INVITATION

Dear Dr. Mridula Joshi,

I, Dr Naisargi Shah, am the Editor-in-Chief of the Journal of Prosthodontics and Dental Materials (JPDM) which is the official publication of the Indian Prosthodontic Society, Mumbai Navi Mumbai Branch. We are in our inaugural publication and we wish to take advantage of your immense experience, teachings and research abilities to validate the submitted articles. Your detailed, constructive and candid evaluations will strengthen the quality and lead to a publication of international levels.

We would kindly request you to voluntarily accept our invitation as a Reviewer of forwarded articles, which will be professionally beneficial and personally rewarding.

With your high ethical standards, we wish to reiterate your responsibilities such as

- i. The review articles are highly confidential and will not be shared and discussed with anybody.
- ii. If any conflict of interests (personal, professional or financial) or any strong disagreements are identified, you will recuse yourself from that article
- iii. You will return the review evaluations in stipulated or agreed time.

We will send more review policy guidelines and other evaluation criteria later with the manuscripts for review.

Kindly send your willingness with a reply to this mail with a brief CV and photo.

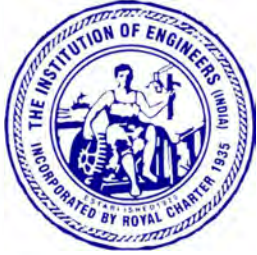

Please contact me (mentioned below) if you have any questions. I look forward to hearing from you soon.

Warm Regards,

Dr Naisargi Shah,
Editor, JPDM.

IJST-2020-1065 - Invitation for the review of a manuscript

Indian Journal of Science & Technology <indjst@manuscriptcommunicator.com>

Tue 7/28/2020 4:54 AM

To:

R. M. Holmukhe

Dear Dr. R. M. Holmukhe ,

Manuscript Id: IJST-2020-1065

Manuscript Title: An Investigation into Awareness and Usage of Lead Acid Batteries in E-rickshaws: A Field Survey in New Delhi

Manuscript Type: Review Article

Submitted Date: 25 July 2020

We invite and request you to take up the review of the manuscript submitted to the journal aforementioned. The abstract for the manuscript has been provided below, kindly go through the abstract and state your decision by clicking on the box:

Abstract:

Objectives: The purpose of this study is to identify the reasons which contribute to the premature failure of the e-rickshaw battery that puts the e-rickshaw operator (ERO) in financial stress. Methods: A field survey was conducted in the North-West Delhi suburbs to extrapolate the shortcomings. Different EROs, charging station operators (CSOs), battery vendors, and e-rickshaw manufacturers were interviewed with an administered questionnaire. Findings: Constant Current (CC) based chargers were found to be the major reason for the shortened life of the battery. These chargers along with other erroneous practices are preventing both the ERO and the CSO to get the full profitability that they could. Also, it was found during the field survey that the e-rickshaw ecosystem is in a dire need of a fast-charging algorithm. Most of the modern charging techniques such as the Constant Current-Constant Voltage (CC-CV), Pulse-Current, Superimposed Pulse Frequency, Intermittent-Current Charging, and Interrupted Charge-Control techniques are absent in the e-rickshaw technology. This paper gives a review of the aforementioned charging techniques, which can be used in the e-rickshaw ecosystem. Novelty/Improvement: Using the modern charging techniques will contribute to extending the battery life, reduce the charging time, and simultaneously increase the profitability of the ERO and the CSO.

Regards

Prof. Natarajan Gajendran

Editorial Board

Editor-in-chief:

The Editor-in-Chief is the highest-ranking member of the editorial team. They manage the team of editors, determine the look and feel of the journal, decide what to publish and oversee the publication's operations and policies. By reviewing and deciding upon submitted manuscripts to ensure sustainable and timely journal issue flow.

Dr. GopiKrishna V

Adjunct Professor

Sri Ramachandra Dental College & Hospital,

Chennai, India

Associate Editors:

The associate editors are a team of individuals that work directly with the editor in chief to develop the journal and promote new initiatives. They carry out primary evaluation of the manuscripts for journal suitability. They select and invite reviewers based on their expertise in the field of Endodontics. They supervise the constructive feedback provided by the reviewers in order to submit content of high quality to be published in each issue of the journal. They provide and declare the final decision made for an article which is then finally accepted or declined by the editor in chief. Additionally, they are actively involved in developing and implementing guidelines and procedures that are in compliance with the ethical standards for an article to be published.

