Guest Lecture on Android Development

A guest lecture on "Android Development" was successfully conducted on 6th January 2026. The session was delivered by Ms. Shivani Jadhav, *Senior Android Developer*, representing Kali-Byte Solutions, a startup established around 8–9 months ago. She was accompanied by the founding team members Mr. Rohan Patil, *Co-founder*, and Ms. Manasi Chougule, Co-founder & HR Manager.

The speakers shared valuable insights into the software development industry, highlighting domains such as software development, mobile application development, and web development. Students were introduced to real-time projects developed by the startup, including:

1. Government CS Office Website

2. Cricket Academy Mobile Application

3. FileSetu – File Management System

4. Jaggery Factory Management System

5. Laundry Management Web Application

6. Quality Management System

Dr. Rajendra Pujari, Head of the Department, felicitated the speakers in appreciation of their valuable contribution and industry-oriented guidance. The session provided students with practical exposure to current technologies, development workflows, and startup culture.

The program was conducted under the guidance of Dr. P. P. Jamsandekar, Director, and was efficiently coordinated by Dr. Suvarna Patil, who worked as the Event Coordinator. The institute expressed its gratitude to the guest speakers for making the lecture informative, interactive, and motivating for the students.
