**SEMESTER I** 

Subject Name	101 Applied Database Management Systems
No. of Credits	4 Credits
Pre Requisite	Basics of Computing and Data Storage
Course Objectives	<ul> <li>To teach the fundamentals of the database systems at a master level. A variety of topics will be covered that are important for modern databases in order to prepare the students for real life applications of databases.</li> <li>To impart knowledge of the concepts related to database and operations on databases. It also gives the idea how database is managed in various environments with emphasis on security measures</li> </ul>
	as implemented in database management systems.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Remember the database concepts
Understanding	<ul> <li>Understand the concept of database and techniques for its management</li> <li>Understand data security standards and methods.</li> <li>Understand the fundamentals of Distributed Database Systems</li> </ul>
Applying	<ul> <li>Design different data models at conceptual and logical level and translate ER Diagrams to Relational Data Model.</li> <li>Normalize the database.</li> </ul>
Analyzing	<ul> <li>Identify and study the file organization schemes for DBMS.</li> <li>State and Describe features for Concurrency and Recovery.</li> </ul>
Evaluating	·
Creating	Convert the relational algebra statements to the SQL statements.      Design the guaring Political Algebra
	Design the queries using Relational Algebra  Content
Unit	
1	Introduction to DBMS (5 Lectures)  Difference between Data, Information, Data Processing & Data Management. File Oriented Approach, Database oriented approach to Data Management, Need for DBMS, Characteristic of Database, Database Architecture: Levels of Abstraction, Database schema and instances, 3 tier architecture of DBMS, Data Independence. Database users, Types of Database System. Database Languages, DBMS interfaces.
2	Data Modeling in Database (7 Lectures)
	Data Models, Logical Data Modeling: Hierarchical Data Model, Network Data Model, Relational Data Model. Conceptual Data Modeling: Entity Relationship Model, Entities, Attributes, Types of Attributes, Relationships, Relationship set, Degree of relationship Set, Mapping Cardinalities, Keys, ER Diagram Notations, Roles Participation: Total and Partial, Strong and Weak Entity Set.The extended entity relationship (EER) model, Subclass, Superclass, generalization, specialization, Attribute Inheritance. Relational Data Model: Codd's Rules for RDBMS, Translating ER Diagram toRelational Database.
3	Normalization and Relational Algebra: (7 Lectures) Normalization Vs De-Normalization, Decomposition, Lossy and

	Lossless Decomposition, Functional Dependencies, Normal forms 1NF, 2NF, 3NF, BCNF, Case Studies on Normalization.
	Relational Algebra:
	Keys: Composite, Candidate, Primary, Secondary, Foreign, Relational
	Algebra Operators: Select, Project, Divide, Rename. Set Operations:
	Union, Intersect, Difference, And Product, Joins: Outer Joins, Inner Joins
	with example.
4	File Structures and Data Administration: (6 Lectures)
4	File Organization, Overview of Physical Storage Media, Magnetic Disk,
	RAID, Tertiary Storage, Storage Access, Data Dictionary Storage,
	Organization of File (Sequential, Clustering), Indexing and Hashing,
	Basic Concepts, indices, B+ Tree index file, B- tree index file, Static
5	hashing, Dynamic Hashing  Canary Tool And Bassyery Tool Prince (7 Lastures)
3	Concurrency Controls  Concurrency Controls
	Concurrency Control: Single User and Multiuser systems, Multiprogramming and
	Multiprocessing, Basic Database access operations, Concept of
	transaction, transaction state, ACID properties, Schedules, Serializability
	of schedules., Concurrency Control, Need for Concurrency control, lock
	based protocols, timestamp based protocols, Multiple granularity,
	Multiple Version Techniques, Deadlock and its handling, Wait-Die and
	Wound-Wait, Deadlock prevention without using timestamps, Deadlock
	detection and time outs, Starvation
	Recovery Techniques:
	Database Recovery, Types of Failures, Storage Structure: Volatile, Non
	Volatile and stable storage, Data access. Recovery and atomicity,
	Recovery Techniques / Algorithms: Log Based Recovery, Check points,
	Shadow Paging.
6	Data Administration And Security: (7 Lectures)
	Data administration, Role and Responsibility of DBA,
	Creating/Deleting/Updating table space, Database Monitoring, User
	Management. Basic data security principles – user privileges, data
	masking, encryption and decryption. Data Security Implementation,
	revalidation of user, role, privileges. Data Quality Management, Basic
	quality principles, data quality audit, data quality improvement
7	Introduction to Distributed Database, NOSQL and MongoDB (6
	Lectures)
	Heterogeneous and Homogeneous Databases, Distributed database
	features and needs, Advantages and Disadvantages, Distributed
	DatabaseArchitecture. Levels of distribution, transparency, replication.
	Fragmentation.
	• Introduction to NoSQL – Architecture, Sharding, Replica sets
	NoSQL Assumptions and the CAP Theorem
	Strengths and weaknesses of NoSQL
	MongoDB Functionality Examples
Text Books	
L	I .

Subject Name	102. Computer Networks
No. of Credits	4 Credits
Pre Requisite	Knowledge about hardware , network devices and data communication concepts
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of Computer Hardware and Network terminology for development of basic networks in the organization.
Understanding	By remembering students the basic concepts students will understand the concepts of Network topology, network operating systems and how the networks are developed ad per the need of the organization
Applying	Students will Have thorough knowledge about Computer Network and its use for the Information Sharing , device sharing and use of various new network technologies .
Analyzing	Students will acquire a good knowledge of the computer network, its architecture and operation.  Student will be able to pursue his study in advanced networking courses (This knowledge will help them to create base for the Network Electives to be studied in the next semesters).  Students will be able to follow trends of computer networks. So, students will get exposer to advanced network technologies like MANET, WSN, and 4G.
Evaluating	Ability to select proper method to design the network systems, selecting the proper tool to design the network protect the network from misuse.
Creating	Design and create their own procedure to protect the computer network and use the sharing proper resources.
Unit	Content
1	Introduction to Computer Networks (6 Lectures)

	Basic concepts of computer hardware and network terminology, What is Computer Network? Network Goals and Motivations, Application of Networks, Network Topologies, Classification of Networks, Network software in brief: Network Protocols, Protocol Hierarchies, Design issues for the Layers, Connection Oriented and Connectionless Services, Service Primitives, Relation of services to Protocols, Network Models: The OSI Reference Model, The TCP/IP Reference Model, Comparison of OSI and TCP/IP Reference Model, A critique of OSI Model, A critique of TCP/IP Model, Examples of some networks: Internet, X.25, ISDN, Frame relay, ATM, Ethernet, Wireless LANs- (wi-fi)
2	Data Transmission and Physical Layer: (7 Lectures) Signals: Analog and Digital Signals, Data Rate, Transmission Impairment, Signal Measurement: Throughput, Propagation Speed and Time, Wavelength, Frequency, Bandwidth, Spectrum Transmission Media& its Characteristics: Guided and Unguided Media, Synchronous and Asynchronous Transmission, Multiplexing: FDM, WDM, TDM, Switching: Circuit, Message and Packet Switching.
3	Unit 3: Network Layer: (7 Lectures) Network Layer Design Issues; Routing Algorithms: Static/ Dynamic , Direct/ Indirect, Shortest Path Routing, Flooding, Distance Vector Routing , Link State Routing, Hierarchical Routing, Broadcast Routing, Multicast Routing, Congestion Control Algorithms: General Principal of Congestion Control, congestion prevention polices, Load shedding, Jitter Control, IP Addressing: IP-Protocol, IP-Address Classes (A, B, C, D, E), Broadcast address, Multicast address, Network Mask.
4	Unit 4: Transport and Application Support Protocols (7 Lectures) Transport service, Service Primitives, Internet, and Transport Protocols: TCP/UDP, Remote Procedure Calls, RTP, Session Layer: Token Concept Presentation Layer: Data Encryption and Data Security, Message Authentication,
5	Unit 5: Advance Networks: (7 Lectures) Concept of 4G Networks, Introduction of 802.16, 802.20, Bluetooth, Infrared, MANET, Sensor Networks. Technical Issues of Advanced Networks, Mobile Ad-hoc Networks: Introductory concepts, Destination-Sequenced Distance Vector protocol, Ad Hoc On-Demand Distance Vector protocol, Wireless Sensor Networks: Sensor networks overview: Introduction, applications, design issues, requirements.
6	Unit 6: Internet Basics (7 Lectures)  Concept and Characteristics of Internet, Intranet, Extranet. Structure of Internet through Client Sever. Domain name, Website Development formats for Business Applications. Practical Application on: Domain Name Service, Telnet, FTP, SMTP, SNMP, MIME, POP, IMAP, WWW,HTTP, TCP/IP, LAN, WAN Some basic Operations and commands.
7	Unit 7 : Mobile Network - (7 Lectures)

	Mobile Telephone Systems: various generations mobile technology, Smart
	Mobile facilities and Apps on Mobile . Sub netting, Internet control
	Protocol-ICMP, IGMP, Mobile-IP, IPv6
Text Books	1.A.S. Tanenbaum, <b>Computer Networks</b> (4 <sup>th</sup> ed.), Prentice-Hall of India,

	network ,In house on <u>www.bharatividyapeeth.edu</u> , Computer Network
	in Brief: -http://www.nripesheschool.com/

Subject Name	103. Java Programming
No. of Credits	4 Credits
Pre Requisite	Any programming Language and Concepts of OOP
Cognitive Abilities	<ul> <li>At the end of this course, student should be able to</li> <li>Design interfaces, abstract and concrete classes needed, given a problem specification</li> <li>Implement classes designed using object oriented programming language</li> <li>Make them comfort to muse Java API for Input/output and Java Collections and utility classes</li> <li>Able to achieve object persistence using object serialization and write modules to take adventages of concurrent programming</li> </ul>
Remembering	<ul> <li>modules to take advantages of concurrent programming</li> <li>Java language Data Types, control structures, OOP concepts,</li> <li>Java API to handle numbers, strings</li> <li>Get knowledge about core Java API (Wrapper classes; String classes, Math class)</li> <li>Java API hierarchy for Input/output, collections and concurrent programming</li> </ul>
Understanding	<ul> <li>Understanding how to write, compile and run a Java program.</li> <li>Structure of class and using Inheritance among them.</li> <li>How to create Arrays.</li> <li>Come to know need of inheritance, abstract class and interface and how to use them</li> <li>Get knowledge about core Java API, API hierarchy for Input/output, collections and concurrent programming</li> </ul>
Applying	<ul> <li>Design classes and interfaces for given problem statement by making use of OOP concepts.</li> <li>Using proper I/O classes and Collections classes for given problem statement.</li> </ul>
Analyzing	<ul> <li>Analyze a given problem statement to identify classes and relationships among them and making use of Java API efficiently.</li> </ul>
Evaluating	<ul> <li>Given a problem statement; students should able to decide/ best mechanism of class design using is_a or has_a relationships.</li> <li>Read/listen a problem statement and able to decide which I/O classes to be used.</li> <li>Able to debate about when make to use of threads and which collection implementation should be used.</li> </ul>
Creating	Writing Java Applications with use of classes, interfaces and taking advantages of polymorphism.
Unit	Content
1	Introduction to Java (9Lectures) Java Basics: Features of Java, History of Java, Installations of JDK and

	aslines as IDE
	eclipse as IDE Writing and executing first Java program. Understanding role Java compiler, JVM, Understanding how Java is platform independent and secure.
	Java data types, variables, operators, expressions, type conversion and casting in Java.
	Control structures in java: if, if-else and switch statements, using iterative/looping statements in Java: while, do-while and for. Writing functions: Need of functions/methods, Writing and using static method; concepts of passing values and returning
2	Class and Object Concepts: (7Lectures)
	Introduction to Object Oriented concepts, Defining a class, creating objects from class, adding attributes and methods to the class, using constructors, Java naming conventions for class, properties and methods/functions.  Passing values to the functions – pass by value, pass by reference, Function overloading.
	Modifiers – public, private, protected, default, static, final
	Understanding use of Wrapper classes and Garbage collection in Java
3	Arrays and Strings (6Lectures)
	One dimensional arrays, Multidimensional arrays, exploring String class and methods, String Buffer class. Packages - creating and accessing a package, importing, packages, creating user defined packages, Concept of package.
	Introduction to Exception Handling and user defined exceptions.
4	Inheritance and Polymorphism(6Lectures)  Concept and importance of inheritance, is-a relationship, types of inheritance, Polymorphism — function overriding, dynamic method dispatch. Overriding methods with throws clause.  Using abstract and final keywords with class declaration, Concept of interface, Comparison of Interface and class.  Access modifiers and data accessibility in derived classes, method access modifier and method overriding.
5	Concurrent Programming (7Lectures) Concept of threads, lifecycle of threads, creating threads, Thread class, Runnable interface, Thread synchronization, inter thread communication – wait(), notify(), notifyAll() methods.
6	wait(), notify(), notifyAll() methods .  Java Input/Output (7Lectures)  Concept of streams, types of streams – byte streams, character streams, The
	Console: System.out, System.in, and System.err Understanding File class, InputStream class, OutputStream class, FileInputStreams, FileOutputStream, Using character oriented Reader and Writer class, FileReader, FileWriter. Introduction to Buffered streams — DataInput and DataOutput Streams using BufferedReader, BufferedWriter. Making use of Object Streams for Serialization and deserialization
7	Java Collections and Utility Classes(8Lectures)
	Introductions to generics: generic types and methods

	Collection Basics- A Collection Hierarchy, Using ArrayList and Vector,
	LinkedList, making use of Iterator to access collection elements.
	Set: HashSet, LinkedHashSet, TreeSet , Role of Comparable and
	Comparator interfaces,
	Introduction Map: Hashmap, HashTable, TreeMap, LinkedHashMap
	Understanding bounded types, erasures.
Text Books	Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne
	Media;
Reference Books	1. Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne
	Media; Seventh Edition, 2007
	2. Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core
	Series, Eighth Edition, 2008
	3. Bruce Eckel, Thinking In Java – Printice Hall, Fourth Edition

Subject Name	104 Computational Statistics
No. of Credits	4 Credits
Pre Requisite	
Course	.Tobuild a strong foundation for students
Objectives	to become proficient in all Statistics concepts and their Applicationnecessary
	to become aDatascience Professional.
	.To provide a conducive environment for understanding, implementing and
	Prediction on various Historical data.
	. To keep the students and faculty abreast with the emerging technologies in
	the field of computer applications.
	. To bring professionalism amongst the students and promote holistic
	development.
Cognitive	Course Outcome as per Blooms Taxonomy
Abilities	Course outcome as per brooms randomy
Remembering	Remember the definitions of concepts
Understanding	Understand the concept of Statistics and their methods for its Data
8	Analytics
	<ul> <li>Understand data engineering and standards and methods.</li> </ul>
	<ul> <li>Understand the fundamentals of statistics and their Application</li> </ul>
Applying	Data engineering and their concept
Analyzing	Identify and study the data foranalytics purpose.
	State and Describe features for Analytics
Evaluating	Future Prediction for historical data
Creating	Write programming of R for Data Analysis
Unit	Contents
1	Introduction to Statistics (4Lectures):
	Meaning of Statistics as a Science, Importance of Statistics Scope of
	Statistics, Types of data: Primary data, Secondary data, Cross-sectional
	data, time series data, directional data, classification data and its
	classification, ungrouped frequency distribution,, grouped frequency
	distribution, cumulative frequency distribution, and relative frequency
2	distribution.
2	Measures of Central Tendency (15Lectures):
	Concept of central tendency of statistical data, Statistical averages, characteristics of a good statistical average. Arithmetic Mean (A.M.):
	Definition, effect of change of origin and scale, combined mean of a number
	of groups, merits and demerits, trimmed arithmetic mean. Mode and
	Median: Definition, formulae (for ungrouped and grouped data), merits and
	demerits, Quartiles, Deciles and Percentiles (for ungrouped and grouped
	data),
	Geometric Mean (G.M.): Definition, formula, merits and demerits.
	Harmonic Mean (H.M.): Definition. Formula, merits and demerits. mean
	Weighted Mean: weighted A.M., G.M. and H.M. Measures of Dispersion
	:Concept of dispersion, characteristics of good measure of dispersion.

	Tibshirani(2013). <i>An Introduction to Statistical Learning: With Applications in R.</i> New York: Springer.  Suggested MOOC: Please refer these websites for MOOCS:
	York: W. W. Norton.  3. James, Gareth, Daniela Witten, Trevor Hastie, & Robert
Books	<ul><li>1.Fundamental of Statistics byS.C.Gupta</li><li>2. Freedman, David, Robert Pisani, &amp; Roger Pervis(2007). Statistics. New</li></ul>
Text Books Reference	1 Fundamental of Statistics, by C. Gunta
Text Rooks	World Problem
7	Introduction to R Programming (15Lectures) Concept of R, Installation of R, Data Types, Vector, List, Frame, Array, Matrix, Statistics Commands, Base graphics, Data manipulation with data table, concept of cluster, Concept of Prediction Model, Analysis of Real world Problem
6	Time Series (5Lectures) Meaning and utility, Components of time series, Additive and multiplicative models, Methods of estimating trend: moving average method, least squares method and exponential smoothing method(with graph and interpretation)
5	Regression (5Lectures)  Meaning of regression, difference between correlation and regression, Concept of error in regression, error modeled as a continuous random variable. Simple linear regression model Estimation of a, b by the method of least squares. Interpretation of parameters.
4	Correlation (5Lectures):  Bivariate data, Scatter diagram and interpretation., Concept of correlation between two variables, positive correlation, negative correlation, no correlation. variance between two variables, Karl Pearson's coefficient of correlation (r), Spearman's rank correlation coefficient, compute Karl Pearson's correlation coefficient between ranks
3	Moments, Skewness and Kurtosis (6Lectures):  Concept of Raw and central moments, Formulae for ungrouped and grouped data (only first four moments), relation between central and raw moments upto fourth order. (without proof), Measures of Skewness, Types of skewness, Pearson's and Bowley's coefficient of skewness, Measure of skewness based on moments, Measure of Kurtosis: Types of kurtosis, Measure of kurtosis based on moments
	Range, Quartile deviation  Mean deviation: Definition, merits and demerits, Variance and standard deviation

Subject Name	105. Management Concepts and Applications
No. of Credits	4Credits
Pre Requisite	General awareness about the organization and atomization used
Remembering	Students are expected to recalling day to day management concepts
	that are unknowingly applied in real life situations
Understanding	Gathering information about management, its origin and the
	contributions of some of the management gurus is achieved.
Applying	Students will learn implementation of management functions in real
	life cases so as to justify decision being taken and through ERPs
	availability
Analyzing	Students will learn fact finding in a situation using the objectives of
	each functions' achievement and its effective utilisation in e
	commerce environment
Evaluating	Generating or creating the ability amongst the students in fact finding
	techniques and evaluating the actual performance with the planned.
Creating	Students are expected to capture the new cases in real life situation
	and create a solution in the form of model so as to resolve the
	problem such as ERPs
Unit	Contents
1	Management (9 Lectures)
	Definition and Meaning ,Nature and purpose ,Evolution of
	Management thoughts, Contributions of F.W Taylor, Contributions of
	Henry Fayol, Human relations approach, System approach to
	management, Skills and Functions of a manager
2	Planning (9 Lectures)
	Definition and Importance ,Types of Plans, Types of Planning , Steps
	in Planning ,Limitations of Planning ,Planning Premises,
	Management by Objectives (MBO):Concept, Objective setting
	Process, Benefits and Weaknesses, concept of software project
3	planning (9)
3	Organization (9 Lectures) Definition ,nature of organizing, importance , process of organizing
	organization chart structure of IT organization, New Organizational
	Designs – Project, Matrix, Organic Structure & Mechanistic Structure
	Challenge of Modern Organisation, Virtual Organisation, Case study
	(7)
4	Staffing (8 Lectures)
	Nature & Significance, A brief knowledge of Recruitment, Selection,
	Training & Development, Performance Appraisal in IT organisation.
	Case study (8)
5	Directing and Controlling (15 Lectures)
	Nature, Concept of Leadership, Leadership Styles, Theories of
	Leadership, Charismatic Leadership Theory, Role of Software Team
	Leader, case study, Concept and Importance of Control, Control
	Process, Types of Control Mechanism, Responsibility and authority,
	Management by Exceptions, case study.
6	Decision making (6 Lectures)
U	Decision making (o Decimes)

