

BHARATI VIDYAPEETH (DEEMED TO BE UNIVERSITY), PUNE

Faculty of Engineering & Technology
B. Tech. - Civil
New Syllabus

BHARATI VIDYAPEETH (DEEMED TO BE UNIVERSITY) Pune.

Faculty of Engineering & Technology
Programme: B. Tech.(Civil) (2021 Course)
Course Structure & Syllabus
(Choice based credit systems-2021)
B.Tech (Civil Engineering)
Semester I to VIII

Bharati Vidyapeeth (Deemed to be University) Curriculum 2021-22

Executive summary

Students pursuing engineering studies need to be well equipped and state of art with the latest technological trends and industrial requirements. To produce the students with high caliber and technically sound, enrichment in the curriculum content and various quality initiatives are needed. This is possible only when the students undergo studies with an updated and evolving curriculum to match global scenario.

Curriculum Development History

- In ambits of Deemed University- 2000
- Curriculum of SPPU Accepted
- First Revision in 2004
- Second Revision in 2007
- Third Revision in 2011
- Fourth Revision in 2014
- Fifth Revision in 2018 was expected

The proposed curriculum is developed to inculcate the advanced engineering skills to cope up with upcoming industrial and societal needs. Students will be imparted with advanced contents from respective field and innovative delivery methods.

To inculcate the advanced engineering skills and knowledge, branch specific courses have been introduced from the Sem – I itself. There are total 38 theory courses, 4 vocational courses, 3 MOOCs, 2 projects, technical research paper writing, no. of application software courses, no. of practical based courses, 6 Industry taught courses along with 60 days exclusive internship have been incorporated in the curriculum with 230 credits and 6500 Marks.

There will be collaboration with the prominent industries to execute the vocational courses. These industries will deliver the content and execute the hands-on session to inculcate the required engineering skills of particular course.

| Also, one course pe industry of respect | er semester wil ive field for wh | ll be entirely d ich blended te | livered by the aching learnin | expert/s from the g will be adopted. |

| | | | | |

Students will apply the knowledge of respective courses and develop the prototype/ model as a part of project based learning.

To give the experience of technical writing and research article, students have to develop the two projects in pre final and final year respectively and shall submit the research article to reputed journal for publication. This will inculcate research aptitude among students and will enhance the research profile of institute also. Incorporation of various practical based courses in respective discipline, will give hands on experience to students to understand the engineering concept in better way. Nowadays all practices and process in the field are being computerized and automated. Hence, it was pertinent to increase software content in the curriculum. It was demand from the industry that every engineer should be conversant with Software/Programming/Data analysis and automation process. Hence, courses to such as C, C++, Python, Machine Learning, Artificial Intelligence are added in curriculum of all discipline. Students who wish to develop their career in the IT field, significant courses related to computational engineering and application software have been incorporated in the curriculum of each discipline.

National Education Policy is insisting the Online and Digital Education and Ensuring Equitable Use of Technology. To inculcate the self-learning approach amongst the students, proposed curriculum has introduced Massive Open Online Courses to all the students to provide an affordable and flexible way to learn new skills, advance the career and deliver quality educational experiences at scale.

Bharati Vidyapeeth (Deemed to be University) College of Engineering, Pune

2. Curriculum Content

- Curriculum derived from Latin word 'Currere', which means a race course or runway on which one runs to reach a goal.
- Curriculum is the instructional and educative programme by following students achieve their goals, ideals and aspirational life.
- Curriculum is a standards based sequence of planned experiences,
 which students practice and achieve proficiency in content and applied learning skills
- Its confidence building process
- Its total learning experience of the individuals
- Its interactive system of instructions and learning with specific goals , contents, strategies, measurements and resources.
- The desired outcome of curriculum is successful transfer / development of knowledge, skills, and attitude.
- Curriculum should lead to transformation of student to contributory member of the society

We tried to develop curriculum, which will meet these concepts.

Curriculum is the outline of concepts to be taught to students to help them meet the content standards. **Curriculum** is what is taught in a given course or subject. It refers to an interactive system of instruction and learning with specific goals, contents, strategies, measurement, and resources. It is a course of study that will enable the learner to acquire specific knowledge and skills. A **curriculum** consists of the "roadmap" or "guideline" of any given discipline. Both the philosophy of teaching of the instructors as well as of the educational institution serve as two of the principles upon which a curriculum is based.

In Engineering, a **curriculum** is the combination of instructional practices, learning experiences, and students' performance assessment that are designed to bring out and evaluate the target learning outcomes of a particular course. It is the goals, assessments, methods, and materials used to teach a particular skill or subject and includes thinking under "skill.". The curriculum needs to be planned

and designed in such a way so as to sequentially improve students' knowledge and skills.

Placement is an important parameter and outcome of a good curriculum, which satisfy the need of good placement. The written curriculum is a plan of what is to be taught so that the student gets good placement. For this , a variety of technical and non-technical courses that are required to complete a specific degree so as to help the student for placement are included in the curriculum. In addition to technical knowledge , it should also include social behaviors as well as content and thinking skills.

Overall, the curriculum should be such that it should develop a student in a good job seeker, good entrepreneur and also a good human being.

All the above aspects are taken care in the curriculum of **B. Tech-2021** course. This will develop different abilities in a student.

3. Curriculum Preamble

The curriculum 2021 is formed such that it will develop different abilities in a student. It a combination of blended teaching learning process in which both online and offline teaching is a part of the curriculum. In order to develop affection towards the discipline a student has selected, core discipline courses are included right from first year. This will also help to give the overall idea about the branch / discipline to the student.

Interaction with the industry is increased in this curriculum by introducing two new concepts –

1. Vocational Course and 2. Industry Taught Course.

Vocational Course (VC), a student will able to develop a specific skill set from the relevant people/ agency from the industry. This will add in gaining new skill sets required by the industry. Such Vocational Courses are included from Semester III to Semester VI of the curriculum. Department also design vocational course relevant for the discipline, which add practical knowledge to students. The vocational courses should be discipline specific. 4 vocational courses and 8 credits are integrated with curriculum.

Industry Taught Courses (ITC) are the courses which will be taught by the people from industry who are experts in the relevant field, either partially or fully. This will provide a scope to students to gain the latest knowledge as used in industry and also to have direct one on one interaction with the industry. This will develop a confidence among the students. Such teaching by industry experts will be as per their availability, if required online and other than official college hours also. Thus, there is a blend of online and offline teaching, knowledge from academicians as well as from industry. Total six Industry Taught Courses are included in the curriculum.

Industry Internship of 60 days at the end of Semester VI integrated with curriculum, will also add to the interaction with the industry. A student will avail his training in industry or on site or in any design office or research organization as allotted to him/by the institute. A separate logbook will be maintained by the student during this period duly signed daily by the competent authority.

Project Based Learning is a part of almost each course of the curriculum. Small projects on relevant topics will be allotted to the students as a part of term-work

of that course. This will inculcate the habit of applying the knowledge learnt to solve practical problems.

Two Projects are included in two stages, one in third year (Sem V and Sem VI) and the second in final year (Sem VII and Sem VIII). Improvement in Research, thinking ability and application of theoretical knowledge to develop practical ideas is the main purpose of these projects.

Publication of a research paper is the outcome expected from the Project work and as a motivation, separate credits are allotted for this. Students are expected to write research article based on Project-I in standard journals in final year. Guide for Project -I will help in writing the research article.

To develop the self studying, self-learning skills, each student has to join the MOOC/NPTEL courses and will get the certification of the respective course. This will also give him/her a chance to get the knowledge from teachers from well known institutes of national repute. Three such MOOC/NPTEL courses are included each in Semester III, Semester V and Semester VII and separate credits are allotted to it.

Various new courses are introduced in the curriculum thereby introducing the current and latest technology to students. Basic Science and Engineering Science course contents are designed to match the requirement of the specific disciplines.

Number of software related to that branch/ discipline are included as part of the curriculum. This will help the students to get good placement.

Few soft courses are introduced to non-circuit branches. This will give a soft feel to such branches and also to inculcate confidence among the students.

In addition to technical abilities, a student needs to be developed as a good human being. For this, he will complete social activities in Semester IV and Sem VIII.

Thus Curriculum-2021 satisfies the requirements of National Education Policy-2021.

"Knowledge, Skill, Behavior" are the three attributes that are inculcated in a student when he completes his B.Tech. course under Curriculum-2021.

Recommendations considered

- UGC- Quality mandate
- National Education Policy (NEP)

- AICTE model curriculum
- Curriculum of International Universities
- Curriculum of Indian Universities
- Feedback from HR of industries called for placements
- Market perception

Methodologies Adopted In Designing Curriculum (2021-22)

- 19 Basic Points for design of Curriculum
- Listing of common points (credits, marks, No. of courses, common courses, industry taught courses, vocational Programmes etc.)
- Conducted series of meetings
- Conducted in depth one on one discussions with HoDs
- Planned three workshops,
- Eminent experts from Industry, IITs, IISER, NIT, SPPU, Central Universities were invited for workshops
- First workshop Course structure, Titles of courses, Industry taught courses, Vocational Courses.
- Second workshop Content of first and second year courses
- Third workshop Content of third and fourth year courses- (Planned)

4. Salient features

- Total 250 contact hours teaching are incorporated.
- Credit based 38 theory courses being offered to achieve global standards of quality.
- Curriculum offers practicals to more than 80% (~ 30 theory courses) theory courses.
- Total 230 credits (6500 marks) are offered for the entire B. Tech. programme.
- Theory courses contains 60% of courses and 20% to practical courses.
- Tutorials (6 Credits), online courses (6 Credits), vocational courses (6 Credits), projects (18 Credits), internship (3 Credits), Research Publication (2 Credits) and social activities assigned (4 Credits) contains remaining 20% of credits
- Blended education policy is adopted considering its importance. 20% courses are taught in online mode.
- Incorporation of 6 industry taught courses is one of the important and strategic step.
- Adopting 4 vocational Programmes in cooperation with industries, renowned agencies, universities will improve skillsets of our students.
- 60 days industrial internship to meet the requirements of industry.
- Including of 2 projects to enhance technical skills & self learning.
- Research paper based on Project-I will inculcate research aptitude among students.
- Project based learning practically for all courses will enhance the ability of application of knowledge and problem solving aptitude.
- NPTEL/ MOOC courses in online mode are introduced as integrated part of the course structure.
- To understand social responsibility and social activities of weightage of 4 credits are integrated part of the course structure.
- Quantitative Techniques and communication courses are introduced to enhance the analytical ability of students and address employability.
- Wide range of elective courses have been offered to provide the choice, to explore the knowledge in their domain of interest.

Salient Features

| Sr. No. | UGC (Quality mandate)/ NEP2020- Recommendations | Curriculum (2021-22) |
|------------|-------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Learning Outcome-based Curriculum Framework (LOCF) | Programme outcomes and course outcomes are being made ready |
| 2 | Imparting Life Skills to Students. | a) Quantitative techniques b) Communication skills c) Bridging gap with Industry by vocational courses d) Self learning by NPTEL/PBL/Two projects |
| 3 | Social and Industry Connect | a) 6 Industry taught courses b) 4 Vocational courses c) 60 days internship d) Time and credits for social activities |
| 4 | Promotion of Research and the Creation of New Knowledge. | a) Research publications based on projects b) Project based learning |
| 5 | Blended Education | a) 15% courses in online mode b) NPTEL/MOOC courses in online mode |
| 6 | Technology Enabled Learning/Self Learning | a) NPTEL/MOOCS |
| 7 | Software Applications | Programme specific softwares and Software application Courses |

5. Curriculum Details

5.1. Courses-Theory/Practical's/Tutorials/Units/Co-mapping and Engagement

Courses-Theory/Practical's/Tutorials/Units/Co-mapping and Engagement, University exam and internal assessment

The B.Tech. 2021 offers Credit and Outcome based curriculum with total 230 credits, required for graduation with a Bachelors' degree (B.Tech). The Under-Graduate Programme (B.Tech) is of four years duration i.e of eight semesters (two semesters/year).

Engagement of Courses:

The courses in revised curriculum structure of B.Tech. program are categorized under Core courses, Elective courses, Engineering Science courses and Basic Science courses. These courses are taught to students by engaging them through lectures, practical or tutorials by respective course coordinators. From semester I to VI, there are five (lecture engaged and assessed) courses and in semester VII and VIII there are four (lecture engaged and assessed) courses which are mandatory. All the courses have varying hours of engagement and credits. Theory lecture engagement varies between 3 hours to 4 hours/week, practical engagement varies between 2 hours to 4 hours/week for the respective courses. The contents of every course is divided into six units. Each unit can be covered in 6 hours or 8 hours depending on the total allotted hours/week of lecture engagement for the respective course. Some courses are solely practical oriented. These courses will be only engaged through laboratory sessions.

Outcome Based Curriculum:

Planning and realization of teaching and learning related to outcome-based curricular model requires that initial element shall be an outcome. It serves as a basis for defining modes of evaluation and validation of outcomes. The curriculum defines the Course Outcomes (COs) and course objectives for every course. The outcomes are assessed through various activities and evaluation of learner's performance in various examination schemes i.e Theory/Practical/Oral/Term work.

13

Credit Calculation:

The course credits are computed based on the teaching hours per week for that course using the formula as mentioned below.

Credits earned by the Student = Credits earned in Theory (Th) + Credits earned in Practical (P) / Oral (O) + Credits earned in Tutorial (T)

Here, as mentioned above, the credit assignment for Th/P/O/T of any course is based on number of teaching hours of that course. It is as mentioned here:

Number of Credits for Theory (Th) courses = Number of classroom teaching hours per week for that course (1:1 correspondence)

Number of Credits for Practical (P) / Oral (O) courses = Number of laboratory hours per week for that course / 2 (0.5:1 correspondence)

Number of Credits for Tutorial (T) courses = Number of tutorial hours for that course (1:1 correspondence)

Example: If a course has 4 hours of classroom teaching, 2 hours of laboratory session and 1 hour of tutorial, then the credits assigned for that course will be 4(Th), 1(P/0) and 1(T) respectively.

Examination Pattern:

A) University Examination (UE)

The pattern for theory examination is of 60:40, where the learner can earn 60 Marks (maximum) through University Examination (UE) and 40 marks (maximum) are assigned for Internal Assessment (IA). For the UE of Practical/Oral assessment, the total marks allotted are 50. The laboratory assessment is divided into three assessment heads viz. Term work (TW), Practical (P) and Oral (O). The students will be assessed through TW or P or O or combination of any of these for the courses that have practical assessment. 25 Marks are assigned to TW/P/O each, so when a learner is assessed for practical through TW and P heads, he/she will be assessed for 50 marks.

B) Internal Assessment (IA)

The Internal Assessment (IA) for the respective courses will be performed through Unit Tests (UT) and Assignments. Total two UTs of 20 marks each will be

conducted and the average marks of these two UTs will be considered. Similarly, course coordinators will design the class assignments in terms of exercises, case studies, real world problems or mini projects, which the learners have to submit from time-to-time, as mentioned by the deadline of each assignment. While designing the assignment, the course coordinators will provide the assessment criteria to the learners and maximum score (marks) for the assignment as well. If there are multiple assignments, then the average of score (from score attained in all assignments) will be calculated and considered as IA marks. This way, the learner will be assessed for 20 marks (maximum) for assignments.

Hence, total marks for UT and assignments are 20 each and so, IA will be of 40 marks. The score for IA is calculated as:

IA Score attained by learner (Max 40) = Average Score attained in UTs (Max 20) + Score attained in Assignments (Max 20)

5.2. Credit Concept: Equivalence

In CBCS 2021 Course structure, the allotment of credits are as follows:

Theory class of 1 hour: 1 Credit Practical class of 2 hours: 1 Credit Tutorial class of 1 hour: 1 Credit

Project, Research Paper & Social Activity: 1 Credit

5.3. Vocational course

Vocational learning opportunities play a important role in skill development and employability of student. Vocational courses are ways of implementation of theoretical knowledge in the practice. The importance of vocational development can largely be summed up as the difference between theoretical knowledge vs. practical skills. The vocational courses are based on the teaching of practical skills. These courses are designed to introduce the manual skills in the professional education in addition to the theory. These courses will serve as bridge courses for professional growth and career improvement.

Aims & objectives of vocational courses:

- To provide students with technical knowledge and skills necessary for progressive education in engineering profession.
- To give a better understanding of the emerging of technology.
- To train the student with necessary skills leading to skilled personnel who will be enterprising and self-reliant.
- To enhance the skill of students for becoming self-sustained engineer.
- To reduce the mismatch between the demand and supply of skill man-power.

In this curriculum at B.Tech Programme, there are four vocational courses introduced i.e. in Semester III, IV, V and VI. The courses offered at these semesters are as per the requirement of the programme.

Methodology:

The vocational courses shall be conducted in association with the companies through MoUs. The candidate shall be provided training in the industries in respective area. The training can also be given by the company experts in the college with appropriate infrastructure. Departments can design vocational programme/course as per employability skills for an engineer of respective discipline required. The student shall have to attend the training sessions for at least 4 hours per week. The training sessions shall be organized on weekends or on the extended hours of the college timing.

A faculty-in-charge will be appointed to monitor the functioning of the vocational

course as well as monitor the performance of the student for the said course.

The student has to maintain proper record of the training attended throughout the semester and submit the report on the work carried out. The record has to be checked and signed by the faculty –in-charge.

Assessment:

The assessment of the performance of the candidate for the vocational courses shall be in the form of term work and oral. The term work and oral carry 50 marks. The candidate performance shall be evaluated based on the training undertaken by the candidate throughout the semester. Student shall give presentation of skills he learned through vocational courses followed by viva. External examiner for the same shall necessarily from relevant industry.

A total of 2 credits shall be allotted per vocational course per semester.

Certificate:

Every candidate shall be awarded a certificate after successful completion of the vocational course as per the rules & regulations.

The certificate shall be jointly signed by concerned authorities of college and the company.

5.4. Industry Taught Courses

PREAMBLE:

The concept of Industry Offered Courses enables bridging of technological gaps between students and state-of-the-art technologies used current in the industry.

OBJECTIVES: To

- i. Impart the state-of-art technology course existing in the industry.
- ii. Expose students to application of technologies adopted by industry.
- iii. Train students for solving real-world projects in respective industries by applying technical knowledge gleaned from an industry expert
- iv. Make students draw benefit from the experience of veterans from industry. Knowledge sharing by industry experts.
- v. Align student's mind-set towards industrial environment through the instructor from industry. Provide industry instructor lead courses.

CREDIT/HRS.:

Percentage of Industry Taught Courses in the programme = %

METHODOLOGY:

- A) A faculty shall be appointed as course co-ordinator. Roles and responsibilities of Course coordinator are as follows:
- (i) Act as a liaison between identified Industry expert and department.
- (ii) Arrange schedule of lectures in consultation with identified Industry expert.
- (iii) Keep record of students' attendance.
- (iv) Collect feedback from students and suggest changes and modifications in lecture delivery method by industry subject expert.
- (v) Keep record of Unit Test Performance and Practicals along with experts.
- (vi) Organise visit to the industry relevant to the course.

B) Execution:

- (i) The Identified industry expert can conduct theory classes on weekends or as per convenience of Industry experts either through offline or online mode. The courses which are to be taught by expert from industry are already identified and confirmed in workshop-I
- (ii) Practical sessions will be conducted by course coordinator. Panel of experts from Industry shall be identified to teach the course before the commencement of the respective semester and submitted for the approval of the Head of the Institution with financial layout.

Bharati Vidyapeeth (Deemed to be University) College of Engineering, Pune, BV(DU)COEP an AICTE approved institution, was established in the year 1983 and is a constituent unit of Bharati Vidyapeeth (Deemed to be University), accredited (3rd Cycle) with 'A+' grade by NAAC and NBA.

In the national arena, BV(DU)COE Pune has been among top 100 Engineering Colleges of India, consecutively for five years (99th ranking in 2020) by MHRD in June 2020. It has also been ranked 20th at national level by AICTE Internshala for internships. Our reputation as India's premier engineering institution is further enhanced by being honored with the Platinum category by AICTE-CII survey. College is proud to be ranked 11th across India by the prestigious magazine India Today. DATAQUEST a leading journal, ranked BV(DU)COEP in 3rd position amongst the Top 50 Private T - Institutes of India. The college ranked 17th position in the survey conducted by Times of India in 2019.

----Brief about dept-----

The course curriculum has a multi-dimensional approach, it not only implements a dynamic, qualitative, and evolved structure and syllabus, but also incorporates a good and healthy mix of theoretical and practical exposure. In this regards the institute promotes and encourages courses in line with industry expectations and forthcoming challenges which should ease the students for undergoing industry offered courses for practical exposure of applications of Education system. This is much required to bridge the gap between Industry and Academia and by promoting industry orientation for creating a complete industry ready professional.

To fulfil these objectives, curriculum design, which will be implemented from the academic year 2021-22, B.Tech. program includes 6 courses taught by industry experts. With reference to the subject mentioned above, we request you to teach... Total...... number of lectures (60 min each) are required to be delivered. A blended learning, to be offered for the students through combining online or offline teaching wherever and whichever is best possible. Therefore, I request you to send acceptance letter, mode of teaching, convenient day and time slot to teach the said course. Enclosed please find herewith standard format for reply.

With Thanks and Regards,

Industry Taught Courses (Assessment-Theory/Practical)

- One course coordinator should be appointed for the course. All documents related to assessment of the course will be maintained by the course coordinator.
- Total assessment of Industry Taught Course Theory is of 100 Marks.
- Assessment of this course consists of Internal Assessment and End Semester Exam which carry 40 Marks and 60 Marks, respectively.
- Internal Assessment consists of assignments and mini projects.
- One real world project (mini project) is considered as part of Internal Assessment.
- Students should give presentation on given topic.
- Industry expert should set question papers.
- In case of practical exam, industry expert can take oral exam (may be online)
 and students will perform the experiments in the presence of course
 coordinator in the department.

5.5 MOOCs Implementation

To inculcate the self-learning approach amongst the students, proposed curriculum has introduced Massive Open Online Courses to all the students. It will provide an affordable and flexible way to learn new skills, advance the career and deliver quality educational experiences at scale.

Also, National Education Policy is insisting the Online and Digital Education and Ensuring Equitable Use of Technology.

A massive open online course (MOOC) is an online course aimed at large-scale interactive participation and open access via the web. In addition to traditional course materials such as videos, readings, and problem sets, MOOCs provide interactive user forums that help build a community for the students, professors, and teaching assistants (TAs).

BV(**DU**)**COE Pune is having active NPTEL local chapter-partnership.** Proposed curriculum has introduced three MOOCs at B.Tech Sem – III, Sem V and Sem VII with following objectives.

- 1. To provide e-learning through online web and video courses in Engineering by experts in the country in that subject.
- 2. To develop self-learning attitude in students.
- 3. To provide platform for knowledge enhancement of student's as per their area of interest.
- 4. To update students with advanced technologies.
- 5. To make the students more employable.
- 6. To prepare the students for competitive exams like GATE and also for higher studies.

Methodology of Assessment:

- Department shall publish list of NPTEL courses in every semester. Student can refer selected one of them in respective semester.
- Considering pre-requisite, proposed curriculum has provided with the various subject baskets as per the courses available.
- Students need to enroll for the course in each academic year as mentioned in the structure.

- Students need to attend all online lectures and complete all assignments as per schedule for registered course.
- Student will register and appear for exam conducted by NPTEL and shall submit the copy of course completion certificate received after passing the exam for registered course.
- Accordingly, the credits will be allotted to the student for respective MOOCs.
- Students have the flexibility to attempt the said course during the entire B.Tech Programme to earn the credits of respective MOOCs.
- NPTEL courses relevant to respective branch are only expected to select by students. Credits will not be awarded if general/ non engineering courses opted.

5.6 Project I and II

Project Stage I Objectives:

Provide help to the students

- In generating a new idea or modify existing system for solving societal, industrial and/or institutional problem.
- In review of literature that aligns with new idea and/or existing systems and clearly defining the problem
- In developing a workflow process/methodology for the desired system.
- In designing various components of the system assembly
- In developing a CAD model of the desired system.
- In writing the technical report based on the work completed

Project Stage II Objectives:

Provide help to the students

- In fabrication of the experimental setup/new system and/or purchase of standard components
- In pilot run and/or validation of new system for its performance
- In modifying the system if required to improve its performance.
- In detailed parametric studies of the modified system and analyzing the results
- In writing the technical report, research article and/or filing a patent.

| Particular | Hours per week | Credits allotted |
|---------------------|----------------|------------------|
| Project I stage I | 2 | 4 |
| Project I stage II | 2 | 4 |
| Project II stage I | 4 | 4 |
| Project II stage II | 4 | 6 |

Parameters for evaluation of project in University examination

- 1. Idea of Project/Topic
- Technical content
- 3. Innovation
- 4. Experimentation/Model development/Software development/Simulation development etc.
- 5. Participation as an Individual
- 6. Research Potential
- 7. Project Hardware/Software
- 8. Fabrication/Model/Equipment development
- 9. Data Analysis
- 10. Attendance
- 11. Timely completion
- 12. Report writing
- 13. Presentation

Prepare a format for report card of indicating progress, assessment and progressive evaluation of the project. This progressive evaluation record (PER) is prerequisite for university examination.

Progressive Evaluation Record (PER) shall be submitted in the department at the end of the semester and made available at time of university examination.

Format for Internal Examination for Project- I & II B.Tech (-----), Sem------

| | | | | | | | | | | | | | | | | | |

Out of 13 parameters, parameters no. 1,3,4,6 & 8 are mandatory and may be considered for assessment of the project. Each parameter will carry 10 marks for Project-I & 20 marks for Project-II.

5.7 Social Activities for the Learners

A) Introduction

The prime objective of Bharati Vidyapeeth (Deemed to be University) College of Engineering, Pune is holistic development of students. The learner achieves the status as "whole" when he/she has not only achieved success in academics but also has succeeded in bringing the nation up by connecting with socially left-out elements and bringing ray of hopes into their lives. In this respect, the new curriculum encourages the learner on the social activities. In this case, student's social activities are provided by the colleges, but not limited to them. Total of four credits assigned for these activities.

B) Objectives

- a) To make people create balances, so they do not only focus on academic aspects, but there can also be other aspects to have in life.
- b) To build better relationship with others.
- c) To create great balance with the academic aspects.
- d) To learn and understand society.
- e) To develop the nature of help and enhance the ethical norms for behaviors.
- f) Teamwork

C) Outcome of Social Activities:

The social activities make a good impact on learners. The learner:

- a) Will be able to understand the needs of society.
 - It enables a learner to consider the perspective of other people and understand their needs by interacting with people from diverse backgrounds.
- b) Will be able to understand different perspectives and engage other cultures. Social events develop social skills and empathy—the outward-oriented dimensions of emotional intelligence (EQ). The interactions or conversations elicited by events helps students build relationships, understand different perspectives and engage other cultures. Social events provide an opportunity to expand one's social circle.

c) Will be able to maintain positive outlook towards life.

With high adaptability to diverse situations and a good level of understanding of other's opinions, socially aware learners are less likely to indulge in negative behavior. They are also less vulnerable to stressful situations and have fewer chances of getting involved in undisciplined behavior. These students also have a more positive outlook on life.

d) Will be able to maintain good emotional health.

Social activities keep the learners sharp and mentally engaged, and this is important to prevent the onset of serious diseases like dementia or Alzheimer. Connecting with others helps keep you in a positive mood, which in turn wards off depression by improving physical health and maintaining good emotional health as well.

D) Sample list of Social Activities (not limited to them)

a) Organizing Educational Camps

Educational camps may be organized for the socially and economically week elements, especially in rural areas or even in the slum areas of the city, by making them aware of the importance of education and their own human rights.

b) Tree Plantation Drive

There are so many health benefits to having plants around – like fresher air, improved emotional state, and reduction of illness in and around the society. Tree plantation in this respect plays a crucial role. Just planting the tree is not enough but it should be made to grow to its extent.

c) Offer Helping Hand for Martyrs Family by Fundraisers

Soldiers fight for our country, securing our borders. They don't think of their family and sacrifice their lives for us, and what we do for them? Packages are announced every time after the death of our worriers but rarely reaches them. Families keep waiting for years. In this regard, few of these forgotten families can be visited and a small helping hand can be lend to them, to make them lead their further life peacefully. Fundraising in this respect, is a great student society social idea. It is incredible to see how people can bring positive change if they work together. The youth can make a team with an

external organization to take part in a purposeful community event as mentioned above.

d) National Service Scheme

It will help in the overall personality development of a learner by participating in projects that benefit the community. This extra-curricular activity is sponsored by the Ministry of Youth Affairs and Sports.

e) Felicitations of People who have contributed to the society but now forgotten by the society

There are so many intellectuals in our society who have achieved great heights in their field, who are stalwarts in different field but never came into limelight, their contribution is not recognized. Few of these can be invited publicly or visited at individual level by making a team and felicitate to appreciate their contribution towards the society or nation. Some of these stalwarts may be like Anand Kumar who teaches underprivileged students for IIT-JEE without a penny, Shekhar Naik who is the Captain of Indian Blind Cricket Team, Ranjeet Singh Desale who even being a rural teacher, is awarded by UNESCO with Global Teacher Prize, Ritu Biyani who fought cancer, traveled across the country to spread awareness.

f) Street Play on Social Awareness

This is also typically known as "Nukkad Natak". This form has been used to propagate social and political messages and to create awareness amongst the people regarding social issues. What is important is that the plays make the people think. The play is seen by many people of different age groups who then question and discuss the contents of the play. There have been several plays exposing the mechanism of black marketing and hoarding. Some talk of the use of political power for pressurizing people. Others highlight caste conflicts or ideas about hygiene and health. Street plays are also used to encourage literacy amongst villagers. Street plays on some of the topics like degradation of Indian media, hypocrisy, responsibility towards environmental concerns, brain drain, dilapidated educational structure, safety issues and rights for women. child labor, organ/human trafficking etc., can be thought of. The learners can participate in street play festivals like Manthan Mahotsav, the largest street play festival in India.

g) Poster Exhibition on Contributions of Heroes of India

The learners can organize an exhibition to not only display but explain the contribution of Indian Heroes who have been forgotten and remained in the book of history. Some of these inspiring heroes may be Mihir Sen, Khashaba Dadasaheb Jadhav, Anandibai Joshi – First woman doctor from India, Bhikaji Cama, Khudiram Bose, Baba and Prakash Amte etc. Such exhibitions make inspired, the youth of today's generation.

- h) Waste Clean Drive
- Educating literacy-poor societies about disposal of nature-harming objects
- j) Distributing needful items for living in economically backward societies
- k) Organizing early completion on national issues.
- l) Cleaning of Public Places/ Traffic Management/ Police Mitra.
- m) Organizing activities under engagement of people with Science and Technology.

Report of social activities conducted each student shall be prepared in standard format. Appropriate documentary evidences shall be part of report of students correspondence with respective authorities for social activities, permissions, certificates from Institutes/Organization/Local Government are essential documents for award of credits under this head.

E) Summary

Thus the interactions or conversations elicited by such social events help students to build relationships, understand different perspectives and engage other cultures and these events not only will uplift the moral of the society but also ignite minds of generations ahead to provide their support and enthusiastically participate in such activities. Such interactions will certainly provide an opportunity to expand their own social circle.

5.8 Internship

Internship of 60 days is incorporated as an integrated part of curriculum structure-2021. The primary objective of internship is to make students familiar with industry environment and to take up on- site assignment as trainees or interns in order to bridge the gap between theory and industrial practices. It is mandatory for students to undergo in-plant training after completion of semester VI in reputed industrial organization. The student shall submit the "Intern Certificate" issued by the industry organization as well as a technical report not exceeding 30 pages within the stipulated time to be eligible for making a presentation before the committee constituted by the department. On the basis of daily work carried out in the industry, student shall prepare a record book. This record book shall be checked and signed by his/her supervisor from the industry where he/she is doing internship on daily basis.

University examination carries 50 marks and after successful completion, student may be awarded 3 credits for the internship work. Standard format for record book shall be as below. Marks will be awarded out of maximum 50 and three credits will be given upon completion of internship towards the degree requirements, as per the regulations. Internship will ultimately assist students to apply theory learned in classroom to industrial practices so as to understand engineering/technical solutions in a global, economic, environmental and societal context.

5.9 Research paper publication

Research paper publication is one of the innovative features of programme curriculum- 2021.

- 1. It has been & introduced in 7th semester. Two credits are awarded for the same subject to publish of research paper. Student shall publish a research paper in peer reviewed/ Standard journal(not in paid journals) based on research work carried out for Project-I. Guide for Project-I shall be responsible for Writing manuscript, Selection of journal for publication, Submission of manuscript to the journal. Progress report of publication of research paper shall be prepared in standard format and submitted for the award of credits. Students shall be first author of research papers. No name either of faculty members except guide or other students shall be added without any contribution in research/project work. Format for progress report of research paper published (To be maintained by Guide). A departmental committee comprising of head of department, project guide, and one senior professor will review the progress of this activity periodically (not exceeding three months). The suggestions/comments offered by committee will be incorporated in due course of time to accomplish the task within a predetermined period.
- 2. Research paper publication as a integrated part of the course structure, will inculcate research aptitude among students. This will help there in seeking admissions in reputed International Universities for higher studies. Further, this research aptitude developed may enhance his employability also.
- 3. This activity is expected to generate 15 to 20 publication per year, which will enhance research profile of department and institute too.
- 4. Hence, there should be team of maximum 3 to 4 students per project except very exceptional projects. Prior permission to increase team size is essential.

Weekly progress report of the research paper publication.

Syllabus for Unit Test:

Unit Test -1 :UNIT – I to III

Unit Test -2: UNIT – IV to VI

Topics for project based Learning for Applied Chemistry

- 1. Powder Coating methods used for prevention of metals from corrosion
- 2. Metallic Coating methods used for prevention of metals from corrosion
- 3. Analysis of various water contaminants
- 4. Treatment of water by Zeolite method.
- 5. To find various sources of air pollutants and its analysis.
- 6. Methods of estimation of CO, NOx
- 7. Construction and Working of Acid and Alkaline Storage Battery
- 8. Construction and Working of Dry Cell, Ni-Cd Batteries
- 9. Manufacturing of Portland Cement.
- 10. To study the properties and applications of Portland cement.
- 11. Preparation of alloys Fusion method, Electro deposition method.
- 12. To study Composition, Properties & Application of (i) Brass (ii) Bronze (iii) Duralumin
- 13. To study manufacturing of mild steel.
- 14. To analyze waste water.
- 15. To determine hardness of water and its ill effects.

- 3. https://www.engineerwing.com/2012/10/tremix-flooring.html
- 4. http://home.iitk.ac.in/~mohite/composite_introduction.pdf

Topics for Project based learning:

- 1: Model making on various components of buildings, report writing, cost analysis and site visit.
- 2. Market survey, sample collections and report writing on all types of construction materials.
- 3. Report on Scope of Civil Engineering in various fields.
- 4. Collecting various National Building codes and report writing.
- 5. Model making on Types of Shallow foundations report writing
- 6. Model making on Types of Deep foundations report writing
- 7. Sample collections of various types of stones used in stone masonry report writing
- 8. Model making on Different types of stone masonry (mentioned in syllabus) report writing
- 9. Model making on various types of Brick bond masonry. (Mentioned in syllabus) report writing
- 10. Model making on different types of Doors report writing
- 11. Model making on different types of windows reports writing
- 12. Model making on different types of staircase report writing
- 13. Market survey, sample collections and report writing on various roofing materials.
- 14. The rain roof water-harvesting systems.
- 15. Site visit, market survey, report writing and cost analysis of various plastering materials.
- 16. Site visit, market survey, report writing and cost analysis of various types of Paint.
- 17. Model making on Types of formwork and designs.
- 18. Model making on various types of Scaffolding and designs.
- 19. Corrosion mechanism, prevention, and repairs measures of RCC structure.
- 20 Construction Project Management & Building Information Modelling

- 2. M. L. Shah, C. M. Kale, S. Y. Patki, "Building Drawing with integrated approach to Built Environment", Tata McGraw Hill Publishers
- 3. Gupte R.B, "A text book of engineering geology", P.V.G. Publications, Pune.

Reference Books:

- 1. IS provisions "National Building Code"
- 2. "Development Control Rules" of local plan sanctioning authority
- 3. Calendar, "Time Saver Standards for Architectural Design", Tata McGraw Hill Publishers
 - 4. Merit, "Building Design and Construction", Tata McGraw Hill Publishers
 - 5. Engineering Geology & General Geology By Parbin singh
- 6. General Geology & Engineering Geology by Dr.P.T.Sawant, New Delhi Publication.

Topics for project-based Learning for Civil Engineering Structures and Geology

- 1. Prepare a chart for structures used for Water treatment and sewage treatment plant.
- 2. Collect the information of various types of structures.
- 3. Prepare a model or chart for a retaining wall or any hydraulic structures.
- 4. Prepare a chart for comparison of load bearing and framed structure.
- 5. Prepare a prototype model for load bearing structure with showing all components.
- 6. Prepare a chart for various types of soil and water conservation structures.
- 7. Prepare a model of Bridge structure.
- 8. Collect the information of high rise building in India and prepare the report.
- 9. Prepare a chart or prototype model for Eco friendly and Intelligent building.
- 10. Effect of solid waste on quality of ground water.
- 11. Geophysical investigation using seismic refraction method to determine causes of real failure.
 - 12. Resistivity methods used in horizontal and vertical discontinuities in the electrical properties of the Ground water.
- 13. Structural interpretation and mineral potential using remote sensing data and GIS tools.
 - 14. Application of electrical resistivity method in ground water exploration.
- 15. Types of minerals.
- Types of igneous rocks.
 - 17. Types of metamorphic rocks.
- 18. Types of secondary rocks.
- 19. Texture of rocks.
- 20. Folds in rocks.
- 21. Failure in rocks.
- 22. Structures in rocks.
- 23. Determination of rock parameters, specific gravity, density and compressive strength of different types of rocks.

| Syllabus Fo | or: | | |
| Unit Test-I | UNIT – I, II, III | | |
| Unit Test-II | UNIT- IV,V,VI | | |
| | | | |
| List of Proj | ects: | | |
| Unit: I | Introduction to Civil Engineering | | |
| 1 | 1.Collection of Structural Information Historical structure of India: Visit, | | |
| | take photos, brows information and prepare report /chart | | |
| 2 | Give day to day examples of Link of Civil Engineering with various | | |
| | discipline of Engineering: Photos in their day-to-day life they see about link | | |
| | of civil engineering with other discipline and write note in their own words | | |
| | on example they have seen (Minimum one example of link with each | | |
| | discipline) | | |
| 3 | branches of Civil Engineer - Structural engineering, Construction | | |
| | engineering, Surveying and mapping engineering, Transportation | | |
| | engineering r, Environmental engineering, Hydraulic and irrigation | | |
| | engineering, Geotechnical engineering, Estimation and coasting, Project | | |
| | management: collect information on the branch of civil engineer of their | | |
| | choice and submit power point presentation | | |

| Unit: II | Scope and role of Civil engineering | |
|-----------|-------------------------------------------------------------------------------|--|
| 4 | Infrastructural development: Collect information on infrastructural | |
| | development of country in last 6 years and prepare booklet on it | |
| 5 | Scope of Civil engineering in government sector: collect information on | |
| | jobs in government sector, selection criteria process and exams for | |
| | selection. Make a poster and display on notice board of department | |
| 6 | Scope of civil engineering in private sector and Role of civil engineering in | |
| | society: collect information on jobs in private sector, make a poster and | |
| | display on notice board of department | |
| Unit: III | Civil Engineering Project and Process | |
| 7 | Visit and take a interview of Civil Engineers, Architects, Contractor, | |
| | Consultant, Govt departments and write your own observations of their | |
| | work and share in for of class | |
| Unit: IV | Approvals required for Civil Engineering Construction Projects | |
| 8 | Different approvals required for Civil Engineering construction projects: | |
| | make list of approvals requires brows the information about the process and | |
| | prepare leaflet (Hard Copy) | |
| 9 | Authorities for giving approvals: visit any one approval authority of your | |
| | place and prepare digital chart and mail to all staff and students of | |
| | Department and take feed back | |
| 10 | Necessity & Importance of approval, the procedure for approvals: Prepare | |
| | digital leaflet of necessity & importance of approval, the procedure for | |
| | approvals and mail it to students and take feed back | |
| Unit: V | Recent Developments in Civil Engineering | |
| 11 | Present your ideas on low coast housing: Students have to build model of | |
| | low coast house and need to explain its importance | |
| 12 | Present your ideas on Intelligent building: Students have to build model and | |
| | explain concept. | |
| 13 | Present your ideas on Eco-Friendly building: Students have to build model | |
| | and explain concept | |
| Unit: VI | Opportunities in Civil Engineering | |
| 14 | PPT on Required Skill set for Civil Engineering | |
| 15 | Own start-ups: Present idea of own start-up in front of class | |
| 16 | Software in civil engineering and its importance: collect information, | |
| | download any one free software related to civil engineering and present its | |
| | working in front of class | |
| 17 | Study the building structure where you live and write your observation | |
| | along with photograph | |
| 18 | Study the traffic, traffic signals, parking on your way to college write your | |
| | observation along with photograph | |
| 19 | Study Plumbing system of your house write your observation along with | |
| | photograph | |
| 20 | Write a report on waste management in your house with photograph, | |
| | discuss with your parents and improve waste management of your house. | |

Syllabus

Programme: B.Tech Civil Sem - I (2021)

| | Cour | se: GRAPHICS FOR CIVIL ENGINEERING | | |
|--------------|-------------------------------------------------------------------------|--------------------------------------------------------------------|-------------------|--|
| TEACHING | G SCHEME: | | CREDITS ALLOTTED: | |
| Practical: 2 | Hours / Week | Term Work: 25 Marks Oral: 25 Marks | Practical: 01 | |
| | | Т | otal: 1 | |
| Course Pre | -requisites: The | students should have knowledge of | | |
| 1 Basics | of Mathematics | at Secondary School Level. | | |
| Course Obj | ectives: | | | |
| To pro | ovide knowledge | about | | |
| • | Fundamentals o | f engineering drawing and curves | | |
| • | Isometric views | and projection | | |
| • | Projections of p | oints, lines, planes & solids | | |
| • | Use of CAD too | ols. | | |
| Course Out | comes: The stud | ent will be able to | | |
| 1 | Understand dim | ensioning methods and drawing of engineering curves. | | |
| 2 | Draw orthograp | hic projections using 1 st angle method of projection*. | | |
| 3 | Draw Isometric | views from given orthographic projections*. | | |
| 4 | | of Lines, its traces and projections of planes*. | | |
| 5 | | of different solids*. | | |
| 6 | | ent of lateral surfaces of solids*. | | |
| | *Using CAD to | ols | | |
| Course Cor | | | (0.4 TT) | |
| UNIT - I | | nensioning in Engineering Drawing and Engineering | (04 Hours) | |
| | Curves | | | |
| | | s of lines used in drawing practice, Dimensioning-linea | | |
| | | ed system, unidirectional system, parallel dimensioning | 2, | |
| | chain dimensioning, location dimension and size dimension. | | | |
| | Ellipse by Arcs of Circles method, Concentric circles method. Involutes | | | |
| | of a circle, Cyc | loid. | | |
| | Introduction to | Auto CAD commands. | | |
| UNIT - II | Orthographic | | (04 Hours) | |
| | | es of orthographic projection (First and Third angl | | |
| | method). Orth | ographic projection of objects by first angle projectio | n | |

| | method only. Procedure for preparing scaled drawing, sectional views | |
|------------|------------------------------------------------------------------------------|-------------|
| | and types of cutting planes and their representation, hatching of sections. | |
| | (Using AutoCAD commands). | |
| UNIT - III | Isometric Projections | (04 Hours) |
| | Isometric view, Isometric scale to draw Isometric projection, Non- | , |
| | Isometric lines, and construction of Isometric view from given | |
| | orthographic views and to construct Isometric view. | |
| | (Using AutoCAD commands) | |
| UNIT - IV | Projections of Points & Lines | (04 Hours) |
| | Projections of points, projections of lines, lines inclined to one reference | , |
| | plane, Lines inclined to both reference planes. (Lines in First Quadrant | |
| | Only). | |
| | (Using AutoCAD commands) | |
| UNIT - V | Projections of Planes | (04 Hours) |
| | Projections of Planes, Inclination of the plane with HP, VP. | (04 Hours) |
| | (Using AutoCAD commands) | |
| UNIT - VI | Projections of Solids | (04 Hours) |
| | Projection of prism, pyramid, cone and cylinder by rotation method. | (04 110415) |
| | (Using AutoCAD commands) | |
| | (Using AutoCAD commands) | |
| Term Work | • | |
| TCIII WOIK | All sheets should complete using AutoCAD. | |
| | 1. Types of Lines, Dimensioning practice, free hand lettering, | |
| | 1 nd and3 rd anglemethodssymbol. | |
| | 2 . Engineering Curves | |
| | 3. Orthographic Projections | |
| | 4. Isometric Views | |
| | 5. Projections of Points and Lines | |
| | 6. Projections of Planes | |
| | 7. Projections of Solids | |
| | | |
| | | |
| Toyt Pooks | / Pafaranca Roaks | |

Programme: B.Tech Civil Sem - I (2021)

| WORKSHOP TECHNOLOGY | | | | |
|---------------------------------|------------------------------|---------------|---------------------|--|
| Teaching Scheme: | Examination Scheme: | | Credits Allotted | |
| Theory: - 00 Hours/ Week | End Semester | | Th | |
| | Examination | | Theory: 00 | |
| Practical: -02 Hours/ Week | IA | | | |
| | Term Work | 50 Marks | Term Work: 01 | |
| | Total | 50 Marks | 01 | |
| Course Pre-requisites: - Studer | nts should have basic knowle | dge of hand t | ools used in day to | |

Course Pre-requisites: - Students should have basic knowledge of hand tools used in day to day life.

Course Objectives:

The Student should

- 1. To acquire the knowledge of basic manufacturing processes.
- 2. To identify tools, work material and measuring instruments useful for sheet metal, welding, carpentry, plumbing and Piping practice.

Course Outcomes:

The students should be able to

- 1. Understand the basic Manufacturing Processes used in the industry.
- 2. Understand various tools and apply suitable tools for suitable operations in civil work.
- **3.** Understand the importance of safety.

Term work shall consist of any three jobs and demonstrations on rest of the trades, journal consisting of five assignments one on each of the following topics.

Plumbing and Pipe fitting Shop: Study of Pipe joints, Pipe fitting, Cutting, Threading and Laying of pipes. Different tools and equipment like pipe vice, pipe bending machine, dies and die holder, plumbing vice, cutting dies, pipe wrench, ball peen hammer etc. are used for plumbing operations on G.I. pipe.

Welding Shop: Electric arc welding, Study of tools and Operations, Edge preparations, Types of welding joints, Exercises making of various joints. safety practices and general guidelines.

Joining methods: Study of tools and Operations of **riveting**, Fabrication of toolbox, tray, electrical panel box etc. and study of bolts. joints by bolting etc.

Carpentry Shop: Introduction to wood working, Study of tools and Operations and carpentry joints, Simple exercise using jack plain. To prepare half lap corner joint, mortise and Tennon joints, Simple exercise on woodworking lathe. Safety practices and general guidelines.

Plastic Molding shop: Introduction to plastic molding. types of plastics. types of plastic molding. Exercise on plastic molding machine.

- 2. Applied Mathematics (Volumes I and II) by P. N. Wartikar & J. N. Wartikar (Pune Vidyarthi GrihaPrakashan, Pune), 7th Edition, 1988, Reprint 2010.

Reference Books:

- 1. Advanced Engineering Mathematics, 2e, by M. D. Greenberg (Pearson Education), 2nd, Edition, 2002.
- 2. Advanced Engineering Mathematics by Erwin Kreyszig (Wiley Eastern Ltd.), 8th Edition, 1999,Reprint 2010.
- 3. Advanced Engineering Mathematics, Wylie C.R. & Barrett L.C. (McGraw-Hill, Inc.), 6th Edition,1995
- 4. Higher Engineering Mathematics by B. S. Grewal (Khanna Publication, Delhi),42th Edition ,2012.

Syllabus for

Unit Test-I - UNIT - I, II, III

Unit Test-II - UNIT- IV,V,VI

Project Based learning topics for Integral Calculus:

Students are expected prepare report on any one topic, write its definition, applications and illustrate with few examples. Also, write pseudo code/proof for it, wherever applicable.

- 1. Formation of differential equation
- 2. Exact differential Equation
- 3. Linear differential equation
 - 4. Newton's law of cooling
 - 5. Newton's second law of motion
- 6. Fourier's law
 - 7. Kirchhoff's voltage law
 - 8. Fourier series
- 9. Harmonic analysis
 - 10. Gamma and beta function
 - 11. Curve tracing
 - 12. Locating position in three dimensional space
 - 13. Multiple integrals applications
 - 14. Error function
 - 15. Differentiation under integral sign

- 9. Introduction to Electrodynamics David R. Griffiths, Pearson (2013)
- 10. Renewable Energy: Power for a Sustainable Future, Boyle, Oxford University Press (2012)
- 11. Fundamentals of Physics, Jearl Walker, David Halliday and Robert Resnick, John Wiley and Sons (2013)

Topics for project-based Learning for Acoustics and Modern Physics

- 1. Measurement and effect of environmental noise in the college
- 2. Design and simulation of automatic solar powered time regulated water pumping
- 3. Solar technology: an alternative source of energy for national development

| 4. Double pendulum and its application |
|-------------------------------------------------------------------------------------------|
| 5. Comparison of various method used in measuring the gravitational constant g |
| 6. The physics of stars and their astronomical identification |
| 7. Design and construction of digital distance measuring instrument |
| 8. Electronic eye (Laser Security) as autoswitch/security system |
| 9. Electric power generation by road power |
| 10. Measurement /simulation of reverberation time |
| 11. Study of vibration of bars |
| 12. Determination of absorption coefficient of sound absorbing materials |
| 13. Determination of velocity of O-ray and E-ray in different double refracting materials |
| 14. Need of medium for propagation of sound wave |
| 15. Small wind turbines as a source of electricity |
| |

Syllabus Programme: B. Tech. Civil Sem - II Course (2021)

| | Course: Statics and Dynamics | | | | | | |
|-------------------------------------------------------------------------------------------------|------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------|-------------------|-----------|--|--|
| TEACHING SCHEME: | | | EXAMINATION SCHEME: | Total CREDITS: 05 | | | |
| Theory: 04 Hours / Week | | | Semester End Examination: 60 Marks Internal Assessment: 40 Marks | Theory:04 | | | |
| Practical: 02 Hours / Week | | | Term Work: 25 Marks | Term work: 01 | | | |
| Cou | | _ | students should have knowledge of | | | | |
| 1 | _ | es-Forces, Newton's law of motion, Concept of physical quantities, their units and rsion of units, Scalar and Vector | | | | | |
| 2 | | matics-Algebra, Geometry, Concept of differentiation and integration | | | | | |
| Cou | Course Objective: | | | | | | |
| The student should be able to determine effect of forces on rigid objects in sta dynamic state. | | | | | tic and | | |
| | Course Outcomes: The student will be able to | | | | | | |
| | 1 calculate resultant and apply conditions of equilibrium. | | | | | | |
| 3 | | calculate friction force and its effect. | | | | | |
| 4 | | analyze the truss calculate centroid and moment of inertia. | | | | | |
| 5 | evaluate kinematic effect of forces | | | | | | |
| 6 | evaluate kinetic effect of forces | | | | | | |
| | | | | | | | |
| Cou | rse Co | ntent: | | | | | |
| Unit - I | | Resultant and Equilibrium | | | (08Hrs) | | |
| | | Types and Resolution of forces, Moment and Couple, Free Body | | | | | |
| | | Diagram, Types of Supports, Classification and Resultant of a force system in a Plane - Analytical and Graphical approach. | | | | | |
| | | Equilibrant, Conditions of Equilibrium, Equilibrium of a force | | | | | |
| | | | e, Force and Couple system about a poin | | | | |
| Unit - II | | Friction | | | (08 Hrs) | | |
| | | Coefficient of Static Friction, Impending motion of Blocks, Ladders and Belts. | | | , | | |
| Unit - III | | Analysis of Truss | | | (08 Hrs) | | |
| | | Analysis of Perfect Trusses - Method of Joint, Method of Section | | | , | | |
| | | and Graphical M | | | | | |
| Unit - IV | | | Ioment of Inertia | | (08 Hrs) | | |
| | | | and plane areas, Moment of Inertia of | • | | | |
| | | 1 | rpendicular axis theorem, radius of gy | ration, least | | | |
| Unit - V | | moment of inertia. Kinematics of a Particle | | | (08 Hrs) | | |
| Omt - v | | Cartesian components, Normal and Tangential components of | | | (00 1113) | | |
| | | | e motion, Dependent motion, Motion of a | | | | |
| Unit - VI | | Kinetics of a Particle | | | (08 Hrs) | | |
| | | | Principle, Work-Energy Principle an | - | | | |
| | | Momentum Principle, Coefficient of Restitution, Direct Central | | | | | |
| Impact. | | | | | | | |
| Assignments: 1) Explain different types of forces and types of supports. | | | | | | | |
| | | / 1 | esultant of given force system | 113. | | | |
| | | 2) Calculate I | estituit of given force system | | | | |

Syllabus

Programme: B. Tech. Civil Sem - II Course (2021)

| | | | | | |
|--------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|--|--|--|--|
| 3) Calculate support reactions of the beam | | | | | |
| 4) What is equilibrium? What are conditions of equilibrium? | | | | | |
| 5) Calculate friction force for Blocks and Ladders. | | | | | |
| 6) Calculate tension on sides of Belts. | | | | | |
| 7) Calculate forces in members of truss. | | | | | |
| 8) Calculate centroid of given area. | | | | | |
| 9) Calculate moment of inertia of given area. | | | | | |
| 10) Calculate relative velocity of bodies. | | | | | |
| 11) Calculate motion and path of projectile. | | | | | |
| 12) Apply D'Alemberts Principle to solve given problem. | | | | | |
| 13) Apply Work-Energy Principle to solve given problem. | | | | | |
| 14) Apply Impulse-Momentum Principle to solve given problem. | | | | | |
| 15) Calculate velocity of bodies after impact. | | | | | |
| Town Works The term work shall consist of | | | | | |
| Term Work: The term-work shall consist of - | | | | | |
| Part-A: Minimum Five experiments from list below. | | | | | |
| 1) Study of equilibrium of concurrent force system in a plane | | | | | |
| 2) Determination of reactions of Simple and Compound beam. | | | | | |
| 3) Determination of coefficient of friction for Flat Belt. | | | | | |
| 4) Determination of coefficient of friction for Rope. | | | | | |
| 5) Determination of Centroid of line or plane elements. | | | | | |
| 6) Study of Curvilinear motion. | | | | | |
| 7) Determination of Coefficient of Restitution. | | | | | |
| Part-B: Minimum Five graphical solutions of the problems on | | | | | |
| different concepts in course content. | | | | | |
| | | | | | |

Project Based Learning

- 1 Study of National Building code of India to find Building Bye laws for planning residential buildings.
- 2. With the help of 3 different case studies of residential buildings study the application of Principles of building planning.
- 3 Preparing a measured drawing of a two bed room residential building (Plan, Elevation and section)
- 4 Take case study of green building and study provisions with reference to energy saving, solid waste management, recycling of water, use of green building materials.
- 5 With the help of site visit determine planning requirements for health care buildings and prepare a report.
- 6. With the help of site visit determine planning requirements for commercial buildings and prepare a report.
- 7 Study the architectural and working drawings for a building construction project and prepare a report.
- 8 With the help of site visit prepare a plumbing layout of a residential building and study various fixtures for plumbing.
- 9 Study of fire safety arrangements for high rise buildings and prepare a report.
- 10 Study the process of preparing development plan of a city and prepare a report.
- 11 With the help of case study prepare a report on zoning in Development plan.
- 12 With the help of site visit determine planning requirements for recreational buildings and prepare a report.
- 13. Take a case study of intelligent building and study various provisions and prepare a report.
- 14 Study the foundation plan of a residential building and prepare a report on lineout of a building.
- 15 Study the electrical layout plan of a building construction project and prepare a report.
- 16. Study of various legal documents such as 7/12 extract, TDR certificate, completion certificate.
- 17. With the help of site visit determine planning requirements for primary school building and prepare a report.
- 18. Study development control rues of the local authority and prepare a report.
- 19 With the help of site visit determine planning requirements for high rise building and prepare a report.
- 20 Study of Landscape details in a residential complex and prepare a report.

| Topics for project based Learning for Mechanics of Soilds |
| 1. Draw the stress strain curve of mild steel and tor steel by using excel. |
| 2. Collect the IS code related to testing of material and specifications for any five materials. |
| 3. Prepare the chart for various types of stresses and strain with suitable example. |
| 4. Development of an excel sheet for calculation of Elastic constants, Thermal stresses with |
| suitable example. |
| 5. Market survey for structural materials (at least ten materials) |
| 6. Prepare the chart for Shear force and bending moment diagram for simply supported |
| beam (At least Five problems with different types of loading) |
| 7. Prepare the chart for Shear force and bending moment diagram for Cantilever beam (At |
| least Five problems with different types of loading). |
| 8. Prepare the chart for Shear force and bending moment diagram for overhanging beam (At |
| least Five problems with different types of loading) |
| 9. Development of an excel sheet for calculation of bending stresses for different sections. |
| (At least three problem) |
| 10. Prepare the chart for derivation of flexural formula and bending stress distribution |
| diagram for different section. |
| 11. Prepare the chart for deflection and slope of simply supported beam (at least five |
| problems with different types of loading) |
| 12. Prepare the chart for deflection and slope of cantilever beam (at least five problems with |
| different types of loading) |
| 13. Prepare the chart for derivation of shear stress formula and shear stress distribution |
| diagram for different section. |
| 14. Prepare the chart for derivation of torsional formula. |
| 15. Development of an excel sheet for calculation of direct and bending stress in section. (At |
| least three problem) |
| 16. Prepare the chart for core section (square, rectangular, circular, hollow rectangular and |
| hollow circular). |
| 17. Development of an excel sheet for load carrying capacity of column by using Euler's |
| theory. (At least three problem) |
| 18. Collect the photographs along with justification of (a) failure of short and long column |
| (b) Failure of beam in bending and shear. |
| 19. Draw the Mohr's circle (at least five problems) |
| 20. Prepare the chart for Calculation of normal and shear stress by using graphical method. |

Assignments –

- 1. Write short notes on -:
 - a) Shotcreting
 - b) Gunieting
 - c) Trenchless technology
 - d) Drill & Blast method
 - e) Pneumatic drilling equipments
- 2. Define & differentiate between Cofferdams & Caissons & briefly explain piles & its Classification.
- 3. List out difference between crawler and pneumatic type of wheels?
- 4. Compare belt conveyor with other types of conveyors?
- 5. What are the various equipments used for compacting? Explain them.
- 6. Explain launching of girders.
- 7. What are the different types of equipments used for trenching and tunneling?
- 8. What is Well point system?
- 9. Describe various methods for tunneling in hard rocks.

