheet Metal Practice** Introduction to primary technology processes involving bending, punching and drawing various sheet metal joints, development of joints.

**Bharati Vidyapeeth  
Deemed University, Pune**

**Joining-** Includes making temporary and permanent joints between similar and dissimilar material by processes of chemical bonding, mechanical fasteners and fusion technologies.

Term work includes one job involving various joining processes like riveting, joining of plastics, welding, brazing, etc.

**Forging** -Hot working, cold working processes, forging materials, hand tools & appliances, Hand forging, Power Forging.

**Moulding** -Principles of moulding, methods, core & core boxes, preparation of foundry sand, casting, Plastic moulding.

**Plumbing (Demonstration Common for Electrical & Non electrical Group)**

Types of pipe joints, threading dies, Pipe fittings.

**Bharati Vidyapeeth**  
**Deemed University, Pune**  
**ENGINEERING MATHEMATICS-II**

**Teaching Scheme:**  
**Lectures: 3Hrs/Week**  
**Tutorials: 1Hr/Week**

**Examination scheme:**  
**End Semester Examination: 60 marks**  
**Continuous Assessment: 40 marks**

**Credits Allotted:**  
**Theory : 03**  
**Tutorial : 01**

**Unit I**

**DIFFERENTIAL EQUATIONS (DE)**

Definition, Order and Degree of DE, Formation of DE. Solutions of Variable Separable DE, Exact DE, Linear DE and reducible to these types.

**(08 Hours)**

**Unit II**

**APPLICATIONS OF DIFFERENTIAL EQUATIONS**

Applications of DE to Orthogonal Trajectories, Newton's Law of Cooling, Kirchoff's Law of Electrical Circuits, Motion under Gravity, Rectilinear Motion, Simple Harmonic Motion, One-Dimensional Conduction of Heat, Chemical engineering problems.

**(08 Hours)**

**Unit III**

**FOURIER SERIES**

Definition, Dirichlet's conditions, Fourier Series and Half Range Fourier Series, Harmonic Analysis.

**INTEGRAL CALCULUS**

Reduction formulae, Beta and Gamma functions.

**(08 Hours)**

**Unit IV**

**INTEGRAL CALCULUS**

Differentiation Under the Integral Sign, Error functions.

**CURVE TRACING**

Tracing of Curves, Cartesian, Polar and Parametric Curves. Rectification of Curves.

**(08 Hours)**

**Unit V**

**SOLID GEOMETRY**

Cartesian, Spherical Polar and Cylindrical Coordinate Systems. Sphere, Cone and Cylinder.

**(08 Hours)**

**Bharati Vidyapeeth  
Deemed University, Pune**

**Unit VI**

**MULTIPLE INTEGRALS AND THEIR APPLICATIONS**

Double and Triple integrations, Applications to Area, Volume, Mean and Root Mean Square Values.

**(08 Hours)**

**Assignments**

1. Differential Equations.
2. Application of DE.
3. Fourier Series and Integral Calculus.
4. DUIS and Curve Tracing.
5. Solid Geometry.
6. Double and Triple integrations, area and volume.

Teaching Scheme:	Examination Scheme:	Credits Allotted
Theory: -03Hours / Week	End Semester Examination: -60Marks	<u>04</u>
Practical: 02 Hours / Week	Continuous Assessment: -40Marks	
	Term Work: 25 Marks	

UNIT-I	<p><b>Thermodynamics-</b></p> <p>Heat, work and Internal Energy, Thermodynamic State, Process, Cycle, Thermodynamic System, First Law of Thermodynamics, Application of First Law to steady Flow and Non Flow processes, Limitations of First Law, PMM of first kind (Numerical Treatment), Second Law of Thermodynamics – Statements, Carnot Engine and Carnot Refrigerator, PMM of Second Kind (Elementary treatment only)</p>	(08)
UNIT-II	<p><b>Introduction to I.C. Engines and turbines-</b></p> <p>Two stroke, Four Stroke Cycles, Construction and Working of C.I. and S.I. Engines,</p> <p>Hydraulic turbines, steam turbines, gas turbines.(Theoretical study using schematic diagrams)</p> <p><b>Introduction to refrigeration, compressors &amp; pumps-</b></p> <p>Vapor compression and vapor absorption system, house hold refrigerator, window air conditioner. Reciprocating and rotary compressor, Reciprocating and centrifugal pump. (Theoretical study using schematic diagrams)</p>	(08)
UNIT-III	<p><b>Energy Sources -</b></p> <p>Renewable and nonrenewable, solar flat plate collector, Wind, Geothermal, Wave, Tidal, Hydro power, Bio-gas, Bio-Diesel, Nuclear power.</p> <p><b>Heat transfer-</b></p> <p>Statement and explanation of Fourier’s law of heat conduction, Newton’s law of cooling, Stefan Boltzmann’s law. Conducting and insulating</p>	(08)

**Bharati Vidyapeeth**  
**Deemed University, Pune**

	materials and their properties, types of heat exchangers and their applications.	
UNIT-IV	<p><b>Properties of fluids-</b></p> <p>Introduction, Units of measurements, mass density, specific weight, specific volume and relative density, viscosity, pressure, compressibility and elasticity, gas laws, vapor pressure, surface tension and capillarity, regimes in fluid mechanics, fluid properties and analysis of fluid flow.</p> <p><b>Properties of Materials and their Applications-</b></p> <p>Metals – Ferrous and Non-Ferrous, Nonmetallic materials, smart materials, Material selection criteria.</p>	(08)
UNIT-V	<p><b>Mechanical devices -</b></p> <p>Types of Belts and belt drives, Chain drive, Types of gears, Types of Couplings, friction clutch (cone and plate), brakes, Power transmission shafts, axles, keys, bush and ball bearings.</p> <p><b>Mechanisms-</b></p> <p>Slider crank mechanism, Four bar chain mechanism, List of various inversions of Four bar chain mechanism, Geneva mechanism, Ratchet and Paul mechanism</p>	(08)
UNIT-VI	<p><b>Machine Tools-</b></p> <p>Lathe Machine – Centre Lathe, Drilling Machine – Study of Pillar drilling machine, Introduction to NC and CNC machines, Grinding machine, Power saw, Milling Machine.</p> <p><b>Introduction to manufacturing processes and Their Applications-</b></p> <p>Casting, Sheet metal forming, Sheet metal cutting, Forging, Fabrication, Metal joining processes.</p>	(08)

**List of experiments-**

The Term Work shall consist of **any Eight** experiments of following list

1	Measurement of viscosity using Redwood viscometer.
2	Assembly and working of 4-bar, 6-bar, 8-bar planer mechanisms
3	Finding relation between input angle and output angle for various link lengths.

**Bharati Vidyapeeth  
Deemed University, Pune**

4	Study of domestic refrigerator & window air-conditioner
5	Demonstration of operations of centre lathe
6	Demonstration of operations on drilling machines
7	Demonstration of Two stroke and four stroke engine
8	Study of power transmitting elements: Coupling, Gears and bearings
9	Demonstration of pumps and compressor
10	Study and demonstration of different types of clutches.

<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks	01 Credit

**Course Pre-requisites:**

The Students should have knowledge of

- |    |   |
|----|---|
| 1. | Scalar and Vector   |
| 2. | Newton's law of motion  |
| 3. | Law of friction   |
| 4. | Concept of physical quantities, their units and conversion of units |
| 5. | Concept of differentiation and integration                          |

**Course Objectives:**

To develop and apply the concept of resultant and equilibrium for various static and dynamic engineering problems.

**Course Outcomes:**

**The student should be able to**

- |    |  |
|----|--|
| 1. | calculate resultant and apply conditions of equilibrium.                                       |
| 2. | analyze the truss and calculate friction force.  |
| 3. | calculate centroid and moment of inertia.  |
| 4. | solve problem on rectilinear motion.   |
| 5. | solve problems on curvilinear motion.  |
| 6. | use D'Alembert's principle, Work Energy principle and Impulse Momentum principle for particle. |

**Bharati Vidyapeeth**  
**Deemed University, Pune**

<b>UNIT - I</b>	<b>Resultant and Equilibrium</b>	<b>(06 Hours)</b>
	Types and Resolution of forces, Moment and Couple, Free Body Diagram, Types of Supports, Classification and Resultant of a force system in a Plane - Analytical and Graphical approach..  Equilibrant, Conditions of Equilibrium, Equilibrium of a force system in a Plane, Force and Couple system about a point.	
<b>UNIT - II</b>	<b>Truss and Friction</b>	<b>(06 Hours)</b>
	Coefficient of Static Friction, Impending motion of Blocks, Ladders and Belts.  Analysis of Perfect Trusses - Method of Joint, Method of Section and Graphical Method.	
<b>UNIT - III</b>	<b>Centroid and Moment of Inertia</b>	<b>(06 Hours)</b>
	Centroid of line and plane areas, Moment of Inertia of plane areas, parallel and perpendicular axis theorem, radius of gyration, least moment of inertia.	
<b>UNIT - IV</b>	<b>Kinematics of Rectilinear motion of a Particle</b>	<b>(06 Hours)</b>
	Equations of motion, Constant and variable acceleration, Motion Curves, Relative motion, Dependent motion.	
<b>UNIT - V</b>	<b>Kinematics of Curvilinear motion of a Particle</b>	<b>(06 Hours)</b>
	Motion of a Projectile, Cartesian components, Normal and Tangential components of a curvilinear motion.	
<b>UNIT - VI</b>	<b>Kinetics of a Particle</b>	<b>(06 Hours)</b>
	D'Alemberts Principle, Work-Energy Principle and Impulse-Momentum Principle, Coefficient of Restitution, Direct Central Impact.	

**Term Work:**

**A)** The term-work shall consist of minimum **Five** experiments from list below.

1. Determination of reactions of Simple and Compound beam.
2. Study of equilibrium of concurrent force system in a plane.
3. Determination of coefficient of friction for Flat Belt.
4. Determination of coefficient of friction for Rope.
5. Study of Curvilinear motion.
6. Determination of Coefficient of Restitution.

**Bharati Vidyapeeth**  
**Deemed University, Pune**

B) The term-work shall also consist of minimum **Five** graphical solutions of the problems on different topics.

**Text Books:**

1) "Engineering Mechanics (Statics and Dynamics)", Hibbeler R.C., McMillan Publication.

2) "Vector Mechanics for Engineers-Vol.-I and Vol.-II (Statics and Dynamics)", Beer F.P. and Johnston E.R., Tata McGraw Hill Publication.

3) "Engineering Mechanics", Bhavikatti S.S. and Rajashekarappa K.G., New Age International (P) Ltd.

**Reference Books:**

1. "Engineering Mechanics (Statics and Dynamics)", Shames I.H., Prentice Hall of India (P) Ltd.

2. "Engineering Mechanics (Statics and Dynamics)", Singer F.L., Harper and Row Publication.

3. "Engineering Mechanics (Statics and Dynamics)", Meriam J.L. and Kraige L.G., John Wiley and Sons Publication.

4. "Engineering Mechanics (Statics and Dynamics)", Timoshenko S.P. and Young D.H., McGraw Hill Publication.

5. "Engineering Mechanics (Statics and Dynamics)", Tayal A.K., Umesh Publication.

6. "Engineering Mechanics-I and II (Statics and Dynamics)", Mokashi V.S., Tata McGraw Hill Publication.

**Syllabus for Unit Test:**

Unit Test -1

UNIT – I to III

Unit Test -2

UNIT – IV to VI

**Bharati Vidyapeeth**  
**Deemed University, Pune**  
**ENGINEERING CHEMISTRY**

**Teaching Scheme:**  
**Lectures: 4Hrs/Week**  
**Practical: 2Hr/Week**

**Examination scheme:**  
**End Semester Examination: 60 marks**  
**Continuous Assessment: 40 marks**

**Credits Allotted:**  
**Theory: 04**  
**Practical: 01**  
**Term Work: 25marks**

**Unit I**

**WATER**

Introduction, Hardness of water, Effect of hard water on boilers and heat exchangers: a) boiler corrosion b) caustic embrittlement c) scales and sludges d) priming and foaming

Water softening methods for industrial purposes :a) Zeolite process b) Phosphate conditioning  
Numerical based on the zeolite process **(08 Hours)**

**Unit II**

**MATERIAL CHEMISTRY**

**Crystallography :** Unit cell, Laws of crystallography, Weiss indices and Miller indices, Crystal defects (point and line defects), X-ray diffraction – Bragg's Law and numerical.

**Cement :** Introduction of cement, Hydraulic/ Non-hydraulic cementing materials, classification of cement, chemistry of portland cement, chemical composition and compound constituents of portland cement, properties of cement and its applications. **(08 Hours)**

**Unit III**

**FUELS**

Introduction, classification of fuels, calorific value of fuels, NCV and GCV, Determination of calorific values using Bomb calorimeter and Boys' gas calorimeter.

Theoretical calculation of calorific value of a fuel, Analysis of coal a) Proximate b) Ultimate analysis of coal, Numericals based on NCV, GCV. **(08 Hours)**

**Unit IV**

**CORROSION AND ITS PREVENTION**

Corrosion: - Definition, atmospheric corrosion-mechanism, Wet corrosion-mechanism, Electrochemical and galvanic series, Factors affecting corrosion-nature of metal, nature of environment.

Methods of prevention of corrosion- Cathodic and Anodic protection, Metallic coatings, Electroplating, Hot dipping. **(08 Hours)**

**Unit V**

**ELECTROCHEMISTRY**

Introduction, Arrhenius Ionic theory, Kohlrausch's law of independent migration of ions

Laws of electrolysis: Faradays Laws, Ostwald's dilution law, Acids and Bases, concept of pH and pOH, Buffer solutions, Solubility Product, Redox Reactions.

Electrode Potential, electrochemical cell, concentration cell, reference Electrodes, Overvoltage, Conductometric Titrations, Fuel cells, Lead Acid Storage Cell and numericals based on the above articles. **(08 Hours)**

**Bharati Vidyapeeth  
Deemed University, Pune**

**Unit VI**

**STEREOCHEMISTRY**

Introduction, chirality, optical activity, Enantiomers, Diastereomers, projection formula of tetrahedral carbon- Newman projection, Wedge projection, Fischer projection, Geometrical isomerism :- cis and trans isomerism, E and Z isomers

Optical isomerism :- Mesoform, the number of optical isomers for chiral molecules,

Conformations :- conformations of ethane, conformations of n-butane

**(08 Hours)**

**TERM WORK**

**Experiments**

**Any Ten experiments from the following:**

1. Estimation of hardness of water by EDTA method.
2. Estimation of chlorine by Mohr's method.
3. Determination of percentage of Ca in given cement sample
4. Determination of coefficient of viscosity by Ostwald's viscometer
5. Study of Bomb calorimeter for determination of calorific value.
6. Determination of calorific value of gas fuel by using Boy's gas calorimeter.
7. Determination of dissolved oxygen in a water sample.
8. To determine the Molecular Weight of polymer
9. Estimation of Copper from brass sample solution by Iodometrically
10. Estimation of percentage of Iron in Plain Carbon Steel by Volumetric Method
11. To standardize NaOH solution and hence find out the strength of given hydrochloric Acid solution
12. To determine Surface Tension of given liquid by Stalagmometer
13. Study of corrosion of metals in medium of different pH.
14. To set up Daniel cell
15. To determine pH of soil
16. To determine Acidity of soil

**Assignments**

1. Effect of hard water on boilers and heat exchangers
2. Hydraulic/ Non-hydraulic cementing materials
3. Analysis of coal a) Proximate b) ultimate analysis of coal
4. Wet corrosion-mechanism, Electroplating, Hot dipping
5. Geometrical isomerism :- cis and trans isomerism, E and Z isomers
6. Fuel cells

**Bharati Vidyapeeth**  
**Deemed University, Pune**

**Syllabus for Unit Test:**

**Unit Test I :- Unit I,II,III**

**Unit Test II :- Unit IV,V,VI**

**Bharati Vidyapeeth**  
**Deemed University, Pune**

**02: Fundamentals of Electrical Engineering**

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Theory: 04 Hours / Week	End Semester Examination: 60 Marks	03 Credits
Practical: 02 Hours / Week	Continuous Assessment: 40 Marks	
	Term Work: 25 Marks	01 Credit

**Course Pre-requisites:**

The Students should have

- |    |             |
|----|-------------|
| 1. | Mathematics |
| 2. | Physics     |

**Course Objectives:**

The course introduces fundamental concepts of DC and AC circuits, electromagnetism, transformer and measuring instruments and electronic components to all first year engineering students.

**Course Outcomes:**

- |    |  |
|----|--|
| 1. | Understand and apply knowledge of basic concepts of work ,power ,energy for electrical, mechanical and thermal systems     |
| 2. | Understand and apply knowledge of Kirchoff's laws and network theorems to solve electrical networks                        |
| 3. | Describe construction, principle of operation, specifications and applications of capacitors and batteries                 |
| 4. | Describe and apply fundamental concepts of magnetic and electromagnetic circuits for operation of single phase transformer |
| 5. | Define basic terms of single phase and three phase ac circuits and supply systems  |
| 6. | Know and use electrical safety rules   |

**Bharati Vidyapeeth**  
**Deemed University, Pune**

<b>UNIT - I</b>	<b>Basic concepts</b>	<b>(06 Hours)</b>
	Concept of EMF, Potential Difference, current, resistance, Ohms law, resistance temperature coefficient, SI units of Work, power, energy. Conversion of energy from one form to another in electrical, mechanical and thermal systems	
<b>UNIT - II</b>	<b>Network Theorems</b>	<b>(06 Hours)</b>
	Voltage source and current sources, ideal and practical, Kirchoff's laws and applications to network solutions using mesh analysis, Simplifications of networks using series- parallel, Star/Delta transformation. Superposition theorem, Thevenin's theorem, Max Power Transfer theorem.	
<b>UNIT - III</b>	<b>Electrostatics</b>	<b>(06 Hours)</b>
	Electrostatic field, electric field intensity, electric field strength, absolute permittivity, relative permittivity, capacitor composite, dielectric capacitors, capacitors in series & parallel, energy stored in capacitors, charging and discharging of capacitors, Batteries-Types, Construction & working.	
<b>UNIT - IV</b>	<b>Magnetic Circuit &amp; Transformer</b>	<b>(06 Hours)</b>
	Magnetic effect of electric current, cross and dot convention, right hand thumb rule, concept of flux, flux linkages, Flux Density, Magnetic field, magnetic field strength, magnetic field intensity, absolute permeability, relative permeability, B-H curve, hysteresis loop, series-parallel magnetic circuit, composite magnetic circuit, Comparison of electrical and magnetic circuit  Farady's law of electromagnetic induction, statically and dynamically induced emf, self inductance, mutual inductance, coefficient of coupling,  Single phase transformer construction, principle of operation, EMF equation, voltage ratio, current ratio, kVA rating, losses in transformer, Determination of Efficiency & Regulation by direct load test.	
<b>UNIT - V</b>	<b>AC Fundamentals &amp; AC Circuits</b>	<b>(06 Hours)</b>
	AC waveform definitions, form factor, peak factor, study of R-L, R-C, RLC series circuit, R-L-C parallel circuit, phasor representation in polar & rectangular form, concept of impedance, admittance, active, reactive, apparent and complex power, power factor, 3-ph AC Circuits.	

**Bharati Vidyapeeth  
Deemed University, Pune**

<b>UNIT - VI</b>	<b>Electrical Wiring and Illumination system</b>	<b>(06 Hours)</b>
	Basic layout of distribution system, Types of Wiring System & Wiring Accessories, Necessity of earthing, Types of earthing, Different types of lamps (Incandescent, Fluorescent, Sodium Vapour, Mercury Vapour, Metal Halide, CFL, LED), Study of Electricity bill.	
<b><u>Term Work:</u></b>		
The term work shall consist of record of minimum eight exercises / experiments.		
<ol style="list-style-type: none"> <li>1. Determination of resistance temperature coefficient</li> <li>2. Verification of Superposition Theorem</li> <li>3. Verification of Thevenin's Theorem</li> <li>4. Verification of Kirchoff's Laws</li> <li>5. Verification of Maximum power transfer Theorem</li> <li>6. Time response of RC circuit</li> <li>7. Study of R-L-C series circuits for <math>X_L &gt; X_C</math>, <math>X_L &lt; X_C</math> &amp; <math>X_L = X_C</math></li> <li>8. Verification of current relations in three phase balanced star and delta connected loads.</li> <li>9. Direct loading test on Single phase transformer             <ol style="list-style-type: none"> <li>a) Voltage and current ratios.</li> <li>b) Efficiency and regulations .</li> </ol> </li> <li>10. Study of a Residential (L.T.) Bill</li> </ol>		
<b>Text Books:</b>		
1) B.L.Theraja- "A Textbook of Electrical Technology" Volume- I, S.Chand and Company Ltd., New Delhi

3. John Omalley Shawn – "Basic circuits analysis" Mc Graw Hill Publications		
4. Vincent Del Toro – "Principles of Electrical Engineering", PHI Publications		

**Bharati Vidyapeeth  
Deemed University, Pune**

<b>Syllabus for Unit Test:</b>	
Unit Test -1	UNIT – I, UNIT – II, UNIT - III
Unit Test -2	UNIT – IV, UNIT – V, UNIT - VI

**Bharati Vidyapeeth**  
**Deemed University, Pune**  
**Analytical Techniques in Chemical Engineering**

**Teaching Scheme:**

**Lectures: - -**

**Practical: 2 Hr/week**

**Examination Scheme:**

**Term work: 50 Marks**

**Credits:**

**01**

**Course pre-requisite:** Fundamental knowledge of chemistry involved in analytical techniques.

**Course objectives:**

1. To develop students acquaintance with various basic analytical techniques available in Chemical Engineering.
2. To provide a base for effective understanding of the core subjects of Chemical Engineering such as Stoichiometry, Environmental Engineering etc.

**Course outcome:**

After successful completion of the course the student will be able:

1. To independently prepare standard solutions and solutions for given normality/ molarity/ molality
2. To carry out preliminary water and fuel analysis.

