LESSON

There are many important things in life. Learning, growing, loving, and exploring are all things that each person should take time for. Celebration is another thing that everyone should take time for. Celebration adds an excitement and a lot of fun to life.

There are many celebrations in countries in the world. Some of them are funny and interesting, some are traditional or religious. No matter what they are, celebrations play an important role in our lives. Without celebrations, we can't enjoy this life fully.

Celebrations make life more enjoyable and fun. For instance, in Vietnam we celebrate the Mid-autumn Festival on the 14th day of the 8th lunar month annually. In this time, children wear masks; have parties with special cakes and lots of fruits. This celebration makes them very excited to wait for it.

Celebration allows us to relax and unwind in the midst of busy and crazy lives. We use celebrations as an excuse to gather with the friends and family that mean that most to us. We also enjoy celebrations because they allow us to remember the things in life that truly matter. As we celebrate, we allow the stresses of life to fall behind and we spend our time doing things we love with the people we love. There is something about a great celebration that reminds us of the purpose of our life and of the power of our closest relationships.

Perhaps the best thing about celebration of any kind is that it makes our lives richer and fuller.