Term work -:

- 1. Collection of pamphlets and information regarding various construction techniques equipment (Information pertaining to the following aspects should be collected)
 - i. Types, Different makes of the equipment
 - ii. Useful Life and area of use
 - iii. Equipment performance data
- 2. In context of tunneling, enlist and explain different tunnel driving techniques & tunnel boring machines.

- 3. Classify, discuss briefly various earth work machineries (any five) & factors affecting in selection including their economics.
- 4. Classify & explain various hoisting & conveying equipment. Discuss in detail about factors affecting in selection of them & its economics.
- 5. Explain crushers & its types in detail.
- 6. Enlist & explain with neat diagrams, different dewatering techniques (electroosmosis method, well point system).
- 7. Write a brief note on Pumps & its types. Discuss in detail about various pumps used for concreting.
- 8. Prepare a Power Point presentation (P.P.T.) on any of the topic of your choice from the entire syllabus after getting approval of topic from your subject teacher.
- 9. Site Visit report to be prepared after visiting the site covering topics mentioned in syllabi.

Textbooks -:

- 1. Peurifoy, R., Schexnayder, C., Shapira, A., & Schmitt, R. (2011). "ConstructionPlanning, Equipment, and Methods" (8th ed.). McGraw-Hill.
- 2. Gransberg, D. D., Popescu, C. M., & Ryan, R. C. (2006). "Construction equipment management for engineers, estimators, and owners" (2nd edition). CRC Press.

Reference Books:

- 1. Mahesh Verma, "Construction Equipment & Planning & Application", Metropolitan Book Company Private Ltd., New Delhi.
- 2. Peurifoy Robert L., William B. Ledbetter, "Construction Planning Equipment Methods", McGraw Hill Book Company.
- 3. Russel James E., "Construction Equipment", Reston Publishing Company.
- 4. Shetty M.S., "Concrete Technology Theory & Practice", S. Chand & Company Private Limited.
- 5. S.C. Sharma & Khanna, Construction Equipments & its Management",
- 6. V.R. Phadke "Construction Machinery & Works Management".
- 7. Day, D. A., & Benjamin, N. B. H. (1991). "Construction equipment guide" (2ndedition). John Wiley & Sons.
- 8. Harris, F. (1994). "Modern construction and ground engineering equipment and methods" (2nd ed.). Pearson Longman.
- 9. Nunnally, S. W. (2011). "Construction methods and management" (8th edition.). Prentice Hall.

Project Based Learning topics -:

- 1. Construction Technology used in defense war fields.
- 2. Low cost housing Construction of a low cost house.

- 3. Tunnel design.
- 4. Use of dampers in high rise buildings
- 5. Construction of Overhead Bridge process. (Case study).
- 6. The invention of slip form technique and cost savings (case study).
- 7. PILE Construction Technique.
- 8. Construction techniques used in Empire State Building and Burj Khalifa.
- 9. For the construction project what capital cost has to be taken in consideration (Case study)?
- 10. List out some of the software used in the construction sector to estimate cost and monitoring expenses of machineries and perform one application of it on construction site/project?
- 11. What are the health and safety duties in relation to concrete pumping work? What is to be involved in managing risks associated with concrete pumping?
- 12. What are the parameters for Selection of Tunneling Method and Parameters Effecting Ground Settlements
- 13. How to choose the right conveyor system? How much do conveyor systems cost?
- 14. Why is electro-osmosis (dewatering) so effective in clayey and heterogeneous soils. Explain with a case study?
- 15. Explain methods of launching girders at a metro rail site in India.
- 16. How do real estate development and precast concrete elements fit together? Are there any limitations regarding the construction of houses?
- 17. Construction of Emergency Temporary structures and facilities (Jumbo COVID hospital etc.).
- 18. What are the hazards associated with construction of cofferdam?
- 19. What are the different methods of blasting?
- 20. Explain Mechanical Dredging Operations for Removal of Reservoir Sediment.

| 1 | | | soil according to formation of soil and its properties. | |
| 3 | 1 | mine index propertie | | |
| 4 | | | ermeability and effective stresses of soil. esses and OMC of soil by various methods. | |
| 5 | | | ers of soil by various method. | |
| 6 | | | ssure on retaining wall. | |
| | Comp | die lateral earth pres | ssure on retaining wan. | |
| Course | e Cont | ent: | | |
| UNIT | | | eomechanics and soil classification | (08Hrs) |
| | | | eomechanics Engineering and its applications to Civi | , |
| | | | s of soil structure, Field identification of soils | |
| | | basic definitions, three and two phase system of soil, soil classification | | |
| | | systems – USCS, IS, HRB, Textural classification, Activity of clay, | | |
| | | | Thixotrophy of clay | |
| UNIT | - II | Index Properties | of Soil | (08Hrs) |
| | | 1 * * | of soil – Water content, specific gravity, particle size istency limits, density, relative density, Relationship perties of soil. | |
| UNIT | - III | Permeability and | Seepage | (08Hrs) |
| | | permeability. Labe method and Falling Total, Neutral an gradient and poten | ability-Basic Definition, Darcy's law, factors affecting oratory measurement of permeability: Constant head g head method as per IS 2720. d effective stress-principle of effective stress, head ntial, seepage pressure, Upward flow condition, 2 Ention, flow net:- Characteristics and uses. | |
| UNIT | - IV | | Stress Distribution | (08Hrs) |
| | | Compaction: - compaction; Struct soils; Field compac | Laboratory compaction tests; Factors affecting ture and engineering behaviour of compacted cohesive | 5 |

| | Theory for point la | and Westergaard's theory | |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|----------|
| UNIT - V | Theory for point load, Westergaard's theory Shear Strength of Soil | | (08Hrs) |
| UNII - V | | ar strength an Engineering Property. Mohr's stress | (001118) |
| | circle, Mohr-Coulomb failure theory. The effective stress principle- Total | | |
| | stress, effective stress and neutral stress / pore water pressure. Peak and | | |
| | | rength, factors affecting shear strength. Stress-strain | |
| | behaviour of sands | = = = = = = = = = = = = = = = = = = = = | |
| | | hear Strength- Direct Shear test, Triaxial Compression | |
| | | Compression test, Vane Shear test. Their suitability for | |
| | - | soils, advantages and disadvantages. Different drainage | |
| | conditions for shear | | |
| UNIT - VI | Earth Pressure | | (08Hrs) |
| | Introduction, Rank | kine's state of Plastic Equilibrium in soils- Active and | |
| | | e to wall movement, Earth Pressure at rest. Rankine's | |
| | Theory: Earth pre | ssure on Retaining wall due to submerged backfill. | |
| | Backfill with uni | form surcharge, backfill with sloping surface, layered | |
| | backfill. | | |
| Internal Ass | | | |
| | Unit Test 1 | Unit I to III | |
| | Unit Test 2 | Unit No IV to VI | |
| | | | |
| Assignments | | | |
| 1 | Study of various relationship between weight and volume, numerical | | |
| | based on it and classification of soil | | |
| 2 | _ | ation of different index properties of soil and numerical | |
| | based on it. | | |
| 3 | Study of permeabi | lity and numerical based on it. | |
| 4 | | on of soil and numerical based on it. | |
| 5 | | shear parameter of soil by various methods and | |
| | numerical based o | | |
| 6 | _ | n based on calculation of lateral earth pressure on | |
| | retaining wall. | | |
| Term Work: | • | | |
| Term work | | sall consist of minimum Fight approximents from list | |
| | | nall consist of minimum Eight experiments from list | |
| 1 | | ch first four are compulsory . ontent of given soil sample by oven drying method | |
| 2 | | e gravity of given soil by pycnometer method | |
| 3 | | sistency limits of soil – Liquid, plastic and shrinkage | |
| J | limit. | sistency mints of son – Liquid, plastic and similkage | |
| 4 | Determine the shear parameters of given soil by Direct shear test. | | |
| 5 | Determine the snear parameters of given soil by Direct snear test. Determine dry unit weight of soil in field by core cutter or sand | | |
| J | replacement method | | |
| 6 | 1 | cient of permeability by constant head test or falling | |
| U | head test of given | | |
| 7 | | and OMC by standard proctor test and Modified | |
| , | proctor test of give | • | |
| 8 | | size distribution of given soil sample by mechanical | |
| • | sieve analysis. | size distribution of given son sumple by intendifical | |
| | Jac . C allai y bib. | | |

| 9 | Determine the shear parameters of given soil by Unconfined | | | |
|-----------------|---------------------------------------------------------------------|--|--|--|
| | Compression Strength of soil. | | | |
| 10 | Determine the shear parameters of given soil by Triaxial Shear Test | | | |
| 11 | Determine the shear parameters of given soil by Vane Shear Test | | | |
| | | | | |
| Oral/Practical: | | | | |
| | The oral examination based on above term work. | | | |
| | | | | |

Topics for project based learning for Geomechanics

- 1. Prepare the chart of different classification of soils.
- 2. Collection the information about soil deposits in various regions of India and show in the map of India
- 3. Prepare the chart of different types of soil structure.
- 4. Calculate the water content and specific gravity of soil (take at least three different soil sample)
- 5. Calculate the consistency limit and flow index of soil (take at least three different soil sample)
- 6. Prepare chart showing all basic index properties of soil.
- 7.Draw the particle size distribution curve for soil by using excel (take at least two different soil sample)
- 8. Prepare the chart for relationship between index properties of soil.
- 9. Compare the constant head and falling head method.
- 10. Prepare the chart for soil water and permeability of soil.
- 11. Draw the flow net for sheet pile or earthern dam.
- 12. Compute the permeability of stratified soil deposits by using excel.
- 13. Prepare the chart of derivation of Laplace equation for two-dimensional flow.
- 14. Compare the standard proctor and modified proctor test.
- 15. Collection of information and photographs of machines used for compaction of soil.
- 16. Draw the optimum moisture curve for compaction of soil by using excel.
- 17. Draw the Mohr's stress circle for triaxial shear test and unconfined compression test.
- 18. solution of problems on shear strength parameter by using graphical method. (At least three problem).
- 19. Prepare the chart showing lateral earth pressure distribution diagram on retaining wall in various conditions.
- 20. Contribution of various scientists in estimation of active and passive earth pressure on retaining wall.

Programme: B.Tech (Civil) Sem – IV (2021)

| Inte | rnal Assessment: | |
| | Unit Test -1 UNIT – I, II, III | |
| | Unit Test -2 UNIT – IV, V, VI | |
| | 1 - 1 - 12 17 1 | |
| Proi | ect Based Learning: | |
| 1 | Prepare a poster on highway development plans | |
| 2 | Prepare a poster on Classification of Roads | |
| 3 | Write short note on various surveys in Transport Planning | |
| 4 | What are the Travel demand forecasting techniques | |
| 5 | Prepare a power point presentation on Traffic Problems in metro cities | |
| 6 | Solve a numerical on calculation of sight distance on highway | |
| 7 | Prepare a power point presentation on various geometric design parameters | |
| 8 | Prepare a chart for mechanistic design of pavements | |
| 9 | Prepare a power point presentation on the materials used in road construction | |
| 10 | Pavement design of highways (rigid and flexible) according to IRC guidelines | |
| 11 | Write a case study on Highway maintenance | |
| 12 | Write the importance of mass rapid transit system in Urban areas | |
| 13 | Write case study of land use and transport planning. | |
| 14 | Write a case study on BOT, BOOT type of Project. | |
| 15 | Case study on metro/ monorail project | |
| 10 | Case study on metro/ monoran project | |
| Prac | etical: | |
| 1. | Tests on Aggregate (Compulsory) | |
| -1. | a. Aggregate Impact Value Test | |
| | b. Specific Gravity and Water Absorption Test by basket method | |
| | c. Shape Test (Flakiness Index and Elongation Index) | |
| | Test on Aggregate (Any one) | |
| | d. Los Angeles Abrasion Test | |
| | e. Aggregate Crushing Strength Test | |
| 2. | f. Stripping Value Test | |
| ۷. | Tests on Bitumen (Compulsory) | |
| | | |
| | a. Ductility Test b. Specific Gravity Test | |
| | | |
| | Tests on Bitumen (Any One) c. Penetration Test | |
| 2 | | |
| 3. | d. Softening Point Test | |

| | e. Bitumen Emulsion Test |
|------|--------------------------------------------------------------------------------------------|
| | Traffic and Transportation Planning |
| | a. Traffic Count Survey |

| | | |
| | sed Learning: | |
| | out triangulation survey using three stations and perform triangulation adjust | |
| | out survey of the area using electronic total station and prepare a plane taur map. | ble map and |
| | g a handheld GPS perform a driver survey and locate coordinates of traverse st | ations. |
| _ | out urban planning with the use of photogrammetry. | |
| | out urban growth monitoring using photogrammetry. | |
| | out transport planning using photogrammetry. | |
| | out water resources assessment using remote sensing and GIS. | |
| | out land use and power analysis using remote sensing and GIS. | |
| | out assessment of crop yield using remote sensing and GIS. | |
| | out reservoir sedimentation studies using remote sensing and GIS. | |
| | rt on various remote sensing data products available from various sources like | e BHUVAN |
| | A Hyderabad etc. | |
| | out setting off layout for foundation using electronic total station. | |
| | out electronic total station survey for contour mapping. | |
| | out electronic total station survey for profile levelling. | |
| | out electronic total station survey for laying out pipeline. | |
| | | |
| Practical: | | |
| 1 Study | y and use of total station for traverse survey. (3 Practicals). | |
| 2 Appl | ications of Total Station for REM, RDM. (1 Practical). | |
| | y and Use of Mirror stereoscope with parallax bar. (1 Practical). | |
| 3 1 511103 | VALIGUESE OF MILLOF SICIEOSCODE WITH DATAHAX DALE EL FLACTICALE | |
| | view of Arc GIS Attribute Data Input: Creation of Schema, Tables, Data Det | inition Data |

- Input, Data Updating, Queries on Tables, Simple-Complex Query with Two or More Tables Using SQL. Queries Using Union (4 Practicals).
 - 5 Spatial Data Input: Vector Data Formats with File Extensions. Scanning, On-Screen Digitization, Editing, Topology Creation, Line and Area Measurements, Data Attribution (4 Practicals).
 - 6 Georeferencing Data: Coordinate Systems, Datum Conversions, Map Projections, Types, Storing- Viewing Projection Information. (3 Practicals).
 - Working with Layers in Arc map: Building Templates, Classification, Displaying Qualitative and quantitative Values, Labelling Features and Map Creation. (3 Practical).
 - 8 Surface Analysis: DEM, DSM and DTM, Presenting Data: Map Design, Map Composition (4 Practical).

Oral:

The oral examination will be based on above term work and course content.

| | | | Total: 02 | | | | | |
| | | | | | | | | |
| Intr | oduction: | | | | | | | |
| The | The prime objective of Bharati Vidyapeeth (Deemed to be University) College of Engineering, Pune | | | | | | | |
| is h | olistic development of stud | lents. The learner achieves the status | as whole, when he/she has not | | | | | |
| only | achieved success in acade | mics, but also has succeeded in bring | ging the nation up by connecting | | | | | |
| | | and bringing ray of hopes into their | | | | | | |
| | | mer on the social activities. In this ca | ase, student's are provided with | | | | | |
| | al activities by the colleges | but not limited to them. | | | | | | |
| Cou | rse Objectives: | | | | | | | |
| 1 | * * | alance, so they do not only focus on | academic aspects, but there can | | | | | |
| | also be other aspects to ha | | | | | | | |
| 2 | To build better relationsh | <u> </u> | | | | | | |
| 3 | To create great balance w | ith the academic aspects. | | | | | | |
| 4 | To learn and understand s | ociety. | | | | | | |
| 5 | To develop the nature of | nelp and enhance the ethical norms for | behaviours. | | | | | |
| Cou | rse Outcomes: The social | activities make good impact on learner | rs. The learner will be able to | | | | | |
| 1 | identify the Needs of Soc | | | | | | | |
| | It enables a learner to co | nsider the perspective of other people | e and understand their needs by | | | | | |
| | interacting with people fro | m diverse backgrounds. | +- | | | | | |
| 2 | recognize Different Pers | pectives and Engage Other Cultures | : | | | | | |
| | Social events develop soc | al skills and empathy- the outward- o | riented dimensions of emotional | | | | | |
| | | teractions or conversations elicited | | | | | | |
| | | lifferent perspectives and engage othe | er cultures. Social events provide | | | | | |
| | as opportunity to expand of | | | | | | | |
| 3 | maintain Positive Outloo | | | | | | | |
| | | diverse situation and good level of un | | | | | | |
| | | uations and have fewer chances of g | | | | | | |
| | | also have a more positive outlook on l | lite. | | | | | |
| 4 | maintain Good Emotion | | 1 C 1 (1) | | | | | |
| | | f diverse situations and a good lev | <u> </u> | | | | | |
| | | earners are less likely to indulge in ne | | | | | | |
| | | sful situations and have fewer ch These students also have a more positive | | | | | | |
| 5 | maintain Good Emotion | | ve outlook on me. | | | | | |
| 3 | | learner sharp and mentally engaged, | and this is important to prevent | | | | | |
| | the onset of serious disease | es like dementia or Alzheimer. Conne | cting with others helps keen you | | | | | |
| | | ch in turn wards off depression by | | | | | | |
| | maintaining good emotion | 1 , | improving physical nearth and | | | | | |
| 6 | | vities (not limited to them): | | | | | | |
| | a. Organizing Education | | | | | | | |
| | b. Tree Plantation Drive | | | | | | | |
| | | or Martyrs Family by Fundraisers. | | | | | | |
| | d. National Service Sche | | | | | | | |
| | e. Felicitation of people | who have contributed to the society bu | at now forgotten by society. | | | | | |
| | f. Street Play on Social. | | | | | | | |

| | Introduction, Design | of Tube settler. | | |
| | | | | |
| | • | | | |

| Unit-I | | (08 Hours) |
|--------|------------------------------------------------------------------------------------|--------------|
| | Filtration, Disinfection: | |
| | Filtration: Necessity, mechanisms, Theory of filtration, types of filters, | |
| | pressure filters, dual and multimedia filters, Different media, details of | |
| | filter, Rapid sand filter and slow sand filter, design criteria, working and | |
| | washing of rapid sand filter, design of rapid sand filter. | |
| | Disinfection: Necessity, Different methods, Chlorination, Reactions | |
| | involved, Free and combined residual chlorine, Break point chlorination. | |
| Unit-I | | (08 Hours) |
| | Water softening, Desalination- R.O. Plant, demineralization, Adsorption | |
| | Ion exchange, Membrane Systems, RO Reject Management, Iron and | |
| | Manganese removal, De-fluoridation, Construction and Operation & | |
| | Maintenance aspects, Recent advances, MBR process, Introduction to | |
| | various water treatment modelling software. | |
| Unit-V | 11 0 | (08 Hours) |
| | Requirements of water distribution, Components, Service reservoirs | |
| | Functions, Network design, Economics, Analysis of distribution networks, | |
| | Computer applications, Appurtenances, Leak detection. Principles of design | |
| | of water supply in buildings: House service connection, Fixtures and | |
| | fittings, systems of plumbing and types of plumbing, Introduction to | |
| | SCADA and PLC for WTP and Water Distribution System including ESRs. | |
| Unit-V | | (08 Hours) |
| | Water Audit, Benefits and Approach for Water Audit, Steps of Water Audit, | |
| | Water Supply and Usage Study, Process Study, System Audit, Discharge | |
| | Analysis, Water Audit Report, introduction to water audit for Domestic | |
| | Sector, Industrial Sector, Irrigation Sector. | |
| | Action Plan for Water Conservation, surface and ground water, Rain water | |
| | harvesting, Action Points for Water Conservation, Domestic Sector, | |
| | Industrial Sector, Irrigation Sector, Regulatory Mechanism for Water | |
| | Conservation, Mass Awareness with respect to conservation Domestic | |
| | Sector, Industrial Sector, Irrigation Sector. | |
| Intern | d Assessment: | |
| Intern | Unit Test -1 UNIT – I, II, III | |
| | Unit Test -2 UNIT – IV, V, VI | |
| | Omt 100: 2 Oldi 11, 1, 1 | |
| Projec | Based Learning: | |
| | Collect information and write report on sources of drinking water of your city. | |
| | Collect information related to water quality standards. | |
| | Calculate water demand for your house. | |
| | Collect samples / broachers of appurtenances. | |
| | Collect pipe samples / brochures of various materials use for residential water su | upply Design |
| | ube settler. | |
| | Report on various types of Aeration with photos. | |
| 7 | Draw Plan and section of conventional water treatment plan. | |
| | Design slow sand filter. | |
| | mportance of various types of disinfection (conventional to advance). | |
| 10 | Collect information on advance water treatment plant and write report on its imp | ortance with |

| | respect to today's pollution. |
|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11 | List software used for water distribution system and explain any one. |
| 12 | Study plumbing system of your house and write report with neat sketch and photos Write a |
| 12 | report on your ideas about Mass Awareness with respect to conservation. |
| | a. Domestic Sector. |
| | b. Industrial Sector. |
| | c. Irrigation Sector. |
| 13 | Draft report on water audit of our institute. |
| 14 | Carry out awareness program in society related to water conservation and its importance and |
| <u> </u> | draft report on it. |
| 15 | Visit industry and collect information on usage of water, water conservation and water audit. |
| - | The manner of the state of the |
| Prac | etical: (Any Eight) (Practical 1 to 7 are compulsory and any one from 8 to 10) |
| 1 | Determination of pH and alkalinity of water samples. |
| 2 | Determination of Total Hardness and its components of water samples. |
| 3 | Determination of Chlorides of water samples. |
| 4 | Determination of Turbidity and optimum dose of alum for raw water samples. |
| 5 | Determination of optimum dose of chlorine and residual chlorine for water samples. |
| 6 | Site visit – Water Treatment Plant. |
| 7 | Computer applications - Water Treatment. |
| 8 | Computer applications— Analysis of distribution networks. |
| 9 | Draw Layout of water supply in residential buildings. |
| 10 | Water audit of water supply of our institute. |
| | |
| Prac | etical Exam: |
| | The practical examination will be based on above term work and course content. |
| | |

| Cour | so Pro roo | unicitos. The stud | ante should have knowledge of | | |
| 1 | rse Pre-requisites: The students should have knowledge of Building Planning and Design. | | | | |
| 2 | Advanced Surveying with Geomatics. | | | | |
| 3 | Planning & Management of Construction Projects. | | | | |
| 4 | | ture and Transport | | | |
| 5 | | e Design of Steel | | | |
| | | | Structures. | | |
| Cour | The aim of this course is to prepare the students to make estimate of building, road, and other civil | | | | nd other oivil |
| | | | o propare the students to make estimate of | ounding, road, al | ia omei civii |
| Cours | engineering structures. ourse Outcomes: The student will be able to | | | | |
| 1 | execute approximate estimate of structures. | | | | |
| 2 | execute quantities of different types of items of work. | | | | |
| 3 | explain specification with reference to different types of materials. | | | | |
| 4 | execute rate analysis for different types of structures. | | | | |
| 5 | execute abstract and build of different items of work for constructions. | | | | |
| 6 | | | | | |
| | Course Content: | | | | |
| | UNIT - I Estimation: | | (08 Hours) | | |
| | | | ing and valuation, Types of estimates, typ | es of estimates. | (00 110 415) |
| | | data required for estimates, units of measurement & principles deciding the | | | |
| | | units, mode of measurement of building works, Abstracting, bill of | | | |
| | | quantities. Provisional & prime cost items, contingencies, establishment | | | |
| | | | narges, Schedule of rates (D. S. R.). | Ź | |
| UNIT | | | g out Quantities: | | (08 Hours) |
| | L | ong Wall-Short | Wall Method and Centre Line method | of taking out | |
| | qı | uantities for diff | erent items of building. Estimation of q | uantity of load | |
| | be | bearing structures, Preparing Detailed Estimates of quantity single storied | | | |
| | re | sidential buildin | g, Preparing Detailed Estimates of qua | entity Different | |
| | R | .C.C. members, 1 | Preparing Detailed Estimates of water supp | oly and sanitary | |
| | W | orks, Estimation | of quantity of culverts and bridges, Meth | ods of estimate | |
| | of | earthwork for r | oads, canals, Estimation of quantity of Tra | usses. IS Codes | |
| used for estimating. Ca | | | g. Calculating quantities using MS Excel. | | |
| UNIT | UNIT - III Specification | | | | (08 Hours) |
| | | | oose, Objectives and importance of speci | | |
| | | - | ations, Specification of works, Dra | - | |
| | - | | reference to materials, quality, workmans | - | |
| 1 | 23 | secution, mode | of measurement and payment, for major | items such as | |
| | | | prick masonry, plastering, ceramic tile f | | |

| | work. | | |
|--------|--------------------------------------------------------------------------------------------------|-------------|--|
| UNIT | - IV Rate Analysis: | (08 Hours) | |
| | Purpose, importance and requirements of rate analysis, Prerequisites, factors | | |
| | affecting rate analysis, overhead expenses, procedure for rate analysis, | | |
| | schedule of rates, Task work: Labor requirement for different works, | | |
| | material requirement for different works, Rate analysis of different Items of | | |
| | work. | | |
| UNIT | | (08 Hours) | |
| | Abstracting: Purpose of abstract, Preparation of abstract, Measurement and | | |
| | billing, Checking of bills and final bills. | | |
| | Billing: Maintenance of muster role, Preparation of pay bill, Measurement of | | |
| | work for payment of contractors. Introduction to HIT-Office Software. | | |
| UNIT | | (08 Hours) | |
| UNII | Purpose, nature of value, price, cost and value, types of value, Factors | (00 110018) | |
| | affecting value of property. Concept of free hold and lease hold property, | | |
| | Depreciation & methods of working out depreciation, Sinking fund, Years | | |
| | Purchase, Out goings. Methods of Valuation of Building: Land & building | | |
| | basis, Rental basis, Reproduction & replacement cost basis. | | |
| | 1, | | |
| Interi | nal Assessment: | | |
| | Unit Test -1 UNIT – I, II, III | | |
| | Unit Test -2 UNIT – IV, V, VI | | |
| | | | |
| | ct Based Learning: Students are expected prepare report on any one topic, write i | | |
| applic | cations and illustrate with few examples. Also, write pseudo code/proof for it, wherever | applicable. | |
| 1 | Prepare approximate estimate of load bearing and framed structure. | | |
| 2 | Prepare approximate estimate for construction of septic tank. | | |
| 3 | Prepare detailed estimate for 3 storey framed structure. | | |
| 4 | Prepare a detailed estimate for construction of a road of 500m length. | | |
| 5 | Estimation of quantity of Trusses required for an industrial shed. | | |
| 6 | Prepare detailed specifications for different materials required for construction of residential | | |
| 7 | Prepare rate analysis for different types of construction works. | | |
| 8 | Prepare abstract and bill for different types of construction activities. | | |
| 9 | Prepare valuation report of different types of structures. | | |
| 10 | Calculate Valuation of residential and commercial building based on rental method. | | |
| 11 | Prepare detailed estimate for pipe culvert. | | |
| 12 | Prepare detailed estimate for box culvert. | | |
| 13 | Prepare detailed estimate for industrial shed. | | |
| 14 | Prepare detailed estimate for bridge. | | |
| | Carry out valuation for land and building. | | |
| 15 | | | |
| 15 | <u> </u> | | |
| | | | |
| | Work: (Any Six) | e method. | |
| Term | | e method. | |

| 4 | a) Detailed estimate of canal work. |
|-------|---------------------------------------------------------------------------------------------------------------------|
| | b) Assignment on road earthwork calculations. |
| 5 | Draft detailed specifications of any five items of work. |
| 6 | Assignment on Abstracting and Billing. |
| 7 | Prepare Detailed Rate analysis for any five items of work. |
| 8 | Carryout detailed valuation on different types of buildings. |
| 9 | Project I: Calculating quantities of different items using MS excel. |
| | |
| Oral: | |
| | The oral examination will be based on above term work and course content. |
| | |

| Proi | ect Based Learning: Any ONE based on following topics but not limited to it |
|------|-----------------------------------------------------------------------------------------------|
| 1 | Prepare the chart for various types and properties of fibers. |
| 2 | Develop of an excel sheet for calculation of mix design using fiber reinforced composites |
| 3 | Prepare the chart for design and manufacture of self-compacting concrete |
| 4 | Develop of an excel sheet for calculation of mix design for self-compacting concrete |
| 5 | Develop of an excel sheet for calculation of mix design for very high strength concrete |
| 6 | Develop of an excel sheet for calculation of mix design for high density concrete |
| 7 | Prepare the chart for various types of meshes used for construction of ferro-cement |
| 8 | Prepare the chart for various applications of ferro-cement |
| 9 | Prepare the chart for physical and chemical properties of silica fume |
| 10 | Prepare the chart for reaction mechanism of silica fume |
| 11 | Prepare the chart for properties of silica fume concrete in fresh state |
| 12 | Develop of an excel sheet for calculation of mix design for silica fume concrete |
| 13 | Develop of an excel sheet for calculation of mix design for polymer concrete |
| 14 | Prepare the chart for classification of light weight concrete |
| 15 | Develop of an excel sheet for calculation of mix design for light weight concrete |
| 16 | Compare Cost of different types of concrete |
| 17 | Suggest suitable type of concrete as per site requirements |
| 18 | Case study of economical aspect of a typical project. |
| | |
| Terr | n work: (Any four) |
| 1 | Mix design and testing of fiber reinforced composites concrete for split-tension and flexure. |
| 2 | Mix design and testing of fresh properties of Self Compacting Concrete |
| 3 | Mix design and testing of panels of ferro-cement |
| 4 | Mix design and testing of cubes of silica fume concrete |
| 5 | Mix design and testing of cubes of polymer concrete |
| 6 | Mix design and testing of cubes of light weight concrete |
| 7 | Mix design and cost comparison of different types of concrete. |
| | |

| | | sessment: | | |
| | Test - | - , , , , | | |
| Unit | Test - | 2 UNIT – IV, V, VI | | |
| | | | | |
| | | sed Learning: Any ONE based on following topics but not limited to it | | |
| 1 | | re a report on Case studies with reference to rock properties affecting ground | water. | |
| 2 | | re a report on Case studies with reference to ground water fluctuations. | | |
| 3 | | re a report on different types of aquifer and their characteristics | | |
| 4 | • | re a report on well development and well protection. | | |
| 5 | | re a report on testing for yield of the wells. | | |
| 6 | | re a report on sources and causes of ground water pollution. | 1:4 | |
| 7 | | re a report on physical, chemical and biological analysis of ground water qua | | |
| 8 | metho | | - | |
| 9 | Prepa metho | re a report on Case studies with reference ground water exploration by remote ods. | sensing | |
| 10 | | re a report on Case studies with reference ground water exploration by using exiting method. | electrical | |
| 11 | Prepare a report on Case studies with reference various methods of artificial recharge of ground water. | | ge of ground | |
| 12 | Prepa | re a report on Case studies with reference various sea water intrusion. | | |
| Prac | ctical v | vill consist of following Assignments | | |
| 1 | | mination of specific yield of an aquifer | | |
| 2 | Use | of flow net for ground water studies | | |
| 3 | | ems on pumping test method. | | |
| 4 | Assign | nment on method of images | | |
| 5 | | nment on different types of wells | | |
| 6 | | nment on ground water quality for industrial use and domestic use. | | |
| 7 | _ | to nearby ground water harvesting structure and prepare a report. | | |
| 8 | | ems on well hydraulics | | |
| 9 | | nment on ground water exploration techniques. | | |
| 10 | | nment on Design of wells | | |
| | | | | |
| Oral | : | | | |
| | The o | ral examination will be based on above term work and course content. | | |

| Inte | Unit Test -1 Units: I, II, III |
| | Unit Test -2 Units: IV, V, VI |
| | Onit lest -2 Onits. IV, V, VI |
| | ect Based Learning: Any ONE based on following topics but not limited to it |
| 1 | Prepare a poster on 'Components of smart Cities'. |
| 2 | Prepare a power point presentation on 'Need of Smart City Planning in India'. |
| 3 | Prepare a poster on 'Impact of Urbanization on Cities'. |
| 4 | Prepare a power point presentation on 'Quality of life in cities'. |
| 5 | Prepare a power point presentation on international initiatives for challenges in cities. |
| 6 | Prepare a model of green city. |
| 7 | Prepare a poster on 'Sustainable Development' in cities. |
| 8 | Prepare a model of 'Waste Management' in Smart Cities. |
| 9 | Prepare a power point presentation on 'Need for public participation in shaping the cities'. |
| 10 | Case study of 'Smart City' and prepare a power point presentation on it. |
| | |
| Teri | n work: The term work shall consist of any SIX following practical- |
| 1 | Case study of 'Smart City Planning' in detail and prepare the report |
| 2 | To study and prepare report on smart materials for smart buildings |
| 3 | Case study of 'Green Building' in detail and prepare the report |
| 4 | To study the problems urbanization and its impact on quality of life |
| 5 | Case study of 'e – governance' in detail and prepare the report |
| 6 | To study the traffic problems in metro cities and address the solutions |
| 7 | To study and prepare a report on 'Smart Transport systems for Smart Cities' |
| 8 | Site visit of Smart City and prepare a report |
| 9 | Model preparation on Smart City |
| | |
| Ora | l <mark>:</mark> |
| Section 1 | The oral examination will be based on above term work and course content. |

| TEACHIN | G SCHEME: | EXAMINATION SCHEME: | CREDITS: | |
| Theory: 04 | Hours / Week | End Semester Examination: 60 Marks | Theory: 04 | |
| | | Internal Assessment: 40Marks | | |
| | | | Total: 04 | |
| | | | | |
| | | dents should have knowledge of | | |
| 1 Static | s and Dynamics | | | |
| 2 Geom | echanics | | | |
| 3 Fluid | Mechanics | | | |
| 4 Found | lation Engineering | | | |
| | jective: On complet | | | |
| To far | miliarize the students | s for the design of different type of founda | tions. | |
| Course Ou | tcomes: On complet | tion of the course, the students will be able | e to - | |
| 1 identi | fy various types of fo | oundations and its necessities. | | |
| | n of raft foundation. | | | |
| 3 under | stand concept of Pie | r and Cassion. | | |
| 4 design | n of well foundation. | | | |
| 5 analys | se the sheet pile foun | dation. | | |
| | | of machine foundation. | | |
| Course Co | ntent: | | | |
| Unit-I | Introduction: - | | | (08 Hrs) |
| | Introduction: Basic | concept of foundation design, Function | of Foundation, | |
| | General requirement | nts, causes of foundation failure, types of | of shallow and | |
| | deep foundations | and their use, performance of various | ous types of | |
| | | past earthquakes, Various IS codes for o | design of | |
| | foundations. | | | |
| Unit-II | Raft Foundation: | | | (08 Hrs) |
| | | , floating raft, design of raft foundation- | | |
| | | , principles of design of buoyancy raft a | and basement, | |
| | concept of modulus | s of sub-grade reactions. | | |
| Unit-III | · · · · · · · · · · · · · · · · · · · | sion Foundation: - | | (08 Hrs) |
| | | : Introduction, design of piers, construc | - | |
| | | caissons, construction of open caisson | · • | |
| | caissons, constru | | antages and | |
| | disadvantages of pr | neumatic caissons. | | |
| | | | | |
| | | | | |
| Unit-IV | Well Foundation: | | | (08 Hrs) |
| | | of well foundation and bearing capacity, | | |
| | | on, analysis of well foundation, design | of individual | |
| | | l, Floating Foundation | | |
| Unit-V | Sheet pile: | | | (08 Hrs) |
| | Introduction Sheet | piles and Braced cuts: Cantilever sheet p | iles including | |

| | anchored sheet piles in cohesion-less and cohesive soils: lateral earth | | | |
|---------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|-------------|--|--|
| | pressure diagram, computation of embedment depth. Design of anchored | | | |
| T7 •4 | bulkhead:- Free earth support and fixed earth method. | (00 II) | | |
| Unit | -VI Machine Foundation: - Introduction, types of machine foundation, dynamic loads, Dynamic soil | (08 Hrs) | | |
| | testing techniques: block vibration test, shear modulus test, | | | |
| | Resonance-column test, Two & three borehole techniques, Vibration | | | |
| isolation, General requirements and design criteria, analysis, and design | | | | |
| | steps involved in Barkans method. | | | |
| | | | | |
| Inter | rnal Assessment: | | | |
| | Unit Test -1 Unit No: I, II, III | | | |
| | Unit Test -2 Unit No:IV, V, VI | | | |
| | | | | |
| | ect Based Learning: Any ONE based on following topics but not limited to it | | | |
| 1 | To prepare demonstrate models of different types of foundations. | | | |
| 2 | To prepare detailed report on performance of various types of foundations during past | | | |
| 2 | earthquakes. | | | |
| 3 4 | To prepare chart on computation of design load of shallow foundation. | | | |
| 5 | To prepare chart on design steps of raft foundation. | | | |
| 6 | To prepare detailed report on construction open and pneumatic caisson. To prepare chart on forces acting on a well foundation. | | | |
| 7 | To prepare detailed report construction of well foundation. | | | |
| 8 | To prepare chart on cantilever sheet pile in cohesive and non-cohesive soil. | | | |
| 9 | To prepare detailed report on types of machine foundation. | | | |
| 10 | To prepare detailed report on Dynamic soil testing techniques. | | | |
| | | | | |

| | _ | d, uniformly loaded circular and rectangula | ar areas. use of | | | |
| | Newmark's chart. | | | | | |
| Unit-II | Seepage Analysis | | | (08 Hrs) | | |
| | | I mode of occurrence, permeability, Dard | , | | | |
| | | coefficient of permeability: Pumping out | , 1 0 | | | |
| | | for one dimensional flow and two-dime | 1 | | | |
| | 1 0 | non-homogenous and anisotropic soil, m | ethods of | | | |
| TI!4 TIT | obtaining flow net | , radial flow net. | | (00 II) | | |
| Unit-III | Consolidation: - Introduction, me | echanism of consolidation, basic ter | eme used in | (08 Hrs) | | |
| | , | echanism of consolidation, basic ter ee-dimensional consolidation equation, s | ms used in | | | |
| | | to accelerate consolidation process, (Nun | | | | |
| | consolidation) | to decelerate combondation process, (1) and | icricar on | | | |
| Unit-IV | Geotechnical Inst | trumentation: - | | (08 Hrs) | | |
| | | nition of terms relating to instrumentation c | haracteristics, | (00 1115) | | |
| | | ore pressure:- introduction and instrument | | | | |
| | measurement of deformation:- introduction and instrument types | | | | | |
| Unit-V | Stability of Earth | slopes: - | | (08 Hrs) | | |
| | - | nite slopes in cohesionless and cohesion s | | | | |
| | | lopes, planar surface failure:- Culmann's | method, | | | |
| | Swedish slip circle | e method, Taylor stability number. | | | | |

| Uni t | t-VI Introduction of Geotechnical Earthquake Engineering: - | (08 Hrs) |
|--------------|-------------------------------------------------------------------------------------------------------|------------|
| | Introduction, causes of earthquake, seismograph, nature and types of | |
| | dynamic loading, concept of dynamic loading, characteristics of ground | |
| | motion, effect of local site conditions on ground motions, dynamic soil | |
| | properties, liquefaction and related phenomena, soil improvement for | |
| | remediation of seismic hazards. | |
| | | |
| Inte | rnal Assessment: | |
| | Unit Test -1 Unit No: I, II, III | |
| | Unit Test -2 Unit No: IV, V, VI | |
| D | | |
| Pro | ject Based Learning: Any ONE based on following topics but not limited to it | |
| 1 | To prepare demonstrate model of Darcy's law. | |
| 2 | To prepare chart on flow net and its practical applications in Geotechnical Engineerin | |
| 3 | To prepare detailed report on different techniques to accelerate consolidation process | S. |
| 4 | To prepare chart on mechanism of consolidation process with proper sketches. | |
| 5 | To prepare PPT on stress calculation for different types of loading on soil. | 11 |
| 6 | To Prepare detailed report on Newmark chart and Westergaard's equation with suita | ible |
| 7 | numerical problem. To prepare detailed report on uses of different geotechnical instruments for meas | ymamant of |
| / | pore pressure and deformation. | urement of |
| 8 | To Prepare chart on Culmann's method. | |
| 9 | To prepare chart on Swedish slip circle method. | |
| 10 | To Prepare PPT on liquefaction phenomena with case study. | |
| 11 | To prepare detailed report of a case study on earthquake hazards. | |
| 12 | To prepare detailed report on types of embankment failure due to earthquake. | |
| | 20 propriet detailed report on types of embanisment funded and to entirequire. | |

BHARATI VIDYAPEETH (DEEMED TO BE UNIVERSITY), PUNE

Faculty of Engineering & Technology
B. Tech. - Civil
Old Syllabus

College Information

Bharati Vidyapeeth University college of Engineering, Pune continued to take new strides towards evolving directions to further the growth and dissemination of scientific and technological knowledge.

The college established in 1983, is one of the oldest and largest Engineering Colleges in the state of Maharashtra. The college has well defined goals which are intensely practised and followed.

Their implementation encompass multi-faceted activities in the form of recruiting experienced faculty, organizing faculty development program, Identifying socio-economically relevant areas and emerging technologies. Constant review and upgradation of curricula, Upgradation of Laboratories, library and communication facilities, Collaboration with industries and research and development organizations, Sharing of knowledge, infrastructure and resources, training extension, testing and consultancy services and Promoting Interdisciplinary research.

The college has been ranked as 'A' grade Engineering college by the Government of Maharashtra. Meeting quality standards in education such as is been a motto of this institute. As a pedagogical effect, out of ten under graduate programmes being conducted, seven programmes eligible for accreditation are accredited by National Board of Accreditation(NBA).

The DATAQUEST - CMR conducts an annual survey of technical schools of India and publishes the list of best 100 technical schools in India. In the surveys, for the past seven years, the college has been consistently ranked among top 50 technical schools.

Another feather in Institute's cap is its selection for the grant of Rs. 4.0 Crore under Technical Education Quality Improvement Programme - II(TEQIP-II) by Ministry of Human Resource Development (MHRD) of Government of India supported by World Bank.

This Institute has been ranked to 45th position at all India level and 5th at the Western Region of AICTE in 2012. The Institute has been very sensitive to the human resource development and continues initiating new academic programmes. Presently it offers 09 undergraduate programmes in the field of Civil Engineering, Chemical Engineering, Computer Engineering, Information Technology, Electrical Engineering, Electronics Engineering, Electronics and Telecommunication Engineering, Mechanical Engineering and Production Engineering.

The college offers 08 postgraduate programmes in the field of Civil Engineering, Chemical Engineering, Computer Engineering, Information Technology, Electrical Engineering, Electronics Engineering, Mechanical Engineering and NanoTechnology.

Salient Features

The Department of Civil Engineering offers undergraduate, postgraduate and doctorate degree courses. The department possesses qualified faculty, state-of-the-art infrastructure and its own library. As a part of the infrastructure, the department laboratories are equipped and are capable of conducting research projects and provide consultancy to the industry. The well-equipped hi-tech computer lab provides students with a hands-on experience of the industry relevant softwares that are part of their curriculum. The curiculum is kept up-to-date and relevant by involving industry experts in the revision process. The department has a very active student association which is managed by the students. This association organizes events, expert lectures, site visits and personality development programs every year. The association also publishes a newsletter and maintains its own website. All students complete a six week internship before their final year. For their internship they are sent to various companies across India for on-the-job training in various technical roles.

The Department of Civil Engineering is honing the potential of the students to face the challenges in this vast field. The department also runs a postgraduate course in Hydraulic Engineering, for which it recieves the guidance from internationally recognized scientists in the field of Hydraulics. The P.G. Students perform their dissertation works in collaboration with CW & PRS Laboratories, Government of India- especially the model studies.

Civil engineering is a professional engineering discipline that deals with the design, construction, and maintenance of the physical and naturally built environment, including works like roads, bridges, canals, dams, and buildings. Civil engineering is the oldest engineering discipline after military engineering. Due to extensive growth in the construction, infrastructure and real estate sectors in India, the demand of civil engineers is high. Career opportunities for these professionals are available with firms of both the private and public sectors. Besides this, job opportunities are obtainable for them abroad too. Civil Engineers can pursue a very lucrative career.

Major Topics of Research Undertaken:

- Studies in the areas of sediment transport and fluid mechanics related to non uniform sediments, hydraulic design of spillways and design of permeable spurs.
- Structural Engineering: Studies of earthquake resistant structures and composite materials.
- Geotechnical Engineering: Utilization of waste plastics in road sub base.
- Environmental Engineering: Use of Moringa Olifera as a coagulant for treatment of potable water.

Research Facilities Developed

- Modernization of Environment Engineering laboratory to carry out research related to water quality management and air pollution control. For this purpose AICTE has provided grant of Rs. 6,00,000/- under MODROBS scheme.
- In Hydraulics Engineering Laboratory, tilting flume and wind tunnel facilities are established.

Consultancy

Testing and Consultancy in the areas of geotechnical Engineering, Structural Engineering and Environmental Engineering is carried out. Total revenue generated in last five years is Rs. 16 lacs.

Total Research Grants Recieved from Academic Year 2004-05 to 2014-15: Rs 7.35 lacs Research Publications from Academic Year 2010-11 to 2014-15:

| Type of Publication | No of Publication |
|--------------------------|-------------------|
| International Journal | 43 |
| National Journal | 03 |
| International Conference | 07 |
| National Conference | 04 |
| Total | 57 |

Mission

Create high quality Civil Engineers to meet global challenges.

Vision

"Transformation in Construction Industry for National development."

Program Educational Objectives

- PEO 1 To prepare students for career in civil engineering profession.
- PEO2 To develop a responsible 'Entrepreneur'.
- PEO3 To develop the student to cope up with the advancements in Civil Engineering.

Programme Outcomes

The Graduate Engineers will have the ability to

- Apply possessed knowledge of fundamental subjects to Civil Engineering problems.
- 2. Analyze Civil Engineering problems.
- 3. Design Civil Engineering structures with appropriate consideration to safety, economy, health and environmental considerations.
- 4. Solve complex Civil Engineering problems by conducting investigations.
- 5. Use modern Civil Engineering tools, techniques and softwares.
- 6. Apply their professional responsibilities
- 7. Understand the impact of professional engineering solutions in societal and environmental contexts.
- 8. Exhibit professional ethics and norms of engineering practice.
- 9. Function individually and in teamwork.
- 10. Communicate effectively in both verbal and written forms.
- 11. Manage the work and finance of a civil engineering projects.
- 12. Practice the use of lifelong learning.

Program Educational Objectives:

- To prepare students for career in civil engineering profession.
- To develop a responsible 'Enterpreneur'.
- To develop the student to cope up with the advancements in Civil.

Programme Outcomes:

- Apply possessed knowledge of fundamental subjects to civil engineering problems.
- analyze civil engineering problems.
- Design civil engineering structures with appropriate consideration to safety, economy, health and environmental considerations.
- Solve complex civil engineering problems by conducting investigations.
- Use modern civil engineering tools, techniques and softwares.
- Apply their professional responsibilities.
- Understand the impact of professional engineering solutions in societal and environmental contexts.
- Exhibit professional ethics and norms of engineering practice.
- Function individually and in teamwork.
- Communicate effectively in both verbal and written forms.
- Manage the work and finance of a civil engineering projects.
- Practice the use of lifelong learning.

ENGINEERING MATHEMATICS - I

TEACHING SCHEME

Lectures :3 Hrs/week
Tutorial :1 Hrs/week
Total :4 Hrs/week

CREDIT

Theory :3 Tutorial :1 Total :4

EXAMINATION SCHEME

Theory : 60 Marks
Unit Test : 20 Marks
Attendance : 10 Marks
Assignment : 10 Marks
Total : 100 Marks

Course Prerequisite

Students should have knowledge about

- 1. Matrix
- 2. Complex Numbers
- 3. Derivatives

Course Objectives

To develop an ability to use the mathematical techniques, skills and tools necessary for engineering practice.

Course Outcomes

At the end of this course, a student will be able to

- $1. \ solve the consistency of any type of system.\\$
- 2. find the roots of equation, using DeMoivre's Theorem and to locate imaginary points using Argand Diagram.
- 3. apply Leibnitz rule to find nth Derivative.
- ${\bf 4.}\ test\,Convergence\,and\,Divergence\,of\,in finite\,series.$
- 5. compute a total derivative.
- 6. compute Maxima and Mininma of any functiion of two variables

<u>Unit-I</u> (8 Hours)

Matrices

Rank, Normal form, System of Linear Equations, Linear Dependence and Independence, Linear and Orthogonal Transformations, Eigen values, Eigen Vectors, Cayley – Hamilton Theorem, Application to problems in Engineering.