**Minimum eight practicals should be conducted from the list given below:**

**I. Standardization**

1. To prepare standard alkaline and acidic solutions.

**II. Normality/ Molarity/ Molality Concepts**

3. Find the strength of given alkaline solution using acidic solution or vice versa.
4. Preparation of solutions for given normality/ molarity/ molality

**III. Water Analysis**

1. To determine free CO<sub>2</sub> in the given water Sample.
2. Determination of Dissolved oxygen in the given water sample.
3. To determine Acidity of a given water sample.
4. To determine alkalinity of a given water sample.

**IV. Fuel Analysis**

1. Determination of octane/cetane number
2. Determination of kinematic viscosity
3. Determination of calorific value

**Bharati Vidyapeeth  
Deemed University, Pune**

4. Determination of moisture content
5. Ultimate/proximate analysis of solid fuel

**Text books/References:**

1. Practical organic chemistry, Arthur I. Vogel, Longman publication
2. Experiments in applied chemistry, Sunita Rattan, S. K. Kataria & Sons

**DEEMED UNIVERSITY, PUNE**  
**B.Tech (Chemical) - 2014 Course**  
**Semester-III**

<b>CHEMICAL ENGINEERING THERMODYNAMICS-I</b>		
<b>Designation:</b> Professional Core		
<b>Course Pre-requisites:</b>		
Students should have knowledge of		
<b>1.</b>	Mathematics	
<b>2.</b>	Physics	
<b>3</b>	Chemistry	
<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Lectures : 3 <b>Hours/Week</b>	End Semester Examination : 60 Marks	Theory : 03
Tutorial : 1 Hour /Week	Unit Test : 20 marks	Tutorial : 01
Total : 4 <b>Hours/Week</b>	Continuous Assessment : 20 Marks	Total credits : 04
	Term Work/Oral : 25 Marks	
	Total : 125 Marks	
<b>Course Outcomes:</b>		
After completion of the course students will be able to		
<b>1.</b>	(a) Estimate energy requirement for a system	
<b>2.</b>	(a) Understand second law of thermodynamics and the concept of entropy (b) Calculate efficiency of heat engines and refrigerator, and calculate change in entropy for ideal gas.	
<b>3.</b>	(a) Understand P-T and P-V diagrams for pure fluids (b) Select appropriate equation of state for representing P-V-T behavior of gases and/or liquids.	
<b>4.</b>	(a) Calculate changes in internal energy, enthalpy, and entropy for ideal gases, and also for non-ideal gases through use of residual properties (b) Understand the criterion of phase equilibrium for a pure substance and use it to relate the enthalpy of phase change to the saturation pressure curve via Clausius- Clapeyron equation	
<b>5.</b>	(a) Understand refrigeration and liquefaction cycles.	
<b>6.</b>	(a) Estimate deviation from ideality for real gaseous mixtures and liquid solutions	
<b>Topics covered</b>		
<b>UNIT - I</b>	<b>First Law of Thermodynamics</b> Preliminary concepts of thermodynamics; Statement of first law of thermodynamics; Joules experiment and internal energy; Mathematical form of first law of thermodynamics; State function and path function; Intensive and extensive properties; Enthalpy; Steady state steady flow process; Equilibrium; Phase rule; Reversible and irreversible processes; Constant volume and constant pressure processes.	<b>(08 Hours)</b>

<b>UNIT - II</b>	<b>Second Law of Thermodynamics:</b> Necessity of second law of thermodynamics; Statements of second law of thermodynamics; Heat engine: Carnot approach; Kelvin-Planck statements; Thermodynamic temperature scale; Thermodynamic temperature and the ideal gas scale; Entropy: Clausius approach; Entropy change of ideal gas; Mathematical statement of second law of thermodynamics; Third law of thermodynamics and its mathematical statement	<b>(08 Hours)</b>
<b>UNIT - III</b>	<b>Volumetric Properties of Pure Fluids</b> PVT behavior of pure substance; Basic equation of state; Difference between Ideal gas and real gas; Equation governing PVT behavior of ideal gas; Development of thermodynamic relations for ideal gas for isochoric, isobaric, isothermal, adiabatic, and polytropic processes; Equations governing PVT behavior of real gas: (i) the virial equations, (ii) two parameter equations (van der Waal, and RedlichKwong equations), (iii) compressibility factor: two parameter theorem of corresponding state and three parameter theorem of corresponding state.	<b>(08 Hours)</b>
<b>UNIT - IV</b>	<b>Thermodynamic properties of Fluids:</b> Property relations for homogeneous phases: (i) Thermodynamic relations derived from laws of thermodynamics, Helmholtz energy, and Gibbs energy, (ii) Maxwell relationships; Two-phase systems: Clausius - Clapeyron equation and Antoine equation; Thermodynamic diagrams: (i) temperature-entropy, (ii) pressure-enthalpy, and (iii) enthalpy-entropy (the Mollier diagram).	<b>(08 Hours)</b>
<b>UNIT - V</b>	<b>Refrigeration and Liquefaction</b> The Carnot Cycle; The vapor- compression cycle; Comparison of refrigeration cycle; The Choice of refrigerant; Absorption refrigeration and power cycle; Organic Rankine cycle; Liquefaction processes	<b>(08 Hours)</b>
<b>UNIT - VI</b>	<b>Solution Thermodynamics</b> Fundamental property relation; Phase equilibrium using volumetric properties; Partial molal properties; Ideal gas mixtures and ideal solutions; Concept of fugacity and activity; Concept of residual and excess properties.	<b>(08 Hours)</b>
<b>Tutorials:</b>		
Tutorials will be based on the theoretical and/or numerical covered in six units		
<b>1</b>	Solving numerical in connection with the basic principles of thermodynamics	
<b>2</b>	Questions involving first law applied to pure component systems.	
<b>3</b>	Solving numerical in connection with entropy changes of ideal gas for various thermodynamic processes.	
<b>4</b>	Draw P-T and P-V diagrams for pure substances.	
<b>5</b>	Solving numerical based on application of thermodynamics to transient open and closed systems	
<b>6</b>	Numerical involving Pure Fluid Properties Coupled to 1st and 2nd Laws.	

7	Conducting surprise MCQ test for students
8	Solving numerical based on Refrigeration and Liquefaction.
9	Enhancement in collaborative learning is done through, group assignments that will be given to encourage students to work with classmates to discuss and complete homework assignments.
10	Students have to study any five NPTEL videos related to Chemical Engineering Thermodynamics I and prepare/present power point presentation.
11	Group discussions on any of the following topics: a) Importance of Chemical Engineering Thermodynamics in chemical industries. b) Practical applications involving various thermodynamic processes. c) Ideal Gas, Real Gas, Ideal gas mixture, Ideal solution.
12	Preparation of a brief report on applicability of equations of states (EOS) in chemical engineering systems.
13	Solve question papers of CET I of previous THREE years.
14	Unsolved numerical from the reference books on various topics studied
<b>Text Books/ References:</b>	
1.	J. M. Smith and H. C. Van Ness, "Introduction to Chemical Engineering Thermodynamics", McGraw-Hill Publication
2.	T. E. Daubert, "Chemical Engineering Thermodynamics", McGraw- Hill Publication
3.	B. F. Dodge, "Chemical Engineering Thermodynamics", McGraw- Hill Publication
4.	S. I. Sandler, "Chemical Engineering Thermodynamics", McGraw- Hill Publication
<b>Syllabus for Unit Test:</b>	
Unit Test - I	UNIT– I, II, and III
Unit Test - II	UNIT– IV, V, and VI

<b>STRENGTH OF MATERIAL</b>					
<b>Designation:</b> Breath					
<b>Course Pre-requisites:</b>					
Students should have					
1.	Basic knowledge of Engineering Mechanics				
<b>TEACHING SCHEME:</b>					
<b>EXAMINATION SCHEME:</b>					
<b>CREDITS ALLOTTED:</b>					
Lectures	: 3Hours/Week	End Semester Examination : 60 Marks	Theory	: 03	
Practical	: 2 Hour /Week	Unit Test	: 20 Marks	Practical	: 01
Total	: 5 Hours/Week	Continuous Assessment	: 20 Marks	Total credits	: 04
		Term Work/Practicalal	: 25 Marks		
		Total	: 125 Marks		
<b>Course Outcomes:</b>					
After completion of the course students will be able to					
1.	Calculate stresses due to axial force.				
2.	Calculate shear force and bending moment in the beam.				
3.	Calculate deflection and bending stress in the beam.				
4.	Calculate shear stress due to shear force and torsion.				
5.	Calculate critical load for column.				
6.	Calculate principal stresses.				
<b>Topics covered</b>					
<b>UNIT-I</b>	<p><b>Concept of stress and strain:</b> Normal, lateral, shear and volumetric stresses and strains, Stress-strain curve; Elastic constants and their inter relationship; Generalized Hooke's law;</p> <p><b>Stresses due to Axial Load and Temperature:</b> Axial force diagram; Stresses, strains and deformation of determinate and indeterminate bars of prismatic, homogenous and composite cross section.</p>	<b>(06 Hours)</b>			
<b>UNIT-II</b>	<p><b>Shear Force and Bending Moment in Beams:</b></p> <p>Concept of Shear Force and Bending Moment; Relation between Shear Force, Bending Moment and intensity of loading; Shear Force Diagram and Bending Moment Diagram of determinate beams due to concentrated load, uniformly distributed load, uniformly varying load and moments.</p>	<b>(06 Hours)</b>			
<b>UNIT-III</b>	<p><b>Deflection of Beams:</b></p> <p>Concept of relation between deflection, slope, bending moment, shear force and intensity of loading; Macaulay's method, Elastic curve.</p> <p><b>Flexural Stresses:</b> Theory and assumptions of pure bending; Moment of resistance; Flexure formula; Flexural rigidity; Modulus of rupture; Flexural stress distribution diagram for various sections; Force resisted by partial cross section.</p>	<b>(08 Hours)</b>			
<b>UNIT-IV</b>	<p><b>Shear Stresses:</b> Concept of direct and transverse shear; Shear stress formula; concept of complementary shear stress; Shear stress distribution diagram for symmetrical and unsymmetrical section.</p> <p><b>Torsion of Circular Shafts:</b> Theory, assumptions and derivation of torsional formula; Shear stress distribution across cross section; Twisting moment diagram; Shear</p>	<b>(06 Hours)</b>			

	stresses and strains in determinate and indeterminate shafts of hollow, solid, homogeneous and composite cross sections subjected to twisting moment; Torsional rigidity.	
<b>UNIT-V</b>	<b>Combined Axial and Bending Stress:</b> Concept; Resultant stress due to the axial load and uni-axial or biaxial bending; Core of section. <b>Axially Loaded Long Columns:</b> Concept of critical load and buckling; Differential equation of elastic curve; Euler's formula for hinged ends; Equivalent length for different end conditions; Limitation of Euler's formula; Rankine's formula.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Principal Stresses and Principal Planes:</b> Normal and shear stresses on any oblique plane. Concept of principal stresses and principal planes. Maximum shear stress; Analytical and graphical method. (Mohr's circle method); Combined effect of axial force, bending moment, shear force and torsion.	<b>(06 Hours)</b>

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV ,V,VI

## PHYSICAL CHEMISTRY

<b>Designation:</b> Basic science		
<b>Course Pre-requisites:</b> Basic knowledge for chemistry		
<b>TEACHING SCHEME:</b>		
Lectures : 03 Hours/Week	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Practical : 02 Hours /Week	End Semester Examination : 60 Marks	Theory : 03
Total : 05 Hours/Week	Unit Test : 20 Marks	Practical : 01
	Continuous Assessment : 20 Marks	Total credits : 04
	Term Work/Practical : 50 Marks	
	Total : 150 Marks	
<b>Course Outcomes:</b>		
After completion of the course students will be able to		
1.	Explain the basic concepts of bond forming and reactivity.	
2.	Describe the principles and applications of spectroscopic techniques such as infra-red UV/Visible absorption spectrometry.	
3.	Demonstrate the principles and functions of the UV and IR spectroscopy for chemical investigations.	
4.	Recognize the use of catalysts for industrially important processes.	
5.	Comprehend Structure-Property Relationship.	
6.	Interpret concept of Surface and Interfacial Chemistry.	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Bonding and reactivity:</b> Aromaticity-conditions necessary for delocalization of electrons, resonance structures stability rules, resonance in phenol, aniline, benzaldehyde, nitrobenzene molecules, Effect of inductive effect and resonance on pKa and pKb values of acids and bases. Reaction intermediates –carbonations, carban ions, free radicals and their stability. Types of reagents, types of reactions.	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Reaction mechanisms:</b> Substitution at saturated carbon (SN1, SN2)- mechanism, factors favoring. Electrophilic aromatic substitution in benzene and mono substituted benzenes, activating and deactivating groups , nitration, Friedal-Craft reactions, sulphonation, diazotization. Nucleophilic substitution on on carbonyl carbon. Addition of HX on C=C 1, 2-Eliminations- E1mechanism, E 2, (Saytzeff, Hoffman products), factors favoring. Rearrangements- Beckman, Claisen, Reformatsky.	<b>(06Hours)</b>
<b>UNIT-III</b>	<b>Instrumental methods of chemical analysis:</b> UV-Visible spectroscopy: Lambert-Beer law, $\lambda$ max, calculation of $\lambda$ max for olefinic and cyclic structures, instrumentation, interpretation of spectra, applications. IR Spectroscopy: Introduction, instrumentation (double beam spectrophotometer) characteristic absorption in functional and finger print regions, interpretation of spectra, applications.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Catalysis:</b> Introduction, types of catalyst, criteria or Characteristics of catalyst, adsorption theory of catalysis, catalytic promoters or activators, catalytic poisons, Enzyme catalysis, Applications of catalysts for industrially important processes.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Structure –Property Relationship:</b> Molecular interactions and bonds weaker than covalent bonds, e.g. hydrogen bond,dipole interaction,VDW forces etc.and there effects on various properties	<b>(06 Hours)</b>

	such as refractive index ,viscosity, surface tension, density, thermal conductivity, specific heat, diffusivity, melting point, boiling point, vapor pressure, heat of formation, latent of diffusion and vaporization, non ideal behavior in solutions, group contribution methods for estimation of these properties(including those of polymers and polymeric solutions).	
<b>UNIT-VI</b>	<b>Surface and Interfacial Chemistry:</b> Concept of surface /interfacial energy and surface /interfacial tension, Thermodynamics of surfaces, Gibbs adsorption equation and isotherm, Curved surfaces-Young, Laplace, Kelvin and Thompson equations contact angle and wetting phenomena, adhesion, cohesion, surface active agents: types and applications, surfactant aggregates, emulsions and micro emulsions preparation, stability and application.	<b>(06 Hours)</b>
<b>List of Experiments:</b>		
Term work will consist of the experiments listed below, of which at least eight should be performed in laboratory by the students.		
1.	Preparation of benzoic acid from benzamide.	
2.	Preparation of aspirin from salicylic acid.	
3.	Conductometric titration between strong acid and strong base.	
4.	Determination of percentage purity of sodium Bicarbonate by gravimetry.	
5.	Estimation of Cu <sup>++</sup> ions by spectrophotometer/colorimeter.	
6.	Purification of organic compounds by crystallization and sublimation.	
7.	To determine the number of molecules of water of crystallization in BaCl <sub>2</sub> .2H <sub>2</sub> O by heating.	
8.	Volumetric estimation of aniline from the given solution.	
9.	Volumetric estimation of acetone from the given solution.	
10.	Determine viscosity of given liquids by Ostwald's viscometer.	
11.	To determine ΔH, ΔG,ΔS of the reaction, $Zn(s) + Cu^{2+} (aq) \longrightarrow Zn^{2+} (aq) + Cu(s)$	
12	Preparation of tetramine copper (II) sulphate.	
13	Preparation of potassiumtrioxalato aluminate.	
14	Preparation of crystal of potash alum.	
15	To determine the equivalent weight of the given metal (Zn or Mg) eudiometrically.	
<b>Assignments:</b>		
1	What is resonance effect? Draw resonating structure of aniline, phenol, phenoxide ion.	
2	Nucleophilic substitution.	
3	Conductometric titrations.	
4	Industrial applications of catalysts.	
5	Adsorption theory of catalysis.	
6	Gibbs adsorption equation and isotherm	
<b>Reference Books</b>		
1	Instrumental methods of chemical analysis ----B.K.Sharma, Goel publ.)	
2	Instrumental methods of chemical analysis ----Chatwal –Anand	
3	Organic chemistry –I L Finar volume I and II	
4	Engineering Chemistry ---S.S.Dara	
5	Physical chemistry –P L Soni	

6	Atkins P.W. and Paula., Physical Chemistry, 8 <sup>th</sup> Edn., Oxford University Press.	
7	Inorganic chemistry ----Cotton, Wilkinson	
8	Spectroscopy ---Kalsi	
9	Vogels text book of quantitative chemical analysis. (5 <sup>th</sup> Edn.)	
<b>Syllabus for Unit Test:</b>		
Unit Test -I	UNIT – I ,II,III	
Unit Test -II	UNIT – IV,V,VI	

## CHEMICAL PROCESS CALCULATIONS

<b>Designation:</b> Professional Core		
<b>Course Pre-requisites:</b>		
Students should have		
1.	Basic knowledge of chemistry	
<b>TEACHING SCHEME:</b>		
<b>EXAMINATION SCHEME:</b>		
<b>CREDITS ALLOTTED:</b>		
Lectures	: 3Hours/Week	End Semester Examination : 60 Marks
Tutorial	: 1 Hour /Week	Unit Test : 20 Marks
Total	: 4 Hours/Week	Continuous Assessment : 20 Marks.
		Term Work/Oral : 25 Marks
		Total : 125 Marks
		Theory : 03
		Tutorial : 01
		Total credits : 04
<b>Course Outcomes:</b>		
After completion of the course students will be able to		
1.	Explain the concept of units and dimensions and solve the problems on basic chemical calculations.	
2.	Describe the concept of material balance without chemical reactions and solve the problems involved in various unit operations.	
3.	Explain the concept of material balance involving chemical reactions and solve the problems on unit processes carried out in chemical industry.	
4.	Explain the concept of recycle, bypass, purge operations and solve problems based on humidification, recycle, bypass and purge operations.	
5.	Interpret the concepts of energy balance and solve numerical based on them.	
6.	Apply the knowledge of gross and net calorific values of fuel and solve the problems based on them.	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Basic Chemical Calculations:</b> Units and dimensions for mass and energy calculation for solid, liquid and gas; Mole concept; Basic composition calculation for homogeneous, two phase and three phase systems,	<b>(08 Hours)</b>
<b>UNIT-II</b>	<b>Material balances without Chemical Reactions:</b> Generalized law of conservation of mass; Mass conservation without chemical reaction; Mass balance for unit operations encountered in chemical process industry : Distillation, extraction, evaporation, blending etc.	<b>(08 Hours)</b>
<b>UNIT-III</b>	<b>Material balances involving Chemical Reactions:</b> Generalization of law of conservation of mass involving chemical reaction and its simplification; Chemical equations and stoichiometry; Some basic concepts: conversion, yield, selectivity; Material balance for unit processes encountered in chemical process industry: nitration, esterification, acylation, sulfonation etc.	<b>(08 Hours)</b>
<b>UNIT-IV</b>	<b>Recycle, bypass and purge operations:</b> Necessity of recycle, bypass and purge streams; Basic calculations of recycle, bypass and purge streams for unit operations and unit processes. Industrial examples of recycling, bypassing and purging with complete mass balance viz. biofuel synthesis, food processing etc.; Humidification operation.	<b>(08 Hours)</b>
<b>UNIT-V</b>	<b>Energy Balance:</b> Basic concepts; heat capacity; Sensible heat and latent heat: Clausius-Clapeyron equation; standard heat of formation, combustion, reaction, Hess's law; General equation of energy balance; Energy balance approach and calculations for exothermic and endothermic reactions with industrial examples; Steam table and its utility; Utility	<b>(08 Hours)</b>

	energy balance calculations.	
<b>UNIT-VI</b>	<b>Fuels and Combustion:</b> Types of fuels: solid, liquid and gas; Calculations of energy content of fuel; Analysis of fuel; oxygen requirement and excessity; Adiabatic flame temperature calculations.	<b>(08 Hours)</b>
<b>Term Work/ Tutorial:</b>		
Term work includes numerical on the following topics.		
1.	Basic chemical calculations.	
2.	Material balances without chemical reactions.	
3.	Material balances involving chemical reactions.	
4.	Recycle, bypass, purge and humidification operation.	
5.	Energy balance.	
6.	Fuels and combustion.	
<b>Assignment:</b>		
1.	Mass and energy balance for any one of following unit operations for given system.	
	a) Distillation	
	b) Evaporation	
	c) Extraction	
	d) Crystallization	
	e) Drying. etc	
2.	Mass and energy balance for any one of following unit processes for given system. These assignment may include overall energy and/or mass balance or energy and/or mass balance over a given chemical process equipment.	
	a) Nitration	
	b) Esterification	
	c) Acylation	
	d) Fermentation	
	e) Sulfonation etc.	
3.	Students have to visit chemical industry and prepare a detailed report on various unit operations and unit processes used in industry.	
4.	Measurement of calorific values of any two types of fuel.	
5.	Group discussions on mass and energy balance for unit operations and unit processes carried out in chemical industry	
6.	Solve last five years GATE question papers with reference to chemical process calculations.	
7.	Students have to study any five NPTEL videos related to chemical process calculations and prepare/present power point presentation.	
8.	Numericals based on above six units.	
9.	Technical interview based on knowledge of chemical process calculations.	
10.	Prepare models for recycle, bypass and purge operations carried out in chemical industry.	
11.	With the help of this subject knowledge, write a report on how you would apply your concepts in industry.	
12.	Prepare a report on unit operations which are newly introduced in the current year.	
13.	Write a report on your visit to research and development laboratory of national/international repute.	
In addition to these above stated assignments concern faculty member may design his/her won.