	Decision making and its process, Decision making conditions, need
	of computer based decision making, decision support system, expert
	system.
7	Introduction to E-commerce (6 Lectures)
	E commerce types,E commerce spread in recent years ,E commerce
	importance ,Security measures under E commerce, introduction to
	Enterprise Resource Planning (ERP) ,ERP advantages, Introduction to
	SAP
Text Books	1.Principles of Management by L M Prasad, Sultan Chand
	Publications
	2.E – Commerce: Strategy, Technologies and Applications" by David
	Whiteley
Reference Books	1. Principles of management by TRamaswamy, Himalaya
	Publications
	2. Principals of Management by Tripathi and Ready,
	3. New Era of Management by Richard Daft ,South Western Sangage
	Learning
	4.Management Principles and Practices by Lallan Prasad and SS
	Gulshan.
	Publications :Excel Books India.
	5.Decision Support System , Janaki Raman ,PHI publications

Subject Name	106 Lab on Applied Database Management Systems
No. of Credits	3 Credits
Pre Requisite	Concept of Database Management Systems,
1	Familiarity with data processing concepts and applications.
Course Objective	To practice the application of the concepts related to database its techniques
<b>J</b>	and Operations.
	SQL (Structured Query Language) is introduced in this subject. This helps to
	create strong foundation for application of database design.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Make use of different operators as per the questions
Understanding	Understand the theoretical and physical aspect of a relational database.
Applying	Implementation of RDBMS concepts through Oracle.
Analyzing	Observe the performance of the query with different data sets.
Evaluating	Test the results obtained from the different queries, PL/SQL blocks, functions
Creating	Construct Simple and complex queries on sample datasets
8	Writing PL/SQL blocks
Unit	Contents
1	Introduction to Oracle and SQL (8 Lectures)
	History, Features, Versions of Oracle, Database Structure: Logical Structure and
	Physical
	Structure, Oracle Architecture: System Global Area Processes: Server Processes,
	Background Processes, Tools of Oracle: SQL * Plus, PL/SQL, Forms, Reports, Pre
	Compilers:SQL Loader, Import, Export.
	Introduction to SQL
	Keywords, Delimiters, Literals, Data Types, Components of SQL:
	<b>DDL Commands</b> — Defining a database in SQL, Creating table, changing table definition,
	removing table, Creating Tables with constraints on row level and column level,
	primary
	key, foreign key, check. Altering Constraints.
	DML Commands- Inserting, updating, deleting data,
	<b>DQL Commands</b> : Select Statement with all options.
	Renaming table, Describe Command, Distinct Clause, Sorting Data in a Table,
	Creating
	table from a table, Inserting data from other table, Table alias, and Column alias.
	DCL commands- Granting and Revoking Permissions
2	Operators and Functions (5 Lectures)
	Operators: Arithmetic, Logical, Relational, Range Searching, Pattern Matching,
	IN &
	NOT IN Predicate, all, % any, exists, not exists clauses, Set Operations: Union,
	Union
	All, Minus, Intersect, Grouping data.
	Functions: Aggregate Functions, Numeric Functions, String Functions, Date
	Functions,

	Conversion Functions Missellaneous Sub queries
	Conversion Functions, Miscellaneous Sub queries
	Joins: Relating data through join concept. Simple join, equi join, non equi join,
	Self join,
2	Outer join  Detabage Objects (5 Lectures)
3	Database Objects (5 Lectures)
	Views:Introduction, Creating a View, Selecting data from a view, Updateable
	views,
	Views on multiple tables, Destroying a View.
	<b>Sequences:</b> Introduction, Creating a Sequence, Altering a Sequence, Referencing a
	Sequence, Dropping a Sequence.
	Index:Introduction, Creating Index, Simple Index, Unique Index, Reverse Key
	Index,
4	Dropping Index.
4	Introduction To PL/SQL (5 Lectures)
	Introduction, Advantages, PL/SQL Block, PL/SQL Execution Environment,
	PL/SQL Character set, Literals, Data types, PL/SQL Block: Attributes %type,
	%rowtype, Variables, Constants, Displaying User Message on screen,
	Conditional Control in PL/SQL, Iterative Control Structure: While Loop, For
	Loop, Goto Statement, Commit,
<u></u>	Rollback, Savepoint
5	Cursor Management and Triggers (5 Lectures)
	Cursor: Explicit & Implicit Cursor, Declaring Cursor Variables, Constrained &
	Unconstrained Cursor Variables, Opening Cursor, Fetching Cursor into Variables,
	Closing Cursor, Cursor For Loops, Parametric Cursors.
	<b>Triggers:</b> Definition, Syntax, Parts of triggers: statement, body, restricted, Types of
	triggers: Enabling & disabling triggers.
6	Stored Procedures / Functions and Exception Handling (5 Lectures)
	Introduction, How oracle executes procedures/ functions, Advantages, How to
	createProcedures& Functions, Examples.  Error Handling in PL/SQL:
	Exception Handling & Oracle Engine, Oracles Named Exception Handlers, User NamedException Handlers.
7	MongoDB (7 Lectures)
	Installation of MongoDB, Checking Shell, Creating Users and Enabling
	Authorization,
	Basic Querying Using Shell, sorting, indexing – single indexing and compound
	indexing,
	Using Conditional Operators in queries
Text Books	References (Books, Websites etc.):

Subject	107 Lab on Java Programming
Name	
No of Credits	3 Credits
Course	This is companion course of Object Oriented Programming Practical aspects of OOP
Objective	towards problem solving is covered.
Prerequisite	Theoretical Knowledge of Java Programming
Course	The students will develop adequate programming skills with respect to following
Outcome	Write simple programs to use basic programming language constructs
	<ul> <li>Design interfaces, abstract and concrete classes needed, given a problem specification</li> </ul>
	Implement classes designed using object oriented programming language
	<ul> <li>Learn how to test, verify, and debug object-oriented programs and create programs using</li> </ul>
	<ul> <li>Make them comfort to muse Java API for Input/output and Java Collections and utility classes</li> </ul>
	Able to achieve object persistence using object serialization and write modules to take advantages of concurrent programming
Unit No	Programming Exercises
1	Introduction to Java Writing, compiling and Executing Java programs using basic language constructs as bellow  - Using Operators: arithmetic, relational, logical and bitwise  - Control structures (if, if-else, switch)  - Iterative statements (while, do-while, for)
2	Class and Object Concepts
	<ul> <li>Wring a class, creating objects and using it</li> <li>Using constructors to initialize object</li> <li>Programs to demonstrate parameter passing</li> <li>Making use of access modifiers</li> </ul>
3	Arrays and Strings  - Programs to work with single dimensional and multidimensional arrays  - Searching and sorting  - Programming with string and operations on it  - Programs to understand and study string literal pool
4	Inheritance and Polymorphism  - Defining classes as generic types; using it to write new class/classes

<ul> <li>Need and example of method overriding</li> <li>Writing abstract class and interface</li> <li>Using abstract classes to write concrete classes</li> </ul>	
<ul> <li>Using abstract classes to write concrete classes</li> </ul>	
<ul> <li>Using interface as base type to write new interface and implementing it to</li> </ul>	write
new concrete class/classes	
<ul> <li>Anonymous and inner classes</li> </ul>	
5 Concurrent Programming	
<ul> <li>Designing and using Thread class and Runnable interface</li> </ul>	
- Thread synchronization	
<ul> <li>Program to demonstrate Thread priorities, thread join and making use of y</li> </ul>	ield
<ul> <li>Programs with classes making use of thread and inter communication betw</li> </ul>	
them.	
6 Java Input/Output	
<ul> <li>Programs to make using InputStream and OutStream classes.</li> </ul>	
<ul> <li>Reading and Writing data into files</li> </ul>	
<ul> <li>Making use to console to read data.</li> </ul>	
<ul> <li>Using readers and writers to write data into Files</li> </ul>	
<ul> <li>Making use of Buffered Streams and reader and writer</li> </ul>	
<ul> <li>Programs to take advantages of serialization</li> </ul>	
7 Java Collections and Utility Classes	
<ul> <li>Programs to make use collections (ArrayList, Vector, Set and Maps)</li> </ul>	
<ul> <li>Writing user defined generic data types types</li> </ul>	
<ul> <li>Programs to illustrate bounded types and erasures</li> </ul>	
<b>ference</b> 1. Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media	ι;
oks: Seventh Edition, 2007	
2. Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, E	lighth
Edition, 2008	
3. Bruce Eckel ,Thinking In Java – Printice Hall, Fourth Edition	

The outline provided above provides the types of computational problems are expected to be given to students. List of the example assignment is provided here; these assignments are just examples and it is not limited to this only.

Subject Name	109 Universal Human Values
No. of Credits	2 Credits
Pre Requisite	
Course Objectives	<ul> <li>To help the student to see the need for developing a holistic perspective of life.</li> <li>To sensitize the student about the scope of life – individual, family, society and nature/existence.</li> <li>Strengthening self-reflection.</li> <li>To develop more confidence and commitment to understand, learn and act accordingly.</li> </ul>
<b>Cognitive Abilities</b>	Course Outcomes
Remembering	To provide an overview of Prerequisites to Human Values
Understanding	Understand the role of a human being in ensuring harmony in self and society
Applying	To actualize a harmonious environment wherever they work
Analyzing	To analysing ethical dilemma while discharging duties in professional life
Evaluating	To evaluate ethical and unethical decisions and take a right stand
Creating	To develop a harmonious environment for holistic development of self and body
Syllabus	
1	Introduction to Value Education& Harmony in Human Being  1. Value Education, Definition, Concept and Need for Value Education. Self exploration as a means of Value Education.
2	<ol> <li>Harmony in the Human Being         <ol> <li>Human Being is more than just the Body.</li> <li>Harmony of the Self ('I') with the Body - happiness and physical facility</li> <li>Understanding Myself as Co-existence of the Self and the Body.</li> </ol> </li> <li>Understanding Needs of the Self and the needs of the Body.     </li> <li>Understanding the activities in the Self and the activities in the Body</li> </ol>
3	Harmony in the Family and Society and Harmony in the Nature  1. Family as a basic unit of Human Interaction and Values in Relationships.  2. The Basics for Respect and today's Crisis: Affection, e, Guidance, Reverence, Glory,

	<ul> <li>Gratitude, Prosperity and Love.</li> <li>3. Comprehensive Human Goal: The Five Dimensions of Human Endeavour.</li> <li>4. Harmony in Nature: The Four Orders in Nature.</li> <li>5. The Holistic Perception of Harmony in Existence.</li> </ul>
4	Professional Ethics  1. Value based Life and Profession.  2. Professional Ethics and Right Understanding.  3. Competence in Professional Ethics. Issues in Professional Ethics - The Current Scenario.
Reference Books	<ul> <li>Human Society in Ethics &amp; Politics by Bertrand Russell publisher Taylor and Francis 2015 reprint</li> <li>Ethical Philosophy of India by I.C. Sharma publisher Johnsen 1965</li> </ul>
OnlineResources:	<ul> <li>https://fdp-si.aicte- india.org/verifiedProgramDetailsList.php</li> <li>https://citizenchoice.in/course/Universal-Human- Values/Unit%201/Happiness-and-Prosperity</li> </ul>
MOOCs:	Swayam.gov.in https://epgp.inflibnet.ac.in

Subject Name	109 Soft Skills
No. of Credits	2 Credits
Pre Requisite	
<b>Course Objectives</b>	<ul> <li>To familiarise students about the various soft skills</li> <li>To boost students' communication and presentation skills</li> </ul>
Course Outcomes	<ul> <li>Development of Critical and reflective thinking;</li> <li>Self-management and self awareness skills amongst the students</li> </ul>
1	Introduction to Soft Skills Introduction ,the objectives of soft skills development , Integral Parts of Soft Skills ,Outcomes of Soft Skills Development ,Personal Developmental Plan (PDP), self awareness
2	Communication Skills  Definition, Nature and Scope of Communication ,Importance and Purpose of Communication, Process of Communication ,Types of Communication, Aspects of communication skills ,verbal and non verbal communication skills, Essentials of Effective Communication
3	Presentation Skills Objectives, Types of presentations, factors to be considered while preparing presentation, creating a Presentation, delivering a Presentation, attending a Presentation, body Language and etiquettes
4	Time Management Skills Need, objectives, time management techniques, benefits of time management, factors to be considered -delegation of task, prioritse work, creating schedule, set up deadline, Overcome Procrastination, dealing with stress, avoiding multitasking, start early etc.
Reference Books	Soft Skills 3rd Edition: Personality Development for Life Success     By Prashant Sharma, BPB publications     Time Management: The Brian Tracy Success Library     by Brian Tracy

Subject Name	109 Cyber Security
No. of Credits	2 Credits
Pre Requisite	
Course	To understand different types of threats .
<b>Objectives:</b>	To know the ways of different cyber attack being adopted.
	<ul> <li>To recognize types of viruses such as malware, virus, hacking and cracking activities.</li> </ul>
Course	To understand techniques of encryption .
Outcomes:	To understand the term Cryptography and its importance in computer forensics and cyber security     To identify Cyber Crime and the action thereof.
1	CyberSecurity Meaning of Cyber security ,meaning of Cyber Crimes, ways of achieving Cyber Security, IT Act, Computer Ethics and Security Policies, Guidelines to choose web browsers, Guidelines for setting up a Secure password, Online Banking Security, Mobile Banking Security ,Web Application Security, Digital Infrastructure Security
2	Information Security- Threat to business continuity due to accidents related to information systems, Cyberspace, Information assets, Vulnerabilities, Information security measures, Threats such as Unauthorized intrusion, Unauthorized access, Eaves dropping, Spoofing, Alteration, Cracking.
3	Kinds of Cyber-attack Information leakage, DoS attack, Rumor, Flaming, SPAM e-mail, Computer virus, Macro virus, Worm, Bot (botnet, remote operated virus), Trojan horse, Spyware, Ransomware, Key logger, Root kit, Backdoor, Fake anti-virus software
4	Cryptography- Meaning of cryptography, encryption, decryption, Symmetric cryptography, Public key cryptography
Reference Books	1.Fundamentals of Cyber Security by BhushanMayank, BPB Publications
	2. Foundations of Information Security : A Straight forward Introduction by Jason Andress

Subject Name	201. Object Oriented Software Engineering
No. of Credits	4 Credits
Pre Requisite	Programming skills, Database Concepts.
<b>Cognitive Abilities</b>	· ·
Remembering	Should be able to remember various steps carried out in development of software.
Understanding	Should be able to understand requirements of the user.
Applying	Should be able to apply object oriented concepts and UML diagrams to the defined
	problem.
Analyzing	Should be able to analyze requirements of the user and convert to functionalities of
	the software.
Evaluating	Should be able to Evaluate design of the existing software.
Creating	Should be able to de Design their own software.
Unit	Contents
1	Software and Software Engineering ( 5 Lectures )
	The nature of software, Software Engineering Concept, SDLC, Process Models:
	Waterfall Model, V Model, Prototyping Model, Spiral Model, RAD (Rapid Action
	Development) Model
2	Object Oriented Concepts, Modeling and UML( 5 Lectures )
	2.1 What is Object Orientation? (Introduction to class, object, inheritance,
	polymorphism)
	2.2 Modeling
	2.2.1 Introduction of Modeling
	2.2.2 Object Oriented Modeling
	2.3 UML (Unified Modelling Language)
	2.3.1 History of UML
	2.3.2 UML Diagrams
	2.4 Iterative Development with RUP and Phases of RUP
3	Requirement Understanding and Requirement Modelling with Use Case
	Diagram (5Lectures)
	3.1 Requirement Engineering
	3.2 Requirement Elicitation
	3.3 Developing Use Cases
	3.4 Use Case Diagram
	3.4.1 Realization of Use Cases
	3.4.2 Finding Actors
	3.4.3 Defining Relations among Use case
	3.4.4 Writing Use Cases
	3.5 Activity Diagram
4	Basic and Advanced Structural Modeling (10 Lectures)
	4.1 Class Diagram
	4.1.1 Identifying the elements of an object model

	4.1.1 Identifying classes and objects 4.1.2 Specifying the attributes 4.1.3 Defining operations 4.1.4 Finalizing the object definition 4.1.5 Advanced class Modelling 4.1.6 Interface, Types and Roles 4.2 State Chart Diagram
	4.3 Package Diagram
	4.4 Object Diagram
5	Interaction Modelling (5 lectures )
	5.1 Introduction to Interaction Diagrams
	5.2 Need of Interaction Diagrams
	5.3 Interaction Diagrams
	5.3.1 Collaboration Diagram
	5.3.2 Sequence Diagram
6	Architectural Modeling ( 5 Lectures )
	6.1 Component Diagram
	6.1.1 Need of Component Diagram
	6.1.2 Realization of Components
	6.1.3 Relating Components
	6.2 Deployment Diagram
	6.2.1 Software Architecture
	6.2.2 Architectural Styles
	6.2.3 Representing Architecture using Deployment Diagram
7	Case Studies (10 Lectures)
	7.4 Discussion on following case Studies-
	a. Library Management System
	b. Hospital Management System
	c. Online Shopping
	d. Nukari.com website
m . n . l	e. Matrimonial website
Text Books	Software Engineering by Pressman Publisher BPB
Reference Books	1. The Unified Modeling Language User Guide by Grady Booch, James Raumbaugh,
	Ivar Jacobson. Publisher Addison-Wesley Professional
	2. Object Oriented Software Engineering Use case driven approach by Ivar Jacobson
	Publisher Pearson  2. UML Distilled by Montin Forvior Publisher Addison Wesley Professional
	3. UML Distilled by Martin Fowler Publisher Addison-Wesley Professional
	4. UML Toolkit 2 by Hans-Erik Eriksson Publisher Wiley.

Subject Name	202. Cloud Computing Concepts
No. of Credits	4 Credits
Pre Requisite	Knowledge of Web technologies
_	2. Knowledge of Web services andmultimedia
	3. Knowledge of DBMS
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	How to provide Flexible and scalable infrastructures
Understanding	Increased availability of high-performance applications to
	small/ medium-sized businesses
Applying	Reduces implementation and maintenance costs
Analyzing	The case studies will help us to understandmore of practice of cloud
	computing in the market.
Evaluating	Comparison of cost-wise solution to the problem and selecting the best
	solution for the problem suggested to the organization
Creating	Creating flexible and scalable infrastructure suitable to the organizational
	need
Unit	Contents
1	Cloud Computing Fundamentals (10 Lectures)
	Definition of Cloud Computing, private, public and hybrid cloud. Cloud
	types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, public
2	Vs private clouds
2	Virtualization And Cloud Computing (7 Lectures)
	Role of virtualization in enabling the cloud; Business Agility: Benefits and
	challenges to Cloud architecture. Application availability, performance, security and disaster recovery; next generation Cloud Applications,
	Visualizing Virtualization, Managing Virtualization, Taking Virtualization
	into the Cloud
3	Service Oriented Architecture And The Cloud (7 Lectures)
	Defining Service Oriented Architecture, Understanding the Coupling,
	Implementation of Service Oriented Architecture (SOA), Understanding
	Services in the Cloud, Serving the Business with SOA and Cloud Computing.
4	Cloud Applications (7 Lectures)
	Technologies and the processes required when deploying web services;
	Deploying a web service from inside and outside a cloud architecture,
	advantages and disadvantages.
5	Management Of Cloud Services (7 Lectures)
	Reliability, availability and security of services deployed from the cloud.
	Performance and scalability of services, tools and technologies used to
	manage cloud services deployment; Cloud Economics: Cloud Computing
	infrastructures available for implementing cloud based services. Economics
	of choosing a Cloud platform for an organization, based on application
	requirements, economic constraints and business needs (e.g Amazon,
	Microsoft and Google, Salesforce.com, Ubuntu and Redhat)
6	Application Development (7 Lectures)
	Service creation environments to develop cloud based applications.

	Development environments for service development; Amazon, Azure,
	Google App.
7	Cloud It Model (7 Lectures)
	Analysis of Case Studies when deciding to adopt cloud computing
	architecture. How to decide if the cloud is right for your requirements. Cloud
	based service, applications and development platform deployment so as to
	improve the total cost of ownership (TCO)
Text Books	1. Cloud Computing: Principles and Pardigms by RajkumarBuyya,
	jamesBroberg and Andrzej M.Goscinski, Wiley, 2011.
	2. Distributed & Cloud computing, Kai Hwang, GeofferyC.Fox,jack
	Elsevierm,2012
	3. Cloud Computing implementation, management and security by John
	W.Rittinghouse, James E Ransome, CRCPress, Taylor & Francis
	group,2010
	4. Cloud Computing a practical approach by Anthony T.Velte, Toby J. Velte
	Robert Elsenpeter, Tata Mc Graaw Hill edition, 2010
Reference Books	1. Cloud Application Architecture by George Reese, Oreilly publishers
	2. Cloud computing and SOA convergence in your
	enterprise, by David S. Linthicum, Addison-Wesley

Subject Name	203. Data Structures and Algorithms using Python
No. of Credits	4 Credits
Pre Requisite	School Level Mathematics. It does not assume any prior knowledge of
•	programming.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Using some motivating examples to remember and quickly builds up basic
	concepts such as conditionals, loops, functions, lists, strings and tuples.
Understanding	Students will get acquainted built in data structures in python, understand
	features and programming constructs of python language. During this course,
	they will understand main control structures of procedural programming
	languages. understand the complexity of various algorithms
Applying	They will make of function to reduce problem into small modules, To
	familiarize with exceptions and mechanism to handle it, make use of python
	to read and write data into files, implement ADT for various user defined
	data structures, implement data structures like: Stack, Queue, Link List,
	Tree.
Anglyzing	Compare efficiency of various data structures for solving a particular
Analyzing	problem. Analyzing performance of a algorithm.
	problem. Analyzing performance of a algorithm.
Evaluating	Ability to choose appropriate data structures for problem solving
Lyanaaning	Ability to use combination of these data structures for problem solving.
	Evaluating the performance of various Algorithms and Data Structures.
Creating	Design and create their own data structure for solving a real life problem
Unit	Contents
1	Basics of Python (6 Lectures)
	Python Installation, writing and executing first python script, using python
	editors to write and execute python scripts
	Identifiers and Operators:
	Writing get familiar with python variables and data types, variables and
	assignments, Operator understanding and its usage,
	Python Control structures in Python:
	Conditionals and Loops: if statement, else Statement, el-if Statement, while
	Statement, for Statement, break Statement, continue Statement, pass
	Statement, Arrays Working strings in python: String type strings concatenations and
	Working strings in python: String type, strings concatenations and
2	comparing strings, using string functions  Working with functions and Built in data structures Functions (6
<u> </u>	Lectures)
	Writing a simple function and using it, functions and parameters,
	writing a simple function and using it, functions and parameters,

	functions retuning values, functions and variable scope, Variable number of arguments, passing objects and collections in function, understanding recursive functions, writing and using recursive functions. Variable number of arguments to functions  Python data Structures:
	List: Crating and using list and tuples. Operations on list and tuples, Special Features of Lists and tuples, introduction to List comprehensions Dictionaries: Introduction to Dictionaries, Operators, Built-in Functions, Built-in Methods, Dictionary Keys, Using Set data structure
3	Handling Exceptions and File Input/Output (8 Lectures)  Need of exception Handling, Simple mechanism to handle exception,  Using if exceptions to handle the code cracks, Using else clause while handling exceptions, Handling generic and specific exceptions, handling multiple exceptions, Raising exception,  File Objects, creating a file object, reading File contents, Writing data into file, reading and writing CSV files, using with clause, Using Exception handling with file operations
4	Introduction ADT (9 Lectures) Writing a simple Class in Python, creating object of class, Instance Methods, Class Variables and special methods. Understanding ADT, Defining ADT using pseudo-code, Defining ADT for Date, Stack and Queue, Implementation of Date, Stack and Queue ADT. Concepts of circular and double ended queue. Applications of Stack and Queue
5	Linked Lists (8 Lectures)
	Defining List as ADT, Implementation of Singly Linked Lists, Circularly Linked Lists, Doubly Linked Lists, The Positional List ADT, Sorting a Positional List, Link-Based vs Array-Based Sequences.
	Implementation of Stack and Queue using Link List. Applications of Linked List (polynomial Equations)
6	Trees (9 Lectures)
	Concepts of tress and Binary Trees, Defining binary tree as ADT, Implementing Binary Trees, Tree Traversal Algorithms
	<b>Search Trees</b> : Binary Search Trees ,Balanced Search Trees ,Python Framework for Balancing Search Trees ,AVL Trees ,Splay Trees, Red-Black Trees
	Heaps, Maps, Hash Tables, and Skip Lists
7	Searching, Sorting and Analysis of Algorithms (9 Lectures)
	Need of searching, linear search, using binary search for efficient search.  Need of sorting and various sorting algorithms: insertion sort, bubble sort, selection sort; Merge sort and quick sort algorithms.  Python's Built-In Sorting Functions, Selection Algorithms.  Analysis of Algorithms: Measuring Algorithm Efficiency, Asymptotic Analysis, The Big-O Notation, Find the complexity of Algorithms: Linear

	Search, Binary Search, Sorting Algorithms. Compare complexity of various
	searching and sorting Algorithms
Text Books	Data Structures and Algorithms in Python Paperback – 2016
	by Michael T. Goodrich (Author), Roberto Tamassia (Author), Michael H.
	Goldwasser (Author) WILEY PUBLICATION
	Data Structure and Algorithmic Thinking with Python Paperback – 2015
	by NarasimhaKarumanchi (Author)
Reference Books	Problem Solving in Data Structures & Algorithms Using Python:
	Programming Interview Guideby Hemant Jain
MOOC on NPTEL	https://nptel.ac.in/courses/106/106/106106145/#

Subject Name	204. Data Warehousing and Data Mining
No. of Credits	4 Credits
Pre Requisite	Thorough understanding of Relational database normalization techniques,
_	Physical design of a database, Concepts of algorithm design and analysis,
	Basic understanding of: Software engineering principles and techniques,
	Probability and statistics
<b>Course Objectives</b>	• This course will enable to expose the students to Study various design and
	implementation issues and techniques in data warehousing and data mining.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Remembering the fundamentals of Database technology and its application in
8	data warehousing and data mining.
Creating	Creating multi dimensional data models using star, snowflake and fact
8	constellation schemas.
Understanding	Understand the components, architecture and other important tools of data
g	warehousing and data mining.
Applying	Apply the techniques of clustering, classification, association and other data
<b>FF</b> -J <b>S</b>	mining algorithms to real world data.
Analyzing	Gather and analyze large sets of data to gain useful information using data
<u>y</u> <b>g</b>	mining techniques.
Evaluating	Producing and interpreting quantitative analysis using various data mining
	algorithms.
Unit	Contents
1	Business Intelligence (5 Lectures)
	Business Environment and Computerized Decision Support, Managerial
	Decision Making, Computerized support for Decision Making, Decision
	Support System, Early Framework for Computerized Decision Support,
	Business Intelligence, Importance of BI, BI for Decision makers, The BI
	process, A framework for Business Intelligence
2	Data warehousing (10 Lectures)
	OLTP and OLAP Systems, Introduction to Data Warehouse, Differences
	between OLTP Systems and Data Warehouse, Characteristics of Data
	Warehouse; Advantages of Data Warehouse; Data Warehouse Users,
	Metadata, Classification of Metadata, and Importance of Metadata.
	Data Marts, Reasons for creating Data Marts, Building Data Marts: Top down
	Approach & Bottom up Approach,
	Data Warehouse Architecture, Two tier Architecture, Three Tier Architecture.
	Data Warehouse Schema, Star, Snow Flake & Fact Constellation Schema.
	OLAP Operations, OLAP Models.
3	Data Preprocessing (5 Lectures)
	Need, Objectives and Techniques of data preprocessing.
	<b>Descriptive Data Summarization</b> : Measuring the Central Tendency,
	Measuring the Dispersion of Data, Graphic Displays of Basic Descriptive
	Data Summaries
	<b>Data Cleaning:</b> Handling of Missing values and Noisy Data, Data cleaning as
	a process
	Data Integration and Transformation:
	Data Integration: Schema integration, Controlling redundancies using

	correlation.
	Data Transformation: Smoothing, Aggregation, Generalization, Attribute
	construction, Normalization
	Data Reduction: Data Cube Aggregation; Attribute Subset Selection,
	Dimensionality Reduction, Numerosity Reduction, Discretization & Concept Hierarchy Generation for Numerical Data and for Categorical Data.
	Therarchy Generation for Numerical Data and for Categorical Data.
4	Introduction Data Mining (5 Lectures)
	Evolution of database system technology, introduction to data mining,
	architecture of a typical data mining system, Types of data that can be mined,
	Data Mining Functionalities, Classification of Data Mining systems, Data
	Mining Task Primitives, Integration of a Data Mining System with a Database
F	or a Data Warehouse System, Major issues in Data Mining.
5	Mining Association Rules (5 Lectures)
	Introduction, Market Basket Analysis, Multi-Level and single level Mining, Mining Association Rules on Transactional database, Multi-Dimensional
	Association Rules From Relational Databases & Data Warehouses, From
	Association Mining To Correlation Analysis, Constraint Based Association
	Mining,
	Association Rule mining using Apriori Algorithm, and FP Growth
	algorithm. Generalized association rule.
6	Classification & Prediction (5 Lectures)
	Introduction to Classification and Prediction; Basics of Supervised &
	Unsupervised Learning; Preparing the Data for Classification and Prediction;
	Comparing Classification and Prediction Methods, Classification by Decision
	Tree Induction, Tree Pruning, Rule-based Classification Using IF-THEN
	Rules for Classification; Rule Extraction from a Decision Trees; Bayesian
	Classification: Bayes' Theorem, Naïve Bayesian Classification. Prediction
	using Regression analysis.
7	Cluster Analysis (5 Lectures)
	Introduction to Cluster Analysis; Types of Data in Cluster Analysis;
	Classification of clustering methods-Partitioning Method, Hierarchical Method,
	Density-based Method, Grid-Based Method, Model-Based Method,
	Constraint-based Method  Destriction in a Method of K. Magne and K. Madaida
Text Books	Partitioning Methods: K-Means and K-Medoids  References (Books, Websites etc.):
Text Dooks	Jiawei Han, MichelineKamber, Data Mining: Concepts and
	Techniques, Harcourt India Pvt., 2011.
Reference Books	Alex Berson, Stephen J. Smith, Data Warehousing, Data Mining and
Talefeller Books	OLAP,McGrawHill, 2004
	<ul> <li>D. Hand, H. Mannila, and P. Smyth, Principles of Data Mining, MIT</li> </ul>
	Press, 2011

Subject Name	205. Web Supporting Technologies
No. of Credits	4 Credits
Pre Requisite	Any pre-requisite knowledge is not required.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	The students will get information of the basics of internet with the help of
8	examples. It will help them to identify and remember Web supporting
	concepts.
Understanding	Remembering the definitions will help the students to understand basic
_	concepts of HAML, JavaScript, CSS and PHP etc. In this subject, students
	will understand various tags, programming constructs of JavaScript,
	technical issues, cascading Style Sheets, forms and PHP concepts.
Applying	Students will Have thorough knowledge of HTML and JavaScript. They will
	be able to design various forms as per requirements. They will be able to
	apply CSS concepts in scripting. The students will also apply their creativity
	to display the output.
Analyzing	The students will relate real life problem with the JavaScript solution. They
	will analyze the problem and solve it.
Evaluating	Ability to use JavaScript construct for problem solving, handling technical
	issues etc.
Creating	Design and create their own forms for solving a real-life requirement.
Unit	Contents
1.	Basics of Internet (4 Lectures)
	Understanding internet and intranet, difference between internet and
	intranet, Introduction to WWW, Concept of client and server, Introduction to
	web server and web browser, using Apache as web server, Internet Service
2	Providers (ISP)
2.	Introduction to HTML (8 Lectures)
	Overview of HTML, concept of Tag, types of HTML tags, structure of HTML program, Text Formatting Through HTML: Emphasizing Material in
	a Web Page, Using Image tag, attributes of Image tag, Lists: Using
	unordered, ordered, definition lists,
	Handling Tables: To define header rows & data rows, use of caption tag,
	changing height & width of table, BGcolor, Handling Tables: cell padding,
	cell spacing, colspan, row span, handling table data, images in table, Frames:
	Introduction To frames, using frames & framesets, named frames, Concept
	of hyperlink, types of hyperlinks, linking to the beginning of document,
	linking to a particular location in a document, image as hyperlinks
3.	Cascading Style Sheets (4 Lectures)
	Introducing CSS, Types of style sheets: inline, embedded and external style
	sheets, working with CSS properties: text properties, color and background
	properties, border and shading, box and block properties, positioning with
	CSS, various types of CSS selectors, Using class and span tag, External style
	sheets,

4.	Introduction to JavaScript (Client-Side Scripting) (8 Lectures) Introduction to scripting, overview of Java Script, advantages, client-side java Script, capturing user input, writing JavaScript into HTML, Advantages and limitations of JavaScript,  JavaScript Basics: Data types, literals, variables and operators, Java Script arrays, dense array, operators, expressions,  JavaScript Programming Constructs: Assignment, data declaration, if, switch, while, for, do while, label, break, continue, function call, return, with, delete, method of invocation  Dialog boxes -Alert dialog box, prompt dialog box, confirm dialog box, window objects  JavaScript Functions- Types of functions in Java Script- Built in functions, User defined functions, function declaration, passing parameters, variable scope, return values, recursive functions  Arrays- Introduction to arrays, arrays with methods
5.	Forms (6 Lectures)
	Interactive web pages concepts, difference between static & dynamic web pages, Concept of form, how form works, Different elements - text,
	password, button, submit, reset, checkbox, Radio, Text Area, select &
	option, properties of form elements, form object's Method, Other built-in
	Object: String object, math object, date object, Regular Expressions, Form
	validation
6.	JavaScript Events (6 Lectures)
	What is an Event? Onclick Event Type, onsubmit Event Type, onmouseover and onmouseout, onchange, onload, onkeydown, working with DOM,
	Concept of Cookies and sessions, when and how to use cookies and
	sessions,
7.	Introduction to PHP (4 Lectures)
	Server-side web scripting, Adding PHP to HTML, Syntax and Variables,
m . n .	PHP control structures, Establishing connectivity with MySQL database
Text Books	1. Ivan Bayross (2006) Web Enabled Commercial Application
	Development Using HTML, DHTML, JavaScript, Perl CGI, BPB Publications
Reference Books	Thomas Powell, Web Design The complete Reference, Tata     McGrawHill
	2. Thomas Powell and Fritz Schneider JavaScript 2.0 : The Complete
	Reference, Second Edition
	3. PHP: The Complete Reference By Steven Holzner, Tata McGrawHil
	4. Luke Welling, PHP and MySQL Web Development, Pearson
MOOC on NOTE	Education; Fifth edition
MOOC on NPTEL	NPTEL / Swayam www.edx.com
	www.coursera.com
	www.w3schools.com

Subject Name	206. Lab on Data Structures using Python
No. of Credits	4 credits
Pre Requisite	School Level Mathematics. It does not assume any prior knowledge of
	programming.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Using some motivating examples to remember and quickly builds up
	basic concepts such as conditionals, loops, functions, lists, strings and
	tuples.
Understanding	By remembering students the basing concepts students will understand the concepts of searching and sorting algorithms, dynamic programming
	and backtracking, as well as topics such as exception handling and using files. As far as data structures are concerned, the course covers Python dictionaries as well as classes and objects for defining user defined data
	types such as linked lists and binary search trees.
Applying	Students will Have thorough knowledge about data structures and will be able to design & develop program using linear data structures&non
	linear data structures for solving problems
Analyzing	Compare efficiency of various data structures for solving a particular
	problem.
Evaluating	Ability to choose appropriate data structures for problem solving
	Ability to use combination of these data structures for problem solving.
Creating	Design and create their own data structure for solving a real life problem
Unit	Contents
1	Informal introduction to programming, algorithms and data structures via gcd, Downloading and installing Python,gcd in Python: variables, operations, control _flow - assignments, conditionals, loops, functions.
	Suggested Programs
	Installation of Python IDE, understand various platforms for Python
	(google collaborator, Jupitar notebook)
	Basic program to understand Data Types
	<ul> <li>creating variables, accepting input variable from user and</li> </ul>
	printing their datatype
	<ul> <li>Mathematical functions (apply various operations on data +, -, /,</li> </ul>
	*)
	Conditional Statements (if, else, ,
	Create functions to
	o Find average of marks of five subjects
2	Find sum of first n prime numbers
2	Python: types, expressions, strings, lists, tuples, arrays   Python memory
	model: names, mutable and immutable values   List operations: slices etc - Binary search   Inductive
	minutable values   List operations, sinces etc - Dinary search   inductive

	function denitions: numerical
	and structural induction   Elementary inductive sorting: selection and
	insertion sort   In-place sorting.
	Suggested Programs
	Operations on Strings, Lists , tuples and arrays
	<ul> <li>Creating lists/tuple/array and accessing list elements</li> </ul>
	using index
	<ul> <li>Access the list/tuple element using –ve index</li> </ul>
	Extract specific element from list/tuple/array
	<ul> <li>Use len(), del(), remove() and range functions on</li> </ul>
	list/tuple
	Applying different searching and sorting algorithm on data (list)
3	Basic algorithmic analysis:inputsize,asymptotic,omplexity,O() notation
	Arrays vs lists   Merge sort
	Quicksort   Stable sorting. Dictionaries   More on Python functions:
	optional arguments, default values   Passing functions as
	arguments   Higher order functions on lists: map, lter, list
	comprehension.
	Suggested Programs
	Write a program for sorting given list using Quick Sort
	• Fuction calling ( passing the variables)
	<ul> <li>Find factorial of a number</li> </ul>
	<ul> <li>Find fibbonacci series for a given number</li> </ul>
	<ul> <li>Create Dictionaries with key, value pair, and access various</li> </ul>
	elements of Dictioneries, Various operation using Dictionaries.
	Usage of map, lter functions on list
4	Exception handling   Basic input/output   Handling files   String
	processing.
	Suggested Programs
	Read, write, search operations on File data structure
	Write Programs based on exception handling
	Write program for various operations on string variables
5	Backtracking: N Queens, recording all solutions   Scope in Python:
	local, global, nonlocal names
	Nested functions   Data structures: stack, queue   Heaps.
	Suggested Programs
	<ul> <li>Creation and various operations on Stack</li> </ul>
	Creation and various operations on queue
	Creation and various operations on heap
	Defining scope variables in Python
6	Abstract datatypes   Classes and objects in Python   "Linked" lists: find,
-	insert, delete   Binary search
	trees: find, insert, delete   Height-balanced binary search trees.
	Suggested Programs

	Creation of class data structure ,Abstract classes
	Creation of Link List and various operations on Link List
	Implementation of tree data structure using class concept
7	Efficient evaluation of recursive denitions: memoization   Dynamic
	programming: examples   Other programming languages: C and manual
	memory management   Other programming paradigms: functional
	programming.
	Suggested Programs
	Comparison of all discussed algorithm with their implementation in C
	and compare memory usage
Text Books	Data Structures and Algorithms in Python Paperback – 2016

Subject Name	209 Foreign Language : Japanese Language Proficiency
No. of Credits	2 Credits
Pre Requisite	Basic English ( Grammar and Sentence Formation)
<b>Cognitive Abilities</b>	The ability to understand some basic Japanese.
	One is able to read and understand typical expressions and sentences
	written in hiragana ,katakana , and basic kanji .
	One is able to listen and comprehend conversations about topics
	regularly encountered indaily life and classroom situations, and is able to
	pick up necessary information from short
	<ul> <li>conversations spoken slowly.</li> </ul>
Remembering	<ul> <li>Recognise the symbols, Numbers in Kanjis</li> </ul>
_	■ Greetings
Understanding	■ Understand the Language Knowledge(Vocabulary, Grammar, Kanji)
Applying	<ul> <li>Reading and understand typical expressions and sentences</li> </ul>
	<ul> <li>Using Kanjis in expressions and sentences</li> </ul>
Analyzing	Basic Communication in Japanese
Evaluating	Frame the dialogue to communicate in Japanese
Creating	Construct the simple sentences
Syllabus	
1	General Features of Japanese
	Japanese Script Pronunciation of Japanese
	Daily Greetings and Expression
	Numerals
2	a) Vocabulary
	b) Translation – Sentence Pattern and Example Sentence
	c)Conversation – How do you do?
	Reference word- Country, people and Language
3	a) Vocabulary
	b) Translation – Sentence Pattern and Example Sentence
	c)Conversation – This is just a token Reference word- Family Names
4	a) Vocabulary
	b) Translation – Sentence Pattern and Example Sentence
	c)Conversation – I 'll take it
	Reference word- Department Store
5	a) Vocabulary
	b) Translation – Sentence Pattern and Example Sentence
	c)Conversation – What are your opening hours?
6	Reference word- Phone and Letter
6	<ul><li>a) Vocabulary</li><li>b) Translation – Sentence Pattern and Example Sentence</li></ul>
	c)Conversation – Does this train goes to koshien?
	Reference word- National Holidays

Subject Name	209: Digital Technology
Credits	2 credits

#### **Course Objective:**

- To understand, communicate and adapt to a digital world as it impacts their personal life, society, and the business world.
- To actively engage students in the processes of analysing problems and opportunities, designing, developing and evaluating digital solutions, and creating and sharing information that meets a range of current and future needs.
- To learn and ethically exploit the capacity of information systems to create digital solutions.

#### Learning Outcome: At the end of this course, student should be able to

- Exposure to foundation knowledge in hardware, software, programming, web design, IT support, and networks.
- Students will apply their knowledge to situations and defend their actions/ decisions/ choices through the knowledge and skills acquired in this course.

#### **Pre-requisites:**

Preliminary knowledge of computer, ICT, Digital learning, their operations and applications.

Suggested MOOC: Please refer these websites for MOOCS:-

Course Plan	
Unit	Contents
1	Introduction:
	Introduction to Digital Technology, Purpose of Digital Technology, History of
	Digital Technology, Scope of Digital Technology, Examples of Digital

Technology: social media, online games, multimedia and mobile phones.
Benefits and challenges of digital technologies in the classroom.
Terms are associated with digital technology:
Bring your own device (BYOD), E-portfolios, Flipped classroom, Personal
Learning Network (PLN), Virtual Learning Environment (VLE), Interactive
Whiteboards (IWB), Software Applications (Apps), Web 2.0,
Telecommunication, Fibre Optics, Cellular Telephones, Digital printing, pulse
code modulation (PCM)
Types of Digital Technology:
Artificial Intelligence (AI): Introduction, Applications, scope, history
Advantages and Disadvantages,
Machine Learning (ML) : Introduction, Applications, scope, history
Advantages and Disadvantages
Deep Learning (DL): Introduction, Applications, scope, history Advantages
and Disadvantages
Digital Learning:
Types, Technology and Methods of Teaching and Learning
Support System:
Support system for teachers and students to use of digital technologies in the
classroom, SAMR (Substitution, Augmentation, Modification, Redefinition)
model developed by Dr Ruben Puentedur

Subject Name	209 Human Psychology at Workplace
No. of Credits	2 Credits
Objectives	<ul> <li>To expose the students to the fundamentals of Human Psychology - such as working with people, nature of organizations, communication, leadership and motivation of people.</li> <li>To help students develop a conceptual understanding of Behavioral theory theories</li> <li>To enable the students to put the ideas and skills of Psychology into practice</li> </ul>
Course Outcome	<ul> <li>To understand the dynamics of individual and Human Psychology and relationships.</li> <li>To understand the importance of human behavior in managerial functions</li> </ul>
Unit No	Syllabus content

1	Foundations of Individual Behavior Attitudes and Job Satisfaction,
	Components of Attitude, Major Job Attitude, Job Satisfaction, Personality and
	Values, Personality Determinants, MBTI, Big – Five Model, Values,
	Formation, Types of Values, Perception, Factors influencing perception
2	Motivation and Leadership: Motivation and Leadership Concept of
	motivation, Definition, Theories of Motivation, Maslow's need Theory,
	ERG Theory, Theory X and Theory Y, Two Factor Theory, McClelland's
	Theory, Equity Theory, Vroom"s Expectancy Theory.
	Concept ofLeadership, Theories of leadership, Traits of good Leader,
	Difference between Leaderand Manager
3	Groups and Teams:
	Concept of OB, Foundations of Group Behaviour, Formation of Group, Group
	Classification, Properties, Roles, norms, status, size and cohesiveness, Group
	decision making, Understanding teams, creating effective teams, Conflict
	Process, Conflict management communication
4	Culture
	Culture Definition, Culture's function, need and importance of Cross Cultural
	management, Stress and its Management.
Reference Books	1) Kavita Singh, Organizational Behavior, Vikas Publications
	2) Robbins, Timothy Judge, SeemaSanghi, Organizational Behavior,
	Stephen PearsonPrentice Hall, 12 edition
	3) Fred Luthans, Organizational Behavior, McGraw Hill Inc.
	4) John Newstrom and Keith Davis, Organizational Behavior, Tata
	McGraw Hill, 11 edition
	5)AshwaThapa, Organizational Behavior

**SEMESTER III** 

40

301. Software Design Patterns
4 Credits
This course assumes students should have following knowledge:
OOAD and UML.
Software Engineering
Java Programming
Course Outcome as per Blooms Taxonomy
Ability to identify the structure, framework of Design Patterns for a
given problem
Ability to understand the meanings, concepts and types of Design
Patterns
Ability to decide and suggest a design pattern for the given problem
Exploit the possibilities and limitations of basic design patterns for a
given problem and ability to analyze a software development problem
Ability to evaluate, assess the design pattern that are appropriate for a
given problem
Create software design that are scalable, robust and easily maintainable
and consisting multiple modules
Contents
Introduction to Design Patterns (4 Lectures)
Reusable design Patterns: Meaning & Use of Design Patterns,
Organizing the Patterns, describing pattern, how to use the patterns
while solving the problem, Applications of different design patterns in
various cases. Selection of a Design Pattern
Creational Patterns (8 Lectures)
Intent, Motivation, Applicability, Structure, Participants,
Collaborations, Consequences and Implementation of following
Creational Patterns: -
Factory Method, Abstract Factory, Builder, Prototype, Singleton.  Tutorial: Tutorials should be conducted in LAB using JAVA for
implementing Creational design pattern.
Structural Patterns (8 Lectures)
Intent, Motivation, Applicability, Structure, Participants,
Collaborations, Consequences, Implementation of Following Structural
Patterns
Adapter (class), Adapter (object), Bridge, Composite, Decorator.
Façade, Flyweight, Proxy.
Tutorial: Tutorials should be conducted in LAB using JAVA for
implementing Structural design patterns.

4	Behavioral Patterns – I (8 Lectures)
	Intent, Motivation, Applicability, Structure, Participants,
	Collaborations, Consequences, Implementation of following Behavioral
	Pattern
	Interpreter, Template Method, Chain of Responsibility, Command,
	Iterator
	Tutorial: Tutorials should be conducted in LAB using JAVA for
	implementing Behavioral Design Patterns – I
5	Behavioral Patterns – II (8 Lectures)
	Intent, Motivation, Applicability, Structure, Participants,
	Collaborations, Consequences, Implementation of following Behavioral
	Pattern
	Mediator, Memento, Observer, State, Strategy, Visitor
	Tutorial: Tutorials should be conducted in LAB using JAVA for
	implementing Behavioral Design Patterns – II
6	JEE Patterns (6 Lectures)
	Presentation Layer Design Pattern, Business Layer Design Pattern,
	Integration Layer Design Pattern
	Tutorial: Tutorials should be conducted in LAB using JAVA for
	implementing above Patterns
7	Case Study (4 Lectures)
	Designing a parking lot
	Designing Movie Ticket Booking System
	Design Logistic System
	Online Hotel Booking System OYO
Text Books	Head First Design Patterns, Eric Freeman, Elisabeth Freeman, Kathy
	Sierra, Bert Bates,
Reference Books	Design Patterns Elements of Reusable Object-oriented
	Software- Erich Gama, Richard Helm, Ralph Jonson
	Ben Schneiderman, Designing the User Interface, Pearson Education, 1998

<u></u>	- 1

<b>Subject Name</b>	302. Artificial Intelligence
No. of Credits	4 Credits
<b>Pre Requisite</b>	
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Using some motivating examples to remember and quickly builds up
	basic concepts such as visual perception, speech recognition, decision-
	making, and translation between languages
Understanding	By remembering the basic concepts students will understand the
	concepts of Natural-language understanding (NLU) or natural-language
	interpretation (NLI), as well as topics such as simulation process of
	human intelligence by machines and special computer systems. As far as
	artificial intelligence is concerned the course covers natural language
	processing, Knowledge Representation Issues, Symbolic Reasoning
	under Uncertainty as well as Machine Learning (ML) using Python.
Applying	Students will have thorough knowledge about various level of
	mathematics, including probability, statistics, algebra, calculus, logic
	and algorithms. Bayesian networking or graphical modeling, including
	neural nets. Physics, engineering and robotics, Computer science,
	programming languages and coding. Knowledge of Python is essential.
Analyzing	Compare efficiency of various Theories of Intelligence and learning
	from experience for solving a particular problem.
Evaluating	Ability to choose appropriate Knowledge based approach for problem
	solving.
	Ability to use combination of these artificial intelligence theories for
	problem solving.
Creating	Design and create their own artificial intelligence applications for
Creating	solving a real life problem
Total Deciles	
Text Books	1)Artificial Intelligence : A Modern Approch, Stuart Russel, Peter
	Norvig  2) Artificial Intelligence and Machine Learning by Chandra S. S. V. PHI
Defenence Deelze	2)Artificial Intelligence and Machine Learning by Chandra S.S.V, PHI

Unit	Content

1	Introduction (4 Lectures)
	What is AI? ,The AI Problems, Background/history, What Is An AI
	Techniques, The Level Of The Model, Criteria For Success, Some
	General References, High-level overview of field, State of the art.
2	Introduction and historical perspective, Hard and Soft AI(7 Lectures)
	Disciplines and applications, Theories of Intelligence, Detecting and
	Measuring Intelligence, Knowledge based approach, Problems, State
	Space Search & Heuristic Search Techniques: Defining The Problems as
	A State Space Search, Production Systems, Production Characteristics,
	Production System Characteristics, And Issues In The Design Of Search
	Programs, Additional Problems. Generate – And-Test, Hill Climbing,
	Best-First Search, Problem Reduction, Constraint Satisfaction, Means-
	Ends Analysis.
3	Knowledge Representation Issues(6 Lectures)
	Representations And Mappings, Approaches To Knowledge
	Representation. Using Predicate Logic: Representation Simple Facts In
	Logic, Representing Instance And Isa Relationships, Computable
	Functions And Predicates, Resolution. Representing knowledge Using
	Rules: Procedural Versus Declarative Knowledge, Logic Programming, Forward Versus Backward Reasoning
4	Symbolic Reasoning under Uncertainty(5 Lectures)
·	Introduction To Non-monotonic Reasoning, Logics For Non monotonic
	Reasoning. Statistical Reasoning: Probability And Bays' Theorem,
	Certainty Factors And Rule-Base Systems, Bayesian Networks,
	Dumpster-Shafer Theory, Fuzzy Logic.
5	Natural Language Processing(5 Lectures)
	Introduction, Syntactic Processing, Semantic Analysis, Semantic
	Analysis, Discourse And Pragmatic Processing, Spell Checking.
	Connectionist Models: Introduction: Hopfield Network, Learning In
	Neural Network, Application Of Neural Networks, Recurrent Networks,
	Distributed Representations, Connectionist AI And Symbolic AI.
6	Introduction to machine learning (7 Lectures)
	IntroductionMachine Learning Concepts, methods and models,
	Supervised Learning, unsupervised and semi-supervised, Learning
	Decision Trees, Evaluating and Choosing the Best Hypothesis, ,
	Introduction to Numpybasics, creating numpy arrays, structure and
	content of arrays, subset, slice, index and iterate through arrays,
	multidimensional arrays, python lists vs numpy arrays, introduction to
	numpy operations on numpy arrays, operations on arrays basic linear
	algebra operations.

#### 7 Introduction to pandas (8 Lectures)

Introduction, pandas basics, indexing and selecting data, merge and append, grouping and summarizing data frames, lambda function & pivot tables, reading delimited and relational databases, reading data from websites, getting data from apis, reading data from pdf files, cleaning datasets.

Case study: For example, to explore a dataset stored in a CSV on your computer. Pandas will extract the data from that CSV into a Data Frame — a table, basically — then let you do things like:

Calculate statistics and answer questions about the data, like

- 1) What's the average, median, max, or min of each column?
- 2) Does column A correlate with column B?
- 3) What does the distribution of data in column C look like?
- 4)Clean the data by doing things like removing missing values and filtering rows or columns by some criteria
- 5) Visualize the data with help from Matplotlib. Plot bars, lines, histograms, bubbles, and more.
- 6)Store the cleaned, transformed data back into a CSV, other file or database

Subject Name	303. Information Security
No. of Credits	4 Credits
Pre Requisite	Basic Knowledge about Software Development Life Cycle, System Analysis
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of software development and software engineering
	Information can be understood and remembered.
Understanding	By remembering students the basing concepts students will understand the concepts of Information, Characteristics, Levels of Information, Information
A 7 •	Security Measures and various stages in Information testing Life Cycle.
Applying	Students will Have thorough knowledge about Measures of Information Security and Cyber security at higher level, network security measures and various scanner and cleaners
Analyzing	To Measure the risk of Information loss or theft and over come the Information Security by scientific and proper methods.
Evaluating	Ability to select proper method to protect the information from misuse and make the organization full proof from various Information threats.
Creating	Design and create their own procedure to protect the important data and information at all the levels.
Unit	Contents
1	Introduction and Background (5 Lectures)
	Basic concepts of Information, Information Characteristics, sources of
	Information, Types of Information, Generating Information in Organizations.
	Business Application of Information and Information System, What is
	Information security? Need for Information Security, Types of Organization,
	Functions of Business organization, Levels of Organization, How
2	Organizations manage the information , flow of information.
2	Basics of Networking for Security Purpose (8 Lectures)
	Network Installations, Types of Networks and their security issues, Types of Network of OS. Functions of Information security officer. Different measures
	to safe guard the important information in the organization. Network policy
	for protecting important resources of the Network. Basic concept of MIS and
	Organization flow of Information.
3	Importance of Information Security (7 Lectures)
	Improvement in corporate reputation based on the height of the level of
	information security, threat to business continuity due to accidents related to
	information systems, cyber space, information assets, threats, and
	vulnerabilities. Information Security Measures.
	<b>Threats</b> :- Ty p e s of threats physical threats (accident, disaster, fault,
	destruction, theft, unauthorized intrusion, etc.), technical threats (unauthorized
	access, eave
	S dropping, spoofing, alteration, error, cracking, etc.), man-made threats

	(consisting a large plane and a second property of the sign of the
	(operational error, loss, damage, peep, unauthorized use, social engineering,
	etc.), cyber-attack, information leakage, intent, negligence, mistake, fraudulent
	behavior, sabotage, DoS attack, rumor, flaming, SPAM e-mail, file sharing
	software [Malware / malicious programs] computer virus, macro virus, worm,
	bot (botnet, remote operated virus), Trojan horse, spyware, ransom ware, key
	logger, root kit, backdoor, fake anti-virus software
4	Information security technology (cryptography) (7 Lectures)
	<b>CRYPTREC</b> ciphers list, cryptography (encryption key), decryption
	(decryption key), decoding, symmetric cryptography (common key), public
	key cryptography (public key, private key)), AES (Advanced Encryption
	Standard), S/MIME (Secure MIME), PGP (Pretty Good Privacy), hybrid
	encryption, hash function (SHA-256, etc.), key management, disk encryption,
	file encryption, compromise. digital signature (signature key, verification
	key), timestamp (time authentication), message authentication, MAC
	(Message Authentication Code), challenge-response authentication.
	<b>Human assets</b> (people, and their qualifications, skills, and experience),
	intangible assets, service, risk management (JIS Q 31000), monitoring,
	information security events, information security incidents.
5	Information security Management (7 Lectures)
	Management of information based on the information security policy,
	information, information assets, physical assets, software assets
	Risk analysis and evaluation (Information asset review / Classification)
	information assets review, classification and management by importance of
	information assets, information assets ledger Risk analysis and evaluation
	(Risk type)loss of property, loss of responsibility, loss of net earnings, human
	cost, operational risk, supply chain risk,
6	
0	Information security regulations (8 Lectures)
	(Company regulations including information)
	security policy) organizational operation according to the information security
	policy, information security policy, information security purpose, information
	security measures criteria, information management regulations, security
	control regulations, documentation control regulations, regulations on
	measures to be taken against computer virus infection, regulations on
	measures against accidents, information security education regulations,
	privacy policy (personal information protection policy), employment
	agreement, office regulations, penal provisions, outward explanation
	regulations, regulations for exceptions, regulations for updating rules,
	procedure for approving regulations
7	Management of Information Asset. (8 Lectures)
,	Security Incidents management, reducing risk in Information loss and keeping
	the information safe from unauthorized users and threats.
	Information Technology Act, Cyber Crimes and Cyber LawsWhat are
	cyber-crimes? Types of cyber-crimes. Categories of Cyber Crime, Online
	business threats, Online business frauds Safety tips for online business., IT
	Policy for Information protecting. risk involved in usage of external service,
	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
	risk involved in distribution of information by SNS, moral hazard, estimated annual loss, scoring method, cost factor.

Text Books	1. Information Security Management Handbook, Sixth Edition, Volume
	5-2012 Amazon BooksEdited by - Micki Krause Nozaki, Harold F.
	Tipton.
	2. Cyber Security Understanding Cyber Crimes, Computer Forensics and
	Legal Perspectives Nina Godbole and SunitBelpure, Publication
	Wiley.
	3. Information Security: Principles and Practice 1st, Kindle Edition -
	2005 Amazon BooksAuthor - Mark Stamp
	4. "Cryptography and information Security" V.K.Pachghare, PHI
	Learning Private Limited, Delhi India.
	5. Analyzing Computer Security by Charles P. Pfleeger, Shari
	LawerancePfleeger, Pearson Education India
	6. Anil Gaikwad, JyotiBiradar (Patil) "Basic Concepts of System
	Analysis" Lambert Academic Publication Dec. 2019.
Reference Books	Practical Information Security Management: A Complete Guide to
	Planning and Implementation-Dec-2016 Amazon Books.
	Tony Campbell
	2. Managing Risk and Information Security :- Protect to Enable
	3. Anil Gaikwad, JyotiBiradar (Patil) Software Project Management
	Made Easy Lambert Academic Publication Dec 2019.
MOOC on NPTEL	https://nptel.ac.in/courses/, http://www.freetechbooks.com/managing-risk-and-
	<u>information-security-protect-to-enable-t1150.html</u>

Subject Name	306. Lab on Software Testing
No. of Credits	3 Credits
Pre Requisite	Fundamental knowledge of computer.
1	Fundamental knowledge of Software Engineering, System
	Analysis and Design.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	The purpose of this course is to build the skills necessary to perform
	software testing at the function, class and application level.
	This course will enable students to
Understanding	Concepts of developing test plan, test cases, execution of test cases etc.
Applying	Work on automated software testing tools like bugzilla, winrunner, selenium,
Applying	test link etc.
Analyzing	Analyse the requirements for the given problem statement
,g	Find defects which may get created by the programmer while developing the
	software.
Evaluating	Gain confidence to write and execute test cases.
	To get the knowledge about automated testing and automated testing tools.
Creating	Design and implement the solution for given problem in any programming
	language.
	Derive test cases and execute test cases for any given problem.

Subject Name	309: Water Management
No. of Credits	2 Credits
Pre Requisite	Basics of Environmental studies
Cognitive Abilities	<ul> <li>To learn how to analyse and comprehend basic principle of water resources and its planning and management</li> <li>To visualise systematic process on environmentally water resource management and sustainable water resource development</li> <li>To launch the skillful techniques for water resource planning and management</li> </ul>
Remembering	Basic Needs of Human
Understanding	Availability of water resource
Applying	Method for water harvesting based on the area.
Analyzing	The issues related to planning and management of water resources
Evaluating	Water issues related to particular area
Creating	Construct the solution based on Water Management Problem
Syllabus	
1	Introduction:Sources and Uses of water (primary, secondary and tertiary sector uses); Concept of virtual water; Health and environmental concerns of availability and quality of water resources.
2	Crisis in Water Resources:Water crisis and water stress; Protection of aquifers; Water rights and its legal implications; Politics of water sharing
3	Water Resources Planning and Management: Necessity, System components, planning scales, Approaches, planning and management aspects, Analysis, Models for impact prediction and evaluation, Adaptive Integrated Policies, Post Planning and management Issues
4	Water Harvesting and Conservation: Water Harvesting Techniques – Micro-catchments -Design of Small Water Harvesting Structures – Farm Ponds – Percolation Tanks – Yield from a Catchment, Rain water Harvesting-various techniques related to Rural and Urban area.

Subject Name	209 Economics for IT Industry
No. of Credits	2 Credits
Pre Requisite	Introductory knowledge of IT industry with application skills.
Course Objectives	<ul> <li>To study changes in the environment in which firms operate influence their decision-making and outcome</li> <li>To acquaint learners with basic concepts and techniques of</li> </ul>
	<ul> <li>economic analysis and their application to managerial decision-making in the IT industry.</li> <li>To prepare the students for the use of various economics</li> </ul>
	terminologies and techniques in IT industry.
	To understand recent developments in the economic situation and
G 44 A 7 8784	its impact on economic decision making.
CognitiveAbilities	. Course Outcome as per Blooms Taxonomy
Remembering	Students will have the fundamental knowledge of the industrial economy and especially of the IT industry
Understanding	Understand the concept of economics for IT industry
	Use of economics in IT industry
	A better understanding of IT industry contribution to the Indian
	economy
Applying	Economics allows you to drive positive change for the betterment of
	the company and the industry
Analyzing	Analyze the demand and supply conditions and assess the position of
	a company.
Evaluating	Examine the possible economic risks and identify policies to address them
	Study price structure of designed software
Creating	Study the economics of IT sector
Unit	Content
1	Introduction Economics and IT industry
	Meaning and scope of Industrial Economics .
	<ul> <li>Need and importance of industry economics.</li> </ul>
	IT industry and its contribution to the Indian Economy.
	Factors hindering the IT Industry in India
2	Theory of Demand and Supply
	Theory of Demand Supply
	Law of Demand and Supply.
	• Elasticity of demand .
	Supply and demand chain
3	Theory of company /Firm:
	• Size and structure of the company
	Size and structure of the IT industry in India  The last of the Company of t
	Technological View of the firm
	Marketing Boundaries
	Determining the marketing boundaries ans Structure
	Competition

	Discount los may be not may
	Price output- log run/ short run
	Monopoly
4	Macro economics
	Macroeconomics
	Competition and industrial Policy
	Current issues in the IT industry and Competition
	Government and IT industry policies
	R& D in It Industry
	Government Monetary policy and its impact in IT industry
Text Books	Managerial Economics DN Dwivedi Vikas Publishing
	<ul> <li>Managerial Economics and Micro Economic G.S Gupta</li> </ul>
	Macro Economics R.Dornbusch, S.Fischer

Subject Name	309. Social Change in Technology
No. of Credits	2 Credits
Course Objective	<ul> <li>To help the student to see the need for developing a holistic perspective of life.</li> <li>To aware the student to see the need for developing science and Technology.</li> <li>To sensitize the students about the scope of technology and its impact on social change.</li> <li>To develop more confidence and commitment to understand, learn and act accordingly</li> </ul>
<b>Pre Requisite</b>	
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Understand the meaning of technology and social change
Understanding	Learn the ideas of prominent sociological thinkers on social change and understanding their explanation on society and how it changes with time
Applying	Describe and assess technological development and resulting social changes emanating from the information revolution
Analyzing	Analyse social changes emanating from the information revolution
Evaluating	Describe and evaluate the relationship of social change to the development, impact
Creating	Diffusion of modern communication technologies in society
Unit	Contents
2	Introduction to Social Change: What is Social change, Role of society in change, social change as a dynamic concept, existing theories of social change, innovation and invention as a social process for social change  Discovery Social change: Link between education and social change, concept of Science and Technology, role of technology in social change, Causes and Effects
	of Technology in social changes, discovery as a social process for social change and technological development, trends of technology, social processes that are involved in the development of technologies and social change
3	<b>Digital divide and social change:</b> Computers, equity, education and digital divide, technology & work/business, Role of ICT in government & military, technological development and resulting social changes emanating from the information revolution, relationship of social change to the development, impact and diffusion of printed materials, Internet, email and social media in society.
4	<b>Social issues caused by the rise in technology:</b> Computer crime and security, Intellectual property and responsible computing, identify and evaluate past, present, and potential future political and ethical issues involving technology and economy
Text Books	Human Societies as Sociocultural System by Nolan & Lenski1983

# ELECTIVES ELECTIVE GROUP (01): CLOUD COMPUTING

No. of Credits   3 Credits (2 Lectures + 1 Tutorial)	C 1: AN	LOS (A. ) XV. A. V. A. V.
Pre Requisite  Knowledge of Cloud Computing Concepts Knowledge of Virtualization Knowledge of Virtualization Knowledge of Web technologies  Cognitive Abilities  Course Outcome as per Blooms Taxonomy How to provide Flexible and scalable infrastructures as per user requirement Understanding Understanding the components of Virtualization  Applying  Carrying out practical's through Virtualization  Analyzing  The case studies will help us to understand more of practice of cloud computing in the market.  Evaluating  Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization Creating flexible and scalable infrastructure suitable to the organizational need  Unit  Contets  Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, Virtualization Solutions  Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts,Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization, Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, Storage Virtualization, Client & Desktop Virtualization, Storage Virtualization (Lectures/practical's: 05)	Subject Name	01(A) Virtualization
Knowledge of Virtualization Knowledge of Cloud secuity Knowledge of Web technologies  Cognitive Abilities Course Outcome as per Blooms Taxonomy  Remembering How to provide Flexible and scalable infrastructures as per user requirement Understanding Understanding the components of Virtualization  Applying Carrying out practical's through Virtualization  Analyzing The case studies will help us to understand more of practice of cloud computing in the market.  Evaluating Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization Creating Creating flexible and scalable infrastructure suitable to the organizational need  Unit Contents  1 Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, virtualization Solutions  Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  3 Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization. Installing Hyper-V In Windows Server 2012,  4 Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, Storage Virtualization, Storage Sulfualization, Network Virtualization, Storage Virtualization (Lectures/practical's: 05)		
Knowledge of Cloud secuity Knowledge of Web technologies  Course Outcome as per Blooms Taxonomy  Remembering How to provide Flexible and scalable infrastructures as per user requirement  Understanding Understanding the components of Virtualization  Analyzing The case studies will help us to understand more of practice of cloud computing in the market.  Evaluating Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization  Creating flexible and scalable infrastructure suitable to the organizational need  Unit Contents  Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, unWare's Virtualization Solutions  Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization; Installing Hyper-V In Windows Server 2012,  Types Of Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, Services and Applications Virtualization, Network Virtualization, StorageVirtualization Tools For Virtualization (Lectures/practical's: 05)	Pre Requisite	
Knowledge of Web technologies		
Course Outcome as per Blooms Taxonomy		
How to provide Flexible and scalable infrastructures as per user requirement Understanding Understanding the components of Virtualization     Applying   Carrying out practical's through Virtualization     Analyzing   The case studies will help us to understand		
Understanding		
Applying  Carrying out practical's through Virtualization  The case studies will help us to understand more of practice of cloud computing in the market.  Evaluating  Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization  Creating flexible and scalable infrastructure suitable to the organizational need  Unit  Contents  Overview Of Virtualization (Lectures/practical's:7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  Understanding Virtualization (Lectures/practical's:7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare:  what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, StorageVirtualization Services and Applications Virtualization, Network Virtualization, StorageVirtualization Tools For Virtualization (Lectures/practical's: 05)	Remembering	1 1
The case studies will help us to understand more of practice of cloud computing in the market.  Evaluating  Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization  Creating  Creating flexible and scalable infrastructure suitable to the organizational need  Unit  Contents  1  Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, ymWare's Virtualization Solutions  1  Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare:  what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization: Full Virtualization, Emulation Virtualization, Para virtualization (Lectures/practical's: 7) Server Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, Storage Virtualization (Lectures/practical's: 05)	Understanding	U I
more of practice of cloud computing in the market.  Evaluating  Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization  Creating  Creating flexible and scalable infrastructure suitable to the organizational need  Unit  Contents  Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts,Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization. Full Virtualization, Emulation Virtualization, Para virtualization: Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, Storage Virtualization (Lectures/practical's: 05)	Applying	Carrying out practical's through Virtualization
more of practice of cloud computing in the market.  Evaluating  Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization  Creating  Creating flexible and scalable infrastructure suitable to the organizational need  Unit  Contents  Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts,Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization. Full Virtualization, Emulation Virtualization, Para virtualization: Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, Storage Virtualization (Lectures/practical's: 05)	Analyzing	The case studies will help us to understand
Creating Creating flexible and scalable infrastructure suitable to the organizational need  Unit Contents  Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  Understanding Virtualization, (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware.  vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization: Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012.  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, Storage Virtualization (Lectures/practical's: 05)		more of practice of cloud computing in the market.
Creating       Creating flexible and scalable infrastructure suitable to the organizational need         Unit       Contents         1       Overview Of Virtualization (Lectures/practical's: 7)         Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions         2       Understanding Virtualization (Lectures/practical's: 7)         The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware.         vmWare:       what is VmWare, Virtualization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment         3       Hypervisor (Lectures/practical's: 7)         What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization, Installing Hyper-V In Windows Server 2012,         4       Types Of Virtualization (Lectures/practical's: 7)         Server Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, Storage Virtualization         5       Tools For Virtualization (Lectures/practical's: 05)	Evaluating	Comparison of cost-wise solution to the problem and selecting the best
Creating       Creating flexible and scalable infrastructure suitable to the organizational need         Unit       Contents         1       Overview Of Virtualization (Lectures/practical's: 7)         Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions         2       Understanding Virtualization (Lectures/practical's: 7)         The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware.         vmWare:       what is VmWare, Virtualization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment         3       Hypervisor (Lectures/practical's: 7)         What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization, Installing Hyper-V In Windows Server 2012,         4       Types Of Virtualization (Lectures/practical's: 7)         Server Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, Storage Virtualization         5       Tools For Virtualization (Lectures/practical's: 05)		solution for the problem suggested to the organization
Unit  Contents  Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization Services and Applications Virtualization, Network Virtualization, StorageVirtualization Tools For Virtualization (Lectures/practical's: 05)	Creating	
1 Overview Of Virtualization (Lectures/practical's: 7) Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  2 Understanding Virtualization (Lectures/practical's: 7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts,Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  3 Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,  4 Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization Services and Applications Virtualization, Network Virtualization, StorageVirtualization Tools For Virtualization (Lectures/practical's: 05)		need
Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  2	Unit	Contents
Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  2	1	Overview Of Virtualization (Lectures/practical's: 7)
Virtualization, Para-Virtualization, vmWare's Virtualization Solutions  Understanding Virtualization (Lectures/practical's:7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware.  vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts,Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization, Services and Applications Virtualization, Network Virtualization, StorageVirtualization  Tools For Virtualization (Lectures/practical's: 05)		Introduction to Virtualization, Virtualization Approaches, Virtualization
2 Understanding Virtualization (Lectures/practical's:7) The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. vmWare: what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7) What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7) Server Virtualization, Client & Desktop Virtualization Services and Applications Virtualization, Network Virtualization, Storage Virtualization Tools For Virtualization (Lectures/practical's: 05)		for Server Consolidation and Containment, Hardware Support for
The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware.  vmWare:  what is VmWare, Virtulization with Vmware, VmWareProducts, Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment  Hypervisor (Lectures/practical's: 7)  What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization: Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,  Types Of Virtualization (Lectures/practical's: 7)  Server Virtualization, Client & Desktop Virtualization Services and Applications Virtualization, Network Virtualization, Storage Virtualization (Lectures/practical's: 05)		Virtualization, Para-Virtualization, vmWare's Virtualization Solutions

## **ELECTIVE GROUP (01): CLOUD COMPUTING**

Subject Name	(1)Cloud Computing Services (Amazon Web Services)
No. of Credits	3 Credits (2 Lectures +1 Tutorial)
Pre Requisite	Knowledge of Cloud Computing Concepts
•	Knowledge of Virtualization
	Knowledge of Cloud secuity
	Knowledge of Web technologies
	Knowledge of Iaas, PaSS,SaSS&DaSS
Cognitive	Course Outcome as per Blooms Taxonomy
Abilities	
Remembering	How to provide Flexible and scalable infrastructures as per user
	requirement
Understanding	Understanding the components of AWS
Applying	Carrying out practical's through AWS
Analyzing	The case studies will help us to understand
	more of practice of cloud computing in the market.
Evaluating	Comparison of cost-wise solution to the problem and selecting the best
	solution for the problem suggested to the organization
Creating	Creating flexible and scalable infrastructure suitable to the organizational
	need
Unit	Contents
1	Cloud Computing Fundamentals (Lectures/practical's: 10)
	Definition of Cloud Computing, private, public and hybrid cloud. Cloud
	types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing,
	public Vs private clouds
2	Infrastructure & Networking (Lectures/practical's :10)
	Introduction to Amazon Web Services
	AWS Global Infrastructure
	Introduction to Network Switches & Virtual Private Cloud
	VPC & Subnets
	Internet Gateways, VPC Peering & NAT Gateways
	IP Addressing in AWS
	Understanding AWS Security Groups
	Launching our first EC2 instance
2	EC2 instance types & Pricing Models
3	Storage (Lectures/practical's: 10)
	Introduction to Block & Object storage mechanism
	Introduction to Elastic Block Store - EBS
	EBS Snapshots
	EBS Volume Types
	Instance Store Volumes Introduction to Simple Storage Service (S3)
	Introduction to Simple Storage Service (S3) Features of S3
4	
4	Elastic Load Balancers –( Lectures/practical's : 10)
	Understanding High Availability Configuration
	ELB Configuration

	Elasticity
	Auto Scaling
	Identity & Access Management
	Understanding the IAM Policies
	IAM User, IAM Policy and IAM Role
5	Relational Databases(Lectures/practical's: 05)
	Introduction to Relational Databases
	Creating our first database structure in MySQL
	Getting started with DynamoDB
6	Domain Name System(Lectures/practical's: 05)
	Introduction to DNS
	Understanding DNS Records
	Introduction to Route53
7	AWS Lambda and API(Lectures/practical's: 05)
	Getting started with AWS Lambda
	Introduction to API
	Understanding working of API
	Building our API with API Gateway
Text Books	1. Cloud Computing: Principles and Pardigms by RajkumarBuyya,
	jamesBroberg and Andrzej M.Goscinski, Wiley, 2011.
	2. Amazon Web Services for Dummies – Wiley Brand.
	3. Learning AWS – Design, Build and Deploy responsive applications
	using AWS cloud components by Aurobindo Sarkar, Amit Shah
Reference	1. Learn AWS – David Clinton
Books	2. AWS Lab by Zoom Technologies

## ELECTIVE GROUP (02):DATA SCIENCE

Subject Name	(A) - Statistical Programming in R
No. of Credits	3 Credits (2 Lectures + 1 Tutorial)
<b>Pre Requisite</b>	Statistical Knowledge required
Course	• To teach the Beginners of R Programming of the a master level. A variety of topics
Objectives	will be covered that are important for Data science in order to prepare the students
	for real life prediction of data engineering.
	• To impart knowledge of the concepts related to Probability and Application on data
	sets. It also gives the idea how data is managed in various environments with
	emphasis on Predictions measures as implemented in data sets.
Cognitive	Course Outcome as per Blooms Taxonomy
Abilities	
Remembering	• Remember the definitions of concepts and their Implementation in R.
Understandin	<ul> <li>Understand the concept of data and techniques for its Implementation</li> </ul>
g	Understand data data standards and methods.
	Understand the fundamentals of Data science
Applying	Design different data behaviors and their Predictions.
	Predictions Model Develop.
Analyzing	Analyzing Data set
	Studying Historical Data.
Evaluating	Convert the historical Data into Prediction Model.
Creating	Write R coding for Prediction Model.
Unit	Contents

## ELECTIVE GROUP (02):DATA SCIENCE

<b>Subject Name</b>	(02) B - Introduction to Data Science
No. of Credits	3 Credits (2 Lectures + 1 Tutorial)
Pre Requisite	Statistical and Programming Knowledge required
<b>Course Objectives</b>	• To teach the Beginners of Data analysis through R /Python Programming
	of the a master level. A variety of topics will be covered that are
	important for Data science in order to prepare the students for real live
	Project Analysis
	• To impart knowledge of the concepts related to Machine Learning and
	implement and variety Application on data sets. It also gives the idea how
	data is managed in various environments with emphasis on Analysis
	measures as implemented .
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Remember the definitions of concepts and their Programming skills.
Understanding	<ul> <li>Understand the concept of coding and techniques for its</li> </ul>
	Implementation
	Understand data different Methods.
	Understand the fundamentals of Data science
Applying	<ul> <li>Design different Model and their validity check.</li> </ul>
	Concept applying in other domain area.
Analyzing	Analyzing Data set.
	Comparing different Model .
Evaluating	Convert the analysis in Modern approaches.
Creating	Write R/Python coding for Analysis
Unit	Contents
1	Association Rule (5 Lectures)
	Mining Frequent Patterns, Associations, and Correlations: Basic Concepts
	and a Road Map, Association Rules, the Apriori Algorithm Classification
	and Prediction
2	Classification (5 Lectures)
	Classification, Issues Regarding Classification, Classification by Decision
	Tree Induction, Bayesian Classification, Rule-Based Classification, Metrics
	for Evaluating Classifier Performance, Holdout Method and Random Sub
2	sampling
3	Prediction (5 Lectures)
	Prediction, Issues Regarding Prediction, Accuracy and Error Measures,
	Evaluating the Accuracy of a Classifier or Predictor. Clustering: Cluster
	Analysis, Agglomerative versus Divisive Hierarchical Clustering, Distance Measures in Algorithmic, Evaluation of Clustering
4	Linear Regression (5 Lectures)
<b>*</b>	Prediction using Linear Regression, Gradient Descent, Linear Regression
	with one variable, Linear Regression with multiple variables, Polynomial
	Regression, Feature Scaling/Selection
1	1 to 51 coolon, 1 cutate beaming belocation
5	Logistic Regression (5 Lectures)

	Classification using Logistic Regression, Logistic Regression vs. Linear
	Regression, Logistic Regression with one variable and with multiple
	variables
6	Deep Learning (10 Lectures) History, Scope and specification, why deep learning now, building block of neural network, neural networks, Deep learning hardware. Backward and forward neural networks, XOR model, cost function estimation (maximum likelihood), units, activation functions, layers, , normalization, hyperparameter tuning, Convolution neural networks, architecture
7	Case study (10 Lectures) Iris Data set ,Loan Data set, Titanic survival Data set ,Share Market Data set, Covide -19 Data set etc
Text Books	An Introduction to Machine Learning Springer by GopinathRebala
Reference Books	1. Fundamentals of Statistics" Seventh Edition By S.C.Gupta  2.An Introduction to Machine Learning Springer byGopinathRebala  3.Deep Learning MIT Press by John D.Kelleher.  Suggested MOOC: Please refer these websites for MOOCS:  NPTEL / Swayam www. edx.com, www.coursera.com

## **ELECTIVE GROUP (03): LINUX**

Subject Name	(03)A- Linux Desktop Environment, Shell Programming and System
	Administration
No. of Credits	3 Credits
Pre Requisite	Knowledge of any operating system
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Linux Architecture and Shell Commands
Understanding	Understanding of Linux operating system and environment
Applying	Use Linux operating system for configuring the environment.
Analyzing	
Evaluating	Writing shell scripts and evaluating them
Creating	Creating small applications for smart home/city using Arduino
Unit	Contents
1	Linux Installation (8 Lectures)
	Using Shell Interface:
	<ul> <li>Introduction to Linux</li> </ul>
	<ul> <li>Internal and external commands</li> </ul>
	<ul> <li>General purpose utilities</li> </ul>
	<ul> <li>Navigating the file system</li> </ul>
	<ul> <li>Handling ordinary files</li> </ul>
	Using GUI Environments:
	<ul> <li>GNOME desktop environment</li> </ul>
	KDE desktop environment
2	Using open source office suite (8 Lectures)
	<ul> <li>Word processor application</li> </ul>
	<ul> <li>Spreadsheet application</li> </ul>
	<ul> <li>Presentation application</li> </ul>
	<ul> <li>Desktop database application</li> </ul>
	Using the Internet
	<ul> <li>World wide web</li> </ul>
	• FTP
	■ Telnet
	Using Multimedia
	<ul> <li>Graphics</li> </ul>
	<ul> <li>AudioVideo</li> </ul>
3	Introduction to shell (8 Lectures)
	<ul><li>Introduction to 'bash' shell</li></ul>
	<ul><li>Redirection</li></ul>
	■ Pipes
	■ Tees
	<ul> <li>Command substitution</li> </ul>
	<ul> <li>Introduction to other shells: Korn shell, C Shell etc.</li> </ul>
	Shell environment
	<ul> <li>Shell variables</li> </ul>
	<ul> <li>Handling the command line arguments</li> </ul>

	<ul> <li>Login scripts</li> </ul>
	<ul> <li>Terminal characteristics</li> </ul>
	<ul><li>Aliases</li></ul>
	Text editors
	'vi' editor, 'emacs' editor
4	Shell commands (5 Lectures)
7	General purpose utilities
	File management
	<ul> <li>Process management</li> </ul>
	<ul> <li>Communication management</li> </ul>
	Regular expressions
	Pattern matching
	• Wild cards
	<ul> <li>Regular expressions</li> </ul>
	<ul> <li>Utilities: grep, egrep, fgrep etc.</li> </ul>
	Filters
	<ul><li>Introduction to filters</li></ul>
	Utilities: pr, head, tail, cut, paste, sort, uniq, nl, tr etc.
5	Shell scripting (6 Lectures)
	<ul> <li>Introduction to shell scripting</li> </ul>
	<ul> <li>Programming constructs</li> </ul>
	Mathematical operators
	<ul> <li>Logical operators</li> </ul>
	String manipulation
	<ul> <li>Interactive scripts</li> </ul>
	Handling command line arguments
6	Understanding system administration (6 Lectures)
	<ul> <li>Introduction to the routine activities in system administration</li> </ul>
	<ul> <li>Shell commands for system administration</li> </ul>
	<ul> <li>Administrative tools</li> </ul>
	Managing file systems and disk space
7	Setting up and supporting users (8 Lectures)
	<ul> <li>Managing user accounts</li> </ul>
	<ul> <li>Providing support to the users</li> </ul>
	Automating system tasks:
	<ul> <li>Aut System initialization</li> </ul>
	<ul> <li>System startup and shutdown</li> </ul>
	<ul> <li>Scheduling system tasks omating system tasks:</li> </ul>
	Backing up and restoring files:
	<ul> <li>Backup and restore strategy</li> </ul>
	<ul> <li>Backup and restore tools</li> </ul>
	Computer security issues:
	<ul> <li>Password protection</li> </ul>
	FirewallsImplement one small project
Text Books	Textbook:
	<ul> <li>Red Hat Linux Bible: Fedora and Enterprise Edition - by</li> </ul>
	Christopher Negus

Reference Books	UNIX Concepts and Applications - by Sumitabha Das
MOOC on NPTEL	

## **ELECTIVE GROUP (03): LINUX**

Subject Name	(03)B -Linux
Subject Name	Linux Internals and Network Administration
No. of Credits	3
Pre Requisite	Basics of Operating System
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Remembering Linux Internal and Network Management commands
	Understanding of Linux operating system and Network administration.
Understanding	
Applying	Creating Proxy, server, File server, web server
Analyzing	Analyzing inter process communication
Evaluating	Performance of different servers
Creating	Use of Linux administration for creation of server and management
Unit	Contents
1	Setup And Manage a Local Area Network (8 Lectures)
	Basic Networking, Introduction to networking, OSI Model, IP addressing
	(IPV4, IPV6) & LAN establishment with Linux, Configuring internet in
	Linux through broadband, dial-up, data card & through mobile (gprs).
	Setup And Manage Proxy Server :
	Basics of proxy services, Configuring proxy services, Creating ACL's for
	controlling access to internet, SQUID: Proxy server setup, Blocking
	Websites, content filtering, Bandwidth Management
2	Setup And Manage FILE Server (8 Lectures)
	NFS: network file sharing & resource sharing across Linux environment.
	YUM server: Setting up local YUM, FTP YUM, HTTP YUM, EPEL,
	REMI &RPMForge like YUM configuration, DHCP:Dynamic Host
	Configuration Protocol setting up, Allocating IP, Subnet mask, default
	gateway and hostname, communication with DNS and other protocols.
	Setup And Manage FTP Server
3	Setup And Manage Web Server (8 Lectures)
	Basics of Web Services, Introduction to Apache, Configuring Apache for
	main site, Configuring Apache for multiple sites using IP-based, port
	based and name-based, Web Server: Apache installation, configuring
	dedicated server, shared server, user based authentication, load balancing
	and apache tuning. NIS, LDAP: (user's liberty to sit into remote machine)
	MAIL Server: knowing MUA,MTA& MDA, setting up and configuring
	POSTFIX,PO3s v/sIMAPs, Squirrel mail, accessing via Outlook,
	Thunderbird and evolution. Multi/virtual domain management, email
	security. Postfix Administration.
4	Setup And Manage boot Server (5 Lectures)
	What is booting and boot process of Linux?, Init Process or Run levels
	Setup And Manage DNS Server :
	Basics of Internet, Basics of DNS and BIND 9, Configuring DNS primary
	server, DNS:master DNS, slave DNS with forward & reverse zone, one
	DNS resolving multiple domain, dynamic DNS etc
5	(6 Lectures)
	Architecture of Linux, User and Kernel Space, Introduction to System
	1 /

	Calls, System Calls in Detail, trace – Tracing system calls.
	Process management
	Introduction to Process and process attributes, process vs. Program,
	Process States, Creating Process, Process termination, process commands
	Special case of processes.
	Inter Process Communication
	Introduction to IPC, Pipe, FIFO, Shared Memory, Advantages and
	Disadvantages of various IPC mechanisms, Application of IPC
6	Working with Signals and Threads (6 Lectures)
	Thread and Process Synchronization
	Threads and resources management, Race condition in multi-threaded
	applications, writing thread safe code, Mutex, POSIX Semaphores, Usage
	of Binary semaphores and Mutex
	Race condition in multi-process applications, Limitations of shared
	memory, Semaphore Implementation
7	Linux Networking (8 Lectures)
	OSI and TCP/IP models, Addressing in TCP/IP, IPv4 and IPv6
	differences, TCP three-way handshake, Network packet analysis in
	Linux, Networking commands in Linux, Using socket API to implement
	client server communication, Working with TCP and UDP sockets,
	Synchronous I/O
Text Books	
	1. Linux Administration : A Beginner's Guide, Shah, TMH
	2.LINUX: The Complete Reference, Petersen, TMH
	3.LINUX Network Administrator's Guide, Kirch, SPD/O'REILLY
MOOC on NPTEL	https://nptel.ac.in/courses/106/105/106105166/

## **ELECTIVE GROUP (04):OPEN SOURCE TECHNOLOGIES**

Subject N	lame	(04) A. Perl Scripting
No. of Credits		3 Credits
Pre Requ	isite	
Course O	bjectives	Course Objective :
		• To introduce basic concepts of Perl Programming and write, modify,
		and run simple Perl scripts and study working with files and using perl
		as an object oriented language
Cognitive	Abilities	Course Outcome as per Blooms Taxonomy
Remembe	ering	Using some basic concepts of Perl scripting terminology for development
		of applications for organization.
Understa	nding	By remembering students will understand concepts of perl language and
		how to develop and implement various types of programs as per need of
		organization
Applying		Students will Have thorough knowledge about programming of Perl.
Analyzing	g 5	Students will acquire a good knowledge of programming with perl.
		Student will be able to pursue his study in object oriented concepts also
		using perl.
Evaluatin	ıg	Ability to select proper programming concept to design applications to
		solve real world problem.
Creating		Design and create ir own applications using procedures, functions, file
D 0	(D. 1	handling & OOP objects.
		Websites etc):
	_	rl : Brian, O'Reilly
• WV	ww.tutorial	spoint.com/perl/index.htm
Suggested	MOOC:	
Swayam		
		Course Plan
Unit	Conten	ts
1	Perl - 1	Introduction
	What is	s Perl? Perl features, Perl – Syntax Overview, Perl – Data Types, Numeric
	Literals	String Literals, Perl – Variables, Creating Variables, Perl – Scalars,
	Scalar C	Operations, Perl — Arrays Perl — Hashes
2	Control	I Flow and Looping Statement
	if staten	nent, if else statement, if elsif else statement, unless statement, switch
	statemen	nt, ?: Operator
	Perl — l	<b>Loops</b> : while loop, until loop, for loop, For each loop do while loop
	nested le	oops, next statement, last statement, continue statement, redo statement, go
	to stater	ment, Infinite Loop
3 <b>Perl – O</b>		Operators
	What is	an Operator? Perl Arithmetic Operators, Perl Equality Operators, Perl
	_	nent Operators, Perl Bitwise Operators, Perl Logical Operators, Quote-like
•		rs, Perl – Date and Time, GMT Time Format, Date & Time, Epoch time,

	POSIX Function strftime()
4	Perl — Subroutines  Define and Call a Subroutine, Passing Arguments to a Subroutine, Passing Lists to Subroutines, Passing Hashes to Subroutines, Returning Value from a Subroutine, Private Variables in a Subroutine, Temporary Values via local(), State Variables via state() Subroutine, Call Context  Perl — References: Create References Dereferencing Circular References, References to Functions  Perl — Formats Define a Format Using Format, Define a Report Header Number of Linear and Paragraphy Paragraphy States and Magnetical Expertises.
5	Lines on a Page, Define a Report Footer, String and Mamatical Functions  Perl — File I/O  Opening and Closing Files, Open Function, Sysopen Function, Close Function, Operator getc Function, read Function, print Function, Copying Files Renaming a file, Deleting an Existing File Positioning inside a File Perl — Directories: Display all Files, Create new Directory, Remove a directory, Change a Directory
6	Perl — Regular Expressions Pattern Matching, Match Operator Match Operator Modifiers Matching Only Once Regular Expression Variables. Substitution Operator Substitution Operator Modifiers. Translation Operator Translation Operator Modifiers More Complex Regular Expressions Matching Boundaries Selecting Alternatives Grouping Matching. \G Assertion Regular-expression Examples
7	Introduction to Object Oriented Programming in Perl Object Basics, Defining a Class Creating and Using Objects, Defining Methods, Inheritance Method Overriding, Default Auto loading, Destructors and Garbage Collection, Object Oriented Perl Example

Subject N	ame	(04)B- Ruby
No. of Cre	edits	3 Credits
Pre Requi		
Course O	bjectives	Course Objective :
		• Main objective of this paper is to learn, object-oriented programming with
		Ruby, Rails fundamentals and how to create basic online applications. How to
		work with HTML controls, use models in Rails applications, and work with
		sessions. Details on working with databases and creating, editing and deleting
		database records, Methods for handling cookies and filters and for caching
~		pages.
Cognitive		Course Outcome as per Blooms Taxonomy
Remembe	ering	Using some basic concepts of Ruby scripting for development of applications for organization .
Understar	nding	By remembering students will understand concepts of ruby rails and how to
		develop and implement various types of programs as per need of organization
Applying		Students will Have thorough knowledge about object-oriented programming with
		Ruby.
Analyzing	5	Students will acquire a good knowledge of programming with HTML controls,
		use models in Rails applications, and work with sessions.
		Student will be able to pursue his study in object oriented concepts for online
Evaluation	~	application development
Evaluating	g	Ability to select proper programming concept to design applications to solve real world problem.
Creating		Design and create ir own applications using OOP objects & rails application
Creating		developement.

Suggested		
SWAYAN		
	Contents	3
1	Introduc	tion to Ruby
		a first web application, getting started with Ruby, Checking ruby documentation,
	working	with numbers in ruby, working with strings in ruby.
2	Variable	s and Constants in Ruby
	Storing d	ata in variables, creating constants, interpolating variables in Double-Quoted
	strings, re	eading text on command line, creating symbols in ruby, working with operators,
	_	operator precedence, working with Arrays, using Two Array Indices, working
	with Hasl	hes, working with ranges.

3	Conditional Loops, Methods and Blocks If Statement, Using case statement, using loops, creating and calling a method, making use of Scope, working with Blocks
4	Classes: creating a class, creating an object Data Encapsulation, Data Abstraction, Polymorphism, Inheritance
5	Objects Understanding Ruby's object Access, overriding method, creating class variables, creating class methods, creating Modules, creating Mixins
6	Rails Putting Ruby to Rails, introducing Model View Controller Architecture, giving view something to do, mixing ruby code and HTML inside view, passing data from an action to a view, escaping sensitive text, adding a second action.
7	Building Simple Rails Applications Accessing data user provides, using rails shortcuts for HTML controls, working with models, tying controls to models, initializing data in controls, storing data in sessions

## **ELECTIVE GROUP (05): MOBILE COMPUTING**

Subject Name	(05) A- JavaScript Programming
No. of Credits	3 Credits
Pre Requisite	Basic Knowledge about website development.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of programming be understood and remembered.
Understanding	By remembering students the basing concepts students will understand
A manifestar or	the concepts of programming structure
Applying	Students willHave thorough knowledge about website working
Analyzing	To study the form elements and its working
Evaluating	Ability to select proper functionality of a page and form.
Creating	Design and create their own websites with proper validation
Unit	Contents
1	Introduction to Javascript (5 Lectures)
	JavaScript Overview , JavaScript Programming Basics, Variables and
	Operators: Variables and Data Types, Operators, Array
2	Control Statements (5 Lectures)
	Controlling the Flow: JavaScript Control Statements, <b>Functions</b> :
	Parameters and working, <b>The Window Object</b> : The Window Object,
	Dialog Boxes ,Window function
3	The Document Object (4 Lectures)
	The Document Object, Writing to Documents, Document related
	functions Forms and Forms-based Data: The Form Object, Working
	with Form Elements and Their Properties ,Event related with form
4	Form Validation (4 Lectures)
	A Process, Testing Data, Preparing Data for Validation and Reporting
	Results, Validating Non-text Form.
5	Frames: (6 Lectures)
	HTML Frames Review, Scripting for Frames  The String and RegErroChicata The String Chicata Proportion and
	<b>The String and RegExpObjects</b> : The String Object, Properties and methods of String Object, Using String Object Methods to Correct Data
	Entry Errors, The RegExp Object
	<b>Dates and Math:</b> The Date Object, Properties and methods of Date
	Object, The Math Object, Properties and methods of Math Object
6	AJAX (8 Lectures)
	Animation: Frequently used Animation function, Manual and
	Automated animation. <b>AJAX</b> : Introduction to AJAX, Interacting with
	the Web Server using XMLHttpRequest Object, Need of Web server
7	JS Frameworks & Libraries (8 Lectures)
	Need of JSON, RESTful API with JSON, jQuery, Intro, Effects and

	animations DOM/HTML Updates,jQuery and Ajax
Reference Books	1.JavaScript and JQuery: Interactive Front-End Web Development, by
	Jon Duckett
	2.JavaScript: The Definitive Guide, by David Flanagan
	3.Learn JavaScript VISUALLY, by IvelinDemirov

## **ELECTIVE GROUP (05): MOBILE COMPUTING**

Subject Name	(05)B - Android
<b>N</b> 60 34	
No. of Credits	3 Credits (2 Lectures + 1 Tutorial)
Pre Requisite	Basic Knowledge about Java language
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of programming with GUI.
Understanding	By remembering students the basing concepts students will understand
	the concepts of program structure with layout
Applying	Students willHave thorough knowledge how programming affects on
	layout, output design.
Analyzing	To see various parts of design and its elements
Evaluating	Ability to create effective layout.
Creating	Design and create their own screen with proper view.
Unit	Contents
1	Introduction to Android (5 Lectures)
-	Evolution of Android ,Advantages of Android, SDK Tools for
	Android
	Overview of Android Platform :
	Android Development IDE Understand the Working of Android, The
	Android Application Framework, Screen Layout Design, User
	Interface Design, Introduction to Graphics and Animation Design,
	Interactivity, Introduction to Content Providers, Intent and Intent
	Filters
2	Android Development Environment (8 Lectures)
	<b>Setting up the Android Development Environment :</b> Installing
	Android Development Environment, Updating the Android SDK
	Setting up AVDs and Smartphone Connections
	Introduction to the Android Software Development Platform :
	Understanding Java SE and Dalvik Machine, The Directory Structure
	of an Android Project, Android XML, Android Application Resources
	,Launching an Android Application, Creating first Hello Application
3	Overview of Android Framework (7 Lectures)
	Overview of Object Oriented Programming, Overview of XML
	The Anatomy of an Android Application, Components of an Android
	Application, Android Intent Objects, Android Manifest XML
4	Screen Layout Design (7 Lectures)
	Android View Hierarchies, Activity Lifecycle, Defining Screen
	Layouts (Screen size, pixel density)
	User Interface Design:
	Using Common UI Elements, Using Menus in Android,
	Adding Dialogs(Date picker, Time picker, Custom Dialog, Alert