<u>Unit-II</u> (8 Hours)

Complex Numbers and Applications

Definition, Cartesian, Polar and Exponential Forms ,Argand's Diagram, De'Moivre's theorem and its application to find roots of algebraic equations, Hyperbolic Functions, Logarithm of Complex Numbers, Separation into Real and Imaginary parts, Application to problems in Engineering.

<u>Unit-III</u> (8 Hours)

Expansion of Functions and Differential Calculus

 $\label{eq:definition} Differential \ Calculus: Successive \ Differentiation, n^{\text{th}}\ Derivatives\ of\ Standard\ Functions, \\ Leibnitz's\ Theorem.$

Expansion of Functions: Taylor's Series and Maclaurin's Series.

<u>Unit-IV</u> (8 Hours)

Differential Calculus

Indeterminate Forms, L'Hospital's Rule, Evaluation of Limits.

Infinite Series

Infinite Sequences, Infinite Series, Alternating Series, Tests for Convergence, Absolute and Conditional Convergence, Power series, Range of Convergence.

<u>Unit-V</u> (8 Hours)

Partial Differentiation and Applications

Partial Derivatives, Euler's Theorem on Homogeneous Functions, Implicit functions, Total Derivatives, Change of Independent Variables.

Errors and Approximations.

<u>Unit-VI</u> (8 Hours)

Jacobian

Jacobians and their applications, Chain Rule, Functional Dependence.

Maxima and Minima

Maxima and Minima of Functions of two variables, Lagrange's method of undetermined multipliers.

Text Books

Applied Mathematics (Volumes I and II) by P.N. Wartikar and J.N. Wartikar, Pune Vidhyarthi Griha Prakashan, Pune 7th edition(1988).

Assignments

- 1. Rank, System of linear equations.
- 2. Complex Numbers.
- 3. Differential calculus and expansion of functions.
- 4. Indeterminate forms and infinite series.
- 5. Partial Derivatives, Euler's theorem on homogeneous functions.
- 6. Jacobians, Maxima and Minima of functions of two variables.

FUNDAMENTALS OF CIVIL ENGINEERING

TEACHING SCHEME

Lectures : 3 Hrs/week
Practicals : 2 Hrs/week
Total : 5 Hrs/week

CREDITS

Theory : 3
Term Work : 1
Total : 4

EXAMINATION SCHEME

Theory : 60 Marks
Unit Test : 20 Marks
Attendance : 10 Marks
Assignments : 10 Marks
Term work : 25 Marks
Total : 125 Marks

Course Prerequisite

The Students should have the knowledge of

- 1. Concepts of units and conversions of units.
- 2. Basic knowledge of Chemistry
- 3. Basic knowledge of geography, concept of latitude and longitude.

Course Objective

To make student understand the scope and application of Civil Engineering

Course Outcomes

Students will be able to

- 1. Describe the scope of Civil Engineering and role of Civil Engineer in Construction project.
- $2. \ \ Explain use of surveying instruments for land survey \, .$
- $3. \ \ Explain\ principles\ of\ building\ planning\ and\ by e\ laws.$
- 4. Describe types of foundations and their stability.
- 5. Explain methods of irrigation, types of dams, canals, and water and sewage treatment process.
- 6. Describe the components of infrastructure like roads, railways, bridges and airports.

<u>Unit-I</u> (6 Hours)

Civil Engineering scope and applications

Civil Engineering scope, importance and applications to other disciplines of Engineering; Civil Engineering construction process and role of Civil engineer; Government authorities related to Civil Engineering; Types of structures based on loading , material and configuration; Building components and their functions; Civil Engineering materials: concrete, construction steel, bricks, flooring material and tiles, paints, plywood, glass and aluminum.

<u>Unit-II</u> (6 Hours)

Surveying

Objectives, Principles and Classification of Surveying; Linear, angular, Vertical and area Measurements and related instruments.

<u>Unit-III</u> (6 Hours)

Building planning and Bye laws

Site selection for residential building; Principles of building planning; Building bye lawsnecessity, Floor Space Index, Heights, open space requirements, set back distance, ventilation and lighting, concept of carpet and built up area, minimum areas and sizes for residential buildings; Concept of Eco friendly structures and Intelligent buildings.

<u>Unit-IV</u> (6 Hours)

Foundations and Earthquakes

Function of foundation, concept of bearing capacity and its estimation, types of foundation and its suitability, causes of failure of foundation.

Earthquakes causes, effects and guidelines for earthquake resistant design, earthquake zones.

<u>Unit-V</u> (6 Hours)

Irrigation and Water Supply

Rainfall measurement and its use in design of dams; Types of dams, canals, methods of irrigation and their merits and demerits; hydropower structures; Water supply, drinking water requirements and its quality, water and sewage treatment flow chart.

<u>Unit-VI</u> (6 Hours)

Infrastructure

Roads- types of roads and their suitability, cross section of roads, meaning of terms; width of roads, super elevation, camber, gradient, sight distance, materials used for construction of roads.

Railways- Types of gauges, section of railway track, components of railway track, advantages.

Bridges: Components - Foundation, Piers, Bearings, Deck. Airways - Components - Runway, Taxiway and Hangers.

Waterways: components-port, jetty, breakwater.

Term Work

(Term work shall consist of any eight exercises from the list given below.)

- 1. Study and use of prismatic compass and measurement of bearings.
- 2. Study and use of Dumpy level and reduction of levels by collimation plane method.
- 3. Area measurement by Digital Planimeter.
- 4. Drawing plan and elevation of a residential bungalow.
- 5. Study of features of topographical maps.
- 6. Assignment on collection of information on Civil Engineering materials.
- 7. Assignment on types of foundations.
- 8. Assignment problem on irrigation and hydropower structures.
- 9. Assignment on study of flow chart of water and sewage treatment.
- $10. Assignments \, on \, types \, of \, transportation \, systems.$

Text Books

- 1. "Surveying-Voll" S.K. Duggal, Tata Mc Graw Hill Publication.
- 2. "Built Environment" Shah, Kale, Patki, , Tata Mc Graw Hill Publication

ENGINEERING GRAPHICS

TEACHING SCHEME

EXAMINATION SCHEME

Lectures : 4 Hrs/week
Practicals : 2 Hrs/week
Total : 6 Hrs/week

Theory : 60 Marks Unit Test : 20 Marks

Total . OTH 3/ WEEK

Attendance : 10 Marks
Assignment : 10 Marks

CREDIT

Term Work : 25 Marks
Total : 125 Marks

Theory : 4 Practical : 1 Total : 5

Course Prerequisites

Students should have basic knowledge of fundamentals of drawing.

Course Objectives

To apply fundamental principles of Engineering Graphics.

Course Outcomes

At the end of this course, a student will be able to understand

- 1. Different engineering curves and dimensions.
- $2. \ \ Differentiate first angle and third angle projection method in orthographic.$
- $3. \ \ To interpret \ views \ of object and to draw by using Isometric Projection Method.$
- $4. \ \ Projection of lines and its traces.$
- 5. Projection of different planes
- 6. Projection of solids and its sections.

<u>Unit-I</u> (6 Hours)

Lines and Dimensioning in Engineering Drawing

Different types of lines used in drawing practice, Dimensioning – linear, angular, aligned system, unidirectional system, parallel dimensioning, chain dimensioning, location dimension and size dimension.

<u>Unit-II</u> (6 Hours)

Curves used in Engineering Practice

Ellipse by Directrix-Focus method, Arcs of Circle method, Concentric circle method and Oblong method. Involute of a circle, Cycloid, Archimedean Spiral, Helix on cone, Loci of points-Slider Crank mechanisms.

Projections of Points and Lines and planes

Projections of points, projections of lines, lines inclined to one reference plane, Lines inclined to both reference planes. (Lines in First Quadrant Only) Traces of lines, Projections of Planes, Angle between two planes, Distance of a point from a given plane, Inclination of the plane with HP, VP

<u>Unit-III</u> (6 Hours)

Projection of Solids

Projection of prism, pyramid, cone and cylinder by rotation method.

<u>Unit-IV</u> (6 Hours)

Section of Solids

Types of section planes, projections of solids cut by different sections of prism, pyramid, cone and cylinder.

<u>Unit-V</u> (6 Hours)

Orthographic Projection

Basic principles of orthographic projection (First and Third angle method) . Orthographic projection of objects by first angle projection method only. Procedure for preparing scaled drawing, sectional views and types of cutting planes and their representation, hatching of sections.

<u>Unit-VI</u> (6 Hours)

Isometric Projections

Isometric view, Isometric scale to draw Isometric projection, Non-Isometric lines, and construction of Isometric view from given orthographic views and to construct Isometric view of a Pyramid, Cone, Sphere.

Term work

- Term work shall consist of Seven half-imperial size or A2 size (594 mm x 420 mm) sheets.
- Assignment 05 Problems on each unit in A3 size Drawing Book

Sheets

- Types of lines, Dimensioning practice, Free hand lettering, 1nd and 3rd angle methods symbol.
- Curves and loci of points
- Projections of Points and Lines and planes
- Projection of Solids
- Section of solids
- Orthographic Projections
- Isometric views

ENGINEERING PHYSICS

TEACHING SCHEME

Lectures : 4 Hrs/week
Practicals : 2 Hrs/week
Total : 6 Hrs/week

CREDITS

Theory : 4 Practicals : 1 Total : 5

EXAMINATION SCHEME

Paper : 60 Marks
Unit Test : 20 Marks
Assignment : 10 Marks
Attendance : 10 Marks
Term Work : 25 Marks

Total :125 Marks

Course Prerequisite

The Student should have basic knowledge of kinematics, electrostatic, wave mechanics and dimensions along with good knowledge of calculus of Higher Secondary level of schooling.

Course Objective

After completing this course the students will able to apply knowledge of Engineering Physics to different branches of engineering for better conceptual clarity and exploring emerging fields of technology and research.

Course Outcomes

- 1. To use the properties of charged particles to develop modern instruments and explain the mechanism of fusion and fission.
- 2. To understand the basics of semiconductor and its uses to develop devices such as diode.
- Students will be capable of applying knowledge of nanoscience to develop new electronic devices.
- 4. Students will be able to associate the wave nature of light and apply it to measure stress, pressure and dimension etc..
- 5. To discuss the concept of transverse waves.
- 6. To judge the problems associated with architectural acoustics and give their remedies and use ultrasonic as a tool in industry for Non Destructive Testing.
- 7. To understand the behavior of quantum particles in different types of potentials.

<u>Unit-I</u> (8 Hours)

Modern Physics

Motion of a charged particle in electric and magnetic fields, Electrostatic and Magnetostatic focussing, Wavelength and resolution, Specimen limitation, Depth of field and focus, Electron microscope, Positive rays, Separation of isotopes by Bainbridge mass spectrograph.

Nuclear Physics

Nuclear fission, Liquid drop model of nucleus, Nuclear fission in natural uranium, Fission energy, Critical mass and size, Reproduction factor, Chain reaction and four factor formula, Nuclear fuel and power reactor, Nuclear fusion and thermonuclear reactions, Merits and demerits of nuclear energy, Particle accelerators, Cyclotron, Betatron

<u>Unit-II</u> (8 Hours)

Solid State Physics

Band theory of solids, Free electron theory, Fermi-Dirac probability function and position of Fermi level in intrinsic semi-conductors and in extrinsic semi-conductors (with derivation), Band structure of p-n junction diode under forward and reverse biasing, Conductivity in conductor and semi-conductor, Hall effect and Hall coefficient, Photovoltaic effect, Solar cell and its characteristics.

Superconductivity

Introduction, Properties of a super conductor, Meissner's effect, Critical field, Types of superconductors, BCS theory, High temperature superconductors, Application of superconductors.

Unit-III (8 Hours)

Thermodynamics

Zeroth law of thermodynamics, first law of thermodynamics, determination of j by Joule's method, Applications of first law, heat engines, Carnot's cycle and Carnot's engine, second law of thermodynamics, entropy, change in entropy in reversible and irreversible processes, third law of thermodynamics.

Nanoscience

Introductions of nanoparticals, properties of nanoparticals (Optical, electrical, Magnetic, structural, mechanical), synthesis of nanoparticals(Physical and chemical), synthesis of colloids, growth of nanoparticals, synthesis of nanoparticals by colloidal route, applications.

<u>Unit-IV</u> (8 Hours)

Optics - I

Interference

Interference of waves, Visibility of fringes, interference due to thin film of uniform and non-uniform thickness, Newton's rings, Engineering applications of interference (optical flatness, non-reflecting coatings, multi-layer ARC).

Diffraction

Classes of diffraction, Diffraction at a single slit (Geometrical method), Conditions for maximum and minimum, Diffraction at a circular aperture (Result only), Plane diffraction grating, Conditions for principal maxima and minima, Rayleigh's criterion for resolution, Resolving power of grating and telescope.

<u>Unit-V</u> (8 Hours)

Polarisation

Introduction, Double refraction and Huygen's theory, Positive and negative crystals, Nicol prism, Dichroism, Polaroids, Elliptical and circular polarisation, Quarter and half wave plates, Production of polarised light, Analysis of polarised light, half shade polarimeter, LCD.

Lasers

Spontaneous and stimulated emission, Population inversion, Ruby laser, Helium-Neon laser, Semiconductor laser, Properties of lasers, Applications of lasers (Engineering/industry, medicine, communication, Computers), Holography.

<u>Unit-VI</u> (8 Hours)

Architectural Acoustics

Elementary acoustics, Limits of audibility, Reverberation and reverberation time, Sabine's formula, Intensity level, Sound intensity level, Sound absorption, Sound absorption coefficient, different types of noise and their remedies, basic requirement for acoustically good hall, factors affecting the architectural acoustics and their remedies.

Quantum Mechanics

Wave nature of matter, De-Broglie waves, Wavelength of matter waves, Electron diffraction, Davisson and Germer's experiment, Physical significance of wave function, Schrodinger's time dependant and time independent wave equation, Application of Schrodinger's time independent wave equation to the problems of Particle in a rigid box and non rigid box.

Term-work:

Experiments

Any eight experiments from the following

- 1. Determination of band gap of semi-conductor.
- 2. Solar cell characteristics.
- 3. e/m by Thomson's method.
- 4. Uses of CRO for measurement of phase difference and Lissajous figures.
- 5. Hall effect and Hall coefficient.
- 6. Conductivity by four probe method.
- 7. Diode characteristics (Zener diode, Photo diode, LED, Ge/Si diode).
- 8. Plank's constant by photodiode.
- 9. Wavelength by diffraction grating.
- 10. Newton's rings.
- 11. Ultrasonic interferometer.
- 12. Sound intensity level measurement.
- 13. Wavelength of laser by diffraction.
- 14. Determination of refractive index for O-ray and E-ray.
- 15. Brewester's law.

Assignments

- 1. Recent advances in Nanotechnology
- Nuclear radiation detectors.
- 3. Atomic force microscope (AFM).
- 4. Advanced opto-electronic devices.
- 5. Laser in Industry.
- 6. Different spectroscopic methods a comparison (Raman, IR, UVR, etc.).

Text Books

B.TECH.(CIVIL) SEM-I

FUNDAMENTALS OF ELECTRICAL ENGINEERING

TEACHING SCHEME

Lectures : 3 Hrs/week
Practicals : 2 Hrs/week
Total : 5 Hrs/week

CREDITS

Theory : 3
Term work : 1
Total : 4

EXAMINATION SCHEME

Theory : 60 Marks
Unit Test : 20 Marks
Attendance : 10 Marks
Assignments : 10 Marks
Term work : 25 Marks
Total :125 Marks

Course Pre-requisites:

The Students should have basic knowledge about

- 1. Mathematics
- 2. Physics

Course Objectives:

The course introduces fundamental concepts of DC and AC circuits, electromagnetism, transformer and measuring instruments to all first year Engineering students.

Course Outcomes:

- 1. Understand and apply knowledge of basic concepts of work, power, energy for electrical, mechanical and thermal systems.
- 2. Understand and apply knowledge of Kirchoff's laws and network theorems to solve electrical networks.
- 3. Describe construction, principle of operation, specifications and applications of capacitors and batteries.
- 4. Describe and apply fundamental concepts of magnetic and electromagnetic circuits for operation of single phase transformer.
- 5. Define basic terms of single phase and three phase ac circuits and supply systems.
- 6. Know and use electrical safety rules.

<u>Unit-I</u> (6 Hours)

Basic concepts

Concept of EMF, Potential Difference, current, resistance, Ohms law, resistance temperature coefficient, SI units of Work, power, energy. Conversion of energy from one form to another in electrical, mechanical and thermal systems

<u>Unit-II</u> (6 Hours)

Network Theorem

Voltage source and current sources, ideal and practical, Kirchoff's laws and applications to network solutions using mesh analysis, Simplifications of networks using series- parallel, Star/Delta transformation. Superposition theorem, Thevenin's theorem, Max Power Transfer theorem.

<u>Unit-III</u> (6 Hours)

Electrostatics

Electrostatic field, electric field intensity, electric field strength, absolute permittivity, relative permittivity, capacitor composite, dielectric capacitors, capacitors in series& parallel, energy stored in capacitors, charging and discharging of capacitors, Batteries-Types, Construction& working.

<u>Unit-IV</u> (6 Hours)

Magnetic Circuit & Transformer

Magnetic effect of electric current, cross and dot convention, right hand thumb rule, concept of flux, flux linkages, Flux Density, Magnetic field, magnetic field strength, magnetic field intensity, absolute permeability, relative permeability, B-H curve, hysteresis loop, series-parallel magnetic circuit, composite magnetic circuit, Comparison of electrical and magnetic circuit

Farady's law of electromagnetic induction, statically and dynamically induced emf, self inductance, mutual inductance, coefficient of coupling,

Single phase transformer construction, principle of operation, EMF equation, voltage ratio, current ratio, kVA rating, losses in transformer, Determination of Efficiency & Regulation by direct load test.

Unit-V (6 Hours)

AC Fundamentals & AC Circuits

AC waveform definitions, form factor, peak factor, study of R-L, R-C, RLC series circuit, R-L-C parallel circuit, phasor representation in polar & rectangular form, concept of impedance, admittance, active, reactive, apparent and complex power, power factor, 3-ph AC Circuits.

Unit-VI (6 Hours)

Electrical Wiring and Illumination system

Basic layout of distribution system, Types of Wiring System & Wiring Accessories, Necessity of earthing, Types of earthing, Different types of lamps (Incandescent, Fluorescent, Sodium Vapour, Mercury Vapour, Metal Halide, CFL, LED), Study of Electricity bill.

Term-work:

The term work shall consist of record of minimum eight exercises / experiments.

List of Experiments

- 1. Determination of resistance temperature coefficient
- 2. Verification of Superposition Theorem
- 3. Verification of Thevenin's Theorem
- 4. Verification of Kirchoff's Laws
- 5. Verification of Maximum power transfer Theorem
- 6. Time response of RC circuit
- 7. Study of R-L-C series circuits for XL> XC, XL< XC & XL= XC
- 8. Verification of current relations in three phase balanced star and delta connected loads.
- 9. Direct loading test on Single phase transformer a) Voltage and current ratios.
 - b) Efficiency and regulations.
- 10. Study of a Residential (L.T.) Bill

Text Books

- 1. A Textbook of Electrical Technology Volume- I B.L.Theraja, S.Chand and Company Ltd., New Delhi.
- 2. Basic Electrical Engineering, V. K. Mehta, S. Chand and Company Ltd., New Delhi.

PROFESSIONAL SKILL DEVELOPMENT - I FNGLISH COMMUNICATION

TEACHING SCHEME

EXAMINATION SCHEME

Lectures : 2 Hrs/week
Total : 2 Hrs/week

Theory : 50 Marks
Total : 50 Marks

CREDITS

Theory : 2 Total : 2

Unit I:

(5 hours)

Essential Grammar

Tenses: Basic forms and use, sentence formation (general & Technical), Common errors, Parts of speech through context, Direct and reported speech structures and voices.

Unit II:

(2 hours)

Vocabulary Enrichment

Exposure to words from General Service List (GSL) by West, Academic word list (AWL) specific technical terms related to the field of technology. Phrases, idioms, significant abbreviations, formal (business) vocabulary.

Unit III:

(3 hours)

Written Communication I

Letter Writing – Formal and Informal letter writing, Application letters, Report Writing-Academic and Business reports, Job application letter.

Unit IV:

(2 hours)

Phonetics

Pronunciation, Reduction of MTI in spoken English, Question formation with emphasis on common errors made during conversation.

SOFT SKILLS

<u>Unit I:</u> (3 hours)

Communication Skill

- a) Importance of effective communication, types of communication- verbal and non verbal, barriers of communication, effective communication
- b) Listening Skills: Law of nature- Importance of listening skills, difference between listening and hearing, Types of listening.

<u>Unit II:</u> (3 hours)

Self Awareness & Self Development

- a) Self Assessment, Self Appraisal, SWOT, Goal setting Personal & career Self-Assessment, Self-Awareness, Perceptions and Attitudes, Positive Attitude, Values and Belief Systems, Self-Esteem, Self appraisal, Personal Goal setting,
- b) Career Planning, Personal success factors, Handling failure, Depression and Habit,

Unit III: (4 hours)

Interpersonal Relationship

Team work, Team effectiveness, Group discussion, Decision making - Team Communication. Team, Conflict Resolution, Team Goal Setting, Team Motivation Understanding Team Development, Team Problem Solving, Building the team dynamics. Multicultural team activity

Unit IV: (2 hours)

Time Management

The Time management matrix, apply the Pareto Principle (80/20 Rule) to time management issues, to prioritize using decision matrices, to beat the most common time wasters, how to plan ahead, how to handle interruptions, to maximize your personal effectiveness, how to say "no" to Time wasters.

B.TECH.(CIVIL) SEM-I

COMPUTER APPLICATIONS IN CIVIL ENGINEERING-I

TEACHING SCHEME

EXAMINATION SCHEME

Practicals : 2 Hrs/week
Total : 2 Hrs/week

Term work : 50 Marks

CREDIT

Practical : 1 Total : 1

Course Pre-requisites:

The students should have

- 1. Basic knowledge of computer components, systems and operating of computer
- 2. Basic mathematical ability

Course Objectives:

To develop an ability to use MS- Excel and MS- Power Point

Course Outcomes:

- 1. To solve different problems using M S- Excel
- 2. To generate various graphs and charts by analyzing the given data in Excel
- 3. To present different problems in various slides using MS Power Point

Use of computers in Civil Engineering is increasing day by day. Various analysis and design problems can be solved by preparing the programmes in Microsoft Office Excel. Also to present it properly ,knowledge of Microsoft PowerPoint is required. Use of Microsoft Office Excel and PowerPoint will make the candidate to analyze and present different problems the details of which are as listed below:

Learning Microsoft Excel

- Introduction
- Getting Started
- Data analysis and Calculations using relevant formulae.
- Generate graphs and charts.

Learning Microsoft PowerPoint

- Introduction
- · Getting Started
- Preparation of various slides
- Preparing presentation by giving different effects to the data entered.

Term Work

Term work shall consist of 8 assignments as follows:

- 1. Introduction to Microsoft Excel
- 2. Preparation of Excel Sheets with various solved equations.
- 3. Graphical representation of different data.
- 4. A mini project with Microsoft Excel.
- 5. Introduction to Microsoft PowerPoint.
- 6. Preparation of slides.
- 7. Insertion of clipart, word-art, histograms, different shapes and various charts.
- 8. A mini project with Microsoft PowerPoint.

Reference Books:

- 1) "Excel 2013 Bible" by John Walkenbach
- 2) "Excel 2010 All-in-one For Dummies" by Greg Harvey\
- 3) ${\it "Microsoft PowerPoint 2013 Introduction Quick Reference Guide"}\ by Beezix Inc.$

B.TECH.(CIVIL) SEM-II

ENGINEERING MATHEMATICS - II

TEACHING SCHEME

Lectures :3 Hrs/week
Tutorial :1 Hrs/week
Total :4 Hrs/week

CREDIT

Theory :3 Tutorial :1 Total :4

EXAMINATION SCHEME

Theory : 60 Marks
Unit Test : 20 Marks
Attendance : 10 Marks
Assignment : 10 Marks
Total : 100 Marks

Course Prerequisite

Students should have basic knowledge about

- 1. Derivatives
- 2. Integration

Course Objectives

To develop an ability to use the mathematical techniques, skills and tools necessary for engineering practice.

Course Outcomes

At the end of this course, a student will be able to

- 1. solve the differential equations of first order and first degree.
- 2. form mathemtical model of rectilinear motion, electric circuit, fourier heat conduction, newton's law of cooling.
- 3. represent periodic function as fourier series.
- 4. evaluate definite Integral by DUIS Rule and to trace cartesian and polar curves.
- 5. transform the cartesian coordinates into spherical polar and cylindrical coordinate systems.
- 6. apply methods to find area and volume by double and triple integration.

<u>Unit-I</u> (8 Hours)

Differential Equations (DE)

Definition, Order and Degree of DE, Formation of DE, Solutions of Variable Separable DE, Exact DE, Linear DE and reducible to these types

Unit-II (8 Hours)

Application of Differential Equations

Applications of DE to Orthogonal Trajectories, Newton's Law of Cooling, Kirchoff's Law of Electrical Circuits, Motion under Gravity, Rectilinear Motion, Simple Harmonic Motion, One–Dimensional Conduction of Heat, Chemical engineering problems

<u>Unit-III</u> (8 Hours)

Fourier Series

Definition, Dirichlet's conditions, Fourier Series and Half Range Fourier Series, Harmonic Analysis.

Integral Calculus

 $Reduction formulae, Beta \, and \, Gamma \, functions.$

<u>Unit-IV</u> (8 Hours)

Integral Calculus

Differentiation Under the Integral Sign, Error functions

Curve Tracing

Tracing of Curves, Cartesian, Polar and Parametric Curves. Rectification of Curves.

<u>Unit-V</u> (8 Hours)

Solid Geometry

Cartesian, Spherical Polar and Cylindrical Coordinate Systems. Sphere, Cone and

<u>Unit-VI</u> (8 Hours)

Multiple Integrals and their Applications

Double and Triple integrations, Applications to Area, Volume, Mean and Root Mean Square Values.

Assignments

- 1. Differential equations.
- 2. Aplication of differential equations.
- 3. Fourier series and Integral calculus.
- 4. DUIS and curve tracing.
- 5. Solid geometry.
- 6. Double and triple integrations, area and volume.

FUNDAMENTALS OF MECHANICAL ENGINEERING

TEACHING SCHEME

Lectures : 3 Hrs/week
Practicals : 2Hrs/week
Total : 5Hrs/week

<u>CREDIT</u>

Theory : 3 Practical : 1 Total : 4

EXAMINATION SCHEME

Theory : 60 Marks
Unit Test : 20 Marks
Attendance : 10 Marks
Assignment : 10 Marks
Term Work : 25 Marks
Total : 125 Marks

Course Prerequisites

Students should have the basic knowledge of Thermal Science.

Course Objectives

 $Students\,will\,get\,the\,basic\,knowledge\,of\,Mechanical\,Engineering\,systems.$

Course Outcomes

At the end of this course, a student will be able to understand

- 1. the fundamentals of thermal engineering.
- 2. working of power producing and absorbing devices.
- 3. different energy sources and fundamental laws of heat transfer.
- 4. the basic properties of fluids and materials.
- 5. the different mechanical devices and mechanisms.
- 6. machine tools and manufacturing processes.

<u>Unit-I</u> (8 Hours)

Thermodynamics

Heat, work and Internal Energy, Thermodynamic State, Process, Cycle, Thermodynamic System, First Law of Thermodynamics, Application of First Law to steady Flow and Non Flow processes, Limitations of First Law, PMM of first kind (Numerical Treatment), Second Law of Thermodynamics – Statements, Carnot Engine and Carnot Refrigerator, PMM of Second Kind (Elementary treatment only)

<u>Unit-II</u> (8 Hours)

Introduction to I.C. Engines and turbines

Two stroke, Four Stroke Cycles, Construction and Working of C.I. and S.I. Engines, Hydraulic turbines, steam turbines, gas turbines.(Theoretical study using schematic diagrams)

Introduction to refrigeration, compressors & pumps

Vapor compression and vapor absorption system, house hold refrigerator, window air conditioner. Reciprocating and rotary compressor, Reciprocating and centrifugal pump. (Theoretical study using schematic diagrams)

Unit-III (8 Hours)

Energy Sources

Renewable and nonrenewable, solar flat plate collector, Wind, Geothermal, Wave, Tidal, Hydro power, Bio-gas, Bio-Diesel, Nuclear power.

Heat transfer

Statement and explanation of Fourier's law of heat conduction, Newton's law of cooling, Stefan Boltzmann's law. Conducting and insulating materials and their properties, types of heat exchangers and their applications.

<u>Unit-IV</u> (8 Hours)

Properties of fluids

Introduction, Units of measurements, mass density, specific weight, specific volume and relative density, viscosity, pressure, compressibility and elasticity, gas laws, vapor pressure, surface tension and capillarity, regimes in fluid mechanics, fluid properties and analysis of fluid flow.

Properties of Materials and their Applications

Metals – Ferrous and Non-Ferrous, Nonmetallic materials, smart materials, Material selection criteria.

<u>Unit-V</u> (8 Hours)

Mechanical devices

Types of Belts and belt drives, Chain drive, Types of gears, Types of Couplings, friction clutch (cone and plate), brakes, Power transmission shafts, axles, keys, bush and ball bearings.

Mechanisms

Slider crank mechanism, Four bar chain mechanism, List of various inversions of Four bar chain mechanism, Geneva mechanism, Ratchet and Paul mechanism

<u>Unit-VI</u> (8 Hours)

Machine Tools

Lathe Machine – Centre Lathe, Drilling Machine – Study of Pillar drilling machine, Introduction to NC and CNC machines, Grinding machine, Power saw, Milling Machine.

Introduction to manufacturing processes and Their Applications

Casting, Sheet metal forming, Sheet metal cutting, Forging, Fabrication, Metal joining processes

List of experiments:

The Term Work shall consist of any Eight experiments of following list

- 1 Measurement of viscosity using Redwood viscometer.
- 2 Assembly and working of 4-bar, 6-bar, 8-bar planer mechanisms
- 3 Finding relation between input angle and output angle for various link lengths.
- 4 Study of domestic refrigerator & window air-conditioner
- 5 Demonstration of operations of centre lathe
- 6 Demonstration of operations on drilling machines
- 7 Demonstration of Two stroke and four stroke engine
- 8 Study of power transmitting elements: Coupling, Gears and bearings
- 9 Demonstration of pumps and compressor
- 10 Study and demonstration of different types of clutches.

ENGINEERING MECHANICS

TEACHING SCHEME

EXAMINATION SCHEME

Lectures : 4 Hrs/week
Practicals : 2 Hrs/week
Total : 6 Hrs/week

Theory
Unit Test
Attendance

: 60 Marks: 20 Marks: 10 Marks

Assignment : 10 Marks
Term Work : 25 Marks
Total : 125 Marks

CREDIT

Theory : 4 Practical : 1 Total : 5

Course Prerequisites

The Students should have knowledge of

- 1. Scalar and Vector
- 2. Newton's law of motion
- 3. Law of friction
- 4. Concept of physical quantities, their units and conversion of units
- 5. Concept of differentiation and integration

Course Objectives

To develop and apply the concept of resultant and equilibrium for various static and dynamic engineering problems.

Course Outcomes

At the end of this course, a student will be able to understand

- 1. calculate resultant and apply conditions of equilibrium.
- 2. analyze the truss and calculate friction force.
- 3. calculate centroid and moment of inertia.
- 4. solve problem on rectilinear motion.
- 5. solve problems on curvilinear motion.
- 6. Use D'Alembert's principle, Work Energy principle and Impulse Momentum principle for particle.

<u>Unit-I</u> (8 Hours)

Resultant and Equilibrium

Types and Resolution of forces, Moment and Couple, Free Body Diagram, Types of Supports, Classification and Resultant of a force system in a Plane - Analytical and Graphical approach..

<u>Unit-II</u> (8 Hours)

Truss and Friction

 $Coefficient of Static Friction, Impending motion of Blocks, Ladders and Belts. \\ Analysis of Perfect Trusses - Method of Joint, Method of Section and Graphical Method. \\$

<u>Unit-III</u> (8 Hours)

Centroid and Moment of Inertia

Centroid of line and plane areas, Moment of Inertia of plane areas, parallel and perpendicular axis theorem, radius of gyration, least moment of inertia.

<u>Unit-IV</u> (8 Hours)

Kinematics of Rectilinear motion of a Particle

Equations of motion, Constant and variable acceleration, Motion Curves, Relative motion, Dependent motion.

<u>Unit-V</u> (8 Hours)

Kinematics of Curvilinear motion of a Particle

Motion of a Projectile, Cartesian components, Normal and Tangential components of a curvilinear motion.

<u>Unit-VI</u> (8 Hours)

Kinetics of a Particle

D'Alemberts Principle, Work-Energy Principle and Impulse-Momentum Principle, Coefficient of Restitution, Direct Central Impact.

Practicals

- A) The term-work shall consist of minimum Five experiments from list below.
 - 1. Determination of reactions of Simple and Compound beam.
 - 2. Study of equilibrium of concurrent force system in a plane.
 - 3. Determination of coefficient of friction for Flat Belt.
 - 4. Determination of coefficient of friction for Rope.
 - 5. Study of Curvilinear motion.
 - 6. Determination of Coefficient of Restitution.

B)The term-work shall also consist of minimum Five graphical solutions of the problems on different topics.

Theory : 4 Hrs/week
Practicals : 2 Hrs/week
Total : 6 Hrs/week

CREDITS

Theory : 4
Practical : 1
Total : 5

EXAMINATION SCHEME

Theory : 60 Marks
Term Work : 25 Marks
Unit Test : 20 Marks
Assignments : 10 Marks
Attendance : 10 Marks
Total : 125 Marks

Course Prerequisites

 $Students\,should\,have\,basic\,knowledge\,of$

Industrial use of water, crystal structure, fuels, corrosion, electrochemical cell and structure of organic molecules at Higher Secondary level of schooling.

Course Objectives

After completing this course the students will able to apply knowledge of Engineering Chemistry to different branches of engineering for better conceptual clarity and exploring emerging fields of technology and research.

Course Outcomes

At the end of this course, a student will be able to

- 1. Analyze the methods involved in improving quality of water for domestic and industrial purposes.
- 2. Express the crystal structure through X-ray diffraction technique to examine the internal structure of crystal.
- 3. Demonstrate the properties and applications of fossil fuels and derived fuels.
- 4.Define the fundamental principles of corrosion and methods used for minimizing corrosion.
- 5.Interpret the basic concepts of electrochemical techniques and its applications in society.
- 6. Develop the skills for correct stereo chemical assignment and interpretation in complex organic molecules.

<u>Unit-I</u> (8 Hours)

Water

Introduction, Hardness of water, Effect of hard water on boilers and heat exchangers: a) boiler corrosion b) caustic embrittlement c) scales and sludges d) priming and foaming Water softening methods for industrial purposes :a) Zeolite process b) Phosphate conditioning, Numerical based on the zeolite process.

<u>Unit-II</u> (8 Hours)

Material Chemistry

Crystallography

Unit cell, Laws of crystallography, Weiss indices and Miller indices, Crystal defects (point and line defects), X-ray diffraction – Bragg's Law and numericals.

Cement

Introduction of cement, Hydraulic/ Non-hydraulic cementing materials, classification of cement, chemistry of portland cement, chemical composition and compound constituents of portland cement, properties of cement and its applications.

<u>Unit-III</u> (8 Hours)

Fuels

Introduction, classification of fuels, calorific value of fuels, NCV and GCV, Determination of calorific values using Bomb calorimeter and Boys' gas calorimeter.

Theoretical calculation of calorific value of a fuel, Analysis of coal a) Proximate b) Ultimate analysis of coal, Numericals based on NCV, GCV.

<u>Unit-IV</u> (8 Hours)

Corrosion and its Prevention

Corrosion: Definition, atmospheric corrosion-mechanism, Wet corrosion-mechanism, Electrochemical and galvanic series, Factors affecting corrosion-nature of metal, nature of environment.

Methods of prevention of corrosion: Cathodic and Anodic protection, Metallic coatings, Electroplating, Hot dipping.

<u>Unit-V</u> (8 Hours)

Electrochemistry

Introduction, Arrhenius Ionic theory, Kohlrausch's law of independent migration of ions Laws of electrolysis: Faradays Laws, Ostwald's dilution law, Acids and Bases, concept of pH and pOH, Buffer solutions, Solubility Product, Redox Reactions.

Electrode Potential, electrochemical cell, concentration cell, reference Electrodes, Overvoltage, Conductometric Titrations, Fuel cells, Lead Acid Storage Cell and numericals based on the above articles.

<u>Unit-VI</u> (8 Hours)

Stereochemistry

Introduction, chirality, optical activity, Enantiomers, Diastereomers, projection formula of tetrahedral carbon- Newman projection, Wedge projection, Fischer projection,

Geometrical isomerism: cis and trans isomerism, E and Z isomers

Optical isomerism: Mesoform, the number of optical isomers for chiral molecules,

Conformations: conformations of ethane, conformations of n-butane

Term work

Practicals

Any Eight experiments from the following

- 1. Estimation of hardness of water by EDTA method.
- 2. Estimation of chlorine by Mohr's method.
- 3. Determination of percentage of Ca in given cement sample
- 4. Determination of coefficient of viscosity by Ostwald's viscometer.
- 5. Study of Bomb calorimeter for determination of calorific value.
- 6. Determination of calorific value of gas fuel by using Boy's gas calorimeter.
- 7. Determination of dissolved oxygen in a water sample.
- 8. To determine the Molecular Weight of polymer.
- 9. Estimation of Copper from brass sample solution by lodometrically.
- 10. Estimation of percentage of Iron in Plain Carbon Steel by Volumetric Method.
- 11. To standardize NaOH solution and hence find out the strength of given hydrochloric Acid solution.
- 12. To determine Surface Tension of given liquid by Stalagmometer.
- 13. Study of corrosion of metals in medium of different pH.
- 14. To set up Daniel cell.
- 15. To determine pH of soil.
- 16. To determine Acidity of soil.

Assignments

- 1. Effect of hard water on boilers and heat exchangers
- 2. Hydraulic/Non-hydraulic cementing materials
- 3. Analysis of coal a) Proximate b) ultimate analysis of coal
- 4. Wet corrosion-mechanism, Electroplating, Hot dipping
- 5. Geometrical isomerism: cis and trans isomerism, E and Z isomers
- 6. Fuelcells

BUILDING CONSTRUCTION

TEACHING SCHEME

Lectures : 3 Hrs/week
Practicals : 2 Hrs/week
Total : 5 Hrs/Week

CREDITS

Theory: 3
Practical: 1
Total: 4

EXAMINATION SCHEME

Theory : 60 Marks
Unit Test : 20 Marks
Attendance : 10 Marks
Assignments : 10 Marks
Term Work : 25 Marks
Total : 125 Marks

Course Pre-requisites:

The Students should have basic knowledge of

- 1. Fundamentals of civil Engineering.
- 2. Concept of Engineering Graphics.

Course Objectives:

To develop the knowledge of building components, materials and construction practices

Course Outcomes:

The student should be able to

- 1. Understand different types of foundation and masonry.
- 2. Design staircase.
- 3. Understand types of Arches and flooring.
- 4. Understand different methods of building finishes.
- 5. Know different types of formworks.
- $6. Understand\ different\ properties\ of\ construction\ materials.$

<u>Unit-I</u> (6 Hours)

Building Foundations and Masonry

Building foundations: Necessity, Types, Building and its components,

Masonry: Stone, Brick, Types of bonds in brick masonry, Composite masonry, Hollow and Solid block masonry, Mortars used in construction.

<u>Unit-II</u> (6 Hours)

Doors, Windows and Stairs

Doors: Classification, Terminology used, Frames, Sizes.

Windows: Types, Sizes.

 $Stairs: Classification\ , Terminology\ used\ , Design\ of\ stairs.\ Lifts,,\ Escalators\ , Ramps.$

<u>Unit-III</u> (6 Hours)

Arches, Lintels and Floors

Arches: Classification, Terminology used,, Stability

Lintels: Types, Details of R.C.C. lintels and chhajja.

 ${\bf Flooring: I.S. \, Specifications, Types \, , Factors \, for \, selection \, of \, flooring.}$

<u>Unit-IV</u> (6 Hours)

Roof Construction

Roofs : Types, Suitability, Roof structures, Selection of roof covering material, Methods of water proofing of roofs, Types of trusses, Fixtures & fastenings

<u>Unit-V</u> (6 Hours)

Building Finishes

Plastering: Methods, tools used, Mortars, Defects, Plaster of Paris.

Pointing: Types, Methods of pointing

Paints: Types, Textures, Apex, Plastic emulsion, Wall cladding and its Materials

<u>Unit-VI</u> (6 Hours)

Formwork, Scaffolding and Smart Materials

Formwork: Necessity, Materials, Factors for selection, Types.

Scaffolding: Necessity, Materials, Factors for selection.

Precast concrete , Ferrocrete , Nanoconcrete , Green construction materials, Tremix flooring, Construction Chemicals.

Termwork

Plates- (1/4 imperial size)

- 1. Symbols of Material & structures
- 2. Section of wall
- 3. Brick bonds English bond, Flemish bond
- 4. Types of stone masonry
- 5. Arches any three
- 6. Types of steel trusses any three
- Paneled Door & Flush doors.
- 8. M.S. Window, Aluminum Window, Louvers Windows
- 9. Collection of information brochures related to Construction Material.

Assignment: One from each Unit.

Text Books

- 1. "Building Construction"-Rangwala, Charotar Publication
- "The Text Book of Building Construction"-S.P.Arora& S.P.Bindra-DhanpatRai Publication
- 3. "Building Technology and Valuation" TTTI Madras, -- Tata McGraw Hill Publication

Reference Books

- 1) "My Construction Practices "R.B.Chaphalkar.
- 2) "A to Z" Building Construction" Mantri Publications.
- 3) "Materials of Construction" Ghose-Tata McGraw Hill Publications.
- 4) "Civil engineering Material'-TTTI Chandigarh-Tata McGraw Hill Publications.

B.TECH.(CIVIL) SEM-II

PROFESSIONAL SKILL DEVELOPMENT - II FNGLISH COMMUNICATION

TEACHING SCHEME

EXAMINATION SCHEME

Lectures : 2 Hrs/week
Total : 2 Hrs/week

Theory : 50 Marks
Total : 50 Marks

CREDITS

Theory : 2 Total : 2

Unit I: (4 hours)

Essential Grammar II

Application of tenses, Auxiliaries- correct usage and importance in formal communication, Business Vocabulary - Vocabulary exercises through web-based applications

<u>Unit II:</u> (4 hours)

Written Communication II

Email writing- Formal and Informal email writing structure, Inquiry letters, Instruction letters, complaint letters, Routine business letters, Sales Letters etc. Technical writing, Essay writing, Paragraph writing.

<u>Unit III:</u> (2 hours)

Vocabulary Application

Vocabulary exercises through web-based applications, Usage and application through

<u>Unit IV:</u> (2 hours)

Situational Conversation

Application of grammar and correct spoken English according to context/ situation and application in business scenario.

SOFT SKILLS

<u>Unit I:</u> (3 hours)

Fundamentals Of Effective Communication

Public Speaking: fundamentals of effective public speaking, types- Extempore speech, manuscript speech, and ways to enhance public speaking skills, storytelling, oral review

<u>Unit II:</u> (3 hours)

Presentation Skills

PowerPoint presentations, Effective ways to structure the presentation, importance of body language.

Unit III: (3 hours)

Leadership Skills, Leader's Role, Responsibilities And Skill Required

Understanding good Leadership behaviors, Learning the difference between Leadership and Management, Gaining insight into your Patterns, Beliefs and Rules, Defining Qualities and Strengths of leadership, Determining how well you perceive what's going on around you, interpersonal Skills and Communication Skills, Learning about Commitment and How to Move Things Forward, Making Key Decisions, Handling Your and Other People's Stress, Empowering, Motivating and Inspiring Others, Leading by example, effective feedback.

<u>Unit VI:</u> (2 hours)

Problem Solving Skill

Problem solving skill, Confidence building

Unit V: (4 hours)

Corporate / Business Etiquettes

Corporate grooming & dressing, etiquettes in social & office setting-Understand the importance of professional behavior at the work place, Understand and Implement etiquettes in workplace, presenting oneself with finesse and making others comfortable in a business setting. Importance of first impression, Grooming, Wardrobe, Introduction to Ethics in engineering and ethical reasoning, rights and responsibilities

B.TECH.(CIVIL) SEM-II

WORKSHOP TECHNOLOGY

TEACHING SCHEME

Practicals : 2 Hrs/week

Total : 2 Hrs/week

CREDITS

Practical : 1 Total : 1

EXAMINATION SCHEME

Term Work : 50 Marks

Total : 50 Marks

Course Objectives

Introduction to different materials in engineering practices with respect to their workability, formability & machinability with hand tools & power tools and to develop skills through hands on experience. Special; emphasis shall be given to Safety in Workshop-Fire hazards, electric short circuit—causes and remedies, Machine protection, Human protection, Accident prevention methods, developing ability to observe safe working habits.

Term work shall consist of any three jobs, demonstrations on rest of the trades and journal consisting of six assignments one on each of the following topics.

Course Outcomes

At the end of this course, students should be able to understand

- 1. Basic Manufacturing Processes used in the industry,
- 2. Importance of safety
- 3. Electrical circuit making.

Carpentry

Introduction to wood working, kinds of woods, hand tools & machines, Types of joints, wood turning. Pattern making, types of patterns, contraction, draft & machining allowances Term work includes one job involving joint and woodturning.

Fitting

Types of Fits, concepts of interchangeability, datum selection, location layout, marking, cutting, shearing, chipping, sizing of metals, drilling and tapping. Term work to include one job involving fitting to size, male-female fitting with drilling and tapping.

Sheet Metal Practice

Introduction to primary technology processes involving bending, punching and drawing various sheet metal joints, development of joints.

Joining

Includes making temporary and permanent joints between similar and dissimilar material by processes of chemical bonding, mechanical fasteners and fusion technologies. Term work includes one job involving various joining processes like riveting, joining of plastics, welding, brazing, etc.

Forging

Hot working, cold working processes, forging materials, hand tools & appliances, Hand forging, Power Forging.

Moulding

Principles of moulding, methods, core & core boxes, preparation of foundry sand, casting, Plastic moulding.

Electrical Board Wiring

(Demonstration Common for Electrical & Non electrical Group)

Electric power utilization, energy audit, Types of wiring - House wiring, stair case wiring, two-way switch wiring, Types of fuses and their uses, circuit breaker, Three phase wiring for electrical motors, earthing, minor fault finding.

Plumbing (Demonstration Common for Electrical & Non electrical Group)

Types of pipe joints, threading dies, Pipe fittings.

RULES REGARDING ATKT, CONTINUOUS ASSESSMENT AND AWARD OF CLASS

Standards of Passing and ATKT Rules:

- 1. For all courses, both UE(University Evaluation) and IA(Internal Assessment) constitue separate heads-of-passing (HoP). In order to pass in such courses and to 'earn' the assigned credits.
 - a) The learner must obtain a minimum grade point of 5.0(40 % marks) at UE and also a minimum grade point of 5.0 (40 % marks) at IA.

OR

- b) If he/she fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for course is atleast 6.0 (50 % of aggregate). The GPA for a course will be calculated only if the learner passes at the UE.
- 2. A student who fails at UE in a course has to reappear only at UE as a backlog candidate and clear the HoP. Similarly, A student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the HoP.

Rules of ATKT:

- 1. A student is allowed to carry backlog of courses prescribed for B. Tech. Sem I, III , V , VII to B.Tech. Sem-II, IV , VI , VIII respectively.
- 2. A student is allowed to keep term of Sem-III, if he/she is failing in any number of subjects of Sem I & II.
- 3. A student is allowed to keep term of Sem-V, if he/she is failing in any number of subjects of Sem III & IV but passed in all subjects of Sem-I & II.
- 4. A student is allowed to keep term of Sem-VII, if he/she is failing in any number of subjects of Sem V & VI but passed in all subjects of Sem-III & IV.

Award of Class for the Degree Considering CGPA:

Award of Honours:

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The Criteria for the Award of Honours at the End of the Programme are as given below.

| Range of CGPA | Final Grade | Performance Descriptor | Equivalent Range of Marks(%) |
|----------------------------------|-------------|---------------------------|------------------------------|
| $9.50 \le \text{CGPA} \le 10.00$ | 0 | Outstanding | 80 ≤ Marks ≤ 100 |
| $9.00 \le CGPA \le 9.49$ | A+ | Excellent | 70 ≤ Marks ≤ 80 |
| 8.00 ≤ CGPA ≤ 8.99 | А | Very Good | 60 ≤ Marks ≤ 70 |
| $7.00 \le CGPA \le 7.99$ | B+ | Good | 55 ≤ Marks ≤ 60 |
| $6.00 \le CGPA \le 6.99$ | В | Average | 50 ≤ Marks ≤ 55 |
| 5.00 ≤ CGPA ≤ 5.99 | С | Satisfactory | 40 ≤ Marks ≤ 50 |
| CGPA Below 5.00 | F | Fail | Marks Below 40 |

BHARATI VIDYAPEETH DEEMED UNIVERSITY Pune.

Faculty of Engineering & Technology
Programme: B. Tech. (Civil)

COURSE STRUCTURE AND SYLLABUS (Choice Based Credit System - 2014 Course)
B. Tech. (Civil) (Sem III & IV)

Bharati Vidyapeeth Deemed University College of Engineering, Pune

Vision:

Provide high quality technical manpower to the industry and nation.

Mission:

Social Transformation Through Dynamic Education

Goals:

- a) To create work place environment that attracts and retains superior and diversified faculty members.
- b) To adopt policies to promote faculty development programmes.
- c) To gather, support and collaboration for research activities in emerging technologies and interdisciplinary studies.
- d) Constant reform and upgradation of curricula to keep pace with rapidly advancing technology trends.
- e) Development of centre of excellence in Engineering and Technology.
- f) Strengthen the interaction with R & D and industry organizations.
- g) Accelerate the process of sharing knowledge, infrastructure and resources for better tomorrow.
- h) Enhance the facilities necessary for training, testing and consultancy services.

COURSE STRUCTURE AND SYLLABUS

(Choice Based Credit System - 2014 Course)
B. Tech. (Civil) (Sem III & IV)

Bharati Vidyapeeth Deemed University

Bharati Vidyapeeth, the parent organization of this University is one of the largest educational organizations in the country. It has 171 educational units under its umbrella including 67 Colleges and Institutes of conventional and professional education.

The Department of Human Resource Development, Government of India on the recommendations of the University Grants Commission accorded the status of "Deemed to be University" initially to a cluster of 12 units of Bharati Vidyapeeth. Subsequently, 17 additional colleges / institutes were brought within the ambit of Bharati Vidyapeeth Deemed University wide various notifications of the Government of India. Bharati Vidyapeeth Deemed University commenced its functioning on 26th April, 1996.

Constituent Units of Bharati Vidyapeeth Deemed University

- 1. BVDU Medical College, Pune.
- 2. BVDU Dental College & Hospital, Pune
- 3. BVDU College of Ayurved, Pune
- 4. BVDU Homoeopathic Medical College, Pune
- 5. BVDU College of Nursing, Pune
- 6. BVDU Yashwantrao Mohite College of Arts, Science & Commerce, Pune.
- 7. BVDU New Law College, Pune
- 8. BVDU Social Sciences Centre (M.S.W.), Pune
- 9. BVDU Yashwantrao Chavan Institute of Social Science Studies & Research, Pune.
- BVDU Centre for Research & Development in Pharmaceutical Sciences & Applied Chemistry, Pune
- 11. BVDU College of Physical Education, Pune.
- 12. BVDU Institute of Environment Education & Research, Pune
- 13. BVDU Institute of Management & Entrepreneurship Development, Pune
- 14. BVDU Poona College of Pharmacy, Pune
- 15. BVDU College of Engineering, Pune
- 16. BVDU Interactive Research School in Health Affairs (IRSHA), Pune
- 17. BVDU Rajiv Gandhi Institute of Information Technology & Biotechnology, Pune
- 18. BVDU College of Architecture, Pune
- 19. BVDU Abhijit Kadam Institute of Management & Social Sciences, Solapur
- 20. BVDU Institute of Management, Kolhapur
- 21. BVDU Institute of Management & Rural Development administration, Sangli
- 22. BVDU Institute of Management & Research, New Delhi
- 23. BVDU Institute of Hotel Management & Catering Technology, Pune

- 24. BVDU Yashwantrao Mohite Institute of Management, Malakapur-Karad
- 25. BVDU Medical College & Hospital, Sangli
- 26. BVDU Dental College & Hospital, Mumbai
- 27. BVDU Dental College & Hospital, Sangli
- 28. BVDU College of Nursing, Sangli
- 29. BVDU College of Nursing, Navi Mumbai

The status of University was given to a cluster of these colleges and institutes in appreciation of the high level of their academic excellence and for their potential for further growth.

During the last 20 years or so, the University has achieved higher pinnacles of academic excellence and has established its reputation to such an extent that it attracts students not only from various parts of India but also from abroad. According to a survey conducted by Association of Indian Universities, this University is one among the top ten Universities in the country preferred by the overseas students for admissions. At present, there are more than 850 overseas students from 47 countries on the rolls of constituent units of this University.

During the last 20 years, there has been tremendous academic expansion of the University. It now conducts in all 305 courses in its constituent units, of them 108 are Post Graduate, 45 are Under Graduate and 55 Diploma level courses, 12 Fellowship and 5 certificate courses. All the professional courses which the University conducts such as those of Medicine, Dentistry, Engineering etc., have approval of the respective statutory councils, viz., Medical Council of India, Dental Council of India, All India Council for Technical Education etc.