Unit Test -II	UNIT – IV,V,VI

## MECHANICAL OPERATION

**Designation:** Professional Core

**Course Pre-requisites:** None

<b>TEACHING SCHEME:</b>		<b>EXAMINATION SCHEME:</b>		<b>CREDITS ALLOTTED:</b>	
Lectures	: 4 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 04
Practical	: 2 Hours /Week	Unit Test	: 20 Marks	Practical	: 01
Total	: 6 Hours/Week	Continuous Assessment	: 20 Marks	Total credits	: 05
		Term Work/Practical	: 50 Marks		
		Total	: 150 Marks		

### Course Outcomes:

After completion of the course students will be able to

1. Understand the concept of particle size measurement, distribution and analyze the performance of size reduction equipment.
2. Understand the concept of solid storage and solid conveying.
3. Understand the concept of mixing and Calculate the power requirement for agitator.
4. Understand the concept of particle mechanics and sedimentation
5. Understand the concepts of filtration.
6. Understand the concept of separation of solids from fluids.

### Topics covered

<b>UNIT-I</b>	<p><b>Properties of Solid and Size Reduction</b>  <b>Properties of solid:-</b> Particle size and shape, Mixtures of particles, Cumulative and differential screen analysis, Determination of particle size, Screen effectiveness and capacity, Industrial screening equipments.  <b>Size Reduction:-</b> Crushing efficiency, energy requirements calculations by using different crushing laws, Size reduction equipments: Primary crushers, secondary crushers, Intermediate &amp; fine grinders, Ultra fine grinders, Cutting machines, open circuit &amp; Closed circuit grinding.</p>	<b>(08 Hours)</b>
<b>UNIT-II</b>	<p><b>Handling and Transport of Solids</b>  <b>Storage of Solids:-</b> Bins, silos, hoppers, Janseen's equation, characteristics of Bulk solids.  <b>Transport of Solids:-</b> Conveyors: Working principles, Construction, Advantages, Disadvantages and design calculation of Screw conveyors, Belt Conveyors, Chain &amp; Flight conveyors, Bucket elevators, Pneumatic conveyors.</p>	<b>(08Hours)</b>
<b>UNIT-III</b>	<p><b>Mixing and Agitation</b>  Necessity of mixing &amp; agitation in chemical industries, Mixers for pastes and plastic masses. Mixers for dry powders. Criteria for mixer effectiveness. Mixing index in blending granular solids. Rate of mixing. Types of equipment, Mixing characteristics, Power consumption, Mixing index calculations, Agitator selection.</p>	<b>(08 Hours)</b>
<b>UNIT-IV</b>	<p><b>Sedimentation</b>  Gravity settling method: Motion of particles in fluid, drag force, drag coefficients, effect of particle shape, Stock's law, hindered settling, Terminal velocity, sink and float method, differential settling. Batch sedimentation, equipments for sedimentation, Kynch theory of sedimentation, calculation of area and depth of batch thickeners and continuous thickeners.</p>	<b>(08 Hours)</b>
<b>UNIT-V</b>	<p><b>Filtration</b>  Filter media and filter aids, classification of filtration, pressure drop through filter cake, filter medium resistance, specific cake resistance, Continuous Filtration,</p>	<b>(08 Hours)</b>

	Washing and dewatering of filter cakes, Centrifugal filtration. Selection of filtration equipment.	
<b>UNIT-VI</b>	<b>Separation of solids from fluids</b> Froth flotation, magnetic separator, scrubbers, fiber and fabric filter, and electrostatic precipitators. Mineral jig, cyclone separator, hydro cyclone types and centrifuges, centrifugal clarifier.	<b>(08 Hours)</b>
<b>List of Experiments:</b>		
Term work will consist of the experiments listed below, of which at least eight should be performed in laboratory by the students.		
1.	To determine effectiveness of given set of standard screen.	
2.	To determine energy consumption and crushing law constants for jaw crusher.	
3.	To determine Critical speed of Ball mill & Average particle size of the product obtained in ball mill.	
4.	To determine mixing Index of a mixture in Ribbon Blender. <b>OR</b> To determine mixing Index of mixture in Sigma Mixer.	
5.	To determine filter medium resistance and cake resistance by using Vacuum Leaf filter.	
6.	To determine filter medium resistance and cake resistance by using Plate & frame Filter Press <b>OR</b> by using centrifuge machine.	
7.	To determine area of batch thickener by conducting batch sedimentation test.	
8.	To determine separation efficiency by using froth flotation cell.	
9.	To determine separation efficiency by using magnetic separator.	
10.	To determine efficiency of Cyclone separator.	
<b>Assignments:</b>		
1	Pilot scale solid-liquid fluidization: Expansion characteristics of solids	
2	Estimate power consumption for homogeneous system	
3	Industry related unit operation (ANY ONE INDUSTRY) detailing of it.	
4	How does filtration fit into the water treatment process?	
5	How Does Filtration clean water?	
6	What types of filters are used for water treatment? Explain in brief	
7	Explain hand pump water filter	
8	How does sedimentation fit in to the waste water treatment process?	
9	What zones are present in sedimentation basin?	
10	How is sedimentation sludge disposed of?	
11	What is surface loading rate explain in brief. The flow into clarifier is 3.2 MGD in tank 80 feet long and 40 feet wide. what is surface loading rate?	
12	Recent trends in particle size technology.	
13	Watch the NPTEL video on this subject of any TWO modules and summarize it	
14	Solve numerical problems asked in previous THREE year question papers.	
15	Solve questions asked on filtration in previous THREE year question papers.	
16	If your particles are not spherical which equivalent particle size would be suitable to calculate for the purpose of filtration	
17	What media are used in filters? What factors affect filter efficiency?

Unit Test -II	UNIT – IV,V,VI

**BHARATI VIDYAPEETH**  
**DEEMED UNIVERSITY, PUNE**  
**B.Tech (Chemical) - 2014 Course**  
**SEMESTER-IV**

<b>ENGINEERING MATHEMATICS- III</b>		
<b>Designation:</b> Professional Core		
<b>Course Pre-requisites:</b>		
Students should have		
Basic knowledge of Mathematics including derivative, integration etc.		
<b>TEACHING SCHEME:</b>		
<b>EXAMINATION SCHEME:</b>		
<b>CREDITS ALLOTTED:</b>		
Lectures : 3Hours/Week	End Semester Examination : 60 Marks	Theory : 04
Tutorial : 1 Hour /Week	Unit Test : 20 Marks	Total credits : 04
Total : 4 Hours/Week	Continuous Assessment : 20 Marks	
	Total : 100 Marks	
<b>Course Outcomes:</b>		
After completion of the course students will be able to		
1.	To develop an ability of mathematical modeling of systems using differential equations and ability to solve linear differential equations with constant coefficient	
2.	To develop an ability to solve the Laplace, heat and wave equations for a variety of boundary conditions in domains of simple geometry and with simple boundary conditions; the techniques available will include, separation of variables	
3.	To develop an ability to solve problems on Fourier sine and cosine transform	
4.	To develop an ability to use theorems to compute the Laplace transform, inverse Laplace transforms	
5.	To develop an ability to calculate the gradients and directional derivatives of functions of several variables	
6.	To develop an ability to use Green's theorem to evaluate line integrals along simple closed contours on the plane	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Linear Differential Equations (LDE):</b> Solution of nth order LDE with Constant Coefficients, Method of Variation of Parameters, Cauchy's & Legendre's DE, Solution of Simultaneous & Symmetric Simultaneous DE. Applications of LDE to chemical engineering problems and allied engineering.	<b>(08 Hours)</b>
<b>UNIT-II</b>	<b>Partial Differential Equations (PDE):</b> Solution of Partial Differential Equations 1) $\frac{\partial u}{\partial t} = a^2 \frac{\partial^2 u}{\partial x^2}$ , 2) $\frac{\partial^2 u}{\partial t^2} = a^2 \frac{\partial^2 u}{\partial x^2}$ , 3) $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 0$	<b>(08 Hours)</b>

	By separating variables only. Applications of PDE to problems of Chemical and allied engineering.	
<b>UNIT-III</b>	<b>Fourier Transform (FT):</b> Fourier Integral theorem. Sine & Cosine Integrals. Fourier Transform, Fourier Cosine Transform, Fourier Sine Transforms and their inverses. Finite FT, Application of FT to problems on one and two dimensional heat flow problems.	<b>(08 Hours)</b>
<b>UNIT-IV</b>	<b>Laplace Transform (LT):</b> Definition of LT, Inverse LT. Properties & theorems. LT of standard functions. LT of some special functions viz. error, 1st order Bessel's, Periodic, Unit Step, Unit Impulse, ramp, jump, parabolic, Si(t) and Ei(t). Problems on finding LT & inverse LT. Applications of LT for solving ordinary differential equations, liquid level systems, consisting of single tank and two tanks in series (interacting and non-interacting systems), second order systems (damped vibrator).	<b>(08 Hours)</b>
<b>UNIT-V</b>	<b>Vector Differentiation:</b> Physical Interpretation of Vector Differentiation. Radial, Transverse, Tangential & Normal components of Velocity and Acceleration. Vector differential operator. Gradient, Divergence & Curl. Directional derivative. Vector identities. Irrotational & Solenoidal fields. Application of vector differentiation to chemical engineering.	<b>(08 Hours)</b>
<b>UNIT-VI</b>	<b>Vector Integration:</b> Line integral, Surface & Volume integrals. Work done, Green's Lemma, Gauss-Divergence and Stoke's Theorem, Applications of Vectors to problems in Fluid Mechanics, Continuity equations, Stream lines, Equations of motion, Bernoulli's equation.	<b>(08 Hours)</b>

**Assignments:**

1	Linear differential equation with constants coefficients.
2	Application of LDE and partial differential equations.
3	Fourier transform and inverse fourier a function which is neither even nor odd ,for even and odd function
4	Laplace transform and invese laplace transform and its application to differential equation
5	Vector identities and application of vector differential in mechanics.
6	line integral, surface integral and volume integral.

**Text Books/References:**

1.	Advanced Engineering Mathematics by Peter V. O'Neil (Cengage Learning).
2.	Advanced Engineering Mathematics by Erwin Kreyszig (Wiley Eastern Ltd.)
3.	Engineering Mathematics by B.V. Raman (Tata McGraw-Hill).
4.	Advanced Engineering Mathematics, 2e, by M. D. Greenberg (Pearson Education).
5.	Advanced Engineering Mathematics, Wylie C.R. & Barrett L.C. (McGraw-Hill, Inc.)
6.	Higher Engineering Mathematics by B. S. Grewal (Khanna Publication, Delhi).
7.	Applied Mathematics (Volumes I and II) by P. N. Wartikar & J. N. Wartikar (Pune Vidyarthi Griha Prakashan, Pune).
8.	Advanced Engineering Mathematics with MATLAB, 2e, by Thomas L. Harman, James Dabney and Norman Richert (Brooks/Cole, Thomson Learning).

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I, II, III
Unit Test -II	UNIT – IV, V, VI

## FLUID FLOW OPERATIONS

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have knowledge of

1. Physics, Engineering Science and Engineering Mechanics.
2. Elements of Civil Engineering

**TEACHING SCHEME:**

**EXAMINATION SCHEME:**

**CREDITS ALLOTTED:**

Lectures	: 4 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 04
Practical	: 2 Hour /Week	Unit Test	: 20 Marks	Practical	: 01
Total	: 6 Hours/Week	Continuous Assessment	: 20 Marks.	Total credits	: 05
		Term Work/Practical	: 50 Marks		
		Total	: 150 Marks		

**Course Outcomes:**

After completion of the course students will be able to

1. Describe the various properties of fluids and basic concept of fluid flow.
2. Apply the basic equations of fluid flow like Continuity and Bernoulli's equation for solving numerical in fluid flow operations.
3. Apply the basics of turbulent flow and flow measuring devices for solving numerical in fluid flow operations
4. Identify and explain the various types of energy losses for fluid flowing through a pipe.
5. Identify and select various types of fluid moving equipments for fluid flow
6. Explain the construction and working of fluidized bed reactor.

### Topics covered

<b>UNIT - I</b>	<b>Basic Concepts of Fluid Flow:</b> Types of fluid: Newtonian and Non-Newtonian fluids; Properties of fluids; Concept of viscosity, calculation and measurement; Models for non-Newtonian fluids; Types of flow: laminar, transition and turbulent and their characteristics; Concept of fluid pressure, pressure measurement and calculation.	<b>(08 Hours)</b>
<b>UNIT - II</b>	<b>Equations of Fluid Flow:</b> Basic equations of fluid flow; Equation of continuity and motion (cartesian, cylindrical and spherical coordinates) in laminar flow and its applications for calculation of velocity profiles, shear stress distribution, volumetric flow rate, power etc. in engineering applications; Flow of incompressible fluids.	<b>(08 Hours)</b>
<b>UNIT - III</b>	<b>Turbulent Flow:</b> Basics of turbulent flow; Equations of continuity and motion for turbulent flows: Reynolds averaging, Boussinesq hypothesis, Prandtl mixing length theory, Turbulent models; Flow measurement: flow measuring devices; Velocity profile;	<b>(08 Hours)</b>
<b>UNIT - IV</b>	<b>Pressure Drop Calculation and Measurement in Pipe Flow:</b> Darcy-Weisbach equation; Bernoulli's equation; Friction factor: laminar, transition and turbulent flow; Models available to predict friction factor; Friction factor: valves, bends, fittings, sudden expansion and contraction, sudden obstruction etc.; Equivalent diameter concept for energy losses.	<b>(08 Hours)</b>

<b>UNIT - V</b>	<b>Flow Moving Equipments:</b> Pumps: Types; Selection and specifications; characteristic curves; cavitation phenomena; Net positive suction head (NPSH) calculations; System and operating parameters affecting pump performance; Calculation of power requirement. Blowers and compressor: Selection and specifications; Factors affecting performance; Power calculations for given duty.	<b>(08 Hours)</b>
<b>UNIT - VI</b>	<b>Flow Through Solids:</b> Expansion characteristics of solids: Drag and drag coefficient ( $C_D$ ), terminal settling velocity, settling in presence of other particles; voidage-superficial fluid velocity relationship, $C_D$ Vs $N_{Re}$ ; Boundary layer separation; Pressure drop calculation and measurement: skin and form friction, effect of system, operating and geometrical parameters, Ergun equation, experimental methods of measuring pressure drop. Applications of fluidization: catalytic cracking, chromatographic separation etc.	<b>(08 Hours)</b>

**Term Work:**

Term work will consist of the experiments listed below, out of which at least eight experiments should be performed in laboratory by the students.

1.	To determine kinematic viscosity and to study the effect of temperature on kinematic viscosity of given oil.
2.	To study flow characteristics using Reynolds apparatus and determine Reynolds number.
3.	To determine the coefficient of discharge for venturimeter.
4.	To determine the coefficient of discharge for orificemeter.
5.	To determine Darcy Weisbach coefficient of friction of laminar and turbulent flow for given pipe.
6.	To determine friction and pressure drop for flow through helical/spiral coils.
7.	To find losses due to sudden expansion and contraction in pipe.
8.	To calculate minimum fluidization velocity using fluidized bed reactor.
9.	To verify Bernoulli's theorem.
10.	To study characteristics of centrifugal pump.
11.	To Study Darcy's law.
12.	To study pressure drop in packed bed for different fluid velocities.
13.	To determine the coefficient of discharge for different notches like rectangular notch, $45^\circ$ V notch, $60^\circ$ V notch and trapezoidal notch.
14.	To determine terminal velocity of particles in fluids of different viscosity and plot a graph of drag coefficient ( $C_D$ ) as a function of $N_{Re}$ .

**Assignments:**

1.	Numericals based on above six units.
2.	Visit to suppliers and prepare a report on detailed specifications of following fluid moving equipments.
	a) Pumps.
	b) Blowers.
	c) Compressors.
3.	Visit to suppliers and prepare a report on detailed specifications of following flow measuring devices.
	a) Venturimeter.
	b) Orificemeter.
	c) Pitot tube.
	d) Roatameters.
4.	Students have to study any five NPTEL videos related to fluid flow operations and prepare/present power point presentation.

5.	Students have to visit chemical industry and make a detailed report on overall fluid flow operations.
6.	Group discussions on any one of the following topics.
	a) Importance of fluid flow operations in chemical industries.
	b) Pumps, blowers and compressors.
	c) Flow measuring devices.
7.	Prepare models for various types of valves and write industrial applications.
8.	Prepare models for various types of bends and write industrial applications.
9.	Prepare models for various types of fittings and write industrial applications.
10.	Prepare a report on fluid flow operations which are newly introduced in the current year.
11.	Solve last five years GATE question papers with reference to fluid flow operations subject.
12.	Write a report on your visit to research and development laboratory of national/international repute.
13.	Technical interview based on knowledge of fluid flow operations.
14.	With the help of this subject knowledge, write a report on how you would apply your concepts in industry.
In addition to these above stated assignments concern faculty member may design his/her won.

<b>Syllabus for Unit Test:</b>	
Unit Test - I	UNIT– I, II, III
Unit Test - II	UNIT– IV, V, VI

## PROCESS HEAT TRANSFER

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have

Basic knowledge of units and dimensions, mathematical concepts like differential and integral etc, fluid flow concepts like continuity equation, momentum balance.

**TEACHING SCHEME:**

Lectures : 4 Hours/Week

Practical : 2 Hour /Week

Total : 6 Hours/Week

**EXAMINATION SCHEME:**

End Semester Examination : 60 Marks

Unit Test : 20 Marks

Continuous Assessment : 20 Marks

Termwork / practical :50 Marks

Total :150 Marks

**CREDITS ALLOTTED:**

Theory : 04

Practical : 01

Total credits : 05

**Course Outcomes:**

After completion of the course students would be able to

1. Evaluate heat loss through pipe insulation, critical and optimum thickness for insulation.
2. Identify the importance of dimensional analysis and derive the dimensionless numbers.
3. Calculate the heat transfer coefficient and heat transfer rate for vertical, horizontal plate in case of film-wise condensation.
4. Apply appropriate empirical correlations to estimate critical heat flux in boiling.
5. Explain the evaporation phenomena and estimate economy of the evaporator.
6. Compute heat transfer rates in case of conduction, convection and radiation.

### Topics covered

<b>UNIT-I</b>	<p><b>Heat conduction</b> Thermal conductivity: solids, liquids, and gases; Generalized equation for heat conduction; Steady state heat conduction through: plane slab, composite slab, hollow cylinder, composite cylinder and hollow sphere; Heat loss through pipe: maximum loss, critical and optimum thickness of insulation; its application for the calculation of temperature profile, maximum temperature rise or drop, heat flow at surface; Heat transfer through extended surfaces of uniform cross section.</p>	<b>(08 Hours)</b>
<b>UNIT-II</b>	<p><b>Convection without phase change</b> Basic concepts of convection; Natural and forced convection; Dimensional analysis: dimensionless groups and their physical significance; Film coefficients; Factors affecting film coefficient; Fouling resistance; Empirical equations for convection heat transfer in turbulent flow through tubes, through annulus and over a flat plate; Steady state convection heat transfer equation to calculate temperature distribution in laminar and turbulent flows.</p>	<b>(08 Hours)</b>
<b>UNIT-III</b>	<p><b>Convection with phase change</b> Condensation basic concepts; Dropwise and filmwise condensation; Condensation on surfaces-Nusselt's theory: vertical surface, horizontal surface, and inclined surface. Boiling types; Effect of physical properties; Pool boiling curve; Correlations used in boiling; Concept of critical heat flux.</p>	<b>(08 Hours)</b>
<b>UNIT-IV</b>	<p><b>Radiation</b> Basic concepts; Thermal radiation; Black body radiation; Properties and laws of radiation; The radiation shape factor; Laws of shape factor; Various cases of radiation between two surfaces; Radiation shields; Radiant heat exchange in an enclosure having black surfaces.</p>	<b>(08 Hours)</b>
<b>UNIT-V</b>	<p><b>Evaporation</b></p>	<b>(08 Hours)</b>

	Introduction; Types of evaporators; Material and energy balance; Boiling point elevation; Capacity and economy; Multiple effect evaporators.	
<b>UNIT-VI</b>	<b>Unsteady state processes</b> Unsteady state heat conduction: infinite slab, infinite cylinder, sphere. Heat transfer in agitated vessels: calculation of film coefficient in coil, jacket; heating and cooling times; Application to batch reactor and processes.	<b>(08 Hours)</b>
<b>Assignments</b>		
1.	Write a report on the recent advances in heat transfer processes with reference to the current year.	
2.	Solve old (last five years) question papers with reference to particular topic.	
3.	Prepare a model for any of the heat transfer equipment.	
4.	Prepare a report on heat transfer equipments which are newly introduced in the current year.	
5.	Give fifteen minutes presentation (seminar) on particular topic and prepare a report.	
6.	Evaluate capacity and economy for any industrial evaporator.	
7.	Estimate how much heat transfer rate is decreased due to the scale formation on surface of industrial heat transfer equipment?	
8.	By determining optimum thickness of insulation give solution to an industrial problem to minimize the heat loss.	
9.	Design laboratory manuals better than existing ones with clearly shown specimen calculations.	
10.	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.	
11.	Write a technical report on your visit to a process industry.	
12.	Solve old (last ten years) GATE question papers with reference to heat transfer subject.	
13.	Group discussion on the recent advances in heat transfer processes.	
14.	Write a report on your visit to research and development laboratory of national/international repute.	
15.	Technical interview based on the knowledge of heat transfer.	
In addition to these above stated assignments concerned faculty member may design his/her own assignments		
<b>Term Work:</b>		
Term work will consist of the experiments listed below, out of which any eight experiments are to be performed in laboratory by the students.		
1.	To determine rate of heat flow and thermal conductivity of an insulating material.	
2.	To determine thermal conductivity of a metal bar.	
3.	To study Newton's law of cooling to find rate of heat flow.	
4.	To determine the local heat transfer coefficients using the various correlations in natural convection.	
5.	To determine heat transfer coefficient in forced convection.	
6.	To study film wise condensation.	
7.	To study drop wise condensation.	
8.	To determine the critical heat flux	
9.	To study Stefan-Boltzman law and find the value of its constant.	
10.	To study evaporators.	
11.	To determine emissivity of an aluminum plate.	
12.	To study unsteady state processes.

