A Continuing Dental Education (CDE) Programme on **“Airway Management”** was successfully conducted on 15th April 2026 by the Department of Oral and Maxillofacial Surgery at Bharati Vidyapeeth (Deemed to be University) Dental College and Hospital, Sangli.

The programme began with didactic lectures held in the auditorium, followed by a hands-on workshop at the Simulation Lab, Bharati Medical College, Sangli, providing participants with both theoretical knowledge and practical training.

The event witnessed active participation from interns, postgraduate students, and staff members. A total of 31 students from BVDU Dental College and other colleges along with 33 staff members, attended the programme. Delegates from various institutions including PMNM Dental College, Bagalkot; MIDSR Dental College, Latur; Al-Ameen Dental College, Bijapur; KIMS Dental College, Karad; and Vasantdada Patil Dental College also attended, making it a well-represented inter-institutional academic programme.

The scientific sessions were conducted by experienced anaesthesiologists. Dr. Sreyoshi Som delivered a lecture on *Airway Assessment and Preparation Algorithm*, emphasizing systematic evaluation and planning in airway management. Dr. Ashwini Kshirsagar presented on *Endotracheal and Submental Intubation* and further elaborated on *Definitive Airway Assessment*, highlighting advanced airway techniques and their clinical relevance. Dr. Asmita Karnalkar conducted a session on *Supraglottic Airway Insertion*, focusing on indications, techniques, and practical considerations. These sessions provided a comprehensive understanding of airway management by integrating theoretical concepts with clinical expertise.

The hands-on workshop in the simulation lab enabled participants to practice essential skills including airway assessment, endotracheal intubation, use of supraglottic airway devices, and management of airway emergencies. This practical exposure significantly enhanced the confidence and competence of the participants

Outcome of the Activity:-

The CDE programme was highly beneficial and achieved its objectives by:

- Enhancing participants' knowledge of airway assessment and management
- Improving practical skills through simulation-based training
- Increasing confidence in handling routine and emergency airway situations
- Promoting interdisciplinary learning and collaboration

Overall, the programme was a great academic success, equipping participants with essential skills required for safe and effective airway management in clinical practice.