	Dialog
5	Introduction to Graphics Resources (7 Lectures)
	Introduction to Drawables, Using Bitmap Images, Using Transitions,
	Creating 9-Patch Custom Scalable Images, Playing Video in Android
	Apps
	Handling User Interface Events: An Overview of UI Events,
	Handling on Click Events for all Views, Android Touch-screen Events:
	onTouch
	Touch-screen's Right-Click Equivalent: onLongClick, Keyboard Event
	Listeners: onKeyUp, onKeyDown, Context Menus:
	onCreateContextMenu, Controlling the Focus
6	(8 Lectures)
	<b>Understanding Content Providers:</b> An Overview of Android Content
	Providers, defining a Content Provider, Working with a Database
	<b>Intents and Intent Filters :</b> Understanding the Intents, Android Intent
	Messaging via Intent Objects, Intent Resolution, Using Intents with
	Activities, Android Services, Using Intents with Broadcast Receivers
7	Bars and Views (8 Lectures)
	Action Bar, Toolbar, Navigation Drawer, TextView, EditView, Button,
	WebView, ImageView ,ListViewetc
Reference Books	1.Android Application Development All-in-One For Dummies- Barry
	A. Burd
	2.Android Programming: The Big Nerd Ranch Guide
	Programming Android:
	3. Java Programming for the New Generation of Mobile Devices-
	Authors: Zigurd R. Mednieks, Laird Dornin, G. Blake Meike, Masumi
	Nakamura

# **ELECTIVE GROUP (06): DOT NET TECHNOLOGIES**

Subject Name:	(06) A- C# Programming and Applications
No. of Credits:	3 Credits ( 2 Lectures + 1 Tutorial)
Pre Requisite:	Basic Knowledge of Object-Oriented Programming, Event Driven Programming was and Database Applications.
Cognitive Abilities:	Course Outcome as per Blooms Taxonomy
Remembering:	Using basic concepts of object-oriented programming, event driven programming and database application programming in C# can be understood and remembered.
Understanding	By remembering basic concepts students can understand how to work with programming in C#. Students need to understand programming structures of OOP in C#. Needs to understand methods and properties of various controls of windows forms application along with database objects and their methods.
Applying:	Students will have detailed knowledge of Abstraction, Inheritance, Polymorphism, Encapsulation, Exception Handling, Windows forms applications and database applications
Evaluating:	Students will have ability to use proper methods of C# to solve object oriented problems.
Creating	Students can apply the concepts of C# programming to create console based and windows based applications.
Syllabus:	Unit 1: Introduction to C#: (7 Lectures)  Programming Features of C#: Kaywards in C#: Namespaces, Data Types
	Programming Features of C#, Keywords in C#, Namespaces, Data Types, Variables, Operators, Type Conversions, The '?:' Operator, Control Statements.  Methods, Passing Method Parameters, Method Overloading, Array, ArrayList class, String Methods, foreach loop.
	Unit 2: Classes and Objects: (7 Lectures) Basic Principles of OOP, Define a Class, Member Access Modifiers, Constructors, Types of Constructors (Default Constructor, Overloaded Constructor, Static Constructor, Private Constructor and Copy Constructor), Destructors, 'this' Reference, Constant Members, Properties, Auto Implemented Properties, Object Initializer, Collection Initializer, Anonymous Types, Extension Methods, Partial Class, Partial Methods, Indexers.

	Unit 3: Inheritance and Polymorphism: (8 Lectures)
	Define Inheritance, Types of Inheritance, Method Overriding, Abstract Class, Abstract Methods, Sealed Class and Methods,
	Define Polymorphism, Static Polymorphism: Function Overloading Operator
	Overloading, Overloadable and Nonoverloadable Operators, Dynamic
	Polymorphism, Defining Interface, Extending interface, Interface and
	Inheritance, Explicit Interface.
	Unit 4: Errors and Exception Handling: (7 Lectures)
	Types of Errors, Exceptions, Syntax for Exceptions Handling Code, Multiple
	catch Statements, finally Statement, Nested try Block, Throwing Our Own
	Exception.  Unit 5: Working with Windows Form Controls: (7 Lectures)
	Properties, Events and Examples of:
	Button, Label, LinkLabel, TextBox, RichTextBox, ListBox, ListView,
	ComboBox, RadioButton, CheckBox, CheckedListBox, DateTimePicker,
	PictureBox, Timer, ProgressBar, TrackBar, HScrollBar, VScrollBar.
	Unit 6: Menus, MDI and Containers: (7 Lectures)
	ContextMenuStrip, MenuStrip, StatusStrip, ToolStrip, SDI and MDI, Visual
	Inheritance, GroupBox, Panel, TreeView, SplitContainer, TabControl Example.
	Unit 7: Data Access and Data Bindings: (7 Lectures)
	ADO.NET Overview, .NET Data Providers, ADO.Net Objects, Connections,
	Commands, Data Adapters, Data Readers, Data Sets, Data Tables, Data
	Views, Data Bindings, Reports.

# **ELECTIVE GROUP (06): DOT NET TECHNOLOGIES**

Subject Name:	(06)B-ASP.Net with MVC
No. of Credits:	3 Credits
D D ::	
Pre Requisite:	Basic Knowledge of Website Development, JavaScript, Validations, State
	Management etc
Cognitive Abilities:	Course Outcome as per Blooms Taxonomy
Remembering:	Using basic concepts of website development, methods and properties
	ASP. Net in C# can be understood and remembered.
Understanding	By remembering basic concepts students can understand how to work with
	web designing in C#. Students need to understand methods and properties
	of various client and server side controls. Working of state management is
	also needs to understand.
Applying:	Students will have detailed knowledge of Website design and development,
	validation, state management, use of web parts and Ajax controls.
Evaluating:	, , , ,
	of C# to design modern web design.
Creating	Students can apply the concepts of C# programming for designing a
	programs for desktop or mobile, as well as web application.
Syllabus	Unit 1: Introduction to ASP.Net: (7)
	Introduction to ASP.Net, ASP.Net Architecture, ASP.Net Page Life Cycle,
	Page Life Cycle Events, ASP.Net Directives., FileUpload Control,
	Calendar Control, AdRotator Control, MultiView Control, and Wizard
	Control Examples, Validation Controls, Menu, SiteMapPath, TreeView
	Control.
	Unit 2: Master Pages, CSS, and JavaScript: (8 Lectures)
	Working With Master Pages, Nested Master Pages, CSS Overview,
	Adding Style Sheets into, Web Pages, Editing Styles, Applying Styles to
	Master Pages, Applying Styles to Web Page, JavaScript Overview, Adding
	JavaScript files into ASP.Net, Editing JavaScript Files, Applying
	JavaScripts to Master Pages, Applying JavaScripts to WebPage.
	Unit 3: State Management: (7 Lectures)
	View State, Hidden Field, Session State, Application State, QueryString,

	HttpContext, Cookies, Caching, Types of Caching.
	Unit 4: Data Access in ASP.Net: (7 Lectures)
	Data Source Controls, DataList, DataPager, GridView, DetailsView, FormView, Object Data Sources, ListView, DataPager, Repeater.
	Unit 5: ASP. Net Web Parts: (7 Lectures)
	Introduction, Advantages of Web Parts, WebPartsManager, CatalogPart,
	PageCatalogPart, EditorPart, WebPartZone,, EditorZone, CatalogZone
	Controls.
	Unit 6 :Ajax Controls: (7 Lectures)
	AJAX control toolkit, Building a ASP.NET Page with AjaxScriptManager
	Control, UpdatePanel Control, UpdateProgress Control, Timer Control
	Unit 7: Working with MVC: (7 Lectures)
	Introduction to .Net MVC Framework, MVC Framework Features, MVC
	Architecture, MVC Components, MVC Application Folders, Configuration
	files- global.asax, packages.config, web.config, Working with Views,
Reference Books:	Woking with Controls.

	4) edX ( <u>www.edx.org</u> )
	5) Mooc List (www.mooc-list.com)

# **ELECTIVE GROUP (07): NET CENTRIC TECHNOLOGIES**

Subject Name	(07)-A HTML 5.0
No. of Credits	3 Credits
Pre Requisite	Basic concepts of Languages and HTML tags with functions.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Understand the Concepts of HTML 5 & the Applications of HTML 5 to
	WebsiteDevelopment.
	The state of the s
Understanding	By remembering students the basic concepts of HTML and the
	applications of advanced features of HTML 5. 0 for web development.
Applying	Students will Have thorough knowledge about practical approach in
	designing website for various business applications
Analyzing	To Measure the knowledge about website development and practical
, 6	applications of advanced features to the web applications
Evaluating	Ability to select proper method to use better tools for website
8	development using HTML 5.0 features and apply security measures to the
	websites also use useful functions of HTML 5.0
Creating	Design and Develop Websites for various BusinessApplications. Check
J	information inputted into a Database and validateit.
Syllabus	Unit-1 Introduction to HTML: (7 Lectures)
	MIME Types, Standards for the Internet, Evolution of HTML,
	Introduction to XHTML, Introduction
	to Working Group, W3C
	Unit-2 Features of HTML5: (6 Lectures)
	Detection of HTML5 Support, Modernizr: An HTML5 Detection Library, Canvas, Canvas, Text, Video, Video Formats, Local Storage,
	Web Workers, Offline Web Applications, Geolocation, Input Types,
	Placeholder Text, Form Autofocus, Microdata
	Unit-3 Elements of HTML5: (7 Lectures)
	The Doctype, The Root Element, The <head> Element, New Semantic</head>
	Elements in HTML5, Handling
	of Unknown Elements by the Browsers, Headers, Articles, Dates and
	Times, Navigation, Footers
	Unit-4:Drawing Surface: (7 Lectures) Introduction to Canvas, Simple Shapes, Canvas Coordinates, Paths,
	Text, Gradients, Images
	Unit-5: Video on the web (6 Lectures)
	Video Containers, Video Codecs, Audio Codecs
	Unit-6 :Geolocation and Local Storage for Web Applications (7
	Lectures)
	Geolocation API, Handling Errors, geo.js Library, Evolution of Local
	Storage, Introduction to HTML5 Storage
	Unit-7: Web Forms and Offline Web Application (6 Lectures)
	Introduction to Web Forms, Placeholder Text, Autofocus Field, e-Mail,
	Addresses, Web Addresses, Numbers as Spinboxes, Numbers as Sliders,
	Date Pickers, Search Boxes, Color Pickers, Introduction to Offline Web
	application, The CacheManifest

## **ELECTIVE GROUP (07): NET CENTRIC TECHNOLOGIES**

Subject Name	(07) B - AJAX PROGRAMMING
No. of Credits	3 Credits
Pre Requisite	Basic concepts of Languages and HTML tags with functions.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Understand the Concepts of Basic Programming skills and how to use
	AJAX Programming for software development.
Understanding	Understand the Concepts of AJAX Programming & the Applications of
	AJAX to WebsiteDevelopment. Design and Develop Websites for
	various Business Applications using AJAXProgramming. Check information and handle database inwebsites
Applying	Students will Have thorough knowledge about practical approach in
Applying	AJAX rogramming language for Software development.
Analyzing	Computer programming detail knowledge, An intermediate knowledge
Timely Zing	on Programming Languages and its structure for developing professional
	web applications for business organizations.
Evaluating	Ability to select proper method to use better tools for website
	development using AJAX programming language. Use maximum
	features of AJAX language and know the details about security features
	of the language.
Creating	Design and Develop Web applications or web sites for various
	BusinessApplications.
Syllabus –	Unit-1 Introduction to AJAX (6 Lectures)
	Introduction to Web Architecture, Traditional Web Communication
	Processes and Technologies, Introduction to AJAX
	Unit-2 Interacting with the Web Server using XMLHttpRequest
	Object: (7 Lectures)
	Introduction to Interaction with Web Server, Create an
	XMLHttpRequest Object, Interact with the Web Server
	Unit-3: Working with PHP and AJAX: (6 Lectures)
	Introduction to PHP, Process Client Requests, Accessing Files Using
	PHP
	Unit-4 Manipulating XML Data: (7 Lectures)
	Basics of XML, Create an XML Document Using DOM, Retrieve
	Data from XML
	Unit-5: Working with XSLT and AJAX: (7 Lectures)
	Basics of XSLT, Transform Responses Using XSLT
	Unit-6: Working with JSON: (6 Lectures)
	Introduction to JSON Format, Create Data in JSON Format, Implement
	JSON on the Server Side scripting.
	Unit-7: Using Frameworks in AJAX: (6 Lectures)

	Understand AJAX Frameworks, Use Prototype and Script.aculo.us, Use jQuery
	Applying Basic AJAX Techniques
	Download Images Using AJAX, Auto-Populate Select Boxes
	Implementing Security and Accessibility in AJAX Applications Create Secure AJAX Applications, Create Accessible Rich Internet Applications

# **ELECTIVE GROUP (08): INFORMATION SYSTEMS**

Subject Name	(08) A -Recommender System
No. of Credits	3 Credits
Pre Requisite	Basic Knowledge about Relational Database Management system and
•	Software Development, Knowledge about Business Organizations and
	its functions, Theory of Recommender Systems and Decision Making
	process.
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of software databases, development stages
	and software development also software engineering Information can be
	understood and remembered.
Understanding	By remembering students the basing concepts students will understand
Chacistanang	the concepts of Recommender system, Internet and database concepts.
Applying	Students will Have thorough knowledge about practical approach in
rippiying	database design and design the recommender systems for business
	applications
Analyzing	To Measure the Information systems applications with respect to
Anaryzing	business benefits . reduce the risk of decision making
Evaluating	Ability to select proper method to use proper recommender system for
Lyanuaning	business applications and make it useful for business functions.
Creating	Design and create own recommender system as per the requirements of
Creating	the business and functions of the business After going through this
	course a student should be able to understand:
	Will be able to understand the concepts of Decision  Making Process
	MakingProcess.  Can be able to design and develop Recommender for
	<ul> <li>Can be able to design and develop Recommender for Businessapplications.</li> </ul>
	Implementation of Recommender System for various areas of Interest in
	Business Organizations.
Unit No	
	Syllabus contents :Introduction to Basic Concepts:
1	Collaborative Recommendation: User Based Nearest Neighbor
	recommendation, Item Based Nearest Neighbor recommendation, model
	based and pre-processing based approaches. Recent practical approaches
	and systems.
	Content based Recommendation: content representation and content
	similarity, similarity based retrieval, other text classification methods,
	Knowledge Based Recommendation: Knowledge representation and
	reasoning, interacting with constraint based recommenders, interacting
	with case based recommenders,
2	:Hybrid recommendation approaches:
<b>—</b>	Opportunities for hybridization, Monolithic hybridization design,
	parallelized hybridization design, pipelined hybridization design,
3	:Evaluating recommender systems :
3	General properties of Evaluation research, popular evaluation designs,
	evaluation on historical datasets, alternate evaluation designs,
4	: Recent developments:
	1 Account de l'élophieires

	Attacks on collaborative recommender systems, Online consumer
	decision making
5	: Recommender systems and the next-generation web
	Recommendations in ubiquitous environments.
6	: Explanations in recommender systems
	Explanations in constraint-based recommenders, explanation in case
	based recommenders, explanation in collaborative filtering
	recommenders.
7	:Case studies on Recommender System for various Business applications

## **ELECTIVE GROUP (08): INFORMATION SYSTEMS**

Subject Name	(08) B -Knowledge Management
No. of Credits	3 Credits
Pre Requisite	Knowledge about Information System and MIS with Implementation of
	MIS
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Using some basic concepts of software development, information system
	and applications of databases o business problems The objective of the
	course is to provide the basic skills of managing knowledge in
	organizations. Knowledge is an asset for retaining the competitive
	advantage of the organization. This course develops the capabilities of
	towards managing students to manage knowledge in organizations.
Understanding	By remembering students the basic concepts of Knowledge management
	students will understand the concepts of applications of knowledge
	management to the business problems.
Applying	Students will Have thorough knowledge about practical approach in
	designing knowledge management systems for business functions and
	apply the various advanced tools of software development.
Analyzing	To Measure the knowledge management applications with respect to
	business benefits . reduce the risk of decision making
Evaluating	Ability to select proper method to use proper knowledge management
	system for business applications and make it useful for business
	functions.
Creating	Design and create own knowledge management After going through this
	course a student should be able to understand:
	Will be able to understand the concepts of Knowledge and knowledge
	management. Can be able to design and develop Knowledge management
	systems for Business applications. Implementation of KM to various
	areas of Interest in Business Organizations.
Unit No	Cyllohyo
1.	Syllabus Introduction:
1.	Definition, Scope and Significance of Knowledge Management,
	Difficulties of Knowledge Management, Techniques of KM –
	Implementation of KM, Organizational knowledge, Characteristics and
	Components of Organizational Knowledge
2.	Drivers of knowledge Management
<b>∠</b>	Pillars of knowledge Management, KM framework, Supply Chain of
	KM, Formulation of KMstrategy.
3.	Technology and KM:
	Technology and KW.  Technology components of KM – IT &KM, Ecommerce and KM
4.	Total Quality Management and KM:
	TQM and KM, Bench marking and KM.
	1 QIVI and KIVI, Denoil marking and KIVI.