<b>Syllabus for Unit Test:</b>	
Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

## CHEMICAL PROCESS INDUSTRIES

**Designation:** Professional Core

**Course Pre-requisites:** None

<b>TEACHING SCHEME:</b>		<b>EXAMINATION SCHEME:</b>		<b>CREDITS ALLOTTED:</b>	
Lectures	: 02 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 03
Tutorial	: 01 Hours /Week	Unit Test	: 20 Marks	Total credits	: 03
Total	: 03 Hours/Week	Continuous Assessment	: 20 Marks		
		Term Work/Oral	: 50Marks		
		Total	: 150 Marks		

### Course Outcomes:

After completion of the course students will be able to

1. Understand the concept of Unit operation and Unit processes as well the significance of process flow diagram.
2. Understand the manufacturing processes for soda ash, caustic and chlorine and Indian scenario of chlor-alkali industries.
3. Understand manufacturing processes of sulfur and nitrogen industry
4. Understand nitration of hydrocarbons and typical industrial process for nitration
5. Understand sulfonation and sulfation process used in organic industry
6. Understand processes for various petrochemicals

### Topics covered

<b>UNIT-I</b>	<b>Concept of Unit Operation and Unit process:</b> Unit operations and unit processes, Concept of block diagram, process flow diagram (ASME guidelines). Water for the chemical process industry and its treatment: Boiler feed-water, Cooling tower water, Process Plant water.	<b>(08 Hours)</b>
<b>UNIT-II</b>	<b>Chlor -alkali industries:</b> current status (Indian and global), Production and consumption pattern, Different processes for the manufacture of Soda ash, Caustic and chlorine	<b>(08Hours)</b>
<b>UNIT-III</b>	<b>Sulfur Industry:</b> Current status (Indian and global), Production and consumption pattern Sulfur and Manufacture of sulfuric acid, Different processes and comparison. <b>Nitrogen Industry:</b> Current status (Indian and global), Production and consumption pattern Ammonia, Nitric acid, Urea and other nitrogen fertilizers, Mixed fertilizers.	<b>(08 Hours)</b>
<b>UNIT-IV</b>	<b>Nitration:</b> Nitrating Agents, Kinetics and Mechanism of Aromatic Nitration, Nitration of Paraffinic hydrocarbons, Liquid phase nitration, Nitro compounds, and Commercial nitration process.	<b>(08 Hours)</b>
<b>UNIT-V</b>	<b>Sulfonation and Sulfation:</b> Sulfonating and sulfating agents and their principal applications, Sulfonation and Sulfation of aliphatic compounds, Sulfonation of aromatic compounds, Commercial sulfonation process.	<b>(08 Hours)</b>
<b>UNIT-VI</b>	<b>Petrochemicals:</b> Production of petrochemical precursors - olefins and aromatics, Production of ethylene, propylene, formaldehyde, methanol, ethylene oxide, ethanolamine, cumene, ethylene glycol, ethyl benzene	<b>(08 Hours)</b>

### List of Practicals:

The practical shall include at least (6) assignments from the various units mentioned in the syllabus.

One industrial visit should be arranged to the process industry and students should prepare the report on the same as a part of the term work.

**Expert Interaction:**

Lecture(s) by eminent scholar(s) on the topic(s) mentioned in the syllabus.

**Assignments:**

1	One industrial visit should be arranged to the process industry and the students will prepare the report which includes the consumption pattern of the products produced, process flow diagram and process description, major engineering problems in the industry.
2	Students should prepare the plant-layout for the industry visited.
3	Students should visit one CETP (Central effluent Treatment Plant) nearby and prepare the report which includes different unit operations in CETP, Significance of each unit.
4	Students should visit one STP (Sewage treatment plant) and prepare the report which includes different unit operations in STP, block diagram.
5	Students should compile the list of vendors (manufacturers of pumps, contact, and address) along with the details like type, specifications, and costs and should prepare the comparative for the same.
6	Students should prepare the report on “Material of construction” for pumps for special applications using the data from assignment 4.
7	Students should make a report on “Indian scenario of inorganic industries” which will include the name of industries (from different chemical zones), products manufactured, and production capacity.
8	Students should make a report on “Fertilizer industries in Maharashtra and Gujarat” which will include the name of industries (from different chemical zones), products manufactured, and production capacity.
9	Model making of any one Unit operation used in chemical process industry.
10	Describe the different equipment used to run the process plant with different utilities.
11	Students should compile the list of Boiler manufacturers, contacts, and address along with their product range specifications.
12	Students should compile the list of vendors providing “water treatment plants” in chemical process industries along with their product specifications.
13	Give a presentation on “commercial aspects of petrochemical products”.
14	AutoCAD drawing of process flow diagram for any one process from the syllabus

**Text Books**

2	Kirk and Othmer, "Encyclopaedia of Chemical Technology" Wiley (2004).
3	Pandey G.N &Shukla.S.D, “Chemical Technology Vol - I” Vikas publication.

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV ,V,VI

## CHEMICAL ENGINEERING THERMODYNAMICS-II

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have knowledge of

- |    |                                       |
|----|---------------------------------------|
| 1. | Chemical Engineering Thermodynamics I |
| 2. | Mathematics                           |
| 3. | Chemistry, Physics                    |

**TEACHING SCHEME:**

**EXAMINATION SCHEME:**

**CREDITS ALLOTTED:**

Lectures	: 3 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 03
Tutorial	: 2 Hour /Week	Unit Test	: 20 Marks	Tutorial	: 01
		Continuous Assessment	: 20 Marks	Total credits	: 04
		Term Work/Oral	: 50 Marks		
		Total	: 150 Marks		

**Course Outcomes:**

After completion of the course students will be able to

- |    |   |
|----|---|
| 1. | a) Understand the concept of fugacity and its application to gaseous and liquid systems<br>b) Understand residual and excess properties to demarcate non- ideality in gaseous phase and liquid solution |
| 2. | a) Understand criteria of phase equilibrium and stability<br>b) Make typical phase equilibrium calculations pertaining to VLE, LLE, SLE, SVE, etc.  |
| 3. | a) Perform bubble P, dew P, bubble T, and dew T calculations for VLE<br>b) Carry out thermodynamic consistency test for experimental VLE data   |
| 4. | a) Understand the criterion for chemical reaction equilibrium<br>b) Establish relation of equilibrium constant to composition for gas phase and liquid phase reactions.                                 |
| 5. | a) Calculate equilibrium constant for heterogeneous system<br>b) Understand phase rule for reacting system and its physical significance  |
| 6. | Understand thermodynamics of liquid-liquid equilibrium.   |

### Topics covered

<b>UNIT - I</b>	<p><b>Solution Thermodynamics:</b></p> <p>Concept of chemical potential; chemical potential as a criterion of phase equilibria; Concept of non ideality in gaseous mixtures; Fugacity and fugacity coefficient for species in solution; Methods of determination of fugacity coefficient; Concept of non-ideality in liquid mixtures; Activity and</p>	<b>(06 Hours)</b>
-----------------	--	-------------------

	activity coefficient for species in solution; Excess properties; Gibbs excess energy; Model for estimation of excess property; Property change of mixing and heat effects in mixing.	
<b>UNIT - II</b>	<b>Phase Equilibria:</b> Criteria of phase equilibrium; Criterion of stability; Phase equilibria in single and multi component system; Phase rule: Duhems theorem; LLE, VLLE, SLE, and SVE; Phase diagrams; Dilute solution laws: Nernst's law, osmotic equilibrium.	<b>(06 Hours)</b>
<b>UNIT - III</b>	<b>Vapor-liquid equilibrium (VLE):</b> Qualitative behavior of VLE; Basic equation for vapor- liquid equilibrium; Liquid phase properties from VLE data; VLE at low to moderate pressures: excess Gibbs free energy models; Azeotropic data; VLE at high pressures; Multicomponent vapor- liquid equilibria; Bubble point and dew point calculations; Thermodynamic consistency test for VLE data.	<b>(06 Hours)</b>
<b>UNIT - IV</b>	<b>Chemical reaction equilibria:</b> The reaction coordinate; Application of equilibrium criteria to chemical reactions; The standard Gibbs energy change and the equilibrium constant; Effect of temperature on the equilibrium constant; Evaluation of equilibrium constant; Relation of equilibrium constants to composition; Phase rule for reacting systems; Multi-reaction equilibria.	<b>(06 Hours)</b>
<b>UNIT - V</b>	<b>Heterogeneous reaction equilibrium:</b> Notable industrial heterogeneous systems and thermodynamic role; The Gibbs energy change and equilibrium constant; Estimation of equilibrium constant for heterogeneous system by defining standard state of the phases involved; Pressure of decomposition; Simultaneous reactions; Combined physical and chemical equilibria.	<b>(06 Hours)</b>
<b>UNIT - VI</b>	<b>Liquid-liquid Equilibria (LLE):</b>	<b>(06 Hours)</b>

	Quantitative behavior of LLE; Basic equation governing LLE; Distribution coefficient (Partition Coefficient); Activity coefficient and its determination; Selection of extractant; Solubility parameters and estimation.	
<b>Tutorials/Assignments:</b>		
1	Questions involving fugacity and activity for the species in solution.	
2	Solving numerical in connection with phase equilibria.	
3	Solving numerical based on application of Rault's law for the calculation of dew point and bubble point	
4	Conducting surprise MCQ test for students.	
5	Draw P-xy and T-xy diagrams.	
6	Solving numerical based on chemical reaction equilibrium.	
7	Enhancement in collaborative learning is done through, group assignments that will be given to encourage students to work with classmates to discuss and complete homework assignments.	
8	Students have to study any five NPTEL videos related to Chemical Engineering Thermodynamics I and prepare/present power point presentation.	
9	Group discussions on any of the following topics: a) Importance of Phase equilibria in chemical industries. b) Thermodynamic properties for pure species and species in solution	
10	Preparation of a brief report on applicability of liquid-liquid equilibrium (LLE) in chemical engineering systems.	
11	Solve question papers of CET II of previous THREE years.	
12	Unsolved numerical from the reference books on various topics studied.	
<b>Term Work:</b>		
Term work includes minimum 08 assignments/problems on each unit covered		
<b>Text Books/ References:</b>

**Grand Total : 50**

**Elective I: Advanced Material Science**

**Designation:** Elective

**Course Pre-requisites:**

- |           |  |
|-----------|--|
| <b>1.</b> | Basic chemistry, Basic physics, Chemical Engineering Materials, Physical chemistry, Chemical Reaction Engineering, Chemical Engineering Thermodynamics |
|-----------|--|

**TEACHING SCHEME:**

**EXAMINATION SCHEME:**

**CREDITS ALLOTTED:**

Lectures: 3 Hours/Week

End Semester Examination: 60 marks

Theory : 03

Continuous Assessment: 40 marks

**Course Outcomes:**

- |           |   |
|-----------|---|
| <b>1.</b> | Explain basics of polymers and their classifications                                    |
| <b>2.</b> | Explain various polymer properties and the their effect on engineering properties       |
| <b>3.</b> | Determine suitable process for polymer synthesis and describe its mechanism             |
| <b>4.</b> | Understand the basics of polymer characterizations and discuss its effect on properties |
| <b>5.</b> | Explain the formation of composites and blends in polymers                              |
| <b>6.</b> | Explain the methods of polymer compounding and processing                               |

**Topics covered**

<b>UNIT-I</b>	<b>Material composites</b> Introduction to composite materials, factors influencing the properties of composite materials like fiber parameter, matrix, interface & molding methods. Phase selection criteria. Reinforcing mechanisms. Interfaces, advantages and disadvantages. Polymer composites. Reinforcing and matrix materials, prepregs, fiber winding techniques, fabrication techniques, laminates, mechanical behavior, etc.	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Composite and reinforcement</b> Metal composites, types of reinforcement, chemical compatibility, fabrication processes, mechanical behavior and properties, ceramic composites. Matrices and reinforcement. Why to reinforce ceramics, fabrication methods, crack propagation and mechanical behavior.	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Carbon composites</b> Carbon composites, their properties, fabrication methods and their applications, ablative polymers, their applications, air craft materials, introduction to nonmaterial, synthesis & characterization of nonmaterial, application of nonmaterial with special reference to chemical engineering.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Nuclear materials</b> Atomic structure, atomic number, mass number, isotopes, nuclear energy and nuclear forces, binding energy, nuclear stability, radioactivity, nuclear reactions, nuclear fissions, nuclear fusion, Types of waste –disposal – radiation hazards and prevention	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Biomaterials</b>	<b>(06 Hours)</b>

	Properties of biomaterials: Physical, thermal, electrical and optical properties of bio-materials and their application to processing. Novel Biomaterials and Uses in Engineering and Tissue Engineering: Hydrogels, self-assembling peptides, Implants materials: Metallic implant materials, hydroxyapatite glass ceramics carbons, Polymeric implant, medical applications.	<b>Hours)</b>
<b>UNIT-VI</b>	<b>Nanomaterials</b> Basics - distinction between molecules, nanoparticles and bulk materials; size-dependent properties. Nanoparticles: nano cluster, nano rod, nanotube (CNT) and nanowire. Synthesis: precipitation, thermolysis, hydrothermal, solvothermal, electrode position, chemical vapour deposition, laser ablation; Properties and applications	<b>(06 Hours)</b>

**Assignments:**

1. Prepare the report on any advanced material comprising its significance, preparation, characterization, processing, properties and application

**References/Text Books:**

1. L.C. Merrite, "Basic principles of Nuclear science and Reactors" Wiley Eastern 1977.
2. Polymers of high technology, electronics and photonics, Bowden M.J & Turner S.R., ACS Symp. Ser. 346, 1987.
3. Composite Materials , Chawala K.K., Springer Science & Business Media.
4. Buddy D. Ratner Allan S. HoffmanFrederick J. SchoenJack E. Lemons Biomaterials Science, Second Edition: Wiley Science 2004.
5. "An Introduction to Materials Engineering and Science for Chemical and Materials Engineers," by Brian S. Mitchell; Wiley-Interscience, 2003; ISBN 0471436232.

7. Bhusan, Bharat (Ed), "Springer Handbook of Nanotechnology", 2nd Edition, 2007.

**Syllabus for Unit Test:**

Unit Test –I	UNIT – I ,II,III
Unit Test –II	UNIT – IV,V,VI

## ELECTIVE I COMBUSTION ENGINEERING

<b>Designation:</b> Elective		
<b>Course Pre-requisites:</b>		
Students should have		
1.	Basic knowledge of chemistry	
<b>TEACHING SCHEME:</b>		
<b>EXAMINATION SCHEME:</b>		
<b>CREDITS ALLOTTED:</b>		
Lectures: 3Hours/Week	End Semester Examination: 60 Marks	Theory : 03
	Unit Test: 20 Marks	Total credits: 03
	Continuous Assessment: 20 Marks.	
	Total : 100 Marks	
<b>Course Outcomes:</b>		
After completion of the course students will be able to		
1.	Identify the fundamental definitions, properties and various measurement techniques for fuels.	
2.	Describe the combustion techniques of solid fuel i.e. coal.	
3.	Explain the concept of exploration of crude petroleum and refinery equipments.	
4.	Explain about different important gaseous fuels	
5.	Emphasis is given to combustion of various fuels in the light of thermodynamics and applies the knowledge of gross and net calorific values of fuel and solves the problems based on them.	
6.	Describe the incineration technology.	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Introduction:</b> History of Fuels : History of solid fuel, History of liquid fuels and gaseous fuels, Production, present scenario and consumption pattern of fuels, Fundamental definitions, properties and various measurements: Definitions and properties of solid fuels, Definitions and properties of liquid and gaseous fuels, Various measurement techniques.	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Solid Fossil Fuel (Coal):</b> Coal classification, composition and basis, Coal mining, Coal preparation and washing, Combustion of coal and coke making (Action of heat on different coal samples, Different types of coal combustion techniques, Coal tar distillation), Coal liquefaction (Direct liquefaction, Indirect liquefaction), Coal gasification	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Liquid Fossil Fuel (Petroleum):</b> Exploration of crude petroleum, Evaluation of crude, Distillation (Atmospheric distillation, Vacuum distillation), Secondary processing (Cracking, Thermal cracking, Visbreaking, Coking, Catalytic cracking, Reforming of naphtha, Hydrotreatment, dewaxing, deasphalting), Refinery equipments.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Gaseous Fuels:</b> Natural gas and LPG, Producer gas, Water gas, Hydrogen, Acetylene, Other fuel gases	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Combustion Technology:</b> Fundamentals of thermochemistry, Combustion air calculation, Calculation of calorific value of fuels, Adiabatic flame temperature calculation, Mechanism and kinetics of combustion, Flame properties, Combustion burners, Combustion furnaces, Internal combustion engines	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Incineration Technology:</b> Classification, Key Issues, Pretreatment of Waste, Sorting, Homogenization, Moving Grate Incineration, Rotary Kiln Incineration, Fluidized Bed Incineration, advantages, disadvantages and applications of incineration. Furnaces and Boilers.	<b>(06 Hours)</b>

<b>Assignment:</b>	
1.	Presentations on any topic of combustion engineering.
2.	Recent trends in combustion technology.
3.	Alternative fuel for engines.
4.	Measurement of calorific values of any two types of fuel.
5.	Detail study on solid fossil fuel.
6.	Solve last five years GATE question papers with reference to combustion engineering.
7.	Students have to study any five NPTEL videos related to combustion engineering and prepare/present power point presentation.
8.	Numerical based on above fifth unit.
9.	Detail study on liquid fossil fuel.
10.	Detail study on gaseous fuels.
11.	With the help of this subject knowledge, write a report on how you would apply your concepts in industry.
12.	Prepare a report on combustion technology which is newly introduced in the current year.
13.	Write a report on incineration technology.
In addition to these above stated assignments concern faculty member may design his/her won.

<b>Syllabus for Unit Test:</b>	
Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

**ELECTIVE-I : MULTIPHASE FLOW**

**Designation:** Elective

**Course Pre-requisites:**

Students should have basic knowledge of

1 | Fluid Flow Operations

2 | Process Heat Transfer

<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Lectures : 3 Hours/Week	End Semester Examination : 60 Marks	Theory : 03
	Continuous Assessment : 40 Marks	Total credits : 03
	Total : 100 Marks	

**Course Outcomes:**

After completion of the course students will be able to

1. Explain the concept of two phase flow and describe the flow types, flow regimes in horizontal and vertical flow
2. Describe the two phase flow classifications.
3. Explain the mixing power correlations.
4. Identify and explain packed bed, fluidized bed, bubble column and its design aspects.
5. Explain the concept of multiphase flow and identify the flow regimes.
6. Explain cavitation and RTD in multiphase flow system.

**Topics covered**

<b>UNIT-I</b>	<b>Gas/liquid and liquid/liquid Two phase flow:</b> Scope and significance of multiphase flows, Dimensionless numbers in multiphase flows; Flow types and regimes in horizontal and vertical flow, Regime maps, Behaviour of non-Newtonian fluids in two phase flow.	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Flow Classification:</b> Two-phase Co-current flow of Gas-Liquid, Gas-Solid and Liquid-Liquid, Upward and Downward Flow in Vertical pipes. Suspensions of Solid and their transport in Horizontal Pipes. Drag Reduction Phenomena, Laminar, Turbulent and Creeping Flow Regimes.	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Mixing Power Correlations:</b> Theories of Intensity and Scale of Turbulence. Calculation of Circulation Velocities and Power Consumption in Agitated Vessels for Newtonian and Non-Newtonian Fluids. Blending and Mixing of Phases, flow patterns. Power requires for aeration to suspend to an Immiscible Liquid or Solids in Slurry Reactors, Prediction of optimum speed of Impeller Rotor. Mixing equipments.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Quantification of Flow System:</b> Prediction of Holdup, Pressure Drop and bubble size in pipe flow, Lockhart – Martinelli Parameters, Bubble Column and its Design aspects; Flow through Packed Bed and Fluidized Bed, Minimum Carryover Velocity. Holdup Ratios, Pressure Drop and Transport Velocities and their prediction. Solid-Fluid Conveying and Settling.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Flow in Three - Phase Systems:</b>	<b>(06 Hours)</b>

	Introduction to three phase flow; Flow regime identification, pressure drop, void fraction and flow rate measurement, Prediction of Holdup, Pressure Drop and throughput velocities in three –phase system. phase separation and settling behaviour, analysis of stratified and bubble flow, formation of bubbles and drops and their size distribution and hold up in different flow system, momentum and energy relations.	
<b>UNIT-VI</b>	<p><b>RTD in multiphase flow system:</b> Non-Ideal Flow: Residence time distribution of fluid in vessel, non-ideal flow patterns, E, F, C curve, Mean and variance, residence time, Models for non-ideal flow.</p> <p><b>Cavitation:</b> Introduction, types of cavitation, mechanism of cavitation. Key features of bubble cavitation: cavitation inception, cavitation bubble collapse, shape distortion during bubble collapse, cavitation damage. Cavitation bubbles: observations of cavitating bubbles, cavitation noise and cavitation luminescence.</p>	<b>(06 Hours)</b>

### Assignments

1	Give fifteen minutes presentation (seminar) on particular topic and prepare a report.
2	Students have to study any five NPTEL videos related to multiphase flow and prepare/present power point presentation.
3	Students have to visit chemical industry and make a detailed report on multiphase flow.
4	Write a report on the recent advances in multiphase flow with reference to the current year.
5	Prepare models for bubble column, packed bed and fluidized bed reactors.
6	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.
7	Write a report on your visit to research and development laboratory of national/international repute.
8	Solve old (last five years) GATE question papers with reference to multiphase flow.
9	Group discussions on any one topic from above six units.
10	Technical interview based on the knowledge of multiphase flow.