The University is a throbbing center of research activities and has launched Ph.D. programmes in 77 subjects and M.Phil in 3 subjects. It has also introduced quite few innovative academic programmes such as Masters in Clinical Optometry, M.Tech. in Nano Technology etc.

The University's performance and achievements were assessed by the "National Assessment and Accreditation Council" and it was reaccredited with a prestigious "A" grade in 2011. Some programmes of the constituent units such as College of Engineering at Pune, Management Institute in Delhi and others have also been accredited by "National Board of Accreditation". Three constituent units of Bharati Vidyapeeth Deemed University are also the recipients of ISO 9001-2001 certifications.

Bharati Vidyapeeth Deemed University College of Engineering, Pune

College Information:

Bharati Vidyapeeth University College of Engineering, Pune (BVUCOE) established in 1983, a constituent unit of BVU (University with 'A' Grade status by MHRD, accredited to Grade 'A' by NAAC in 2004 and 2011) and holds a place of pride and is amongst the most reputed institute. It has been ranked to 61st by National Institutional Ranking Framework (NIRF) with criteriawise ranking as 5th in Graduate Outcome (GO), 13th in Outreach and Inclusivity (OI), 44th in Teaching Learning Resources (TLR) and 62nd in Perception (PR). This also made institute to stand 4th in the State of Maharashtra. Further, DATAQUEST-CMR national survey also ranked this institute to 4th among private technical institutions of India, 29th by Times of India and 41st by OUTLOOK. This is the only institute selected by MHRD for its Technical Education Quality Improvement Programme (TEQIP-II – 1.1 Programme) for the grant of Rs. 4 Crores.

BVUCOE, Pune offers 09 graduate, 08 post graduates programmes and Doctoral programmes in 08 disciplines. All Programmes are accredited by National Board of Accreditation (NBA) twice and we have applied for third cycle of accreditation.

Institute has its own spacious well designed building measuring 26,286 sq. m. and it houses 101 labs, 43 class rooms, and 21 tutorial rooms. The library of the institute is a five storied building and houses periodical section, computer center, reading hall, reference section. It contents more than 60,000 books, 15,000 volumes, 80 national and 81 international journals subscription and digital library facility. Digital library of institute with 66,944 number of journals in e-form is one of the richest source of knowledge in e-form for students and faculty members. The Library, Laboratories, Equipments, Learning resources and Software constantly get upgraded and updated in tune with the changing time. An Investment of Rs.119.95 million is made in the last five years.

The structured faculty development programme has strengthened quality of Teaching Learning Process in the institute. 35 faculty members with Ph. D. qualifications have been proved as resources for research, innovations and sound Teaching – Learning Process. As a part of quality improvement programme 04 number faculty members were deputed to International Universities, Institutions of national importance such as IIT, NIT etc. for qualification improvement. Team of 206 faculty members with average experience 11.7 years and average age 38.3 years indicates teachers with fine blend of experience and youth. Faculty members are well conversant and trained for use of latest softwares and latest equipments being purchased every year as policy of upgrading laboratories. In last five years college has invested Rs. 119.95 million in laboratory upgradation. Institute organized 138 number of continuing education programmes in last five years to keep sharpen skills of faculty members. Further, 1389 faculty members were deputed to attend various workshops and training programmes for sharing and enhancing their knowledge. Faculty members also play active role in curriculum development as Member of Board of Studies of various subjects and other statutory bodies of the University.

The research quality is indicative of the university penchant for quality. The research publications in reputed international and national refereed journals and conferences have shown a steady and significant rise over the years which is aptly reflected by 1091 Research papers publications in reputed national and international journals in last five years. Grant

of Rs. 152.73 Lakhs from funding agencies such as UGC, DST, DRDO, AICTE etc. fetched by faculty members is strong indicator of research aptitude of faculty members. Seed money up to Rs. 3 lakhs under Institutionally Funded Research Programme (IFRP) nurtures research aptitude of faculty members. 575 number of publications in standard research databases such as SCOPUS, Web of Science, Google Scholar etc. in last five years throws light on quality of publications by faculty members of this institute. These publications by faculty members have received 137 number of citations in the same period. Institute has 02 patents to its credit and filed 05 patents.

The institute has collaboration with international universities such as North Carolina A & T State University, Greensboro, USA, Joint School of Nanoscience and Nanoengineering (JSNN), USA, The University of Tokushima, Japan, ARM University, USA and with industries such as TCS, SKF India Ltd. Every year one faculty member is deputed for Ph. D. programme in NCAT with scholarship. Students of M. Tech. (Nanotechnology) joins JSNN, USA to pursue their dissertation research work for six months with scholarship to the tune of \$1000 per month. Further, NCAT, USA, The University of Tokushima, Japan contributes intellectually as well as financially to organize biannual international conference NANOCON. Three editions of NANOCON are conducted since 2010 with their association. In association with Eduvance & GAATsis, a "Center of Excellence in Embedded Systems" is established in the Institute with donation of Educational kits like ARM development boards from ARM University Program and PSoC kits by Cypress Semiconductors are used for developing projects in the sponsored laboratory. TCS supports students and faculty members for faculty enablement programmes and student development programme. Establishment of Lubricant Conditioning Monitoring Laboratory is outcome of collaboration with SKF India Ltd.

Being Deemed University college takes advantage of academic autonomy in making the curriculum industry oriented and enable students to make employable. In-plant training (45 days), courses such as Professional Skill Development introduced as integrated part of course structure. In-plant training enable students to interact within their associated industries for gaining practical field experience and professional exposure. Curriculum is Choice Based Credit System which makes students path of joining international universities for their higher studies smoother.

Today, qualitative soft skill development in students is more pertinent to a student's professional career. The institute regularly arranges training programme in the area of personality development, aptitude test, group discussion and personal interview. Through its Employment Enhancement Programme (EEP) designed for third year students which comprises of communication skill quantities analysis, corporate culture, IT Training and soft skills. This programme is conducted in association with professional institutes of national repute for effective execution and implementation. To enhance their professional experience and get them head start in the industry, an innovative programme is initiated on student mentoring "Saturday @ BV", wherein speakers are entrepreneurs and high ranked corporate who share their experiences, hardship and their corporate journey.

In it's long, multi-pronged, persistent and pain staking efforts for producing quality engineering professionals, institute has produced more than 1068 entrepreneurs.

PROGRAMME: CIVIL ENGINEERING

Vision:

To Create Civil Engineers who will transform Civil Engineering Industry for sustainable development of society.

Mission:

Create responsible Civil Engineers to meet global challenges.

Programme Education Objectives (PEO)

PEO1: To prepare students for career in Civil Engineering profession.

PEO2: To develop a responsible 'Entrepreneur'.

PEO3: To develop the student to cope up with the advancements in Civil

Engineering.

Program Outcomes (PO)

The Graduates will be able to

- 1. apply possessed knowledge of fundamental subjects to Civil Engineering problems.
- 2. analyze Civil Engineering problems.
- 3. design Civil Engineering structures with appropriate consideration to safety, economy, health and environmental considerations.
- $4. \hspace{0.5cm} \hbox{solve complex civil engineering problems by conducting investigations.} \\$
- 5. use modern civil engineering tools, techniques and softwares.
- 6. apply their professional responsibilities.
- 7. understand the impact of professional engineering solutions in societal and environmental contexts.
- 8. exhibit professional ethics and norms of engineering practice.
- 9. function individually and in teamwork.
- 10. communicate effectively in both verbal and written forms.
- 11. manage the work and finance of a Civil Engineering projects.
- 12. practice the use of lifelong learning.

15: BUILDING PLANNING DESIGN AND BYELAWS

TEACHING SCHEME:

CREDITS ALLOTED

Theory: 3 Hours/ Week Practical: 2 Hours/ Week

Theory: 03 Credits

TermWork: 01 Credit

Course Pre-requsites

The Student Should have knowledge of

- 1 Fundamentals of Civil Engineering
- 2 Building Construction Practices

Course Objective

To make the student understand the process of building planning and building byelaws

Course Outcomes

Student will be able to

- describe various types of buildings, their planning and building byelaws.
- 2 apply design considerations for climate, ventilation and lighting in building planning.
- 3 apply design considerations for Noise & acoustics, fire protection, Electrical & telecommunication and circulation in building planning.
- 4 apply design considerations for plumbing services in building planning.
- 5 explain the legal aspects of plan sanctioning.
- 6 explain the role of town planning authority and various presentation drawings.

Unit -I (06 Hours)

Buildings, Types, Planning and Regulations

Types of Residential Building units – Bungalows, Twin bungalows, Row houses, Apartments; Requirements of Public buildings - Educational buildings, buildings for health care, industrial buildings and commercial buildings; Principles of planning for building, Integrated approach necessity. Building Rules Regulations and Byelaws necessity, plot size, open space around the building. FSI, Building line, control line. Height, room size, Built up area, floor area, carpet area. Rules of lighting ventilation, Drainage and Sanitation; Types of drawings - Submission drawings, working drawings and Architectural drawing.

Unit II (06 Hours)

Building Services I

- (a) Climate elements of climate, global climate, thermal design Principles, comfort sectors, Heat exchange of building. Thermal insulation of roof and wall.
- (b) Ventilation and lighting comfort factors, function of ventilation, stack effect wind effect. Mechanical ventilation, ventilation rate, Air conditioning-design data, cooling load, Air conditioning systems.
- (c) Noise and acoustics –Effect of noise, comfort standards, Noise control sound insulation, Acoustics reverberation Sabines formula acoustical defects conditions of good acoustics.

Unit III (06 Hours)

Building Services II

- (a) Plumbing services, fixtures and fastenings, Layout of water supply & drainage system, Rate of water supply, storage and distribution arrangement, Plumbing systems,
- (b) Fire Protection Fire safety, fire load, grading of occupancies by fire load, fire escape elements.

(c) Constructional requirements for different building services like Electrical, Telecommunication services, Circulation-Lift escalators, Entertainment services.

Unit IV (06 Hours)

New Planning Concepts of Buildings

Layout plans of different types of buildings, Design and planning of ECO Friendly building, Intelligent building, Low Cost Housing, Planning considerations in High rise buildings.

Unit V (06 Hours)

Legal Aspects of Plan Sanctioning

Role of Plan Sanctioning Authority for layout, co-op Housing societies and apartments. Ownership of land, plot, 7/12 abstract, meanings of different terms of 7/12 abstract, 6-D form, list of documents to be submitted along with building Plan for sanction from the authority. TDR, certificate of commencement and completion, various no objection certificates to be produced, format of permissions from pollution control board, MSEB, Water Supply and Drainage Department, State or National Highway Department.

Unit VI (06 Hours)

Town Planning and Presentation drawings

- (a) Necessity of town planning in India. Importance of safety, amenities and services, Development plan, Land use- zoning: Introduction to different zones of land in town planning, Requirements of residential zone, commercial industrial and agricultural zone, open areas, green belts and parks.
- b) Axonometric, Perceptive-One point and Two point.

Term work shall consist of:

 Preparation of working drawings of any one of the buildings listed below:

- a) Residential Building
- b) Commercial Building
- c) Educational Building
- d) Industrial Building
- e) Recreational Building
- f) Health Club
- 2. Sheets to be drawn
 - a) Plan/Typical floor plan to a suitable scale.
 - b) Elevation and section to a suitable scale.
 - c) Site plan showing water supply and Drainage
 - d) Foundation Plan to a suitable scale.
- 3. Line plan of remaining five buildings from 1.
- 4. Perspective Drawing of different objects.

Assignments

- 1 Study of building bye laws and D.C. rules of local authority
- 2 Study of different types of drawings.
- 3 Data collection with respect to climate, ventilation and lighting in building planning.
- 4 Study of various components of water supply and drainage system of buildings.
- 5 Case studies with respect to fire fighting of high rise building.
- 6 Case studies with respect to lift and escalators.
- 7 Constructional requirements with respect to electrical services in buildings.
- 8 Case studies of Ecofriendly and intelligent buildings.
- 9 Collecting information about legal aspects of building planning.
- 10 Writing report on development plan.

Text Books

1. Bindra Arora, "Building Construction", Laxmi Publication

- 2. M. L. Shah, C. M. Kale, S. Y. Patki, "Building Drawing with integrated approach to Built Environment", Tata McGraw Hill Publishers
- 3. Rangwala, "Town Planning", Charaotar Publications

References Books:

- 1. IS provisions "National Building Code"
- 2. "Development Control Rules" of local plan sanctioning authority
- 3. Calendar, "Time Saver Standards for Architectural Design", Tata McGraw Hill Publishers
- 4. Merit, "Building Design and Construction", Tata McGraw Hill Publishers

Syllabus for Unit Test

Unit Test I Unit I, II, III
Unit Test II Unit IV, V, VI

B.TECH (CIVIL) - SEM-III

16: APPLIED GEOLOGY

TEACHING SCHEME

CREDITS ALLOTTEDTheory: 03 Credits

Theory: 03 Hours / Week
Practical: 02 Hours / Week

Termwork: 01 Credit

Course Pre-requisites

The Students should have basic knowledge of

1. Engineering sciences

Course Objectives

To make students understand physical geology, mineralogy, petrology, structural & Indian geology, surface & sub surface water, geological investigation for tunnel, dam, reservoir & bridge

Course Outcomes

Students will be able to

- 1. explain Geology of Mountain earthquakes & volcanism to decide the location ,type of foundation and type of civil engineering structure
- 2. identify different rocks & minerals.
- 3. identify different Geological structures to decide location and type of civil engineering structure.
- 4 determine influence of texture & structures of rocks on occurance of Ground water and Geology of river
- 5 explain surface and sunsurface investigation for tunnels.
- 6 explain geological aspects at Dams, Reservoir and Bridges.

UNIT - I (06 Hours)

Physical Geology & Introduction to Engineering Geology

Origin of Earth, Surface Relief of the earth, Earth Movement, Earthquake, Interior of the Earth, Volcanocity: Product of Volcanoes, types of mountains, Different Branches of Geology, Engineering Geology as a Subject.

UNIT - II (06 Hours)

Mineralogy and Petrology

Mineralogy: Formation Process of Minerals, Types of Minerals, Classification of Minerals.

Petrology- Rocks & minerals, Igneous rocks- mineral composition, texture, classification of igneous rock, study of common rock types, secondary rocks-weathering, texture & structure of sedimentary rocks & its classification, metamorphic rocks, agents & types of metamorphism, metamorphic textures Building stones.

UNIT - III (06 Hours)

Structural Geology & Indian Geology

Structural Geology- Outcrop, dip & strike, conformable series, unconformity & overlap, faults & folds in rocks, mode of occurrence of igneous rocks, joints & fractures.

Indian Geology- General Principles of stratigraphy, age of the earth & divisions of geological time, physiographic divisions of India & their characteristics, geological history of peninsula, study of formation in peninsula.

UNIT - IV (06 Hours)

Water: Surface & Sub Surface

Surface Water: Geological action of running water, river valley development, normal & regional cycle of river erosion, waterfalls, ox-bow lakes, flood plane deposits, deltas, rejuvenation & resulting features,.

Sub - Surface Water: Types of Groundwater, depth zones of groundwater, perched water table, pervious & impervious rocks, geological work done by groundwater, natural springs & seepages, effect of pumping, cone of depression, circle of influence, conservation of groundwater, artesian wells, water bearing capacity of common rocks.

UNIT - V (06 Hours)

Geological Investigations

Preliminary geological investigations- use of geological maps & sections, drill holes, test pits, trenches, exploratory tunnels, shafts, adits, drifts etc., limitation of drilling, engineering significance of geological structures,

Tunneling- Influence of geological condition on design & construction method, preliminary geological investigations for tunnels, important geological considerations while choosing alignment, difficulties during tunneling, as related with lithology, nature & structure of materials to be excavated, role of groundwater, geological conditions likely to be troublesome, suitability of common rock types for tunneling, case studies.

UNIT - VI (06 Hours)

Geological Aspects at Dams, Reservoirs & Bridges

Geology of dam site- preliminary geological work at dam site, influence of geological condition on the choice of types & design of dam, favourable & unsuitable geological conditions for locating a dam i.e. landslide, treatment of leaky rocks & geological structures, case studies.

Geology of reservoir sites- Dependence of water tightness on physical properties & structures of rocks, geological conditions suitable & unsuitable for reservoir sites, conditions likely to cause leakage through reservoir rim, importance of groundwater studies & effect of rising of water table, case studies.

Geology of Bridge Sites- Preliminary geological exploration for bridge piers & bridge abutments, scouring & erosion around bridge piers, influence of nature & structure of rocks on bridge foundation, case studies.

List of Practical's / Term work

- 1) Identification of the Minerals (Two Practical)
- 2) Identification of Igneous rocks (One Practical)
- 3) Identification of Secondary rocks (One Practical)
- 4) Identification of Metamorphic rocks (One Practical)

- 5) Study of Contoured Geological Maps & drawing the sections (Five Practical)
- 6) Visit to site of Dam / Tunnel for understanding the geological features.

List of assignment:

- 1. Assignment on Earthquakes, Volcanoes and interior of Earth.
- 2. Assignment on Minerals and rocks.
- 3. Assignment on folds and faults.
- 4. Assignment on geological work of river and ground water.
- 5. Assignment on surface & sub-surface investigations.
- 6. Assignment on Engineering Geological study of Dams & bridges.
- 7. Asssignment on Good Building stones.
- 8. Assignment on rejernation of river.

Reference Books:

- Gupte R. B., "A Text Book of Engineering Geology", P. V. G. Publications, Pune
- 2) Legget R., "Geology and Engineering", McGraw Hill Book Co., London
- 3) Trefethen J. M., "Geology for Engineers", D Van Nostrand Co. Inc.
- 4) Schultz J. R. and A. B. Cleaves, "Geology in Engineering", John Wiley Inc.
- 5) Engineering Geology & General Geology by Parbin Singh.
- 6) General Geology & Engineering Geology by Dr. P. T. Sawant, New Delhi Publication.

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B.TECH (CIVIL) - SEM-III

17: ENGINEERING ECONOMICS AND FINANCIAL ACCOUNTING

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 03 Hours / Week Theory: 03 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Basic concept of Civil Engineering
- 2. Basics of Mathematics

Course Objectives

To make students understand Engineering Economics and Financial Management

Course Outcomes

Student will be able to

- 1. draw organization chart.
- 2. find out time value of money.
- 3. select best project.
- 4 find out depreciation cost.
- 5 prepare balance sheet.
- 6 generate finance for his organization.

UNIT - I (06 Hours)

Elementary Economics

Definition of Economics, nature, scope and importance of Engineering economics, basic economics concept-Human wants. Utility, value, cost, price, profit, capital, wealth, equilibrium etc. law of demand, elasticity of demand. The law of supply. Factors influencing production: land, labor, capital and organization.

UNIT - II (06 Hours)

Engineering Economics.

Basic principles, time value of money, cash flow diagram. Equivalence-single payment in the future, present payment compare to uniform series payment. Future payment compare to uniform series payment.

UNIT - III (06 Hours)

Project Economics Analysis

Comparison of alternatives, net present value present, future and annual worth method of comparing alternatives, internal rate of return. Break even analysis. Benefit cost ratio

UNIT - IV (06 Hours)

Depreciation and Value Engineering.

Depreciation and methods of depreciations. Inflation, value engineering and value analysis.

UNIT - V (06 Hours)

Finance Management

Financial management, construction accountancy charts of accounts, financial statement, profit and loss account, balance sheet, insurance audits and financial risk aspects

UNIT - VI (06 Hours)

Project Budgeting

Types of capitals, fix and working capital, debentures, shares, public deposits. Forms of foreign capital, money and capital market in India. New economical policy. Role of financial institutions in economical development, RBI government of India guidelines for foreign funding in construction projects.

Assignments:

- 1. Scope and importance of Engineering Economics.
- Numericals on time value of money.
- $3. \qquad \hbox{Numericals on Economic analysis of project by different methods}.$
- 4. Break Even Analysis.
- 5 Methods of depreciation and value analysis.
- Preparation of Balance Sheet.
- 7. Investments in Infrastracture development Capital.

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B.TECH (CIVIL) - SEM-III

18: MECHANICS OF SOLIDS

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 04 Hours / Week Theory: 04 Credits

Course Pre-requisites

The Students should have knowledge of "Engineering Mechanics".

Course Objectives

To make student able to calculate stresses developed in the material.

Course Outcomes

The student should be able to

- 1. calculate stresses due to axial force.
- 2. Calculate shear force and bending moment in the beam.
- 3. Calculate deflection and bending stress in the beam.
- 4 Calculate shear stress due to shear force and torsion.
- 5 Calculate critical load for column.
- 6 Calculate principal stresses.

UNIT - I (08 Hours)

Simple Stresses and strains

Concept of stress and strain: Normal, lateral, shear and volumetric stresses and strains, Stress-strain curve; Elastic constants and their inter relationship; Generalized Hooke's law;

Stresses due to Axial Load and Temperature: Axial force diagram; Stresses, strains and deformation of determinate and indeterminate bars of prismatic, homogenous and composite cross section.

UNIT - II (08 Hours)

Shear Force and Bending Moment in Beams

Concept of Shear Force and Bending Moment; Relation between Shear Force, Bending Moment and intensity of loading; Shear Force Diagram and Bending Moment Diagram of determinate beams due to concentrated load, uniformly distributed load, uniformly varying load and moments;

UNIT - III (08 Hours)

Deflection of beam and bending stresses

Deflection of Beams: Concept of relation between deflection, slope, bending moment, shear force and intensity of loading; Macaulay's method, Elastic curve.

Flexural Stresses: Theory and assumptions of pure bending; Moment of resistance; flexural formula; Flexural rigidity; Modulus of rupture; Flexural stress distribution diagram for various sections; Force resisted by partial cross section.

UNIT - IV (08 Hours)

Shear Stresses

Shear Stresses: Concept of direct and transverse shear; Shear stress formula; concept of complementary shear stress; Shear stress distribution diagram for symmetrical and unsymmetrical section.

Torsion of Circular Shafts: Theory, assumptions and derivation of torsional formula; Shear stress distribution across cross section; Twisting moment diagram; Shear stresses and strains in determinate and indeterminate shafts of hollow, solid, homogeneous and composite cross sections subjected to twisting moment; Torsional rigidity.

UNIT - V (08 Hours)

Combined stresses and axially loaded column

Combined Axial and Bending Stress: Concept; Resultant stress due to the axial load and uni-axial or biaxial bending; Core of section.

Axially Loaded Long Columns

Concept of critical load and buckling; Differential equation of elastic curve; Euler's formula for hinged ends; Equivalent length for different end conditions; Limitation of Euler's formula; Rankine's formula.

UNIT - VI (08 Hours)

Principal Stresses and Principal Planes

Normal and shear stresses on any oblique plane. Concept of principal stresses and principal planes. Maximum shear stress; Analytical and graphical method. (Mohr's circle method); Combined effect of axial force, bending moment, shear force and torsion.

Assignments:

- 1. Assignment on Stress & Strain recent three years of BVU question papers.
- 2. Assignment on S.F.D & B.M.D problems on plates (Three various types of problems).
- 3. Assignment on Macaulay's method problems.
- 4. Assignment on Shear stress & Torsion problems of various problems.
- 5. Assignment on Column (Eulers & Rankine's) Problems.
- 6. Assignment on Mohr's circle method (Graphical & Analytical Methods)
- 7. Assignment on Deflection of beam (Types)
- 8. Assignment on Bending stresses.

Text Books

R. C. Hibbeler, "Mechanics of Materials", Pearson Prentice Hall,

Rajput R. K., "Strength of Materials", S. Chand Publication

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B.TECH (CIVIL) - SEM-III

19:CONCRETE TECHNOLOGY

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 03 Hrs / Week Theory: 03 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Fundamentals of Civil Engineering
- 2. Engineering Chemistry

Course Objectives

To make student to know qualities & properties of concrete.

Course Outcomes

The student will be able to

- 1. Tests Ingredients of concrete.
- 2. Measure Workability of concrete.
- 3. Measure strength of concrete.
- 4. Design concrete Mix.
- 5. Measure Durability of concrete.

UNIT - I (06 Hours)

Ingredients of Concrete:

Cement: Manufacture of Portland cement, Chemical Composition, Bogues compounds, Hydration of cement, Structure of Hydrated cement, ASTM classification and types of cement, Tests of cement and I.S. requirements for ordinary Portland cement.

Aggregates: Classification, Properties of aggregates, Deleterious materials, Soundness, Alkali-Aggregate Reaction, Grading of aggregates, Standard Grading curves, Testing of aggregates, Artificial & recycled aggregates. Water: Quality of water IS requirements, Use of sea water.

UNIT - II (06 Hours)

Fresh Concrete

Workability: Factors affecting workability, Measurements of workability, Suitability of concrete based on degree of workability, Segregation, bleeding.

Concreting Process: batching, mixing, transporting, placing and compaction. Curing of Concrete: Methods of curing (study of machinery not expected), Effect of temperature on curing, Steam curing, curing compounds, period for curing, stripping time.

UNIT - III (06 Hours)

Hardened Concrete:

Properties of Hardened concrete

Strength of Concrete: General, Compressive strength, Factors affecting strength, Maturity Concept, Tensile strength, Relation between compressive and tensile strength, Flexural strength, Testing under central and third point loading, Shear strength, Bond strength, Elasticity, Creep and Shrinkage: Stress-Strain relation, Modulus of Elasticity, Creep-time curve.

Non Destructive Testing: Schmidth's Rebound hammer, Ultrasonic Pulse velocity method.

UNIT - IV (06 Hours)

Concrete Mix Design

Concept of mix design, Variables in mix design, Statistical Quality Control, Various methods of mix design, Design of mix by Indian Standard recommended method (IS: 10262 & IS: 456), Acceptance criteria.

UNIT - V (06 Hours)

Admixtures in Concrete

Purpose and functions, Classification, Chemical Admixtures: Plasticizers, Super-Plasticizer, Retarders, Air entraining agents, Compatibility of admixtures and cement, Marsh Cone Test.

Mineral Pozzolanic/Admixtures:- Fly ash, Silica flume.

Self Compacting Concrete, Roller Compacted Concrete, Ready mix concrete; High Performance Concrete.

UNIT - VI (06 Hours)

Special Concrete and Durability of Concrete

Special Concrete: Light weight concrete, Polymer Concrete, Fiber reinforced concrete, Ferro-cement.

Special Concreting: Under water concreting, Cold weather concreting.

Durability of Concrete: Definition, Significance, Strength and durability relationship; Permeability, Chemical attack; Sulphate attack; Chloride attack, attack by sea water, Carbonation and measurement of depth of carbonation, Requirement for durability as per IS 456.

Assignments:

- 1. Assignment based on ingredients of concrete.
- 2. Assignment based on properties of concrete.
- 3. Assignment based on properties of aggregates.
- 4. Assignment based on testing of fresh concrete.
- 5. Assignment based on testing of hardened concrete concrete.
- 6. Assignment problem based on concrete mix design.
- 7. Assignment based on admixtures of concrete.
- 8. Assignment based on special concrete.

Text Books

- 1) Gambhir M. L., "Concrete Technology", Tata McGraw Hill Publication
- 2) Shetty M. S., "Concrete Technology", S. Chand & Company Ltd.

Reference Books

- 1) Neville A. M. & Brooks J. J., "Concrete Technology", Pearson Education Publication
- 2) Neville A. M., "Properties of Concrete", ELBS & Longman Publication

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III Unit Test -2 UNIT – IV, V, VI

B.TECH (CIVIL) - SEM-III

20: PROFESSIONAL SKILL DEVELOPMENT III

TEACHING SCHEME

CREDITS ALLOTED

Theory: 4 Hours / Week Theory: 4 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Basic math's and reasoning, the rules of English and comprehensive ability
- 2. Basic awareness of phrasal verbs used in spoken communication and knowledge of verbs and other words used in professional life.
- 3. Basic writing techniques taught to them in the first semester.
- 4. The strengths and achievements analyzed during self awareness session taught in the second semester. They should also be able to identify their long term and short term goals.
- 5. Basic knowledge and idea about leaders and leadership qualities.
- 6. Basic awareness of PowerPoint presentation and paper presentation and also should be fluent in English.

Course Objectives

The Professional Skills Development course which is a combination of aptitude and soft skills aims to augment students to face the campus recruitment test and train them on applying short techniques/ tricks to solve questions of Maths, reasoning and English in very less amount of time. The English and soft skills section focuses on the higher aspects of soft skills such as grooming them on leadership, presentation, business communication which would enable them to project themselves as professionals in the corporate sector and/or otherwise.

Course Outcomes

The student will be able to

- Solve the aptitude test in the recruitment exam and competitive exam by applying short techniques and solve the question in less amount of time. They would be able to handle around 15-20 topics of math's and reasoning and 50 rules of parts of speech.
- 2. Present themselves with finesse by using around 25-20 idioms and phrases relevant to corporate communication as well as spoken English. They will also learn 50-60 words and other words that are specifically used in meetings, group discussions, presentation and other corporate events.
- Process their ideas and thoughts (verbal communication) into written communication in an effective, coherent and logical manner within a stipulated time and specific word limit of 500-750 words for essay writing along with limited words for technical writing and report writing.
- 4. Identify themselves in terms of their strengths. Weaknesses and opportunities available to them for the career growth. They would also learn to overcome their weakness and convert into strengths and also make utilization of the opportunity vis-à-vis their strength. They would also learn to set realistic short/long term goals relevant to them through the SMART goal mnemonic.
- 5. Differentiate between the different types of leaders and groom themselves to be potential leaders. Based on their qualities and strengths they would learn 5 types of leadership styles and mould themselves according to that. They would also learn 10-15 leadership traits.
- 6. Prepare PowerPoint presentation and paper presentation effectively by focusing on body language, tone of communication and audiences' needs. They would also learn to handle the questions in an effective and smart way.

Unit I (18 Hours)

Aptitude (Maths, Logical Reasoning, English)

- Maths
 - > Enjoy maths + Number system
 - Number system
 - > Percentage, profit and loss
- Logical Reasoning
 - > Coding, Decoding, Number series,
 - > Blood relation Directions, cubes & dices
- English
 - > Vocabulary-1
 - Confusing words-1(Homonyms)

Unit II (06 Hours)

Essential Grammar - III

- Idioms and phrases
- Usage of Idioms & phrases in daily conversation
- Activities
- Academic word list- Words to be used in business communication

Unit III (04 Hours)

Written Communication- II

- Essay writing
- Mnemonics to develop ideas and write essays
- Structure of essays
- Technical writing
- Report writing

Unit IV (06 Hours)

SWOT Analysis

- Introduction to SWOT
- Importance to SWOT
- Individual & Organizational SWOT Analysis
- Identifying strengths, weaknesses, threats & opportunities
- Short term goals& Long term goals, Career planning

Unit V (04 Hours)

Interpersonal Skills - III

- Introduction to leadership skills
- Importance of leadership skills
- Types of leadership skills
- Are leaders born or made?

Unit VI (04 Hours)

Presentation Skills

- Introduction to PowerPoint presentation
- Structure & flow of presentation
- Importance of body language
- Presentation by students-evaluation& feedback by trainers

Text Books

- 1. APAART: Verbal Ability
- 2. APAART: Logical Reasoning
- 3. APAART: Quantitative Aptitude
- 4. APAART: Speak Well 1 (English Language and Communication)
- 5. APAART: Speak Well 2 (Soft Skills)

B.TECH (CIVIL) - SEM-III

21: COMPUTER APPLICATIONS IN CIVIL ENGINEERING - II

TEACHING SCHEME

CREDITS ALLOTTED

Theory: --

Practical: 02 Hours / Week

Termwork: 01 Credit

Course Pre-requisites

The Students should have knowledge of

- 1. basic building aspects.
- 2. various building components.
- 3. various building symbols.

Course Objectives

To make student capable of drawing any kind of Engineering drawing using AutoCAD.

Course Outcomes

The students will be able to

- 1. draw various Engineering drawing using AutoCAD.
- 2. draw various elements of a building.
- 3. draw various elevation and sections of the building.

CIVIL ENGINEERING SCOPE AND APPLICATIONS II

- Introduction.
- Getting Started.
- Learning commands: Draw and Modify Menu.
- Learning commands through drawings.
- Centerline drawings
- Layers / Filters

- Blocks
- Area Command
- Drawing Presentation :Sheet size and Text Format

Term Work

- 1) Introduction to the software: Tool bars, Symbols and Various Commands.
- 2) Drawing Plates (minimum 10 in number)
- 3) Drawing Plan, Elevation and Section of G+1 Building.

Text Books

AutoCAD users Guide

B.TECH (CIVIL) - SEM-III

22: TESTING OF MATERIALS

TEACHING SCHEME

CREDITS ALLOTTED

Practical: 02 Hours / Week Termwork: 01 Credit

Course Pre-requisites

The Students should have knowledge of

1. Engineering Mechanics

Course Objectives

To make student capable to test quality of the materials.

Course Outcomes

The student should be able to decide quality of materials by performing tests on - $\,$

- 1. Metals
- 2. Cement
- 3. Aggregate
- 4. Concrete

Course Contents

The term work shall consist of minimum TWELVE experiments from list below.

Metal: (min Four)

- 1 Tension Test Mild steel, Tor steel
- 2 Torsion test- Mild Steel
- 3 Direct Shear test- Mild Steel
- 4 Izod & Charpy Impact test- Mild Steel, Aluminum, Brass, Copper
- 5 Rockwell Hardness test- Mild Steel, Aluminum, Brass, Copper

Cement: (min Two)

- 6 Standard consistency and Setting time test on cement
- 7 Fineness test on Cement
- 8 Compressive strength of Cement
- 9 Soundness test on Cement

Aggregate: (min Two)

- 10 Specific gravity of Aggregates
- 11 Fineness Modulus of Aggregate
- 12 Aggregate Impact Value
- 13 Aggregate Crushing Value

Concrete (min Four)

- 14 Workability of Concrete & effect of admixture.
- 15 Compressive strength of Concrete
- 16 Flexural Test of Concrete
- 17 Split Tensile strength of Concrete
- 18 Non Destructive Test on concrete –Schmidth's Rebound hammer test
- 19 Bending test Timber
- 20 Compressive Strength test- Bricks

B.TECH (CIVIL) - SEM-IV

23: ENGINEERING MATHEMATICS - III

Teaching Scheme

Credits Allotted

Lectures: 4 hrs./week

Theory: 04 credits

Course Prerequisite

Students should have basic knowledge of:

- 1. Differential calculus
- 2. Integral calculus
- 3. Basics of statistics
- 4. Basics of Probability

Course Objective

To develop ability to use the mathematical and statistical techniques, skills, and tools necessary for engineering practice.

Course Outcome

- To develop ability to understand mathematical modeling of systems using differential equations and ability to solve the differential equations.
- To develop ability to use the concept of Vector differentiation and integration that finds applications in solid mechanics, fluid flow, heat problems and potential theory etc.
- To develop an ability to analyze the numerical data by applying statistical methods.
- To develop an ability to solve system of linear equation and ordinary differential equation by numerical methods.
- To develop an ability to understand mathematical modeling of systems using partial differential equations and ability to solve the partial differential equations

Unit I (08 Hours)

Linear Differential Equations (LDE)

Solution of nth order LDE with Constant Coefficients, Method of Variation of Parameters, Cauchy's & Legendre's Differential Equitation, Solution of Simultaneous & Symmetric Simultaneous Differential Equitation.

Unit II (08 Hours)

Applications of Differential Equitation (DE)

Modeling of problems on bending of beams, whirling of shafts and mass spring systems. Solution of Partial Differential Equations (PDE): by separating variables only.

$$1)\frac{\partial u}{\partial t} = a^2 \frac{\partial^2 u}{\partial x^2},$$

$$2)\frac{\partial^2 u}{\partial t^2} = a^2 \frac{\partial^2 u}{\partial x^2},$$

$$3)\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} = 0$$

Applications of PDE to problems of Civil and allied engineering.

Unit III (08 Hours)

Numerical Methods

Numerical solutions of (i) System of Linear Equations by Gauss Elimination, Cholesky and Gauss-Seidel methods (ii) Ordinary Differential Equations by Euler's, Modified Euler's,

Runge-Kutta 4th order and Predictor-Corrector methods.

Unit IV (08 Hours)

Statistics and Probability

Measures of Central Tendency, Standard Deviation, Coefficient of Variation, Moments, Skewness and Kurtosis, Correlation and Regression, Reliability of Regression Estimates.

Theorems and Properties of Probability, Probability Density Function, Probability Distributions: Binomial, Poisson, Normal and Hypergometric; Test of Hypothesis: Chi-Square test.

Unit V (08 Hours)

Vector Differential Calculus

Physical Interpretation of Vector Differentiation, Vector Differential Operator, Gradient, Divergence and Curl, Directional Derivative, Solenoidal, Irrotational and Conservative Fields, Scalar Potential, Vector Identities

Unit VI (08 Hours)

Vector Integral Calculus

Line, Surface and Volume integrals, Work-done, Green's Lemma, Gauss's Divergence Theorem, Stoke's Theorem. Applications to problems in Fluid Mechanics, Continuity equations, Stream lines, Equations of motion, Bernoulli's equations.

Assignments

- 1. Linear differential equation with constants coefficients.
- 2. Application of LDE and partial differential equations.
- 3. Numerical methods to solve system of algebraic equation and ordinary differential equation.
- 4. Statistical methods and probability distribution.
- 5. Vector identities and application of vector differential in mechanics.
- 6. line integral, surface integral and volume integral.
- 7. Collect and Solve recent 3 Qustion Papers of BVU.

Text Books

- 1. Peter V. O'Neil Advanced Engineering Mathematics (Cengage Learning).
- 2. Erwin Kreyszig Advanced Engineering Mathematics (Wiley Eastern Ltd.)

Reference Books

- 1. B.V. Raman, Engineering Mathematics by (Tata McGraw-Hill).
- 2. M. D. Greenberg, Advanced Engineering Mathematics, 2e, by (Pearson Education).
- 3. Wylie C.R. & Barrett L.C., Advanced Engineering Mathematics, (McGraw-Hill, Inc.)
- 4. B. S. Grewal, Higher Engineering Mathematics (Khanna Publication, Delhi).
- 5. P. N. Wartikar & J. N. Wartikar, Applied Mathematics (Volumes I and II) (Pune Vidyarthi Griha Prakashan, Pune).
- 6. Thomas L. Harman, James Dabney and Norman Richert Advanced Engineering Mathematics with MATLAB, 2e, (Brooks/Cole, Thomson Learning).

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT - IV, V, VI

B.TECH (CIVIL) - SEM-IV

24: SURVEYING

TEACHING SCHEME CREDITS ALLOTED

Theory : 3 Hrs/ Week Theory : 03 Credits
Practical : 4 Hrs/ Week Theory : 02 Credit

Course Pre-requisites

The Student Should have knowledge of

- 1. Basic concept of civil engineering.
- 2. Basics of mathematics and Geometry.

Course Objective

To make students understand use of various instruments and process of surveying and levelling.

Course Outcomes

The student will be able to

- 1. Explain the use of linear measurements and prismatic compass in surveying.
- 2. Describe the process of vertical measurements and contouring and calculate reduced levels.
- 3. Describe the use of vernier theodolite for angular measurements and calculate coordinates of traverse stations.
- 4. Calculate omitted measurements in traverse survey and describe permanent adjustments of theodolite.
- 5. Explain various methods of setting out curves and describe field procedure of curve setting.
- 6. Explain use of plane table and minor instruments in surveying.

UNIT - I (06 Hours)

Linear measurement and Compass survey

Introduction to land surveying, linear measurements, Tapes and EDM-Construction, working and principle, Direct and Indirect methods of linear

measurement and ranging, types of tapes, , locating details with offsets by swinging tape, open cross staff and laser square method, concept of scale, R.F. maps and plan. Study and use of topo sheets.

Compass survey: Types of bearing and meridian other than magnetic meridian, local attraction and correction of local attraction, dip, declination, reduction of true bearings, adjustment of closing error.

UNIT - II (06 Hours)

Vertical measurements and contouring.

Instruments for vertical measurement-dumpy level, auto level, laser level and digital level. Principle axes of dumpy level, temporary and permanent adjustment, simple, compound and reciprocal levelling, curvature and refraction corrections, distance to the visible horizon.

Contouring: Direct and indirect methods of contouring, uses of contour maps, profile levelling and cross sectioning and their applications, reduction of volume from contour map and tracing grade contour.

UNIT - III (06 Hours)

Theodolite and traversing

Study of Vernier transit 20" Theodolite, introduction to digital Theodolite, use of Theodolite for measurement of horizontal angles by repetition and reiteration, vertical angles and magnetic bearing, prolonging a line, lining in and setting out an angle with a Theodolite, plane trigonometrical levelling.

Theodolite traversing: computation of consecutive and independent coordinates, adjustment of closed traverse by transit rule and Bowditch's rule, Gales traverse table.

UNIT - IV (06 Hours)

Omitted measurements, permanent adjustments of transit Theodolite and Tachometry.

Omitted measurements, area calculation by independent co-ordinates, open

traverse and its uses, measurement of deflection angles using transit Theodolite, open traverse survey and checks in open traverse.

Fundamental axes of Theodolite: testing and permanent adjustment of Theodolite

Tachometry: applications and limitations, principle of stadia tachometry, fixed hair method with vertical staff to determine horizontal distances and elevations of points.

UNIT - V (06 Hours)

Curves

Introduction to horizontal and vertical curves, different types and their applications, simple circular curves, elements and setting out by linear methods, offsets from long chord and offsets from chord produced, angular method, Rankin's method of deflection angle.

Transition curves: necessity, types and requirements.

UNIT - VI (06 Hours)

Plane table survey and construction survey.

Equipments required for plane table survey and their uses, methods of plane table survey: radiation, intersection, traversing, and simple resection, errors and precisions in plane table surveying, construction survey- survey for tunnels, drainage line of buildings, and roads. Use of laser based electronic range finder.

Term work

The term work shall consist of Field book containing record of all exercises and project listed below.

- a) Road project showing L-section, plan of road with contours and typical cross section 2-sheets
- b) Theodolite traverse survey project. 1-sheets

List of Practical

Details of practicals to be performed, Exercise projects and assignments

- 1. Linear measurements with tape and accessories.
- 2. Study and use of auto level and double check leveling.
- 3. Compound leveling and fly leveling, calculation by rise and fall method.
- 4. Two peg test for level.
- 5. Study and use of 20" Vernier Theodolite.
- 6. Measurement of horizontal angles of triangle by repetition method and applying check.
- 7. Measurement of vertical angle by transit Theodolite
- 8. Trigonmetrical levelling by transit Theodolite.
 - Project I Road project of minimum length of 250 M including fixing of alignment, profile leveling and cross sectioning.
 - Project II Theodolite traverse survey of closed traverse for minimum 0.5 hectares area including building roads etc.
- 9. Computation of horizontal distance and elevation of points by tachometry for horizontal and inclined sights.
- 10. Introduction and study of outfit of plane table and method of radiation.
- 11. Intersection method of plane table survey.
- 12. Closed plane table traverse survey around a small four sided building.
- 13. Setting out simple circular curve by Rankine's method of deflection angle
- 14. Use of laser based electronic range finder.

Assignments

- 1 Computation of corrected bearings of the traverse by different methods.
- $\label{eq:solving} 2 \qquad \text{Solving problems on calculation of reduced levels by different methods}.$

- 3 Preparing contour map of the area from the given spot levels.
- 4 Study of topographical sheets to record various details shown.
- 5 Solving problems on trigonometrical leveling.
- 6 Computations of independent coordinates of a closed traverse.
- 7 Solving problems on omitted measurements.
- 8 Calculation of reduced level and distance of a point by tacheometry.
- 9 Computation of data required to set out the simple circular curve by Rankine's method .
- 10 Write details of survey for drainage line with proper sketches.

Text Book

- 1 Surveying and Levelling by Vol. I & II-T.P. Kanetkar and S.V. Kulkarni.
- 2 Surveying Vol. I & II by Dr. B.C. Punmia, Ashok K. Jain, Arun K. Jain.
- 3 Surveying for Engineers- John Uren & Bill Price- Palgrave Macmillan
- 4 Plane Surveying A.M. Chandra New age International Publishers
- 5 Surveying and Levelling N. N. Basak, Tata Mc-Graw hill
- 6 Surveying Vol. I & II Dr. K. R. Arora.

Reference Books

- Surveying: Theory and practice---James M. Anderson, Edward M. Mikhail
- 2 Surveying theory and practices---Devise R. E., Foot F.S.
- 3 Plane and Geodetic Surveying for Engineers. Vol. I—David clark.
- 4 Principles of Surveying. Vol. I by J.G. Olliver, J.Clendinning
- 5 Surveying Vol. I & II by S.K.Duggal, Tata Mc-Graw Hill.
- 6 Surveying and Levelling by Subramanian, Oxford University Press.

Syllabus for Unit Test.

Unit Test I Units I, II, III
Unit Test II Units IV, V, VI

B.TECH (CIVIL) - SEM- IV

25: MECHANICS OF FLUIDS

TEACHING SCHEME: CREDITS ALLOTED:

Theory: 3 Hrs/Week Theory: 03 Credits
Practical: 2 Hr/Week Termwork: 01 Credit

Course Pre-requisites:

The Student Should have knowledge of

- 1 Concepts of units and conversion of units
- 2 Mathematics
- 3 Physics

Course Objective

To make student understand the scope and application of Mechanics of Fluids.

Course Outcomes

The students will be able to

- 1 describe basic properties of fluids and measure its properties in static conditions.
- 2 apply knowledge of fluid kinematics and dynamics conditions.
- analyze physical phenomenon dimensionally.
- 4 explain laminar flow and flow through pipes
- 5 explain of boundary layer theory.
- 6 describe turbulent flow.

Unit -I (06 Hours)

Properties of Fluids & Statics:

Scope and application of fluid mechanics, Physical properties of fluids, Newton's Law of Viscosity, Dynamic & Kinematic Viscosity, Classification of fluids.

Statics: Pressure density height relationship & Measurement, Hydrostatic pressure on a plane, Centre of pressure, Buoyancy, Stability of floating bodies, Metacentre and Metacentric height.

Unit II (06 Hours)
Kinematics

Types of flow, path lines and streak lines, stream lines, Stream Tube, Continuity Equation in 1-D and 3-D, Velocity potential, Stream functions, Circulation and Vorticity, Concept and Application of Flow Net.

Unit III (06 Hours)
Kinetics

Derivation of Bernoulli's Equation from Newton's 2nd Law , Limitations, Modified form of Bernoulli's Equation, Total energy and Hydraulic Grade line, , Impulse momentum equation.

Unit IV (06 Hours)

Dimensional Analysis and Model Studies

Dimensional homogeneity, Important dimensionless parameters, Dimensional analysis using Buckingham's π theorem, Model studies, Similitude, Model laws, Types of models.

Unit V (06 Hours)

Fundamental of Pipe Flow &Boundary layer theory

Reynolds experiment, Classification of Flows based on Reynolds Number, Moody's Diagram, Laminar flow in circular pipe, Hagen Poisullies Equation, Introduction to Boundary Layer Theory, Concept of boundary layer, Development of Boundary layer over a flat plate, Laminar and transitional boundary layer, laminar sub layer, General characteristic of boundary layer, Boundary layer thickness, Velocity distributions within boundary layer

Unit VI (06 Hours)

Turbulent flow& Pipe Flow Problems

Characteristics of turbulent flow- Instantaneous velocity, Temporal mean velocity, Scale of turbulence and intensity of turbulence, Darcy- Weisbach equation, Flow through pipes: Energy losses in pipe flow, parallel and series pipes, Equivalent Pipe Concept, Pipe network Analysis, Siphons, Hydraulic transmission through pipes, three reservoir problems.

Term work shall consist of ANY Eight Experiments

Term Work

- 1. Measurement of Viscosity
- 2. Study of Pressure Measuring Devices
- 3. Stability of Floating Bodies
- 4. Verification of Bernoulli's Theorem
- 5. Calibration of Venturimeter
- 6. Calibration of Orifice
- 7. Calibration of Notch
- 8. Study of Laminar flow Using Heleshaw's Apparatus
- 9. Study of Laminar flow Using Reynold's Apparatus

Assignments

- solution of Numerical Problems asked in recent three years of BVU question papers
- 2 solution of Questions asked in recent three years BVU question papers
- 3 report on new topic being discussed in reputed research journals related to fluid mechanics
- 4 mini Projects such as collection of information, Brochure, Data on a topic related to fluid mechanics
- 5 writing of industrial Application of Various Topics of Syllabus
- 6 design of New Experiments related to fluid mechanics

- 7 collection of two fluid mechanics NPTEL videos and demonstration of it.
- 8 collection of information, brochure of new equipments / machinery / materials related to fluid mechanics.
- 9 collection of information about fluid mechanics phenomenon and its explanation.
- 10 collection of data of different fluids with reference to their properties.

Text Books/ References:

- 1. Garde R. J. and Mirajgaonkar "Engineering Fluid Mechanics" ScitechPulication
- 2. Garde R. J. and Mirajgaonkar "Fluid Mechanics Through Problems", New Age International New Delhi
- 3. Modi P.N. and Seth S.M. "Fluid Mechanics" Standard Book House
- 4. Streeter- Wylie,"Fluid Mechanics", TataMcGraw Hill Publication

Syllabus for Unit Test

Unit Test I Unit I, II, III
Unit Test II Unit IV. V. VI

B.TECH (CIVIL) - SEM- IV

26: CONSTRUCTION TECHNIQUES & MACHINERY

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 03 Hours / Week Theory: 03 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Building Construction Practices, Building Planning & Design.
- 2. Engineering Economics.
- 3. Concrete Technology.

Course Objectives

Students should get knowledge of Construction Operation Equipments & different methods of advanced construction techniques, tunneling, concreting & dewatering.

Course Outcomes

Student will be able to

- 1. explain erection techniques for high rise structures.
- $2. \hspace{0.5cm} describe \ different \ construction \ techniques \ in \ underwater \ construction.$
- 3. explain advanced construction techniques.
- 4. describe different Earth moving equipments.
- 5. explain hoisting & hauling equipments.
- 6. describe various dewatering & paving equipments.

UNIT - I (06 Hours)

CONSTRUCTION MECHANISATION & HIGH RISE CONSTRUCTIONS

Role of Construction activity in the National (including Urban & Rural) & Global development. Necessity of mechanization in construction industry. Types of construction such as Light, Medium & Heavy duty. Erection techniques for high rise structures, advantages & disadvantages of high rise structures. Scope of infrastructure in India and provisions made.

UNIT - II (06 Hours)

UNDER WATER CONSTRUCTION

Cofferdams & Caissons – Definition, Classification & its use. Dredging Techniques. Construction under deep water (Tremie Method). Classification & different types of Piles, Sheet Piles, Pile driving techniques, Negative skin friction. Use of special types of Formwork. Jetties.

UNIT - III (06 Hours)

ADVANCED CONSTRUCTION TECHNIQUES

Launching of Girders, Precast Techniques, Tunnel Driving techniques, Tunnel boring machines (Open & Shield), Road Headers & Boomers, Placing of concrete in Hot & Cold weather conditions. Shotcreting & Gunieting. Trenchless Technology, Micro Tunneling. Pneumatic Drilling equipments. Drill & Blast method.

UNIT - IV (06 Hours)

EARTH WORK MACHINERIES

Classification of Earth Moving machines (rippers, dragline, scrappers, pavers, backhoe) & factors affecting in selection. Group behavior of equipments. Manpower requirement for the equipments. Rollers, Tractors, Bull Dozers, Rippers, Draglines & Clamp Shells, Scrappers, Dumpers, Pavers, Power Shovels, Backhoe -: detailed study of these equipments with classification, uses, output, & economics. Excavating, Transporting & compaction equipments. Importance of record keeping of machineries & mode of payment for them.

UNIT - V (06 Hours)

HOISTING & CONVEYING EQUIPMENTS

Hoisting & Transporting equipment; types (Derrick, Tower & Mobile), factors affecting for selection. Conveying equipments-: belt, apron, vibrating, pneumatic, flight & spiral or screw conveyors. Hauling equipments. Crushers & its types.

UNIT - VI (06 Hours)

DEWATERING, PAVING EQUIPMENTS & CONCRETE PUMPS

Dewatering Techniques; Electro-osmosis method, Well Point System. Paving

Equipments; Types, Uses. Asphalt Pavers, Slip Form Pavers, Concrete Pavers. Pumps; Types & Uses. Pumps for concreting.

Assignments:

- 1. Errection Technique for high rise structures.
- 2. Pile driving techniques.
- 3. Tunnel driving shotereting and guniting.
- 4. Study of different types of earth work machinaries. (Case study of any two equipment)
- 5. Case study of hoising and transporting equipment
- 6. Dewatering techniques, poving equipments.
- 7. Presentation on any one topic from above units.

Textbooks / Reference Books

- 2) Peurifoy Robert L., William B. Ledbetter, "Construction Planning Equipment Methods", Mc Graw Hill Book Company.
- 3) Russel James E., "Construction Equipment", Reston Publishing Company.
- 4) Shetty M.S., "Concrete Technology Theory & Practice", S. Chand & Company Private Limited.
- 5) S.C. Sharma & Khanna, Construction Equipments & its Management",
- 6) V.R. Phadke "Construction Machinery & Works Management".

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT - IV, V, VI

B.TECH (CIVIL) - SEM- IV

27 : STRUCTURAL ANALYSIS - I

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 03 Hours / Week Theory: 03 Credits

Course Pre-requisites

The Students should have knowledge of

1. Solid Mechanics

Course Objectives

To make student capable to analyse the structure.