5.	Implementation of KM:
	Discussion on Roadblocks to success, Implementing a KM programme,
	Critical Success Factors in KM, Implementation of KM
6.	KM and Organizational Restructuring:
	The Mystique of Learning, Organization:- Outcomes of learning,
	Learning and Change – Innovation, continuous Improvements, Corporate
	Transformation.
7.	Case studies in Knowledge Management
	Knowledge management in Health Care, Knowledge Management in
	Human Resource Management and other areas of Business Applications.
Text Books	1. "Innovation Management A Business Development Approach -
	Anil Gaikwad, Rajesh Kanthe –Lambert Academic Publication Dec
	2019.
	2. Honey Cutt: "Knowledge Management Strategies", PHI, NewDelhi.
Reference Books	References (Books, Websites etc.):
	1Madhukar Shukla:Competing Through Knowledge-Building a learning
	Organization (Response Books, NewDelhi.
	2.Awad, KM, Pearson Edn,2007.
	3. Barnes, Knowledge Management Systems, 1/e, Thomson2006.
	IkudiroNonka&Hirotaka Takeuchi, "The Knowledge – Creating
	Company", Oxford University Press, London.
	4. Anil Gaikwad, JyotiBiradar (Patil) Software Project Management

## **ELECTIVE GROUP (09): IOT**

Subject Name	(09) A - IoT Architecture Sensors and Fundamentals with Hands-
Subject Manie	on lab
No. of Credits	3
Pre Requisite	School Level Mathematics. Basics of Programming and Networking
Cognitive Abilities	Course Outcome as per Blooms Taxonomy
Remembering	Learning the concepts of IOT, Networking for IOT, Type of Sensor
0	Network, Arduino Programming
Understanding	IOT Standards, connecting Technologies, Machine to Machine
	Communication
Applying	Implementing IOT with Arduino
Analyzing	Find the usability of IOT in various applications
Evaluating	Evaluate the performance of IOT solution and upgradation
Creating	Creating small applications for smart home/city using Arduino
Unit No	Syllabus content
1.	IOT concepts:
	Technologies that led to evolution of IOT
	IOT and SCADA
	• IOT and M2M
	IOT and Big Data
	Relevance of IOT for the future
	IOT in everyday life
	Internet of Everything
	IOT and Individual Privacy.
	Sensing, Actuation, Basics of Networking: layered architecture, important protocols (MQTT, CoAP, REST, XMPP, AMQP)
2.	IOT Standards :
	Requirement of international standard ( case study)
	IOT standards in practice.
	Operating platforms /systems
	connectivity Technologies: 802.15.4, Zigbee, 6LoWPANs, RFID,
	HART, Bluetooth, ZWAVE, ISA 100.11-A
3.	<b>Sensor Networks:</b> components of sensor networks, deriving data from
	sensor nodes, different types of sensor networks and behavior of node
	in a sesor network, target tracking, wireless multimedia sensor
	network,nanonetworks, relationship between coverage and
	connectivity, stationary wireless sensor networks, mobile wireless
4.	sensor networks, UAV Networks  Machine to Machine Communications: exchanging data between
4.	Machine-to-Machine Communications: exchanging data between machines without human intervention, Low-end sensor nodes, mid-end
	sensor nodes, M2M ecosystem
5.	Interoperability in IoT, syntactic and semantic interoperability
J.	interoperating in 101, syntactic and semantic interoperating

	Introduction to Arduino Programming:
	Features of Arduino
	Arduino IDE
	Sketch Structure
	Arduino Function Libraries: Example : blink LED
	Operators, control statements, arrays, string, random number,
	interrupts
6.	Integration of Sensors and Actuators with Arduino:
	Sensor interface with Arduino, DTH Sensor Library,
	Type of Motor Actuators, integration of Actuator with Arduino
7.	IOT Applications:
	Lighting as a service ( case study)
	Intelligent Traffic systems ( case study)
	Smart Parking ( case study)
	Smart water management ( case study)
	Implement one small project
Text Books	• Daniel Minoli, "Building the Internet of Things with IPv6 and
	MIPv6: The Evolving World of M2M Communications", ISBN:

MOOC on NPTEL	https://nptel.ac.in/courses/106/105/106105166/

## **ELECTIVE GROUP (09): IOT**

Subject Name	(09) B - Internet Of Things: implementation with Python and
	Raspberry Pi
No. of Credits	3
Pre Requisite	School Level Mathematics. Basics of Programming and Networking
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Understand IoT sensors and technological challenges faced by IoT
	devices
Understanding	Understanding of IoT value chain structure (device, data cloud),
	application areas and technologies involved
Applying	Implementing IOT with Python and Raspberry Pi
Analyzing	Explore and learn about Internet of Things with the help of preparing
	projects designed for Raspberry Pi
Evaluating	Evaluate the performance of IOT solution and upgradation
Creating	Creating small applications for smart home/city using Python and
Cicating	Raspberry Pi
Unit No	Syllabus content
1.	Introduction to Python Programming: Pyton IDE (Spider,
1.	Anaconda), Data Types in Python, control statements, functions, file
	read/write operations, image read/write operations, Networking in
	Python,
2.	Introduction to Rasberry Pi:
2.	Basic architecture, installation, Rasberry Pi GPIO, OS setup, using
	GPIO pins, Taking Pictures using PiCam using Python on Rasberry Pi
3.	Implementation of IOT with Rasberry Pi, integration of sensors for
	data collection, dissemination of data for processing, visualization of
	data
4.	Software Defined Networking:
	Origin of SDN
	SDN Architecture
	Rule Placement
	OpenFlow Protocol
	APIs in SDN
	Controller Placement
	Integration of SDN with IoT
5.	
	Introduction,
	Service Model
	Service Management
	Sensor-cloud
	Fog Computing
6.	Smart Cites, Smart Homes, connected vehicles, Industrial IOT
7.	Data Handling and Analytics
	Implement one small project
6.	Cloud Computing: Introduction, Service Model Service Management Sensor-cloud Fog Computing Smart Cites, Smart Homes, connected vehicles, Industrial IOT Data Handling and Analytics

Text Books	Daniel Minoli, "Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications", ISBN: 978-1-118-47347-4, Willy Publications  William Madientic and Applications  Output  Delay (Statement of Things (Applications))
	• Vijay Madisetti and ArshdeepBahga, "Internet of Things (A Hands-onApproach)", 1 st Edition, VPT, 2014.

MOOC on NPTEL	https://nptel.ac.in/courses/106/105/106105166/

# **ELECTIVE GROUP (10): BIG DATA**

Subject Name	(10) A - Introduction to Big Data
No. of Credits	3 Credits
Pre Requisite	Preliminary knowledge of computer, Data Mining, Data Warehousing
1 Te Requisite	Concepts.
<b>Course Objectives</b>	To introduce learner with Big Data Concept, decision making by doing
Course Objectives	analysis on the data and managing the data using Big Data Concept like
	Business Intelligence Concept, decision making by Business Intelligence
	Tools on Applications such as Finance, Marketing, Education etc.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Remember the definitions of concepts of Big Data and Business
g	Intelligence Tools.
Understanding	• Understand the concept of Big Data and Business Intelligence Tools.
	<ul> <li>Understand decision making Theory and Strategies for Big Data.</li> </ul>
	Understand different Business Intelligence Applications.
	• Understanding the use of Business Intelligence for AI and Security.
Applying	Knowledge of Decision making using analysis on the Big Data
	Applying on different Big Data Applications in Industries
Analyzing	Identify and study the Big Data Analysis by Decision Theory and
	Strategy.
	User experience on Big Data and Business Intelligence Tools.
Evaluating	Applying Decision Making Theory on Big Data.
Creating	Case Studies: Knowledge about different applications used in
	industries.
	Using Business Intelligence in AI.
	Using Business Intelligence for Security
Unit No	Syllabus content
1	Introduction:
	Big Data History, The Big Data Business Opportunity- Business
	Transformation Imperative, Big Data Business Model, Business Impact of
	Big Data,
	Big Data In Organization: Data Analytics Lifecycle, Data Scientist
	Roles and Responsibilities – Discovery, Data Preparation, Model
	Planning, Model Building, Communicate Results, Operationalize, New
	Organizational Roles, Liberating Organizational Creativity.
2	.Decision Theory And Strategy:
	Business Intelligence Challenge, Big Data User Interface Ramifications,
	Human Challenge of Decision Making, Strategy for Decision Making-
	Big Data Strategy Document, Case Study. Value Creation Process:
	Understanding Big Data Value Creation, Michael Porter's Value
2	Creation Models: Michael Porter's Value Chain Analysis, Case Study.
3	Big Data User Experience: The Unitedligent Hear Experience, Understanding the Vey Decisions to
	The Unintelligent User Experience, Understanding the Key Decisions to
	Build a Relevant User Experience, Using Big Data Analytics to Improve
	Customer Engagement, Uncovering and Leveraging Customer Insights,

	D' D. D. N. C. L. ' D' D. H. C.
	Big Data can Power a New Customer Experience, Big Data Use Cases:
	1. Research Business Intiatives, 2. Acquire and Analyze your Data, 3.
	Brainstorm New Ideas, 4. Prioritize Big Data Use Cases, 5. Document
	Next Steps, The Prioritization Process.
4	Introduction To Business Intelligence Applications:
	Introduction to Big Data, Business Intelligence Data Mining, and Data
	Warehousing, What are Business Intelligence Applications (BIA).
	Features of BIA. Sales, Finance And Marketing: Introduction to Sales,
	Finance and Marketing Concept, Education And Learning: Introduction
	to Education System, Learning Concept.
5	Vertical AI Applications:
	Overview of AI, What is Vertical AI, Features of Vertical AI, Use of
	Business Intelligence in Vertical AI, Case Study.
6	Security:
	Define Security, Security in Big Data, Problems with Security, Business
	Intelligence for Security, Case Study.
7	Lifescience
	Introduction to Life Science, Life Science Intelligence, Features of Life
	Science Intelligence, Use of Life Science Intelligence in Decision
	Making, Case Study.
Text Books	
Reference Books	1. Big Data- Understanding How Big Data Power Big Business —By Bill
	Schmarzo
	2. Edureka lectures
	Link:-https://www.youtube.com/watch?v=A02SRdyoshM
	3. Business Intelligence Strategy -By John Boyer, Bill Frank, Brain
	Green, Tracy Harris
	Suggested MOOC: Please refer these websites for MOOCS:
	NPTEL / Swayam www. edx.com, www.coursera.com

## **ELECTIVE GROUP (10): BIG DATA**

Subject Name	(10) B -Business Intelligence Tools with HADOOP
No. of Credits	3 Credits
Pre Requisite	Preliminary knowledge of computer, Big Data Analysis and Business
Tre Kequisite	Intelligence.
<b>Course Objectives</b>	To introduce learner with Big Data Concept and HADOOP tool for
0	Business Intelligence. Using different Advance Excel Functions (like
	Optimization) and implementing it on Big Data for decision making. By
	solving Case Studies the students will get real example of using BI Tools
	in industry. It will also introduce learner with decision making by doing
	analysis on the data using HADOOP Tool and also managing the Big
	Data using HADOOP.
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Remember the concepts of Business Intelligence Tools and
	HADOOP.
Understanding	Understand the Excel Tools for Business Intelligence.
	Understand working with Macros.
	Understand HDSF, Mapping and Reducing in HADOOP
	Environment.
	Understanding the Clusters and Nodes in HADOOP Environment.
Applying	Knowledge of Decision making using analysis on the Big Data using
	Excel Tools.
	Knowledge of Decision making using HADOOP analysis on the Big
	Data
Analyzing	Applying the Excel Tools or Mapping and Reducing on Big Data.
	Implementing Environment Setup of HADOOP.
Evaluating	Applying HADOOP Environment for Analysis on Big Data.
Creating	Case Studies: for Big Data Analysis using Excel tools or HADOOP
	• Using features of Macros.
Unit No	Syllabus Contents
1	Introduction To Big Data and Business Intelligence
	Overview of - Data Mining, Data Warehousing, Big Data, How Business
	Intelligence is useful for Big Data, Big Data Problems.
	Introduction to BI, <b>Data Cleaning-</b> Editing a Workbook, Data Cleaning
	Using Text Functions, Using Validation To Keep Data Clean, Working
	with Multidimensional Data- Pivot Tables, Pivot Charts.
2	Applications Of Business Intelligence and Excel Tools
	CRM Domain, Banking Domain, Health Care Domain, Mobile Industry
	Domain, Creation of a New Product, Providing Personalized Services,
	Optimization Modeling With Solver: Introduction to MS-Excel and
	MS-Excel Formulas, Understanding Optimization Modeling, Setting Up a
	Solver Worksheet, Solving an Optimization Modeling Problem,  Pavianing the Solver Penerts, Working With Solver, Working With the
	Reviewing the Solver Reports, <b>Working With Solver:</b> Working With the
	Solver Options, Setting a Limit on Solver, Understanding the Solver Error

	Messages, Case Studies (Solver Problems).
3	Advance Excel Tools:
3	Using Shared Work Books- Sharing a workbook, Opening and editing a
	shared workbook, Tracking changes, Resolving conflict in a shared
	workbook, Multiple workbooks- Linking workbooks, Editing the Link,
	Consolidating the workbook.
4	Working With Macros:
	Introduction to Macros? Where are Macros, Features of Macros,
	Working with Macros- Display the developer Tab, Changing Macro
	security Settings, Recording and running a Macro.
5	Introduction To HADOOP:
	Hadoop Architecture, MapReduce, Hadoop Distributed File System, How
	Does Hadoop Work?, Advantages of Hadoop. <b>HDFS Overview:</b> Features
	of HDFS, HDFS Architecture, Starting HDFS, Listing Files in HDFS,
	Inserting Data into HDFS, Retrieving Data from HDFS, Shutting Down
	the HDFS.
6	MAPREDUCE:
	What is MapReduce?, The Algorithm for MapReduce, Inputs and Outputs
	(Java a Perspective), Analyze different use-cases where MapReduce is
	used, Differentiate between traditional way and MapReduce way.
	Introduction To Hadoop Features: New Big Data Architecture,
	Introducing HADOOP Features – Apache Hive, Apache HBase, Pig.
7	Multi Node Cluster:
	Multi Node Cluster, Install Java, Creating User Account, Mapping the
	Nodes, Installing Hadoop, Configuring Hadoop, Start Hadoop Services,
	Adding New Data Node in the Hadoop Cluster, Removing New Data
	Node from the Hadoop Cluster.
	<b>Environment Setup:</b> Pre-installation Setup, Installing Java Downloading
	Hadoop Hadoop Operation Modes Installing Hadoop in Standalone Mode
	Installing Hadoop in Pseudo Distributed Mode Verifying Hadoop
	Installation, Implement basic Hadoop commands on terminal.

# **ELECTIVE GROUP (11): CYBER SECURITY**

Title of the Course	(11) A -Introduction to Information Security
<b>Number of Credits</b>	3 Credits
Pre-Requisites	Information about computer hardware, system and application
	software, and networking
	Course Outcomes as per Bloom's Taxonomy
Remember	Concepts involved in information systems
Understand	Security concerns involving information systems
Apply	Understanding of concerns to improve information security
Analyze	Real-life scenarios with respect to information systems
Evaluate	Scenarios involving information systems and security concerns
Create	Information security awareness to address real-world scenarios
Unit No	Syllabus contents
1	Information Security Concepts  Confidentiality, Integrity and Availability of Information Identification, Authentication and Authorization Security Principles and Models
2	Physical Security     Facility Requirement     Perimeter Security     Fire Protection     Fire Suppression     Power Protection     General Environmental Protection     Equipment Failure Protection
3	Network Security Secure Network design Firewalls WLAN Security VPNs Types and Sources of Network Threats
4	Operating System Security  Windows Linux/UNIX
5	Database Security  MS SQL
6	<ul> <li>Web Application Security</li> <li>Web Application Vulnerabilities</li> <li>Secure Coding Techniques</li> <li>Continuous Security Testing and Assessments</li> </ul>

7	Compliance Standards
	■ IT Act
	■ ISO 27001
	■ ITIL Framework
Text Book	Shimonski R., Certified Ethical Hacker - Study Guide, Sybex
Reference Book	Lammle T., CCNA - Routing and Switching - Complete Study Guide,

Title of the Course	(11) B - Information Security Threats and Mitigation Strategies
<b>Number of Credits</b>	3 Credits
<b>Pre-Requisites</b>	Information about computer hardware, system and application software,
_	and networking
	Course Outcomes as per Bloom's Taxonomy

Remember	Concepts involved information security domain
Understand	Security vulnerabilities and threats
Apply	Understanding of security threats to mitigate them
Analyze	Real-life scenarios with respect to information security
Evaluate	Scenarios involving information security threats
Create	Awareness about mitigation of information security threats in real-world scenarios
Unit No	Syllabus contents
1	<ul> <li>: Introduction to Information Security Threats</li> <li>TCP/IP Fundamentals</li> <li>Operating System Fundamentals</li> <li>Web Application and Database Fundamentals</li> <li>Introduction to Ethical Hacking</li> <li>Advanced Persistent Threats</li> </ul>
2	<ul> <li>: Information Gathering</li> <li>Footprinting</li> <li>Advanced Google Hacking</li> <li>Nmapping the network</li> <li>Fingerprinting</li> </ul>
3	<ul> <li>Exploitation</li> <li>Hacking Networks</li> <li>Hacking Servers</li> <li>Hacking Databases</li> <li>Password Cracking</li> </ul>
4	Advanced Exploitation  Hacking WLANs Evading IDS, Firewalls Web Application Hacking Advanced Web Hacking Hacking Web Browsers
5	: Social Engineering  Introduction to Social Engineering  Common Types of Attacks  Online Social Engineering
6	: Cryptography Introduction to Cryptography Encryption and Decryption Cryptographic Algorithms Digital Signature Cryptography Tools Cryptography Attacks
7	: Malware Attacks  • Viruses

	■ Worms
	■ Trojans
Text Book	Shimonski R., Certified Ethical Hacker - Study Guide, Sybex
Reference Book	Howard M., Writing Secure Code, Microsoft Press

## **ELECTIVE GROUP (12): DATA MANAGEMENT**

Subject Name	(12)A: Data Management Environment
No. of Credits	3
Pre Requisite	Basic Knowledge of Data in the Business
Course Objective	To practice the application of the concepts related to data management .
3	To make students familiar with data management
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Able to describe the basic concepts, data management.
Understanding	Able to Interpret the data.
Applying	Able to Solve the data requirement on understanding the case.
Analyzing	Analyse the data quality.
Evaluating	Ability to judge functionality of data management
Creating	Design data management model with proper validation
Units	Contents
1.	Introduction To Data Management
	Meaning of data management, need of data management, data management
	process, big data ,data management system components.
2.	Data governance
	Data governance meaning, importance, objectives of data governance, Introduction to
	Data Governance Tools , concept of data asset, types of data assets, concept of data
3.	steward,  Data Warehousing and Business Intelligence Management
3.	Business intelligence, OLAP ,Data mart, Data mining, Data movement (Extract,
	transform, load), Data warehouse
4.	Document, Record and Content Management
	Meaning of Document management, document management system, Record management,
	Meaning of content management ,content management process.
5.	Database Maintenance
	Data maintenance, its need, database administrator (DBA) ,DBA role ,data base administration system, Database management system.
6.	Data Architecture ,Analysis and Design
0.	Data analytics, data architecture, data modeling ,types of data modeling , data
	modeling techniques.
7.	Data Quality Management
	Data cleansing ,data integrity, data enrichment, data quality parameters, data quality
	assurance, Capability maturity management, Data maturity model(DMM), genuine
	capability
Reference Books	1. DAMA-DMBOK: Data Management Body of Knowledge DMBOK (2 <sup>nd</sup> Edition) , Technics Publications LLC
	2. Master Data Management and Data Governance by Alex Berson, Larry Dubov, McGraw-
	Hill Publications

Subject Name	(12)B: Industrial Data Management and Security
No. of Credits	3 credits
Pre Requisite	Basic idea of need of data hiding
<b>Course Objective</b>	To familiarize students to different types of data management and industrial
	data security
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
Remembering	Memorise remind data hiding and data security concepts
Understanding	Understanding need of data management and security
Applying	Identify data security threats and application of security tools
Analyzing	Analysis of data management
Evaluating	Evaluation of threats and application of security measures
Creating	Creation of protective environment for sharing industrial data
Units	Contents
1.	Reference and master data management
	Meaning of Reference data, importance of reference data management, reference
	data management process, reference data evaluation criteria ,data integration,
	master data management
2.	Meta Data Management
	Meaning of Meta-data, Need of Meta data management, Metadata discovery,
	Metadata publishing, Metadata registry
3.	Contact Data Management
	Business continuity planning ,marketing operations, Customer data integration,
	identify management ,identify theft , address(geography),postal code, email
	address, telephone number.
4.	Industrial Automation of Management Processes
	Management processes and its interdependence ,Need of automation of
	management processes in industries, ERP software, CRM software, introduction
<u></u>	to SAP
5.	Industrial Data Security
	Meaning of Data security , need of industrial data security , four key issues in data
	security, Data access, data erasure, data privacy, data security, data security technologies, data security Vs Data privacy.
6.	Industrial Data Security Threats and management
0.	industrial Data Security Threats and management
	Threats in data security, Industrial information security threats, Data Protection
	Practices- operational and technical ,industrial security threats/risks and
	mitigations for industrial network control system.
7.	Advanced data security tools
	Wireshark, Kali linux, John the ripper, metasploit, cain and abel etc
Reference Books	1. Master Data Management and Data Governance by Alex Berson, Larry Dubov , McGraw-
	Hill Publications
	2. Data Mining: Concepts and Techniques, Third Edition, The Morgan Kaufmann Series in
	Data Management Systems 3. Data Management by Richard T Watson, Publisher eGreen Press
	4.Big Data security Shibakali Gupta, Indradip Banerjee and Siddhartha Bhattacharyya,
	Published by De Gruyter