In addition to these above stated assignments concerned faculty member may design his/her own assignments

<b>Syllabus for Unit Test:</b>	
--------------------------------	--

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

## Elective I Rheology

**Designation:** Elective

<b>TEACHING SCHEME:</b>	<b>EXAMINATION SCHEME:</b>	<b>CREDITS ALLOTTED:</b>
Lectures: 3 Hours/Week	End Semester Examination: 60 Marks	Theory : 03
Practical : ---	Unit Test: 20 Marks	Practical: ---
Total: 3Hours/Week	Continuous Assessment: 20 Marks	Total credits: 03
	Total :100 Marks	

### Course Outcomes:

After completion of the course students would be able to

1.	Apply the rheological models to study the rheology of non-Newtonian fluids
2.	Describe the operation of instruments used for measurements of rheological properties
3.	Obtain the rheological behavior of non-Newtonian fluids
4.	Explain the rheological models for rubber compounds
5.	Describe the models to represent behavior of polymer liquids
6.	Obtain the variable influencing the rheology of fluids

### Topics covered

<b>UNIT-I</b>	<b>Introduction</b> Types of fluid flow, time dependant fluids, shear rate dependant fluids, Newtonian and Non Newtonian fluids, Definition of Rheology, Rheological Perspective, The importance of nonlinearity, Solids and liquids, Components of rheological research: Rheometry, Constitutive equations.	<b>(08 Hours)</b>
<b>UNIT-II</b>	<b>Rheological Models</b> Power law fluid Model, Eyring Model, Bingham Plastic fluid model, Ellis fluid model, Eyring-Powel model , Reiner-Phillipoff model , Meter model. <b>Instruments used for measurements of Rheological properties</b> capillary rheometer, melt flow index, cone and plate viscometer, Torque rheometer, Mooney viscometer	<b>(08 Hours)</b>
<b>UNIT-III</b>	<b>Experimental Studies of Rheological Behavior :</b> Steady Shear Flow: Elongation Flow, Oscillating Flow: Stress Relaxation, Temperature Dependence: Processability, Test & Dependence upon Polymer Structure, Shear Flow Boundary Conditions and Slippage, Flow induced Degradation & Mechanochemistry.	<b>(08 Hours)</b>
<b>UNIT-IV</b>	<b>Rheology of Rubber</b> Rheological Models and Approaches to Flow Analysis: One Dimensional Rheological Models for Rubber Compounds: Plastic Viscous Model, Plastic Viscoelastic Model, Thixotropic Model, Equation of Motion and Dimensional Analysis of Non-Newtonian Fluids: General, Viscoelastic Fluids, Plastic Fluids, Energy Equation & Non Isothermal Flow :Energy Equation, Dimensional Analysis, Classification of Flows :Internal & External Flow, Hydrodynamic Lubrication Theory.	<b>(08 Hours)</b>
<b>UNIT-V</b>	<b>Rheology of polymers</b> <b>Introduction</b>	<b>(08 Hours)</b>

	Elastic materials ,Viscous materials, Viscoelasticity, Effect of rate of strain, temperature and time on mechanical behavior of polymeric materials, creep, stress relaxation <b>Models to represent behavior of Polymer Liquids</b> Mechanical models, stress strain response of spring and dashpot Viscoelastic models, Maxwell element, Voigt Oelvin element, response to creep and stress relaxation, Four parameter model, dynamic mechanical properties, behavior of Maxwell element and relaxation spectra	
<b>UNIT-VI</b>	<b>Variable influencing the Rheology of fluids</b> Effect of Temperature, Effect of Pressure, Effect of Molecular weight & Molecular structure, effect of entanglement of molecules & molecular motions.	<b>(08 Hours)</b>

### Assignments

1.	Group discussion on the recent advances in rheology.
2.	Presentation on a instruments used for measurements of rheological properties.
3.	Group discussion on importance of studying this elective.
4.	Technical interview based on the knowledge of rheology.
5.	Presentation on rheological models for rubber compounds.
6.	Write a report on your visit to research and development laboratory of national/international repute.
7.	Technical interview based on the knowledge of rheology.
8.	Preparation of report on recent trends in rheology of polymers.
9.	Group discussion on variable influencing the rheology of fluids

In addition to these above stated assignments concerned faculty member may design his/her own assignments

### Text Books/References:

1.	R. B. Bird, W. E. Stewart, E. N. Lightfoot, “ Transport Phenomena” Wiley- India, New Delhi

### Syllabus for Unit Test:

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV, V,VI

## MASS TRANSFER OPERATION

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have basic knowledge of

- |   |                                   |
|---|-----------------------------------|
| 1 | Heat Transfer operation           |
| 2 | Unit Operations and stoichiometry |

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Lectures : 4 Hours/Week	End Semester Examination : 60 Marks	Theory : 04
Practical : 2 Hour /Week	Unit Test : 20 Marks	Practical : 01
Total : 6Hours/Week	Continuous Assessment : 20 Marks	Total credits : 05
	Term work / practical : 50 Marks	
	Total : 150 Marks	

**Course Outcomes:**

After completion of the course students would be able to

- |    |   |
|----|---|
| 1. | Evaluate diffusivity and rate of diffusion.   |
| 2. | Evaluate mass transfer coefficients and understand interphase mass transfer.          |
| 3. | Calculate the height of transfer unit, number of transfer unit, in absorption column. |
| 4. | Calculate rate of mass transfer in humidification.                                    |
| 5. | Estimate rate and time of drying.   |
| 6. | Analyze type of crystallization and estimate yield of crystallization.                |

### Topics covered

<b>UNIT-I</b>	<p><b>Diffusion</b> Molecular diffusion in fluids: Steady state diffusion in fluids at rest and in laminar flow, Steady state diffusion of A through nondiffusing B , equimolar counter diffusion, steady state diffusion in multicomponent mixture , molecular diffusion in fluids, diffusivity of liquids and gases, effect of temperature and pressure on diffusivity, diffusion in solids. Laws of diffusion and empirical equations – Maxwell’s law, Stefan’s law, Winkle man’s method.</p>	<b>(08 Hours)</b>
<b>UNIT-II</b>	<p><b>Mass transfer Coefficient and Interphase Mass Transfer:</b> a) <b>Mass transfer coefficients:</b> Mass transfer coefficient in laminar flow and in turbulent flow. Relation of individual and overall mass transfer coefficient. Theories of mass transfer. Mass, heat and momentum transfer analogies. b) <b>Interphase mass transfer.</b> Equilibrium in mass transfer, two resistance concept. diffusion between phases. Steady state co-current and counter current processes. continuous crosscurrent, counter-current, crosscurrent cascade operations and mass balances.</p>	<b>(08 Hours)</b>
<b>UNIT-III</b>	<p><b>Absorption:</b> Introduction to absorption, types of tower packing’s, contact between liquid and gas, pressure drop and limiting flow rates, material balances for each flow , limiting gas-liquid ratio, rate of absorption, calculation of HTU, NTU and</p>	<b>(08 Hours)</b>

	HETP. Alternate forms of transfer coefficients and their relations. Tray Efficiencies, absorption in plate columns, absorption with chemical reaction. Equipments for absorption column.	
<b>UNIT-IV</b>	<b>Humidification:</b> Vapor-liquid equilibrium, enthalpy for pure substances, definitions of humidity terms, adiabatic saturation temperature, wet bulb and dry bulb temperatures, study of humidity charts, lewis relation. method of adiabatic humidification and dehumidification. Equipments for humidification, cooling tower design.	<b>(08 Hours)</b>
<b>UNIT-V</b>	<b>Drying:</b> Basic principles of drying. equilibrium in drying. definitions of terms in drying, types of moisture binding, rate of drying curve, mechanism of batch drying and continuous drying, time requirement for drying, mechanism of moisture movement in solids. Equipments used for drying: Classification of dryers, solids handling in dryers, equipments for batch and continuous drying processes: working principle of tray driers, tower driers, rotary driers, spray driers. Concept of freeze drying	<b>(08 Hours)</b>
<b>UNIT-VI</b>	<b>Crystallisation:</b> Introduction to the process, principal rate of crystallization, Mier's supersaturation theory, growth and properties of crystals, crystallisation rate, calculations of yield, mass and enthalpy balances. Equipments used in crystallization.	<b>(08 Hours)</b>

### Assignments

1.	Write a report on the recent advances in mass transfer processes with reference to the current year.
2.	Solve old (last five years) question papers with reference to particular topic.
3.	Prepare a model for any of the Mass transfer equipment.
4.	Prepare a report on Mass transfer equipments which are newly introduced in the current year.
5.	Give fifteen minutes presentation (seminar) on particular topic and prepare a report.
6.	Evaluate efficiencies of different Gas-liquid contact equipment. .
7.	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.
8.	Design laboratory manuals better than existing ones with clearly shown specimen calculations.
9.	Compare working and principles for different mass transfer operations.
10.	Solve numerical for any industrial data.
11.	Write a technical report on your visit to a process industry.
12.	Solve old (last ten years) GATE question papers with reference to Mass transfer-I subject.
13.	Group discussion on the recent advances in mass Transfer equipments.
14.	Write a report on your visit to research and development laboratory of national/international repute.
15.	Technical interview based on the knowledge of Mass transfer.

In addition to these above stated assignments concerned faculty member may design his/her own assignments

### Term Work:

Term work will consist of the experiments listed below, out of which any eight experiments are to be

performed in laboratory by the students.	
1.	To calculate diffusion coefficient in Liquid-Liquid diffusion.
2.	To calculate diffusion coefficient in still air..
3.	To study characteristics of Wetted Wall Column.
4.	To calculate individual and overall interface mass transfer coefficient.
5.	To estimate efficiency of cooling Tower.
6.	To estimate rate of drying in tray drier/rotary drier
7.	To study the crystallization process by air, water cooling and seeding.
8.	Humidification and Dehumidification experiment.
9.	To study agitated batch crystallizer
10.	Study of Spray drier
<b>Text Books/References:</b>

2.	Treybal R.E., Mass Transfer Operations, 3 <sup>rd</sup> Ed., McGrawHill, 1981.
3.	King C. J. "Separation Techniques," McGraw Hill Publications
4.	Richardson, J. F., and J. M. Coulson: "Chemical Engineering," Butterworth Heinemann, Volume 1.
5.	E. L. Cussler, "Diffusion Mass Transfer in fluid systems " 3 <sup>rd</sup> Ed. Cambridge Series in Chemical Engineering.
<b>Syllabus for Unit Test:</b>	
Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

<b>CHEMICAL REACTION ENGINEERING-I</b>		
<b>Designation:</b> Professional Core		
<b>Course Pre-requisites:</b>		
Students should have basic knowledge of		
1	Analytical and physical Chemistry	
2	Process Calculation	
3	Mathematics including integration and derivation	
<b>TEACHING SCHEME:</b>		
<b>EXAMINATION SCHEME:</b>		
<b>CREDITS ALLOTTED:</b>		
Lectures: 4 Hours/Week	End Semester Examination: 60 Marks	Theory : 04
Practical : 2 Hour /Week	Unit Test: 20 Marks	Practical: 01
Total : 6Hours/Week	Continuous Assessment: 20 Marks	Total credits: 05
	Termwork / practical:50 Marks	
	Total :150 Marks	
<b>Course Outcomes:</b>		
After completion of the course students would be able to		
1.	Define rates of homogeneous chemical reactions and express the temperature dependent term of a rate equation with Arrhenius' Law and other theories	
2.	Design experiments, analyze and interpret data, and apply the results to chemical systems and processes.	
3.	Design ideal batch reactors, ideal CSTR reactors and ideal plug flow reactors.	
4.	Analyze multiple reactor system, autocatalytic and recycle reactors.	
5.	Specify operating conditions to produce desired products from parallel and series chemical reactions.	
6.	Evaluate effect of temperature on reaction.	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Chemical Kinetics:</b> Classification of reactions, rate laws and stoichiometry, relative rates of reaction, reaction order, rate limiting step, half life, concentration-dependent term of a rate equation, temperature-dependent term of a rate equation, Temperature dependency from Arrhenius law, Transition state theory, collision theory, rate equation using partial pressure and concentration, their interrelation, searching for a reaction mechanism.	<b>(08 Hours)</b>
<b>UNIT-II</b>	<b>Interpretation of Batch reactor data:</b> Interpretation of batch experimental kinetics data using integral and differential analysis, constant volume batch reactor system, design equation for zero, first, second and third order irreversible and reversible reactions, graphical interpretation of these equations and their limitations, variable volume batch reactors, design equation for zero, first and second order irreversible and reversible reactions, graphical interpretation of their limitations.	<b>(08 Hours)</b>
<b>UNIT-III</b>	<b>Introduction to Reactor Design</b> Single ideal reactors under steady state conditions, design equations for batch,	<b>(08 Hours)</b>

	mixed flow & plug flow reactor, development of rate expression for mean holding time for a plug flow reactor, space time and space velocity, Introduction to Semi-batch reactor.	
<b>UNIT-IV</b>	<b>Isothermal flow reactors</b> Size comparison of reactor performance, sequences of reactors, reactors with recycle. optimum size determination, reactors in series and parallel, performance of infinite number of back mix reactors in series, back mix and plug flow reactors of different sizes in series and their optimum way of staging, optimum recycle ratio for auto –catalytic (recycle) reactors.	<b>(08 Hours)</b>
<b>UNIT-V</b>	<b>Design of reactors for Single and Multiple reactions</b> Parallel and consecutive reactions in batch, CSTR and PFR, qualitative discussion about product distribution, quantitative treatment of product distribution and reactor size, factors affecting such as choice, optimum yield, conversion, selectivity, reactivity on consecutive and parallel reactions in reactors.	<b>(08 Hours)</b>
<b>UNIT-VI</b>	<b>Non-Isothermal reactor for homogeneous reactor systems</b> Energy balances in reactors, adiabatic operations, non-adiabatic operations, stability of reactors, non-isothermal homogeneous reactor systems, rates of heat exchanges for different reactors, adiabatic operations for batch and continuous reactors, optimum temperature progression, rate, temperature and conversion profiles for exothermic and endothermic reactions.	<b>(08 Hours)</b>

#### Assignments

1.	Write a report on the recent advances in chemical reaction engineering with reference to the current year.
2.	Give fifteen minutes presentation (seminar) on particular topic and prepare a report.
3.	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.
4.	Derive the rate equations for various combinations of reactors.
5.	Suggest best suitable reactor arrangement for zero, first and second order reaction.
6.	Explain in detail use of kinetics in equipment/reactor design.
7.	Design laboratory manuals better than existing ones with clearly shown specimen calculations.
8.	Solve old (last five years) question papers with reference to particular topic.
9.	Prepare a model for any of the reactor.
10.	Solve old (last ten years) GATE question papers with reference to chemical reaction engineering subject.
11.	Group discussion on the recent advances in reaction engineering.
12.	Write a report on your visit to research and development laboratory of national/international repute.
13.	Technical interview based on the knowledge of chemical reaction engineering.

In addition to these above stated assignments concerned faculty member may design his/her own assignments

#### Term Work:

Term work will consist of the experiments listed below, out of which any eight experiments are to be performed in laboratory by the students.

1.	Study of first order reaction.
2.	Study of PFR & CSTR combination in second order reaction.

3.	Rate constant of hydrolysis of methyl acetate by dilute HCl.
4.	Energy of activation of a reaction between $K_2S_2O_8$ and KI
5.	Study of homogeneous catalytic reaction, decomposition of hydrogen peroxide, acid catalysed ester hydrolysis.
6.	Hydrolysis of ester (e.g. ethyl acetate) by alkali (NaOH).
7.	Study of CSTR combination in first order reactions.
8.	Determination of Arrhenius parameters.
9.	Rate constant for saponification of ethyl acetate with NaOH using CSTR.
10.	Rate constant for saponification of ethyl acetate with NaOH at ambient conditions using PFR.
11.	Rate constant for saponification of ethyl acetate with NaOH at ambient conditions using (i) Isothermal batch reactor (ii) Isothermal CSTR.
12.	Study and operation of an adiabatic batch reactor.
13.	Study of a reversible reaction in a batch reactor.
14.	To determine energy of activation of reaction of ethyl acetate with sodium hydroxide.
15.	Find out specific rate constant and activation energy of a reaction in a plug flow reactor.
16.	Use MATLAB software to simulate Batch / CSTR / Plug flow reactor data.

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

## CHEMICAL ENGINEERING MATHEMATICS

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have

Basic knowledge of Mathematics including derivative, integration etc.

**TEACHING SCHEME:**

Lectures: 3Hours/Week

Tutorial : 1Hour/Week

**EXAMINATION SCHEME:**

End Semester Examination: 60 Marks

Unit Test: 20 Marks

Continuous Assessment: 20 Marks

Term work / Oral:50 Marks

Total: 150

**CREDITS ALLOTTED:**

Theory : 03

Tutorial : 01

Total credits: 04

**Course Outcomes:**

After completion of the course students will be able to

1. Compute the roots of the equation using methods like Secant method, Bisection method, False position method etc.
2. Apply Numerical differentiation methods such Euler's method, Modified Euler's method, Runge-Kutta methods etc.
3. Apply Numerical integration methods such as Trapezoidal rule, Simpson method, Romberg method etc.
4. Evaluate the problems on special matrices using Matrix inversion method, LU decomposition etc.
5. Evaluate curve fitting problems.
6. Optimize Linear programming problems.

### Topics covered

<b>UNIT-I</b>	<p><b>Root of equation</b> Solve Fluid flow, heat transfer problems using Picard method, Secant method, Bisection method, False position method, Newton-Rapson method, modified Newton-Rapson method, Muller method.</p>	<b>(06 Hours)</b>
<b>UNIT-II</b>	<p><b>Numerical Differentiation</b> Solve mass transfer, chemical reaction engineering, heat transfer problems using Euler's method, Modified Euler's method, Runge-Kutta methods, Milne's predictor-corrector method, Richardson Extrapolation.</p>	<b>(06 Hours)</b>
<b>UNIT-III</b>	<p><b>Numerical Integration</b> Trapezoidal rule, Simpson 1/3 and 3/8 rule, Multiple integrals, Romberg integration, Stirlings formula, LaGarange method, Cauchys integral formula.</p>	<b>(06 Hours)</b>

<b>UNIT-IV</b>	<b>Multiple algebraic equations using Matrix</b> Matrix inversion method, Gauss elimination, Gauss Jordan method, LU decomposition method, Gauss Seidal method, Jacobian method.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Curve fitting and Statistics</b> Linear regression, multiple linear regressions, polynomial regression, general linear least squares, Non-linear regression. Introduction to Statistics, application of Statistics, histogram method, measuring centre values by median, mode methods.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Optimization</b> Graphical method, Simplex method, Golden section search method, Linear programming case studies such as least cost design of tank, least cost treatment of wastewater, chemical Process e.g. reactors, heat exchangers, evaporators etc.	<b>(06 Hours)</b>

**Assignments:**

There will be six (6) assignments from various units mentioned in the syllabus. Each assignment will carry 10 marks.

List of assignments

1. Finding the roots of polymeric equations mentioned in the fluid mechanics. Equations such as buoyancy of ball, liquid level in manometer etc.
2. Solving the equations from mass transfer, Momentum transfer using Numerical differentiation methods.
3. Evaluating the integrals from heat transfer using Numerical integral methods.
4. Solving linear problems from process calculation using matrix methods.
5. Finding rate equation, equilibrium curve using experimental data.
6. Applying optimization method for equation of cost for various equipments, insulation thickness etc.
7. With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry
8. Solve old (last five years) question papers with reference to particular topic.
9. Solve old (last ten years) GATE question papers with reference to chemical engineering mathematics subject.

**Tutorials / Term work**

1. Solving problems on roots of equation.
2. Use numerical differential methods for problems on chemical reaction engineering, mass transfer, heat transfer etc.
3. Use numerical integration methods for problems on chemical reaction engineering, mass transfer, heat transfer etc.
4. Solve problems on multiple algebraic equations using Matrix.
5. Analyze and solve the problems on curve fitting.
6. Applying optimization method for industrial problems.

<b>Syllabus for Unit Test:</b>	
Unit Test -I	UNIT – I , II, III
Unit Test -II	UNIT – IV, V, VI

## COMPUTER PROGRAMMING FOR CHEMICAL ENGINEERS - I

**Designation:** Computing

**Course Pre-requisites:**

Students should have basic knowledge of

Computer fundamentals

<b>TEACHING SCHEME:</b>		<b>EXAMINATION SCHEME:</b>		<b>CREDITS ALLOTTED:</b>	
Lectures	: 3 Hours/Week	End Semester Examination	: 60 Marks	Theory	: 03
Practical	: 2 Hour /Week	Continuous Assessment	: 40 Marks	Practical	: 01
Total	: 5Hours/Week	Term work / practical	: 50 Marks	Total credits	: 04
		Total	:150 Marks		

**Course Outcomes:**

After completion of the course students will be able to

1. Apply the knowledge of constant, variables and data types used in visual basic and write programs.
2. Write coding in VB and prepare interface using various controls like option button, check box, list box, text box, command button etc.
3. Apply the knowledge of Visual Basic to various chemical engineering calculations.
4. Explain and apply the HTML tags for web page.
5. Design a web page and apply dynamic effects to the page using the knowledge of HTML.
6. Explain and apply the various DHTML tags and object models for web page.

### Topics covered

<b>UNIT-I</b>	<b>Visual Basic:</b> Introduction to visual basic, object oriented programming and Graphics User Interface (GUI). Editions of visual basic. Variable: Types of variable declaration, scope of variable. Data Types, conversion of data types, array of controls. Control constructs and loop statements used in visual basic.	<b>(06 Hours)</b>
<b>UNIT-II</b>	Important Visual Basic controls like Text box, command button, option button, check box, list box, combo box, frame, label and Timer control. Events: mouse, key and focus events. Working with menus, toolbars, status bars. Scope of variables and procedures. Data controls. Creating MDI applications.	<b>(06 Hours)</b>
<b>UNIT-III</b>	Application of Visual Basic for Chemical Engineering: Various calculations and solutions in chemical engineering like calculation of LMTD for co-current and counter current heat exchangers, Design of distillation column, evaporator, dryer, mixed flow reactor etc.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>HTML:</b> Introduction to HTML, components of HTML, structure tags, block level tags, text level tags, horizontal rules, colours in web page. Design parameters. List: ordered, unordered and definition list, generating lists.	<b>(06 Hours)</b>
<b>UNIT-V</b>	Web page designing parameters. Adding graphics/images. Hyperlinks. Tables. Frames. Style sheets. Applying dynamic effects to the page. Working with forms in a web page	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>DHTML:</b>	<b>(06 Hours)</b>

	Introduction to DHTML, DHTML Object Model. Events. Handling text attributes. Dynamically changing style. Dynamically changing content. Dynamically altering the placement of elements	
--	---	--

### Assignments

1.	Discuss the client-server applications with appropriate example
2.	Discuss web applications with appropriate example
3.	Explain e-commerce applications
4.	Design your own home page using various HTML tags
5.	Design your own blog for technical discussion.
6.	Give fifteen minutes presentation (seminar) on particular topic and prepare a report.
7.	To create various animations using Timer control.
8.	Design various unit operations used in chemical industry using knowledge of visual basic.
9.	Students have to study any five NPTEL videos related to HTML, DHTML and visual basic and prepare/present power point presentation.
10.	Programs based on above six units.
11.	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.
12.	Group discussion on the recent advances in HTML, DHTML and visual basic.
13.	Technical interview based on the knowledge of HTML, DHTML and visual basic.

