### *Message*

*It is with great joy and pride that I welcome you to the National Conference on "Empowering Public Health Nursing through Artificial Intelligence: Innovations, Ethics, and Impact."*

*We have arranged this unique and ambitious conference by keeping the vision of the university at forefront that is, "social transformation through dynamic education."*

*Artificial Intelligence (AI) refers to computer systems that can perform tasks that normally require human intelligence—such as learning, reasoning, problem-solving, and decision-making. In healthcare, AI is transforming how we screen diseases, support diagnoses, manage resources, and deliver personalized care.*

*Healthcare in India is at a turning point—while we continue to face enormous public health challenges, we are also blessed with opportunities to innovate and transform care delivery. Artificial intelligence is not just about technology; it is about people. It is about giving our nurses, patients, and communities new hope, faster solutions, and more compassionate care.*

*As public health nurses, you are the heart of our communities. Your role in bringing health closer to people cannot be replaced, but it can be strengthened. By learning how to responsibly use AI, you gain powerful tools that can help you detect illness earlier, manage chronic conditions better, and ensure that no one is left behind in the journey toward better health.*

*This conference is more than an academic event—it is a movement toward preparing ourselves for the future. It is about building confidence, fostering collaboration across professions, and leading with both knowledge and empathy in this digital era.*

*I believe the discussions and experiences shared here will ignite new ideas, encourage ethical practice, and empower each of you to create meaningful change in the lives of the people we serve. Together, let us embrace innovation not as a challenge, but as an opportunity to heal with wisdom, compassion, and courage.*

*Wishing you all an enlightening and memorable conference!*