Course Outcomes

The student should be able to

- 1 Calculate degree of indeterminacy of the structure.
- 2 Calculate deflection of truss.
- 3 Analyse Indeterminate truss using strain energy method.
- 4 Calculate fixed end moments.
- 5 Analyse plane structure using slope deflection method.
- 6 Analyse plane structure using moment distribution method.

UNIT - I (06 Hours)

Basic Concepts

Types and classification of skeletal structures, members, joints, supports, loads and load effects; Concept of stability; Concepts of indeterminacy and degrees of freedom; Static and Kinematic degree of indeterminacy; Deflected shape of beams and frames.

Strain Energy: Concept of strain energy; Modulus of Resilience; Strain energy due to axial force, shear force, bending moment and torsional moment.

UNIT - II (06 Hours)

Deflection of Beam and Truss

Deflection of determinate beam using conjugate beam method, Deflection of joints of determinate truss using Castigliano's first theorem

UNIT - III (06 Hours)

Analysis of Indeterminate Plane Trusses using Castigliano's theorem

Analysis of indeterminate trusses by application of Castigliano's second theorem; Effect of lack of fit, temperature changes in member and Sinking of supports.

UNIT - IV (06 Hours)

Fixed Beams and Three Moment Theorem

Analysis of propped cantilevers and fixed Beams; Sinking of support. Analysis of indeterminate beam using clapeyron's three moments theorem.

UNIT - V (08 Hours)

Slope Deflection Method

Analysis of continuous beams using slope deflection method-sinking and rotation at support; Deflected shape of beam; Analysis of non- sway and sway rectangular portal frames (with indeterminacy up to 3 degrees);

UNIT - VI (08 Hours)

Moment Distribution Method

Analysis of continuous beams using moment distribution method-sinking and rotation at support; Analysis of non-sway and sway rectangular portal frames (with indeterminacy up to 3 degrees).

Assignments:

- 1. Draw different types of structures space, plane, trusses, beams and frames.
- 2. Draw deflected shapes of different types of structures.

- 3. Calculate degree of static indeterminacy.
- 4. Calculate degree of kinematic indeterminacy.
- 5. Calculate deflection of beam using conjugate beam method
- 6. Calculate deflection of truss using Castigliano's first theorem.
- 7. Analysis of indeterminate trusses using Castigliano's second theorem
- 8. Write fixed end moments for different loading cases.
- 9. Explain three moment theorem
- 10. Analysis of beam/frame using slope deflection method.
- 11. Calculate distribution factor at joint.
- 12. Analysis of non-sway beam/fram using moment distribution method.
- 13. Analysis of sway frame using moment distribution method.

Text Books

- 1) Hibbeler R. C., "Structural Analysis", Prentice Hall Publication
- 2) Pandit G. S. & Gupta S. P., "Theory of Structures Vol-I", Tata McGraw Hill Publication
- 3) Ramamrutham S. & Narayan R., "Theory of Structures", Dhanpat Rai Publishing Company

Reference Books

- 1) Prakash Rao D. S., "Structural Analysis", Universities Press Publication
- 2) Timoshenko S. P. & Young, "Theory of Structures", McGraw Hill Publication
- 3) Aslam Kassimali, "Structural Analysis", Cengage Learning.

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B.TECH (CIVIL) - SEM- IV

28: PROFESSIONAL SKILLS DEVELOPMENT IV

TEACHING SCHEME

CREDITS ALLOTED

Theory: 4 Hours / Week Theory: 4 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Basic concepts of Maths, Logical reasoning and English Grammar taught in the last semester.
- 2. An overall idea about the difference in personal and professional communication in terms of vocabulary used.
- 3. Knowledge of writing skills, importance of professionalism in emails and letters.
- 4. They should be aware of concepts of self esteem, self-assessment and its importance in setting long term and short term goals.
- 5. Awareness of the interpersonal skills like team work and introduction to Leadership taught during the last semester.
- 6. Body language and importance of non verbal communication to maintain professionalism.

Course Objectives

The Professional Skills Development 4 is an extension of PSD- 3 with focus on the remaining topics of Maths and Logical reasoning. The further complex concepts of Aptitude and Grammat aims to acquaint them with the level of complexity presented in recruitment tests and also provide them techniques to solve such question with tricks/methods in a very short period. The English communication and soft skills section of PSD-4 focuses on the higher aspects of soft skills such as grooming them on corporate etiquettes and various formats of email/ letter writing so that can present themselves as professionals further both in oral and written communication.

Course Outcomes

The student should be able to

- Learn further concepts of Maths, Logical reasoning and English grammar and apply short cuts/ tricks to solve questions in less time. Learn remaining 25-30 rules of grammar relevant from the recruitment point of view.
- 2. Use appropriate words in the right context both academically and professionally. Students would have approximately around 80-100 words from the academic word list prescribed in the syllabus.
- 3. Understand the importance of email etiquettes and distinguish between the format of formal and informal emails/letters. They would be able to draft professional mails and letters like job application letters, cover letters, and apology emails with proper structure and words which are necessary in the corporate life.
- 4. Apply various strategies of conflict resolution through amicable way to settle team conflicts/disputes. They would learn to handle criticism and feedback in a positive way as an individual as well as a team.
- 5. Understand the major concepts of leadership like coaching, mentoring. They would learn effective time management strategies- Pareto principle (the 80-20 rule of time management) and apply them in the corporate life.
- 6. Understand the importance of grooming, body language and etiquettes in the corporate sector. They would be able to conduct themselves in a professional and impressive way by conducting themselves according to situations in the professional sector. They would also learn various strategies and conversational techniques to handle telephonic interviews confidently.

Unit I (18Hours)

Aptitude (Maths, Logical Reasoning, English)

- Maths
 - Simple Interest and Compound Interest

- Ratio, Proportion and Average
- Mixture and Allegation
- Logical Reasoning
 - Data Interpretation
 - Data Sufficiency
- English
 - Grammar I
 - Vocabulary Analogies

Unit II (4 Hours)

Essential Grammar - IV

• Vocabulary – Academic word List

Unit III (6 Hours)

Written Communication- III

- Email writing and etiquettes formal and informal email writing, format of various types of email, do's and don'ts of email writing
- Letter writing formal letters, job application letter, cover letter.
- Essay writing mnemonics top develop ideas and write essays, structure of essays

Unit IV (4 Hours)

Self Awareness and Conflict Resolution

- Self-assessment & Perception & attitudes.
- Analyzing skills & weaknesses and habits.
- Developing positive attitude & handling criticism positively
- Handling conflicts in the personal and corporate sector
- Causes of conflicts in work scenario.
- Ways and methods for conflict resolution

Unit V (6 Hours)

Interpersonal Skills - III

- Mentoring, Difference between Leadership and Management
- Leading with examples
- Time management -The Time Management Matrix, Pareto Principle

Unit VI (4 Hours)

Corporate Etiquettes and Grooming

- Introduction to grooming & etiquettes
- Ways of handling telephonic interviews

Text Books

- 1. APAART: Verbal Ability
- 2. APAART: Logical Reasoning
- 3. APAART: Quantitative Aptitude
- 4. APAART: Speak Well 1 (English Language and Communication)
- 5. APAART: Speak Well 2 (Soft Skills)

B.TECH (CIVIL) - SEM- IV

29 : COMPUTER APPLICATIONS IN CIVIL ENGINEERING - III

TEACHING SCHEME

CREDITS ALLOTTED

Theory: --

Practical: 02 Hours / Week

Theory: 01 Credit

Course Pre-requisites

The Students should have knowledge of

- 1. structural elements.
- 2. various forces acting on the structure.
- 3. analysis of the results obtained from the software

Course Objectives

To make student capable of analysis various different structures.

Course Outcomes:

The students will be able to

- 1. model different types of structures.
- 2. assign different types of load and supports to the structural members.
- 3. Analyze the structure and extract the output results.
 - Introduction.
 - Getting Started.
 - Modeling of geometry.
 - · Application of loads, supports and sections
 - Analyzing the structure.
 - Extracting the output results: Maximum stresses, Maximum strains, SFD and BMD, Deflection values.

Term Work:

- 1) Assignments on analysis of Beams.
- 2) Assignments on analysis of Frames.
- 3) Assignments on analysis of Trusses.
- 4) Project.

Text Books:

Staad. Pro Manual

B.TECH (CIVIL) - SEM- IV

30: CIVIL ENGINEERING CONSTRUCTION PRACTICE

TEACHING SCHEME

CREDITS ALLOTTED

Practical: 02Hours / Week Termwork: 01Credits

Course Pre-requisites

The Student Should have knowledge of

- 1. Basic concept of Civil Engineering.
- 2. Basics of mathematics.

Course Objective

1. To make students understand Civil Engineering Practices.

Course Outcomes

Student will be able to

- 1. setout of foundation for buildings.
- 2. carry out testing of construction materials
- 3. manage inventory on site.
- 4. maintain quality control on site.
- 5. work as a site engineer

List of Practicals

- 1. Setting out and layout of building foundation.
- 2. Study of various types of drawings required on construction sites
- 3. Study of reinforcement and its bending for different structural members.
- 4. Slump test on concrete and effect of plasticizers.
- 5. Study of formwork & scaffolding.
- 6. Construction of different types of brick masonry bonds, study of recent types of bricks and blocks

- 7. Study of plastering & pointing.
- 8. Study of different types of tiles.
- 9. Introduction to water supply & sanitary fittings and appliances.
- 10. Consealed construction practices.
- 11. Types of paints.
- 12. Methods of Waterproofing of toilets & roofs.
- 13. Testing of concrete cubes of different grades.
- 14. Study of stock register format and daily report.

REFERENCES

- 1. A to Z Building Construction by Mantri publication.
- 2. My Construction Practices by R.B. Chaphalkar.
- 3. Building construction by B.C.Punmia.
- 4. Building construction by S.P. Arora & S. P. Bindra

RULES REGARDING ATKT, CONTINUOUS ASSESSMENT AND AWARD OF CLASS Standards of Passing and ATKT Rules

- 1. For all courses, both UE (University Evaluation) and IA (Internal Assessment) constitue separate heads of passing (HoP). In order to pass in such courses and to 'earn' the assigned credits.
 - a) The learner must obtain a minimum grade point of 5.0 (40 % Marks) at UE and also a minimum grade point of 5.0 (40 % Marks) at IA.

OR

- b) If he/she fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for course is atleast 6.0 (50% Aggregate). The GPA for a course will be calculated only if the learner passes at the UE.
- 2. A student who fail at UE in a course has to reappear only at UE as a backlog candidate and clear the HoP. Similarly, A student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the HoP.

Rules of ATKT

- 1. A student is allowed to carry backlog of courses prescribed for B.Tech Sem I, III, V, VII to B.Tech Sem II, IV, VI, VIII respectively.
- 2. A student is allowed to keep term of Sem III, if he/she is failing in any number of subjects of Sem I & II.
- 3. A student is allowed to keep term of Sem V, if he/she is failing in any number of subjects of Sem II & IV but passed in all subjects of Sem I & II.
- 4. A student is allowed to keep term of Sem VII, if he/she is failing in any number of subjects of Sem V & VI but passed in all subjects of Sem III & IV.

Award of Class for the Degree Considering CGPA Award of Honours

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The Criteria for the Award of Honours at the End of the Programme are as given below.

| Range of CGPA | Final Grade | Performance Descriptor | Equivalent Range of Marks (%) |
|----------------------------------|-------------|---------------------------|----------------------------------|
| $9.50 \le \text{CGPA} \le 10.00$ | 0 | Outstanding | 80 ≤ Marks ≤ 100 |
| $9.00 \le \text{CGPA} \le 9.49$ | A+ | Excellent | 70 ≤ Marks ≤ 80 |
| $8.00 \le \text{CGPA} \le 8.99$ | A | Very Good | 60 ≤ Marks ≤ 70 |
| $7.00 \le \text{CGPA} \le 7.99$ | B+ | Good | 55 ≤ Marks ≤ 60 |
| $6.00 \le \text{CGPA} \le 6.99$ | В | Average | 50 ≤ Marks ≤ 55 |
| $5.00 \le \text{CGPA} \le 5.99$ | С | Satisfactory | 40 ≤ Marks ≤ 50 |
| CGPA Below 5.00 | F | Fail | Marks Below 40 |

BHARATI VIDYAPEETH DEEMED UNIVERSITY Pune.

Faculty of Engineering & Technology
Programme: B. Tech. (Civil)

COURSE STRUCTURE AND SYLLABUS (Choice Based Credit System - 2014 Course)
B. Tech. (Civil) (Sem V & VI)

Bharati Vidyapeeth Deemed University College of Engineering, Pune

Vision:

Provide high quality technical manpower to the industry and nation.

Mission:

Social Transformation Through Dynamic Education

Goals:

- a) To create work place environment that attracts and retains superior and diversified faculty members.
- b) To adopt policies to promote faculty development programmes.
- c) To gather, support and collaboration for research activities in emerging technologies and interdisciplinary studies.
- d) Constant reform and upgradation of curricula to keep pace with rapidly advancing technology trends.
- e) Development of centre of excellence in Engineering and Technology.
- f) Strengthen the interaction with R & D and industry organizations.
- g) Accelerate the process of sharing knowledge, infrastructure and resources for better tomorrow.
- h) Enhance the facilities necessary for training, testing and consultancy services.

BHARATI VIDYAPEETH UNIVERSITY Pune

Faculty of Engineering & Technology Programme : B. Tech. (Civil)

COURSE STRUCTURE AND SYLLABUS

(Choice Based Credit System - 2014 Course) B. Tech. (Civil) (Sem V & VI)

Bharati Vidyapeeth Deemed University

Bharati Vidyapeeth, the parent organization of this University is one of the largest educational organizations in the country. It has 171 educational units under its umbrella including 67 Colleges and Institutes of conventional and professional education.

The Department of Human Resource Development, Government of India on the recommendations of the University Grants Commission accorded the status of "Deemed to be University" initially to a cluster of 12 units of Bharati Vidyapeeth. Subsequently, 17 additional colleges / institutes were brought within the ambit of Bharati Vidyapeeth Deemed University wide various notifications of the Government of India. Bharati Vidyapeeth Deemed University commenced its functioning on 26th April, 1996.

Constituent Units of Bharati Vidyapeeth Deemed University

- 1. BVDU Medical College, Pune.
- 2. BVDU Dental College & Hospital, Pune
- 3. BVDU College of Ayurved, Pune
- 4. BVDU Homoeopathic Medical College, Pune
- 5. BVDU College of Nursing, Pune
- 6. BVDU Yashwantrao Mohite College of Arts, Science & Commerce, Pune.
- 7. BVDU New Law College, Pune
- 8. BVDU Social Sciences Centre (M.S.W.), Pune
- 9. BVDU Yashwantrao Chavan Institute of Social Science Studies & Research, Pune.
- BVDU Centre for Research & Development in Pharmaceutical Sciences & Applied Chemistry, Pune
- 11. BVDU College of Physical Education, Pune.
- 12. BVDU Institute of Environment Education & Research, Pune
- 13. BVDU Institute of Management & Entrepreneurship Development, Pune
- 14. BVDU Poona College of Pharmacy, Pune
- 15. BVDU College of Engineering, Pune
- 16. BVDU Interactive Research School in Health Affairs (IRSHA), Pune
- 17. BVDU Rajiv Gandhi Institute of Information Technology & Biotechnology, Pune
- 18. BVDU College of Architecture, Pune
- 19. BVDU Abhijit Kadam Institute of Management & Social Sciences, Solapur
- 20. BVDU Institute of Management, Kolhapur
- 21. BVDU Institute of Management & Rural Development administration, Sangli
- 22. BVDU Institute of Management & Research, New Delhi
- 23. BVDU Institute of Hotel Management & Catering Technology, Pune

- 24. BVDU Yashwantrao Mohite Institute of Management, Malakapur-Karad
- 25. BVDU Medical College & Hospital, Sangli
- 26. BVDU Dental College & Hospital, Mumbai
- 27. BVDU Dental College & Hospital, Sangli
- 28. BVDU College of Nursing, Sangli
- 29. BVDU College of Nursing, Navi Mumbai

The status of University was given to a cluster of these colleges and institutes in appreciation of the high level of their academic excellence and for their potential for further growth.

During the last 20 years or so, the University has achieved higher pinnacles of academic excellence and has established its reputation to such an extent that it attracts students not only from various parts of India but also from abroad. According to a survey conducted by Association of Indian Universities, this University is one among the top ten Universities in the country preferred by the overseas students for admissions. At present, there are more than 850 overseas students from 47 countries on the rolls of constituent units of this University.

During the last 20 years, there has been tremendous academic expansion of the University. It now conducts in all 305 courses in its constituent units, of them 108 are Post Graduate, 45 are Under Graduate and 55 Diploma level courses, 12 Fellowship and 5 certificate courses. All the professional courses which the University conducts such as those of Medicine, Dentistry, Engineering etc., have approval of the respective statutory councils, viz., Medical Council of India, Dental Council of India, All India Council for Technical Education etc.

The University is a throbbing center of research activities and has launched Ph.D. programmes in 77 subjects and M.Phil in 3 subjects. It has also introduced quite few innovative academic programmes such as Masters in Clinical Optometry, M.Tech. in Nano Technology etc.

The University's performance and achievements were assessed by the "National Assessment and Accreditation Council" and it was reaccredited with a prestigious "A" grade in 2011. Some programmes of the constituent units such as College of Engineering at Pune, Management Institute in Delhi and others have also been accredited by "National Board of Accreditation". Three constituent units of Bharati Vidyapeeth Deemed University are also the recipients of ISO 9001-2001 certifications.

Bharati Vidyapeeth Deemed University College of Engineering, Pune

College Information:

Bharati Vidyapeeth University College of Engineering, Pune (BVUCOE) established in 1983, a constituent unit of BVU (University with 'A' Grade status by MHRD, accredited to Grade 'A' by NAAC in 2004 and 2011) and holds a place of pride and is amongst the most reputed institute. It has been ranked to 61st by National Institutional Ranking Framework (NIRF) with criteriawise ranking as 5th in Graduate Outcome (GO), 13th in Outreach and Inclusivity (OI), 44th in Teaching Learning Resources (TLR) and 62nd in Perception (PR). This also made institute to stand 4th in the State of Maharashtra. Further, DATAQUEST-CMR national survey also ranked this institute to 4th among private technical institutions of India, 29th by Times of India and 41st by OUTLOOK. This is the only institute selected by MHRD for its Technical Education Quality Improvement Programme (TEQIP-II – 1.1 Programme) for the grant of Rs. 4 Crores.

BVUCOE, Pune offers 09 graduate, 08 post graduates programmes and Doctoral programmes in 08 disciplines. All Programmes are accredited by National Board of Accreditation (NBA) twice and we have applied for third cycle of accreditation.

Institute has its own spacious well designed building measuring 26,286 sq. m. and it houses 101 labs, 43 class rooms, and 21 tutorial rooms. The library of the institute is a five storied building and houses periodical section, computer center, reading hall, reference section. It contents more than 60,000 books, 15,000 volumes, 80 national and 81 international journals subscription and digital library facility. Digital library of institute with 66,944 number of journals in e-form is one of the richest source of knowledge in e-form for students and faculty members. The Library, Laboratories, Equipments, Learning resources and Software constantly get upgraded and updated in tune with the changing time. An Investment of Rs.119.95 million is made in the last five years.

The structured faculty development programme has strengthened quality of Teaching Learning Process in the institute. 35 faculty members with Ph. D. qualifications have been proved as resources for research, innovations and sound Teaching – Learning Process. As a part of quality improvement programme 04 number faculty members were deputed to International Universities, Institutions of national importance such as IIT, NIT etc. for qualification improvement. Team of 206 faculty members with average experience 11.7 years and average age 38.3 years indicates teachers with fine blend of experience and youth. Faculty members are well conversant and trained for use of latest softwares and latest equipments being purchased every year as policy of upgrading laboratories. In last five years college has invested Rs. 119.95 million in laboratory upgradation. Institute organized 138 number of continuing education programmes in last five years to keep sharpen skills of faculty members. Further, 1389 faculty members were deputed to attend various workshops and training programmes for sharing and enhancing their knowledge. Faculty members also play active role in curriculum development as Member of Board of Studies of various subjects and other statutory bodies of the University.

The research quality is indicative of the university penchant for quality. The research publications in reputed international and national refereed journals and conferences have shown a steady and significant rise over the years which is aptly reflected by 1091 Research papers publications in reputed national and international journals in last five years. Grant

of Rs. 152.73 Lakhs from funding agencies such as UGC, DST, DRDO, AICTE etc. fetched by faculty members is strong indicator of research aptitude of faculty members. Seed money up to Rs. 3 lakhs under Institutionally Funded Research Programme (IFRP) nurtures research aptitude of faculty members. 575 number of publications in standard research databases such as SCOPUS, Web of Science, Google Scholar etc. in last five years throws light on quality of publications by faculty members of this institute. These publications by faculty members have received 137 number of citations in the same period. Institute has 02 patents to its credit and filed 05 patents.

The institute has collaboration with international universities such as North Carolina A & T State University, Greensboro, USA, Joint School of Nanoscience and Nanoengineering (JSNN), USA, The University of Tokushima, Japan, ARM University, USA and with industries such as TCS, SKF India Ltd. Every year one faculty member is deputed for Ph. D. programme in NCAT with scholarship. Students of M. Tech. (Nanotechnology) joins JSNN, USA to pursue their dissertation research work for six months with scholarship to the tune of \$1000 per month. Further, NCAT, USA, The University of Tokushima, Japan contributes intellectually as well as financially to organize biannual international conference NANOCON. Three editions of NANOCON are conducted since 2010 with their association. In association with Eduvance & GAATsis, a "Center of Excellence in Embedded Systems" is established in the Institute with donation of Educational kits like ARM development boards from ARM University Program and PSoC kits by Cypress Semiconductors are used for developing projects in the sponsored laboratory. TCS supports students and faculty members for faculty enablement programmes and student development programme. Establishment of Lubricant Conditioning Monitoring Laboratory is outcome of collaboration with SKF India Ltd.

Being Deemed University college takes advantage of academic autonomy in making the curriculum industry oriented and enable students to make employable. In-plant training (45 days), courses such as Professional Skill Development introduced as integrated part of course structure. In-plant training enable students to interact within their associated industries for gaining practical field experience and professional exposure. Curriculum is Choice Based Credit System which makes students path of joining international universities for their higher studies smoother.

Today, qualitative soft skill development in students is more pertinent to a student's professional career. The institute regularly arranges training programme in the area of personality development, aptitude test, group discussion and personal interview. Through its Employment Enhancement Programme (EEP) designed for third year students which comprises of communication skill quantities analysis, corporate culture, IT Training and soft skills. This programme is conducted in association with professional institutes of national repute for effective execution and implementation. To enhance their professional experience and get them head start in the industry, an innovative programme is initiated on student mentoring "Saturday @ BV", wherein speakers are entrepreneurs and high ranked corporate who share their experiences, hardship and their corporate journey.

In it's long, multi-pronged, persistent and pain staking efforts for producing quality engineering professionals, institute has produced more than 1068 entrepreneurs.

PROGRAMME: CIVIL ENGINEERING

Vision:

To Create Civil Engineers who will transform Civil Engineering Industry for sustainable development of society.

Mission:

Create responsible Civil Engineers to meet global challenges.

Program Education Objectives: PEO

PEO1: To prepare students for career in Civil Engineering profession.

PEO2: To develop a responsible 'Entrepreneur'.

PEO3: To develop the student to cope up with the advancements in Civil

Engineering.

Program Outcome: (PO)

The Graduates will be able to

- 1. apply possessed knowledge of fundamental subjects to civil engineering problems.
- 2. analyze civil engineering problems.
- 3. design civil engineering structures with appropriate consideration to safety, economy, health and environmental considerations.
- 4. solve complex civil engineering problems by conducting investigations.
- 5. use modern civil engineering tools, techniques and softwares.
- 6. apply their professional responsibilities.
- 7. understand the impact of professional engineering solutions in societal and environmental contexts.
- 8. exhibit professional ethics and norms of engineering practice.
- 9. function individually and in teamwork.
- 10. communicate effectively in both verbal and written forms.
- 11. manage the work and finance of a civil engineering projects.
- 12. practice the use of lifelong learning.

Numerical Methods in Civil Engineering.

31: STRUCTURAL DESIGN-I

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 4Hours / Week Theory: 5 Credits
Practical: 2Hours / Week Termwork: 1 Credit

Tutorial: 1 Hour / Week

Course Pre-requisites

The Students should have knowledge of

- 1. Structural Analysis- I
- 2. Mechanics of Solids

Course Objectives

To make student capable to design different structural elements using steel.

Course Outcomes

The student will be able to

- 1. estimate design load
- 2. design a connection for axial load
- 3. design a members for axial tension
- 4. design a members for axial compression
- 5. design a built up column
- 6. design a beam

UNIT - I

(06 Hours)

Design Philosophy

Types of structural elements and their behavior, Introduction to IS:875, Types of Loads, Estimation of Loads, Wind Load on Roof Truss.Load combinations, Design Load,Steel as a structural material, Type of structural steel, Mechanical Properties, Rolled steel sections and engineering properties, Introduction to SP6(1),Strength of Section, Design strength, Partial safety factors, Concept of Limit state design, Introduction to IS:800.

UNIT - II (06Hours)

Design of Connections for Axial Load

Types of fasteners, advantages and disadvantages, Types of bolts, Design strength of bolts, Design of bolted connection and detailing, Strength of weld, Design of weld and detailing.

IINIT - III (06Hours)

Design of Axially Loaded Tension Members

Behavior of member in tension, Axial tension capacity of plates, single and double angles and channel section, Design of axially loaded Tension members

IINIT - IV (06 Hours)

Design of Axially Loaded Compression Members

Behavior of member in compression, Concept of Effective Lengths, Axial compression capacity of single and double angle section, Design of axially loaded compression members.

IINIT - V (06 Hours)

Design of Builtup Column and Column Base.

Axial compression capacity of Built up Column, Design of built up column, Design of Lacing system, Design of battening system, Design of slab base, Design of gusseted base.

UNIT-VI (06 Hours)

Design of Beams

Behavior of beams, Shear and moment capacity of Laterally supported and laterally unsupported beam. Design of beam, Design of built up section, Curtailment of plates, Design of bolted connections for shear and moment.

Term Work

- The term work shall consist of minimum any ONE projects with 2 numbers of half imperial sheets based on following topics:
- Design of roof truss: Load estimation, Analysis of truss, Design force for member, Design of Members, Design of connection, Design of Purlin, Drawing.
- Design of Building: Load estimation, Analysis of frame, Design of Secondary beams, main beams, Columns, Beam to Beam, Beam to Column connections, column bases, etc.

Assignments

- 1) Calculate Wind load acting on the roof truss.
- 2) Design of bolted or welded connection for axial load.
- 3) Design of member for axial tensile load.
- 4) Calculate axial capacity of member in compression.
- 5) Design of lacing or battening connection for built up column
- 6) Calculation of moment and shear capacity of rolled / built up section.
- 7) Explain limit state design phidosophy.
- 8) Explain diffrent types of structural sections and their properties.
- 9) Calculate design strength of given bolt.

Reference Books

- 1) N. Subhramanian, "Design of Steel Structures", Oxford University Press
- 2) S. K Duggal, "Limit State Desin of Steel Structures", Tata McGraw-Hill Education
- 3) S.S.Bhavikatti, "Design of Steel Structures: By Limit State Method", I K International Pub
- 4) Dr. Ramchandra, "Limit State Design of Steel Structures", Scientific Publishers
- 5) M. R. Shiyekar, "Limit State Design in Structural Steel", Prentice-Hall of India

- 6) IS:800-2007, General Construction in Steel Code of Practice"
- 7) IS:875-1987, "Code of Practice for Design Loads for Buildings and Structures Part (1 to 5)"
- 8) IS:808-1989, "Dimensions for Hot Rolled Steel Beam, Column, Channel and Angle Sections"
- 9) SP-6(6)- 1972, "Handbook for Structural Engineers"

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT - IV, V, VI

32 : ADVANCED SURVEYING

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 3 Hours / Week Theory: 3 Credits
Practical: 2 Hours / Week Termwork: 1 Credit

Course Pre-requisites

The Students should have knowledge of

- 1. Fundamentals of Civil Engineering
- 2. Surveying

Course Objectives

To make student cabable to use advanced surveying techniques for mapping

Course Outcomes:

The student will be able to

- 1. explain Geodetic control survey and theory of errors.
- 2. explain various features of modern Total Station for survey .
- 3. describe principles and components of Space Based Positioning System and its applications .
- 4. describe technique of Hydrographic Survey.
- 5. describe the process of Aerial survey and its use in Surveying.
- 6. explain basics of Remote sensing and Geographical information System and its applications.

UNIT - I (6Hours)

Geodetic Control Survey

Introduction to geodetic control survey, System- Triangulation and Trilateration, Triangulation stations and figures, concept of base line. Types of errors, Probable error and its determination, Laws of weights, Method of least squares, Normal equation, Adjustment of triangulation figure.

UNIT - II (6Hours)

Total Station Survey

Concept and necessity of an electronic total station instrument. Types of total station as per EDM , range and angle resolution system. Principle features of an ETS, temporary adjustments, On board programmes such as REM, RDM, Free stationing, resectioning etc., traverse survey with ETS. Concept of data down loading and post processing software, Errors in ETS survey.

UNIT - III (6 Hours)

Space Based Positioning Techniques:

Introduction and concept, segments of SBPS- space, control and user. GNSS type SBPS in action-GPS, GLONASS, Compass. RNSS type SBPS in action-Quasi zenith, IRNSS. GPS signals, GPS receivers-navigation and surveying. SBPS positioning systems-absolute and differential. Access denial techniques and ephimeris. SBPS coordinates and heights. Surveying with SBPS. Errors in positioning with SBPS. Applications of SBPS

UNIT - IV (6Hours)

Hydrographic Survey

Concept, objects, Soundings and instruments and personnel required for sounding, methods of locating soundings. Three point problem and its solution by mechanical, analytical and graphical method. Tides and tidal gauges and establishment of MSL

UNIT - V (6Hours)

Photogrammetry

Elements of photogrammetry, types of photogrammetry. Aerial photographs their types and scale. Concept of relief displacement, Stereoscopy, parallax and mirror stereoscope, parallax equation and difference in elevation from differential parallax. Ground control. Procedure of aerial survey and flight planning.

UNIT - VI (6 Hours)

Remote Sensing and Geographic Information System:

Remote sensing-concept, types –active and passive, components of remote sensing system, electromagnetic energy and spectrum, atmospheric windows and spectral signature. Remote sensing platforms and sensors. Remote sensing data products, interpretation of remotely sensed images visual and digital. Limitations and applications of remote sensing.

Concept and need of GIS, Components- people, procedure, hardware, software and data .Functions-Input, manipulation, management, Query analysis and Visualization. Application and limitations of GIS.

Assignments

- 1. Solution of problems on Laws of weights and normal equations.
- 2. Collection of information for various types of ETS used and available in the market and their salient features
- 3. Collection of information of SBPS of various countries and applications of SBPS.
- 4. Write a report on Instruments used for measurement of soundings.
- 5. Case studies on applications of Remote sensing in Mappins.
- 6. Case studies on applications of Aerial survey.
- 7. Case stude on applications of GIS for Urban Planning.
- 8. Collection of information for various remote sensing satellite of India.

Term Work

Any Ten Experiments

- $1. \quad \text{Study and use of one second the odolite and measurement of horizontal} \\ \quad \text{angle} \\$
- 2. Measurement of horizontal angles by reiteration method and Measurement of vertical angle.
- 3. Study and use of total station.

- 4. Study and use of total station for traverse survey.
- 5. Applications of Total Station for REM, RDM.
- 6. Study and Use of Nautical Sextant for measurement of horizontal angles.
- 7. Study and Use of Mirror stereoscope to find air base distance. parallax bar and determination of difference in elevation by differential parallax
- 8. Study and use of parallax bar and determination of difference in elevation by differential parallax.
- 9. Adjustment of braced Geodetic quadrilateral
- 10. Study and use of Handheld GPS for traverse survey
- 11. Solution of three point problem inhydrographic surveying
- 12. Study of GIS software.

Text Books

- Duggal S. K., "Surveying Vol-1, Vol-2", Tata Mac Graw Hill pub. co., New Delhi
- 2. Punmia B. C., "Higher Surveying", Laxmi Publications, New Delhi
- 3. Chandra A.M.,"Higher Surveying ",New Age International Publishers,
- 4. Bannister A. and Raymond Baker, "Surveying", Pearson Education
- 5 Anji M. Reddy, "Text book of Remote Sensing and GIS", BSP BS Publications

Reference Books

- 1. Uren J., W. F. Price, "Surveying for Engineers", Macmillan Pub
- 2. Wolf P. R., "Elements of Photogrammety", Mc Graw Hill
- 3. Agarwal C. S., Garg P. K., "Remote Sensing in Natural Resources", Wheeler Publishing
- 4. Lo C.P., Albert Yeung, "Concepts and techniques of GIS", Printice Hall of India

Syllabus for Unit Test

Unit Test -1 UNIT – I,II,III

Unit Test -2 UNIT – IV, V,VI

33: ENGINEERING PROJECT MANAGEMENT

TEACHING SCHEME CREDITS ALLOTTED

Theory: 3Hours / Week Theory -3 Theory
Practical: 2Hours / Week Termwork -1 Creditz

Course Pre-requisites

The Students should have knowledge of

- 1. Building construction.
- 2. Building planning and design.

Course Objectives

To prepare the student to analyze the network and monitor and control the civil engineering projects.

Course Outcomes

The student will be able to

- 1. prepare organization chart.
- 2. prepare a network and analyze by CPM and PERT methods.
- 3. update network and carryout resource allocation
- 4. carry out material management
- 5. solve linear programming problem by graphical and simplex methods
- 6. check quality parameters in construction process.

UNIT - I (06 Hours)

Introduction to Project Management

Importance, Objectives and functions of Management, Categories of Project, Project Life Cycle Concept, Importance of organizational structures, types of organization, Project Manager education, experience, authority & responsibility.

UNIT - II (6 Hours)

Project Planning & Scheduling

Gantt /Bar Charts and its limitations, Network planning, network analysis, C.P.M., P.E.R.T., Types of floats, Slack. Ladder network,

UNIT - III (6 Hours)

Project Monitoring & Control

Resource allocation, resource smoothening and leveling, crashing of network, direct cost and indirect cost, Cost Slope, updating of network,

UNIT - IV (6 Hours)

Material Management

Objectives of material management, material requirement, scheduling, monitoring, inventory control, inventory classification, inventory management, economic order quantity, inventory models, ABC analysis

UNIT - V (6 Hours)

Linear Programming

Identification & formulation of L.P. problem, requirements and assumptions of linear programming model, graphical method and simplex method

UNIT - VI (6 Hours)

Total Quality Management

Importance of total quality management in construction process and steps involved, concept of quality control, quality assurance, quality management and TQM, study of various quality standards in construction, six sigma concept, designing of quality manual, checklist and inspection reports, necessity of MIS in management

Assignments

- 1) Project Manager Education, experience, authority & responsibility.
- 2) Draw a bar chart for a building project.
- 3) Ladder network analysis.

- 4) ABC analysis of small building project.
- 5) Problems on linear programming, graphical and simplex method.
- 6) Total quality management.
- 7) Network analysis by CPM & PERT.
- 8) Network Updating

Term Work

- 1. Assignment on different types of organization and their flowcharts.
- 2. Assignment on bar chart.
- 3. Assignments on C.P.M. and P.E.R.T.
- 4. Assignment on resource leveling.
- 5. Assignment on crashing of network.
- 6. Assignment on updating of network.
- 7. Assignment on ABC and EOQ analysis.
- 8. Assignment on linear programming, graphical and simplex method.
- 9. Study of quality control system of a construction project.
- 10. Prepare a network for any construction project containing minimum 25 activities and find out total float and free float.

Text Books

- 1. Construction Engineering and Management by S. Seetharaman, Umesh Publications, New Delhi.
- 2. PERT & CPM principles & applications by L.S. Srinath, affiliated East West press Pvt. Ltd., New Delhi.
- 3. Project Planning & control with PERT & CPM by Dr. B.C. Punmia, K.K. Khandelwal, Laxmi Publications (P) Ltd, New Delhi.

Reference Books

1. Construction Management and Planning by B. Sengupta and H. Guha, Tata McGraw Hill Publishing Company, New Delhi.

- 2. Construction Project Management Planning, Scheduling and controlling by K.K. Chitkara TMH Publishing Company, New Delhi
- 3. Inventory Control by L.C. Zhamb, Everest Publishing House
- 4. Project Management by Khatua, Oxford University Press
- 5. Project Planning, Analysis selection, Implementation & Review by Prasanna Chandra, Tata McGraw Hill, New Delhi
- 6. Civil Engineering Project Management by Alan C. Twort& J. Gordon Rees, Elsevier

Syllabus for Unit Test

Unit Test -1 UNIT - I, II, III

Unit Test -2 UNIT – IV, V, VI

34: STRUCTURAL ANALYSIS - II

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 3 Hours / Week Theory: 3 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Structural Analysis- I
- 2. Mechanics of Solids

Course Objectives

To make student capble to analyse the structure.

Course Outcomes

The student will be able to

- 1. calculate plastic moment capacity of section.
- 2. draw Influence Line Diagrams(ILD) for reaction, Shear Force and Bending Moment
- 3. draw Influence Line Diagrams(ILD)for force in members of truss
- 4. analyse three hinge arch
- 5. analyse two hinge arch
- 6. analyse frame using approximate method.

UNIT - I (06 Hours)

Plastic Analysis of Structure

Elastic and Plastic moment capacity, Plastic hinge, Shape factor, Collapse mechanism, Applications to continuous beams, Fixed beams, Single bay single storied rectangular frames.

UNIT - II (06 Hours)

Influence Line Diagrams and rolling loads for beams

Basic Concept of Influence lines, Construction of Influence Line Diagrams (ILD) for Support reactions, Shear Force and Bending Moment at a given section for simply supported beams, overhanging beams and compound beams. Muller-Breslau's principle and its application to above beams. Rolling loads - Use of influence line diagram for determination of SF and BM in beams due to UDL shorter than span, UDL longer than span, Series of concentrated loads. Conditions for maximum SF and maximum BM values.

UNIT - III (06 Hours)

Influence Line Diagrams and rolling loads for truss:

Influence line diagram for axial forces in members of plane determinate trusses. Use of influence line diagram for determination of member forces of plane determinate trusses under dead load and live load.

UNIT - IV (06 Hours)

Analysis of Three Hinged Arch

Concept and types of arches, Three hinged arch – analysis, Calculation of horizontal Thrust, Radial Shear, Normal Thrust and BM at a cross section.

UNIT - V (06 Hours)

Analysis of Two Hinged Arch

Two hinged arches – Horizontal Thrust at support, Radial Shear, Normal Thrust and BM at a cross section. BM diagram for concentrated load and UDL.

UNIT - VI (06 Hours)

Approximate Methods of the Analysis:

Approximate methods of analysis of multistoried, multibay, 2-D rigid jointed frames by

- i) Portal method
- ii) Cantilever method
- iii) Substitute Frame Method

Assignments

- 1) Calculate Plastic moment capacity of the cross section
- 2) Draw ILD for beams for reaction, SF and BM
- 3) Draw ILDs for members of the Truss
- 4) Analyse of three hinged arch
- 5) Calculate support reactions for two hinged arch.
- 6) Analyse frame using any approximate method
- 7) Calculate plastic moment for Beam.
- 8) Calculate maximum SF & BM due to moving loads on beam.
- 9) Calculate maximum axial force in truss due to moving loads.

Reference Books

- 1) Hibbeler R. C., "Structural Analysis", Prentice Hall Publication
- 2) Pandit G. S. & Gupta S. P., "Theory of Structures- Vol-II", Tata McGraw Hill Publication
- 3) Timoshenko S. P. & Young, "Theory of Structures", McGraw Hill Publication
- 4) Junnarkar S. B. & Adavi, "Mechanic of Structures", Charotar Publishing House
- 5) Ramamrutham S. & Narayan R., "Theory of Structures", Dhanpat Rai Publishing Company

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

35 : ADVANCED MECHANICS OF FLUIDS

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 03Hours / Week Theory: 3 Credits

Practical: 02Hours / Week Termwork: 01 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Fluid Mechanics basics, Types of flows, friction.
- 2. Basic knowledge of Water retaining structure like dam, weir etc. irrigation channel.
- 3. Basic knowledge of Drag& lift, unsteady flow.
- 4. Basic knowledge of Hydro power plant.
- 5. Basic knowledge of pumps.

Course Objectives

To impart knowledge of open channel flows and hydraulic machinery to students.

Course Outcomes

The student will be able to

- 1. Design most efficient channel section, find critical depth of a flow.
- 2. Understand and apply knowledge of various flow profile and their characteristics.
- 3. Find energy dissipated in a hydraulic jump.
- 4. Calculate forces on vanes for different conditions.
- 5. Understand and apply knowledge of turbines.
- 6. Understand and apply knowledge of pumps.

UNIT - I (06 Hours)

Uniform Flow in Open Channels

Basic Equations: Continuity Equation, Bernoulli's Equation & Momentum Equation as applied to open channel one dimensional flow, Velocity distribution in open channel, Chezy's & Manning's formulae, factors affecting Manning's roughness coefficient, Normal depth, Conveyance Section factor, Most efficient channel section, Specific Energy, SpecificEnergy diagram, Depth-Discharge diagrams, alternate depths, Critical depth, Critical slopes, Froude number, Specific Force, Specific force diagrams, Conjugate depths, Depth-Discharge diagrams with respect to specific force.

UNIT - II (06 Hours)

Gradually Varied Flow in Open Channels

Gradually and rapidly varied flows, their examples, Basic assumptions in the derivation of GVF, Differential equations of GVF, Various GVF profiles, and their characteristics.

UNIT - III (06 Hours)

Rapidly Varied Flow:

Hydraulic Jump in Rectangular and Trapezoidal channels, Classification & Practical uses of Jump, Examples of occurrence of Hydraulic Jump, Conjugate Depths, Energy Dissipation in Hydraulic Jump, Location of Jump, Devices for measurement of velocity and discharge in open Channels, Stream gauging.

UNIT - IV (06 Hours)

Unsteady Flow:

Types, Flow through openings under varying head, Flow Compressibility, Celerity of Elastic Pressure Waves, Water Hammer Phenomenon, Rigid & Elastic water Columns Theories, Simple cases neglecting Friction, rapid acceleration of flow due to sudden opening of valve, surge tanks and their functions, Location and Classification.

UNIT - V (06 Hours)

Fluid Flow Around Submerged Bodies

Fluid Flow Around Submerged Bodies: Practical problems involving fluid flow around submerged bodies, Definition & Expression for Drag, lift, drag coefficient, Types of Drag.

UNIT - VI (06 Hours)

Hydraulic Machines

Impact of Jet: Force Exerted due to impact of jet on stationary and moving flat and curved plates using Linear Momentum Principle, Principle of Angular Momentum, Euler's Momentum Equation for Turbines.

Element of Hydropower plant, Hydraulic turbines, Heads & efficiencies, Governing of turbines, Cavitation in turbines, Performance of turbines, Prediction of performance in terms of unit quantities and specific quantities, specific speed.

Theory of centrifugal pump, Centrifugal head due to rotation, Heads & efficiencies, Cavitation, Prediction of performance in terms of specific quantities, specific speed, characteristiccurves.

Assignments (Any Six)

- 1. Solve Four Numericals to find out Critical Depth.
- 2. Solve Numerical on GVF to find out flow profiles
- 3. Solve Numericals on Hydraulic Jump to find out dissipation of energy.
- 4. Solve Numericals to find out forces on different types of vanes.
- 5. Solve Numericals on design of Turbines.
- 6. Solve Numericals on design of Pumps.
- 7. Collection & Study of Information Brochure about different Hydraulic Machineries.
- 8. Collection & study of information brochure about 0Hydralic lab instrument, Meterial and Machines companies.

Term Work: (Any Eight)

- 1. Flow around aerofoil.
- 2. Flow around a Circular Cylinder.
- 3. Impact of jet around flat / curved plate.
- 4. Performance Curves of Hydraulic Turbine.
 Constant Head Characteristic Curve
- 5. Characteristics of Centrifugal Pump.
- 6. Uniform flow formulae of open channel.
- 7. Velocity distribution in open channel flow.
- 8. Hydraulic jump as energy dissipater.
- 9. Characteristics of various GVF profiles.
- 10. Design of Hydraulic Centrifugal Pump.
- 11. Design of Hydraulic Turbine.
- 12. GVF Computations by Direct Step Method.

Text Books

- 1. Garde R. J., Mirajgaonkar A. G., "Engineering Fluid Mechanics", Scitech Publication, Chennai
- 2. Rangaraju K. G., "Open Channel Flow", Tata McGraw Publication
- 3. Streeter Wylie, "Fluid Mechanics", Tata McGraw Publication
- 4. Subramanyam K., "Open Channel Flow", Tata McGraw Publication
- 5. VenTe Chow, "Open Channel Hydraulics", Tata McGraw Publication
- 6. C P Konthadraman, R Rroodramoorthy, "Fluid Mechanics & Machinery" New Academic Science

Reference Books:

- Fox, McDonald, Pritchard, "Fluid Mechanics SI Version" Willey Student Edition
- 2. Frank M. White, "Fluid Mechanics", McGraw Hills Series

Syllabus for Unit Test

Unit Test -1 UNIT - I,II,III

36: PROFESSIONAL SKILLS DEVELOPMENT V

TEACHING SCHEME

CREDITS ALLOTED

Theory: 4 Hours / Week Theory: 4 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Basic concepts of Maths, Logical reasoning and English Grammar taught in the last semester.
- 2. An overall idea about vocabulary, Public speaking skills taught in the last semester
- 3. Knowledge of writing skills, importance of professionalism in emails and letters.
- 4. Knowledge on handling criticism and the concept of conflicts.
- 5. Awareness of the interpersonal skills like team work and its importance in the corporate sector.

Course Objectives

The Professional Skills Development 5 is an extension of PSD- 4 with focus on the remaining topics of Aptitude, Reasoning and Grammar. The further complex concepts of Aptitude and Grammar aims to acquaint them with the topics and also provide them techniques to solve the question with tricks/methods in a very short period. The English communication and soft skills section of PSD-5 focuses on the higher aspects of soft skills training students on how to handle Group Discussions during placement process and other topics such as grooming them on how to handle conflicts effectively in the corporate scenario and also the correct attitude/approach to solve problems collectively from a team's perspective and also individually.

Course Outcomes

The student should be able to

1. Learn further concepts of Maths, Logical reasoning and English gram-

- mar and apply short cuts/ tricks to solve questions in less time. Learn remaining 25-30 rules of grammar topics of tenses and Sub- verb agreement relevant from the recruitment point of view.
- Use Mnemonics, and learn appropriate strategies to handle complex topics in GDs and ways to handle them. Students would learn the appropriate ways of stating opinions, disagreeing or communicating during the Group Discussion Process.
- 3. Apply various strategies of conflict resolution through amicable way to settle team conflicts/disputes. They would learn to handle criticism and feedback in a positive way as an individual as well as a team.
- 5. Students would learn effective time management strategies- Pareto principle (the 80-20 rule of time management) and apply them in the corporate life. It would be a continuation of the topic covered during the previous semester PSD-4
- 6. Learn to handle Case studies effectively and incorporate the right approach towards Case Studies asked during the recruitment process.

<u>Unit I</u> (24Hours)

Aptitude (Maths, Logical Reasoning, English)

- Maths
 - Time, Speed & Distance
 - Time & Work
 - Simple Interest & Compound Interest in continuation
 - Maths Revision
- Logical Reasoning
 - Data Interpretation
 - Data Sufficiency
 - Set Theory & Syllogisms
 - Reasoning Revision
- English
 - Grammar II (Adjective, Verb, Sub- Verb Agreement)

- Grammar- (Tenses)
- Vocabulary
- Verbal Ability- Revision

<u>Unit II</u> (24Hours)

Soft Skills & English Communication

- Situational Conversation
- Situational Writing
- GD Orientation
- Mock GD-1
- Mock GD-2
- Mock GD-3
- Conflict Resolution
- Problem Solving Skills
- Time- Management Skills
- Handling Case Studies
- Management Games
- Business Meeting Etiquettes

Text Books

- 1. APAART: Verbal Ability
- 2. APAART: Logical Reasoning
- 3. APAART: Quantitative Aptitude
- 4. APAART: Speak Well 1 (English Language and Communication)
- 5. APAART: Speak Well 2 (Soft Skills)

OPTIONAL SUBJECT ENGINEERING MATHEMATICS-IV

TEACHING SCHEME: CREDITS ALLOTTED:

Theory: 04 Hours / Week Theory: 04 Credits

Course Pre-requisites:

The Students should have knowledge of

- 1. Determinants
- 2. Matrices
- 3. Differentiation
- 4. Integration of functions
- 5. Differential equation

Course Objectives:

The course aims at making the students familiar about the most basic numerical methods and

concepts like error estimation helpful in various fields of engineering and can be used to simulate the results of various numerical methods.

Course Outcomes:

The student should be able to

- 1. derive appropriate numerical methods to solve algebraic and transcendental equations
- 2. evaluate the accuracy of common numerical methods.
- 3. develop appropriate numerical methods to solve a difference equation.
- 4. be familiar with numerical interpolation and approximation of functions, numerical integration and differentiation.
- 5. be familiar with numerical solution of ordinary differential equations.
- 6. To compute Numerical Solution of Partial Differential Equations.

UNIT - I

Numerical solutions of algebraic and transcendental equations

(08 Hours)

Bisection method, Regula-Falsi method, Newton-Raphson method, Direct iterative method.

UNIT - II

Solution of system of linear algebraic equation (08 Hours)

Matrix inversion method, Gauss-elimination Method, Jordan's method, Crout's method. Gauss-Seidel and Gauss Jacobi's iterative method.

UNIT - III

Difference equation and Solution of difference equations (08 Hours)

Definition of difference equations, formation of difference equation. Solution of Homogeneous and non-homogeneous difference equation with constant and variable coefficients using Boole's operator method and generating functions. Simultaneous difference equation.

UNIT-IV

Interpolation and Numerical differentiation and integration (08 Hours)

Finite difference operator, Interpolation formula with equal and unequal intervals. Divided differences and central differences. Curve fitting: Method of least squares. Straight line, Second degree, parabola, Exponential curve.

Differentiation using forward, backward and divided difference General quadrature formula, Trapezoidal rule, Simpson's 1/3rd rule, Simpson's 3/8th rule, Weddle's rule.

UNIT-V

Numerical solution of first order ordinary differential equation

(08 Hours)

Solution by Euler's method, Euler' Modified method, Taylor's series, Runga-kutta method, Milne's Predictors and Correctors method.

UNIT - VI

Numerical Solution of Partial Differential Equations (08 Hours)

Classification of second order partial differential equations, Solution of Laplace's, Poisson's, heat and wave equations by finite difference methods, Use of method of characteristics for solution of initial and boundary value problems.

Assignments:

- 1) Numerical Problems on algebraic and transcendental equations.
- 2) Numerical problems on system of linear algebraic equations.
- 3) Numerical Problems on difference equations using Boole's operator method.
- 4) Numerical Problems on simultaneous difference equation.
- 5) Numerical Problems on Curve fitting.
- 6) Numerical Problems on numerical integration.
- 7) Problems on numerical solution of first order ordinary differential equation.
- 8) Problems on numerical solution Partial Differential Equations.
- 9) Collect and solve question number 3 and 4 from recent three question paper of BVU.
- Collect and solve question number 5 and 6 from recent three question paper of BVU.

These are minimum assignments recommended by the University and the faculty has choice to design and add few more assignments.

Text Books:

- 1. Gupta P.P.& Malik G.S., Calculus of Finite Differences and Numerical Analysis, Krishna Prakashan Mandir, Meerut, 21/e, 2006.
- 2. B.S.Grewal, Engineering Mathematics, Khanna Publishers, 12/e, 2006.

Reference Books:

- 1. Francis J. Scheid, Schaum's Outline of Numerical Analysis, McGraw-Hill, New York, 1989.
- 2. S. S. Sastry, Engineering Mathematics, Vol I, II Prentice Hall Publication, 3/e, 2004.
- 3. C.Ray Wylie & Louis C. Barretle, Advanced Engineering Mathematics, Tata McGraw Hill Publishing Co Ltd., 6/e,2003.

Syllabus for Unit Test:

Unit Test -1 UNIT - I,II,III

Unit Test -2 UNIT – IV,V,VI

CREDITS ALLOTTED

37: STRUCTURAL DESIGN-II

TEACHING SCHEME

Theory: 3Hours / Week Theory: 4 Credits
Practical: 2Hours / Week Termwork: 1 Credit

Tutorial: 1 Hour/Week

Course Pre-requisites

The Students should have knowledge of

- conditions of equilibrium, plotting Shear force and bending moment diagram of beams with various support conditions and various load combinations.
- 2. Determination of bending stress and shear stress in beams.
- 3. Concept of short, long columns, direct and bending stress, principal stress and strains.
- 4. Concrete, concreting techniques and properties of concrete.
- 5. Plastic theory, concepts of planning of staircase, planning of a building.

Course Objectives

To make student capable to complete the design and detailing of a G+2 storied R.C.C.building.

Course Outcomes

The student will be able to

- 1. differentiate between various design philosophies of R.C.C. and know the properties of materials used in R.C.C. and the partial safety factors in Limit State Method.
- 2. differentiate between under-reinforced, over-reinforced and balanced section, analyse and design a singly reinforced, doubly reinforced and flanged beam by Limit State Method.

- 3. design beams for flexure, shear, bond for various supporting conditions
- 4. design different types of slabs and a staircase.
- 5. design short columns for axial load, uniaxial and biaxial bending by using SP-16.
- 6. design isolated column footings.