In addition to these above stated assignments concerned faculty member may design his/her own assignments

### Term Work:

Term work will consist of the programs/practicals listed below, out of which any eight programs/practicals are to be performed in laboratory by the students.

1.	Development of visual basic interface and programs using click events.
2.	Development of visual basic interface and programs using option button.
3.	Development of visual basic interface and programs using list box control.
4.	Development of visual basic interface and programs using various control statements
5.	Development of visual basic interface and programs using various loop statements
6.	Development of visual basic interface and programs using Timer control.
7.	Application of visual basic to various chemical engineering calculations.
8.	To create table and use of table tags in HTML to design a web page.
9.	Web page design as per given output
10.	Design a web page using the image and hyperlink.
11.	Design a web page using ordered list, unordered list and definition list.
12.	HTML code to display given form.

6.	Hollis; Visual Basic 6 : Design, specification & Objects, Longman Publications

7.	Ivan Bayross; Web Enabled Commercial Application Development Using HTML, DHTML, JavaScript, Perl CGI, PBP Publications.
<b>Syllabus for Unit Test:</b>	
Unit Test -I	UNIT – I ,II,IV
Unit Test -II	UNIT – III,V,VI

## ELECTIVE II BIOFUEL TECHNOLOGY

**Designation:** Elective

**Course Pre-requisites:**

Students should have basic knowledge of

1 | Biology

2 | Basics of Chemical Engineering

**TEACHING SCHEME:**

Lectures: 3 Hours/Week

Practical : -

Total : 3 Hours/Week

**EXAMINATION SCHEME:**

End Semester Examination: 60 Marks

Unit Test: 20 Marks

Continuous Assessment: 20 Marks

Total :100 Marks

**CREDITS ALLOTTED:**

Theory : 03

Total credits: 03

**Course Outcomes:**

After completion of the course students would be able to describe

1. How petroleum and bio-based fuels affect the global carbon cycle

2. The attributes of biofuels that make them suitable as a fuel for a specific application

3. Limitations of petroleum fuel and biofuel and importance of biodiesel

4. Global impacts of bioethanol and biobutanol on energy sector

5. Technological advances and challenges to be overcome for biohydrogen production

6. Importance and aspects of manufacturing processes of microbial fuel cells

### Topics covered

<b>UNIT-I</b>	<p><b>Introduction to Biofuels:</b> Biofuels, energy use and efficiency, generations of biofuels, alternative energies, types of biofuels, advantages and disadvantages of different biofuels, economics, and policies.</p>	<b>(06 Hours)</b>
<b>UNIT-II</b>	<p><b>Renewable Feedstocks:</b> Feedstocks: Biomass, starch, sugar, lignocellulosic, agro and industrial by-products, pretreatment of feedstock, biomass production for fuel – algal cultures, yeasts (lipid and carbohydrate), sources of oils – edible and non edible</p>	<b>(06 Hours)</b>
<b>UNIT-III</b>	<p><b>Production of biodiesel:</b>  Chemical, thermodynamic and reaction kinetic aspects of biodiesel production: esterification and transesterification, free fatty acids; saponification; single step and two step biodiesel production, catalysts for biodiesel production – homogeneous (alkali/acidic) and heterogeneous, general procedure of biodiesel production and purification. algal biodiesel production, quality control aspects, methods to improve the biodiesel yield, process flow diagrams</p>	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<p><b>Production of bioethanol and biobutanol:</b> Process technology for ABE using different feedstocks; by-products of biofuel industry as feedstock; selection of micro-organisms and feedstock – ethanol/butanol tolerance; determination of ABE yield; recovery of biofuels, process integration, advances in bioethanol and biobutanol production.</p>	<b>(06 Hours)</b>

<b>UNIT-V</b>	<p><b>Production of Biohydrogen:</b></p> <p>Enzymes involved in H<sub>2</sub> production; photobiological H<sub>2</sub> production: biophotolysis and photo-fermentation; H<sub>2</sub> production by fermentation: biochemical pathway, batch fermentation, factors affecting H<sub>2</sub> production, carbon sources, process and culture parameters; detection and quantification of H<sub>2</sub>, reactors for biohydrogen production. <b>Biogas:</b></p> <p>Use of different feedstock to produce biogas, methods of biogas generation, equipment design to improve the yield, application of biogas as fuel</p>	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<p><b>Microbial Fuel Cells (MFC):</b></p> <p>Biochemical basis; components of MFC fuel cell design, microbial cultures, MFC performance methods: substrate and biomass measurements, basic power calculations, MFC performance, single vs two-chamber designs, Applications of MFC</p>	<b>(06 Hours)</b>

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I , II, III
Unit Test -II	UNIT – IV,V,VI

## ELECTIVE II FOOD TECHNOLOGY

**Designation:** Elective

**Course Pre-requisites:**

Basic knowledge of microbiology and biochemistry

<b>TEACHING SCHEME:</b>		<b>EXAMINATION SCHEME:</b>		<b>CREDITS ALLOTTED:</b>	
Lectures	: 3 Hours/Week	End Semester Examination	: 60	Theory	: 03
		Marks			
Seminar	: -	Unit Test	: 20	Seminar	: -
		Marks			
Total	: 3 Hours/Week	Continuous Assessment	: 20	Total credits	: 03
		Marks			
		Total	: 100		
		Marks			

**Course Outcomes:**

After completion of the course students would be able to

1. Evaluate analysis of suitable chemical constitute and their significance in food products.
2. Identify the significance of fluid flow and rheological properties of food; develop the Process and equipment design aspect for food processing.
3. Draw basic flow sheet development for food processing, construction and plant layout.
4. Implement suitable equipment design and their design parameters for canning and retort processing.
5. Chose and apply suitable food preservation technique, give details of preservation, significance and estimate economy of the food preservation.
6. Select and do the packaging of fresh food and processed food, implement newer trends in packaging.

### Topics covered

<b>UNIT-I</b>	<b>Introduction to food technology :</b> Introduction to food technology, different types of food products, Application of Engineering in Food industries. Analysis of chemical constituents in food products, their characterization and significance.	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Food Engineering:</b> Principles of mass and energy balance in food processing operations. Transport phenomena with respect to foods. Fluid dynamics, Rheological properties of foods. Process design aspects. Concentration with thermal and membranes processes. Process and equipment design for food processing.	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Food Process Engineering:</b> Important aspects of product and process development. Basic flow sheet development for food processing. Other food processing such as Bakery machines and equipment; Food processing plant layout, material of construction, corrosion, waste utilization.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Thermal processing:</b> Canning and retort processing – process design and equipment. Equipment design aspects, dryers and their design parameters. Construction of cold	<b>(06 Hours)</b>

	storages, Types of freezers and their design parameters	
<b>UNIT-V</b>	<b>Principles of food preservation:</b> Aims and objectives of preservation and processing of foods. Preservation by high temperature, Preservation by low temperature, Preservation by water removal. Different preservation technique: chemical preservatives. Controlled and modified atmospheric storage.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Food Packaging Technology:</b> Concept of packaging, Functions of a Food Package, Aseptic Packaging. Packaging as a method for conservation and protection of foods. Different packaging materials and their properties, Environmental friendly food packing material, Food product characteristics and package requirement, Evaluation of quality and safety of packaging materials.	<b>(06 Hours)</b>

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I , II, III
Unit Test -II	UNIT – IV, V, VI

## ELECTIVE-II NANOMATERIALS

**Designation:** Elective

**Course Pre-requisites:**

Students should have knowledge of

1. Chemistry, Physics

**TEACHING SCHEME:**

**EXAMINATION SCHEME:**

**CREDITS ALLOTTED:**

Lectures : 3 Hours/Week

End Semester Examination : 60 Marks

Theory : 03

Unit Test : 20 Marks

Total credits : 03

Continuous Assessment : 20 Marks

Total : 100 Marks

**Course Outcomes:**

After completion of the course students will be able to

1. Define the concept of nanomaterials and Nanotechnology
2. Express various types of nanomaterials and characterization techniques
3. Distinguish between the synthesis techniques for nanomaterials and apply the appropriate synthesis technique.
4. Recognize the properties of nanomaterials and effect on them due to nanoscale.
5. Express the Chemical and Catalytic Aspects of Nanomaterials
6. Recognize the various modes and methods for synthesis of polymer nanocomposite

### Topics covered

<b>UNIT - I</b>	<p><b>Introduction to Nanomaterials</b> Basic definitions: Nanoscience, Nanotechnology, Nanomaterial, Nanostructure, Nanomachine; Historical perspective on nanomaterials, Advantages of nanomaterials, Importance of nanomaterials, Top down and bottom up approaches to manufacture nanomaterials. Applications of Nanomaterials</p> <p><b>Types of nanomaterial/Nanostructures</b> Classification of nanomaterial based on the number of dimensions: 0-D, 1-D, 2-D, and 3-D nanostructures; Quantum dots, Quantum wire, Core/Shell structures, Nanotubes, nanorodes, nanowires, nanofibers.</p>	<b>(06 Hours)</b>
<b>UNIT - II</b>	<p><b>Characterization Techniques:</b> X-ray Diffraction, Scanning Electron Microscopy (SEM), Transmission Electron microscopy (TEM), Optical spectroscopy, Atomic Force Micrograph (AFM), Partical Size Analyzer.</p> <p><b>Synthesis of Nanomaterials:</b> Classification of Nanoparticle Synthesis Techniques, Solid-State Synthesis of Nanoparticles, Vapor-Phase Synthesis of Nanoparticles, Inert Gas Condensation of Nanoparticles, Chemical Vapor Condensation (CVC),</p>	<b>(06 Hours)</b>
<b>UNIT - III</b>	<p><b>Technology of Nanoparticles Synthesis:</b> Plasma-Based Synthesis of Nanoparticles, Flame-Based Synthesis of Nanoparticles, Spray Pyrolysis of Nanoparticles; Solution Processing of Nanoparticles, Sol-Gel Processing, Solution Precipitation, Water–Oil</p>	<b>(06 Hours)</b>

	Microemulsion (Reverse Micelle) Method.	
<b>UNIT - IV</b>	<b>Nanomaterial properties</b> Physical properties of nanostructured materials, Chemical properties, Mechanical properties, Magnetic and structural properties, Optical properties, Thermal properties; Influence of nano structuring on mechanical, optical, electronic, magnetic and chemical properties; Gramsize effects on strength of metals optical properties of quantum dots and quantum wires, carbon nano tubes: magnetic behavior.	<b>(06 Hours)</b>
<b>UNIT - V</b>	<b>Chemical and Catalytic Aspects of Nanomaterials</b> Nanomaterials in catalysis, Importance of surface to volume ratios, nanocrystal shapes and defects as they relate to heterogeneous catalysis, Controlled pore size materials, nanoparticles as chemical reagents; Examples of metal, metal oxide and metal sulfide nanoparticles in catalytic processes	<b>(06 Hours)</b>
<b>UNIT - VI</b>	<b>Polymer Nanocomposites</b> Generalities on polymer composites, From “Micro” to “Nano” composites: Effect of particle dimensions, Nanocomposites preparation pathways: Importance of the interfacial compatibilization, Current scientific and technical advances in polymer nanocomposites	<b>(06 Hours)</b>
<b>Tutorials/Assignments:</b>		
The internal assessment shall consist of minimum SIX assignments from the following list		
1.	Questions involving classification of nanomaterial	
2.	Prepare one assignment considering any one nanomaterial on: Influence of Nano structuring on Mechanical - Optical, electronic, magnetic and chemical properties	
3.	Conducting surprise MCQ test for students	
4.	Questions involving various techniques employed for nanomaterial characterization	
5.	Enhancement in collaborative learning is done through, group assignments that will be given to encourage students to work with classmates to discuss and complete homework assignments	
6.	Students have to study any five research papers related to specific topic in nanomaterials and prepare/present power point presentation	
7.	Brief report on ‘Environmental, health and ethical concerns that are associated with nanomaterials	
8.	Group discussions on any of the following topics: a) Importance of Nanomaterials in chemical industries. b) Current scientific and technical advances in Nanomaterials c) Methods of synthesis for nanomaterials	
9.	Preparation of a brief report on applicability of nanomaterials in chemical engineering operations	
10.	Conducting open-book class test	
<b>Text Books/ References:</b>		
1.	Charles P. Poole, Frank J. Owens, “Introduction to Nanotechnology”, Wiley Interscience

7.	Kenneth J. Klabunde, "Nanoscale Materials in Chemistry", John Wiley & Sons, Inc
8.	Alain Nouailhat, "An Introduction to Nanoscience and Nanotechnology", Wiley-ISTE; 1 <sup>st</sup> Edition
<b>Syllabus for Unit Test:</b>	
Unit Test - I	UNIT– I, II, and III
Unit Test - II	UNIT– IV, V, and VI

<b>Elective I: Polymer Technology</b>		
<b>Designation:</b> Elective		
<b>Course Pre-requisites:</b>		
<b>1.</b>	Basic chemistry, Physical chemistry, Chemical Reaction Engineering, Chemical Engineering Thermodynamics	
<b>TEACHING SCHEME:</b>		
<b>EXAMINATION SCHEME:</b>		
<b>CREDITS ALLOTTED:</b>		
Lectures: 3 Hours/Week	End Semester Examination: 60 marks	Theory : 03
	Continuous Assessment: 40 marks	
<b>Course Outcomes:</b>		
<b>1.</b>	Explain basics of polymers and their classifications	
<b>2.</b>	Explain various polymer properties and the their effect on engineering properties	
<b>3.</b>	Determine suitable process for polymer synthesis and describe its mechanism	
<b>4.</b>	Understand the basics of polymer characterizations and discuss its effect on properties	
<b>5.</b>	Explain the formation of composites and blends in polymers	
<b>6.</b>	Explain the methods of polymer compounding and processing	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Introduction to polymers</b> Introduction, polymer microstructure, homopolymers-heteropolymers, monomers as building block of polymers, historical development, classifications of polymers and polymerization reactions, chain growth and step growth polymerization, mechanism of polymerization, polymer liquids and polymer solids	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Polymer properties</b> Molecular weight of polymers (Mw, Mn, Mv), Molecular weight distribution, determination of molecular weights, polymer morphology, polymer structure – linear, branched and crosslinked, presence of functionality, chemical bonding in polymers, stereoisomerism, effect these factors on chemical, thermal and mechanical properties of polymers	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Synthesis of polymers</b> Polymerization techniques: bulk, solution, suspension, emulsion polymerization with their merits and demerits, kinetics of polymerization; free radical chain polymerization, cationic polymerization, anionic polymerization, polycondensation, co-polymerization and its kinetics, Smith Ewarts kinetics for emulsion polymerization, continuous emulsion polymerization, Ziegler-Natta catalyst	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Polymer structure and effect on properties</b> Chemical and geometrical structure of polymer molecules, microstructure based on chemical structure, microstructure based on geometrical structure, Glass transition temperature, factors influencing glass transition – molecular	<b>(06 Hours)</b>

	weight, plasticisers, copolymer concentration, and their effect on polymer properties; crystallinity, effect of presence of crystallinity on polymer properties	
<b>UNIT-V</b>	<b>Polymer composite and blends</b> Difference between blends and composites, their significance, choice of polymers for blending, blend miscibility-miscible and immiscible blends, thermodynamics, phase morphology, polymer alloys, polymer eutectics, plastic-plastic, rubber-plastic and rubber-rubber blends, FRP, particulate, long and short fibre reinforced composites.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Polymer processing and compounding</b> Polymer compounding-need and significance, different compounding ingredients for rubber and plastics, crosslinking and vulcanization. Methods of processing: Compression molding, transfer molding, injection molding, blow molding, reaction injection molding, extrusion, pultrusion, calendaring, rotational molding, thermoforming, rubber processing in two-roll mill, internal mixer.	<b>(06 Hours)</b>
<b>Assignments:</b>		
1.	Prepare the report on any one polymer comprising its significance, preparation, characterization, processing and properties	
<b>References/Text Books:</b>		
1.	Text book for polymer science; F. W. Billmeyer, Wiley Interscience Publications (John Wiley and Sons)	
2.	Polymer Science, V. R. Gowarikar, N. V. Viswanathan, J. Shreedhar; Wiley Estern Limited	
3.	Principles of Polymerizations; Odion G. G.; Mc-Graw Hill	
4.	Fundamentals of polymer Engineering, Arie Ram, Plenum Press	
5.	Polymer Physics, Michael Rubinstein, Ralph H. Colby, Wiley Interscience Publications (John Wiley and Sons)	
6.	Polymer data handbook, James E. Mark (Ed.), Oxford University Press	
<b>Syllabus for Unit Test:</b>		
Unit Test –I	UNIT – I ,II,III	
Unit Test –II	UNIT – IV,V,VI	

<b>SEPARATION TECHNIQUES</b>		
<b>Designation:</b> Professional Core		
<b>Course Pre-requisites:</b>		
Students should have basic knowledge of		
1	Fundamentals of mass transfer	
2	Fundamentals of heat transfer	
<b><u>TEACHING SCHEME:</u></b>	<b><u>EXAMINATION SCHEME:</u></b>	<b><u>CREDITS ALLOTTED:</u></b>
Lectures: 4 Hours/Week	End Semester Examination: 60 Marks	Theory : 04
Practical : 2 Hour /Week	Unit Test: 20 Marks	Practical: 01
Total : 6Hours/Week	Continuous Assessment: 20 Marks	Total credits: 05
	Term work / practical:50 Marks	
	Total :150 Marks	
<b>Course Outcomes:</b>		
After completion of the course students would be able to		
1.	Apply the basics of distillation for the binary separation of ideal and nonideal mixture and determine the extent of separation obtained.	
2.	Describe the operation of continuous rectification and determine the number of stages required for distillation.	
3.	Determine the number of stages required for separation using liquid-liquid extraction and describe the extractors used industrially.	
4.	Obtain the requirement of solvent in leaching operation and obtain the extent of separation.	
5.	Plot the adsorption isotherms and estimate the amount of adsorption using single and multistage operations.	
6.	Explain the operation and applications of novel separation techniques	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Introduction:</b> Review of various separation techniques, Selection of the technique of separation, pros and cons of various methods. <b>Basics of Distillation:</b> Equilibrium of vapor and liquid, relative volatility, Raoult's law, Ideal and Non-ideal behavior study, Azeotropes, positive and negative deviation from ideality, Methods of distillation - simple, flash distillation, Rayleigh's equation, Graphical and analytical method for determination of the compositions, Introduction to reactive distillation, Azeotropic distillation, Molecular or low pressure distillation, Extractive distillation.	<b>(08 Hours)</b>
<b>UNIT-II</b>	<b>Rectification:</b> Continuous rectification for binary systems, Tray towers, McCabe Thiele's method of calculation of number of trays, Method of Ponchon Savarit, Enthalpy concentration diagrams, Tray efficiencies, Concept of reflux, cold reflux, partial and total cold reflux, Effect of feed temperature and q-line equation derivation, Total reflux, Optimum reflux, Fenske Underwood equation, Condenser and reboilers used in distillation, Use of open steam for	<b>(08 Hours)</b>

	distillation, Rectification of Azeotropic mixtures. Distillation in packed towers: HETP concept, HTU and NTU calculations, Distillation column internals: Type of trays, Type of packing used.	
<b>UNIT-III</b>	<b>Adsorption:</b> Types of adsorption, Nature of adsorbents, Equilibria in adsorption- Single gases and vapors, adsorption hysteresis, Effect of temperature, Heat of adsorption, adsorption of liquids, Langmuir isotherms, Freundlich isotherms, Introduction to pressure swing and temperature swing adsorption, Equipment: Continuous contact, Steady state moving bed absorbers. <b>Ion exchange process:</b> Basic principles and chemical reactions, Techniques and applications, Equilibria and rate of ion exchange, Equipment studies.	<b>(08 Hours)</b>
<b>UNIT-IV</b>	<b>Liquid- Liquid Extraction:</b> Introduction, Choice of solvent, Ternary equilibrium, Binodal solubility curve, Single stage extraction, Multistage crosscurrent and countercurrent extraction, extraction calculations using triangular and rectangular coordinates, Solvent free basis calculations, Nxy diagrams, Material balances, Continuous countercurrent extraction with reflux, stage efficiency. Continuous countercurrent extraction in packed columns: HTU and NTU calculations. Types of extractors: Stage type and differential extractors.	<b>(08 Hours)</b>
<b>UNIT-V</b>	<b>Leaching (Solid Liquid Extraction):</b> Introduction: Classification of leaching processes, Factors affecting the leaching process, Solid –liquid equilibria. Methods of calculation: Single stage leaching, multistage cross-current leaching, Continuous countercurrent leaching. Leaching Equipments: Unsteady state and steady state equipment.	<b>(08 Hours)</b>
<b>UNIT-VI</b>	<b>Novel separation techniques:</b> Membrane separation techniques- Ultrafiltration, Nano-filtration, Reverse osmosis process, Electro dialysis, Rate based processes such as diffusion coefficient based inert gas generating from air by carbon molecular sieves.	<b>(08 Hours)</b>

### Assignments

1.	Group discussion on the recent advances in mass transfer operations.
2.	Solve previous university question papers with reference to particular topic of this subject.
3.	Seminar presentation on a particular topic specified in the syllabus and submission of report based on it.
4.	Estimation of composition of vapor and liquid in flash distillation
5.	Compute the composition of residue and distillate in simple distillation.
6.	Evaluation of number of stages using McCabe Thiele and Ponchon Savarit method.
7.	HTU and NTU calculation for distillation in packed columns.
8.	Group discussion on equipments used for extraction.
9.	Estimate the number of stages required for single and multistage extraction operation.
10.	Estimate the number of stages required for single and multistage leaching operation.
11.	Group discussion on ion exchange technique and its application.
12.	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.

