

1. What is the M.Sc. in Climate Action and Sustainability?

M.Sc. in Climate Action and Sustainability is a 2-year postgraduate program designed to address climate change, sustainability, and environmental challenges through science, policy, and technology-based solutions.

2. What are the key subjects covered in this course?

The course includes climate change science, mitigation and adaptation, ESG reporting, climate finance, energy transition, AI & data analytics, and sustainability policy.

3. What career opportunities are available after M.Sc. Climate Action and Sustainability?

Graduates can work as Sustainability Managers, ESG Analysts, Climate Policy Experts, Carbon Accounting Specialists, Environmental Consultants, and Climate Researchers.

4. Which industries hire climate action and sustainability graduates?

Graduates are hired by corporate sustainability teams, environmental consulting firms, government agencies, NGOs, renewable energy companies, and international climate organizations.

5. Is M.Sc. in Climate Action and Sustainability a good career choice in India?

Yes, with the rise of ESG compliance, net-zero targets, and climate policies, there is a growing demand for skilled professionals in climate action and sustainability across industries.

6. What practical skills will I gain from this course?

You will gain skills in climate modelling, GIS, carbon accounting, ESG reporting, data analytics, environmental impact assessment, and sustainability strategy development.

7. Does the course include internships and real-world projects?

Yes, the program includes internships (including a 16-week professional internship), fieldwork, and applied research projects for hands-on experience.

8. What tools and technologies are taught in this program?

Students learn advanced tools such as GIS, remote sensing, climate modelling software, AI & data analytics, and carbon assessment tools.

9. What certifications are included in the course?

The program offers industry-relevant certifications like ISO 14064 (GHG Accounting) and ISO 14001 Lead Auditor, enhancing employability in sustainability roles.

10. Can I work in corporate sustainability roles after this course?

Yes, the course prepares students for roles in ESG reporting, CSR, sustainability consulting, and corporate climate strategy implementation.

11. What government job opportunities are available after this course?

Graduates can work in environmental ministries, policy think tanks, climate missions, pollution control boards, and sustainability-focused government projects.

12. What are the eligibility criteria for M.Sc. Climate Action and Sustainability?

Candidates must have a bachelor's degree in science, engineering, or related fields (including social sciences and management) with minimum qualifying marks.

13. Can I pursue a PhD after this course?

Yes, graduates can pursue PhD programs in climate science, sustainability, environmental policy, or related interdisciplinary fields.

14. What is the global scope of climate action careers?

Climate and sustainability careers are in high demand globally due to increasing climate risks, international agreements, and the transition to a low-carbon economy.

15. What real-world problems does this course help solve?

The program prepares students to tackle climate change, carbon emissions, energy transitions, biodiversity loss, and sustainable development challenges.

16. Why should I choose M.Sc. Climate Action and Sustainability as a career?

It offers a future-proof career combining science, technology, and policy, with opportunities to work on impactful global issues like climate change and sustainability transformation