UNIT - I (6 Hours)

Materials and Design Approach:

Introduction of R.C.C: Materials: Types of reinforcements, Study of properties of concrete and properties of steel. Introduction to design philosophies of R.C. Structures: Working Stress Method, Ultimate Load method, Limit State Method. Various limit states, semi-probabilistic approach, partial safety factors for materials and loads, various structural elements and loads on the elements, Load combinations.

UNIT - II (6 Hours)

R.C. Sections in Flexure:

R.C. Sections in Flexure: Limit State Method: Assumptions, Strain variation diagram, Stress variation diagram; Concept of under reinforced, balanced, over reinforced section; Design parameters of a singly reinforced rectangular section, Moment of resistance of singly reinforced, doubly reinforced, rectangular, flanged section.

UNIT - III (6 Hours)

Beams:

Design of Beams for Flexure, Shear, Bond :Behaviour of R.C .beam in shear, Shear failure, Shear strength of beam Without shear reinforcement, Design of shear reinforcement. Bond–Introduction, types of bonds, Code provision.

Design of beams- Simply supported, cantilever, Continuous – Singly reinforced, doubly reinforced and flanged beam.

Introduction to Redistribution of moments in beams: Assumption, Requirements of I.S.456-2000. Various load combinations in continuous beams.

UNIT - IV (6 Hours)

Slabs

Design of Slabs: One Way Slabs: Simply Supported, Cantilever, Continuous

Two Way Slabs: Various support conditions Design of Staircase: Dog legged, Open well

UNIT - V (6 Hours)

Columns

Design of Columns: Columns- Axially loaded short columns, requirements of minimum eccentricity;

Design of short columns for axial load, uniaxial, biaxial bending (use of SP 16); Checking safety of column for biaxial bending

UNIT-VI (6Hours)

Footings

Design of Footings: Footings- Design of isolated column footing for axial load, uniaxial Bending.

Term Work

- 1. Design of G+2 storied building for gravity loads only. The design should include all types of slabs, beams, columns, footings and staircase (two flights) (Maximum three students in a group)
- 2. Report of a site visit related to building structure under construction.
- 3. Four half imperial drawing sheets. Out of which two sheets to be drawn using drafting software.

Assignments: Any Six

- 1. Assignment based on various methods of design.
- 2. Assignment based on basic parameters in design-Limit StateMethod and Working Stress Method.
- 3. Assignment based on moment of resistance of a singly reinforced beam, doubly reinforced beam, flanged beam.
- 4. Assignment based on design of various types of slabs.
- 5. Assignment based on design of various types of beams.
- 6. Assignment based on staircase design.
- 7. Assignment based on design of various types of columns.
- 8. Assignment based on design of isolated footing.
- 9. Making the models of reinforcement in various types of slabs.
- 10. Making the models of reinforcement in various types of beams.
- 11. Making the models of reinforcement in columns.
- 12. Making the models of reinforcement in staircase.
- 13. Making the models of reinforcement in footing.

Syllabus for Unit Test

Unit Test -1 UNIT - I,II,III

Unit Test -2 UNIT – IV,V,VI

38: ENVIRONMENTAL ENGINEERING - I

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 3 Hours / Week Theory: 3 Credits

Practical: 2Hours / Week Termwork: 1 Credit

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering chemistry.
- 2. Engineering mathematics.

Course Objectives

To make student aware of water treatment, air pollution, solid waste management and environmental management

Course Outcomes

The student will be able to

- 1. Explain the water quality criteria and drinking water quality standards.
- 2. Explain aeration and sedimentation process of water treatment.
- 3. Describe filtration, disinfection and advanced water treatment processes.
- 4. Enumerate the various aspects of air pollution.
- 5. Describe the solid and hazardous waste management.
- 6. Explain the aspects of environmental management.

UNIT - I (06 Hours)

Water - Quantity, Quality and standard

Water - Surface water sources, Ground water Sources, Water demand and quantity, various demands, Conveyance of water, Factors affecting demand, Design period, population forecasting, Quality of Water of various sources, Common impurities and their effects, Physical, Chemical, Biological, radiological characteristics of water, Drinking water quality standards, Different flow sheets of Water Treatment Plant (WTP) based on sources of Raw water for Rural and Urban.

UNIT - II (06 Hours)

Treatment - Aeration and Sedimentation

Aeration: Types of aerators, gravity aerator and fixed spray aerator. Sedimentation: Plain Sedimentation, Principles and types of plain Sedimentation, details of Sedimentation tank, types of tanks, inlet and outlet arrangements; Design criteria like surface overflow rate, detention time, weir loading, depth of tank. Chemical assisted Sedimentation— Necessity, Unit operation, coagulation, Different coagulants, flocculation, factors affecting flocculation, Design of Clariflocculator; Tube settlers: Introduction, Design of Tube settler

UNIT - III (06 Hours)

Treatment - Filtration, Disinfection and Advance Technology

Filtration:Necessity, mechanisms, Theory of filtration, types of filters, pressure filters, dual and multimedia filters, Different media, details of filter, Rapid sand filter and slow sand filter, design criteria, working and washing of rapid sand filter, design of rapid sand filter. Disinfection: Necessity, Different methods, chlorination, reactions involved, Free And combined residual chlorine, Break point chlorination. UV disinfection, OzonationAdvance Treatment Methods:Water Softening-Chemical and ion exchange methods, Fluoridation and defluoridation, desalination, membrane technologies.

UNIT - IV (06 Hours)

Air Pollution and Control

History of Air pollutants, Sources and classification of pollutants and their effects on human health, vegetation and property. Ambient air quality and emission standards, Air Pollution Control Principles, Removal of gaseous pollutants by adsorption, absorption, reaction and other methods, Particulate Matter Control: settling chambers, cyclone separation, Wet collectors, fabric filters, and electrostatic precipitators.

UNIT - V (06 Hours)

Solid and Hazardous Waste Management

Introduction and need for solid and hazardous waste management, Sources, Legislations, Waste Generation, Composition, Source reduction of wastes, Handling and segregation of wastes at source, storage and collection, Transport, Labeling and Handling of Hazardous Wastes, Waste processing, Composting, Solid Wastes Disposal in Landfills, secure landfills and landfill bioreactors, landfill remediation, Elements of integrated waste management.

UNIT - VI (06 Hours)

Environmental Management

Fundamentals of Environmental Management, Introduction to Environmental Management Systems- ISO 14000 series, Environmental Management Plans, Rules and Regulations of Environmental laws in India (Water and Air), Eco – labeling, Introduction to Life Cycle Assessment (LCA), Environmental Impact Assessment (EIA) and Environmental audits

Assignments

- 1. Draw and explain flow sheets of water treatment plant for different types of water sources
- 2. Numericals on design of flocculator, sedimentation tank and tube settler.
- 3. Information about various types of filtration units
- 4. National ambient air quality standards and control methods of air pollutants
- 5. Experiences of solid waste management.
- EIA studies

- 7. Case study on EMS ISO 14000
- 8. Case study on Life cycle assessment
- 9. Case study on Environmental audit.

Term Work: (Any Eight)

- 1. Determination of pH and alkalinity of water samples
- 2. Determination of Total Hardness and its components of water samples
- 3. Determination of Chlorides of water samples
- 4. Determination of Turbidity and optimum dose of alum for raw water samples.
- 5. Determination of Optimum dose of chlorine and residual chlorine for water samples.
- 6. Determination of calorific value and/or energy content of the solid waste.
- 7. Determination of concentration of trace metals (Al, Mn, Cu, Ni, Zn, Pb, Cd, Fe, N, P. K) from water, solid waste, air and soil samples.
- 8. Determination of PM 2.5 in ambient air samples.
- 9. Determination of concentration of Particulate matter and gaseous pollutants in industrial stack.
- 10. Determination of concentration of carbon di-oxide from ambient air/industry/automobile
- 11. Site visit
- 12. Study of EIA report of infrastructure project.

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

39: ESTIMATING, COSTING AND VALUATION

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 3Hours / Week Theory -4 Credits
Practical: 2 Hours / Week Termwork -1 Credit

Tutorial: 1 Hour/ week

Course Pre-requisites

The Students should have knowledge of

- 1. Building Construction and Building planning and Design.
- 2. Structural Design I and Structural Design II.
- 3. Surveying and leveling
- 4. Environmental Engineering I
- 5. Infrastructure Engineering

Course Objectives

To prepare the students to make estimate of building, road, and other civil engineering structures

Course Outcomes

The student will be able to

- 1. explain the specifications for different construction works and materials...
- 2. prepare estimate of the buildings, and other civil engineering structures.
- 3. Carryout rate analysis of different items of construction work.
- 4. carryout the valuation of civil engineering structures.
- fill the tenders documents.
- 6. compare different types of contracts

UNIT - I (6 Hours)

Estimating: Definition, importance of quantity surveying, types of estimates, data required for estimates, units of measurement & principles deciding the units, mode of measurement of building works. Abstracting, bill of quantities. Provisional & prime cost items, contingencies, establishment charges, centage charges, Schedule of rates (D. S. R.)

Approximate Estimate: Definition, purpose, methods of approximate estimation of building & other civil engineering projects like roads, irrigation & water supply &sanitary engineering, electrical works.

UNIT - II (6Hours)

Methods of Taking out quantities: long wall, short wall method and centre line method of taking out quantities for different items of building. Estimate of RCC members. IS Codes used for estimating.

Specifications: Definition& purpose, types, standard specifications. Drafting detailed specifications with reference to materials, quality, workmanship, method of execution, mode of measurement and payment, for major items such as earthwork, stone/brick masonry, plastering, ceramic tile flooring, R.C.C. work.

UNIT - III (6Hours)

Analysis of rates: Factors affecting cost of an item of work, materials, sundries, labour, Tools & plant, overheads & profit. Task work - definition & factors affecting task work. Analysis of rates of any five items.

Estimate of Road: Methods of estimate of earthwork for road, canal. Estimate of different types of roads.

UNIT - IV (6Hours)

Valuation of Properties: Purpose, nature of value, price, cost and value, types of value. Factors affecting value of property. Concept of free hold and lease hold property.

Depreciation & methods of working out depreciation, sinking fund, Years purchase, out goings. Methods of Valuation of Building: Land & building basis, Rental basis, Reproduction & replacement cost basis. O₁ form

UNIT - V (6Hours)

Tenders: Definition. Methods of inviting tenders, tender notice, Prequalifications of contractor, tender documents, preparation of tenders. Submission in 3 bid/ 2 bid or single bid system. Qualitative and quantitative evaluation of tenders, E tendering. Comparative statement, pre- bid conference, acceptance of tenders, various forms of BOT tenders, global tendering. (A mockup exercise of preparation, submission, opening of tender documents is suggested). PPP contracts.

UNIT - VI (6Hours)

Contracts: General idea, types of contracts viz: lump sum, item rate, cost plus, Conditions of contracts. FIDIC document, standard contract conditions published by MOS and PI, Law of contract. Definition, objective & essentials of valid contract.

Conditions of contract: General and Specific conditions. Condition regarding EM, SD, time as an essence of contract. Important conditions regarding addition, alteration, extra items, testing of materials, defective work, subletting, powers delegated to Engineer incharge regarding the above aspect, defect liability period, retention money, interim payment or running account bills, advance payment, secured advance, final bill.

Settlement of disputes viz. dispute resolving board, arbitration, concept of partnering. Indian Contract Act. Liquidated damages, termination of contract.

Assignments

- 1. Approximate estimate of different types of buildings
- 2. To determine quantities of different items of building and preparation of specifications for construction materials (Any five)

- 3. Rate analysis.
- 4. To carryout the valuation of existing building.
- 5. Mock up exercise of submission of tender.
- 6. Types of contracts.
- 7. To prepare estimate of plumbing of building.
- 8. To prepare roak estimate.

Term Work

- Estimate of different structures using long wall short wall method and centre line method
- 2. Detailed estimate of a single storied R. C. C. framed building using D.S.R. rates
- 3. Working out quantities of steel reinforcement for a slab, a beam, column, footing and preparing bar bending schedule.
- 4. a) Detailed estimate of roadwork . b) Assignment on road earthwork calculations.
- 5. Estimating quantities for any two of the following
 - a) House drainage & water supply arrangement.b) Pipe culvert or slab culvert. c) Septic tank.
- $\hbox{6.} \quad \hbox{Drafting detailed specifications of any five items} \, .$
- 7. Assignment on valuation of building. (01 form)
- 8. Preparation of draft tender notice.
- 9. Rate analysis for any five items.

Text Books

- 1. Estimating and Costing By: Rangwala Published By: Charotar Publishing House, Anand
- 2. Estimating, Costing Specifications & valuation in Civil Engineering By: M.Chakraborty

Reference Books

- 1. Estimating and Costing in Civil Engineering: Theory and Practice, By: B.N Dutta. Published By: S. Dutta & Company, Lucknow.
- 2. Civil Engineering Contracts & Estimates By: B.S.Patil Published, Orient LongmanLtd. Mumbai.
- 3. I.S.1200 (Part 01 to 25): Methods of Measurement of Building and Civil Engineering Works.
- 4. D.S.R: District Schedule of Rates

Syllabus for Unit Test

Unit Test -1 UNIT – I,II,III

Unit Test -2 UNIT – IV, V, VI

40 : GEOTECHNICAL ENGINEERING

TEACHING SCHEME CREDITS ALLOTTED

Theory: 03Hours / Week Theory: 03 Credits
Practical: 02Hours / Week Termwork: 01 Credit

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering Mathematics
- 2. Engineering Mechanics
- 3. Fluid Mechanics

Course Objectives

To make student capable

to determine the properties of soil and use of soil as a construction material.

Course Outcomes

The student will be able to

- 1. determine weight volume relation in soil as a three phase system
- 2. determine index properties of soil.
- 3. carryout the compaction and consolidation process.
- 4. calculate the geostatic stresses and coefficient of permeability.
- 5. measure the shear strength of soil by various methods.
- 6. calculate the active and passive earth pressure by various methods.

UNIT - I (6 Hours)

Introduction to soil mechanics

Soil, Soil formation, soil types its composition, soil structures, clay mineral, soil mechanics, history and development of soil mechanics, basic definitions, weight volume relations in soil as three phase system, soil classification systems – USCS, IS, HRB, Textural classification, Activity of clay, Sensitivity of clay, Thixotrophy of clay

UNIT - II (6 Hours)

Index Properties of Soil

Index properties of soil – Water content, specific gravity, particle size distribution, Consistency limits, density, relative density

UNIT - III (6 Hours)

Permeability and Seepage Analysis

Stresses within a soil, effective stress principle, stress point and stress path, Soil - water systems- capillarity, flow, Darcy's law, permeability, and tests for its determination, head gradient and potential, seepage pressure, Upward flow condition, 2 D flow, Laplace equation, flow net and applications.

UNIT - IV (6 Hours)

Compaction and Stress Distribution

Compaction: - Laboratory compaction tests; Factors affecting compaction; Structure and engineering behaviour of compacted cohesive soils; Field compaction; compaction specifications and field control.

Stresses in soil: Geostatic Stresses, stress distribution, Bossinsque's Theory for point load, Westergaard's theory

UNIT - V (6 Hours)

Shear Strength

a) Introduction- Shear strength an Engineering Property. Mohr's stress circle, Mohr-Coulomb failure theory. The effective stress principle-Total stress, effective stress and neutral stress / porewater pressure. Peak and Residual shear strength, factors affecting shear strength. Stress-strainbehavior of sands and clays. b) Measurement of Shear Strength- Direct Shear test, Triaxial Compression test, UnconfinedCompression test, Vane Shear test. Their suitability for different types of soils, advantages and disadvantages. Different drainage conditions for shear tests.

UNIT - VI (6 Hours)

Earth Pressure Theories

- Earth Pressure- Introduction, Rankine's state of Plastic Equilibrium in soils- Active and Passive states due to wall movement, Earth Pressure at rest. Rankine's Theory- Earth pressure on Retaining wall due to submerged backfill,
- b) Backfill with uniform surcharge, backfill with sloping surface, layered backfill. Coulomb's Wedge theory. Rebhann's graphical method of determination of earth pressure.

Term Work

Term work shall consist of the following experiments (Any Ten)

- 1. Determination of water content by oven drying method
- 2. Determination of specific gravity of coarse and fine grained soil
- 3. Classification of soil by sieve analysis
- 4. Determination of consistency limits Liquid, plastic and shrinkage limit
- 5. Determination of in situ density test Core cutter and sand replacement method
- 6. Determination of coefficient of permeability by
 - a) Constant Head Method
- b) Falling Head Method
- 7. Determination of OMC and MDD by Standard Proctor Test and Modified Proctor Test
- 8. Determination of shear parameters by Direct Shear Test.
- 9. Determination of Unconfined Compression Strengthof soil
- 10. Determination of shear parameters Triaxial Shear Test
- 11. Determination of shear parameters Vane Shear Test

Assignment

- 1. Study of various relationships between weight and volume, numerical based on it and classification of soil.
- 2. Classification of soil based on the index properties of soil.
- 3. Study of permeability and numerical based on it.
- 4. Study of Proctor tests, different field compaction equipments.
- 5. Determination of shear strength, numerical problems based on it.
- 6. Numerical problems based on earth pressure.
- 7. Numericals based on stress distribution.
- 8. Numericals based on compaction properties.

Text Books

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

41 (A): ELECTIVE-I: FINANCIAL MANAGEMENT

TEACHING SCHEME CREDITS ALLOTTED

Theory: 03 Hours / Week Theory - 03

Course Pre-requisites

The Students should have knowledge of

- 1. Project Management
- 2. Economics and Management
- 3. Construction Techniques and machinery.

Course Objectives

To make student capable to prepare company's financial position for decision making.

Course Outcomes

The student will be able to

- 1. manage financial planning of a construction project.
- 2. forecast financial requirement of a construction firm.
- 3. analyze Time-Value of Money.
- 4. determine working capital for construction Project.
- 5. apply theories of capital structures.
- 6. carry out risk analysis of budget.

UNIT - I (6 Hours)

Introduction to Financial Management

Scope and Functions of Financial Management, Role of Finance Manager, Organization of the Finance function, Financial Planning, Financial Statement Analysis UNIT - II (6Hours)

Financial Planning

Introduction, Objectives and steps in Financial planning, Factors affecting financial planning, estimation of financial requirement of a construction firm, Capitalization, Sources of Financing

UNIT - III (6 Hours)

Capital Budgeting

Time Value of money – Future value of a single cash flow, annuity, Present value of Single Cash flow, Present Value of Uneven Cash flow, Discounting and Non-discounting techniques –NPV, IRR, BCR and Payback period.

UNIT - IV (6 Hours)

Working Capital Management

Importance and Objectives, factors affecting working Capital, Determination of Working Capital, Working capital financing policy

UNIT - V (6 Hours)

Capital Structure

Introduction, Salient features of Capital Structure, Factors influencing capital structure, Theories of Capital structures – EBIT and MM approach, Financial Management in India.

UNIT - VI (6 Hours)

Risk Analysis in Capital Budgeting

Introduction, Types and Sources of Risk in Capital Budgeting, Risk Adjusted Discount Rate, Certainty Equivalent Approach, Probability Distribution Approach, Sensitivity Analysis, Simulation Analysis

Assignments: (Any Six)

- 1. Assignment on Financial Management.
- 2. Assignment on Financial Planning.
- 3. Assignment on Balance Sheet & Profit-Loss statement.
- 4. Assignment on Cash flows.
- 5. Assignment on NPV, BCR and IRR
- 6. Assignment on working Capital Management with reference to case study.
- 7. Assignment on EBIT approach.
- 8. Assignment on MM approach.
- 9. Assignment on sensitivity analysis.
- 10. Assignment on simulation.

Text Books

- 1. Financial Management, I.M. Pande, Vikas Publication
- 2. Financial Management, C. Paramasivam& T. Subramaniam, New Age International (P) Limited, Publishers.

Reference Books

- 1. Financial Management, An Introduction, Jim McMenamin, Taylor and Francis
- 2. Financial Management, M.Y. Khan, P.K. Jain, Tata McGraw Hill Publication
- 3. Financial Management, Prasanna Chandra, Tata McGraw Hill Publication

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

41 (B): ELECTIVE-I - ADVANCED STRUCTURAL ANALYSIS

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 3 Hours / Week

Theory: 3 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Structural Analysis- I
- 2. Structural Analysis- II

Course Objectives

To make students capable to analyse the structure.

Course Outcomes

The student will be able to

- 1. calculate deflection of beams and frames using Castigliano's first theorem.
- 2. analyze deflection of beams and frames using Castigliano's second theorem,
- 3. analyze indeterminate beams using Stiffness matrix method.
- 4. analyze indeterminate frames using Stiffness matrix method.
- $5. \hspace{0.5cm} \text{analyze indeterminate beams using Flexibility matrix method.} \\$
- $6. \hspace{0.5cm} \hbox{analyze indeterminate frames using Flexibility matrix method.} \\$

UNIT - I (06 Hours)

Deflection of Beams and Plane Frames using Strain Energy Method

Deflection of determinate beams and rectangular portals by application of Castigliano's first theorem;

UNIT - II (06 Hours)

Analysis of Beams and Plane Frames using Strain Energy Method

Analysis of indeterminate beams and rectangular portals by application of Castigliano's second theorem with indeterminacy up to two degrees.

UNIT - III (06Hours)

Analysis of Beams using Stiffness Matrix Method

Stiffness matrix method of analysis, Formulation of stiffness matrices, Applications to indeterminate beams. (Involving not more than three unknowns).

UNIT - IV (06 Hours)

Analysis of Plane Frames using Stiffness Matrix Method

Formulation of stiffness matrices for frames, Applications for rigid jointed indeterminate rectangular plane frames. (Involving not more than three unknowns).

UNIT - V (06 Hours)

Analysis of Beams using Flexibility Matrix Method

Flexibility matrix method of analysis, Formulation of flexibility matrices, Applications to indeterminate beams. (Involving not more than three unknowns).

UNIT - VI (06 Hours)

Analysis of Plane Frames using Flexibility Matrix Method

Formulation of flexibility matrices for frames, Applications for rigid jointed indeterminate rectangular plane frames. (Involving not more than three unknowns).

Assignments

- 1) Calculate deflection of beams using Castigliano's first theorem
- 2) Analyse indeterminate beams or rectangular portals by application of Castigliano's second theorem
- 3) Calculate stiffness matrix for beams
- 4) Calculate stiffness matrix for frames
- 5) Calculate flexibility matrix for beams
- 6) Calculate flexibility matrix for frames
- 7) Analyse beam using stuffnes matrix.
- 8) Analyse frame using stiffness.
- 9) Analyse beam using flexibility matrix.

Reference Books

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

41 (C): ELECTIVE I: URBAN WATER MANAGEMENT

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 03Hours / Week Theory:03 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Physics, Chemistry, Mathematics and Statistics
- 2. Ecology, Hydrology, Environment and Climate Change
- 3. Water Engineering and Management

Course Objectives

To learn Urban Water Management (UWM) which promises a better approach than the current system, in which water supply, sanitation, storm water and wastewater are managed by isolated entities, and all four are separated from land-use planning and economic development and adopt UWM and its adaptive, iterative processes will help cities significantly reduce the number of people without access to water and sanitation by providing water services of appropriate quantity and quality, thereby improving the health and productivity of urban residents.

Course Outcomes

The student will be able to

- Understand how cities are growing and changing which is leading to
 describing the promise of IUWM and how some city case studies that
 explore the ways in which aspects of IUWM have been put into practice,
 since every city faces a different challenge and requires contextappropriate solutions.
- 2. Focus on the implications of these changes for urban water resources: in the past, water security efforts focused on water quantity and understand how new concerns about water quality are now emerging.

- 3. Understand and design the new tools and strategies to shift from urban water management to IUWM, and develop flexible and adaptable urban water systems.
- 4. Gain insight that how UWM can contribute to cities' resilience in the face of climate change and analyze changing climate demanding water management be approached in a different way.
- 5. Understand, apply and develop an enabling environment for the change toward a framework for integrated urban water management.
- 6. Design, analyze and apply practical approaches for constructing and building GREENand SMART cities that are inclusive, productive, well governed, and sustainable which leads to foster a new culture of urban water management.

UNIT - I (6 Hours)

Introduction to Urban Water Management

Introduction to Urban Water Management (UWM): Concept, Need, The changing urban context, Expanding city limits, Consequences of globalization and Urbanization, Urban-Rural Conflicts, Special challenges for some cities

UNIT - II (6 Hours)

Water resources and urbanization

Water: Sources, Quantity and Quality, Wastewater: Sources, Quality and Reuse, Effects on Water Demand due to Urbanization, Water Cess Act, Water(Prevention and Control) Act 1974

UNIT - III (6 Hours)

UWM tools and management strategies

Storm water management, Water reclamation and reuse, Water audits and efficient use, Flexible and adaptable urban water systems, Tariffs, payments and other economic tools, Benefit Cost Ratio for Urban Water Management

UNIT - IV (6 Hours)

Climate Change Challenge

Climate Change: Introduction, Cause and Consequences, Climatic Variations in India in recent years, Effect of Climate change on Water Resources and Sanitation, Urban contributions to climate change, Response options, Resilience to climate change.

UNIT - V (6 Hours)

Conventional and Integrated Urban Water Management

Conventional Urban Water Management: Introduction, Present Scenario, Advantages and Disadvantages, Integrated Urban Water Management (IUWM): Introduction, Need, Advantages, Urban water governance, Application of IUWM for SMART CITY

UNIT - VI (6 Hours)

Framework for integrated urban water management

Role of Central and Local governments, Involvement of Private sector, Business opportunities and Employment Enhancement, Participation of NGO's and Stakeholder, Sustainable Development and Practices

Assignments

- 1. Collection of data how cities are growing and changing describing the promise of IUWM
- 2. Study of urban water resources: in the past and how new concerns about water quality are now emerging.
- 3. Design new tools and strategies to shift from Conventional urban water management to IUWM
- 4. Study and data collection of climate change and analyze changing climate demanding water management be approached in a different way.
- 5. Design framework for integrated urban water management for Existing and Futuristic SMART Cities

- 6. Design, analyze and apply practical approaches for constructing and building GREEN and SMART cities to foster a new culture of urban water management.
- 7. Field Visit and Report on SMART City and/orTownship in India and/or abroad
- 8. Suggest suitable plan for a city to be smarter.

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT - IV, V, VI

41 (D): ELECTIVE-I: DOCKS, PORTS AND HARBOURS

TEACHING SCHEME CREDITS ALLOTTED
Theory: 03 Hours / Week Theory: 03 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Fluid Mechanics
- 2. Advanced Surveying (Hydrographic Survey)

Course Objectives

To make student to understand different marine structures and their design considerations

Course Outcomes

The student will be able to

- 1. describe development of port.
- 2. describe the wave, tide and the phenomenon related to the same.
- 3. explain different harbour and port facilities.
- 4. design the breakwaters.
- 5. explain the port planning.
- 6. explain marine pollution.

UNIT - I (6 Hours)

Introduction to Ports and Harbours

History, development of port and ship construction technology along with International trade, Port Development – Indian Scenario

UNIT - II (6 Hours)

Waves and Tides

Concept of generation, propagation and form of wave in coastal zone, global tide phenomenon, types of tides concept of wave tranquility, resonance, coastal sediment transport

UNIT - III (6 Hours)

Ports and Harbours

Harbour : classification, facilities and structures, Approcah channel, Marker Buoys, Breakwater layout, Berth and Jetties, Bulk oil container

Ports: Loading unloading, storage, customs and relevant facilities, security, hospital colony, Associated Services, Maintenance facilities, Dry docks, Slipway, locks.

UNIT - IV (6 Hours)

Marine Structures

General design aspects, breakwaters - function, types general design principles, wharves, quays, jetties, piers, pier heads, dolphin, fenders, mooring accessories- function, types, suitability, design and construction features.

UNIT - V (6 Hours)

Port Planning

Modernization of port, Lifting and loading unloading (RORO) facilities, Computerization, Automation, berth occupancy, Port Cost Analysis, Dredging and disposal technology.

UNIT - VI (6 Hours)

Port Development

Role of port development and national policy, Public and private sector, Marine pollution and environmental aspects.

Assignments:

- 1. Explain history and development of port in India.
- 2. Write the concept of wave generation and propagation in coastal zone
- 3. Explain the facilities provided at ports and harbours.

- 4. Design a breakwater with the data given.
- 5. Write different aspect of port planning.
- 6. National policy for port development and environmental aspect of it.
- 7. Site visit to CW & PRS

Text Books

- 1. Basic Coastal Engineering, R.M.Sorenson, J.Wiley& Sons, 1978
- 2. Docks and Harbour Engineering,H.P.Oza and G.H.Oza, Charotar Publishing 2013
- 3. A Course in Docks and Horbour Engineering, S.P.Bindra, Dhanpatrai Publications
- 4. Harbour, Dock and Tunnel Engineering, R. Shrinivasan, Charotar Publishing House Pvt.Ltd (2013)

Reference Books

- 1. Oceanographical Engineering, R.L.Wiegel, Prentice -Hall 1964
- 2. Coastal Engineering, Vols. 1 and 2 , R. Silvester Elsevier Scientific Publishing Co., 1974
- 3. N I O Design Manual

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III
Unit Test -2 UNIT – IV, V, VI

41 (E): ELECTIVE-I: HUMAN RESOURCE MANAGEMENT

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 3 Hours / Week Theory: 03 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering Economics Management
- 2. Project Management

Course Objectives

To develop the skill of human resource management in construction industry.

Course Outcomes

The student will be able to

- 1. discuss the significance of human resources in construction industry.
- 2. plan human resources.
- 3. describe the recruitment and selection process.
- 4. discuss the significance of training and development of employees.
- 5. analyze the employee benefits and incentives.
- 6. describe employee management relations.

UNIT - I (6 Hours)

Introduction

History of HRD, Objectives, Functions, HRD inConstruction industry, status of construction labour.

UNIT - II (6 Hours)

Human Resource Planning

Formulating human resource plans, various methods, job analysis, job specifications and job design inconstruction projects, forecasting personal needs and supply in construction sector.

UNIT - III (6 Hours)

Recruitment & selection

Selecting project manager & project team, external & internal recruitment. Data gathering methods, skill requirement of construction personnel.

UNIT - IV (6 Hours)

Training & Development

The training Process, Individual and organizational development, change management, performance appraisal, use of performance appraisal information establishing the evaluation system, Performance Management / Encouragement, Rewarding Employees

UNIT - V (6 Hours)

Employee Benefits

Employee health and safety, wage and salary administration, incentive system, wages of construction industry, Retirement and pensions.

UNIT - VI (6 Hours)

Employee Management Relations

Collective Bargaining, Effective ways of working, tradeunions act, labour welfare act, payment of wages act, workers compensation act ,contract labour act, management of conflicts.

Assignments

- 1. Case study of HRD in construction industry
- 2. Formulating human resource plan
- 3. Case study of external and internal recruitment
- 4. Report on establishing evaluation system for performance appraisal
- 5. Importance on Employee benefits
- 6. Report on conversation with HR of any construction industry

Text Books

- 1. "Human Resource Development and Management" by "Biswanath Ghosh", Vikas Publishing House Pvt. Ltd.
- 2. "Human Resource Management" by "S.C. Agarwal", Dhanpat Rai Publications
- 3. Personnel & Human resource Management C.B. Mamoria, Himalaya Publishing House

Reference Books

- 1. Human resource management Subbarao, Himalaya Publishing House
- 2. Human Resource Management— K. Aswathappa, TMH Pvt. Ltd
- 3. "Human Resource Management" by "John Stredwick"
- 4. International Human Resource Management--- Gary Diesler

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B.TECH (CIVIL) - SEM-VI

41 (F): ELECTIVE-I - GREEN CONSTRUCTION PRACTICES.

TEACHING SCHEME

CREDITS ALLOTTED

Theory: 03Hours / Week Theory:03 Credits

Course Pre-requisites

The Students should have basic knowledge of

conventional construction practices, green materials and immerging trends in the green building industry.

Course Objectives

- 1. To understand the concept of sustainability and sustainable development
- 2. To familiarize students with various environmental issues
- 3. To familiarize students with various Green Building Rating Systems
- 4. To understand selection criteria and implementation options for various green material
- 5. To inform the various alternatives materials and construction practices.
- 6. To inform the various recycled and innovative materials and construction techniques through case studies.

Course Outcomes

The student will be able to

- 1. evaluate the immerging trends in the fields of sustainable development and environment.
- 2. evaluate the effects of construction industry on environment.
- 3. understand the various evaluation systems for green buildings.
- 4. implement various green material selection and construction techniques.

- 5. determine immerging trends in alternative materials and construction techniques.
- 6. determine immerging trends in the field of recycled and innovative materials

UNIT - I (06 Hours)

Introduction to Sustainable Development

Basic Concepts of Sustainable Development - History of sustainable development in India and around the world –Sustainable Development an overview Bruntland Commission, UNFCCC – Goals of sustainable development – Energy, Environment and Financial sustainability.

UNIT - II (06 Hours)

Environment Management and Impact Assessment

Environment Management Basic: Introduction to biodiversity, Ecosystem and impacts of climate change on environment Environment Laws and Policies: EP Act (Environment Protection Act) Acts related to pollution and climate change Environment Impact Assessment: Introduction, goals and process of impact assessment

UNIT - III (06 Hours)

Sustainable Architecture and Green Buildings

Green Ratings System: in India and around the world- an introduction Green Rating Systems in India: LEED (IGBC), Griha – Ecohousing, BEE Rating – Codes and standards for Green Building.

UNIT - IV (06 Hours)

Green Building Materials and Construction Techniques

Introduction to Green materials – Life Cycle Analysis – Life Cycle Cost Analysis – Selection criteria of Materials and Construction Techniques Green Buildings. UNIT - V (06 Hours)

Alternative Material and Construction Techniques:

Bamboo, ferrocrete, cob-adobe, etc and their construction techniques.

UNIT - VI (06 Hours)

Recycled and Innovative Materials and Construction Techniques

Recycled glass, plastic, recycled debris block. Process of manufacture and construction.

Assignments

- 1. Assignment on various building practices carried out conventionally and the consequences.
- 2. Assignment on Eco system and food chain,
- 3. Assignment on Environmental Impact.
- 4. Report writing on Green Material.
- 5. Report writing on Indoor Environmental Quality Enhancement facilities.
- 6. Case Studies
- 7. Assignment on Sustainable Development.

Text Books

- 1. Dominique Gauzin Muller "Sustainable Architecture and Urbanism: Concepts, Technologies
- 2. Slessor, Eco-Tech: "Sustainable Architecture and High Technology", Thames and Hudson 1997.
- 3. Ken Yeang, "Ecodesign : A manual for Ecological Design", Wiley Academy, 2006.

Reference Books

- 1. Francis D.K. Ching, Ian M. Shapiro: "Green building Illustrated"
- 2. Kumar, Surender, Managi, Shunsuke: "The Economics of Sustainable Development The Case of India"

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT - IV, V, VI

B.TECH (CIVIL) - SEM-VI

41 (G): ELECTIVE-I:NUMERICAL METHODS IN CIVIL ENGINEERING

TEACHING SCHEME CREDITS ALLOTTED

Theory: 3 Hours / Week Theory: 3 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering Mathematics
- 2. Concept of differentiation and integration
- 3. Partial differential equations.

Course Objectives

To give a broad background to numerical methods common to various branches of civil engineering to the student.

Course Outcomes

The student will be able to

- find out core concepts of error estimate and accuracy of numerical solutions.
- 2. use direct solutions of linear systems.
- $3. \quad \ use iterative solutions of linear systems.$
- 4. use direct solutions of non-linear systems.
- 5. use numerical solutions to solve partial differential equations.
- 6. use numerical integration methods to solve partial differential equations.

UNIT - I (6 Hours)

Introduction to Numerical Methods

Introduction, need of studying numerical methods, Sources of error in numerical solutions: truncation error, round off error. Order of accuracy - Taylor series expansion.

UNIT - II (6 Hours)

Direct Solutions of Linear Systems

Gauss elimination, Gauss Jordan elimination. Pivoting, inaccuracies due to pivoting. Factorization, Cholesky decomposition.

UNIT - III (6 Hours)

Iterative Solutions of Linear Systems

Jacobi iteration.Gauss Seidel iteration.Convergence criteria.

UNIT - IV (6 Hours)

Direct Solutions of Nonlinear Systems

Newton Raphson iterations to find roots of a 1D nonlinear equation.

Generalization to multiple dimensions.

Newton Iterations, Quasi Newton iterations.

Local and global minimum, rates of convergence, convergence criteria.

UNIT - V (6 Hours)

Numerical Methods to solve partial differential equations.

Difference operators (forward, backward and central difference), Stability and accuracy of solutions, Application of finite difference operators to solve initial and boundary value problems.

Numerical quadrature: Trapezoidal rule, simpsons rule, Gauss quadrature.

UNIT-VI (6Hours)

Numerical integration of time dependent partial differential equations

Parabolic equations: algorithms - stability, consistency and convergence, Lax equivalence theorem. Hyperbolic equations: algorithms - Newmark's method, stability and accuracy, convergence, multi-step methods.

Assignments: Any Six

- 1. Assignment problem based on 'Gauss -Jordan Method'.
- 2. Assignment problem based on 'Gauss -Elimination Method'.
- 3. Assignment problem based on 'Gauss -Seidel Iteration Method'.
- 4. Assignment problem based on 'Newton-Raphson Method'-1D solution.
- 5. Assignment problem based on 'Newton –Raphson Method'-multidimensional solution.
- 6. Solution of Partial Differential Equation using 'Trapezoidal Rule'.
- 7. Solution of Partial Differential Equation using 'Simposon's Rule'.
- 8. Solution of Partial Differential Equation using 'Gauss Quadrature Rule'.
- 9. Solution of Time Dependent Partial Differential Equation .

Text Books

- 1. Balaguruswamy " Numerical Methods" Tata Mcgraw Hill Publications
- 2. Dr.V.M.Domkundwar "Numerical Methods"
- 3. S.S.Sastry "Introductory Methods of Numerical Analysis", Prentice Hall India

Reference Books

- 1. T.J.R.Hughes"The Finite Element Method", Prentice Hall, Englewood Cliffs, NJ, 1987.
- 2. I.Stakgold , "Green's functions and Boundary Value Problems", Wiley, 1998.
- 3. D.Dahlquist and A. Bork "Numerical Methods", Dan Prentice-Hall, Englewood Cliffs, NJ,. 1974.

Syllabus for Unit Test

Unit Test -1 UNIT – I,II,III

Unit Test -2 UNIT - IV,V,VI

B.TECH (CIVIL) - SEM-VI

42: PROFESSIONAL SKILLS DEVELOPMENT (VI)

TEACHING SCHEME

CREDITS ALLOTED

Theory: 4 Hours / Week

Theory: 4 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Concepts of Maths, Logical reasoning and English Grammar taught in the last semester.
- 2. A basic knowledge of Group Discussion, DO's and Don'ts done in the previous sem.
- 3. Basic knowledge of writing skills, importance of professionalism in emails and letters.
- 4. Knowledge on the concepts of criticism, feedback and conflicts.
- 5. Awareness of the interpersonal skills like team work and introduction to Leadership taught during the last semester.
- 6. Brief idea about professional and business meeting etiquettes.

Course Objectives

The Professional Skills Development 6 is an extension of PSD- 5 with focus on the remaining topics of Aptitude and Grammar. The further complex concepts of Permutation and Combination, Probability and grammatical topics such as prepositions etc would be dealt with. The objective here is to acquaint them with the level of complexity presented in recruitment tests and also provide them techniques to solve such question with tricks/methods in a very short period. The English communication and soft skills section of PSD-6 focuses on the other important aspects of soft skills training students such as techniques of effectively handling Personal Interviews during placement process and understand the dynamics of structured Resume and PIs

Course Outcomes

The student will be able to

1. Learn further concepts of Maths, Logical reasoning and English grammar and apply short cuts/ tricks to solve questions in less time. Learn

- remaining 25-30 rules of grammar topics such as prepositions, conjunctions etc relevant from the recruitment point of view.
- 2. Learn to handle vocabulary questions such as synonyms and analogies in recruitment test and other competitive exams
- 3. Understand and Learn techniques/Strategies of how to handle Personal interviews during recruitment process. Through Mock PIs students would be taught the appropriate ways of answering tricky questions in Interview and would learn the correct body language etc to be demonstrated in an interview process.
- 4. They would be acquainted with the differences between CV, Bio- Data and Resume and they would learn the correct format of a Résumé along with methods and styles to make their Resumes interesting.
- Students would learn to incorporate various rules of written communication in business writing scenario with the appropriate tone and words.
- 6. Understand the importance of grooming, body language and etiquettes in the corporate sector. They would be able to conduct themselves in a professional and impressive way by conducting themselves according to situations in the professional sector.

Unit I (24Hours)

Aptitude (Maths, Logical Reasoning, English)

- Maths
 - Permutation & Combination
 - Probability
 - Maths Revision -1
 - Maths Revision 2
- Logical Reasoning
 - Matching, Selection & Arrangement
 - Clocks & Calendars, Visual Reasoning
 - Input, Output & Flow Chart.

- Reasoning Revision- 1
- Reasoning Revision-2
- English
 - Grammar III– (Prepositions& Conjunctions)
 - Grammar- (Articles & Parallelism)
 - Verbal Ability Revision- I

Unit II (24Hours)

Soft Skills & English Communication

- Resume-I
- Resume- II
- Mock GD
- Mock GD
- Personal Interviews-I
- Personal Interviews-II
- Mock PI
- Mock PI
- Extempore Speeches, Group Interviews
- Written Skills- Revision
- Stress Management
- Business Writing Tones.

Text Books

- 1. APAART: Verbal Ability
- 2. APAART: Logical Reasoning
- 3. APAART: Quantitative Aptitude
- 4. APAART: Speak Well 1 (English Language and Communication)
- 5. APAART: Speak Well 2 (Soft Skills)

RULES REGARDING ATKT, CONTINUOUS ASSESSMENT AND AWARD OF CLASS Standards of Passing and ATKT Rules

- 1. For all courses, both UE (Universtiy Evaluation) and IA (Internal Assessment) constitue separate heads of passing (HoP). In order to pass in such courses and to 'earn' the assigned credits.
 - a) The learner must obtain a minimum grade point of 5.0 (40 % Marks) at UE and also a minimum grade point of 5.0 (40 % Marks) at IA.

OR

- b) If he/she fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for course is atleast 6.0 (50% Aggregate). The GPA for a course will be calculated only if the learner passes at the UE.
- 2. A student who fail at UE in a course has to reappear only at UE as a backlog candidate and clear the HoP. Similarly, A student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the HoP.

Rules of ATKT

- 1. A student is allowed to carry backlog of courses prescribed for B.Tech Sem I, III, V, VII to B.Tech Sem II, IV, VI, VIII respectively.
- 2. A student is allowed to keep term of Sem III, if he/she is failing in any number of subjects of Sem I & II.
- 3. A student is allowed to keep term of Sem V, if he/she is failing in any number of subjects of Sem III & IV but passed in all subjects of Sem I & II.
- 4. A student is allowed to keep term of Sem VII, if he/she is failing in any number of subjects of Sem V & VI but passed in all subjects of Sem III & IV.

Award of Class for the Degree Considering CGPA Award of Honours

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The Criteria for the Award of Honours at the End of the Programme are as given below.

| Range of CGPA | Final Grade | Performance | Equivalent Range |
|----------------------------------|--------------|--------------|------------------|
| Kalige of CurA | rillal Graue | Descriptor | of Marks (%) |
| $9.50 \le \text{CGPA} \le 10.00$ | 0 | Outstanding | 80 ≤ Marks ≤ 100 |
| $9.00 \le \text{CGPA} \le 9.49$ | A+ | Excellent | 70 ≤ Marks ≤ 80 |
| $8.00 \le CGPA \le 8.99$ | A | Very Good | 60 ≤ Marks ≤ 70 |
| $7.00 \le \text{CGPA} \le 7.99$ | B+ | Good | 55 ≤ Marks ≤ 60 |
| $6.00 \le CGPA \le 6.99$ | В | Average | 50 ≤ Marks ≤ 55 |
| $5.00 \le \text{CGPA} \le 5.99$ | С | Satisfactory | 40 ≤ Marks ≤ 50 |
| CGPA Below 5.00 | F | Fail | Marks Below 40 |

BHARATI VIDYAPEETH UNIVERSITY, COLLEGE OF ENGINEERING, PUNE

Sr. No. 26, 27, Pune Satara Road, Pune - 411 043. Tel.- 020 2410 7390/391, Fax- 020 2437 2998 E-mail- bvucoepune@bharatividyapeeth.edu Website- www.bvucoepune.edu.in

BHARATI VIDYAPEETH DEEMED UNIVERSITY Pune.

Faculty of Engineering & Technology Programme : B. Tech. (Civil)

COURSE STRUCTURE AND SYLLABUS

(Choice Based Credit System - 2014 Course) B. Tech. (Civil) – Sem VII & VIII

Bharati Vidyapeeth Deemed University, Pune

Bharati Vidyapeeth, the parent organization of this University is one of the largest educational organizations in the country. It has 171 educational units under its umbrella including 67 Colleges and Institutes of conventional and professional education.

The Department of Human Resource Development, Government of India on the recommendations of the University Grants Commission accorded the status of "Deemed to be University" initially to a cluster of 12 units of Bharati Vidyapeeth. Subsequently, 17 additional colleges / institutes were brought within the ambit of Bharati Vidyapeeth Deemed University wide various notifications of the Government of India. Bharati Vidyapeeth Deemed University commenced its functioning on 26th April, 1996.

Constituent Units of Bharati Vidyapeeth Deemed University

- 1. BVDU Medical College, Pune.
- 2. BVDU Dental College & Hospital, Pune
- 3. BVDU College of Ayurved, Pune
- 4. BVDU Homoeopathic Medical College, Pune
- 5. BVDU College of Nursing, Pune
- 6. BVDU Yashwantrao Mohite College of Arts, Science & Commerce, Pune.
- 7. BVDU New Law College, Pune
- 8. BVDU Social Sciences Centre (M.S.W.), Pune
- 9. BVDU Yashwantrao Chavan Institute of Social Science Studies & Research, Pune.
- BVDU Centre for Research & Development in Pharmaceutical Sciences & Applied Chemistry, Pune
- 11. BVDU College of Physical Education, Pune.
- 12. BVDU Institute of Environment Education & Research, Pune
- 13. BVDU Institute of Management & Entrepreneurship Development, Pune
- 14. BVDU Poona College of Pharmacy, Pune
- 15. BVDU College of Engineering, Pune
- 16. BVDU Interactive Research School in Health Affairs (IRSHA), Pune
- 17. BVDU Rajiv Gandhi Institute of Information Technology & Biotechnology, Pune
- 18. BVDU College of Architecture, Pune
- 19. BVDU Abhijit Kadam Institute of Management & Social Sciences, Solapur
- 20. BVDU Institute of Management, Kolhapur
- 21. BVDU Institute of Management & Rural Development administration, Sangli
- 22. BVDU Institute of Management & Research, New Delhi

- 23. BVDU Institute of Hotel Management & Catering Technology, Pune
- 24. BVDU Yashwantrao Mohite Institute of Management, Malakapur-Karad
- 25. BVDU Medical College & Hospital, Sangli
- 26. BVDU Dental College & Hospital, Mumbai
- 27. BVDU Dental College & Hospital, Sangli
- 28. BVDU College of Nursing, Sangli
- 29. BVDU College of Nursing, Navi Mumbai

The status of University was given to a cluster of these colleges and institutes in appreciation of the high level of their academic excellence and for their potential for further growth.

During the last 20 years or so, the University has achieved higher pinnacles of academic excellence and has established its reputation to such an extent that it attracts students not only from various parts of India but also from abroad. According to a survey conducted by Association of Indian Universities, this University is one among the top ten Universities in the country preferred by the overseas students for admissions. At present, there are more than 850 overseas students from 47 countries on the rolls of constituent units of this University.

During the last 20 years, there has been tremendous academic expansion of the University. It now conducts in all 305 courses in its constituent units, of them 108 are Post Graduate, 45 are Under Graduate and 55 Diploma level courses. 12 Fellowship and 5 certificate courses. All the professional courses which the University conducts such as those of Medicine, Dentistry, Engineering etc., have approval of the respective statutory councils, viz., Medical Council of India, Dental Council of India, All India Council for Technical Education etc.

The University is a throbbing center of research activities and has launched Ph.D. programmes in 77 subjects and M.Phil in 3 subjects. It has also introduced quite few innovative academic programmes such as Masters in Clinical Optometry, M.Tech. in Nano Technology etc.

The University's performance and achievements were assessed by the "National Assessment and Accreditation Council" and it was reaccredited with a prestigious "A" grade in 2011. Some programmes of the constituent units such as College of Engineering at Pune, Management Institute in Delhi and others have also been accredited by "National Board of Accreditation". Three constituent units of Bharati Vidyapeeth Deemed University are also the recipients of ISO 9001-2001 certifications.

Bharati Vidyapeeth Deemed University College of Engineering, Pune

College Information:

Bharati Vidyapeeth University College of Engineering, Pune (BVUCOE) established in 1983, a constituent unit of BVU (University with 'A' Grade status by MHRD, accredited to Grade 'A' by NAAC in 2004 and 2011) and holds a place of pride and is amongst the most reputed institute. It has been ranked to 61st by National Institutional Ranking Framework (NIRF) with criteriawise ranking as 5th in Graduate Outcome (GO), 13th in Outreach and Inclusivity (OI), 44th in Teaching Learning Resources (TLR) and 62nd in Perception (PR). This also made institute to stand 4th in the State of Maharashtra. Further, DATAQUEST-CMR national survey also ranked this institute to 4th among private technical institutions of India, 29th by Times of India and 41st by OUTLOOK. This is the only institute selected by MHRD for its Technical Education Quality Improvement Programme (TEQIP-II – 1.1 Programme) for the grant of Rs. 4 Crores.

BVUCOE, Pune offers 09 graduate, 08 post graduates programmes and Doctoral programmes in 08 disciplines. All Programmes are accredited by National Board of Accreditation (NBA) twice and we have applied for third cycle of accreditation.

Institute has its own spacious well designed building measuring 26,286 sq. m. and it houses 101 labs, 43 class rooms, and 21 tutorial rooms. The library of the institute is a five storied building and houses periodical section, computer center, reading hall, reference section. It contents more than 60,000 books, 15,000 volumes, 80 national and 81 international journals subscription and digital library facility. Digital library of institute with 66,944 number of journals in e-form is one of the richest source of knowledge in e-form for students and faculty members. The Library, Laboratories, Equipments, Learning resources and Software constantly get upgraded and updated in tune with the changing time. An Investment of Rs.119.95 million is made in the last five years.

The structured faculty development programme has strengthened quality of Teaching Learning Process in the institute. 35 faculty members with Ph. D. qualifications have been proved as resources for research, innovations and sound Teaching – Learning Process. As a part of quality improvement programme 04 number faculty members were deputed to International Universities, Institutions of national importance such as IIT, NIT etc. for qualification improvement. Team of 206 faculty members with average experience 11.7 years and average age 38.3 years indicates teachers with fine blend of experience and youth. Faculty members are well conversant and trained for use of latest softwares and latest equipments being purchased every year as policy of upgrading laboratories. In last five years college has invested Rs. 119.95 million in laboratory upgradation. Institute organized 138 number of continuing education programmes in last five years to keep sharpen skills of faculty members. Further, 1389 faculty members were deputed to attend various workshops and training programmes for sharing and enhancing their knowledge. Faculty members also play active role in curriculum development as Member of Board of Studies of various subjects and other statutory bodies of the University.

The research quality is indicative of the university penchant for quality. The research publications in reputed international and national refereed journals and conferences have shown a steady and significant rise over the years which is aptly reflected by 1091 Research papers publications in reputed national and international journals in last five years. Grant

of Rs. 152.73 Lakhs from funding agencies such as UGC, DST, DRDO, AICTE etc. fetched by faculty members is strong indicator of research aptitude of faculty members. Seed money up to Rs. 3 lakhs under Institutionally Funded Research Programme (IFRP) nurtures research aptitude of faculty members. 575 number of publications in standard research databases such as SCOPUS, Web of Science, Google Scholar etc. in last five years throws light on quality of publications by faculty members of this institute. These publications by faculty members have received 137 number of citations in the same period. Institute has 02 patents to its credit and filed 05 patents.

The institute has collaboration with international universities such as North Carolina A & T State University, Greensboro, USA, Joint School of Nanoscience and Nanoengineering (JSNN), USA, The University of Tokushima, Japan, ARM University, USA and with industries such as TCS, SKF India Ltd. Every year one faculty member is deputed for Ph. D. programme in NCAT with scholarship. Students of M. Tech. (Nanotechnology) joins JSNN, USA to pursue their dissertation research work for six months with scholarship to the tune of \$1000 per month. Further, NCAT, USA, The University of Tokushima, Japan contributes intellectually as well as financially to organize biannual international conference NANOCON. Three editions of NANOCON are conducted since 2010 with their association. In association with Eduvance & GAATsis, a "Center of Excellence in Embedded Systems" is established in the Institute with donation of Educational kits like ARM development boards from ARM University Program and PSoC kits by Cypress Semiconductors are used for developing projects in the sponsored laboratory. TCS supports students and faculty members for faculty enablement programmes and student development programme. Establishment of Lubricant Conditioning Monitoring Laboratory is outcome of collaboration with SKF India Ltd.

Being Deemed University college takes advantage of academic autonomy in making the curriculum industry oriented and enable students to make employable. In-plant training (45 days), courses such as Professional Skill Development introduced as integrated part of course structure. In-plant training enable students to interact within their associated industries for gaining practical field experience and professional exposure. Curriculum is Choice Based Credit System which makes students path of joining international universities for their higher studies smoother.