Dear Reviewer,

A manuscript entitled **Medical Emergencies in Dentistry- A review**. (JOHSR_21_8) has been assigned to you for review and is available in your panel in Scriptor's Zone for review process.

The Abstract of the Article is below:

Medical emergencies have a way of happening unexpectedly. The best time to prepare for an emergency is well before it happens. When a true emergency happens in the office or in your home, the first few minutes can mean the difference between life and death. If we review protocol well before the stress of an emergency, we will be better able to think with a clear head. ~~This will enable~~ to react

Thank you for reviewing JOHSR_20_33

Dear Dr. Sachin BM,

We would like to take this opportunity to thank you for the effort and expertise that you contribute to reviewing, without which it would be impossible to maintain the high standards of peer-reviewed journals.

Thank you for your constructive comments concerning the manuscript entitled **Comparison of bioactive glass bone graft (putty) with autologous platelet rich fibrin in the treatment of intrabony defects (JOHSR_20_33)**.

Editor-in-Chief

Journal of Health Sciences & Research

About Us

The Journal of Human Reproductive Sciences (JHRS) (ISSN:0974-1208) is a Quarterly peer-reviewed international journal launched in January 2008 under the auspices of Indian Society of Assisted Reproduction. The journal covers all aspects of human reproduction as described under 'Scope of the journal'

With the aim of faster and better dissemination of knowledge, we publish articles 'Ahead of Print' immediately on acceptance. In addition, the journal allows an 'Open Access' to its contents, to facilitate readership and a free access to the scientific matter it publishes.

Abstracting and Indexing Information

The journal is registered with the following abstracting partners:

Baidu Scholar, CNKI (China National Knowledge Infrastructure), EBSCO Publishing's Electronic Databases, Ex Libris – Primo Central, Google Scholar, Hinari, Infotrieve, National Science Library, ProQuest, TDNet, Wanfang Data

The journal is indexed with, or included in, the following:

DOAJ, EMBASE/ Excerpta Medica, Indian Science Abstracts, PubMed Central, Scimago Journal Ranking, SCOPUS

Journal Ethics

Wolters Kluwer and Journal/Association are committed to meeting and upholding standards of ethical behavior at all stages of the publication process. We follow closely the industry associations, such as the Committee on Publication Ethics (COPE), International Committee of Medical Journal Editors (ICMJE) and World Association of Medical Editors (WAME), that set standards and provide guidelines for best practices in order to meet these requirements. For a summary of our specific policies regarding duplicate publication, conflicts of interest, patient consent, etc., please visit www.Medknow.com/EthicalGuidelines.asp

Open Access Publication and Creative Commons Licensing

This is an open access journal, and articles are distributed under the terms of the Creative Commons Attribution-NonCommercial-ShareAlike 4.0 License, which allows others to remix, tweak, and build upon the work non-commercially, as long as appropriate credit is given and the new creations are licensed under the identical terms.

Digital Archiving

Wolters Kluwer Medknow provides for long-term digital preservation through two primary partnerships, Portico and CLOCKSS.

Portico is a leading digital preservation service worldwide. The content is preserved as an archival version and is not publically accessible via Portico, but is provided when required under specific conditions, such as discontinuation of the collection or catastrophic failure of the website.

CLOCKSS will enable any library to maintain their own archive of content from Wolters Kluwer Medknow and other publishers, with minimal technical effort and using cheaply available hardware.

Ahead of Print policy

Articles published online under the Ahead of Print model are considered published and can be cited and quoted using the DOI as the reference source. Wolters Kluwer Medknow has a policy that changes will not be made after publication of an article without following accepted procedures for making corrections to the scientific record.

Advertisements

While advertisements are crucial to this journal to be able to keep all content free for everyone, ethical considerations are in place to ensure the integrity of the journal and its content:

- "Pop-up" and "banner" ads appear on a random, rotating basis. The advertiser has no control or input over the pages where their ads appear.
- The Editorial Board has full and final approval over the content of all advertisements.
- Advertisers will never be shown any manuscripts or other content prior to publication.

All correspondence, subscription orders and requests for placing advertisements should be addressed to the publications office in the address mentioned below:
