

### 3.1.5 University has the following facilities

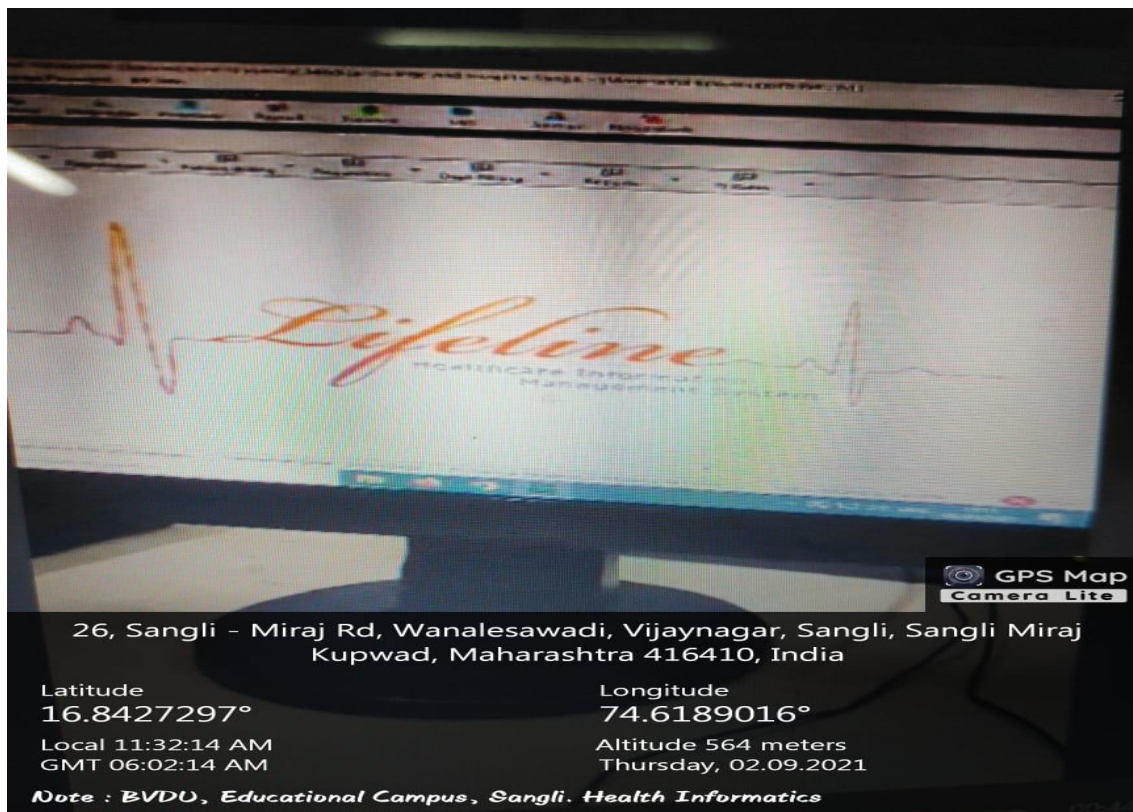

#### 3. Health Informatics

### REPORT OF HEALTH INFORMATICS

Health Informatics is an added advantage in acquiring information regarding health data of clients. The health information technology aids the physician in providing and planning appropriate line of treatment to the patients as the health records are maintained and can be reviewed periodically.