Today, qualitative soft skill development in students is more pertinent to a student's professional career. The institute regularly arranges training programme in the area of personality development, aptitude test, group discussion and personal interview. Through its Employment Enhancement Programme (EEP) designed for third year students which comprises of communication skill quantities analysis, corporate culture, IT Training and soft skills. This programme is conducted in association with professional institutes of national repute for effective execution and implementation. To enhance their professional experience and get them head start in the industry, an innovative programme is initiated on student mentoring "Saturday @ BV", wherein speakers are entrepreneurs and high ranked corporate who share their experiences, hardship and their corporate journey.

In it's long, multi-pronged, persistent and pain staking efforts for producing quality engineering professionals, institute has produced more than 1068 entrepreneurs.

PROGRAMME: CIVIL ENGINEERING

Mission and Vision of the Institution:

Vision:

• To Be World Class Institute for Social Transformation Through Dynamic Education

Mission:

- To provide quality technical education with advanced equipments, qualified faculty members, infrastructure to meet needs of profession and society.
- To provide an environment conductive to innovation, creativity, research and entrepreneurial leadership.
- To practice and promote professional ethics, transparency and accountability for social community, economic and environmental conditions.

Mission and Vision of the Department Department of Civil Engineering:

Vision:

To create Civil Engineers who will transform Civil Engineering Industry for sustainable development of society.

Mission:

- To create Civil Engineers enriched with quality technical education.
- To inculcate innovation, creativity and research approach among the graduants.
- To create entrepreneurs practicing professional ethics.

Programme Educational Objectives

PEO1: To prepare students for career in Civil Engineering profession.

PEO2: To develop a responsible 'Entrepreneur'.

PEO3: To develop the student to cope up with the advancements in Civil Engineering.

Programme Outcomes

The Graduates will be able to

- 1. apply possessed knowledge of fundamental subjects to Civil Engineering problems.
- 2. analyze Civil Engineering problems.
- 3. design Civil Engineering structures with appropriate consideration to safety, economy, health and environmental considerations.
- 4. solve complex Civil Engineering problems by conducting investigations.
- 5. use modern Civil Engineering tools, techniques and software.
- 6. apply their professional responsibilities.
- 7. understand the impact of professional Engineering solutions in societal and environmental contexts.
- 8. exhibit professional ethics and norms of Engineering practice.
- 9. function individually and in teamwork.
- 10. communicate effectively in both verbal and written forms.
- 11. manage the work and finance of a Civil Engineering projects.
- 12. practice the use of lifelong learning.

PROGRAMME: B. TECH. CIVIL

Reasons for Revision:

- Letter from Secretary, University Grants Commission, New Delhi (D.
 No. F 14-12/2016(CPP II) dated 13th June 2016) Action:
 - a. Addition of new course Urban Planning at B. Tech. Civil Sem VII
 - b. Subsequent removal of Elective II of B. Tech. Civil Sem VII
 - c. Adjustment of the courses of Elective II in Elective III (Sem VII) and Elective IV (Sem VIII).
 - d. Renaming of Elective III and Elective IV as Elective II (Sem VII) and Elective III (Sem VIII) respectively.
- 2. Subject Environmental Studies shifted from Sem VIII to Sem VI.

B. TECH. (CIVIL) SEM. VI

43: STRUCTURAL DESIGN-III

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 02 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50 Marks Termwork: 01 Credit

Course Pre-requisites

The Students should have knowledge of

- conditions of equilibrium, plotting Shear force and bending moment diagram of beams with various support conditions and various load combinations.
- Determination of bending stress and shear stress in beams, Concept of short, long columns, direct and bending stress, principal stress and strains.
- 3. Concrete, concreting techniques and properties of concrete
- 4. Design a R.C.C. slabs, beams, columns and footings as per limit state method
- 5. Concepts of Working Stress Method and design of singly reinforced beam by working stress method.

Course Objectives:

The students should be able to design advanced structures in Reinforced Cement Concrete and in Prestressed Concrete.

Course Outcomes:

On completion of the course, the students will be able to:

 differentiate between prestressed concrete and reinforced concrete, analyse a prestressed concrete beam, draw the stress distribution diagrams at initial and final stages of loading and know the various methods of prestressing.

- 2. calculate various losses due to prestressing, design a simply supported prestressed concrete beam (rectangular , symmetrical and unsymmetrical flanged beam) for flexure ,shear and deflection.
- 3. design and detailing of flat slab using I.S. code method
- 4. design and detailing a T and L shaped cantilever retaining wall for various loading conditions.
- 5. design and detailing of a rectangular combined footing for two columns, beam-slab type.
- 6. design the circular water tanks resting on ground using I.S. code method, design of rectangular tanks using I.S. code method

UNIT - I (06Hours)

Introduction to Prestressed Concrete Structures

Introduction to prestressing, Basic definitions and terms related to pre stressing, Concepts of prestressing, Materials used, Various methods of prestressing, analysis of P.S.C. beam for flexure.

UNIT - II (06Hours)

Losses and Design of P.S.C.beam

Concept of losses, Calculation of various losses.

Design of Pre stressed simply supported beams of rectangular and flanged cross sections , design for flexure and shear only , check for deflection, Design should confirm to the latest version of I.S. 1343

UNIT - III (06Hours)

Design of Flat Slabs

Concept of flat slabs ,Design of flat slabs using latest I.S. Codes

UNIT - IV (06Hours)

Design of Retaining walls

Design of cantilever retaining walls –T and L-shaped for all loads as per latest L.S. codes.

UNIT - V (06Hours)

Design of Combined Footing

Design of slab type rectangular combined footing for two columns only. Concept of beam- slab type footing.

UNIT - VI (06 Hours)

Design of Water Tanks

Design of containers only, resting on ground. Use of latest version of I.S. 3370 Circular tanks - using I.S. code method.

Design of rectangular water tanks using I.S.Code method

Assignments:

Any six from the list given below.

- 1. Assignment problems based on analysis of rectangular P.S.C.beam
- 2. Assignment problems based on analysis of unsymmetrical I section of a P.S.C.beam
- 3. Assignment problems based on analysis of T section of a P.S.C.beam
- 4. Assignment problems based on time dependent losses in prestressing
- 5. Assignment problems based on instantaneous losses in prestressing
- 6. Assignment problems based on design of a rectangular prestressed concrete beam.
- 7. Assignment problems based on design of a flat slabs.
- 8. Assignment problems based on design of L-shaped retaining wall.
- 9. Assignment problems based on design of circular water tank using I.S.Code method.
- 10. Assignment problems based on design of rectangular water tank using I.S. Code method.

Term Work:

- 1. Termwork should be based on above syllabus.
- 2. Termwork should consist of three projects on above syllabus.
- 3. Minimum three half imperial sheets based on above projects to be drawn.

Text Books:

- 1. Dr. V. L. Shah and Dr. S. R. Karve- "Limit State Theory and Design", Pune VidyarthiGriha Publications
- 2. Punmia, Jain and Jain, "Comprehensive Design of R. C. Structures", Standard Book House
- 3. Sinha R.C. "RCC Analysis and Design- Vol. I, II", Chand and Co, New Delhi
- 4. Ramamrutham "Design of R. C. Structures '- Dhanpat Rai Publications
- 5. Krishna raju "Advanced Design of Structures"

Reference Books:

- 1. T.Y.Lin "Design of P.S.C structures"
- 2. S. S. Bhavikatti, "Advanced R.C.C. Design", New Age International Ltd.
- 3. N.Subramanian" Design of Reinforced Concrete Structures" Oxford University Press
- 4. S.Unnikrishnan Pillai, Devidas Menon "Reinforced Concrete Design"-Tata Mcgraw Hill Companies
- 5. P. C. Vergese, "Limit State Design", Prentice Hall India Publications, New Delhi

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B. TECH. (CIVIL) SEM. VI

44: ENVIRONMENTAL ENGINEERING II

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 2 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50 Marks

Termwork: 01 Credit

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering Chemistry
- 2. Engineering Mathematics
- 3. Mechanics of fluids

Course Objectives:

To make student understand

- 1. Hydraulic design of sewers and storm water.
- 2. Principle and Design of Sewage Treatment Plant.
- 3. The characteristics of wastewater (domestic as well as industrial).
- 4. The effect of wastewater discharge (domestic as well as industrial) into the environment in uncontrolled fashion.
- 5. The difference between requirement of rural area and urban area for water and waste water management.

Course Outcomes:

On completion of the course, the students will be able to:

- Use the concept related to sewage, sewer, storm water etc in its hydraulic design
- 2. Study and design of Primary treatment units.
- 3. To test the sample of waste water in the laboratory for physical & chemical characteristics.
- 4. Take-up functional planning, layout and design of sewage treatment plant components.
- 5. Analyze the industrial waste water for its treatment units
- 6. Plan for rural sanitation provisions, perform functional design of septic

UNIT - I (06 Hours)

Collection and Conveyance of sewage

General Aspects of Environmental Engineering – Study of waste water, black water & grey water.

System of collection and conveyance of sewage- separate and combined systems, patterns of sewage collection systems.

Quantity of storm water and sanitary waste water Sewer: Types, Shapes, Hydraulic Design (Capacity, Size, Grade)

UNIT - II (06 Hours)

Characteristics and Primary Treatment of Sewage

Characteristics of sewage - Physical, Chemical, Biological.

Introduction to unit operations and processes.

Primary Treatment – Preliminary and Primary treatment- screen chamber, grit chamber, oil & grease removal, Primary settling tank. (including design of screen chamber, grit chamber, primary settling tank)

UNIT - III (06 Hours)

Secondary Treatment of Sewage and disposal of sewage

Secondary Treatment-Activated sludge process: Theory and design of ASP, sludge volume index, sludge bulking & control, modifications in ASP.

Trickling filter: Biological principle, different T.F. media & their characteristics, design of standard rate and high rate filters, single stage & two stage filters, recirculation, ventilation, operational problems, control measures.

Introduction to the process of sequencing batch reactor (SBR) and membrane bioreactor (MBR).

Disposal of sewage: Methods and effluent standards for disposal

UNIT - IV (06 Hours)

Treatment and Anaerobic Digestion of Sludge

Principles of anaerobic digestion, stages of digestion, bio-gas production, its characteristics and application, factors governing anaerobic digestion, Design of high rate digester, Theory, Process and design of sludge drying bed. Advances in sludge treatment and disposal.

UNIT - V (06 Hours)

Industrial Waste Water treatment

Industrial waste water treatment: Methods of sampling, Equalization and neutralization. Application of preliminary, primary and secondary treatment for industrial wastewater as per the CPCB norms. Sources of waste water generation from manufacturing process, characteristics of effluent, different methods of treatment & disposal of effluent for the following industries: Sugar, dairy and Pulp & Paper. Effluent Discharge standards as per CPCB norms. Introduction to concept of CETP (Common Effluent Treatment Plant.)

UNIT - VI (06 Hours)

Rural Sanitation

Rural sanitation: Importance of Rural sanitation, bio-gas recovery. Septic tank including soak pit. Waste water recycling and reuse- Definition of terms used in water reuse applications, Role of water recycling in Hydrological Cycle, Waste water reuse application, need for water reuse, Public Health and Environmental issues in reuse of treated waste water, Two Pit Latrines.

Assignments:

- 1. Numericals on Hydraulic Design of Sewer
- 2. Characteristics of sewage sample collected by the students.
- 3. Numericals on Design of standard rate and high rate filters
- $4. \quad \ \ Collection\ of\ information\ -\ Advances\ in\ sludge\ treatment\ and\ disposal.$
- 5. Drawing Layout of ETP of Sugar, Pulp and Paper, Dairy Industries (Case studies)
- 6. Numericals on Design and drawing of septic tank for hostel
- 7. Information of useful micro-organisms in waste water treatment
- 8. Case studies Recycle and reuse of treated waste water.
- 9. Case studies Rural sanitation. (Site Visit).

Term Work:

First five experiments compulsory and any three from remaining six.

- Determination of Solids -Total solids, suspended solids, volatile solids, settleable solids & nonsettleable solids, Total Dissolved solids, Fixed Solids.
- 2. Determination of Dissolved oxygen
- 3. Determination of Bio-Chemical Oxygen Demand
- 4. Determination of Chemical Oxygen Demand

- 5. Determination of Electrical Conductivity of waste water samples
- 6. Determination of Phosphates from waste water samples by spectrophotometer
- 7. Determination of Nitrates from waste water samples by spectrophotometer
- 8. Determination of heavy metals from waste water samples like Cr6+ or Zn or Ni or Cd
- Determination of total nitrogen from waste water samples by Kjeldhal method
- 10. Visit to domestic / Industrial wastewater treatment plant & its detailed reports
- 11. Computer aided design of Sewage Treatment Plant (STP) OR Effluent Treatment Plant (ETP) of Sugar or Dairy Industry using suitable software (C programming or any other suitable software)

 Note: -Term Work should include a detailed analysis of practical interpretation, significance and application of test results

Text Books:

- 1. Waste Water Treatment & Disposal Metcalf & Eddy TMH publication
- 2. Environmental Engg. Peavy, Rowe McGraw Hill Publication.
- 3. Environmental studies by Rajgopalan- Oxford University Press
- 4. Waste Water Engg. B.C. Punmia & Ashok Jain Arihant Publications
- 5. Sewage Disposal & Air Pollution Engg. S. K. Garg Khanna Publication
- 6. Industrial Waste Water Treatment- A. D. Patwardhan Publication PHL Learning Private Limited.
- 7. Water Supply And Wastewater Engineering B S N Raju- McGraw Hill Publication.
- 8. Waste Treatment Plants-C. A. Sastry Narosa Punlication
- 9. CPHEEO Manual on sewage treatment

Reference Books:

- 1. Environmental Engg. Davis McGraw Hill Publication
- 2. Water Supply & Waste Water Engg.- B.S.N. Raju TMH publication
- 3. Resources i) http://nptel.iitm.ac.in/courses-contents/IIT Kanpur and IIT Madras. ii) http://cpcb.nic.in iii) http://moef.nic.in

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III Unit Test -2 UNIT – IV, V, VI

B. TECH. (CIVIL) SEM. VI

45: Foundation Engineering

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Continuous Assessment: 40 Marks

Course Pre-requisites

The Students should have knowledge of

- 1. building construction
- 2. geotechnical engineering
- 3. engineering mechanics

Course Objectives:

Student can apply the knowledge to design different types of foundations.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. carryout soil exploration.
- 2. find out bearing capacity of soil
- 3. apply knowledge of consolidation to foundation design..
- 4. design pile foundation
- 5. analyze sheet pile foundation
- 6. apply methods of soil stabilization.

UNIT - I (6 Hours)

Soil Exploration

Purpose and planning of exploration programme. Subsurface exploration, Trial pits, Methods of borings. Provisions as regards Number of bore holes and depth of boring and spacing as per IS. Geophysical method-Seismic reflection method and Electrical resistivity method. Coring of rocks, preparation of bore logs and core logs subsurface exploration report. Disturbed and undisturbed samples. Types of samplers. Field testing-SPT, DCPT, and its correlation IS Code provisions.

UNIT - II (6 Hours)

Bearing Capacity

Modes of shear failure. Terzaghi's bearing capacity analysis and Bearing capacity factors. Skempton method for Strip, Rectangular and Circular footings. Effect of water table and depth on bearing capacity. Bearing capacity of layered soil. Effect of eccentricity. Use of SPT blow count and I.S. provisions. Plate Load Test, Floating foundation. Foundations on rocks, various field and laboratory tests on rocks for deciding SBC.

UNIT - III (6 Hours)

Elastic settlement and Consolidation

Pressure bulb, Contact pressure, Elastic settlement of bases (Elastic Mechanism and Janbu's Method). I.S. criteria, Total and Differential settlement, Tolerable settlement, Allowable soil pressure. Effect of lowering of water table

Consolidation Settlement: Introduction, Spring analogy, Terzaghi's consolidation theory, Laboratory consolidation test, Determination of coefficient of consolidation by Square root of time fitting method and Logarithm of time fitting method. Time factor, Rate of settlement and its applications in shallow foundation. Normal consolidation, over consolidation and preconsolidation pressure.

UNIT - IV (6 Hours)

Pile Foundation

Introduction, Pile classification, Pile installation-Cast in situ, Driven pile. Load carrying capacity of pile by static method, Dynamic methods Engineering News formula, Modified ENR formula. Pile load test and Cyclic and dynamic pile load test. Group action-Feld rule, Rigid block method. Negative skin friction. Settlement of pile group in cohesive soil by approximate method. Micro piles. Socketing of piles in rocks

UNIT - V (6 Hours)

Sheet Piles and foundation on black cotton Soil

Sheet Piles Strutting for excavations, Pressure distribution diagram. Cantilever sheet pile, Anchored sheet pile. Free earth support and Fixed earth support.

Foundations on Black Cotton Soil.: Characteristics of black Cotton Soils, Problems and preventive measures Swelling potential, Under reamed piles – Design Principles and Techniques (Maximum two bulbs). Prefabricated vertical drains and Preloading Technique.

UNIT - VI (6 Hours)

Geosynthetics and Soil Stabilization.

Geosynthetics -Types, Properties, Functions, Reinforcement concept. Reinforced soil structures with vertical faces, Reinforced soil embankments, Methods of soil stabilization. stone columns, compaction piles.

Assignments:

- 1. A case study for Preparation of bore hole investigation report
- 2. Numericals on Bearing Capacity by different Methods.
- Numericals on Plate load test.
- 4. Numericals on Consolidation of soil.
- 5. Numericals on Elastic settlement by different methods.
- 6. Explain Pile load test.
- 7. Discuss Group action of piles and Negative skin friction.
- 8. Draw sketches of .Under reamed pile .
- 9. Sheet pile and its applications.
- 10. Methods of soil stabilization.

Text Books:

- 1. C.Venkatramaia, "Geotechnical Engineering", New Age International Publication.
- 2. B.C.Punmia. "Soil mechanics and foundation Engineering", Standard Publishers and distributers.
- 3 K.R.Arora, "Soil mechanics and foundation Engineering", Standard Publishers and distributers.

Reference Books:

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III Unit Test -2 UNIT – IV, V, VI

46: URBAN PLANNING

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: Credits 3

Continuous Assessment: 40 Marks

Course Pre-requisites

The Students should have knowledge of

- 1. Building Planning and Design
- 2. Building Bye laws and Development control rules.
- 3. Infrastructure Engineering.

Course Objectives:

Students will study concept & process of Urban Planning.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. understand rationale of Town planning
- 2. learn theory of Urban planning
- 3. understand concept of smart city planning.
- 4. learn process of making development plan as per MRTP Act 1966
- 5. know Intelligent Transport system.
- 6. Describe spatial aspects of planning.

UNIT - I (6 Hours)

Rationale of planning

Definitions and Rationales of Planning; Goals and objectives of planning; Components of planning; Benefits of planning;

Foundations of Planning; Sustainability and rationality in planning; Components of sustainable urban and regional development; various sources of planning knowledge, various forms of planning knowledge; Reasoning and its various forms in planning; Space, place and location

UNIT - II (6 Hours)

Theory of Urban Planning

Scope, purpose and methods of Planning, the nature and purpose of Town and Country Planning at National, Regional and local levels.

The physical planning process and the relation between surveys and plan.

Land-use planning, determinants of Land Use and of spatial patterns of urban land uses, Various surveys for physical planning and techniques of Analysis realization of the plan. The parts of the town and their relationship, planning standards, site layout and development, zoning and density control.

UNIT - III (6 Hours)

Various types of Plans

Development Plans and Development Regulations Definition of development plan; Types of development plans: master plan, city development plan, structure plan, district plan, action area plan, subject plan, town planning scheme, regional plan, sub-regional plan; Planning Advisory Group report and the URDPFI Guidelines; Provisions of MRTP Act 1966; Defining development and development control regulations, types of development control; Implications of violations of development control regulations;

UNIT - IV (6 Hours)

Smart City Planning

Concept of Smart City; Urban renewal, retrofitting and redevelopment program. Economic growth model of a city. Capacity building in urban administration and urban planning.

Smart city planning for solid waste management, rejuvenation of streams and rivers, affordable housing to poor ,housing and slum redevelopment, energy efficient and green buildings, Water supply and its management, Concept of intelligent transport network and green belts. E governance and citizen's participation.

UNIT - V (6 Hours)

Traffic and Transportation

Concept of PCU and level of service, capacity of uninterrupted flow conditions, factors affecting; capacity and level of service; capacity of rural and urban roads, capacity at intersections.

Traffic Volume Count, origin destination survey, speed and delay study, parking surveys, road network inventory, accident study - need, design of survey proforma, methods of conducting surveys, analysis and interpretation; Concept of transport facility design.

UNIT - VI (6 Hours)

Spatial Aspects

Settlements-rural and urban settlements in their regional setting hinterlands. Towns and cities their geographical characteristics.

Urban concentrations and growth characteristics factors, historical, administrative, location, economic, socio-economic consequences. The essential characteristics of city/town, importance of morphological aspects in town planning.

Use of remote sensing and GIS in planning.

Assignments:

- 1. Report on UDPFI guidelines for urban planning
- 2. Settlements and their physical forms during various dynasties upto 18th century and during colonization
- 3. Study of various surveys for Urban planning.
- 4. Write a report on preparation of development plan of a City
- 5. Case studies on Urban planning from ITPI Journal.
- 6. Applications of Remote sensing and GIS in Urban planning
- 7. Land use Survey of a given area
- 8. Layout of neighborhood design
- 9. Traffic volume survey at a given intersection

Text Books:

- 1. L.R. Kadiyali, "Traffic Engineering and Transport Planning" Khanna Publishers, New Delhi, 2007
- 2. Annapurna Shaw ," Indian cities " Oxford India ,2012
- 3. B. Gallion, S. Eisner, "The Urban Pattern", Van Nostrand Reinhold Company,2003
- 4. ITPI, "City and Metropolitan Planning & Design" ITPI, New Delhi

Reference Books:

Peter Hall, "Urban and Regional Planning" Routledge, New York, 2002 Smart City Guidelines, Ministry of Urban Development, Govt. of India. 2015 NCRPB, "Regional Plan 2021, New Delhi, 2005

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III
Unit Test -2 UNIT – IV, V, VI

47 A: CONSTRUCTION MANAGEMENT

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Continuous Assessment: 40 Marks

Course Pre-requisites

The Students should have knowledge of

- 1. Building Construction,
- 2. Building planning design and byelaws.
- 3. Engineering Project Management.

Course Objectives:

Student can apply the knowledge of Construction Management during execution of civil engineering structures.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Know role, duties and responsibilities of construction manager.
- 2. Carryout economic comparison of project
- 3. Apply knowledge of linear programming to civil engineering problems.
- 4. Carryout feasibility analysis
- 5. Apply different laws to construction industry
- 6. Prepare site layout.

UNIT - I (6 Hours)

Title-Construction Sector

Nature, Characteristics, Size and Structure of construction sector in India. Role in economic development of Nation ,Employment Generation, Infrastructure Development, CIDC's role in Gearing up Construction sector. Features of construction economy.

Construction Management Role, importance, necessity, characteristics and functions of construction management Role, Qualities, Ethics, Duties, Authorities, Responsibilities and Training of Construction Managers'

UNIT - II (6 Hours)

Title -Engineering Economics

- Time value of money, Cash flow diagram. Meaning and necessity of Economics, types of costs, interest- simple, compound,
- Economic comparisons of projects- Discounting Methods net present worth method, benefit cost ratio method, internal rate of return method

UNIT - III (6 Hours)

Linear Programming

Transportation and Assignment Models, Game theory, Pure and Mixed strategy.

UNIT - IV (6 Hours)

Artificial Intelligence in Construction Management

Introduction to Artificial Neural Network, Fuzzy logic and Building information modeling

UNIT - V (6 Hours)

Construction Labour and Legislation

Necessity and importance of labour laws, Law of Contract, Contract labour Act, 1970, Worksman compensation Act 1923, Child labour Act, Building and construction Act, Employees Provident fund Act, Payment of wages Act, Minimum wages Act. Industrial Disputes Act

UNIT - VI (6 Hours)

Construction Safety Management

- Causes of Accidents, Safety measures and policy adopted, Safety Parameters, safety requirements, Personal Protective Equipments. Role of various parties in safety management, safety benefits to employers, employees and customers
- Site Layout:- Factors Affecting site layouts, Typical Layout for major Civil Engineering Project.

Assignments:

- 1. Preparation of Site layout.
- 2. Numerical on Time Value of Money.
- 3. Application of LPP for civil engg. Problems
- 4. Preparation of feasibility report –A case study.
- 5. Study of labour laws
- 6. Case study on safety Management.

Text Books:

- S. Seetaraman Construction Engineering and Management Umesh Publications Delhi.
- 2. L.C.Jhamb volume I, Quantitative Techniques for Managerial Decisions. Everest Publishing House Pune

Reference Books:

- K.K.Chitkara, Construction Project Management, Tata McGrawHill Education Pvt. Ltd. New Delhi.
- 2. Edward R. Fisk, Construction Project Administration, Prentice Hall New Jersy Colombus ohio.
- 3. O.P.Khanna, Industrial Engineering and Management, Dhanpatrai Publications New Delhi.
- 4. Barrie Paulsion, Professional Construction Management, Tata McGrawHill Education Pvt. Ltd. New Delhi.
- 5. Sengupta, Construction Planning and Management. McGrawHill Education Pvt. Ltd. New Delhi.

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III Unit Test -2 UNIT – IV, V, VI

47 B: MAINTENANCE & REHABILITATION OF STRUCTURES

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03Hours / Week End Semester Examination: 60 Marks

Theory: 03 Credits

Continuous Assessment: 40 Marks

Course Pre-requisites

The Students should have knowledge of

- 1. Building construction, various techniques of plastering, pointing and concreting
- 2. Concrete technology
- 3. Properties of R.C. members in flexure.

Course Objectives:

The student should be able to use suitable materials and techniques for repair.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. identify need of maintenance and repair of structure.
- 2. identify Preventive measures
- 3. identify suitable method for evaluating structure.
- 4. select suitable material for repair.
- 5. select suitable techniques for repair
- 6. prepare report on repair & rehabilitation work.

UNIT - I (06Hours)

Introduction

Properties of concrete - Strength, Permeability, Durability, Stiffness, Ductility, Thermal properties & Cracking. Maintenance, Repair, Strengthening and Retrofitting of structure

UNIT - II (06Hours)

Preventive measures and Maintenance

Effect of climate, temperature, chemicals, wear and erosion, Design and construction errors, Corrosion mechanism, Effect of cover, thickness and cracking, method of corrosion protection, corrosion inhibitors, corrosion resistant steels, coatings and catholic protection, Maintenance, repair and rehabilitation, Facets of Maintenance importance of Maintenance Preventive measures on various aspects.

UNIT - III (06 Hours)

Non Destructive Testing and Structural Audit

Inspection, Causes of deterioration, Non destructive testing methods and testing techniques, Assessment procedure for evaluating a damaged structure, Structural Audit and its report.

UNIT - IV (06 Hours)

Materials for Repair and Retrofitting

Special concretes and mortar, concrete chemicals, special elements for accelerated strength gain, Expansive cement, polymer concrete, Sulphur infiltrated concrete, ferro-cement, fibre reinforced concrete, Rust eliminators and polymers coating for rebars, foamed concrete, mortar and dry pack, vacuum concrete, Mortar repair for cracks, shoring and under pinning.

UNIT - V (06 Hours)

Techniques for Repair and Retrofitting

Selection of suitable material, Technique to overcome low member strength, Deflection, Cracking, Chemical disruption, weathering wear, Gunite and Shotcrete, Epoxy injection, fire, leakage, marine exposure.

UNIT - VI (06 Hours)

Case Study on Repair & Rehabilitation of structure.

Case study report on Maintenance repair & Rehabilitation of a structure.

Assignments:

- 1. Assignment based on properties of concrete.
- 2. Assignment based on need of maintenance and repair
- 3. Assignment based on Preventive measures
- 4. Assignment based on maintenance
- 5. Assignment based on Non destructive testing
- 6. Assignment based on Structural Audit and its report
- 7. Assignment based on various materials for repair.
- 8. Assignment based on market survey of various materials for repair.
- 9. Assignment based on various techniques of repair.

Text Books:

- M.S.Shetty, "Concrete Technology Theory and Practice", S. Chand & Company, New Delhi, 1992.
- Denison Campbell, Allen and Harold Roper, "Concrete Structures", Materials, Maintenance and Repair ,Longman Scientific and Technical UK,1991.

- 3. R.T.Allen and S.C.Edwards, "Repair of concrete Structures", Blakie and Sons, UK,1987
- 4. Raikar, R.N., "Learning from failures –Deficiencies in Design", Construction and service-R&D Center (SDCPL), Raikar Bhavan Bombay, 1987.

Reference Books:

- 1. Santhakumar, A.R., "Training Course notes on Damage Assessment and repair in LowCost Housie", "RHDC-NBO" Anna University, July,1992
- 2. Lakshmipathy, Metal Lecture notes of Workshop on "Repairs and Rehabilitation of Structures",29-30th October 1999.
- N.Palaniappan, "Estate Management, Anna Institute of Management", Chennai, 1992

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

47 C:ENVIRONMENTAL IMPACT ASSESSMENT

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 3 Credits

Continuous Assessment: 40 Marks

Course Pre-requisites:

The Students should have knowledge of

- 1. Basic Knowledge of Physics, Chemistry and Mathematics
- 2. Basic Knowledge of Environmental Science
- 3. Basic Knowledge of Statistics and Computers

Course Objectives:

To learn the purpose and aims of EIA as well as EIA administration and practice thereby undertaking an EIA projects by understanding of the strengths and limitations of EIA with the costs and benefits of undertaking EIA

Course Outcomes:

On completion of the course, the students will be able to:

- Appreciate the purpose and role of EIA in the decision-making process and understand the strengths of EIA in regard to environmental management;
- 2. Understand the technical and social/political limitations of EIA and know the administration and procedures that apply in the student's jurisdiction;
- 3. Understand the screening process and the scoping process and how it is applied
- 4. Know the options for estimating environmental and social impacts and the format of an EIA Report (Environmental Impact Statement, or Environmental Statement);
- 5. Appreciate the factors that assist, and destract, from the usefulness of the EIA Report
- 6. Understand the purpose of developing follow-up procedures, and the options for designing these procedures.

UNIT - I (6Hours)

Environmental Impact Assessment (EIA)

EIA: Background, Introduction, Purpose and aims of EIA, Nature and Scope of environmental issues and impacts, Principles of EIA administration and practice, Key elements of the EIA process, Costs and benefits of EIA, EIA Policy and Legislation, EIA Requirements of International Organizations, Principles for a Functional EIA System

UNIT - II (6Hours)

Screening and Scoping

Screening: Introduction, Screening procedure, Project lists for screening, Preliminary EIA, Screening Basics, Other types of Screening, Criteria for the determination of the need for, and level of, EIAScreening Exercise,

Scoping: Introduction, Purpose of scoping, Approaches to scoping, Scoping methods, Scoping Basics, Alternatives and tiering, Scoping in Practice

UNIT - III (6Hours)

Impact analysis and EIA Methods

Implications of the widening environment and sustainability agenda, Impact Identification, Impact Analysis/Prediction, Impact Analysis Basics, Characteristics of environmental impacts, Impact Characterization, Social Impact Assessment, Evaluation of impact significance, Significance Criteria, Impact Significance Assessment, Interaction Matrix and Simple Checklist Methods, Development of a Simple Matrix, Observations on Simple Matrices, Simple Checklists

UNIT - IV (6Hours)

Mitigation and Impact Management

Link between EIA process and Mitigation, Main Elements of Mitigation, Mitigation Basics, Approaches to Mitigation, Mitigation of Specific Impacts, Environmental Management Plan and Mitigation Measures, Impact Assessment and Mitigation,

Public involvement: Introduction, Principles of public involvement, Scope of involvement, Planning a public involvement programme, Public involvement techniques, Arguments for and against public involvement, Stakeholders involved

UNIT - V (6Hours)

EIA Reporting and Review of EIA Quality

EIA Report, Typical Elements of an EIA Report, EIA Reporting Basics, Shortcomings encountered in Preparing EIA Reports, Guidelines for effective EIA report preparation and production, The Non-Technical Summary/Executive Summary, EIA Reporting Practice, Role and Purpose of the EIA Review Process, Need for a Systematic Approach, Procedural Aspects, Main Steps in the EIA Review, EIA Quality Basics, Carrying out the review, EIA Report Quality Assessment Exercise, Procedures for Evaluating EIA Reports

UNIT - VI (6 Hours)

Decision-making, Implementation and Follow-up

Role of the Decision-makers, EIA as part of the Decision-making Process, Decision-making: Procedural Considerations, Responsibility of the Decision-Makers, Key Objectives of EIA implementation and follow up, Tools for Environmental Management and Performance Review, Monitoring, Implementation Management Planning, Environmental Auditing, EMP and Audit Programme, Evaluation of EIA Effectiveness and Performance

Assignments:

- 1. The ways of modifying a project through EIA.
- 2. Legislative protections on a proposed development site in India
- 3. Some of the problems and advantages having the developer and/or consultant responsible for preparing the EIA documents
- 4. EIA Challenges especially in developing countries
- 5. Project of State Significance in India and what role does it play in the Indian system
- 6. Inventorisation of the natural resources available in India

Text Books:

- Environmental Impact Assessment: A Practical Guide, Betty Marriott -1997
- 2. Environmental impact assessment, Larry W. Canter 1977
- 3. Introduction to Environmental Impact Assessment, John Glasson, Parkitherivel, Pandrew Chadwick 2013
- 4. Environmental Impact Assessment, Stephen Tromans 2012
- 5. Environmental Impact Assessment: Practice and Participation, Kevin Hanna 2015
- 6. Environmental Impact Assessment: A Methodological Approach, Richard K. Morgan 1999
- 7. Methods of Environmental Impact Assessment, Peter Morris,

 RikiTherivel 2001
- 8. Environmental Impact Assessment: A Guide to Best Professional Practices, Charles H. Eccleston 2011
- 9. Introduction to Environmental Impact Assessment, John Glasson,

 RikiTherivel, PAndrew Chadwick 2005

Reference Books and Further Reading:

- 1. Ackland A, Hyam P and Ingram H (1999) Guidelines for Stakeholder Dialogue A Joint Venture. The Environment Council, London.
- 2. African High-Level Ministerial Meeting on Environmental Impact Assessment (EIA) Durban, South Africa. Communique (1995) issued by UNEP, Nairobi.
- 3. Ashe J and Sadler B (1997) Conclusions and Recommendations. In Report of the EIA Process Strengthening Workshop. (pp.109-118). Environment Protection Agency, Canberra.

- Australian and New Zealand Environmental and Conservation Council (ANZECC) (1996) Guidelines and Criteria for Determining the Need for and Level of Environmental Impact Assessment in Australia. Working Group on National Environmental Impact Assessment, ANZECC, Canberra.

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III Unit Test -2 UNIT – IV, V, VI

47 D: BRIDGE & TUNNEL ENGINEERING

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Continuous Assessment: 40 Marks

Course Pre-requisites

Students should have basic knowledge of

- 1. Waste water treatment
- 2. Engineering Chemistry

Course Pre-requisites:

The Students should have knowledge of

- 1. Engineering Geology
- 2. Geotechnical Engineering
- 3. Infrastructure Engineering, Traffic Engineering
- 4. Surveying
- 5. Hydraulics
- 6. Structural Engineering

Course Objectives:

To make the student understand various types of bridges & tunnels & their components. Students would also be able to decide factors affecting selection of bridge & tunnels.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. describe bridge classifications & bridge components.
- 2. explain various forces acting on bridges.
- 3. manifest bridge bearings & its importance.
- 4. explicate tunnels & its site selection.
- 5. annotate various tunneling methods.
- 6. construe various safety requirements & maintenance methods in tunneling.

UNIT - I (06 Hours)

Bridge Engineering -: Introduction

Definition, Importance of bridge, Classifications of bridge, Components of bridge, Site Selection, Preliminary data to be collected, Determination of design discharge – Lineal waterway, Economical span, Afflux, HFL, Sub-soil exploration – Scour depth, Investigation report, choice of bridge type, quality assurance for bridge projects, Types of Analysis of Economic Costing, Implemation of Methodology, quality control and assurance for bridge projects

UNIT - II (06 Hours)

Loading Standards for Design Bridges (With STAAD- Pro and C++)

Evaluation of bridge loading standard as per IRC specifications (dead load IRC, standard live load, Impact effect, wind load, longitudinal forces, centrifugal forces, horizontal forces due to water currents, buoyancy effect, earth pressure, temperature effect, seismic forces), forces acting on abutment, piers, wing wall & superstructure.

UNIT - III (06 Hours)

Types of bridges, bridge bearings& maintenance of bridges, and Rehabilitation of bridges

Types of bridges; culverts, temporary, moveable, fixed span, Methods of erecting bridges, maintenance of bridges, inspection of bridges, types of failures, bridge foundations (open, caissons etc.),

Classification of Highway Bridge parapets, Bearing; purpose & importance, materials specification, types of bearings, maintenance & Rehabilitation of Bridges

UNIT - IV (06 Hours)

Tunnel Engineering -: Introduction

Definition, General aspects, classification, purpose of tunnels, selection of Route advantages & disadvantages. Condition favorable for tunnel construction (influence of geological conditions), economics, setting out of tunnels, criterion for selection of size & shape, Open cuts, twin tunnels, pilot tunnels, portals, shafts

UNIT - V (06 Hours)

Tunneling alignment & methods

Surveying, Preliminary explorations, alignment & Grade, size & cross section of tunnels, types of drills, selection of drilling equipment & pattern, types of explosives, blasting techniques, Tunneling; hard rock, soft soils, tunneling methods using TBM, NATM method

UNIT - VI (06 Hours)

HSE (Health, safety & Environment) requirements & Maintenance of tunnels

Precautions in handling & storing of explosives, safety requirements during blasting operation, lining of tunnels, Maintenance; dust prevention, ventilation, Lighting, drainage, Introduction to Metro Tunnels & under water tunnel tubes.

Assignments: (Any Eight)

- 1. Write classification of bridges & its component.
- 2. Enlist & explain different types of load acting on a bridge structure.
- ${\it 3.} \quad \hbox{Briefly explain different types of bridges.}$
- 4. Write a short note on bridge bearings (Classification, importance & maintenance).
- 5. Classify various types tunnels & explain advantages & disadvantages of each.
- 6. Write a short note on Open cuts, Twin tunnels, pilot tunnels, portals & shafts with neat sketches wherever necessary.
- 7. Illustrate various preliminary investigations & surveying required for tunnel construction.
- 8. Write a note on explaining various methods for;
 - 1) tunneling in soft soils
 - 2) tunneling in hard rocks

- 9. Prepare a power point presentation on use of TBM & NATM methods for tunneling.
- 10. Illustrate briefly the importance of lining, lighting, drainage, ventilation & dust prevention in tunnels.
- 11. Site visit & preparation of report on any bridge/tunnel structure.

Text Books:

- Bindra S.P., "Principles & Practice of Bridge Engineering, Dhanpat Rai & Sons Publishers, New Delhi.
- 2) Rangwala S.C., "Bridge Engineering", Charotar Publishing House Pvt. Ltd., Gujarat.
- 3) Saxena S.C., "Tunnel Engineering", Dhanpat Rai & Sons Publishers, New Delhi.
- 4) Srinivasan R., "Harbour, Docks & Tunnel Engineering", Charotar Publishing House, Gujarat.

Reference Books:

- 1) Bickel J.O., "Tunnel Engineering Handbook", CBS Publishers, New Delhi.
- 2) Victor D.J., "Essentials of Bridge Engineering", Oxford & IBH Publications Co. Ltd., Mumbai.

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

47 E:- ELECTIVE II - GROUND WATER HYDROLOGY

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Continuous Assessment: 40 Marks

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering Geology and Soil Mechanics
- 2. Fluid Mechanics

Course Objectives:

Course attempts to provide knowledge and skills for effective ground water management

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Explain types of aquifer and its properties
- 2. Describe movement of ground water through porous media.
- 3. Determine yield of an open and tube well
- 4. Explain construction and design of wells
- 5. Describe various methods of artificial recharge of ground water
- 6. Describe various parameters of ground water quality

UNIT - I (6 Hours)

Introduction

Introduction, Divisions of ground water, Sources of Ground water, Ground Water in various types of rocks, Hydrological Terms , types of aquifer, Porosity, Specific Yield, Specific Retention, Specific yield and its determination,

UNIT - II (6 Hours)

Movement of Ground Water

Darcy's Equation, Permeability, Factor affecting on permeability, Laboratory and field determination of permeability, Flow net and its properties, Flow net for Isotropic and Anisotropic Aquifer, Ground Water Flow Potential, Steady one Dimensional Flow, Ground Water Theory

UNIT - III (6 Hours)

Well Hydraulics

Flow into a wells, Dupit's assumption, , Steady radial flow into in unconfined aquifer and confined aquifer, Well losses, Specific Capacity of well, well Efficiency, Interference among wells, Cavity wells, Pumping Test Method: Their method, Jacob Method, Chow Method

UNIT - IV (6 Hours)

Water Well Construction and Design

Types of water wells:- Open Well and Tube well, Method of Construction of open Well and tube well, Design of water well, Infiltration Gallery, water well construction

UNIT - V (6 Hours)

Ground Water Recharge Methods

Introduction, Methods of Ground water recharge, Types of Artificial and natural ground water recharge, Suitability of artificial recharging methods, Well shrouding and well development, other sources of ground water

UNIT - VI (6 Hours)

Ground Water Quality and Pollution

Chemical composition of Ground water, water sampling, water quality for Industrial use and Domestic use, sea water contamination in ground water, ground water pollution.

Assignments:

- 1. Determination of specific yield of an aquifer
- 2. Use of flow net for ground water studies
- 3. Problems on pumping test method.
- 4. Assignment on different types of wells
- 5. Assignment on ground water quality for industrial use and domestic use.
- 6. Visit to nearby water harvesting structure and prepare a report.
- 7. Problems on well hydraulics

Text Books:

- 1. Dr. P.N.Modi, Irrigation Water Resources and Water Power Engineering , Standard Book House 2012
- 2. Garg S.K. ,Irrigation Engineering and Hydraulic Structures, Khanna Publisher ,2006

Reference Books:

- 1 Raghunath H.M., Ground Water:, New Age International Publishers
- 2 Todd D.K. Ground water Hydrology, John Wiley and sons
- 3 Rastogi A.k., Numerical ground water hydrology, Pennram Publishers

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

47 F GEOINFORMATICS

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 3 Credits

Continuous Assessment: 40 Marks

Course Pre-requisites

The Students should have knowledge of

- 1. Basic knowledge of Physics, Chemistry and Mathematics
- 2. Basic knowledge of Geography, Maps and Surveying
- 3. Basic knowledge of Computers and graphic softwares

Course Objectives:

To provide the students insight of Geoinformatics and its applications in Resource Conservation and Management, Disaster Management, Environmental Pollution Management, Civil Engineering and Construction Management and Sustainable Development

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Apply Geoinformatics technologies and the technologies used in Geographical Studies
- 2. Analyze and Understand Aerial Photographs procured from the technology of Aerial Photogrammetry and the information to be retrieved with the help of Visual Interpretation and Stereoscopy
- 3. Understand the components and principles of GPS, DGPS Concepts and GPS Applications in Military, Transport network planning and management, Meteorology and climate change, Telecommunications
- 4. Apply and use the concept of Remote Sensing and applications in the field of Civil and Environmental Engineering and interpret images and photographs procured from Satellites

- 5. Familiarize with various GIS softwares for developing thematic maps by Geo-referencing and Geo-coding and analyze Spatial Data with the help of Digital Elevation Model
- 6. Apply the Geoinformatics techniques in the field of Land Resource, Water Resources, Urban Planning, Geo-technical Engineering, Environmental Management

UNIT - I (6 Hours)

Geoinformatics

Introduction, Scope and Importance of Geoinformatics, Geoinformatics technologies and the technologies used in Geographical Studies, Geoinformatics and other Information Sciences, Geoinformatics-Spatial and Non –Spatial data Management. Spatial information Technology, Applications of Geo-Informatics: Urban planning and land use management, Tourism, Virtual globes, Environmental modeling and analysis, Military, Transport network planning and management, Agriculture,

UNIT - II (6 Hours)

Photogrammetry

Aerial Photograph: Introduction, Comparison of Aerial Photograph And Map Aerial Photography: Introduction, Specifications For Aerial Photography, Planning of Photographic Flights, Execution of Flight, Aerial Cameras, Aerial Films, Completion of Photographic Task, Production of Positive Copies

Aerial Mosaics: Introduction, Planning for Mosaics, Mosaic Compilation, Annotation and Reproduction, Choice of Methods

UNIT - III (6 Hours)

Global Positioning System

Introduction, Components of GPS, Operational Principle, Facts and Limitations of GPS, GPS Receivers, Total Station Surveys Differential GPS: Introduction, DGPS Concepts, Types of DGPS GPS Applications in Military, Transport network planning and management, Meteorology and climate change, Telecommunications

UNIT - IV (6 Hours)

Remote Sensing (RS)

Basic Concepts: Introduction, Multispectral Remote Sensing, Multispectral Photography, Multispectral Scanning Remote Sensing in Thermal Infrared Region, Emissivity, Thermal Infrared Sensors, Characteristics of Thermal Images, Applications Remote Sensing in Microwave Region: Passive System, Active System, Satellite Radar Systems, Radar Image Characteristics, Radar Image Interpretation Satellite Remote Sensing: Introduction, LANDSAT, IRS and Other Satellites Satellite Image Interpretation: Visual Interpretation, Digital Image Processing, Applications of Satellite Imagery.

UNIT - V (6 Hours)

Geographical Information System (GIS)

GIS Concept: Functions and use of GIS, Spatial Data Representation, Relationships of Spatial Objects, GIS Functions, Spatial (Raster and Vector) and non-spatial (Relational, Network and Hierarchical), Geo-referencing and Geo-coding, Spatial Data Analysis, Digital Elevation Model

UNIT - VI (6 Hours)

Remote sensing GIS Applications

Application in Land Resource: Remote sensing in mapping soil degradation, impact of surface mining on land resources, forest resources.

 $\label{lem:problem} \mbox{Application in Water Resources: Remote sensing in hydro-geomorphologic interpretation for groundwater exploration, reservoir sedimentation, .}$

Application in Urban Planning: Mapping urban land use, transportation network, ity mapping, urban sprawl, site selection for urban development, Urban Information System

Application in Geo-technical Engineering: Slope stability and drainage network analysis, Digital Terrain Modeling,

Application in Environmental Management: Selection of disposal sites for industrial and municipal wastes,

Assignments: (At least 10 assignments out of 12 to be completed)

- 1. Arial photograph interpretation
- 2. Visual interpretation of multispectral and panchromatic image
- 3. Image rectification and classification, supervised and unsupervised classifications
- 4. Digital database creation Point features, Line features, Polygon features
- 5. Data Editing-Removal of errors Overshoot & Undershoot, Snapping
- 6. Construction of different thematic maps in GIS
- 7. Introduction to GPS and initial setting
- 8. Point Data collection using GPS with different datum
- 9. Case studies on Applications of Remote sensing and GIS in Urban planning
- Case studies on Applications of Remote sensing and GIS in water resources
- 11. Case studies on Applications of Remote sensing and GIS in environmental management
- 12. Case studies on Applications of Remote sensing and GIS in agriculture.

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT - IV, V, VI

47 G: ADVANCED CONCRETE TECHNOLOGY AND COMPOSITES

TEACHING SCHEME:

EXAMINATION SCHEME:

CREDITS ALLOTTED: Theory: 03 Credits

Theory: 03Hours / Week

End Semester Examination: 60 Marks

Continuous Assessment: 40 Marks

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering Chemistry
- 2. Basic Concrete Technology
- 3. Construction practices
- 4. Construction methods

Course Objectives:

The student should be able to know properties of various types of advanced concretes, concreting methods and special types of concretes and their use.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. know properties of various properties of advanced concrete, carry out mix design as per I.S. Code method.
- 2. know the properties and use of advanced concreting methods.
- 3. know the properties and use of special concreting methods.
- 4. analyse and design prefabricated concrete, know the use precast concrete elements.
- 5. know the properties of concrete with mixed ingredients.
- 6. know the properties and use of special types of concrete.

UNIT - I (06)

Introduction

Review of concrete as a structural material, study of concrete and its various ingredients for the properties such as strength, elasticity, shrinkage, creep, permeability, durability as Mix Design by I.S. Code Method, design of high strength mixes containing entrained air.

UNIT - II (06 Hours)

Advanced Concreting Methods

Study of Roller Compacted concrete, High Performance Concrete, Cold Rolled Concrete.

UNIT - III (06 Hours)

Special Concreting Methods

Study of Underwater concreting, Tri mix Concrete, Self Compacting Concrete.

UNIT - IV (06 Hours)

Precast Concrete

Analysis and Design of prefabricated concrete, Precast concrete construction joints in precast construction, erection and assembly techniques.

UNIT - V (06 Hours)

Concrete Composites

Fiber Reinforced Concrete using carbon, glass, steel, polypropylene fibers for its various properties.

UNIT - VI (06 Hours)

Special Types of Concrete

Ferro cement, Light Weight & High Density Concrete for its various properties.

Assignments: Any six from the list given below.

- 1. Assignment based on I.S.code mix design of concrete
- 2. Assignment based on advanced concreting methods.
- 3. Assignment based on special concreting methods.
- 4. Assignment based on precast concrete
- 5. Assignment based on carbon and glass fibre reinforced concrete.
- 6. Assignment based on steel fibre reinforced concrete.
- 7. Assignment based on polypropylene fibre reinforced concrete.
- 8. Assignment based on special types of concrete.
- 9. Assignment based on visit to sites of precast concrete

10. Assignment based on actual survey on use of special concrete at various locations.

Text Books:

- 1. M.S. Shetty -"Concrete Technology" --, S. Chand Publications
- 2. A R Santhakumar, -"Concrete Technology "-- Oxford University Press.
- 3. M. L. Gambhir, -"Concrete technology" -- Tata Mcgraw Hill Publications
- 4. P.N.Balguru & P.N.Shah "Fiber Reinforced Cement Composite" Wheeler Publications-.

- 3. N V Nayak, A .K. Jain "Handbook on Advanced concrete Technology" Edited by, Narosa Publishing House
- 4. Dr. D.B.Divekar "Ferrocement Construction Mannual- -Pune
- 5. Prof. Gajanan Sabnis"Concrete Mix Design---

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

48 : COMPUTER APPLICATIONS IN CIVIL ENGINEERING-IV

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Practical: 02 Hours / Week Term Work and Oral: 50 Marks Termwork: 01Credit

Course Pre-requisites

The Students should have knowledge of

- 1. Structural Analysis-I & II
- 2. Structural Design- II

Course Objectives:

The student should be able to design RCC structure using STAAD.Pro

Course Outcomes:

On completion of the course, using STAAD.Pro the students will be able to:

- $1. \hspace{0.5cm} \textbf{Analyse the Building frame and calculate design forces in the members} \\$
- 2. Design RCC members
- 3. Design RCC Framed Building

UNIT - I (08Hours)

Structural Analysis

Generation of skeletal model, Defining cross section and section properties, Generate and assign different types of supports, assign different types of nodal and member loads, Define load combination, analysis, static check, load list, post analysis, extract output/result of axial force, shear force, bending moment, torsional moment, deflection etc.

UNIT - II (08Hours)

RCC Design

Staad - Design parameters as per IS 456-2000 and their significance, Design of Beam, Design of Column, Check code, Check members passing and failing, Redesign for optimization, Calculation of material quantities, Design Reports

Term Work:

- 1. Analysis of Building frame and calculation of design forces in the members
- 2. Design of RCC Framed Building.

Text Books:

- 1. T.S. Sharma, "Staad.Pro v8i for beginners", Notion Press
- 2. Sivakumar Naganathan, "Learn Yourself STAAD.Pro V8i",Lap Lambert

Reference Books:

- 1. Bentley Structures, "Staad.Pro Technical reference manual", Bentley Community e-book
- 2. IS 456 -2000

49: PROJECT STAGE I

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Practical: 02 Hours / Week Term Work and Oral: 50 Marks Termwork: 04 Credits

Course Pre-requisites

The Students should have knowledge of

- 1. Engineering Mathematics
- 2. Written and Communication skills
- 3. Analytical skills
- 4. Project planning and design

Course Objectives:

The student shall be able to identify the problem and suitable solution for the same.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Perform the literature review
- 2. Identify the grey area as the topic for work.
- 3. Decide the methodology

The project work shall consist of any project pertaining to Civil Engineering field or interdisciplinary field. The work may consist of any one or more of the following:

- 1. Critical Survey of literature
- 2. Experimental investigations

- 3. Design and fabrication of model
- 4. Design problems use of latest software
- 5. Industrial assignments / field survey and analysis

Use of computers, laboratory testing, projects sponsored by industry are preferred.

Stage I consist of

- 1. Defining the topic of the project, scope of the project and experimental and design work involved.
- 2. Completing the literature review and methodology pertaining to the topic selected.
- 3. A report / term work is tobe prepared on work done in stage I

TW & ORAL:

It shall be based on work completed in stage I and the Termwork / Report submitted.

Unit Test -II UNIT – IV,V,VI

50: INPLANT TRAINING

EXAMINATION SCHEME:

CREDITS ALLOTTED:

Duration: 45 days Term Work and Oral: 50 Marks

Termwork: 03 Credits

Course Pre-requisites

The Students should have knowledge of

- Building construction, building Planning, Surveying, Advanced Surveying
- 2. Concrete Technology
- 3. Hydraulic Engineering, Irrigation Engineering
- 4. Infrastructure Engineering,
- 5. Estimation, Costing and Valuation

Course Objectives:

- 1. The student shall be able to identify various problems faced on site.
- 2. The student shall be able to find read the drawings and find out the quantities from them
- 3. The student shall be able to know methods of concrete mix design, design of various civil engineering structures.

