Value Added Course on **Gerontological Nursing**

Overview:

The geriatric population is the fastest growing health cohort around the world. Currently more than 10% of population in India is elderly. Most of the patients admitted in hospitals are geriatric patients. Nurses must have specialized knowledge and training to effectively educate, assess and care for these elderly people.

Gerontology is multidisciplinary and is concerned with physical, mental, and social aspects and implications of aging. Geriatrics is a medical specialty focused on care and treatment of older persons.

Gerontological nursing is the specialty of nursing pertaining to older adults. Gerontological nurses work in collaboration with older adults, their families, and communities to support healthy aging, maximum functioning, and quality of life.