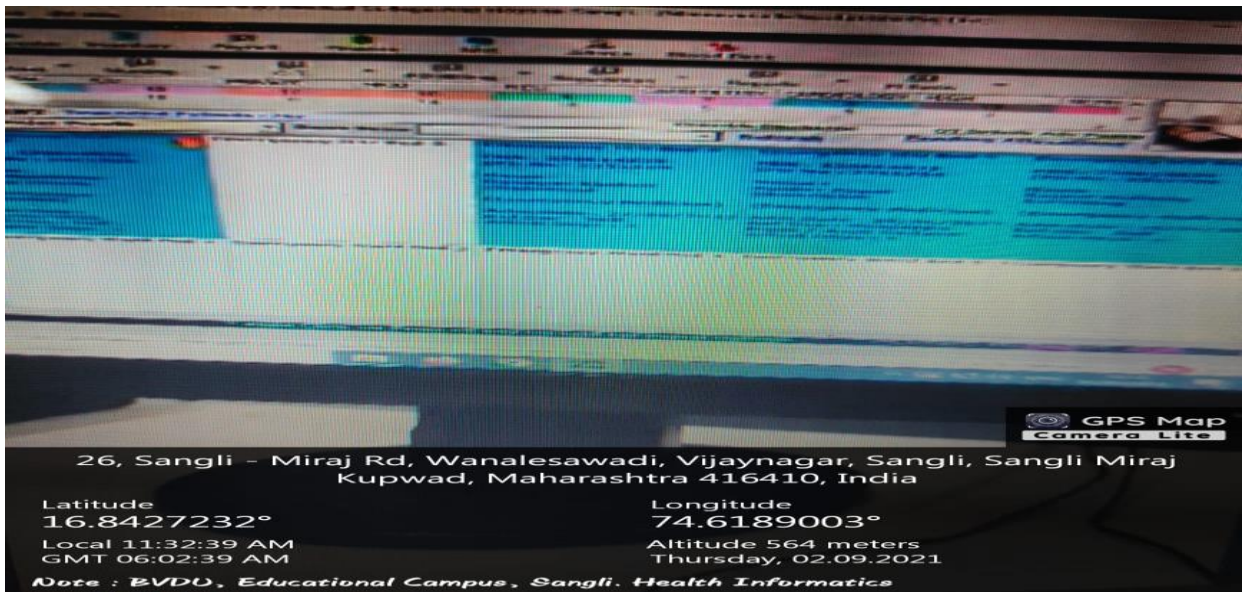

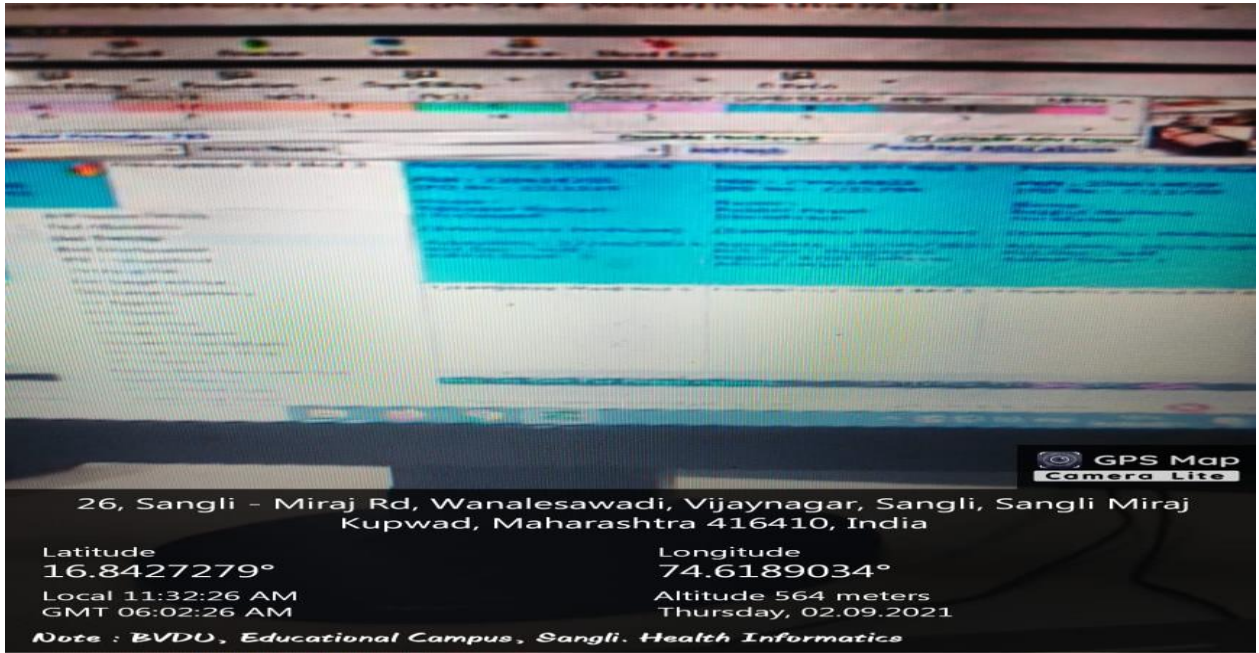

Bharati Hospital, Sangli makes use of **Lifeline healthcare information management system** for maintaining the data of clients in the OPD and IPD Departments. The Year of Establishment of this system was in the year 2007

Patients Baseline data, the lab and radiological investigations ordered by doctors for confirmation of diagnosis and their reports, the treatment provided etc. all the data is been preserved with the help of Lifeline healthcare information management system.