13.	Presentation on novel separation techniques.
14.	Solve old GATE question papers with reference to this subject.
15.	Group discussion on the recent advances in separation techniques.
16.	Write a report on your visit to research and development laboratory of national/international repute.
17.	Technical interview based on the knowledge of separation techniques.

In addition to these above stated assignments concerned faculty member may design his/her own assignments

**Term Work:**

Term work will consist of the experiments listed below, out of which any eight experiments are to be performed in laboratory by the students.

1.	Simple distillation
2.	Distillation with total reflux
3.	Steam distillation
4.	Equilibrium diagrams for liquid -liquid extraction
5.	Cross current multistage extraction
6.	York Schiebel column for extraction
7.	Bubble cap distillation column
8.	Sieve tray distillation column
9.	Vapour liquid equilibria
10.	Solid liquid extraction of oil
11.	Langmuir and Freundlich adsorption isotherm

2.	Coulson J. M. Richardson, "Chemical engineering", Vol, I and II, Pergamon Press.
3.	King C. J., "Separation Techniques", McGraw Hill publication.
4.	Smith B. D., "Design of Equilibrium stage process", McGraw Hill publication.

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV, V, VI

## CHEMICAL PROCESS EQUIPMENT DESIGN-I

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have basic knowledge of

- |   |  |
|---|--|
| 1 | Unit Operations involved in chemical engineering                     |
| 2 | Heat transfer and Mass transfer and Mechanical operation equipments. |

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Lectures: 3 Hours/Week	End Semester Examination: 60 Marks	Theory : 03
Drawing : 2 Hour /Week	Unit Test: 20 Marks	Drawing: 01
Total : 5Hours/Week	Continuous Assessment: 20 Marks	Total credits: 04
	Term work / practical:25 Marks	
	Total :125 Marks	

**Course Outcomes:**

After completion of the course students would be able to

- |    |  |
|----|--|
| 1. | Apply and understand different codes for equipment design.   |
| 2. | Design different heads used for equipments   |
| 3. | Identify and design different supports used for process equipments.  |
| 4. | Study and design process and mechanical aspect of heat exchangers  |
| 5. | Calculate various stresses acting on vessels   |
| 6. | Design different equipments like cyclone separator, gravity thickener, decanter, fluid –fluid separator, electrostatic precipitator, cooling towers, evaporators, dryers, crystallizers. |

### Topics covered

<b>UNIT-I</b>	<p><b>Introduction to Process Equipment Design:</b> Introduction to various mechanical properties of materials to be used as material of construction, resistance of metals to corrosion under varying conditions of temperature and pressure etc. Theories of failures, application and use of various codes and standards in design. Representation of different utilities and symbols, General design procedure, equipment classification, study of design parameters such as maximum working pressure, design pressure, design temperature, design stress &amp; factor of safety, design of wall thickness &amp; minimum actual thickness, corrosion allowance, design loading, poissions ratio.</p>	<b>(06 Hours)</b>
<b>UNIT-II</b>	<p><b>Design of pressure vessels and storage tank:</b> Design of pressure vessels and storage tank: Vessels subjected to internal pressure and combined loading, cylindrical and spherical shell, resultant stresses induced in pressure vessel, stresses in high pressure vessels, optimum vessel size, design of various heads &amp; closures such as flat head, torrispherical head, elliptical head, hemispherical head, and conical head. Design of storage tank, types of storage tank, types of roof for storage tank, types of losses in floating roof tank, estimation of nozzle diameter for drain in storage tank.</p>	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Introduction to various Supports :</b>	<b>(06 Hours)</b>

	Introduction to various Supports, design of various supports such as skirt support, skirt bearing plate, leg support, bracket support, saddle support, design of tall vertical column, anchor bolts, base ring, ring stiffeners, wind girders, flanges & nozzles, detail design of number of bolts & nozzles. Stresses induced in supports like dead weight, wind load, seismic load.	
<b>UNIT-IV</b>	<b>Design of Heat exchangers :</b> Classification of heat exchangers, flow arrangements, types of heat exchanger, LMTD and effectiveness NTU method, Process design of shell and tube heat exchanger - heat transfer coefficient calculations, number of tube calculation, pressure drop calculation on tube side and shell side. Process design of double pipe heat exchanger, types of fouling, fouling resistance in heat exchangers. Mechanical design aspects of heat exchanger. Differential expansion and thermal stresses in heat exchanger. Introduction to fin type, plate type heat exchanger.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Design of Agitators :</b> Design of Agitators: types of agitators, selection criteria, design of blades, power calculation, flow patterns, calculation of bending moment, twisting moment, and combined effect.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Design of some separation equipments :</b> Design of some separation equipment like cyclone separator, gravity thickener, decanter, fluid –fluid separator, electrostatic precipitator, evaporators.	<b>(06 Hours)</b>

### Assignments

1.	Write a report on different codes and symbols used in design.
2.	Solve old (last five years) question papers with reference to particular topic.
3.	Prepare a model for any of the equipment
4.	Prepare a report on advance equipments which are newly introduced in the current year.
5.	Give fifteen minutes presentation (seminar) on particular topic and prepare a report.
6.	Prepare model for different roofs used in storage vessels.
7.	Prepare a chart for different construction of materials in equipment design.
8.	Prepare a presentations on newly introduced equipments in current year
9.	Design laboratory manuals better than existing ones with clearly shown specimen calculations.
10.	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in designing a economic plant layout for any industry.
11.	Write a technical report on your visit to a process industry.
12.	Solve old (last ten years) GATE question papers with reference to design subject.
13.	Group discussion on the recent advances in equipment design
14.	Write a report on your visit to research and development laboratory of national/international repute.
15.	Technical interview based on the knowledge of design

In addition to these above stated assignments concerned faculty member may design his/her own assignments

### Term Work:

Term work will consist of the Practicals and drawings listed below, out of which any eight are to be done by students. Any one drawing in Autocad.

1.	Detailed design and drawing of enclosures and supports
2.	Design of pressure vessels.
3.	Calculation of heat transfer coefficient, No of tubes and rate of heat flow in shell and tube heat exchanger
4	Calculate pressure drop for tube and shell side heat exchanger.
5.	Detailed design and drawing of agitated vessel.
6.	Detailed design and drawing of cyclone separator.
7.	Detailed design and drawing of cooling towers
8.	Detailed design and drawing of crystallizer
9.	Detailed design and drawing of gravity thickener.
10.	Design of storage tanks.
11.	Design of Supports.
12	Calculation of heat transfer coefficient,rate of heat flow and effectiveness in Double pipe heat exchanger.
13	Calculation of heat transfer coefficient,rate of heat flow and effectiveness in fin type heat exchanger.

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

<b>CHEMICAL REACTION ENGINEERING-II</b>		
<b>Designation:</b> Professional Core		
<b>Course Pre-requisites:</b>		
Students should have basic knowledge of		
1	Chemical reaction engineering-I	
2	Stoichiometry	
3.	Mass transfer	
<b>TEACHING SCHEME:</b>		
<b>EXAMINATION SCHEME:</b>		
<b>CREDITS ALLOTTED:</b>		
Lectures: 3 Hours/Week	End Semester Examination: 60 Marks	Theory : 03
Practical : 2 Hour /Week	Unit Test: 20 Marks	Practical: 01
Total : 5Hours/Week	Continuous Assessment: 20 Marks	Total credits: 04
	Term work / Oral :50 Marks	
	Total :150 Marks	
<b>Course Outcomes:</b>		
After completion of the course students would be able to		
1.	a) Write the overall rate equation for heterogeneous reactions. b) Study kinetics and design of fluid solid non catalytic reactions.	
2.	Define the mechanism of catalytic reactions.	
3.	Calculate the height of fluid fluid non catalytic reactions.	
4.	Learn the kinetics and design of solid catalyzed reactions.	
5.	Learn the diffusion and reaction kinetics for porous catalyst.	
6.	Develop the kinetics of nonideal flow.	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Introduction to heterogeneous reaction systems:</b> <b>Fluid-solid non catalytic reactions:</b> Types of heterogeneous reactions. Steps involved in developing overall rate equation. Linearizing a nonlinear rate equation and contacting patterns for heterogeneous reaction systems. Proposed models i.e. progressive conversion model and unreacted core model. Steps/resistance involved in these models. Individual and overall/global rate equation. Determination of rate controlling step. Application to design of fluid solid reactor by identifying the type of flow of phases.	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Fluid-fluid non catalytic reactions:</b> Kinetic regimes for mass transfer and reaction. Rate equation for different cases/regimes. Clues to kinetic regimes using different methods. Application to design of packed bed reactor.	<b>(06Hours)</b>
<b>UNIT-III</b>	<b>Catalysis ( fluid-solid catalytic reactions):</b> The nature of catalytic reactions. The mechanism of catalytic reactions. Steps involved in catalytic reactions. Types of adsorption, Langmuir adsorption isotherm. Synthesizing a rate law rate limiting step, preparation of catalyst and its deactivation, poisoning and regeneration. Nature and mechanism of catalyst reactions.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Solid catalyzed reactions:</b>	<b>(06Hours)</b>

	Introduction, Rate equation, Film resistance controlling, surface flow controlling, Pore diffusion controlling, Experimental methods for finding rates, construction, operation and design of Catalytic reactors : Fixed bed reactor, Fluidized bed reactor.	
<b>UNIT-V</b>	<b>Diffusion and reaction in porous catalysts:</b> Diffusion and reaction in spherical catalyst pellets. Internal effectiveness factor. Overall effectiveness factor. Estimation of diffusion- and reaction-limited regimes. Mass transfer and reaction in a packed-bed. Chemical vapor decomposition (CVD) reactors.	<b>(06Hours)</b>
<b>UNIT-VI</b>	<b>Basics of Non-ideal Flow:</b> The Residence Time Distribution Functions and their Relationships Role of RTD in determining reactor behavior Experimental methods for finding E, the pulse experiment, the step experiment, relationship between E, F & C curve. Introduction to Dispersion Model, Tank in series model.	<b>(06Hours)</b>

### Assignments

1.	List different types of heterogeneous reactions in chemical industry.
2.	Write a report on “ Importance of heterogeneous reactions in Chemical Industry”
3.	Select any five industrial heterogeneous reactions and write rate equations for the reactions.
4.	Give power point presentation on models for heterogeneous reactions.
5.	Design a reactor for fluid solid non catalytic reactions.
6.	Do the experiments on Reactor lab software.
7.	Give power point presentation on different types of adsorption isotherms.
8.	Solve any five old question papers.
9.	Solve ten problems on kinetics and design of fluid fluid non catalytic reactions.
10.	List out different types of industrial catalyst with characteristics.
11.	Draw different types of contacting patterns for heterogeneous reactions used in industry.
12.	Give a presentation on any reactor used for heterogeneous reactions in industry
13.	Write a report on research (review) paper on reactors used for heterogeneous reactions.
14.	Industrial visit to a chemical industry.
15.	Write a report on industrial visit. Give emphasis on details of reactor.

In addition to these above stated assignments concerned faculty member may design his/her own assignments

### Term Work:

Term work will consist of the experiments listed below, out of which any eight experiments are to be performed in laboratory by the students.

1.	To study residence time distribution in packed bed reactor.
2.	To study residence time distribution in plug flow reactor.
3.	To study residence time distribution in continuous stirred tank reactor.
4.	To study CSTR PFR in series.
5.	To study CSTR in series.
6.	Determination Surface area of catalysts.
7.	Determination of bulk density, apparent density, and true density of catalyst.
8.	Determination Pore volume of catalysts.

<b>Syllabus for Unit Test:</b>	
Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

## PROCESS INSTRUMENTATION AND INSTRUMENTAL METHODS OF ANALYSIS

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have

Basic knowledge of Mathematics.

**TEACHING SCHEME:**

Lectures: 3 Hour/Week

Tutorial : 2 Hour /Week

Total: 5 Hour /Week

**EXAMINATION SCHEME:**

End Semester Examination: 60 Marks

Unit Test: 20 Marks

Continuous Assessment: 20 Marks

TW/Practical: 25 marks

Total : 125 Marks

**CREDITS ALLOTTED:**

Theory : 03

Practical : 01

Total credits: 04

**Course Outcomes:**

After completion of the course students will be able to

1. To explain the need of process instrumentation and process control in chemical industries.
2. To describe various chemical analysis instruments.
3. To explain conductometry, turbidimetry and refractometry.
4. To describe chromatography methods.
5. To develop an ability to use theorems to compute the Laplace transform, inverse Laplace transforms. To calculate the transfer functions for first order and second order systems.
6. To explain various control action for first order and second order system.

**Topics covered**

<b>UNIT-I</b>	<p><b>Introduction:</b> Basic Concepts and characteristics of measurement system, various elements of instrument, performance characteristics.</p> <p><b>Temperature measurement:</b> Introduction, methods of temperature measurement by expansion thermometers, filled system thermometers, electrical temperature instruments, pyrometers. Calibration of Thermometers</p> <p><b>Level measurement:</b> Displacers, ultrasonic, microwaves, laser light.</p>	<b>(06 Hours)</b>
<b>UNIT-II</b>	<p><b>Introduction to instrumental methods of analysis:</b> General Introduction, classification of instrumental methods, spectroscopy, properties of electromagnetic radiation, <b>pH metry, Karl Fischer Titration.</b></p> <p><b>Visible Spectrophotometry &amp; Colorimetry:</b> Deviation from Beer's law, instrumentation applications. Molar compositions of complexes, examples.</p>	<b>(06 Hours)</b>
<b>UNIT-III</b>	<p><b>Conductometry:</b> Introduction, laws, conductance, measurements, types of conductometric titrations, applications, advantages and disadvantages.</p> <p><b>Nephelometry and Turbidimetry:</b> Introduction, theory, comparison with spectrophotometry, instrumentation, applications.</p> <p><b>Refractometry:</b> Introduction, Abbe refractometer, instrumentation, applications.</p>	<b>(06 Hours)</b>

<b>UNIT-IV</b>	<p><b>Chromatography:</b> Introduction, types, theoretical principles, theories of chromatography, development of chromatography, qualitative and quantitative analysis, applications and numerical.</p> <p><b>Gas Chromatography:</b> Introduction, principles of gas chromatography, gas liquid chromatography, instrumentation, evaluation, retention volume, resolution. Branches of gas chromatography, applications and numerical.</p> <p><b>High Performance (Pressure) Liquid Chromatography:</b> Introduction, principles, instrumentation, apparatus &amp; materials, column efficiency and selectivity, applications.</p> <p><b>GC-MS, LC-MS.</b></p>	<b>(06 Hours)</b>
<b>UNIT-V</b>	<p><b>Process dynamics:</b> Introduction, tools of dynamics analysis, ideal forcing function, input output model, transfer function models, proportion of transfer function, poles &amp; zeros of transfer function with qualitative response, dynamic behavior of pure integrator, pure gain, first order &amp; second order systems (with or without dead time), physical example of these systems.</p>	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<p><b>Introduction to feedback control:</b> Final Control Elements - Valve characteristics. Instrumentation symbols. Introduction to Process Flow Diagram (PFD) and Piping &amp; Instrumentation Diagram (P&amp;ID).</p> <p><b>Control theory basics:</b> The control loops, process control terms, components of control loops, basic control action i.e. on-off, P, I, D, PI, PD, PID for 1st order process control loops and 2nd order response.</p>	<b>(06 Hours)</b>

#### List of Experiments:

Term work will consist of the experiments listed below, of which at least eight should be performed in laboratory by the students.

1.	To Study the characteristics of On-Off Controller.
2.	Calibration of Bimetallic thermometer.
3.	Gas Chromatography.
4.	High Performance Liquid Chromatography.
5.	UV Spectrophotometer.
6.	Dynamic behavior of non interacting system.
7.	Dynamic behavior of interacting system.
8.	Mercury Thermometer With well and Without Well.
9.	Conductivity meter.
10.	PH meter analysis.
11.	Manometer Tuning.
12.	To Study the Thermocouple.
13.	Calibration of RTD.

#### Assignments:

1.	Students have to visit chemical industry and prepare a detailed report on various instruments used for process variable measurement.
2.	Students have to visit chemical industry and prepare a detailed report on various instruments used

	for chemical analysis.
3.	Watch NPTEL video and make report on various instruments used for process variable measurement.
4.	Presentation on instruments used for process variable measurement.
5.	Group discussions on instruments used for process variable measurement.
6.	To find Transfer Function for 1 <sup>st</sup> order and 2 <sup>nd</sup> order Instrument or process.
7.	Draw the Control Loop for HE for different process variable control.
8.	Draw the Control Loop for Batch Reactor for different process variable control.
9.	Draw the Control Loop for CSTR for different process variable control.

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I, II, III
Unit Test -II	UNIT – IV, V, VI

## COMPUTER PROGRAMMING FOR CHEMICAL ENGINEERING - II

**Designation:** Computing

**Course Pre-requisites:**

Students should have basic knowledge of

- |   |   |
|---|---|
| 1 | Computer fundamentals                           |
| 2 | Computer Programming for Chemical Engineering-I |

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Practical : 2 Hour /Week	Term work / practical : 50 Marks	Practical : 01
		Total credits : 01

**Course Outcomes:**

After completion of the course students will be able to

- |    |  |
|----|--|
| 1. | Apply the knowledge of constant, variables, data types and various standard input output functions to write C-programs.                            |
| 2. | Prepare a flow chart and write C-programs using control constructs and looping statements.   |
| 3. | Explain the concept of single dimensional and multidimensional arrays and write C-programs for single dimensional arrays, multidimensional arrays. |
| 4. | Write C-programs using string.   |
| 5. | Explain the concept of pointer and write C-programs using pointers.  |
| 6. | Apply the knowledge of C-programming language, CHEMCAD, MATLAB for chemical engineering calculations.  |

**Term Work:**

Term work will consist of the programs/practicals listed below, out of which any eight programs/practicals are to be performed in laboratory by the students.

- |   |   |
|---|---|
| ➤ | <p><b>C-Programming Language:</b> Introduction, Character sets, constant, variables and <u>Data Types</u>: integer, float, double, char, string. <u>Operators</u>: arithmetic, relational, logical, increment and decrement, assignment, conditional. Standard input-output functions: printf ( ), scanf ( ), getch ( ) or getchar( ).</p> <p>1. Programs based on standard input-output functions used in C-Programming.</p> |
| ➤ | <p><u>Control statements</u>: programs using if statement, if-else statement, goto statement and switch-case statement.</p> <p>2. Programs based on if-else statements.<br/>3. Programs based on goto statements.<br/>4. Programs based on switch-case statements.</p>  |
| ➤ | <p><u>Loop statements</u>: programs using while loop, do-while loop and for loop.</p> <p>5. Programs based on while loop.<br/>6. Programs based on do-while loop.<br/>7. Programs based on for loop.<br/>8. Programs to solve chemical engineering problems.</p>  |
| ➤ | <p><u>Arrays</u>: single dimensional and multi-dimensional arrays.</p>  |

	9. Programs based on single dimensional arrays. 10. Programs based on multi-dimensional arrays.
➤	<u>String:</u> programs using string. String functions: strlen( )/ strcpy( )/ strrev( )/ strcat ( )/strlwr ( )/strupr ( )/ strcmp ( ).  11. Programs based on strings and string functions. 12. Programs based on string functions.
➤	<u>Pointers:</u> programs using pointers. Use of * and & operators. Pointer arithmetic's. Use of pointers <u>Pointer and function:</u> parameter passing to function by reference and by value. File handling, Linked list  13. Programs based on pointers and function
➤	<u>Application of C-programming language, CHEMCAD and MATLAB for Chemical Engineering:</u> various calculations and solutions in Chemical Engineering.  Term work includes programs based on following unit operations 13. Design of co-current and counter current heat exchanger 14. Design of Distillation column 15. Design of Mixed Flow Reactor 16. Design of Evaporator etc.
In addition to these above stated programs / practicals concern faculty member may design his/her own programs / practicals.

## CHEMICAL PROCESS EQUIPMENT DESIGN-II

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have basic knowledge of

- |   |  |
|---|--|
| 1 | Unit Operations involved in chemical engineering                     |
| 2 | Heat transfer and Mass transfer and Mechanical operation equipments. |

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Lectures: 3 Hours/Week	End Semester Examination: 60 Marks	Theory : 03
Drawing : 2 Hour /Week	Unit Test: 20 Marks	Drawing: 01
Total : 5Hours/Week	Continuous Assessment: 20 Marks	Total credits: 04
	Term work / practical:50 Marks	
	Total :150 Marks	

**Course Outcomes:**

After completion of the course, students would be able to

- |    |   |
|----|---|
| 1. | Design evaporator and crystallizers.                            |
| 2. | Design Dryers and Filters.                                      |
| 3. | Design different columns used in distillation/Absorption.       |
| 4. | Identify and design different packings used in packed columns.  |
| 5. | Calculate height of packing, column diameter in packed columns. |
| 6. | Understand importance of process safety and Hazard Analysis.    |

### Topics covered

<b>UNIT-I</b>	<p><b>Evaporators &amp; Crystallizers</b></p> <p>Classification of vaporizing equipment, evaporators such as kettle, thermosiphon, vertical, horizontal etc., Chemical evaporators, natural circulation &amp; forced circulation evaporators, the calculation of chemical evaporators, crystallizers, types of crystallizers, design considerations. Case studies on evaporators.</p>	<b>(06 Hours)</b>
<b>UNIT-II</b>	<p><b>Filters &amp; Dryers:</b></p>	<b>(06 Hours)</b>

	Various types of filters like vacuum filters, pressure filters, centrifuges and rotary drum filters, design of rotary drum filters, including design of drum, shaft, bearing and drive system. Types of dryers, batch type dryers, continuous dryers.	
<b>UNIT-III</b>	<b>Tray Column Design</b> Design of plate column- distillation columns, design variables in distillation, design methods for binary systems, plate efficiency, approximate column sizing, plate Contactors, plate hydraulic design.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Packed Column Design</b> Choices of packing, types of packing, packed bed height (distillation and absorption), HETP, HTU, NTU, Cornell's method, Onda's method, column diameter, column internals, column auxiliaries.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Piping Design I</b> Definition and Application of Piping, Classification of pipe, Piping Material Specifications, Manufacturing Method, Weight and Size Standards STD , Extra Strong XS , Double Extra Strong XXS etc. Pressure Temperature Rating System, Pipe Fittings, Types of Flanges, Types of Valves,	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Piping Design II</b> Codes and Standards, Piping elements, Pipe Hydraulics and Sizing, Mechanical Design, Fundamentals Piping Drawing, Basics Development of Plot Plan, Equipment and Piping Layout, Stress Analysis Static and Dynamic, Selection and Design of Supports and Expansion Joints, Transient Fluid flow Analysis. Friction Factor, Moody Diagram, Minor Losses in Piping ,Equivalent Length Method & Loss Coefficient Method,	<b>(06 Hours)</b>

**Assignments**

1.	Write a report on different evaporators and crystallizer
2.	Types of Dryers and filters.
3.	Designing of Distillation column.
4.	Designing of Absorption column.
5.	Importance of piping design.

