Details of the Activity with Photographs (Geotag & non geotag Photos)-

The program for **CHILDREN'S DAY 2025** was conducted by the Department of Pediatric and Preventive dentistry. The event turned out to be a great success and full of joy, not only for the invited young preschoolers from FUTURE FOUNDATION INTERNATIONAL SCHOOL, SANGLI but also for the interns, postgraduate students and the faculty of Department of Pedodontics.

The event began with warm welcome of the kindergarden kids along with their Principal and staff members from the Future Foundation International School. The event began with teaching the children the proper brushing technique with a live demonstration using a jawset followed by interactive animated videos for the same. This was followed by the main event, which is oral screening for the children along with educating them about oral hygiene importance. The kids were then served snacks and refreshments. The event was concluded with lamp lighting ceremony. The children were presented with a small token of love in the form of gifts and oral hygiene kit. The department proceeded to felicitate our respected Dr. Sharad Kamat, as this event couldn't have been possible without his kind support.

As the event reached its conclusion, the student speaker delivered a vote of thanks and the kids were warmly sent off from the Department. The event was a huge success, organized under the guidance of our respected Principal Dr. Sharad Kamat, and our respected Head of Department, Dr. Anil Patil.

Outcome of the Activity:-

The event held on CHILDREN'S DAY was definitely fun, engaging and fulfilling for not only the invited children, but also the Department of Pediatric and Preventive Dentistry, BVDU, Sangli.

1. Improved oral health awareness: Children gained a better understanding of oral hygiene practices such as proper brushing, flossing and dietary habits.
2. Community and school engagement: Collaboration with school enhances community participation in oral health initiatives.
3. Promotion of preventive dentistry: Children and teachers become more receptive to preventive dental services.
4. Early detection of dental problems: Timely reference enables further preventive or corrective interventions.
