Date: June 4, 2026

All teaching faculty and clinical staff members are hereby informed that the **BHARATI VIDYAPEETH (Deemed to be University) School of Physiotherapy, Sangli** is organizing a specialized, hands-on training session following the recent procurement of new, advanced electrotherapy and rehabilitation equipment.

The session is designed to upgrade clinical expertise and standardize safety protocols for operating high-end modalities.

- Extracorporeal Shockwave Therapy (ESWT)
- TECAR Therapy (Capacitive and Resistive Energy Transfer)
- Spinal Decompression Therapy

The session will include comprehensive theoretical insights followed by live practical demonstrations by expert trainers. Attendance is mandatory for all faculty and clinical staff to ensure seamless integration of these modalities into both patient care and student practical curricula.

Details of the Activity with Photographs-

Bharati Vidyapeeth (Deemed to be University) School of Physiotherapy, Sangli organized a specialized hands-on training session for its faculty and clinical staff on June 6, 2026. The training was conducted following the procurement of new, advanced electrotherapy and rehabilitation equipment for the college. The session focused extensively on the clinical applications, indications, contraindications, and safety protocols for Extracorporeal Shockwave Therapy (ESWT), TECAR Therapy (Capacitive and Resistive Energy Transfer), and Spinal Decompression Therapy.

The expert trainers provided comprehensive theoretical insights followed by practical, live demonstrations on patient simulation models. Staff members actively participated in operating the devices to understand dosage parameters and treatment customization. The coordinators for the event as Dr. Athira (Assistant Professor, BVDU SOP, Sangli) The event was highly successful and conducted under the guidance of Dr. Sneha Katke, Principal, BVDU SOP, Sangli.

Impact of the Activity

Clinical Skill Enhancement: The hands-on session updated the faculty's clinical expertise, allowing them to effectively operate high-end modalities like Shockwave and TECAR therapy in daily practice.

Evidence-Based Teaching: Acquiring direct operational knowledge ensures teachers can seamlessly integrate advanced physical modalities into the practical curriculum for undergraduate and postgraduate students.

Improved Patient Care: Mastering spinal decompression and advanced electrotherapy parameters enables the clinical staff to deliver more precise, accelerated recovery pathways for complex musculoskeletal and spinal conditions.

Safety & Protocol Standardization: The rigorous training established clear safety guidelines and standardized operating procedures within the department to mitigate risks and maintain high clinical standards.