6.	Pipe sizing and supports
7.	Report on Equivalent Length Method & Loss Coefficient Method,
8.	Solve old (last five years) question papers with reference to particular topic.
9.	Prepare a model for any of the equipment
10.	Prepare a report on advance equipments which are newly introduced in the current year.
11.	Give fifteen minutes presentation (seminar) on particular topic and prepare a report.
12.	Solve old (last ten years) GATE question papers with reference to design subject.
13.	Group discussion on the recent advances in equipment design
14.	Write a report on your visit to research and development laboratory of national/international repute.
15.	Technical interview based on the knowledge of design

In addition to these above stated assignments concerned faculty member may design his/her own assignments

**Term Work:**

Term work will consist of the Practicals and drawings listed below, out of which any eight are to be done by students. Any one drawing in Autocad.

1.	Design and drawing of evaporator.
2.	Design and drawing of crystallizer.
3.	Design and drawing of rotary filter.
4.	Detailed design and drawing of piping layout.
5.	Detailed design and drawing of spray dryer..
6.	Detailed design and drawing of distillation column.
7.	Detailed design and drawing of absorption column..
8.	Study various packings.
9.	Design and calculations of packed column.
10.	Study the contains of stress analysis of pipes.
11.	Detailed design and drawing of piping supports.

<b>Syllabus for Unit Test:</b>	
--------------------------------	--

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

<b>MULTIPHASE REACTION ENGINEERING</b>		
Designation: Professional Core		
Course Pre-requisites:		
Students should have basic knowledge of		
1	Thermodynamics	
2	Transport Processes	
<u>TEACHING SCHEME</u>	<u>EXAMINATION SCHEME</u>	<u>CREDITS ALLOTTED</u>
Lectures : 3 Hours/Week	End Semester Examination : 60 Marks	Theory : 03
	Unit Test : 20 Marks	Practical: 01
	Continuous Assessment : 20 Marks	Total credits: 04
	Total :100 Marks	
<b>Course Outcomes:</b>		
After completion of the course students would be able to		
1	Recognize the importance of multiphase reactors.	
2	Determine chemical reaction equilibrium constant and rate controlling step for heterogeneous system.	
3	Recognize the effect of system and operating parameters on the hydrodynamics of multiphase reactors.	
4	Recognize the significance of mixing and determine extent of mixing in multiphase system	
5	Determine the effect of system, geometric, and operating parameters on heat and mass transfer coefficients.	
6	Enumerate the effect of hold up in the design of multiphase reactors	
<b>Topics covered</b>		
<b>UNIT-I</b>	<b>Introduction to Multiphase Reactor Engineering</b> Types, Classification, Application of Industrial Importance. Two case studies	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Thermodynamics and kinetics</b> Notable industrial heterogeneous systems and thermodynamic role. Application of equilibrium criteria to chemical reactions. The Gibbs energy change and equilibrium constant. Estimation of equilibrium constant for heterogeneous system by defining standard state of the phases involved. Determination of rate controlling step: intrinsic kinetics for heterogeneous systems	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Hydrodynamic Characteristics</b> Hydrodynamic characteristics of different multiphase reactors: Mechanically	<b>(06 Hours)</b>

	Agitated Contactors (MAC), Bubble Columns, Slurry Reactors, Fluidized Beds, Loop Reactors and Modified Versions	
<b>UNIT-IV</b>	<b>Mixing Studies</b> Effect of geometrical, system, and operating parameters on phase mixing in multiphase reactors. Quantification of phase mixing. Development of a mathematical model.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Heat Transfer and Mass Transfer Studies</b> Effect of geometrical, system, and operating parameters on heat transfer coefficient in multiphase reactors. Quantification of heat transfer coefficient. Application of correlations available to different multiphase reactors. Experimental techniques used for estimation of mass transfer coefficient and selection of suitable technique for a multiphase reactor. Effect of geometrical, system, and operating parameters on mass transfer coefficient in multiphase reactors. Quantification of mass transfer coefficient. Application of correlations available to different multiphase reactors.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Design Aspects of Multiphase Reactors</b> Pressure drop, Fractional phase hold- up, mass and heat transfer coefficient, extent of mixing, etc.	<b>(06 Hours)</b>

**Assignments:**

1.	Enumerate any one industrial relevant multiphase system
2.	Refer any one recently published article related to multiphase system and make presentation
3.	Estimate the power requirement for a given impeller
4.	Visit to any chemical process industry to study atleast one multiphase system
5.	List the pressure measurement tools available in the market
6.	List and enumerate physical significance of the empirical correlations available in the literature to estimate liquid dispersion coefficient.
7.	List and enumerate physical significance the empirical correlations available in the literature to estimate mass transfer coefficient.
8.	Refer any review article perati
9.	Technical interview based on the knowledge of analytical techniques.
10.	List out all the principles of the analytical techniques.
11.	Perform any one chromatographic technique.
12.	Find out different types of proteins with structure.
13.	Prepare a report on downstream processing.

In addition to these above stated assignments concerned faculty member may design his/her own

assignments.

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

## PLANT UTILITIES AND PROCESS SAFETY

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have knowledge of

1. Chemical Technology, Chemical Process Industries

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Lectures : 3 Hours/Week	End Semester Examination : 60 Marks	Theory : 03
	Unit Test : 20 Marks	Total credits : 03
	Continuous Assessment : 20 Marks	
	Total : 100 Marks	

**Course Outcomes:**

After completion of the course students will be able to

1. Identify the common utilities required for Chemical Plant.
2. Express various types of boilers and their selection.
3. Analyze the importance of insulation and air pressure in process.
4. Identify and analyze the hazards.
5. Integrate the theoretical and practice knowledge to understand hazards activities.
6. Implement the safety designs and procedures.

### Topics covered

<b>UNIT - I</b>	<p><b>Identification of common plant utilities</b></p> <p>Role and importance of plant utilities in chemical plants, Water, compressed air, steam, vacuum, refrigeration, venting, flaring and pollution abating. Water and its quality, storage and distribution for cooling and fire fighting, Water resource management.</p>	<b>(06 Hours)</b>
<b>UNIT - II</b>	<p><b>Steam Generation and Utilization</b></p> <p>Steam generation and its application in chemical process plants, distribution and utilization; Types of boilers and their operation; steam economy, Steam condensers and condensate utilization, Steam generation by utilizing process waste heat using thermic fluids, Selection and sizing of boilers; waste heat</p>	<b>(06 Hours)</b>

	boilers.	
<b>UNIT - III</b>	<p><b>Compressors, blowers and Vacuum Pumps</b></p> <p>Compressors, blowers and vacuum pumps and their performance characteristics; Methods of developing vacuum and their limitations, material handling under vacuum, Creation of low pressure/vacuum by pumps and ejectors.</p> <p><b>Refrigeration and HVAC</b></p> <p>fundamentals of refrigeration, refrigerant management and safety, Selection of refrigerants; Processes of HVAC, Psychometric Chart and Air-Conditioning System, Ventilation and Indoor Air Quality.</p>	<b>(06 Hours)</b>
<b>UNIT - IV</b>	<p><b>Elements of Safety</b></p> <p>Elements of safety, safety and site selection; Plant layout and unit plot planning; Definition of risk and hazard, Identification and assessment of the hazards, distinction between hazards and risk, Industrial hygiene, toxicological studies, Hazard operability (HAZOP) hazard analysis (HAZAN); Safety Integrity Level (SIL) Studies; Technology selection and transfer, choosing the right process.</p>	<b>(06 Hours)</b>
<b>UNIT - V</b>	<p><b>Safety in Chemical Processes</b></p> <p>Introduction, Chemical Process classification, Process design and safety parameters. Safety parameters in the process design of phenol from cumene, safety in polyvinyl chloride plant.</p> <p><b>Chemicals and their Hazards</b></p> <p>Acetonitrile, acetyl chloride, butyl amine, acrylamide, acrylonitrile, allyl alcohol, benzene, bromine, isopropyl alcohol, acetaldehyde, ethylene oxide, butane, n-hexane, anhydrous ammonia, acetone, toluene, p-xylene, acetic acid, monochloro benzene, oleum, carbon monoxide.</p>	<b>(06 Hours)</b>
<b>UNIT - VI</b>	<p><b>Safety Procedures and Designs</b></p> <p>Process Safety Hierarchy, Process Safety Strategies, Managing Safety, Safety Reviews and Accident Investigations, Designs for Process Safety, Inherently Safer Designs, Controls: Double Block and Bleed, Safeguards or Redundancy, Block Valves, Explosion Suppression, Designs for Runaway Reactions.</p>	<b>(06 Hours)</b>

<b>Tutorials/Assignments:</b>	
The internal assessment shall consist of minimum SIX assignments from the following list	
1.	Prepare a report on safety issues of any one particular industry.
2.	Prepare Utility Line Diagram (ULD) for typical process.
3.	Write a report on HAZOP study of one particular hazard.
4.	Prepare a report on the color codes for utility pipelines in chemical plants.
5.	Enhancement in collaborative learning is done through, group assignments that will be given to encourage students to work with classmates to discuss and complete homework assignments
6.	Write a report on “ Importance of Industrial Hygiene in Chemical Industry”
7.	Group discussions on any of the following topics: <ul style="list-style-type: none"> <li>a) Importance of various utilities in chemical industries.</li> <li>b) Process safety in petroleum industry</li> <li>c) HAZOP Vs HAZAN</li> </ul>
8.	Design a manual for application of utilities for various plants.
9.	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.
10.	Write a technical report on HAZAN study of any one particular threat.
11.	Elaborate the role of safety engineer in Chemical industry.
12.	Organizing a industrial visit to nearby industry to understand the plant utilities and safety measures.
13.	Write a report on your visit to research and development laboratory of national/international repute.

6.	Trevor A. Kletz, "Hazop & Hazan: Identifying and Assessing Process Industry Hazards", Fourth Edition, CRC Press, 1999.
<b>Syllabus for Unit Test:</b>	
Unit Test - I	UNIT– I, II, and III
Unit Test - II	UNIT– IV, V, and VI

## PROCESS DYNAMICS AND CONTROL

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have

1. Basic knowledge of Mathematics.
2. Process Instrumentation and Instrumental Methods of Analysis

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Lectures: 3Hours/Week	End Semester Examination: 60 Marks	Theory : 03
Tutorial : 2 Hour /Week	Unit Test: 20 Marks	Practical : 01
Total: 5 Hour /Week	Continuous Assessment: 20 Marks	Total credits: 04
	TW/Practical: 50 marks	
	Total : 150 Marks	

**Course Outcomes:**

After completion of the course students will be able to

1. To give details of basic control action and develop mathematical models for control purpose.
2. To illustrate behavior of chemical processes.
3. To elucidate transient response of system.
4. To describe stability of the system.
5. To analyze frequency response of process.
6. To apply knowledge for controller selection and tuning.

### Topics covered

<b>UNIT-I</b>	<p><b>Introduction:</b> Block diagrams, closed loop and open loop control systems, Basic control actions.</p> <p><b>Open Loop Response of Simple Systems:</b> Dynamics of first order systems using transfer functions; Various first order responses such as, a thermometer bulb. General response to step, ramp, impulse, and sinusoidal inputs; Concentration and temperature responses of a stirred tank</p>	<b>(06 Hours)</b>
---------------	--	-------------------

<b>UNIT-II</b>	<b>Dynamic Behavior of Chemical Processes:</b> Linearization of liquid level systems: Response of a pressure system, second order systems, the manometer; Response of interacting and non interacting systems. Transfer functions and the input-output models. Dynamics and analysis of first, second and higher order systems.	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Transient Response of Control Systems:</b> Servo and regulated operation, General equations for the transient response, proportional control of a signal capacity process; Integral control, Proportional-integral control and derivative action.	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Stability:</b> Concept of stability, Stability criterion, Routh test for stability. <b>Root Locus Analysis:</b> Concept of root locus, Locus diagram.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Frequency Response Analysis:</b> First order systems, Bode diagram, and Complex numbers to get frequency response. Nyquist plot.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Advanced Control Schemes:</b> Controller selection and tuning, Control valve characteristics and sizing, cascade control, Feed forward and ratio control. Introduction of digital control system.	<b>(06 Hours)</b>

#### List of Experiments:

Term work will consist of the experiments listed below, of which at least eight should be performed in laboratory by the students.

1.	To study the closed loop pressure control for P control action and calculate offset.
2.	To study the closed loop pressure control for PI action PID action.
3.	To study optimizing performance for pressure control trainer by using tuning technique with help of PID action.
4.	To study closed loop system for servo problem having PI action consideration.
5.	To study the closed loop flow controller
6.	To study the closed loop level controller

7.	To study the ratio controller
8.	To study the cascade controller
9.	Root locus analysis on software (Ex. MATLAB)
10.	Bode plot on software (Ex. MATLAB)
11.	Nyquist plot on software (Ex. MATLAB)
12.	PID control loop simulation for a first order process (Ex. SIMULINK)

**Assignments:**

1.	Students have to visit chemical industry and prepare a detailed report on various controllers used in industry.
2.	Watch NPTEL video and make report on various topics in process dynamics and control
3.	Group discussions on controllers used for chemical processes.
4.	To find Transfer Function for 1 <sup>st</sup> order and 2 <sup>nd</sup> order process.
5.	Draw the Control Loop and Block Diagram for different chemical processes.
6.	Solve numerical questions in last three year question papers.
7.	Write note on Advance Controllers.
8.	Explain Digital Controllers.
9.	Explain IMC Controller in Detail.
10.	Explain MPC Controller in Detail.
11.	Explain process Identification of any Chemical Process in detail
12.	Explain Optimal control of any one Chemical Process.

**Text Books/References:**

4	Seborg, D.E., Edgar, T.F. and Mellichamp, "Process dynamics and control," Wiley, New York, D.A. 2003.

**Syllabus for Unit Test:**

Unit Test -I	UNIT – I , II, III
Unit Test -II	UNIT – IV, V, VI

## CHEMICAL PROCESS MODELING AND SIMULATION

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have basic knowledge of

- |   |   |
|---|---|
| 1 | Heat transfer, Mass transfer, Chemical reaction engineering, Process Dynamics and Control |
| 2 | Process Calculation   |
| 3 | Mathematics including integration and derivation  |

<u>TEACHING SCHEME:</u>	<u>EXAMINATION SCHEME:</u>	<u>CREDITS ALLOTTED:</u>
Lectures: 3 Hours/Week	End Semester Examination: 60 Marks	Theory : 03
Practical : 2 Hour /Week	Unit Test: 20 Marks	Practical: 01
Total : 5Hours/Week	Continuous Assessment: 20 Marks	Total credits: 04
	Term work / practical:50 Marks	
	Total :150 Marks	

**Course Outcomes:**

After completion of the course students would be able to

- |   |   |
|---|---|
| 1 | Express mass balance, energy balance and momentum balance equation for various chemical process systems.            |
| 2 | Express models for heat transfer equipment such as double pipe heat exchangers, shell and tube heat exchanger, etc. |
| 3 | Develop models for distillation columns, etc.   |
| 4 | Develop models for reaction equipment such as batch reactor, CSTR, etc.   |
| 5 | Recognize simulation approaches.  |
| 6 | Simulate model equations using numerical methods.   |

### Topics covered

<b>UNIT-I</b>	<p><b>Introduction to modeling:</b> Introduction, definition of modeling, different types of models, applications of mathematical modeling, principles of formation, lumped model, distributed parameter model, Fundamental laws: continuity equation, energy equation,</p>	<b>(06 Hours)</b>
---------------	---	-------------------

	equations of motions, transport equations, equations of state, chemical kinetics.	
<b>UNIT-II</b>	<b>Modeling of Heat transfer equipment:</b> Double pipe heat exchanger, shell and tube heat exchanger, two heated tanks, single component vaporizer, steady-state heat Conduction through a hollow cylindrical pipe, heat transfer with coil	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Modeling of distillation columns:</b> Ideal binary distillation column, multi component non-ideal distillation column, batch distillation with holdup, flash distillation, packed column design	<b>(06 Hours)</b>
<b>UNIT-IV</b>	<b>Modeling of reactors:</b> Two phase CSTR with heat removal, series of isothermal constant holdup CSTRs, CSTRs with variable holdups, Gas phase-pressurized CSTR, Non-Isothermal CSTR, Batch reactor, gas liquid bubble reactor, semi-batch reactor.	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Introduction to simulation:</b> Introduction to simulation, definition of simulation, approaches of simulation: modular approaches, equation-solving approach, decomposition of networks: tearing algorithms, algorithms based on the signal flow graph, algorithms based on reduced digraph.	<b>(06 Hours)</b>
<b>UNIT-VI</b>	<b>Simulations using numerical methods:</b> Use of numerical methods to solve mathematical model equations of Gravity flow tank, Three CSTRs in series, Non-isothermal CSTR, Binary distillation column, Multi-component distillation column, Batch reactor.	<b>(06 Hours)</b>

<b>Assignments</b>	
1	Write a report on the importance of modeling with reference to the process industries.
2	Solve old (last five years) question papers with reference to particular topic.
3	Discuss the importance of modeling and simulation w. r. t. science and engineering
4	Prepare a report on application of modeling and simulation.
5	Give fifteen minute presentation (seminar) on particular topic and prepare a report.
6	Obtain any industrial data for modeling and simulation.
7	With the help of this subject knowledge, write a guideline report on how you would apply your concepts in industry.

8	Discuss different software available for modeling and simulation.
9	Write a technical report on your visit to a process industry with respect to modeling.
10	Group discussion on the recent advances in simulation software.
11	Prepare a report on modeling and simulation of all different chemicals reactors.
12	Technical interview based on the knowledge of Modeling simulation.
13	Students may take any industrial case e.g. manufacturing of Maleic anhydride and solve this case using standard simulation software like Aspen Plus, HYSIS
In addition to these above stated assignments concerned faculty member may design his/her own assignments.	
<b>Term Work:</b>	
Term work will consist of the practicals listed below, out of which any eight practicals are to be performed in laboratory by the students.	
1	Study of gravity flow tank.
2	Study of Batch reactor
3	Simulation of CSTR
4	Simulation of bubble point temperature
5	Simulation of distillation column.
6	Simulation of heat exchanger
7	Simulation of first order reaction system in batch reactor.
8	Simulation of first order reaction system in CSTR
9	Study of a reversible reaction in a batch reactor.
10	Simulation of any model equation.
11	Study of CSTR combination in first order reactions.
For simulation, faculty member may use any suitable simulation software like MATLAB, ASPEN, CHEMCAD, etc. In addition to these above stated practicals concerned faculty member may design his/her own practicals.

Unit Test -I	UNIT – I ,II,III
Unit Test -II	UNIT – IV,V,VI

## INDUSTRIAL MANAGEMENT

**Designation:** Professional Core

**Course Pre-requisites:**

Students should have basic knowledge of

1	Concept of Management.
---	------------------------

**TEACHING SCHEME:**

Lectures: 3 Hours/Week

Total: 3 Hours/Week

**EXAMINATION SCHEME:**

End Semester Examination: 60 Marks

Unit Test: 20 Marks

Continuous Assessment: 20 Marks

Total : 100 Marks

**CREDITS ALLOTTED:**

Theory : 03

Drawing: 00

Total credits: 03

**Course Outcomes:**

After completion of the course, students would be able to

- |    |   |
|----|---|
| 1. | Know the types of business.               |
| 2. | Understand the types of organization      |
| 3. | Understand the forms of ownership.        |
| 4. | Know the concepts of material management. |
| 5. | Know the concepts quality management.     |
| 6. | Know the various acts.                    |

### Topics covered

	<b>Outline of Business</b>	
<b>UNIT-I</b>	Types of Business, Industrial sectors Globalization Management Process, Principles of Management, Functions of Management	<b>(06 Hours)</b>
<b>UNIT-II</b>	<b>Organizational Management</b> Organization, Types of organization, Departmentation, Principles of Organization, Forms of ownership	<b>(06 Hours)</b>
<b>UNIT-III</b>	<b>Financial Management</b> Financial Management- Objectives & Functions, Capital Generation &	<b>(06 Hours)</b>

	Management, Budgets and accounts, Taxation (Excise Tax, Service Tax, Income Tax, Value Added Tax and Custom Duty)	
<b>UNIT-IV</b>	<b>Materials Management</b> Inventory Concept, its classification, functions of inventory, ABC Analysis, Economic Order Quantity Concept, graphical representation, determination of EOQ, Standard steps in Purchasing, Modern Techniques of Material Management, Material Resource Planning (MRP), Enterprise Resource Planning (ERP)	<b>(06 Hours)</b>
<b>UNIT-V</b>	<b>Quality Management</b> Quality Management System, Quality Control, Quality Circle, Quality Assurance, Total Quality and TQM, Kaizen, 5'S', 6 Sigma	<b>(06 Hours)</b>
