Clinical studies with 2% arginine and fluoride varnish as 4 weeks. Arginine potential and reduced acidity, while 1.5% arginine without fluoride resulted in increased arginine staining, which activity and raised the cytoplasmic and environmental.

Fluoride varnish with arginine varnish base was superior to fluoride varnish without arginine.

A systematic review has 40% reduction in caries and plaque could be expected. However, the results for caries and plaque were not significant.

**PROLIFERATION OF ORAL CARIES WITH PROBRITOLIC - IS IT A MEASURE TO CONSIDER?**

Good health, especially in saliva-saturated oral flora. There are various measures to reduce this bacteria.

**PROBRITOLIC** - Salivary and sublingual mucus (SLM) concentrations containing a broad range of bacteria.

**PROBRITOLIC MECHANISM**

- It maintains the microbial flora that inhibit pathogens on occlusal surfaces.
- It balances pH levels by generating acid from these organisms.

**CLINICAL STUDIES**

### Ways to avoid grapevine

- **Statutory information:** terms and conditions of service
- **Regular information:** about work situations through informal sessions.
- **Major policy decisions:** which will affect large number of people by meetings or notices.
- **Information bulletin:** to keep people informed about events through newsletters, sense of involvement.
- **Communication by expectancy:** critical changes to those who will be directly affected, creates expectancy in the receivers.

### REMEDIES OF OVER-CAPITALIZATION:

The process of remedying overcapitalization is very painful. It can be remedied through following measures:

1. Reduction in its capital so as to obtain a satisfactory relationship between proprietary funds and net profit.
2. If over-capitalization is because of result of over-valuation of assets then it can be remedied by bringing down the values of assets to their proper values.
3. Reduction of debt burden. For which negotiations with the big lenders may be made to reduce the interest obligation.
4. Preference shares may be redeemed through capital reduction scheme.
5. Reducing face value and paid up value of equity shares.
6. Initiating merger with well managed profit making companies interested in taking over ailing company.
