DR. SHWETA V. SAGARE

Sr. No	Name Of the Article	Name Of the Journal	Volume	Issue	Year	Page No
1	Reattachment Of The Uncomplicated Fracture And Direct Pulp Capping For Complicated Fracture Using MTA In Maxillary Anteriors: A Case Report	International Journal of Innovative Research And Advanced Studies	4	1	2017	147-150
2	An Effective Management Of Children With Bruxism : A Case Report	International Journal of Innovative Research And Advanced Studies	4	1	2017	157-159
3	Plasma Osteocalcin Levels, Status Of Oral Disease And Alteration In Mandibular Bone Density In Postmenopausal Women.	The Journal Of Contemporary Dental Practice	21	8	2020	916-921
4	Nusmile Zirconia Crowns: Pedodontist Perception To Restore Esthetic Smiles	European Journal Of Molecular And Clinical Medicine	08	03	2021	3329- 3333
5	Management of mutilated decayed teeth: a case series	Annals Of Romanian Society For Cell Biology	25	6	2021	10147- 157
6	A Comparative Study Of The Efficacy Of Waveone And Neo Endo	Journal Of Pharmacy And Bioallied Sciences	13	2	2021	S1683-85

9	An in vitro	Cureus	15	3		E36837
	evaluation of					
	evaluation of morinda citrifolia					
	morinda citrifolia					
	morinda citrifolia and ocimum snctum as				2023	
	morinda citrifolia and ocimum snctum as potential storage				2023	
	morinda citrifolia and ocimum snctum as potential storage media to maintain				2023	
	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for				2023	
	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth				2023	
	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase				2023	
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay.	Furonean	12	Si6	2023	4010-
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively	European Chemical	12	Si6	2023	4010- 4013
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of	Chemical	12	Si6	2023	4010- 4013
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond		12	Si6	2023	
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two	Chemical	12	Si6		
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Chemical	12	Si6	2023	
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate	Chemical	12	Si6		
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate and Zinc	Chemical	12	Si6		
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate and Zinc polycarboxylate	Chemical	12	Si6		
	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate and Zinc polycarboxylate used in dentistry.	Chemical Bulletein				4013
10	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate and Zinc polycarboxylate used in dentistry.	Chemical Bulletein	12	Si6		4013 5068-
	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate and Zinc polycarboxylate used in dentistry. Comparison of different rotary	Chemical Bulletein European Chemical			2023	4013
	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate and Zinc polycarboxylate used in dentistry. Comparison of different rotary files and dentinal	Chemical Bulletein				4013 5068-
	morinda citrifolia and ocimum snctum as potential storage media to maintain cell viability for avulsed teeth using collagenase Dispase assay. Comparatively evaluation of tensile bond strength of two luting cements (Zinc phosphate and Zinc polycarboxylate used in dentistry. Comparison of different rotary	Chemical Bulletein European Chemical			2023	4013 5068-

	treatment seen in stereomicroscope.					
12	A comparative evaluation of five different obturation techniques in the management of simulated internal resorptive cavities.	Pakistan Heart Journal	56	03	2023	931-934