Course Outcomes:

On completion of the course, the students will be able to:

- complete the inplant training for 45 days in Civil Engineering/construction Industry /govt. organization/research organisation related to civil engineering.
- 2. know and implement various terms and problems on sites /design office related to civil engineering.
- 3. prepare the log book of day to day activities during his/her inplant training period and get it signed every day from the supervisor

- 4. complete a technical report/log book of his/her inplant training for 45 days duly certified by the officer in charge for the training.
- 5. explain and grade his/her experience of inplant training based on the knowledge received.
- 6. satisfactorily answer the questions and queries on work/experience of his/her inplant training completed.

Unit I (Hours)

In view of getting exposure to industry / site / design office, a student has to undergo the inplant training for 6 weeks / 45 days in one of the Civil Engineering areas. The training may consist of any one or more of the following:

- 1. Working on any site with substantial work related to Civil Engineering
- 2. Working in any design office with work related to Civil Engineering Design
- 3. Working in any Civil Engineering industry / Government organisation / research organisation

Report:

A report on above training and the work completed during training duly certified by officer incharge for the training. The report to be submitted within fifteen days from the date of completion of the training.

Termwork and Oral:

Termwork and Oral examination shall be based on the Termwork submitted.

51: EARTHQUAKE RESISTANT DESIGN OF STRUCTURES

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 02 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50 Marks Termwork:01 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Basic concepts of equilibrium of a structure
- 2. Concepts of shears and moments in a frame
- 3. Geological concepts in civil engineering
- 4. Design of R.C.C. elements using limit state design.
- 5. Concept of various forces acrting on a frame and analysis of a frame.

Course Objectives:

The student should be able to know various causes of earthquakes, their types, various methods of determination of earthquake forces, design a shear wall and ductile detailing of buildings.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. describe the causes and characteristics of earthquakes, effects of earthquake and various seismic zones
- define single and multiple degree freedom system, different types of vibrations.
- 3. calculate the earthquake forces using Equivalent Static method as per I.S.1893-2002.
- 4. determine the earthquake forces using Dynamic method as per I.S.1893-2002, decide the choice of method.
- 5. design a shear wall by understanding the concept behind it.
- 6. design the various provisions in buildings for earthquake resistance and the ductile detailing provisions as per I.S. 13920-1993.

UNIT - I (06 Hours)

Earthquake and their effects

Geology of earth, configuration of tectonic plates in a globe, influence of Geology on earthquake, behavior of plates, their motion and effects, causes of earthquake ,Characteristics of Earthquakes, Earthquake parameters, magnitudes, intensity, scales, classification of earthquake, seismic zoning of India, seismic coefficients for different zones, Effects of earthquakes on buildings

UNIT - II (06 Hours)

Theory of vibrations

Vibrations - definition, causes, classifications. Single Degree of Freedom systems (SDOF) - Free, forced, damped, un-damped vibrations with basic examples. Introduction to Multi-degrees of Freedom systems (MDOF)

UNIT - III (06Hours)

Determination of Earthquake forces-Static Method

Introduction to IS1893 (Part-I): 2002, Seismic design Philosophy, basic definitions, Concept of OMRF &SMRF frames, Seismic coefficient method, Determination of base shear ,Lateral force , storey shear diagram, application to cantilevers

UNIT - IV (06 Hours)

Determination of Earthquake forces-Dynamic Method

Dynamic Methods, Response Spectra Method as per I.S. 1893, Choice of Method

UNIT - V (06 Hours)

Design of Shear Wall

Concept of Shear Wall in earthquake resistance, Design of Shear wall

UNIT - VI (06 Hours)

General Provisions and rules to be followed for buildings in seismic areas, Various irregulations in buildings, Ductile detailing of earthquake resistant design as per IS 13920:1993

Assignments: Any six from the list given below.

- 1. Assignment based on geology of earthquakes, causes of earthquakes.
- 2. Assignment based on effects of earthquakes, seismic zones
- 3. Assignment based on calculation live loads at different storey levels..
- 4. Assignment based on different types of vibrations.
- 5. Assignment based on calculation of various loads for different types of frames.
- Assignment based on calculation of various loads for different types of soils.
- 7. Assignment based on calculation of various loads in different zones.
- 8. Assignment based on single degree freedom and multiple degree freedom system.
- 9. Assignment based on various irregularities in buildings.
- 10. Assignment based on ductile detailing as per IS 13920

Term Work:

- 1. Termwork should be based on above syllabus
- 2. Termwork should consist of
 - projects on determinations of Earthquake forces using static method
 - ii) projects on determinations of Earthquake forces using dynamic method
 - iii) project on design of shear wall.

Text Books:

- 1. B.N.Duggal "Earthquake resistance design of structure Oxford University Press.
- 2. Dr. Vinod Hosur " Earthquake Resistant Design of Building Structures"- Wiley India
- 3. Earthquake Tips NICEE, IIT, Kanpur
- 4. Jai krishna and Chandra shekharan "Elements of Earthquake Engineering"

5. N.Subramanian "Design of Steel Structures", Oxford University Press

Reference Books:

- 1. Clough R.W. and Penzin J "Dynamics of structure'. McGraw Hill Civil Engineering
- 2. Anil Chopra "Dynamics of structure", Prentice Hall India Publication
- 3. Mario Paz " Dynamics of structure", CBSPD Publication
- 4. Kramer S. L. 'Geo-technical Earthquake Engineering ',Prentice Hall India Publication
- 5. John M. Biggs "Introduction to Structural Dynamics"
- 6. LS.1893-2002 and LS. 13920-1993

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

52: WATER RESOURCES ENGINEERING

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 4 Credits

Practical: 2 Hours / Week Continuous Assessment: 40 Marks

Tutorial: 1 Hour / Week Term Work and Oral: 50 Marks Term work: 1 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Fundamentals of Soil and Fluid Mechanic.
- 2. Fundamentals of Mathematics and Statistics.

Course Objectives:

Students will study hydrological analysis and design hydraulic structures.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Describe methods of Measurement of precipitations and its analysis for planning water resources project.
- 2. Describe methods of estimation of evaporation and infiltration and their use for hydrological studies.
- 3. Describe the methods of stream flow measurement and design the flood hydrograph.
- 4. Describe process of reservoir planning and design the gravity dams.
- 5. Design and construction of earth dams.
- 6. Hydraulic design of spillways and energy dissipation arrangement.

UNIT - I (06 Hours)

Precipitation and its measurement

Introduction to Hydrology, Hydrological Cycle, Applications in Engineering, Formation of precipitation, Types of Precipitations, Measurement- rain gauges, estimation of missing data, mean precipitation over an area, presentation of rainfall data, depth area duration relationship, intensity duration frequency relationship, frequency of point rainfall

UNIT - II (06 Hours)

Evaporation and Infiltration

Initial losses, Evaporation Evapo transmeters, imperial methods for estimation of evaporation, evapotranspiration, methods to reduce evaporation, infiltration process, factors affecting infiltration, infiltration equations, measurement of infiltration, infiltration indices,

UNIT - III (06 Hours)

Stream Flow Measurement and Hydrograph

Stream flow measurement, measurement of stage, measurement of velocity, area velocity method, slope area methods dilution techniques/tracer methods, run off, factors affecting, hydrograph, Unit hydrograph, theory and applications. Methods of flood estimation, rational method.

UNIT - IV (06 Hours)

Reservoir planning and Gravity dams

Investigations for reservoir planning, various storage zones, estimation of reservoir capacity by mass curve method, Gravity dams forces acting and their combinations, criteria for structural stability, modes of failure, elementary profile of gravity dam, construction of gravity dam, Use of colgrout masonry ,foundation treatment.

UNIT - V (06 hours)

Earth dams

Classification of earth dams, method of construction ,basic design considerations in design of section, phreatic line and its location, stability of slopes ,design of filters ,rock toe and pitching, internal drainage arrangement, cut of trench. Causes of failure of earth dams.

UNIT - VI (06 Hours)

Spillways and hydropower structures

Introduction , function , components, classification ,selection of type of spillway, hydraulic design of ogee spillway, Energy dissipation below spillway-hydraulic jump type and bucket type, spillway gates.

Assignments:

- 1. Numericals on precipitation.
- 2. Estimation of net run off from given catchment knowing the infiltration index.
- 3. Numericals on
- 4. Unit hydrograph.
- 5. Case studies on types of gravity dams.
- 6. Report on colgroute masonry construction of gravity dams.
- 7. Numericals on spillways
- 8. Study of different sections of earth dams used in field for different site conditions and different materials

Term Work:

Term Work will consist of minimum eight assignments from list given below.

- 1. Marking the catchment area for a given reservoir site on topographical maps and Estimation of Mean precipitation for given catchment area.
- 2. Estimation of reservoir capacity by mass curve method
- 3. Design a flood hydrograph from a given unit hydrograph.
- 4. Design of hydrographs of different duration from a given UH.
- 5. Site Visit to water resources project.
- 6. Stability analysis of gravity dams.
- 7. Stability analysis of earth dams.
- 8. Hydraulic design of spillway and energy dissipation arrangement.
- 9. Study and draw typical layout of high head hydropower plant.

Text Books:

- 1. Dr. P.N. Modi "Irrigation Water Resources and Water Power Engineering", Standard Book House.2014
- 2. S. K. Garg "Irrigation Water Resources and Water Power Engineering" Khanna Publishers, 2006.
- 3. " K. Subramanian "Engineering Hydrology" Tata Mc Graw Hill 2015

4. Dr P. Jaya Rami Reddy "A Text Book of Hydrology" . University Science Press New Delhi.2008

Reference Books:

- 1. V.T. Chow "Applied Hydrology", Mc Graw Hill Publications 2003
- 2. R.S. Varshney Concrete dams,, Oxford and IBH, 2000
- 3. Bharat Singh and R.S.Varshney Embankment dams , Oxford and IBH ,2000 $\,$

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III Unit Test -2 UNIT – IV, V, VI

53: INFRASTRUCTURE ENGINEERING

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 02 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50 Marks Termwork: 01 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. surveying.
- 2. concrete technology.
- 3. geotechnical engineering.
- 4. foundation engineering.

Course Objectives:

1) To make the student understand & design various components of a railways, highway & airport.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. carry out surveys involved in planning & highway alignment.
- 2. carry out traffic survey & geometric design for highway construction.
- 3. describe flexible & rigid pavements as per IRC
- 4. describe various components of permanent way.
- 5. construe geometric design of a railway track & signaling in railways.
- 6. annotate components of an airport.

UNIT - I Highway Engineering (06 Hours)

Scope of Road transportation, Highway Development in India,Road Plans: Nagpur, Bombay & Lucknow, determination of road length. Road Classification & patterns, preliminary surveys, Highway alignment,Repairs & maintenance, quality control, concept of BOT, BOOT & BOLT.

UNIT - II (06 Hours)

Traffic Engineering & Geometric design

Traffic Engineering: Traffic characteristics, Volume studies, speed studies, capacity, density, traffic regulations & control device, types of road intersection.

Geometric Design: Camber, Super Elevation, Road Margin, pavement width, right of the way, gradient, sight distance, stopping distance, shoulder, design speed, cross section of roads (cutting & embankment), Highway drainage.

Curves:horizontal transition curves, grade compensation on horizontal curves, vertical curves.

UNIT - III (06Hours)

Pavement Design & Highway Materials

Road Pavement: types, design factor, design of flexible pavement by CBR method (IRC 37- 2001 & 2012), methods of rigid pavement design (IRC 58 – 2002), load & temperature stresses (IRC recommendations for Road failure), Joints.

Highway Materials: Importance & properties of sub grade (soil), pavement component materials, aggregates.

Bitumen: Types, Bitumen mix design (Marshall stability test).

UNIT - IV (06 Hours)

Railway Engineering

History & Development, comparison to different modes of transports, Location surveys & alignment, permanent way, gauges, necessity of uniformity of gauges.

Rails: types & functions, defects, rail flaw detector, joints.

Sleepers: classification & functions, sleeper density

Ballast, formation & subgrade, rail fixtures & fastening, L.W.R.& S.W.R., advantages of welded joints.

UNIT - V (06 Hours)

Geometric Design, Points, Crossings & Signaling in railways

Geometric Design: Cross-sectional elements of a railway tract, Gradient, Curves, Super Elevation, cant deficiency.

Points & Crossings: Types, Turnouts, design of diamond crossing & cross over.

Signaling:Objects, principles & classification, interlocking, turntable, buffer stops, scoth block.

Introduction to Metro, mono rails& Pod taxi.

UNIT - VI (06 Hours)

Airport Engineering

Airport: planning & layout, classification, orientation, aircraft characteristics, airport obstructions, Runway, taxiway, aprons, terminal area.

Assignments:

- 1. Solve numerical problem on determination of road length according to Nagpur, Bombay & Lucknow plan.
- 2. Write a short note on BOT, BOOT & BOLT type of projects.
- 3. Define all the terms related to cross section of highway with neat sketches of each (in embankment & cutting).
- 4. Solve a numerical on calculation of sight distance on highway.
- 5. Write a short note on pavement design of highways (Flexible & Rigid) according to IRC guidelines.
- 6. Draw a neat sketch of a cross section of a railway track explaining all its components & their functions.
- 7. Write a short note on Gradients, Curves, Super Elevation, cant deficiency.
- 8. Explain the advantages of SWR & LWR.
- 9. Write classification of different types of signals & briefly explain semaphore signal.
- Draw a layout of an airport illustrating all its components& their functions.
- 11. Write a short on Inland Waterways & its scope in India.

Term Work:

- 1) List of experiments: test on aggregates (any four)
 - a) Aggregate Impact Test
 - b) Los Angeles Abrasion Test
 - c) Crushing Test on aggregates
 - d) Flakiness Index & Elongation Index
 - e) Specific gravity & Water absorption test
 - f) Bitumen stripping value Index
 - g) Use of Antistripping compound
- 2) List of experiments :test on Bitumen (any five)
 - a) Specific gravity test
 - b) Penetration test
 - c) Ductility test
 - d) Softening point test
 - e) Viscosity test
 - f) Flash point & Fire point test
 - g) Benkelman Beam Test
 - h) Marshal stability test
- 3) List of experiments: test on soil.
 - a) California Bearing Ratio Test

Text Books:

- 1) Khanna S.K. & Justo C.E.G., "Highway Engineering", Nem Chand & Bros Publishers, Roorkee, Uttarakhand.
- 2) Arora & Khanna, "Airport Engineering", Nem Chand & Bros Publishers, Roorkee, Uttarakhand.
- 3) Saxena S.C., "A Text book of Railway Engineering", DhanpatRai& Sons Publishers, New Delhi.

Reference Books:

- 1) Mundrey J.S., "Railway Track Engineering", Tata McGraw Hill Publications, New Delhi.
- 2) Satish Chandra & Agrawal M.M., "Railway Engineering", Oxford University Press, New Delhi.
- 3) ParthaChakraborty&Animesh Das, "Principles of Transportation EngineeringEngineering",
- 4) Norman J. Ashfor, Saleh A. Mumayiz&Paul H. Wright, "Airport Engineering: Planning, Designand Development of 21st-Century Airports", John Wiley & Sons Publishers, New Delhi

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III
Unit Test -2 UNIT – IV, V, VI

54 A: DISASTER MANAGEMENT

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 02 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50Marks Termwork: 01 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Engineering Geology
- 2. Advanced Surveying
- 3. Project Management

Course Objectives:

To make the student understand various disaster management strategies for massive hazards.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. construe various disasters & role of civil engineer during such hazards.
- 2. manifest various geological disasters & their consequences.
- 3. explicate various hydro-meteorological disasters.
- 4. annotate various disaster management & risk assessment strategies.
- 5. describe use of various scientific & technological tools for disaster forecasting & its dissemination as warning.
- 6. explicate various disaster management techniques used for rescue operations during the disaster.

UNIT - I (06 Hours)

Disaster Management: Understanding disasters

Disaster- Definition & Concept, Types, Mitigation, Preparedness, Phases of Disaster Management- response, recovery, rehabilitation, information & public awareness, role of government in disaster management (NIDM), principle components of disaster management, organizational structure for disaster management, study of recent disasters, role of Civil Engineer in disaster management.

UNIT - II (06 Hours)

Geological & Manmade Disasters

Earthquake- Different types of earthquake waves, seismic zoning of India, liquefaction of soil

Tsunami- The process of triggering waves, dynamics of tsunami waves, management of tsunami disaster

Landslides- causes, signs, early warnings systems, means of mitigation Blasts- Mechanism, causes, characteristics, preventive and control measures of fire, Investigation after explosion.

UNIT - III (06 Hours)

Cyclones, Flood, Drought & Fire disasters

Cyclones- major location of occurrence, intensity of classification, cyclone, management & mitigation

Flood- types of flood, effects of flood, flood defenses & management,

Drought- concept of Drought, consequences of drought, management & risk reduction, mitigation

Fire- detection & alarms, fire resistance, fire endurance, mitigation measures

UNIT - IV (06 Hours)

Disaster Management Cycles,

Disaster management cycle- Paradigm shift in disaster management, financial relief expenditure, legal aspects, rescue operations, risk management (pre & post disaster), zone & macro zone formation, Infrastructure- early recovery, reconstruction & redevelopment, Disaster prevention & Risk assessment strategies- IDNDR, Yokohama Strategy, Hyogo framework of action

UNIT - V (06 Hours)

Application of Science & Technology for Disaster Management

Geo- informatics tools in disaster management, prediction & assessment (RS, GIS & GPS), buoys, Disaster Communication system (Early Warning & its dissemination), Disaster safe designs constructions,

UNIT - VI (06 Hours)

Emergency Management

Rescue operations- use of Helicopters, transportation, detection of areas of disasters, Global, National, Local management systems for various disasters, Short term/long term effects & measures to be taken to overcome, SWOT analysis based on design & formulation strategies, S & T institution for disaster management, methods of assessment of impact of disasters such as photogrammetric methods, ground data collections, school awareness & safety assurance programme

Assignments:

- 1. Name the government organizations related to disaster management & their role in pre, post & during disaster situation.
- 2. Mention the role of Civil Engineer in various disaster situations.
- 3. Explain the causes & types of earthquakes. Briefly explain the concept of plate tectonics in earthquakes.
- 4. Explain the phenomenon of Tsunami, briefly mentioning tsunami prediction tools.
- 5. Write a short note on cyclonic, flood, drought & fire disasters.
- 6. Explain the various components of disaster management cycle.
- 7. Briefly discuss various Disaster prevention & Risk assessment strategies.
- 8. Explain the advantages of usingScience & Technology for Disaster Management.
- 9. Briefly explain various medium used asDisaster Communication systems (Early Warning & its dissemination).
- 10. List out various rescue operation methods for various disasters.

Term Work:

1) Write case studies (any three- 03) on any disaster & disaster management techniques used covering topics mentioned below.

(use imageries & site data if available to support your answer)

- a) Type & cause of disaster.
- b) Pre & Post disaster risk assessment.
- c) Disaster mitigation after the disaster.
- d) Use of Science & technology for various aspects of disasters.
- e) Emergency management (Use of any other tools or risk assessment strategies.
- f) Impact of disaster.
- g) Rehabilitation (pre-post disaster).
- h) Mention role of government agencies co-ordinating during disaster.

Text Books:

- 1) Srivastava H.M., Bhattacharya S.N., Gupta G.D., "Earthquakes Geography and Management", New Age International (P) Ltd., Publishers, New Delhi.
- 2) Singhal J.P., "Disaster Management", Laxmi Publications, New Delhi.
- 3) K. Elangovan, "GIS: Fundamentals, Applications and Implementations", New India Publishing Agency, New Delhi.

Reference Books:

- 1) Dr. Mrinali Pandey, "Disaster Management", Wiley India Pvt. Ltd.
- 2) Tushar Bhattacharya, "Disaster Science & Management", Mc Graw Hills (India), Pvt., Ltd.

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

54 B: ADVANCED STEEL DESIGN

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 02 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50Marks Termwork: 01 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Strength of Materials
- 2. Structural Design I

Course Objectives:

The student will able to design Building, Truss Bridge, Plate Girder and its foundation using Structural Steel

Course Outcomes:

On completion of the course, the students will be able to:

- 1. design the member for different forces.
- 2. design moment resisting connection.
- design plate girder
- 4. design building frame
- 5. design column foundation
- 6. evaluate design forces for gantry girder and truss bridge.

UNIT - I (06Hours)

Design of Structural Members:

Design of Members for Axial Tension, Axial Compression, Shear and Bending Moment. Check for deflection.

UNIT - II (06Hours)

Design of Moment Resisting Connection:

Design of bolted connection for Moment, Design of bolted connection for Moment, Design of connection for combined Shear and Moment.

UNIT - III (06Hours)

Design of Welded Plate Girder:

Design of Cross section, Design of connection between web and flange, Design of Load carrying and Load bearing Stiffeners, Design of Intermediate Stiffeners, Design of Horizontal Stiffeners, Design of connection between stiffeners and section.

UNIT - IV (06Hours)

Design of Building Frame:

Load Calculation, Analysis of Frame, Design of Beams, Design of Columns, Design of Beam to Beam connection, Design of Beam to Column connection.

UNIT - V (06Hours)

Design of Foundation:

Design of Column base, base plate and anchor bolt, Design of RCC Footing.

UNIT - VI (06 Hours)

Design Philosophy for different structures:

Design philosophy for Gantry Girder, Truss Bridges.

Assignments:

- 1. Design of member for tension and compression.
- 2. Design of member for shear and moment
- 3. Design of bolted connection for moment
- 4. Design of welded connection for moment
- 5. Design of cross section for plate girder.
- 6. Design of stiffeners
- 7. Design of Beam to beam connection

- 8. Design of Beam to column connection
- 9. Draw layout of gantry girder or truss bridge.

Term Work: Design of any one project below-

- 1) Plate Girder
- 2) Building Frame

which includes-

- 1. Calculation of loads, Analysis and calculation of member forces
- 2. Design of different elements for member forces
- 3. Design of connections
- 4. Drawing Sheets using AutoCad.

Text Books:

- S. K Duggal, "Limit State Desin of Steel Structures", Tata McGraw-Hill Education
- S.S.Bhavikatti, "Design of Steel Structures: By Limit State Method", I K International Pub
- 3. M. R. Shiyekar, "Limit State Design in Structural Steel", Prentice-Hall of India

Reference Books:

- 1. N. Subhramanian, "Design of Steel Structures", Oxford University Press
- 2. Dr. Ramchandra, "Limit State Design of Steel Structures", Scientific Pub
- 3. IS:800-2007, General Construction in Steel Code of Practice"
- 4. IS:875-1987, "Code of Practice for Design Loads for Buildings and Structures Part (1 to 5)"
- 5. SP-6(6)- 1972, "Handbook for Structural Engineers"

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

54 C: SOLID WASTE MANAGEMENT

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 3 Credits

Practical: 2 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50 Marks Termwork: 1 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Basic Knowledge of Physics, Chemistry and Mathematics
- 2. Basic Knowledge of Environmental Science
- 3. Basic Knowledge of Statistics and Computers

Course Objectives:

To learn the concept of Solid Waste Generation and understand its need and importance to Reuse, Recycle, Refuse and thereby, effectively manage the problem of Solid Waste generated as well as mitigation and combating the issue of land pollution.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Understand the generation, sources and characteristics of Solid Waste
- 2. Classify the types of the collection and storage of Solid Waste
- 3. Familiarize with the Present Scenario of transporting the Solid Waste by analyzing inefficient and Unscientific Manual Loading Of Waste and Understand the screening and scoping process and how it is applied
- 4. Know the options for sorting the solid waste at Source, Waste Processing Site and Land filling Site
- 5. Understand Site Investigation and Site Characterization for Landfill by Proper Planning And Design as well as Principles Of Composting by Manual And Mechanized Methods
- 6. Familiarize with latest Emerging Processing Technologies for Solid Waste for Treatment and Recovery of useful Products

UNIT - I (6 Hours)

Solid Waste Management

Solid Waste: Definitions And Classification Of Solid Wastes, Composition, Characteristics And Quantities, Per Capita Quantity Of Municipal Solid Waste In Indian Urban Centers, Estimation Of Future Per Capita Waste Quantity, Physical Characteristics, Chemical Characteristics

Solid Waste Management: Introduction, Objective, Principles, Functional Elements, Components, Solid Waste Generation, Environmental Impact Of Solid Waste Disposal On Land, Management System, Linkages Between Municipal Solid Waste Management System And Other Types Of Wastes Generated In An Urban Centre, Materials Flow Chart For Municipal Solid Waste, Legislation and Rules of SWM in India

UNIT - II Collection and Storage of Waste

(6 Hours)

Collection: Introduction, Present Scenario, Tools & Equipment, Methods Of Primary Collection Of Waste, Collection Of Waste From Shops And Establishments, Collection Of Bio-Medical Waste, Collection Of Hotel And Restaurant Waste, Collection Of Construction And Demolition, Collection Of Domestic Hazardous & Toxic Waste

Storage: Introduction, Present Scenario, Storage Of Recyclable Waste, Provision Of Litter Bins On The Streets, Provision Of Special Containers For Storage Of Domestic Hazardous And Toxic Wastes, Measures To Be Taken By The Local Bodies Towards Segregation Of Recyclable Waste

UNIT - III (6 Hours)

Transportation of Waste

Introduction, The Present Scenario: Inefficient And Unscientific Manual Loading Of Waste Irregular Transportation, Underutilization Of Fleet Of Vehicles, Open Trucks Cause Nuisance, Non-Routing Of Transportation Of Waste From Hotels/Restaurants/Hospitals/Construction Site, Measures To Be Taken To Improve The System: Domestic/Trade/Institutional Waste, Routing Of Vehicles, Use Of Vehicles In Two Shifts, Type Of Vehicles To Be Used, Bio-Medical Waste From Hospitals/Nursing Homes/Health Care Establishments, Transportation Of Waste From Hotels & Restaurants, Transportation Of Construction Waste And Debris, Transportation Of Waste

From Narrow Lanes, Setting Up Of Transfer Station, Lifting Of Waste From The Transfer Station, Workshop Facility For Vehicle Maintenance, Fleet Of Vehicles To Be Maintained, Parking Of Workshop Vehicles

UNIT - IV (6 Hours)

Sorting and Material recovery

Sorting: Introduction, Objectives, Stages, Primary and Secondary / Tertiary Sorting, Primary Sorting At Source, Primary Sorting At The Community Bin (Municipal Bin), Primary Sorting At Landfill, Secondary / Tertiary Sorting, Occupational Health, Toxicity Related Hazards, Hazardous Substance Containers, Household Batteries And Other Toxic, Infectious, Non-Recyclable, Problems And Desirable Change, Long-Term Desirable, Sorting At Waste Processing Site, Sorting Prior To Land filling

Material Recovery: Introduction, Guidelines for Sorting for Materials Recovery, Material Recovery at the Source, Community Bin (Municipal Bin), Waste Storage Depot, Transfer Station, Intermediate Sorting at Central Sorting Facility, Waste Processing Site, Land filling Site

UNIT - V (6 Hours)

Landfill and Composting

Landfill: Introduction, Land filling Of Municipal Solid Waste, Environmental Impact And Its Minimization, Essential Components, Site Selection, Site Investigation And Site Characterization, Landfill Planning And Design, Design And Construction Of Landfill Liners, Construction And Operational Practice, Post-Closure Stabilization, Operation And Care, Landfill Quality Assurance And Quality Control, Land filling Costs, Manpower Requirements, Remediation Of Old Landfill Sites

Composting: Introduction, Principles Of Composting – Manual And Mechanized Methods, Windrow Composting, Factors Affecting The Composting Process, Control Of Composting Process, Properties Of Compost, Mechanical Composting, Unit Processes, Environmental Control

UNIT - VI (6Hours)

Emerging Processing Technologies

Introduction, Vermicomposting, Biogas from Municipal Solid Wastes, Conversion Of Solid Wastes To Alcohol Fermentation, Pyrolysis, Plasma Arc Technology/Plasma Pyrolysis Vitrification, Refuse Derived Fuel, Hydro pulping, Slurry Carb Process, Treatment For Recovery Of Useful Products

Assignments:

- 1. Segregation and Storage of Waste at Source
- 2. Abolish open waste storage depots and other Inefficient waste storage devices
- 3. Public Private Partnership in SWM Services
- 4. Private Sector Participation
- 5. Provision of SWM Services in slums
- Allotment adequate funds for capital and revenue Expenditure for SWM

Text Books:

- 1. Handbook of Solid Waste Management, George Tchobanoglous and Frank Kreith. Second Edition. McGRAW-HILL
- 2. Solid Waste Management, K. Sasikumar, Sanoop Gopi Krishna, PHI Learning, 2009
- 3. Solid Waste: Engineering Principles and Management Issues, , George Tchobanoglous, 1st Edition, McGRAW-HILL
- 4. Solid Waste Technology and Management Vol. 1 and 2, Thomas Christensen, Wiley Publishing, 2010
- 5. Solid Waste Management, Stefen Burnley, Wiley Publishing, 2014

Reference Books and Further Reading:

- 1. Assessment of the Status of Municipal Solid Waste Management in Metro Cities, State Capitals, Class I Cities and Class II Towns in India: An Insight . Sunil Kumar, J.K. Bhattacharya, A.N. Vaidya, Tapan Chakrabarti, Sukumar Devotta, A.B. Akolkar. Kolkatta: Central Pollution Control Board (CPCB), National Environmental Engineering Research Institute (NEERI), 2008.
- 2. Ministry of New and Renewable Energy, MNRE. National Master Plan for Development of Waste-to-Energy in India. Ministry of Environment and Forests. [Online] 2003.
- 3. Census of India, 2011. Census of India. [Online] 2011.

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III Unit Test -2 UNIT – IV, V, VI

54 D: ENTREPRENEURSHIP DEVELOPMENT

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 02 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral:50 Marks Termwork: 01Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Project Management
- 2. Construction Management
- 3. Engineering Economics and Financial Management
- 4. Construction Techniques and Machinery

Course Objectives:

The purpose of this course is to generate a new breed of entrepreneurs on an ongoing basis. This course will create in them the necessary knowledge, attitudes, skills and competence to start and manage a new enterprise. It will also train them to be innovative in creating and managing business units started by them and manage change.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. develop the ability to select potential areas for self-employment
- 2. identify information and use of technology for Business Initiatives.
- 3. understand the use of technology to design and structure the organization
- 4. select appropriate agency/ies for technical and financial support.
- 5. prepare preliminary and detailed project report.
- 6. manage sales and sales promotion.

UNIT - I (06Hours)

Introduction to Entrepreneurship

Definition entrepreneurship and enterprise, Concept, Classification & Characteristics of Entrepreneur, need and scope of entrepreneurship in Civil Engineering, Entrepreneurship as career, present scenario of with respect to entrepreneurship in India.

UNIT - II (06Hours)

Business Opportunity Identification

Opportunity search: Divergent Thinking Mode: Meaning and Objectives – Tools and Techniques: Environmental Scanning for business opportunity identification Opportunity Selection: Convergent Thinking Mode: Tools and Techniques

UNIT - III (06Hours)

Business Plan

Meaning and Importance – Objectives – Selections Contents – Marketing and Technical Feasibility – Financial Viability market survey techniques, marketing viability of the product, and typical areas of Civil Engineering.

UNIT - IV (06Hours)

Finance and accountancy

Finance and accountancy: working capital and fixed capital assessment incentives from financial institutions and government, financial ratios, their significance, break even analysis cash flow charts financial statements.

UNIT - V Project Report

(06Hours)

Project report: Preliminary and final project report preparation, financial technical commercial and economic viability project implementation process project profiles with respect to Civil Engineering

UNIT - VI (06Hours)

Marketing Management

Introduction to marketing management, contract management and sales promotion. Motivation risk and its analysis goal setting decision making. Communication skills effective communication and barriers.

Assignments:

- Case study for Present scenario of Entrepreneurship development in India
- 2. Assignment based on business plan preparation.
- 3. Develop a market survey format and carry out a market survey.
- 4. Prepare financial report of any constrction project.
- 5. Prepare a project report for any small construction project
- 6. Prepare marketing proposal for a construction project.
- 7. Study of any one of Entrepreneure biography.
- 8. Student are expected to study the assistance scheme of the following Institutions

District Industries Center (DIC)

Maharashtra Center for Entrepreneurship Development (MCED)

National Small Industries Corporation of India (NSIC)

Maharashtra Industrial Development Corporation (MIDC)

Micro Small and Medium Enterprises (MSME)

Term Work:

- 1. Visit report : Shudent shall visit a small scale industry, study the working of the industry and write a report on that.
- 2. Prepare a detailed report for construction industry.

Text /Reference Books:

- 1. Small Scale Industry Handbook Jay Narayan Vyas, Published by Granthvitaran, Ahmedabad
- 2. Entrepreneurship for the Nineties Gordon B. Baty published by Prentice Hall Inc. College Technical Reference by Granthvitaran

- 3. Self-made Impact making Entrepreneurs published by Entrepreneurship Development, Institute of India Bhatt. P.O. Chandkhed, Dist. Gandhinagar
- 4. Entrepreneurship : New venture creation by David Holt Prentice Hall of India Pvt. Ltd. Latest Edition
- 5. Entrepreneurs Talent Temperament Technique by Bill Bolton and John Thompson- 2nd Edition-Elsevier
- 6. Dynamics of Entrepreneurship Development Vasant Desai.
- 7. Innovation and Entrepreneurship Peter F. Drucker

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

54 E : HYDRAULIC STRUCTURES

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 3 Credits

Practical: -2 Hours / Week Continuous Assessment: 40 Marks

Tutorial: -- Term Work and Oral: -- Marks Term work: 1 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Fluid and Soil Mechanics
- 2. Water Resources Engineering

Course Objectives:

Students will study uses and design hydraulic structures.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Describe and design weirs on permeable foundations
- 2. Design channels by different methods.
- 3. Describe various types of canal outlets and regulation works
- 4. Describe and design cross drainage works
- 5. Describe and design river training works .
- 6. Describe causes, effects and measures to control water logging.

UNIT - I (06 Hours)

Diversion Head works

Introduction, types, components, weir and barrage, causes of failure of weirs on permeable foundations, Bligh's creep theory, Khosla's theory, silt control devices.

UNIT - II (06 Hours)

Canals

Introduction, Classification of irrigation canals, canal network, canal alignment, losses in channels, design of unlined channels by silt theories, Kennedy's and Lacey's theory, tractive force theory, losses in channels, Lining of channels types and economics.

UNIT - III (06 Hours)

Canal outlets and regulation works

Introduction, requirements of good outlets, types of outlets, Canal regulation works, necessity and location of falls, types of falls, cross regulator and distributary head regulator.

UNIT - IV (06 Hours)

Cross drainage works

Introduction, types, classification of aqueducts and siphon aqueducts, design of cross drainage works, determination of maximum flood discharge, determination of waterway of drain

UNIT - V (06 hours)

River training works

River training and its objectives, classification of river training works, Marginal embankment or levees, guide banks, spurs, types of spurs, design of guide banks and spurs.

UNIT - VI (06 Hours)

Water logging and its control

Introduction, causes and effects of water logging, measures for prevention of water logging, open and closed drains, reclamation of saline and alkali soils.

Assignments:

- 1. Problems on Bligh's and Khosla's theory
- 2. Design problems on Kennedy's and Lacey's theory.
- 3. Design of any one type of fall
- 4. Design of head regulator
- 5. Design of aqueduct/ siphon aqueduct.
- 6. Design of guide banks /spurs.
- 7. Case studies on uses of spurs
- 8. Case studies on drainage of water logged areas

Text Books:

- 1. Dr. P.N. Modi "Irrigation Water Resources and Water Power Engineering", Standard Book House. 2014
- 2. S. K. Garg "Irrigation Water Resources and Water Power Engineering" Khanna Publishers, 2006.

Reference Books:

1. Garde R.J. and Rangaraju K.G. ," Sediment transport and river Engineering" New Age International Publishers, 2006

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

54 F: SOCIAL AND LEGAL ASPECTS IN CIVIL ENGINEERING

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 3 Hours / Week End Semester Examination: 60 Marks Theory: 3 Credits

Practical: 2Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50Marks Termwork: 1 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Building Planning Design and Byelaws.
- 2. Project Management.

Course Objectives:

To make students understand applications of social and legal aspects in civil engineering construction and professional practice.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Forms of business associations, their liabilities and their governing principles.
- 2. To understand difference between executional policies of public and private projects, types of organization structures & their bidding processes.
- 3. To understand laws of contracts, contract classification, types of agreements, safety legislation, health laws
- 4. Interprete contracts, understand conflict resolution, performance disputes, arbitration etc.
- 5. Learn social aspects like neighboring land owner rights, byelaws regarding growth & control, environmental aspects etc.
- Understand intellectual property rights related to patents, copyrights & trade secrets.

UNIT - I (6 Hours)

Title-: FORMS OF BUSINESS ASSOCIATION & EMPLOYMENT

Sole proprietorship, Partnerships, authority & liability of partners, Profit corporations & non-profit corporations, Professional corporations, Limited Liability Partnerships (LLP), Limited liability companies (LLC), Joint Ventures

Agency & employment - Policies behind agency concept & relationship, Employment relationship & workers compensation, Union & labour disruptions, Independent contractors, Labour laws - overview

UNIT - II (6 Hours)

PROJECT ORGANISATIONS

Public versus Private projects, Pricing types & delivery schedules. Turnkey Contractors- design & build project alliance, Public Private Partnerships (PPP), Build Operate & Transfer (BOT), Building Information Modeling (BIM), Competitive bidding process, Lean project delivery

UNIT - III (6 Hours)

CONTRACTS & CONSTRUCTION PROCESS

Contract formation, defects in contract formation, contract classification. Agreements- Memorandum of Understanding (MoU), Letter of Intent (LoI), Breach of contract, remedies for contract breach, limits on recovery, Law of Tort, Limits on tort liability.

Basic types of contracts, Public versus Private owner, Prime contractor, Subcontractor. Purchase orders, Insurers, sureties, Permits, Building codes, safety legislation, Occupational safety & health laws, Responsibility of consultant, professional standard & compliance, ownership of drawings & specifications. Suspension, abandonment & termination clauses.

UNIT - IV (6 Hours)

PERFORMANCE DISPUTES

Contract interpretation, contractor claims, owner claims, contractor defenses to claims, resolving conflicts and inconsistencies, differing conditions, changes, design liability, Project delays and accelerations, time & duration of extension, notices, Warranty (Guarantee) clauses, bonus/penalty clauses, Contractual indemnity, Insurance, Arbitration, mediation & dispute resolution, Termination of contract.

UNIT - V (6 Hours)

SOCIAL ASPECTS & ENVIRONMENTAL LAWS

Urban & rural social transformation and their impact on social life, Housing as social security and important land use component, role of housing in development of family & community wellbeing, Land use provisions, economic concepts of land pricing, demand forecasting for land use, factors affecting land supply and demand.

Environment restrictions & limitations on land use control. Historic & landmark preservation. Open space & National Environmental Policy act. Resource conservation & recovery act. Clean water & clean air act. The environment friendly design and construction.

UNIT - VI (6 Hours)

INTELLECTUAL PROPERTY RIGHTS

Ideas, Copy rights, Patents & Trade secrets

Nature of Intellectual property - Patents, Designs, Trademarks & copyrights, availability of legal protection, duration of protection. Process of patenting & development for Technological Research, Innovation, Patent rights, Licensing & Transfer of Technology, Patent information and data base.

Assignments:

- 1. Distinguish between forms of business associations, their liabilities and their governing principles.
- 2. Explain the policies of public and private projects, types of organization structures & their bidding processes.

- 3. Short note on Turnkey Contractors- design & build project alliance
- 4. Explain Laws of contracts, contract classification.
- 5. Documentation in contract formation, defects in contract formation
- 6. Short note on Arbitration, mediation & dispute resolution.
- 7. List various social laws and explain Historic & landmark preservation
- 8. Explain land zoning Byelaws for land use control.
- 9. Explain in brief Intellectual property, Patents-Designs, Trademarks & copyrights
- 10. Explain with flow chart Process of patenting.

Term Work:

- 1) Collection And analysis of data for different business association.
- 2) Application of Building Information Modeling (BIM).
- 3) Classification of contracts.
- 4.) Case study on arbitration.
- 5.) Different types of laws related to property and environment.
- 6.) Application of intellectual property rights.
- 7) Write case study on: Build Operate & Transfer (BOT), Public Private Partnerships (PPP)

Text Books:

- BIM and construction management Brad Hardin, Dave Mccool.
- Fundamentals of Engineering Economics-Pravin Kumar, Wiley, India.

Reference Books:

- BIM and construction management Brad Hardin, Dave Mccool.
- Prabuddha Ganguly, "Intellectual Property Rights", Tata Mc-Graw Hill.

- Fundamentals of Engineering Economics-Pravin Kumar, Wiley, India.
 Arbitration, Conciliation and Alternative Dispute Resolution Systems-Dr S.R. Myneni-2004 Edition, reprinted in 2005 –Asia Law House Publishers.
- The Indian Contract Act (9 of 1872) Bare Act-2006-Professional Book Publishers.

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B. TECH. (CIVIL) SEM. VI

54 G: ADVANCED ENGINEERING GEOLOGY WITH ROCK MECHANICS

TEACHING SCHEME

EXAMINATION SCHEME

CREDITS ALLOTTED

Theory: 3 Hours / Week

End Semester Examination: 60 Marks Practical: 2 Hours / Week Continuous Assessment: 40 Marks Theory: 03 Credits

Term Work and Oral: 50 Marks

Term work: 01 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. **Applied Geology**
- 2. **Basic Science**

Course Objectives:

To make students understand strength and water tightness of rocks, treatments given to the rocks. Decide foundation level for dams, bridges and alignment of tunnel.

Course Outcomes:

On completion of the course, students will be able to:

- 1. Discuss engineering geology of Deccan trap basalt.
- 2 To determine occurrence of ground water.
- 3. . Explain tail channel erosion.
- 4. Decide alignment of tunnel with reference to nature and structure of rock
- 5. Discuss process of soil formation
- Decide different treatment to tunnel and foundation of civil 6. engineering structures using rock mechanics.

UNIT - I (6 Hours)

Introduction and Engineering geology of the Deccan Trap

Importance of geological studies in engineering investigation, Precautions necessary to avoid misleading conclusions likely to be drawn while interpreting drilling data with particular reference to RQD. .Case histories illustrating economics made possible by proper geological studies and wasteful expenditure or difficulties resulting from their neglect. Engineering characters of rocks of major rock formations of India. Engineering geology of the Deccan Trap Basalts: Stratigraphy of Maharashtra, Varieties of Basalt, Field Characters of flows, regional distribution of Deccan trap rocks. Factors affecting strength and water tightness, Stability of cuts and ability to stand without support. Significance of commonly occurring features like gas cavities, Jointing, Weathering, Hydrothermal alteration, Volcanic breccias, Tachylytes, Dykes, Fractures.

UNIT - II (6 Hours)

Deccan Trap Basalt as Construction material and Ground water conditions in Maharashtra

Deccan trap basalt as construction material, Use of compact basalt and amygdaloidal basalt as rubble for masonry and metal for concrete.

Ground water conditions in Maharashtra with reference to Deccan trap area. Water bearing characters of different types of basalt, volcanic Breccia's, Tachylytic basalt, Dykes, Fractures, Weathering products and older alluvium. Geological factors governing natural recharge. Geological aspects of multi aquifer system. Geological aspects of conservation of water and artificial recharge. Dependence of success of such schemes as percolation tanks and water shed development on geological conditions and necessity of geological studies for such schemes. Study of case history.

UNIT - III (6 Hours)

Dam, Foundation Treatment, Tail Channel & Geomorphology

Dams: Strength and Water tightness of Deccan Trap rocks from foundation point of view. Physical properties such as compressive strength, Water absorption .Effect of weathering and hydrothermal alteration on the engineering properties of rocks. Deterioration of rock masses on exposure to the atmosphere and suitable treatment for such rocks.

Foundation Treatment:

Determining of foundation levels of gravity dams and cut off levels for earth dams. Correction of adverse features by means of grouting, Consolidation grouting for improving strength of weak and fragmented rocks. Curtain grouting for preventing leakage through foundation rocks. Foundation Treatment for fractures, jointed rocks Tachylytes, faults and dykes.

Tail Channels:

Erosion of tail channel as a factor in selecting site for spillway .Causes of rapid erosion of tail channels of side spillways.

Geological conditions leading to tail channel erosion, case histories. Suitable treatment.

Geomorphology:

Geomorphologic Studies for Reservoir, Different parameters of geomorphology, stream order, stream length, drainage pattern, drainage density and bifurcation ratio etc., Application of these studies.

UNIT - IV Tunnel and Bridges

(6 Hours)

Preliminary geological investigation for different types of tunnels, Difference in behavior of basalts because of jointing as exemplified by compact basalt and amygdaloidal basalt, Difficulties introduced by tachylytes, Volcanic breccias, Tuffs, fractures, Dykes, Hydrothermal alteration,

Investigation for bridge foundations,. Computing safe bearing capacity (SBC) for bridge foundation based on nature and structures of rocks. Foundation settlements, Case histories.

UNIT - V Geology of Soil formation

(6 Hours)

Residual and transported soil. Rock weathering conditions favorable for decomposition and disintegration. Influence of climate on residual and transported soil in Deccan trap area. Nature of alluvium of Deccan traps rivers and its engineering characters. Effect of decomposition of calcium carbonate. Scarcity of sand in the river in Deccan traps area. Geophysical Investigations: Electrical resistively methods of exploration as applied to engineering investigation.

UNIT - VI (6 Hours)

Rock Mechanics

General principals of rock mechanics, physical and mechanical properties of Deccan trap rocks. Calculating RQD, Joint frequency index, RMR, RSR, Qsystem, standup time calculations, Bieniawski's geomechanical classifications and Bickhems Rock Classification.

Assignments:

- 1. Identification of Varieties of Deccan Trap Rocks.
- 2. Various Foundation Treatments.
- 3. Tunneling in Hard Rock
- 4. Tunneling in Soft Rock
- 5. Basalt as construction Material.
- 6. Calculation of RQD and RMR.
- 7. Types of Drainage Pattern with studies of streams.
- 8. Study of Toposheet (Any One for Geomorphology)
- 9. Calculation of Geomorphological Parameters as per the requirement of Reservoir estimation.
- 10. Weathering and Soil formation.

Term Work:

- 1. Construction of Geological section for dam site using drilling data.
- 2. Construction of Geological section and locating fault by angle holes.
- 3. Construction of Geological section and limitation for drilling.
- 4. Dams on Deccan trap rocks.
- 5. Tunnels and road cuts in folded sedimentary rocks.
- 6. Tunneling in Deccan trap rocks.
- 7. A report to be prepared on actual site visit for Major Civil Engineering Structures.

Text Books:

Syllabus for Unit Test

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B. TECH. (CIVIL) SEM. VI

54 H: DEVELOPMENT ENGINEERING

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Theory: 03 Hours / Week End Semester Examination: 60 Marks Theory: 03 Credits

Practical: 02 Hours / Week Continuous Assessment: 40 Marks

Term Work and Oral: 50 Marks Termwork: 01 Credit

Course Pre-requisites:

The Students should have knowledge of

1. Surveying and Advanced Surveying

2. Engineering Economics

Course Objectives:

To give exposure and insight on governance and development problems particularly at rural level and to develop new, innovative methods and solutions to existing problems in rural areas.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. The students can take hands on research on real world problems and deliver solutions.
- 2. develop multi scaled perspective about decisions in the built environment
- 3. expose the students to the analysis and evaluation of real world problems aiming to bring desired change in the society.
- 4. understand the government policies
- 5. understand the various government schemes
- 6. Describe importance of people participation in development projects.

UNIT - I (06 Hours)

Introduction to Development Engineering

Need of development at rural level, development deficit, socioeconomic development, issues and challenges associated with drinking water, waste water treatment, electricity, public transport, irrigation, Sanitation and nonconventional energy sources. National and state level policy.

UNIT - II (06 Hours)

Initiatives of GOI and Maharashtra State

Initiatives of GOI and Maharashtra State Various schemes for Rural Area like Jalyukta shivar, Sansad Adarsh Gram Yojana, Model village or Smart village concept, PMGSY,CMGSY, Unnat Bharat Abhiyan, Unnat Maharashtra Abhiyan, and other schemes for rural areas. Water shed development projects.

UNIT - III (06 Hours)

Life cycle costing of various schemes

Life cycle costing of various schemes Different phases in the schemes and projects, cost benefit analysis, environmental analysis of the project.

UNIT - IV (06 Hours)

Field work and reporting

Field work and reporting Primary data gathering tools such as Delphi methods and other methods, Assessment of existing schemes in rural area and possible problem identifications in existing scheme

UNIT - V (06 Hours)

Geographic Information Systems (GIS)

Introduction to Geographic Information Systems (GIS), Advantages and benefits, various GIS software's, Interdisciplinary applications of GIS, Integrated use of GIS with GPS and remote sensing, mapping and preparation of layouts.

UNIT - VI (06 Hours)

Social Impact Assessment

PRA, RRA. The basics of PRA-The Demand side: House hold surveys, Drinking water and irrigation water. The supply side: Resource map, assets, institutions and allocation documents, time line, changes in crop and welfare.

Assignments:

- 1. Assignment based on challenges associated with drinking water
- 2. Assignment based on challenges associated with waste water
- 3. Assignment based on challenges associated with public transport
- 4. Assignment based on challenges associated with sanitation
- Assignment based on initiatives by GOI and Govt. of Maharashtra for development
- 6. Assignment based on activities under Unnat Maharashtra and Unnat Bharat Abhiyan
- 7. Assignment based on assessment of existing schemes in rural area.
- 8. Assignment based on use of GIS in development process of rural area
- 9. Assignment based on PRA & RRA

Termwork:

- 1. Study of any one development project from urban area in progress
- 2. Visit report of any one development project in rural area in progress
- 3. Impact assessment of development projects
- 4. Use of GIS for development project
- 5. Cost benefit analysis of development project

Syllabus for Unit Test:

Unit Test -1 UNIT – I, II, III

Unit Test -2 UNIT – IV, V, VI

B. TECH. (CIVIL) SEM. VI

55: PROJECT STAGE II

TEACHING SCHEME: EXAMINATION SCHEME: CREDITS ALLOTTED:

Practical: 06 Hours / Week Term Work and Oral: 100 Marks Termwork: 08 Credit

Course Pre-requisites:

The Students should have knowledge of

- 1. Engineering Mathematics
- 2. Written and Communication skills
- 3. Analytical skills
- 4. Project planning and design

Course Objectives:

The student shall be able to identify the problem and suitable solution for the same.

Course Outcomes:

On completion of the course, the students will be able to:

- 1. Design the experimentation for the work.
- 2. Analyse the results of the work
- 3. Decide the conclusion and suggestions for the work.

UNIT - I

Stage-II

The Project Stage-II will be the work in continuation of Project Stage-I .No change on the topic of Stage-I is allowed.

Stage-II:

It consists of completing the experimentation/design/model work of the problem/ topic defined in Stage-I.

Preparing a detailed project report in specified format. The report shall be consisting of work completed in Stage-I, observations, results and conclusions of the problem/topic selected.

Oral: Oral shall be based on above termwork and a presentation on it.

RULES REGARDING ATKT, CONTINUOUS ASSESSMENT AND AWARD OF CLASS Standards of Passing and ATKT Rules

- 1. For all courses, both UE (University Evaluation) and IA (Internal Assessment) constitue separate heads of passing (HoP). In order to pass in such courses and to 'earn' the assigned credits.
 - a) The learner must obtain a minimum grade point of 5.0 (40 % Marks) at UE and also a minimum grade point of 5.0 (40 % Marks) at IA.

OR

- b) If he/she fails in IA, the learner passes in the course provided he/she obtains a minimum of 25% in IA and GPA for course is atleast 6.0 (50% Aggregate). The GPA for a course will be calculated only if the learner passes at the UE.
- 2. A student who fail at UE in a course has to reappear only at UE as a backlog candidate and clear the HoP. Similarly, A student who fails in a course at IA has to reappear only at IA as backlog candidate and clear the HoP.

Rules of ATKT

- 1. A student is allowed to carry backlog of courses prescribed for B.Tech Sem I, III, V, VII to B.Tech Sem II, IV, VI, VIII respectively.
- 2. A student is allowed to keep term of Sem III, if he/she is failing in any number of subjects of Sem I & II.
- 3. A student is allowed to keep term of Sem V, if he/she is failing in any number of subjects of Sem III & IV but passed in all subjects of Sem I & II.
- 4. A student is allowed to keep term of Sem VII, if he/she is failing in any number of subjects of Sem V & VI but passed in all subjects of Sem III & IV.

Award of Class for the Degree Considering CGPA Award of Honours

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The Criteria for the Award of Honours at the End of the Programme are as given below.

| Range of CGPA | Final Grade | Performance | Equivalent Range |
|----------------------------------|-------------|--------------|------------------|
| | | Descriptor | of Marks (%) |
| $9.50 \le \text{CGPA} \le 10.00$ | 0 | Outstanding | 80 ≤ Marks ≤ 100 |
| $9.00 \le \text{CGPA} \le 9.49$ | A+ | Excellent | 70 ≤ Marks ≤ 80 |
| $8.00 \le CGPA \le 8.99$ | A | Very Good | 60 ≤ Marks ≤ 70 |
| $7.00 \le CGPA \le 7.99$ | B+ | Good | 55 ≤ Marks ≤ 60 |
| $6.00 \le CGPA \le 6.99$ | В | Average | 50 ≤ Marks ≤ 55 |
| $5.00 \le \text{CGPA} \le 5.99$ | С | Satisfactory | 40 ≤ Marks ≤ 50 |
| CGPA Below 5.00 | F | Fail | Marks Below 40 |
